29/58 . Cooling (of machines or engines in general F01P); Heating; Diminishing heat transfer

29/60 . Mounting; Assembling; Disassembling
29/62 . . of radial or helico-centrifugal pumps
29/64 . . of axial pumps
29/66 . Combating cavitation, whirls, noise, vibration, or the like (gas-flow silencers for machines or engines in general F01N); Balancing (surge control F04D 27/02)
29/68 . . by influencing boundary layers
29/70 . Suction grids; Strainers; Dust separation; Cleaning

Other non-positive-displacement pumps

31/00 Pumping liquids and elastic fluids at the same time

33/00 Non-positive-displacement pumps with other than pure rotation, e.g. of oscillating type (F04D 35/00 takes precedence; hand-held fans A45B) **[2]**

35/00 Pumps producing waves in liquids, i.e. wave-producers (for bath tubs A47K 3/10) **[2]**

F04F PUMPING OF FLUID BY DIRECT CONTACT OF ANOTHER FLUID OR BY USING INERTIA OF FLUID TO BE PUMPED (containers or packages with special means for dispensing liquid or semi-liquid contents by internal gaseous pressure B65D 83/14); SIPHONS [2]

(1) Attention is drawn to the Notes preceding class F01.
(2) Combinations of pumps covered by this subclass with other pumps are only classified in this subclass if such other pumps are intended for preliminary pumping for diffusion pumps.

Subclass index

1/00 Pumps using positively or negatively pressurised fluid medium acting directly on the liquid to be pumped (using only negative pressure F04F 3/00; jet pumps F04F 5/00; siphons F04F 10/00)
1/02 . using both positively and negatively pressurised fluid medium, e.g. alternating
1/04 . . generated by vaporising and condensing
1/06 . the fluid medium acting on the surface of the liquid to be pumped (F04F 1/02 takes precedence)
1/08 . . specially adapted for raising liquids from great depths, e.g. in wells
1/10 . . of multiple type, e.g. with two or more units in parallel (F04F 1/08 takes precedence)
1/12 . . . in series
1/14 . . adapted to pump specific liquids, e.g. corrosive or hot liquids
1/16 . . characterised by the fluid medium being suddenly pressurised, e.g. by explosion
1/18 . the fluid medium being mixed with, or generated from, the liquid to be pumped
1/20 . . specially adapted for raising liquids from great depths, e.g. in wells

3/00 Pumps using negative pressure acting directly on the liquid to be pumped (siphons F04F 10/00)

5/00 Jet pumps, i.e. devices in which fluid flow is induced by pressure drop caused by velocity of another fluid flow (diffusion pumps F04F 9/00; combination of jet pumps with pumps of other than jet type F04B; use of jet pumps for priming or boosting non-positive-displacement pumps F04D)
5/02 . the inducing fluid being liquid
5/04 . . displacing elastic fluids
5/06 . . . of rotary type
5/08 . . . the elastic fluid being entrained in a free-falling column of liquid
5/10 . . displacing liquids, e.g. containing solids, or liquids and elastic fluids
5/12 . . . of multi-stage type
5/14 . the inducing fluid being elastic fluid
5/16 . . displacing elastic fluids
5/18 . . . for compressing
5/20 . . . for evacuating
5/22 . . . . of multi-stage type
5/24 . . displacing liquids, e.g. containing solids, or liquids and elastic fluids
5/26 . . . of multi-stage type (F04F 5/28 takes precedence)
5/28 . . . Restarting of inducing action
5/30 . . . . with axially-slidable combining nozzle
5/32 . . . . with hinged flap in combining nozzle
5/34 . . characterised by means for changing inducing-fluid source
5/36 . . characterised by using specific inducing fluid
5/38 . . . the inducing fluid being mercury vapour
5/40 . . . the inducing fluid being oil vapour
5/42 . characterised by the input flow of inducing fluid medium being radial or tangential to output flow (cyclones B04C)
5/44 . Component parts, details, or accessories not provided for in, or of interest apart from, groups F04F 5/02 to F04F 5/42
5/46 . . Arrangements of nozzles
5/48 . . Control
5/50 . . . of compressing pumps
5/52 . . . of evacuating pumps
5/54 . Installations characterised by use of jet pumps, e.g. combinations of two or more jet pumps of different type

7/00 Pumps displacing fluids by using inertia thereof, e.g. by generating vibrations therein

7/02 . Hydraulic rams

9/00 Diffusion pumps

9/02 . of multi-stage type

9/04 . in combination with fore pumps, e.g. use of isolating valves

9/06 . Arrangement of vapour traps

9/08 . Control

10/00 Siphons

10/02 . Gravity-actuated siphons

13/00 Pressure exchangers [2009.01]

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

ENGINEERING IN GENERAL

F15 FLUID-PRESSURE ACTUATORS; HYDRAULICS OR PNEUMATICS IN GENERAL

F15B SYSTEMS ACTING BY MEANS OF FLUIDS IN GENERAL; FLUID-PRESSURE ACTUATORS, E.G. SERVOMOTORS; DETAILS OF FLUID-PRESSURE SYSTEMS, NOT OTHERWISE PROVIDED FOR (motors, turbines, compressors, blowers, pumps F01 to F04; fluid dynamics F15D; fluid clutches or brakes F16D; fluid springs F16F; fluid gearing F16H; pistons, cylinders, packing F16J; valves, taps, cocks, actuating-floats F16K; safety valves with auxiliary fluid operation of the main valve F16K 17/10; fluid-operating means for valves F16K 31/12; pipes, pipe joints F16L; lubricating F16N)

Note

In this subclass, the following terms are used with the meanings indicated:
- "telemotor" means a system or device in which a substantially constant amount of fluid is trapped between an input member and an output member to act as a fluid link;
- "servomotor" means a fluid-pressure actuator, e.g. a piston and cylinder, directly controlled by a valve or other device which is responsive to operation of an initial controlling member; "Servomotor" does not cover a telemotor. The initial controlling member may be adjacent to the servomotor or at a distance, and may be, for example, a hand lever.

Subclass index

1/00 Installations or systems with accumulators; Supply reservoir or sump assemblies

1/02 . Installations or systems with accumulators (devices damping pulsations or vibrations in fluids for use in, or in connection with, pipes or pipe systems F16L 55/04)

1/027 . . having accumulator charging devices (control of fluid pressure in general G05D 16/00) **[6]**

1/033 . . . with electrical control means **[6]**

1/04 . . Accumulators (connection of valves to inflatable elastic bodies B60C 29/00)

1/08 . . . using a gas cushion; Gas charging devices; Indicators or floats therefor **[6]**

1/10 . . . . with flexible separating means **[6]**

1/12 . . . . . attached at their periphery (F15B 1/16 takes precedence) **[6]**

1/14 . . . . . by means of a rigid annular supporting member **[6]**

1/16 . . . . . in the form of a tube **[6]**

1/18 . . . . . Anti-extrusion means **[6]**

1/20 . . . . . fixed to the separating means **[6]**

1/22 . . . . Liquid port constructions **[6]**

1/24 . . . . with rigid separating means, e.g. pistons **[6]**

1/26 . Supply reservoir or sump assemblies **[6]**

3/00 Intensifiers or fluid-pressure converters, e.g. pressure exchangers; Conveying pressure from one fluid system to another, without contact between the fluids

5/00 Transducers converting variations of physical quantities, e.g. expressed by variations in positions of members, into fluid-pressure variations or vice versa; Varying fluid pressure as a function of variations of a plurality of fluid pressures or variations of other quantities (F15B 9/00 takes precedence; for measuring or controlling G01, G05)

Fluid-pressure actuator systems

(1) Groups F15B 7/00 to F15B 21/00 cover systems in which members are moved into one or more definite positions by means of fluid pressure.

(2) Pump, motor, and control features so far as not peculiar to this purpose are classified in the relevant classes.

7/00 Fluid-pressure actuator systems in which the movement produced is definitely related to the output of a volumetric pump; Telemotors

7/02 . Systems with continuously-operating input and output apparatus

7/04 . in which the ratio between pump stroke and motor stroke varies with the resistance against the motor (in brake-actuating systems for motor vehicles B60T)

7/06 . Details (F15B 15/00 takes precedence)

7/08 . . Input units; Master units

7/10 . . Compensation of the liquid content in a system (F15B 7/08 takes precedence; pressure-maintaining arrangements for brake master cylinders B60T 11/228) **[5]**

9/00 Servomotors with follow-up action, i.e. in which the position of the actuated member conforms with that of the controlling member

9/02 . with servomotors of the reciprocatable or oscillatable type
9/03 . . with electrical control means
9/04 . . controlled by varying the output of a pump with variable capacity
9/06 . . controlled by means using a fluid jet
9/07 . . . with electrical control means
9/08 . . controlled by valves affecting the fluid feed or the fluid outlet of the servomotor (F15B 9/06 takes precedence)
9/09 . . . with electrical control means
9/10 . . . in which the controlling element and the servomotor each controls a separate member, these members influencing different fluid passages or the same passage
9/12 . . . in which both the controlling element and the servomotor control the same member influencing a fluid passage and are connected to that member by means of a differential gearing
9/14 . with rotary servomotors
9/16 . Systems essentially having two or more interacting servomotors
9/17 . . with electrical control means

11/00 Servomotor systems without provision for follow-up action (F15B 3/00 takes precedence)

11/02 . Systems essentially incorporating special features for controlling the speed or the actuating force or speed of an output member
11/024 . . by means of differential connection of the servomotor lines, e.g. regenerative circuits **[6]**
11/028 . . for controlling the actuating force (F15B 11/024 takes precedence) **[6]**
11/032 . . . by means of fluid-pressure converters (fluid-pressure converters per se F15B 3/00) **[6]**
11/036 . . . by means of servomotors having a plurality of working chambers (servomotors per se F15B 15/00) **[6]**
11/04 . . for controlling the speed (F15B 11/024 takes precedence) **[6]**
11/042 . . . by regulating means in feed line (F15B 11/046, F15B 11/05 take precedence) **[6]**
11/044 . . . by regulating means in return line (F15B 11/046, F15B 11/05 take precedence) **[6]**
11/046 . . . depending on the position of the working member **[6]**
11/048 . . . . with deceleration control **[6]**
11/05 . . . specially adapted to maintain constant speed, e.g. pressure-compensated, load-responsive
11/06 . involving features specific to the use of a compressible medium, e.g. air, steam
11/064 . . with devices for saving the compressible medium **[6]**
11/068 . . with valves for gradually putting pneumatic systems under pressure **[6]**
11/072 . . Combined pneumatic-hydraulic systems **[6]**
11/076 . . . with pneumatic drive or displacement and speed control or stopping by hydraulic braking **[6]**
11/08 . with only one servomotor
11/10 . . in which the servomotor position is a function of the pressure
11/12 . . providing distinct intermediate positions; with step-by-step action
11/13 . . . using chambers of predetermined volume **[6]**
11/15 . . with special provision for automatic return
11/16 . with two or more servomotors
11/17 . . using two or more pumps **[6]**
11/18 . . used in combination for obtaining stepwise operation of a single controlled member
11/20 . . controlling several interacting or sequentially-operating members (fluid distribution or supply devices for the control of two or more servomotors F15B 13/06)
11/22 . . Synchronisation of the movement of two or more servomotors

13/00 Details of servomotor systems (F15B 15/00 takes precedence)

13/01 . Locking-valves or other detent devices (associated with the actuator F15B 15/26)
13/02 . Fluid distribution or supply devices characterised by their adaptation to the control of servomotors (multiple-way valves F16K 11/00)
13/04 . . for use with a single servomotor
13/042 . . . operated by fluid pressure
13/043 . . . . with electrically-controlled pilot valves
13/044 . . . operated by electrically-controlled means, e.g. solenoids, torque-motors
13/06 . . for use with two or more servomotors
13/07 . . . in distinct sequence
13/08 . . . Assemblies of units, each for the control of a single servomotor only
13/10 . Special arrangements for operating the actuated device without using fluid pressure, e.g. for emergency use
13/12 . Special measures for increasing the sensitivity of the system
13/14 . Special measures for giving the operator by sense of touch the immediate response of the actuated device
13/16 . Special measures for feedback

15/00 Fluid-actuated devices for displacing a member from one position to another (motors for continuous movement F01 to F03); **Gearing associated therewith**

15/02 . Mechanical layout characterised by the means for converting the movement of the fluid-actuated element into movement of the finally-operated member
15/04 . . with oscillating cylinder
15/06 . . for mechanically converting rectilinear movement into non-rectilinear movement
15/08 . characterised by the construction of the motor unit (pistons, cylinders, packing F16J)
15/10 . . the motor being of diaphragm type (connection of valves to inflatable elastic bodies B60C 29/00; diaphragms, bellows F16J 3/00)
15/12 . . of the oscillating-vane or curved-cylinder type
15/14 . . of the straight-cylinder type
15/16 . . . of the telescopic type
15/17 . . . of differential-piston type
15/18 . Combined units comprising both motor and pump
15/19 . Pyrotechnical actuators **[3]**
15/20 . Other details
15/22 . . for accelerating or decelerating the stroke
15/24 . . for restricting the stroke
15/26 . . Locking mechanisms
15/28 . . Means for indicating the position, e.g. end of stroke **[4]**

17/00 **Combinations of telemotor and servomotor systems**

17/02 . in which a telemotor operates the control member of a servomotor

18/00 **Parallel arrangements of independent servomotor systems**

19/00 **Testing fluid-pressure actuator systems or apparatus, so far as not provided for elsewhere**

20/00 **Safety arrangements for fluid actuator systems**; **Applications of safety devices in fluid actuator systems**; **Emergency measures for fluid actuator systems**

21/00 **Common features of fluid actuator systems**; **Fluid-pressure actuator systems or details thereof, not covered by any other group of this subclass**

21/02 . Servomotor systems with programme control derived from a store or timing device; Control devices therefor

21/04 . Special measures taken in connection with the properties of the fluid, e.g. for venting, compensating for changes of viscosity, cooling, filtering, preventing churning

21/06 . Use of special fluids, e.g. liquid metal; Special adaptations of fluid-pressure systems, or control of elements therefor, to the use of such fluids

21/08 . Servomotor systems incorporating electrically-operated control means (F15B 21/02 takes precedence)

21/10 . Delay devices or arrangements (associated with fluid motors or actuators F15B 15/22)

21/12 . Fluid oscillators or pulse generators (fluid oscillators predominantly used for computing or control purposes F15C 1/22, F15C 3/16)

21/14 . Energy-recuperation means (for vehicles B60T 1/10) **[6]**

F15C **FLUID-CIRCUIT ELEMENTS PREDOMINANTLY USED FOR COMPUTING OR CONTROL PURPOSES** (transducers F15B 5/00; fluid dynamics in general F15D; computers comprising fluid elements G06D, G06G)

Note

Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems". **[7]**

1/00 **Circuit elements having no moving parts**

1/02 . Details

1/04 . . Means for controlling fluid streams to fluid devices, e.g. by electric signals

1/06 . . Constructional details; Selection of specified materials

Note

Group F15C 1/22 takes precedence over groups F15C 1/08 to F15C 1/20. **[2]**

1/08 . Boundary-layer devices, e.g. wall-attachment amplifiers **[2]**

1/10 . . for digital operation, e.g. to form a logical flip-flop, OR-gate, NOR-gate

1/12 . . . Multiple arrangements thereof for performing operations of the same kind, e.g. majority gates, identity gates

1/14 . Stream-interaction devices; Momentum-exchange devices, e.g. operating by exchange between two orthogonal fluid jets

1/16 . Vortex devices, i.e. devices in which use is made of the pressure drop associated with vortex motion in a fluid

1/18 . Turbulence devices, i.e. devices in which a controlling stream will cause a laminar flow to become turbulent

1/20 . Direct-impact devices, i.e. devices in which two collinear opposing power streams are impacted

1/22 . Oscillators **[2]**

3/00 **Circuit elements having moving parts** (valves, construction of valves F16K)

Note

Group F15C 3/16 takes precedence over groups F15C 3/02 to F15C 3/10. **[2]**

3/02 . using spool valves

3/04 . using diaphragms (connection of valves to inflatable elastic bodies B60C 29/00)

3/06 . using balls

3/08 . using reeds

3/10 . using nozzles or jet pipes

3/12 . . the nozzle or jet pipe being movable

3/14 . . the jet from the nozzle being intercepted by a flap

3/16 . Oscillators **[2]**

4/00 **Circuit elements characterised by their special functions**

5/00 **Manufacture of fluid-circuit elements**; **Manufacture of assemblages of such elements**

7/00 **Hybrid elements, i.e. circuit elements having features according to groups F15C 1/00 and F15C 3/00 [2]**

F15D FLUID DYNAMICS, I.E. METHODS OR MEANS FOR INFLUENCING THE FLOW OF GASES OR LIQUIDS (fluid-circuit elements F15C)

Note

This subclass covers boundary-layer control and other arrangements and methods, not provided for in other classes, for influencing the flow of fluids relative to constraining surfaces and after leaving these surfaces, e.g. producing or removing turbulence, deflecting jets, guiding flow through bends in conduits, affecting distribution of fluid in a conduit, reducing fluid friction.

1/00 Influencing the flow of fluids

1/02 . in pipes or conduits

1/04 . . Arrangements of guide vanes in pipe elbows or duct bends; Construction of pipe conduit elements or elbows with respect to flow, specially for reducing losses of flow

1/06 . . by influencing the boundary layer

1/08 . of jets leaving an orifice (nozzles or outlets with means for mechanically breaking-up or deflecting the jet B05B, e.g. B05B 1/26)

1/10 . around bodies of solid material

1/12 . . by influencing the boundary layer

1/14 . Diverting flow into alternative channels (in hydraulic engineering E02B)

F16 ENGINEERING ELEMENTS OR UNITS; GENERAL MEASURES FOR PRODUCING AND MAINTAINING EFFECTIVE FUNCTIONING OF MACHINES OR INSTALLATIONS; THERMAL INSULATION IN GENERAL

F16B DEVICES FOR FASTENING OR SECURING CONSTRUCTIONAL ELEMENTS OR MACHINE PARTS TOGETHER, E.G. NAILS, BOLTS, CIRCLIPS, CLAMPS, CLIPS OR WEDGES; JOINTS OR JOINTING (couplings for transmitting rotation F16D)

Note

Attention is drawn to:
(a) the Note following group E04B 1/38; **[5]**
(b) the following places:

A44B		Buckles, slide fasteners
A47G	3/00	Ornamental heads for nails, screws, or the like
B42F	3/00	Means, not using staples, for attaching sheets temporarily together
E01B	9/10	Screws or bolts for railway sleepers
E01B	11/00	Rail joints
E04		Connections for building
E04D	13/08	Clamping means for down pipes for roof drainage
E04F	13/21	Fastening means specially adapted for covering or lining elements for buildings
E04G	5/04	Fastening scaffolds against buildings
E04G	7/00	Scaffolding couplings
E05C		Bolts or fasteners for wings, specially for doors or windows
F16C	29/10	Locking bearings for parts moving only linearly
F16G	17/00	Hooks as integral parts of chains
F16L		Pipe joints
F16L	3/00	Supports for pipes, cables or protective tubing, e.g. hangers, holders, clamps, cleats, clips, brackets
F16L	33/02	Clips for connecting hoses to rigid members
H01F	7/00	Magnetic holding devices
H02N	13/00	Electrostatic holding devices.

Subclass index

1/00 Devices for securing together, or preventing relative movement between, constructional elements or machine parts

Note

Groups F16B 2/00 to F16B 47/00 take precedence over group F16B 1/00. **[2]**

1/02 . Means for securing elements of mechanisms after operation (means for bringing members to rest F16D)

1/04 . . disengaged by movement of the actuating member of the element (locking of actuators G05G, e.g. G05G 5/00)

Fastenings for constructional elements or machine parts in general

2/00 **Friction-grip releasable fastenings** (for cables or ropes, e.g. cleats, F16G 11/00; supports for pipes, cables or protective tubing F16L 3/00)

2/02 . Clamps, i.e. with gripping action effected by positive means other than the inherent resistance to deformation of the material of the fastening

2/04 . . internal, i.e. with spreading action (F16B 2/14 to F16B 2/18 take precedence)

2/06 . . external, i.e. with contracting action (F16B 2/14 to F16B 2/18 take precedence)

2/08 . . . using bands (clips for connecting hoses to rigid members F16L 33/02)

2/10 . . . using pivoting jaws

2/12 . . . using sliding jaws

2/14 . . using wedges

2/16 . . using rollers or balls

2/18 . . using cams, levers, eccentrics, or toggles

2/20 . Clips, i.e. with gripping action effected solely by the inherent resistance to deformation of the material of the fastening

2/22 . . of resilient material, e.g. rubbery material

2/24 . . . of metal

2/26 . . of pliable non-resilient material, e.g. plant tie

3/00 **Key-type connections**; **Keys** (F16B 2/00 takes precedence; for rods or tubes mutually F16B 7/00)

3/04 . using keys formed of wire or other flexible material, to be inserted through an opening giving access to grooves in the adjacent surfaces of the parts to be connected

3/06 . using taper sleeves

4/00 **Shrinkage connection, e.g. assembled with the parts at different temperature**; **Force fits** (restricted to metal parts or objects B23P 11/02); **Non-releasable friction-grip fastenings** (F16B 2/00 takes precedence)

5/00 **Joining sheets or plates to one another or to strips or bars parallel to them** (by sticking together F16B 11/00; dowel connections F16B 13/00; pins, including deformable elements F16B 19/00; covering of walls E04F 13/00; fastening signs, plates, panels, or boards to a supporting structure, fastening readily-detachable elements, e.g. letters, to signs, plates, panels, or boards, G09F 7/00)

5/01 . by means of fastening elements specially adapted for honeycomb panels

5/02 . by means of fastening members using screw-thread (construction of screw-threaded connections F16B 25/00 to F16B 39/00)

5/04 . by means of riveting (rivets F16B 19/04)

5/06 . by means of clamps or clips (friction-grip releasable fastenings in general F16B 2/00)

5/07 . by means of multiple interengaging protrusions on the surfaces, e.g. hooks, coils

5/08 . by means of welds or the like (welding B23K)

5/10 . by means of bayonet connections (fastening devices locking by rotation F16B 21/02)

5/12 . Fastening strips or bars to sheets or plates, e.g. rubber strips, decorative strips for motor vehicles, by means of clips (friction-grip releasable fastenings in general F16B 2/00; fastening rods or tubular parts to flat surfaces at an angle F16B 9/00; clips for connecting hoses to rigid members F16L 33/02)

7/00 **Connections of rods or tubes, e.g. of non-circular section, mutually, including resilient connections** (umbrella frames A45B 25/02; welding or soldering of connections B23K; vehicle connections in general B60D; railway couplings B61G; bicycle frames B62K; couplings for transmitting rotation F16D; couplings for tubes conveying fluid F16L)

7/02 . with conical parts

7/04 . Clamping or clipping connections (friction-grip releasable fastenings in general F16B 2/00)

7/06 . Turnbuckles (for cables, ropes, or wire F16G 11/12)

7/08 . Pipe saddles (friction-grip releasable fastenings in general F16B 2/00)

7/10 . Telescoping systems (for scaffolding E04G 25/04; telescope props for mining E21D 15/14 to E21D 15/46; stands or trestles as supports for apparatus or articles placed thereon F16M 11/00)

7/12 . . locking only in extreme extended position

7/14 . . locking in intermediate positions

7/16 . . . locking only against movement in one direction

7/18 . using screw-thread elements

7/20 . using bayonet connections

7/22 . using hooks or like elements

9/00 **Connections of rods or tubular parts to flat surfaces at an angle** (friction-grip releasable fastenings in general F16B 2/00; making press-fit connections B23P 11/00, B23P 19/00; fluid-tight connecting of pipes to reservoirs, sheets, or the like F16L, e.g. joining pipes to walls F16L 41/00; supports for pipes, cables or protective tubing F16L 3/00)

9/02 . Detachable connections

11/00 **Connecting constructional elements or machine parts by sticking or pressing them together, e.g. cold pressure welding** (non-electric welding in general B23K; methods of using adhesives independently of the form of the surfaces joined C09J 5/00)

12/00 **Jointing of furniture or the like, e.g. hidden from exterior** (F16B 2/00 to F16B 11/00 take precedence; fastening means per se F16B 13/00 to F16B 47/00; wood-working B27)

12/02 . Joints between panels and corner posts

12/04 . Non-loosenable joints for non-metal furniture parts, e.g. glued

12/06 . Non-loosenable joints for metal furniture parts

12/08 . . without use of separate connecting elements

12/10 . using pegs, bolts, tenons, clamps, clips, or the like (glued F16B 12/04; fastening means per se F16B 15/00 to F16B 47/00)

12/12 . . for non-metal furniture parts, e.g. made of wood, of plastics

12/14 . . . using threaded bolts or screws

12/16 . . . . using self-tapping screws

12/18 . . . . using drawing bars

12/20 . . . using clamps, clips, wedges, sliding bolts, or the like

12/22 . . . using keyhole-shaped slots and pins

12/24 . . . using separate pins, dowels, or the like

12/26 . . . using snap-action elements

12/28 . . for metal furniture parts

12/30 . . . using threaded bolts

12/32 . . . using clamps, clips, wedges, sliding bolts, or the like

12/34 . . . using keyhole-shaped slots and pins

12/36 . . . using separate pins, dowels, or the like

12/38 . . . using snap-action elements
12/40 . Joints for furniture tubing
12/42 . . connecting furniture tubing to non-tubular parts
12/44 . Leg joints; Corner joints
12/46 . . Non-metal corner connections
12/48 . . Non-metal leg connections (F16B 12/46 takes precedence)
12/50 . . Metal corner connections
12/52 . . Metal leg connections (F16B 12/50 takes precedence)
12/54 . Fittings for bedsteads or the like
12/56 . . Brackets for bedsteads; Coupling joints consisting of bolts or the like; Latches therefor
12/58 . . Tapered connectors for bed rails
12/60 . . Fittings for detachable side panels

13/00 Dowels or other devices fastened in walls or the like by inserting them in holes made therein for that purpose (nails F16B 15/00; self-locking pins or bolts in general, stud-and-socket releasable fastenings F16B 21/00; dowels or bolts for railroad sleepers E01B 9/00; means for anchoring structural elements or bulkheads specially adapted to foundation engineering E02D 5/74; bolts or dowels used while laying bricks or casting concrete E04B 1/38; setting anchoring bolts in shafts, tunnels or galleries E21D 20/00; anchoring bolts for shafts, tunnels or galleries E21D 21/00) **[5]**

13/02 . in one piece with protrusions or ridges on the shaft
13/04 . with parts gripping in the hole or behind the reverse side of the wall after inserting from the front (friction-grip releasable fastenings in general F16B 2/00)
13/06 . . combined with expanding sleeve
13/08 . . with separate gripping parts moved into their final position in relation to the body of the device without further manual operation
13/10 . . with separate gripping parts moved into their final position in relation to the body of the device by a separate operation (F16B 13/06 takes precedence)
13/12 . Separate metal dowel sleeves fastened by inserting the screw, nail, or the like
13/13 . . self-cutting **[2]**
13/14 . Non-metallic plugs or sleeves; Use of liquid, loose solid or kneadable material therefor **[5]**

Fastening means without screw-thread

15/00 Nails; **Staples** (surgical staples A61B 17/064; manufacture of nails or staples B21G; railway spikes E01B 9/06)

15/02 . with specially shaped heads, e.g. with enlarged surfaces (ornaments for furniture A47B 95/04; removable ornamental heads for nails A47G 3/00)
15/04 . with spreading shaft
15/06 . with barbs, e.g. for metal parts; Drive screws
15/08 . formed in integral series but easily separable

17/00 Fastening means without screw-thread for connecting constructional elements or machine parts by a part of or on one member entering a hole in the other (construction of bolts, pins, or rivets F16B 19/00; riveting F16B 19/04; means for preventing withdrawal of a pin, spigot, or the like from its operative position, stud-and-socket releasable fastenings F16B 21/00)

19/00 Bolts without screw-thread; **Pins, including deformable elements** (in screwed connections F16B 29/00); **Rivets** (means for preventing withdrawal F16B 21/00)

19/02 . Bolts or sleeves for positioning of machine parts, e.g. notched taper pins, fitting pins, sleeves, eccentric positioning rings
19/04 . Rivets; Spigots or the like fastened by riveting (lead seals G09F 3/00)
19/05 . . Bolts fastening by swaged-on collars (F16B 19/08 takes precedence)
19/06 . . Solid rivets made in one piece
19/08 . . Hollow rivets; Multi-part rivets
19/10 . . . fastened by expanding mechanically
19/12 . . . fastened by fluid pressure, including by explosion (bolts shot by means of detonation-operated nailing tools into concrete constructions, metal walls, or the like F16B 19/14)
19/14 . Bolts or the like for shooting into concrete constructions, metal walls, or the like by means of detonation-operated nailing tools (tools therefor B25C, B27F)

21/00 Means without screw-thread for preventing relative axial movement of a pin, spigot, shaft, or the like and a member surrounding it (riveted or deformable spigots F16B 19/04; for gudgeon pins F16J 1/18); **Stud-and-socket releasable fastenings without screw-thread**

21/02 . Releasable fastening devices locking by rotation (with snap action F16B 21/06; studs or coupling-pins with resilient protrusions F16B 21/08)
21/04 . . with bayonet catch
21/06 . Releasable fastening devices with snap action
21/07 . . in which the socket has a resilient part
21/08 . . in which the stud, pin, or spigot has a resilient part (wall-dowels F16B 13/00)
21/09 . Releasable fastening devices with a stud engaging a keyhole slot
21/10 . by separate parts (key-type connection F16B 3/00; locking screws or nuts against rotation by such means F16B 39/04)
21/12 . . with locking-pins or split-pins thrust into holes
21/14 . . . Details of locking-pins or split-pins
21/16 . . with grooves or notches in the pin or shaft
21/18 . . . with circlips or like resilient retaining devices; Details (spring-washers for locking nuts F16B 39/24; adjusting-rings F16B 43/00)
21/20 . . for bolts or shafts without holes, grooves, or notches for locking members

Fastening means using screw-thread

23/00 Specially-shaped heads of bolts or screws for rotations by a tool

25/00 Screws that form threads in the body into which they are screwed, e.g. wood screws, self-tapping screws [4]

25/02 . by a cutting and material removing action, e.g. fluted self-tapping screws **[4]**
25/04 . by a slicing and material displacing action, e.g. wood screws with sharp thread crests **[4]**
25/06 . by swaging, i.e. material deforming action **[4]**
25/08 . by a combination of any two or all of the actions provided for in groups F16B 25/02 to F16B 25/06 **[4]**
25/10 . Screws performing an additional function to thread-forming, e.g. drill screws **[4]**

27/00 **Bolts, screws, or nuts formed in integral series but easily separable, particularly for use in automatic machines**

29/00 **Screwed connection with deformation of nut or auxiliary member while fastening** (wall-dowels F16B 13/00; members deformed for locking screws, bolts or nuts F16B 39/22)

31/00 **Screwed connections specially modified in view of tensile load**; **Break-bolts** (shape of thread F16B 33/04)

31/02 . for indicating or limiting tensile load

31/04 . for maintaining constant tensile load

31/06 . having regard to possibility of fatigue rupture

33/00 **Features common to bolt and nut** (wall-dowels F16B 13/00)

33/02 . Shape of thread; Special thread-forms (used as screw-locking device F16B 39/30)

33/04 . . in view of tensile load

33/06 . Surface treatment of parts furnished with screw-thread, e.g. for preventing seizure

35/00 **Screw-bolts**; **Stay bolts**; **Screw-threaded studs**; **Screws**; **Set screws** (wall-dowels F16B 13/00; thread-cutting screws F16B 25/00)

35/02 . divided longitudinally

35/04 . with specially-shaped head or shaft in order to fix the bolt on or in an object (locking the bolt against turning in the object by the use of accessory parts F16B 39/00)

35/06 . . Specially-shaped heads (special shape in order to rotate the bolt F16B 23/00)

37/00 **Nuts or like thread-engaging members** (wall-dowels F16B 13/00)

37/02 . made of thin sheet material (fastening to surfaces F16B 37/04)

37/04 . Devices for fastening nuts to surfaces, e.g. sheets, plates

37/06 . . by means of welding or riveting

37/08 . Quickly-detachable nuts, e.g. consisting of two or more parts; Nuts movable along the bolt after tilting the nut

37/10 . . divided parallel or about parallel to the bolt axis

37/12 . with thread-engaging surfaces formed by inserted coil-springs, discs, or the like; Independent pieces of wound wire used as nuts; Threaded inserts for holes

37/14 . Cap nuts; Nut caps or bolt caps

37/16 . Wing nuts (F16B 37/14 takes precedence)

39/00 **Locking of screws, bolts, or nuts** (wall-dowels F16B 13/00; locking of bottle closures B65D; locking of rail-fastening bolts for permanent ways E01B 9/12; locking of fastening means for railway fishplates E01B 11/38; locking devices for valves or cocks F16K)

Note

In this group, heads of screws or bolts are put on a par with nuts as far as pertains to locking; an object into which a screw is threaded is put on a par with a nut.

39/01 . specially adapted to prevent loosening at extreme temperatures

39/02 . in which the locking takes place after screwing down (F16B 39/01 takes precedence; split-pins, circlips, or the like for preventing relative axial movement only F16B 21/10; fastening nuts by welding or riveting F16B 37/06)

39/04 . . with a member penetrating the screw-threaded surface of at least one part, e.g. a pin, wedge, cotter-pin, screw

39/06 . . . with a pin or staple parallel to the bolt axis

39/08 . . with a cap interacting with the nut, connected to the bolt by a pin or cotter-pin

39/10 . . by a plate or ring immovable with regard to the bolt or object (F16B 39/08 takes precedence)

39/12 . . by means of locknuts

39/14 . . . made of thin sheet material or formed as spring washers (locknuts per se made of thin sheet material F16B 37/02)

39/16 . . . in which the screw-thread of the locknut differs from that of the nut

39/18 . . . . in which the locknut grips with screw-thread in the nuts as well as on the bolt

39/20 . . by means of steel wire or the like (F16B 39/10 takes precedence)

39/22 . in which the locking takes place during screwing down or tightening (F16B 39/01 takes precedence)

39/24 . . by means of washers, spring washers, or resilient plates that lock against the object (locking to the screw-thread F16B 39/14, F16B 39/36)

39/26 . . . with spring washers fastened to the nut or bolt-head

39/28 . . by special members on, or shape of, the nut or bolt (F16B 39/26 takes precedence; locknuts F16B 39/12)

39/282 . . . Locking by means of special shape of work-engaging surfaces, e.g. notched or toothed nuts

39/284 . . . Locking by means of elastic deformation (F16B 39/38 takes precedence)

39/286 . . . . caused by saw cuts

39/30 . . . Locking exclusively by special shape of the screw-thread

39/32 . . . Locking by means of a pawl or pawl-like tongue

39/34 . . . Locking by deformable inserts or like parts

39/36 . . . with conical locking parts, which may be split, including use of separate rings co-operating therewith

39/38 . . . with a second part of the screw-thread which may be resiliently mounted (F16B 39/30 takes precedence)

41/00 **Measures against loss of bolts, nuts, or pins**; **Measures against unauthorised operation of bolts, nuts, or pins** (seals G09F 3/00)

43/00 **Washers or equivalent devices**; **Other devices for supporting bolt-heads or nuts** (circlips F16B 21/18; with special means for locking bolts or nuts F16B 39/10, F16B 39/24)

43/02 . with special provisions for engaging surfaces which are not perpendicular to a bolt axis or do not surround the bolt

45/00 **Hooks**; **Eyes** (if the attaching parts or means are concerned, groups F16B 13/00, F16B 15/00, F16B 19/00, F16B 25/00, F16B 35/00, F16B 47/00 take precedence; for hanging pictures or the like A47G 1/16; towing hooks for ships B63B 21/58; for hoisting or hauling purposes B66C; hooks or eyes with integral parts designed to facilitate quick attachment to cables or ropes at any point F16G 11/14)

45/02 . Hooks with pivoting closing member

45/04 . Hooks with sliding closing member
45/06 . Hooks with two symmetrically-pivoting hook parts

47/00 Suction cups for attaching purposes; Equivalent means using adhesives

---

F16C SHAFTS; FLEXIBLE SHAFTS; MECHANICAL MEANS FOR TRANSMITTING MOVEMENT IN A FLEXIBLE SHEATHING; ELEMENTS OF CRANKSHAFT MECHANISMS; PIVOTS; PIVOTAL CONNECTIONS; ROTARY ENGINEERING ELEMENTS OTHER THAN GEARING, COUPLING, CLUTCH OR BRAKE ELEMENTS; BEARINGS [5]

Note

In this subclass, the following expression is used with the meaning indicated:
– "rotary engineering elements other than gearing, coupling, clutch or brake elements" covers any engineering element other than gearing, coupling, clutch or brake elements which rotates in so far as its features are affected only by the fact that it rotates.

Subclass index

1/00 Flexible shafts (flexible shafts in dental machines for boring or cutting A61C 1/18); **Mechanical means for transmitting movement in a flexible sheathing**
1/02 . for conveying rotary movements
1/04 . . Articulated shafts
1/06 . . with guiding-sheathing, tube, or box (F16C 1/04 takes precedence; guiding-sheathings F16C 1/26)
1/08 . . End connections
1/10 . Means for transmitting linear movement in a flexible sheathing, e.g. "Bowden mechanisms" (guiding-sheathings F16C 1/26)
1/12 . . Arrangements for transmitting movement to or from the flexible member
1/14 . . . Construction of the end-piece of the flexible member; Attachment thereof to the flexible member
1/16 . . . in which the end-piece is guided rectilinearly
1/18 . . . in which the end portion of the flexible member is laid along a curved surface of a pivoted member
1/20 . . Construction of flexible members moved to and fro in the sheathing
1/22 . . Adjusting; Compensating length
1/24 . Lubrication; Lubricating equipment
1/26 . Construction of guiding-sheathings or guiding-tubes
1/28 . . with built-in bearings

3/00 Shafts (flexible shafts F16C 1/00; marine propeller shafts, paddle wheel shafts B63H 23/34); **Axles**; **Cranks**; **Eccentrics**
3/02 . Shafts; Axles
3/03 . . telescopic
3/035 . . . with built-in bearings
3/04 . Crankshafts, eccentric-shafts; Cranks, eccentrics
3/06 . . Crankshafts
3/08 . . . made in one piece (features relating to lubrication F16C 3/14, to cooling F16C 3/16)
3/10 . . . assembled of several parts, e.g. by welding
3/12 . . . . releasably connected
3/14 . . . Features relating to lubrication
3/16 . . . Features relating to cooling
3/18 . . Eccentric-shafts
3/20 . . Shape of crankshafts or eccentric-shafts having regard to balancing
3/22 . . Cranks; Eccentrics (constructional features of crank-pins F16C 11/02)
3/24 . . . with return cranks, i.e. a second crank carried by the crank-pin
3/26 . . . Elastic crank-webs; Resiliently-mounted crank-pins
3/28 . . . Adjustable cranks or eccentrics
3/30 . . . with arrangements for overcoming dead-centres

5/00 Crossheads; **Constructions of connecting-rod heads or piston-rod connections rigid with crossheads** (piston-rods, i.e. rods rigidly connected to the piston, F16J 7/00)

7/00 Connecting-rods or like links pivoted at both ends (coupling-rods for locomotive driving-wheels B61C 17/10); **Construction of connecting-rod heads** (heads rigid with crossheads F16C 5/00)
7/02 . Constructions of connecting-rods of constant length
7/04 . with elastic intermediate part or fluid cushion
7/06 . Adjustable connecting-rods
7/08 . made from sheet metal

9/00 **Bearings for crankshafts or connecting-rods**; **Attachment of connecting-rods** (lubrication of connecting-rods in connection with crankshafts F16C 3/14; connections to crossheads F16C 5/00, to pistons F16J 1/14)

9/02 . Crankshaft bearings

9/03 . . Arrangements for adjusting play

9/04 . Connecting-rod bearings; Attachment thereof

9/06 . . Arrangements for adjusting play in bearings, operating either automatically or not

11/00 **Pivots**; **Pivotal connections** (arrangements of steering linkage connections B62D 7/16)

11/02 . Trunnions; Crank-pins (fastening crank-pins to webs, crank-pins integral with cranks F16C 3/06, F16C 3/22)

11/04 . Pivotal connections (hinges for doors, windows or wings E05D)

11/06 . . Ball-joints; Other joints having more than one degree of angular freedom, i.e. universal joints (universal joints in which flexibility is produced by means of pivots or sliding or rolling connecting parts F16D 3/16)

11/08 . . . with resilient bearings

11/10 . . Arrangements for locking

11/12 . . incorporating flexible connections, e.g. leaf springs

13/00 **Rolls, drums, discs, or the like** (guide rollers in feeding webs B65H 27/00; calender rolls, bearings therefor D21G 1/02; rotary drums or rollers for heat-exchange or heat-transfer apparatus F28F 5/02; special adaptations, see the relevant classes); **Bearings or mountings therefor**

13/02 . Bearings

13/04 . . Bearings with only partial enclosure of the member to be borne; Bearings with local support at two or more points

13/06 . . self-adjusting

15/00 **Construction of rotary bodies to resist centrifugal force** (flywheels, correction weights F16F 15/30, F16F 15/32)

Bearings for rotary parts (F16C 9/00, F16C 13/02 take precedence; allowing for linear movement also F16C 31/00)

17/00 **Sliding-contact bearings for exclusively rotary movement** (F16C 32/06 takes precedence; adjustable bearings F16C 23/00, F16C 25/00) **[2]**

17/02 . for radial load only

17/03 . . with tiltably-supported segments, e.g. Michell bearings

17/04 . for axial load only

17/06 . . with tiltably-supported segments, e.g. Michell bearings

17/08 . . for supporting the end face of a shaft or other member, e.g. footstep bearings

17/10 . for both radial and axial load

17/12 . characterised by features not related to the direction of the load

17/14 . . specially adapted for operating in water

17/18 . . with floating brasses or bushes, rotatable at a reduced speed

17/20 . . with emergency supports or bearings

17/22 . . with arrangements compensating for thermal expansion

17/24 . . with devices affected by abnormal or undesired conditions, e.g. for preventing overheating, for safety

17/26 . Systems consisting of a plurality of sliding-contact bearings

19/00 **Bearings with rolling contact, for exclusively rotary movement** (adjustable bearings F16C 23/00, F16C 25/00)

19/02 . with bearing balls essentially of the same size in one or more circular rows

19/04 . . for radial load mainly

19/06 . . . with a single row of balls

19/08 . . . with two or more rows of balls

19/10 . . for axial load mainly

19/12 . . . for supporting the end face of a shaft or other member, e.g. footstep bearings

19/14 . . for both radial and axial load

19/16 . . . with a single row of balls

19/18 . . . with two or more rows of balls

19/20 . . with loose spacing bodies, e.g. balls, between the bearing balls

19/22 . with bearing rollers essentially of the same size in one or more circular rows, e.g. needle bearings

19/24 . . for radial load mainly

19/26 . . . with a single row of rollers

19/28 . . . with two or more rows of rollers

19/30 . . for axial load mainly

19/32 . . . for supporting the end face of a shaft or other member, e.g. footstep bearings

19/34 . . for both radial and axial load

19/36 . . . with a single row of rollers

19/38 . . . with two or more rows of rollers

19/40 . . with loose spacing bodies between the rollers

19/44 . . Needle bearings

19/46 . . . with one row of needles

19/48 . . . with two or more rows of needles

19/49 . Bearings with both balls and rollers

19/50 . Other types of ball or roller bearings

19/52 . with devices affected by abnormal or undesired conditions

19/54 . Systems consisting of a plurality of bearings with rolling friction (spindle bearings F16C 35/08)

19/55 . . with intermediate floating rings rotating at reduced speed

19/56 . . in which the rolling bodies of one bearing differ in diameter from those of another

21/00 **Combinations of sliding-contact bearings with ball or roller bearings, for exclusively rotary movement** (F16C 17/24, F16C 19/52take precedence) **[2]**

23/00 **Bearings for exclusively rotary movement adjustable for aligning or positioning** (F16C 27/00 takes precedence)

23/02 . Sliding-contact bearings

23/04 . . self-adjusting

23/06 . Ball or roller bearings

23/08 . . self-adjusting

23/10 . Bearings, parts of which are eccentrically adjustable with respect to each other

25/00 **Bearings for exclusively rotary movement adjustable for wear or play** (F16C 27/00 takes precedence)

25/02 . Sliding-contact bearings

25/04 . . self-adjusting

25/06 . Ball or roller bearings
25/08 . . self-adjusting

27/00 Elastic or yielding bearings or bearing supports, for exclusively rotary movement (shock-damping bearings for watches or clocks G04B 31/02)
27/02 . Sliding-contact bearings
27/04 . Ball or roller bearings, e.g. with resilient rolling bodies
27/06 . by means of parts of rubber or like materials (F16C 27/08 takes precedence; with sliding surfaces of rubber or synthetic rubber F16C 33/22)
27/08 . primarily for axial load, e.g. for vertically-arranged shafts

29/00 Bearings for parts moving only linearly (F16C 32/06 takes precedence; incorporated in flexible shafts F16C 1/28) **[2]**
29/02 . Sliding-contact bearings
29/04 . Ball or roller bearings
29/06 . . in which the rolling bodies circulate partly without carrying load
29/08 . Arrangements for covering or protecting the ways
29/10 . Arrangements for locking the bearings
29/12 . Arrangements for adjusting play

31/00 Bearings for parts which both rotate and move linearly
31/02 . Sliding-contact bearings
31/04 . Ball or roller bearings
31/06 . . in which the rolling bodies circulate partly without carrying load

32/00 Bearings not otherwise provided for
32/02 . Knife-edge bearings
32/04 . using magnetic or electric supporting means **[2]**
32/06 . with moving member supported by a fluid cushion formed, at least to a large extent, otherwise than by movement of the shaft, e.g. hydrostatic air-cushion bearings **[2]**

Details or accessories of bearings

33/00 Parts of bearings; **Special methods for making bearings or parts thereof** (metal-working or like operations, see the relevant classes)
33/02 . Parts of sliding-contact bearings
33/04 . . Brasses; Bushes; Linings
33/06 . . . Sliding surface mainly made of metal (F16C 33/24 to F16C 33/28 take precedence)
33/08 . . . . Attachment of brasses, bushes, or linings to the bearing housing
33/10 . . . . Construction relative to lubrication
33/12 . . . . Structural composition; Use of special materials or surface treatments, e.g. for rust-proofing
33/14 . . . . Special methods of manufacture; Running-in
33/16 . . . Sliding surface consisting mainly of graphite
33/18 . . . Sliding surface consisting mainly of wood or fibrous material
33/20 . . . Sliding surface consisting mainly of plastics (F16C 33/22 to F16C 33/28 take precedence)
33/22 . . . Sliding surface consisting mainly of rubber or synthetic rubber (F16C 33/24 to F16C 33/28 take precedence)
33/24 . . . with different areas of the sliding surface consisting of different materials
33/26 . . . made from wire coils; made from a number of discs, rings, rods, or other members
33/28 . . . with embedded reinforcements shaped as frames or meshed materials
33/30 . Parts of ball or roller bearings
33/32 . . Balls
33/34 . . Rollers; Needles
33/36 . . . with bearing-surfaces other than cylindrical, e.g. tapered; with grooves in the bearing surfaces
33/37 . . Loose spacing bodies
33/372 . . . rigid
33/374 . . . resilient
33/38 . . Ball cages
33/40 . . . for multiple rows of balls
33/41 . . . comb-shaped
33/42 . . . made from wire or sheet-metal strips (F16C 33/40, F16C 33/41 take precedence)
33/44 . . . Selection of substances (F16C 33/40, F16C 33/41 take precedence)
33/46 . . Cages for rollers or needles
33/48 . . . for multiple rows of rollers or needles
33/49 . . . comb-shaped
33/50 . . . formed of interconnected members, e.g. chains
33/51 . . . formed of unconnected members
33/52 . . . with no part entering between, or touching, the bearing surfaces of the rollers (F16C 33/50 takes precedence)
33/54 . . . made from wire, strips, or sheet metal (F16C 33/48, F16C 33/49 take precedence)
33/56 . . . Selection of substances (F16C 33/48, F16C 33/49 take precedence)
33/58 . . Raceways; Race rings
33/60 . . . divided
33/61 . . . . formed by wires
33/62 . . . Selection of substances
33/64 . . . Special methods of manufacture
33/66 . . Special parts or details in view of lubrication
33/72 . Sealings
33/74 . . of sliding-contact bearings
33/76 . . of ball or roller bearings
33/78 . . . with a diaphragm, disc, or ring, with or without resilient members
33/80 . . . Labyrinth sealings
33/82 . . . Arrangements for electrostatic or magnetic action against dust or other particles

35/00 Rigid support of bearing units; **Housings, e.g. caps, covers** (F16C 23/00 takes precedence)
35/02 . in the case of sliding-contact bearings
35/04 . in the case of ball or roller bearings
35/06 . . Mounting of ball or roller bearings; Fixing them onto shaft or in housing
35/063 . . . Fixing them on the shaft (with interposition of an element F16C 35/07) **[3]**
35/067 . . . Fixing them in a housing (with interposition of an element F16C 35/07) **[3]**
35/07 . . . Fixing them on the shaft or housing with interposition of an element **[3]**
35/073 . . . . between shaft and inner race ring **[3]**
35/077 . . . . between housing and outer race ring **[3]**
35/078 . . . using pressure fluid as mounting aid **[3]**
35/08 . for spindles
35/10 . . with sliding-contact bearings
35/12 . . with ball or roller bearings

37/00 Cooling of bearings

39/00 Relieving load on bearings
39/02 . using mechanical means
39/04 . using hydraulic or pneumatic means
39/06 . using magnetic means

41/00 Other accessories for bearings
41/02 . Arrangements for equalising the load on a plurality of bearings or their elements
41/04 . Preventing damage to bearings during storage or transport thereof or when otherwise out of use

43/00 Assembling bearings
43/02 . Assembling sliding-contact bearings
43/04 . Assembling rolling contact bearings
43/06 . . Placing rolling bodies in cages or bearings
43/08 . . . by deforming the cages or the races

F16D COUPLINGS FOR TRANSMITTING ROTATION (gearing for conveying rotation F16H, e.g. fluid gearing F16H 39/00 to F16H 47/00); **CLUTCHES** (dynamo-electric clutches H02K 49/00; clutches using electrostatic attraction H02N 13/00); **BRAKES** (electrodynamic brake systems for vehicles in general B60L 7/00; dynamo-electric brakes H02K 49/00) **[2]**

Subclass index

Couplings

1/00 Couplings for rigidly connecting two coaxial shafts or other movable machine elements (for attachment of cranks to their shafts F16C 3/10)
1/02 . for connecting two abutting shafts or the like
1/027 . . non-disconnectable, e.g. involving gluing, welding or the like **[6]**
1/033 . . by clamping together two faces perpendicular to the axis of rotation, e.g. with bolted flanges **[6]**
1/04 . . with clamping hub; with hub and longitudinal key
1/05 . . . with radial clamping due to axial loading of at least one pair of conical surfaces **[5]**
1/06 . for attachment of a member on a shaft or on a shaft-end (attachment of marine propellers on shafts B63H 23/34)
1/064 . . non-disconnectable **[6]**
1/068 . . . involving gluing, welding or the like **[6]**
1/072 . . . involving plastic deformation (plastic welding F16D 1/068) **[6]**
1/076 . . by clamping together two faces perpendicular to the axis of rotation, e.g. with bolted flanges **[6]**
1/08 . . with clamping hub; with hub and longitudinal key
1/09 . . . with radial clamping due to axial loading of at least one pair of conical surfaces **[5]**
1/091 . . . . and comprising a chamber including a tapered piston moved axially by fluid pressure to effect clamping **[8]**
1/092 . . . . the pair of conical mating surfaces being provided on the coupled hub and shaft **[8]**
1/093 . . . . using one or more elastic or segmented conical rings forming at least one of the conical surfaces, the rings being expanded or contracted to effect clamping (F16D 1/091 takes precedence) **[8]**
1/094 . . . . . using one or more pairs of elastic or segmented rings with mutually mating conical surfaces, one of the mating rings being contracted and the other being expanded **[8]**
1/095 . . . . . with clamping effected by ring contraction only **[8]**
1/096 . . . . . the ring or rings being located between the shaft and the hub **[8]**
1/097 . . . . . with clamping effected by ring expansion only, e.g. with an expanded ring located between hub and shaft **[8]**

1/10 . Quick-acting couplings in which the parts are connected by simply bringing them together axially
1/104 . . having retaining means rotating with the coupling and acting only by friction **[6]**
1/108 . . having retaining means rotating with the coupling and acting by interengaging parts, i.e. positive coupling **[6]**
1/112 . . . the interengaging parts comprising torque-transmitting surfaces, e.g. bayonet joints **[6]**
1/116 . . . the interengaging parts including a continuous or interrupted circumferential groove in the surface of one of the coupling parts (circlips for retaining hubs on shafts F16B 21/18) **[6]**
1/12 . allowing adjustment of the parts about the axis (during motion F16D 3/10)

3/00 Yielding couplings, i.e. with means permitting movement between the connected parts during the drive (couplings disconnectable simply by axial movement F16D 1/10; slip couplings F16D 7/00; fluid couplings F16D 31/00 to F16D 39/00)

3/02 . adapted to specific functions (universal joints, see the appropriate groups)
3/04 . . specially adapted to allow radial displacement, e.g. Oldham couplings
3/06 . . specially adapted to allow axial displacement
3/08 . . Couplings for intersecting shafts, provided with intermediate bars bent in an angle corresponding with the angle of intersection
3/10 . . Couplings with means for varying the angular relationship of two coaxial shafts during motion
3/12 . . specially adapted for accumulation of energy to absorb shocks or vibration (by making use of fluid elements F16D 3/80)
3/14 . . combined with a friction coupling for damping vibration or absorbing shock
3/16 . Universal joints in which flexibility is produced by means of pivots or sliding or rolling connecting parts
3/18 . . the coupling parts having slidably-interengaging teeth

Note

In this group, the following expression is used with the meaning indicated:
– "coupling parts" means the driving member and the driven member of the coupling, which are mounted on, and rotate as a unit with, the shafts or their equivalents between which the coupling is placed. An intermediate member interconnecting these parts is regarded as such an equivalent. **[4]**

3/19 . . . of resilient material or structure
3/20 . . one coupling part entering a sleeve of the other coupling part and connected thereto by sliding or rolling members (F16D 3/18, F16D 3/24 take precedence) **[4,5]**
3/202 . . . one coupling part having radially projecting pins, e.g. tripod joints **[5]**
3/205 . . . . the pins extending radially outwardly from the coupling part **[5]**
3/207 . . . . the pins extending radially inwardly from the coupling part **[5]**
3/22 . . . the rolling members being balls, rollers, or the like, guided in grooves or sockets in both coupling parts **[3,5]**
3/221 . . . . the rolling members being located in sockets in one of the coupling parts **[5]**
3/223 . . . . *the rolling members being guided in grooves in both coupling parts* **[5,2011.01]**
3/2233 . . . . . *where the track is made up of two curves with a point of inflexion in between, i.e. S-track joints* **[2011.01]**
3/2237 . . . . . *where the grooves are composed of radii and adjoining straight lines, i.e. undercut free [UF] type joints* **[2011.01]**
3/224 . . . . . *the groove centre-lines of each coupling part lying on a sphere* **[5,2011.01]**
3/2245 . . . . . *where the groove centres are offset from the joint centre* **[2011.01]**
3/226 . . . . . the groove centre-lines of each coupling part lying on a cylinder co-axial with the respective coupling part **[5]**
3/227 . . . . . the joints being telescopic **[5]**
3/229 . . . . . Prismatic coupling parts having each groove centre-line lying on planes parallel to the axis of the respective coupling part (F16D 3/224, F16D 3/226 take precedence) **[5]**
3/24 . . comprising balls, rollers, or the like, between overlapping driving faces, e.g. cogs, on both coupling parts **[3,5]**
3/26 . . Hooke's joints or other joints with an equivalent intermediate member to which each coupling part is pivotally or slideably connected (F16D 3/18, F16D 3/20 take precedence)
3/27 . . . with two or more intermediate members pivotally or slidably connected together, e.g. tongue-and-slipper type joints **[5]**
3/28 . . . in which the interconnecting pivots include elastic members
3/30 . . . in which the coupling is specially adapted to constant velocity-ratio
3/32 . . . . by the provision of two intermediate members each having two relatively-perpendicular trunnions or bearings
3/33 . . . . . with ball or roller bearings
3/34 . . . . parts being connected by ridges, pins, balls, or the like guided in grooves or between cogs
3/36 . . . in which each pivot between the coupling parts and the intermediate member comprises a single ball
3/38 . . . with a single intermediate member with trunnions or bearings arranged on two axes perpendicular to one another (F16D 3/36 takes precedence)
3/40 . . . . with intermediate member provided with two pairs of outwardly-directed trunnions on intersecting axes
3/41 . . . . . with ball or roller bearings
3/42 . . . . with ring-shaped intermediate member provided with bearings or inwardly-directed trunnions
3/43 . . . . . with ball or roller bearings
3/44 . . . the intermediate member being connected to the coupling parts by ridges, pins, balls, or the like guided in grooves or between cogs
3/46 . . . . each coupling part embracing grooves or ridges on the intermediate member
3/48 . . one coupling part having pins arranged parallel to the axis and entering holes in the other coupling part
3/50 . with the coupling parts connected by one or more intermediate members (F16D 3/16 takes precedence)

3/52 . . comprising a continuous strip, spring, or the like engaging the coupling parts at a number of places
3/54 . . Couplings comprising a chain or strip surrounding two wheels arranged side by side and provided with teeth or the equivalent
3/56 . . comprising elastic metal lamellae, elastic rods, or the like, e.g. arranged radially or parallel to the axis, the members being shear-loaded collectively by the total load
3/58 . . . the intermediate members being made of rubber or like material
3/60 . . comprising pushing or pulling links attached to both parts (F16D 3/64 takes precedence)
3/62 . . . the links or their attachments being elastic
3/64 . . comprising elastic elements arranged between substantially-radial walls of both coupling parts
3/66 . . . the elements being metallic, e.g. in the form of coils
3/68 . . . the elements being made of rubber or similar material
3/70 . . comprising elastic elements arranged in holes in one coupling part and surrounding pins on the other coupling part
3/72 . . with axially-spaced attachments to the coupling parts (F16D 3/56 takes precedence)
3/74 . . . the intermediate member or members being made of rubber or other flexible material
3/76 . . shaped as an elastic ring centered on the axis, surrounding a portion of one coupling part and surrounded by a sleeve of the other coupling part
3/77 . . . the ring being metallic
3/78 . . shaped as an elastic disc or flat ring, arranged perpendicular to the axis of the coupling parts, different sets of spots of the disc or ring being attached to each coupling part, e.g. Hardy couplings
3/79 . . . the disc or ring being metallic
3/80 . in which a fluid is used (fluid couplings allowing continuous slip F16D 31/00 to F16D 35/00)
3/82 . . with a coupling element in the form of a pneumatic tube
3/84 . Shrouds, e.g. casings, covers; Sealing means specially adapted therefor

5/00 **Impulse couplings, i.e. couplings that alternately accelerate and decelerate the driven member** (fluid couplings F16D 31/00 to F16D 39/00)

7/00 **Slip couplings, e.g. slipping on overload, for absorbing shock** (combined with yielding shaft couplings F16D 3/14; fluid slip couplings F16D 31/00 to F16D 35/00)
7/02 . of the friction type (couplings in which overload initiates a decrease of coupling pressure or a disconnection, see the relevant groups for clutches)
7/04 . of the ratchet type
7/06 . . with intermediate balls or rollers
7/08 . . . moving axially between engagement and disengagement **[5]**
7/10 . . . moving radially between engagement and disengagement **[5]**

9/00 **Couplings with safety member for disconnecting**
9/02 . by thermal means, e.g. melting member **[6]**
9/04 . by tensile breaking **[6]**
9/06 . by breaking due to shear stress **[6]**
9/08 . . over a single area encircling the axis of rotation, e.g. shear necks on shafts (F16D 9/10 takes precedence) **[6]**
9/10 . . having a part movable after disconnection so as to provide reconnection, e.g. advanceable shear pins **[6]**

Clutches with mechanically-actuated clutching members; **Synchronisation arrangements for clutches**

11/00 **Clutches in which the members have interengaging parts** (arrangements for synchronisation F16D 23/02; automatic clutches F16D 43/00 to F16D 45/00; external control F16D 48/00)
11/02 . disengaged by a contact of a part mounted on the clutch with a stationarily-mounted member
11/04 . . with clutching members movable only axially
11/06 . . with clutching members movable otherwise than only axially, e.g. rotatable keys
11/08 . actuated by moving a non-rotating part axially (actuating-mechanisms in the relevant groups)
11/10 . . with clutching members movable only axially
11/12 . . with clutching members movable otherwise than only axially
11/14 . with clutching members movable only axially (F16D 11/02, F16D 11/08 take precedence) **[5]**
11/16 . with clutching members movable otherwise than only axially (F16D 11/02, F16D 11/08 take precedence) **[5]**

13/00 **Friction clutches** (arrangements for synchronisation F16D 23/02; automatic clutches F16D 43/00 to F16D 45/00; external control F16D 48/00)
13/02 . disengaged by the contact of a part mounted on the clutch with a stationarily-mounted member
13/04 . with means for actuating or keeping engaged by a force derived at least partially from one of the shafts to be connected (automatic clutches F16D 43/00)
13/06 . . with clutching members movable otherwise than only axially (F16D 13/08, F16D 13/12 take precedence)
13/08 . with a helical band or equivalent member, which may be built-up from linked parts, with more than one turn embracing a drum or the like, with or without an additional clutch actuating the end of the band (F16D 13/02 takes precedence)
13/10 . with clutching members co-operating with the periphery of a drum, a wheel-rim, or the like (F16D 13/02 to F16D 13/08 take precedence)
13/12 . with an expansible band or coil co-operating with the inner surface of a drum or the like (F16D 13/02 takes precedence)
13/14 . with outwardly-movable clutching members co-operating with the inner surface of a drum or the like (F16D 13/02, F16D 13/06, F16D 13/12 take precedence)
13/16 . . shaped as radially-movable segments
13/18 . . shaped as linked or separately-pivoted segments
13/20 . with clutching members co-operating with both the periphery and the inner surface of a drum or wheel-rim
13/22 . with axially-movable clutching members
13/24 . . with conical friction surfaces
13/26 . . . in which the or each axially-movable member is pressed exclusively against an axially-located member

13/28 . . . . with means for increasing the effective force between the actuating sleeve or equivalent member and the pressure member
13/30 . . . . . in which the clutching pressure is produced by springs only
13/32 . . . in which two or more axially-movable members are pressed from one side towards an axially-located member
13/34 . . . . with means for increasing the effective force between the actuating sleeve or equivalent member and the pressure member
13/36 . . . . . in which the clutching pressure is produced by springs only
13/38 . . with flat clutching surfaces, e.g. discs
13/40 . . . in which the or each axially-movable member is pressed exclusively against an axially-located member
13/42 . . . . with means for increasing the effective force between the actuating sleeve or equivalent member and the pressure member
13/44 . . . . . in which the clutching pressure is produced by springs only
13/46 . . . in which two axially-movable members, of which one is attached to the driving side and the other to the driven side, are pressed from one side towards an axially-located member
13/48 . . . . with means for increasing the effective force between the actuating sleeve or equivalent member and the pressure member
13/50 . . . . . in which the clutching pressure is produced by springs only
13/52 . . . Clutches with multiple lamellae
13/54 . . . . with means for increasing the effective force between the actuating sleeve or equivalent member and the pressure member
13/56 . . . . . in which the clutching pressure is produced by springs only
13/58 . Details
13/60 . . Clutching elements (friction lining or attachment thereof F16D 69/00)
13/62 . . . Clutch-bands; Clutch-shoes; Clutch-drums (brake-bands, brake-shoes, brake-drums F16D 65/00)
13/64 . . . Clutch-plates; Clutch-lamellae (brake-plates, brake-lamellae F16D 65/12)
13/66 . . . . of conical shape
13/68 . . . . Attachments of plates or lamellae to their supports
13/69 . . . . Arrangements for spreading lamellae in released state
13/70 . . Pressure members, e.g. pressure plates, for clutch-plates or lamellae; Guiding arrangements for pressure members
13/71 . . . in which the clutching pressure is produced by springs only
13/72 . . Features relating to cooling
13/74 . . Features relating to lubrication
13/75 . . Features relating to adjustment, e.g. slack adjusters
13/76 . specially adapted to incorporate with other transmission parts, i.e. at least one of the clutch parts also having another function, e.g. being the disc of a pulley

15/00 Clutches with wedging balls or rollers or with other wedgeable separate clutching members (freewheels, freewheel clutches F16D 41/00; automatic clutches F16D 43/00 to F16D 45/00; external control F16D 48/00)

17/00 Clutches in which the drive is transmitted solely by virtue of the eccentricity of the contacting surfaces of clutch members which fit one around the other (automatic clutches F16D 43/00 to F16D 45/00; external control F16D 48/00)

19/00 Clutches with mechanically-actuated clutching members not otherwise provided for (automatic clutches F16D 43/00 to F16D 45/00; external control F16D 48/00)

21/00 Systems comprising a plurality of mechanically-actuated clutches (for synchronisation F16D 23/04; automatic clutches F16D 43/00 to F16D 45/00; external control F16D 48/00)
21/02 . for interconnecting three or more shafts or other transmission members in different ways
21/04 . . with a shaft carrying a number of rotatable transmission members, e.g. gears, each of which can be connected to the shaft by a clutching member or members between the shaft and the hub of the transmission member
21/06 . . at least two driving shafts or two driven shafts being concentric
21/08 . Serially-arranged clutches interconnecting two shafts only when all the clutches are engaged (F16D 13/08, F16D 13/12 take precedence)

23/00 Details of mechanically-actuated clutches not specific for one distinct type; **Synchronisation arrangements for clutches**
23/02 . Arrangements for synchronisation (shape or mounting of interengaging parts of clutch members to facilitate engagement F16D 11/08)
23/04 . . with an additional friction cluch
23/06 . . . and a blocking mechanism preventing the engagement of the main clutch prior to synchronisation
23/08 . . with a blocking mechanism that only releases the clutching member on synchronisation (in combination with an additional friction clutch F16D 23/06)
23/10 . . automatically producing the engagement of the clutch when the clutch members are moving at the same speed; Indicating synchronisation
23/12 . Mechanical clutch-actuating mechanisms arranged outside the clutch as such (specific for combined clutches F16D 21/00; mechanisms specific for synchronisation F16D 23/02)
23/14 . . Clutch-actuating sleeves; Actuating members directly connected to clutch-actuating sleeves

Clutches actuated non-mechanically [3]

25/00 Fluid-actuated clutches (arrangements for synchronisation F16D 23/02; fluid clutches F16D 31/00 to F16D 39/00; automatic clutches F16D 43/00 to F16D 45/00; external control F16D 48/00)
25/02 . with means for actuating or keeping engaged by a force derived at least partially from one of the shafts to be connected
25/04 . in which the fluid actuates an elastic clutching member, e.g. a diaphragm or a pneumatic tube (F16D 25/02 takes precedence; coupling using a pneumatic tube F16D 3/82)
25/06 . in which the fluid actuates a piston incorporated in the clutch (F16D 25/02 takes precedence)
25/061 . . the clutch having interengaging clutch members
25/062 . . the clutch having friction surfaces

25/063 . . . with clutch members exclusively moving axially
25/0632 . . . . with conical friction surfaces, e.g. cone clutches **[5]**
25/0635 . . . . with flat friction surfaces, e.g. discs **[5]**
25/0638 . . . . . with more than two discs, e.g. multiple lamellae **[5]**
25/064 . . . . the friction surface being grooved
25/065 . . . with clutching members having a movement which has at least a radial component
25/08 . with fluid-actuated member not rotating with a clutching member (F16D 25/02 takes precedence)
25/10 . Clutch systems with a plurality of fluid-actuated clutches
25/12 . Details not specific to one of the before-mentioned types

27/00 Magnetically-actuated clutches; **Control or electric circuits therefor** (arrangements for synchronisation F16D 23/02; clutches with magnetisable particles F16D 37/02; automatic clutches F16D 43/00 to F16D 45/00; circuits for external control F16D 48/00) **[2]**
27/01 . with permanent magnets
27/02 . with electromagnets incorporated in the clutch, i.e. with collecting rings
27/04 . . with axially-movable friction surfaces
27/06 . . . with friction surfaces arranged within the flux
27/07 . . . . Constructional features of clutch-plates or clutch-lamellae
27/08 . . . with friction surfaces arranged externally to the flux
27/09 . . and with interengaging jaws or gear-teeth
27/10 . with an electromagnet not rotating with a clutching member, i.e. without collecting rings
27/102 . . with radially movable clutching members (F16D 27/105 takes precedence) **[5]**
27/105 . . with a helical band or equivalent member co-operating with a cylindrical coupling surface **[5]**
27/108 . . with axially movable clutching members **[5]**
27/11 . . . with conical friction surfaces, e.g. cone clutches **[5]**
27/112 . . . with flat friction surfaces, e.g. discs **[5]**
27/115 . . . . with more than two discs, e.g. multiple lamellae **[5]**
27/118 . . with interengaging jaws or gear teeth **[5]**
27/12 . Clutch systems with a plurality of electromagnetically-actuated clutches
27/14 . Details

28/00 Electrically-actuated clutches (arrangements for synchronisation F16D 23/02; clutches actuated directly by means of an electromagnet F16D 27/00; automatic clutches F16D 43/00 to F16D 45/00; external control F16D 48/00) **[6]**

29/00 Clutches or systems of clutches involving both fluid and magnetic or both fluid and electric actuation [6]

Couplings or clutches with a fluid or semifluid as power-transmitting means

31/00 Fluid couplings or clutches with pumping sets of the volumetric type, i.e. in the case of liquid passing a predetermined volume per revolution
31/02 . using pumps with pistons or plungers working in cylinders
31/04 . using gear-pumps
31/06 . using pumps of types differing from those before-mentioned
31/08 . Control of slip

33/00 Rotary fluid couplings or clutches of the hydrokinetic type
33/02 . controlled by changing the flow of the liquid in the working circuit, while maintaining a completely filled working circuit
33/04 . . by altering the position of blades
33/06 . controlled by changing the amount of liquid in the working circuit
33/08 . . by devices incorporated in the fluid coupling, with or without remote control
33/10 . . . consisting of controllable supply and discharge openings
33/12 . . . . controlled automatically by self-actuated valves
33/14 . . . consisting of shiftable or adjustable scoops
33/16 . . by means arranged externally of the coupling or clutch
33/18 . Details
33/20 . . Shape of wheels, blades, or channels with respect to function

35/00 Fluid clutches in which the clutching is predominantly obtained by fluid adhesion (F16D 37/00 takes precedence)
35/02 . with rotary working chambers and rotary reservoirs, e.g. in one coupling part **[5]**

37/00 Clutches in which the drive is transmitted through a medium consisting of small particles, e.g. centrifugally speed-responsive
37/02 . the particles being magnetisable

39/00 Combinations of couplings according to two or more of the groups F16D 31/00 to F16D 37/00

Freewheels or freewheel clutches; **Automatic clutches**

Note

Groups F16D 31/00 to F16D 39/00 take precedence over groups F16D 41/00 to F16D 45/00. **[2009.01]**

41/00 Freewheels or freewheel clutches (cycle brakes controlled by back-pedalling B62L 5/00)
41/02 . disengaged by contact of a part of or on the freewheel or freewheel clutch with a stationarily-mounted member
41/04 . combined with a clutch for locking the driving and driven members (F16D 41/02, F16D 41/24 take precedence)
41/06 . with intermediate wedging coupling members between an inner and an outer surface (F16D 41/02, F16D 41/24 take precedence)
41/061 . . the intermediate members wedging by movement having an axial component **[6]**
41/063 . . the intermediate members wedging by moving along the inner and the outer surface without pivoting or rolling, e.g. sliding wedges (F16D 41/061 takes precedence) **[6]**
41/064 . . the intermediate members wedging by rolling and having a circular cross-section, e.g. balls (F16D 41/061 takes precedence) **[6]**
41/066 . . . all members having the same size and only one of the two surfaces being cylindrical **[6]**

41/067 . . . . and the members being distributed by a separate cage encircling the axis of rotation **[6]**
41/069 . . the intermediate members wedging by pivoting or rocking, e.g. sprags (F16D 41/061 takes precedence) **[6]**
41/07 . . . between two cylindrical surfaces **[6]**
41/08 . . with provision for altering the freewheeling action
41/10 . . . with self-actuated reversing
41/12 . with hinged pawl co-operating with teeth, cogs, or the like (F16D 41/02, F16D 41/24 take precedence)
41/14 . . the effective stroke of the pawl being adjustable
41/16 . . the action being reversible
41/18 . with non-hinged detent (F16D 41/02, F16D 41/24 take precedence)
41/20 . with expandable or contractable clamping ring or band (F16D 41/02, F16D 41/24 take precedence)
41/22 . with clutching ring or disc axially shifted as a result of lost motion between actuating members (F16D 41/02, F16D 41/24 take precedence)
41/24 . specially adapted for cycles
41/26 . . with provision for altering the action
41/28 . . with intermediate wedging coupling members
41/30 . . with hinged pawl co-operating with teeth, cogs, or the like
41/32 . . with non-hinged detent
41/34 . . with expandable or contractable clamping ring or band
41/36 . . with clutching ring or disc axially shifted as a result of lost motion between actuating members

43/00 Internally controlled automatic clutches (freewheels, freewheel clutches F16D 41/00; external control of clutches F16D 48/00) **[6]**

43/02 . actuated entirely mechanically
43/04 . . controlled by angular speed (F16D 43/24 takes precedence; clutches in which the drive is transmitted through a medium consisting of small particles F16D 37/00)
43/06 . . . with centrifugal masses actuating axially a movable pressure ring or the like
43/08 . . . . the pressure ring actuating friction plates, cones, or similar axially-movable friction surfaces
43/09 . . . . . in which the carrier of the centrifugal masses can be stopped
43/10 . . . . . the centrifugal masses acting directly on the pressure ring, no other actuating mechanism for the pressure ring being provided
43/12 . . . . . the centrifugal masses acting on, or forming a part of, an actuating mechanism by which the pressure ring can also be actuated independently of the masses
43/14 . . . with centrifugal masses actuating the clutching members directly in a direction which has at least a radial component; with centrifugal masses themselves being the clutching members
43/16 . . . . with clutching members having interengaging parts
43/18 . . . . with friction clutching members
43/20 . . controlled by torque, e.g. overload-release clutches, slip-clutches with means by which torque varies the clutching pressure
43/202 . . . of the ratchet type (slip couplings of the ratchet type F16D 7/04) **[5]**
43/204 . . . . with intermediate balls or rollers **[5]**
43/206 . . . . . moving axially between engagement and disengagement **[5]**
43/208 . . . . . moving radially between engagement and disengagement **[5]**
43/21 . . . with friction members
43/22 . . controlled by both speed and torque
43/24 . . controlled by acceleration or deceleration of angular speed
43/25 . . controlled by thermo-responsive elements
43/26 . . acting at definite angular position or disengaging after a definite number of rotations (actuating by means of stationary abutment F16D 11/02, F16D 13/02, F16D 15/00)
43/28 . actuated by fluid pressure
43/284 . . controlled by angular speed
43/286 . . controlled by torque
43/30 . Systems of a plurality of automatic clutches

45/00 Freewheels or freewheel clutches combined with automatic clutches

---

47/00 Systems of clutches, or clutches and couplings, comprising devices of types grouped under at least two of the following sets of groups: F16D 1/00 to F16D 9/00; **F16D 11/00 to F16D 23/00**; **F16D 25/00 to F16D 29/00**; **F16D 31/00 to F16D 39/00**; **F16D 41/00 to F16D 45/00** (freewheels combined with a clutch to lock the driving and driven members of the freewheel F16D 41/04, F16D 41/26)

47/02 . of which at least one is a coupling (elastic attachment of clutch parts, see the relevant groups for clutches)
47/04 . of which at least one is a freewheel (F16D 47/02, F16D 47/06 take precedence)
47/06 . of which at least one is a clutch with a fluid or a semifluid as power-transmitting means

48/00 External control of clutches [6]

Note

This group does not cover actuation, which is covered by groups F16D 11/00 to F16D 29/00. **[6]**

48/02 . Control by fluid pressure **[6]**
48/04 . . providing power assistance **[6]**
48/06 . Control by electric or electronic means, e.g. of fluid pressure **[6]**
48/08 . . Regulating clutch take-up on starting **[6]**
48/10 . . Preventing unintentional or unsafe engagement **[6]**
48/12 . . Control of torque transfer between driven axles **[6]**

Brakes

49/00 Brakes with a braking member co-operating with the periphery of a drum, wheel-rim, or the like

49/02 . shaped as a helical band or coil with more than one turn, with or without intensification of the braking force by the tension of the band or contracting member
49/04 . . mechanically actuated
49/06 . . fluid actuated
49/08 . shaped as an encircling band extending over approximately 360°

49/10 . . mechanically actuated (self-tightening F16D 49/20)
49/12 . . fluid actuated
49/14 . shaped as a fluid-filled flexible member actuated by variation of the fluid pressure
49/16 . Brakes with two brake-blocks (self-tightening F16D 49/20)
49/18 . Brakes with three or more brake-blocks (self-tightening F16D 49/20)
49/20 . Self-tightening brakes (with helical band or coil with more than one turn F16D 49/02)
49/22 . . with an auxiliary friction member initiating or increasing the action of the brake

51/00 Brakes with outwardly-movable braking members co-operating with the inner surface of a drum or the like

51/02 . shaped as one or more circumferential bands
51/04 . . mechanically actuated
51/06 . . fluid actuated
51/08 . shaped as an expansible fluid-filled flexible member
51/10 . shaped as exclusively radially-movable brake-shoes
51/12 . . mechanically actuated
51/14 . . fluid actuated
51/16 . shaped as brake-shoes pivoted on a fixed or nearly-fixed axis (self-tightening F16D 51/46)
51/18 . . with two brake-shoes
51/20 . . . extending in opposite directions from their pivots
51/22 . . . . mechanically actuated
51/24 . . . . fluid actuated
51/26 . . . both extending in the same direction from their pivots
51/28 . . . . mechanically actuated
51/30 . . . . fluid actuated
51/32 . . with three or more brake-shoes
51/34 . . . extending in opposite directions from their pivots
51/36 . . . . mechanically actuated
51/38 . . . . fluid actuated
51/40 . . . all extending in the same direction from their pivots
51/42 . . . . mechanically actuated
51/44 . . . . fluid actuated
51/46 . Self-tightening brakes with pivoted brake-shoes
51/48 . . with two linked or directly-interacting brake-shoes
51/50 . . . mechanically actuated
51/52 . . . fluid actuated
51/54 . . with three or more brake-shoes, at least two of them being linked or directly interacting
51/56 . . . mechanically actuated
51/58 . . . fluid actuated
51/60 . . with wedging action of a brake-shoe, e.g. the shoe entering as a wedge between the brake-drum and a stationary part
51/62 . . . mechanically actuated
51/64 . . . fluid actuated
51/66 . . an actuated brake-shoe being carried along and thereby engaging a member for actuating another brake-shoe
51/68 . . . mechanically actuated
51/70 . . . fluid actuated

53/00 Brakes with braking members co-operating with both the periphery and the inner surface of a drum, wheel-rim, or the like

55/00 Brakes with substantially-radial braking surfaces pressed together in axial direction, e.g. disc brakes

55/02 . with axially-movable discs or pads pressed against axially-located rotating members
55/04 . . by moving discs or pads away from one another against radial walls of drums or cylinders
55/06 . . . without self-tightening action
55/08 . . . . Mechanically-actuated brakes
55/10 . . . . Brakes actuated by a fluid-pressure device arranged in or on the brake
55/12 . . . . . comprising an expansible fluid-filled flexible member coaxial with the brake
55/14 . . . with self-tightening action, e.g. by means of coacting helical surfaces or balls and inclined surfaces
55/15 . . . . initiated by means of brake-bands or brake-shoes
55/16 . . . . Mechanically-actuated brakes
55/18 . . . . Brakes actuated by a fluid-pressure device arranged in or on the brake
55/20 . . . . . comprising an expansible fluid-filled flexible member coaxial with the brake
55/22 . . by clamping an axially-located rotating disc between movable braking members, e.g. movable brake discs or brake pads **[5]**
55/224 . . . with a common actuating member for the braking members **[5]**
55/225 . . . . the braking members being brake pads **[5]**
55/2255 . . . . . in which the common actuating member is pivoted **[5]**
55/226 . . . . . in which the common actuating member is moved axially **[5]**
55/2265 . . . . . the axial movement being guided by one or more pins **[5]**
55/227 . . . . . by two pins **[5]**
55/228 . . . with a separate actuating member for each side
55/24 . with a plurality of axially-movable discs, lamellae, or pads, pressed from one side towards an axially-located member
55/26 . . without self-tightening action
55/28 . . . Brakes with only one rotating disc
55/30 . . . . mechanically actuated
55/31 . . . . . by means of an intermediate leverage
55/32 . . . . actuated by a fluid-pressure device arranged in or on the brake
55/33 . . . . . by means of an intermediate leverage
55/34 . . . . . comprising an expansible fluid-filled flexible member coaxial with the brake
55/36 . . . Brakes with a plurality of rotating discs all lying side by side
55/38 . . . . mechanically actuated
55/39 . . . . . by means of an intermediate leverage
55/40 . . . . actuated by a fluid-pressure device arranged in or on the brake
55/41 . . . . . by means of an intermediate leverage
55/42 . . . . . comprising an expansible fluid-filled flexible member coaxial with the brake
55/44 . . . with the rotating part consisting of both central plates and ring-shaped plates arranged concentrically around the central plates
55/46 . . with self-tightening action

55/48 . . . with discs or pads having a small free angular travel relative to their support, which produces the self-tightening action

55/50 . . . with auxiliary friction members, which may be of different type, producing the self-tightening action

57/00 Liquid-resistance brakes; **Air-resistance brakes**

57/02 . with blades or like members braked by the fluid

57/04 . with blades causing a directed flow, e.g. Föttinger type

57/06 . comprising a pump circulating fluid, braking being effected by throttling of the circulation

59/00 Self-acting brakes, e.g. coming into operation at a predetermined speed

59/02 . spring-loaded and adapted to be released by mechanical, fluid, or electromagnetic means

61/00 Brakes with means for making the energy absorbed available for use (F16D 57/00 takes precedence)

63/00 Brakes not otherwise provided for; **Brakes combining more than one of the types of groups F16D 49/00 to F16D 61/00** (brakes with auxiliary members for self-tightening F16D 49/22, F16D 51/66, F16D 55/50)

65/00 Parts or details of brakes

65/02 . Braking members; Mounting thereof (friction linings or attachment thereof F16D 69/00)

65/04 . . Bands, shoes or pads; Pivots or supporting members therefor **[5]**

65/06 . . . for externally-engaging brakes

65/08 . . . for internally-engaging brakes

65/09 . . . . Pivots or supporting members therefor **[2]**

65/092 . . . for axially-engaging brakes, e.g. disc brakes **[5]**

65/095 . . . . Pivots or supporting members therefor **[5]**

65/097 . . . . . Resilient means interposed between pads and supporting members **[5]**

65/10 . . Drums for externally- or internally-engaging brakes

65/12 . . Discs; Drums for disc brakes

65/14 . Actuating mechanisms for brakes; Means for initiating operation at a predetermined position (brake control systems, parts thereof B60T)

65/16 . . arranged in or on the brake

65/18 . . . adapted for drawing members together

65/20 . . . . comprising a fluid-pressure device

65/21 . . . . acting by electric or magnetic means **[2]**

65/22 . . . adapted for pressing members apart

65/24 . . . . comprising a fluid-pressure device

65/26 . . . . . in the form of a fluid-filled flexible member

65/27 . . . . acting by electric or magnetic means **[2]**

65/28 . . arranged apart from the brake

65/30 . . . acting mechanically

65/32 . . . acting by fluid means

65/34 . . . acting by electric or magnetic means (holding devices using electrostatic attraction H02N 13/00) **[2]**

65/35 . . . . including a permanent magnet **[3]**

65/36 . . . acting by both fluid and electric means

65/38 . Slack adjusters

65/40 . . mechanical

65/42 . . . non-automatic

65/44 . . . . by means of direct linear adjustment (F16D 65/46, F16D 65/48 take precedence)

65/46 . . . . with screw-thread and nut

65/48 . . . . with eccentric or helical body

65/50 . . . . for angular adjustment of two concentric parts of the brake control system

65/52 . . . self-acting in one direction for adjusting excessive play

65/54 . . . . by means of direct linear adjustment (F16D 65/56, F16D 65/58 take precedence)

65/56 . . . . with screw-thread and nut

65/58 . . . . with eccentric or helical body

65/60 . . . . for angular adjustment of two concentric parts of the brake control system

65/62 . . . self-acting in both directions for adjusting excessive and insufficient play

65/64 . . . . by means of direct linear adjustment (F16D 65/66, F16D 65/68 take precedence)

65/66 . . . . with screw-thread and nut

65/68 . . . . with eccentric or helical body

65/70 . . . . for angular adjustment of two concentric parts of the brake control system

65/72 . . hydraulic

65/74 . . . self-acting in one direction

65/76 . . . self-acting in both directions

65/78 . Features relating to cooling

65/80 . . for externally-engaging brakes

65/807 . . . with open cooling system, e.g. cooled by air **[2]**

65/813 . . . with closed cooling system **[2]**

65/82 . . for internally-engaging brakes

65/827 . . . with open cooling system, e.g. cooled by air **[2]**

65/833 . . . with closed cooling system **[2]**

65/84 . . for disc brakes

65/847 . . . with open cooling system, e.g. cooled by air **[2]**

65/853 . . . with closed cooling system **[2]**

66/00 Arrangements for monitoring working conditions of brakes, e.g. wear or temperature

66/02 . Apparatus for indicating wear

67/00 Combinations of couplings and brakes; **Combinations of clutches and brakes** (F16D 71/00 takes precedence; conjoint control of brake systems and driveline clutches in vehicles B60W 10/02, B60W 10/18) **[2]**

67/02 . Clutch-brake combinations

67/04 . . fluid actuated

67/06 . . electromagnetically actuated

69/00 Friction linings; **Attachment thereof**; **Selection of coacting friction substances or surfaces** (braking members F16D 65/02)

69/02 . Composition of linings (chemical aspects, see the relevant classes)

69/04 . Attachment of linings

71/00 Mechanisms for bringing members to rest in a predetermined position (combined with, or controlling, clutches F16D 43/26; means for initiating operation of brakes at a predetermined position F16D 65/14)

71/02 . comprising auxiliary means for producing the final movement

71/04 . providing for selection between a plurality of positions (F16D 71/02 takes precedence)

F16F SPRINGS; SHOCK-ABSORBERS; MEANS FOR DAMPING VIBRATION

(1) This subclass covers:
- springs, shock-absorbers or vibration-dampers;
- their arrangement in, or adaptation for, particular apparatus, if not provided for in the subclasses covering said apparatus. **[5]**

(2) This subclass does not cover the arrangement or adaptation of springs, shock-absorbers or vibration-dampers in, or for, particular apparatus, if provided for in the subclasses concerning the said apparatus, e.g.

A47C	23/00	to	Spring mattresses
A47C	27/00		
A63C	5/075		Vibration dampers in skis
B60G			Vehicle suspensions
B60R	19/24		Mounting of bumpers on vehicles
B61F			Rail vehicle suspensions
B61G	11/00		Buffers for railway or tramway vehicles
B62D	21/15		Vehicle chassis frames having impact absorbing means
B62J	1/02		Resiliently mounted saddles on cycles
B62K	21/08		Steering dampers
B63H	1/15		Marine propellers having vibration-damping means
B63H	21/30		Anti-vibration mounting of marine propulsion plant in ships
B64C	25/58		Arrangement of shock-absorbers or springs in aeroplane alighting gear
B65D	81/02		Containers, packing elements or packages with shock-absorbing means
D06F	37/20		Resilient mountings in washing machines
D06F	49/06		Resilient mountings in domestic spin-dryers
F03G	1/00		Spring motors
F21V	15/04		Resilient mounting of lighting devices
F41A	25/00		Gun cradles to permit recoil
F41B	5/20		Vibration dampers for archery bows
G01D	11/00		Indicating or recording in connection with measuring
G01G	21/10		Weighing apparatus, e.g. arrangement of shock-absorbers in weighing apparatus
G04B			Clocks, watches
G12B	3/08		Damping of movements in instruments
G21C	7/20		Disposition of shock-absorbing devices for displacable control elements in nuclear reactors.

Subclass index

1/00 **Springs** (working with fluid F16F 5/00, F16F 9/00)

1/02 . made of steel or other material having low internal friction (F16F 1/36 takes precedence); Wound, torsion, leaf, cup, ring or the like springs, the material of the spring not being relevant **[6]**

1/04 . . Wound springs

1/06 . . . with turns lying in cylindrical surfaces

1/08 . . . with turns lying in mainly conical surfaces

1/10 . . . Spiral springs with turns lying substantially in plane surfaces

1/12 . . . Attachments or mountings

1/13 . . . . comprising inserts or spacers between the windings for changing the mechanical or physical characteristics of the spring **[6]**

1/14 . . Torsion springs consisting of bars or tubes

1/16 . . . Attachments or mountings

1/18 . . Leaf springs

1/20 . . . with layers, e.g. anti-friction layers, or with rollers between the leaves

1/22 . . . with means for modifying the spring characteristic

1/24 . . . Lubrication; Covers, e.g. for retaining lubricant

1/26 . . . Attachments or mountings (B60G 11/10 takes precedence) **[5]**

1/28 . . . . comprising cylindrical metal pins pivoted in close-fitting sleeves

1/30 . . . . comprising intermediate pieces made of rubber or similar elastic material

1/32 . . Cup springs; Dished disc springs (diaphragms F16J 3/00)

1/34 . . Ring springs, i.e. annular bodies deformed radially due to axial load

1/36 . made of plastics, e.g. rubber; made of material having high internal friction

1/362 . . made of steel wool or compressed hair **[6]**

1/364 . . made of cork, wood or the like material **[6]**

1/366 . . made of fibre reinforced plastics **[6]**

1/368 . . . Leaf springs **[6]**

1/37 . . of foam-like material, e.g. sponge rubber

1/371 . . characterised by inserts or auxiliary extension elements, e.g. for rigidification (F16F 1/366, F16F 1/387 take precedence) **[6]**
1/373 . . characterised by having a particular shape **[6]**
1/374 . . . having a spherical or the like shape **[6]**
1/376 . . . having projections, studs, serrations or the like on at least one surface (F16F 1/387 takes precedence) **[6]**
1/377 . . . having holes or openings (F16F 1/387 takes precedence) **[6]**
1/379 . . characterised by arrangements for regulating the spring temperature, e.g. by cooling **[6]**
1/38 . . with a sleeve of elastic material between a rigid outer sleeve and a rigid inner sleeve or pin
1/387 . . . comprising means for modifying the rigidity in particular directions **[6]**
1/393 . . . with spherical or conical sleeves **[6]**
1/40 . . consisting of a stack of similar elements separated by non-elastic intermediate layers
1/41 . . . the spring consisting of generally conically arranged elements **[6]**
1/42 . . characterised by the mode of stressing
1/44 . . . loaded mainly in compression
1/46 . . . loaded mainly in tension
1/48 . . . loaded mainly in torsion
1/50 . . . loaded mainly in shear
1/52 . . . loaded in combined stresses
1/54 . . . . loaded in compression and shear

3/00 Spring units consisting of several springs, e.g. for obtaining a desired spring characteristic (including fluid springs F16F 5/00, F16F 13/00)

3/02 . with springs made of steel or of other material having low internal friction
3/04 . . composed only of wound springs
3/06 . . . of which some are placed around others in such a way that they damp each other by mutual friction
3/07 . . combined with chambers filled with gas or liquid
3/08 . with springs made of a material having high internal friction, e.g. rubber
3/087 . . Units comprising several springs made of plastics or the like material (F16F 1/40 takes precedence) **[6]**
3/093 . . . the springs being of different materials, e.g. having different types of rubber **[6]**
3/10 . . combined with springs made of steel or other material having low internal friction
3/12 . . . the steel spring being in contact with the rubber spring, e.g. being embedded in it **[6]**

5/00 Liquid springs in which the liquid works as a spring by compression, e.g. combined with throttling action; **Combinations of devices including liquid springs**

6/00 Magnetic springs; **Fluid magnetic springs**

7/00 Vibration-dampers; **Shock-absorbers** (using fluid F16F 5/00, F16F 9/00; specific for rotary systems F16F 15/10)

7/01 . using friction between loose particles, e.g. sand **[6]**
7/02 . with relatively-rotatable friction surfaces that are pressed together (F16F 7/01 takes precedence; one of the members being a spring F16F 13/02) **[6]**
7/04 . . in the direction of the axis of rotation
7/06 . . in a direction perpendicular or inclined to the axis of rotation
7/08 . with friction surfaces rectilinearly movable along each other (F16F 7/01 takes precedence) **[6]**
7/09 . . in dampers of the cylinder-and-piston type **[6]**
7/10 . using inertia effect
7/104 . . the inertia member being resiliently mounted **[6]**
7/108 . . . on plastics springs **[6]**
7/112 . . . on fluid springs **[6]**
7/116 . . . on metal springs **[6]**
7/12 . using plastic deformation of members
7/14 . of cable-support type, i.e. frictionally-engaged loop-forming cables

9/00 Springs, vibration-dampers, shock-absorbers, or similarly-constructed movement-dampers using a fluid or the equivalent as damping medium (F16F 5/00 takes precedence; connection of valves to inflatable elastic bodies B60C 29/00; door-operating appliances with fluid braking systems E05F)

9/02 . using gas only
9/04 . . in a chamber with a flexible wall
9/05 . . . the flexible wall being of the rolling diaphragm type **[5]**
9/06 . using both gas and liquid
9/08 . . in a chamber with a flexible wall
9/084 . . . comprising a gas spring contained within a flexible wall, the wall not being in contact with the damping fluid, i.e. mounted externally on the damper cylinder **[6]**
9/088 . . . comprising a gas spring with a flexible wall provided within the cylinder on the piston rod of a monotubular damper or within the inner tube of a bitubular damper **[6]**
9/092 . . . comprising a gas spring with a flexible wall provided between the tubes of a bitubular damper **[6]**
9/096 . . . comprising a hydropneumatic accumulator of the membrane type provided on the upper or the lower end of a damper or separately from or laterally on the damper **[6]**
9/10 . using liquid only; using a fluid of which the nature is immaterial
9/12 . . Devices with one or more rotary vanes turning in the fluid, any throttling effect being immaterial
9/14 . . Devices with one or more members, e.g. pistons, vanes, moving to and fro in chambers and using throttling effect
9/16 . . . involving only straight-line movement of the effective parts
9/18 . . . . with a closed cylinder and a piston separating two or more working spaces therein
9/19 . . . . . with a single cylinder
9/20 . . . . . with the piston-rod extending through both ends of the cylinder
9/22 . . . . with one or more cylinders, each having a single working space closed by a piston or plunger
9/24 . . . . . with a single cylinder and a single piston or plunger
9/26 . . . . . with two cylinders in line and with the two pistons or plungers connected together
9/28 . . . . . with two parallel cylinders and with the two pistons or plungers connected together
9/30 . with solid or semi-solid material, e.g. pasty masses, as damping medium

9/32 . Details
9/34 . . Special valve constructions (valves in general F16K); Shape or construction of throttling passages
9/342 . . . Throttling passages operating with metering pins
9/344 . . . Vortex flow passages **[6]**
9/346 . . . Throttling passages in the form of slots arranged in cylinder walls
9/348 . . . Throttling passages in the form of annular discs operating in opposite directions
9/36 . . Special sealings, including sealings or guides for piston-rods
9/38 . . Covers for protection or appearance
9/40 . . Arrangements for preventing froth
9/42 . . Cooling arrangements
9/43 . . Filling arrangements, e.g. for supply of gas
9/44 . . Means on or in the damper for manual or non-automatic adjustment; such means combined with temperature correction (F16F 9/53, F16F 9/56 take precedence; temperature correction only F16F 9/52) **[5,6]**
9/46 . . . allowing control from a distance
9/48 . . Arrangements for providing different damping effects at different parts of the stroke (F16F 9/53, F16F 9/56 take precedence) **[5,6]**
9/49 . . . Stops limiting fluid passage, e.g. hydraulic stops
9/50 . . Special means providing automatic damping adjustment (F16F 9/53, F16F 9/56 take precedence) **[5,6]**
9/504 . . . Inertia-sensitive means **[6]**
9/508 . . . Means responsive to the velocity of movement of the piston **[6]**
9/512 . . . Means responsive to load action on the damper or fluid pressure in the damper **[6]**
9/516 . . . resulting in the damping effects during contraction being different from the damping effects during extension **[6]**
9/52 . . . in case of change of temperature (combined with external adjustment F16F 9/44)
9/53 . . Means for adjusting damping characteristics by varying fluid viscosity, e.g. electromagnetically **[5]**
9/54 . . Arrangements for attachment
9/56 . . Means for adjusting the length of, or for locking, the spring or damper, e.g. at the end of the stroke **[6]**
9/58 . . Stroke limiting stops, e.g. arranged on the piston rod outside the cylinder (F16F 9/49 takes precedence) **[6]**

11/00 Vibration-dampers or shock-absorbers working with both friction and a damping fluid

13/00 Units comprising springs of the non-fluid type as well as vibration-dampers, shock-absorbers, or fluid springs (F16F 5/00 takes precedence)
13/02 . damping by frictional contact between the spring and braking means (frictionally coacting wound springs F16F 3/06)
13/04 . comprising both a plastics spring and a damper, e.g. a friction damper **[6]**
13/06 . . the damper being a fluid damper, e.g. the plastics spring not forming a part of the wall of the fluid chamber of the damper (F16F 13/26 takes precedence) **[6]**
13/08 . . . the plastics spring forming at least a part of the wall of the fluid chamber of the damper (F16F 13/20 to F16F 13/24 take precedence) **[6]**
13/10 . . . . the wall being at least in part formed by a flexible membrane or the like (F16F 13/12 to F16F 13/18 take precedence) **[6]**
13/12 . . . . Single chamber dampers (F16F 13/14 takes precedence) **[6]**
13/14 . . . . Units of the bushing type **[6]**
13/16 . . . . . specially adapted for receiving axial loads **[6]**
13/18 . . . . characterised by the location or the shape of the equilibration chamber, e.g. the equilibration chamber surrounding the plastics spring or being annular (F16F 13/14 takes precedence) **[6]**
13/20 . . . characterised by comprising also a pneumatic spring (F16F 13/22 takes precedence) **[6]**
13/22 . . . characterised by comprising also a dynamic damper (dampers using inertia effect per se F16F 7/10) **[6]**
13/24 . . . the central part of the unit being supported by one element and both extremities of the unit being supported by a single other element, i.e. double acting mounting **[6]**
13/26 . . characterised by adjusting or regulating devices responsive to exterior conditions **[6]**
13/28 . . . specially adapted for units of the bushing type (F16F 13/30 takes precedence) **[6]**
13/30 . . . comprising means for varying fluid viscosity, e.g. of magnetic or electrorheological fluids **[6]**

15/00 Suppression of vibrations in systems (vehicle seat suspension devices B60N 2/50); **Means or arrangements for avoiding or reducing out-of-balance forces, e.g. due to motion** (testing static or dynamic balance of machines or structures G01M 1/00)
15/02 . Suppression of vibrations of non-rotating, e.g. reciprocating, systems; Suppression of vibrations of rotating systems by use of members not moving with the rotating system (layered products B32B; suppression of vibration in ships B63)
15/023 . . using fluid means **[6]**
15/027 . . . comprising control arrangements **[6]**
15/03 . . using electromagnetic means (F16F 9/53 takes precedence) **[5]**
15/04 . . using elastic means (single elements or their attachment F16F 1/00 to F16F 13/00) **[2]**
15/06 . . . with metal springs (with rubber springs also F16F 15/08)
15/067 . . . . using only wound springs **[6]**
15/073 . . . . using only leaf springs **[6]**
15/08 . . . with rubber springs
15/10 . Suppression of vibrations in rotating systems by making use of members moving with the system (by balancing F16F 15/22; with flywheels acting variably or intermittently F16H)
15/12 . . using elastic members or friction-damping members, e.g. between a rotating shaft and a gyratory mass mounted thereon (F16F 15/16 takes precedence) **[6]**
15/121 . . . using springs as elastic members, e.g. metallic springs (F16F 15/131 takes precedence) **[6]**
15/123 . . . . Wound springs **[6]**
15/124 . . . . Plastics springs, e.g. made of rubber (F16F 15/123 takes precedence) **[6]**

15/126 . . . . . consisting of at least one annular element surrounding the axis of rotation **[6]**
15/127 . . . . using plastics springs combined with other types of springs **[6]**
15/129 . . . characterised by friction-damping means (F16F 15/131 takes precedence) **[6]**
15/131 . . . the rotating system comprising two or more gyratory masses **[6]**
15/133 . . . . using springs as elastic members, e.g. metallic springs **[6]**
15/134 . . . . . Wound springs **[6]**
15/136 . . . . . Plastics springs, e.g. made of rubber (F16F 15/134 takes precedence) **[6]**
15/137 . . . . . the elastic members consisting of two or more springs of different types **[6]**
15/139 . . . . characterised by friction-damping means **[6]**
15/14 . . using freely-swinging masses rotating with the system
15/16 . . using a fluid (devices connecting input and output members F16D)
15/167 . . . having an inertia member, e.g. ring **[6]**
15/173 . . . . provided within a closed housing **[6]**
15/18 . . using electric means (dynamo-electric devices H02K)
15/20 . Suppression of vibrations of rotating systems by favourable grouping or relative arrangement of the moving members of the system or systems
15/22 . Compensation of inertia forces
15/24 . . of crankshaft systems by particular disposition of cranks, pistons, or the like
15/26 . . of crankshaft systems using solid masses, other than the ordinary pistons, moving with the system
15/28 . Counterweights; Attaching or mounting same (for roll-type closures E06B 9/62)
15/30 . Flywheels (F16F 15/16 takes precedence; suppression of vibrations in rotating systems using elastic members or friction-damping members moving with the system F16F 15/12; rotary-body aspects in general F16C 13/00, F16C 15/00) **[6]**
15/305 . . made of plastics, e.g. fibre reinforced plastics (FRP) **[6]**
15/31 . . characterised by means for varying the moment of inertia **[6]**
15/315 . . characterised by their supporting arrangement, e.g. mountings, cages, securing inertia member to shaft (F16F 15/31 takes precedence) **[6]**
15/32 . Correcting- or balancing-weights or equivalent means for balancing rotating bodies, e.g. vehicle wheels **[2,5]**
15/34 . . Fastening arrangements therefor **[5]**
15/36 . . operating automatically **[5]**

F16G BELTS, CABLES, OR ROPES, PREDOMINANTLY USED FOR DRIVING PURPOSES; CHAINS; FITTINGS PREDOMINANTLY USED THEREFOR

Subclass index

1/00 **Driving-belts** (V-belts F16G 5/00; conveyer belts B65G)
1/02 . made of leather (F16G 1/28 takes precedence; making thereof C14B 9/00)
1/04 . made of fibrous material, e.g. textiles, whether rubber-covered or not (F16G 1/28 takes precedence; making thereof D03D)
1/06 . made of rubber (F16G 1/28 takes precedence; producing belts from plastics or substances in a plastic state B29D 29/00)
1/08 . . with reinforcement bonded by the rubber
1/10 . . . with textile reinforcement
1/12 . . . with metal reinforcement
1/14 . made of plastics (F16G 1/28 takes precedence; producing belts from plastics or substances in a plastic state B29D 29/00)
1/16 . . with reinforcement bonded by the plastic material
1/18 . made of wire (making thereof B21F 43/00)
1/20 . made of a single metal strip (making thereof B21D 53/14)
1/21 . built-up from superimposed layers, e.g. zig-zag folded
1/22 . consisting of several parts
1/24 . . in the form of links (in the shape of chain links F16G 13/08)
1/26 . . in the form of strips or lamellae
1/28 . with a contact surface of special shape, e.g. toothed

3/00 **Belt fastenings, e.g. for conveyer belts** (for V-belts F16G 7/00)
3/02 . with series of eyes or the like, interposed and linked by a pin to form a hinge (F16G 3/09 takes precedence)
3/04 . . in which the ends of separate U-shaped or like eyes are attached to the belt by parts penetrating into it
3/06 . with outwardly-bent, mutually-connected belt ends
3/07 . Friction clamps, e.g. of grommet-thimble type
3/08 . consisting of plates and screw-bolts or rivets (F16G 3/06 takes precedence)
3/09 . . the plates forming a hinge
3/10 . Joining belts by sewing, sticking, vulcanising, or the like; Constructional adaptations of the belt ends for this purpose
3/12 . Joining belts by lacing
3/14 . with extensible parts; with resilient parts
3/16 . Devices or machines for connecting driving-belts or the like

5/00 **V-belts, i.e. belts of tapered cross-section**
5/02 . made of leather (F16G 5/20 takes precedence)

5/04 . made of rubber (F16G 5/20 takes precedence)
5/06 . . with reinforcement bonded by the rubber
5/08 . . . with textile reinforcement
5/10 . . . with metal reinforcement
5/12 . made of plastics (F16G 5/20 takes precedence)
5/14 . . with reinforcement bonded by the plastic material
5/16 . consisting of several parts
5/18 . . in the form of links
5/20 . with a contact surface of special shape, e.g. toothed
5/22 . built-up from superimposed layers
5/24 . . zig-zag folded

7/00 V-belt fastenings
7/02 . locked, e.g. riveted
7/04 . quickly detachable
7/06 . adjustable, e.g. for tension

9/00 Ropes or cables specially adapted for driving, or for being driven by, pulleys or other gearing elements
9/02 . made of leather; having enveloping sheathings made of leather
9/04 . made of rubber or plastics (F16G 9/02 takes precedence)

11/00 Means for fastening cables or ropes to one another or to other objects (cable clamps for suspension bridge cables E01D 19/16); **Caps or sleeves for fixing on cables or ropes** (attaching ropes or cables to lift cars or cages B66B 7/08, to winch drums or barrels B66D 1/34; rope clamps in earth drilling E21B 19/12)
11/02 . with parts deformable to grip the cable or cables; Fastening means which engage a sleeve or the like fixed on the cable
11/03 . incorporating resiliently-mounted members for attachment of the cable end
11/04 . with wedging action, e.g. friction clamps of grommet-thimble type (F16G 11/02 takes precedence)
11/05 . . by using conical plugs insertable between the strands
11/06 . with laterally-arranged screws (F16G 11/02, F16G 11/04 take precedence)
11/08 . Fastenings for securing ends of driving-cables to one another, the fastenings having approximately the same diameter as the cables
11/09 . . incorporating hinge joints or pivots for the attachment of the cable ends
11/10 . Quick-acting fastenings; Clamps holding in one direction only
11/12 . Connections or attachments, e.g. turnbuckles, adapted for straining of cables, ropes or wire
11/14 . Devices or coupling-pieces designed for easy formation of adjustable loops, e.g. choker hooks; Hooks or eyes with integral parts designed to facilitate quick attachment to cables or ropes at any point, e.g. by forming loops

13/00 Chains (making thereof B21L)
13/02 . Driving-chains
13/04 . . Toothed chains
13/06 . . with links connected by parallel driving-pins with or without rollers
13/07 . . . the links being of identical shape, e.g. cranked
13/08 . . with links closely interposed on the joint pins (F16G 13/04 takes precedence)
13/10 . . with universal joints
13/12 . Hauling- or hoisting-chains
13/14 . . built up from readily-separable links **[3]**
13/16 . . with arrangements for holding electric cables, hoses, or the like
13/18 . Chains having special overall characteristics
13/20 . . stiff; Push-pull chains
13/22 . . extensible
13/24 . . . resilient

15/00 Chain couplings; **Shackles**; **Chain joints**; **Chain links**; **Chain bushes** (making chain elements B21L)
15/02 . for fastening more or less permanently
15/04 . Quickly-detachable chain couplings; Shackles
15/06 . . Shackles designed for attachment by joint pins to chain elements, e.g. D-shackles
15/08 . Swivels
15/10 . Emergency joints or links
15/12 . Chain links
15/14 . . made of sheet metal, e.g. profiled

17/00 Hooks as integral parts of chains (hooks for cranes B66C 1/34)

F16H GEARING

(1) Combinations including mechanical gearings are classified in groups F16H 37/00or F16H 47/00, unless they are provided for in groups F16H 1/00 to F16H 35/00. **[2009.01]**
(2) In this subclass, sets of rigidly-connected members are regarded as single members.
(3) In this subclass, the following terms or expressions are used with the meanings indicated:
- "toothed gearing" includes worm gearing and other gearing involving at least one wheel or sector provided with teeth or the equivalent, except gearing with chains or toothed belts, which is treated as friction gearing;
- "conveying motion" includes transmitting energy, and means that the applied and resultant motions are of the same kind, though they may differ in, e.g. speed, direction or extent;
- "rotary" implies that the motion may continue indefinitely.
- "oscillating" means moving about an axis to an extent which is limited by the construction of the gearing and which may exceed one revolution, the movement being alternately forwards and backwards during continued operation of the gearing;
- "reciprocating" means moving substantially in a straight line, the movement being alternately forwards and backwards during continued operation of the gearing;
- "reversing" or "reversal" means that an applied movement in one direction may produce a resultant movement in either of two opposed directions at will;
- "central gears" includes any gears whose axis is the main axis of the gearing.

(4) Attention is drawn to the following places:

A01D	69/06	Gearings in harvesters or mowers
A63H	31/00	Gearing for toys
B21B	35/12	Toothed-wheel gearing for metal-rolling mills
B60K		Arrangement of transmissions in vehicles
B61C	9/00	Transmissions for railway locomotives
B62D	3/00	Vehicle steering gears
B62M		Transmissions for cycles
B63H	23/00	Transmissions for marine propulsion
B63H	25/00	Marine steering gears
F01 to F04		Machines, engines, pumps
F15B	15/00	Gearings associated with fluid-actuated devices
G01D	5/04	Gearing used in indicating or recording apparatus in connection with measuring devices
H03J	1/00	Driving arrangements for tuning resonant circuits
H04L	13/04	Driving mechanisms for apparatus for transmission of coded digital information.

Subclass index

Toothed gearings for conveying rotary motion

1/00 Toothed gearings for conveying rotary motion (specific for conveying rotary motion with variable gear ratio or for reversing rotary motion F16H 3/00)

1/02 . without gears having orbital motion

1/04 . . involving only two intermeshing members

1/06 . . . with parallel axes

1/08 . . . . the members having helical, herring-bone, or like teeth

1/10 . . . . one of the members being internally toothed

1/12 . . . with non-parallel axes

1/14 . . . . comprising conical gears only

1/16 . . . . comprising worm and worm-wheel

1/18 . . . . the members having helical, herring-bone, or like teeth (F16H 1/14 takes precedence)

1/20 . . involving more than two intermeshing members

1/22 . . . with a plurality of driving or driven shafts; with arrangements for dividing torque between two or more intermediate shafts

1/24 . . involving gears essentially having intermeshing elements other than involute or cycloidal teeth (F16H 1/16 takes precedence)

1/26 . . Special means compensating for misalignment of axes

1/28 . with gears having orbital motion

1/30 . . in which an orbital gear has an axis crossing the main axis of the gearing and has helical teeth or is a worm

1/32 . . in which the central axis of the gearing lies inside the periphery of an orbital gear

1/34 . . involving gears essentially having intermeshing elements other than involute or cycloidal teeth (in worm gearing F16H 1/30)

1/36 . . with two central gears coupled by intermeshing orbital gears

1/46 . . Systems consisting of a plurality of gear trains, each with orbital gears

1/48 . . Special means compensating for misalignment of axes

3/00 Toothed gearings for conveying rotary motion with variable gear ratio or for reversing rotary motion (speed-changing or reversing mechanisms F16H 59/00 to F16H 63/00)

3/02 . without gears having orbital motion

3/04 . . with internally-toothed gears

3/06 . . with worm and worm-wheel or gears essentially having helical or herring-bone teeth

3/08 . . exclusively or essentially with continuously-meshing gears, that can be disengaged from their shafts

Note

In this group, gears which can be put out of mesh are not taken into consideration if they are used for reversal only. **[8]**

3/083 . . . with radially acting and axially controlled clutching members, e.g. sliding keys **[5]**

3/085 . . . with more than one output shaft **[5]**

3/087 . . . characterised by the disposition of the gears (F16H 3/083, F16H 3/085 take precedence) **[5]**

Note

When counting the countershafts, the reverse countershaft is not taken into consideration if it is used for reversal only. **[5]**

3/089 . . . . all of the meshing gears being supported by a pair of parallel shafts, one being the input shaft and the other the output shaft, there being no countershaft involved **[5]**
3/091 . . . . including a single countershaft **[5]**
3/093 . . . . with two or more countershafts **[5]**
3/095 . . . . . with means for ensuring an even distribution of torque between the countershafts **[5]**
3/097 . . . . . the input and output shafts being aligned on the same axis **[5]**
3/10 . . . with one or more one-way clutches as an essential feature
3/12 . . . with means for synchronisation not incorporated in the clutches (synchronised clutches F16D 23/02)
3/14 . . . Gearings for reversal only
3/16 . . essentially with both gears that can be put out of gear and continuously-meshing gears that can be disengaged from their shafts

Note

In this group, gears which can be put out of mesh are not taken into consideration if they are used for reversal only. **[8]**

3/18 . . . Gearings for reversal only
3/20 . . exclusively or essentially using gears that can be moved out of gear

Note

In this group, gears which can be put out of mesh are not taken into consideration if they are used for reversal only. **[8]**

3/22 . . . with gears shiftable only axially
3/24 . . . . with driving and driven shafts coaxial
3/26 . . . . . and two or more additional shafts
3/28 . . . . . an additional shaft being coaxial with the main shafts
3/30 . . . . with driving and driven shafts not coaxial
3/32 . . . . . and an additional shaft
3/34 . . . with gears shiftable otherwise than only axially
3/36 . . . with a single gear meshable with any of a set of coaxial gears of different diameters
3/38 . . . with synchro-meshing
3/40 . . . Gearings for reversal only
3/42 . . with gears having teeth formed or arranged for obtaining multiple gear ratios, e.g. nearly infinitely variable
3/44 . using gears having orbital motion
3/46 . . Gearings having only two central gears, connected by orbital gears (F16H 3/68 to F16H 3/78 take precedence)
3/48 . . . with single orbital gears or pairs of rigidly-connected orbital gears
3/50 . . . . comprising orbital conical gears
3/52 . . . . comprising orbital spur gears
3/54 . . . . . one of the central gears being internally toothed and the other externally toothed
3/56 . . . . . both central gears being sun gears
3/58 . . . with sets of orbital gears, each consisting of two or more intermeshing orbital gears
3/60 . . . Gearings for reversal only
3/62 . . Gearings having three or more central gears (F16H 3/68 to F16H 3/78 take precedence)
3/64 . . . composed of a number of gear trains, the drive always passing through all the trains, each train having not more than one connection for driving another train
3/66 . . . composed of a number of gear trains without drive passing from one train to another
3/68 . . in which an orbital gear has an axis crossing the main axis of the gearing and has helical teeth or is a worm
3/70 . . in which the central axis of the gearing lies inside the periphery of an orbital gear
3/72 . . with a secondary drive, e.g. regulating motor, in order to vary speed continuously
3/74 . . Complexes, not using actuatable speed-changing or regulating members, e.g. with gear ratio determined by free play of frictional or other forces
3/76 . . with an orbital gear having teeth formed or arranged for obtaining multiple gear ratios, e.g. nearly infinitely variable
3/78 . . Special adaptation of synchronisation mechanisms to these gearings

Gearing for conveying rotary motion by endless flexible members

7/00 **Gearings for conveying rotary motion by endless flexible members** (specific for conveying rotary motion with variable gear ratio or for reversing rotary motion F16H 9/00; endless flexible members per se, e.g. belts or chains F16G)
7/02 . with belts; with V-belts
7/04 . with ropes
7/06 . with chains
7/08 . Means for varying tension of belts, ropes, or chains (pulleys of adjustable construction F16H 55/52)
7/10 . . by adjusting the axis of a pulley
7/12 . . . of an idle pulley
7/14 . . . of a driving or driven pulley
7/16 . . . . without adjusting the driving or driven shaft
7/18 . Means for guiding or supporting belts, ropes, or chains (construction of pulleys F16H 55/36)
7/20 . . Mountings for rollers or pulleys
7/22 . Belt, rope, or chain shifters
7/24 . Equipment for mounting belts, ropes, or chains

9/00 **Gearings for conveying rotary motion with variable gear ratio, or for reversing rotary motion, by endless flexible members** (control of change-speed or reversing-gearings conveying rotary motion F16H 59/00 to F16H 63/00; endless flexible members per se, e.g. belts or chains F16G)
9/02 . without members having orbital motion
9/04 . . using belts, V-belts, or ropes (with toothed belts F16H 9/24; pulleys of adjustable construction F16H 55/52)
9/06 . . . engaging a stepped pulley
9/08 . . . engaging a conical drum (F16H 9/12 takes precedence)

9/10 . . . engaging a pulley provided with radially-actuatable elements carrying the belt
9/12 . . . engaging a pulley built-up out of relatively axially-adjustable parts in which the belt engages the opposite flanges of the pulley directly without interposed belt-supporting members
9/14 . . . . using only one pulley built-up out of adjustable conical parts
9/16 . . . . using two pulleys, both built-up out of adjustable conical parts
9/18 . . . . . only one flange of each pulley being adjustable
9/20 . . . . . both flanges of the pulleys being adjustable
9/22 . . . specially adapted for ropes
9/24 . . using chains, toothed belts, belts in the form of links; Chains or belts specially adapted to such gearing (toothed belts F16G 1/28; V-belts in the form of links F16G 5/18; toothed V-belts F16G 5/20)
9/26 . with members having orbital motion

Other friction gearing for conveying rotary motion

13/00 Gearing for conveying rotary motion with constant gear ratio by friction between rotary members (specific for conveying rotary motion with variable gear ratio or for reversing rotary motion F16H 15/00)
13/02 . without members having orbital motion
13/04 . . with balls or with rollers acting in a similar manner
13/06 . with members having orbital motion
13/08 . . with balls or with rollers acting in a similar manner
13/10 . Means for influencing the pressure between the members
13/12 . . by magnetic forces
13/14 . . for automatically varying the pressure mechanically

15/00 Gearings for conveying rotary motion with variable gear ratio, or for reversing rotary motion, by friction between rotary members (control of change-speed or reversing-gearings conveying rotary motion F16H 59/00 to F16H 63/00)
15/01 . characterised by the use of a magnetisable powder or liquid as friction medium between the rotary members **[2]**
15/02 . without members having orbital motion
15/04 . . Gearings providing a continuous range of gear ratios
15/06 . . . in which a member A of uniform effective diameter mounted on a shaft may co-operate with different parts of a member B
15/08 . . . . in which the member B is a disc with a flat or approximately-flat friction surface
15/10 . . . . . in which the axes of the two members cross or intersect
15/12 . . . . . in which one or each member is duplicated, e.g. for obtaining better transmission, for lessening the reaction forces on the bearings
15/14 . . . . . in which the axes of the members are parallel or approximately parallel
15/16 . . . . in which the member B has a conical friction surface
15/18 . . . . . externally
15/20 . . . . . co-operating with the outer rim of the member A, which is perpendicular or nearly perpendicular to the friction surface of the member B
15/22 . . . . . the axes of the members being parallel or approximately parallel
15/24 . . . . . internally
15/26 . . . . in which the member B has a spherical friction surface centered on its axis of revolution
15/28 . . . . . with external friction surface
15/30 . . . . . with internal friction surface
15/32 . . . . in which the member B has a curved friction surface formed as a surface of a body of revolution generated by a curve which is neither a circular arc centered on its axis of revolution nor a straight line
15/34 . . . . . with convex friction surface
15/36 . . . . . with concave friction surface, e.g. a hollow toroid surface
15/38 . . . . . with two members B having hollow toroid surfaces opposite to each other, the member or members A being adjustably mounted between the surfaces
15/40 . . . in which two members co-operate by means of balls, or rollers of uniform effective diameter, not mounted on shafts
15/42 . . . in which two members co-operate by means of rings or by means of parts of endless flexible members pressed between the first-mentioned members
15/44 . . . in which two members of non-uniform effective diameter directly co-operate with one another
15/46 . . Gearings providing a discontinuous or stepped range of gear ratios
15/48 . with members having orbital motion
15/50 . . Gearings providing a continuous range of gear ratios
15/52 . . . in which a member of uniform effective diameter mounted on a shaft may co-operate with different parts of another member
15/54 . . . in which two members co-operate by means of rings or by means of parts of endless flexible members pressed between the first-mentioned members
15/56 . . Gearings providing a discontinuous or stepped range of gear ratios

---

19/00 Gearings comprising essentially only toothed gears or friction members and not capable of conveying indefinitely-continuing rotary motion (with intermittently-driving members F16H 27/00 to F16H 31/00; rope or like tackle for lifting or haulage B66D 3/00)
19/02 . for interconverting rotary motion and reciprocating motion
19/04 . . comprising a rack
19/06 . . comprising an endless flexible member
19/08 . for interconverting rotary motion and oscillating motion

Gearing for conveying or converting motion by means of levers, links, cams or screw-and-nut mechanisms

21/00 Gearings comprising primarily only links or levers, with or without slides (F16H 23/00 takes precedence)

21/02 . the movements of two or more independently-moving members being combined into a single movement

21/04 . Guiding mechanisms, e.g. for straight-line guidance (for drawing-machines B43L)

21/06 . which can be made ineffective when desired

21/08 . . by pushing a reciprocating rod out of its operative position

21/10 . all movement being in, or parallel to, a single plane

21/12 . . for conveying rotary motion

21/14 . . . by means of cranks, eccentrics, or like members fixed to one rotary member and guided along tracks on the other

21/16 . . for interconverting rotary motion and reciprocating motion

21/18 . . . Crank gearings; Eccentric gearings

21/20 . . . . with adjustment of throw (adjustable cranks or eccentrics F16C 3/28; adjustable connecting-rods F16C 7/06)

21/22 . . . . with one connecting-rod and one guided slide to each crank or eccentric

21/24 . . . . . without further links or guides

21/26 . . . . . with toggle action

21/28 . . . . . with cams or additional guides

21/30 . . . . . with members having rolling contact

21/32 . . . . . with additional members comprising only pivoted links or arms

21/34 . . . . with two or more connecting-rods to each crank or eccentric

21/36 . . . . without swinging connecting-rod, e.g. with epicyclic parallel motion, slot-and- crank motion

21/38 . . . . with means for temporary energy accumulation, e.g. to overcome dead-centre positions

21/40 . . for interconverting rotary motion and oscillating motion

21/42 . . . with adjustable throw

21/44 . . for conveying or interconverting oscillating or reciprocating motions

21/46 . with movements in three dimensions

21/48 . . for conveying rotary motion

21/50 . . for interconverting rotary motion and reciprocating motion

21/52 . . for interconverting rotary motion and oscillating motion

21/54 . . for conveying or interconverting oscillating or reciprocating motions

23/00 Wobble-plate gearings; **Oblique-crank gearings**

23/02 . with adjustment of throw by changing the position of the wobble-member (F16H 29/04, F16H 33/10 take precedence)

23/04 . with non-rotary wobble-members

23/06 . . with sliding members hinged to reciprocating members

23/08 . . connected to reciprocating members by connecting-rods

23/10 . with rotary wobble-plates with plane surfaces

25/00 Gearings comprising primarily only cams, cam-followers and screw-and-nut mechanisms

25/02 . the movements of two or more independently-moving members being combined into a single movement

25/04 . for conveying rotary motion

25/06 . . with intermediate members guided along tracks on both rotary members

25/08 . for interconverting rotary motion and reciprocating motion (F16H 23/00 takes precedence)

25/10 . . with adjustable throw (adjustable cams F16H 53/04)

25/12 . . with reciprocation along the axis of rotation, e.g. gearings with helical grooves and automatic reversal (screw mechanisms without automatic reversal F16H 25/20)

25/14 . . with reciprocation perpendicular to the axis of rotation (F16H 21/36 takes precedence)

25/16 . for interconverting rotary motion and oscillating motion

25/18 . for conveying or interconverting oscillating or reciprocating motions

25/20 . . Screw mechanisms (with automatic reversal F16H 25/12)

25/22 . . . with balls, rollers, or similar members between the co-operating parts; Elements essential to the use of such members

25/24 . . . Elements essential to such mechanisms, e.g. screws, nuts (F16H 25/22 takes precedence)

Gearings with intermittently-driving members

27/00 Step-by-step mechanisms without freewheel members, e.g. Geneva drives (rotary gearings with cyclically-varying velocity ratio F16H 35/02; impulse couplings F16D 5/00; clockwork escapements G04B 15/00)

27/02 . with at least one reciprocating or oscillating transmission member

27/04 . for converting continuous rotation into a step-by-step rotary movement

27/06 . . Mechanisms with driving pins in driven slots, e.g. Geneva drives

27/08 . . with driving toothed gears with interrupted toothing

27/10 . . obtained by means of disengageable transmission members, combined or not combined with mechanisms according to group F16H 27/06 or F16H 27/08

29/00 Gearings for conveying rotary motion with intermittently-driving members, e.g. with freewheel action (freewheels F16D 41/00)

29/02 . between one of the shafts and an oscillating or reciprocating intermediate member, not rotating with either of the shafts (F16H 29/20, F16H 29/22 take precedence)

29/04 . . in which the transmission ratio is changed by adjustment of a crank, an eccentric, a wobble-plate, or a cam, on one of the shafts

29/06 . . . with concentric shafts, an annular intermediate member moving around and being supported on an adjustable crank or eccentric

29/08 . . in which the transmission ratio is changed by adjustment of the path of movement, the location of the pivot, or the effective length, of an oscillating connecting member

29/10 . . in which the transmission ratio is changed by directly acting on the intermittently driving members

29/12 . between rotary driving and driven members (F16H 29/20, F16H 29/22 take precedence)

29/14 . . in which the transmission ratio is changed by adjustment of an otherwise stationary guide member for the intermittently-driving members

29/16 . . in which the transmission ratio is changed by adjustment of the distance between the axes of the rotary members

29/18 . . . in which the intermittently-driving members slide along approximately radial guides while rotating with one of the rotary members

29/20 . the intermittently-acting members being shaped as worms, screws, or racks

29/22 . with automatic speed change

31/00 Other gearings with freewheeling members or other intermittently-driving members (F16H 21/00, F16H 23/00, F16H 25/00 take precedence; gearings involving the use of automatic changing-mechanisms, e.g. cyclically-actuated reversal gearings, see the appropriate groups)

33/00 Gearings based on repeated accumulation and delivery of energy

33/02 . Rotary transmissions with mechanical accumulators, e.g. weights, springs, intermittently-connected flywheels

33/04 . . Gearings for conveying rotary motion with variable velocity ratio, in which self-regulation is sought

33/06 . . . based essentially on spring action (ratchet slip couplings F16D 7/04)

33/08 . . . based essentially on inertia

33/10 . . . . with gyroscopic action, e.g. comprising wobble-plates, oblique cranks

33/12 . . . . with a driving member connected differentially with both a driven member and an oscillatory member with large resistance to movement, e.g. Constantinesco gearing

33/14 . . . . having orbital members influenced by regulating masses

33/16 . . . . . which have their own free motion, or consist of fluid

33/18 . . . . . of which the motion is constrained

33/20 . for interconversion, based essentially on inertia, of rotary motion and reciprocating or oscillating motion

35/00 Gearings or mechanisms with other special functional features

35/02 . for conveying rotary motion with cyclically-varying velocity ratio (speed-changing mechanisms operating cyclically, see the appropriate groups)

35/06 . Gearings designed to allow relative movement between supports thereof without ill effects (F16H 1/26, F16H 1/48 take precedence)

35/08 . for adjustment of members on moving parts from a stationary place

35/10 . Arrangements or devices for absorbing overload or preventing damage by overload (couplings for transmitting rotation F16D)

35/12 . Transmitting mechanisms with delayed effect (vibration- or shock-dampers in general F16F)

35/14 . Mechanisms with only two stable positions, e.g. acting at definite angular positions

35/16 . Mechanisms for movements or movement relations conforming to mathematical formulae (devices in which computing operations are performed mechanically G06G 3/00)

35/18 . Turning devices for rotatable members, e.g. shafts (starting devices for internal-combustion engines F02N)

37/00 Combinations of mechanical gearings, not provided for in groups F16H 1/00 to F16H 35/00 (combinations of mechanical gearing with fluid clutches or fluid gearing F16H 47/00; applications of underdrives or overdrives in motor vehicles, combinations with differential gearings in motor vehicles B60K)

37/02 . comprising essentially only toothed or friction gearings

37/04 . . Combinations of toothed gearings only (F16H 37/06 takes precedence)

37/06 . . with a plurality of driving or driven shafts; with arrangements for dividing torque between two or more intermediate shafts

37/08 . . . with differential gearing

37/10 . . . . at both ends of intermediate shafts

37/12 . Gearings comprising primarily toothed or friction gearing, links or levers, and cams, or members of at least two of these three types (F16H 21/14, F16H 21/28, F16H 21/30 take precedence; toothed or friction gearing or cam gearing, with only an additional lever or link, see the appropriate group for the main gearing)

37/14 . . the movements of two or more independently-moving members being combined into a single movement

37/16 . . with a driving or driven member which both rotates or oscillates on its axis and reciprocates

Fluid gearing [3]

39/00 Rotary fluid gearing using pumps and motors of the volumetric type, i.e. passing a predetermined volume of fluid per revolution (control of exclusively fluid gearing F16H 61/38; fluid couplings or clutches with pumping sets of volumetric type F16D 31/00; application to lifting or pushing equipment B66F) **[5]**

39/01 . Pneumatic gearing; Gearing working with subatmospheric pressure (pneumatic hammers B25D 9/00) **[2]**

39/02 . with liquid motors at a distance from liquid pumps

39/04 . with liquid motor and pump combined in one unit

39/06 . . pump and motor being of the same type

39/08 . . . each with one main shaft and provided with pistons reciprocating in cylinders

39/10 . . . . with cylinders arranged around, and parallel or approximately parallel to, the main axis of the gearing

39/12 . . . . . with stationary cylinders

39/14 . . . . . with cylinders carried in rotary cylinder blocks or cylinder-bearing members

39/16 . . . . with cylinders arranged perpendicular to the main axis of the gearing

39/18 . . . . . the connections of the pistons being at the outer ends of the cylinders

39/20 . . . . . the connections of the pistons being at the inner ends of the cylinders

39/22 . . . with liquid chambers shaped as bodies of revolution concentric with the main axis of the gearing

39/24 . . . . with rotary displacement members, e.g. provided with axially or radially movable vanes passing movable sealing members
39/26 . . . with liquid chambers not shaped as bodies of revolution or shaped as bodies of revolution eccentric to the main axis of the gearing
39/28 . . . . with liquid chambers formed in rotary members
39/30 . . . . with liquid chambers formed in stationary members
39/32 . . . . . with sliding vanes carried by the rotor
39/34 . . . in which a rotor on one shaft co-operates with a rotor on another shaft
39/36 . . . . toothed-gear type
39/38 . . . . Displacement screw-pump type
39/40 . . . Hydraulic differential gearings, e.g. having a rotary input housing with interconnected liquid chambers for both outputs
39/42 . . pump and motor being of different types

41/00 Rotary fluid gearing of the hydrokinetic type (control of exclusively fluid gearing F16H 61/38; rotary fluid couplings or clutches of the hydrokinetic type F16D 33/00) **[5]**

41/02 . with pump and turbine connected by conduits or ducts
41/04 . Combined pump-turbine units
41/22 . . Gearing systems consisting of a plurality of hydrokinetic units operating alternatively, e.g. made effective or ineffective by filling or emptying or by mechanical clutches
41/24 . Details
41/26 . . Shape of runner blades or channels with respect to function
41/28 . . with respect to manufacture, e.g. blade attachment
41/30 . . relating to venting, lubrication, cooling, circulation of the cooling medium
41/32 . Selection of working fluids (chemical aspects, see the relevant classes)

43/00 Other fluid gearing, e.g. with oscillating input or output [2]

43/02 . Fluid gearing actuated by pressure waves **[2]**

45/00 Combinations of fluid gearings for conveying rotary motion with couplings or clutches (F16H 41/22 takes precedence; conjoint control of driveline clutches and change-speed gearing in vehicles B60W 10/02, B60W 10/10) **[2]**

Note

Clutches for varying working conditions in fluid torque-converters are regarded as a part of the latter.

45/02 . with mechanical clutches for bridging a fluid gearing of the hydrokinetic type (control of torque converter lock-up clutches F16H 61/14)

47/00 Combinations of mechanical gearing with fluid clutches or fluid gearing (conjoint control of driveline clutches and change-speed gearing in vehicles B60W 10/02, B60W 10/10) **[2]**

47/02 . the fluid gearing being of the volumetric type
47/04 . . the mechanical gearing being of the type with members having orbital motion
47/06 . the fluid gearing being of the hydrokinetic type
47/07 . . using two or more power-transmitting fluid circuits (F16H 47/10 takes precedence) **[2]**
47/08 . . the mechanical gearing being of the type with members having orbital motion
47/10 . . . using two or more power-transmitting fluid circuits **[2]**
47/12 . . . the members with orbital motion having vanes interacting with the fluid **[2]**

48/00 Differential gearings [6]

Note

Documents relating to transfer gears are classified both in group F16H 48/02 and in groups F16H 48/06 to F16H 48/20. **[6]**

48/02 . Transfer gears for influencing drive between outputs **[6]**
48/04 . . having unequal torque transfer between two outputs **[6]**

(1) When classifying in groups F16H 48/06 to F16H 48/20, classification is made in the last appropriate place. **[8]**

(2) When classifying in groups F16H 48/06 to F16H 48/20, constructional features of differential gearings not identified by the classification according to Note (1), and which are considered to represent information of interest for search, may also be classified. Such non-obligatory classification should be given as "additional information". **[8]**

48/06 . with gears having orbital motion **[6]**
48/08 . . with orbital conical gears **[6]**
48/10 . . with orbital spur gears **[6]**
48/12 . without gears having orbital motion **[6]**
48/14 . . with cams **[6]**
48/16 . . with freewheels **[6]**
48/18 . . with fluid gearing **[6]**
48/20 . Arrangements for suppressing or influencing the differential action, e.g. locking devices **[6]**
48/22 . . using friction clutches or brakes **[6]**
48/24 . . using positive clutches or brakes **[6]**
48/26 . . using fluid action, e.g. viscous clutches **[6]**
48/28 . . using self-locking gears **[6]**
48/30 . . using externally-actuatable locking devices **[6]**

49/00 Other gearing

Details of gearing or mechanisms

51/00 Levers of gearing mechanisms (shafts, Bowden mechanisms, cranks, eccentrics, bearings, pivotal connections, crossheads, connecting-rods F16C; manipulating levers G05G)

51/02 . adjustable

53/00 Cams or cam-followers, e.g. rollers for gearing mechanisms (shafts, Bowden mechanisms, cranks, eccentrics, bearings, pivotal connections, crossheads, connecting-rods F16C; cams specially adapted for reciprocating-piston liquid engines F03C 1/30)

53/02 . Single-track cams for single-revolution cycles; Camshafts with such cams
53/04 . . Adjustable cams

53/06 . Cam-followers (F16H 53/08 takes precedence)
53/08 . Multi-track cams, e.g. for cycles consisting of several revolutions; Cam-followers specially adapted for such cams

55/00 Elements with teeth or friction surfaces for conveying motion; **Worms, pulleys or sheaves for gearing mechanisms** (of screw-and-nut gearing F16H 25/00; shafts, Bowden mechanisms, cranks, eccentrics, bearings, pivotal connections, crossheads, connecting-rods F16C; chains, belts F16G; pulley-blocks for lifting or hauling appliances B66D 3/04) **[4]**

55/02 . Toothed members; Worms
55/06 . . Use of materials; Use of treatments of toothed members or worms to affect their intrinsic material properties **[3]**
55/08 . . Profiling **[3]**
55/10 . . Constructively simple tooth shapes, e.g. shaped as pins, as balls **[3]**
55/12 . . with body or rim assembled out of detachable parts **[3]**
55/14 . . Construction providing resilience or vibration-damping (F16H 55/06 takes precedence) **[3]**
55/16 . . . relating to teeth only **[3]**
55/17 . . Toothed wheels (worm wheels F16H 55/22; chain wheels F16H 55/30) **[3]**
55/18 . . . Special devices for taking-up backlash
55/20 . . . . for bevel gears
55/22 . . for transmissions with crossing shafts, especially worms, worm-gears (bevel gears, crown wheels, helical gears F16H 55/17)
55/24 . . . Special devices for taking up backlash
55/26 . . Racks
55/28 . . . Special devices for taking up backlash
55/30 . . Chain wheels (specially adapted for cycles B62M)
55/32 . Friction members (friction surfaces F16D 69/00)
55/34 . . Non-adjustable friction discs
55/36 . . Pulleys (with features essential for adjustment F16H 55/52)
55/38 . . . Means or measures for increasing adhesion (in general F16D 69/00)
55/40 . . . with spokes (F16H 55/48 takes precedence)
55/42 . . . Laminated pulleys
55/44 . . . Sheet-metal pulleys
55/46 . . . Split pulleys
55/48 . . . manufactured exclusively or in part of non-metallic material, e.g. plastics (F16H 55/38, F16H 55/42, F16H 55/46 take precedence)
55/49 . . . Features essential to V-belt pulleys **[2]**
55/50 . . . Features essential to rope pulleys
55/52 . . Pulleys or friction discs of adjustable construction
55/54 . . . of which the bearing parts are radially adjustable
55/56 . . . of which the bearing parts are relatively axially adjustable

57/00 General details of gearing (of fluid gearing F16H 39/00 to F16H 43/00; of screw-and-nut gearing F16H 25/00; shafts, Bowden mechanisms, cranks, eccentrics, bearings, pivotal connections, crossheads, connecting-rods F16C)

57/02 . Gear-boxes; Mounting gearing therein
57/04 . Features relating to lubrication or cooling (control of lubrication or cooling in hydrostatic gearing F16H 61/4165) **[1,2010.01]**
57/05 . . of chains (for conveyers B65G 45/08)
57/08 . of gearings with members having orbital motion
57/10 . . Braking arrangements
57/12 . Arrangements for adjusting or for taking-up backlash not provided for elsewhere **[2]**

Control of gearing conveying rotary motion [5]

(1) Attention is drawn to the Notes following the title of subclass B60W.

(2) In groups F16H 59/00 to F16H 63/00, clutches positioned within a gearbox are considered as comprising part of the gearings. **[5]**

(3) In groups F16H 59/00 to F16H 63/00, the following terms or expressions are used with the meaning indicated:
- "final output element" means the final element which is moved to establish a gear ratio, i.e. which achieves the linking between two power transmission means, e.g. reverse idler gear, gear cluster, coupling sleeve, apply piston of a hydraulic clutch;
- "mechanism" means a kinematic chain consisting either of a single element or alternatively of a series of elements, the position of each point on the kinematic chain being derivable from the position of any other point on the chain, and therefore, for a given position of a point on one of the elements forming the kinematic chain there is only one position for each of the other points on the element or series of elements forming the kinematic chain;
- "final output mechanism" means the mechanism which includes the final output element;
- "actuating mechanism" means the mechanism, the movement of which causes the movement of another mechanism by being in mutual contact;
- "final actuating mechanism" means the mechanism actuating the final output mechanism. **[5]**

(4) Combinations of features individually covered by group F16H 61/00 and one or both of groups F16H 59/00 and F16H 63/00 are classified in group F16H 61/00. **[5]**

(5) Combinations of features individually covered by groups F16H 59/00 and F16H 63/00 are classified in group F16H 63/00. **[5]**

(6) When classifying in groups F16H 59/00 to F16H 63/00, control inputs or types of gearing which are not identified by the classification according to Notes (4) and (5), and which are considered to represent information of interest for search, may also be classified. Such non-obligatory classification should be given as "additional information", e.g. selected from subgroup F16H 61/66 relating to the type of gearing controlled or from group F16H 59/00 relating to control inputs. **[8]**

59/00 Control inputs to change-speed- or reversing-gearings for conveying rotary motion [5]

59/02 . Selector apparatus **[5]**
59/04 . . Ratio selector apparatus **[5]**
59/06 . . . the ratio being infinitely variable **[5]**
59/08 . . Range selector apparatus **[5]**
59/10 . . . comprising levers **[5]**
59/12 . . . comprising push button devices **[5]**
59/14 . Inputs being a function of torque or torque demand **[5]**
59/16 . . Dynamometric measurement of torque **[5]**

59/18 . . dependent on the position of the accelerator pedal **[5]**
59/20 . . . Kickdown **[5]**
59/22 . . . Idle position **[5]**
59/24 . . dependent on the throttle opening **[5]**
59/26 . . dependent on pressure **[5]**
59/28 . . . Gasifier pressure in gas turbines **[5]**
59/30 . . . Intake manifold vacuum **[5]**
59/32 . . . Supercharger pressure in internal combustion engines **[5]**
59/34 . . dependent on fuel feed **[5]**
59/36 . Inputs being a function of speed **[5]**
59/38 . . of gearing elements **[5]**
59/40 . . . Output shaft speed **[5]**
59/42 . . . Input shaft speed **[5]**
59/44 . . dependent on machine speed (F16H 59/46 takes precedence) **[5]**
59/46 . . dependent on a comparison between speeds **[5]**
59/48 . Inputs being a function of acceleration **[5]**
59/50 . Inputs being a function of the status of the machine, e.g. position of doors or safety belts **[5]**
59/52 . . dependent on the weight of the machine, e.g. change in weight resulting from passengers boarding a bus **[5]**
59/54 . . dependent on signals from the brakes, e.g. parking brakes **[5]**
59/56 . . dependent on signals from the main clutch **[5]**
59/58 . . dependent on signals from the steering **[5]**
59/60 . Inputs being a function of ambient conditions **[5]**
59/62 . . Atmospheric pressure **[5]**
59/64 . . Atmospheric temperature **[5]**
59/66 . . Road conditions, e.g. slope, slippery **[5]**
59/68 . Inputs being a function of gearing status **[5]**
59/70 . . dependent on the ratio established **[5]**
59/72 . . dependent on oil characteristics, e.g. temperature, viscosity **[5]**
59/74 . Inputs being a function of engine parameters (F16H 59/14 takes precedence) **[5]**
59/76 . . Number of cylinders operating **[5]**
59/78 . . Temperature **[5]**

61/00 Control functions within change-speed- or reversing-gearings for conveying rotary motion [5]

61/02 . characterised by the signals used **[5]**
61/04 . Smoothing ratio shift **[5]**
61/06 . . by controlling rate of change of fluid pressure **[5]**
61/08 . . Timing control **[5]**
61/10 . Regulating shift hysteresis **[5]**
61/12 . Detecting malfunction or potential malfunction, e.g. fail safe (in control of hydrostatic gearing F16H 61/4192) **[5,2010.01]**
61/14 . Control of torque converter lock-up clutches **[5]**
61/16 . Inhibiting shift during unfavourable conditions (F16H 61/18 takes precedence) **[5]**
61/18 . Preventing unintentional or unsafe shift (constructional features of the final output mechanisms F16H 63/30) **[5]**
61/20 . Preventing gear creeping **[5]**
61/21 . Providing engine brake control **[7]**
61/22 . Locking (F16H 63/34 takes precedence) **[5]**
61/24 . Providing feel, e.g. to enable selection **[5]**
61/26 . Generation or transmission of movements for final actuating mechanisms **[5]**

(1) The generation or transmission of movements comprising only the selector apparatus, is classified in group F16H 59/00. **[5]**
(2) The generation or transmission of movements, when part of the final output mechanisms, is classified in group F16H 63/00. **[5]**

61/28 . . with at least one movement of the final actuating mechanism being caused by a non-mechanical force, e.g. power-assisted **[5]**
61/30 . . . Hydraulic motors therefor **[5]**
61/32 . . . Electric motors therefor **[5]**
61/34 . . comprising two mechanisms, one for the preselection movement, and one for the shifting movement (F16H 61/36 takes precedence) **[5]**
61/36 . . with at least one movement being transmitted by a cable **[5]**
61/38 . Control of exclusively fluid gearing **[5]**
61/40 . . hydrostatic (involving modification of the gearing F16H 39/02, F16H 39/04) **[5,2010.01]**
61/4008 . . . Control of circuit pressure **[2010.01]**
61/4017 . . . . Control of high pressure, e.g. avoiding excess pressure by a relief valve **[2010.01]**
61/4026 . . . . Control of low pressure **[2010.01]**
61/4035 . . . Control of circuit flow **[2010.01]**
61/4043 . . . Control of a bypass valve **[2010.01]**
61/4052 . . . . by using a variable restriction, e.g. an orifice valve **[2010.01]**
61/4061 . . . Control related to directional control valves, e.g. change-over valves, for crossing the feeding conduits (forward reverse switching by using swash plate F16H 61/438) **[2010.01]**
61/4069 . . . Valves related to the control of neutral, e.g. shut off valves (zero tilt rotation holding means F16H 61/439) **[2010.01]**
61/4078 . . . Fluid exchange between hydrostatic circuits and external sources or consumers **[2010.01]**
61/4096 . . . . with pressure accumulators **[2010.01]**
61/4104 . . . . Flushing, e.g. by using flushing valves or by connection to exhaust **[2010.01]**
61/4131 . . . . Fluid exchange by aspiration from reservoirs, e.g. sump **[2010.01]**
61/4139 . . . . Replenishing or scavenging pumps, e.g. auxiliary charge pumps **[2010.01]**
61/4148 . . . Open loop circuits **[2010.01]**
61/4157 . . . Control of braking, e.g. preventing pump over-speeding when motor acts as a pump **[2010.01]**
61/4165 . . . Control of cooling or lubricating **[2010.01]**
61/4174 . . . Control of venting, e.g. removing trapped air **[2010.01]**
61/4183 . . . Preventing or reducing vibrations or noise, e.g. avoiding cavitations **[2010.01]**
61/4192 . . . Detecting malfunction or potential malfunction, e.g. fail safe **[2010.01]**
61/42 . . . involving adjustment of a pump or motor with adjustable output or capacity **[5,2010.01]**
61/421 . . . . Motor capacity control by electro-hydraulic control means, e.g. using solenoid valves **[2010.01]**
61/423 . . . . Motor capacity control by fluid pressure control means **[2010.01]**
61/425 . . . . Motor capacity control by electric actuators **[2010.01]**

61/427 . . . . Motor capacity control by mechanical control means, e.g. by levers or pedals **[2010.01]**

61/431 . . . . Pump capacity control by electro-hydraulic control means, e.g. using solenoid valve **[2010.01]**

61/433 . . . . Pump capacity control by fluid pressure control means **[2010.01]**

61/435 . . . . Pump capacity control by electric actuators **[2010.01]**

61/437 . . . . Pump capacity control by mechanical control means, e.g. by levers or pedals **[2010.01]**

61/438 . . . . Control of forward-reverse switching, e.g. control of the swash plate causing discharge in two directions (using a directional control valve F16H 61/4061) **[2010.01]**

61/439 . . . . Control of the neutral position, e.g. by zero tilt rotation holding means (using a neutral valve or a shutoff valve F16H 61/4069) **[2010.01]**

61/44 . . . with more than one pump or motor unit in operation **[5]**

61/444 . . . . by changing the number of pump or motor units in operation **[2010.01]**

61/448 . . . . Control circuits for tandem pumps or motors **[2010.01]**

61/452 . . . . Selectively controlling multiple pumps or motors, e.g. switching between series or parallel **[2010.01]**

61/456 . . . . Control of the balance of torque or speed between pumps or motors (hydrostatic differentials F16H 48/18) **[2010.01]**

61/46 . . . Automatic regulation in accordance with output requirements **[5,2010.01]**

61/462 . . . . for achieving a target speed ratio **[2010.01]**

61/465 . . . . for achieving a target input speed **[2010.01]**

61/468 . . . . for achieving a target input torque **[2010.01]**

61/47 . . . . for achieving a target output speed **[2010.01]**

61/472 . . . . for achieving a target output torque **[2010.01]**

61/475 . . . . for achieving a target power, e.g. input power or output power **[2010.01]**

61/478 . . . . for preventing overload, e.g. high pressure limitation **[2010.01]**

61/48 . . hydrodynamic **[5]**

61/50 . . . controlled by changing the flow, force, or reaction of the liquid in the working circuit, while maintaining a completely filled working circuit **[5]**

61/52 . . . . by altering the position of blades **[5]**

61/54 . . . . . by means of axially-shiftable blade runners **[5]**

61/56 . . . . . to change the blade angle **[5]**

61/58 . . . . by change of the mechanical connection of, or between, the runners **[5]**

61/60 . . . . . exclusively by the use of freewheel clutches **[5]**

61/62 . . . . . involving use of a speed-changing gearing or of a clutch in the connection between runners (F16H 45/02, F16H 61/60 take precedence) **[5]**

61/64 . . . controlled by changing the amount of liquid in the working circuit **[5]**

61/66 . specially adapted for continuously variable gearings (F16H 61/38 takes precedence; orbital toothed gearings with a secondary drive in order to vary the speed continuously F16H 3/72) **[8]**

61/662 . . with endless flexible members **[8]**

61/664 . . Friction gearings **[8]**

61/68 . specially adapted for stepped gearings **[8]**

61/682 . . with interruption of drive **[8]**

61/684 . . without interruption of drive **[8]**

61/686 . . . with orbital gears **[8]**

61/688 . . . with two inputs, e.g. selection of one of two torque-flow paths by clutches **[8]**

61/70 . specially adapted for change-speed gearing in group arrangement, i.e. with separate change-speed gear trains arranged in series, e.g. range or overdrive-type gearing arrangements **[8]**

63/00 Control outputs to change-speed- or reversing-gearings for conveying rotary motion [5]

63/02 . Final output mechanisms therefor; Actuating means for the final output mechanisms **[5]**

63/04 . . a single final output mechanism being moved by a single final actuating mechanism **[5]**

63/06 . . . the final output mechanism having an indefinite number of positions **[5]**

63/08 . . Multiple final output mechanisms being moved by a single common final actuating mechanism **[5]**

63/10 . . . the final actuating mechanism having a series of independent ways of movement, each way of movement being associated with only one final output mechanism **[5]**

63/12 . . . . two or more ways of movement occurring simultaneously **[5]**

63/14 . . . the final output mechanisms being successively actuated by repeated movement of the final actuating mechanism **[5]**

63/16 . . . the final output mechanisms being successively actuated by progressive movement of the final actuating mechanism **[5]**

63/18 . . . . the final actuating mechanism comprising cams **[5]**

63/20 . . . with preselection and subsequent movement of each final output mechanism by movement of the final actuating mechanism in two different ways, e.g. guided by a shift gate **[5]**

63/22 . . . . the final output mechanisms being simultaneously moved by the final actuating mechanism **[5]**

63/24 . . each of the final output mechanisms being moved by only one of the various final actuating mechanisms **[5]**

63/26 . . . some of the movements of the final output mechanisms being caused by another final output mechanism **[5]**

63/28 . . two or more final actuating mechanisms moving the same final output mechanism **[5]**

63/30 . . Constructional features of the final output mechanisms **[5]**

63/32 . . . Gear shifter yokes **[5]**

63/34 . . . Locking or disabling mechanisms **[5]**

63/36 . . . . Interlocking devices **[5]**

63/38 . . . Detents **[5]**

63/40 . comprising signals other than signals for actuating the final output mechanisms **[5]**

63/42 . . Ratio indicator devices **[5]**

63/44 . . Signals to the control unit of auxiliary gearing **[5]**

63/46 . . Signals to a clutch outside the gearbox **[5]**
63/48 . . Signals to a parking brake **[5]**
63/50 . . Signals to an engine or motor **[7]**

F16J PISTONS; CYLINDERS; PRESSURE VESSELS IN GENERAL; SEALINGS

Note

Attention is drawn to the following places:

A47J	27/08	Pressure cookers
E04B	1/68	Sealing building joints
E05C	9/00	Multi-point fastening of wings in general
F01B		Machines or engines in general or of reciprocating type, e.g. cylinders peculiar to steam engines F01B 31/28
F02F	1/00	Cylinders for combustion engines
F02F	3/00	Pistons for combustion engines
F04D	29/08	Sealings of non-positive displacement pumps
F17B	1/04	Sealing devices for sliding parts of gas holders of variable capacity
F28F	9/04	Arrangements for sealing elements into header boxes or end plates of heat-exchangers.

Subclass index

1/00 **Pistons**; **Trunk pistons**; **Plungers** (bellows pistons F16J 3/06; piston-rings or seats therefor F16J 9/00; rotary pistons, e.g. for "Wankel" type engines, F01C; specific for combustion engines, i.e. constructed to withstand high temperature or modified for guiding, igniting, vaporising, or otherwise treating the charge, F02F; pistons specially adapted for reciprocating-piston liquid engines F03C 1/28; for pumps F04B; floats F16K 33/00)

1/01 . characterised by the use of particular materials (F16J 1/02 takes precedence) **[3]**
1/02 . Bearing surfaces
1/04 . Resilient guiding parts, e.g. skirts, particularly for trunk pistons
1/06 . . with separate expansion members; Espansion members
1/08 . Constructional features providing for lubrication
1/09 . with means for guiding fluids (F16J 1/08 takes precedence) **[3]**
1/10 . Connection to driving members
1/12 . . with piston-rods, i.e. rigid connections
1/14 . . with connecting-rods, i.e. pivotal connections
1/16 . . . with gudgeon-pin; Gudgeon-pins
1/18 . . . . Securing of gudgeon-pins
1/20 . . . with rolling contact, other than in ball or roller bearings
1/22 . . . with universal joint, e.g. ball-joint
1/24 . . designed to give the piston some rotary movement about its axis

3/00 **Diaphragms**; **Bellows**; **Bellows pistons** (connection of valves to inflatable elastic bodies B60C 29/00; bellows or the like used in instruments G12B 1/04; diaphragms for electromechanical transducers H04R 7/00)

3/02 . Diaphragms **[2]**
3/04 . Bellows **[2]**
3/06 . Bellows pistons **[2]**

7/00 **Piston-rods, i.e. rods rigidly connected to the piston** (connecting-rods or like links pivoted at both ends F16C 7/00)

9/00 **Piston-rings, seats therefor**; **Ring sealings of similar construction in general** (other sealings between pistons and cylinders F16J 3/06, F16J 15/16; tools for mounting or removing piston-rings or the like B25B; piston sealing arrangements on brake master cylinders B60T 11/236) **[2,5]**

9/02 . L-section rings
9/04 . Helical rings
9/06 . using separate springs expanding the rings; Springs therefor
9/08 . with expansion obtained by pressure of the medium
9/10 . Special members for adjusting the rings
9/12 . Details
9/14 . . Joint-closures
9/16 . . . obtained by stacking of rings
9/18 . . . with separate bridge-elements
9/20 . . Rings with special cross-section (L-section rings F16J 9/02); Oil-scraping rings
9/22 . . Rings for preventing wear of grooves or like seatings
9/24 . . Members preventing rotation of rings in grooves
9/26 . characterised by the use of particular materials **[3]**
9/28 . . of non-metals **[3]**

10/00 **Engine or like cylinders** (pressure vessels in general F16J 12/00; cylinders for engines or other apparatus of particular kinds, see the appropriate subclasses, e.g. for combustion engines F02F); **Features of hollow, e.g. cylindrical, bodies in general [3]**

10/02 . Cylinders designed to receive moving pistons or plungers **[3]**
10/04 . . Running faces; Liners **[3]**

12/00 **Pressure vessels in general** (covers therefor F16J 13/00; for particular applications, see the relevant subclasses, e.g. B01J, F17C, G21C) **[3]**

13/00 **Covers or similar closure members for pressure vessels in general** (for engine or like cylinders F16J 10/00; sealings F16J 15/02; covers for box-like containers B65D 43/00; devices for securing or retaining closure members B65D 45/00; closures for containers not otherwise provided for B65D 51/00; manholes, covers for large containers B65D 90/10; gates or closures for large containers B65D 90/54; for vessels for containing or storing compressed, liquefied or solidified gases F17C 13/06; steam boilers F22B)

13/02 . Detachable closure members; Means for tightening closures (F16J 13/16, F16J 13/22 take precedence) **[3]**
13/04 . . attached with a bridge member
13/06 . . attached only by clamps along the circumference
13/08 . . attached by one or more members actuated to project behind a part or parts of the frame (similar constructions for doors or windows E05C 9/00)
13/10 . . attached by means of a divided ring
13/12 . . attached by wedging action by means of screw-thread, interrupted screw-thread, bayonet closure, or the like
13/14 . . attached exclusively by spring action or elastic action
13/16 . Pivoted closures (F16J 13/22 takes precedence) **[3]**
13/18 . . pivoted directly on the frame
13/20 . . mounted by mobile fastening on swinging arms
13/22 . with movement parallel to the plane of the opening **[3]**
13/24 . with safety devices, e.g. to prevent opening prior to pressure release **[3]**

15/00 **Sealings** (sealing arrangements for vehicle windows, windscreens, non-fixed roofs, doors, or similar devices B60J 10/00; sealing or packing elements for container closures B65D 53/00; sealing arrangements in rotary-piston machines or engines F01C 19/00; sealings in non-positive-displacement machines or engines F01D 11/00; arrangements of sealings in combustion engines F02F 11/00; sealing arrangements in rotary-piston pumps F04C 27/00; sealing lead-in or lead-through insulators H01B 17/30) **[5]**

15/02 . between relatively-stationary surfaces (F16J 15/46, F16J 15/48 take precedence)
15/04 . . without packing between the surfaces, e.g. with ground surfaces, with cutting edge
15/06 . . with solid packing compressed between sealing surfaces
15/08 . . . with exclusively metal packing
15/10 . . . with non-metallic packing
15/12 . . . . with metal reinforcement or covering
15/14 . . by means of granular or plastic material, or fluid
15/16 . between relatively-moving surfaces (F16J 15/50, F16J 15/52 take precedence; bellows pistons F16J 3/06; piston-rings or ring sealings of similar construction in general F16J 9/00; spindle sealings for valves F16K 41/00) **[2]**
15/18 . . with stuffing-boxes for elastic or plastic packings
15/20 . . . Packing materials therefor
15/22 . . . . shaped as strands, ropes, threads, ribbons, or the like
15/24 . . . with radially or tangentially compressed packing
15/26 . . with stuffing-boxes for rigid sealing rings
15/28 . . . with sealing rings made of metal
15/30 . . . with sealing rings made of carbon
15/32 . . with elastic sealing lip
15/34 . . with slip-ring pressed against a more or less radial face on one member
15/36 . . . connected by a diaphragm to the other member
15/38 . . . sealed by a packing **[2]**
15/40 . . by means of fluid
15/42 . . . kept in sealing position by centrifugal force
15/43 . . . kept in sealing position by magnetic force **[6]**
15/44 . Free-space packings
15/447 . . Labyrinth packings **[3]**
15/453 . . . characterised by the use of particular materials **[3]**
15/46 . with packing ring expanded or pressed into place by fluid pressure, e.g. inflatable packings (connection of valves to inflatable elastic bodies B60C 29/00; specially adapted for tube connections F16L)
15/48 . . influenced by the pressure within the member to be sealed
15/50 . between relatively-movable members, by means of a sealing without relatively-moving surfaces, e.g. fluid-tight sealings for transmitting motion through a wall
15/52 . . by means of sealing bellows or diaphragms (connection of valves to inflatable elastic bodies B60C 29/00)
15/53 . using magnetic means **[6]**
15/54 . Other sealings for rotating shafts
15/56 . Other sealings for reciprocating rods

F16K VALVES; TAPS; COCKS; ACTUATING-FLOATS; DEVICES FOR VENTING OR AERATING

(1) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems". **[7]**

(2) Attention is drawn to Note (2) following the title of subclass G05D and also the subdivisions of that subclass, according to which pressure regulators and flow regulators, e.g. flow regulating valves with pressure compensator, even with the whole regulating system contained in a valve, operating with or without auxiliary power, are covered by groups G05D 16/00 or G05D 7/00, respectively. However, details of the valve parts, per se, are classified in the appropriate groups of this subclass. **[2]**

(3) Attention is drawn to the following places:

A47J	27/09	Safety devices for pressure cookers
A47J	31/46	Dispensing spouts, drain valves or like beverage-making apparatus
A61B	5/0235	Valves specially adapted for measuring pressure in heart or blood vessels
A61F	2/24	Heart valves
A61M	16/20	Valves specially adapted for medical respiratory devices

A61M	39/00	Tube connectors, tube couplings, valves or branch units specially adapted for medical use in general
A62B	9/02	Valves for respiratory apparatus
A62B	18/10	Valves for breathing masks or helmets
A62C		Fire extinguishers
B05B		Nozzles, spray heads or other discharge apparatus for spraying or atomising
B60C	29/00	Arrangements of tyre-inflating valves relative to tyres or wheel rims; Connection of valves to wheel rims, tyres or other inflatable elastic bodies
B60G	17/048	Valves specially adapted for adjusting vehicle fluid-spring characteristics
B60T		Valves specially adapted for vehicle brake control systems
B62D	5/08	Vehicle power-assisted steering characterised by the type of valve used
B63B	7/00,	Arrangement of inflating valves for floatable live-saving equipment
B63C	9/00	
B65D	47/04	Container closures with discharging valves
B65D	83/28,	Nozzles or valves specially adapted for aerosol containers
B65D	83/44	
B65D	90/32	Safety valves for large containers
B65D	90/54	Gates or closures on large containers
B67C	3/28	Flow control devices for bottling liquids
B67D		Dispensing, delivering or transferring liquids
E02B	8/00	Details, e.g. valves, of barrages or weirs
E02B	13/02	Closures for irrigation conduits
E03B	9/02	Arrangement of valves in hydrants
E03D		Flushing valves for water-closets or urinals
E05F	3/12	Valve arrangement in door closers
E21B	21/10	Valve arrangements in drilling-fluid circulation systems
E21B	34/00	Valve arrangements for boreholes or wells
F01B	25/10	Working-fluid valves for controlling machines or engines in general or of positive-displacement type
F01D	17/10	Final actuators for controlling non-positive displacement machines or engines
F01L		Cyclically operated valves for machines or engines
F02D	9/08	Throttle valves for controlling combustion engines
F02K	9/58	Propellant feed valves for rocket-engines
F02M		Carburettors, fuel injection
F02M	59/46	Valves for fuel injection pumps
F04		Pumps
F16F	9/34	Valves for shock absorbers
F16L	29/00,	Pipe joints or quick-acting couplings with fluid cut-off means
F16L	37/28	
F16L	55/00	Arrangement of valves in pipes
F16L	55/055	Valves specially adapted to prevent or minimise the effect of water hammer
F16L	55/46	Launching devices for pigs or moles
F16N	23/00	Check valves for lubrication systems
F17C	13/04	Arrangement of valves in pressure vessels
F22B	37/44	Arrangement of safety valves on steam boilers
F22D	5/34	Application of valves to automatic water-feed in boiler
F23L	13/00	Valves for air supply control to burners
F23Q	2/173	Valves for lighters with gaseous fuel and adjustable flame
F24C	3/12,	Arrangement of valves on stoves or ranges
F24C	5/16	
F24F		Air conditioning; Ventilation
F25B	41/04	Disposition of fluid circulation valves in refrigeration machines
G05D		Controlling non-electric variables
G10B	3/06	Valves for organs
G10D	9/04	Valves for other wind-actuated musical instruments.

Subclass index

CONSTRUCTIONAL TYPES

Lift-valves, gate valves or sliding valves, taps, diaphragm cut-off apparatus ..... 1/00 to 7/00

Multiple-way valves 11/00

Other constructional types of cut-off apparatus, arrangements for cutting off 13/00

FUNCTIONAL TYPES

Check valves; safety or equalising valves; arrangements for mixing fluids 15/00; 17/00; 11/00

Fluid-delivery valves; valves for preventing drip from nozzles 21/00; 23/00

For venting or aerating enclosures 24/00

DETAILS OR GENERAL MEANS

Handling or control 29/00, 31/00, 39/00, 43/00

Auxiliary means 47/00, 49/00

Constructional types

Note

In groups F16K 1/00 to F16K 13/00, an initial seal breaking or final sealing movement which is different from the opening or closing movement of the valve is not considered in determining the movement to be classified. **[2]**

1/00 **Lift valves, i.e. cut-off apparatus with closure members having at least a component of their opening and closing motion perpendicular to the closing faces** (diaphragm valves F16K 7/00)

1/02 . with screw-spindle (F16K 1/12 to F16K 1/28 take precedence; actuating mechanisms with screw-spindles F16K 31/50)
1/04 . . with a cut-off member rigid with the spindle, e.g. main valves
1/06 . . Special arrangements for improving the flow, e.g. special shape of passages or casings
1/08 . . . in which the spindle is perpendicular to the general direction of flow
1/10 . . . in which the spindle is inclined to the general direction of flow
1/12 . with streamlined valve member around which the fluid flows when the valve is opened
1/14 . with ball-shaped valve members (check valves F16K 15/04)
1/16 . with pivoted closure members
1/18 . . with pivoted discs or flaps
1/20 . . . with axis of rotation arranged externally of valve member
1/22 . . . with axis of rotation crossing the valve member, e.g. butterfly valves
1/226 . . . . Shape or arrangement of the sealing
1/228 . . . . . Movable sealing bodies
1/24 . with valve members that, on opening of the valve, are initially lifted from the seat and next are turned around an axis parallel to the seat
1/26 . . Shape or arrangement of the sealing
1/28 . . . Movable sealing bodies
1/30 . specially adapted for pressure containers
1/32 . Details (details of more general applicability F16K 25/00 to F16K 51/00)
1/34 . . Cutting-off parts (F16K 1/06, F16K 1/12, F16K 1/14, F16K 1/26 take precedence)
1/36 . . . Valve members (for double-seat valves F16K 1/44)
1/38 . . . . of conical shape
1/40 . . . . of helical shape
1/42 . . . Valve seats (for double-seat valves F16K 1/44)
1/44 . . . Details of seats or valve members of double-seat valves
1/46 . . . Attachment of sealing rings
1/48 . . Attaching valve members to valve-spindles **[4]**
1/50 . . Preventing rotation of valve members
1/52 . . Means for additional adjustment of the rate of flow
1/54 . . Arrangements for modifying the way in which the rate of flow varies during the actuation of the valve

3/00 **Gate valves or sliding valves, i.e. cut-off apparatus with closing members having a sliding movement along the seat for opening and closing** (F16K 5/00 takes precedence; in barrages or weirs E02B 8/04)

3/02 . with flat sealing faces; Packings therefor
3/03 . . with a closure member in the form of an iris-diaphragm
3/04 . . with pivoted closure members
3/06 . . . in the form of closure plates arranged between supply and discharge passages (F16K 3/10 takes precedence)
3/08 . . . . with circular closure plates rotatable around their centres
3/10 . . . with special arrangements for separating the sealing faces or for pressing them together
3/12 . . with wedge-shaped arrangements of sealing faces
3/14 . . . with special arrangements for separating the sealing faces or for pressing them together
3/16 . . with special arrangements for separating the sealing faces or for pressing them together (F16K 3/10, F16K 3/14 take precedence)
3/18 . . . by movement of the closure members
3/20 . . . by movement of the seats
3/22 . with sealing faces shaped as surfaces of solids of revolution (F16K 13/02 takes precedence; with resilient valve members F16K 3/28)
3/24 . . with cylindrical valve members
3/26 . . . with fluid passages in the valve member
3/28 . with resilient valve members
3/30 . Details
3/312 . . Line blinds
3/314 . . Forms or constructions of slides; Attachment of the slide to the spindle
3/316 . . Guiding of the slide
3/32 . . Means for additional adjustment of the rate of flow
3/34 . . Arrangements for modifying the way in which the rate of flow varies during the actuation of the valve
3/36 . . Features relating to lubrication

5/00 **Taps or cocks comprising only cut-off apparatus having at least one of the sealing faces shaped as a more or less complete surface of a solid of revolution, the opening and closing movement being predominantly rotary** (taps of the lift-valve type F16K 1/00)

5/02 . with plugs having conical surfaces; Packings therefor
5/04 . with plugs having cylindrical surfaces; Packings therefor
5/06 . with plugs having spherical surfaces; Packings therefor
5/08 . Details

5/10 . . Means for additional adjustment of the rate of flow
5/12 . . Arrangements for modifying the way in which the rate of flow varies during the actuation of the valve
5/14 . . Special arrangements for separating the sealing faces or for pressing them together
5/16 . . . for plugs with conical surfaces
5/18 . . . for plugs with cylindrical surfaces
5/20 . . . for plugs with spherical surfaces
5/22 . . Features relating to lubrication

7/00 Diaphragm cut-off apparatus, e.g. with a member deformed, but not moved bodily, to close the passage (container gates or closures operating by deformation of flexible walls B65D 90/56; means for plugging pipes or hoses F16L 55/10)
7/02 . with tubular diaphragm
7/04 . . constrictable by external radial force
7/06 . . . by means of a screw-spindle, cam, or other mechanical means
7/07 . . . by means of fluid pressure
7/08 . . constrictable by twisting
7/10 . with inflatable member
7/12 . with flat, dished, or bowl-shaped diaphragm
7/14 . . arranged to be deformed against a flat seat
7/16 . . . the diaphragm being mechanically actuated, e.g. by screw-spindle or cam
7/17 . . . the diaphragm being actuated by fluid pressure
7/18 . with diaphragm secured at one side only, e.g. to be laid on the seat by rolling action
7/20 . with a compressible solid closure member

11/00 Multiple-way valves, e.g. mixing valves; **Pipe fittings incorporating such valves**; **Arrangement of valves and flow lines specially adapted for mixing fluid [4]**
11/02 . with all movable sealing faces moving as one unit
11/04 . . comprising only lift valves
11/044 . . . with movable valve members positioned between valve seats **[4]**
11/048 . . . with valve seats positioned between movable valve members **[4]**
11/052 . . . with pivoted closure members, e.g. butterfly valves **[4]**
11/056 . . . with ball-shaped valve members **[4]**
11/06 . . comprising only sliding valves
11/065 . . . with linearly sliding closure members **[4]**
11/07 . . . . with cylindrical slides **[4]**
11/072 . . . with pivoted closure members **[4]**
11/074 . . . . with flat sealing faces **[4]**
11/076 . . . . with sealing faces shaped as surfaces of solids of revolution **[4]**
11/078 . . . with pivoted and linearly movable closure members **[4]**
11/08 . . comprising only taps or cocks
11/083 . . . with tapered plug **[2]**
11/085 . . . with cylindrical plug **[2]**
11/087 . . . with spherical plug **[2]**
11/10 . with two or more closure members not moving as a unit
11/12 . . with one plug turning in another
11/14 . . operated by one actuating member, e.g. a handle (with one plug turning in another F16K 11/12)
11/16 . . . which only slides, or only turns, or only swings in one plane
11/18 . . . with separate operating movements for separate closure members
11/20 . . operated by separate actuating members (with one plug turning in another F16K 11/12)
11/22 . . . with an actuating member for each valve, e.g. interconnected to form multiple-way valves
11/24 . . . with an electromagnetically-operated valve, e.g. for washing machines

13/00 Other constructional types of cut-off apparatus (means for plugging pipes or hoses F16L 55/10); **Arrangements for cutting-off [4]**
13/02 . with both sealing faces shaped as small segments of a cylinder and the moving member pivotally mounted
13/08 . Arrangements for cutting-off **[4]**
13/10 . . by means of liquid or granular medium **[4]**

Functional types

15/00 Check valves (valves specially adapted for inflatable balls A63B 41/00)
15/02 . with guided rigid valve members
15/03 . . with a hinged closure member
15/04 . . shaped as balls
15/06 . . with guided stems
15/08 . . shaped as rings
15/10 . . . integral with, or rigidly fixed to, a common valve plate
15/12 . . . Springs for ring valves **[3]**
15/14 . with flexible valve members
15/16 . . with tongue-shaped laminae
15/18 . with actuating mechanism; Combined check valves and actuated valves
15/20 . specially designed for inflatable bodies, e.g. tyres (connecting valves to inflatable elastic bodies B60C 29/00)

17/00 Safety valves; **Equalising valves** (pressure relief devices for aerosol containers B65D 83/70)
17/02 . opening on surplus pressure on one side; closing on insufficient pressure on one side (check valves F16K 15/00)
17/04 . . spring-loaded
17/06 . . . with special arrangements for adjusting the opening pressure
17/08 . . . with special arrangements for providing a large discharge passage
17/10 . . . with auxiliary valve for fluid operation of the main valve
17/12 . . weight-loaded
17/14 . . with fracturing member
17/16 . . . with fracturing diaphragm
17/164 . . and remaining closed after return of the normal pressure
17/168 . . combined with manually-controlled valves, e.g. a valve combined with a safety valve
17/18 . opening on surplus pressure on either side
17/19 . . Equalising valves predominantly for tanks
17/192 . . . with closure member in the form of a movable liquid column
17/194 . . . weight-loaded
17/196 . . . spring-loaded
17/20 . Excess-flow valves (actuated in consequence of shock or similar extraneous influence F16K 17/36)
17/22 . . actuated by the difference of pressure between two places in the flow line
17/24 . . . acting directly on the cutting-off member

17/26 . . . . operating in either direction
17/28 . . . . operating in one direction only
17/30 . . . . . spring-loaded
17/32 . . . acting on a servo-mechanism or on a catch-releasing mechanism
17/34 . . in which the flow-energy of the flowing medium actuates the closing mechanism
17/36 . actuated in consequence of extraneous circumstances, e.g. shock, change of position
17/38 . . of excessive temperature
17/40 . with fracturing member, e.g. fracturing diaphragm, fusible joint (valves with fracturing member opening on surplus pressure on one side F16K 17/14)
17/42 . Valves preventing penetration of air in the outlet of containers for liquids

21/00 **Fluid-delivery valves** (specially adapted for aerosol containers B65D 83/44; for liquid handling B67D; for flushing devices for water-closets or the like E03D)
21/02 . providing a continuous small flow
21/04 . Self-closing valves, i.e. closing automatically after operation
21/06 . . in which the closing movement, either retarded or not, starts immediately after opening
21/08 . . . with ball-shaped closing members
21/10 . . . with hydraulic brake cylinder acting on the closure member
21/12 . . . with hydraulically-operated opening means; with arrangements for pressure relief before opening
21/14 . . with special means for preventing the self-closing
21/16 . . closing after a predetermined quantity of fluid has been delivered (F16K 21/10 takes precedence)
21/18 . . closed when a rising liquid reaches a predetermined level (float-actuated valves F16K 31/18)
21/20 . . . by means making use of air-suction through an opening closed by the rising liquid

23/00 **Valves for preventing drip from nozzles**

24/00 **Devices, e.g. valves, for venting or aerating enclosures** (equalising valves F16K 17/00; arrangement or mounting in pipes or pipe systems F16L 55/07; venting or aerating as an additional function of steam traps or like apparatus F16T; ventilation of rooms, vehicles, see the appropriate subclass, e.g. F24F) **[2]**
24/02 . the enclosure being itself a valve, tap, or cock **[2]**
24/04 . for venting only (F16K 24/02 takes precedence) **[2]**
24/06 . for aerating only (F16K 24/02 takes precedence) **[2]**

Details

Note

Details not provided for in groups F16K 25/00 to F16K 51/00 are classified in groups F16K 1/00 to F16K 24/00.

25/00 **Details relating to contact between valve members and seats** (movement of valve members other than for opening and closing F16K 29/00; sealing constructions, see the appropriate groups according to the type of valve)
25/02 . Arrangements using fluid issuing from valve members or seats
25/04 . Arrangements for preventing erosion, not otherwise provided for

27/00 **Construction of housings** (methods for welding housings B23K); **Use of materials therefor**
27/02 . of lift valves (for reducing the flow resistance of screw-spindle lift-valves F16K 1/06)
27/04 . of sliding valves
27/06 . of taps or cocks
27/07 . of cutting-off parts of tanks, e.g. tank-cars **[4]**
27/08 . Guiding yokes for spindles; Means for closing housings; Dust caps, e.g. for tyre valves
27/10 . Welded housings
27/12 . Covers for housings

29/00 **Arrangements for movement of valve members other than for opening or closing the valve, e.g. for grinding-in, for preventing sticking**
29/02 . providing for continuous motion

31/00 **Operating means**; **Releasing devices**
31/02 . electric; magnetic
31/04 . . using a motor
31/05 . . . specially adapted for operating hand-operated valves or for combined motor and hand operation
31/06 . . using a magnet
31/08 . . . using a permanent magnet
31/10 . . . with additional mechanism between armature and closure member
31/11 . . . . with additional hand operating means **[2]**
31/12 . actuated by fluid (fluid-actuated check valves F16K 15/00; fluid-actuated safety valves F16K 17/00)
31/122 . . the fluid acting on a piston (F16K 31/143, F16K 31/163, F16K 31/363, F16K 31/383 take precedence) **[2]**
31/124 . . . servo actuated **[2]**
31/126 . . the fluid acting on a diaphragm, bellows, or the like (F16K 31/145, F16K 31/165, F16K 31/365, F16K 31/385 take precedence) **[2]**
31/128 . . . servo actuated **[2]**
31/14 . . for mounting on, or in combination with, hand-actuated valves
31/143 . . . the fluid acting on a piston
31/145 . . . the fluid acting on a diaphragm
31/16 . . with a mechanism, other than pulling- or pushing-rod, between fluid motor and closure member (with float F16K 31/18)
31/163 . . . the fluid acting on a piston
31/165 . . . the fluid acting on a diaphragm
31/18 . . actuated by a float (floats F16K 33/00; float-actuated valves in steam-traps F16T 1/20, in boilers F22D 5/08)
31/20 . . . actuating a lift valve
31/22 . . . . with the float rigidly connected to the valve
31/24 . . . . with a transmission with parts linked together from a single float to a single valve
31/26 . . . . . with the valve guided for rectilinear movement and the float attached to a pivoted arm
31/28 . . . . with two or more floats actuating one valve
31/30 . . . actuating a gate valve or sliding valve
31/32 . . . actuating a tap or cock
31/34 . . . acting on pilot valve controlling the cut-off apparatus
31/36 . . in which fluid from the conduit is constantly supplied to the fluid motor
31/363 . . . the fluid acting on a piston (F16K 31/38 takes precedence)

31/365 . . . the fluid acting on a diaphragm
31/38 . . . in which the fluid works directly on both sides of the fluid motor, one side being connected by means of a restricted passage and the motor being actuated by operating a discharge from that side (F16K 31/40 takes precedence)
31/383 . . . . the fluid acting on a piston
31/385 . . . . the fluid acting on a diaphragm
31/40 . . . with electrically-actuated member in the discharge of the motor
31/42 . . by means of electrically-actuated members in the supply or discharge conduits of the fluid motor (F16K 31/40 takes precedence)
31/44 . Mechanical actuating means
31/46 . . for remote operation
31/48 . . actuated by mechanical timing-device, e.g. with dash-pot (self-closing valves F16K 21/16)
31/50 . . with screw-spindle
31/52 . . with crank, eccentric, or cam
31/524 . . . with a cam
31/528 . . . with pin and slot
31/53 . . with toothed gearing
31/54 . . . with pinion and rack
31/56 . . without stable intermediate position, e.g. with snap action
31/58 . . comprising a movable discharge-nozzle
31/60 . . Handles
31/62 . . Pedals or like operating members, e.g. actuated by knee or hip
31/64 . responsive to temperature variation (dependant on excessive temperature F16K 17/38; control of fire-fighting equipment A62C 37/00; devices for preventing bursting of water pipes by freezing E03B 7/10) **[4]**
31/66 . . electrically or magnetically actuated, e.g. by magnets with variable magnetic characteristics **[4]**
31/68 . . actuated by fluid pressure or volumetric variation in a confined chamber **[4]**
31/70 . . mechanically actuated, e.g. by a bimetallic strip **[4]**
31/72 . Operating means or releasing devices specifically adapted to enhance the speed of valve response **[4]**

33/00 Floats for actuation of valves or other apparatus

35/00 Means to prevent accidental or unauthorised actuation

35/02 . to be locked or disconnected by means of a push or pull
35/04 . yieldingly resisting the actuation
35/06 . using a removable actuating or locking member, e.g. a key (F16K 35/10, F16K 35/12 take precedence)
35/08 . requiring setting according to a code, e.g. permutation locks
35/10 . with locking caps or locking bars
35/12 . with sealing wire
35/14 . interlocking two or more valves
35/16 . with locking member actuated by magnet

37/00 Special means in or on valves or other cut-off apparatus for indicating or recording operation thereof, or for enabling an alarm to be given

39/00 Devices for relieving the pressure on the sealing faces

39/02 . for lift valves
39/04 . for sliding valves
39/06 . for taps or cocks

41/00 Spindle sealings

41/02 . with stuffing-box
41/04 . . with at least one ring of rubber or like material between spindle and housing
41/06 . . with at least one ring attached to both spindle and housing
41/08 . . with at least one ring provided with axially-protruding peripheral closing-lip
41/10 . with diaphragm, e.g. shaped as bellows or tube
41/12 . . with approximately flat diaphragm
41/14 . with conical flange on the spindle which co-operates with a conical surface in the housing
41/16 . with a flange on the spindle which rests on a sealing ring
41/18 . . sealing only when the closure member is in the opened position

43/00 Auxiliary closure means in valves, which in case of repair, e.g. rewashering, of the valve, can take over the function of the normal closure means; **Devices for temporary replacement of parts of valves for the same purpose**

47/00 Means in valves for absorbing fluid energy (for pipes F16L 55/00)

47/02 . for preventing water-hammer or noise
47/04 . for decreasing pressure, the throttle being incorporated in the closure member
47/06 . . with a throttle in the form of a helical channel
47/08 . for decreasing pressure and having a throttling member separate from the closure member
47/10 . . in which the medium in one direction must flow through the throttling channel, and in the other direction may flow through a much wider channel parallel to the throttling channel
47/12 . . the throttling channel being of helical form
47/14 . . the throttling member being a perforated membrane
47/16 . . the throttling member being a cone

49/00 Means in or on valves for heating or cooling (for pipes F16L 53/00; thermal insulation in connection with pipes or pipe systems F16L 59/16)

51/00 Other details not peculiar to particular types of valves or cut-off apparatus

51/02 . specially adapted for high-vacuum installations **[2]**

99/00 Subject matter not provided for in other groups of this subclass [8]

F16L PIPES; JOINTS OR FITTINGS FOR PIPES; SUPPORTS FOR PIPES, CABLES OR PROTECTIVE TUBING; MEANS FOR THERMAL INSULATION IN GENERAL

(1) In this subclass, the following terms are used with the meanings indicated:
– "pipe" means a conduit of closed cross-section, which is specially adapted to convey fluids, materials or objects;
– "hose" means a pipe, as defined above, which has flexibility as an essential characteristic. **[5]**

(2) Attention is drawn to the following places:

A61M	39/00	Tube connectors, tube couplings or branch units, specially adapted for medical use
B05B	1/20	Perforated pipes
B63B	35/03	Pipe-laying vessels
B64D	39/04	Adaptation of hose constructions for refuelling aircraft during flight
B67D	7/38	Arrangements of hoses in apparatus for transferring liquids, e.g. fuel, from bulk to vehicles or portable containers
E01D	19/10	Fastening of pipes or cables to bridges
E03B		Water supply installations
E03D	11/17	Means for connecting water-closet bowls to the flushing pipe
E03D	11/18	Siphons for water-closets
E03F	3/04	Pipes or fittings specially adapted to sewers
E04D	13/08	Down pipes for roof drainage; Clamping means therefor
E04F	17/00	Vertical ducts, channels in buildings, e.g. chimneys
E21F	1/04	Air ducts for ventilation of mines or tunnels; Connections therefor
E21F	17/02	Suspension devices for tubes or the like in mines or tunnels
F01N		Gas flow silencers or exhaust apparatus for machines or engines
F16N	21/00	Conduits, junctions for lubrication systems
F17C	3/02	Thermal insulation of vessels not under pressure for storing liquified or solidified gases, e.g. Dewar flask
F22B	37/10	Water tubes of steam boilers
F23J	13/04	Joints, connections for chimneys or flues
F24H	9/12	Connecting circulation pipes to heaters
F28F	9/04	Arrangements for sealing elements into header boxes or end plates of heat-exchangers
G21C	15/22	Structural association of coolant tubes with headers or other pipes in nuclear reactors
H02G	3/04	Protective tubing or conduits for electric cables
H02G	3/30	Installations of electric cables or lines on walls, floors or ceilings
H02G	3/36	Installations of electric cables or lines in walls, floors or ceilings

Subclass index

1/00 **Laying or reclaiming pipes**; **Repairing or joining pipes on or under water** (soldering or welding B23K; lifting-gear and load-engaging elements B66; hydraulic installations, soil drainage E02B; excavations or underwater constructions E02D; machines for digging trenches in combination with pipe-assembly E02F; laying sewer pipes E03F 3/06; in earth boreholes or wells E21B; tunnelling E21D; laying electric, or combined optical and electric, cables H02G; making special pipe joints, see the relevant groups for the joints) **[2,5,6]**

1/024 . Laying or reclaiming pipes on land, e.g. above the ground (F16L 1/12 takes precedence) **[5]**

1/026 . . in or on a frozen surface **[6]**

1/028 . . in the ground (F16L 1/026 takes precedence) **[5,6]**

1/032 . . . the pipes being continuous (F16L 1/038 takes precedence) **[5,6]**

1/036 . . . the pipes being composed of sections of short length (F16L 1/038 takes precedence) **[5,6]**

1/038 . . . the pipes being made in situ **[6]**

1/06 . . Accessories therefor, e.g. anchors **[5]**

1/09 . . . for bringing two tubular members closer to each other **[6]**

1/10 . . . for aligning **[5]**

1/11 . . . for the detection or protection of pipes in the ground **[6]**

1/12 . Laying or reclaiming pipes on or under water (buoyant hoses F16L 11/133) **[5]**

1/14 . . between the surface and the bottom **[5]**

1/15 . . . vertically **[6]**

1/16 . . on the bottom **[5]**

1/18 . . . the pipes being S- or J-shaped and under tension during laying **[5]**

1/19 . . . . the pipes being J-shaped **[6]**

1/20 . . Accessories therefor, e.g. floats, weights (buoys B63B 22/00) **[5]**

1/225 . . . Stingers **[6]**

1/23 . . . Pipe tensioning apparatus **[6]**

1/235 . . . Apparatus for controlling the pipe during laying **[6]**

1/24 . . . Floats; Weights **[5]**

1/26 . Repairing or joining pipes on or under water (buoyant hoses F16L 11/133; joints per se F16L 13/00 to F16L 49/00) **[5]**

3/00 **Supports for pipes, cables or protective tubing, e.g. hangers, holders, clamps, cleats, clips, brackets** (anchors for holding pipes on or under the ground F16L 1/06; noise absorbers in the form of specially adapted hangers or supports F16L 55/035; arrangements specially adapted for supporting insulated bodies F16L 59/12) **[5,7]**

3/01 . for supporting or guiding the pipes, cables or protective tubing, between relatively movable points, e.g. movable channels (hauling- or hoisting-chains with arrangements for holding electric cables, hoses or the like F16G 13/16) **[5]**

3/015 . . using articulated- or supple-guiding elements (arrangements for cranes of means for transmitting pneumatic, hydraulic or electric power to movable parts or devices B66C 13/12) **[6]**

3/02 . partly surrounding the pipes, cables or protective tubing (bands or chains F16L 3/14)

3/04 . . and pressing it against a wall or other support

3/06 . . with supports for wires

3/08 . substantially surrounding the pipe, cable or protective tubing

3/10 . . divided, i.e. with two members engaging the pipe, cable or protective tubing

3/11 . . . and hanging from a pendant (F16L 3/14 takes precedence) **[5]**

3/12 . . comprising a member substantially surrounding the pipe, cable or protective tubing

3/123 . . . and extending along the attachment surface **[5]**

3/127 . . . and extending away from the attachment surface **[5]**

3/13 . . . and engaging it by snap action **[5]**

3/133 . . . and hanging from a pendant (F16L 3/14 takes precedence) **[5]**

3/137 . . . and consisting of a flexible band **[5]**

3/14 . Hangers in the form of bands or chains

3/16 . with special provision allowing movement of the pipe (F16L 3/01 takes precedence; supporting pipes or cables inside other pipes or sleeves F16L 7/00) **[5]**

3/18 . . allowing movement in axial direction

3/20 . . allowing movement in transverse direction

3/202 . . . the transverse movement being converted to a rotational movement (F16L 3/215 takes precedence) **[6]**

3/205 . . . having supporting springs **[5]**

3/21 . . . . providing constant supporting spring force **[5]**

3/215 . . . the movement being hydraulically or electrically controlled **[5]**

3/217 . . . . hydraulically **[6]**

3/22 . specially adapted for supporting a number of parallel pipes at intervals **[6]**

3/223 . . each support having one transverse base for supporting the pipes (F16L 3/23, F16L 3/237 take precedence) **[6]**

3/227 . . . each pipe being supported by a separate element fastened to the base **[6]**

3/23 . . for a bundle of pipes or a plurality of pipes placed side by side in contact with each other (F16L 3/237 takes precedence) **[6]**

3/233 . . . by means of a flexible band **[6]**

3/237 . . for two pipes **[6]**

3/24 . with special member for attachment to profiled girders

3/26 . specially adapted for supporting the pipes all along their length, e.g. pipe channels or ducts **[6]**

5/00 **Devices for use where pipes, cables or protective tubing pass through walls or partitions** (installations of electric cables or lines through walls, floors or ceilings H02G 3/22)

5/02 . Sealing

Note

Group F16L 5/14 takes precedence over groups F16L 5/04 to F16L 5/12. **[6]**

5/04 . . to form a firebreak device **[6]**

5/06 . . by means of a swivel nut compressing a ring or sleeve **[6]**

5/08 . . by means of axial screws compressing a ring or sleeve **[6]**

5/10 . . by using sealing rings or sleeves only **[6]**

5/12 . . the pipe being cut in two pieces **[6]**

5/14 . . for double-walled or multi-channel pipes **[6]**

7/00 **Supporting pipes or cables inside other pipes or sleeves, e.g. for enabling pipes or cables to be inserted or withdrawn from under roads or railways without interruption of traffic** (sleeves for supporting pipes, cables or protective tubing, between relatively movable points F16L 3/01) **[5]**

7/02 . and sealing the pipes or cables inside the other pipes, cables or sleeves **[6]**

Pipes

9/00 **Rigid pipes**

9/01 . of wood (F16L 9/16 to F16L 9/22 take precedence) **[6]**

9/02 . of metal (F16L 9/16 to F16L 9/22 take precedence; finned pipes F28F)

9/04 . . Reinforced pipes

9/06 . . Corrugated pipes

9/08 . of concrete, cement, or asbestos cement, with or without reinforcement (F16L 9/16 to F16L 9/22 take precedence)

9/10 . of glass or ceramics, e.g. clay, clay tile, porcelain (F16L 9/16 to F16L 9/22 take precedence)

9/12 . of plastics with or without reinforcement (F16L 9/16 to F16L 9/22 take precedence)

9/127 . . the walls consisting of a single layer **[5]**

9/128 . . . Reinforced pipes **[6]**

9/133 . . the walls consisting of two layers **[5]**

9/14 . Compound tubes, i.e. made of materials not wholly covered by any one of the preceding groups (F16L 9/16 to F16L 9/22 take precedence)

9/147 . . comprising only layers of metal and plastics with or without reinforcement **[6]**

9/153 . . comprising only layers of metal and concrete with or without reinforcement **[6]**

9/16 . wound from sheets or strips, with or without reinforcement

9/17 . obtained by bending a sheet longitudinally and connecting the edges **[6]**

9/18 . Double-walled pipes; Multi-channel pipes or pipe assemblies (joints therefor F16L 39/00)

9/19 . . Multi-channel pipes or pipe assemblies **[4]**

9/21 . made of sound-absorbing materials or with sound-absorbing structure **[7]**

9/22 . Pipes composed of a plurality of segments

11/00 **Hoses, i.e. flexible pipes** (hose-like supports for pipes, cables or protective tubing, between relatively movable points F16L 3/01; suction-cleaner hoses A47L 9/24) **[5]**

11/02 . made of fibres or threads, e.g. of textile

11/04 . made of rubber or flexible plastics

11/06 . . with homogeneous wall (F16L 11/11 takes precedence) **[2]**

11/08 . . with reinforcements embedded in the wall (F16L 11/11 takes precedence) **[2]**

11/10 . . with reinforcements not embedded in the wall (F16L 11/11 takes precedence) **[2]**

11/11 . . with corrugated wall **[2]**

11/112 . . . having reinforcements embedded in the wall **[5]**

11/115 . . . having reinforcements not embedded in the wall **[5]**

11/118 . . . having arrangements for particular purposes, e.g. electrically conducting **[5]**

11/12 . . with arrangements for particular purposes, e.g. specially profiled, with protecting layer, heated, electrically conducting (F16L 11/11 takes precedence) **[2]**

11/127 . . . electrically conducting **[5]**

11/133 . . . buoyant **[5]**

11/14 . made of rigid material, e.g. metal or hard plastics

11/15 . . corrugated (F16L 11/16 takes precedence) **[5]**

11/16 . . wound from profiled strips or bands

11/18 . . Articulated hoses, e.g. composed of a series of rings

11/20 . Double-walled hoses **[5]**

11/22 . Multi-channel hoses **[5]**

11/24 . wound from strips or bands (F16L 11/16 takes precedence) **[5]**

11/26 . made of sound-absorbing materials or with sound-absorbing structure **[7]**

Pipe joints; **Hose nipples** **[2]**

13/00 **Non-disconnectable pipe joints, e.g. soldered, adhesive, or caulked joints** (joints for rigid pipes of plastics F16L 47/00)

13/007 . specially adapted for joining pipes of dissimilar materials **[5]**

13/013 . . Accessories therefor **[5]**

13/02 . Welded joints

13/04 . . with arrangements preventing overstressing

13/06 . . . with tension-relief of the weld by means of detachable members, e.g. divided tensioning rings, bolts in flanges

13/08 . Soldered joints

13/10 . Adhesive or cemented joints

13/11 . . using materials which fill the space between parts of a joint before hardening **[2]**

13/12 . with a seal made of lead, caulked packing, or the like

13/14 . made by plastically deforming the material of the pipe, e.g. by flanging, rolling

13/16 . . the pipe joint consisting of overlapping extremities having mutually co-operating collars **[5]**

15/00 **Screw-threaded joints** (casing joints used in deep-drilling E21B 17/08; joints sealed primarily by means other than engagement of screw-threads, see the relevant groups characterised by the sealing arrangements); **Forms of screw-threads for such joints**

15/02 . allowing substantial longitudinal adjustment by the use of a long screw-threaded part

15/04 . with additional sealings **[2]**

15/06 . characterised by the shape of the screw-thread **[5]**

15/08 . with supplementary elements (F16L 15/04 takes precedence) **[5]**

17/00 **Joints with packing adapted to sealing by fluid pressure** (compensating devices F16L 51/00)

17/02 . with sealing rings arranged between outer surface of pipe and inner surface of sleeve or socket

17/025 . . the sealing rings having radially directed ribs **[5]**

17/03 . . having annular axial lips **[2]**

17/035 . . . the sealing rings having two lips parallel to each other **[5]**

17/04 . . with longitudinally split or divided sleeve

17/06 . with sealing rings arranged between the end surfaces of the pipes or flanges or arranged in recesses in the pipe ends or flanges

17/067 . . Plastics sealing rings **[6]**

17/073 . . . the sealing rings having two lips parallel to each other **[6]**

17/08 . . Metal sealing rings **[5]**
17/10 . the packing being sealed by the pressure of a fluid other than the fluid in or surrounding the pipe (expansion-compensation arrangements for pipe-lines F16L 51/00) **[5]**

19/00 **Joints in which sealing surfaces are pressed together by means of a member, e.g. a swivel nut, screwed on, or into, one of the joint parts** (F16L 17/00 takes precedence; if using bolts or equivalent connecting means F16L 23/00; connecting arrangements or other fittings specially adapted to be made of plastics or to be used with pipes made of plastics F16L 47/00)
19/02 . Pipe ends provided with collars or flanges, integral with the pipe or not, pressed together by a screwed member
19/025 . . the pipe ends having integral collars or flanges **[5]**
19/028 . . . the collars or flanges being obtained by deformation of the pipe wall **[6]**
19/03 . . with flexible sealing rings between the sealing surfaces **[2]**
19/04 . using additional rigid rings, sealing directly on at least one pipe end, which is flared either before or during the making of the connection
19/05 . . with a rigid pressure ring between the screwed member and the exterior of the flared pipe end **[5]**
19/06 . in which radial clamping is obtained by wedging action on non-deformed pipe ends
19/065 . . the wedging action being effected by means of a ring **[5]**
19/07 . . adapted for use in socket or sleeve connections **[2]**
19/075 . . specially adapted for spigot-and-socket joints **[5]**
19/08 . with metal rings which bite into the wall of the pipe
19/10 . . the profile of the ring being altered **[5]**
19/12 . . . with additional sealing means **[5]**
19/14 . . . the rings being integral with one of the connecting parts **[6]**

21/00 **Joints with sleeve or socket** (F16L 13/00, F16L 17/00, F16L 19/00 take precedence; connecting arrangements or other fittings specially adapted to be made of plastics or to be used with pipes made of plastics F16L 47/00; specially adapted for pipes of brittle material F16L 49/00)
21/02 . with elastic sealing rings between pipe and sleeve or between pipe and socket, e.g. with rolling or other prefabricated profiled rings (F16L 21/06, F16L 21/08 take precedence; if adjustability is essential F16L 27/00)
21/025 . . Rolling sealing rings **[5]**
21/03 . . placed in the socket before connection (F16L 21/025 takes precedence) **[5]**
21/035 . . placed around the spigot end before connection (F16L 21/025 takes precedence) **[5]**
21/04 . . in which sealing rings are compressed by axially-movable members
21/05 . . comprising a first ring being placed on a male part and a second ring in the sleeve or socket **[6]**
21/06 . with a divided sleeve or ring clamping around the pipe ends (flanged joints F16L 23/00; couplings of the quick-acting type F16L 37/00)
21/08 . with additional locking means (F16L 21/06 takes precedence; couplings of the quick-acting type F16L 37/00)

23/00 **Flanged joints** (F16L 13/00, F16L 17/00, F16L 19/00 take precedence; adjustable joints F16L 27/00; for hoses F16L 33/00; couplings of the quick-acting type F16L 37/00; for double-walled or multi-channel pipes, or pipe assemblies F16L 39/00; connecting arrangements or other fittings specially adapted to be made of plastics or to be used with pipes made of plastics F16L 47/00; specially adapted for pipes of brittle material F16L 49/00)
23/02 . the flanges being connected by members tensioned axially (F16L 23/12 takes precedence) **[2,5]**
23/024 . . characterised by how the flanges are joined to, or form an extension of, the pipes **[5]**
23/026 . . . by welding **[6]**
23/028 . . . the flanges being held against a shoulder **[5]**
23/032 . . characterised by the shape or composition of the flanges **[5]**
23/036 . . characterised by the tensioning members, e.g. specially adapted bolts or C-clamps **[5]**
23/04 . the flanges being connected by members tensioned in the radial plane (F16L 23/12 takes precedence) **[2,5]**
23/06 . . connected by toggle-action levers (quick acting couplings tightened by toggle-action levers F16L 37/20) **[5]**
23/08 . . connection by tangentially arranged pin and nut **[5]**
23/10 . . . with a pivoting or swinging pin **[5]**
23/12 . specially adapted for particular pipes **[5]**
23/14 . . for rectangular pipes **[5]**
23/16 . characterised by the sealing means **[5]**
23/18 . . the sealing means being rings **[6]**
23/20 . . . made exclusively of metal **[6]**
23/22 . . . made exclusively of a material other than metal **[6]**
23/24 . . specially adapted for unequal expansion of the parts of the joint **[6]**

25/00 **Construction or details of pipe joints not provided for in, or of interest apart from, groups F16L 13/00 to F16L 23/00** (adjustable or allowing movement F16L 27/00; with fluid cut-off means F16L 29/00; quick-acting F16L 37/00; for double-walled or multi-channel pipes F16L 39/00; connecting arrangements or other fittings specially adapted to be made of plastics or to be used with pipes made of plastics F16L 47/00; specially adapted for pipes of brittle material F16L 49/00)
25/01 . specially adapted for realising electrical conduction between the two pipe ends of the joint or between parts thereof (electrically-conductive connections between or with tubular conductors H01R 4/60) **[7]**
25/02 . specially adapted for electrically insulating the two pipe ends of the joint from each other **[2]**
25/03 . . in non-disconnectable pipe joints **[7]**
25/04 . comprising a collar or ring having a threaded pin rigid with the pipe-encircling member **[5]**
25/06 . comprising radial locking means **[5]**
25/08 . . in the form of screws, nails or the like **[6]**
25/10 . Sleeveless joints between two pipes, one being introduced into the other **[7]**
25/12 . Joints for pipes being spaced apart axially **[7]**
25/14 . Joints for pipes of different diameters or cross-section **[7]**

27/00 **Adjustable joints**; **Joints allowing movement** (of the quick-acting type F16L 37/50; for double-walled or multi-channel pipes or pipe assemblies F16L 39/04; swivel joints in hose lines used for flushing boreholes E21B 21/02) **[5]**

27/02 . Universal joints, i.e. with mechanical connection allowing angular movement or adjustment of the axes of the parts in any direction

27/04 . . with partly-spherical engaging surfaces

27/047 . . . held in place by a screwed member having an internal spherical surface **[5]**

27/053 . . . held in place by bolts passing through flanges **[5]**

27/06 . . . with special sealing means between the engaging surfaces

27/067 . . . . the sealing means being actuated by the medium pressure **[5]**

27/073 . . . . one of the cooperating surfaces forming the sealing means **[5]**

27/08 . allowing adjustment or movement only about the axis of one pipe

27/087 . . Joints with radial fluid passages **[6]**

27/093 . . . of the "banjo" type, i.e. pivoting right-angle couplings **[6]**

27/10 . comprising a flexible connection only

27/103 . . in which a flexible element, e.g. a rubber-metal laminate, which undergoes constraints consisting of shear and flexure, is sandwiched between partly curved surfaces **[6]**

27/107 . . the ends of the pipe being interconnected by a flexible sleeve **[5]**

27/108 . . . the sleeve having the form of a bellows with only one corrugation **[6]**

27/11 . . . the sleeve having the form of a bellows with multiple corrugations **[6]**

27/111 . . . . the bellows being reinforced **[6]**

27/113 . . the ends of the pipe being interconnected by a rigid sleeve **[5]**

27/12 . allowing substantial longitudinal adjustment or movement (by use of screw-thread F16L 15/02)

29/00 **Joints with fluid cut-off means** (quick-acting joints with cut-off means F16L 37/28)

29/02 . with a cut-off device in one of the two pipe ends, the cut-off device being automatically opened when the coupling is applied **[5]**

29/04 . with a cut-off device in each of the two pipe ends, the cut-off devices being automatically opened when the coupling is applied **[5]**

31/00 **Arrangements for connecting hoses to one another or to flexible sleeves** (F16L 33/00 takes precedence)

31/02 . for branching hoses **[6]**

33/00 **Arrangements for connecting hoses to rigid members** (hand tools for inserting fittings into hoses B25B 27/10); **Rigid hose-connectors, i.e. single members engaging both hoses** (connecting arrangements or other fittings specially adapted to be made of plastics or to be used with pipes made of plastics F16L 47/00)

Note

Groups F16L 33/01 and F16L 33/26 take precedence over other subgroups **[7]**

33/01 . specially adapted for hoses having a multi-layer wall **[2]**

33/02 . Hose-clips

33/025 . . tightened by deforming radially extending loops or folds **[7]**

33/03 . . Self-locking elastic clips **[7]**

33/035 . . fixed by means of teeth or hooks **[7]**

33/04 . . tightened by tangentially-arranged threaded pin and nut

33/06 . . . in which the threaded pin is rigid with the hose-encircling member

33/08 . . in which a worm coacts with a part of the hose-encircling member that is toothed like a worm-wheel

33/10 . . with a substantially-radial tightening member

33/12 . . with a pivoted or swinging tightening or securing member, e.g. toggle lever

33/14 . . with a taping-bolt, i.e. winding up the end of the hose-encircling member

33/16 . with sealing or securing means using fluid pressure

33/18 . characterised by the use of additional sealing means

33/20 . Undivided rings, sleeves, or like members contracted on the hose or expanded inside the hose by means of tools; Arrangements using such members

33/207 . . only a sleeve being contracted on the hose **[5]**

33/213 . . only a sleeve being expanded inside the hose **[5]**

33/22 . with means not mentioned in the preceding groups for gripping the hose between inner and outer parts

33/23 . . the outer parts being segmented, the segments being pressed against the hose by tangentially arranged members **[2]**

33/24 . with parts screwed directly on or into the hose (F16L 33/22 takes precedence)

33/26 . specially adapted for hoses made of metal

33/28 . for hoses with one end terminating in a radial flange or collar **[5]**

33/30 . comprising parts inside the hoses only (F16L 33/24 takes precedence) **[7]**

33/32 . comprising parts outside the hoses only (F16L 33/24 takes precedence) **[7]**

33/34 . with bonding obtained by vulcanisation, gluing, melting, or the like **[7]**

35/00 **Special arrangements used in connection with end fittings of hoses, e.g. safety or protecting devices**

37/00 **Couplings of the quick-acting type** (radially-binding sleeves F16L 17/04, F16L 21/06; connecting hoses to rigid members F16L 33/00; connections made automatically when vehicles are brought together B60D, B61G; specially adapted for lubricating devices F16N 21/00)

37/02 . in which the connection is maintained only by friction of the parts being joined (F16L 37/22 takes precedence)

37/04 . . with an elastic outer part pressing against an inner part by reason of its elasticity (with locking members F16L 37/08)

37/05 . . . tightened by the pressure of a mechanical organ **[5]**

37/06 . . . tightened by fluid pressure

37/08 . in which the connection between abutting or axially-overlapping ends is maintained by locking members (F16L 37/22 to F16L 37/26 take precedence)

37/084 . . combined with automatic locking **[5]**

37/086 . . . by means of latching members pushed radially by spring-like elements **[7]**

37/088 . . . by means of a split elastic ring **[5]**

37/091 . . . by means of a ring provided with teeth or fingers **[7]**

37/092 . . . by means of elements wedged between the pipe and the frusto-conical surface of the body of the connector **[5]**
37/096 . . . by means of hooks hinged about an axis **[5]**
37/098 . . . by means of flexible hooks **[7]**
37/10 . . using a rotary external sleeve or ring on one part
37/107 . . . Bayonet-type couplings **[7]**
37/113 . . . the male part having lugs on its periphery penetrating into the corresponding slots provided in the female part **[7]**
37/12 . . using hooks, pawls, or other movable or insertable locking members (F16L 37/084 takes precedence) **[5]**
37/124 . . . using bolts, fixed to a flange, which are able to tilt in slots of another flange, and being maintained there by the tightening of nuts **[7]**
37/127 . . . using hooks hinged about an axis **[5]**
37/133 . . . using flexible hooks **[5]**
37/138 . . . using an axially movable sleeve **[7]**
37/14 . . . Joints secured by inserting between mating surfaces an element, e.g. a piece of wire, a pin, a chain
37/15 . . . . the element being a wedge **[7]**
37/16 . . . Joints tightened by the action of wedge-shaped hinged hooks
37/18 . . . Joints tightened by eccentrics or rotatable cams
37/20 . . . Joints tightened by toggle-action levers
37/22 . in which the connection is maintained by means of balls, rollers, or helical springs under radial pressure between the parts
37/23 . . by means of balls **[5]**
37/24 . in which the connection is made by inserting one member axially into the other and rotating it to a limited extent, e.g. with bayonet-action
37/244 . . the coupling being co-axial with the pipe **[5]**
37/248 . . . Bayonet-type couplings **[5]**
37/252 . . . the male part having lugs on its periphery penetrating into the corresponding slots provided in the female part **[5]**
37/256 . . the coupling not being coaxial with the pipe **[5]**
37/26 . in which the connection is made by transversely moving the parts together, with or without their subsequent rotation
37/28 . with fluid cut-off means
37/30 . . with fluid cut-off means in each of two pipe-end fittings **[5]**
37/32 . . . at least one of two lift valves being opened automatically when the coupling is applied **[5]**
37/33 . . . . the lift valves being of the ball type **[7]**
37/34 . . . . at least one of the lift valves being of the sleeve type, i.e. a sleeve being telescoped over an inner cylindrical wall **[5]**
37/35 . . . . at least one of the valves having an axial bore communicating with lateral apertures **[7]**
37/36 . . . with two lift valves being actuated to initiate the flow through the coupling after the two coupling parts are locked against withdrawal **[5]**
37/367 . . . with two gate valves or sliding valves **[7]**
37/373 . . . with two taps or cocks **[7]**
37/38 . . with fluid cut-off means in only one of two pipe-end fittings **[5]**
37/40 . . . with a lift valve being opened automatically when the coupling is applied **[5]**
37/407 . . . . the lift valve being of the ball type **[7]**
37/413 . . . . the lift valve being of the sleeve type, i.e. a sleeve being telescoped over an inner cylindrical wall **[7]**
37/42 . . . . the valve having an axial bore communicating with lateral apertures **[5]**
37/44 . . . with one lift valve being actuated to initiate the flow through the coupling after the two coupling parts are locked against withdrawal **[5]**
37/46 . . . with a gate valve or sliding valve **[5]**
37/47 . . . with a tap or cock **[7]**
37/48 . for fastening a pipe on the end of a tap **[5]**
37/50 . adjustable; allowing movement of the parts joined **[5]**
37/52 . . Universal joints, i.e. with a mechanical connection allowing angular movement or adjustment of the axes of the parts in any direction **[5]**
37/53 . . allowing adjustment or movement only about the axis of one pipe **[7]**
37/54 . . for pipes under pressure which are supported only on one side **[5]**
37/56 . for double-walled or multi-channel pipes **[5]**
37/58 . the extremities of the two halves of the joint being pressed against each other without being locked in position **[5]**
37/60 . with plug and fixed wall housing **[7]**
37/62 . pneumatically or hydraulically actuated **[7]**

39/00 Joints or fittings for double-walled or multi-channel pipes or pipe assemblies

39/02 . for hoses
39/04 . allowing adjustment or movement
39/06 . of the multiline swivel type, e.g. comprising a plurality of axially mounted modules **[7]**

41/00 Branching pipes; **Joining pipes to walls** (F16L 39/00 takes precedence; connections not designed for conveying fluid F16B 9/00; joints suitable for connecting together pipe ends, see the relevant groups)

41/02 . Branch units, e.g. made in one piece, welded, riveted
41/03 . . comprising junction pieces for four or more pipe members **[5]**
41/04 . Tapping pipe walls, i.e. making connections through the walls of pipes while they are carrying fluids; Fittings therefor (apparatus or operations relating to metal-working steps, see the relevant classes for metal-working)
41/06 . . making use of attaching means embracing the pipe
41/08 . Joining pipes to walls or pipes, the joined pipe axis being perpendicular to the plane of a wall or to the axis of another pipe (F16L 41/02 takes precedence) **[2]**
41/10 . . the extremity of the pipe being screwed into the wall **[5]**
41/12 . . using attaching means embracing the pipe **[5]**
41/14 . . by screwing an intermediate part against the inside or outside of the wall **[5]**
41/16 . . the branch pipe comprising fluid cut-off means **[5]**
41/18 . the branch pipe being movable **[7]**

43/00 Bends; **Siphons** (with cleaning apertures F16L 45/00; siphons for water-closets E03D 11/18; siphons in general F04F 10/00)

43/02 . adapted to make use of special securing means

45/00 Pipe units with cleaning aperture and closure therefor

47/00 **Connecting arrangements or other fittings specially adapted to be made of plastics or to be used with pipes made of plastics** (packing, for joints, adapted to sealing by fluid pressure F16L 17/00)

47/02 . Welded joints; Adhesive joints

47/03 . . Welded joints with an electrical resistance incorporated in the joint **[7]**

47/04 . with a swivel nut or collar engaging the pipe **[2]**

47/06 . with sleeve or socket formed by or in the pipe end **[2]**

47/08 . . with sealing rings arranged between the outer surface of one pipe end and the inner surface of the sleeve or socket, the sealing rings being placed previously in the sleeve or socket **[7]**

47/10 . . . the sealing rings being maintained in place by additional means **[7]**

47/12 . . with additional locking means **[7]**

47/14 . Flanged joints **[7]**

47/16 . Screw-threaded joints **[7]**

47/18 . Adjustable joints; Joints allowing movement **[7]**

47/20 . based principally on specific properties of plastics **[7]**

47/22 . . using shrink-down material **[7]**

47/24 . . for joints between metal and plastics pipes **[7]**

47/26 . for branching pipes; for joining pipes to walls; Adaptors therefor **[7]**

47/28 . . Joining pipes to walls or to other pipes, the axis of the joined pipe being perpendicular to the wall or to the axis of the other pipe **[7]**

47/30 . . . using attaching means embracing the pipe **[7]**

47/32 . . Branch units, e.g. made in one piece, welded, riveted **[7]**

47/34 . . Tapping pipes, i.e. making connections through walls of pipes while carrying fluids; Fittings therefor **[7]**

49/00 **Connecting arrangements, e.g. joints, specially adapted for pipes of brittle material, e.g. glass, earthenware**

49/02 . Joints with a sleeve or socket **[5]**

49/04 . Flanged joints **[5]**

49/06 . Joints in which sealing surfaces are pressed together by means of a member, e.g. swivel nut, screwed on, or into, one of the joint parts **[7]**

49/08 . Adjustable joints; Joints allowing movement **[7]**

51/00 **Expansion-compensation arrangements for pipe-lines** (telescopic pipes F16L 27/12)

51/02 . making use of a bellows or an expansible folded or corrugated tube

51/03 . . comprising two or more bellows **[5]**

51/04 . making use of bends, e.g. lyre-shaped

53/00 **Heating or cooling pipes or pipe systems** (preventing freezing of pipes, thawing frozen pipes E03B 7/12, E03B 7/14; pipe-line systems, pipe-lines F17D)

55/00 **Devices or appurtenances for use in, or in connection with, pipes or pipe systems** (F16L 1/00 to F16L 53/00, F16L 57/00, F16L 59/00 take precedence; repairing or joining pipes on or under water F16L 1/26; nozzles B05B; cleaning of pipes B08B 9/02, e.g. removal of blockages B08B 9/027; devices for preventing bursting of water pipes by freezing E03B 7/10; for domestic plumbing installations E03C 1/00; arrangements for sealing leaky tubes or conduits of heat-exchangers F28F 11/00)

55/02 . Energy absorbers; Noise absorbers (in valves F16K 47/00)

55/027 . . Throttle passages (influencing fluid flow F15D 1/00; control of fluid flow G05D 7/00) **[5]**

55/033 . . Noise absorbers (F16L 55/027 takes precedence) **[5]**

55/035 . . . in the form of specially adapted hangers or supports **[7]**

55/04 . Devices damping pulsations or vibrations in fluids

55/045 . . specially adapted to prevent or minimise the effects of water hammer **[5]**

55/05 . . . Buffers therefor (accumulators F15B 1/04) **[5]**

55/052 . . . . Pneumatic reservoirs **[7]**

55/053 . . . . . the gas in the reservoir being separated from the fluid in the pipe **[7]**

55/054 . . . . . the reservoir being placed in or around the pipe from which it is separated by a sleeve-shaped membrane **[7]**

55/055 . . . Valves therefor **[5]**

55/07 . Arrangement or mounting of devices, e.g. valves, for venting or aerating or draining (arrangement of draining devices in water-supply systems E03B 7/08; apparatus for draining F16K, F16T; venting or aerating devices per se F16K 24/00) **[2]**

55/09 . Air-conditioning, e.g. de-watering, in pneumatic systems (in general F24)

55/10 . Means for stopping flow in pipes or hoses (F16L 29/00, F16L 37/28 take precedence; for covering leaks F16L 55/16; valves F16K) **[1,7]**

55/103 . . by temporarily freezing liquid sections in the pipe **[7]**

55/105 . . Closing devices introduced radially into the pipe or hose **[5]**

55/11 . . Plugs **[5]**

55/115 . . Caps **[5]**

55/12 . . by introducing into the pipe a member expandable in situ (inflatable cut-off valves F16K 7/10)

55/124 . . . introduced radially into the pipe or hose **[5]**

55/128 . . . introduced axially into the pipe or hose **[5]**

55/13 . . . . the closure device being a plug fixed by plastic deformation **[7]**

55/132 . . . . the closure device being a plug fixed by radially deforming the packing **[5]**

55/134 . . . . . by means of an inflatable packing **[7]**

55/136 . . . . the closure device being a plug fixed by radially expanding or deforming a split ring, hooks or the like **[5]**

55/16 . Devices for covering leaks in pipes or hoses, e.g. hose-menders **[1,7]**

55/162 . . from inside the pipe (specially adapted for bends, branch units, branching pipes, or the like F16L 55/179) **[5,7]**

55/163 . . . a ring, a band or a sleeve being pressed against the inner surface of the pipe **[7]**

55/164 . . . a sealing fluid being introduced in the pipe (F16L 55/1645 takes precedence) **[7]**

55/1645 . . . a sealing material being introduced inside the pipe by means of a tool moving in the pipe **[7]**

55/165 . . . a pipe being inserted in the damaged section **[5,7]**

55/168 . . from outside the pipe (specially adapted for bends, branch units, branching pipes, or the like F16L 55/179) **[5,7]**

55/17 . . . by means of rings, bands or sleeves pressed against the outside surface of the pipe or hose (hose-clips for connecting hoses to rigid members F16L 33/02) **[5,7]**

55/172 . . . . the ring, band or sleeve being tightened by a tangentially arranged threaded pin and a nut **[5,7]**

55/175 . . . by using materials which fill a space around the pipe before hardening **[5,7]**

55/178 . . . by clamping an outer gasket against a joint with sleeve or socket **[5,7]**

55/179 . . specially adapted for bends, branch units, branching pipes or the like **[7]**

55/18 . Appliances for use in repairing pipes (F16L 55/10 takes precedence)

55/24 . Preventing accumulation of dirt or other matter in pipes, e.g. by traps, by strainers

55/26 . Pigs or moles, i.e. devices movable in a pipe or conduit with or without self-contained propulsion means (tunnel railway systems B61B 13/10; conveying articles through pipes or tubes, e.g. tube mail systems, B65G 51/00) **[5]**

(1) Pigs or moles specially adapted for particular applications are classified in the relevant places for the applications, e.g.
- stopping flow from or in pipes or hoses F16L 55/12;
- repairing pipes F16L 55/18;
- applying liquids or other fluent materials to the inside of tubes B05C 7/08;
- cleaning pipes or tubes or systems of pipes or tubes B08B 9/02;
- welding or cutting B23K 37/02;
- earth drilling E21B;
- cleaning chimneys F23J 3/02;
- cleaning internal or external surfaces of heat-exchange or heat-transfer conduits F28G;
- measuring, testing G01;
- inspection of vessels in nuclear reactors G21C 17/003;
- inspection or maintenance of pipe-lines or tubes in nuclear installations G21C 17/017;
- installing electric, or combined optical and electric, cables or lines H02G. **[5]**

(2) In this group, it is desirable to add the indexing codes of group F16L 101/00.

55/28 . . Constructional aspects **[6]**

55/30 . . . of the propulsion means, e.g. towed by cables **[6]**

55/32 . . . . being self-contained **[6]**

55/34 . . . . . the pig or mole being moved step by step **[6]**

55/36 . . . . . jet driven **[6]**

55/38 . . . . driven by fluid pressure **[6]**

55/40 . . . of the body **[6]**

55/42 . . . . gelled or degradable **[6]**

55/44 . . . . expandable **[6]**

55/46 . . Launching or retrieval of pigs or moles **[6]**

55/48 . . Indicating the position of the pig or mole in the pipe or conduit **[6]**

57/00 Protection of pipes or objects of similar shape against external or internal damage or wear (supporting of pipes inside other pipes or sleeves F16L 7/00; used in connection with end fittings of hoses F16L 35/00; protection of pipes or pipe fittings against corrosion or incrustation F16L 58/00; protection thereof during transport B65D, e.g. B65D 59/00)

57/02 . against cracking or buckling **[7]**

57/04 . against fire or other external sources of extreme heat **[7]**

57/06 . against wear (F16L 57/04 takes precedence) **[7]**

58/00 Protection of pipes or pipe fittings against corrosion or incrustation (supporting of pipes inside other pipes or sleeves F16L 7/00; compound tubes F16L 9/14; cleaning pipes or tubes B08B 9/02)

58/02 . by means of internal or external coatings (coatings for thermal insulation F16L 59/00; methods or machines for applying coatings, see the relevant places, e.g. B28B 21/94) **[2]**

58/04 . . Coatings characterised by the materials used (F16L 58/16 takes precedence; compositions, see the relevant classes, e.g. C04B) **[2]**

58/06 . . . by cement, concrete, or the like **[2]**

58/08 . . . by metal **[2]**

58/10 . . . by rubber or plastics **[2]**

58/12 . . . by tar or bitumen **[2]**

58/14 . . . by ceramic or vitreous materials **[2]**

58/16 . . the coating being in the form of a bandage (apparatus for covering cores by winding B65H 81/00) **[2]**

58/18 . specially adapted for pipe fittings **[2]**

59/00 Thermal insulation in general (heat, sound insulation in buildings E04B; heat insulation of steam engines F01B 31/08; heat insulation in rotary piston machines or engines F01C 21/06; heat insulation of pumps F04C 29/04; thermal insulation of pressure vessels F17C 1/12; vessels not under pressure, with provision for insulation F17C 3/02)

59/02 . Shape or form of insulating materials, with or without coverings integral with the insulating materials (chemical aspects, see the relevant classes)

59/04 . Arrangements using dry fillers, e.g. using slag wool

59/05 . . in prefabricated shells or covers **[2]**

59/06 . Arrangements using an air layer or vacuum

59/065 . . using vacuum (F16L 59/075 takes precedence) **[7]**

59/07 . . the air layer being enclosed by one or more layers of insulation **[7]**

59/075 . . the air layer or the vacuum being delimited by longitudinal channels distributed around the circumference of a tube **[7]**

59/08 . Means for preventing radiation, e.g. with metal foil

59/10 . Bandages or covers for the protection of the insulation, e.g. against the influence of the environment or against mechanical damage (integral with insulating materials F16L 59/02)

59/11 . . Rigid covers for elbows **[7]**

59/12 . Arrangements for supporting insulation from the wall or body insulated, e.g. by means of spacers between pipe and heat-insulating material; Arrangements specially adapted for supporting insulated bodies

59/125 . . Helical spacers **[7]**

59/13 . . Resilient supports **[7]**

59/135 . . Hangers or supports specially adapted for insulated pipes **[7]**

59/14 . Arrangements for the insulation of pipes or pipe systems (F16L 59/02 to F16L 59/12 take precedence)

59/147 . . the insulation being located inwardly of the outer surface of the pipe **[5]**

59/15 . . for underground pipes **[7]**

59/153 . . for flexible pipes **[5]**

59/16 . . Arrangements specially adapted to local requirements at flanges, junctions, valves, or the like (means in or on valves for heating or cooling F16K 49/00)

59/18 . . . adapted for joints **[5]**
59/20 . . . . for non-disconnectable joints **[5]**
59/21 . . . adapted for expansion-compensation devices **[7]**
59/22 . . . adapted for bends **[5]**

Indexing scheme associated with groups F16L 55/26 to F16L 55/48, relating to uses and applications of pigs or moles. [6]

101/00 Uses or applications of pigs or moles [6]
101/10 . Treating the inside of pipes **[6]**
101/12 . . Cleaning **[6]**
101/14 . . Drying **[6]**
101/16 . . Coating by application of fluent materials, e.g. painting **[6]**
101/18 . . Lining other than coating **[6]**
101/20 . Expelling gases or fluids **[6]**
101/30 . Inspecting, measuring or testing **[6]**
101/40 . Separating transported fluids **[6]**
101/50 . Pulling cables or the like **[6]**
101/60 . Stopping leaks **[6]**
101/70 . Drill-well operations **[6]**

F16M FRAMES, CASINGS, OR BEDS, OF ENGINES OR OTHER MACHINES OR APPARATUS, NOT SPECIFIC TO AN ENGINE, MACHINE, OR APPARATUS PROVIDED FOR ELSEWHERE; STANDS OR SUPPORTS

Note

Attention is drawn to the following places:
B21B 31/02 Metal-rolling stand frames
G01D 11/30 Supports specially adapted for indicating or recording instruments.

Subclass index

1/00 Frames or casings of engines, machines, or apparatus; Frames serving as machinery beds [2]
1/02 . for reciprocating engines or similar machines
1/021 . . for housing crankshafts
1/022 . . . of tunnel type, i.e. wherein the crankshaft can only be introduced axially (for engines or machines with star-shaped cylinder arrangement F16M 1/023)
1/023 . . . specially adapted for engines or machines with star-shaped cylinder arrangement
1/024 . . . facilitating assembly of power-transmitting parts of engines or machines, e.g. of connecting-rods
1/025 . . . Assembling bearings in casings, e.g. having anchor bolts
1/026 . . for housing movable engine or machine parts other than crankshafts, e.g. valve-gear housings
1/04 . for rotary engines or similar machines
1/08 . characterised by being built-up of sheet material or welded parts

3/00 Portable or wheeled frames or beds, e.g. for emergency power-supply aggregates, compressor sets (construction of vehicles in general B60 to B62)

5/00 Engine beds, i.e. means for supporting engines or machines on foundations

7/00 Details of attaching or adjusting engine beds, frames, or supporting-legs on foundation or base; Attaching non-moving engine parts, e.g. cylinder blocks (elastic or equivalent mounting for absorbing vibrations F16F, especially F16F 15/04)

9/00 Special layout of foundations with respect to machinery to be supported (foundations for machinery E02D 27/44)

11/00 Stands or trestles as supports for apparatus or articles placed thereon (without heads F16M 13/00; easels or stands for blackboards or the like A47B 97/04; show-stands A47F 7/00; for workmen E04G 1/32; supporting, suspending for lighting devices F21V 21/00; special modifications for particular apparatus or articles, see the appropriate subclasses)
11/02 . Heads
11/04 . . Means for attachment of apparatus; Means allowing adjustment of the apparatus relatively to the stand
11/06 . . . allowing pivoting
11/08 . . . . around a vertical axis
11/10 . . . . around a horizontal axis
11/12 . . . . in more than one direction
11/14 . . . . . with ball-joint (ball-jointed hinges F16C 11/06)
11/16 . . Details concerning attachment of head-supporting legs, with or without actuation of locking members therefor
11/18 . . with mechanism for moving the apparatus relatively to the stand
11/20 . Undercarriages with or without wheels
11/22 . . with approximately constant height, e.g. with constant length of column or of legs (F16M 11/42 takes precedence)
11/24 . . changeable in height or length of legs, also for transport only (F16M 11/42 takes precedence)
11/26 . . . by telescoping, with or without folding (details concerning the constructional features of telescoping parts only F16B 7/10)
11/28 . . . . Undercarriages for supports with one single telescoping pillar
11/30 . . . . . with co-moving side-struts
11/32 . . . . Undercarriages for supports with three or more telescoping legs

11/34 . . . . . Members limiting spreading of legs
11/36 . . . . . Members preventing slipping of the feet
11/38 . . . by folding
11/40 . . . by means of coilable or bendable legs
11/42 . with arrangement for propelling the support

13/00 Other supports for positioning apparatus or articles (heads thereof F16M 11/02; adapted to be stuck in the ground A45F 3/44); **Means for steadying hand-held apparatus or articles**
13/02 . for supporting on, or attaching to, an object, e.g. tree, gate, window-frame, cycle
13/04 . for supporting on, or holding steady relative to, a person, e.g. by chains
13/06 . also serviceable for other purposes, e.g. to be used as spade, chair, ski-stick
13/08 . . for use as a walking-cane

F16N LUBRICATING

Note

Attention is drawn to the following places, which cover lubrication of specific apparatus or in particular processes:

A01D	69/12	Harvesters
B21B	25/04	Mandrels for metal tube rolling mills
B21B	27/06	Rolls for metal rolling mills
B21D	37/18	Tools for machines for working metal without removing material
B21J	3/00	Forging or pressing
B22D	11/07	Moulds for continuous casting of metals
B23C	5/28	Milling cutters
B23D	59/02,	Metal saws
B23D	59/04	
B23Q	11/10,	Machine tools
B23Q	11/12	
B25D	17/26	Portable power-driven percussive tools
B26B	19/40	Hair-clippers or dry-shavers
B27B	13/12	Band saw blades for wood or the like
B60R	17/00	Vehicles
B61B	12/08	Cable systems for railways
B61C	17/08	Railway locomotives
B61F	17/00	Axle-boxes of rail vehicles
B61K	3/00	Rail or wheel flanges of railways
B62D	55/092	Endless-track units for vehicles
B62J	31/00	Cycles
B65G	45/02	Conveyers
B66B	7/12	Ropes, cables or guides of elevators
D01H	7/20	Spindles of machines for spinning or twisting threads or fibres
D04B	35/28	Knitting machines
D05B	71/00	Sewing machines
D05C	13/04	Embroidering machines
E01B	7/26	Switches for railways
E05B	17/08	Locks
E05D	11/02	Hinges
E21B	10/22	Roller bits for earth drilling
F01C	21/04	Rotary-piston or oscillating-piston machines or engines
F01D	25/18	Non-positive-displacement machines
F01M		Machines or engines in general
F02C	7/06	Gas-turbine plants
F02F	1/20	Cylinders of combustion engines
F04B	39/02	Pumps for liquids
F04C	29/02	Rotary-piston or oscillating-piston pumps for liquids
F04D	29/04	Non-positive-displacement pumps
F16C	1/24	Flexible shafts
F16C	33/10	Sliding-contact bearings
F16C	33/66	Ball or roller bearings
F16F	1/24	Springs
F16H	57/04	Transmissions
F41A	29/04	Smallarms or ordnance
G04B	31/08	Clocks
H01R	39/56	Rotary current collectors, distributors or interrupters

Subclass index

Lubrication devices or arrangements for oil or grease

1/00 Constructional modifications of parts of machines or apparatus for the purpose of lubrication

3/00 Devices for supplying lubricant by manual action
3/02 . delivering oil
3/04 . . Oil cans; Oil syringes
3/06 . . . delivering on squeezing
3/08 . . . incorporating a piston-pump
3/10 . delivering grease
3/12 . . Grease guns

5/00 Apparatus with hand-positioned nozzle supplied with lubricant under pressure (F16N 3/00 takes precedence)
5/02 . Nozzles or nozzle-valve arrangements therefor, e.g. high-pressure grease guns

7/00 Arrangements for supplying oil or unspecified lubricant from a stationary reservoir or the equivalent in or on the machine or member to be lubricated
7/02 . with gravity feed or drip lubrication
7/04 . . with oil flow promoted by vibration
7/06 . . Arrangements in which the droplets are visible
7/08 . . controlled by means of the temperature of the member to be lubricated
7/10 . . incorporating manually-operated regulating means, e.g. spindles
7/12 . with feed by capillary action, e.g. by wicks
7/14 . the lubricant being conveyed from the reservoir by mechanical means (by pumping devices F16N 7/36, F16N 7/38)
7/16 . . the oil being carried up by a lifting device
7/18 . . . with one or more feed members fixed on a shaft
7/20 . . . with one or more members moving around the shaft to be lubricated
7/22 . . . . shaped as rings
7/24 . . . with discs, rollers, belts, or the like contacting the shaft to be lubricated
7/26 . . Splash lubrication
7/28 . . Dip lubrication
7/30 . the oil being fed or carried along by another fluid
7/32 . . Mist lubrication
7/34 . . . Atomising devices for oil
7/36 . with feed by pumping action of the member to be lubricated or of a shaft of the machine; Centrifugal lubrication
7/38 . with a separate pump; Central lubrication systems
7/40 . . in a closed circulation system

9/00 Arrangements for supplying oil or unspecified lubricant from a moving reservoir or the equivalent (also usable with a stationary reservoir F16N 7/00)
9/02 . with reservoir on or in a rotary member
9/04 . with reservoir on or in a reciprocating, rocking, or swinging member

11/00 Arrangements for supplying grease from a stationary reservoir or the equivalent in or on the machine or member to be lubricated; **Grease cups**
11/02 . Hand-actuated grease cups, e.g. Stauffer cups
11/04 . Spring-loaded devices
11/06 . Weight-loaded devices
11/08 . with mechanical drive, other than directly by springs or weights (lubricating-pumps F16N 13/00)
11/10 . by pressure of another fluid
11/12 . by centrifugal action

13/00 Lubricating-pumps (oil cans with pump F16N 3/08)
13/02 . with reciprocating piston (pumps with distributing equipment F16N 13/22)
13/04 . . Adjustable reciprocating pumps
13/06 . . Actuation of lubricating-pumps
13/08 . . . by hand
13/10 . . . with mechanical drive (F16N 13/18 takes precedence)
13/12 . . . . with ratchet
13/14 . . . . with cam or wobble-plate on shaft parallel to the pump cylinder or cylinders
13/16 . . . with fluid drive
13/18 . . . relative movement of pump parts being produced by inertia of one of the parts or of a driving member
13/20 . Rotary pumps (with distributing equipment F16N 13/22)
13/22 . with distributing equipment

15/00 Lubrication with substances other than oil or grease; **Lubrication characterised by the use of particular lubricants in particular apparatus or conditions** (F16N 17/00 takes precedence; lubricating compositions, selection of particular substances as lubricants in general C10M; lubrication specially adapted to machines or apparatus provided for in a single other class, see the relevant class for the machine or apparatus)
15/02 . with graphite or graphite-containing compositions
15/04 . with water

17/00 Lubrication of machines or apparatus working under extreme conditions (additives to lubricating oil or lubricating grease C10M)
17/02 . at high temperature

17/04 . at low temperature
17/06 . in vacuum or under reduced pressure (of rotary anodes of X-ray tubes H01J 35/10)

Details of lubricators or lubrication systems

19/00 Lubricant containers for use in lubricators or lubrication systems

21/00 Conduits; **Junctions**; **Fittings for lubrication apertures**
21/02 . Lubricating nipples
21/04 . Nozzles for connection of lubricating equipment to nipples
21/06 . Covering members for nipples, conduits, or apertures

23/00 Special adaptations of check valves

25/00 Distributing equipment (combined with oil pump F16N 13/22)
25/02 . with reciprocating distributing slide valve
25/04 . with rotary distributing member

27/00 Proportioning devices
27/02 . Gating equipment

29/00 Special means in lubricating arrangements or systems providing for the indication or detection of undesired conditions; **Use of devices responsive to conditions in lubricating arrangements or systems** (constructions of apparatus outside the lubricating arrangements or systems, see the relevant classes)
29/02 . for influencing the supply of lubricant
29/04 . enabling a warning to be given; enabling moving parts to be stopped

31/00 Means for collecting, retaining, or draining-off lubricant in or on machines or apparatus
31/02 . Oil catchers; Oil wipers (oil-scraping rings for pistons F16J 9/20)

33/00 Mechanical arrangements for cleaning lubricating equipment; **Special racks or the like for use in draining lubricant from machine parts**

Care of lubricants

35/00 Storage of lubricants in engine-rooms or the like

37/00 Equipment for transferring lubricant from one container to another
37/02 . for filling grease guns

39/00 Arrangements for conditioning of lubricants in the lubricating system (cleaning of lubricating oil, lubricating compositions C10M)
39/02 . by cooling
39/04 . by heating
39/06 . by filtration
39/08 . by diluting, e.g. by addition of fuel

99/00 Subject matter not provided for in other groups of this subclass [8]

F16P SAFETY DEVICES IN GENERAL

Note

Attention is drawn to the following places:

A01D	75/18, 75/20	Harvesters or mowers
A01F	21/00	Threshing machines or baling presses
B02C	23/04	Crushing or disintegrating machines
B21B	33/00	Rolling of metal
B21D	55/00	Working sheet metal or tubes, rods or profiles without essentially removing material
B23B	25/04	Turning-machines
B23Q	11/00	Machine tools
B24B	55/00	Grinding or polishing machines
B25D	17/10	Portable power-driven percussive tools
B25J	19/06	Manipulators
B26D	7/22	Cutting machines
B27G	19/00	Wood saws
B65B	57/00	Packaging machines or apparatus
B65G	43/00	Conveyers
B65H	26/00	Web-advancing mechanisms
B65H	63/00	Handling or winding of thin or filamentary material
D01G	31/00	Treatment of fibres
D01H	13/14	Spinning or twisting
D05B	83/00	Sewing machines
F21V	25/00	Lighting devices.

Devices protecting or preventing injuries to people

1/00 **Safety devices independent of the control or operation of any machine** (protective devices for the eyes or ears, worn on the body or carried in the hand, A61F 9/00, A61F 11/00)

1/02 . Fixed screens or hoods

1/04 . Screens or hoods rotating with rotary shafts

1/06 . specially designed for welding

3/00 **Safety devices acting in conjunction with the control or operation of a machine**; **Control arrangements requiring the simultaneous use of two or more parts of the body** (F16P 5/00 takes precedence)

3/02 . Screens or other safety members moving in synchronism with members which move to and fro

3/04 . . for machines with parts which approach one another during operation, e.g. for stamping presses

3/06 . . . in which body parts of the operator are removed from the danger zone on approach of the machine parts

3/08 . in connection with the locking of doors, covers, guards, or like members giving access to moving machine parts

3/10 . . in which the operation of locking the door or other member causes the machine to start

3/12 . with means, e.g. feelers, which in case of the presence of a body part of a person in or near the danger zone influence the control or operation of the machine (F16P 3/08 takes precedence)

3/14 . . the means being photocells or other devices sensitive without mechanical contact

3/16 . . with feeling members moved by the machine

3/18 . Control arrangements requiring the use of both hands

3/20 . . for electric control systems

3/22 . . for hydraulic or pneumatic control systems

3/24 . . for mechanical controls

5/00 **Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted**

7/00 **Emergency devices preventing damage to a machine or apparatus** (F16P 1/00, F16P 3/00, F16P 5/00 take precedence; indicating means, see the appropriate classes)

7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings affected by abnormal conditions F16C)

F16S **CONSTRUCTIONAL ELEMENTS IN GENERAL**; **STRUCTURES BUILT-UP FROM SUCH ELEMENTS, IN GENERAL**

Note

This subclass does not cover similar elements and structures, restricted to use in the building art, which are covered by subclass E04C.

1/00 **Sheets, panels, or other members of similar proportions**; **Constructions comprising assemblies of such members** (built-up gratings F16S 3/00; layered products B32B)

Note

In this group, the members may be generally flat or curved, but they may depart from such shape in detail over part or all of their area, e.g. they may be corrugated, ribbed, flanged; ribs, flanges, or the like may be separately formed.

1/02 . designed for being secured together edge to edge, e.g. at an angle; Assemblies thereof

1/04 . produced by deforming or otherwise working a flat sheet (honeycomb or other core members for layered products B32B 3/00, e.g. B32B 3/12, B32B 3/24, B32B 3/26)

1/06 . . by deforming only

1/08 . . by cutting or perforating, with or without deformation

1/10 . Composite members, e.g. with ribs or flanges attached (F16S 1/02 takes precedence)

1/12 . of substantial thickness, e.g. with varying thickness, with channels

1/14 . Assemblies of such members with members of forms covered by group F16S 3/00 or F16S 5/00 (such other members being for jointing only F16S 1/02)

3/00 **Elongated members, e.g. profiled members**; **Assemblies thereof**; **Gratings or grilles** (gratings or grilles formed from a sheet or the like F16S 1/00, particularly F16S 1/08; frames for doors, windows or the like E06B 1/00, E06B 3/00)

3/02 . composed of two or more elongated members secured together side by side

3/04 . designed for being joined to similar members in various relative positions

3/06 . Assemblies of elongated members (F16S 3/02, F16S 3/04 take precedence)

3/08 . . forming frameworks, e.g. gratings

5/00 **Other constructional members not restricted to an application fully provided for in a single class**

F16T STEAM TRAPS OR LIKE APPARATUS FOR DRAINING-OFF LIQUIDS FROM ENCLOSURES PREDOMINANTLY CONTAINING GASES OR VAPOURS

1/00 Steam traps or like apparatus for draining-off liquids from enclosures predominantly containing gases or vapours, e.g. gas lines, steam lines, containers

1/02 . with valves controlled thermally

1/04 . . by expansion rods

1/06 . . by expansion tubes

1/08 . . by bimetallic strips or plates

1/10 . . by thermally-expansible liquids

1/12 . with valves controlled by excess or release of pressure

1/14 . . involving a piston, diaphragm, or bellows, e.g. displaceable under pressure of incoming condensate

1/16 . . involving a high-pressure chamber and a low-pressure chamber communicating with one another, i.e. thermodynamic steam chambers

1/18 . . involving a vacuum chamber

1/20 . with valves controlled by floats

1/22 . . of closed-hollow-body type

1/24 . . . using levers

1/26 . . of upright-open-bucket type

1/28 . . . using levers

1/30 . . of inverted-open-bucket type; of bell type

1/32 . . of rocking or tilting type

1/34 . without moving parts other than hand valves, e.g. labyrinth type

1/36 . specially adapted for steam lines of low pressure

1/38 . Component parts; Accessories

1/40 . . Actuating mechanisms of ball valves

1/42 . . Actuating mechanisms of slide valves

1/45 . . Means for venting or aerating (separate devices therefor F16K 24/00) **[2]**

1/48 . . Monitoring arrangements for inspecting, e.g. flow of steam and steam condensate

F17 STORING OR DISTRIBUTING GASES OR LIQUIDS

F17B **GAS-HOLDERS OF VARIABLE CAPACITY** (self-acting gas cut-off devices A47J 27/62, G05D; flame traps A62C 4/00; gas mixers B01F, F16K 11/00, G05D 11/00; construction or assembling of bulk storage containers employing civil-engineering techniques E04H 7/00; gas compressors F04; valves F16K; damping pulsations in valves or pipes F16K, F16L; pipes F16L; stopping devices for gas mains F16L 55/10; vessels adapted for storing compressed, liquefied, or solidified gases F17C; gas distribution systems F17D 1/04; detecting leakage F17D 5/02, G01M; supervising or alarm devices F17D 5/02, G08B; control of combustion in burners F23N; gas flow or pressure regulators G05D)

1/00 **Gas-holders of variable capacity** (large containers in general B65D 88/00; storing fluids in natural or artificial cavities or chambers in the earth B65G 5/00)

1/007 . with telescopically movable ring-shaped parts (F17B 1/10 takes precedence; sealing of rings F17B 1/04) **[2]**

1/013 . with movables discs (F17B 1/10 takes precedence; sealing of discs F17B 1/04) **[2]**

1/02 . Details

1/04 . . Sealing devices for sliding parts (in general F16J 15/00)

1/06 . . . using sealing liquids

1/08 . . . using resilient materials for packing, e.g. leather

1/10 . . Guiding moving parts

1/12 . . Gas admission or discharge arrangements

1/14 . . Safety devices, e.g. prevention of excess pressure

1/16 . of wet type

1/18 . . bell-shaped

1/20 . . telescopic

1/22 . . . spirally-guided

1/24 . of dry type

1/26 . . with flexible walls, e.g. bellows (connection of valves to inflatable elastic bodies B60C 29/00)

F17C **VESSELS FOR CONTAINING OR STORING COMPRESSED, LIQUEFIED, OR SOLIDIFIED GASES**; **FIXED-CAPACITY GAS-HOLDERS**; **FILLING VESSELS WITH, OR DISCHARGING FROM VESSELS, COMPRESSED, LIQUEFIED, OR SOLIDIFIED GASES** (storing fluids in natural or artificial cavities or chambers in the earth B65G 5/00; construction or assembling of bulk storage containers employing civil-engineering techniques E04H 7/00; variable-capacity gas-holders F17B; liquefaction or refrigeration machines, plants, or systems F25)

Subclass index

1/00 **Pressure vessels, e.g. gas cylinder, gas tank, replaceable cartridge** (pressurised apparatus for purposes other than storage, see the relevant subclasses such as A62C, B05B; associated with vehicles, see the appropriate subclass of classes B60 to B64; pressure vessels in general F16J 12/00)

1/02 . involving reinforcing arrangements **[4]**

1/04 . . Protecting sheatings

1/06 . . . built-up from wound-on bands or filamentary material, e.g. wires **[4]**

1/08 . . Integral reinforcements, e.g. ribs

1/10 . with provision for protection against corrosion, e.g. due to gaseous acid (inhibiting corrosion of metallic material or incrustation in general C23F) **[4]**

1/12 . with provision for thermal insulation (thermal insulation in general F16L 59/00) **[4]**

1/14 . constructed of aluminium; constructed of non-magnetic steel

1/16 . constructed of plastics materials

3/00 **Vessels not under pressure**

3/02 . with provision for thermal insulation (thermal insulation in general F16L 59/00)

3/04 . . by insulating layers (F17C 3/08 takes precedence)

3/06 . . . on the inner surface, i.e. in contact with the stored fluid **[4]**

3/08 . . by vacuum spaces, e.g. Dewar flask (for household use A47J 41/02)

3/10 . . by liquid-circulating or vapour-circulating jackets

3/12 . with provision for protection against corrosion, e.g. due to gaseous acid (protection against corrosion in general C23F)

5/00 **Methods or apparatus for filling pressure vessels with liquefied, solidified, or compressed gases** (adding propellants to aerosol containers B65B 31/00)

Note

This group covers:
- the filling of vessels for storage of compressed or liquefied gases;
- the filling of pressurised apparatus insofar as it is not covered by a single other subclass, e.g. A62C, B05B.

5/02 . for filling with liquefied gases

5/04 . . requiring the use of refrigeration, e.g. filling with helium or hydrogen

5/06 . for filling with compressed gases

6/00 **Methods or apparatus for filling vessels not under pressure with liquefied or solidified gases [3]**

7/00 **Methods or apparatus for discharging liquefied, solidified, or compressed gases from pressure vessels, not covered by another subclass**

7/02 . Discharging liquefied gases

7/04 . . with change of state, e.g. vaporisation **[3]**

9/00 **Methods or apparatus for discharging liquefied or solidified gases from vessels not under pressure**

9/02 . with change of state, e.g. vaporisation

9/04 . . Recovery of thermal energy **[3]**

11/00 **Use of gas-solvents or gas-sorbents in vessels**

13/00 **Details of vessels or of the filling or discharging of vessels**

13/02 . Special adaptations of indicating, measuring, or monitoring equipment (measuring in general G01)

13/04 . Arrangement or mounting of valves (valves per se F16K)

13/06 . Closures, e.g. cap, breakable member (closures for containers in general B65D)

13/08 . Mounting arrangements for vessels

13/10 . Arrangements for preventing freezing

13/12 . Arrangements or mounting of devices for preventing or minimising the effect of explosion (flame traps A62C 4/00)

F17D **PIPE-LINE SYSTEMS**; **PIPE-LINES** (distributing water E03B; pumps or compressors F04; fluid dynamics F15D; valves or the like F16K; pipes, laying pipes, supports, joints, branches, repairing, work on the entire line, accessories F16L; steam traps or the like F16T; fluid-pressure electric cables H01B 9/06)

Note

In this subclass, the following expression is used with the meaning indicated:
– "pipe-line systems" means systems described in flow sheets as well as arrangements of co-operating elements, the elements per se being covered by the relevant subclasses.

1/00 **Pipe-line systems** (conveying articles or materials through a pipe-line by means of a fluid carrier B65G 51/00, B65G 53/00; dispensing, delivering or transferring liquids B67D; apparatus or devices for transferring liquids from bulk storage containers or reservoirs into vehicles or into portable containers, e.g. for retail sale purposes, B67D 7/00; conveying material which has been excavated by a dredger or soil shifter through a pipe-line E02F 7/10; sewer pipe-line systems E03F 3/00; thermal insulation of pipe-lines F16L 59/00; central heating systems F24D) **[2]**

1/02 . for gases or vapours

1/04 . . for distribution of gas

1/05 . . . Preventing freezing (by heating F16L 53/00)

1/06 . . for steam

1/065 . . Arrangements for producing propulsion of gases or vapours **[2]**

1/07 . . . by compression **[2]**

1/075 . . . by mere expansion from an initial pressure level, e.g. by arrangement of a flow-control valve **[2]**

1/08 . for liquids or viscous products (water-main or service pipe systems E03B 7/04; domestic hot-water supply systems F24D 17/00) **[2]**

1/12 . . Conveying liquids or viscous products by pressure of another fluid **[2]**

1/13 . . Conveying liquids or viscous products by gravity **[2]**

1/14 . . Conveying liquids or viscous products by pumping **[2]**

1/16 . . Facilitating the conveyance of liquids or effecting the conveyance of viscous products by modification of their viscosity **[2]**

1/17 . . . by mixing with another liquid **[2]**

1/18 . . . by heating **[2]**

1/20 . Arrangements or systems of devices for influencing or altering dynamic characteristics of the systems, e.g. for damping pulsations caused by opening or closing of valves (fluid dynamics F15D; damping pulsations in fluids in pipes in general F16L 55/04) **[2]**

3/00 **Arrangements for supervising or controlling working operations**

3/01 . for controlling, signalling, or supervising the conveyance of a product **[2]**

3/03 . for controlling, signalling, or supervising the conveyance of several different products following one another in the same conduit, e.g. for switching from one receiving tank to another **[2]**

3/05 . . the different products not being separated (separation of contaminants by distillation B01D 3/00) **[2]**

3/08 . . the different products being separated by "go-devils", e.g. spheres (cleaning devices moved along the inside of pipe-lines by a fluid B08B 9/053) **[2]**

3/10 . for taking out the product in the line (investigating or analysing materials by determinating their chemical or physical properties G01N) **[2]**

3/12 . for injecting a composition into the line **[2]**

3/14 . for eliminating water (separation of liquids B01D, e.g. B01D 17/00; separation of gases or vapours B01D 53/00) **[2]**

3/16 . for eliminating particles in suspension (from liquids by sedimentation B01D 21/00; separation by filtration or otherwise B01D 24/00 to B01D 51/00; centrifugal apparatus B04) **[2]**

3/18 . for measuring the quantity of conveyed product (measuring volume or volume flow, in general G01F) **[2]**

5/00 Protection or supervision of installations (arrangements for protecting foundations E02D 31/00; protecting pipes from damage or internal or external wear F16L 57/00, against corrosion or scale F16L 58/00; investigation of the fluid-tightness of structures G01M 3/00) **[2]**

5/02 . Preventing, monitoring, or locating loss **[2]**

5/04 . . by means of a signalling fluid enclosed in a double wall **[2]**

5/06 . . using electric or acoustic means **[2]**

5/08 . Protection of installations or persons from the effects of high voltage induced in the pipe-line (emergency protective circuit arrangements H02H) **[2]**

LIGHTING; HEATING

F21 LIGHTING

Note

Attention is drawn to Note III of Section H, and in particular that subclass H05B covers electrical aspects of the same technical subjects that are covered by class F21.

F21H INCANDESCENT MANTLES; **OTHER INCANDESCENT BODIES HEATED BY COMBUSTION** (arrangements thereof F21V 36/00; burners F23D)

1/00 Incandescent mantles; **Selection of imbibition liquids therefor**

1/02 . characterised by the material thereof

3/00 Manufacturing incandescent mantles; **Treatment prior to use, e.g. burning-off**; **Machines for manufacturing**

5/00 Solid incandescent bodies (incandescent mantles F21H 1/00)

7/00 Other incandescent bodies [2009.01]

F21K LIGHT SOURCES NOT OTHERWISE PROVIDED FOR

2/00 Light sources using luminescence (luminescent materials C09K 11/00; selection of luminescent materials for light screens F21V 9/16; using excitation by radioactivity G21H 3/02, H01J 65/06, H01J 65/08; transforming the wavelength of the light of gas- or vapour-discharge lamps by luminescence H01J 61/42; electroluminescent light sources H05B 33/00) **[2,7]**

2/04 . using triboluminescence; using thermoluminescence

2/06 . using chemiluminescence **[3]**

2/08 . . activated by an electric field, i.e. electrochemiluminescence **[3]**

5/00 Light sources using charges of combustible material, e.g. illuminating flash devices (explosive or thermic compositions C06B; fireworks F42B 4/00; photographic flash units G03B 15/03) **[3,5]**

5/04 . Plural charges, e.g. associated for sequential ignition (F21K 5/06, F21K 5/12 take precedence) **[5]**

5/06 . Charge containment **[5]**

5/08 . . Charge held in non-disrupting container, e.g. photo-flash bulb **[5]**

5/10 . . . bearing a coating **[5]**

5/12 . Charge ignition **[5]**

5/14 . . percussive **[5]**

5/16 . . electrical (circuit arrangements H05B 43/02) **[5]**

5/18 . . . Electrically-ignited primers **[5]**

5/20 . Charge feeding means **[5]**

5/22 . Protective light shields **[5]**

99/00 Subject matter not provided for in other groups of this subclass [2010.01]

F21L LIGHTING DEVICES OR SYSTEMS THEREOF, BEING PORTABLE OR SPECIALLY ADAPTED FOR TRANSPORTATION (burners F23D; electric aspects or elements, see section H, e.g. electric light sources H01J, H01K, H05B) **[1,7]**

(1) This subclass covers devices or systems designed or specially adapted to be carried, e.g. by hand, or otherwise transported from place to place, e.g. on wheeled supports, in order to provide illumination as and where required. **[7]**

(2) This subclass does not cover devices or systems intended for fixed installation, e.g. vehicle lighting, or for use essentially at a permanent location, which are covered by subclass F21S. **[7]**

(3) Non-electric lighting devices are classified in groups F21L 17/00 to F21L 26/00 only if a special adaptation related to the use of a non-electric light source is of interest. **[2009.01]**

(4) In this subclass, it is desirable to add the indexing codes of subclasses F21W and F21Y. **[7]**

Subclass index

2/00 **Systems of electric lighting devices** (systems employing both electric and non-electric light sources or exchangeable light sources F21L 27/00) **[7]**

4/00 **Electric lighting devices with self-contained electric batteries or cells [7]**

4/02 . characterised by provision of two or more light sources **[7]**

4/04 . characterised by provision of a light source housing portion adjustably fixed to the remainder of the device **[7]**

4/06 . with light source coupled to the remainder of the device solely by cable **[7]**

4/08 . characterised by means for in situ recharging of the batteries or cells **[7]**

13/00 **Electric lighting devices with built-in electric generators** (with solar cells F21L 4/00) **[1,7]**

13/02 . with fluid drive

13/04 . . actuated by hand

13/06 . with mechanical drive, e.g. spring

13/08 . . by reciprocating pusher actuated by hand

14/00 **Electric lighting devices without a self-contained power source, e.g. for mains connection [7]**

14/02 . capable of hand-held use, e.g. inspection lamps **[7]**

14/04 . carried on wheeled supports **[7]**

17/00 **Non-electric torches**; **Non-electric flares**

19/00 **Lanterns, e.g. hurricane lamps or candle lamps** (candle holders F21V 35/00)

21/00 **Non-electric pocket-lamps, e.g. lamps producing sparks**

23/00 **Non-electric hand-lamps for miners**

26/00 **Non-electric portable lighting devices, or systems thereof, not provided for in groups F21L 17/00 to F21L 23/00 [8]**

27/00 **Lighting devices or systems, employing combinations of electric and non-electric light sources**; **Replacing or exchanging electric light sources with non-electric light sources or vice versa in lighting devices or systems**

F21S **NON-PORTABLE LIGHTING DEVICES OR SYSTEMS THEREOF** (burners F23D; electric aspects or elements, see section H, e.g. electric light sources H01J, H01K, H05B) **[1,7]**

(1) This subclass covers devices or systems intended for fixed installation, e.g. vehicle lighting, or for use at a permanent location, e.g. free-standing floor- or table-lamps. **[7]**

(2) This subclass does not cover devices or systems specially adapted for transportation, which are covered by subclass F21L. **[7]**

(3) Non-electric lighting devices or systems are classified in groups F21S 11/00 to F21S 15/00 only if a special adaptation related to the use of a non-electric light source is of interest. **[2009.01]**

(4) In this subclass, it is desirable to add the indexing codes of subclasses F21W and F21Y. **[7]**

Subclass index

2/00 **Systems of lighting devices, not provided for in main groups F21S 4/00 to F21S 10/00 or F21S 19/00, e.g. of modular construction [7]**

4/00 **Lighting devices or systems using a string or strip of light sources [7]**

6/00 **Lighting devices intended to be free-standing** (F21S 9/00, F21S 10/00 take precedence) **[7]**

8/00 **Lighting devices intended for fixed installation** (F21S 9/00, F21S 10/00 take precedence; using a string or strip of light sources F21S 4/00) **[7]**

8/02 . of recess-mounted type, e.g. downlighters (F21S 8/10 takes precedence) **[7]**

8/04 . intended only for mounting on a ceiling or like overhead structure (F21S 8/02 takes precedence) **[7]**

8/06 . . by suspension **[7]**

8/08 . with a standard **[7]**

8/10 . specially adapted for vehicles **[7]**
8/12 . . providing a single shaped beam, e.g. asymmetric beam, e.g. for penetrating fog or for preventing glare **[7]**

9/00 Lighting devices with a built-in power supply; **Systems employing lighting devices with a built-in power supply**
9/02 . the power supply being a battery or accumulator
9/03 . . rechargeable by exposure to light **[7]**
9/04 . the power supply being a generator

10/00 Lighting devices or systems producing a varying lighting effect [7]
10/02 . changing colours (F21S 10/04 takes precedence) **[7]**
10/04 . simulating flames **[7]**
10/06 . flashing, e.g. with rotating reflector or light source **[7]**

11/00 Non-electric lighting devices or systems using daylight

13/00 Non-electric lighting devices or systems employing a point-like light source (candle holders F21V 35/00); **Non-electric lighting devices or systems employing a light source of unspecified shape**
13/02 . Devices intended to be fixed, e.g. ceiling lamp, wall lamp
13/04 . . with a pendant
13/06 . . . multi-branched, e.g. chandelier
13/08 . . with suspension from a stretched wire
13/10 . . with a standard, e.g. street lamp
13/12 . Devices intended to be free-standing, e.g. table lamp, floor lamp
13/14 . Lighting systems

15/00 Non-electric lighting devices or systems employing light sources not covered by main groups F21S 11/00, F21S 13/00 or F21S 19/00

19/00 Lighting devices or systems employing combinations of electric and non-electric light sources; **Replacing or exchanging electric light sources with non-electric light sources or vice versa**

F21V FUNCTIONAL FEATURES OR DETAILS OF LIGHTING DEVICES OR SYSTEMS THEREOF; **STRUCTURAL COMBINATIONS OF LIGHTING DEVICES WITH OTHER ARTICLES, NOT OTHERWISE PROVIDED FOR [1,7]**

(1) Groups F21V 1/00 to F21V 14/00 cover details of those parts involved in light emission or distribution. Groups F21V 15/00 to F21V 31/00 cover details of those parts not so involved. **[2009.01]**
(2) Details of non-electric lighting devices or systems are classified in groups F21V 35/00 to F21V 37/00 only if a special adaptation related to the use of a non-electric light source is of interest. **[2009.01]**
(3) In this subclass, it is desirable to add the indexing codes of subclasses F21W and F21Y. **[7]**

Subclass index

1/00 Shades for light sources
1/02 . Frames
1/04 . . rigid (F21V 1/08 takes precedence)
1/06 . . foldable or collapsible
1/08 . . adjustable
1/10 . Rotating shades
1/12 . Composite shades
1/14 . Covers for frames; Frameless shades
1/16 . . characterised by the material
1/18 . . . the material being paper
1/20 . . . the material being glass
1/22 . . . the material being plastics
1/24 . . . the material being metal
1/26 . Manufacturing shades

3/00 Globes; **Bowls**; **Cover glasses** (with refracting properties F21V 5/00; with reflecting properties F21V 7/00)
3/02 . characterised by the shape
3/04 . characterised by the material; characterised by surface treatments or coatings

5/00 Refractors for light sources
5/02 . of prismatic shape (F21V 5/04 takes precedence)
5/04 . of lens shape

5/06 . Hanging lustres for chandeliers
5/08 . producing an asymmetric light distribution **[1,7]**

7/00 Reflectors for light sources
7/04 . Optical design (F21V 7/22 takes precedence) **[1,7]**
7/05 . . plane **[1,7]**
7/06 . . with parabolic curvature **[1,7]**
7/07 . . with hyperbolic curvature **[1,7]**
7/08 . . with elliptical curvature **[1,7]**
7/09 . . with a combination of different curvatures **[1,7]**
7/10 . Construction (F21V 7/22 takes precedence) **[1,7]**
7/16 . . with provision for adjusting the curvature **[1,7]**
7/18 . . with provision for folding or collapsing **[1,7]**
7/20 . . specially adapted for facilitating cooling, e.g. with fins **[1,7]**
7/22 . characterised by the material; characterised by surface treatments or coatings

8/00 Use of light guides, e.g. fibre optic devices, in lighting devices or systems (light guides per se, structural details of arrangements with other optical elements G02B 6/00) **[4]**

9/00 Light filters (coloured shades F21V 1/00); **Selection of luminescent materials for light screens** (luminescent materials per se C09K 11/00; electroluminescent light sources per se H05B 33/00)
9/02 . for simulating daylight (F21V 9/04, F21V 9/06, F21V 9/16 take precedence)
9/04 . for filtering out infra-red radiation (using liquid-filled chambers F21V 9/12)
9/06 . for filtering out ultra-violet radiation (F21V 9/16 takes precedence)
9/08 . for producing coloured light, e.g. monochromatic; for reducing intensity of light (F21V 9/16 takes precedence)
9/10 . . with provision for variation of the colour or intensity (F21V 9/12 takes precedence)
9/12 . . with liquid-filled chambers
9/14 . for producing polarised light
9/16 . Selection of luminescent materials for light screens

11/00 Screens not covered by groups F21V 1/00, F21V 3/00, F21V 7/00 or F21V 9/00
11/02 . using parallel laminae or strips, e.g. of Venetian-blind type (F21V 11/06 takes precedence)
11/04 . . adjustable
11/06 . using crossed laminae or strips; using lattices or honeycombs
11/08 . using diaphragms containing one or more apertures
11/10 . . of iris type
11/12 . . of slot type
11/14 . . with many small apertures
11/16 . using sheets without apertures, e.g. fixed (F21V 11/02, F21V 11/06 take precedence)
11/18 . . movable, e.g. flaps, slides

13/00 Producing particular characteristics or distribution of the light emitted by means of a combination of elements specified in two or more of main groups F21V 1/00 to F21V 11/00 (changing the characteristics or distribution of the light emitted by adjustment of parts F21V 14/00) **[1,7]**
13/02 . Combinations of only two kinds of elements
13/04 . . the elements being reflectors and refractors
13/06 . . . a reflector being rotatable
13/08 . . the elements being reflectors and filters
13/10 . . the elements being reflectors and screens
13/12 . Combinations of only three kinds of elements
13/14 . . the elements being reflectors, refractors, and filters

14/00 Changing the characteristics or distribution of the light emitted by adjustment of parts (reflectors with provision for adjusting the curvature F21V 7/16; light filters with provision for variation of colour or intensity F21V 9/10; screens using iris-type diaphragms F21V 11/10; adjustable mountings for lighting devices F21V 21/14) **[7]**
14/02 . by movement of light sources **[7]**
14/04 . by movement of reflectors **[7]**
14/06 . by movement of refractors **[7]**
14/08 . by movement of screens **[7]**

15/00 Protecting lighting devices from damage (cooling or heating arrangements F21V 29/00; gas-tight or water-tight arrangements F21V 31/00)
15/01 . Housings, e.g. material or assembling of housing parts (F21V 15/02 takes precedence) **[7]**
15/015 . . Devices for covering joints between adjacent lighting devices; End coverings **[7]**
15/02 . Cages
15/04 . Resilient mountings, e.g. shock-absorbers
15/06 . Thermal insulation **[7]**

17/00 Fastening of component parts of lighting devices, e.g. shades, globes, refractors, reflectors, filters, screens, grids or protective cages (of light sources or light holders F21V 19/00; gas-tight or water-tight arrangements F21V 31/00)
17/02 . with provision for adjustment (F21V 17/04 to F21V 17/08 take precedence; changing the characteristics or distribution of the light emitted by adjustment of parts F21V 14/00) **[1,7]**
17/04 . onto or by the light source
17/06 . onto or by the lamp holder
17/08 . onto the supporting or suspending arrangements of the lighting device, e.g. power cords, standards **[7]**
17/10 . characterised by specific fastening means or way of fastening (F21V 17/02 to F21V 17/08 take precedence) **[7]**
17/12 . . by screwing **[7]**
17/14 . . Bayonet-type fastening **[7]**
17/16 . . by deformation of parts of the lighting device; Snap action mounting **[7]**
17/18 . . Latch-type fastening, e.g. with rotary action **[7]**
17/20 . . by toggle-action levers **[7]**

19/00 Fastening of light sources or lamp holders (fastening electric light source solely by the coupling device H01R 33/00)
19/02 . with provision for adjustment, e.g. for focusing (changing the characteristics or distribution of the light emitted by adjustment of parts F21V 14/00) **[1,7]**
19/04 . with provision for changing light source, e.g. turret
19/06 . Fastening incandescent mantles or other incandescent bodies to lamp parts; Suspension devices for incandescent mantles or other incandescent bodies **[1,7]**

21/00 Supporting, suspending, or attaching arrangements for lighting devices (F21V 17/00, F21V 19/00 take precedence); **Hand grips [1,7]**
21/002 . making direct electrical contact, e.g. by piercing (F21V 21/35 takes precedence) **[7]**
21/005 . for several lighting devices in an end-to-end arrangement, i.e. light tracks **[7]**

21/008 . Suspending from a cable or suspension line **[7]**
21/02 . Wall, ceiling, or floor bases; Fixing pendants or arms to the bases (F21V 21/08 takes precedence; bases for movable standing lamps F21V 21/06)
21/03 . . Ceiling bases, e.g. ceiling roses (F21V 21/04 takes precedence) **[7]**
21/04 . . Recessed bases
21/06 . Bases for movable standing lamps; Fixing standards to the bases (F21V 21/08 takes precedence)
21/08 . Devices for easy attachment to a desired place
21/084 . . Head fittings (for medical purposes A61B 1/06) **[7]**
21/088 . . Clips; Clamps **[7]**
21/092 . . Suction devices **[7]**
21/096 . . Magnetic devices **[7]**
21/10 . Pendants, arms or standards; Fixing lighting devices to pendants, arms or standards (adjustable mounting F21V 21/14)
21/104 . . Pendants **[7]**
21/108 . . Arms **[7]**
21/112 . . Fixing lighting devices to pendants (F21V 21/002 takes precedence) **[7]**
21/116 . . Fixing lighting devices to arms or standards (F21V 21/002 takes precedence) **[7]**
21/12 . . capable of being elongated or shortened by the insertion or removal of intermediate pieces
21/13 . Spring-loaded poles fixed at both ends **[7]**
21/14 . Adjustable mountings
21/15 . . specially adapted for power operation, e.g. by remote control **[7]**
21/16 . . using wires or cords
21/18 . . . operated by springs
21/20 . . . operated by weights
21/22 . . telescopic
21/24 . . Lazy-tongs
21/26 . . Pivoted arms
21/28 . . . adjustable in more than one plane
21/29 . . . . employing universal joints
21/30 . . Pivoted housings or frames
21/32 . . Flexible tubes
21/34 . Supporting elements displaceable along a guiding element
21/35 . . with direct electrical contact between the supporting element and electric conductors running along the guiding element **[7]**
21/36 . Hoisting or lowering devices, e.g. for maintenance (F21V 21/14 takes precedence)
21/38 . . with a cable
21/40 . Hand grips **[7]**

23/00 Arrangement of electric circuit elements in or on lighting devices
23/02 . the elements being transformers or impedances
23/04 . the elements being switches (safety devices F21V 25/00)
23/06 . the elements being coupling devices

25/00 Safety devices structurally associated with lighting devices (gas-tight or water-tight arrangements F21V 31/00)
25/02 . coming into action when lighting device is disturbed, dismounted, or broken
25/04 . . breaking the electric circuit
25/06 . . feeding a quenching fluid to the light source
25/08 . . cutting the incandescent filament
25/10 . coming into action when lighting device is over-loaded, e.g. thermal switch
25/12 . Flameproof or explosion-proof arrangements

27/00 Cable-stowing arrangements structurally associated with lighting devices, e.g. reels
27/02 . Cable inlets **[7]**

29/00 Cooling or heating arrangements (reflectors specially adapted for cooling F21V 7/20; cooling of air-treatment systems with air-flow over lighting fixtures F24F 3/056; lighting fixtures combined with outlets for air-treatment systems F24F 13/078; cooling of projectors G03B 21/16) **[1,7]**
29/02 . Cooling by forcing air over or around the light source (cooling arrangements structurally associated with electric lamps H01J 61/52, H01K 1/58) **[7]**

31/00 Gas-tight or water-tight arrangements
31/03 . with provision for venting **[7]**
31/04 . Provision of filling media (safety devices F21V 25/00; cooling arrangements F21V 29/00)

33/00 Structural combinations of lighting devices with other articles, not otherwise provided for [1,7]

35/00 Candle holders

36/00 Arrangements of mantles or other incandescent bodies on burners (attaching to lamp parts F21V 19/06)
36/02 . in ceiling lamps

37/00 Details of lighting devices employing combustion as light source, not otherwise provided for [1,7]
37/02 . Special adaptation for protection against draughts **[7]**

99/00 Subject matter not provided for in other groups of this subclass [8]

F21W INDEXING SCHEME ASSOCIATED WITH SUBCLASSES F21L, F21S AND F21V, RELATING TO USES OR APPLICATIONS OF LIGHTING DEVICES OR SYSTEMS [7]

Note

This subclass constitutes an indexing scheme associated with subclasses F21L, F21S and F21V, relating to uses or applications of lighting devices or systems. **[7]**

101/00 Use or application of lighting devices on or in vehicles [7]
101/02 . for land vehicles **[7]**
101/023 . . for cycles **[7]**
101/027 . . . for motorcycles **[7]**
101/04 . for water vehicles **[7]**
101/06 . for aircraft **[7]**
101/08 . Interior lights **[7]**

101/10 . Head-, spot- or fog-lights **[7]**
101/12 . Direction indicator lights **[7]**
101/14 . Rear or stop lights **[7]**

111/00 Use or application of lighting devices or systems for signalling, marking or indicating, not provided for in group F21W 101/00 [7]
111/02 . for roads, paths or the like **[7]**
111/023 . . for pedestrian walkways **[7]**
111/027 . . for indicating kerbs, steps or stairs **[7]**
111/04 . for waterways **[7]**
111/043 . . for lighthouses or lightships **[7]**
111/047 . . for light-buoys **[7]**
111/06 . for aircraft runways or the like **[7]**
111/08 . for handles or handrails **[7]**
111/10 . for personal use, e.g. hand-held **[7]**

121/00 Use or application of lighting devices or systems for decorative purposes [7]
121/02 . for fountains **[7]**
121/04 . for Christmas trees **[7]**
121/06 . for personal wear **[7]**

131/00 Uses or applications of lighting devices or systems not provided for in groups F21W 101/00 to F21W 121/00 [7]
131/10 . Outdoor lighting **[7]**
131/101 . . of tunnels or the like, e.g. under bridges **[7]**
131/103 . . of streets or roads **[7]**
131/105 . . of arenas or the like **[7]**
131/107 . . of the exterior of buildings **[7]**
131/109 . . of gardens **[7]**
131/20 . Lighting for medical use **[7]**
131/202 . . for dentistry **[7]**
131/205 . . for operating theatres **[7]**
131/208 . . for hospital wards **[7]**
131/30 . Lighting for domestic or personal use **[7]**
131/301 . . for furniture **[7]**
131/302 . . for mirrors **[7]**
131/304 . . for pictures **[7]**
131/305 . . for refrigerators **[7]**
131/307 . . for ovens **[7]**
131/308 . . for aquaria **[7]**
131/40 . Lighting for industrial, commercial, recreational or military use **[7]**
131/401 . . for swimming pools **[7]**
131/402 . . for working places **[7]**
131/403 . . for machines **[7]**
131/4035 . . . for sewing machines **[7]**
131/405 . . for shop-windows or displays **[7]**
131/406 . . for theatres, stages or film studios **[7]**
131/407 . . for indoor arenas **[7]**
131/409 . . for furnaces or kilns **[7]**
131/411 . . for inspection of the interior of hollow structures, e.g. vessels, tubes **[7]**

F21Y INDEXING SCHEME ASSOCIATED WITH SUBCLASSES F21L, F21S AND F21V, RELATING TO THE FORM OF THE LIGHT SOURCES [7]

Note

This subclass constitutes an indexing scheme associated with subclasses F21L, F21S and F21V, relating to the form of the light sources. **[7]**

101/00 Point-like light sources [7]
101/02 . Miniature, e.g. light emitting diodes (LED) **[7]**

103/00 Elongated light sources, e.g. fluorescent tubes [7]
103/02 . curved, e.g. ring-shaped **[7]**
103/025 . . U-shaped **[7]**

105/00 Planar light sources [7]

111/00 Light sources of form not covered by groups F21Y 101/00 to F21Y 105/00 [7]

113/00 Combination of light sources [7]
113/02 . of different form **[7]**

F22 STEAM GENERATION

Note

In this class, the following term is used with the meaning indicated:
– "steam" covers also other condensable vapours, e.g. mercury, diphenyl, diphenyl oxide.

F22B **METHODS OF STEAM GENERATION**; **STEAM BOILERS** (steam engine plants where engine aspects predominate F01K; removal of combustion products or residues, e.g. cleaning of the combustion contaminated surfaces of tubes of boilers, F23J 3/00; domestic central-heating systems using steam F24D; heat exchange or heat transfer in general F28; generation of vapour in the cores of nuclear reactors G21)

Note

This subclass covers only methods of, or apparatus for, the generation of steam under pressure for heating or power purposes.

Subclass index

1/00 **Methods of steam generation characterised by form of heating method** (use of solar heat F24J 2/00; jackets or other cooling means in which steam is generated and which serve for cooling other apparatus, see the subclasses for such apparatus)

1/02 . by exploitation of the heat content of hot heat carriers

1/04 . . the heat carrier being hot slag, hot residues, or heated blocks, e.g. iron blocks

1/06 . . the heat carrier being molten; Use of molten metal, e.g. zinc, as heat transfer medium

1/08 . . the heat carrier being steam

1/10 . . . released from heat accumulators

1/12 . . . produced by an indirect cyclic process

1/14 . . . coming in direct contact with water in bulk or in sprays

1/16 . . the heat carrier being hot liquid or hot vapour, e.g. waste liquid, waste vapour

1/18 . . the heat carrier being a hot gas, e.g. waste gas such as exhaust gas of internal-combustion engines (use of waste heat of combustion engines, in general, F02)

1/20 . using heat evolved in a solution absorbing steam; Soda steam boilers

1/22 . using combustion under pressure substantially exceeding atmospheric pressure

1/24 . . Pressure-fired steam boilers, e.g. using turbo air compressors actuated by hot gases from boiler furnace

1/26 . . Steam boilers of submerged-flame type, i.e. the flame being surrounded by, or impinging on, the water to be vaporised

1/28 . in boilers heated electrically

1/30 . . Electrode boilers

3/00 **Other methods of steam generation**; **Steam boilers not provided for in other groups of this subclass**

3/02 . involving the use of working media other than water

3/04 . by drop in pressure of high-pressure hot water within pressure-reducing chambers, e.g. in accumulators (steam accumulators per se F01K 1/00)

3/06 . by transformation of mechanical, e.g. kinetic, energy into heat energy

3/08 . at critical or supercritical pressure values

5/00 **Steam boilers of drum type, i.e. without internal furnace or fire tubes, the boiler body being contacted externally by flue gas**

5/02 . with auxiliary water tubes outside the boiler body

5/04 . Component parts thereof; Accessories therefor (covers or similar closure members for pressure vessels in general F16J 13/00)

7/00 **Steam boilers of furnace-tube type, i.e. the combustion of fuel being performed inside one or more furnace tubes built-in in the boiler body**

7/02 . without auxiliary water tubes

7/04 . with auxiliary water tubes

7/06 . . inside the furnace tube in transverse arrangement

7/08 . . inside the furnace tube in longitudinal arrangement

7/10 . . outside the boiler body

7/12 . with auxiliary fire tubes; Arrangement of header boxes providing for return diversion of flue gas flow

7/14 . with both auxiliary water tubes and auxiliary fire tubes
7/16 . Component parts thereof; Accessories therefor, e.g. stay-bolt connections
7/18 . . Walling of flues; Flue-gas header boxes
7/20 . . Furnace tubes

9/00 Steam boilers of fire-tube type, i.e. the flue gas from a combustion chamber outside the boiler body flowing through tubes built-in in the boiler body

9/02 . the boiler body being disposed upright, e.g. above the combustion chamber
9/04 . . the fire tubes being in upright arrangement
9/06 . . . Arrangement of header boxes providing for return diversion of flue gas flow
9/08 . . the fire tubes being in horizontal arrangement
9/10 . the boiler body being disposed substantially horizontally, e.g. at the side of the combustion chamber
9/12 . . the fire tubes being in substantially-horizontal arrangement
9/14 . . . Arrangement of header boxes providing for return diversion of flue gas flow
9/16 . the boiler body containing fire tubes disposed crosswise in inclined upward arrangement
9/18 . Component parts thereof; Accessories therefor, e.g. stay-bolt connections

11/00 Steam boilers of combined fire-tube type and water-tube type, i.e. steam boilers of fire-tube type having auxiliary water tubes

11/02 . the fire tubes being in upright arrangement
11/04 . the fire tubes being in horizontal arrangement

13/00 Steam boilers of fire-box type, i.e. the combustion of fuel being performed in a chamber or fire-box with subsequent flue(s) or fire tube(s), both chamber or fire-box and flues or fire tubes being built-in in the boiler body

13/02 . mounted in fixed position with the boiler body disposed upright
13/04 . mounted in fixed position with the boiler body disposed substantially horizontally
13/06 . Locomobile, traction-engine, steam-roller, or locomotive boilers
13/08 . . without auxiliary water tubes inside the fire-box
13/10 . . with auxiliary water tubes inside the fire-box
13/12 . . . the auxiliary water tubes lining the fire-box
13/14 . Component parts thereof; Accessories therefor
13/16 . . Stay-bolt connections, e.g. rigid connections
13/18 . . . Flexible connections, e.g. of ball-and-socket type

15/00 Water-tube boilers of horizontal type, i.e. the water-tube sets being arranged horizontally

17/00 Water-tube boilers of horizontally-inclined type, i.e. the water-tube sets being inclined slightly with respect to the horizontal plane

17/02 . built-up from water-tube sets in abutting connection with two header boxes in common for all sets, e.g. with flat header boxes
17/04 . . the water-tube sets being inclined in opposite directions, e.g. crosswise
17/06 . . the water-tube sets being bent angularly
17/08 . . the water-tube sets being curved
17/10 . built-up from water-tube sets in abutting connection with two sectional headers each for every set, i.e. with headers in a number of sections across the width or height of the boiler
17/12 . . the sectional headers being in vertical or substantially-vertical arrangement
17/14 . . the sectional headers being in horizontal or substantially-horizontal arrangement
17/16 . Component parts thereof; Accessories therefor
17/18 . . Header boxes; Sectional headers

19/00 Water-tube boilers of combined horizontally-inclined type and vertical type, i.e. water-tube boilers of horizontally-inclined type having auxiliary water-tube sets in vertical or substantially-vertical arrangement

21/00 Water-tube boilers of vertical or steeply-inclined type, i.e. the water-tube sets being arranged vertically or substantially vertically

21/02 . built-up from substantially-straight water tubes
21/04 . . involving a single upper drum and a single lower drum, e.g. the drums being arranged transversely
21/06 . . . the water tubes being arranged annularly in sets, e.g. in abutting connection with drums of annular shape
21/08 . . . the water tubes being arranged sectionally in groups or in banks, e.g. bent over at their ends
21/10 . . . the water tubes being arranged in staggered rows
21/12 . . involving two or more upper drums and two or more lower drums, e.g. with crosswise-arranged water-tube sets in abutting connection with drums
21/14 . . involving a single upper drum and two or more lower drums
21/16 . . . the lower drums being interconnected by further water tubes
21/18 . . involving two or more upper drums and a single lower drum
21/20 . . involving sectional or subdivided headers in separate arrangement for each water-tube set
21/22 . built-up from water tubes of form other than straight or substantially straight
21/24 . . bent in serpentine or sinuous form
21/26 . . bent helically, i.e. coiled
21/28 . . bent spirally
21/30 . . bent in U-loop form
21/32 . . . disposed horizontally in abutting connection with upright headers or rising water mains
21/34 . built-up from water tubes grouped in panel form surrounding the combustion chamber, i.e. radiation boilers
21/36 . . involving an upper drum or headers mounted at the top of the combustion chamber
21/38 . . Component parts thereof, e.g. prefabricated panels
21/40 . built-up from water tubes arranged in a comparatively long vertical shaft, i.e. tower boilers

23/00 Water-tube boilers built-up from sets of spaced double-walled water tubes of return type in unilaterial abutting connection with a boiler drum or with a header box, i.e. built-up from Field water tubes comprising an inner tube arranged within an outer unilaterally-closed tube

23/02 . the water-tube, i.e. Field-tube, sets being horizontal or substantially horizontal

23/04 . the water-tube, i.e. Field-tube, sets being vertical or substantially vertical

23/06 . Component parts thereof, e.g. Field water tubes (heat-exchange tubes in general F28F)

25/00 Water-tube boilers built-up from sets of water tubes with internally-arranged flue tubes, or fire tubes, extending through the water tubes

27/00 Instantaneous or flash steam boilers

27/02 . built-up from fire tubes

27/04 . built-up from water tubes (F22B 27/12 to F22B 27/16 take precedence)

27/06 . . bent in serpentine or sinuous form

27/08 . . bent helically, i.e. coiled

27/10 . . bent spirally

27/12 . built-up from rotary heat-exchange elements, e.g. from tube assemblies

27/14 . built-up from heat-exchange elements arranged within a confined chamber having heat-retaining walls

27/16 . involving spray nozzles for sprinkling or injecting water particles on to or into hot heat-exchange elements, e.g. into tubes

29/00 Steam boilers of forced-flow type

29/02 . of forced-circulation type

29/04 . of combined-circulation type, i.e. in which convection circulation due to the difference in specific gravity between cold and hot water is promoted by additional measures, e.g. by injecting pressure-water temporarily

29/06 . of once-through type, i.e. built-up from tubes receiving water at one end and delivering superheated steam at the other end of the tubes (F22B 33/00 takes precedence)

29/08 . . operating with fixed point of final state of complete evaporation

29/10 . . operating with sliding point of final state of complete evaporation

29/12 . . operating with superimposed recirculation during starting and low-load periods, e.g. composite boilers

31/00 Modifications of boiler construction, or of tube systems, dependent on installation of combustion apparatus; **Arrangements or dispositions of combustion apparatus** (steam generation characterised by heating method F22B 1/00; combustion apparatus per se F23)

31/02 . Installation of water-tube boilers in chimneys, e.g. in converter chimneys

31/04 . Heat supply by installation of two or more combustion apparatus, e.g. of separate combustion apparatus for the boiler and the superheater respectively

31/06 . . Installation of emergency heat supply

31/08 . Installation of heat-exchange apparatus or of means in boilers for heating air supplied for combustion

Steam-generation plants; **Control systems**

33/00 Steam-generation plants, e.g. comprising steam boilers of different types in mutual association (arrangements or dispositions of steam-generation plants in marine vessels B63H 21/00)

33/02 . Combinations of boilers having a single combustion apparatus in common

33/04 . . of boilers of furnace-tube type with boilers of water-tube type

33/06 . . of boilers of furnace-tube type with boilers of fire-tube type

33/08 . . of boilers of water-tube type with boilers of fire-tube type

33/10 . . of two or more superposed boilers with separate water volumes and operating with two or more separate water levels

33/12 . Self-contained steam boilers, i.e. comprising as a unit the steam boiler, the combustion apparatus, the fuel storage, accessory machines, and equipment

33/14 . Combinations of low- and high-pressure boilers

33/16 . . of forced-flow type

33/18 . Combinations of steam boilers with other apparatus

35/00 Control systems for steam boilers (regulation or control of steam power plants F01K 7/00; for regulating feed-water supply F22D; for controlling superheat temperature F22G 5/00; control of combustion F23N)

35/02 . for steam boilers with natural convection circulation

35/04 . . during starting-up periods, i.e. during the periods between the lighting of the furnaces and the attainment of the normal operating temperature of the steam boilers

35/06 . for steam boilers of forced-flow type

35/08 . . of forced-circulation type

35/10 . . of once-through type

35/12 . . . operating at critical or supercritical pressure

35/14 . . during the starting-up periods, i.e. during the periods between the lighting of the furnaces and the attainment of the normal operating temperature of the steam boilers

35/16 . . responsive to the percentage of steam in the mixture of steam and water

35/18 . Applications of computers to steam-boiler control

37/00 Component parts or details of steam boilers (venting devices F16K 24/00; steam traps or like apparatus F16T)

37/02 . applicable to more than one kind or type of steam boiler

37/04 . . and characterised by material, e.g. use of special steel alloy

37/06 . . Flue or fire tubes; Accessories therefor, e.g. fire-tube inserts

37/08 . . . Fittings preventing burning-off of the tube edges

37/10 . . Water tubes; Accessories therefor (working of metal tubes B21D; pipes in general F16L; repairing leaks in water tubes F16L 55/16, F28F 11/00; cleaning water tubes of boilers F23J, F28G; baffles, screens, or deflectors formed of water tubes F23M 9/10)

37/12 . . . Forms of water tubes, e.g. of varying cross-section

37/14 . . . Supply mains, e.g. rising mains, down-comers, in connection with water tubes

37/16 . . . Return bends

37/18 . . . Inserts, e.g. for receiving deposits from water

37/20 . . . Supporting arrangements, e.g. for securing water-tube sets (construction of tube walls of furnaces including boiler furnaces F23M 5/08)

37/22 . . Drums; Headers; Accessories therefor (making boilers from sheet metal B21D 51/24; pressure vessels in general F16J 12/00; covers or similar closure members for pressure vessels in general F16J 13/00)

37/24 . . Supporting, suspending, or setting arrangements, e.g. heat shielding (frames, engine beds F16M)

37/26 . . Steam-separating arrangements (vapour-liquid separators, e.g. for drying steam, B01D, B04)

37/28 . . . involving reversal of direction of flow

37/30 . . . using impingement against baffle separators

37/32 . . . using centrifugal force

37/34 . . Adaptations of boilers for promoting water circulation (auxiliary devices for promoting water circulation F22D 7/00)

37/36 . . Arrangements for sheathing or casing boilers

37/38 . . Determining or indicating operating conditions in steam boilers, e.g. monitoring direction or rate of water flow through water tubes (measuring or indicating instruments in general G01)

37/40 . . Arrangements of partition walls in flues of steam boilers, e.g. built-up from baffles (in flues or chimneys F23J 13/00)

37/42 . . Applications, arrangements, or dispositions of alarm or automatic safety devices (for feed-water heaters F22D 1/14; alarms responsive to undesired or abnormal conditions G08B)

37/44 . . . of safety valves (safety valves per se F16K)

37/46 . . . responsive to low or high water level, e.g. for checking, suppressing, extinguishing combustion in boilers (fire-fighting, fire extinction in general A62)

37/47 . . . responsive to abnormal temperature, e.g. actuated by fusible plugs (such alarms or devices per se G08B)

37/48 . . Devices or arrangements for removing water, minerals, or sludge from boilers (cleaning water tubes, furnace tubes, or the like of boilers F23J, F28G)

Note

Group F22B 37/48 covers only systems used while the boiler is in operation, or which remain in position while the boiler is in operation, or are specifically adapted to boilers without any other utility. **[4]**

37/50 . . . for draining or expelling water

37/52 . . . Washing-out devices

37/54 . . . De-sludging or blow-down devices

37/56 . . Boiler-cleaning control devices, e.g. for ascertaining proper duration of boiler blow-down

37/58 . . Removing tubes from headers or drums; Extracting tools

37/60 . specially adapted for steam boilers of instantaneous or flash type

37/62 . specially adapted for steam boilers of forced-flow type

37/64 . . Mounting of, or supporting arrangements for, tube units (construction of tube walls of furnaces, e.g. boiler furnaces F23M 5/08)

37/66 . . . involving vertically-disposed water tubes

37/68 . . . involving horizontally-disposed water tubes

37/70 . . Arrangements for distributing water into water tubes

37/72 . . . involving injection devices

37/74 . . . Throttling arrangements for tubes or sets of tubes

37/76 . Adaptations or mounting of devices for observing existence or direction of fluid flow (devices per se G01P)

37/78 . Adaptations or mounting of level indicators (level indicators per se G01F)

F22D PREHEATING, OR ACCUMULATING PREHEATED, FEED-WATER; FEED-WATER SUPPLY; CONTROLLING WATER LEVEL; AUXILIARY DEVICES FOR PROMOTING WATER CIRCULATION WITHIN BOILERS (chemical treatment of water, e.g. purification, C02F; enclosed heat-exchange apparatus in general F28D; controlling in general G05)

1/00 Feed-water heaters, e.g. preheaters

1/02 . with water tubes arranged in the boiler furnace, fire tubes, or flue ways (heat-exchange tubes in general F28F)

1/04 . . the tubes having plain outer surfaces, e.g. in vertical arrangement

1/06 . . . in horizontal arrangement

1/08 . . the tubes having fins, ribs, gills, corrugations, or the like on their outer surfaces, e.g. in vertical arrangement

1/10 . . . in horizontal arrangement (hollow fire-bars, grates, or the like used as water tubes F23H 3/02)

1/12 . . Control devices, e.g. for regulating steam temperature

1/14 . . Safety or venting devices (safety devices for boilers in general F22B 37/42)

1/16 . with water tubes arranged otherwise than in the boiler furnace, fire tubes, or flue ways

1/18 . . and heated indirectly

1/20 . . and directly connected to boilers

1/22 . . and provided for rotary movement

1/24 . with fire tubes or flue ways traversing feed-water vessels

1/26 . with means, other than tubes, to separate water and heating medium, e.g. bulk heaters without internal flues or tubes, jacketted smoke-boxes or flues

1/28 . for direct heat transfer, e.g. by mixing water and steam

1/30 . . with stages, steps, baffles, dishes, circular troughs, or other means to cause interrupted or cascading fall of water

1/32 . arranged to be heated by steam, e.g. bled from turbines

1/34 . . and returning condensate to boiler with main feed supply

1/36 . Water and air preheating systems

1/38 . . Constructional features of water and air preheating systems

1/40 . Combinations of exhaust-steam and smoke-gas preheaters (for locomotives F22D 1/42)

1/42 . specially adapted for locomotives

1/44 . . Smoke-gas preheaters
1/46 . . Exhaust-steam preheaters
1/48 . . Details
1/50 . incorporating thermal de-aeration of feed-water (de-aeration produced in the course of direct heat transfer F22D 1/28; thermal de-aeration of water per se B01D 19/00, C02F 1/20; valves for venting F16K 24/04) **[3]**

3/00 Accumulators for preheated water
3/02 . arranged within combustion chambers
3/04 . combined with steam accumulators
3/06 . directly connected to boilers
3/08 . specially adapted for locomotives (locomotive boilers F22B 13/06)
3/10 . . Control devices (controlling water feed to boilers, or water level F22D 5/00)

5/00 Controlling water feed or water level; **Automatic water feeding or water-level regulators** (steam traps F16T; measuring or indicating instruments G01; for indicating water level G01F; level control in general G05D 9/00)
5/02 . with an intermediate compartment from which the water is fed by gravity after mechanically moving the compartment, the movement being controlled according to water level
5/04 . with pivoting buckets
5/06 . with receptacles external to, but in free communication with, the boilers and adapted to move up and down in accordance with change in water level
5/08 . with float-actuated valves
5/10 . . and with pistons or membranes unitary with the feed inlet valves
5/12 . . and with dipping tubes
5/14 . responsive to thermal expansion and contraction, e.g. of solid elements
5/16 . . of fluids
5/18 . for varying the speed or delivery pressure of feed pumps
5/20 . . without floats
5/22 . . with floats
5/24 . with electric switches
5/26 . Automatic feed-control systems (automatic safety devices F22B 37/42; controlling in general G05)
5/28 . . responsive to amount of steam withdrawn; responsive to steam pressure
5/30 . . responsive to both water level and amount of steam withdrawn or steam pressure
5/32 . . influencing the speed or delivery pressure of the feed pumps
5/34 . . Applications of valves (valves per se F16K)
5/36 . . for feeding a number of steam boilers designed for different ranges of temperature and pressure

7/00 Auxiliary devices for promoting water circulation (adaptation of boilers for promoting water circulation F22B 37/34)
7/02 . Saddles or like directing plates fitted to furnace tubes
7/04 . Injectors for water or steam
7/06 . Rotary devices, e.g. propellers
7/08 . . Arrangements of pumps, e.g. outside the boilers
7/10 . . . within the boilers
7/12 . Control devices
7/14 . specially adapted for locomotive boilers

11/00 Feed-water supply not provided for in other main groups
11/02 . Arrangements of feed-water pumps (F22D 11/06 takes precedence; pumps per se F04)
11/04 . . with means to eliminate steam formation
11/06 . . for returning condensate to boiler

F22G SUPERHEATING OF STEAM (steam-separating arrangements in boilers F22B 37/26; removal of combustion products or residues, e.g. cleaning of the combustion contaminated surfaces of tubes of boilers, F23J 3/00)

1/00 Steam superheating characterised by heating method (exothermal chemical reactions not involving a supply of free oxygen gas, apparatus or devices for using the heat therefrom F24J)
1/02 . with heat supply by hot flue gases from the furnace of the steam boiler
1/04 . . by diverting flow or hot flue gases to separate superheaters operating in reheating cycle, e.g. for reheating steam between a high-pressure turbine stage and an intermediate turbine stage
1/06 . with heat supply predominantly by radiation
1/08 . . from heated brickwork or the like
1/10 . with provision for superheating by throttling
1/12 . by mixing steam with furnace gases or other combustion products
1/14 . using heat generated by chemical reactions
1/16 . by using a separate heat source independent from heat supply of the steam boiler, e.g. by electricity, by auxiliary combustion of fuel oil

3/00 Steam superheaters characterised by constructional features; **Details or component parts thereof** (general aspects of enclosed heat-exchangers F28D)

5/00 Controlling superheat temperature (control systems for steam boilers F22B; regulating or controlling in general G05)
5/02 . Applications of combustion-control devices, e.g. tangential-firing burners, tilting burners
5/04 . by regulating flue gas flow, e.g. by proportioning or diverting
5/06 . by recirculating flue gases
5/08 . . preventing furnace gas backflow through recirculating fan
5/10 . by displacing superheater sections
5/12 . by attemperating the superheated steam, e.g. by injected water sprays (spray-mixers B01F 5/18)
5/14 . . by live steam
5/16 . by indirectly cooling or heating the superheated steam in auxiliary enclosed heat-exchanger
5/18 . by by-passing steam around superheater sections
5/20 . by combined controlling procedures

7/00 Steam superheaters characterised by location, arrangement, or disposition
7/02 . in fire tubes
7/04 . in jackets around fire tubes

7/06 . in furnace tubes
7/08 . in fire-boxes
7/10 . in smoke-boxes
7/12 . in flues
7/14 . in water-tube boilers, e.g. between banks of water tubes

F23 COMBUSTION APPARATUS; COMBUSTION PROCESSES

Note

In this class, the following terms or expressions are used with the meanings indicated:
- "combustion" means the direct combination of oxygen gas, e.g. in air, and a burnable substance. Any other heat-producing combination of chemical substances, e.g. hydrogen peroxide and methane, iron oxide and aluminium, is covered by section C or by subclass F24J;
- "combustion chamber" means a chamber in which fuel is burned to establish a self-supporting fire or flame and which surrounds that fire or flame;
- "burner" means a device by which fluent fuel is passed to a combustion space where it burns to produce a self-supporting flame;
- "air" means a mixture of gases containing free oxygen and able to promote or support combustion.

F23B METHODS OR APPARATUS FOR COMBUSTION USING ONLY SOLID FUEL (for combustion of fuels that are solid at room temperatures, but burned in melted form, e.g. candle wax, C11C 5/00, F23C, F23D; using solid fuel suspended in air F23C, F23D 1/00; using solid fuel suspended in liquids F23C, F23D 11/00; using solid fuel and fluent fuel simultaneously or alternately F23C, F23D 17/00)

(1) This subclass only covers combustion wherein the main body of fuel is either essentially stationary during combustion or mechanically transported, as opposed to pneumatically transported or suspended in air, during combustion. **[8]**

(2) In this subclass, the first place priority rule is applied, i.e. at each hierarchical level, classification is made in the first appropriate place. **[8]**

(3) In this subclass, methods are classified in the groups that cover the apparatus used. Methods that are not related to a particular type of apparatus are classified in group F23B 90/00. **[8]**

(4) In this subclass, it is desirable to add the indexing codes of groups F23B 101/00 to F23B 103/00. **[8]**

Subclass index

10/00 ***Combustion apparatus characterised by the combination of two or more combustion chambers* [8,2011.01]**

10/02 . *including separate secondary combustion chambers* **[2011.01]**

20/00 Combustion apparatus specially adapted for portability or transportability [8]

30/00 Combustion apparatus with driven means for agitating the burning fuel; Combustion apparatus with driven means for advancing the burning fuel through the combustion chamber [8]

30/02 . with movable, e.g. vibratable, fuel-supporting surfaces; with fuel-supporting surfaces that have movable parts **[8]**

30/04 . . with fuel-supporting surfaces that are rotatable around a horizontal or inclined axis and support the fuel on their inside, e.g. cylindrical grates **[8]**

30/06 . . with fuel-supporting surfaces that are specially adapted for advancing the fuel through the combustion zone **[8]**

30/08 . . . with fuel-supporting surfaces that move through the combustion zone, e.g. with chain grates **[8]**

30/10 . . . with fuel-supporting surfaces having fuel advancing elements that are movable, but remain essentially in the same place, e.g. with rollers or reciprocating grate bars **[8]**

40/00 Combustion apparatus with driven means for feeding fuel into the combustion chamber [8]

40/02 . the fuel being fed by scattering over the fuel-supporting surface **[8]**

40/04 . the fuel being fed from below through an opening in the fuel-supporting surface **[8]**

40/06 . the fuel being fed along the fuel-supporting surface **[8]**

40/08 . . into pot- or trough-shaped grates **[8]**

50/00 Combustion apparatus in which the fuel is fed into or through the combustion zone by gravity, e.g. from a fuel storage situated above the combustion zone [8]

50/02 . the fuel forming a column, stack or thick layer with the combustion zone at its bottom **[8]**

50/04 . . the movement of combustion air and flue gases being substantially transverse to the movement of the fuel **[8]**

50/06 . . the flue gases being removed downwards through one or more openings in the fuel-supporting surface **[8]**

50/08 . . with fuel-deflecting bodies forming free combustion spaces inside the fuel layer **[8]**

50/10 . . with the combustion zone at the bottom of fuel-filled conduits ending at the surface of a fuel bed **[8]**

50/12 . the fuel being fed to the combustion zone by free fall or by sliding along inclined surfaces, e.g. from a conveyer terminating above the fuel bed **[8]**

60/00 Combustion apparatus in which the fuel burns essentially without moving [8]

60/02 . with combustion air supplied through a grate **[8]**

70/00 Combustion apparatus characterised by means for returning solid combustion residues to the combustion chamber [8]

80/00 Combustion apparatus characterised by means creating a distinct flow path for flue gases or for non-combusted gases given off by the fuel [8]

80/02 . by means for returning flue gases to the combustion chamber or to the combustion zone **[8]**

80/04 . by means for guiding the flow of flue gases, e.g. baffles **[8]**

***90/00 Combustion methods not related to a particular type of apparatus* [8,2011.01]**

90/02 . *Start-up techniques* **[2011.01]**

90/04 . *including secondary combustion (in separate combustion chambers F23B 10/02)* **[2011.01]**

90/06 . . *the primary combustion being a gasification or pyrolysis in a reductive atmosphere* **[2011.01]**

90/08 . . *in the presence of catalytic material* **[2011.01]**

99/00 Subject matter not provided for in other groups of this subclass [8]

Indexing scheme related to adaptation of combustion apparatus to boilers [8]

101/00 Adaptation of combustion apparatus to boilers in which the combustion chamber is situated inside the boiler vessel, e.g. surrounded by cooled surfaces [8]

103/00 Adaptation of combustion apparatus for placement in or against an opening of a boiler, e.g. for replacing an oil burner [8]

103/02 . for producing an essentially horizontal flame **[8]**

F23C METHODS OR APPARATUS FOR COMBUSTION USING FLUENT FUEL (burners F23D)

Note

In this subclass, methods are classified in the groups that cover the apparatus used. **[8]**

Subclass index

1/00 Combustion apparatus specially adapted for combustion of two or more kinds of fuel simultaneously or alternately, at least one kind of fuel being fluent (combustion apparatus characterised by the combination of two or more combustion chambers F23C 6/00; pilot flame igniters F23Q 9/00) **[1,7,8]**

1/02 . lump and liquid fuel

1/04 . lump and gaseous fuel

1/06 . lump and pulverulent fuel

1/08 . liquid and gaseous fuel

1/10 . liquid and pulverulent fuel

1/12 . gaseous and pulverulent fuel

3/00 Combustion apparatus characterised by the shape of the combustion chamber (F23C 15/00 takes precedence) **[1,7,8]**

5/00 Combustion apparatus characterised by the arrangement or mounting of burners [1,7,8]

5/02 . Structural details of mounting

5/06 . . Provision for adjustment of burner position during operation

5/08 . Disposition of burners

5/14 . . to obtain a single flame of concentrated or substantially planar form, e.g. pencil or sheet flame (F23C 5/32 takes precedence) **[3]**

5/24 . . to obtain a loop flame

5/28 . . to obtain flames in opposing directions, e.g. impacting flames

5/32 . . to obtain rotating flames, i.e. flames moving helically or spirally **[3]**

6/00 **Combustion apparatus characterised by the combination of two or more combustion chambers [3,7,8]**

6/02 . in parallel arrangement **[3]**

6/04 . in series connection **[3]**

7/00 **Combustion apparatus characterised by arrangements for air supply** (inlets for fluidisation air F23C 10/20) **[1,7,8]**

7/02 . Disposition of air supply not passing through burner

7/04 . . to obtain maximum heat transfer to wall of combustion chamber

7/06 . . for heating the incoming air (arrangements of regenerators or recuperators F23L 15/00)

7/08 . . . indirectly by a secondary fluid other than the combustion products

9/00 **Combustion apparatus characterised by arrangements for returning combustion products or flue gases to the combustion chamber** (fluidised bed combustion apparatus with means for recirculation of particles entrained from the bed F23C 10/02; fluidised bed combustion apparatus with devices for removal and partial reintroduction of material from the bed F23C 10/26) **[1,7,8]**

9/06 . for completing combustion **[3]**

9/08 . for reducing temperature in combustion chamber, e.g. for protecting walls of combustion chamber **[3]**

10/00 **Apparatus in which combustion takes place in a fluidised bed of fuel or other particles [7]**

Note

In this group, it is desirable to add the indexing code of group F23C 101/00. **[7]**

10/01 . in a fluidised bed of catalytic particles **[8]**

10/02 . with means specially adapted for achieving or promoting a circulating movement of particles within the bed or for a recirculation of particles entrained from the bed **[7]**

10/04 . . the particles being circulated to a section, e.g. a heat-exchange section or a return duct, at least partially shielded from the combustion zone, before being reintroduced into the combustion zone **[7]**

10/06 . . . the circulating movement being promoted by inducing differing degrees of fluidisation in different parts of the bed **[7]**

10/08 . . . characterised by the arrangement of separation apparatus, e.g. cyclones, for separating particles from the flue gases **[7]**

10/10 . . . . the separation apparatus being located outside the combustion chamber **[7]**

10/12 . . the particles being circulated exclusively within the combustion zone **[7]**

10/14 . . . the circulating movement being promoted by inducing differing degrees of fluidisation in different parts of the bed **[7]**

10/16 . specially adapted for operation at superatmospheric pressures, e.g. by the arrangement of the combustion chamber and its auxiliary systems inside a pressure vessel **[7]**

10/18 . Details; Accessories **[7]**

10/20 . . Inlets for fluidisation air, e.g. grids; Bottoms **[7]**

10/22 . . Fuel feeders specially adapted for fluidised bed combustion apparatus (F23C 10/26 takes precedence) **[7]**

10/24 . . Devices for removal of material from the bed (devices for controlling the level of the bed or the amount of material in the bed F23C 10/30) **[7]**

10/26 . . . combined with devices for partial reintroduction of material into the bed, e.g. after separation of agglomerated parts **[7]**

10/28 . . Control devices specially adapted for fluidised bed combustion apparatus **[7]**

10/30 . . . for controlling the level of the bed or the amount of material in the bed **[7]**

10/32 . . . . by controlling the rate of recirculation of particles separated from the flue gases **[7]**

13/00 **Apparatus in which combustion takes place in the presence of catalytic material** (in a fluidised bed of catalytic particles F23C 10/01; radiant gas burners using catalysis for flameless combustion F23D 14/18) **[8]**

13/02 . characterised by arrangements for starting the operation, e.g. for heating the catalytic material to operating temperature **[8]**

13/04 . characterised by the arrangement of two or more catalytic elements in series connection **[8]**

13/06 . in which non-catalytic combustion takes place in addition to catalytic combustion, e.g. downstream of a catalytic element **[8]**

13/08 . characterised by the catalytic material **[8]**

15/00 **Apparatus in which combustion takes place in pulses influenced by acoustic resonance in a gas mass [8]**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

Indexing scheme associated with group F23C 10/00, relating to combustion in entrained fluidised beds. [7]

101/00 **Combustion in entrained fluidised beds, i.e. fluidised beds which have no distinct upper surface [7]**

F23D **BURNERS** (generating combustion products of high pressure or high velocity F23R)

Subclass index

1/00 Burners for combustion of pulverulent fuel (arrangement or mounting of burners F23C 5/00)
1/02 . Vortex burners, e.g. for cyclone-type combustion apparatus
1/04 . Burners producing cylindrical flames without centrifugal action
1/06 . Burners producing sheet flames

Combustion of a liquid

3/00 Burners using capillary action
3/02 . Wick burners
3/04 . . with flame spreaders (F23D 3/12 takes precedence)
3/06 . . Inverted wick burners, e.g. for illumination
3/08 . . characterised by shape, construction, or material, of wick
3/10 . . Blue-flame burners
3/12 . . . with flame spreaders
3/14 . . . with mixing of air and fuel vapour in a chamber before the flame
3/16 . . using candles (candles per se C11C)
3/18 . . Details of wick burners
3/20 . . . Flame spreaders
3/22 . . . Devices for mixing evaporated fuel with air
3/24 . . . Carriers for wicks
3/26 . . . . Safety devices thereon
3/28 . . . Wick-adjusting devices
3/30 . . . . directly engaging with the wick
3/32 . . . . engaging with a tube carrying the wick
3/34 . . . . Wick stop devices; Wick-fixing devices
3/36 . . . Devices for trimming wicks
3/38 . . . Devices for replacement of wicks
3/40 . the capillary action taking place in one or more rigid porous bodies

5/00 Burners in which liquid fuel evaporates in the combustion space, with or without chemical conversion of evaporated fuel
5/02 . the liquid forming a pool, e.g. bowl-type evaporators, dish-type evaporators
5/04 . . Pot-type evaporators, i.e. using a partially-enclosed combustion space
5/06 . the liquid forming a film on one or more plane or convex surfaces
5/08 . . on cascaded surfaces
5/10 . . on grids
5/12 . Details
5/14 . . Maintaining predetermined amount of fuel in evaporator
5/16 . . Safety devices
5/18 . . Preheating devices

7/00 Burners in which drops of liquid fuel impinge on a surface

9/00 Burners in which a stream of liquid fuel impinges intermittently on a hot surface

11/00 Burners using a direct spraying action of liquid droplets or vaporised liquid into the combustion space (spraying in general B05B, B05D)
11/02 . the combustion space being a chamber substantially at atmospheric pressure
11/04 . the spraying action being obtained by centrifugal action
11/06 . . using a horizontal shaft
11/08 . . using a vertical shaft
11/10 . the spraying being induced by a gaseous medium, e.g. water vapour
11/12 . . characterised by the shape or arrangement of the outlets from the nozzle
11/14 . . . with a single outlet, e.g. slit
11/16 . . in which an emulsion of water and fuel is sprayed
11/18 . . the gaseous medium being water vapour generated at the nozzle
11/20 . . . the water vapour being superheated
11/22 . . the gaseous medium being vaporised fuel, e.g. for a soldering lamp
11/24 . by pressurisation of the fuel before a nozzle through which it is sprayed by a substantial pressure reduction into a space
11/26 . . with provision for varying the rate at which the fuel is sprayed
11/28 . . . with flow-back of fuel at the burner, e.g. using by-pass
11/30 . . . with return feed of uncombusted sprayed fuel to reservoir
11/32 . by electrostatic means
11/34 . by ultrasonic means
11/36 . Details
11/38 . . Nozzles (nozzles in general B05B); Cleaning devices therefor
11/40 . . Mixing tubes; Burner heads
11/42 . . Starting devices (igniting F23Q)
11/44 . . Preheating devices; Vaporising devices
11/46 . . Devices on the vaporiser for controlling the feeding of the fuel

---

14/00 Burners for combustion of a gas, e.g. of a gas stored under pressure as a liquid [4]
14/02 . Premix gas burners, i.e. in which gaseous fuel is mixed with combustion air upstream of the combustion zone **[4]**
14/04 . . induction type, e.g. Bunsen burner **[4]**
14/06 . . . with radial outlets at the burner head **[4]**
14/08 . . . with axial outlets at the burner head **[4]**
14/10 . . . with elongated tubular burner head **[4]**
14/12 . Radiant burners **[4]**
14/14 . . using screens or perforated plates **[4]**
14/16 . . using permeable blocks **[4]**
14/18 . . using catalysis for flameless combustion **[4]**
14/20 . Non-premix gas burners, i.e. in which gaseous fuel is mixed with combustion air on arrival at the combustion zone (F23D 14/30 to F23D 14/44 take precedence) **[4]**
14/22 . . with separate air and gas feed ducts, e.g. with ducts running parallel or crossing each other **[4]**
14/24 . . . at least one of the fluids being submitted to a swirling motion **[4]**
14/26 . with provision for a retention flame (pilot flame igniters F23Q 9/00) **[4]**
14/28 . in association with a gaseous fuel source, e.g. acetylene generator, or a container for liquefied gas **[4]**
14/30 . Inverted burners, e.g. for illumination **[4]**
14/32 . using a mixture of gaseous fuel and pure oxygen or oxygen-enriched air (F23D 14/38 takes precedence) **[4]**
14/34 . Burners specially adapted for use with means for pressurising the gaseous fuel or the combustion air (F23D 14/38 takes precedence) **[4]**

14/36 . . in which the compressor and burner form a single unit **[4]**
14/38 . Torches, e.g. for cutting, brazing, welding or heating (nozzles F23D 14/48) **[4]**
14/40 . . for welding (F23D 14/44 takes precedence) **[4]**
14/42 . . for cutting (F23D 14/44 takes precedence) **[4]**
14/44 . . for use under water **[4]**
14/46 . Details **[4]**
14/48 . . Nozzles (for spraying or coating B05B) **[4]**
14/50 . . . Cleaning devices therefor **[4]**
14/52 . . . for torches; for blow-pipes **[4]**
14/54 . . . . for cutting or welding metal **[4]**
14/56 . . . for spreading the flame over an area, e.g. for desurfacing of solid material, for surface hardening, for heating workpieces (scarfing by applying flames B23K 7/00) **[4]**
14/58 . . . characterised by the shape or arrangement of the outlet or outlets from the nozzle, e.g. of annular configuration **[4]**
14/60 . . Devices for simultaneous control of gas and combustion air (regulation of combustion in general F23N) **[4]**
14/62 . . Mixing devices; Mixing tubes **[4]**
14/64 . . . with injectors **[4]**
14/66 . . Preheating the combustion air or gas **[4]**
14/68 . . Treating the combustion air or gas, e.g. by filtering, by moistening (in general B01) **[4]**
14/70 . . Baffles or like flow-disturbing devices **[4]**
14/72 . . Safety devices, e.g. operative in case of failure of gas supply (protection or supervision of pipe-line systems F17D 5/00) **[4]**
14/74 . . . Preventing flame lift-off (F23D 14/70 takes precedence) **[4]**
14/76 . . . Protecting flame and burner parts **[4]**
14/78 . . . Cooling burner parts **[4]**
14/80 . . . Selection of a non-toxic gas **[4]**
14/82 . . . Preventing flashback or blowback (F23D 14/70 takes precedence; in gas feed lines A62C 4/02) **[4]**
14/84 . . Flame spreading or otherwise shaping (F23D 14/70 takes precedence) **[4]**

Other burners

17/00 **Burners for combustion simultaneously or alternately of gaseous or liquid or pulverulent fuel**

23/00 **Assemblies of two or more burners** (gas burners with provision for a retention flame F23D 14/26; arrangement or mounting of burners F23C 5/00; for industrial furnaces F27)

99/00 **Subject matter not provided for in other groups of this subclass [2010.01]**

F23G CREMATION FURNACES; CONSUMING WASTE OR LOW GRADE FUELS BY COMBUSTION

Subclass index

1/00 **Methods or apparatus specially adapted for cremation of human or animal carcasses**

5/00 **Methods or apparatus, e.g. incinerators, specially adapted for combustion of waste or low-grade fuels [4]**

5/02 . including pretreatment **[4]**
5/027 . . pyrolising or gasifying (pyrolisation of sludge C02F 11/00; destructive distillation of carbonaceous materials C10B 53/00) **[4]**
5/033 . . comminuting or crushing **[4]**
5/04 . . drying **[4]**
5/05 . . . using drying grates **[4]**
5/08 . including supplementary heating **[4]**
5/10 . . using electric means **[4]**
5/12 . . using gaseous or liquid fuel (F23G 5/14 takes precedence) **[4]**
5/14 . . including secondary combustion **[4]**
5/16 . . . in a separate combustion chamber **[4]**
5/18 . . . in a stack **[4]**
5/20 . with combustion in rotating or oscillating drums **[4]**
5/22 . . the drums being conically shaped **[4]**
5/24 . with combustion in a vertical, substantially cylindrical, combustion chamber **[4]**
5/26 . . having rotating bottom **[4]**
5/28 . . having raking arms **[4]**
5/30 . with combustion in a fluidised bed **[4]**
5/32 . in which the waste or low-grade fuel is subjected to a whirling movement, e.g. cyclonic incinerators **[4]**
5/34 . in which the waste or low-grade fuel is burnt in a pit or arranged in a heap for combustion **[4]**
5/36 . with combustion in a conical combustion chamber, e.g. "teepee" incinerators (F23G 5/22 takes precedence) **[4]**
5/38 . having multi-hearth arrangements **[4]**
5/40 . Portable or mobile apparatus **[4]**
5/42 . . of the basket type **[4]**
5/44 . Details; Accessories **[4]**
5/46 . . Recuperation of heat **[4]**
5/48 . . Preventing corrosion **[4]**
5/50 . Control or safety arrangements **[4]**

7/00 **Methods or apparatus, e.g. incinerators, specially adapted for combustion of specific waste or low grade fuels, e.g. chemicals** (F23G 1/00 takes precedence; incinerator closets A47K 11/02; oxidation of sludge C02F 11/06; incinerating radioactive waste G21F 9/00) **[4,8]**

7/02 . of bagasse, megasse or the like **[4]**
7/04 . of waste liquors, e.g. sulfite liquors **[4]**

7/05 . of waste oils **[4]**
7/06 . of waste gases or noxious gases, e.g. exhaust gases (exhaust apparatus for engines with means for rendering the exhaust innocuous, e.g. by thermal or catalytic conversion, F01N 3/08; combustion of uncombusted material from primary combustion within apparatus for combustion of solid or fluent fuel F23B, F23C) **[4]**
7/07 . . in which combustion takes place in the presence of catalytic material **[8]**
7/08 . . using flares, e.g. in stacks **[4]**
7/10 . of field or garden waste **[4]**
7/12 . of plastics, e.g. rubber **[4]**
7/14 . of contaminated soil, e.g. soil contaminated by oil **[4]**

F23H GRATES (inlets for fluidisation air for fluidised bed combustion apparatus F23C 10/20); **CLEANING OR RAKING GRATES**

Subclass index

1/00 Grates with solid bars (double grates F23H 5/00)
1/02 . having provision for air supply or air preheating, e.g. air-supply or blast fittings which form part of the grate structure or serve as supports
1/04 . having a variable burning surface
1/06 . having bars at different levels
1/08 . Vertical grates

3/00 Grates with hollow bars
3/02 . internally cooled
3/04 . externally cooled, e.g. with water, steam, or air

5/00 Double grates

7/00 Inclined grates (inclined travelling grates F23H 11/12)
7/02 . with fixed bars
7/04 . . in parallel disposition
7/06 . with movable bars disposed parallel to direction of fuel feeding
7/08 . . reciprocating along their axes
7/10 . . rocking about their axes
7/12 . with movable bars disposed transversely to direction of fuel feeding
7/14 . . reciprocating along their axes
7/16 . . rocking about their axes
7/18 . . reciprocating in an upward direction

9/00 Revolving grates; **Rocking grates** (F23H 7/00 takes precedence)
9/02 . Revolving cylindrical grates
9/04 . Grates rocked as a whole
9/06 . the bars being rocked about axes transverse to their lengths
9/08 . the bars being rocked about their longitudinal axes
9/10 . . and modified to move fuel along the grate
9/12 . the bars being vertically movable in a plane

11/00 Travelling grates
11/02 . with the bars disposed on transverse bearers
11/04 . with the bars pivoted at one side
11/06 . with the bars movable relatively to one another
11/08 . with several individually-movable grate surfaces
11/10 . with special provision for supply of air from below and for regulating air supply
11/12 . inclined travelling grates; Stepped travelling grates
11/14 . serving as auxiliary grates
11/16 . for multi-layer stoking
11/18 . Details
11/20 . . Driving means
11/22 . . Moving fuel along grate; Cleaning of grate
11/24 . . Removal of ashes; Removal of clinker
11/26 . . . by dumping
11/28 . . Replaceable burning-surface

13/00 Grates not covered by any of groups F23H 1/00 to F23H 11/00
13/02 . Basket grates, e.g. with shaking arrangement
13/04 . Telescoping grates
13/06 . Dumping-grates
13/08 . Grates specially adapted for gas generators and also applicable to furnaces

15/00 Cleaning arrangements for grates (not forming part of the grate F23J 1/00); **Moving fuel along grate** (rocking grates modified for moving fuel F23H 9/10; for travelling grates F23H 11/22)

17/00 Details of grates
17/02 . End fittings on bars
17/04 . . of travelling grates
17/06 . Provision for vertical adjustment of grate
17/08 . Bearers; Frames; Spacers; Supports
17/10 . . Dead plates; Imperforate fuel supports
17/12 . Fire-bars

F23J **REMOVAL OR TREATMENT OF COMBUSTION PRODUCTS OR COMBUSTION RESIDUES**; **FLUES** (precipitating dust from flue gases B01D; composition of fuels C10; combustion apparatus for consuming smoke or fumes, e.g. exhaust gases, F23G 7/06)

(1) This subclass covers also the cleaning of surfaces of furnace tubes, flame tubes, water tubes, flues or the like of boilers, heat-exchange or heat-transfer conduits, which surfaces are contaminated by combustion products or combustion residues.

(2) This subclass does not cover the cleaning of surfaces of boilers, heat exchange or heat-transfer conduits contaminated by other than combustion products or combustion residues, which is covered by subclass F28G.

Subclass index

1/00 **Removing ash, clinker, or slag from combustion chambers** (devices for removal of material from the bed of fluidised bed combustion apparatus F23C 10/24)

1/02 . Apparatus for removing ash, clinker, or slag from ash-pits, e.g. by employing trucks or conveyers, by employing suction devices

1/04 . Hand tools, e.g. rakes, prickers, tongs

1/06 . Mechanically-operated devices, e.g. clinker pushers (forming part of the grate F23H)

1/08 . Liquid slag removal **[3]**

3/00 **Removing solid residues from passages or chambers beyond the fire, e.g. from flues by soot blowers**

3/02 . Cleaning furnace tubes; Cleaning flues or chimneys (by means which do not differ materially from the cleaning of any other tube once the fire is out B08B)

3/04 . Traps

3/06 . Systems for accumulating residues from different parts of furnace plant

7/00 **Arrangement of devices for supplying chemicals to fire** (supplying chemicals to fire C10L)

9/00 **Preventing premature solidification of molten combustion residues**

11/00 **Devices for conducting smoke or fumes, e.g. flues** (heat insulation therefor E04B 1/94; chimneys E04H 12/28; removing cooking fumes from domestic stoves or ranges F24C 15/20) **[5]**

11/02 . for conducting smoke or fumes originating from various locations to the outside, e.g. in locomotive sheds, in garages

11/04 . in locomotives; in road vehicles; in ships

11/06 . . for conducting smoke horizontally

11/08 . for portable apparatus

11/10 . for tents; for log huts; for other inflammable structures

11/12 . Smoke conduit systems for factories or large buildings

13/00 **Fittings for chimneys or flues** (staying, stiffening E04H; means for facilitating climbing E06C; draught-inducing apparatus associated with chimneys or flues F23L)

13/02 . Linings; Jackets; Casings

13/04 . Joints; Connections (pipe joints in general F16L)

13/06 . Mouths; Inlet holes

13/08 . Doors or covers specially adapted for smoke-boxes, flues, or chimneys (in general E06B)

15/00 **Arrangements of devices for treating smoke or fumes** (such devices per se, methods for treating smoke or fumes, see the relevant places for the treatment, e.g. B01D 53/00)

15/02 . of purifiers, e.g. for removing noxious material (traps for solid residues F23J 3/04) **[6]**

15/04 . . using washing fluids **[6]**

15/06 . of coolers **[6]**

15/08 . of heaters **[6]**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

F23K FEEDING FUEL TO COMBUSTION APPARATUS (fuel feeders specially adapted for fluidised bed combustion apparatus F23C 10/22; regulating or controlling combustion F23N)

1/00 Preparation of lump or pulverulent fuel in readiness for delivery to combustion apparatus (filtration B01D; mixing B01F; pulverising B02C; drying F26B)
1/02 . Mixing solid fuel with a liquid, e.g. preparing slurries
1/04 . Heating fuel prior to delivery to combustion apparatus

3/00 Feeding or distributing of lump or pulverulent fuel to combustion apparatus (conveying in general B65G)
3/02 . Pneumatic feeding arrangements, i.e. by air blast
3/04 . for locomotive boiler furnaces
3/06 . for shaft-type furnaces
3/08 . for furnaces having movable grate bars
3/10 . Under-feed arrangements
3/12 . . feeding by piston
3/14 . . feeding by screw
3/16 . Over-feed arrangements
3/18 . . Spreader stokers
3/20 . . . with moving hoppers
3/22 . Controlling thickness of fuel bed

5/00 Feeding or distributing other fuel to combustion apparatus
5/02 . Liquid fuel **[5]**
5/04 . . Feeding or distributing systems using pumps (F23K 5/06 takes precedence) **[5]**
5/06 . . from a central source to a plurality of burners **[5]**
5/08 . . Preparation of fuel **[5]**
5/10 . . . Mixing with other fluids **[5]**
5/12 . . . . Preparing emulsions (burners spraying an emulsion of water and fuel into the combustion space F23D 11/16) **[5]**
5/14 . . Details thereof **[5]**
5/16 . . . Safety devices (F23K 5/18 takes precedence; safety arrangements for combustion chambers F23M 11/00) **[5]**
5/18 . . . Cleaning or purging devices, e.g. filters **[5]**
5/20 . . . Preheating devices (in burners using a direct spraying action of liquid droplets or vaporised liquid into the combustion space F23D 11/44) **[5]**
5/22 . . . Vaporising devices (in burners using a direct spraying action of liquid droplets or vaporised liquid into the combustion space F23D 11/44) **[5]**

F23L AIR SUPPLY; **DRAUGHT-INDUCING**; **SUPPLYING NON-COMBUSTIBLE LIQUID OR GAS** (air-supply arrangements for combustion apparatus using fluent fuel, e.g. fluidised bed combustion apparatus, F23C; dampers or throat restrictors for open fire-places F24; air inlet valves for open fire fronts F24)

Subclass index

1/00 Passages or apertures for delivering primary air for combustion
1/02 . by discharging the air below the fire

3/00 Arrangements of valves or dampers before the fire

5/00 Blast-producing apparatus before the fire
5/02 . Arrangements of fans or blowers (fans or blowers per se F04)
5/04 . by induction of air for combustion, e.g. using steam jet

7/00 Supplying non-combustible liquids or gases, other than air, to the fire, e.g. oxygen, steam

9/00 Passages or apertures for delivering secondary air for completing combustion of fuel
9/02 . by discharging the air above the fire
9/04 . by discharging the air beyond the fire, i.e. nearer the smoke outlet
9/06 . by discharging the air into the fire bed

11/00 Arrangements of valves or dampers after the fire
11/02 . for reducing draught by admission of air to flues

13/00 Construction of valves or dampers for controlling air supply or draught (in general F16K)
13/02 . pivoted about a single axis but having no other movement (formed as linked slats each pivoted about an axis F23L 13/08)
13/04 . . with axis perpendicular to face
13/06 . slidable only
13/08 . operating as a roller blind; operating as a venetian blind
13/10 . having a compound movement involving both sliding and pivoting

15/00 **Heating of air supplied for combustion**
15/02 . Arrangements of regenerators
15/04 . Arrangements of recuperators

17/00 **Inducing draught**
17/02 . Tops for chimneys or ventilating shafts; Terminals for flues
17/04 . . Balanced-flue arrangements, i.e. devices which combine air inlet to combustion unit with smoke outlet
17/06 . . branched; T-headed
17/08 . . with coaxial cones or louvres
17/10 . . wherein the top moves as a whole
17/12 . . Devices for fastening the top or terminal to chimney, shaft, or flue
17/14 . . Draining devices
17/16 . Induction apparatus, e.g. steam jet, acting on combustion products beyond the fire

99/00 **Subject matter not provided for in other groups of this subclass [8]**

F23M **CONSTRUCTIONAL DETAILS OF COMBUSTION CHAMBERS, NOT OTHERWISE PROVIDED FOR** (construction or support of tube walls for steam boilers F22B; generating combustion products of high pressure or high velocity F23R)

3/00 **Firebridges** (baffles not confining the fire F23M 9/06)
3/02 . modified for circulation of fluids, e.g. air, steam, water
3/04 . . for delivery of gas, e.g. air, steam
3/06 . . . into or towards fire
3/08 . . . away from fire, e.g. towards smoke outlet
3/10 . . . transversely
3/12 . characterised by shape or construction (F23M 3/02 takes precedence)
3/14 . . with apertures for passage of combustion products
3/16 . . built-up in sections, e.g. using bars or blocks
3/18 . . double; multiple
3/20 . . comprising loose refractory material, wholly or in part
3/22 . movable; adjustable

5/00 **Casings**; **Linings**; **Walls** (casings, linings, or walls of heat-treatment chambers of ovens, kilns, or retorts F27D)
5/02 . characterised by the shape of the bricks or blocks used (ceramic materials C04B 33/00, C04B 35/00)
5/04 . Supports for linings
5/06 . Crowns or roofs for combustion chambers (F23M 5/02, F23M 5/04 take precedence)
5/08 . Cooling thereof; Tube walls

7/00 **Doors specially adapted for combustion chambers** (in general E06B; for flues or smoke-boxes F23J 13/08)
7/02 . Frames therefor
7/04 . Cooling doors or door frames

9/00 **Baffles or deflectors for air or combustion products**; **Flame shields**
9/02 . in air inlets
9/04 . with air-supply passages in the baffle or shield
9/06 . in fire-boxes
9/08 . Helical or twisted baffles or deflectors
9/10 . Baffles or deflectors formed as tubes, e.g. in water-tube boilers (interconnection of such tubes in boilers for fluid flow F22)

11/00 **Safety arrangements** (by controlling combustion F23N 5/24)
11/02 . Preventing emission of flames or hot gases, or admission of air, through working or charging apertures
11/04 . Means for supervising combustion, e.g. window (alarm systems G08B)

99/00 **Subject matter not provided for in other groups of this subclass [2010.01]**

F23N **REGULATING OR CONTROLLING COMBUSTION** (control devices specially adapted for combustion apparatus in which combustion takes place in a fluidised bed of fuel or other particles F23C 10/28; condition responsive controls for regulating combustion in domestic stoves with open fires for solid fuel F24B 1/187)

1/00 **Regulating fuel supply**
1/02 . conjointly with air supply
1/04 . conjointly with air supply and with draught
1/06 . conjointly with draught
1/08 . conjointly with another medium, e.g. boiler water
1/10 . . and with air supply or draught

3/00 **Regulating air supply or draught** (conjointly with fuel supply F23N 1/00)
3/02 . Regulating draught by direct pressure operation of single valves or dampers
3/04 . by operation of single valves or dampers by temperature-sensitive elements
3/06 . by conjoint operation of two or more valves or dampers (F23N 3/08 takes precedence)
3/08 . by power-assisted systems

5/00 **Systems for controlling combustion** (F23N 1/00, F23N 3/00 take precedence)
5/02 . using devices responsive to thermal changes or to thermal expansion of a medium
5/04 . . using bimetallic elements
5/06 . . using bellows; using diaphragms
5/08 . . using light-sensitive elements
5/10 . . using thermocouples
5/12 . . using ionisation-sensitive elements, i.e. flame rods
5/14 . . using thermo-sensitive resistors
5/16 . using noise-sensitive detectors
5/18 . using detectors sensitive to rate of flow of air or fuel
5/20 . with a time programme acting through electrical means, e.g. using time-delay relays

5/22 . with a time programme acting through mechanical means, e.g. using cams

5/24 . Preventing development of abnormal or undesired conditions, i.e. safety arrangements (F23N 5/02 to F23N 5/18 take precedence)

5/26 . Details

F23Q IGNITION (devices for igniting matches A24F; chemical igniters C06C 9/00); **EXTINGUISHING DEVICES**

Subclass index

1/00 Mechanical ignition (lighters containing fuel F23Q 2/00; matches C06F)

1/02 . using friction or shock effects

1/04 . . on a part moved by the fuel-controlling member, e.g. by a tap on a gas cooker

1/06 . . Portable igniters

2/00 Lighters containing fuel, e.g. for cigarettes

2/02 . Lighters with liquid fuel

2/04 . . with cerium-iron alloy and wick

2/06 . . . with friction wheel

2/08 . . . . with ignition by spring action of the cover

2/10 . . . with other friction member

2/12 . . with cerium-iron alloy without wick

2/14 . . with cerium-iron alloy and torch ignited by striking or pushing

2/16 . Lighters with gaseous fuel, e.g. the gas being stored in liquid phase

2/167 . . with adjustable flame **[3]**

2/173 . . . Valves therefor **[3]**

2/18 . Lighters with solid fuel

2/20 . . with cerium-iron alloy and friction wheel

2/22 . . with cerium-iron alloy and tinder

2/24 . . with ignition pills or strips with inflammable parts

2/26 . . combined with liquid-fuel lighters

2/28 . Lighters characterised by electrical ignition of the fuel

2/30 . Lighters characterised by catalytic ignition of fuel

2/32 . Lighters characterised by being combined with other objects (combinations with smokers' equipment A24F)

2/34 . Component parts or accessories

2/36 . . Casings

2/38 . . . with containers for flints or tools

2/40 . . Cover fastenings

2/42 . . Fuel containers; Closures for fuel containers

2/44 . . Wicks; Wick guides or fastenings

2/46 . . Friction wheels; Arrangement of friction wheels

2/48 . . Flints (composition, manufacture C06C 15/00); Guides for, or arrangements of, flints

2/50 . . Protecting coverings

2/52 . . Filling devices

3/00 Ignition using electrically-produced sparks (lighters containing fuel F23Q 2/28; sparking-plugs H01T 13/00)

3/01 . Hand-held lighters, e.g. for cigarettes

5/00 Make-and-break ignition, i.e. with spark generated between electrodes by breaking contact therebetween

7/00 Incandescent ignition; **Ignition using electrically-produced heat, e.g. lighters for cigarettes**; **Electrically-heated glowing plugs**

7/02 . for igniting solid fuel

7/04 . . with fans for transfer of heat to fuel

7/06 . Igniters structurally associated with fluid-fuel burners (lighters containing fuel F23Q 2/00)

7/08 . . for evaporating and igniting liquid fuel, e.g. in hurricane lanterns

7/10 . . for gaseous fuel, e.g. in welding appliances

7/12 . . . actuated by gas-controlling device

7/14 . Portable igniters

7/16 . . with built-in battery

7/18 . . with built-in generator

7/20 . . with built-in mains transformer

7/22 . Details

7/24 . . Safety arrangements

7/26 . . . Provision for re-ignition

9/00 Ignition by a pilot flame

9/02 . without interlock with main fuel supply

9/04 . . for upright burners, e.g. gas-cooker burners

9/06 . . for inverted burners, e.g. gas lamps

9/08 . with interlock with main fuel supply

9/10 . . to determine the sequence of supply of fuel to pilot and main burners

9/12 . . to permit the supply to the main burner in dependence upon existence of pilot flame

9/14 . . . using electric means, e.g. by light-sensitive elements

11/00 Arrangement of catalytic igniters

11/04 . at the burner

11/06 . remote from the burner, e.g. on the chimney of a lamp

11/08 . on a part moved by the fuel-controlling member

11/10 . . and moving out of the flame after ignition

13/00 Ignition not otherwise provided for

13/02 . using gas burners, e.g. gas pokers

13/04 . using portable burners, e.g. torches, fire pots

21/00 Devices for effecting ignition from a remote location

23/00 **Testing of ignition installations** (peculiar to internal-combustion engines F02P 17/00; testing of sparking plugs H01T 13/58)

23/02 . Testing of ignition timing

23/08 . Testing of components

23/10 . . electrically

25/00 **Extinguishing devices, e.g. for blowing-out or snuffing candle flames**

F23R **GENERATING COMBUSTION PRODUCTS OF HIGH PRESSURE OR HIGH VELOCITY, E.G. GAS-TURBINE COMBUSTION CHAMBERS** (fluidised bed combustion apparatus specially adapted for operation at superatmospheric pressures F23C 10/16)

3/00 **Continuous combustion chambers using liquid or gaseous fuel [3]**

3/02 . characterised by the air-flow or gas-flow configuration (reverse-flow combustion chambers F23R 3/54; cyclone or vortex type combustion chambers F23R 3/58) **[3]**

3/04 . . Air inlet arrangements **[3]**

3/06 . . . Arrangement of apertures along the flame tube **[3]**

3/08 . . . . between annular flame tube sections, e.g. flame tubes with telescopic sections **[3]**

3/10 . . . for primary air (F23R 3/06 takes precedence) **[3]**

3/12 . . . . inducing a vortex **[3]**

3/14 . . . . . by using swirl vanes **[3]**

3/16 . . with devices inside the flame tube or the combustion chamber to influence the air or gas flow **[3]**

3/18 . . . Flame stabilising means, e.g. flame holders for after-burners of jet-propulsion plants **[3]**

3/20 . . . . incorporating fuel injection means **[3]**

3/22 . . . . movable, e.g. to an inoperative position; adjustable, e.g. self-adjusting **[3]**

3/24 . . . . of the fluid-screen type **[3]**

3/26 . . Controlling the air flow **[3]**

3/28 . characterised by the fuel supply **[3]**

3/30 . . comprising fuel prevapourising devices **[3]**

3/32 . . . being tubular **[3]**

3/34 . . Feeding into different combustion zones **[3]**

3/36 . . Supply of different fuels **[3]**

3/38 . . comprising rotary fuel injection means **[3]**

3/40 . characterised by the use of catalytic means **[3]**

3/42 . characterised by the arrangement or form of the flame tubes or combustion chambers **[3]**

3/44 . . Combustion chambers comprising a tubular flame tube within a tubular casing (reverse-flow combustion chambers F23R 3/54) **[3]**

3/46 . . Combustion chambers comprising an annular arrangement of flame tubes within a common annular casing or within individual casings **[3]**

3/48 . . . Flame tube interconnectors, e.g. cross-over tubes **[3]**

3/50 . . Combustion chambers comprising an annular flame tube within an annular casing (toroidal combustion chambers F23R 3/52) **[3]**

3/52 . . Toroidal combustion chambers **[3]**

3/54 . . Reverse-flow combustion chambers **[3]**

3/56 . . Combustion chambers having rotary flame tubes **[3]**

3/58 . . Cyclone or vortex type combustion chambers **[3]**

3/60 . . Support structures; Attaching or mounting means **[3]**

5/00 **Continuous combustion chambers using solid or pulverulent fuel [3]**

7/00 **Intermittent or explosive combustion chambers [3]**

F24 HEATING; RANGES; VENTILATING

Note

In this class, the following terms are used with the meanings indicated:
– "stove" includes apparatus which may have an open fire, e.g. fireplace;
– "range" means an apparatus for cooking having elements that perform different cooking operations or cooking and heating operations.

F24B DOMESTIC STOVES OR RANGES FOR SOLID FUELS; IMPLEMENTS FOR USE IN CONNECTION WITH STOVES OR RANGES [6]

1/00 **Stoves or ranges**
1/02 . Closed stoves
1/04 . . built-up from glazed tiles (F24B 1/08, F24B 1/16 take precedence)
1/06 . . . Construction of tiles or bracing means therefor, e.g. shim liner (forming of tiles B28B; glazing of tiles C04B)
1/08 . . with fuel storage in a single undivided hopper within stove or range
1/10 . . . with combustion in horizontal direction (F24B 1/14 takes precedence)
1/14 . . . with predistillation in the hopper
1/16 . . with fuel storage in multiple or divided hoppers within the stove or range
1/18 . Stoves with open fires, e.g. fireplaces
1/181 . . Free-standing fireplaces, e.g. for mobile homes **[4]**
1/182 . . with additional provisions for cooking (other stoves with additional provisions for cooking F24B 1/26) **[4]**
1/183 . . with additional provisions for heating water **[4]**
1/185 . . with air-handling means, heat exchange means, or additional provisions for convection heating (F24B 1/183 takes precedence; component parts or accessories having air-handling means, heat exchange means, or additional provisions for convection heating F24B 1/191); Regulating combustion; Controls therefor **[4]**
1/187 . . . Condition responsive controls for regulating combustion (valves or dampers for air supply F23L) **[4]**
1/188 . . . characterised by use of heat exchange means (F24B 1/187 takes precedence) **[4]**
1/189 . . . characterised by air-handling means, i.e. of combustion-air, heated-air, or flue-gases, e.g. draught control dampers (F24B 1/187, F24B 1/188 take precedence) **[4]**
1/19 . . . . Supplying combustion-air **[4]**
1/191 . . Component parts; Accessories **[4]**
1/192 . . . Doors; Screens; Fuel guards **[4]**
1/193 . . . Grates; Irons **[4]**
1/195 . . . Fireboxes; Frames; Hoods; Heat reflectors **[4]**
1/197 . . . Hearths **[4]**
1/198 . . . Surrounds-fronts **[4]**
1/199 . . . Fuel-handling equipment **[4]**
1/20 . Ranges
1/22 . . in which the baking oven is arranged above the fire-box
1/24 . . with built-in masses for heat storage or heat insulation
1/26 . Stoves with additional provisions for cooking (stoves with open-fires with additional provisions for cooking F24B 1/182) **[4]**
1/28 . Combined installations of stoves or ranges, e.g. back-to-back stoves with a common fire-box

3/00 **Heaters not covered by group F24B 1/00, e.g. charcoal brazier** (for cooking A47J 27/00 to A47J 37/00)

5/00 **Combustion-air or flue-gas circulation in or around stoves or ranges** (stoves with open fires with air-handling means F24B 1/185) **[4]**
5/02 . in or around stoves
5/04 . . the air or gas passing downwards through the bottom of the stove or fire grate
5/06 . in or around ranges
5/08 . . around the baking oven

7/00 **Stoves, ranges, or flue-gas ducts, with additional provisions for convection heating** (stoves with open fires characterised by use of heat exchange means F24B 1/185; air heaters having heat generating means F24H 3/00) **[4]**
7/02 . with external air ducts
7/04 . with internal air ducts
7/06 . without air ducts

9/00 **Stoves, ranges, or flue-gas ducts, with additional provisions for heating water** (F24B 1/182, F24B 1/183 take precedence) **[3,4]**
9/02 . in open containers, e.g. bain-marie
9/04 . in closed containers **[4]**

13/00 **Details solely applicable to stoves or ranges burning solid fuels** (component parts or accessories for stoves with open-fires F24B 1/191; removing ash, clinker or slag from combustion chambers F23J 1/00; removing solid residues from passages or chambers beyond the fire F23J 3/00; joints or connections for chimneys or flues F23J 13/04; mouths or inlet holes for chimneys or flues F23J 13/06; means for supervising combustion F23M 11/04) **[4]**
13/02 . Arrangement or mounting of fire-grate assemblies (grates F23H); Arrangement or mounting of linings for fire-boxes, e.g. fire-back (ceramic materials C04B 33/00, C04B 35/00; casings, linings, walls for combustion chambers F23M)
13/04 . Arrangements for feeding solid fuel, e.g. hoppers (feeding solid fuel to combustion apparatus in general F23K)

15/00 **Implements for use in connection with stoves or ranges** (ash sieves B07B; firelighters C10L 11/00; removal of ashes F23J; other devices for igniting F23Q) **[6]**
15/02 . for breaking coal **[6]**
15/04 . Coal hods; Coal boxes **[6]**
15/06 . Shovels with ejectors **[6]**
15/08 . Shovels with sifters **[6]**
15/10 . Coal tongs **[6]**

F24C **OTHER DOMESTIC STOVES OR RANGES**; **DETAILS OF DOMESTIC STOVES OR RANGES, OF GENERAL APPLICATION** (radiator stoves of the fluid-circulating type F24H)

Subclass index

1/00 **Stoves or ranges in which the fuel or energy supply is not restricted to solid fuel or to a type covered by a single one of groups F24C 3/00 to F24C 9/00**; **Stoves or ranges in which the type of fuel or energy supply is not specified**
1/02 . adapted for the use of two or more kinds of fuel or energy supply (F24C 1/16 takes precedence; combinations of two or more stoves or ranges each having a different kind of fuel or energy supply F24C 11/00)
1/04 . . simultaneously
1/06 . . by replacing parts, e.g. replacing burner by electric heater
1/08 . solely adapted for radiation heating (F24C 1/16 takes precedence)
1/10 . . with reflectors
1/12 . . . of circular shape
1/14 . Radiation heating stoves or ranges, with additional provision for convection heating (F24C 1/02, F24C 1/16 take precedence; solely adapted for convection heating F24H)
1/16 . with special adaptation for travelling, e.g. collapsible

3/00 **Stoves or ranges for gaseous fuels**
3/02 . with heat produced solely by flame (F24C 3/14 takes precedence)
3/04 . with heat produced wholly or partly by a radiant body, e.g. by a perforated plate (F24C 3/14 takes precedence)
3/06 . . without any visible flame
3/08 . Arrangement or mounting of burners (burners per se F23D)
3/10 . Arrangement or mounting of ignition devices (ignition devices per se F23Q)
3/12 . Arrangement or mounting of control or safety devices (control valves F16K; safety devices for burners F23D 14/72; regulating or controlling combustion F23N)
3/14 . with special adaptation for travelling, e.g. collapsible

5/00 **Stoves or ranges for liquid fuels**
5/02 . with evaporation burners, e.g. dish type (F24C 5/20 takes precedence)
5/04 . . wick type
5/06 . . . adjustable
5/08 . . with heat produced wholly or partly by a radiant body
5/10 . with atomising burners (F24C 5/20 takes precedence)
5/12 . Arrangement or mounting of burners (burners per se F23D)
5/14 . Arrangement or mounting of ignition devices (ignition devices per se F23Q)
5/16 . Arrangement or mounting of control or safety devices (control valves F16K; safety devices for burners F23D; regulating or controlling combustion F23N)
5/18 . Liquid-fuel supply arrangements forming parts of stoves or ranges (feeding liquid fuel to combustion apparatus in general F23K)
5/20 . with special adaptation for travelling, e.g. collapsible

7/00 **Stoves or ranges heated by electric energy** (electric heating elements or arrangements H05B)
7/02 . using microwaves (heating using microwaves in general H05B 6/64)
7/04 . with heat radiated directly from the heating element (F24C 7/10 takes precedence)
7/06 . Arrangement or mounting of electric heating elements
7/08 . Arrangement or mounting of control or safety devices (switches H01H; circuit arrangements for electric heating H05B)
7/10 . with special adaptation for travelling, e.g. collapsible

9/00 **Stoves or ranges heated by a single type of energy supply not covered by groups F24C 3/00 to F24C 7/00 or subclass F24B** (using the heat from an exothermal reaction not involving a supply of free oxygen gas, using solar energy F24J)

11/00 **Combinations of two or more stoves or ranges, e.g. each having a different kind of energy supply**

13/00 **Stoves or ranges with additional provisions for heating water [3]**

14/00 **Stoves or ranges having self-cleaning provisions, e.g. continuous or catalytic cleaning, electrostatic cleaning [3]**
14/02 . pyrolytic type **[3]**

15/00 **Details** (electric heating elements or arrangements H05B)
15/02 . Doors specially adapted for stoves or ranges (in general E06B; for combustion chambers F23M)
15/04 . . with transparent panels
15/06 . Ornamental features, e.g. grate front, surround
15/08 . Foundations or support plates; Legs or pillars; Casings; Wheels (F24C 15/10 takes precedence)
15/10 . Tops, e.g. hot plate; Rings (F24C 15/12, F24C 15/14 take precedence)
15/12 . Side rests; Side plates; Cover lids; Splash guards; Racks outside ovens, e.g. for drying plates
15/14 . Spillage trays or grooves
15/16 . Shelves, racks, or trays inside ovens; Supports therefor
15/18 . Arrangement of compartments additional to cooking compartments, e.g. for warming, for storing utensils or fuel containers; Arrangement of additional heating or cooking apparatus, e.g. grills (grills per se A47J)
15/20 . Removing cooking fumes (parts, details or accessories of cooking-vessels for withdrawing or condensing cooking vapours from such vessels A47J 36/38) **[5]**
15/22 . Reflectors for radiation heaters
15/24 . Radiant bodies or panels for radiation heaters (radiant gas burners F23D 14/12)
15/26 . Handles for carrying
15/28 . Draught shields
15/30 . Arrangements for mounting stoves or ranges in particular locations
15/32 . Arrangements of ducts for hot gases, e.g. in or around baking ovens
15/34 . Elements or arrangements for heat storage or insulation
15/36 . Protective guards, e.g. for preventing access to heated parts

---

F24D **DOMESTIC- OR SPACE-HEATING SYSTEMS, E.G. CENTRAL HEATING SYSTEMS**; **DOMESTIC HOT-WATER SUPPLY SYSTEMS**; **ELEMENTS OR COMPONENTS THEREFOR** (preventing corrosion C23F; water supply in general E03; using steam or condensate extracted or exhausted from steam engine plants for heating purposes F01K 17/02; steam traps F16T; domestic stoves or ranges F24B, F24C; water or air heaters having heat generating means F24H; combined heating and refrigeration systems F25B; heat exchange apparatus or elements F28; removing furring F28G; electric heating elements or arrangements H05B)

Note

In this subclass, the following expression is used with the meaning indicated:
– "central heating system" means a system in which heat is generated or stored at central sources and is distributed by means of a transfer fluid to the spaces or areas to be heated. **[5]**

Subclass index

Central heating systems

1/00 **Steam central heating systems** (F24D 10/00, F24D 11/00 take precedence)
1/02 . operating with live steam
1/04 . operating with exhaust steam
1/06 . operating with superheated steam
1/08 . Feed-line arrangements, e.g. providing for one-pipe system

3/00 **Hot-water central heating systems** (F24D 10/00, F24D 11/00 take precedence)
3/02 . with forced circulation, e.g. by pumps
3/04 . with the water under high pressure
3/06 . . Arrangements or devices for maintaining high pressure
3/08 . in combination with systems for domestic hot-water supply
3/10 . Feed-line arrangements, e.g. providing for heat-accumulator tanks, expansion tanks
3/12 . Tube and panel arrangements for ceiling, wall, or underfloor heating (electric underfloor heating F24D 13/02; special adaptations of floors for incorporating ducts, e.g. for heating or ventilating, E04B 5/48; building elements of block or other shape for the construction of parts of buildings characterised by special adaptations, e.g. serving for locating conduits, E04C 1/39; building elements of relatively thin form for the construction of parts of buildings with special adaptations for auxiliary purposes, e.g. serving for locating conduits, E04C 2/52) **[4]**
3/14 . . incorporated in a ceiling, wall or floor **[4]**
3/16 . . mounted on, or adjacent to, a ceiling, wall or floor **[4]**
3/18 . using heat pumps **[5]**

5/00 **Hot-air central heating systems** (F24D 10/00, F24D 11/00 take precedence; air conditioning F24F); **Exhaust-gas central heating systems**
5/02 . operating with discharge of hot air into the space or area to be heated

5/04 . . with return of the air to the air heater
5/06 . operating without discharge of hot air into the space or area to be heated
5/08 . . with hot air led through radiators
5/10 . . with hot air led through heat-exchange ducts in the walls, floor, or ceiling
5/12 . using heat pumps **[5]**

7/00 **Central heating systems employing heat-transfer fluids not covered by groups F24D 1/00 to F24D 5/00, e.g. oil, salt, gas** (F24D 10/00, F24D 11/00 take precedence)

9/00 **Central heating systems employing combinations of heat-transfer fluids covered by two or more of groups F24D 1/00 to F24D 7/00** (F24D 10/00, F24D 11/00 take precedence)
9/02 . Hot water and steam systems

10/00 **District heating systems [5]**

11/00 **Central heating systems using heat accumulated in storage masses** (self-contained storage heating units F24D 15/02; storage masses, see the relevant subclasses)
11/02 . using heat pumps

12/00 **Other central heating systems**
12/02 . having more than one heat source (F24D 3/18, F24D 5/12, F24D 11/02 take precedence) **[5]**

Other domestic- or space-heating systems

13/00 **Electric heating systems** (electric water or air heaters F24H)
13/02 . solely using resistance heating, e.g. underfloor heating
13/04 . using electric heating of heat-transfer fluid in separate units of the system

15/00 **Other domestic- or space-heating systems**
15/02 . consisting of self-contained heating units, e.g. storage heaters **[3]**
15/04 . using heat pumps **[5]**

17/00 **Domestic hot-water supply systems** (combined with domestic- or space-heating systems F24D 1/00 to F24D 15/00)
17/02 . using heat pumps **[5]**

19/00 **Details** (of water or air heaters F24H 9/00; of heat-exchange or heat-transfer apparatus, of general application F28F) **[3]**
19/02 . Arrangement of mountings or supports for radiators **[3]**
19/04 . . in skirtings **[3]**
19/06 . Casings, cover lids or ornamental panels, for radiators **[3]**
19/08 . Arrangements for drainage, venting or aerating (valves for drainage F16K, e.g. F16K 21/00, for venting or aerating F16K 24/00) **[3]**
19/10 . Arrangement or mounting of control or safety devices (control valves F16K; only the heater being controlled F24H 9/20) **[3]**

F24F **AIR-CONDITIONING**; **AIR-HUMIDIFICATION**; **VENTILATION**; **USE OF AIR CURRENTS FOR SCREENING** (devices for ventilating greenhouses A01G; animal husbandry A01K, e.g. controlling humidity in incubators A01K 41/04; disinfecting or sterilising of air A61L; devices for reconditioning breathing air in sealed rooms or for ventilating gasproof shelters A62B; filtering, washing or drying of gases B01D; mixing gases with vapours or liquids in general B01F 3/00; spraying B05B, B05D; removing dirt or fumes from areas where they are produced B08B 15/00; ventilation, air-conditioning, or cooling, specially adapted for vehicles, see the relevant vehicle places, e.g. B60H, B61D 27/00; production of ozone C01B 13/10; chimneys or flues E04F 17/02, E04H 12/28, F23J 11/00, F23L 17/02; air ducts or conduits E04F 17/04, F16L; ventilation in doors or windows E06B 7/02; fans, blowers F04; noise-absorbing in pipes or pipe systems F16L; tops for chimneys or ventilating shafts F23L; cooling F25; details of heat-exchange or heat-transfer apparatus, of general application F28F; apparatus for generating ions to be introduced into non-enclosed gases, e.g. the atmosphere, H01T 23/00)

(1) In this subclass:
– air-humidification as auxiliary treatment in air-conditioning, i.e. in units wherein the air is also either cooled or heated, is covered by groups F24F 1/00 or F24F 3/14; **[3]**
– air-humidification per se, e.g. "room humidifiers", is covered by group F24F 6/00. **[3]**

(2) In this subclass, the following terms or expressions are used with the meanings indicated:
– "air-conditioning" means the supply of air to rooms or spaces by means which provide for the treatment of the air in at least two of the following ways:
heating – cooling – any other kind of treatment, e.g. humidification;
– "ventilation" means the supply of air to, or its extraction from, rooms or spaces, and systems for circulating air within rooms or spaces, but does not cover the mere treatment of air being supplied to, extracted from, or circulated within, rooms or spaces.

(3) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

Air-conditioning

1/00 ***Room units, e.g. separate or self-contained units or units receiving primary air from a central station* [1,2011.01]**

1/01 . *in which secondary air is induced by injector action of the primary air (F24F 1/02 takes precedence)* **[3,2011.01]**

1/02 . *self-contained, i.e. with all apparatus for treatment installed in a common casing* **[1,2011.01]**

1/04 . . *Arrangements for portability* **[1,2011.01]**

1/06 . *Separate outdoor units, e.g. outdoor unit to be linked to a separate room unit comprising a compressor and a heat exchanger* **[2011.01]**

Note

In this group, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place. **[2011.01]**

1/08 . . *Compressors specially adapted for separate outdoor units* **[2011.01]**

1/10 . . . *Arrangement or mounting thereof* **[2011.01]**

1/12 . . . *Vibration or noise prevention therefor* **[2011.01]**

1/14 . . *Heat exchangers specially adapted for separate outdoor units* **[2011.01]**

1/16 . . . *Arrangement or mounting thereof* **[2011.01]**

1/18 . . . *characterised by their shape* **[2011.01]**

1/20 . . *Electric components for separate outdoor units* **[2011.01]**

1/22 . . . *Arrangement or mounting thereof* **[2011.01]**

1/24 . . . *Cooling of electric components* **[2011.01]**

1/26 . . *Refrigerant piping* **[2011.01]**

1/28 . . . *for connecting several separate outdoor units* **[2011.01]**

1/30 . . . *for use inside the separate outdoor units* **[2011.01]**

1/32 . . . *for connecting the separate outdoor unit to indoor units* **[2011.01]**

1/34 . . . *Protection means therefor, e.g. covers for refrigerant pipes* **[2011.01]**

1/36 . . *Drip trays for outdoor units* **[2011.01]**

1/38 . . *Fan details of outdoor units, e.g. bell-mouth shaped inlets or fan mountings* **[2011.01]**

1/40 . . *Vibration or noise prevention at outdoor units (for outdoor unit compressors F24F 1/12)* **[2011.01]**

1/42 . . *characterised by the use of the condensate, e.g. for enhanced cooling* **[2011.01]**

1/44 . . *characterised by the use of internal combustion engines* **[2011.01]**

1/46 . . *Component arrangements in separate outdoor units* **[2011.01]**

1/48 . . . *characterised by airflow, e.g. inlet or outlet airflow* **[2011.01]**

1/50 . . . . *with outlet air in upward direction* **[2011.01]**

1/52 . . . . *Inlet and outlet arranged on the same side, e.g. for mounting in a wall opening* **[2011.01]**

1/54 . . . . *Inlet and outlet arranged on opposite sides* **[2011.01]**

1/56 . . *Casing or covers of separate outdoor units, e.g. fan guards* **[2011.01]**

1/58 . . . *Separate protective covers for outdoor units, e.g. solar guards, snow shields or camouflage* **[2011.01]**

1/60 . . *Arrangement or mounting of the outdoor unit* **[2011.01]**

1/62 . . . *Wall-mounted* **[2011.01]**

1/64 . . . *Ceiling-mounted, e.g. below a balcony* **[2011.01]**

1/66 . . . *under the floor level* **[2011.01]**

1/68 . . . *Arrangement of multiple separate outdoor units* **[2011.01]**

3/00 **Air-conditioning systems in which conditioned primary air is supplied from one or more central stations to distributing units in the rooms or spaces where it may receive secondary treatment**; **Apparatus specially designed for such systems** (room units F24F 1/00; construction of heat-exchangers F28)

3/02 . characterised by the pressure or velocity of the primary air (F24F 3/044 takes precedence) **[3]**

3/04 . . operating with high pressure or high velocity

3/044 . Systems in which all treatment is given in the central station, i.e. all-air systems **[3]**

3/048 . . with temperature control at constant rate of air-flow (F24F 3/056 takes precedence) **[3]**

3/052 . . . Multiple duct systems, e.g. systems in which hot and cold air are supplied by separate circuits from the central station to mixing chambers in the spaces to be conditioned **[3]**

3/056 . . the air at least partially flowing over lighting fixtures, the heat of which is dissipated or used **[3]**

3/06 . characterised by the arrangements for the supply of heat-exchange fluid for the subsequent treatment of primary air in the room units (F24F 3/02 takes precedence)

3/08 . . with separate supply and return lines for hot and cold heat-exchange fluids

3/10 . . with separate supply lines and common return line for hot and cold heat-exchange fluids

3/12 . characterised by the treatment of the air otherwise than by heating and cooling (F24F 3/02, F24F 3/06 take precedence; apparatus for the individual treatment, see the appropriate subclasses for the treatments)

3/14 . . by humidification; by dehumidification

3/147 . . . with both heat and humidity transfer between supplied and exhausted air **[3]**

3/153 . . . with subsequent heating, i.e. with the air, given the required humidity in the central station, passing a heating element to achieve the required temperature **[3]**

3/16 . . by purification, e.g. by filtering; by sterilisation; by ozonisation

5/00 Air-conditioning systems or apparatus not covered by group F24F 1/00 or F24F 3/00

6/00 Air-humidification [3]

6/02 . by evaporation of water in the air **[3]**

6/04 . . using stationary unheated wet elements **[3]**

6/06 . . using moving unheated wet elements **[3]**

6/08 . . using heated wet elements **[3]**

6/10 . . . heated electrically **[3]**

6/12 . by forming water dispersions in the air **[3]**

6/14 . . using nozzles (nozzles per se, spraying in general B05B) **[3]**

6/16 . . using rotating elements **[3]**

6/18 . by injection of steam into the air **[3]**

7/00 Ventilation

7/007 . with forced flow (using ducting systems F24F 7/06) **[3]**

7/013 . . using wall or window fans, displacing air through the wall or window **[3]**

7/02 . Roof ventilation (F24F 7/007 takes precedence; ventilation of roof coverings E04D) **[3,6]**

7/04 . with ducting systems

7/06 . . with forced air circulation, e.g. by fan

7/08 . . . with separate ducts for supplied and exhausted air **[3]**

7/10 . . . with air supply, or exhaust, through perforated wall, floor or ceiling (outlet members for directing or distributing air F24F 13/06) **[3]**

9/00 Use of air currents for screening, e.g. air curtain (air curtains for vehicles B60J 9/04)

Common features or details

11/00 Control or safety systems or apparatus (control valves per se F16K) **[3]**

11/02 . Arrangement or mounting of control or safety devices

11/04 . . solely for controlling the rate of air-flow (F24F 11/08 takes precedence)

11/047 . . . to constant value **[3]**

11/053 . . . by means responsive to temperature **[3]**

11/06 . . solely for controlling the supply of heating or cooling fluids for secondary treatment (F24F 11/08 takes precedence)

11/08 . . for controlling the primary treatment of air

12/00 Use of energy recovery systems in air conditioning, ventilation or screening (with both heat and humidity transfer between supplied and exhausted air F24F 3/147; heat-exchange in general F28) **[4]**

13/00 Details common to, or for air-conditioning, air-humidification, ventilation or use of air currents for screening

13/02 . Ducting arrangements

13/04 . . Air-mixing units (F24F 13/06 takes precedence; mixing gases in general B01F 3/02)

13/06 . . Outlets for directing or distributing air into rooms or spaces, e.g. ceiling air diffuser

13/062 . . . having one or more bowls or cones diverging in the flow direction (F24F 13/072 takes precedence) **[3]**

13/065 . . . formed as cylindrical or spherical bodies which are rotatable (F24F 13/072 takes precedence) **[3]**

13/068 . . . formed as perforated walls, ceilings or floors (F24F 13/078 takes precedence) **[3]**

13/072 . . . of elongated shape, e.g. between ceiling panels **[3]**

13/075 . . . having parallel rods or lamellae directing the outflow, e.g. the rods or lamellae being individually adjustable (F24F 13/072 takes precedence) **[3]**

13/078 . . . combined with lighting fixtures (air-treatment systems with air-flow over lighting fixtures F24F 3/056) **[3]**

13/08 . Air-flow control members, e.g. louvres, grilles, flaps, guide plates (F24F 7/013, F24F 13/06 take precedence; roof ventilation F24F 7/02) **[3]**

13/10 . . movable, e.g. damper (F24F 13/18 takes precedence; valves in general F16K)

13/12 . . . built-up of sliding members

13/14 . . . built-up of tilting members, e.g. louvre

13/15 . . . . with parallel simultaneously tiltable lamellae **[3]**

13/16 . . . built-up of parallelly-movable plates

13/18 . . specially adapted for insertion in flat panels, e.g. in door or window-pane

13/20 . Casings or covers **[5]**

13/22 . Means for preventing condensation or evacuating condensate **[5]**

13/24 . Means for preventing or suppressing noise **[5]**

13/26 . Arrangements for air-circulation by means of induction, e.g. by fluid coupling or thermal effect **[6]**

13/28 . Arrangement or mounting of filters **[6]**

13/30 . Arrangement or mounting of heat-exchangers **[6]**

13/32 . Supports for air-conditioning, air-humidification or ventilation units **[6]**

F24H **FLUID HEATERS, E.G. WATER OR AIR HEATERS, HAVING HEAT-GENERATING MEANS, IN GENERAL** (heat-transfer, heat-exchange or heat-storage materials C09K 5/00; tube furnaces for thermal non-catalytic cracking C10G 9/20; devices, e.g. valves, for venting and aerating enclosures F16K 24/00; steam traps or like apparatus F16T; steam generation F22; combustion apparatus F23; domestic stoves or ranges F24B, F24C; domestic- or space-heating systems F24D; furnaces, kilns, ovens, retorts F27; heat-exchangers F28; electric heating elements or arrangements H05B)

(1) The distinguishing feature of the air heaters covered by this subclass is that the heat is predominantly released to the air by convection, mostly by forced circulation of the air. The domestic stoves or ranges covered by subclass F24B, F24C may also be fired or electric air heaters but they release their heat to a considerable extent by radiation and only to some extent by natural convention. **[3]**

(2) In this subclass, the following terms or expressions are used with the meanings indicated:
- "water" includes other liquids and means always the liquid to be heated; **[3]**
- "air" includes other gases or gas mixtures and means always the gas to be heated; **[3]**
- "furnace tubes" means tubes inside the heater wherein combustion is performed; **[3]**
- "fire tubes" means tubes inside the heater through which flue-gases flow from a combustion chamber located outside the tubes; **[3]**
- "heater" means apparatus including both heat generating means and means for transferring the generated heat to water or air. **[3]**

(3) All storage heaters are classified in group F24H 7/00. **[3]**

Subclass index

1/00 **Water heaters having heat generating means, e.g. boiler, flow-heater, water-storage heater** (F24H 7/00, F24H 8/00 take precedence; details F24H 9/00; steam boilers F22B; domestic stoves or ranges with additional provisions for heating water F24B 9/00, F24C 13/00) **[5]**

1/06 . Portable or mobile, e.g. collapsible

1/08 . Packaged or self-contained boilers, i.e. water heaters with control devices and pump in a single unit

1/10 . Continuous-flow heaters, i.e. heaters in which heat is generated only while the water is flowing, e.g. with direct contact of the water with the heating medium (F24H 1/50 takes precedence) **[5]**

1/12 . . in which the water is kept separate from the heating medium

1/14 . . . by tubes, e.g. bent in serpentine form

1/16 . . . . helically or spirally coiled

1/18 . Water-storage heaters (F24H 1/50 takes precedence; combined with water-heating stoves for central heating F24H 1/22) **[5]**

1/20 . . with immersed heating elements, e.g. electric elements or furnace tubes

1/22 . Water heaters other than continuous-flow or water-storage heaters, e.g. water heaters for central heating (F24H 1/50 takes precedence) **[5]**

1/24 . . with water mantle surrounding the combustion chamber or chambers (F24H 1/40, F24H 1/44 take precedence) **[3]**

1/26 . . . the water mantle forming an integral body

1/28 . . . . including one or more furnace or fire tubes

1/30 . . . the water mantle being built-up from sections

1/32 . . . . with vertical sections arranged side by side

1/34 . . with water chamber arranged adjacent to the combustion chamber or chambers, e.g. above or at side (F24H 1/24, F24H 1/44 take precedence)

1/36 . . . the water chamber including one or more fire tubes

1/38 . . with water contained in separate elements, e.g. radiator-type element (F24H 1/40, F24H 1/44 take precedence)

1/40 . . with water tube or tubes (F24H 1/44 takes precedence)

1/41 . . . in serpentine form **[3]**

1/43 . . . helically or spirally coiled **[3]**

1/44 . . with combinations of two or more of the types covered by groups F24H 1/24 to F24H 1/40

1/46 . Water heaters having plural combustion chambers **[2,5]**

1/48 . Water heaters for central heating incorporating heaters for domestic water **[5]**

1/50 . . incorporating domestic water tanks **[5]**

1/52 . . incorporating heat exchangers for domestic water (F24H 1/50 takes precedence) **[5]**

3/00 **Air heaters having heat generating means** (F24H 7/00, F24H 8/00 take precedence; details F24H 9/00; domestic stoves or ranges with additional provisions for convection heating of air F24B, F24C) **[5]**

3/02 . with forced circulation (F24H 3/12 takes precedence)

3/04 . . the air being in direct contact with the heating medium, e.g. electric heating element

3/06 . . the air being kept separate from the heating medium, e.g. using forced circulation of air over radiators

3/08 . . . by tubes

3/10 . . . by plates

3/12 . with additional heating arrangements

4/00 **Fluid heaters using heat pumps [5]**

4/02 . Liquid heaters **[5]**

4/04 . . Storage heaters **[5]**
4/06 . Gas heaters **[5]**

6/00 **Combined water and air heaters** (F24H 8/00 takes precedence) **[5]**

7/00 **Storage heaters, i.e. heaters in which the energy is stored as heat in masses for subsequent release** (domestic stoves or ranges with additional heat storage masses F24B 1/24, F24C 15/34)
7/02 . the released heat being conveyed to a transfer fluid, e.g. air, water
7/04 . . with forced circulation of the transfer fluid
7/06 . the released heat being radiated

8/00 **Fluid heaters having heat-generating means specially adapted for extracting latent heat from flue gases by means of condensation [5]**

9/00 **Details**
9/02 . Casings; Cover lids; Ornamental panels
9/06 . Arrangement of mountings or supports
9/12 . Connecting heaters to circulation pipes (pipe joints in general F16L)
9/14 . Connecting different sections, e.g. in water heaters (in radiators F28F 9/26)
9/16 . Arrangements for water drainage (valves for drainage F16K, e.g. F16K 21/00; in pipes or pipe systems in general F16L 55/00; in domestic-or space-heating systems F24D 19/08)
9/18 . Arrangement or mounting of grates, burners, or heating elements (burners F23D; grates F23H; electric heating elements H05B)
9/20 . Arrangement or mounting of control or safety devices (control valves F16K; safety devices for burners F23D; combustion control devices F23N; of systems comprising a heater, see the relevant subclasses, e.g. of control heating systems F24D 19/10; automatic switching for electric heating apparatus H05B 1/02)

F24J **PRODUCTION OR USE OF HEAT NOT OTHERWISE PROVIDED FOR** (materials therefor C09K 5/00; engines or other mechanisms for producing mechanical power from heat, see the relevant classes, e.g. F03G for using natural heat)

Note

Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

1/00 **Apparatus or devices using heat produced by exothermal chemical reactions other than by combustion** (for cooking-vessels A47J 36/28; self-heating compresses A61F 7/03; materials for the production of heat or cold undergoing non-reversible chemical reactions, other than by combustion, when used C09K 5/18)

2/00 **Use of solar heat, e.g. solar heat collectors** (distillation or evaporation of water using solar energy C02F 1/14; roof covering aspects of energy collecting devices E04D 13/18; devices for producing mechanical power from solar energy F03G 6/00; semi-conductor devices specially adapted for converting solar energy into electrical energy H01L 25/00, H01L 31/00; semiconductor devices including arrays of solar cells using heat energy H01L 31/058; generators in which light radiation is directly converted into electrical energy H02N 6/00) **[4,5]**
2/02 . Solar heat collectors with support for article heated, e.g. stoves, ranges, crucibles, furnaces or ovens using solar heat **[4]**
2/04 . Solar heat collectors having working fluid conveyed through collector **[4]**
2/05 . . surrounded by a transparent enclosure, e.g. evacuated solar collectors **[6]**
2/06 . . having concentrating elements (optical elements or systems per se G02B) **[4]**
2/07 . . . Receivers working at high temperature, e.g. for solar power plants **[6]**
2/08 . . . having lenses as concentrating elements **[4]**
2/10 . . . having reflectors as concentrating elements **[4]**
2/12 . . . . parabolic **[4]**
2/13 . . . . hemispherical **[6]**
2/14 . . . . semi-cylindrical or cylindro-parabolic **[4]**
2/15 . . . . conical **[6]**
2/16 . . . . having flat plates **[4]**
2/18 . . . . spaced, opposed interacting reflecting surfaces **[4]**
2/20 . . the working fluid being conveyed between plates **[4]**
2/22 . . . having extended surfaces, e.g. protrusions, corrugations (F24J 2/28 takes precedence) **[4]**
2/23 . . the working fluid trickling freely over collector elements **[6]**
2/24 . . the working fluid being conveyed through tubular heat absorbing conduits **[4]**
2/26 . . . having extended surfaces, e.g. protrusions (F24J 2/28 takes precedence) **[4]**
2/28 . . having permeable mass, foraminous or porous materials **[4]**
2/30 . . with means to exchange heat between plural fluids **[4]**
2/32 . . having evaporator and condenser section, e.g. heat pipe **[4]**
2/34 . . having heat storage mass **[4]**
2/36 . Rollable or foldable collector units **[4]**
2/38 . employing tracking means (F24J 2/02, F24J 2/06 take precedence; rotary supports or mountings therefor F24J 2/54; direction-finders for determining the direction from which electromagnetic waves are being received G01S 3/78; control of position or direction G05D 3/00) **[4]**
2/40 . Control arrangements **[4]**
2/42 . Solar heat systems not otherwise provided for **[4]**
2/44 . . having thermosiphonic circulation **[4]**

2/46 . Component parts, details or accessories of solar heat collectors **[4]**
2/48 . . characterised by the absorber material **[4]**
2/50 . . Transparent coverings **[4]**
2/51 . . Thermal insulation (F24J 2/50 takes precedence) **[6]**
2/52 . . Arrangement of mountings or supports **[4]**
2/54 . . . specially adapted for rotary movement **[6]**

3/00 Other production or use of heat, not derived from combustion (use of solar heat F24J 2/00)
3/06 . using natural heat **[4]**
3/08 . . using geothermal heat (devices for producing mechanical power from geothermal energy F03G 4/00) **[4,5]**

F25 REFRIGERATION OR COOLING; COMBINED HEATING AND REFRIGERATION SYSTEMS; HEAT PUMP SYSTEMS; MANUFACTURE OR STORAGE OF ICE; LIQUEFACTION OR SOLIDIFICATION OF GASES

F25B REFRIGERATION MACHINES, PLANTS, OR SYSTEMS; COMBINED HEATING AND REFRIGERATION SYSTEMS; HEAT PUMP SYSTEMS (heat-transfer, heat-exchange or heat-storage materials, e.g. refrigerants, or materials for the production of heat or cold by chemical reactions other than by combustion C09K 5/00; pumps, compressors F04; use of heat pumps for domestic or space-heating or for domestic hot-water supply F24D; air-conditioning, air-humidification F24F; fluid heaters using heat pumps F24H)

Note

Attention is drawn to Note (2) following the title of subclass F24F. **[5]**

Subclass index

Compression machines, plant, or systems

1/00 Compression machines, plant or systems with non-reversible cycle (F25B 3/00, F25B 5/00, F25B 6/00, F25B 7/00, F25B 9/00 take precedence) **[5]**

1/02 . with compressor of reciprocating-piston type (F25B 1/10 takes precedence)

1/04 . with compressor of rotary type (F25B 1/10 takes precedence)

1/047 . . of screw type **[5]**

1/053 . . of turbine type **[5]**

1/06 . with compressor of jet type, e.g. using liquid under pressure (F25B 1/10 takes precedence)

1/08 . . using vapour under pressure

1/10 . with multi-stage compression (with cascade operation F25B 7/00)

3/00 Self-contained rotary compression machines, i.e. with compressor, condenser, and evaporator rotating as a single unit

5/00 Compression machines, plant, or systems, with several evaporator circuits, e.g. for varying refrigerating capacity (with cascade operation F25B 7/00)

5/02 . arranged in parallel **[5]**

5/04 . arranged in series **[5]**

6/00 Compression machines, plant, or systems, with several condenser circuits [5]

6/02 . arranged in parallel **[5]**

6/04 . arranged in series **[5]**

7/00 Compression machines, plant, or systems, with cascade operation, i.e. with two or more circuits, the heat from the condenser of one circuit being absorbed by the evaporator of the next circuit (F25B 9/00 takes precedence)

9/00 Compression machines, plant, or systems, in which the refrigerant is air or other gas of low boiling point

9/02 . using Joule-Thompson effect; using vortex effect

9/04 . . using vortex effect **[5]**

9/06 . using expanders (F25B 9/10 takes precedence) **[5]**

9/08 . using ejectors (F25B 9/10 takes precedence) **[5]**

9/10 . with several cooling stages **[5]**

9/12 . using 3He-4He dilution **[5]**
9/14 . characterised by the cycle used, e.g. Stirling cycle **[5]**

11/00 Compression machines, plant, or systems, using turbines, e.g. gas turbines
11/02 . as expanders (F25B 9/06 takes precedence) **[5]**
11/04 . . centrifugal type **[5]**

13/00 Compression machines, plant, or systems, with reversible cycle (defrosting cycles F25B 47/02)

Sorption machines, plant, or systems

15/00 Sorption machines, plant, or systems, operating continuously, e.g. absorption type
15/02 . without inert gas (F25B 15/12, F25B 15/14, F25B 15/16 take precedence)
15/04 . . the refrigerant being ammonia evaporated from aqueous solution
15/06 . . the refrigerant being water vapour evaporated from a salt solution, e.g. lithium bromide
15/08 . . the refrigerant being sulfuric acid
15/09 . . the refrigerant being hydrogen desorbed from a hydride **[5]**
15/10 . with inert gas (F25B 15/12, F25B 15/14, F25B 15/16 take precedence)
15/12 . with resorber (F25B 15/14 takes precedence)
15/14 . using osmosis
15/16 . using desorption cycle

17/00 Sorption machines, plant, or systems, operating intermittently, e.g. absorption or adsorption type
17/02 . the absorbent or adsorbent being a liquid, e.g. brine (F25B 17/10 takes precedence)
17/04 . . with two or more boilers operating alternately
17/06 . . with the boiler and evaporator built-up as a unit in a tiltable or revolving arrangement
17/08 . the absorbent or adsorbent being a solid, e.g. salt (F25B 17/12 takes precedence) **[5]**
17/10 . using the endothermic solution of salt
17/12 . using desorption of hydrogen from a hydride **[5]**

Machines, plant, or systems, with a single mode of operation, not covered by groups F25B 1/00 to F25B 17/00

19/00 Machines, plant, or systems, using evaporation of a refrigerant but without recovery of the vapour
19/02 . using fluid jet, e.g. of steam
19/04 . . using liquid jet, e.g. of water

21/00 Machines, plant, or systems, using electric or magnetic effects
21/02 . using Peltier effect; using Nernst-Ettinghausen effect (thermoelectric elements H01L 35/00, H01L 37/00)
21/04 . . reversible **[5]**

23/00 Machines, plant, or systems, with a single mode of operation not covered by groups F25B 1/00 to F25B 21/00, e.g. using selective radiation effect

---

25/00 Machines, plant, or systems, using a combination of modes of operation covered by two or more of the groups F25B 1/00 to F25B 23/00 (combinations of two or more modes of operation covered by a single main group, see the relevant group)
25/02 . Compression-sorption machines, plants, or systems

27/00 Machines, plant, or systems, using particular sources of energy (F25B 30/06 takes precedence)
27/02 . using waste heat, e.g. from internal-combustion engines

29/00 Combined heating and refrigeration systems, e.g. operating alternately or simultaneously [5]

30/00 Heat pumps [5]

Note

When classifying heat pump circuits or systems, groups F25B 1/00 to F25B 25/00 and F25B 29/00 take precedence over group F25B 30/00. **[5]**

30/02 . of the compression type **[5]**
30/04 . of the sorption type **[5]**
30/06 . characterised by the source of low potential heat **[5]**

Component parts or details

31/00 Compressor arrangements (compressors per se F04)
31/02 . of motor-compressor units

33/00 Boilers; **Analysers**; **Rectifiers** (boiler-absorbers F25B 35/00)

35/00 Boiler-absorbers, i.e. boilers usable for absorption or adsorption
35/02 . using a liquid as sorbent, e.g. brine
35/04 . using a solid as sorbent

37/00 Absorbers; **Adsorbers** (boiler-absorbers F25B 35/00; separating processes involving the treatment of liquids with solid sorbents B01D 15/00; separation of gases or vapours by adsorption B01D 53/02; separation of gases or vapours by absorption B01D 53/14; investigating using adsorption or absorption G01N 30/00)

39/00 Evaporators; **Condensers**
39/02 . Evaporators
39/04 . Condensers

40/00 Subcoolers, desuperheaters or superheaters [5]
40/02 . Subcoolers **[5]**
40/04 . Desuperheaters **[5]**
40/06 . Superheaters **[5]**

41/00 Fluid-circulation arrangements, e.g. for transferring liquid from evaporator to boiler (pumps per se, sealings therefor F04)
41/02 . using electro-osmosis
41/04 . Disposition of valves (valves per se F16K)
41/06 . Flow restrictors, e.g. capillary tubes; Disposition thereof

43/00 Arrangements for separating or purifying gases or liquids (in analysers or rectifiers F25B 33/00); **Arrangements for vaporising the residuum of liquid refrigerant, e.g. by heat** (F25B 40/00 takes precedence) **[5]**
43/02 . for separating lubricants from the refrigerant
43/04 . for withdrawing non-condensible gases

45/00 Arrangements for charging or discharging refrigerant

47/00 Arrangements for preventing or removing deposits or corrosion, not provided for in another subclass
47/02 . Defrosting cycles **[5]**

49/00 **Arrangement or mounting of control or safety devices** (testing refrigerators G01M; control in general G05)

49/02 . for compression type machines, plant or systems **[5]**

49/04 . for sorption type machines, plant or systems **[5]**

F25C **PRODUCTION, WORKING, STORING OR DISTRIBUTION OF ICE** (frozen sweets, including ice-cream, their production A23G 9/00; concentrating solutions by removing frozen solvents B01D 9/04; purification of water by freezing C02F 1/22; refrigeration machines, plants, or systems F25B; solidification of gases or gaseous mixtures F25J; freeze-drying F26B) **[2]**

Note

In this subclass, the following term is used with the meaning indicated:
– "ice" means any frozen liquid and also covers frozen semiliquids or pasty substances. **[2]**

1/00 **Production of ice** (F25C 3/00 takes precedence)

1/02 . Production of natural ice, i.e. without refrigeration

1/04 . by using stationary moulds

1/06 . . open or openable at both ends

1/08 . by immersing freezing chambers or plates into water

1/10 . by using rotating or otherwise moving moulds (F25C 1/08 takes precedence)

1/12 . by freezing water on cooled surfaces, e.g. to form slabs

1/14 . . to form thin sheets which are removed by scraping or wedging, e.g. in the form of flakes

1/16 . by partially evaporating water in a vacuum

1/18 . of a particular transparency or translucency, e.g. by injecting air

1/20 . . by agitation

1/22 . Construction of moulds; Filling devices therefor (metering by volume in general G01F)

1/24 . . for refrigerators, e.g. freezing trays

3/00 **Methods or apparatus specially adapted for the production of ice or snow for winter sports or similar recreational purposes, e.g. for sporting installations**; **Production of artificial snow** (foundations or pavings for artificial surfaces for outdoor or indoor practice of snow or ice sports E01C 13/10; working on surfaces of snow or ice in order to make them suitable for traffic or sporting purposes E01H 4/00)

3/02 . for ice rinks

3/04 . for sledging trails or ski trails; Production of artificial snow

5/00 **Working, storing or distribution of ice**

5/02 . Tools or machines for disintegrating, removing, or harvesting ice

5/04 . . without the use of saws

5/06 . . . by deforming bodies with which the ice is in contact, e.g. by inflatable members

5/08 . . . by heating bodies in contact with the ice

5/10 . . . . using hot refrigerant; using fluid heated by refrigerant

5/12 . . . Ice-shaving machines

5/14 . Tools or machines for shaping or finishing ice pieces, e.g. ice presses

5/16 . Tools or devices for ice handling not covered by any other subclass

5/18 . Storing ice

F25D **REFRIGERATORS**; **COLD ROOMS**; **ICE-BOXES**; **COOLING OR FREEZING APPARATUS NOT COVERED BY ANY OTHER SUBCLASS** (refrigerated showcases A47F 3/04; thermally-insulated vessels for domestic use A47J 41/00; refrigerated vehicles, see the appropriate subclasses of classes B60 to B64; containers with thermal insulation in general B65D 81/38; heat-transfer, heat-exchange or heat-storage materials, e.g. refrigerants, or materials for the production of heat or cold by chemical reactions other than by combustion C09K 5/00; thermally-insulated vessels for liquefied or solidified gases F17C; air-conditioning or air-humidification F24F; refrigeration machines, plants, or systems F25B; cooling of instruments or comparable apparatus without refrigeration G12B; cooling of engines or pumps, see the relevant classes)

(1) Devices associated with refrigerating machinery are classified in groups F25D 11/00 to F25D 16/00. **[2009.01]**

(2) In this subclass, the following term is used with the meaning indicated:
– "device" means an enclosed space to be cooled; such devices being associated either with refrigerating machinery, e.g. in a refrigerator, or with other cold sources, e.g. in an ice-box.

(3) Attention is drawn to Note (2) following the title of subclass F24F. **[5]**

Subclass index

Devices not associated with refrigerating machinery

1/00 **Devices using naturally-cold air or water**
1/02 . using naturally-cold water, e.g. household-tap water

3/00 **Devices using other cold materials**; **Devices using cold-storage bodies**
3/02 . using ice, e.g. ice-boxes
3/04 . . Stationary cabinets
3/06 . . Movable containers
3/08 . . . portable, i.e. adapted to be carried personally
3/10 . using liquefied gases, e.g. liquid air
3/11 . . with conveyers carrying articles to be cooled through the cooling space **[4]**
3/12 . using solidified gases, e.g. carbon-dioxide snow
3/14 . . portable, i.e. adapted to be carried personally

5/00 **Devices using endothermic chemical reactions, e.g. using frigorific mixtures**
5/02 . portable, i.e. adapted to be carried personally

7/00 **Devices using evaporation effects without recovery of the vapour** (butter or cheese dishes with cooling devices A47G 19/26)

9/00 **Devices not associated with refrigerating machinery and not covered by groups F25D 1/00 to F25D 7/00**; **Combinations of devices covered by two or more of the groups F25D 1/00 to F25D 7/00**

Devices associated with refrigerating machinery

11/00 **Self-contained movable devices associated with refrigerating machinery, e.g. domestic refrigerators**
11/02 . with cooling compartments at different temperatures
11/04 . specially adapted for storing deep-frozen articles (F25D 11/02 takes precedence)

13/00 **Stationary devices associated with refrigerating machinery, e.g. cold rooms**
13/02 . with several cooling compartments, e.g. refrigerated locker systems
13/04 . . the compartments being at different temperatures
13/06 . with conveyers carrying articles to be cooled through the cooling space

15/00 **Devices associated with refrigerating machinery not covered by group F25D 11/00 or F25D 13/00, e.g. non-self-contained movable devices**

16/00 **Devices using a combination of a cooling mode associated with refrigerating machinery with a cooling mode not associated with refrigerating machinery [5]**

Details or features of the devices covered by groups F25D 1/00 to F25D 16/00 [5]

17/00 **Arrangements for circulating cooling fluids**; **Arrangements for circulating gas, e.g. air, within refrigerated spaces [3]**
17/02 . for circulating liquids, e.g. brine
17/04 . for circulating gas, e.g. by natural convection **[3]**
17/06 . . by forced circulation
17/08 . . . using ducts

19/00 **Arrangement or mounting of refrigeration units with respect to devices**
19/02 . plug-in type
19/04 . with more than one refrigeration unit

21/00 **Defrosting**; **Preventing frosting**; **Removing condensed or defrost water** (removing ice or water from heat-exchange apparatus in general F28F 17/00; heating arrangements specially adapted for transparent or reflecting areas H05B 3/84)
21/02 . Detecting the presence of frost or condensate
21/04 . Preventing the formation of frost or condensate
21/06 . Removing frost (defrosting cycles F25B 47/02)
21/08 . . by electric heating
21/10 . . by spraying with fluid
21/12 . . by hot-fluid circulating system separate from the refrigerant system
21/14 . Collecting or removing condensed and defrost water; Drip trays

23/00 **General constructional features** (F25D 21/00 takes precedence)
23/02 . Doors; Covers (F25D 23/08 takes precedence)
23/04 . . with special compartments, e.g. butter conditioners
23/06 . Walls (F25D 23/08 takes precedence; containers with thermal insulation B65D 81/38) **[4]**
23/08 . Parts formed wholly or mainly of plastics materials
23/10 . Arrangements for mounting in particular locations, e.g. for built-in type, for corner type
23/12 . Arrangements of compartments additional to cooling compartments; Combinations of refrigerators with other equipment, e.g. stove

25/00 **Charging, supporting, or discharging the articles to be cooled**

25/02 . by shelves

25/04 . by conveyers (in general B65G)

27/00 **Lighting arrangements** (in general F21)

29/00 **Arrangement or mounting of control or safety devices**

31/00 **Other cooling or freezing apparatus**

F25J **LIQUEFACTION, SOLIDIFICATION, OR SEPARATION OF GASES OR GASEOUS MIXTURES BY PRESSURE AND COLD TREATMENT** (cryogenic pumps F04B 37/08; gas storage vessels, gas-holders F17; filling vessels with, or discharging from vessels, compressed, liquefied, or solidified gases F17C; refrigeration machines, plants, or systems F25B)

1/00 **Processes or apparatus for liquefying or solidifying gases or gaseous mixtures**

1/02 . requiring the use of refrigeration, e.g. of helium or hydrogen

3/00 **Processes or apparatus for separating the constituents of gaseous mixtures involving the use of liquefaction or solidification**

3/02 . by rectification, i.e. by continuous interchange of heat and material between a vapour stream and a liquid stream (F25J 3/08 takes precedence)

3/04 . . for air

3/06 . by partial condensation (F25J 3/08 takes precedence; by rectification F25J 3/02)

3/08 . Separating gaseous impurities from gases or gaseous mixtures (cold traps B01D 8/00)

5/00 **Arrangements of cold-exchangers or cold-accumulators in separation or liquefaction plants** (heat-exchangers F28C, F28D, F28F)

F26 DRYING

F26B **DRYING SOLID MATERIALS OR OBJECTS BY REMOVING LIQUID THEREFROM** (drying devices for combines A01D 41/133; racks for drying fruit or vegetables A01F 25/12; drying foodstuffs A23; drying hair A45D 20/00; body-drying implements A47K 10/00; drying household articles A47L; drying gases or vapours B01D; chemical or physical processes for dewatering or like separating liquids from solids B01D 43/00; centrifugal apparatus B04; drying ceramics C04B 33/30; drying yarns or fabrics in association with some other form of treatment D06C; drying frames for laundry without heating or positive air circulation, domestic laundry-or spin-driers, wringing or hot pressing laundry D06F; furnaces, kilns, ovens F27)

Note

Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

Processes for drying

1/00 **Preliminary treatment of solid materials or objects to facilitate drying**

3/00 **Drying solid materials or objects by processes involving the application of heat** (in specific machines or apparatus F26B 9/00 to F26B 19/00)

3/02 . by convection, i.e. heat being conveyed from a heat source to the materials or objects to be dried by a gas or vapour, e.g. air

3/04 . . the gas or vapour circulating over, or surrounding, the materials or objects to be dried (F26B 3/14 takes precedence)

3/06 . . the gas or vapour flowing through the materials or objects to be dried (F26B 3/14 takes precedence)

3/08 . . . so as to loosen them, e.g. to form a fluidised bed

3/084 . . . . with heat exchange taking place in the fluidised bed **[5]**

3/088 . . . . using inert thermally-stabilised particles **[5]**

3/092 . . . . agitating the fluidised bed, e.g. by vibrating or pulsating **[5]**

3/097 . . . . using a magnetic field to stabilise the fluidised bed **[5]**

3/10 . . the gas or vapour carrying the materials or objects to be dried with it

3/12 . . . in the form of a spray

3/14 . . the materials or objects to be dried being moved by gravity

3/16 . . . in a counter-flow of the gas or vapour

3/18 . by conduction, i.e. the heat is conveyed from the heat source, e.g. gas flame, to the materials or objects to be dried by direct contact

3/20 . . the heat source being a heated surface (F26B 3/22 takes precedence)

3/22 . . the heat source and the materials or objects to be dried being in relative motion, e.g. of vibration

3/24 . . . the movement being rotation

3/26 . . . the movement being performed by gravity

3/28 . by radiation, e.g. from the sun

3/30 . . from infra-red-emitting elements

3/32 . by development of heat within the materials or objects to be dried

3/34 . . by using electrical effects

3/347 . . . Electromagnetic heating, e.g. induction heating or heating using microwave energy **[4]**

3/353 . . . Resistance heating **[4]**

3/36 . . by using mechanical effects, e.g. by friction (by using ultrasonic vibration F26B 5/02)

5/00 **Drying solid materials or objects by processes not involving the application of heat** (separating liquids from solids by straining B01D; replacing liquids in wet solids by other liquids, e.g. water by spirit, B01D 12/00; drying by electrophoresis B01J)

5/02 . by using ultrasonic vibrations

5/04 . by evaporation or sublimation of moisture under reduced pressure, e.g. in a vacuum

5/06 . . the process involving freezing

5/08 . by centrifugal treatment

5/10 . . the process involving freezing

5/12 . by suction

5/14 . by applying pressure, e.g. wringing; by brushing; by wiping

5/16 . by contact with sorbent bodies, e.g. absorbent mould; by admixture with sorbent materials

7/00 Drying solid materials or objects by processes using a combination of processes not covered by a single one of groups F26B 3/00 or F26B 5/00

Machines or apparatus for drying

9/00 Machines or apparatus for drying solid materials or objects at rest or with only local agitation; Domestic airing cupboards

9/02 . in buildings (special types of buildings E04H)

9/04 . in presses or clamping devices

9/06 . in stationary drums or chambers

9/08 . . including agitating devices

9/10 . in the open air; in pans or tables in rooms; Drying stacks of loose material

11/00 Machines or apparatus for drying solid materials or objects with movement which is non-progressive

11/02 . in moving drums or other mainly-closed receptacles (F26B 11/18 takes precedence)

11/04 . . rotating about a horizontal or slightly-inclined axis

11/06 . . . with stirring devices which are held stationary

11/08 . . rotating about a vertical or steeply-inclined axis

11/10 . . . with stirring devices which are held stationary

11/12 . in stationary drums or other mainly-closed receptacles with moving stirring devices (F26B 11/22 takes precedence)

11/14 . . the stirring device moving in a horizontal or slightly-inclined plane

11/16 . . the stirring device moving in a vertical or steeply-inclined plane

11/18 . on or in moving dishes, trays, pans, or other mainly-open receptacles

11/20 . . with stirring devices which are held stationary

11/22 . on or in stationary dishes, trays, pans, or other mainly-open receptacles, with moving stirring devices

13/00 Machines or apparatus for drying fabrics, fibres, yarns, or other materials in long lengths, with progressive movement

13/02 . with movement in a straight line

13/04 . . using rollers

13/06 . with movement in a sinuous or zig-zag path

13/08 . . using rollers

13/10 . Arrangements for feeding, heating, or supporting materials; Regulating movement, tension, or position of materials (heating processes F26B 3/00)

13/12 . . Regulating movement, tension, or position of material

13/14 . . Rollers (sorbent surfaces F26B 13/26)

13/16 . . . perforated (F26B 13/18 takes precedence; for applying suction F26B 13/30)

13/18 . . . heated; cooled

13/20 . . Supporting materials by fluid jets, e.g. air

13/22 . . Arrangements of gas flames

13/24 . Arrangements of devices using drying processes not involving heating (such processes per se F26B 5/00)

13/26 . . using sorbent surfaces, e.g. bands or coverings on rollers

13/28 . . for applying pressure; for brushing; for wiping

13/30 . . for applying suction, e.g. through perforated rollers

15/00 Machines or apparatus for drying objects with progressive movement; Machines or apparatus with progressive movement for drying batches of material in compact form (F26B 13/00, F26B 17/00 take precedence; conveyers in general B65G)

15/02 . with movement in the whole or part of a circle

15/04 . . in a horizontal plane

15/06 . . . involving several planes, one above the other

15/08 . . in a vertical plane

15/10 . with movement in a path composed of one or more straight lines, e.g. compound

15/12 . . the lines being all horizontal or slightly inclined

15/14 . . . the objects or batches of materials being carried by trays or racks

15/16 . . . the objects or batches of materials being carried by wheeled trucks

15/18 . . . the objects or batches of materials being carried by endless belts

15/20 . . the lines being all vertical or steeply inclined

15/22 . . . the objects or batches of materials being carried by endless belts

15/24 . . . . in a zig-zag path

15/26 . with movement in a helical path

17/00 Machines or apparatus for drying materials in loose, plastic, or fluidised form, e.g. granules, staple fibres, with progressive movement (F26B 13/00 takes precedence)

17/02 . with movement performed by belts carrying the materials; with movement performed by belts propelling the materials over stationary surfaces

17/04 . . the belts being all horizontal or slightly inclined (F26B 17/08 takes precedence)

17/06 . . the belts being all vertical or steeply inclined (F26B 17/08 takes precedence)

17/08 . . the belts being arranged in a sinuous or zig-zag path

17/10 . with movement performed by fluid currents, e.g. issuing from a nozzle (F26B 3/08 takes precedence) **[5]**

17/12 . with movement performed solely by gravity

17/14 . . the materials moving through a counter-current of gas

17/16 . . the materials passing down a heated surface

17/18 . with movement performed by rotating helical blades or other rotary conveyers moving materials in stationary chambers

17/20 . . the axis of rotation being horizontal or slightly inclined

17/22 . . the axis of rotation being vertical or steeply inclined

17/24 . with movement performed by shooting or throwing the materials

17/26 . with movement performed by reciprocating or oscillating conveyers propelling materials over stationary surfaces; with movement performed by reciprocating or oscillating shelves, sieves, or trays

17/28 . with movement performed by rollers or discs with material passing over or between them, e.g. suction drum, sieve

17/30 . with movement performed by rotary or oscillating containers; with movement performed by rotary floors

17/32 . . the movement being in a horizontal or slightly-inclined plane

17/34 . . the movement being in a vertical or steeply-inclined plane

19/00 Machines or apparatus for drying solid materials or objects not covered by groups F26B 9/00 to F26B 17/00

20/00 Combinations of machines or apparatus covered by two or more of groups F26B 9/00 to F26B 19/00

Details of general application

21/00 Arrangements for supplying or controlling air or gases for drying solid materials or objects (air-conditioning or ventilation in general F24F)

21/02 . Circulating air or gases in closed cycles, e.g. wholly within the drying enclosure (F26B 21/14 takes precedence)

21/04 . . partly outside the drying enclosure

21/06 . Controlling, e.g. regulating, parameters of gas supply (F26B 21/14 takes precedence)

21/08 . . Humidity

21/10 . . Temperature; Pressure

21/12 . . Velocity of flow; Quantity of flow

21/14 . using gases or vapours other than air or steam

23/00 Heating arrangements (using heated air or gases F26B 21/00)

23/02 . using combustion heating (F26B 23/10 takes precedence)

23/04 . using electric heating (F26B 23/10 takes precedence)

23/06 . . resistance heating

23/08 . . inductive heating; capacitative heating; microwave heating

23/10 . using tubes or passages containing heated fluids

25/00 Details of general application not covered by group F26B 21/00 or F26B 23/00 (loading, conveying, or unloading in general B65G)

25/02 . Applications of driving mechanisms, not covered by another subclass

25/04 . Agitating, stirring, or scraping devices

25/06 . Chambers, containers, or receptacles

25/08 . . Parts thereof

25/10 . . . Floors, roofs, or bottoms; False bottoms

25/12 . . . Walls or sides; Doors

25/14 . . Chambers, containers, receptacles of simple construction

25/16 . . . mainly closed, e.g. drum

25/18 . . . mainly open, e.g. dish, tray, pan

25/20 . Rollers (F26B 25/06 takes precedence)

25/22 . Controlling the drying process in dependence on liquid content of solid materials or objects

F27 FURNACES; KILNS; OVENS; RETORTS [4]

(1) This class covers:
- furnaces, kilns, ovens, retorts, open sintering apparatus and other similar apparatus for heat treatment of materials or articles, and details or accessories therefor, in general;
- the arrangement of electrical heating elements in or on furnaces.

(2) This class does not cover:
- combustion apparatus per se, i.e. apparatus for direct combination of oxygen gas and a burnable substance; **[7]**
- electrical heating elements per se;
- processes carried on within the furnaces.

(3) In this class, the following term is used with the meaning indicated:
- "furnaces" covers kilns, ovens, or retorts.

F27B FURNACES, KILNS, OVENS, OR RETORTS IN GENERAL; OPEN SINTERING OR LIKE APPARATUS (combustion apparatus F23; electric heating H05B)

Note

Attention is drawn to the references and Notes following the title of class F27 and the Note (3) of section H.

Subclass index

1/00 Shaft or like vertical or substantially vertical furnaces (for preheating, burning, calcining or cooling lime, magnesia or dolomite C04B 2/12)

1/02 . with two or more shafts or chambers, e.g. multi-storey

1/04 . . Combinations or arrangements of shafts

1/06 . of other than up-draught type

1/08 . heated otherwise than by solid fuel mixed with charge

1/09 . . heated electrically **[4]**

1/10 . Details, accessories, or equipment peculiar to furnaces of these types

1/12 . . Shells or casings; Supports therefor

1/14 . . . Arrangements of linings (linings in general F27D 1/00)

1/16 . . Arrangements of tuyères

1/18 . . Arrangements of dust collectors

1/20 . . Arrangement of devices for charging **[4]**

1/21 . . Arrangement of devices for discharging **[4]**

1/22 . . Arrangements of heat-exchange apparatus (heat-exchangers in general F28C, F28D)

1/24 . . Cooling arrangements

1/26 . . Arrangements of controlling devices

1/28 . . Arrangements of monitoring devices, of indicators, of alarm devices

3/00 Hearth-type furnaces, e.g. of reverberatory type (F27B 9/00 to F27B 15/00, F27B 21/00 take precedence); **Electric arc furnaces [4]**

3/02 . of single-chamber fixed-hearth type

3/04 . of multiple-hearth type; of multiple-chamber type; Combinations of hearth-type furnaces

3/06 . with movable working chambers or hearths, e.g. tiltable

3/08 . heated electrically, e.g. electric arc furnaces, with or without any other source of heat

3/10 . Details, accessories, or equipment, e.g. dust-collectors, peculiar to hearth-type furnaces

3/12 . . Working chambers or casings; Supports therefor

3/14 . . . Arrangements of linings

3/16 . . . Walls; Roofs

3/18 . . Arrangement of devices for charging **[4]**

3/19 . . Arrangement of devices for discharging **[4]**

3/20 . . Arrangements of heating devices

3/22 . . Arrangements of air or gas supply devices

3/24 . . Cooling arrangements

3/26 . . Arrangements of heat-exchange apparatus

3/28 . . Arrangement of controlling, monitoring, alarm or like devices **[4]**

5/00 Muffle furnaces; Retort furnaces; Other furnaces in which the charge is held completely isolated (F27B 9/00 takes precedence)

5/02 . of multiple-chamber type

5/04 . adapted for treating the charge in vacuum or special atmosphere

5/05 . . in vacuum **[5]**

5/06 . Details, accessories, or equipment peculiar to furnaces of these types

5/08 . . Arrangements of linings

5/10 . . Muffles

5/12 . . Arrangement of devices for charging **[4]**

5/13 . . Arrangement of devices for discharging **[4]**

5/14 . . Arrangements of heating devices

5/16 . . Arrangements of air or gas supply devices
5/18 . . Arrangement of controlling, monitoring, alarm or like devices **[4]**

7/00 Rotary-drum furnaces, i.e. horizontal or slightly inclined
7/02 . of multiple-chamber or multiple-drum type
7/04 . . with longitudinal divisions
7/06 . adapted for treating the charge in vacuum or special atmosphere
7/08 . externally heated
7/10 . internally heated, e.g. by means of passages in the wall
7/12 . tiltable
7/14 . with means for agitating or moving the charge
7/16 . . the means being fixed relatively to the drum (F27B 7/04 takes precedence)
7/18 . . the means being movable within the drum
7/20 . Details, accessories, or equipment peculiar to rotary-drum furnaces
7/22 . . Rotary drums; Supports therefor
7/24 . . . Seals between rotary and stationary parts
7/26 . . Drives
7/28 . . Arrangements of linings
7/30 . . Arrangements of partitions
7/32 . . Arrangement of devices for charging **[4]**
7/33 . . Arrangement of devices for discharging **[4]**
7/34 . . Arrangements of heating devices
7/36 . . Arrangements of air or gas supply devices
7/38 . . Arrangements of cooling devices
7/40 . . . Planetary coolers **[4]**
7/42 . . Arrangement of controlling, monitoring, alarm or like devices **[4]**

9/00 Furnaces through which the charge is moved mechanically, e.g. of tunnel type (F27B 7/14 takes precedence); **Similar furnaces in which the charge moves by gravity**
9/02 . of multiple-track type; of multiple-chamber type; Combinations of furnaces
9/04 . adapted for treating the charge in vacuum or special atmosphere
9/06 . heated without contact between combustion gases and charge; electrically heated
9/08 . . heated through chamber walls
9/10 . . heated by hot air or gas
9/12 . with special arrangements for preheating or cooling the charge
9/14 . characterised by the path of the charge during treatment; characterised by the means by which the charge is moved during treatment (F27B 9/28 takes precedence; travelling or movable supports or containers for the charge F27D 3/12)
9/16 . . the charge moving in a circular or arcuate path
9/18 . . . under the action of scrapers or pushers
9/20 . . the charge moving in a substantially straight path
9/22 . . . under the action of scrapers or pushers (F27B 9/26 takes precedence)
9/24 . . . being carried by a conveyer
9/26 . . . on or in trucks, sleds, or containers
9/28 . for treating continuous lengths of work
9/30 . Details, accessories, or equipment peculiar to furnaces of these types
9/32 . . Casings
9/34 . . . Arrangements of linings
9/36 . . Arrangements of heating devices
9/38 . . Arrangement of devices for charging **[4]**
9/39 . . Arrangement of devices for discharging **[4]**
9/40 . . Arrangements of controlling or monitoring devices

11/00 Bell-type furnaces (for treating metal strips or wire C21D 9/663)

13/00 Furnaces with both stationary charge and progression of heating, e.g. of ring type, of type in which segmental kiln moves over stationary charge
13/02 . of multiple-chamber type with permanent partitions; Combinations of furnaces
13/04 . of single-chamber type with temporary partitions
13/06 . Details, accessories, or equipment peculiar to furnaces of this type
13/08 . . Casings
13/10 . . . Arrangements of linings
13/12 . . Arrangements of heating devices
13/14 . . Arrangement of controlling, monitoring, alarm or like devices **[4]**

14/00 Crucible or pot furnaces; **Tank furnaces [4]**
14/02 . with tilting or rocking arrangements (F27B 14/04 takes precedence)
14/04 . adapted for treating the charge in vacuum or special atmosphere
14/06 . heated electrically, e.g. induction crucible furnaces, with or without any other source of heat (F27B 14/04 takes precedence)
14/08 . Details peculiar to crucible, pot or tank furnaces **[4]**
14/10 . . Crucibles
14/12 . . . Covers therefor
14/14 . . Arrangements of heating devices
14/16 . . Arrangement of devices for charging **[4]**
14/18 . . Arrangement of devices for discharging **[4]**
14/20 . . Arrangement of controlling, monitoring, alarm or like devices **[4]**

15/00 Fluidised-bed furnaces; **Other furnaces using or treating finely-divided materials in dispersion** (combustion apparatus in which combustion takes place in a fluidised bed of fuel or other particles F23C 10/00)
15/02 . Details, accessories, or equipment peculiar to furnaces of these types
15/04 . . Casings; Supports therefor
15/06 . . . Arrangements of linings
15/08 . . Arrangement of devices for charging **[4]**
15/09 . . Arrangement of devices for discharging **[4]**
15/10 . . Arrangements of air or gas supply devices
15/12 . . Arrangements of dust collectors
15/14 . . Arrangements of heating devices
15/16 . . Arrangements of cooling devices
15/18 . . Arrangements of controlling devices
15/20 . . Arrangements of monitoring devices, of indicators, of alarm devices

17/00 Furnaces of a kind not covered by any of groups F27B 1/00 to F27B 15/00 (structural combinations of furnaces F27B 19/02)
17/02 . specially designed for laboratory use

19/00 Combinations of different kinds of furnaces that are not all covered by any single one of main groups F27B 1/00 to F27B 17/00
19/02 . combined in one structure
19/04 . arranged for associated working

21/00 **Open or uncovered sintering apparatus**; **Other heat-treatment apparatus of like construction**
21/02 . Sintering grates or tables
21/04 . Sintering pots or sintering pans
21/06 . Endless-strand sintering machines
21/08 . Details, accessories, or equipment peculiar to sintering or like apparatus **[4]**
21/10 . . Arrangement of devices for charging **[4]**
21/12 . . Arrangement of devices for discharging **[4]**
21/14 . . Arrangement of controlling, monitoring, alarm or like devices **[4]**

F27D **DETAILS OR ACCESSORIES OF FURNACES, KILNS, OVENS, OR RETORTS, IN SO FAR AS THEY ARE OF KINDS OCCURRING IN MORE THAN ONE KIND OF FURNACE** (combustion apparatus F23; electric heating H05B)

Note

Attention is drawn to the references and Notes following the title of class F27 and Note (3) of section H.

Subclass index

1/00 **Casings**; **Linings**; **Walls**; **Roofs** (refractory materials C04B; firebridges for combustion chambers F23M 3/00)
1/02 . Crowns; Roofs
1/04 . characterised by the form of the bricks or blocks used
1/06 . . Composite bricks or blocks
1/08 . . . Bricks or blocks with internal reinforcement or metal backing
1/10 . Monolithic linings; Supports therefor
1/12 . incorporating cooling arrangements (constructions of tube assemblies in general F28)
1/14 . Supports for linings (F27D 1/10 takes precedence)
1/16 . Making or repairing linings
1/18 . Door frames; Doors, lids, removable covers

3/00 **Charging**; **Discharging**; **Manipulation of charge** (conveying systems characterised by their application for specified purposes not otherwise provided for B65G 49/00; moving charge through a furnace F27B 9/14)
3/02 . Skids or tracks for heavy objects
3/04 . Ram or pusher apparatus
3/06 . Charging or discharging machines on travelling carriages
3/08 . Screw feeders; Screw dischargers
3/10 . Charging directly from hoppers or shoots
3/12 . Travelling or movable supports or containers for the charge
3/14 . Charging or discharging liquid or molten material
3/15 . Tapping equipment; Equipment for removing slag
3/16 . Introducing a fluid jet or current into the charge (F27D 3/18 takes precedence) **[3]**
3/18 . Charging particulate material using a fluid carrier **[3]**

5/00 **Supports, screens, or the like for the charge within the furnace** (travelling or movable supports F27D 3/12)

7/00 **Forming, maintaining, or circulating atmospheres in heating chambers**
7/02 . Supplying steam, vapour, gases, or liquids
7/04 . Circulating atmospheres by mechanical means
7/06 . Forming or maintaining special atmospheres or vacuum within heating chambers (F27D 7/02 takes precedence)

9/00 **Cooling of furnaces or of charges therein** (F27D 1/00, F27D 3/00 take precedence)

11/00 **Arrangement of elements for electric heating in or on furnaces** (electric heating per se H05B)
11/02 . Ohmic resistance heating
11/04 . . with direct passage of current through the material being heated
11/06 . Induction heating, i.e. in which the material being heated, or its container or elements embodied therein, form the secondary of a transformer
11/08 . Heating by electric discharge, e.g. arc discharge
11/10 . . Disposition of electrodes (automatic control of temperature G05D 23/00; electric discharge apparatus H01T; arrangements for feeding or guiding electrodes H05B 7/10; automatic control of power by positioning of electrodes H05B 7/144) **[3]**
11/12 . with electromagnetic fields acting directly on the material being heated

13/00 **Apparatus for preheating charges**; **Arrangements for preheating charges**

15/00 **Handling or treating discharged material**; **Supports or receiving chambers therefor**
15/02 . Cooling

17/00 **Arrangement for using waste heat** (heat-exchangers per se F28); **Arrangement for using, or disposing of, waste gases** (removing fumes in general B08B 15/00)

19/00 **Arrangement of controlling devices**

21/00 **Arrangement of monitoring devices**; **Arrangements of safety devices**
21/02 . Observation or illuminating devices
21/04 . Arrangements of indicators or alarms

25/00 **Devices for removing incrustations [2010.01]**

27/00 **Stirring devices for molten material** (F27D 3/14 takes precedence) **[2010.01]**

99/00 **Subject matter not provided for in other groups of this subclass [2010.01]**

F28 HEAT EXCHANGE IN GENERAL

(1) In this class, the following expressions are used with the meanings indicated:
– "heat exchange" means the heating or cooling of a fluid or fluent solid by direct or indirect contact with a heated or cooled fluid or fluent solid;
– "heat transfer" means the heating or cooling of a fluid or fluent solid by direct contact with a heated or cooled surface or body.

(2) Apparatus using heat exchange or heat transfer (as defined in Note (1) above) for specific purposes is classified either in subclass F28B or in the appropriate subclasses of, for example, classes F22, F24, F25, F26, or F27; if no such other subclass is appropriate, such apparatus is classified in subclass F28C or F28D.

F28B STEAM OR VAPOUR CONDENSERS (condensation of vapours B01D 5/00; condensation during pretreatment of gases prior to electrostatic precipitation of dispersed particles B03C 3/014; steam engine plants having condensers F01K; liquefaction of gases F25J; details of heat-exchange or heat-transfer arrangements of general application F28F)

1/00 Condensers in which the steam or vapour is separated from the cooling medium by walls, e.g. surface condenser
1/02 . using water or other liquid as the cooling medium
1/04 . . employing moving walls
1/06 . using air or other gas as the cooling medium
1/08 . . employing moving walls **[3]**

3/00 Condensers in which the steam or vapour comes into direct contact with the cooling medium
3/02 . by providing a flowing coating of cooling liquid on the condensing surface
3/04 . by injecting cooling liquid into the steam or vapour (F28B 3/08 takes precedence)
3/06 . by injecting the steam or vapour into the cooling liquid (F28B 3/08 takes precedence)
3/08 . with rotatable members

5/00 Condensers employing a combination of the methods covered by groups F28B 1/00 and F28B 3/00; Other condensers

7/00 Combinations of two or more condensers, e.g. provision of reserve condenser

9/00 Auxiliary systems, arrangements, or devices
9/02 . for feeding steam or vapour to condensers
9/04 . for feeding, collecting, and storing cooling water or other cooling liquid
9/06 . . with provision for re-cooling the cooling water or other cooling liquid
9/08 . for collecting and removing condensate
9/10 . for extracting, cooling, and removing non-condensable gases

11/00 Controlling arrangements with features specially adapted for condensers

---

F28C HEAT-EXCHANGE APPARATUS, NOT PROVIDED FOR IN ANOTHER SUBCLASS, IN WHICH THE HEAT-EXCHANGE MEDIA COME INTO DIRECT CONTACT WITHOUT CHEMICAL INTERACTION (heat-transfer, heat-exchange or heat-storage materials C09K 5/00; fluid heaters having heat generating means F24H; with an intermediate heat-transfer medium coming into direct contact with heat-exchange media F28D 15/00 to F28D 19/00; details of heat-exchange apparatus of general application F28F)

1/00 Direct-contact trickle coolers, e.g. cooling towers (building construction E04H 5/12; enclosed spaces cooled by trickle F25; component parts of trickle coolers F28F 25/00)
1/02 . with counter-current only
1/04 . with cross-current only
1/06 . with both counter-current and cross-current
1/08 . Arrangements for recovering heat from exhaust steam
1/10 . Arrangements for suppressing noise **[5]**
1/12 . Arrangements for preventing clogging by frost **[3]**
1/14 . comprising also a non-direct contact heat exchange **[3]**
1/16 . Arrangements for preventing condensation, precipitation or mist formation, outside the cooler (F28C 1/14 takes precedence) **[3]**

3/00 Other direct-contact heat-exchange apparatus
3/02 . the heat-exchange media both being gases or vapours
3/04 . the heat-exchange media both being liquids
3/06 . the heat-exchange media being a liquid and a gas or vapour (temperators for cooling steam F22)
3/08 . . with change of state, e.g. absorption, evaporation, condensation (generating steam under pressure F22)
3/10 . one heat-exchange medium at least being a fluent solid, e.g. a particulate material
3/12 . . the heat-exchange medium being a particulate material and a gas, vapour, or liquid
3/14 . . . the particulate material moving by gravity, e.g. down a tube
3/16 . . . the particulate material forming a bed, e.g. fluidised, on vibratory sieves
3/18 . . . the particulate material being contained in rotating drums

F28D HEAT-EXCHANGE APPARATUS, NOT PROVIDED FOR IN ANOTHER SUBCLASS, IN WHICH THE HEAT-EXCHANGE MEDIA DO NOT COME INTO DIRECT CONTACT (heat-transfer, heat-exchange or heat-storage materials C09K 5/00; fluid heaters having heat generating means and heat transferring means F24H; furnaces F27; details of heat-exchange apparatus of general application F28F); **HEAT STORAGE PLANTS OR APPARATUS IN GENERAL [4]**

Subclass index

1/00 Heat-exchange apparatus having stationary conduit assemblies for one heat-exchange medium only, the media being in contact with different sides of the conduit wall, in which the other heat-exchange medium is a large body of fluid, e.g. domestic or motor car radiators (F28D 5/00 takes precedence)

1/02 . with the heat-exchange conduits immersed in the body of fluid

1/03 . . with plate-like or laminated conduits **[4]**

1/04 . . with tubular conduits

1/047 . . . the conduits being bent, e.g. in a serpentine or zig-zag **[4]**

1/053 . . . the conduits being straight **[4]**

1/06 . with the heat-exchange conduits forming part of, or being attached to, the tank containing the body of fluid

3/00 Heat-exchange apparatus having stationary conduit assemblies for one heat-exchange medium only, the media being in contact with different sides of the conduit wall, in which the other heat-exchange medium flows in a continuous film, or trickles freely, over the conduits (F28D 5/00 takes precedence)

3/02 . with tubular conduits

3/04 . Distributing arrangements

5/00 Heat-exchange apparatus having stationary conduit assemblies for one heat-exchange medium only, the media being in contact with different sides of the conduit wall, using the cooling effect of natural or forced evaporation

5/02 . in which the evaporating medium flows in a continuous film or trickles freely over the conduits

7/00 Heat-exchange apparatus having stationary tubular conduit assemblies for both heat-exchange media, the media being in contact with different sides of a conduit wall

7/02 . the conduits being helically coiled (F28D 7/10 takes precedence)

7/04 . the conduits being spirally coiled (F28D 7/10 takes precedence)

7/06 . the conduits having a single U-bend (F28D 7/10 takes precedence)

7/08 . the conduits being otherwise bent, e.g. in a serpentine or zig-zag (F28D 7/10 takes precedence)

7/10 . the conduits being arranged one within the other, e.g. concentrically

7/12 . . the surrounding tube being closed at one end, i.e. return type (F28D 7/14 takes precedence)

7/14 . . both tubes being bent

7/16 . the conduits being arranged in parallel spaced relation (F28D 7/02 to F28D 7/10 take precedence) **[4]**

9/00 Heat-exchange apparatus having stationary plate-like or laminated conduit assemblies for both heat-exchange media, the media being in contact with different sides of a conduit wall

9/02 . the heat-exchange media travelling at an angle to one another (F28D 9/04 takes precedence)

9/04 . the conduits being formed by spirally-wound plates or laminae

11/00 Heat-exchange apparatus employing moving conduits

11/02 . the movement being rotary, e.g. performed by a drum or roller (F28D 11/08 takes precedence)

11/04 . . performed by a tube or a bundle of tubes

11/06 . the movement being reciprocating or oscillating (F28D 11/08 takes precedence)

11/08 . more than one conduit assembly performing independent movements, e.g. rotary bundle of tubes in a rotary drum

13/00 Heat-exchange apparatus using a fluidised bed

Heat-exchange apparatus employing intermediate heat-transfer media or bodies [3]

15/00 Heat-exchange apparatus with the intermediate heat-transfer medium in closed tubes passing into or through the conduit walls

15/02 . in which the medium condenses and evaporates, e.g. heat-pipes **[4]**

15/04 . . with tubes having a capillary structure **[6]**

15/06 . . Control arrangements therefor **[6]**

17/00 **Regenerative heat-exchange apparatus in which a stationary intermediate heat-transfer medium or body is contacted successively by each heat-exchange medium, e.g. using granular particles**

17/02 . using rigid bodies, e.g. of porous material

17/04 . Distributing arrangements for the heat-exchange media

19/00 **Regenerative heat-exchange apparatus in which the intermediate heat-transfer medium or body is moved successively into contact with each heat-exchange medium**

19/02 . using granular particles

19/04 . using rigid bodies, e.g. mounted on a movable carrier

20/00 **Heat storage plants or apparatus in general** (specially adapted for particular applications, see the relevant places, e.g. F24D 15/02); **Regenerative heat-exchange apparatus not covered by groups F28D 17/00 or F28D 19/00 [4]**

20/02 . using latent heat **[6]**

21/00 **Heat-exchange apparatus not covered by any of the groups F28D 1/00 to F28D 20/00 [4]**

F28F **DETAILS OF HEAT-EXCHANGE OR HEAT-TRANSFER APPARATUS, OF GENERAL APPLICATION** (heat-transfer, heat-exchange or heat-storage materials C09K 5/00; water or air traps, air venting F16)

Subclass index

1/00 **Tubular elements**; **Assemblies of tubular elements** (specially adapted for movement F28F 5/00)

1/02 . Tubular elements of cross-section which is non-circular (F28F 1/08, F28F 1/10 take precedence)

1/04 . . polygonal, e.g. rectangular

1/06 . . crimped or corrugated in cross-section

1/08 . Tubular elements crimped or corrugated in longitudinal section

1/10 . Tubular elements or assemblies thereof with means for increasing heat-transfer area, e.g. with fins, with projections, with recesses (crimped or corrugated elements F28F 1/06, F28F 1/08)

1/12 . . the means being only outside the tubular element

1/14 . . . and extending longitudinally (F28F 1/38 takes precedence)

1/16 . . . . the means being integral with the element, e.g. formed by extrusion (F28F 1/22 takes precedence)

1/18 . . . . . the element being built-up from finned sections

1/20 . . . . the means being attachable to the element (F28F 1/22 takes precedence)

1/22 . . . . the means having portions engaging further tubular elements

1/24 . . . and extending transversely (F28F 1/38 takes precedence)

1/26 . . . . the means being integral with the element (F28F 1/32 takes precedence)

1/28 . . . . . the element being built-up from finned sections

1/30 . . . . the means being attachable to the element (F28F 1/32 takes precedence)

1/32 . . . . the means having portions engaging further tubular elements

1/34 . . . and extending obliquely (F28F 1/38 takes precedence)

1/36 . . . . the means being helically-wound fins or wire spirals

1/38 . . . and being staggered to form tortuous fluid passages

1/40 . . the means being only inside the tubular element

1/42 . . the means being both outside and inside the tubular element

1/44 . . . and being formed of wire mesh

3/00 **Plate-like or laminated elements**; **Assemblies of plate-like or laminated elements** (specially adapted for movement F28F 5/00)

3/02 . Elements or assemblies thereof with means for increasing heat-transfer area, e.g. with fins, with recesses, with corrugations (F28F 3/08 takes precedence)

3/04 . . the means being integral with the element

3/06 . . the means being attachable to the element

3/08 . Elements constructed for building-up into stacks, e.g. capable of being taken apart for cleaning

3/10 . . Arrangement for sealing the margins

3/12 . Elements constructed in the shape of a hollow panel, e.g. with channels

3/14 . . by separating portions of a pair of joined sheets to form channels, e.g. by inflation (manufacture thereof B23P)

5/00 Elements specially adapted for movement (arrangements for moving the elements, see the appropriate subclass for the apparatus concerned)

5/02 . Rotary drums or rollers

5/04 . Hollow impellers, e.g. stirring vane

5/06 . Hollow screw conveyers

7/00 Elements not covered by group F28F 1/00, F28F 3/00, or F28F 5/00

7/02 . Blocks traversed by passages for heat-exchange media

9/00 Casings; **Header boxes**; **Auxiliary supports for elements**; **Auxiliary members within casings**

9/007 . Auxiliary supports for elements **[6]**

9/013 . . for tubes or tube-assemblies **[6]**

9/02 . Header boxes; End plates

9/04 . . Arrangements for sealing elements into header boxes or end plates (joining pipes to walls in general F16L 41/00)

9/06 . . . by dismountable joints

9/08 . . . . by wedge-type connections, e.g. taper ferrule

9/10 . . . . by screw-type connections, e.g. gland

9/12 . . . . by flange-type connections

9/14 . . . . by force-joining

9/16 . . . by permanent joints, e.g. by rolling (metal-working procedures in general B21, B23, particularly B21D 39/06, B23K)

9/18 . . . . by welding

9/20 . Arrangements of heat reflectors, e.g. separately-insertible reflecting walls

9/22 . Arrangements for directing heat-exchange media into successive compartments, e.g. arrangements of guide plates

9/24 . Arrangements for promoting turbulent flow of heat-exchange media, e.g. by plates (F28F 1/38 takes precedence; in general F15D)

9/26 . Arrangements for connecting different sections of heat-exchange elements, e.g. of radiators (connecting different sections in water heaters F24H 9/14)

11/00 Arrangements for sealing leaky tubes or conduits (stopping flow from or in pipes in general F16L 55/10)

11/02 . using obturating elements, e.g. washers, inserted and operated independently of each other (F28F 11/06 takes precedence)

11/04 . using pairs of obturating elements, e.g. washers, mounted upon central operating rods (F28F 11/06 takes precedence)

11/06 . using automatic tube-obturating appliances

13/00 Arrangements for modifying heat transfer, e.g. increasing, decreasing (F28F 1/00 to F28F 11/00 take precedence)

13/02 . by influencing fluid boundary (boundary-layer control in general F15D)

13/04 . by preventing the formation of continuous films of condensate on heat-exchange surfaces, e.g. by promoting droplet formation

13/06 . by affecting the pattern of flow of the heat-exchange media

13/08 . . by varying the cross-section of the flow channels

13/10 . . by imparting a pulsating motion to the flow, e.g. by sonic vibration

13/12 . . by creating turbulence, e.g. by stirring, by increasing the force of circulation (F28F 13/08 takes precedence)

13/14 . by endowing the walls of conduits with zones of different degrees of conduction of heat

13/16 . by applying an electrostatic field to the body of the heat-exchange medium

13/18 . by applying coatings, e.g. radiation-absorbing, radiation-reflecting; by surface treatment, e.g. polishing

17/00 Removing ice or water from heat-exchange apparatus

19/00 Preventing the formation of deposits or corrosion, e.g. by using filters

19/01 . by using means for separating solid materials from heat-exchange fluids, e.g. filters **[6]**

19/02 . by using coatings, e.g. vitreous or enamel coatings

19/04 . . of rubber; of plastics material; of varnish

19/06 . . of metal

21/00 Constructions of heat-exchange apparatus characterised by the selection of particular materials

21/02 . of carbon, e.g. graphite

21/04 . of ceramic; of concrete; of natural stone

21/06 . of plastics material

21/08 . of metal

23/00 Features relating to the use of intermediate heat-exchange materials, e.g. selection of compositions

23/02 . Arrangements for obtaining or maintaining same in a liquid state

25/00 Component parts of trickle coolers (arrangements for increasing heat transfer F28F 13/00; controlling arrangements F28F 27/00)

25/02 . for distributing, circulating, or accumulating liquid (spraying or atomising in general B05B, B05D)

25/04 . . Distributing or accumulator troughs

25/06 . . Spray nozzles or spray pipes

25/08 . . Splashing boards or grids, e.g. for converting liquid sprays into liquid films; Elements or beds for increasing the area of the contact surface (packing elements in general B01J 19/30, B01J 19/32)

25/10 . for feeding gas or vapour

25/12 . . Ducts; Guide vanes, e.g. for carrying currents to distinct zones

27/00 Control arrangements or safety devices specially adapted for heat-exchange or heat-transfer apparatus

27/02 . for controlling the distribution of heat-exchange media between different channels (arrangements of guide plates or guide vanes F28F 9/22, F28F 25/12)

99/00 Subject matter not provided for in other groups of this subclass [8]

F28G CLEANING OF INTERNAL OR EXTERNAL SURFACES OF HEAT-EXCHANGE OR HEAT-TRANSFER CONDUITS, E.G. WATER TUBES OF BOILERS (cleaning pipes or tubes in general B08B 9/02; devices or arrangements for removing water, minerals, or sludge from boilers while the boiler is in operation, or which remain in position while the boiler is in operation, or are specifically adapted to boilers without any other utility F22B 37/48; removal or treatment of combustion products or combustion residues F23J; removing ice from heat-exchange apparatus F28F 17/00)

Subclass index

1/00 **Non-rotary, e.g. reciprocated, appliances** (F28G 3/00 takes precedence)

1/02 . having brushes (brushes A46B)

1/04 . having articulated tools, e.g. assembled in chain manner

1/06 . having coiled wire tools, i.e. basket type

1/08 . having scrapers, hammers, or cutters, e.g. rigidly mounted

1/10 . . resiliently mounted

1/12 . Fluid-propelled scrapers, bullets, or like solid bodies

1/14 . Pull-through rods

1/16 . using jets of fluid for removing debris (F28G 1/12 takes precedence)

3/00 **Rotary appliances**

3/02 . having abrasive tools

3/04 . having brushes (brushes A46B)

3/06 . having articulated tools, e.g. assembled in chain manner

3/08 . having coiled wire tools, i.e. basket type

3/10 . having scrapers, hammers, or cutters, e.g. rigidly mounted

3/12 . . resiliently mounted

3/14 . . thrown into working position by centrifugal force

3/16 . using jets of fluid for removing debris

5/00 **Cleaning by distortion** (by vibration F28G 7/00)

7/00 **Cleaning by vibration**

9/00 **Cleaning by flushing or washing, e.g. with chemical solvents** (appliances using jets of fluid for removing debris F28G 1/16, F28G 3/16)

11/00 **Cleaning by combustion processes, e.g. using squibs, using travelling burners**

13/00 **Appliances or processes not covered by groups F28G 1/00 to F28G 11/00**; **Combinations of appliances or processes covered by groups F28G 1/00 to F28G 11/00**

15/00 **Details** (measuring thickness of deposit G01B)

15/02 . Supports for cleaning appliances, e.g. frames

15/04 . Feeding or driving arrangements, e.g. power operation

15/06 . . Automatic reversing devices

15/08 . Locating position of cleaning appliances within conduits

15/10 . Masks for delimiting area to be cleaned

WEAPONS; BLASTING

F41 WEAPONS

(1) This class covers also means for practice and training which may have aspects of simulation, e.g. in apparatus for so-called “military games”, although simulators are generally covered by class G09. **[4]**

(2) In this class, the following terms or expressions are used with the meanings indicated:
- “smallarm” means a firearm which is generally held with one or both hands for firing, but this term also includes a light machine-gun which may be supported on a tripod or the like during firing; **[5]**
- “gun” means any weapon having a barrel and a trigger or firing mechanism for projecting a missile; it may be a piece of ordnance or a smallarm. It may use combustible or explosive propellant charges, air pressure, electromagnetism or other propulsive forces; **[5]**
- “revolver-type gun” means a gun having a revolving drum magazine, the chambers of which are used successively as firing chamber; **[5]**
- “revolver” means a revolver-type pistol; **[5]**
- “semi-automatic firearm” means a firearm from which one shot is fired after actuation of the trigger and which then returns to a condition for firing a subsequent shot upon renewed actuation of the trigger;
- “automatic firearm” means a firearm which will continue firing so long as the initial firing pressure is maintained on the trigger;
- “sighting” means bringing into visual coincidence a direction defined by a so-called “sighting” device with the direction of a target;
- “aiming” means bringing a weapon to a direction differing from the sighting direction by corrections in order that the projectile may hit the target;
- “laying” means setting a weapon in the correct position for hitting a target.

(3) Attention is drawn to the definitions of “projectile”, “missile” and “rocket” given in Note (2) following the title of class F42. **[4]**

F41A FUNCTIONAL FEATURES OR DETAILS COMMON TO BOTH SMALLARMS AND ORDNANCE, E.G. CANNONS; MOUNTINGS FOR SMALLARMS OR ORDNANCE [5]

(1) This subclass covers those features or details which are considered to be of a kind generally applicable to, or to be concerned with intrinsic functions common to, both smallarms and ordnance. **[5]**

(2) Such features or details are classified in this subclass, even if they are stated to be applied only to smallarms or only to ordnance. **[5]**

(3) Attention is drawn to the definitions given in Note (2) following the title of class F41. **[5]**

Subclass index

1/00 **Missile propulsion characterised by the use of explosive or combustible propellant charges** (projecting missiles without use of explosive or combustible propellant charge F41B; launching rockets or torpedoes F41F 3/00; missile self-propulsion F42B 15/00) **[5]**

1/02 . Hypervelocity missile propulsion using successive means for increasing the propulsive force, e.g. using successively initiated propellant charges arranged along the barrel length; Multistage missile propulsion **[5]**

1/04 . Missile propulsion using the combustion of a liquid or gaseous fuel, e.g. hypergolic fuel **[5]**

1/06 . Adjusting the range without varying elevation angle or propellant charge data, e.g. by venting a part of the propulsive charge gases, or by adjusting the capacity of the cartridge or combustion chamber **[5]**

1/08 . Recoilless guns, i.e. guns having propulsion means producing no recoil **[5]**

1/10 . . a counter projectile being used to balance recoil **[5]**

3/00 **Breech mechanism, e.g. locks [5]**

3/02 . Block action, i.e. the main breech opening movement being transverse to the barrel axis **[5]**

3/04 . . with pivoting breech-block **[5]**

3/06 . . . about a horizontal axis transverse to the barrel axis at the rear of the block (F41A 3/08 takes precedence) **[5]**

3/08 . . . carrying a rotably mounted obturating plug of the screw-thread or the interrupted-thread type (F41A 3/30 takes precedence) **[5]**

3/10 . . with sliding breech-block, e.g. vertically **[5]**

3/12 . Bolt action, i.e. the main breech opening movement being parallel to the barrel axis **[5]**

3/14 . . Rigid bolt locks, i.e. having locking elements rigidly mounted on the bolt or bolt handle and on the barrel or breech-housing respectively **[5]**

3/16 . . . the locking elements effecting a rotary movement about the barrel axis, e.g. rotating cylinder bolt locks **[5]**

3/18 . . . . hand-operated **[5]**

3/20 . . . . . Straight-pull operated bolt locks, i.e. the operating hand effecting only a straight movement parallel to the barrel axis **[5]**

3/22 . . . . . the locking being effected by rotating the operating handle or lever transversely to the barrel axis **[5]**

3/24 . . . . . the locking elements forming part of the operating handle or lever **[5]**

3/26 . . . . semi-automatically or automatically operated, e.g. having a slidable bolt-carrier and a rotatable bolt **[5]**

3/28 . . . . . having fixed locking elements on the non-rotating bolt and rotating locking elements mounted on the barrel or breech housing, e.g. rotatable rings **[5]**

3/30 . . . . Interlocking means, e.g. locking lugs, screw threads **[5]**

3/32 . . . the bolt being rocked about a notional axis transverse to the barrel axis **[5]**

3/34 . . . the bolt additionally effecting a sliding movement transverse to the barrel axis **[5]**

3/36 . . Semi-rigid bolt locks, i.e. having locking elements movably mounted on the bolt or on the barrrel or breech housing **[5]**

3/38 . . . having rocking locking elements, e.g. pivoting levers or vanes **[5]**

3/40 . . . . mounted on the bolt (F41A 3/42 takes precedence) **[5]**

3/42 . . . . hand-operated **[5]**

3/44 . . . having sliding locking elements, e.g. balls, rollers **[5]**

3/46 . . . . mounted on the bolt (F41A 3/48 takes precedence) **[5]**

3/48 . . . . hand-operated **[5]**

3/50 . . . Toggle-joint locks, e.g. crank-operated **[5]**

3/52 . . . . hand-operated **[5]**

3/54 . . Bolt locks of the unlocked type, i.e. being inertia operated **[5]**

3/56 . . . the bolt being provided with an additional slidable mass **[5]**

3/58 . Breakdown breech mechanisms, e.g. for shotguns **[5]**

3/60 . Breech mechanisms for guns having two or more barrels (F41A 3/58 takes precedence; for revolving-cannon guns F41F 1/10) **[5]**

3/62 . using combustion gas pressure for adding to the mechanical locking action, or for delaying breech opening movement **[5]**

3/64 . Mounting of breech-blocks; Accessories for breech-blocks or breech-block mountings **[5]**

3/66 . . Breech housings or frames; Receivers **[5]**

3/68 . . Bolt stops, i.e. means for limiting bolt opening movement **[5]**

3/70 . . Anti-rebound arrangements, i.e. preventing rebound of the bolt out of the firing position **[5]**

3/72 . . Operating handles or levers; Mounting thereof in breech-blocks or bolts **[5]**

3/74 . . Obturating or packing devices for gas leak prevention in breech mechanisms **[5]**

3/76 . . . specially adapted for sealing the gap between the forward end of the cartridge chamber and the rearward end of the barrel, e.g. sealing devices for revolvers or revolver-type guns **[5]**

3/78 . . Bolt buffer or recuperator means **[5]**

3/80 . . . Adjustable spring buffers **[5]**

3/82 . . . Coil spring buffers (F41A 3/80 takes precedence) **[5]**

3/84 . . . . mounted within the gun stock **[5]**

3/86 . . . . mounted under the barrel **[5]**

3/88 . . . . mounted around the barrel **[5]**

3/90 . . . Fluid buffers **[5]**

3/92 . . . . adjustable **[5]**

3/94 . . . . in combination with spring buffers **[5]**

5/00 **Mechanisms or systems operated by propellant charge energy for automatically opening the lock [5]**

5/02 . recoil-operated **[5]**

5/04 . . the barrel being tilted during recoil **[5]**

5/06 . . the barrel being rotated about its longitudinal axis during recoil **[5]**

5/08 . . having an accelerator lever acting on the breech-block or bolt during the opening movement **[5]**

5/10 . . having a movable inertia weight **[5]**

5/12 . . . mounted in a gun having a fixed barrel **[5]**

5/14 . . Barrel stops, i.e. devices for holding the recoiling barrel in a predetermined position, e.g. the recoil position **[5]**

5/16 . . having a barrel moving forwardly after the firing of a shot **[5]**

5/18 . gas-operated **[5]**

5/20 . . using a gas piston arranged concentrically around the barrel **[5]**

5/22 . . having two or more gas pistons **[5]**

5/24 . . by direct action of gas pressure on bolt or locking elements **[5]**

5/26 . . Arrangements or systems for bleeding the gas from the barrel (F41A 5/20 to F41A 5/24 take precedence) **[5]**

5/28 . . . Adjustable systems **[5]**

5/30 . Gas- or recoil-operation, e.g. selection of gas- or recoil-operated systems **[5]**

5/32 . Energy accumulator systems, i.e. systems for opening the breech-block by energy accumulated during barrel or gas piston recoil **[5]**

5/34 . . with spring accumulators **[5]**

5/36 . . with fluid accumulators **[5]**

7/00 Auxiliary mechanisms for bringing the breech-block or bolt or the barrel to the starting position before automatic firing (operating handles or levers F41A 3/00); **Drives for externally-powered guns** (revolving-cannon guns F41F 1/00); **Remote-controlled gun chargers [5]**

7/02 . Machine-gun rechargers, e.g. manually operated **[5]**

7/04 . . fluid operated **[5]**

7/06 . . electrically operated **[5]**

7/08 . Drives for externally-powered guns, i.e. drives for moving the breech-block or bolt by an external force during automatic firing **[5]**

7/10 . . using a rotating cylindrical drum having a camming groove **[5]**

9/00 Feeding or loading of ammunition (adaptations for feeding or loading missiles from magazines in air guns F41B 11/02); **Magazines**; **Guiding means for the extracting of cartridges** (cartridge extractors or ejectors F41A 15/00) **[5]**

9/01 . Feeding of unbelted ammunition **[5]**

9/02 . . using wheel conveyers, e.g. star-wheel-shaped conveyers **[5]**

9/03 . . using screw or rotary-spiral conveyers **[5]**

9/04 . . using endless-chain belts carrying a plurality of ammunition **[5]**

9/05 . . . in tandem sequence **[5]**

9/06 . . using cyclically moving conveyers, i.e. conveyers having ammunition pusher or carrier elements which are emptied or disengaged from the ammunition during the return stroke **[5]**

9/07 . . . Reciprocating conveyers, i.e. conveyers pushing a plurality of ammunition during the feeding stroke **[5]**

9/09 . . . Movable ammunition carriers or loading trays, e.g. for feeding from magazines **[5]**

9/10 . . . . pivoting or swinging **[5]**

9/11 . . . . . in a horizontal plane **[5]**

9/12 . . . . . mounted within a smallarm **[5]**

9/13 . . . . . in a vertical plane **[5]**

9/14 . . . . . transverse to the barrel axis **[5]**

9/15 . . . . . mounted within a smallarm **[5]**

9/16 . . . . . parallel to the barrel axis **[5]**

9/17 . . . . . mounted within a smallarm **[5]**

9/18 . . . . . feeding from a magazine under the barrel **[5]**

9/19 . . . . . feeding from a magazine mounted in the stock **[5]**

9/20 . . . . sliding, e.g. reciprocating **[5]**

9/21 . . . . . in a vertical direction (F41A 9/23 takes precedence) **[5]**

9/22 . . . . . in a horizontal direction (F41A 9/23 takes precedence) **[5]**

9/23 . . . . . mounted within a smallarm **[5]**

9/24 . . using a movable magazine or clip as feeding element **[5]**

9/25 . . . using a sliding clip **[5]**

9/26 . . . using a revolving drum magazine **[5]**

9/27 . . . . in revolver-type guns **[5]**

9/28 . . . . . of smallarm type (in revolvers F41C 3/14) **[5]**

9/29 . Feeding of belted ammunition **[5]**

9/30 . . Sprocket-type belt transporters **[5]**

9/31 . . . with cartridge stripping means **[5]**

9/32 . . Reciprocating-slide-type belt transporters **[5]**

9/33 . . . with cartridge stripping means **[5]**

9/34 . . from magazines (magazines for belted ammunition per se F41A 9/79) **[5]**

9/35 . Feeding multibarrel guns **[5]**

Note

Feeding elements or concepts of general interest, not specially adapted for feeding multibarrel guns, are classified in groups F41A 9/01 or F41A 9/29. **[5]**

9/36 . . Feed mechanisms for revolving-cannon guns **[5]**

9/37 . Feeding two or more kinds of ammunition to the same gun; Feeding from two sides **[5]**

Note

Feeding elements or concepts of general interest, not specially adapted for feeding two or more kinds of ammunition or from two sides, are classified in groups F41A 9/01 or F41A 9/29. **[5]**

9/38 . Loading arrangements, i.e. for bringing the ammunition into the firing position **[5]**

9/39 . . Ramming arrangements **[5]**

9/40 . . . the breech-block itself being the rammer **[5]**

9/41 . . . . pushing unbelted ammunition from a box magazine on the gun frame into the cartridge chamber **[5]**

9/42 . . . Rammers separate from breech-block **[5]**

9/43 . . . . Chain rammers **[5]**

9/44 . . . . Fluid-operated piston rammers **[5]**

9/45 . . the cartridge chamber or the barrel as a whole being tiltable between a loading and a firing position **[5]**

9/46 . . the cartridge chamber being formed by two complementary elements, movable one relative to the other for loading **[5]**

9/47 . . using forwardly-sliding barrels or barrel parts for loading **[5]**

9/48 . . by gravitational force **[5]**

9/49 . Internally-powered drives, i.e. operated by propellant charge energy, e.g. couplings, clutches, energy accumulators **[5]**

9/50 . External power or control systems **[5]**

9/51 . . Boosters, i.e. externally-powered motors **[5]**

9/52 . Arrangements for changing from automatic or magazine-loading to hand-loading **[5]**

9/53 . Charged-condition indicators, i.e. indicating the presence of a cartridge in the cartridge chamber **[5]**

9/54 . Cartridge guides, stops or positioners, e.g. for cartridge extraction **[5]**

9/55 . . Fixed guiding means, mounted on, or near, the cartridge chamber **[5]**

9/56 . . Movable guiding means **[5]**

9/57 . . . Flexible chutes, e.g. for guiding belted ammunition from the magazine to the gun **[5]**
9/58 . . Cartridge stops; Cartridge positioners **[5]**
9/59 . Ejectors for clips or magazines, e.g. when empty **[5]**
9/60 . Empty-cartridge-case or belt-link collectors or catchers (F41A 9/81 takes precedence) **[5]**
9/61 . Magazines **[5]**
9/62 . . having means for indicating the number of cartridges left in the magazine, e.g. last-round indicators (last-round safeties F41A 17/40) **[5]**
9/63 . . specially adapted for releasable connection with other magazines **[5]**
9/64 . . for unbelted ammunition **[5]**
9/65 . . . Box magazines having a cartridge follower **[5]**
9/66 . . . . Arrangements thereon for charging, i.e. reloading (apparatus or tools for reloading magazines F41A 9/83) **[5]**
9/67 . . . . . having means for depressing the cartridge follower, or for locking it in a depressed position **[5]**
9/68 . . . . Plural magazines, e.g. tandem magazines **[5]**
9/69 . . . . characterised by multiple-row or zigzag arrangement of cartridges **[5]**
9/70 . . . . Arrangements thereon for discharging, e.g. cartridge followers or discharge throats **[5]**
9/71 . . . . Arrangements thereon for varying capacity; Adapters or inserts for changing cartridge size or type **[5]**
9/72 . . . Tubular magazines, i.e. magazines containing the ammunition in lengthwise tandem sequence **[5]**
9/73 . . . Drum magazines **[5]**
9/74 . . . . with radially disposed cartridges **[5]**
9/75 . . . . having a spiral cartridge channel **[5]**
9/76 . . . Magazines having an endless-chain conveyer **[5]**
9/77 . . . Magazines having a screw conveyer **[5]**
9/78 . . . Magazines having a reciprocating conveyer **[5]**
9/79 . . for belted ammunition **[5]**
9/80 . . . having provision for quick-coupling of the belts of adjacent magazines **[5]**
9/81 . . . having provision for collecting belt links or empty cartridge cases **[5]**
9/82 . Reloading of magazines **[5]**
9/83 . . Apparatus or tools for reloading magazines with unbelted ammunition, e.g. cartridge clips **[5]**
9/84 . . . Clips **[5]**
9/85 . . . . for reloading revolver-type magazines **[5]**
9/86 . . Feeding belted ammunition into magazines **[5]**
9/87 . Ammunition handling dollies or transfer carts (F41A 9/86 takes precedence) **[5]**

11/00 **Assembly or disassembly features**; **Modular concepts**; **Articulated or collapsible guns** (F41A 3/64, F41A 19/10 to F41A 19/15, F41A 21/48, F41A 25/26 take precedence) **[5]**
11/02 . Modular concepts, e.g. weapon-family concepts **[5]**
11/04 . Articulated or collapsible guns, i.e. with hinged or telescopic parts for transport or storage (breakdown shotguns or rifles F41C 7/11; folding or telescopic stocks or stock parts F41C 23/04) **[5]**
11/06 . . Telescopic guns **[5]**

13/00 **Cooling or heating systems** (barrels or gun tubes with fins or ribs F41A 21/00); **Blowing-through of gun barrels**; **Ventilating systems** **[5]**
13/02 . Heating systems **[5]**
13/04 . Injecting fluids into barrels or cartridge chambers (F41A 13/08 takes precedence) **[5]**
13/06 . Evacuating combustion gas from barrels (F41A 13/10 takes precedence) **[5]**
13/08 . . Bore evacuators, i.e. chambers disposed around barrels for storing part of the combustion gas and subsequently injecting it into the barrel to provide suction **[5]**
13/10 . Blowers or turbines for evacuating or cooling guns, e.g. driven by combustion gas pressure or recoil **[5]**
13/12 . Systems for cooling the outer surface of the barrel (F41A 13/10 takes precedence) **[5]**

15/00 **Cartridge extractors, i.e. devices for pulling cartridges or cartridge cases at least partially out of the cartridge chamber**; **Cartridge ejectors, i.e. devices for throwing the extracted cartridges or cartridge cases free of the gun** (F41A 9/54 takes precedence) **[5]**
15/02 . for revolver-type guns, e.g. revolvers **[5]**
15/04 . specially adapted for cartridge cases being deformed when fired, e.g. of plastics **[5]**
15/06 . for breakdown guns **[5]**
15/08 . for block-action guns **[5]**
15/10 . . of sliding-block type **[5]**
15/12 . for bolt-action guns **[5]**
15/14 . . the ejector being mounted on, or within, the bolt **[5]**
15/16 . . the ejector being mounted on the breech housing or frame **[5]**
15/18 . for guns with forwardly slidable barrels **[5]**
15/20 . specially adapted for caseless-ammunition duds **[5]**
15/22 . Tools for extracting cartridges **[5]**

17/00 **Safety arrangements, e.g. safeties** **[5]**
17/02 . Key-operated safeties **[5]**
17/04 . Safeties of the combination-lock type (F41A 17/02 takes precedence) **[5]**
17/06 . Electric or electromechanical safeties (F41A 17/04, F41A 17/08 take precedence) **[5]**
17/08 . for inhibiting firing in a specified direction, e.g. at a friendly person or at a protected area (F41A 27/02 takes precedence) **[5]**
17/10 . . Firing mechanisms with elevation stop **[5]**
17/12 . . Firing mechanisms with anti-canting safety **[5]**
17/14 . Double-loading prevention **[5]**
17/16 . Cook-off prevention, i.e. prevention of spontaneous firing of a cartridge by chamber wall heat **[5]**
17/18 . Hang-fire prevention **[5]**
17/20 . Grip or stock safeties, i.e. safeties disengaged by clasping the grip or stock (thumb-operated sliding safeties F41A 17/52, F41A 17/62, F41A 17/70, F41A 17/80) **[5]**
17/22 . . acting on the trigger **[5]**
17/24 . . acting on the firing pin **[5]**
17/26 . . acting on the hammer **[5]**
17/28 . . acting on the sear **[5]**
17/30 . Multiple safeties, i.e. safeties acting on at least one element of the firing mechanism and at least one other element of the gun, e.g. the moving barrel **[5]**
17/32 . . the other element being the breech-block or bolt **[5]**
17/34 . Magazine safeties **[5]**

17/36 . . locking the gun in a safety condition when the magazine is empty or removed **[5]**
17/38 . . locking the magazine in the gun **[5]**
17/40 . Last-round safeties (F41A 17/34 takes precedence) **[5]**
17/42 . Safeties for locking the breech-block or bolt in a safety position (F41A 17/32, F41A 17/36, F41A 17/40 take precedence) **[5]**
17/44 . Safety plugs, e.g. for plugging-up cartridge chambers **[5]**
17/46 . Trigger safeties, i.e. means for preventing trigger movement (F41A 17/02 to F41A 17/40 take precedence) **[5]**
17/48 . . Automatically operated trigger safeties, i.e. operated by breech opening or closing movement **[5]**
17/50 . . . by breakdown action **[5]**
17/52 . . Thumb-operated sliding safeties mounted on the upside of the stock, e.g. for shotguns **[5]**
17/54 . . Protecting-caps for trigger guards; Trigger locking pieces mounted on, or within, the trigger guard **[5]**
17/56 . Sear safeties, i.e. means for rendering ineffective an intermediate lever transmitting trigger movement to firing pin, hammer, bolt or sear (F41A 17/02 to F41A 17/40 take precedence) **[5]**
17/58 . . automatically operated, i.e. operated by breech opening or closing movement **[5]**
17/60 . . . by breakdown action **[5]**
17/62 . . Thumb-operated sliding safeties mounted on the upside of the stock, e.g. for shotguns **[5]**
17/64 . Firing-pin safeties, i.e. means for preventing movement of slidably-mounted strikers (F41A 17/02 to F41A 17/40 take precedence) **[5]**
17/66 . . automatically operated, i.e. operated by breech opening or closing movement **[5]**
17/68 . . . by breakdown action **[5]**
17/70 . . Thumb-operated sliding safeties mounted on the upside of the stock, e.g. for shotguns **[5]**
17/72 . . trigger-operated, i.e. the movement of the trigger bringing a firing-pin safety into inoperative position during the firing **[5]**
17/74 . Hammer safeties, i.e. for preventing the hammer from hitting the cartridge or the firing pin (F41A 17/02 to F41A 17/40 take precedence) **[5]**
17/76 . . automatically operated, i.e. operated by breech opening or closing movement **[5]**
17/78 . . . by breakdown action **[5]**
17/80 . . Thumb-operated sliding safeties mounted on the upside of the stock, e.g. for shotguns **[5]**
17/82 . . trigger-operated, i.e. the movement of the trigger bringing a hammer safety into inoperative position during firing **[5]**

19/00 Firing or trigger mechanisms; Cocking mechanisms [5]

19/01 . Counting means indicating the number of shots fired **[5]**
19/02 . . Burst limiters (F41A 19/67 takes precedence) **[5]**
19/03 . Shot-velocity control (F41A 3/78, F41A 5/28, F41A 19/05, F41A 19/66 take precedence) **[5]**
19/04 . . by regulating the time of release of the firing pin or hammer **[5]**
19/05 . Synchronising for firing through the propeller of an aircraft **[5]**
19/06 . Mechanical firing mechanisms (F41A 19/01 to F41A 19/05, F41A 19/59 take precedence) **[5]**
19/07 . . press-button actuated, e.g. with thumb rest **[5]**
19/08 . . remote actuated; lanyard actuated **[5]**
19/09 . . Auxiliary trigger devices (F41A 19/08 takes precedence) **[5]**
19/10 . . Triggers; Trigger mountings **[5]**
19/11 . . Trigger guards; Trigger-guard mountings (F41A 19/15 takes precedence) **[5]**
19/12 . . Sears; Sear mountings **[5]**
19/13 . . Percussion or firing pins, i.e. fixed or slidably-mounted striker elements; Mountings therefor **[5]**
19/14 . . Hammers, i.e. pivotably-mounted striker elements; Hammer mountings **[5]**
19/15 . . Modular firing mechanism units **[5]**
19/16 . . Adjustable firing mechanisms; Trigger mechanisms with adjustable trigger pull (F41A 19/17 takes precedence) **[5]**
19/17 . . Hair-trigger mechanisms **[5]**
19/18 . . for multibarrel guns (F41A 19/68 takes precedence) **[5]**
19/19 . . . with single-trigger firing possibility **[5]**
19/20 . . . . Double-trigger arrangements having the possibility of single-trigger actuation **[5]**
19/21 . . . . having only one trigger **[5]**
19/22 . . . . . and only one striker element **[5]**
19/23 . . . . . rotatable about an axis parallel to the barrel axis for firing subsequent barrels **[5]**
19/24 . . Release-trigger mechanisms, i.e. the striker element being released during the return movement of the trigger subsequent to trigger pull **[5]**
19/25 . . having only slidably-mounted striker elements, i.e. percussion or firing pins **[5]**
19/26 . . . the percussion or firing pin and the breech-block or bolt forming one piece **[5]**
19/27 . . . the percussion or firing pin being movable relative to the breech-block **[5]**
19/28 . . . . propelled by a cam or lever when the breech-block or bolt arrives at a closing position **[5]**
19/29 . . . . propelled by a spring under tension **[5]**
19/30 . . . . . in bolt-action guns **[5]**
19/31 . . . . . Sear arrangements therefor (F41A 19/33 takes precedence) **[5]**
19/32 . . . . . for catching the percussion or firing pin after each shot, i.e. in single-shot or semi-automatic firing mode **[5]**
19/33 . . . . . Arrangements for the selection of automatic or semi-automatic fire **[5]**
19/34 . . . . . Cocking mechanisms **[5]**
19/35 . . . . . Double-action mechanisms, i.e. the cocking being effected during the first part of the trigger pull movement **[5]**
19/36 . . . . . in block-action guns **[5]**
19/37 . . . . . Cocking mechanisms **[5]**
19/38 . . . . . Double-action mechanisms, i.e. the cocking being effected during the first part of the trigger pull movement **[5]**
19/39 . . . . . Cocking mechanisms for other types of guns, e.g. fixed breech-block types, forwardly-slidable barrel types **[5]**
19/40 . . . . . Double-action mechanisms, i.e. the cocking being effected during the first part of the trigger pull movement **[5]**
19/41 . . . . . for breakdown guns **[5]**

19/42 . . having at least one hammer **[5]**
19/43 . . . in bolt-action guns **[5]**
19/44 . . . . Sear arrangements therefor (F41A 19/46 takes precedence) **[5]**
19/45 . . . . . for catching the hammer after each shot, i.e. in single-shot or semi- automatic firing mode **[5]**
19/46 . . . . Arrangements for the selection of automatic or semi-automatic fire **[5]**
19/47 . . . . Cocking mechanisms **[5]**
19/48 . . . . . Double-action mechanisms, i.e. the cocking being effected during the first part of the trigger pull movement **[5]**
19/49 . . . in block-action guns **[5]**
19/50 . . . . Cocking mechanisms **[5]**
19/51 . . . . . Double-action mechanisms, i.e. the cocking being effected during the first part of the trigger pull movement **[5]**
19/52 . . . Cocking mechanisms for other types of guns, e.g. fixed breech-block types, revolvers **[5]**
19/53 . . . . Double-action mechanisms, i.e. the cocking being effected during the first part of the trigger pull movement **[5]**
19/54 . . . . for breakdown guns **[5]**
19/55 . Fluid-operated firing mechanisms **[5]**
19/56 . . Ignition of the propellant charge by contact with air heated by adiabatic compression **[5]**
19/57 . Firing mechanisms operating with primer cartridge **[5]**
19/58 . Electric firing mechanisms (F41A 17/10, F41A 17/12 take precedence) **[5]**
19/59 . . Electromechanical firing mechanisms, i.e. the mechanical striker element being propelled or released by electric means **[5]**
19/60 . . characterised by the means for generating electric energy **[5]**
19/61 . . . Inductive generators **[5]**
19/62 . . . Piezo-electric generators **[5]**
19/63 . . having means for contactless transmission of electric energy, e.g. by induction, by sparking gap **[5]**
19/64 . . for automatic or burst-firing mode **[5]**
19/65 . . . for giving ripple fire, i.e. using electric sequencer switches for timed multiple-charge launching, e.g. for rocket launchers **[5]**
19/66 . . . Electronic shot-velocity control (F41A 19/65 takes precedence) **[5]**
19/67 . . . Burst limiters **[5]**
19/68 . . for multibarrel guns (F41A 19/65 takes precedence) **[5]**
19/69 . . Electric contacts or switches peculiar thereto (F41A 19/65 takes precedence) **[5]**
19/70 . . . Electric firing pins; Mountings therefor **[5]**

21/00 **Barrels**; **Gun tubes**; **Muzzle attachments**; **Barrel mounting means** (F41A 25/00 takes precedence; barrel attachments for firing grenades or riot-control ammunition from smallarms F41C 27/06; sighting devices F41G 1/00) **[5]**

21/02 . Composite barrels, i.e. barrels having multiple layers, e.g. of different materials **[5]**
21/04 . . Barrel liners **[5]**
21/06 . Plural barrels **[5]**
21/08 . . Barrel junctions **[5]**
21/10 . Insert barrels, i.e. barrels for firing reduced calibre ammunition and being mounted within the normal barrels **[5]**
21/12 . Cartridge chambers; Chamber liners (F41A 3/74, F41A 9/46, F41A 21/04 take precedence) **[5]**
21/14 . . Arrangement of cartridge chambers lateral to the barrel axis **[5]**
21/16 . Barrels or gun tubes characterised by the shape of the bore **[5]**
21/18 . . Grooves; Rifling **[5]**
21/20 . Barrels or gun tubes characterised by the material (F41A 21/02 takes precedence) **[5]**
21/22 . Barrels which have undergone surface treatment, e.g. phosphating **[5]**
21/24 . Barrels or gun tubes with fins or ribs, e.g. for cooling **[5]**
21/26 . specially adapted for recoil reinforcement, e.g. for training purposes **[5]**
21/28 . Gas-expansion chambers; Barrels provided with gas-relieving ports (F41A 1/06, F41A 13/08 take precedence) **[5]**
21/30 . Silencers **[5]**
21/32 . Muzzle attachments or glands (F41A 21/26, F41A 21/30, F41A 21/46 take precedence) **[5]**
21/34 . . Flash dampers **[5]**
21/36 . . for recoil reduction (recoil reduction arrangements in general F41A 25/00) **[5]**
21/38 . . . adjustable **[5]**
21/40 . . Chokes for shotguns **[5]**
21/42 . . . adjustable **[5]**
21/44 . Insulation jackets; Protective jackets **[5]**
21/46 . Barrels having means for separating sabots from projectiles **[5]**
21/48 . Barrel mounting means, e.g. releasable mountings for replaceable barrels **[5]**

23/00 **Gun mountings, e.g. on vehicles**; **Disposition of guns on vehicles** (F41A 25/00, F41A 27/00 take precedence) **[5]**

23/02 . Mountings without wheels **[5]**
23/04 . . Unipods **[5]**
23/06 . . . adjustable **[5]**
23/08 . . Bipods **[5]**
23/10 . . . adjustable **[5]**
23/12 . . Tripods **[5]**
23/14 . . . adjustable **[5]**
23/16 . . Testing mounts **[5]**
23/18 . . Rests for supporting smallarms in non-shooting position (racks for storage A47B 81/00; racks in vehicles B60R 11/00) **[5]**
23/20 . for disappearing guns **[5]**
23/22 . . on board of submarines **[5]**
23/24 . Turret gun mountings (feeding, loading or guiding ammunition F41A 9/00; mechanical elevating or traversing systems for turret guns F41A 27/18) **[5]**
23/26 . Mountings for transport only; Loading or unloading arrangements for guns for use with carrier vehicles (F41A 23/50 takes precedence) **[5]**
23/28 . Wheeled-gun mountings; Endless-track gun mountings **[5]**
23/30 . . the wheels being liftable from the ground for firing **[5]**
23/32 . . with split trails (F41A 23/30, F41A 23/46 take precedence) **[5]**
23/34 . on wheeled or endless-track vehicles **[5]**
23/36 . . on trailers (F41A 23/42 takes precedence) **[5]**
23/38 . . on motorcycles **[5]**
23/40 . . on rail vehicles **[5]**
23/42 . . for rocket throwers **[5]**

23/44 . on sledges **[5]**
23/46 . Trail spades **[5]**
23/48 . . elastic **[5]**
23/50 . Travelling locks; Brakes for holding the gun platform in a fixed position during transport **[5]**
23/52 . Base plates for gun mountings **[5]**
23/54 . . for mortars **[5]**
23/56 . Arrangements for adjusting the gun platform in the vertical or horizontal position (F41A 17/10, F41A 17/12 take precedence) **[5]**
23/58 . . Hydraulic jacks **[5]**
23/60 . . Screw-operated jacks **[5]**

25/00 Gun mountings permitting recoil or return to battery, e.g. gun cradles; **Barrel buffers or brakes** (recoilless guns F41A 1/08) **[5]**
25/02 . Fluid-operated systems **[5]**
25/04 . . adjustable **[5]**
25/06 . Friction-operated systems **[5]**
25/08 . . adjustable **[5]**
25/10 . Spring-operated systems **[5]**
25/12 . . using coil springs **[5]**
25/14 . . . adjustable **[5]**
25/16 . Hybrid systems **[5]**
25/18 . . Hydroelastic systems **[5]**
25/20 . . Hydropneumatic systems **[5]**
25/22 . Bearing arrangements for the reciprocating gun-mount or barrel movement **[5]**
25/24 . . using ball or roller bearings **[5]**
25/26 . Assembling or dismounting recoil elements or systems **[5]**

27/00 Gun mountings permitting traversing or elevating movement, e.g. gun carriages [5]
27/02 . Control systems for preventing interference between the moving gun and the adjacent structure **[5]**
27/04 . Scatter-fire arrangements, i.e. means for oscillating guns automatically during firing **[5]**
27/06 . Mechanical systems (F41A 27/02, F41A 27/04, F41A 27/30 take precedence) **[5]**
27/08 . . Bearings, e.g. trunnions; Brakes or blocking arrangements **[5]**
27/10 . . . Bearings for supporting a pivoting gun in a wall, e.g. a turret wall **[5]**
27/12 . . . Brakes or locks for blocking traversing or elevating gear in a fixed position **[5]**
27/14 . . . Central-pivot bearings **[5]**
27/16 . . . using raceway bearings, e.g. for supporting the turret **[5]**
27/18 . . for gun turrets (F41A 27/08 takes precedence) **[5]**
27/20 . . . Drives for turret movements **[5]**
27/22 . . Traversing gear (F41A 27/18 takes precedence) **[5]**
27/24 . . Elevating gear (F41A 27/18 takes precedence) **[5]**
27/26 . Fluid-operated systems (F41A 27/02, F41A 27/04, F41A 27/30 take precedence) **[5]**
27/28 . Electrically-operated systems (F41A 27/02, F41A 27/04, F41A 27/30 take precedence) **[5]**
27/30 . Stabilisation or compensation systems, e.g. compensating for barrel weight or wind force **[5]**

29/00 Cleaning or lubricating arrangements (injecting fluids into barrels or cartridge chambers F41A 13/04) **[5]**
29/02 . Scrapers or cleaning rods **[5]**
29/04 . Lubricating, oiling or greasing means, e.g. operating during use **[5]**

31/00 Testing arrangements (testing mounts F41A 23/16) **[5]**
31/02 . for checking gun barrels **[5]**

33/00 Adaptations for training (adaptations of barrels for recoil reinforcement F41A 21/26); **Gun simulators** (teaching or practice apparatus for gun-aiming or gun-laying F41G 3/26) **[5]**
33/02 . Light- or radiation-emitting guns **[5]**
33/04 . Acoustical simulation of gun fire, e.g. by pyrotechnic means **[5]**
33/06 . Recoil simulators **[5]**

35/00 Accessories or details not otherwise provided for [5]
35/02 . Dust- or weather-protection caps or covers (protecting-caps for trigger guards F41A 17/54) **[5]**
35/04 . . Muzzle covers **[5]**
35/06 . Adaptation of guns to both right and left hand use **[5]**

99/00 Subject matter not provided for in other groups of this subclass [8]

F41B WEAPONS FOR PROJECTING MISSILES WITHOUT USE OF EXPLOSIVE OR COMBUSTIBLE PROPELLANT CHARGE; **WEAPONS NOT OTHERWISE PROVIDED FOR** (projectiles for fishing, e.g. fish-spears, A01K 81/00; sports implements for throwing A63B 65/00, e.g. boomerangs A63B 65/08; stationary apparatus for projecting sports balls, e.g. tennis balls, A63B 69/40; throwing or slinging toys A63H 33/18, knives, axes B26B; projectiles or missiles other than those incorporating springs as projecting means F42B 6/00)

Subclass index

1/00 Blow guns, i.e. tubes for impelling projectiles, e.g. peas or darts, by the force of the breath (pop guns A63H)

3/00 Sling weapons (throwing-apparatus for clay-pigeon or clay-disc targets F41J 9/18)
3/02 . Catapults, e.g. slingshots **[3]**

3/03 . . Catapults having a pivotable launcher arm **[5]**
3/04 . Centrifugal sling apparatus **[3]**

4/00 **Friction-wheel operated launchers [5]**

5/00 **Bows**; **Crossbows**
5/06 . Quivers **[3]**
5/10 . Compound bows **[5]**
5/12 . Crossbows **[5]**
5/14 . Details of bows; Accessories for arc shooting (sighting devices for bows F41G 1/467) **[5]**
5/16 . . Archer's finger tabs (sporting arm or hand protectors in general A41D 13/08) **[5]**
5/18 . . Bow-string drawing or releasing devices (F41B 5/16 takes precedence) **[5]**
5/20 . . Bow stabilisers or vibration dampers **[5]**
5/22 . . Arrow rests or guides **[5]**

6/00 **Electromagnetic launchers [5]**

7/00 **Spring guns** (catapults F41B 3/02)
7/02 . the spring forming part of the missile or projectile
7/04 . adapted to discharge harpoons
7/08 . Toy guns

9/00 **Liquid ejecting guns, e.g. water pistols**

11/00 **Air guns, e.g. air pistols**; **Steam guns**
11/02 . Adaptations for feeding or loading missiles from magazines
11/04 . for ejecting a powder, e.g. pepper
11/06 . with pressure supplied by gas cartridge (F41B 11/08 takes precedence; valves therefor F41B 11/32)
11/08 . adapted to discharge harpoons
11/12 . having an air piston effecting a compressor stroke during the firing of each shot **[5]**
11/14 . . spring-operated **[5]**
11/16 . . . having an additional slidable mass moving in the opposite direction of the piston, e.g. for recoil reduction **[5]**
11/18 . . . Arrangements for putting the spring under tension **[5]**
11/20 . . . . by a rocking lever **[5]**
11/22 . . . . . in breakdown air guns **[5]**
11/24 . having a deformable bellows or bulb pressed during the firing **[5]**
11/26 . having precompressed air before the firing (F41B 11/06, F41B 11/08, F41B 11/32 take precedence) **[5]**
11/28 . . Pumping or compressor arrangements therefor **[5]**
11/30 . . . operated by a rocking-lever system, e.g. in breakdown air guns **[5]**
11/32 . Arrangement of valves in, or valves specially adapted for, air guns **[5]**
11/34 . Sealing arrangements; Pistons **[5]**

13/00 **Thrusting-weapons** (bayonets F41C 27/18); **Cutting-weapons carried as side-arms** (training appliances for fencing A63B 69/02; sheaths for hand cutting tools B26B 29/00)
13/02 . Sabres; Cutlasses; Swords; Epees
13/04 . . Sheaths or scabbards therefor
13/06 . . . for concealment, e.g. swordsticks
13/08 . Daggers; Stilettoes
13/10 . Lances; Pikes (spears for sporting purposes A63B 65/02)

15/00 **Weapons not otherwise provided for**
15/02 . Batons; Truncheons; Sticks; Shillelaghs
15/04 . . with electric stunning-means
15/06 . . with inserted knives or spikes
15/08 . Knuckledusters
15/10 . Bolas

F41C **SMALLARMS, E.G. PISTOLS, RIFLES** (functional features or details common to both smallarms and ordnance, mountings therefor F41A; projecting missiles without use of explosive or combustible propellant charge F41B); **ACCESSORIES THEREFOR [5]**

Note

Attention is drawn to the definitions in Note (2) following the title of class F41. **[5]**

Subclass index

3/00 **Pistols, e.g. revolvers** (specially adapted for underwater use F41C 9/06; for slaughtering or stunning animals A22B; for shooting bolts into concrete constructions, metal walls or the like B25C) **[3,5]**
3/02 . Signal pistols, e.g. Very pistols
3/04 . Starting pistols; Alarm pistols
3/06 . Cap-firing pistols, e.g. toy pistols
3/08 . . with band supply
3/10 . . with rotatable cap carrier, e.g. drum **[5]**
3/12 . . with slidable cap carrier, e.g. clip (F41C 3/08 takes precedence) **[5]**
3/14 . Revolvers (F41C 3/10 takes precedence; sealing aspects F41A 3/76; using a revolving drum magazine for feeding revolver-type guns, other than revolvers, F41A 9/27; extractors or ejectors therefor F41A 15/02) **[5]**
3/16 . . Hinge-frame revolvers **[5]**

7/00 **Shoulder-fired smallarms, e.g. rifles, carbines, shotguns** (specially adapted for underwater use F41C 9/06) **[3]**

7/02 . Pump-action guns, i.e. guns having a reciprocating handgrip beneath the barrel for loading or cocking

7/04 . with reciprocating handgrip under the buttstock for loading or cocking

7/06 . Lever-action guns, i.e. guns having a rocking lever for loading or cocking

7/11 . Breakdown shotguns or rifles (hinge-frame revolvers F41C 3/16; breech mechanisms therefor F41A 3/58; cocking mechanisms therefor F41A 19/41) **[5]**

9/00 **Other smallarms, e.g. hidden smallarms or smallarms specially adapted for underwater use [3]**

9/02 . Concealed pistols, e.g. in pencils

9/04 . Walking-stick guns

9/06 . Smallarms specially adapted for underwater use

9/08 . Muzzle-loading smallarms; Smallarms with flintlock mechanisms; Accessories therefor **[5]**

Details

23/00 **Butts**; **Butt plates**; **Stocks**

23/02 . Attachment of slings

23/04 . Folding or telescopic stocks or stock parts (articulated or collapsible guns F41A 11/04) **[5]**

23/06 . Stocks specially adapted for recoil reduction **[5]**

23/08 . . Recoil absorbing pads **[5]**

23/10 . Stocks or grips for pistols, e.g. revolvers (F41C 23/12 takes precedence) **[5]**

23/12 . Auxiliary stocks for stabilising, or for transforming pistols, e.g. revolvers, into shoulder-fired guns **[5]**

23/14 . Adjustable stock or stock parts, i.e. adaptable to personal requirements, e.g. length, pitch, cast or drop **[5]**

23/16 . Forestocks; Handgrips; Hand guards (pump-action guns F41C 7/02) **[5]**

23/18 . characterised by the material used (F41C 23/08 takes precedence) **[5]**

23/20 . Butts; Butt plates; Mountings therefor (F41C 23/08, F41C 23/10 take precedence) **[5]**

23/22 . Stocks having space for the storage of objects **[5]**

27/00 **Accessories**; **Details or attachments not otherwise provided for**

27/04 . Arrangements for mounting spades or shields (spades per se A01B 1/02; shields per se F41H 5/06)

27/06 . Adaptations of smallarms for firing grenades, e.g. rifle grenades, or for firing riot-control ammunition; Barrel attachments therefor (signal pistols F41C 3/02)

27/16 . Smallarms combined with thrusting or cutting weapons (thrusting or cutting weapons, other than bayonets F41B 13/00); Bayonets; Bayonet mounts **[5]**

27/18 . . Bayonets; Bayonet mounts **[5]**

27/20 . Attachments for wire cutting **[5]**

27/22 . Balancing or stabilising arrangements **[5]**

33/00 **Means for wearing or carrying smallarms**

33/02 . Holsters, i.e. cases for pistols having means for being carried or worn, e.g. at the belt or under the arm

33/04 . . Special attachments therefor

33/06 . Containers for carrying smallarms, e.g. safety boxes, gun cases (F41C 33/02 takes precedence) **[5]**

33/08 . Handles for carrying smallarms **[5]**

F41F **APPARATUS FOR LAUNCHING PROJECTILES OR MISSILES FROM BARRELS, E.G. CANNONS** (smallarms F41C); **LAUNCHERS FOR ROCKETS OR TORPEDOES**; **HARPOON GUNS** (functional features or details common to both smallarms and ordnance, mountings therefor F41A; projecting missiles without use of explosive or combustible propellant charge F41B) **[5]**

Subclass index

1/00 **Launching apparatus for projecting projectiles or missiles from barrels, e.g. cannons** (F41F 3/00 takes precedence); **Harpoon guns**

1/06 . Mortars (base plates therefor F41A 23/54)

1/08 . Multibarrel guns, e.g. twin guns **[5]**

1/10 . . Revolving-cannon guns, i.e. multibarrel guns with the barrels and their respective breeches mounted on a rotor; Breech mechanisms therefor **[5]**

3/00 **Rocket or torpedo launchers**

3/04 . for rockets

3/042 . . the launching apparatus being used also as transport container for the rocket **[4]**

3/045 . . adapted to be carried and used by a person, e.g. bazookas (F41F 3/042 takes precedence) **[4]**

3/048 . . Means for imparting spin to the rocket before launching **[4]**

3/052 . . Means for securing the rocket in the launching apparatus **[4]**

3/055 . . Umbilical connecting means **[4]**

3/058 . . Means for removing duds or misfires **[4]**

3/06 . . from aircraft

3/065 . . . Rocket pods, i.e. detachable containers for launching a plurality of rockets **[5]**

3/07 . . Underwater launching-apparatus **[4]**

3/073 . . Silos for rockets, e.g. mounting or sealing rockets therein (F41F 3/077 takes precedence) **[5]**

3/077 . . Doors or covers for launching tubes **[5]**

3/08 . for marine torpedoes

3/10 . . from below the surface of the water

5/00 **Launching-apparatus for gravity-propelled missiles or projectiles** (from aircraft B64D 1/04)
5/04 . from ships, e.g. for mines, for depth charges

7/00 **Launching-apparatus for projecting missiles or projectiles otherwise than from barrels** (F41F 3/04 takes precedence) **[3]**

F41G **WEAPON SIGHTS**; **AIMING** (optical aspects thereof G02B)

1/00 **Sighting devices** (for indirect laying of fire F41G 3/16; bombsights F41G 3/24)
1/01 . characterised by the visual combination effect of the respective geometrical forms of fore and rear sight (F41G 1/42 takes precedence) **[5]**
1/02 . Foresights
1/027 . . with lens **[5]**
1/033 . . adjustable **[5]**
1/04 . . Protection means therefor
1/06 . Rearsights
1/08 . . with aperture
1/10 . . with notch
1/12 . . with line or mark other than notch
1/14 . . with lens
1/16 . . Adjusting mechanisms therefor; Mountings therefor
1/17 . . . Convertible sights, i.e. sets of two or more sights brought into the sight line optionally **[5]**
1/18 . . . Clicking indicators with spring detents
1/20 . . . coarse and fine
1/22 . . . Friction clamps
1/24 . . . rack-and-pinion; lever; linkwork
1/26 . . . screw
1/28 . . . wedge; cam; eccentric
1/30 . Reflecting sights specially adapted for smallarms or ordnance (reflecting-sights in general G02B)
1/32 . Night sights, e.g. luminescent
1/34 . . combined with light source, e.g. spot light
1/35 . . . for illuminating the target **[5]**
1/36 . . . with infra-red light source
1/38 . Telescopic sights specially adapted for smallarms or ordnance (telescopic sights in general G02B); Supports or mountings therefor
1/387 . . Mounting telescopic sights on smallarms **[5]**
1/393 . . Mounting telescopic sights on ordnance; Transmission of sight movements to the associated gun **[5]**
1/40 . Periscopic sights specially adapted for smallarms or ordnance (periscopic sights in general G02B); Supports or mountings therefor
1/41 . . Mounting periscopic sights on smallarms **[5]**
1/42 . Tube sights; Bar sights
1/44 . Spirit-level adjusting-means, e.g. for correcting tilt
1/46 . for particular applications
1/467 . . for bows **[5]**
1/473 . . for lead-indicating or range-finding, e.g. for use with rifles or shotguns **[5]**
1/48 . . for firing grenades from rifles
1/50 . . for trench mortars
1/52 . . for rifles or shotguns having two or more barrels, or adapted to fire different kinds of ammunition, e.g. ball or shot
1/54 . Devices for testing or checking

3/00 **Aiming means**; **Laying means** (sighting devices F41G 1/00; determining direction, distance or velocity by use of radio or other waves G01S; computers G06; aerials H01Q)
3/02 . using an independent line of sight
3/04 . for dispersing fire from a battery
3/06 . with rangefinder (rangefinders per se G01C)
3/08 . with means for compensating for speed, direction, temperature, pressure, or humidity of the atmosphere (measuring G01)
3/10 . with means for compensating for canting of the trunnions
3/12 . with means for compensating for muzzle velocity or powder temperature
3/14 . Indirect aiming means
3/16 . . Sighting devices adapted for indirect laying of fire
3/18 . . Auxiliary target devices adapted for indirect laying of fire
3/20 . . specially adapted for mountain artillery
3/22 . for vehicle-borne armament, e.g. on aircraft
3/24 . . Bombsights
3/26 . Teaching or practice apparatus for gun-aiming or gun-laying
3/28 . . Small-scale apparatus (relief models or maps G09B)
3/30 . . Gun-laying apparatus
3/32 . Devices for testing or checking

5/00 **Elevating or traversing control systems for guns** (gun mountings permitting traversing or elevating movement, e.g. gun carriages, F41A 27/00; computers G06)
5/02 . using only mechanical means for remote control
5/04 . using hydraulic means for remote control
5/06 . using electric means for remote control
5/08 . Ground-based tracking-systems for aerial targets
5/12 . acoustically influenced
5/14 . for vehicle-borne guns
5/16 . . gyroscopically influenced
5/18 . . Tracking systems for guns on aircraft
5/20 . . for guns on ships
5/22 . . . to compensate for rolling or pitching
5/24 . . for guns on tanks
5/26 . Apparatus for testing or checking

7/00 **Direction control systems for self-propelled missiles** (flight control B64C, G05D 1/00; self-propelled or guided missiles having direction control systems only installed aboard F42B 15/01; rocket torpedoes F42B 17/00; marine torpedoes or sea-mines having self-propulsion means F42B 19/00; locating by use of radio or other waves G01S; computing aspects G06)
7/20 . based on continuous observation of target position **[3]**
7/22 . . Homing guidance systems **[3]**
7/24 . . Beam riding guidance systems (conical-scan beam beacons therefor G01S 1/42) **[3]**
7/26 . . . Optical guidance systems **[3]**
7/28 . . . Radio guidance systems **[3]**

7/30 . . Command link guidance systems **[3]**
7/32 . . . for wire-guided missiles **[3]**
7/34 . based on predetermined target position data **[3]**
7/36 . . using inertial references **[3]**

9/00 Systems for controlling missiles or projectiles, not provided for elsewhere
9/02 . for bombing control (bombsights F41G 3/24)

11/00 Details of sighting or aiming apparatus; **Accessories**

F41H ARMOUR; ARMOURED TURRETS; ARMOURED OR ARMED VEHICLES; MEANS OF ATTACK OR DEFENCE, E.G. CAMOUFLAGE, IN GENERAL

Subclass index

1/00 Personal protection-gear (shields for personal use F41H 5/08; for protection against chemical warfare A62B)
1/02 . Armoured or projectile- or missile-resistant garments; Composite protection fabrics
1/04 . Protection helmets (crash helmets A42B 3/00)
1/06 . . of steel; Steel head-shields
1/08 . . of plastics; Plastic head-shields

3/00 Camouflage, i.e. means or methods for concealment or disguise (for vessels B63G 8/34, B63G 13/02)
3/02 . Covers, e.g. screens, nets (making thereof, see the relevant classes, e.g. D04)

5/00 Armour; **Armour plates** (processes for manufacturing or treating B21, C21)
5/007 . Reactive armour; Dynamic armour **[5]**
5/013 . Mounting or securing armour plates **[5]**
5/02 . Plate construction
5/04 . . composed of more than one layer
5/06 . Shields (in ships B63G 9/00; in aircraft B64D 7/00)
5/08 . . for personal use
5/10 . . . Spade bayonets, i.e. usable as a spade, bayonet, or cover against rifle fire
5/12 . . for smallarms; for light-rocket launchers
5/14 . . . Wheeled armoured shields
5/16 . . for ordnance
5/18 . . Rotating shields
5/20 . Turrets
5/22 . Manhole covers, e.g. on tanks (in general F16J)
5/24 . for stationary use, e.g. fortifications
5/26 . Peepholes; Windows (manufacture or composition of glass C03); Covers therefor

7/00 Armoured or armed vehicles (general vehicle aspects B60; armoured or armed ships B63G; armoured or armed aircraft B64D; mounting guns, e.g. machine-guns, on vehicles F41A 23/00)
7/02 . Land vehicles with enclosing armour, e.g. tanks (endless-track vehicles, steering thereof B62D)
7/03 . . Air-pressurised compartments for crew; Means for preventing admission of noxious substances, e.g. combustion gas from gun barrels, in crew compartments; Sealing arrangements **[5]**
7/04 . . Armour construction (in general F41H 5/00)
7/10 . Mine-laying land vehicles

9/00 Equipment for attack or defence by spreading flame, gas, or smoke; **Chemical warfare equipment** (protection against chemicals A62B)
9/02 . Flame-throwing apparatus (for destroying vegetation A01M 15/00)
9/04 . Gas blowing apparatus, e.g. for tear gas (F41H 9/10 takes precedence)
9/06 . Apparatus for generating artificial fog or smoke screens (smoke-pot projectors, e.g. arranged on vehicles, F42B 5/155)
9/08 . . Smoke-pots without propulsive charge, i.e. stationary **[5]**
9/10 . Hand-held or body-worn self-defence devices using repellant gases or chemicals **[5]**

11/00 Defence installations; **Defence devices** (constructional aspects, see section E, e.g. E04H 9/04); **Means for clearing or detecting landmines**
11/02 . Anti-aircraft or anti-guided missile defence installations or systems (cartridges or missiles for producing smoke or for dispensing radar chaff or infra-red material F42B 5/15, F42B 12/48, F42B 12/70)
11/04 . . Aerial barrages
11/05 . Net barriers for harbour defence
11/06 . Gun-traps
11/08 . Barbed-wire obstacles; Barricades; Stanchions; Tank traps; Vehicle-impeding devices; Caltrops
11/10 . . Dispensing-apparatus therefor, e.g. devices for dispensing and reeling barbed wire
11/11 . . Clearing or neutralising barbed-wire obstacles (smallarm attachments for wire cutting F41C 27/20) **[5]**
11/12 . *Means for clearing land minefields; Systems specially adapted for detection of landmines* **[1,2011.01]**
11/13 . . *Systems specially adapted for detection of landmines* **[2011.01]**
11/132 . . . *Biological systems, e.g. with detection by animals or plants* **[2011.01]**
11/134 . . . *Chemical systems, e.g. with detection by vapour analysis* **[2011.01]**
11/136 . . . *Magnetic, electromagnetic, acoustic or radiation systems, e.g. ground penetrating radars or metal-detectors* **[2011.01]**
11/138 . . . *Mechanical systems, e.g. prodding sticks for manual detection* **[2011.01]**
11/14 . . Explosive line charges, e.g. snakes

11/16 . . *Self-propelled mine-clearing vehicles; Mine-clearing devices attachable to vehicles* **[1,2011.01]**

11/18 . . . *with ground-impacting means for activating mines by the use of mechanical impulses, e.g. flails or stamping elements* **[2011.01]**

11/20 . . . *with ground-penetrating elements, e.g. with means for removing buried landmines from the soil (F41H 11/18 takes precedence)* **[2011.01]**

11/22 . . . . *the elements being excavation buckets* **[2011.01]**

11/24 . . . . *the elements being ploughs* **[2011.01]**

11/26 . . . . *the elements being rotary ground-penetrating elements* **[2011.01]**

11/28 . . . *using brushing or sweeping means or dozers to push mines lying on a surface aside; using means for removing mines intact from a surface* **[2011.01]**

11/30 . . . *with rollers creating a surface load on the ground, e.g. steadily increasing surface load, for triggering purposes* **[2011.01]**

11/32 . . . *Decoy or sacrificial vehicles; Decoy or sacrificial devices attachable to vehicles* **[2011.01]**

13/00 Means of attack or defence not otherwise provided for

F41J TARGETS; TARGET RANGES; BULLET CATCHERS

Subclass index

1/00 Targets; **Target stands**; **Target holders** (F41J 2/00 to F41J 11/00 take precedence; targets combined with bullet catchers F41J 13/02) **[5]**

1/01 . Target discs characterised by their material, structure or surface (F41J 5/044 takes precedence) **[5]**

1/08 . for ordnance, e.g. cannons; for attacking by aircraft; Full-scale models imitating target objects, e.g. tanks, aircraft **[5]**

1/10 . Target stands; Target holders

2/00 Reflecting targets, e.g. radar-reflector targets; **Active targets transmitting electromagnetic waves [5]**

2/02 . Active targets transmitting infra-red radiation **[5]**

3/00 Targets for arrows or darts, e.g. for sporting or amusement purposes

3/02 . Indicators or score boards for arrow or dart games

5/00 Target indicating systems; **Target-hit or score detecting systems [5]**

5/02 . Photo-electric hit-detector systems

5/04 . Electric hit-indicating systems; Detecting hits by actuation of electric contacts or switches **[5]**

5/044 . . Targets having two or more electrically-conductive layers for short-circuiting by penetrating projectiles **[5]**

5/048 . . . one of the layers being in the form of discrete target sections **[5]**

5/052 . . Targets comprising a plurality of electric contacts, each corresponding to a discrete target section and being actuated by the movement thereof (F41J 5/056 takes precedence) **[5]**

5/056 . . Switch actuation by hit-generated mechanical vibration of the target body, e.g. using shock or vibration transducers **[5]**

5/06 . Acoustic hit-indicating systems, i.e. detecting of shock waves (F41J 5/056 takes precedence)

5/08 . Infra-red hit-indicating systems

5/10 . Cinematographic hit-indicating systems (cinematographic targets F41J 9/14)

5/12 . for indicating the distance by which a bullet misses the target (F41J 5/02 to F41J 5/10 take precedence)

5/14 . Apparatus for signalling hits or scores to the shooter, e.g. manually operated, or for communication between target and shooter; Apparatus for recording hits or scores **[5]**

5/16 . . Manually evaluating scores, e.g. using scoring plugs or gauges; Apparatus for evaluating scores on targets after removal from the target holder **[5]**

5/18 . Targets having hit-indicating means actuated or moved mechanically when the target has been hit, e.g. discs or flags (the target as a whole disappearing or moving when hit F41J 7/04) **[5]**

5/20 . . indicating which part of the target has been hit, i.e. the score **[5]**

5/22 . . the indicating means being a dispensing device **[5]**

5/24 . Targets producing a particular effect when hit, e.g. detonation of pyrotechnic charge, bell ring, photograph **[5]**

5/26 . . exploding or disintegrating when hit (F41J 9/16 takes precedence) **[5]**

7/00 Movable targets which are stationary when fired at

7/02 . movable for checking

7/04 . disappearing when hit

7/06 . Bobbing targets, i.e. targets intermittently or unexpectedly appearing **[5]**

9/00 Moving targets, i.e. moving when fired at (F41J 2/00 takes precedence) **[5]**

9/02 . Land-based targets

9/04 . Sea-going targets

9/06 . . towed

9/08 . Airborne targets, e.g. drones, kites, balloons

9/10 . . towed

9/14 . Cinematographic targets, e.g. moving-picture targets

9/16 . Clay-pigeon targets; Clay-disc targets

9/18 . . Traps or throwing-apparatus therefor

9/20 . . . with spring-operated throwing arm **[3]**

9/22 . . . . cocked by manual action **[3]**
9/24 . . . . cocked by electromechanical means **[3]**
9/26 . . . operated by fluid means **[3]**
9/28 . . . operated by manual action **[3]**
9/30 . . . characterised by using a magazine of targets **[3]**
9/32 . . . characterised by means for obviating the anticipation of the flight path **[3]**

11/00 Target ranges [2009.01]
11/02 . Safety means therefor **[2009.01]**

13/00 Bullet catchers [2009.01]
13/02 . combined with targets **[2009.01]**

F42 AMMUNITION; BLASTING

(1) This class covers also means for practice or training which may have aspects of simulation, although simulators are generally covered by class G09.

(2) In this class, the following terms or expressions are used with the meanings indicated:
- "primer" effects the first explosive step in the sequence of explosion; **[2]**
- "percussion cap" means a primer which is struck to explode; **[2]**
- "igniter" effects the first spark-producing or heat-producing step but may not be explosive; **[2]**
- "firing-means" or "initiator" (used respectively in the arts of weaponry and blasting) means a device acting directly on the primer, which device may or may not form part of the fuze; **[2]**
- "detonator" or "detonator charge" means a charge used to amplify the explosion of the primer; **[2]**
- "fuze" means an assembly or mechanism which incorporates safety and arming means in order that the explosion can only take place under certain conditions; this assembly or mechanism determines also the moment (instantaneous or delayed) or the manner, e.g. impact, proximity, hydrostatic pressure, of the firing; **[2]**
- "ammunition" covers propulsive charge and projectile whether or not forming a single body, unless otherwise made clear; **[2]**
- "projectile", "missile" or "projectile or missile" means any body which is projected or propelled; **[4]**
- "guided missile" means projectile or missile which is guided during at least part of its trajectory; **[4]**
- "rocket" means projectile or missile which is self-propelled, during at least part of its trajectory, by a rocket engine, i.e. by a jet-propulsion engine carrying both fuel and oxidant therefor; **[4]**
- "fuse" or "fuse cord" means a continuous train of explosive enclosed in a usually flexible cord or cable for setting-off an explosive charge in the art of blasting. **[5]**

F42B EXPLOSIVE CHARGES, E.G. FOR BLASTING; **FIREWORKS**; **AMMUNITION** (explosive compositions C06B; fuzes F42C; blasting F42D) **[2,5]**

Subclass index

1/00 Explosive charges characterised by form or shape but not dependent on shape of container

1/02 . Shaped or hollow charges (blasting cartridges with cavities in the charge F42B 3/08; oil-winning using shaped-charge perforators E21B 43/116)

1/024 . . provided with embedded bodies of inert material **[5]**

1/028 . . characterised by the form of the liner **[5]**

1/032 . . characterised by the material of the liner **[5]**

1/036 . . Manufacturing processes therefor **[5]**

1/04 . Detonator charges not forming part of the fuze

3/00 Blasting cartridges, i.e. case and explosive (fuse cords, e.g. detonating fuse cords, C06C 5/00; chemical aspects of detonators, blasting caps or primers C06C 7/00)

3/02 . adapted to be united into assemblies

3/04 . for producing gas under pressure

3/06 . . with re-utilisable case

3/08 . with cavities in the charge, e.g. hollow-charge blasting cartridges

3/087 . Flexible or deformable blasting cartridges, e.g. bags or hoses (loaded cartridge bags F42B 5/38) **[5]**

3/093 . . in mat or tape form **[5]**

3/10 . Initiators therefor (percussion fuzes F42C 7/00; percussion caps F42C 19/10; electric primers F42C 19/12)

Note

Group F42B 3/18 takes precedence over groups F42B 3/103 to F42B 3/16.

3/103 . . Mounting initiator heads in initiators; Sealing-plugs **[5]**
3/107 . . . Sealing-plugs characterised by the material used **[5]**
3/11 . . characterised by the material used, e.g. for initiator case or electric leads (F42B 3/107 takes precedence) **[5]**
3/113 . . activated by optical means, e.g. laser, flashlight **[5]**
3/117 . . activated by friction **[5]**
3/12 . . Bridge initiators
3/13 . . . with semiconductive bridge **[5]**
3/14 . . Spark initiators
3/16 . . Delay initiators
3/18 . . Safety initiators resistant to premature firing by static electricity or stray currents
3/182 . . . having shunting means **[5]**
3/185 . . . having semiconductive sealing plugs **[5]**
3/188 . . . having radio-frequency filters **[5]**
3/192 . . designed for neutralisation on contact with water **[5]**
3/195 . . Manufacture **[5]**
3/198 . . . of electric initiator heads **[5]**
3/22 . Elements for controlling or guiding the detonation wave, e.g. tubes (using inert bodies embedded in shaped or hollow charges F42B 1/024) **[5]**
3/24 . Cartridge closures or seals (top closures for shotgun ammunition cartridges F42B 7/12) **[5]**
3/26 . Arrangements for mounting initiators; Accessories therefor, e.g. tools **[5]**
3/28 . Cartridge cases characterised by the material used, e.g. coatings (for initiator cases F42B 3/11) **[5]**

4/00 Fireworks, i.e. pyrotechnic devices for amusement, display, illumination, or signal purposes (signalling by explosives G08B; advertising by firework G09F 13/46) **[2]**

4/02 . in cartridge form, i.e. shell, propellant, and primer **[2]**
4/04 . Firecrackers **[2]**
4/06 . Aerial display rockets (rockets in general F42B 15/00) **[2]**
4/08 . . characterised by having vanes, wings, parachutes, or balloons **[2]**
4/10 . . characterised by having means to separate article or charge from casing without destroying casing **[2]**
4/12 . . . Parachute or flare separation **[2]**
4/14 . . characterised by having plural successively-ignited charges **[2]**
4/16 . Hand-thrown impact-exploded noise makers (cap pistols F41C 3/06) **[4]**
4/18 . Simulations, e.g. pine cone, house that is destroyed, warship, volcano **[2]**
4/20 . characterised by having holder or support other than casing, e.g. whirler or spike support **[2]**
4/22 . characterised by having means to separate an article or charge from casing without destroying casing (in aerial display rockets F42B 4/10) **[2]**
4/24 . characterised by having plural successively-ignited charges (in aerial display rockets F42B 4/14) **[2]**
4/26 . Flares; Torches **[2]**
4/28 . . Parachute flares (F42B 4/12 takes precedence) **[2]**
4/30 . Manufacture **[2]**

5/00 Cartridge ammunition, e.g. separately-loaded propellant charges (shotgun ammunition F42B 7/00; practice or training ammunition F42B 8/00; missiles therefor F42B 12/00, F42B 14/00, F42B 15/00)

5/02 . Cartridges, i.e. cases with propellant charge and missile
5/03 . . containing more than one missile **[4]**
5/045 . . of telescopic type (F42B 5/184 takes precedence) **[5]**
5/05 . . for recoilless guns (recoilless guns using a counter-projectile to balance recoil F41A 1/10) **[4]**
5/067 . . Mounting or locking missiles in cartridge cases (F42B 5/18 takes precedence) **[5]**
5/073 . . . using an auxiliary locking element **[5]**
5/08 . . modified for electric ignition
5/10 . . with self-propelled bullet
5/14 . . for marking cattle
5/145 . . for dispensing gases, vapours, powders, particles or chemically-reactive substances (from projectiles F42B 12/46, F42B 12/70) **[5]**
5/15 . . . for creating a screening or decoy effect, e.g. using radar chaff or infra-red material (infra-red flares F42B 4/26) **[5]**
5/155 . . . . Smoke-pot projectors, e.g. arranged on vehicles **[5]**
5/16 . . characterised by composition or physical dimensions or form of propellant charge or powder (chemical composition C06B)
5/18 . . Caseless ammunition; Cartridges having combustible cases **[5]**
5/184 . . . telescopic **[5]**
5/188 . . . Manufacturing processes therefor **[5]**
5/192 . . . Cartridge cases characterised by the material used **[5]**
5/196 . . . . Coatings **[5]**
5/24 . . for cleaning; for cooling; for lubricating **[5]**
5/26 . Cartridge cases (F42B 5/18 takes precedence)
5/28 . . of metal
5/285 . . . formed by assembling several elements **[4]**
5/29 . . . . wound from sheets or strips **[4]**
5/295 . . . coated **[4]**
5/297 . . . . with plastics **[5]**
5/30 . . of plastics
5/307 . . . formed by assembling several elements **[4]**
5/313 . . . . all elements made of plastics **[4]**
5/32 . . for rim fire
5/34 . . with provision for varying the length
5/36 . . modified for housing an integral firing-cap
5/38 . Separately-loaded propellant charges, e.g. cartridge bags **[4]**

6/00 Projectiles or missiles specially adapted for projection without use of explosive or combustible propellant charge, e.g. for blow guns, bows or crossbows, hand-held spring or air guns (for delivering hypodermic charges F42B 12/54; throwing-darts A63B 65/02; projectiles or missiles incorporating springs as the projecting means F41B 7/02) **[5]**

6/02 . Arrows; Crossbow bolts; Harpoons for hand-held spring or air guns **[5]**

6/04 . . Archery arrows (F42B 6/08, F41B 5/06 take precedence) **[5]**
6/06 . . . Tail ends, e.g. nocks, fletching **[5]**
6/08 . . Arrow heads; Harpoon heads **[5]**
6/10 . Air gun pellets **[5]**

7/00 Shotgun ammunition
7/02 . Cartridges, i.e. cases with propellant charge and missile
7/04 . . of pellet type
7/06 . . with cartridge case of plastics
7/08 . . Wads therefor
7/10 . . Ball or slug shotgun cartridges
7/12 . . Cartridge top closures, i.e. for the missile side (closures for blasting cartridges F42B 3/24) **[5]**

8/00 Practice or training ammunition (range-reducing, destabilising or braking arrangements F42B 10/00; with signalling effect F42B 12/02; F42B 19/00 takes precedence) **[4]**
8/02 . Cartridges **[5]**
8/04 . . Blank cartridges, i.e. primed cartridges without projectile but containing an explosive or combustible powder charge **[5]**
8/06 . . . for cap-firing pistols **[5]**
8/08 . . Dummy cartridges, i.e. inert cartridges containing neither primer nor explosive or combustible powder charge **[5]**
8/10 . . with sub-calibre adaptor **[5]**
8/12 . Projectiles or missiles (F42B 19/36 takes precedence) **[5]**
8/14 . . disintegrating in flight or upon impact **[5]**
8/16 . . . containing an inert filler in powder or granular form **[5]**

Note

Group F42B 8/14 takes precedence over groups F42B 8/18 to F42B 8/26. **[5]**

8/18 . . Rifle grenades **[5]**
8/20 . . Mortar grenades **[5]**
8/22 . . Fall bombs **[5]**
8/24 . . Rockets **[5]**
8/26 . . Hand grenades **[5]**
8/28 . Land or marine mines; Depth charges **[5]**

10/00 Means for influencing, e.g. improving, the aerodynamic properties of projectiles or missiles; **Arrangements on projectiles or missiles for stabilising, steering, range-reducing, range-increasing or fall-retarding** (F42B 6/00 takes precedence; sub-calibre projectiles having sabots F42B 14/00) **[5]**
10/02 . Stabilising arrangements **[5]**
10/04 . . using fixed fins (F42B 10/22 takes precedence) **[5]**
10/06 . . . Tail fins **[5]**
10/08 . . . . Flechette-type projectiles **[5]**
10/10 . . . . the fins being formed in the barrel by deformation of the projectile body **[5]**
10/12 . . using fins longitudinally-slidable with respect to the projectile or missile **[5]**
10/14 . . using fins spread or deployed after launch, e.g. after leaving the barrel **[5]**
10/16 . . . Wrap-around fins **[5]**
10/18 . . . using a longitudinally slidable support member **[5]**
10/20 . . . deployed by combustion gas pressure, or by pneumatic or hydraulic forces **[5]**
10/22 . . Projectiles of cannelured type **[5]**
10/24 . . . with inclined grooves **[5]**
10/26 . . using spin (F42B 10/04, F42B 10/12, F42B 10/14, F42B 10/24, F42B 14/02 take precedence) **[5]**
10/28 . . . induced by gas action **[5]**
10/30 . . . . using rocket motor nozzles **[5]**
10/32 . Range-reducing or range-increasing arrangements; Fall-retarding means **[5]**
10/34 . . Tubular projectiles **[5]**
10/36 . . . Ring-foil projectiles **[5]**
10/38 . . Range-increasing arrangements (F42B 10/34 takes precedence) **[5]**
10/40 . . . with combustion of a slow-burning charge, e.g. fumers, base-bleed projectiles **[5]**
10/42 . . . Streamlined projectiles **[5]**
10/44 . . . . Boat-tails specially adapted for drag reduction **[5]**
10/46 . . . . Streamlined nose cones; Windshields; Radomes **[5]**
10/48 . . Range-reducing, destabilising or braking arrangements; Fall-retarding means (F42B 10/34 takes precedence) **[5]**
10/50 . . . Brake flaps **[5]**
10/52 . . . Nose cones **[5]**
10/54 . . . Spin braking means **[5]**
10/56 . . . of parachute type **[5]**
10/58 . . . of rotochute type **[5]**
10/60 . Steering arrangements (F42B 19/01 takes precedence) **[5]**
10/62 . . Steering by movement of flight surfaces **[5]**
10/64 . . . of fins **[5]**
10/66 . . Steering by varying intensity or direction of thrust (thrust vector control of rocket engine plants F02K 9/80) **[5]**

12/00 Projectiles, missiles or mines characterised by the warhead, the intended effect, or the material (F42B 6/00, F42B 10/00, F42B 14/00 take precedence; for practice or training F42B 8/12, F42B 8/28; self-propulsion or guidance aspects F42B 15/00) **[5]**
12/02 . characterised by the warhead or the intended effect **[5]**
12/04 . . of armour-piercing type **[5]**
12/06 . . . with hard or heavy core; Kinetic energy penetrators (F42B 12/16, F42B 12/74 take precedence) **[5]**
12/08 . . . with armour-piercing caps; with armoured cupola **[5]**
12/10 . . . with shaped or hollow charge (shaped or hollow charges per se F42B 1/02) **[5]**
12/12 . . . . rotatably mounted with respect to missile housing **[5]**
12/14 . . . . the symmetry axis of the hollow charge forming an angle with the longitudinal axis of the projectile **[5]**
12/16 . . . . in combination with an additional projectile or charge, acting successively on the target **[5]**
12/18 . . . . . Hollow charges in tandem arrangement **[5]**
12/20 . . of high-explosive type (F42B 12/44 takes precedence) **[5]**
12/22 . . . with fragmentation-hull construction **[5]**
12/24 . . . . with grooves, recesses or other wall weakenings **[5]**

12/26 . . . . the projectile wall being formed by a spirally-wound element **[5]**
12/28 . . . . the projectile wall being built from annular elements **[5]**
12/30 . . . . Continuous-rod warheads **[5]**
12/32 . . . . the hull or case comprising a plurality of discrete bodies, e.g. steel balls, embedded therein **[5]**
12/34 . . expanding before or on impact, i.e. of dumdum or mushroom type **[5]**
12/36 . . for dispensing materials; for producing chemical or physical reaction; for signalling **[5]**
12/38 . . . of tracer type **[5]**
12/40 . . . of target-marking, i.e. impact-indicating, type (F42B 12/48 takes precedence) **[5]**
12/42 . . . of illuminating type, e.g. carrying flares **[5]**
12/44 . . . of incendiary type (F42B 12/46 takes precedence) **[5]**
12/46 . . . for dispensing gases, vapours, powders or chemically-reactive substances (F42B 12/70 takes precedence) **[5]**
12/48 . . . . smoke-producing **[5]**
12/50 . . . . by dispersion **[5]**
12/52 . . . . . Fuel-air explosive devices **[5]**
12/54 . . . . by implantation, e.g. hypodermic projectiles **[5]**
12/56 . . . for dispensing discrete solid bodies (F42B 12/70 takes precedence) **[5]**
12/58 . . . . Cluster or cargo ammunition, i.e. projectiles containing one or more submissiles (F42B 12/32 takes precedence) **[5]**
12/60 . . . . . the submissiles being ejected radially **[5]**
12/62 . . . . . the submissiles being ejected parallel to the longitudinal axis of the projectile **[5]**
12/64 . . . . . the submissiles being of shot- or flechette-type **[5]**
12/66 . . . . . Chain-shot, i.e. the submissiles being interconnected by chains or the like **[5]**
12/68 . . . . Line-carrying missiles, e.g. for life-saving (harpoons F42B 30/14) **[5]**
12/70 . . . . for dispensing radar chaff or infra-red material (radar-reflector targets, active targets transmitting infra-red radiation F41J 2/00; radar-reflecting surfaces H01Q 15/14) **[5]**
12/72 . characterised by the material (heat treatment for explosive shells C21D 9/16) **[5]**
12/74 . . of the core or solid body **[5]**
12/76 . . of the casing **[5]**
12/78 . . . of jackets for smallarm bullets **[5]**
12/80 . . . Coatings **[5]**
12/82 . . . . reduction friction **[5]**

14/00 Projectiles or missiles characterised by arrangements for guiding or sealing them inside barrels, or for lubricating or cleaning barrels [5]

14/02 . Driving bands; Rotating bands (F42B 14/04 takes precedence) **[5]**
14/04 . Lubrication means in missiles (coatings for reducing friction F42B 12/82) **[5]**
14/06 . Sub-calibre projectiles having sabots; Sabots therefor **[5]**
14/08 . . Sabots filled with propulsive charges; Removing sabots by combustion of pyrotechnic elements or by propulsive-gas pressure (arrangements on barrels for removing sabots from projectiles F41A 21/46) **[5]**

15/00 Self-propelled projectiles or missiles, e.g. rockets; **Guided missiles** (F42B 10/00, F42B 12/00, F42B 14/00 take precedence; for practice or training F42B 8/12; rocket torpedoes F42B 17/00; marine torpedoes F42B 19/00; cosmonautic vehicles B64G; jet-propulsion plants F02K) **[4]**

15/01 . Arrangements thereon for guidance or control (aircraft flight control B64C; guidance systems other than those only installed aboard F41G 7/00, F41G 9/00; locating by use of radio or other waves G01S; flight control in general G05D 1/00; computing aspects G06) **[5]**
15/04 . . using wire, e.g. for guiding ground-to-ground rockets
15/08 . for carrying measuring instruments (adaptations for meteorology G01W 1/08)
15/10 . Missiles having a trajectory only in the air
15/12 . . Intercontinental ballistic missiles (F42B 15/01 takes precedence) **[4]**
15/20 . Missiles having a trajectory beginning below water surface (having additional propulsion means for movement through water F42B 17/00)
15/22 . Missiles having a trajectory finishing below water surface (having additional propulsion means for movement through water F42B 17/00)
15/34 . Protection against overheating or radiation, e.g. heat shields; Additional cooling arrangements **[5]**
15/36 . Means for interconnecting rocket-motor and body section; Multi-stage connectors; Disconnecting means **[5]**
15/38 . . Ring-shaped explosive elements for the separation of rocket parts **[5]**

17/00 Rocket torpedoes, i.e. missiles provided with separate propulsion means for movement through air and through water (F42B 12/00 takes precedence)

19/00 Marine torpedoes, e.g. launched by surface vessels or submarines (having additional propulsion means for movement through air F42B 17/00); **Sea mines having self-propulsion means** (F42B 12/00 takes precedence; launching means F41F; locating by use of radio or other waves G01S; automatic control of course G05D 1/00; firing directors or calculators G06G)

19/01 . Steering control
19/04 . . Depth control
19/06 . . Directional control
19/08 . . with means for preventing rolling or pitching
19/10 . . remotely controlled, e.g. by sonic or radio control (control systems using wire F41G 7/32)
19/12 . Propulsion specially adapted for torpedoes (marine propulsion in general B63H)
19/14 . . by compressed-gas motors
19/16 . . . of cylinder type
19/18 . . . of turbine type
19/20 . . . characterised by the composition of propulsive gas; Manufacture or heating thereof in torpedoes
19/22 . . by internal-combustion engines
19/24 . . by electric motors
19/26 . . by jet propulsion
19/28 . . with means for avoiding visible wake
19/30 . . with timing control of propulsion
19/36 . adapted to be used for exercise purposes, e.g. indicating position or course
19/38 . . with means for causing torpedoes to surface at end of run
19/40 . . . by expelling liquid ballast

19/42 . . . by releasing solid ballast
19/44 . . . by enlarging displacement
19/46 . adapted to be launched from aircraft

21/00 **Depth charges** (F42B 12/00 takes precedence; for practice or training F42B 8/28; laying aspects B63G)

22/00 **Marine mines, e.g. launched by surface vessels or submarines** (F42B 12/00 takes precedence; for practice or training F42B 8/28; mine laying or sweeping B63G)
22/02 . Contact mines (contact fuzes F42C 7/02)
22/04 . Influenced mines, e.g. by magnetic or acoustic effect
22/06 . Ground mines
22/08 . Drifting mines (with propulsion means F42B 19/00)
22/10 . Moored mines
22/12 . . at a fixed depth setting
22/14 . . at a variable depth setting
22/16 . . . using mechanical means, e.g. plummet and float
22/18 . . . using hydrostatic means
22/20 . . . using magnetic or acoustic depth-control means
22/22 . having self-contained sinking means
22/24 . Arrangement of mines in fields or barriers (net barriers for harbour defence F41H 11/05)
22/42 . with anti-sweeping means, e.g. electrical
22/44 . adapted to be launched from aircraft

23/00 **Land mines** (F42B 12/00 takes precedence; for practice or training F42B 8/28)
23/04 . anti-vehicle **[5]**
23/08 . . non-metallic **[5]**
23/10 . anti-personnel **[5]**
23/14 . . non-metallic **[5]**
23/16 . . of missile type, i.e. for detonation after ejection from ground (fuzes for initiating mine ejection F42C 1/09) **[5]**
23/24 . Details

25/00 **Fall bombs** (F42B 10/00, F42B 12/00 take precedence; for practice or training F42B 8/12) **[5]**

27/00 **Hand grenades** (F42B 12/00 takes precedence; for practice or training F42B 8/12)
27/08 . with handle

29/00 **Noiseless, smokeless, or flashless missiles launched by their own explosive propellant**

30/00 **Projectiles or missiles, not otherwise provided for, characterised by the ammunition class or type, e.g. by the launching apparatus or weapon used** (F42B 10/00, F42B 12/00, F42B 14/00 take precedence) **[5]**
30/02 . Bullets **[5]**
30/04 . Rifle grenades **[5]**
30/06 . . Bullet traps or bullet decelerators therefor **[5]**
30/08 . Ordnance projectiles or missiles, e.g. shells **[5]**
30/10 . . Mortar projectiles **[5]**
30/12 . . . with provision for additional propulsive charges, or for varying the length **[5]**
30/14 . Harpoons (for hand-held spring or air guns F42B 6/02) **[5]**

33/00 **Manufacture of ammunition**; **Dismantling of ammunition**; **Apparatus therefor** (F42B 5/188 takes precedence; manufacturing processes for hollow charges F42B 1/036; manufacturing of blasting cartridge initiators F42B 3/195)
33/02 . Filling cartridges, missiles, or fuzes; Inserting propellant or explosive charges
33/04 . Fitting or extracting primers in or from fuzes or charges
33/06 . Dismantling fuzes, cartridges, projectiles, missiles, rockets, or bombs (F42B 33/04 takes precedence)
33/10 . Reconditioning used cartridge cases
33/12 . Crimping shotgun cartridges
33/14 . Surface treatment of cartridges or cartridge cases

35/00 **Testing or checking of ammunition**
35/02 . Gauging, sorting, trimming or shortening cartridges or missiles

39/00 **Packaging or storage of ammunition or explosive charges**; **Safety features thereof**; **Cartridge belts or bags**
39/02 . Cartridge bags; Bandoleers
39/08 . Cartridge belts
39/10 . . Machines for charging or for extracting cartridges from feed belts
39/14 . Explosion or fire protection arrangements on packages or ammunition (F42B 39/20 takes precedence) **[5]**
39/16 . . Fire-extinguishing **[5]**
39/18 . . Heat shields; Thermal insulation **[5]**
39/20 . Packages or ammunition having valves for pressure-equalising; Packages or ammunition having plugs for pressure release, e.g. meltable **[5]**
39/22 . Locking of ammunition in transport containers **[5]**
39/24 . Shock-absorbing arrangements in packages **[5]**
39/26 . Packages or containers for a plurality of ammunition, e.g. cartridges (F42B 39/14 to F42B 39/24, F42B 39/28 take precedence) **[5]**
39/28 . Ammunition racks, e.g. in vehicles **[5]**
39/30 . Containers for detonators or fuzes (F42B 39/14, F42B 39/20 take precedence) **[5]**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

F42C **AMMUNITION FUZES** (blasting cartridge initiators F42B 3/10; chemical aspects C06C); **ARMING OR SAFETY MEANS THEREFOR** (filling fuzes F42B 33/02; fitting or extracting primers in or from fuzes F42B 33/04; containers for fuzes F42B 39/30) **[5]**

Subclass index

1/00 **Impact fuzes, i.e. fuzes actuated only by ammunition impact**

1/02 . with firing pin structurally combined with fuze

1/04 . . operating by inertia of members on impact

1/06 . . . for any direction of impact

1/08 . . with delayed action after ignition of fuze (time fuzes F42C 9/00)

1/09 . . the fuze activating a propulsive charge for propelling the ammunition or the warhead into the air, e.g. in rebounding projectiles **[5]**

1/10 . without firing pin

1/12 . . with delayed action after ignition of fuze (time fuzes F42C 9/00)

1/14 . operating at a predetermined distance from ground or target by means of a protruding member

3/00 **Fuzes actuated by exposure to a liquid, e.g. sea-water** (F42C 5/00 takes precedence; time fuzes F42C 9/00)

5/00 **Fuzes actuated by exposure to a predetermined ambient fluid pressure**

5/02 . barometric pressure

7/00 **Fuzes actuated by application of a predetermined mechanical force, e.g. tension, torsion, pressure** (by ammunition impact F42C 1/00; by exposure to a predetermined ambient fluid pressure F42C 5/00)

7/02 . Contact fuzes, i.e. fuzes actuated by mechanical contact between a stationary ammunition, e.g. a land mine, and a moving target, e.g. a person (F42C 7/12 takes precedence)

7/04 . . actuated by applying pressure on the ammunition head **[5]**

7/06 . . . and comprising pneumatic or hydraulic retarding means **[5]**

7/08 . . of release type, i.e. actuated by releasing pressure from the ammunition head **[5]**

7/10 . . of antenna type **[5]**

7/12 . Percussion fuzes of the double-action type, i.e. fuzes cocked and fired in a single movement, e.g. by pulling an incorporated percussion pin or hammer (percussion caps F42C 19/10) **[5]**

9/00 **Time fuzes**; **Combined time- and percussion- or pressure-actuated fuzes**; **Fuzes for timed self-destruction of ammunition**

9/02 . the timing being caused by mechanical means

9/04 . . by spring motor

9/06 . . by flow of fluent material, e.g. shot, fluids

9/08 . the timing being caused by chemical action, e.g. of acids

9/10 . the timing being caused by combustion

9/12 . . with ring combustion elements

9/14 . Double fuzes; Multiple fuzes

9/16 . . for self-destruction of ammunition

9/18 . . . when the spin rate falls below a predetermined limit, e.g. a spring force being stronger than the locking action of a centrifugally-operated lock **[5]**

11/00 **Electric fuzes** (proximity fuzes F42C 13/00; electric igniters F42C 19/12)

11/02 . with piezo-crystal

11/04 . with current induction

11/06 . with time delay by electric circuitry

13/00 **Proximity fuzes**; **Fuzes for remote detonation**

13/02 . operated by intensity of light or similar radiation

13/04 . operated by radio waves

13/06 . operated by sound waves

13/08 . operated by variations in magnetic field

14/00 **Fuzes characterised by the ammunition class or type** (F42C 1/00, F42C 13/00, F42C 15/00 take precedence) **[5]**

14/02 . for hand grenades **[5]**

14/04 . for torpedoes, marine mines or depth charges (influenced marine mines F42B 22/04) **[5]**

14/06 . for fall bombs **[5]**

14/08 . for land mines **[5]**

15/00 **Arming-means in fuzes**; **Safety means for preventing premature detonation of fuzes or charges**

15/16 . wherein the firing pin is displaced out of the action line for safety (F42C 15/40 takes precedence)

15/18 . wherein a carrier for an element of the pyrotechnic or explosive train is moved (F42C 15/40 takes precedence) **[5]**

15/184 . . using a slidable carrier **[5]**

15/188 . . using a rotatable carrier **[5]**

15/192 . . . rotatable in a plane which is parallel to the longitudinal axis of the projectile **[5]**

15/196 . . . . by the action of centrifugal or inertia forces on the carrier body, e.g. the carrier having eccentrically mounted weights or eccentric centre of gravity **[5]**

15/20 . wherein a securing-pin or latch is removed to arm the fuze, e.g. removed from the firing pin (F42C 15/40 takes precedence)

15/21 . . using spring action (F42C 15/23 takes precedence) **[5]**

15/22 . . using centrifugal force (F42C 15/23 takes precedence)

15/23 . . by unwinding a flexible ribbon or tape **[5]**

15/24 . wherein the safety or arming action is effected by inertia means (F42C 15/196, F42C 15/20 take precedence)

15/26 . . using centrifugal force

15/28 . operated by flow of fluent material, e.g. shot, fluids (F42C 15/26 takes precedence)

15/285 . . stored within the fuze housing **[5]**

15/29 . . operated by fluidic oscillators; operated by dynamic fluid pressure, e.g. ram-air operated **[5]**

15/295 . . operated by a turbine or a propeller; Mounting means therefor **[5]**

15/30 . . of propellant gases, i.e. derived from propulsive charge or rocket motor

15/31 . . generated by the combustion of a pyrotechnic or explosive charge within the fuze **[5]**

15/32 . operated by change of fluid pressure (F42C 5/00, F42C 15/29 take precedence)

15/33 . . by breaking a vacuum or pressure container **[5]**
15/34 . wherein the safety or arming action is effected by a blocking-member in the pyrotechnic or explosive train between primer and main charge (F42C 15/18, F42C 15/40 take precedence)
15/36 . wherein arming is effected by combustion or fusion of an element (F42C 15/31 takes precedence)
15/38 . wherein arming is effected by chemical action (F42C 3/00 takes precedence)
15/40 . wherein the safety or arming action is effected electrically
15/42 . . from a remote location, e.g. for controlled mines or mine fields **[5]**
15/44 . Arrangements for disarming, or for rendering harmless, fuzes after arming, e.g. after launch **[5]**

17/00 Fuze-setting apparatus
17/02 . Fuze-setting keys
17/04 . for electric fuzes **[5]**

19/00 Details of fuzes (other parts F42C 15/00)
19/02 . Fuze bodies; Fuze housings
19/04 . Protective caps
19/06 . Electric contact parts specially adapted for use with electric fuzes
19/07 . . Nose-contacts for projectiles or missiles **[5]**
19/08 . Primers (initiators for blasting cartridges F42B 3/10); Detonators
19/085 . . Primers for caseless ammunition **[5]**
19/09 . . Primers or detonators containing a hollow charge **[5]**
19/095 . . Arrangement of a multiplicity of primers or detonators, dispersed around a warhead, one of the primers or detonators being selected for directional detonation effects **[5]**
19/10 . . Percussion caps
19/12 . . electric
19/14 . . . operable also in the percussion mode **[5]**

21/00 Checking fuzes; **Testing fuzes**

99/00 Subject matter not provided for in other groups of this subclass [8]

F42D BLASTING (fuses, e.g. fuse cords, C06C 5/00; blasting cartridges F42B 3/00)

1/00 Blasting methods or apparatus, e.g. for loading or tamping
1/02 . Arranging blasting cartridges to form an assembly (adaptation of blasting cartridges therefor F42B 3/02)
1/04 . Arrangements for ignition
1/045 . . Arrangements for electric ignition (dynamo-electric generators H02K) **[5]**
1/05 . . . Electric circuits for blasting **[5]**
1/055 . . . . specially adapted for firing multiple charges with a time delay **[5]**
1/06 . . Relative timing of multiple charges (F42D 1/055 takes precedence)
1/08 . Tamping methods; Methods for loading boreholes with explosives; Apparatus therefor **[5]**
1/10 . . Feeding explosives in granular or slurry form; Feeding explosives by pneumatic or hydraulic pressure **[5]**
1/12 . . Feeding tamping material by pneumatic or hydraulic pressure **[5]**
1/14 . . Hand-operated tamping or loading **[5]**
1/16 . . . Tamping tools **[5]**
1/18 . . Plugs for boreholes **[5]**
1/20 . . Tamping cartridges, i.e. cartridges containing tamping material (flexible or deformable blasting cartridges F42B 3/087) **[5]**
1/22 . . Means for holding or positioning blasting cartridges or tamping cartridges in boreholes **[5]**
1/24 . . characterised by the tamping material **[5]**
1/26 . . . Tamping with foaming agents **[5]**
1/28 . . . Tamping with gelling agents **[5]**

3/00 Particular applications of blasting techniques
3/02 . for demolition of tall structures, e.g. chimney stacks
3/04 . for rock blasting
3/06 . for seismic purposes

5/00 Safety arrangements
5/02 . Locating undetonated charges
5/04 . Rendering explosive charges harmless, e.g. destroying ammunition (extracting primers, dismantling ammunition F42B 33/04, F42B 33/06); Rendering detonation of explosive charges harmless **[5]**
5/045 . . Detonation-wave absorbing or damping means **[5]**
5/05 . . . Blasting mats **[5]**
5/055 . . Silencing means for blasting operations (F42D 5/045 takes precedence) **[5]**
5/06 . Unloading boreholes

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

F99 SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

F99Z SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

Note

This subclass covers subject matter that: **[8]**
(a) is not provided for, but is most closely related to, the subject matter covered by the subclasses of this section, and **[8]**
(b) is not explicitly covered by any subclass of another section. **[8]**

99/00 Subject matter not otherwise provided for in this section [8]

SECTION G – PHYSICS

(1) In this section, the following term is used with the meaning indicated:

– "variable" (as a noun) means a feature or property (e.g., a dimension, a physical condition such as temperature, a quality such as density or colour) which, in respect of a particular entity (e.g., an object, a quantity of a substance, a beam of light) and at a particular instant, is capable of being measured; the variable may change, so that its numerical expression may assume different values at different times, in different conditions or in individual cases, but may be constant in respect of a particular entity in certain conditions or for practical purposes (e.g., the length of a bar may be regarded as constant for many purposes).

(2) Attention is drawn to the definitions of terms or expressions used, appearing in the notes of several of the classes in this section, in particular those of "measuring" in class G01 and "control" and "regulation" in class G05.

(3) Classification in this section may present more difficulty than in other sections, because the distinction between different fields of use rests to a considerable extent on differences in the intention of the user rather than on any constructional differences or differences in the manner of use, and because the subjects dealt with are often in effect systems or combinations, which have features or parts in common, rather than "things", which are readily distinguishable as a whole. For example, information (e.g., a set of figures) may be displayed for the purpose of education or advertising (G09), for enabling the result of a measurement to be known (G01), for signalling the information to a distant point or for giving information which has been signalled from a distant point (G08). The words used to describe the purpose depend on features that may be irrelevant to the form of the apparatus concerned, for example, such features as the desired effect on the person who sees the display, or whether the display is controlled from a remote point. Again, a device which responds to some change in a condition, e.g., in the pressure of a fluid, may be used, without modification of the device itself, to give information about the pressure (G01L) or about some other condition linked to the pressure (another subclass of class G01, e.g., G01K for temperature), to make a record of the pressure or of its occurrence (G07C), to give an alarm (G08B), or to control another apparatus (G05).

The classification scheme is intended to enable things of a similar nature (as indicated above) to be classified together. It is therefore particularly necessary for the real nature of any technical subject to be decided before it can be properly classified.

INSTRUMENTS

G01 MEASURING; TESTING

(1) This class covers, in addition to "true" measuring instruments, other indicating or recording devices of analogous construction, and also signalling or control devices insofar as they are concerned with measurement (as defined in Note 2 below) and are not specially adapted to the particular purpose of signalling or control.

(2) In this class, the following term is used with the meaning indicated:

– "measuring" is used to cover considerably more than its primary or basic meaning. In this primary sense, it means finding a numerical expression of the value of a variable in relation to a unit or datum or to another variable of the same nature, e.g. expressing a length in terms of another length as in measuring a length with a scale; the value may be obtained directly (as just suggested) or by measuring some other variable of which the value can be related to the value of the required variable, as in measuring a change in temperature by measuring a resultant change in the length of a column of mercury. However, since the same device or instrument may, instead of giving an immediate indication, be used to produce a record or to initiate a signal to produce an indication or control effect, or may be used in combination with other devices or instruments to give a conjoint result from measurement of two or more variables of the same or different kinds, it is necessary to interpret "measuring" as including also any operation that would make it possible to obtain such a numerical expression by the additional use of some way of converting a value into figures. Thus the expression in figures may be actually made by a digital presentation or by reading a scale, or an indication of it may be given without the use of figures, e.g. by some perceptible feature (variable) of the entity (e.g. object, substance, beam of light) of which the variable being measured is a property or condition or by an analogue of such a feature (e.g. the corresponding position of a member without any scale, a corresponding voltage generated in some way). In many cases there is no such value indication but only an indication of difference or equality in relation to a standard or datum (of which the value may or may not be known in figures); the standard or datum may be the value of another variable of the same nature but of a different entity (e.g. a standard measure) or of the same entity at a different time.

In its simplest form, measurement may give merely an indication of presence or absence of a certain condition or quality, e.g. movement (in any direction or in a particular direction), or whether a variable exceeds a predetermined value.

(3) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems" and the Notes following the title of subclass B82B relating to "nano-structures". **[7]**

(4) Attention is drawn to the Notes following the title of section G, especially as regards the definition of the term "variable".

(5) In many measuring arrangements, a first variable to be measured is transformed into a second, or further, variables. The second, or further, variables may be (a) a condition related to the first variable and produced in a member, or (b) a displacement of a member. Further transformation may be needed. **[6]**

When classifying such an arrangement, (i) the transformation step, or each transformation step, that is of interest is classified, or (ii) if interest lies only in the system as a whole, the first variable is classified in the appropriate place. **[6]**

This is particularly important where two or more conversions take place, for instance where a first variable, for example pressure, is transformed into a second variable, for example an optical property of a sensing body, and that second variable is expressed by means of a third variable, for example an electric effect. In such a case, the following classification places should be considered: the place for the transformation of the first variable, that for sensing the condition caused by that variable, subclass G01D for expression of the measurement, and finally the place for the overall system, if any. **[6]**

(6) The measurement of change in the value of a physical property is classified in the same subclass as the measurement of that physical property, e.g. measurement of expansion of length is classified in subclass G01B.

G01B MEASURING LENGTH, THICKNESS OR SIMILAR LINEAR DIMENSIONS; MEASURING ANGLES; MEASURING AREAS; MEASURING IRREGULARITIES OF SURFACES OR CONTOURS

(1) This subclass covers measuring of position or displacement in terms of linear or angular dimensions. **[4]**

(2) In this subclass, the groups are distinguished by the means of measurement which is of major importance. Thus the mere application of other means for giving a final indication does not affect the classification.

(3) Attention is drawn to the Notes following the title of class G01.

(4) Machines operated on similar principles to the hand-held devices specified in this subclass are classified with these devices.

(5) Measuring arrangements or details thereof covered by two or more of groups G01B 3/00 to G01B 17/00 are classified in group G01B 21/00 if no single other group can be selected as being predominantly applicable.

Subclass index

1/00 Measuring instruments characterised by the selection of material therefor

3/00 Instruments as specified in the subgroups and characterised by the use of mechanical measuring means (arrangements for measuring particular parameters G01B 5/00; devices of general interest specially adapted or mounted for storing and repeatedly paying-out and re-storing lengths of material B65H 75/34) **[2]**

3/02 . Rulers or tapes with scales or marks for direct reading
3/04 . . rigid
3/06 . . . folding
3/08 . . . extensible
3/10 . . flexible
3/11 . Chains for measuring length
3/12 . Measuring wheels
3/14 . Templates for checking contours
3/16 . Compasses, i.e. with a pair of pivoted arms
3/18 . Micrometers
3/20 . Slide gauges
3/22 . Feeler-pin gauges, e.g. dial gauges (for measuring contours or curvatures G01B 5/20)
3/24 . . with open yoke, i.e. calipers
3/26 . . Plug gauges
3/28 . . Depth gauges
3/30 . Bars, blocks, or strips in which the distance between a pair of faces is fixed, although it may be preadjustable, e.g. end measure, feeler strip
3/32 . . Holders therefor
3/34 . Ring or other apertured gauges, e.g. "go/no-go" gauge
3/36 . . for external screw threads
3/38 . Gauges with an open yoke and opposed faces, i.e. calipers, in which the internal distance between the faces is fixed, although it may be preadjustable
3/40 . . for external screw threads
3/42 . . of limit-gauge type, i.e. "go/no-go" (G01B 3/40 takes precedence)
3/44 . . . preadjustable for wear or tolerance
3/46 . Plug gauges for internal dimensions with engaging surfaces which are at a fixed distance, although they may be preadjustable
3/48 . . for internal screw threads
3/50 . . of limit-gauge type, i.e. "go/no-go" (G01B 3/48 takes precedence)
3/52 . . . preadjustable for wear or tolerance
3/56 . Gauges for measuring angles or tapers, e.g. conical calipers

5/00 Measuring arrangements characterised by the use of mechanical means (instruments of the types covered by group G01B 3/00 per se G01B 3/00) **[2]**

5/004 . for measuring coordinates of points **[6]**
5/008 . . using coordinate measuring machines **[6]**
5/012 . . . Contact-making feeler heads therefor **[6]**
5/016 . . . . Constructional details of contacts **[6]**
5/02 . for measuring length, width, or thickness (G01B 5/004, G01B 5/08 take precedence) **[6]**
5/04 . . specially adapted for measuring length or width of objects while moving
5/06 . . for measuring thickness
5/08 . for measuring diameters
5/10 . . of objects while moving
5/12 . . internal diameters
5/14 . for measuring distance or clearance between spaced objects or spaced apertures (G01B 5/24 takes precedence)
5/16 . . between a succession of regularly spaced objects or regularly spaced apertures
5/18 . for measuring depth
5/20 . for measuring contours or curvatures
5/207 . . using a plurality of fixed, simultaneously operating transducers (G01B 5/213 to G01B 5/22 take precedence) **[6]**
5/213 . . for measuring radius of curvature **[6]**
5/22 . . Spherometers
5/24 . for measuring angles or tapers; for testing the alignment of axes
5/245 . . for testing perpendicularity **[6]**
5/25 . . for testing the alignment of axes
5/252 . . . for measuring eccentricity, i.e. lateral shift between two parallel axes **[6]**
5/255 . . for testing wheel alignment
5/26 . for measuring areas, e.g. planimeter (integrators in general G06G)
5/28 . for measuring roughness or irregularity of surfaces
5/30 . for measuring the deformation in a solid, e.g. mechanical strain gauge

7/00 Measuring arrangements characterised by the use of electric or magnetic means

7/004 . for measuring coordinates of points **[6]**
7/008 . . using coordinate measuring machines **[6]**
7/012 . . . Contact-making feeler heads therefor **[6]**
7/016 . . . . Constructional details of contacts **[6]**
7/02 . for measuring length, width, or thickness (G01B 7/004, G01B 7/12 takes precedence) **[6]**
7/04 . . specially adapted for measuring length or width of objects while moving
7/06 . . for measuring thickness
7/12 . for measuring diameters
7/13 . . Internal diameters **[6]**
7/14 . for measuring distance or clearance between spaced objects or spaced apertures (G01B 7/30 takes precedence)
7/15 . . being regularly spaced **[6]**
7/16 . for measuring the deformation in a solid, e.g. by resistance strain gauge
7/24 . . using change in magnetic properties
7/26 . for measuring depth
7/28 . for measuring contours or curvatures
7/287 . . using a plurality of fixed, simultaneously operating transducers (G01B 7/293 takes precedence) **[6]**
7/293 . . for measuring radius of curvature **[6]**
7/30 . for measuring angles or tapers; for testing the alignment of axes
7/305 . . for testing perpendicularity **[6]**
7/31 . . for testing the alignment of axes
7/312 . . . for measuring eccentricity, i.e. lateral shift between two parallel axes **[6]**
7/315 . . for testing wheel alignment
7/32 . for measuring areas (integrators in general G06G)
7/34 . for measuring roughness or irregularity of surfaces

9/00 Instruments as specified in the subgroups and characterised by the use of optical measuring means (arrangements for measuring particular parameters G01B 11/00) **[2]**

9/02 . Interferometers

9/021 . . using holographic techniques **[2]**
9/023 . . . for contour producing (G01B 9/025 to G01B 9/029 take precedence) **[2]**
9/025 . . . Double-exposure technique **[2]**
9/027 . . . in real time **[2]**
9/029 . . . by time averaging **[2]**
9/04 . Measuring microscopes
9/06 . Measuring telescopes
9/08 . Optical projection comparators
9/10 . Goniometers for measuring angles between surfaces

11/00 Measuring arrangements characterised by the use of optical means (instruments of the types covered by group G01B 9/00 per se G01B 9/00) **[2]**
11/02 . for measuring length, width, or thickness (G01B 11/08 takes precedence)
11/03 . . by measuring coordinates of points **[3]**
11/04 . . specially adapted for measuring length or width of objects while moving
11/06 . . for measuring thickness
11/08 . for measuring diameters
11/10 . . of objects while moving
11/12 . . internal diameters
11/14 . for measuring distance or clearance between spaced objects or spaced apertures (G01B 11/26 takes precedence; rangefinders G01C 3/00)
11/16 . for measuring the deformation in a solid, e.g. optical strain gauge
11/22 . for measuring depth
11/24 . for measuring contours or curvatures
11/245 . . using a plurality of fixed, simultaneously operating transducers (G01B 11/255 takes precedence) **[7]**
11/25 . . by projecting a pattern, e.g. moiré fringes, on the object (G01B 11/255 takes precedence) **[7]**
11/255 . . for measuring radius of curvature **[7]**
11/26 . for measuring angles or tapers; for testing the alignment of axes
11/27 . . for testing the alignment of axes
11/275 . . for testing wheel alignment
11/28 . for measuring areas (integrators in general G06G)
11/30 . for measuring roughness or irregularity of surfaces

13/00 Measuring arrangements characterised by the use of fluids
13/02 . for measuring length, width, or thickness (G01B 13/08 takes precedence)
13/03 . . by measuring coordinates of points **[3]**
13/04 . . specially adapted for measuring length or width of objects while moving
13/06 . . for measuring thickness
13/08 . for measuring diameters
13/10 . . internal diameters
13/12 . for measuring distance or clearance between spaced objects or spaced apertures (G01B 13/18 takes precedence)
13/14 . for measuring depth
13/16 . for measuring contours or curvatures
13/18 . for measuring angles or tapers; for testing the alignment of axes
13/19 . . for testing the alignment of axes
13/195 . . for testing wheel alignment
13/20 . for measuring areas, e.g. pneumatic planimeter (integrators in general G06G)
13/22 . for measuring roughness or irregularity of surfaces
13/24 . for measuring the deformation in a solid **[3]**

15/00 Measuring arrangements characterised by the use of wave or particle radiation (G01B 9/00, G01B 11/00 take precedence) **[4]**
15/02 . for measuring thickness
15/04 . for measuring contours or curvatures
15/06 . for measuring the deformation in a solid
15/08 . for measuring roughness or irregularity of surfaces **[6]**

17/00 Measuring arrangements characterised by the use of infrasonic, sonic, or ultrasonic vibrations [4]
17/02 . for measuring thickness
17/04 . for measuring the deformation in a solid, e.g. by vibrating string
17/06 . for measuring contours or curvatures **[6]**
17/08 . for measuring roughness or irregularity of surfaces **[6]**

21/00 Measuring arrangements or details thereof in so far as they are not adapted to particular types of measuring means of the other groups of this subclass [3]
21/02 . for measuring length, width, or thickness (G01B 21/10 takes precedence) **[3]**
21/04 . . by measuring coordinates of points **[3]**
21/06 . . specially adapted for measuring length or width of objects while moving **[3]**
21/08 . . for measuring thickness **[3]**
21/10 . for measuring diameters **[3]**
21/12 . . of objects while moving **[3]**
21/14 . . internal diameters **[3]**
21/16 . for measuring distance or clearance between spaced objects **[3]**
21/18 . for measuring depth **[3]**
21/20 . for measuring contours or curvatures, e.g. determining profile **[3]**
21/22 . for measuring angles or tapers; for testing the alignment of axes **[3]**
21/24 . . for testing the alignment of axes **[3]**
21/26 . . for testing wheel alignment **[3]**
21/28 . for measuring areas (integrators in general G06G) **[3]**
21/30 . for measuring roughness or irregularity of surfaces **[3]**
21/32 . for measuring the deformation in a solid **[3]**

G01C MEASURING DISTANCES, LEVELS OR BEARINGS; **SURVEYING**; **NAVIGATION**; **GYROSCOPIC INSTRUMENTS**; **PHOTOGRAMMETRY OR VIDEOGRAMMETRY** (measuring liquid level G01F; radio navigation, determining distance or velocity by use of propagation effects, e.g. Doppler effect, propagation time, of radio waves, analogous arrangements using other waves G01S)

(1) In this subclass, the following term is used with the meaning indicated:
– "navigation" means determining the position and course of land vehicles, ships, aircraft, and space vehicles.

(2) Attention is drawn to the Notes following the title of class G01.

Subclass index

1/00 Measuring angles
1/02 . Theodolites
1/04 . . combined with cameras
1/06 . . Arrangements for reading scales
1/08 . Sextants
1/10 . . including an artificial horizon (G01C 1/14 takes precedence)
1/12 . . . with a stabilised mirror
1/14 . . Periscopic sextants

3/00 Measuring distances in line of sight; **Optical rangefinders** (tapes, chains, or wheels for measuring length G01B 3/00; active triangulation systems, i.e. using the transmission and reflection of electromagnetic waves other than radio waves, G01S 17/48) **[1,8]**
3/02 . Details
3/04 . . Adaptation of rangefinders for combination with telescopes or binoculars
3/06 . . Use of electric means to obtain final indication
3/08 . . . Use of electric radiation detectors
3/10 . using a parallactic triangle with variable angles and a base of fixed length in the observation station, e.g. in the instrument **[1,8]**
3/12 . . with monocular observation at a single point, e.g. coincidence type (G01C 3/20 takes precedence)
3/14 . . with binocular observation at a single point, e.g. stereoscopic type (G01C 3/20 takes precedence)
3/16 . . . Measuring marks
3/18 . . with one observation point at each end of the base (G01C 3/20 takes precedence)
3/20 . . with adaptation to the measurement of the height of an object
3/22 . using a parallactic triangle with variable angles and a base of fixed length at, near, or formed by, the object **[1,8]**
3/24 . using a parallactic triangle with fixed angles and a base of variable length in the observation station, e.g. in the instrument **[1,8]**
3/26 . using a parallactic triangle with fixed angles and a base of variable length at, near, or formed by, the object **[1,8]**
3/28 . . with provision for reduction of the distance into the horizontal plane
3/30 . . . with adaptation to the measurement of the height of an object, e.g. tacheometers
3/32 . by focusing the object, e.g. on a ground glass screen

5/00 Measuring height; **Measuring distances transverse to line of sight**; **Levelling between separated points**; **Surveyors' levels** (G01C 3/20, G01C 3/30 take precedence)
5/02 . involving automatic stabilisation of the line of sight
5/04 . Hydrostatic levelling, i.e. by flexibly interconnected liquid containers at separated points
5/06 . by using barometric means

7/00 Tracing profiles (by photogrammetry or videogrammetry G01C 11/00)
7/02 . of land surfaces
7/04 . . involving a vehicle which moves along the profile to be traced
7/06 . of cavities, e.g. tunnels

9/00 Measuring inclination, e.g. by clinometers, by levels
9/02 . Details
9/04 . . Transmission means between sensing element and final indicator for giving an enlarged reading
9/06 . . Electric or photoelectric indication or reading means
9/08 . . Means for compensating acceleration forces due to movement of instrument
9/10 . by using rolling bodies
9/12 . by using a single pendulum (plumb lines G01C 15/10)
9/14 . . movable in more than one direction
9/16 . by using more than one pendulum
9/18 . by using liquids
9/20 . . the indication being based on the inclination of the surface of a liquid relative to its container
9/22 . . . with interconnected containers in fixed relation to each other
9/24 . . in closed containers partially filled with liquid so as to leave a gas bubble
9/26 . . . Details

9/28 . . . . Mountings
9/30 . . . . Means for adjusting dimensions of bubble
9/32 . . . . Means for facilitating the observation of the position of the bubble, e.g. illuminating means
9/34 . . . of the tubular type, i.e. for indicating the level in one direction only
9/36 . . . of the spherical type, i.e. for indicating the level in all directions

11/00 Photogrammetry or videogrammetry, e.g. stereogrammetry; Photographic surveying [1,8]

11/02 . Picture-taking arrangements specially adapted for photogrammetry or photographic surveying, e.g. controlling overlapping of pictures
11/04 . Interpretation of pictures
11/06 . . by comparison of two or more pictures of the same area
11/08 . . . the pictures not being supported in the same relative position as when they were taken
11/10 . . . . using computers to control the position of the pictures
11/12 . . . the pictures being supported in the same relative position as when they were taken
11/14 . . . . with optical projection (G01C 11/26 takes precedence)
11/16 . . . . . in a common plane
11/18 . . . . . involving scanning means
11/20 . . . . . in separate planes
11/22 . . . . with mechanical projection (G01C 11/26 takes precedence)
11/24 . . . . with optical-mechanical projection (G01C 11/26 takes precedence)
11/26 . . . . using computers to control the position of the pictures
11/28 . . . Special adaptation for recording picture point data, e.g. for profiles
11/30 . . by triangulation
11/32 . . . Radial triangulation
11/34 . . . Aerial triangulation
11/36 . Videogrammetry, i.e. electronic processing of video signals from different sources to give parallax or range information **[8]**

13/00 Surveying specially adapted to open water, e.g. sea, lake, river or canal (liquid level metering G01F)

15/00 Surveying instruments or accessories not provided for in groups G01C 1/00 to G01C 13/00

15/02 . Means for marking measuring points
15/04 . . Permanent marks; Boundary markers
15/06 . . Surveyors' staffs; Movable markers
15/08 . . . Plumbing or registering staffs or markers over ground marks
15/10 . Plumb lines
15/12 . Instruments for setting out fixed angles, e.g. right angles
15/14 . Artificial horizons

17/00 Compasses; Devices for ascertaining true or magnetic north for navigation or surveying purposes (using gyroscopic effect G01C 19/00)

17/02 . Magnetic compasses
17/04 . . with north-seeking magnetic elements, e.g. needles
17/06 . . . Suspending magnetic elements
17/08 . . . . by flotation
17/10 . . . Comparing observed direction with north indication
17/12 . . . . by sighting means, e.g. for surveyors' compasses
17/14 . . . . by reference marks, e.g. for ships' compasses
17/16 . . . . by clinometers, e.g. for determining dip or strike of geological strata
17/18 . . . Supporting or suspending compasses, e.g. by gimbal, by flotation
17/20 . . . Observing the compass card or needle
17/22 . . . . by projection
17/24 . . . . Illumination
17/26 . . . . using electric pick-offs for transmission to final indicator, e.g. photocell
17/28 . . Electromagnetic compasses (with north-seeking magnetic elements and having electric pick-offs G01C 17/26)
17/30 . . . Earth-inductor compasses
17/32 . . . Electron compasses
17/34 . Sun- or astro-compasses
17/36 . Repeaters for remote indication of readings of a master compass
17/38 . Testing, calibrating, or compensating of compasses

19/00 Gyroscopes; Turn-sensitive devices with vibrating masses; Turn-sensitive devices without moving masses

19/02 . Rotary gyroscopes
19/04 . . Details
19/06 . . . Rotors
19/08 . . . . electrically driven (G01C 19/14 takes precedence)
19/10 . . . . . Power supply
19/12 . . . . fluid driven (G01C 19/14 takes precedence)
19/14 . . . . Fluid rotors
19/16 . . . Suspensions; Bearings
19/18 . . . . providing movement of rotor with respect to its rotational axes (G01C 19/20, G01C 19/24 take precedence)
19/20 . . . . in fluid
19/22 . . . . torsional
19/24 . . . . using magnetic or electrostatic fields
19/26 . . . Caging, i.e. immobilising moving parts, e.g. for transport
19/28 . . . Pick-offs, i.e. devices for taking off an indication of the displacement of the rotor axis
19/30 . . . Erection devices, i.e. devices for restoring rotor axis to a desired position (for instrument indicating the vertical G01C 19/46)
19/32 . . . Indicating or recording means specially adapted for rotary gyroscopes
19/34 . . for indicating a direction in the horizontal plane, e.g. directional gyroscopes
19/36 . . . with north-seeking action by magnetic means, e.g. gyromagnetic compasses
19/38 . . . with north-seeking action by other than magnetic means, e.g. gyrocompasses using earth's rotation
19/40 . . for control by signals from a master compass, i.e. repeater compasses
19/42 . . for indicating rate of turn; for integrating rate of turn
19/44 . . for indicating the vertical
19/46 . . . Erection devices for restoring rotor axis to a desired position

19/48 . . . . operating by electrical means (G01C 19/54 takes precedence)
19/50 . . . . operating by mechanical means (G01C 19/54 takes precedence)
19/52 . . . . operating by fluid means (G01C 19/54 takes precedence)
19/54 . . . . with correction for acceleration forces due to movement of instrument
19/56 . Turn-sensitive devices with vibrating masses, e.g. tuning fork
19/58 . Turn-sensitive devices without moving masses **[3]**
19/60 . . Electronic or nuclear magnetic resonance gyrometers **[3,4]**
19/62 . . . with optical pumping **[3]**
19/64 . . Gyrometers using the Sagnac effect, i.e. rotation-induced shifts between counter-rotating electromagnetic beams **[3]**
19/66 . . . Ring laser gyrometers **[5]**
19/68 . . . . Lock-in prevention **[5]**
19/70 . . . . . by mechanical means **[5]**
19/72 . . . with counter-rotating light beams in a passive ring, e.g. fibre laser gyrometers **[5]**

21/00 Navigation; **Navigational instruments not provided for in groups G01C 1/00 to G01C 19/00** (measuring distance traversed on the ground by a vehicle G01C 22/00; control of position, course, altitude or attitude of vehicles G05D 1/00; traffic control systems for road vehicles involving transmission of navigation instructions to the vehicle G08G 1/0968)

21/02 . by astronomical means (G01C 21/24, G01C 21/26 take precedence) **[1,7]**
21/04 . by terrestrial means (G01C 21/24, G01C 21/26 take precedence) **[1,7]**
21/06 . . involving measuring of drift angle; involving correction for drift
21/08 . . involving use of the magnetic field of the earth
21/10 . by using measurement of speed or acceleration (G01C 21/24, G01C 21/26 take precedence) **[1,7]**
21/12 . . executed aboard the object being navigated; Dead reckoning
21/14 . . . by recording the course traversed by the object (G01C 21/16 takes precedence)
21/16 . . . by integrating acceleration or speed, i.e. inertial navigation
21/18 . . . . Stabilised platforms, e.g. by gyroscope
21/20 . Instruments for performing navigational calculations (G01C 21/24, G01C 21/26 take precedence) **[1,7]**
21/22 . . Plotting boards
21/24 . specially adapted for cosmonautical navigation
21/26 . specially adapted for navigation in a road network **[7]**
21/28 . . with correlation of data from several navigational instruments **[7]**
21/30 . . . Map- or contour-matching **[7]**
21/32 . . . . Structuring or formatting of map data **[7]**
21/34 . . Route searching; Route guidance **[7]**
21/36 . . . Input/output arrangements for on-board computers **[7]**

22/00 Measuring distance traversed on the ground by vehicles, persons, animals or other moving solid bodies, e.g. using odometers or using pedometers

22/02 . by conversion into electric waveforms and subsequent integration, e.g. using tachometer generator

23/00 Combined instruments indicating more than one navigational value, e.g. for aircraft; **Combined measuring devices for measuring two or more variables of movement, e.g. distance, speed, acceleration**

25/00 Manufacturing, calibrating, cleaning, or repairing instruments or devices referred to in the other groups of this subclass (testing, calibrating, or compensating compasses G01C 17/38)

G01D MEASURING NOT SPECIALLY ADAPTED FOR A SPECIFIC VARIABLE; ARRANGEMENTS FOR MEASURING TWO OR MORE VARIABLES NOT COVERED BY A SINGLE OTHER SUBCLASS; TARIFF METERING APPARATUS; MEASURING OR TESTING NOT OTHERWISE PROVIDED FOR

(1) This subclass covers:
- devices for indicating or recording the results of measurements, not peculiar to variables covered by a single other subclass;
- analogous arrangements but in which the input is not a variable to be measured, e.g. a hand operation;
- details of measuring instruments, which are of general interest;
- measurement transducers not adapted solely for the measurement of a single specified variable and not provided for elsewhere, i.e. means for converting the output of a sensing member to another variable where the form or nature of the sensing member does not constrain the means for converting;
- measuring or testing not otherwise provided for.

(2) Attention is drawn to the Notes following the title of class G01.

Subclass index

1/00 **Measuring arrangements giving results other than momentary value of variable, of general application** (G01D 3/00 takes precedence; in tariff metering apparatus G01D 4/00; transducers not specially adapted for a specific variable G01D 5/00)

1/02 . giving mean values, e.g. root mean square values (measuring root mean square values of currents or voltages G01R 19/02)

1/04 . giving integrated values (giving mean values G01D 1/02)

1/06 . . by intermittent summation

1/08 . . . over fixed periods of time

1/10 . giving differentiated values

1/12 . giving a maximum or minimum of a value

1/14 . giving a distribution function of a value, i.e. number of times the value comes within specified ranges of amplitude

1/16 . giving a value which is a function of two or more values, e.g. product, ratio

1/18 . with arrangements for signalling that a predetermined value of an unspecified parameter has been exceeded (G01D 1/14 takes precedence) **[3]**

3/00 **Measuring arrangements with provision for the special purposes referred to in the subgroups of this group**

3/02 . with provision for altering or correcting the transfer function

3/024 . . for range change; Arrangements for substituting one sensing member by another **[6]**

3/028 . mitigating undesired influences, e.g. temperature, pressure **[6]**

3/032 . . affecting incoming signal, e.g. by averaging; gating undesired signals **[6]**

3/036 . . on measuring arrangements themselves **[6]**

3/06 . with provision for operation by a null method

3/08 . with provision for safeguarding the apparatus, e.g. against abnormal operation, against breakdown

3/10 . with provision for switching-in of additional or auxiliary indicators or recorders

4/00 **Tariff metering apparatus** (in taximeters G07B 13/00; apparatus actuated by coins, cards or the like with meter-controlled dispensing of liquid, gas, or electricity G07F 15/00)

4/02 . Details

4/04 . . Resetting-mechanisms, e.g. for indicating members

4/06 . . Arrangement of clutches between driving and indicating member, e.g. of hysteresis clutch (G01D 4/04 takes precedence)

4/08 . . Transfer of indication from a counter into a summing counter

4/10 . Maximum indicating or recording apparatus, i.e. where the tariff for a period is based on a maximum demand within that period

4/12 . . Apparatus for indicating or recording progressive maximum

4/14 . . Fixed-demand indicating or recording apparatus, i.e. where indication is made when a predetermined quantity has been consumed during a time interval greater or less than a predetermined time interval

4/16 . Apparatus for indicating or recording maximum or minimum load hours

4/18 . Apparatus for indicating or recording overconsumption with opposing torque which comes into effect when a predetermined level is exceeded, e.g. subtraction meters

5/00 **Mechanical means for transferring the output of a sensing member**; **Means for converting the output of a sensing member to another variable where the form or nature of the sensing member does not constrain the means for converting**; **Transducers not specially adapted for a specific variable** (G01D 3/00 takes precedence; specially adapted for apparatus giving results other than momentary value of variable G01D 1/00) **[6]**

Note

Groups G01D 5/02 to G01D 5/54 are distinguished by the means which is of major importance. Thus the mere application of other means for giving a final indication does not affect the classification.

5/02 . using mechanical means

5/04 . . using levers; using cams; using gearing

5/06 . . acting through a wall or enclosure, e.g. by bellows, by magnetic coupling

5/08 . . Reducing the effects of friction, e.g. by applying vibrations

5/10 . . Applying external forces to increase force available for operation of indicating or recording part

5/12 . using electric or magnetic means (G01D 5/06 takes precedence) **[3]**

5/14 . . influencing the magnitude of a current or voltage

5/16 . . . by varying resistance

5/165 . . . . by relative movement of a point of contact and a resistive track **[6]**

5/18 . . . by varying effective impedance of discharge tubes or semiconductor devices

5/20 . . . by varying inductance, e.g. by a movable armature

5/22 . . . . differentially influencing two coils

5/24 . . . by varying capacitance

5/241 . . . . by relative movement of capacitor electrodes **[6]**

5/242 . . . by varying output of an electrodynamic device, e.g. of a tachodynamo

5/243 . . influencing the phase or frequency of ac

5/244 . . influencing characteristics of pulses or pulse trains; generating pulses or pulse trains **[6]**

5/245 . . . using a variable number of pulses in a train

5/246 . . . by varying the duration of individual pulses

5/247 . . . using time shifts of pulses

5/248 . . . by varying pulse repetition frequency

5/249 . . . using pulse code

5/25 . . Selecting one or more conductors or channels from a plurality of conductors or channels, e.g. by closing contacts

5/251 . . . one conductor or channel

5/252 . . . a combination of conductors or channels

5/26 . using optical means, i.e. using infra-red, visible or ultra-violet light

5/28 . . with deflection of beams of light, e.g. for direct optical indication (G01D 5/40 takes precedence)

5/30 . . . the beams of light being detected by photocells

5/32 . . with attenuation or whole or partial obturation of beams of light (G01D 5/40 takes precedence)
5/34 . . . the beams of light being detected by photocells
5/347 . . . . using displacement encoding scales **[6]**
5/353 . . . . influencing the transmission properties of an optical fibre **[6]**
5/36 . . . . Forming the light into pulses
5/38 . . . . . by diffraction gratings
5/39 . . Scanning a visible indication of the measured value and reproducing this indication at a remote place, e.g. on the screen of a cathode-ray tube
5/40 . . specially adapted for use with infra-red light
5/42 . using fluid means
5/44 . . using jets of fluid
5/46 . . . by deflecting or throttling the flow
5/48 . using wave or particle radiation means (G01D 5/26 takes precedence)
5/50 . . derived from a radioactive source
5/52 . . . detected by a counter tube
5/54 . using means specified in two or more of groups G01D 5/02, G01D 5/12, G01D 5/26, G01D 5/42, and G01D 5/48

Note

Classification is made in this group only if no other group can be selected as being predominantly applicable.

Note

For a combination of two or more of the means specified, the first applicable one of subgroups G01D 5/56 to G01D 5/62 takes precedence over any others of these groups.

5/56 . . using electric or magnetic means
5/58 . . using optical means, i.e. using infra-red, visible or ultra-violet light
5/60 . . using fluid means
5/62 . . using wave or particle radiation means not covered by group G01D 5/58

7/00 Indicating measured values
7/02 . Indicating value of two or more variables simultaneously
7/04 . . using a separate indicating element for each variable
7/06 . . . Luminous indications projected on a common screen
7/08 . . using a common indicating element for two or more variables
7/10 . . . giving indication in co-ordinate form
7/12 . Audible indication of meter readings, e.g. for the blind **[2]**

9/00 Recording measured values
9/02 . Producing one or more recordings of the values of a single variable
9/04 . . with provision for multiple or alternative recording
9/06 . . . Multiple recording, e.g. duplicating
9/08 . . . . giving both graphical and numerical recording
9/10 . . the recording element, e.g. stylus, being controlled in accordance with the variable, and the recording medium, e.g. paper roll, being controlled in accordance with time
9/12 . . . recording occurring continuously
9/14 . . . . with provision for altering speed of recording medium in accordance with the magnitude of the variable to be recorded
9/16 . . . recording occurring at separated intervals, e.g. by chopper bar
9/18 . . . . recording element actuated only upon change in value of variable
9/20 . . the recording element, e.g. stylus, being controlled in accordance with time and the recording medium, e.g. paper roll, being controlled in accordance with the variable
9/22 . . . recording occurring continuously
9/24 . . . recording occurring at separated intervals, e.g. by chopper bar
9/26 . . either the recording element, e.g. stylus, or the recording medium, e.g. paper roll, being controlled in accordance with both time and the variable
9/28 . Producing one or more recordings, each recording being of the values of two or more different variables (G01D 9/38, G01D 9/40 take precedence)
9/30 . . there being a separate recording element for each variable, e.g. multiple-pen recorder
9/32 . . there being a common recording element for two or more variables
9/34 . . . the variables being recorded in predetermined sequence
9/36 . . . . in separate columns
9/38 . Producing one or more recordings, each recording being produced by controlling the recording element, e.g. stylus, in accordance with one variable and controlling the recording medium, e.g. paper roll, in accordance with another variable
9/40 . Producing one or more recordings, each recording being produced by controlling either the recording element, e.g. stylus, or the recording medium, e.g. paper roll, in accordance with two or more variables
9/42 . Recording indications of measuring instruments by photographic means, e.g. of counters

11/00 Component parts of measuring arrangements not specially adapted for a specific variable (G01D 13/00, G01D 15/00 take precedence)
11/02 . Bearings or suspensions for moving parts
11/04 . . Knive-edge bearings
11/06 . . Strip or thread suspensions, e.g. in tension
11/08 . Elements for balancing moving parts
11/10 . Elements for damping the movement of parts
11/12 . . using fluid damping
11/14 . . using magnetic induction damping
11/16 . Elements for restraining or preventing the movement of parts, e.g. for zeroising (caging of moving parts when not in use G01D 11/20)
11/18 . . Springs (G01D 11/06 takes precedence)
11/20 . Caging devices for moving parts when not in use
11/22 . . automatically actuated
11/24 . Housings
11/26 . . Windows; Cover glasses; Sealings therefor
11/28 . Structurally-combined illuminating devices
11/30 . Supports specially adapted for an instrument; Supports specially adapted for a set of instruments

13/00 **Component parts of indicators for measuring arrangements not specially adapted for a specific variable**

13/02 . Scales; Dials
13/04 . . Construction
13/06 . . . Moving bands (G01D 13/10 takes precedence)
13/08 . . . Rotating drums (G01D 13/10 takes precedence)
13/10 . . . with adjustable scales; with auxiliary scales, e.g. vernier
13/12 . . Graduation
13/14 . . . for rotations of more than 360°
13/16 . . . with staggered markings
13/18 . . . with raised or recessed markings
13/20 . . . with luminescent markings
13/22 . Pointers, e.g. settable pointer
13/24 . . for indicating a maximum or minimum
13/26 . . adapted to perform a further operation, e.g. making electrical contact
13/28 . . with luminescent markings

15/00 **Component parts of recorders for measuring arrangements not specially adapted for a specific variable**

15/02 . Styli or other recording elements acting to mechanically deform or perforate the recording surface (printing recording elements G01D 15/20)
15/04 . . acting to punch holes in the recording surface
15/06 . Electric recording elements, e.g. electrolytic
15/08 . . for spark erosion
15/10 . Heated recording elements acting on heat-sensitive layers
15/12 . Magnetic recording elements
15/14 . Optical recording elements; Recording elements using X- or nuclear radiation
15/16 . Recording elements transferring recording material, e.g. ink, to the recording surface (printing recording elements G01D 15/20)
15/18 . . Nozzles emitting recording material
15/20 . Recording elements for printing with ink or for printing by deformation or perforation of the recording surface, e.g. embossing
15/22 . Chopper bars for bringing recording element into contact with recording surface
15/24 . Drives for recording elements or surfaces, not covered by group G01D 5/00
15/26 . . operating by clockwork
15/28 . Holding means for recording surfaces; Guiding means for recording surfaces; Exchanging means for recording surfaces
15/30 . . for foldable strip charts
15/32 . . for circular charts
15/34 . Recording surfaces

18/00 **Testing or calibrating of apparatus or arrangements provided for in groups G01D 1/00 to G01D 15/00**

21/00 **Measuring or testing not otherwise provided for**

21/02 . Measuring two or more variables by means not covered by a single other subclass

---

G01F **MEASURING VOLUME, VOLUME FLOW, MASS FLOW, OR LIQUID LEVEL**; **METERING BY VOLUME** (milk flow sensing devices in milking machines or devices A01J 5/01; measuring or recording blood flow A61B 5/02, A61B 8/06; metering media to the human body A61M 5/168; burettes or pipettes B01L 3/02; arrangements of liquid volume meters or volume-flow meters in liquid-delivering apparatus, e.g. for retail sale purposes, B67D 7/16; pumps, fluid motors, details common to measuring or metering devices and pumps or fluid motors F01 to F04; locating, determining distance or velocity using reflection or reradiation of radio waves, analogous arrangements using other waves G01S; systems for ratio control G05D 11/00) **[2,5]**

Note

Attention is drawn to the Notes following the title of class G01.

Subclass index

Measuring volume flow

1/00 **Measuring the volume flow or mass flow of fluid or fluent solid material wherein the fluid passes through the meter in a continuous flow** (measuring a proportion of the volume flow G01F 5/00; measuring speed of flow G01P 5/00; indicating presence or absence of flow G01P 13/00; regulating quantity or ratio G05D) **[2]**

Note

Groups G01F 1/704 to G01F 1/76 take precedence over groups G01F 1/05 to G01F 1/68. **[2]**

1/05 . by using mechanical effects **[2]**
1/06 . . using rotating vanes with tangential admission **[2]**
1/07 . . . with mechanical coupling to the indicating device **[2]**
1/075 . . . with magnetic or electromagnetic coupling to the indicating device **[2]**
1/08 . . . Adjusting, correcting, or compensating means therefor **[2]**

1/10 . . using rotating vanes with axial admission **[2]**
1/11 . . . with mechanical coupling to the indicating device **[2]**
1/115 . . . with magnetic or electromagnetic coupling to the indicating device **[2]**
1/12 . . . Adjusting, correcting, or compensating means therefor
1/20 . . by detection of dynamic effects of the fluid flow **[2]**
1/22 . . . by variable-area meters **[2]**
1/24 . . . . with magnetic or electric coupling to the indicating device **[2]**
1/26 . . . . of the valve type **[2]**
1/28 . . . by drag-force, e.g. vane type or impact flowmeter **[2]**
1/30 . . . . for fluent solid material **[2]**
1/32 . . . by swirl flowmeter, e.g. using Karman vortices **[2]**
1/34 . . by measuring pressure or differential pressure **[2]**
1/36 . . . the pressure or differential pressure being created by the use of flow constriction **[2]**
1/37 . . . . the pressure or differential pressure being measured by means of communicating tubes or reservoirs with movable fluid levels, e.g. by U-tubes **[2]**
1/38 . . . . the pressure or differential pressure being measured by means of a movable element, e.g. diaphragm, piston, Bourdon tube or flexible capsule **[2]**
1/40 . . . . Details of construction of the flow constriction devices **[2]**
1/42 . . . . . Orifices or nozzles **[2]**
1/44 . . . . . Venturi tubes **[2]**
1/46 . . . . . Pitot tubes (specially adapted for measuring speed of fluids G01P 5/165) **[2]**
1/48 . . . the pressure or differential pressure being created by a capillary element **[2]**
1/50 . . . Correcting or compensating means **[2]**
1/52 . . by measuring the height of the fluid level due to the lifting power of the fluid flow **[2]**
1/54 . . by means of chains, flexible bands, or wires introduced into, and moved by, the flow **[2]**
1/56 . by using electric or magnetic effects (G01F 1/66 takes precedence) **[2]**
1/58 . . by electromagnetic flowmeters **[2]**
1/60 . . . Circuits therefor **[2]**
1/64 . . by measuring electrical currents passing through the fluid flow; by measuring electrical potential generated by the fluid flow, e.g. by electrochemical, contact, or friction effects (G01F 1/58 takes precedence) **[2]**
1/66 . by measuring frequency, phase shift, or propagation time of electromagnetic or other waves, e.g. ultrasonic flowmeters **[2]**
1/68 . by using thermal effects **[2]**
1/684 . . Structural arrangements; Mounting of elements, e.g. in relation to fluid flow **[6]**
1/688 . . . using a particular type of heating, cooling or sensing element **[6]**
1/69 . . . . of resistive type **[6]**
1/692 . . . . . Thin-film arrangements **[6]**
1/696 . . Circuits therefor, e.g. constant-current flow meters **[6]**
1/698 . . . Feedback or rebalancing circuits, e.g. self heated constant temperature flowmeters **[6]**
1/699 . . . . by control of a separate heating or cooling element **[6]**
1/704 . using marked regions or existing inhomogeneities within the fluid stream, e.g. statistically occurring variations in a fluid parameter (G01F 1/76, G01F 25/00 take precedence) **[4]**
1/708 . . Measuring the time taken to traverse a fixed distance **[4]**
1/712 . . . using auto-correlation or cross-correlation detection means (measuring speed by using correlation detection means in general G01P 3/80, G01P 5/22) **[4]**
1/716 . . . using electron paramagnetic resonance (EPR) or nuclear magnetic resonance (NMR) **[4]**
1/72 . Devices for measuring pulsing fluid flows **[2]**
1/74 . Devices for measuring flow of a fluid or flow of a fluent solid material in suspension in another fluid **[2]**
1/76 . Devices for measuring mass flow of a fluid or a fluent solid material (weighing a continuous stream of material during flow G01G 11/00) **[2]**
1/78 . . Direct mass flowmeters **[2]**
1/80 . . . operating by measuring pressure, force, momentum, or frequency of a fluid flow to which a rotational movement has been imparted **[2]**
1/82 . . . . using a driven wheel as impeller and one or more other wheels or moving elements which are angularly restrained by a resilient member, e.g. spring member, as the measuring device **[2]**
1/84 . . . . Gyroscopic mass flowmeters **[2]**
1/86 . . Indirect mass flowmeters, e.g. measuring volume flow and density, temperature, or pressure **[2]**
1/88 . . . with differential-pressure measurement to determine the volume flow **[2]**
1/90 . . . with positive-displacement meter or turbine meter to determine the volume flow **[2]**

3/00 Measuring the volume flow of fluids or fluent solid material wherein the fluid passes through the meter in successive and more or less isolated quantities, the meter being driven by the flow (measuring a proportion of the volume flow G01F 5/00)

3/02 . with measuring chambers which expand or contract during measurement
3/04 . . having rigid movable walls
3/06 . . . comprising members rotating in a fluid-tight or substantially fluid-tight manner in a housing
3/08 . . . . Rotary-piston or ring-piston meters
3/10 . . . . Geared or lobed impeller meters
3/12 . . . . Meters with nutating members, e.g. discs
3/14 . . . comprising reciprocating pistons, e.g. reciprocating in a rotating body
3/16 . . . . in stationary cylinders
3/18 . . . . . involving two or more cylinders
3/20 . . having flexible movable walls, e.g. diaphragms, bellows (diaphragms or bellows therefor G01F 15/16)
3/22 . . . for gases
3/24 . with measuring chambers moved during operation (wet gas-meters G01F 3/30)
3/26 . . Tilting-trap meters
3/28 . . on carriers rotated by the weight of the liquid in the measuring chambers
3/30 . Wet gas-meters
3/32 . . comprising partitioned drums rotating or nutating in a liquid

3/34 . . comprising bells reciprocating in a liquid
3/36 . with stationary measuring chambers having constant volume during measurement (with measuring chambers which expand or contract during measurement G01F 3/02)
3/38 . . having only one measuring chamber

5/00 Measuring a proportion of the volume flow

7/00 Volume-flow measuring devices with two or more measuring ranges; **Compound meters**

9/00 Measuring volume flow relative to another variable, e.g. of liquid fuel for an engine
9/02 . wherein the other variable is the speed of a vehicle

Metering by volume

11/00 Apparatus requiring external operation adapted at each repeated and identical operation to measure and separate a predetermined volume of fluid or fluent solid material from a supply or container, without regard to weight, and to deliver it
11/02 . with measuring chambers which expand or contract during measurement
11/04 . . of the free-piston type
11/06 . . . with provision for varying the stroke of the piston
11/08 . . of the diaphragm or bellows type (diaphragms or bellows therefor G01F 15/16)
11/10 . with measuring chambers moved during operation
11/12 . . of the valve type, i.e. the separating being effected by fluid-tight or powder-tight movements (involving the tilting or inverting of the supply vessel G01F 11/26)
11/14 . . . wherein the measuring chamber reciprocates
11/16 . . . . for liquid or semiliquid
11/18 . . . . for fluent solid material
11/20 . . . wherein the measuring chamber rotates or oscillates
11/22 . . . . for liquid or semiliquid
11/24 . . . . for fluent solid material
11/26 . . wherein the measuring chamber is filled and emptied by tilting or inverting the supply vessel, e.g. bottle-emptying apparatus
11/28 . with stationary measuring chambers having constant volume during measurement (with measuring chambers which expand or contract during measurement G01F 11/02)
11/30 . . with supply and discharge valves of the lift or plug-lift type
11/32 . . . for liquid or semiliquid
11/34 . . . for fluent solid material
11/36 . . with supply or discharge valves of the rectilinearly-moved slide type
11/38 . . . for liquid or semiliquid
11/40 . . . for fluent or solid material
11/42 . . with supply or discharge valves of the rotary or oscillatory type
11/44 . . . for liquid or semiliquid
11/46 . . . for fluent solid material

13/00 Apparatus for measuring by volume and delivering fluids or fluent solid materials, not provided for in the preceding groups

15/00 Details of, or accessories for, apparatus of groups G01F 1/00 to G01F 13/00 insofar as such details or appliances are not adapted to particular types of such apparatus
15/02 . Compensating or correcting for variations in pressure, density, or temperature
15/04 . . of gases to be measured
15/06 . Indicating or recording devices, e.g. for remote indication
15/07 . Integration to give total flow, e.g. using mechanically-operated integrating mechanism **[2]**
15/075 . . using electrically-operated integrating means **[2]**
15/08 . Air or gas separators in combination with liquid meters; Liquid separators in combination with gas-meters
15/10 . Preventing damage by freezing or excess pressure or insufficient pressure
15/12 . Cleaning arrangements; Filters (filters in general B01D)
15/14 . Casings, e.g. of special material
15/16 . Diaphragms; Bellows; Mountings therefor
15/18 . Supports or connecting means for meters

Measuring volume

17/00 Methods or apparatus for determining the capacity of containers or cavities, or the volume of solid bodies (measuring linear dimensions to determine volume G01B)

19/00 Calibrated capacity measures for fluids or fluent solid material, e.g. measuring cups

22/00 Methods or apparatus for measuring volume of fluids or fluent solid material, not otherwise provided for [5]
22/02 . involving measurement of pressure **[5]**

Level indicators

23/00 Indicating or measuring liquid level, or level of fluent solid material, e.g. indicating in terms of volume, indicating by means of an alarm (in wells E21B 47/04; adaptation to, or mounting on, steam boilers F22B 37/78; level regulation G05D; alarm devices G08B)
23/02 . by gauge glasses or other apparatus involving a window or transparent tube for directly observing the level to be measured or the level of a liquid column in free communication with the main body of the liquid
23/04 . by dip members, e.g. dip-sticks
23/14 . by measurement of pressure (measuring pressure in general G01L)
23/16 . . Indicating, recording, or alarm devices being actuated by mechanical or fluid means, e.g. using gas, mercury, or a diaphragm as transmitting element, or by a column of liquid
23/18 . . Indicating, recording, or alarm devices actuated electrically
23/20 . by measurement of weight, e.g. to determine the level of stored liquefied gas (weighing in general G01G)
23/22 . by measurement of physical variables, other than linear dimensions, pressure, or weight, dependent on the level to be measured, e.g. by difference of heat transfer of steam or water (involving the use of floats G01F 23/30)
23/24 . . by measuring variations of resistance of resistors due to contact with conductor fluid

23/26 . . by measuring variations of capacity or inductance of capacitors or inductors arising from the presence of liquid or fluent solid material in the electric or electromagnetic fields
23/28 . . by measuring the variations of parameters of electromagnetic or acoustic waves applied directly to the liquid or fluent solid material **[6]**
23/284 . . . Electromagnetic waves **[6]**
23/288 . . . . X-rays; Gamma rays **[6]**
23/292 . . . . Light **[6]**
23/296 . . . Acoustic waves **[6]**
23/30 . by floats (switches operated by floats H01H 35/18) **[4]**
23/32 . . using rotatable arms or other pivotable transmission elements **[4]**
23/34 . . . using mechanically actuated indicating means **[4]**
23/36 . . . using electrically actuated indicating means **[4]**
23/38 . . . using magnetically actuated indicating means **[4]**
23/40 . . using bands or wires as transmission elements **[4]**
23/42 . . . using mechanically actuated indicating means **[4]**
23/44 . . . using electrically actuated indicating means **[4]**
23/46 . . . using magnetically actuated indicating means **[4]**
23/48 . . using twisted spindles as transmission elements **[4]**
23/50 . . . using mechanically actuated indicating means **[4]**
23/52 . . . using electrically actuated indicating means **[4]**
23/54 . . . using magnetically actuated indicating means **[4]**
23/56 . . using elements rigidly fixed to, and rectilinearly moving with, the floats as transmission elements **[4]**
23/58 . . . using mechanically actuated indicating means **[4]**
23/60 . . . using electrically actuated indicating means **[4]**
23/62 . . . using magnetically actuated indicating means **[4]**
23/64 . . of the free float type **[4]**
23/66 . . . using mechanically actuated indicating means **[4]**
23/68 . . . using electrically actuated indicating means **[4]**
23/70 . . . . for sensing changes in level only at discrete points **[4]**
23/72 . . . using magnetically actuated indicating means **[4]**
23/74 . . . . for sensing changes in level only at discrete points **[4]**
23/76 . . characterised by the construction of the float **[4]**

25/00 Testing or calibrating of apparatus for measuring volume, volume flow, or liquid level, or for metering by volume

---

G01G WEIGHING

Note

Attention is drawn to the Notes following the title of class G01.

Subclass index

1/00 Weighing apparatus involving the use of a counterweight or other counterbalancing mass

1/02 . Pendulum-weight apparatus
1/04 . . the pendulum having a fixed pivot axis
1/06 . . . with a plurality of pendulums
1/08 . . the pendulum having a moving pivot axis, e.g. a floating pendulum
1/10 . . . with a plurality of pendulums
1/12 . . Constructional arrangements for obtaining equal indicative divisions
1/14 . . Temperature-compensating arrangements
1/16 . . Means for correcting for obliquity of mounting
1/18 . Balances involving the use of a pivoted beam, i.e. beam balances
1/20 . . Beam balances having the pans carried below the beam, and for use with separate counterweights
1/22 . . . for precision weighing
1/24 . . Platform-type scales, i.e. having the pans carried above the beam
1/26 . . with associated counterweight or set of counterweights
1/28 . . . involving means for automatically lifting counterweights corresponding to the load
1/29 . . . . with electrical or electromechanical control means **[3]**
1/30 . . . wherein the counterweight is in the form of a chain
1/32 . . . wherein the counterweights are in the form of rider-weights
1/34 . . . involving a fixed counterweight, with poise-weights selectively added to the load side
1/36 . . . wherein the counterweights are slidable along the beam, e.g. steelyards
1/38 . . . . with automatically-driven counterweight
1/40 . . specially adapted for weighing by substitution
1/42 . . Temperature-compensating arrangements

3/00 Weighing apparatus characterised by the use of elastically-deformable members, e.g. spring balances

3/02 . wherein the weighing element is in the form of a helical spring
3/04 . . using a plurality of springs
3/06 . wherein the weighing element is in the form of a spiral spring
3/08 . wherein the weighing element is in the form of a leaf spring
3/10 . wherein the torsional deformation of a weighing element is measured
3/12 . wherein the weighing element is in the form of a solid body stressed by pressure or tension during weighing
3/13 . . having piezo-electric or piezo-resistive properties **[3]**
3/14 . . measuring variations of electrical resistance (G01G 3/13 takes precedence) **[3]**
3/142 . . . Circuits specially adapted therefor **[3]**
3/145 . . . . involving comparison with a reference value (G01G 3/147 takes precedence) **[3]**
3/147 . . . . involving digital counting **[3]**
3/15 . . measuring variations of magnetic properties
3/16 . . measuring variations of frequency of oscillations of the body
3/18 . Temperature-compensating arrangements

5/00 Weighing apparatus wherein the balancing is effected by fluid action

5/02 . with a float or other member variably immersed in liquid
5/04 . with means for measuring the pressure imposed by the load on a liquid
5/06 . . using electrical indicating means **[3]**

7/00 Weighing apparatus wherein the balancing is effected by magnetic, electromagnetic, or electrostatic action, or by means not provided for in groups G01G 1/00 to G01G 5/00

7/02 . by electromagnetic action
7/04 . . with means for regulating the current to solenoids
7/06 . by electrostatic action

9/00 Methods of, or apparatus for, the determination of weight, not provided for in groups G01G 1/00 to G01G 7/00

11/00 Apparatus for weighing a continuous stream of material during flow; **Conveyer-belt weighers**

11/02 . having mechanical weight-sensitive devices
11/04 . having electrical weight-sensitive devices
11/06 . having fluid weight-sensitive devices
11/08 . having means for controlling the rate of feed or discharge
11/10 . . by controlling the height of the material on the belt
11/12 . . by controlling the speed of the belt
11/14 . using totalising or integrating devices
11/16 . . being electric or electronic devices **[3]**
11/18 . . . using digital counting **[3]**
11/20 . . being mechanical devices **[3]**

13/00 Weighing apparatus with automatic feed or discharge for weighing-out batches of material (for weighing a continuous stream G01G 11/00; check-weighing G01G 15/00; for fluids G01G 17/04; apportioning by weight materials to be mixed G01G 19/22; combinatorial weighing G01G 19/387) **[5]**

13/02 . Means for automatically loading weigh-pans or other receptacles, e.g. disposable containers, under control of the weighing mechanism
13/04 . . involving dribble-feed means controlled by the weighing mechanism to top up the receptacle to the target weight
13/06 . . . wherein the main feed is effected by gravity from a hopper or chute
13/08 . . . wherein the main feed is effected by mechanical conveying means, e.g. by belt conveyers, by vibratory conveyers
13/10 . . . wherein the main feed is effected by pneumatic conveying means, e.g. by fluidised feed of granular material
13/12 . . Arrangements for compensating for material suspended at cut-off, i.e. for material which is still falling from the feeder when the weigher stops the feeder
13/14 . . Arrangements for determination of, or compensation for, the tare weight of an unloaded container, e.g. of a disposable container
13/16 . Means for automatically discharging weigh receptacles under control of the weighing mechanism
13/18 . . by valves or flaps in the container bottom
13/20 . . by screw conveyers in the weigh receptacle
13/22 . . by tilting or rotating the receptacle
13/24 . Weighing mechanism control arrangements for automatic feed or discharge
13/26 . . involving fluid-pressure systems
13/28 . . involving variation of an electrical variable which is used to control loading or discharge of the receptacle
13/285 . . . involving comparison with a reference value (G01G 13/29 takes precedence) **[3]**
13/29 . . . involving digital counting **[3]**
13/295 . . . for controlling automatic loading of the receptacle **[3]**
13/30 . . involving limit switches or position-sensing switches
13/32 . . . involving photoelectric devices
13/34 . . involving mechanical linkage motivated by the weighing mechanism

15/00 Arrangements for check-weighing of materials dispensed into removable containers

15/02 . with provision for adding or removing a make-up quantity of material to obtain the desired net weight (dribble-feed means for automatic batch-weighers G01G 13/04)
15/04 . with provision for adding or removing a make-up quantity of material to obtain the desired gross weight (dribble-feed means for automatic batch-weighers G01G 13/04)

17/00 Apparatus for, or methods of, weighing material of special form or property (determining weight by measuring volume G01F)

17/02 . for weighing material of filamentary or sheet form
17/04 . for weighing fluids, e.g. gases, pastes
17/06 . . having means for controlling the supply or discharge
17/08 . for weighing livestock

19/00 Weighing apparatus or methods adapted for special purposes not provided for in groups G01G 11/00 to G01G 17/00

19/02 . for weighing wheeled or rolling bodies, e.g. vehicles
19/03 . . for weighing during motion (G01G 19/04, G01G 19/07 take precedence) **[3]**
19/04 . . for weighing railway vehicles
19/06 . . . on overhead rails
19/07 . . for weighing aircraft
19/08 . for incorporation in vehicles
19/10 . . having fluid weight-sensitive devices
19/12 . . having electrical weight-sensitive devices
19/14 . for weighing suspended loads (G01G 3/00 takes precedence)
19/16 . . having fluid weight-sensitive devices
19/18 . . having electrical weight-sensitive devices
19/20 . . for weighing unbalanced loads
19/22 . for apportioning materials by weighing prior to mixing them
19/24 . . using a single weighing apparatus
19/26 . . . associated with two or more counterweighted beams
19/28 . . . having fluid weight-sensitive devices
19/30 . . . having electrical weight-sensitive devices
19/32 . . using two or more weighing apparatus
19/34 . . with electrical control means
19/36 . . with mechanical control means
19/38 . . programme controlled, e.g. by perforated tape
19/387 . for combinatorial weighing, i.e. selecting a combination of articles whose total weight or number is closest to a desired value **[5]**
19/393 . . using two or more weighing units **[5]**
19/40 . with provisions for indicating, recording, or computing price or other quantities dependent on the weight (indicating means for weighing apparatus G01G 23/18; recording means for weighing apparatus G01G 23/18)
19/41 . . using mechanical computing means
19/413 . . using electromechanical or electronic computing means
19/414 . . . using electronic computing means only **[5]**
19/415 . . . . combined with recording means **[5]**
19/417 . . with provision for checking computing part of balance
19/42 . . for counting by weighing (G01G 19/387 takes precedence) **[5]**
19/44 . for weighing persons
19/46 . . Spring balances specially adapted for this purpose
19/48 . . Pendulum balances specially adapted for this purpose
19/50 . . having additional measuring devices, e.g. for height
19/52 . Weighing apparatus combined with other objects, e.g. with furniture (with walking-sticks A45B 3/08)
19/54 . . combined with writing implements or paper-knives
19/56 . . combined with handles of tools or of household implements
19/58 . . combined with handles of suit-cases or trunks
19/60 . . combined with fishing equipment, e.g. with fishing rods
19/62 . Over or under weighing apparatus **[3]**
19/64 . Percentage-indicating weighing apparatus, i.e. for expressing the weight as a percentage of a predetermined or initial weight **[3]**

21/00 Details of weighing apparatus

21/02 . Arrangements of bearings
21/04 . . of knife-edge bearings
21/06 . . of ball or roller bearings
21/07 . . of flexure-plate bearings **[3]**
21/08 . . Bearing mountings or adjusting means therefor
21/10 . . Floating suspensions; Arrangements of shock-absorbers
21/12 . . Devices for preventing derangement
21/14 . Beams
21/16 . . of composite construction; Connections between different beams
21/18 . Link connections between the beam and the weigh pan
21/20 . . for precision weighing apparatus
21/22 . Weigh-pans or other weighing receptacles; Weighing platforms
21/23 . Support or suspension of weighing platforms (G01G 21/24 takes precedence) **[3]**
21/24 . Guides or linkages for ensuring parallel motion of the weigh-pans
21/26 . Counterweights; Poise-weights; Sets of weights; Holders for the reception of weights
21/28 . Frames; Housings
21/30 . Means for preventing contamination by dust

23/00 Auxiliary devices for weighing apparatus

23/01 . Testing or calibrating of weighing apparatus **[3]**
23/02 . Relieving mechanisms; Arrestment mechanisms
23/04 . . for precision weighing apparatus
23/06 . Means for damping oscillations, e.g. of weigh-beams
23/08 . . by fluid means
23/10 . . by electric or magnetic means
23/12 . . specially adapted for preventing oscillations due to movement of the load
23/14 . Devices for determining tare weight or for cancelling out the tare by zeroising, e.g. mechanically operated (in connection with automatic loading G01G 13/14)
23/16 . . electrically or magnetically operated
23/18 . Indicating devices, e.g. for remote indication; Recording devices; Scales, e.g. graduated
23/20 . . Indicating the weight by mechanical means
23/22 . . . combined with price indicators
23/24 . . . involving logarithmic scales
23/26 . . . Drive for the indicating member, e.g. mechanical amplifiers
23/28 . . . involving auxiliary or memory marks
23/30 . . . with means for illuminating the scale
23/32 . . Indicating the weight by optical projection means
23/34 . . . combined with price indicators
23/35 . . Indicating the weight by photographic recording
23/36 . . Indicating the weight by electrical means, e.g. using photoelectric cells
23/365 . . . involving comparison with a reference value (G01G 23/37 takes precedence) **[3]**
23/37 . . . involving digital counting
23/375 . . . . during the movement of a coded element **[3]**
23/38 . . Recording or coding devices specially adapted for weighing apparatus
23/40 . . . mechanically operated
23/42 . . . electrically operated

23/44 . . . . Coding devices therefor **[3]**
23/46 . . . Devices preventing recording until the weighing mechanism has come to rest **[3]**
23/48 . Temperature-compensating arrangements (G01G 1/14, G01G 1/42, G01G 3/18 take precedence) **[3]**

G01H MEASUREMENT OF MECHANICAL VIBRATIONS OR ULTRASONIC, SONIC OR INFRASONIC WAVES [4]

(1) This subclass covers the combination of generation and measurement of mechanical vibrations.
(2) Attention is drawn to the Notes following the title of class G01.

Subclass index

PRINCIPLE OF THE MEASURING

By direct conduction; by detection in a fluid; by sensitivity to radiation; by detection of changes in electric or magnetic properties 1/00; 3/00; 9/00; 11/00

SPECIAL CHARACTERISTICS MEASURED

Propagation velocity; reverberation time; resonant frequency; mechanical or acoustic impedance 5/00; 7/00; 13/00; 15/00

1/00 Measuring vibrations in solids by using direct conduction to the detector (G01H 9/00, G01H 11/00 take precedence)
1/04 . of vibrations which are transverse to direction of propagation
1/06 . . Frequency
1/08 . . Amplitude
1/10 . of torsional vibrations
1/12 . of longitudinal or not specified vibrations **[4]**
1/14 . . Frequency **[4]**
1/16 . . Amplitude **[4]**

3/00 Measuring vibrations by using a detector in a fluid (G01H 7/00, G01H 9/00, G01H 11/00 take precedence)
3/04 . Frequency
3/06 . . by electric means
3/08 . . Analysing frequencies present in complex vibrations, e.g. comparing harmonics present
3/10 . Amplitude; Power
3/12 . . by electric means (G01H 3/14 takes precedence) **[2]**
3/14 . . Measuring mean amplitude; Measuring mean power; Measuring time integral of power **[2]**

5/00 Measuring propagation velocity of ultrasonic, sonic or infrasonic waves

7/00 Measuring reverberation time

9/00 Measuring mechanical vibrations or ultrasonic, sonic or infrasonic waves by using radiation-sensitive means, e.g. optical means

11/00 Measuring mechanical vibrations or ultrasonic, sonic or infrasonic waves by detecting changes in electric or magnetic properties
11/02 . by magnetic means, e.g. reluctance **[4]**
11/04 . . using magnetostrictive devices **[4]**
11/06 . by electric means **[4]**
11/08 . . using piezo-electric devices **[4]**

13/00 Measuring resonant frequency

15/00 Measuring mechanical or acoustic impedance [3]

17/00 Measuring mechanical vibrations or ultrasonic, sonic or infrasonic waves, not provided for in the other groups of this subclass [4]

G01J MEASUREMENT OF INTENSITY, VELOCITY, SPECTRAL CONTENT, POLARISATION, PHASE OR PULSE CHARACTERISTICS OF INFRA-RED, VISIBLE OR ULTRA-VIOLET LIGHT; COLORIMETRY; RADIATION PYROMETRY [2]

(1) This subclass covers the detection of the presence or absence of infra-red, visible, or ultra-violet light, not otherwise provided for.
(2) Attention is drawn to the Notes following the title of class G01.

Subclass index

PHOTOMETRY; PYROMETRY 1/00; 5/00
SPECTROMETRY; MEASURING: POLARISATION; VELOCITY; PHASE; PULSES 3/00; 4/00; 7/00; 9/00; 11/00

1/00 **Photometry, e.g. photographic exposure meter** (spectrophotometry G01J 3/00; specially adapted for radiation pyrometry G01J 5/00)

1/02 . Details
1/04 . . Optical or mechanical part
1/06 . . . Restricting the angle of incident light
1/08 . . Arrangements of light sources specially adapted for photometry
1/10 . by comparison with reference light or electric value
1/12 . . using wholly visual means (G01J 1/20 takes precedence)
1/14 . . . using comparison with a surface of graded brightness
1/16 . . using electric radiation detectors (G01J 1/20 takes precedence)
1/18 . . . using comparison with a reference electric value
1/20 . . intensity of the measured or reference value being varied to equalise their effects at the detector, e.g. by varying incidence angle
1/22 . . . using a variable element in the light-path, e.g. filter, polarising means (G01J 1/34 takes precedence)
1/24 . . . . using electric radiation detectors
1/26 . . . . . adapted for automatic variation of the measured or reference value
1/28 . . . using variation of intensity or distance of source (G01J 1/34 takes precedence)
1/30 . . . . using electric radiation detectors
1/32 . . . . . adapted for automatic variation of the measured or reference value
1/34 . . . using separate light-paths used alternately or sequentially, e.g. flicker
1/36 . . . . using electric radiation detectors
1/38 . using wholly visual means (G01J 1/10 takes precedence)
1/40 . . using limit of visibility or extinction effect
1/42 . using electric radiation detectors (optical or mechanical part G01J 1/04; by comparison with a reference light or electric value G01J 1/10)
1/44 . . Electric circuits
1/46 . . . using a capacitor
1/48 . using chemical effects
1/50 . . using change in colour of an indicator, e.g. actinometer
1/52 . . using photographic effects
1/54 . . by observing photo-reactions between gases
1/56 . using radiation pressure or radiometer effect
1/58 . using luminescence generated by light
1/60 . by measuring the pupil of the eye

3/00 **Spectrometry**; **Spectrophotometry**; **Monochromators**; **Measuring colours [4]**

3/02 . Details
3/04 . . Slit arrangements
3/06 . . Scanning arrangements
3/08 . . Beam-switching arrangements
3/10 . . Arrangements of light sources specially adapted for spectrometry or colorimetry
3/12 . Generating the spectrum; Monochromators
3/14 . . using refracting elements, e.g. prism (G01J 3/18, G01J 3/26 take precedence)
3/16 . . . with autocollimation
3/18 . . using diffraction elements, e.g. grating
3/20 . . . Rowland circle spectrometers
3/22 . . . Littrow mirror spectrometers
3/24 . . . using gratings profiled to favour a specific order
3/26 . . using multiple reflection, e.g. Fabry-Perot interferometer, variable interference filter
3/28 . Investigating the spectrum (using colour filters G01J 3/51) **[4]**
3/30 . . Measuring the intensity of spectral lines directly on the spectrum itself (G01J 3/42, G01J 3/44 take precedence)
3/32 . . . Investigating bands of a spectrum in sequence by a single detector
3/36 . . . Investigating two or more bands of a spectrum by separate detectors
3/40 . . Measuring the intensity of spectral lines by determining density of a photograph of the spectrum; Spectrography (G01J 3/42, G01J 3/44 take precedence) **[4]**
3/42 . . Absorption spectrometry; Double-beam spectrometry; Flicker spectrometry; Reflection spectrometry (beam-switching arrangements G01J 3/08) **[4]**
3/427 . . . Dual wavelength spectrometry **[4]**
3/433 . . . Modulation spectrometry; Derivative spectrometry **[4]**
3/44 . . Raman spectrometry; Scattering spectrometry **[4]**
3/443 . . Emission spectrometry **[4]**
3/447 . . Polarisation spectrometry **[4]**
3/45 . . Interferometric spectrometry **[4]**
3/453 . . . by correlation of the amplitudes **[4]**
3/457 . . Correlation spectrometry, e.g. of the intensity (G01J 3/453 takes precedence) **[4]**
3/46 . Measurement of colour; Colour measuring devices, e.g. colorimeters (measuring colour temperature G01J 5/60) **[4]**
3/50 . . using electric radiation detectors **[4]**
3/51 . . . using colour filters **[4]**
3/52 . . using colour charts

4/00 **Measuring polarisation of light [2]**

4/02 . Polarimeters of separated-field type; Polarimeters of half-shadow type **[2]**
4/04 . Polarimeters using electric detection means (G01J 4/02 takes precedence) **[2]**

5/00 **Radiation pyrometry**

5/02 . Details
5/04 . . Casings
5/06 . . Arrangements for eliminating effects of disturbing radiation
5/08 . . Optical features
5/10 . using electric radiation detectors
5/12 . . using thermoelectric elements, e.g. thermocouples
5/14 . . . Electrical features
5/16 . . . . Arrangements with respect to the cold junction; Compensating influence of ambient temperature or other variables
5/18 . . . . Special adaptation for indicating or recording
5/20 . . using resistors, thermistors, or semiconductors sensitive to radiation
5/22 . . . Electrical features
5/24 . . . . Use of a specially-adapted circuit, e.g. bridge circuit
5/26 . . . . Special adaptation for indicating or recording
5/28 . . using photo-emissive, photo-conductive, or photo-voltaic cells

5/30 . . . Electrical features
5/32 . . . . Special adaptation for indicating or recording
5/34 . . using capacitors
5/36 . . using ionisation of gases
5/38 . using extension or expansion of solids or fluids
5/40 . . using bimetallic elements
5/42 . . using Golay cells
5/44 . . using change of resonant frequency, e.g. of piezo-electric crystal
5/46 . using radiation pressure or radiometer effect
5/48 . using wholly visual means
5/50 . using techniques specified in the subgroups below
5/52 . . using comparison with reference sources, e.g. disappearing-filament pyrometer
5/54 . . . Optical features
5/56 . . . Electrical features
5/58 . . using absorption; using polarisation; using extinction effect
5/60 . . using determination of colour temperature
5/62 . . using means for chopping the light

7/00 Measuring velocity of light

9/00 Measuring optical phase difference; **Determining degree of coherence**; **Measuring optical wavelength** (spectrometry G01J 3/00) **[3]**
9/02 . by interferometric methods **[3]**
9/04 . by beating two waves of the same source but of different frequency and measuring the phase shift of the lower frequency obtained **[3]**

11/00 Measuring the characteristics of individual optical pulses or of optical pulse trains [5]

G01K MEASURING TEMPERATURE; **MEASURING QUANTITY OF HEAT**; **THERMALLY-SENSITIVE ELEMENTS NOT OTHERWISE PROVIDED FOR** (radiation pyrometry G01J 5/00)

(1) In this subclass, the following term is used with the meaning indicated:
– "thermometer" includes thermally-sensitive elements not provided for in other subclasses.
(2) Attention is drawn to the Notes following the title of class G01.

Subclass index

1/00 Details of thermometers not specially adapted for particular types of thermometer (circuits for reducing thermal inertia G01K 7/42) **[6]**
1/02 . Special applications of indicating or recording means, e.g. for remote indications
1/04 . . Scales
1/06 . . . Arrangements for facilitating reading, e.g. illumination, magnifying glass
1/08 . Protective devices, e.g. casings
1/10 . . for preventing chemical attack
1/12 . . for preventing damage due to heat overloading
1/14 . Supports; Fastening devices; Mounting thermometers in particular locations
1/16 . Special arrangements for conducting heat from the object to the sensitive element
1/18 . . for reducing thermal inertia
1/20 . Compensating for effects of temperature changes other than those to be measured, e.g. changes in ambient temperature
1/22 . . by means of fluid contained in a hollow body having parts which are deformable or displaceable under the pressure developed by the fluid
1/24 . . by means of compounded strips or plates, e.g. bimetallic strips
1/26 . Compensating for effects of pressure changes

3/00 Thermometers giving results other than momentary value of temperature (G01K 7/42 takes precedence) **[6]**
3/02 . giving mean values; giving integrated values
3/04 . . in respect of time
3/06 . . in respect of space
3/08 . giving differences of values; giving differentiated values
3/10 . . in respect of time, e.g. reacting only to a quick change of temperature
3/12 . . . based upon expansion or contraction of materials
3/14 . . in respect of space

5/00 Measuring temperature based on the expansion or contraction of a material (G01K 9/00 takes precedence; giving other than momentary value of temperature G01K 3/00)
5/02 . the material being a liquid (G01K 5/32 takes precedence)
5/04 . . Details

5/06 . . . Arrangements for driving back the liquid column
5/08 . . . Capillary tubes
5/10 . . . Containers for the liquid
5/12 . . . Selection of liquid compositions
5/14 . . the liquid displacing a further liquid column or a solid body (for maximum or minimum indication G01K 5/20)
5/16 . . with electric contacts
5/18 . . with electric conversion means for final indication
5/20 . . with means for indicating a maximum or a minimum or both (G01K 5/22 takes precedence)
5/22 . . with provision for expansion indicating over not more than a few degrees, e.g. clinical thermometer
5/24 . . with provision for measuring the difference between two temperatures
5/26 . . with provision for adjusting zero point of scale, e.g. Beckmann thermometer
5/28 . the material being a gas (G01K 5/32 takes precedence)
5/30 . . the gas displacing a liquid column
5/32 . the material being a fluid contained in a hollow body having parts which are deformable or displaceable under the pressure developed by the material (under pressure developed by evaporation G01K 11/04)
5/34 . . the body being a capsule (G01K 5/36, G01K 5/42 take precedence)
5/36 . . the body being a tubular spring, e.g. Bourdon tube
5/38 . . . of spiral formation
5/40 . . . of helical formation
5/42 . . the body being a bellows
5/44 . . the body being a cylinder and piston
5/46 . . with electric conversion means for final indication
5/48 . the material being a solid
5/50 . . arranged for free expansion or contraction
5/52 . . . with electrical conversion means for final indication
5/54 . . consisting of pivotally-connected elements
5/56 . . constrained so that expansion or contraction causes a deformation of the solid
5/58 . . . the solid body being constrained at more than one point, e.g. rod, plate, diaphragm (G01K 5/62 takes precedence)
5/60 . . . . the body being a flexible wire or ribbon
5/62 . . . the solid body being formed of compounded strips or plates, e.g. bimetallic strip
5/64 . . . . Details of the compound system
5/66 . . . . . Selection of composition of the components of the system
5/68 . . . . . Shape of the system
5/70 . . . . specially adapted for indicating or recording
5/72 . . . . . with electric transmission means for final indication

7/00 Measuring temperature based on the use of electric or magnetic elements directly sensitive to heat (giving results other than momentary value of temperature G01K 3/00)

7/01 . using semiconducting elements having PN junctions (G01K 7/02, G01K 7/16, G01K 7/30 take precedence) **[6]**
7/02 . using thermo-electric elements, e.g. thermo-couples
7/04 . . the object to be measured not forming one of the thermo-electric materials
7/06 . . . the thermo-electric materials being arranged one within the other with the junction at one end exposed to the object, e.g. sheathed type
7/08 . . the object to be measured forming one of the thermo-electric materials, e.g. pointed type
7/10 . . Arrangements for compensating for auxiliary variables, e.g. length of lead
7/12 . . . Arrangements with respect to the cold junction, e.g. preventing influence of temperature of surrounding air
7/13 . . . . Circuits for cold-junction compensation **[6]**
7/14 . . Arrangements for modifying the output characteristic, e.g. linearising
7/16 . using resistive elements
7/18 . . the element being a linear resistance, e.g. platinum resistance thermometer (G01K 7/26 takes precedence)
7/20 . . . in a specially-adapted circuit, e.g. bridge circuit
7/21 . . . . for modifying the output characteristic, e.g. linearising **[6]**
7/22 . . the element being a non-linear resistance, e.g. thermistor (G01K 7/26 takes precedence)
7/24 . . . in a specially-adapted circuit, e.g. bridge circuit
7/25 . . . . for modifying the output characteristic, e.g. linearising **[6]**
7/26 . . the element being an electrolyte
7/28 . . . in a specially-adapted circuit, e.g. bridge circuit
7/30 . using thermal noise of resistances or conductors
7/32 . using change of resonant frequency of a crystal
7/34 . using capacitative elements
7/36 . using magnetic elements, e.g. magnets, coils
7/38 . . the variations of temperature influencing the magnetic permeability
7/40 . using ionisation of gases
7/42 . Circuits for reducing thermal inertia; Circuits for predicting the stationary value of temperature **[6]**

9/00 Measuring temperature based on movements caused by redistribution of weight, e.g. tilting thermometer (not giving momentary value of temperature G01K 3/00)

11/00 Measuring temperature based on physical or chemical changes not covered by group G01K 3/00, G01K 5/00, G01K 7/00, or G01K 9/00

11/02 . using evaporation or sublimation, e.g. by observing boiling
11/04 . . from material contained in a hollow body having parts which are deformable or displaceable under the pressure developed by the vapour
11/06 . using melting, freezing, or softening
11/08 . . of disposable test bodies, e.g. cone
11/10 . using sintering
11/12 . using change of colour or translucency (G01K 11/32 takes precedence) **[6]**
11/14 . . of inorganic materials
11/16 . . of organic materials
11/18 . . of materials which change translucency
11/20 . using thermoluminescent materials (G01K 11/32 takes precedence) **[6]**
11/22 . using measurement of acoustic effects
11/24 . . of the velocity of propagation of sound
11/26 . . of resonant frequencies
11/28 . using measurements of density

11/30 . using measurement of the effect of a material on X-radiation, gamma radiation or particle radiation **[5]**

11/32 . using changes in transmission, scattering or fluorescence in optical fibres **[6]**

13/00 Adaptations of thermometers for specific purposes

13/02 . for measuring temperature of moving fluids or granular materials capable of flow

13/04 . for measuring temperature of moving solid bodies

13/06 . . in linear movement

13/08 . . in rotary movement

13/10 . for measuring temperature within piled or stacked materials (by special arrangements for conducting heat from the object to the sensitive element G01K 1/16)

13/12 . combined with sampling devices for measuring temperatures of samples of material

15/00 Testing or calibrating of thermometers

17/00 Measuring quantity of heat

17/02 . Calorimeters using transport of an indicating substance, e.g. evaporation calorimeters

17/04 . Calorimeters using compensation methods

17/06 . Measuring quantity of heat conveyed by flowing media, e.g. in heating systems (G01K 17/02, G01K 17/04 take precedence)

17/08 . . based upon measurement of temperature difference

17/10 . . . between an inlet and an outlet point, combined with measurement of rate of flow of the medium

17/12 . . . . Indicating product of flow and temperature difference directly

17/14 . . . . . using mechanical means for both measurements

17/16 . . . . . using electrical means for both measurements

17/18 . . . . . using electrical means for one measurement and mechanical means for the other

17/20 . . . across a radiating surface, combined with ascertainment of the heat-transmission coefficient

19/00 Testing or calibrating calorimeters

G01L MEASURING FORCE, STRESS, TORQUE, WORK, MECHANICAL POWER, MECHANICAL EFFICIENCY, OR FLUID PRESSURE (weighing G01G) **[4]**

Note

Attention is drawn to the Notes following the title of class G01.

Subclass index

1/00 Measuring force or stress, in general (measuring force due to impact G01L 5/00) **[4]**

1/02 . by hydraulic or pneumatic means

1/04 . by measuring elastic deformation of gauges, e.g. of springs

1/06 . by measuring the permanent deformation of gauges, e.g. of compressed bodies

1/08 . by the use of counterbalancing forces

1/10 . by measuring variations of frequency of stressed vibrating elements, e.g. of stressed strings (using resistance strain gauges G01L 1/22)

1/12 . by measuring variations in the magnetic properties of materials resulting from the application of stress

1/14 . by measuring variations in capacitance or inductance of electrical elements, e.g. by measuring variations of frequency of electrical oscillators

1/16 . using properties of piezo-electric devices

1/18 . using properties of piezo-resistive materials, i.e. materials of which the ohmic resistance varies according to changes in magnitude or direction of force applied to the material

1/20 . by measuring variations in ohmic resistance of solid materials or of electrically-conductive fluids (of piezo-resistive materials G01L 1/18); by making use of electrokinetic cells, i.e. liquid-containing cells wherein an electrical potential is produced or varied upon the application of stress

1/22 . . using resistance strain gauges

1/24 . by measuring variations of optical properties of material when it is stressed, e.g. by photoelastic stress analysis

1/25 . using wave or particle radiation, e.g. X-rays, neutrons (G01L 1/24 takes precedence) **[4]**

1/26 . Auxiliary measures taken, or devices used, in connection with the measurement of force, e.g. for preventing influence of transverse components of force, for preventing overload

3/00 Measuring torque, work, mechanical power, or mechanical efficiency, in general

3/02 . Rotary-transmission dynamometers

3/04 . . wherein the torque-transmitting element comprises a torsionally-flexible shaft

3/06 . . . involving mechanical means for indicating

3/08 . . . involving optical means for indicating

3/10 . . . involving electric or magnetic means for indicating

3/12 . . . . involving photoelectric means

3/14 . . wherein the torque-transmitting element is other than a torsionally-flexible shaft

3/16 . Rotary-absorption dynamometers, e.g. of brake type

3/18 . . mechanically actuated

3/20 . . fluid actuated

3/22 . . electrically or magnetically actuated

3/24 . Devices for determining the value of power, e.g. by measuring and simultaneously multiplying the values of torque and revolutions per unit of time, by multiplying the values of tractive or propulsive force and velocity

3/26 . Devices for measuring efficiency, i.e. the ratio of power output to power input

5/00 Apparatus for, or methods of, measuring force, e.g. due to impact, work, mechanical power, or torque, adapted for special purposes

5/03 . for measuring release force of ski safety bindings

5/04 . for measuring tension in ropes, cables, wires, threads, belts, bands, or like flexible members

5/06 . . using mechanical means

5/08 . . using fluid means

5/10 . . using electric means

5/12 . for measuring axial thrust in a rotary shaft, e.g. of propulsion plants

5/13 . for measuring the tractive or propulsive power of vehicles

5/14 . for measuring the force of explosions; for measuring the energy of projectiles

5/16 . for measuring several components of force

5/18 . for measuring ratios of force

5/20 . for measuring wheel side-thrust

5/22 . for measuring the force applied to control members, e.g. control members of vehicles, triggers

5/24 . for determining value of torque or twisting moment for tightening a nut or other member which is similarly stressed

5/26 . for determining the characteristic of torque in relation to revolutions per unit of time

5/28 . for testing brakes

Measuring fluid pressure

7/00 Measuring the steady or quasi-steady pressure of a fluid or a fluent solid material by mechanical or fluid pressure-sensitive elements (transmitting or indicating the displacement of mechanical pressure-sensitive elements by electric or magnetic means G01L 9/00; measuring differences of two or more pressure values G01L 13/00; measuring two or more pressure values simultaneously G01L 15/00)

7/02 . in the form of elastically-deformable gauges

7/04 . . in the form of flexible, deformable tubes, e.g. Bourdon gauges

7/06 . . of the bellows type

7/08 . . of the flexible-diaphragm type

7/10 . . of the capsule type

7/12 . . . with exhausted chamber; Aneroid barometers

7/14 . . . . with zero-setting means

7/16 . in the form of pistons

7/18 . using liquid as the pressure-sensitive medium, e.g. liquid-column gauges

7/20 . . involving a closed chamber above the liquid level, the chamber being exhausted or housing low-pressure gas; Liquid barometers

7/22 . . involving floats, e.g. floating bells

7/24 . . involving balances in the form of rings partly filled with liquid

9/00 Measuring steady or quasi-steady pressure of a fluid or a fluent solid material by electric or magnetic pressure-sensitive elements; **Transmitting or indicating the displacement of mechanical pressure-sensitive elements, used to measure the steady or quasi-steady pressure of a fluid or fluent solid material, by electric or magnetic means** (measuring differences of two or more pressure values G01L 13/00; measuring two or more pressure values simultaneously G01L 15/00)

9/02 . by making use of variations in ohmic resistance, e.g. of potentiometers

9/04 . . of resistance strain gauges

9/06 . . of piezo-resistive devices

9/08 . by making use of piezo-electric devices

9/10 . by making use of variations in inductance

9/12 . by making use of variations in capacitance

9/14 . involving the displacement of magnets, e.g. electromagnets

9/16 . by making use of variations in the magnetic properties of material resulting from the application of stress

9/18 . by making use of electrokinetic cells, i.e. liquid-containing cells wherein an electric potential is produced or varied upon the application of stress

11/00 Measuring steady or quasi-steady pressure of a fluid or a fluent solid material by means not provided for in group G01L 7/00 or G01L 9/00

11/02 . by optical means **[6]**

11/04 . by acoustic means **[6]**

11/06 . . Ultrasonic means **[6]**

13/00 Devices or apparatus for measuring differences of two or more fluid pressure values

13/02 . using elastically-deformable members or pistons as sensing elements

13/04 . using floats or liquids as sensing elements

13/06 . using electric or magnetic pressure-sensitive elements

15/00 Devices or apparatus for measuring two or more fluid pressure values simultaneously

17/00 Devices or apparatus for measuring tyre pressure or the pressure in other inflated bodies

19/00 Details of, or accessories for, apparatus for measuring steady or quasi-steady pressure of a fluent medium insofar as such details or accessories are not special to particular types of pressure gauges

19/02 . Arrangements for preventing, or for compensating for, effects of inclination or acceleration of the measuring device; Zero-setting means (for aneroid barometers G01L 7/14)
19/04 . Means for compensating for effects of changes of temperature
19/06 . Means for preventing overload or deleterious influence of the measured medium on the measuring device or vice versa
19/08 . Means for indicating or recording, e.g. for remote indication
19/10 . . mechanical
19/12 . . Alarms or signals
19/14 . Housings
19/16 . Dials; Mounting of dials

21/00 Vacuum gauges

21/02 . having a compression chamber in which gas, whose pressure is to be measured, is compressed
21/04 . . wherein the chamber is closed by liquid; Vacuum gauges of the McLeod type
21/06 . . . actuated by rotating or inverting the measuring device
21/08 . by measuring variations in the transmission of acoustic waves through the medium, the pressure of which is to be measured
21/10 . by measuring variations in the heat conductivity of the medium, the pressure of which is to be measured
21/12 . . measuring changes in electric resistance of measuring members, e.g. of filaments; Vacuum gauges of the Pirani type
21/14 . . using thermocouples
21/16 . by measuring variation of frictional resistance of gases
21/18 . . using a pendulum
21/20 . . using members oscillating about a vertical axis
21/22 . . using resonance effects of a vibrating body; Vacuum gauges of the Klumb type
21/24 . . using rotating members; Vacuum gauges of the Langmuir type
21/26 . by making use of radiometer action, i.e. of the pressure caused by the momentum of molecules passing from a hotter to a cooler member; Vacuum gauges of the Knudsen type
21/28 . . using torsional rotary measuring members
21/30 . by making use of ionisation effects
21/32 . . using electric discharge tubes with thermionic cathodes
21/34 . . using electric discharge tubes with cold cathodes
21/36 . . using radioactive substances

23/00 Devices or apparatus for measuring or indicating or recording rapid changes, such as oscillations, in the pressure of steam, gas, or liquid; Indicators for determining work or energy of steam, internal-combustion, or other fluid-pressure engines from the condition of the working fluid

23/02 . mechanically indicating or recording and involving loaded or return springs
23/04 . involving means subjected to known counteracting pressure
23/06 . Indicating or recording by optical means
23/08 . operated electrically
23/10 . . by pressure-sensitive members of the piezo-electric type
23/12 . . by changing capacitance or inductance
23/14 . . by electromagnetic elements
23/16 . . by photoelectric means
23/18 . . by resistance strain gauges
23/20 . combined with planimeters or integrators
23/22 . for detecting or indicating knocks in internal-combustion engines; Units comprising pressure-sensitive members combined with ignitors for firing internal-combustion engines
23/24 . for measuring pressure in inlet or exhaust ducts of internal-combustion engines
23/26 . Details or accessories
23/28 . . Cooling means
23/30 . . Means for indicating consecutively positions of pistons or cranks of internal-combustion engines in combination with pressure indicators
23/32 . . Apparatus specially adapted for recording pressure changes measured by indicators

25/00 Testing or calibrating of apparatus for measuring force, torque, work, mechanical power, or mechanical efficiency [2]

27/00 Testing or calibrating of apparatus for measuring fluid pressure [2]

27/02 . of indicators

G01M TESTING STATIC OR DYNAMIC BALANCE OF MACHINES OR STRUCTURES; TESTING OF STRUCTURES OR APPARATUS, NOT OTHERWISE PROVIDED FOR

Note

Attention is drawn to the Notes following the title of class G01.

Subclass index

1/00 Testing static or dynamic balance of machines or structures (balancing rotary bowls of centrifuges B04B 9/14; apparatus characterised by the means for holding wheels or parts thereof B60B 30/00; determining stability factors of ships B63B; stabilising of aircraft B64C 17/00; control systems for balancing automatically in operation G05; balancing rotors of dynamo-electric machines H02K 15/16)

1/02 . Details of balancing machines or devices
1/04 . . Adaptation of bearing support assemblies for receiving the body to be tested
1/06 . . Adaptation of drive assemblies for receiving the body to be tested
1/08 . . Instruments for indicating directly the magnitude and phase of the unbalance (measuring electrical variables in general G01R)
1/10 . Determining the moment of inertia
1/12 . Static balancing; Determining position of centre of gravity (by determining unbalance G01M 1/14)
1/14 . Determining unbalance (G01M 1/30, G01M 1/38 take precedence)
1/16 . . by oscillating or rotating the body to be tested
1/18 . . . and running the body down from a speed greater than normal
1/20 . . . and applying external forces compensating forces due to unbalance
1/22 . . . and converting vibrations due to unbalance into electric variables (measuring vibrations in general G01H; microphones or like acoustic electromechanical transducers H04R)
1/24 . . . Performing balancing on elastic shafts, e.g. for crankshafts
1/26 . . . with special adaptations for marking, e.g. by drilling
1/28 . . . with special adaptations for determining unbalance of the body in situ, e.g. of vehicle wheels
1/30 . Compensating unbalance (G01M 1/38 takes precedence; counterweights F16F 15/28)
1/32 . . by adding material to the body to be tested, e.g. by correcting-weights (correcting-weights per se F16F 15/32)
1/34 . . by removing material from the body to be tested, e.g. from the tread of tyres
1/36 . . by adjusting position of masses built-in the body to be tested
1/38 . Combined machines or devices for both determining and correcting unbalance

3/00 Investigating fluid tightness of structures (investigating permeability of porous material, investigating the presence of flaws in general G01N)

3/02 . by using fluid or vacuum
3/04 . . by detecting the presence of fluid at the leakage point
3/06 . . . by observing bubbles in a liquid pool
3/08 . . . . for pipes, cables, or tubes; for pipe joints or seals; for valves
3/10 . . . . for containers, e.g. radiators
3/12 . . . by observing elastic covers or coatings, e.g. soapy water
3/14 . . . . for pipes, cables, or tubes; for pipe joints or seals; for valves
3/16 . . . using electric detection means (G01M 3/06, G01M 3/12, G01M 3/20, G01M 3/24, G01M 3/26 take precedence)
3/18 . . . . for pipes, cables, or tubes; for pipe joints or seals; for valves
3/20 . . . using special tracer materials, e.g. dye, fluorescent material, radioactive material
3/22 . . . . for pipes, cables, or tubes; for pipe joints or seals; for valves
3/24 . . . using infrasonic, sonic, or ultrasonic vibrations
3/26 . . by measuring rate of loss or gain of fluid, e.g. by pressure-responsive devices, by flow detectors **[2]**
3/28 . . . for pipes, cables, or tubes; for pipe joints or seals; for valves **[2]**
3/30 . . . . using progressive displacement of one fluid by another **[2]**
3/32 . . . for containers, e.g. radiators **[2]**
3/34 . . . . by testing the possibility of maintaining the vacuum in containers, e.g. in can-testing machines **[2]**
3/36 . . by detecting change in dimensions of the structure being tested
3/38 . by using light (G01M 3/02 takes precedence)
3/40 . by using electric means, e.g. by observing electric discharges

5/00 Investigating the elasticity of structures, e.g. deflection of bridges, aircraft wings (G01M 9/00 takes precedence; strain gauges G01B)

7/00 Vibration-testing of structures; **Shock-testing of structures** (G01M 9/00 takes precedence)

7/02 . Vibration-testing **[5]**
7/04 . . Monodirectional test stands **[5]**
7/06 . . Multidirectional test stands **[5]**
7/08 . Shock-testing **[5]**

9/00 Aerodynamic testing; **Arrangements in or on wind tunnels** (building aspects section E; investigating properties of materials in general G01N)

9/02 . Wind tunnels **[5]**
9/04 . . Details **[5]**
9/06 . Measuring arrangements specially adapted for aerodynamic testing **[5]**
9/08 . Aerodynamic models **[5]**

10/00 Hydrodynamic testing; **Arrangements in or on ship-testing tanks or water tunnels** (building aspects section E; investigating properties of materials in general G01N)

11/00 Testing of optical apparatus; **Testing structures by optical methods not otherwise provided for**

11/02 . Testing of optical properties
11/04 . . Optical benches
11/06 . . Testing of alignment of vehicle head-light devices
11/08 . Testing of mechanical properties

13/00 **Testing of machine parts** (investigating the cutting power of tools G01N, e.g. G01N 3/58)
13/02 . Testing of gearing or of transmission mechanisms (measuring efficiency G01L)
13/04 . Testing of bearings

15/00 **Testing of engines [4]**
15/02 . Details or accessories of testing apparatus **[8]**
15/04 . Testing of internal-combustion engines, e.g. diagnostic testing of piston engines **[8]**
15/05 . . by combined monitoring of two or more different engine parameters **[8]**

Note

Group G01M 15/05 takes precedence over groups G01M 15/06 to G01M 15/12. **[8]**

15/06 . . by monitoring positions of pistons or cranks **[8]**
15/08 . . by monitoring pressure in cylinders **[8]**
15/09 . . by monitoring pressure in fluid ducts, e.g. in lubrication or cooling parts **[8]**
15/10 . . by monitoring exhaust gases **[8]**
15/11 . . by detecting misfire **[8]**
15/12 . . by monitoring vibrations **[8]**
15/14 . Testing of gas-turbine plants or jet-propulsion plants **[8]**

17/00 **Testing of vehicles** (G01M 15/00 takes precedence; testing fluid tightness G01M 3/00; testing elastic properties of bodies or chassis, e.g. torsion-testing, G01M 5/00; testing alignment of vehicle head-lighting devices G01M 11/06)
17/007 . of wheeled or endless-tracked vehicles (G01M 17/08 takes precedence) **[6]**
17/013 . . of wheels **[6]**
17/02 . . of tyres **[6]**
17/03 . . of endless-tracks **[6]**
17/04 . . of suspension or of damping **[6]**
17/06 . . of steering behaviour; of rolling behaviour (measuring steering angles G01B; measuring steering forces G01L) **[6]**
17/08 . of railway vehicles **[6]**
17/10 . . of suspensions, axles or wheels **[6]**

99/00 ***Subject matter not provided for in other groups of this subclass*** **[2011.01]**

G01N **INVESTIGATING OR ANALYSING MATERIALS BY DETERMINING THEIR CHEMICAL OR PHYSICAL PROPERTIES** (separating components of materials in general B01D, B01J, B03, B07; apparatus fully provided for in a single other subclass, see the relevant subclass, e.g. B01L; measuring or testing processes other than immunoassay, involving enzymes or micro-organisms C12M, C12Q; investigation of foundation soil in situ E02D 1/00; monitoring or diagnostic devices for exhaust-gas treatment apparatus F01N 11/00; sensing humidity changes for compensating measurements of other variables or for compensating readings of instruments for variations in humidity, see G01D or the relevant subclass for the variable measured; testing or determining the properties of structures G01M; measuring or investigating electric or magnetic properties of materials G01R; systems in general for determining distance, velocity or presence by use of propagation effects, e.g. Doppler effect, propagation time, of reflected or reradiated radio waves, analogous arrangements using other waves G01S; determining sensitivity, graininess, or density of photographic materials G03C 5/02; testing component parts of nuclear reactors G21C 17/00)

(1) In this subclass, the following terms are used with the meanings indicated:
– "investigating" means testing or determining;
– "materials" includes solid, liquid or gaseous media, e.g. the atmosphere.
(2) Attention is drawn to the Notes following the title of class G01.
(3) Investigating the properties of materials, specially adapted for use in processes covered by subclass B23K, is classified in group B23K 31/12. **[5]**

Subclass index

1/00 **Sampling**; **Preparing specimens for investigation** (handling materials for automatic analysis G01N 35/00)

1/02 . Devices for withdrawing samples (for medical or veterinary purposes A61; obtaining samples of soil or well fluids E21B 49/00)

1/04 . . in the solid state, e.g. by cutting

1/06 . . . providing a thin slice, e.g. microtome

1/08 . . . involving an extracting tool, e.g. core bit

1/10 . . in the liquid or fluent state

1/12 . . . Dippers; Dredgers (suction dredgers E02F 3/88) **[5]**

1/14 . . . Suction devices, e.g. pumps; Ejector devices

1/16 . . . with provision for intake at several levels (G01N 1/12, G01N 1/14 take precedence)

1/18 . . . with provision for splitting samples into portions (G01N 1/12, G01N 1/14 take precedence; fraction-collection apparatus for chromatography B01D 15/08)

1/20 . . . for flowing or falling materials (G01N 1/12, G01N 1/14 take precedence)

1/22 . . in the gaseous state

1/24 . . . Suction devices

1/26 . . . with provision for intake from several spaces

1/28 . Preparing specimens for investigation (mounting specimens on microscopic slides G02B 21/34; means for supporting the objects or the materials to be analysed in electron microscopes H01J 37/20)

1/30 . . Staining; Impregnating

1/31 . . . Apparatus therefor **[6]**

1/32 . . Polishing; Etching

1/34 . . Purifying; Cleaning

1/36 . . Embedding or analogous mounting of samples **[6]**

1/38 . . Diluting, dispersing or mixing samples **[6]**

1/40 . . Concentrating samples **[6]**

1/42 . . Low-temperature sample treatment, e.g. cryofixation **[6]**

1/44 . . Sample treatment involving radiation, e.g. heat **[6]**

3/00 **Investigating strength properties of solid materials by application of mechanical stress** (strain gauges G01B; measuring stress in general G01L 1/00)

Note

This group covers the stressing of materials not only below but also beyond the elastic limit, e.g. until breaking occurs.

3/02 . Details

3/04 . . Chucks

3/06 . . Special adaptations of indicating or recording means

3/08 . by applying steady tensile or compressive forces (G01N 3/28 takes precedence)

3/10 . . generated by pneumatic or hydraulic pressure (G01N 3/18 takes precedence)

3/12 . . . Pressure-testing (testing fluid-tightness G01M 3/00)

3/14 . . generated by dead weight, e.g. pendulum; generated by spring tension (G01N 3/18 takes precedence)

3/16 . . applied through gearing (G01N 3/18 takes precedence)

3/18 . . Performing tests at high or low temperatures

3/20 . by applying steady bending forces (G01N 3/26, G01N 3/28 take precedence)

3/22 . by applying steady torsional forces (G01N 3/26, G01N 3/28 take precedence)

3/24 . by applying steady shearing forces (G01N 3/26, G01N 3/28 take precedence)

3/26 . Investigating twisting or coiling properties

3/28 . Investigating ductility, e.g. suitability of sheet metal for deep-drawing or spinning

3/30 . by applying a single impulsive force (investigating hardness by performing impressions under impulsive load G01N 3/48)

3/303 . . generated only by free-falling weight **[7]**

3/307 . . generated by a compressed or tensile-stressed spring; generated by pneumatic or hydraulic means **[7]**

3/31 . . generated by a rotating fly-wheel **[7]**

3/313 . . generated by explosives **[7]**

3/317 . . generated by electromagnetic means **[7]**

3/32 . by applying repeated or pulsating forces (generation of such forces in general, see the relevant classes or subclasses, e.g. B06, G10)

3/34 . . generated by mechanical means, e.g. hammer blows

3/36 . . generated by pneumatic or hydraulic means

3/38 . . generated by electromagnetic means

3/40 . Investigating hardness or rebound hardness

3/42 . . by performing impressions under a steady load by indentors, e.g. sphere, pyramid (G01N 3/54 takes precedence)

3/44 . . . the indentors being put under a minor load and a subsequent major load, i.e. Rockwell system

3/46 . . . the indentors performing a scratching movement

3/48 . . by performing impressions under impulsive load by indentors, e.g. falling ball (G01N 3/54 takes precedence)

3/50 . . by measuring rolling friction, e.g. by rocking pendulum (G01N 3/54 takes precedence)

3/52 . . by measuring extent of rebound of a striking body (G01N 3/54 takes precedence)

3/54 . . Performing tests at high or low temperatures

3/56 . Investigating resistance to wear or abrasion

3/58 . Investigating machinability by cutting tools; Investigating the cutting ability of tools

3/60 . Investigating resistance of materials, e.g. refractory materials, to rapid heat changes

3/62 . Manufacturing, calibrating, or repairing devices used in investigations covered by the preceding subgroups

5/00 **Analysing materials by weighing, e.g. weighing small particles separated from a gas or liquid** (G01N 9/00 takes precedence)

5/02 . by absorbing or adsorbing components of a material and determining change of weight of the adsorbent, e.g. determining moisture content

5/04 . by removing a component, e.g. by evaporation, and weighing the remainder

7/00 **Analysing materials by measuring the pressure or volume of a gas or vapour**

7/02 . by absorption, adsorption, or combustion of components and measurement of the change in pressure or volume of the remainder

7/04 . . by absorption or adsorption alone

7/06 . . by combustion alone

7/08 . . by combustion followed by absorption or adsorption of the combustion products

7/10 . by allowing diffusion of components through a porous wall and measuring a pressure or volume difference
7/12 . . the diffusion being followed by combustion or catalytic oxidation
7/14 . by allowing the material to emit a gas or vapour, e.g. water vapour, and measuring a pressure or volume difference
7/16 . . by heating the material
7/18 . . by allowing the material to react
7/20 . . . the reaction being fermentation
7/22 . . . . of dough

9/00 Investigating density or specific gravity of materials; **Analysing materials by determining density or specific gravity** (weighing apparatus G01G)
9/02 . by measuring weight of a known volume
9/04 . . of fluids
9/06 . . . with continuous circulation through a pivotally-supported member
9/08 . by measuring buoyant force of solid materials by weighing both in air and in a liquid
9/10 . by observing bodies wholly or partially immersed in fluid materials
9/12 . . by observing the depth of immersion of the bodies, e.g. hydrometers
9/14 . . . the body being built into a container
9/16 . . . the body being pivoted
9/18 . . . Special adaptations for indicating, recording, or control
9/20 . . by balancing the weight of the bodies
9/22 . . . with continuous circulation of the fluid
9/24 . by observing the transmission of wave or particle radiation through the material
9/26 . by measuring pressure differences
9/28 . . by measuring the blowing pressure of gas bubbles escaping from nozzles at different depths in a liquid
9/30 . by using centrifugal effects
9/32 . by using flow properties of fluids, e.g. flow through tubes or apertures
9/34 . . by using elements moving through the fluid, e.g. vane
9/36 . Analysing materials by measuring the density or specific gravity, e.g. determining quantity of moisture (methods of measurement in general G01N 9/02 to G01N 9/32)

11/00 Investigating flow properties of materials, e.g. viscosity, plasticity; **Analysing materials by determining flow properties**
11/02 . by measuring flow of the material
11/04 . . through a restricted passage, e.g. tube, aperture
11/06 . . . by timing the outflow of a known quantity
11/08 . . . by measuring pressure required to produce a known flow
11/10 . by moving a body within the material
11/12 . . by measuring rising or falling speed of the body; by measuring penetration of wedged gauges (G01N 11/16 takes precedence)
11/14 . . by using rotary bodies, e.g. vane (G01N 11/16 takes precedence)
11/16 . . by measuring damping effect upon oscillatory body

13/00 Investigating surface or boundary effects, e.g. wetting power; **Investigating diffusion effects**; **Analysing materials by determining surface, boundary, or diffusion effects** (scanning-probe techniques or apparatus G01Q) **[1,7]**
13/02 . Investigating surface tension of liquids
13/04 . Investigating osmotic effects

15/00 Investigating characteristics of particles; **Investigating permeability, pore-volume or surface-area of porous materials** (identification of micro-organisms C12Q) **[4]**
15/02 . Investigating particle size or size distribution (G01N 15/04, G01N 15/10 take precedence; by measuring osmotic pressure G01N 7/10; by filtering B01D; by sifting B07B) **[4]**
15/04 . Investigating sedimentation of particle suspensions
15/05 . . in blood **[4]**
15/06 . Investigating concentration of particle suspensions (G01N 15/04, G01N 15/10 take precedence; by weighing G01N 5/00) **[3]**
15/08 . Investigating permeability, pore volume, or surface area of porous materials
15/10 . Investigating individual particles **[4]**
15/12 . . Coulter-counters **[4]**
15/14 . . Electro-optical investigation **[4]**

17/00 Investigating resistance of materials to the weather, to corrosion, or to light
17/02 . Electrochemical measuring systems for weathering, corrosion or corrosion-protection measurement (G01N 17/04 takes precedence) **[5]**
17/04 . Corrosion probes **[5]**

19/00 Investigating materials by mechanical methods (G01N 3/00 to G01N 17/00 take precedence)
19/02 . Measuring coefficient of friction between materials
19/04 . Measuring adhesive force between materials, e.g. of sealing tape, of coating
19/06 . Investigating by removing material, e.g. spark-testing
19/08 . Detecting presence of flaws or irregularities (measuring roughness or irregularity of surfaces G01B 5/28)
19/10 . Measuring moisture content, e.g. by measuring change in length of hygroscopic filament; Hygrometers

21/00 Investigating or analysing materials by the use of optical means, i.e. using infra-red, visible, or ultra-violet light (G01N 3/00 to G01N 19/00 take precedence; measuring stress in general G01L 1/00; optical elements of measuring instruments G02B; image analysis by data processing G06T)

Note

This group does not cover the investigation of spectral properties of light per se, or measurements of the properties of materials where spectral properties of light are sensed and primary emphasis is placed on creating, detecting or analysing the spectrum providing that the properties of the materials to be investigated are of minor importance (see also Note (4) after the title of class G01). Those subjects are covered by group G01J 3/00. **[7]**

21/01 . Arrangements or apparatus for facilitating the optical investigation **[3]**
21/03 . . Cuvette constructions **[3]**

21/05 . . . Flow-through cuvettes (G01N 21/09 takes precedence; handling fluid samples G01N 1/10) **[3]**
21/07 . . . Centrifugal type cuvettes (G01N 21/09 takes precedence; centrifuges B04B) **[3]**
21/09 . . . adapted to resist hostile environments or corrosive or abrasive materials **[3]**
21/11 . . Filling or emptying of cuvettes **[3]**
21/13 . . Moving of cuvettes or solid samples to or from the investigating station **[3]**
21/15 . . Preventing contamination of the components of the optical system or obstruction of the light path **[3]**
21/17 . Systems in which incident light is modified in accordance with the properties of the material investigated (where the material investigated is optically excited causing a change in wavelength of the incident light G01N 21/63) **[3]**
21/19 . . Dichroism **[3]**
21/21 . . Polarisation-affecting properties (G01N 21/19 takes precedence) **[3]**
21/23 . . . Bi-refringence **[3]**
21/25 . . Colour; Spectral properties, i.e. comparison of effect of material on the light at two or more different wavelengths or wavelength bands **[3]**
21/27 . . . using photo-electric detection (G01N 21/31 takes precedence) **[3]**
21/29 . . . using visual detection (G01N 21/31 takes precedence) **[3]**
21/31 . . . Investigating relative effect of material at wavelengths characteristic of specific elements or molecules, e.g. atomic absorption spectrometry **[3]**
21/33 . . . . using ultra-violet light (G01N 21/39 takes precedence) **[3]**
21/35 . . . . using infra-red light (G01N 21/39 takes precedence) **[3]**
21/37 . . . . . using pneumatic detection **[3]**
21/39 . . . . using tunable lasers **[3]**
21/41 . . Refractivity; Phase-affecting properties, e.g. optical path length (G01N 21/21 takes precedence) **[3]**
21/43 . . . by measuring critical angle **[3]**
21/45 . . . using interferometric methods; using Schlieren methods **[3]**
21/47 . . Scattering, i.e. diffuse reflection (G01N 21/25, G01N 21/41 take precedence) **[3]**
21/49 . . . within a body or fluid **[3]**
21/51 . . . . inside a container, e.g. in an ampoule (G01N 21/53 takes precedence; checking containers for cleanliness B08B 9/46) **[3]**
21/53 . . . . within a flowing fluid, e.g. smoke (alarm devices actuated by smoke G08B 17/10) **[3]**
21/55 . . Specular reflectivity **[3]**
21/57 . . . Measuring gloss **[3]**
21/59 . . Transmissivity (G01N 21/25 takes precedence) **[3]**
21/61 . . . Non-dispersive gas analysers **[3]**
21/62 . Systems in which the material investigated is excited whereby it emits light or causes a change in wavelength of the incident light **[3]**
21/63 . . optically excited **[3]**
21/64 . . . Fluorescence; Phosphorescence **[3]**
21/65 . . . Raman scattering **[3]**
21/66 . . electrically excited, e.g. electroluminescence **[3]**
21/67 . . . using electric arcs or discharges (spark gaps H01T) **[3]**
21/68 . . . using high frequency electric fields **[3]**
21/69 . . . specially adapted for fluids **[3]**
21/70 . . mechanically excited, e.g. triboluminescence **[3]**
21/71 . . thermally excited **[3]**
21/72 . . . using flame burners **[3]**
21/73 . . . using plasma burners or torches **[3]**
21/74 . . . using flameless atomising, e.g. graphite furnaces **[3]**
21/75 . Systems in which material is subjected to a chemical reaction, the progress or the result of the reaction being investigated (systems in which material is burnt in a flame or plasma G01N 21/72, G01N 21/73) **[3]**
21/76 . . Chemiluminescence; Bioluminescence **[3]**
21/77 . . by observing the effect on a chemical indicator **[3]**
21/78 . . . producing a change of colour **[3]**
21/79 . . . . Photometric titration **[3]**
21/80 . . . . Indicating pH value **[3]**
21/81 . . . . Indicating humidity **[3]**
21/82 . . . producing a precipitate or turbidity **[3]**
21/83 . . . . Turbidimetric titration **[3]**
21/84 . Systems specially adapted for particular applications **[3]**
21/85 . . Investigating moving fluids or granular solids **[3]**
21/86 . . Investigating moving sheets (G01N 21/89 takes precedence) **[3]**
21/87 . . Investigating jewels (G01N 21/88 takes precedence) **[3]**
21/88 . . Investigating the presence of flaws, defects or contamination **[3]**
21/89 . . . in moving material, e.g. paper, textiles (G01N 21/90, G01N 21/91, G01N 21/94 take precedence) **[3,7]**
21/892 . . . . characterised by the flaw, defect or object feature examined **[7]**
21/894 . . . . . Pinholes **[7]**
21/896 . . . . . Optical defects in or on transparent materials, e.g. distortion, surface flaws **[7]**
21/898 . . . . . Irregularities in textured or patterned surfaces, e.g. textiles, wood **[7]**
21/90 . . . in a container or its contents (G01N 21/91 takes precedence) **[3]**
21/91 . . . using penetration of dyes, e.g. fluorescent ink **[3]**
21/93 . . . Detection standards; Calibrating **[7]**
21/94 . . . Investigating contamination, e.g. dust (G01N 21/85 takes precedence) **[7]**
21/95 . . . characterised by the material or shape of the object to be examined (G01N 21/89 to G01N 21/91, G01N 21/94 take precedence) **[7]**
21/952 . . . . Inspecting the exterior surface of cylindrical bodies or wires (G01N 21/956 takes precedence) **[7]**
21/954 . . . . Inspecting the inner surface of hollow bodies, e.g. bores **[7]**
21/956 . . . . Inspecting patterns on the surface of objects (contactless testing of electronic circuits G01R 31/308; testing currency G07D) **[7]**
21/958 . . . . Inspecting transparent materials **[7]**

22/00 Investigating or analysing materials by the use of microwaves (G01N 3/00 to G01N 17/00, G01N 24/00 take precedence) **[3]**
22/02 . Investigating the presence of flaws **[3]**
22/04 . Investigating moisture content **[3]**

23/00 Investigating or analysing materials by the use of wave or particle radiation not covered by group G01N 21/00 or G01N 22/00, e.g. X-rays, neutrons (G01N 3/00 to G01N 17/00 take precedence; measuring stress in general G01L 1/00; measurement of nuclear or X-radiation G01T; introducing objects or materials into nuclear reactors, or removing them therefrom, or storing them after treatment therein G21C; construction or operation of X-ray apparatus or circuits therefor H05G)

23/02 . by transmitting the radiation through the material
23/04 . . and forming a picture (electron microscopes H01J)
23/05 . . . using neutrons **[3]**
23/06 . . and measuring the absorption
23/08 . . . using electric detection means
23/083 . . . . the radiation being X-rays (G01N 23/10 to G01N 23/18 take precedence) **[5]**
23/087 . . . . . using polyenergetic X-rays **[5]**
23/09 . . . . the radiation being neutrons **[3]**
23/10 . . . . the material being confined in a container (G01N 23/09 takes precedence) **[3]**
23/12 . . . . the material being a flowing fluid or a flowing granular solid (G01N 23/09 takes precedence) **[3]**
23/14 . . . . . specially adapted for controlling or monitoring operations or for signalling
23/16 . . . . the material being a moving sheet (G01N 23/09, G01N 23/18 take precedence) **[3]**
23/18 . . . . Investigating the presence of flaws or inclusions (G01N 23/09 takes precedence) **[3,5]**
23/20 . by using diffraction of the radiation, e.g. for investigating crystal structure; by using reflection of the radiation
23/201 . . by measuring small-angle scattering **[2]**
23/202 . . . using neutrons **[3]**
23/203 . . by measuring back scattering **[2]**
23/204 . . . using neutrons **[3]**
23/205 . . by means of diffraction cameras (G01N 23/201 takes precedence) **[2]**
23/206 . . . the radiation being neutrons **[3]**
23/207 . . by means of diffractometry using detectors, e.g. using an analysing crystal or a crystal to be analysed in a central position and one or more displaceable detectors in circumferential positions (G01N 23/201 takes precedence; spectrometry of detected or measured radiation intensity G01T 1/36) **[2]**
23/22 . by measuring secondary emission **[2]**
23/221 . . by activation analysis **[2]**
23/222 . . . using neutrons **[3]**
23/223 . . by irradiating the sample with X-rays and by measuring X-ray fluorescence **[2]**
23/225 . . using electron or ion microprobe (electron or ion-beam tubes for microprobe analysis H01J 37/00) **[2]**
23/227 . . by measuring photoelectric effect, e.g. Auger electrons **[2]**

24/00 Investigating or analysing materials by the use of nuclear magnetic resonance, electron paramagnetic resonance or other spin effects (arrangements or instruments for measuring magnetic resonance effects G01R 33/20) **[3,4,5]**

24/08 . by using nuclear magnetic resonance (G01N 24/12 takes precedence) **[3]**
24/10 . by using electron paramagnetic resonance (G01N 24/12 takes precedence) **[3]**
24/12 . by using double resonance **[3]**
24/14 . by using cyclotron resonance **[3]**

25/00 Investigating or analysing materials by the use of thermal means (G01N 3/00 to G01N 23/00 take precedence)

25/02 . by investigating changes of state or changes of phase; by investigating sintering
25/04 . . of melting point; of freezing point; of softening point
25/06 . . . Analysis by measuring change of freezing point
25/08 . . of boiling point
25/10 . . . Analysis by measuring change of boiling point
25/12 . . of critical point; of other phase change
25/14 . by using distillation, extraction, sublimation, condensation, freezing, or crystallisation (G01N 25/02 takes precedence)
25/16 . by investigating thermal coefficient of expansion
25/18 . by investigating thermal conductivity (by calorimetry G01N 25/20; by measuring change of resistance of an electrically-heated body G01N 27/18)
25/20 . by investigating the development of heat, i.e. calorimetry, e.g. by measuring specific heat, by measuring thermal conductivity
25/22 . . on combustion or catalytic oxidation, e.g. of components of gas mixtures
25/24 . . . using combustion tubes, e.g. for micro-analysis
25/26 . . . using combustion with oxygen under pressure, e.g. in bomb calorimeter
25/28 . . . the rise in temperature of the gases resulting from combustion being measured directly
25/30 . . . . using electric temperature-responsive elements
25/32 . . . . . using thermoelectric elements
25/34 . . . . using mechanical temperature-responsive elements, e.g. bimetallic
25/36 . . . . . for investigating the composition of gas mixtures
25/38 . . . . using the melting or combustion of a solid
25/40 . . . the heat developed being transferred to a flowing fluid
25/42 . . . . continuously
25/44 . . . the heat developed being transferred to a fixed quantity of fluid
25/46 . . . . for investigating the composition of gas mixtures
25/48 . . on solution, sorption, or a chemical reaction not involving combustion or catalytic oxidation
25/50 . by investigating flash-point; by investigating explosibility
25/52 . . by determining flash-point of liquids
25/54 . . by determining explosibility
25/56 . by investigating moisture content
25/58 . . by measuring changes of properties of the material due to heat, cold, or expansion
25/60 . . . for determining the wetness of steam
25/62 . . by psychrometric means, e.g. wet-and-dry-bulb thermometers
25/64 . . . using electric temperature-responsive elements
25/66 . . by investigating dew-point
25/68 . . . by varying the temperature of a condensing surface

25/70 . . . by varying the temperature of the material, e.g. by compression, by expansion

25/72 . Investigating presence of flaws (by investigating thermal conductivity G01N 25/18)

27/00 Investigating or analysing materials by the use of electric, electro-chemical, or magnetic means (G01N 3/00 to G01N 25/00 take precedence; measurement or testing of electric or magnetic variables or of electric or magnetic properties of materials G01R)

27/02 . by investigating impedance

27/04 . . by investigating resistance

27/06 . . . of a liquid (involving electrolysis G01N 27/26; involving polarography G01N 27/48; measuring electric resistance of fluids G01R 27/22)

27/07 . . . . Construction of measuring vessels; Electrodes therefor **[2]**

27/08 . . . . which is flowing continuously

27/10 . . . . . Investigation or analysis specially adapted for controlling or monitoring operations or for signalling (regulating G05D)

27/12 . . . of a solid body in dependence upon absorption of a fluid; of a solid body in dependence upon reaction with a fluid

27/14 . . . of an electrically-heated body in dependence upon change of temperature

27/16 . . . . caused by burning or catalytic oxidation of surrounding material to be tested, e.g. of gas

27/18 . . . . caused by changes in the thermal conductivity of a surrounding material to be tested (G01N 27/20 takes precedence)

27/20 . . . Investigating the presence of flaws

27/22 . . by investigating capacitance

27/24 . . . Investigating the presence of flaws

27/26 . by investigating electrochemical variables; by using electrolysis or electrophoresis (investigating resistance to corrosion G01N 17/00; investigating or analysing materials by separation into components using adsorption, absorption or similar phenomena or using ion-exchange, e.g. chromatography, G01N 30/00; immunoelectrophoresis G01N 33/561; electrochemical processes or apparatus in general B01J; standard cells H01M 6/28) **[5]**

27/27 . . Association of two or more measuring systems or cells, each measuring a different parameter, where the measurement results may be either used independently, the systems or cells being physically associated, or combined to produce a value for a further parameter **[5]**

27/28 . . Electrolytic cell components

27/30 . . . Electrodes, e.g. test electrodes; Half-cells (G01N 27/414 takes precedence) **[5]**

27/31 . . . . Half-cells with permeable membranes, e.g. semi-porous or perm-selective membranes **[5]**

27/32 . . . . Calomel electrodes

27/327 . . . . Biochemical electrodes **[5]**

27/333 . . . . Ion-selective electrodes or membranes (glass electrodes G01N 27/36) **[5]**

27/34 . . . . Dropping-mercury electrodes

27/36 . . . . Glass electrodes

27/38 . . . . Cleaning of electrodes

27/40 . . . Semi-permeable membranes or partitions

27/401 . . . Salt-bridge leaks; Liquid junctions **[5]**

27/403 . . Cells and electrode assemblies **[5]**

27/404 . . . Cells with anode, cathode and cell electrolyte on the same side of a permeable membrane which separates them from the sample fluid **[5]**

27/406 . . . Cells and probes with solid electrolytes **[5]**

27/407 . . . . for investigating or analysing gases **[5]**

27/409 . . . . . Oxygen concentration cells **[5]**

27/41 . . . . . Oxygen pumping cells **[5]**

27/411 . . . . for investigating or analysing of liquid metals **[5]**

27/413 . . . Concentration cells using liquid electrolytes **[5]**

27/414 . . . Ion-sensitive or chemical field-effect transistors, i.e. ISFETS or CHEMFETS **[5]**

27/416 . . Systems (G01N 27/27 takes precedence) **[5]**

27/417 . . . using cells and probes with solid electrolytes **[5]**

27/419 . . . . Measuring voltages or currents with a combination of oxygen pumping cells and oxygen concentration cells **[5]**

27/42 . . . Measuring deposition or liberation of materials from an electrolyte; Coulometry, i.e. measuring coulomb-equivalent of material in an electrolyte **[5]**

27/44 . . . . using electrolysis to generate a reagent, e.g. for titration **[5]**

27/447 . . . using electrophoresis **[5]**

27/453 . . . . Cells therefor **[5]**

27/48 . . . using polarography, i.e. measuring changes in current under a slowly-varying voltage

27/49 . . . Systems involving the determination of the current at a single specific value, or small range of values, of applied voltage for producing selective measurement of one or more particular ionic species **[5]**

27/60 . by investigating electrostatic variables (by investigating capacitance G01N 27/22)

27/61 . . Investigating the presence of flaws **[3]**

27/62 . by investigating the ionisation of gases; by investigating electric discharges, e.g. emission of cathode (particle spectrometers H01J 49/00)

27/64 . . using wave or particle radiation to ionise a gas, e.g. in an ionisation chamber

27/66 . . . and measuring current or voltage

27/68 . . using electric discharge to ionise a gas

27/70 . . . and measuring current or voltage

27/72 . by investigating magnetic variables

27/74 . . of fluids (G01N 24/00 takes precedence)

27/76 . . . by investigating susceptibility

27/80 . . for investigating mechanical hardness, e.g. by investigating saturation or remanence of ferromagnetic material

27/82 . . for investigating the presence of flaws

27/83 . . . by investigating stray magnetic fields **[3]**

27/84 . . . . by applying magnetic powder or magnetic ink **[3]**

27/85 . . . . using magnetographic methods **[3]**

27/87 . . . . using probes **[3]**

27/90 . . . using eddy currents **[3]**

27/92 . by investigating breakdown voltage (G01N 27/60, G01N 27/62 take precedence; testing of articles or specimens of solids or fluids for dielectric strength or breakdown voltage G01R 31/12) **[3]**

29/00 **Investigating or analysing materials by the use of ultrasonic, sonic or infrasonic waves**; **Visualisation of the interior of objects by transmitting ultrasonic or sonic waves through the object** (G01N 3/00 to G01N 27/00 take precedence; measuring or indicating of ultrasonic, sonic or infrasonic waves in general G01H; systems using the reflection or reradiation of acoustic waves, e.g. acoustic imaging, G01S 15/00; obtaining records by techniques analogous to photography using ultrasonic, sonic or infrasonic waves G03B 42/06) **[4]**

29/02 . Analysing fluids (using acoustic emission techniques G01N 29/14) **[5,8]**

29/024 . . by measuring propagation velocity or propagation time of acoustic waves **[8]**

29/028 . . by measuring mechanical or acoustic impedance **[8]**

29/032 . . by measuring attenuation of acoustic waves **[8]**

29/036 . . by measuring frequency or resonance of acoustic waves **[8]**

29/04 . Analysing solids (using acoustic emission techniques G01N 29/14) **[4,5,8]**

29/06 . . Visualisation of the interior, e.g. acoustic microscopy **[4,8]**

29/07 . . by measuring propagation velocity or propagation time of acoustic waves **[8]**

29/09 . . by measuring mechanical or acoustic impedance **[8]**

29/11 . . by measuring attenuation of acoustic waves **[8]**

29/12 . . by measuring frequency or resonance of acoustic waves **[5,8]**

29/14 . using acoustic emission techniques **[5,8]**

29/22 . Details **[5]**

29/24 . . Probes **[5]**

29/26 . . Arrangements for orientation or scanning **[5]**

29/265 . . . by moving the sensor relative to a stationary material **[8]**

29/27 . . . by moving the material relative to a stationary sensor **[8]**

29/275 . . . by moving both the sensor and the material **[8]**

29/28 . . providing acoustic coupling **[5]**

29/30 . . Arrangements for calibrating or comparing, e.g. with standard objects **[8]**

29/32 . . Arrangements for suppressing undesired influences, e.g. temperature or pressure variations **[8]**

29/34 . Generating the ultrasonic, sonic or infrasonic waves **[8]**

29/36 . Detecting the response signal **[8]**

29/38 . . by time filtering, e.g. using time gates **[8]**

29/40 . . by amplitude filtering, e.g. by applying a threshold **[8]**

29/42 . . by frequency filtering **[8]**

29/44 . Processing the detected response signal **[8]**

29/46 . . by spectral analysis, e.g. Fourier analysis **[8]**

29/48 . . by amplitude comparison **[8]**

29/50 . . using auto-correlation techniques or cross-correlation techniques **[8]**

29/52 . . using inversion methods other than spectral analysis, e.g. conjugated gradient inversion **[8]**

30/00 **Investigating or analysing materials by separation into components using adsorption, absorption or similar phenomena or using ion-exchange, e.g. chromatography** (G01N 3/00 to G01N 29/00 take precedence; separation for the preparation or production of components B01D 15/00, B01D 53/02, B01D 53/14) **[4]**

30/02 . Column chromatography **[4]**

Note

In this group, the following term is used with the meaning indicated:
– "conditioning" means the adjustment or control of environmental parameters, e.g. temperature or pressure. **[4]**

30/04 . . Preparation or injection of sample to be analysed **[4]**

30/06 . . . Preparation **[4]**

30/08 . . . . using an enricher **[4]**

30/10 . . . . using a splitter **[4]**

30/12 . . . . by evaporation **[4]**

30/14 . . . . by elimination of some components **[4]**

30/16 . . . Injection (G01N 30/24 takes precedence) **[4]**

30/18 . . . . using a septum or microsyringe **[4]**

30/20 . . . . using a sampling valve **[4]**

30/22 . . . . in high pressure liquid systems **[4]**

30/24 . . . Automatic injection systems **[4]**

30/26 . . Conditioning of the fluid carrier; Flow patterns **[4]**

30/28 . . . Control of physical parameters of the fluid carrier **[4]**

30/30 . . . . of temperature **[4]**

30/32 . . . . of pressure or speed (G01N 30/36 takes precedence) **[4]**

30/34 . . . . of fluid composition, e.g. gradient (G01N 30/36 takes precedence) **[4]**

30/36 . . . . in high pressure liquid systems **[4]**

30/38 . . . Flow patterns **[4]**

30/40 . . . . using back flushing **[4]**

30/42 . . . . using counter-current **[4]**

30/44 . . . . using recycling of the fraction to be distributed **[4]**

30/46 . . . . using more than one column **[4]**

30/50 . . Conditioning of the sorbent material or stationary liquid **[4]**

30/52 . . . Physical parameters **[4]**

30/54 . . . . Temperature **[4]**

30/56 . . . Packing methods or coating methods **[4]**

30/58 . . . the sorbent moving as a whole **[4]**

30/60 . . Construction of the column **[4]**

30/62 . . Detectors specially adapted therefor **[4]**

30/64 . . . Electrical detectors **[4]**

30/66 . . . . Thermal conductivity detectors **[4]**

30/68 . . . . Flame ionisation detectors **[4]**

30/70 . . . . Electron capture detectors (G01N 30/68 takes precedence) **[4]**

30/72 . . . Mass spectrometers **[4]**

30/74 . . . Optical detectors **[4]**

30/76 . . . Acoustical detectors **[4]**

30/78 . . . using more than one detector **[4]**

30/80 . . Fraction collectors **[4]**

30/82 . . . Automatic means therefor **[4]**

30/84 . . Preparation of the fraction to be distributed **[4]**

30/86 . . Signal analysis **[4]**

30/88 . . Integrated analysis systems specially adapted therefor, not covered by a single one of groups G01N 30/04 to G01N 30/86 (signal analysis systems in general G06F, G06G, G06T) **[4]**
30/89 . Inverse chromatography, i.e. with the analyte in stationary phase **[8]**
30/90 . Plate chromatography, e.g. thin layer or paper chromatography **[4]**
30/91 . . Application of the sample **[4]**
30/92 . . Construction of the plate **[4]**
30/93 . . . Application of the sorbent layer **[4]**
30/94 . . Development **[4]**
30/95 . . Detectors specially adapted therefor; Signal analysis **[4]**
30/96 . using ion-exchange (G01N 30/02, G01N 30/90 take precedence) **[4]**

31/00 Investigating or analysing non-biological materials by the use of the chemical methods specified in the subgroups (testing the effectiveness or completeness of sterilisation procedures without using enzymes or microorganisms A61L 2/28; measuring or testing processes involving enzymes or micro-organisms C12Q 1/00); **Apparatus specially adapted for such methods [4]**

Note

The observation of the progress of the reactions covered by groups G01N 31/02 to G01N 31/22 by any of the methods specified in groups G01N 3/00 to G01N 29/00, if this observation is of major importance, is classified in the relevant group covering the method.

31/02 . using precipitation
31/10 . using catalysis
31/12 . using combustion (G01N 25/20 takes precedence)
31/16 . using titration
31/18 . . Burettes specially adapted for titration (burettes in general B01L 3/02)
31/20 . using micro-analysis, e.g. drop reaction
31/22 . using chemical indicators (G01N 31/02 takes precedence)

33/00 Investigating or analysing materials by specific methods not covered by groups G01N 1/00 to G01N 31/00

33/02 . Food
33/03 . . Edible oils or edible fats **[4]**
33/04 . . Dairy products
33/06 . . . Determining fat content, e.g. by butyrometer
33/08 . . Eggs, e.g. by candling
33/10 . . Starch-containing substances, e.g. dough
33/12 . . Meat; fish
33/14 . . Beverages
33/15 . Medicinal preparations **[3]**
33/18 . Water
33/20 . Metals
33/22 . Fuels; explosives
33/24 . Earth materials (G01N 33/42 takes precedence)
33/26 . Oils; viscous liquids; paints; inks (G01N 33/22 takes precedence)
33/28 . . Oils (edible oils or edible fats G01N 33/03) **[4]**
33/30 . . . for lubricating properties
33/32 . . Paints; inks
33/34 . Paper
33/36 . Textiles
33/38 . Concrete; lime; mortar; gypsum; bricks; ceramics; glass
33/40 . Grinding-materials
33/42 . Road-making materials (G01N 33/38 takes precedence)
33/44 . Resins; plastics; rubber; leather
33/46 . Wood
33/48 . Biological material, e.g. blood, urine (G01N 33/02 to G01N 33/14, G01N 33/26, G01N 33/44, G01N 33/46 take precedence; determining the germinating capacity of seeds A01C 1/02); Haemocytometers (counting blood corpuscules distributed over a surface by scanning the surface G06M 11/02) **[3,4]**
33/483 . . Physical analysis of biological material **[4]**
33/487 . . . of liquid biological material **[4]**
33/49 . . . . blood **[4]**
33/493 . . . . urine **[4]**
33/497 . . . of gaseous biological material, e.g. breath **[4]**
33/50 . . Chemical analysis of biological material, e.g. blood, urine; Testing involving biospecific ligand binding methods; Immunological testing (measuring or testing processes other than immunological involving enzymes or micro-organisms, compositions or test papers therefor; processes of forming such compositions, condition responsive control in microbiological or enzymological processes C12Q) **[3]**

Note

In this group, the following expression is used with the meaning indicated:
– "involving", when used in relation to a material, includes the testing for the material as well as employing the material as a determinant or reactant in a test for a different material. **[3]**

Note

In groups G01N 33/52 to G01N 33/98, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[3]**

33/52 . . . Use of compounds or compositions for colorimetric, spectrophotometric or fluorometric investigation, e.g. use of reagent paper **[3]**
33/53 . . . Immunoassay; Biospecific binding assay; Materials therefor (medicinal preparations containing antigens or antibodies A61K; haptens in general, see the relevant places in class C07; peptides, e.g. proteins, in general C07K) **[4]**
33/531 . . . . Production of immunochemical test materials **[4]**
33/532 . . . . . Production of labelled immunochemicals **[4]**
33/533 . . . . . with fluorescent label **[4]**
33/534 . . . . . with radioactive label **[4]**
33/535 . . . . . with enzyme label **[4]**
33/536 . . . . with immune complex formed in liquid phase **[4]**
33/537 . . . . . with separation of immune complex from unbound antigen or antibody **[4]**
33/538 . . . . . by sorbent column, particles or resin strip **[4]**
33/539 . . . . . involving precipitating reagent **[4]**
33/541 . . . . . Double or second antibody **[4]**

33/542 . . . . . with steric inhibition or signal modification, e.g. fluorescent quenching **[4]**
33/543 . . . . with an insoluble carrier for immobilising immunochemicals **[4]**
33/544 . . . . . the carrier being organic **[4]**
33/545 . . . . . Synthetic resin **[4]**
33/546 . . . . . as water suspendable particles **[4]**
33/547 . . . . . with antigen or antibody attached to the carrier via a bridging agent **[4]**
33/548 . . . . . Carbohydrates, e.g. dextran **[4]**
33/549 . . . . . with antigen or antibody entrapped within the carrier **[4]**
33/551 . . . . . the carrier being inorganic **[4]**
33/552 . . . . . Glass or silica **[4]**
33/553 . . . . . Metal or metal coated **[4]**
33/554 . . . . . the carrier being a biological cell or cell fragment, e.g. bacteria, yeast cells **[4]**
33/555 . . . . . Red blood cell **[4]**
33/556 . . . . . Fixed or stabilised red blood cell **[4]**
33/557 . . . . using kinetic measurement, i.e. time rate of progress of an antigen-antibody interaction **[4]**
33/558 . . . . using diffusion or migration of antigen or antibody **[4]**
33/559 . . . . . through a gel, e.g. Ouchterlony technique **[4]**
33/561 . . . . . Immunoelectrophoresis **[4]**
33/563 . . . . involving antibody fragments **[4]**
33/564 . . . . for pre-existing immune complex or autoimmune disease **[4]**
33/566 . . . . using specific carrier or receptor proteins as ligand binding reagent **[4]**
33/567 . . . . . utilising isolate of tissue or organ as binding agent **[4]**
33/569 . . . . for micro-organisms, e.g. protozoa, bacteria, viruses **[4]**
33/571 . . . . . for venereal disease, e.g. syphilis, gonorrhoea, herpes **[4]**
33/573 . . . . for enzymes or isoenzymes **[4]**
33/574 . . . . for cancer **[4]**
33/576 . . . . for hepatitis **[4]**
33/577 . . . . involving monoclonal antibodies **[4]**
33/579 . . . involving limulus lysate **[4]**
33/58 . . . involving labelled substances (G01N 33/53 takes precedence; for testing in vivo A61K 51/00) **[3]**
33/60 . . . . involving radioactive labelled substances (tracers G21H 5/02) **[3]**
33/62 . . . involving urea **[3]**
33/64 . . . involving ketones **[3]**
33/66 . . . involving blood sugars, e.g. galactose **[3]**
33/68 . . . involving proteins, peptides or amino acids **[3]**
33/70 . . . involving creatine or creatinine **[3]**
33/72 . . . involving blood pigments, e.g. hemoglobin, bilirubin **[3]**
33/74 . . . involving hormones **[3]**
33/76 . . . . Human chorionic gonadotropin **[3]**
33/78 . . . . Thyroid gland hormones **[3]**
33/80 . . . involving blood groups or blood types **[3]**
33/82 . . . involving vitamins **[3]**
33/84 . . . involving inorganic compounds or pH **[3]**
33/86 . . . involving blood coagulating time **[3]**
33/88 . . . involving prostaglandins **[3]**
33/90 . . . involving iron binding capacity of blood **[3]**
33/92 . . . involving lipids, e.g. cholesterol **[3]**
33/94 . . . involving narcotics **[3]**
33/96 . . . involving blood or serum control standard **[3]**
33/98 . . . involving alcohol, e.g. ethanol in breath **[4]**

35/00 Automatic analysis not limited to methods or materials provided for in any single one of groups G01N 1/00 to G01N 33/00; **Handling materials therefor [3]**

35/02 . using a plurality of sample containers moved by a conveyer system past one or more treatment or analysis stations **[3]**
35/04 . . Details of the conveyer system **[3]**
35/08 . using a stream of discrete samples flowing along a tube system, e.g. flow injection analysis **[3]**
35/10 . Devices for transferring samples to, in, or from, the analysis apparatus, e.g. suction devices, injection devices **[6]**

37/00 Details not covered by any other group of this subclass [3]

G01P MEASURING LINEAR OR ANGULAR SPEED, ACCELERATION, DECELERATION, OR SHOCK; **INDICATING PRESENCE, ABSENCE, OR DIRECTION, OF MOVEMENT** (measuring or recording blood flow A61B 5/02, A61B 8/06; monitoring speed or deceleration of electrically-propelled vehicles B60L 3/00; vehicle lighting systems adapted to indicate speed B60Q 1/54; determining position or course in navigation, measuring ground distance in geodesy or surveying G01C; combined measuring devices for measuring two or more variables of movement G01C 23/00; measuring velocity of sound G01H; measuring velocity of light G01J 7/00; determining direction or velocity of solid objects by reflection or reradiation of radio or other waves and based on propagation effects, e.g. Doppler effect, propagation time, direction of propagation, G01S; measuring speed of nuclear radiation G01T; measuring acceleration of gravity G01V)

(1) This subclass covers measuring direction or velocity of flowing fluids using propagation effects of radiowaves or other waves caused in the fluid itself, e.g. by laser anemometer, by ultrasonic flowmeter with “sing-around-system”. **[4]**
(2) Attention is drawn to the Notes following the title of class G01.

Subclass index

1/00 **Details of instruments**

1/02 . Housings

1/04 . Special adaptations of driving means

1/07 . Indicating devices, e.g. for remote indication (indicating working conditions of vehicles G07C 5/00) **[3]**

1/08 . . Arrangements of scales, pointers, lamps, or acoustic indicators, e.g. in automobile speedometers

1/10 . . . for indicating predetermined speeds

1/11 . . . . by the detection of the position of the indicator needle **[3]**

1/12 . Recording devices (registering working conditions of vehicles G07C 5/00) **[3]**

1/14 . . for permanent recording **[3]**

1/16 . . for erasable recording, e.g. magnetic recording **[3]**

3/00 **Measuring linear or angular speed**; **Measuring differences of linear or angular speeds** (G01P 5/00 to G01P 11/00 take precedence; counting mechanisms G06M)

Note

Groups G01P 3/02 to G01P 3/64 are distinguished by the method of measurement which is of major importance. Thus the mere application of other methods for giving a final indication does not affect the classification.

3/02 . Devices characterised by the use of mechanical means

3/04 . . by comparing two speeds

3/06 . . . using a friction gear

3/08 . . . using differential gearing

3/10 . . by actuating an indicating element, e.g. pointer, for a fixed time

3/12 . . by making use of a system excited by impact

3/14 . . by exciting one or more mechanical resonance systems

3/16 . . by using centrifugal forces of solid masses (governors G05D 13/00)

3/18 . . . transferred to the indicator by mechanical means

3/20 . . . transferred to the indicator by fluid means

3/22 . . . transferred to the indicator by electric or magnetic means

3/24 . . by using friction effects (G01P 3/06 takes precedence)

3/26 . Devices characterised by the use of fluids

3/28 . . by using pumps

3/30 . . by using centrifugal forces of fluids

3/32 . . . in a rotary container communicating with a fixed container

3/34 . . by using friction effects

3/36 . Devices characterised by the use of optical means, e.g. using infra-red, visible, or ultra-violet light (G01P 3/68 takes precedence; gyrometers using the Sagnac effect, i.e. rotation-induced shifts between counter-rotating electromagnetic beams, G01C 19/64)

3/38 . . using photographic means

3/40 . . using stroboscopic means

3/42 . Devices characterised by the use of electric or magnetic means (G01P 3/66 takes precedence; measuring electric or magnetic values in general G01R)

3/44 . . for measuring angular speed (G01P 3/56 takes precedence)

3/46 . . . by measuring amplitude of generated current or voltage

3/48 . . . by measuring frequency of generated current or voltage

3/481 . . . . of pulse signals **[3]**

3/482 . . . . . delivered by nuclear radiation detectors **[3]**

3/483 . . . . . delivered by variable capacitance detectors **[3]**

3/484 . . . . . delivered by contact-making switches **[3]**

3/486 . . . . . delivered by photo-electric detectors **[3]**

3/487 . . . . . delivered by rotating magnets **[3]**

3/488 . . . . . delivered by variable reluctance detectors **[3]**

3/489 . . . . . Digital circuits therefor **[3]**

3/49 . . . using eddy currents

3/495 . . . . where the indicating means responds to forces produced by the eddy currents and the generating magnetic field **[3]**

3/50 . . for measuring linear speed (G01P 3/56 takes precedence)

3/52 . . . by measuring amplitude of generated current or voltage

3/54 . . . by measuring frequency of generated current or voltage

3/56 . . for comparing two speeds

3/58 . . . by measuring or comparing amplitudes of generated currents or voltages

3/60 . . . by measuring or comparing frequency of generated currents or voltages

3/62 . Devices characterised by the determination of the variation of atmospheric pressure with height to measure the vertical components of speed (measuring pressure in general G01L)

3/64 . Devices characterised by the determination of the time taken to traverse a fixed distance

3/66 . . using electric or magnetic means (G01P 3/80 takes precedence; measuring short time intervals G04F) **[4]**

3/68 . . using optical means, i.e. using infra-red, visible, or ultra-violet light (G01P 3/80 takes precedence) **[4]**

3/80 . . using auto-correlation or cross-correlation detection means **[4]**

5/00 **Measuring speed of fluids, e.g. of air stream**; **Measuring speed of bodies relative to fluids, e.g. of ship, of aircraft** (application of speed-measuring devices for measuring volume of fluids G01F)

5/01 . by using swirlflowmeter **[3]**

5/02 . by measuring forces exerted by the fluid on solid bodies, e.g. anemometer

5/04 . . using deflection of baffle-plates

5/06 . . using rotation of vanes (measuring speed of rotating shafts G01P 3/00)

5/07 . . . with electrical coupling to the indicating device **[3]**

5/08 . by measuring variation of an electric variable directly affected by the flow, e.g. by using dynamo-electric effect

5/10 . by measuring thermal variables

5/12 . . using variation of resistance of a heated conductor

5/14 . by measuring differences of pressure in the fluid

5/16 . . using Pitot tubes

5/165 . . . Arrangements or constructions of Pitot tubes **[3]**

5/17 . . . Coupling arrangements to the indicating device **[3]**

5/175 . . . . with the determination of Mach number (analogue computers therefor G06G 7/57) **[3]**

5/18 . by measuring the time taken by the fluid to traverse a fixed distance **[1,7]**

5/20 . . using particles entrained by a fluid stream (G01P 5/22 takes precedence) **[4]**

5/22 . . using auto-correlation or cross-correlation detection means **[4]**

5/24 . by measuring the direct influence of the streaming fluid on the properties of a detecting acoustical wave **[7]**

5/26 . by measuring the direct influence of the streaming fluid on the properties of a detecting optical wave **[7]**

7/00 **Measuring speed by integrating acceleration** (measuring travelled distance by double integration of acceleration G01C 21/16)

9/00 **Measuring speed by using gyroscopic effect, e.g. using gas, using electron beam** (gyroscopes or turn-sensitive devices per se G01C 19/00)

9/02 . using rotary gyroscopes

9/04 . using turn-sensitive devices with vibrating masses, e.g. tuning-fork

11/00 **Measuring average value of speed** (by determining time taken to traverse a fixed distance G01P 3/64, G01P 5/18)

11/02 . Measuring average speed of a number of bodies, e.g. of vehicles for traffic control

13/00 **Indicating or recording presence, absence, or direction, of movement** (counting moving objects G06M 7/00; electric switches H01H)

13/02 . Indicating direction only, e.g. by weather vane

13/04 . . Indicating positive or negative direction of a linear movement or clockwise or anti-clockwise direction of a rotational movement **[3]**

15/00 **Measuring acceleration**; **Measuring deceleration**; **Measuring shock, i.e. sudden change of acceleration**

15/02 . by making use of inertia forces (G01P 15/14, G01P 15/18 take precedence) **[1,7]**

15/03 . . by using non-electrical means **[3]**

15/04 . . for indicating maximum value

15/06 . . . using members subjected to a permanent deformation

15/08 . . with conversion into electric or magnetic values

15/09 . . . by piezo-electric pick-up **[3]**

15/093 . . . by photoelectric pick-up **[7]**

15/097 . . . by vibratory elements **[7]**

15/10 . . . . by vibratory strings

15/105 . . . by magnetically sensitive devices **[7]**

15/11 . . . . by inductive pick-up **[3]**

15/12 . . . by alteration of electrical resistance

15/125 . . . by capacitive pick-up **[3]**

15/13 . . . by measuring the force required to restore a proofmass subjected to inertial forces to a null position **[3]**

15/135 . . . by making use of contacts which are actuated by a movable inertial mass **[3]**

15/14 . by making use of gyroscopes (G01P 15/18 takes precedence; gyroscopes per se G01C 19/00) **[1,7]**

15/16 . by evaluating the time-derivative of a measured speed signal (G01P 15/18 takes precedence) **[3,7]**

15/18 . in two or more dimensions **[7]**

21/00 **Testing or calibrating of apparatus or devices covered by the other groups of this subclass**

21/02 . of speedometers

G01Q **SCANNING-PROBE TECHNIQUES OR APPARATUS**; **APPLICATIONS OF SCANNING-PROBE TECHNIQUES, E.G. SCANNING-PROBE MICROSCOPY [SPM] [2010.01]**

Note

In this subclass, the first place priority rule is applied, i.e. at each hierarchical level, classification is made in the first appropriate place. **[2010.01]**

10/00 **Scanning or positioning arrangements, i.e. arrangements for actively controlling the movement or position of the probe [2010.01]**

10/02 . Coarse scanning or positioning **[2010.01]**

10/04 . Fine scanning or positioning **[2010.01]**

10/06 . . Circuits or algorithms therefor **[2010.01]**

20/00 Monitoring the movement or position of the probe [2010.01]

20/02 . by optical means **[2010.01]**

20/04 . Self-detecting probes, i.e. wherein the probe itself generates a signal representative of its position, e.g. piezo-electric gauge **[2010.01]**

30/00 Auxiliary means serving to assist or improve the scanning probe techniques or apparatus, e.g. display or data processing devices [2010.01]

30/02 . Non-SPM analysing devices, e.g. SEM [Scanning Electron Microscope], spectrometer or optical microscope **[2010.01]**

30/04 . Display or data processing devices **[2010.01]**

30/06 . . for error compensation **[2010.01]**

30/08 . Means for establishing or regulating a desired environmental condition within a sample chamber **[2010.01]**

30/10 . . Thermal environment **[2010.01]**

30/12 . . Fluid environment **[2010.01]**

30/14 . . . Liquid environment **[2010.01]**

30/16 . . Vacuum environment **[2010.01]**

30/18 . Means for protecting or isolating the interior of a sample chamber from external environmental conditions or influences, e.g. vibrations or electromagnetic fields **[2010.01]**

30/20 . Sample handling devices or methods **[2010.01]**

40/00 Calibration, e.g. of probes [2010.01]

40/02 . Calibration standards or methods of fabrication thereof **[2010.01]**

60/00 Particular types of SPM [Scanning-Probe Microscopy] or apparatus therefor; Essential components thereof [2010.01]

60/02 . Multiple-type SPM, i.e. involving two or more SPM techniques **[2010.01]**

60/04 . . STM [Scanning Tunnelling Microscopy] combined with AFM [Atomic Force Microscopy] **[2010.01]**

60/06 . . SNOM [Scanning Near-field Optical Microscopy] combined with AFM [Atomic Force Microscopy] **[2010.01]**

60/08 . . MFM [Magnetic Force Microscopy] combined with AFM [Atomic Force Microscopy] **[2010.01]**

60/10 . STM [Scanning Tunnelling Microscopy] or apparatus therefor, e.g. STM probes **[2010.01]**

60/12 . . STS [Scanning Tunnelling Spectroscopy] **[2010.01]**

60/14 . . STP [Scanning Tunnelling Potentiometry] **[2010.01]**

60/16 . . Probes, their manufacture or their related instrumentation, e.g. holders **[2010.01]**

60/18 . SNOM [Scanning Near-Field Optical Microscopy] or apparatus therefor, e.g. SNOM probes **[2010.01]**

60/20 . . Fluorescence **[2010.01]**

60/22 . . Probes, their manufacture or their related instrumentation, e.g. holders **[2010.01]**

60/24 . AFM [Atomic Force Microscopy] or apparatus therefor, e.g. AFM probes **[2010.01]**

60/26 . . Friction force microscopy **[2010.01]**

60/28 . . Adhesion force microscopy **[2010.01]**

60/30 . . Scanning potential microscopy **[2010.01]**

60/32 . . AC mode **[2010.01]**

60/34 . . . Tapping mode **[2010.01]**

60/36 . . DC mode **[2010.01]**

60/38 . . Probes, their manufacture or their related instrumentation, e.g. holders **[2010.01]**

60/40 . . . Conductive probes **[2010.01]**

60/42 . . . Functionalisation **[2010.01]**

60/44 . SICM [Scanning Ion-Conductance Microscopy] or apparatus therefor, e.g. SICM probes **[2010.01]**

60/46 . SCM [Scanning Capacitance Microscopy] or apparatus therefor, e.g. SCM probes **[2010.01]**

60/48 . . Probes, their manufacture or their related instrumentation, e.g. holders **[2010.01]**

60/50 . MFM [Magnetic Force Microscopy] or apparatus therefor, e.g. MFM probes **[2010.01]**

60/52 . . Resonance **[2010.01]**

60/54 . . Probes, their manufacture or their related instrumentation, e.g. holders **[2010.01]**

60/56 . . . Probes with magnetic coating **[2010.01]**

60/58 . SThM [Scanning Thermal Microscopy] or apparatus therefor, e.g. SThM probes **[2010.01]**

60/60 . SECM [Scanning Electro-Chemical Microscopy] or apparatus therefor, e.g. SECM probes **[2010.01]**

70/00 General aspects of SPM probes, their manufacture or their related instrumentation, insofar as they are not specially adapted to a single SPM technique covered by group G01Q 60/00 [2010.01]

70/02 . Probe holders **[2010.01]**

70/04 . . with compensation for temperature or vibration induced errors **[2010.01]**

70/06 . Probe tip arrays **[2010.01]**

70/08 . Probe characteristics **[2010.01]**

70/10 . . Shape or taper **[2010.01]**

70/12 . . . Nano-tube tips **[2010.01]**

70/14 . . Particular materials **[2010.01]**

70/16 . Probe manufacture **[2010.01]**

70/18 . . Functionalisation **[2010.01]**

80/00 Applications, other than SPM, of scanning-probe techniques (manufacture or treatment of micro-structures B81C; manufacture or treatment of nano-structures B82B 3/00; recording or reproducing information using near-field interaction G11B 9/12, G11B 11/24 or G11B 13/08) **[2010.01]**

90/00 Scanning-probe techniques or apparatus not otherwise provided for [2010.01]

G01R **MEASURING ELECTRIC VARIABLES**; **MEASURING MAGNETIC VARIABLES** (measuring physical variables of any kind by conversion into electric variables, see Note (4) following the title of class G01; measuring diffusion of ions in an electric field, e.g. electrophoresis, electro-osmosis, G01N; investigating non-electric or non-magnetic properties of materials by using electric or magnetic methods G01N; indicating correct tuning of resonant circuits H03J 3/12; monitoring electronic pulse counters H03K 21/40; monitoring operation of communication systems H04)

(1) This subclass covers:
- measuring all kinds of electric or magnetic variables directly or by derivation from other electric or magnetic variables;
- measuring all kinds of electric or magnetic properties of materials;
- testing electric or magnetic devices, apparatus or networks (e.g. discharge tubes, amplifiers) or measuring their characteristics;
- indicating presence or sign of current or voltage;
- NMR, EPR or other spin-effect apparatus, not specially adapted for a particular application; **[5]**
- equipment for generating signals to be used for carrying out such tests and measurements.

(2) In this subclass, the following terms or expressions are used with the meanings indicated:
- "measuring" includes investigating;
- "instruments" or "measuring instruments" means electro-mechanical measuring mechanisms;
- "arrangements for measuring" means apparatus, circuits, or methods for measuring;

(3) Attention is drawn to the Notes following the title of class G01.

(4) In this subclass, instruments or arrangements for measuring electric variables are classified in the following way: **[8]**
- Electromechanical instruments where the measured electric variables direcly effect the indication of the measured value, including combined effects of two or more values, are classified in groups G01R 5/00 to G01R 11/00. **[8]**
- Details common to different types of the instruments covered by groups G01R 5/00 to G01R 11/00 are classified in group G01R 1/00. **[8]**
- Arrangements involving circuitry to obtain an indication of a measured value by deriving, calculating or otherwise processing electric variables, e.g. by comparison with another value, are classified in groups G01R 17/00 to G01R 29/00. **[8]**
- Details common to different types of arrangements covered by groups G01R 17/00 to G01R 29/00 are classified in group G01R 15/00. **[8]**

(5) In this subclass, group G01R 17/00 takes precedence over groups G01R 19/00 to G01R 31/00.

Subclass index

1/00 **Details of instruments or arrangements of the types included in groups G01R 5/00 to G01R 13/00 and G01R 31/00** (constructional details particular to arrangements for measuring the electric consumption G01R 11/02) **[3,8]**

1/02 . General constructional details (details of a kind applicable to measuring arrangements not specially adapted for a specific variable G01D 7/00)

1/04 . . Housings; Supporting members; Arrangements of terminals

1/06 . . Measuring leads; Measuring probes (G01R 19/145, G01R 19/165 take precedence; end pieces for leads H01R 11/00) **[3]**

1/067 . . . Measuring probes **[3]**

1/07 . . . . Non contact-making probes **[6]**

1/073 . . . . Multiple probes **[3]**

1/08 . . Pointers; Scales, Scale illumination

1/10 . . Arrangements of bearings

1/12 . . . of strip or wire bearings

1/14 . . Braking arrangements; Damping arrangements

1/16 . . Magnets

1/18 . . Screening arrangements against electric or magnetic fields, e.g. against earth's field

1/20 . Modifications of basic electric elements for use in electric measuring instruments; Structural combinations of such elements with such instruments

1/22 . . Tong testers acting as secondary windings of current transformers (voltage or current isolation using transformers G01R 15/18)

1/24 . . Transmission-line, e.g. waveguide, measuring sections, e.g. slotted section

1/26 . . . with linear movement of probe

1/28 . Provision in measuring instruments for reference values, e.g. standard voltage, standard waveform

1/30 . Structural combination of electric measuring instruments with basic electronic circuits, e.g. with amplifier

1/36 . Overload-protection arrangements or circuits for electric measuring instruments

1/38 . Arrangements for altering the indicating characteristic, e.g. by modifying the air gap (circuits G01D 3/02)
1/40 . Modifications of instruments to indicate the maximum or the minimum value reached in a time interval, e.g. by maximum indicator pointer **[3]**
1/42 . . thermally operated
1/44 . Modifications of instruments for temperature compensation **[2]**

3/00 Apparatus or processes specially adapted for the manufacture of measuring instruments

5/00 Instruments for converting a single current or a single voltage into a mechanical displacement (vibration galvanometers G01R 9/02)
5/02 . Moving-coil instruments
5/04 . . with magnet external to the coil
5/06 . . with core magnet
5/08 . . specially adapted for wide angle deflection; with eccentrically-pivoted moving coil
5/10 . String galvanometers
5/12 . Loop galvanometers
5/14 . Moving-iron instruments
5/16 . . with pivoting magnet
5/18 . . with pivoting soft iron, e.g. needle galvanometer
5/20 . Induction instruments e.g. Ferraris instruments
5/22 . Thermoelectric instruments (measuring effective values of currents or voltages using thermoconverters G01R 19/03)
5/24 . . operated by elongation of a strip or wire or by expansion of a gas or fluid
5/26 . . operated by deformation of a bimetallic element
5/28 . Electrostatic instruments (combined with radiation detector G01T)
5/30 . . Leaf electrometers
5/32 . . Wire electrometers; Needle electrometers
5/34 . . Quadrant electrometers

7/00 Instruments capable of converting two or more currents or voltages into a single mechanical displacement (G01R 9/00 takes precedence)
7/02 . for forming a sum or a difference
7/04 . for forming a quotient (for measuring resistance G01R 27/08)
7/06 . . moving-iron type
7/08 . . moving-coil type, e.g. crossed-coil type
7/10 . . . having more than two moving coils
7/12 . for forming product
7/14 . . moving-iron type
7/16 . . having both fixed and moving coils, i.e. dynamometers
7/18 . . . with iron core magnetically coupling fixed and moving coils

9/00 Instruments employing mechanical resonance
9/02 . Vibration galvanometers, e.g. for measuring current
9/04 . using vibrating reeds, e.g. for measuring frequency
9/06 . . magnetically driven
9/08 . . piezo-electrically driven

11/00 Electromechanical arrangements for measuring time integral of electric power or current, e.g. of consumption (monitoring electric consumption of electrically-propelled vehicles B60L 3/00)
11/02 . Constructional details (applicable to electric measuring instruments in general G01R 1/00)
11/04 . . Housings; Supporting racks; Arrangements of terminals
11/06 . . Magnetic circuits of induction meters **[2]**
11/067 . . . Coils therefor **[2]**
11/073 . . . Armatures therefor **[2]**
11/09 . . . . Disc armatures **[2]**
11/10 . . Braking magnets; Damping arrangements
11/12 . . Arrangements of bearings
11/14 . . . with magnetic relief
11/16 . . Adaptations of counters to electricity meters
11/17 . . Compensating for errors; Adjusting or regulating means therefor **[2]**
11/18 . . . Compensating for variations in ambient conditions **[2]**
11/185 . . . . Temperature compensation **[2]**
11/19 . . . Compensating for errors caused by disturbing torque, e.g. rotating-field errors of polyphase meters **[2]**
11/20 . . . Compensating for phase errors in induction meters **[2]**
11/21 . . . Compensating for errors caused by damping effects of the current, e.g. adjustment in the overload range **[2]**
11/22 . . . Adjusting torque, e.g. adjusting starting torque, adjusting of polyphase meters for obtaining equal torques **[2]**
11/23 . . . Compensating for errors caused by friction, e.g. adjustment in the light-load range **[2]**
11/24 . . Arrangements for avoiding or indicating fraudulent use **[4]**
11/25 . . Arrangements for indicating or signalling faults **[2,4]**

Note

Groups G01R 11/48 to G01R 11/56 take precedence over groups G01R 11/30 to G01R 11/46. **[4]**

11/30 . Dynamo-electric motor meters
11/32 . . Watt-hour meters
11/34 . . Ampère-hour meters
11/36 . Induction meters, e.g. Ferraris meters (Ferraris instruments G01R 5/20)
11/38 . . for single-phase operation
11/40 . . for polyphase operation
11/42 . . . Circuitry therefor
11/46 . Electrically-operated clockwork meters; Oscillatory meters; Pendulum meters
11/48 . Meters specially adapted for measuring real or reactive components; Meters specially adapted for measuring apparent energy
11/50 . . for measuring real component
11/52 . . for measuring reactive component
11/54 . . for measuring simultaneously at least two of the following three variables: real component, reactive component, apparent energy
11/56 . Special tariff meters
11/57 . . Multi-rate meters (G01R 11/63 takes precedence) **[2]**
11/58 . . . Tariff-switching devices therefor **[2]**
11/60 . . Subtraction meters; Meters measuring maximum or minimum-load hours
11/63 . . Over-consumption meters, e.g. measuring consumption while a predetermined level of power is exceeded **[2]**

11/64 . . Maximum meters, e.g. tariff for a period is based on maximum demand within that period

11/66 . . . Circuitry

13/00 Arrangements for displaying electric variables or waveforms (display by mechanical displacement only G01R 5/00, G01R 7/00, G01R 9/00; recording frequency spectrum G01R 23/18) **[4]**

13/02 . for displaying measured electric variables in digital form (counters G06M; analogue/digital conversion in general H03M 1/00) **[4]**

13/04 . for producing permanent records **[4]**

13/06 . . Modifications for recording transient disturbances, e.g. by starting or accelerating a recording medium

13/08 . . Electromechanical recording system using a mechanical direct-writing method

13/10 . . . with intermittent recording by representing the variable by the length of a stroke or by the position of a dot

13/12 . . Chemical recording, e.g. clydonographs (G01R 13/14 takes precedence)

13/14 . . Recording on a light-sensitive material

13/16 . . Recording on a magnetic medium

13/18 . . . using boundary displacement

13/20 . Cathode-ray oscilloscopes (cathode-ray tubes H01J 31/00)

13/22 . . Circuits therefor (circuits for generating pulses, e.g. sawtooth waveforms H03K 3/00)

13/24 . . . Time-base deflection circuits

13/26 . . . Circuits for controlling the intensity of the electron beam (brilliance control H01J 29/98)

13/28 . . . Circuits for simultaneous or sequential presentation of more than one variable (electronic switches H03K 17/00)

13/30 . . . Circuits for inserting reference markers, e.g. for timing, for calibrating, for frequency marking

13/32 . . . Circuits for displaying non-recurrent functions such as transients; Circuits for triggering; Circuits for synchronisation; Circuits for time-base expansion

13/34 . . . Circuits for representing a single waveform by sampling, e.g. for very high frequencies (sample-and-hold arrangements G11C 27/02) **[2]**

13/36 . using length of glow discharge, e.g. glowlight oscilloscopes (discharge tubes H01J) **[4]**

13/38 . using the steady or oscillatory displacement of a light beam by an electromechanical measuring system (such measuring systems per se G01R 5/00, G01R 7/00, G01R 9/00) **[4]**

13/40 . using modulation of a light beam otherwise than by mechanical displacement, e.g. by Kerr effect **[4]**

13/42 . Instruments using length of spark discharge, e.g. by measuring maximum separation of electrodes to produce spark

15/00 Details of measuring arrangements of the types provided for in groups G01R 17/00 to G01R 29/00, G01R 33/00 to G01R 33/26 and G01R 35/00 (details of instruments G01R 1/00; measuring leads, measuring probes G01R 1/06; overload protection arrangements G01R 1/36; circuits for correcting the transfer function G01D 3/02) **[1,8]**

15/04 . Voltage dividers **[6]**

15/06 . . having reactive components, e.g. capacitive transformer **[6]**

15/08 . Circuits for altering the measuring range

15/09 . . Autoranging circuits **[6]**

15/12 . Circuits for multi-testers, e.g. for measuring voltage, current, or impedance at will

15/14 . Adaptations providing voltage or current isolation, e.g. for high-voltage or high-current networks (voltage dividers G01R 15/04) **[6]**

15/16 . . using capacitive devices **[6]**

15/18 . . using inductive devices, e.g. transformers **[6]**

15/20 . . using galvano-magnetic devices, e.g. Hall-effect devices **[6]**

15/22 . . using light-emitting devices, e.g. LED, optocouplers **[6]**

15/24 . . using light-modulating devices **[6]**

15/26 . . using modulation of waves other than light, e.g. radio or acoustic waves **[6]**

17/00 Measuring arrangements involving comparison with a reference value, e.g. bridge

17/02 . Arrangements in which the value to be measured is automatically compared with a reference value

17/04 . . in which the reference value is continuously or periodically swept over the range of values to be measured

17/06 . . Automatic balancing arrangements

17/08 . . . in which a force or torque representing the measured value is balanced by a force or torque representing the reference value

17/10 . ac or dc measuring bridges (automatic comparison or re-balancing arrangements G01R 17/02)

17/12 . . using comparison of currents, e.g. bridges with differential current output

17/14 . . with indication of measured value by calibrated null indicator, e.g. percent bridge, tolerance bridge (G01R 17/12, G01R 17/16 take precedence)

17/16 . . with discharge tubes or semiconductor devices in one or more arms of the bridge, e.g. voltmeter using a difference amplifier

17/18 . . with more than four branches

17/20 . ac or dc potentiometric measuring arrangements (automatic comparison or re-balancing arrangements G01R 17/02)

17/22 . . with indication of measured value by calibrated null indicator

19/00 Arrangements for measuring currents or voltages or for indicating presence or sign thereof (G01R 5/00 takes precedence; for measuring bioelectric currents or voltages A61B 5/04) **[4]**

Note

Within groups G01R 19/02 to G01R 19/32, group G01R 19/28 takes precedence. Groups G01R 19/18 to G01R 19/25 take precedence over groups G01R 19/02 to G01R 19/165 and G01R 19/30. **[3]**

19/02 . Measuring effective values, i.e. root-mean-square values

19/03 . . using thermoconverters **[4]**

19/04 . Measuring peak values of ac or of pulses **[2]**

19/06 . Measuring real component; Measuring reactive component

19/08 . Measuring current density

19/10 . Measuring sum, difference, or ratio

19/12 . Measuring rate of change

19/14 . Indicating direction of current; Indicating polarity of voltage

19/145 . Indicating the presence of current or voltage **[3]**

19/15 . . Indicating the presence of current **[3]**

19/155 . . Indicating the presence of voltage **[3]**
19/165 . Indicating that current or voltage is either above or below a predetermined value or within or outside a predetermined range of values (circuits with regenerative action, e.g. Schmitt trigger H03K 3/00; threshold switches H03K 17/00) **[3]**
19/17 . . giving an indication of the number of times this occurs **[3]**
19/175 . Indicating the instants of passage of current or voltage through a given value, e.g. passage through zero **[3]**
19/18 . using conversion of dc into ac, e.g. with choppers
19/20 . . using transductors
19/22 . using conversion of ac into dc
19/25 . using digital measurement techniques (arrangements for displaying measured electric variables in digital form G01R 13/02) **[3]**
19/252 . . using analogue/digital converters of the type with conversion of voltage or current into frequency and measuring of this frequency **[4]**
19/255 . . using analogue/digital converters of the type with counting of pulses during a period of time proportional to voltage or current, delivered by a pulse generator with fixed frequency **[4]**
19/257 . . using analogue/digital converters of the type with comparison of different reference values with the value of voltage or current, e.g. using step-by-step method **[4]**
19/28 . adapted for measuring in circuits having distributed constants
19/30 . Measuring the maximum or the minimum value of current or voltage reached in a time interval (G01R 19/04 takes precedence; modifications of instruments to indicate the maximum or the minimum value reached in a time interval G01R 1/40) **[2,3]**
19/32 . Compensating for temperature change (modifications of instruments for temperature compensation G01R 1/44) **[2]**

21/00 Arrangements for measuring electric power or power factor (G01R 7/12 takes precedence) **[4]**
21/01 . in circuits having distributed constants (G01R 21/04, G01R 21/07, G01R 21/09, G01R 21/12 take precedence) **[2]**
21/02 . by thermal methods **[2]**
21/04 . . in circuits having distributed constants
21/06 . by measuring current and voltage (G01R 21/08 to G01R 21/133 take precedence) **[4]**
21/07 . . in circuits having distributed constants (G01R 21/09 takes precedence) **[2]**
21/08 . by using galvanomagnetic-effect devices, e.g. Hall-effect devices (such devices per se H01L) **[2]**
21/09 . . in circuits having distributed constants **[2]**
21/10 . by using square-law characteristics of circuit elements, e.g. diodes, to measure power absorbed by loads of known impedance (G01R 21/02 takes precedence) **[2]**
21/12 . . in circuits having distributed constants
21/127 . by using pulse modulation (G01R 21/133 takes precedence) **[4]**
21/133 . by using digital technique **[4]**
21/14 . Compensating for temperature change **[2]**

22/00 Arrangements for measuring time integral of electric power or current, e.g. electricity meters (electromechanical arrangements therefor G01R 11/00; monitoring electric consumption of electrically-propelled vehicles B60L 3/00) **[4,8]**

Note

An arrangement for measuring time integral of electric power is classified in group G01R 21/00 if the essential characteristic is the measuring of electric power. **[4]**

22/02 . by electrolytic methods **[4]**
22/04 . by calorimetric methods **[4]**
22/06 . by electronic methods **[8]**
22/08 . . using analogue techniques **[8]**
22/10 . . using digital techniques **[8]**

23/00 Arrangements for measuring frequencies; **Arrangements for analysing frequency spectra** (frequency discriminators H03D)
23/02 . Arrangements for measuring frequency, e.g. pulse repetition rate; Arrangements for measuring period of current or voltage (measuring short time intervals G04F)
23/04 . . adapted for measuring in circuits having distributed constants
23/06 . . by converting frequency into an amplitude of current or voltage
23/07 . . . using response of circuits tuned on resonance, e.g. grid-drip meter **[2]**
23/08 . . . using response of circuits tuned off resonance
23/09 . . . using analogue integrators, e.g. capacitors establishing a mean value by balance of input signals and defined discharge signals or leakage (radiation-measuring instruments in which pulses generated by a radiation detector are integrated G01T 1/15) **[2]**
23/10 . . by converting frequency into a train of pulses, which are then counted
23/12 . . by converting frequency into phase shift
23/14 . . by heterodyning; by beat-frequency comparison (generation of oscillations by beating unmodulated signals of different frequencies H03B 21/00) **[2]**
23/15 . . Indicating that frequency of pulses is either above or below a predetermined value or within or outside a predetermined range of values, by making use of non-linear or digital elements **[3]**
23/16 . Spectrum analysis; Fourier analysis
23/163 . . adapted for measuring in circuits having distributed constants **[3]**
23/165 . . using filters **[3]**
23/167 . . . with digital filters **[3]**
23/17 . . with optical auxiliary devices **[3]**
23/173 . . Wobbulating devices similar to swept panoramic receivers (panoramic receivers per se H03J 7/32) **[3]**
23/175 . . by delay means, e.g. tapped delay lines **[3]**
23/177 . . Analysis of very low frequencies **[3]**
23/18 . . with provision for recording frequency spectrum
23/20 . . Measurement of non-linear distortion

25/00 Arrangements for measuring phase angle between a voltage and a current or between voltages or currents (measuring power factor G01R 21/00; measuring position of individual pulses in a pulse train G01R 29/02; phase discriminators H03D) **[2]**
25/02 . in circuits having distributed constants
25/04 . involving adjustment of a phase shifter to produce a predetermined phase difference, e.g. zero difference
25/06 . employing quotient instrument
25/08 . by counting of standard pulses (measuring time intervals G04F) **[2]**

27/00 Arrangements for measuring resistance, reactance, impedance, or electric characteristics derived therefrom

27/02 . Measuring real or complex resistance, reactance, impedance, or other two-pole characteristics derived therefrom, e.g. time constant (by measuring phase angle only G01R 25/00)

27/04 . . in circuits having distributed constants

27/06 . . . Measuring reflection coefficients; Measuring standing-wave ratio

27/08 . . Measuring resistance by measuring both voltage and current

27/10 . . . using two-coil or crossed-coil instruments forming quotient

27/12 . . . . using hand generators, e.g. meggers

27/14 . . Measuring resistance by measuring current or voltage obtained from a reference source (G01R 27/16, G01R 27/20, G01R 27/22 take precedence)

27/16 . . Measuring impedance of element or network through which a current is passing from another source, e.g. cable, power line

27/18 . . . Measuring resistance to earth

27/20 . . Measuring earth resistance; Measuring contact resistance of earth connections, e.g. plates

27/22 . . Measuring resistance of fluids (measuring vessels, electrodes therefor G01N 27/07)

27/26 . . Measuring inductance or capacitance; Measuring quality factor, e.g. by using the resonance method; Measuring loss factor; Measuring dielectric constants

27/28 . Measuring attenuation, gain, phase shift, or derived characteristics of electric four-pole networks, i.e. two-port networks; Measuring transient response (in line transmission systems H04B 3/46)

27/30 . . with provision for recording characteristics, e.g. by plotting Nyquist diagram

27/32 . . in circuits having distributed constants **[2]**

29/00 Arrangements for measuring or indicating electric quantities not covered by groups G01R 19/00 to G01R 27/00

29/02 . Measuring characteristics of individual pulses, e.g. deviation from pulse flatness, rise time, duration (of amplitude G01R 19/00; of repetition rate G01R 23/00; of phase difference of two cyclic pulse trains G01R 25/00; monitoring pattern of pulse trains H03K 5/19) **[3]**

29/027 . . Indicating that a pulse characteristic is either above or below a predetermined value or within or beyond a predetermined range of values **[3]**

29/033 . . . giving an indication of the number of times this occurs **[3]**

29/04 . Measuring form factor, i.e. quotient of root-mean-square value and arithmetic mean of instantaneous value; Measuring peak factor, i.e. quotient of maximum value and root-mean-square value

29/06 . Measuring depth of modulation

29/08 . Measuring electromagnetic field characteristics

29/10 . . Radiation diagrams of aerials

29/12 . Measuring electrostatic fields

29/14 . . Measuring field distribution

29/16 . Measuring asymmetry of polyphase networks

29/18 . Indicating phase sequence; Indicating synchronism

29/20 . Measuring number of turns; Measuring transformation ratio or coupling factor of windings (calibrating instrument transformers G01R 35/02)

29/22 . Measuring piezo-electric properties

29/24 . Arrangements for measuring quantities of charge (electrostatic instruments G01R 5/28; indicating presence of current G01R 19/15; arrangements for measuring time integral of electric power or current G01R 22/00) **[2]**

29/26 . Measuring noise figure; Measuring signal-to-noise ratio **[2]**

31/00 Arrangements for testing electric properties; **Arrangements for locating electric faults**; **Arrangements for electrical testing characterised by what is being tested not provided for elsewhere** (measuring leads, measuring probes G01R 1/06; indicating electrical condition of switchgear or protective devices H01H 71/04, H01H 73/12, H02B 11/10, H02H 3/04; testing or measuring semiconductors or solid state devices during manufacture H01L 21/66; testing line transmission systems H04B 3/46)

31/01 . Subjecting similar articles in turn to test, e.g. "go/no-go" tests in mass production; Testing objects at points as they pass through a testing station (G01R 31/18 takes precedence) **[6]**

31/02 . Testing of electric apparatus, lines, or components for short-circuits, discontinuities, leakage, or incorrect line connection

31/04 . . Testing connections, e.g. of plugs, of non-disconnectable joints

31/06 . . Testing of electric windings, e.g. for polarity (measuring number of turns, transformation ratio, or coupling factor G01R 29/20)

31/07 . . Testing of fuses (means for indicating condition of fuse structurally associated with the fuse H01H 85/30) **[6]**

31/08 . Locating faults in cables, transmission lines, or networks (emergency protective circuit arrangements H02H)

31/10 . . by increasing destruction at fault, e.g. burning-in by using a pulse generator operating a special programme

31/11 . . using pulse-reflection methods

31/12 . Testing dielectric strength or breakdown voltage

31/14 . . Circuits therefor

31/16 . . Construction of testing vessels; Electrodes therefor

31/18 . . Subjecting similar articles in turn to test, e.g. "go/no-go" tests in mass production

31/20 . . Preparation of articles or specimens to facilitate testing

31/24 . Testing of discharge tubes (during manufacture H01J 9/42) **[2]**

31/25 . . Testing of vacuum tubes **[2]**

31/26 . Testing of individual semiconductor devices (measurement of impurity content of materials G01N) **[2]**

31/265 . . Contactless testing **[6]**

31/27 . . Testing of devices without physical removal from the circuit of which they form part, e.g. compensating for effects due to surrounding elements **[6]**

31/28 . Testing of electronic circuits, e.g. by signal tracer (testing for short-circuits, discontinuities, leakage or incorrect line connection G01R 31/02; checking computers G06F 11/00; checking static stores for correct operation or testing static stores during standby or offline operation G11C 29/00)

31/30 . . Marginal testing, e.g. by varying supply voltage (marginal testing of computers G06) **[2]**

31/302 . . Contactless testing (non contact-making probes G01R 1/07) **[5]**
31/303 . . . of integrated circuits (G01R 31/305 to G01R 31/315 take precedence) **[6]**
31/304 . . . of printed or hybrid circuits (G01R 31/305 to G01R 31/315 take precedence) **[6]**
31/305 . . . using electron beams **[5]**
31/306 . . . . of printed or hybrid circuits **[6]**
31/307 . . . . of integrated circuits **[6]**
31/308 . . . using non-ionising electromagnetic radiation, e.g. optical radiation **[5]**
31/309 . . . . of printed or hybrid circuits **[6]**
31/311 . . . . of integrated circuits **[6]**
31/312 . . . by capacitive methods **[5]**
31/315 . . . by inductive methods **[5]**
31/316 . . Testing of analog circuits **[6]**
31/3161 . . . Marginal testing **[6]**
31/3163 . . . Functional testing **[6]**
31/3167 . . Testing of combined analog and digital circuits **[6]**
31/317 . . Testing of digital circuits **[6]**
31/3173 . . . Marginal testing **[6]**
31/3177 . . . Testing of logic operation, e.g. by logic analysers **[6]**
31/3181 . . . Functional testing (G01R 31/3177 takes precedence) **[6]**
31/3183 . . . . Generation of test inputs, e.g. test vectors, patterns or sequences **[6]**
31/3185 . . . . Reconfiguring for testing, e.g. LSSD, partitioning **[6]**
31/3187 . . . . Built-in tests **[6]**
31/319 . . . . Tester hardware, i.e. output processing circuits **[6]**
31/3193 . . . . . with comparison between actual response and known fault-free response **[6]**
31/327 . Testing of circuit interrupters, switches or circuit-breakers (structural association with switches H01H) **[6]**
31/333 . . Testing of the switching capacity of high-voltage circuit-breakers (means for detecting the presence of an arc or discharge in switching devices H01H 9/50, H01H 33/26) **[6]**
31/34 . Testing dynamo-electric machines (testing electric windings G01R 31/06; methods or apparatus specially adapted for manufacturing, assembling, maintaining or repairing dynamo-electric machines H02K 15/00) **[3]**
31/36 . Apparatus for testing electrical condition of accumulators or electric batteries, e.g. capacity or charge condition (accumulators combined with arrangements for measuring, testing or indicating condition H01M 10/48; circuit arrangements for charging, or depolarising batteries or for supplying loads from batteries H02J 7/00) **[3]**
31/40 . Testing power supplies **[6]**
31/42 . . AC power supplies **[6]**
31/44 . Testing lamps (discharge lamps G01R 31/24; structurally associated with light source circuit arrangements for detecting lamp failure H05B 37/03) **[6]**

33/00 Arrangements or instruments for measuring magnetic variables

33/02 . Measuring direction or magnitude of magnetic fields or magnetic flux (G01R 33/20 takes precedence; measuring direction or magnitude of the earth's field for navigation or surveying G01C; for prospecting, for measuring the magnetic field of the earth G01V 3/00) **[4]**
33/022 . . Measuring gradient **[3]**

Note

Group G01R 33/022 or group G01R 33/10 takes precedence over groups G01R 33/025 to G01R 33/06.

33/025 . . Compensating stray fields **[3]**
33/028 . . Electrodynamic magnetometers **[3]**
33/032 . . using magneto-optic devices, e.g. Faraday **[3]**
33/035 . . using superconductive devices **[3]**
33/038 . . using permanent magnets, e.g. balances, torsion devices **[3]**
33/04 . . using the flux-gate principle
33/05 . . . in thin-film element **[3]**
33/06 . . using galvano-magnetic devices
33/07 . . . Hall-effect devices **[6]**
33/09 . . . Magneto-resistive devices **[6]**
33/10 . . Plotting field distribution
33/12 . Measuring magnetic properties of articles or specimens of solids or fluids (involving magnetic resonance G01R 33/20) **[4]**
33/14 . . Measuring or plotting hysteresis curves
33/16 . . Measuring susceptibility
33/18 . . Measuring magnetostrictive properties
33/20 . involving magnetic resonance (medical aspects A61B 5/055; magnetic resonance gyrometers G01C 19/60) **[4,5]**
33/24 . . for measuring direction or magnitude of magnetic fields or magnetic flux **[4]**
33/26 . . . using optical pumping **[4]**
33/28 . . Details of apparatus provided for in groups G01R 33/44 to G01R 33/64 **[5]**
33/30 . . . Sample handling arrangements, e.g. sample cells, spinning mechanisms **[5]**
33/31 . . . . Temperature control thereof **[6]**
33/32 . . . Excitation or detection systems, e.g. using radiofrequency signals **[5]**
33/34 . . . . Constructional details, e.g. resonators **[5]**
33/341 . . . . . comprising surface coils **[6]**
33/3415 . . . . . comprising arrays of sub-coils **[6]**
33/343 . . . . . of slotted-tube or loop-gap type **[6]**
33/345 . . . . . of waveguide type (G01R 33/343 takes precedence) **[6]**
33/36 . . . . Electrical details, e.g. matching or coupling of the coil to the receiver **[5]**
33/38 . . . Systems for generation, homogenisation or stabilisation of the main or gradient magnetic field **[5]**

Note

Groups G01R 33/385 to G01R 33/389 take precedence over groups G01R 33/381 to G01R 33/383. **[6]**

33/381 . . . . using electromagnets (electromagnets per se H01F 7/06) **[6]**

33/3815 . . . . . with superconducting coils, e.g. power supply therefor (superconductive magnets H01F 6/00) **[6]**
33/383 . . . . using permanent magnets (permanent magnets per se H01F 7/02) **[6]**
33/385 . . . . using gradient magnetic field coils **[6]**
33/387 . . . . Compensation of inhomogeneities (screening G01R 33/42) **[6]**
33/3873 . . . . . using ferromagnetic bodies **[6]**
33/3875 . . . . . using correction coil assemblies, e.g. active shimming **[6]**
33/389 . . . . Field stabilisation **[6]**
33/42 . . . Screening (screening in general H05K 9/00) **[5,6]**
33/421 . . . . of main or gradient magnetic field **[6]**
33/422 . . . . of the radiofrequency field **[6]**
33/44 . . using nuclear magnetic resonance (NMR) (G01R 33/24, G01R 33/62 take precedence) **[5]**
33/46 . . . NMR spectroscopy **[5]**
33/465 . . . . applied to biological material, e.g. in vitro testing **[6]**
33/48 . . . NMR imaging systems **[5]**
33/483 . . . . with selection of signal or spectra from particular regions of the volume, e.g. in vivo spectroscopy **[6]**
33/485 . . . . . based on chemical shift information **[6]**
33/50 . . . . based on the determination of relaxation times **[5]**
33/54 . . . . Signal processing systems, e.g. using pulse sequences **[5]**
33/56 . . . . . Image enhancement or correction, e.g. subtraction or averaging techniques **[5]**
33/561 . . . . . by reduction of the scanning time, i.e. fast acquiring systems, e.g. using echo-planar pulse sequences **[6]**
33/563 . . . . . of moving material, e.g. flow-contrast angiography **[6]**
33/565 . . . . . Correction of image distortions, e.g. due to magnetic field inhomogeneities **[6]**
33/567 . . . . . gated by physiological signals **[6]**
33/58 . . . . Calibration of imaging systems, e.g. using test probes **[5]**
33/60 . . using electron paramagnetic resonance (G01R 33/24, G01R 33/62 take precedence) **[5]**
33/62 . . using double resonance (G01R 33/24 takes precedence) **[5]**
33/64 . . using cyclotron resonance (G01R 33/24 takes precedence) **[5]**

35/00 Testing or calibrating of apparatus covered by the other groups of this subclass [2]
35/02 . of auxiliary devices, e.g. of instrument transformers according to prescribed transformation ratio, phase angle, or wattage rating
35/04 . of instruments for measuring time integral of power or current
35/06 . . by stroboscopic methods

G01S RADIO DIRECTION-FINDING; RADIO NAVIGATION; DETERMINING DISTANCE OR VELOCITY BY USE OF RADIO WAVES; LOCATING OR PRESENCE-DETECTING BY USE OF THE REFLECTION OR RERADIATION OF RADIO WAVES; ANALOGOUS ARRANGEMENTS USING OTHER WAVES

(1) In this subclass, the following term is used with the meaning indicated: **[6]**
– "transponder" means an arrangement which reacts to an incoming interrogating or detecting wave by emitting a specific answering or identifying wave. **[6]**
(2) Attention is drawn to the Notes following the title of class G01 and to Note (1) following the title of subclass G09B.

Subclass index

1/00 Beacons or beacon systems transmitting signals having a characteristic or characteristics capable of being detected by non-directional receivers and defining directions, positions, or position lines fixed relatively to the beacon transmitters; Receivers co-operating therewith (position-fixing by co-ordinating a plurality of determinations of direction or position lines G01S 5/00) **[2]**
1/02 . using radio waves (G01S 19/00 takes precedence) **[1,2010.01]**
1/04 . . Details
1/06 . . . Means for providing multiple indication, e.g. coarse and fine indications
1/08 . . Systems for determining direction or position line
1/10 . . . using amplitude comparison of signals transmitted sequentially from aerials or aerial systems having differently-oriented overlapping directivity-characteristics, e.g. equi-signal A-N type

1/12 . . . . the signals being transmitted sequentially from an aerial or aerial system having the orientation of its directivity characteristic periodically varied, e.g. by means of sequentially effective reflectors

1/14 . . . using amplitude comparison of signals transmitted simultaneously from aerials or aerial systems having differently-oriented overlapping directivity-characteristics

1/16 . . . . Azimuthal guidance systems, e.g. system for defining aircraft approach path, localiser system

1/18 . . . . Elevational guidance systems, e.g. system for defining aircraft glide path

1/20 . . . using a comparison of transit time of synchronised signals transmitted from non-directional aerials or aerial systems spaced apart, i.e. path-difference systems

1/22 . . . . the synchronised signals being frequency modulations on carrier waves and the transit times being compared by measuring difference of instantaneous frequencies of received carrier waves

1/24 . . . . the synchronised signals being pulses or equivalent modulations on carrier waves and the transit times being compared by measuring the difference in arrival time of a significant part of the modulations

1/26 . . . . . Systems in which pulses or time-base signals are generated locally at the receiver and brought into predetermined time-relationship with received signals, e.g. pulse duration coincides with time interval between arrival of significant part of modulation of signals received from first and second aerials or aerial systems

1/28 . . . . . wherein the predetermined time-relationship is maintained automatically

1/30 . . . . the synchronised signals being continuous waves or intermittent trains of continuous waves, the intermittency not being for the purpose of determining direction or position line and the transit times being compared by measuring the phase difference

1/32 . . . . . Systems in which the signals received, with or without amplification, or signals derived therefrom, are compared in phase directly

1/34 . . . . . Systems in which first and second synchronised signals are transmitted from both aerials or aerial systems and a beat frequency, obtained by heterodyning the first signals with each other is compared in phase with a beat frequency obtained by heterodyning the second signals with each other

1/36 . . . . . Systems in which a beat frequency, obtained by heterodyning the synchronised signals, is compared in phase with a reference signal having a phase substantially independent of direction

1/38 . . . using comparison of (1) the phase of the envelope of the change of frequency, due to Doppler effect, of the signal transmitted by an aerial moving, or appearing to move, in a cyclic path with (2) the phase of a reference signal, the frequency of this reference signal being synchronised with that of the cyclic movement, or apparent cyclic movement, of the aerial

1/40 . . . . the apparent movement of the aerial being produced by cyclic sequential energisation of fixed aerials

1/42 . . . Conical-scan beam beacons transmitting signals which indicate at a mobile receiver any displacement of the receiver from the conical-scan axis, e.g. for “beam-riding” missile control **[5]**

1/44 . . . Rotating or oscillating beam beacons defining directions in the plane of rotation or oscillation **[5]**

1/46 . . . . Broad-beam systems producing at a receiver a substantially continuous sinusoidal envelope signal of the carrier wave of the beam, the phase angle of which is dependent upon the angle between the direction of the receiver from the beacon and a reference direction from the beacon, e.g. cardioid system **[5]**

1/48 . . . . . wherein the phase angle of the direction-dependent envelope signal is a multiple of the direction angle, e.g. for “fine” bearing indication **[5]**

1/50 . . . . . wherein the phase angle of the direction-dependent envelope signal is compared with a non-direction- dependent reference signal **[5]**

1/52 . . . . . wherein the phase angles of a plurality of direction-dependent envelope signals produced by a plurality of beams rotating at different speeds or in different directions are compared **[5]**

1/54 . . . . Narrow-beam systems producing at a receiver a pulse-type envelope signal of the carrier wave of the beam, the timing of which is dependent upon the angle between the direction of the receiver from the beacon and a reference direction from the beacon; Overlapping broad beam systems defining a narrow zone and producing at a receiver a pulse-type envelope signal of the carrier wave of the beam, the timing of which is dependent upon the angle between the direction of the receiver from the beacon and a reference direction from the beacon **[5]**

1/56 . . . . . Timing the pulse-type envelope signals derived by reception of beam **[5]**

1/58 . . . . . wherein a characteristic of the beam transmitted or of an auxiliary signal is varied in time synchronously with rotation or oscillation of the beam **[5]**

1/60 . . . . . Varying frequency of beam signal or of auxiliary signal **[5]**

1/62 . . . . . Varying phase-relationship between beam and auxiliary signal **[5]**

1/64 . . . . . Varying pulse timing, e.g. varying interval between pulses radiated in pairs **[5]**

1/66 . . . . . Superimposing direction-indicating intelligence signals, e.g. speech, Morse **[5]**

1/68 . . Marker, boundary, call-sign, or like beacons transmitting signals not carrying directional information
1/70 . using electromagnetic waves other than radio waves
1/72 . using ultrasonic, sonic, or infrasonic waves
1/74 . . Details **[5]**
1/76 . . Systems for determining direction or position line **[5]**
1/78 . . . using amplitude comparison of signals transmitted from transducers or transducer systems having differently-oriented characteristics **[5]**
1/80 . . . using a comparison of transit time of synchronised signals transmitted from non-directional transducers or transducer systems spaced apart, i.e. path-difference systems **[5]**
1/82 . . . Rotating or oscillating beam beacons defining directions in the plane of rotation or oscillation **[5]**

3/00 Direction-finders for determining the direction from which infrasonic, sonic, ultrasonic, or electromagnetic waves, or particle emission, not having a directional significance, are being received (position-fixing by co-ordinating a plurality of determinations of direction or position lines G01S 5/00)
3/02 . using radio waves
3/04 . . Details
3/06 . . . Means for increasing effective directivity, e.g. by combining signals having differently-oriented directivity characteristics or by sharpening the envelope waveform of the signal derived from a rotating or oscillating beam aerial (comparing amplitude of signals having differently-oriented directivity characteristics to determine direction G01S 3/16, G01S 3/28)
3/08 . . . Means for reducing polarisation errors, e.g. by use of Adcock or spaced loop aerial systems
3/10 . . . Means for reducing or compensating for quadrantal, site, or like errors
3/12 . . . Means for determining sense of direction, e.g. by combining signals from directional aerial or goniometer search coil with those from non-directional aerial (determining direction by amplitude comparison of signals derived by combining directional and non-directional signals G01S 3/24, G01S 3/34)
3/14 . . Systems for determining direction or deviation from predetermined direction
3/16 . . . using amplitude comparison of signals derived sequentially from receiving aerials or aerial systems having differently-oriented directivity characteristics or from an aerial system having periodically-varied orientation of directivity characteristic
3/18 . . . . derived directly from separate directional aerials
3/20 . . . . derived by sampling signal received by an aerial system having periodically-varied orientation of directivity characteristic
3/22 . . . . derived from different combinations of signals from separate aerials, e.g. comparing sum with difference
3/24 . . . . . the separate aerials comprising one directional aerial and one non-directional aerial, e.g. combination of loop and open aerials producing a reversed cardioid directivity characteristic
3/26 . . . . . the separate aerials having differently-oriented directivity characteristics
3/28 . . . using amplitude comparison of signals derived simultaneously from receiving aerials or aerial systems having differently-oriented directivity characteristics
3/30 . . . . derived directly from separate directional systems
3/32 . . . . derived from different combinations of signals from separate aerials, e.g. comparing sum with difference
3/34 . . . . . the separate aerials comprising one directional aerial and one non-directional aerial, e.g. combination of loop and open aerials producing a reversed cardioid directivity characteristic
3/36 . . . . . the separate aerials having differently-oriented directivity characteristics
3/38 . . . using adjustment of real or effective orientation of directivity characteristic of an aerial or an aerial system to give a desired condition of signal derived from that aerial or aerial system, e.g. to give a maximum or minimum signal (G01S 3/16, G01S 3/28 take precedence)
3/40 . . . . adjusting orientation of a single directivity characteristic to produce maximum or minimum signal, e.g. rotatable loop aerial, equivalent goniometer system
3/42 . . . . the desired condition being maintained automatically
3/44 . . . . the adjustment being varied periodically or continuously until it is halted automatically when the desired condition is attained
3/46 . . . using aerials spaced apart and measuring phase or time difference between signals therefrom, i.e. path-difference systems
3/48 . . . . the waves arriving at the aerials being continuous or intermittent and the phase difference of signals derived therefrom being measured
3/50 . . . . the waves arriving at the aerials being pulse modulated and the time difference of their arrival being measured
3/52 . . . using a receiving aerial moving, or appearing to move, in a cyclic path to produce a Doppler variation of frequency of the received signal
3/54 . . . . the apparent movement of the aerial being produced by coupling the receiver cyclically and sequentially to each of several fixed spaced aerials
3/56 . . . Conical-scan beam systems using signals indicative of the deviation of the direction of reception from the scan axis
3/58 . . . Rotating or oscillating beam systems using continuous analysis of received signal for determining direction in the plane of rotation or oscillation or for determining deviation from a predetermined direction in such a plane (G01S 3/14 takes precedence)
3/60 . . . . Broad-beam systems producing in the receiver a substantially-sinusoidal envelope signal of the carrier wave of the beam, the phase angle of which is dependent upon the angle between the direction of the transmitter from the receiver and a reference direction from the receiver, e.g. cardioid system
3/62 . . . . . wherein the phase angle of the signal is indicated by a cathode-ray tube

3/64 . . . . . wherein the phase angle of the signal is determined by phase comparison with a reference alternating signal varying in synchronism with the directivity variation

3/66 . . . . Narrow-beam systems producing in the receiver a pulse-type envelope signal of the carrier wave of the beam, the timing of which is dependent upon the angle between the direction of the transmitter from the receiver and a reference direction from the receiver; Overlapping broad-beam systems defining in the receiver a narrow zone and producing a pulse-type envelope signal of the carrier wave of the beam, the timing of which is dependent upon the angle between the direction of the transmitter from the receiver and a reference direction from the receiver

3/68 . . . . . wherein the timing of the pulse-type envelope signal is indicated by cathode-ray tube

3/70 . . . . . wherein the timing of the pulse-type envelope signal is determined by bringing a locally-generated pulse-type signal into coincidence or other predetermined time-relationship with the envelope signal

3/72 . . Diversity systems specially adapted for direction-finding

3/74 . . Multi-channel systems specially adapted for direction-finding, i.e. having a single aerial system capable of giving simultaneous indications of the directions of different signals (systems in which the directions of different signals are determined sequentially and displayed simultaneously G01S 3/04, G01S 3/14)

3/78 . using electromagnetic waves other than radio waves

3/781 . . Details **[5]**

3/782 . . Systems for determining direction or deviation from predetermined direction **[5]**

3/783 . . . using amplitude comparison of signals derived from static detectors or detector systems **[5]**

3/784 . . . . using a mosaic of detectors **[5]**

3/785 . . . using adjustment of orientation of directivity characteristics of a detector or detector system to give a desired condition of signal derived from that detector or detector system **[5]**

3/786 . . . . the desired condition being maintained automatically **[5]**

3/787 . . . using rotating reticles producing a direction-dependent modulation characteristic **[5]**

3/788 . . . . producing a frequency modulation characteristic **[5]**

3/789 . . . using rotating or oscillating beam systems, e.g. using mirrors, prisms **[5]**

3/80 . using ultrasonic, sonic, or infrasonic waves

3/801 . . Details **[5]**

3/802 . . Systems for determining direction or deviation from predetermined direction **[5]**

3/803 . . . using amplitude comparison of signals derived from receiving transducers or transducer systems having differently-oriented directivity characteristics **[5]**

3/805 . . . using adjustment of real or effective orientation of directivity characteristics of a transducer or transducer system to give a desired condition of signal derived from that transducer or transducer system, e.g. to give a maximum or minimum signal **[5]**

3/807 . . . . the desired condition being maintained automatically **[5]**

3/808 . . . using transducers spaced apart and measuring phase or time difference between signals therefrom, i.e. path-difference systems **[5]**

3/809 . . . Rotating or oscillating beam systems using continuous analysis of received signal for determining direction in the plane of rotation or oscillation or for determining deviation from a predetermined direction in such a plane **[5]**

3/82 . . with means for adjusting phase or compensating for time-lag errors

3/84 . . with indication presented on cathode-ray tubes

3/86 . . with means for eliminating undesired waves, e.g. disturbing noises

5/00 Position-fixing by co-ordinating two or more direction or position-line determinations; Position-fixing by co-ordinating two or more distance determinations [2]

5/02 . using radio waves (G01S 19/00 takes precedence) **[1,2010.01]**

5/04 . . Position of source determined by a plurality of spaced direction-finders

5/06 . . Position of source determined by co-ordinating a plurality of position lines defined by path-difference measurements (G01S 5/12 takes precedence) **[3]**

5/08 . . Position of single direction-finder fixed by determining direction of a plurality of spaced sources of known location

5/10 . . Position of receiver fixed by co-ordinating a plurality of position lines defined by path-difference measurements (G01S 5/12 takes precedence) **[3]**

5/12 . . by co-ordinating position lines of different shape, e.g. hyperbolic, circular, elliptical or radial

5/14 . . Determining absolute distances from a plurality of spaced points of known location

5/16 . using electromagnetic waves other than radio waves

5/18 . using ultrasonic, sonic, or infrasonic waves

5/20 . . Position of source determined by a plurality of spaced direction-finders **[5]**

5/22 . . Position of source determined by co-ordinating a plurality of position lines defined by path-difference measurements (G01S 5/28 takes precedence) **[5]**

5/24 . . Position of single direction-finder fixed by determining direction of a plurality of spaced sources of known location **[5]**

5/26 . . Position of receiver fixed by co-ordinating a plurality of position lines defined by path-difference measurements (G01S 5/28 takes precedence) **[5]**

5/28 . . by co-ordinating position lines of different shape, e.g. hyperbolic, circular, elliptical or radial **[5]**

5/30 . . Determining absolute distances from a plurality of spaced points of known location **[5]**

7/00 Details of systems according to groups G01S 13/00, G01S 15/00, G01S 17/00

7/02 . of systems according to group G01S 13/00

7/03 . . Details of HF subsystems specially adapted therefor, e.g. common to transmitter and receiver **[5]**

7/04 . . Display arrangements

7/06 . . . Cathode-ray tube displays

7/08 . . . . with vernier indication of distance, e.g. using two cathode-ray tubes
7/10 . . . . Providing two-dimensional co-ordinated display of distance and direction
7/12 . . . . . Plan-position indicators, i.e. P. P. I.
7/14 . . . . . Sector, off-centre, or expanded- angle display
7/16 . . . . . Signals displayed as intensity modulation with rectangular co-ordinates representing distance and bearing, e.g. type B
7/18 . . . . . Distance-height displays; Distance-elevation displays, e.g. type RHI, type E
7/20 . . . . Stereoscopic displays; Three-dimensional displays; Pseudo-three-dimensional displays
7/22 . . . . Producing cursor lines and indicia by electronic means
7/24 . . . . the display being orientated or displaced in accordance with movement of object carrying the transmitting and receiving apparatus, e.g. true-motion radar
7/26 . . . Displays using electroluminescent panels
7/28 . . Details of pulse systems
7/282 . . . Transmitters **[5]**
7/285 . . . Receivers **[5]**
7/288 . . . . Coherent receivers **[5]**
7/292 . . . . Extracting wanted echo-signals **[5]**
7/295 . . . . Means for transforming co-ordinates or for evaluating data, e.g. using computers **[5]**
7/298 . . . . . Scan converters **[5]**
7/32 . . . . Shaping echo pulse signals; Deriving non-pulse signals from echo pulse signals **[5]**
7/34 . . . . Gain of receiver varied automatically during pulse-recurrence period, e.g. anti-clutter gain control **[5]**
7/35 . . Details of non-pulse systems **[5]**
7/36 . . Means for anti-jamming
7/38 . . Jamming means, e.g. producing false echoes **[2]**
7/40 . . Means for monitoring or calibrating
7/41 . . using analysis of echo signal for target characterisation; Target signature; Target cross-section **[6]**
7/42 . . Diversity systems specially adapted for radar
7/48 . of systems according to group G01S 17/00
7/481 . . Constructional features, e.g. arrangements of optical elements **[6]**
7/483 . . Details of pulse systems **[6]**
7/484 . . . Transmitters **[6]**
7/486 . . . Receivers **[6]**
7/487 . . . . Extracting wanted echo signals **[6]**
7/489 . . . . Gain of receiver varied automatically during pulse-recurrence period **[6]**
7/491 . . Details of non-pulse systems **[6]**
7/493 . . . Extracting wanted echo signals **[6]**
7/495 . . Counter-measures or counter-counter-measures **[6]**
7/497 . . Means for monitoring or calibrating **[6]**
7/499 . . using polarisation effects **[6]**
7/51 . . Display arrangements **[6]**
7/52 . of systems according to group G01S 15/00
7/521 . . Constructional features **[6]**
7/523 . . Details of pulse systems **[6]**
7/524 . . . Transmitters **[6]**
7/526 . . . Receivers **[6]**
7/527 . . . . Extracting wanted echo signals **[6]**
7/529 . . . . Gain of receiver varied automatically during pulse-recurrence period **[6]**
7/53 . . . . Means for transforming co-ordinates or for evaluating data, e.g. using computers **[6]**
7/531 . . . . . Scan converters **[6]**
7/533 . . . . . Data rate converters **[6]**
7/534 . . Details of non-pulse systems **[6]**
7/536 . . . Extracting wanted echo signals **[6]**
7/537 . . Counter measures or counter-counter-measures, e.g. jamming, anti-jamming **[6]**
7/539 . . using analysis of echo signal for target characterisation; Target signature; Target cross-section **[6]**
7/54 . . with receivers spaced apart
7/56 . . Display arrangements
7/58 . . . for providing variable ranges
7/60 . . . for providing a permanent recording
7/62 . . . Cathode-ray tube displays
7/64 . . Luminous indications (G01S 7/62 takes precedence) **[5]**

11/00 **Systems for determining distance or velocity not using reflection or reradiation** (position-fixing by co-ordinating two or more distance determinations G01S 5/00) **[2]**

11/02 . using radio waves (G01S 19/00 takes precedence) **[5,2010.01]**
11/04 . . using angle measurements **[5]**
11/06 . . using intensity measurements **[5]**
11/08 . . using synchronised clocks **[5]**
11/10 . . using Doppler effect **[5]**
11/12 . using electromagnetic waves other than radio waves **[5]**
11/14 . using ultrasonic, sonic or infrasonic waves **[5]**
11/16 . using difference in transit time between electromagnetic and sonic waves **[5]**

(1) Groups G01S 13/00 to G01S 17/00 cover:
- systems for detecting the presence of an object, e.g. by reflection or reradiation from the object itself, or from a transponder associated with the object, for determining the distance or relative velocity of an object, for providing a co-ordinated display of the distance and direction of an object or for obtaining an image thereof; **[3]**
- systems arranged for mounting on a moving craft or vehicle and using the reflection of waves from an extended surface external to the craft, e.g. the surface of the earth, to determine the velocity and direction of motion of the craft relative to the surface. **[3]**

(2) Groups G01S 13/00 to G01S 17/00 do not cover:
- systems for determining the direction of an object by means not employing reflection or reradiation, which are covered by groups G01S 1/00 or G01S 3/00; **[3]**
- systems for determining distance or velocity of an object by means not employing reflection or reradiation, which are covered by group G01S 11/00. **[3]**

13/00 **Systems using the reflection or reradiation of radio waves, e.g. radar systems**; **Analogous systems using reflection or reradiation of waves whose nature or wavelength is irrelevant or unspecified [3]**

13/02 . Systems using reflection of radio waves, e.g. primary radar systems; Analogous systems **[3]**

13/04 . . Systems determining presence of a target (based on relative movement of target G01S 13/56) **[3]**
13/06 . . Systems determining position data of a target **[3]**
13/08 . . . Systems for measuring distance only (indirect measurement G01S 13/46) **[3]**
13/10 . . . . using transmission of interrupted pulse modulated waves (determination of distance by phase measurement G01S 13/32) **[3]**
13/12 . . . . . wherein the pulse-recurrence frequency is varied to provide a desired time relationship between the transmission of a pulse and the receipt of the echo of a preceding pulse **[3]**
13/14 . . . . . wherein a voltage or current pulse is initiated and terminated in accordance respectively with the pulse transmission and echo reception **[3]**
13/16 . . . . . using counters **[3]**
13/18 . . . . . wherein range gates are used **[3]**
13/20 . . . . . whereby multiple time-around echos are used or eliminated **[3]**
13/22 . . . . . using irregular pulse repetition frequency **[3]**
13/24 . . . . . using frequency agility of carrier wave **[3]**
13/26 . . . . . wherein the transmitted pulses use a frequency- or phase-modulated carrier wave **[3]**
13/28 . . . . . with time compression of received pulses **[3]**
13/30 . . . . . using more than one pulse per radar period **[3]**
13/32 . . . . using transmission of continuous unmodulated waves, amplitude-, frequency- or phase-modulated waves **[3]**
13/34 . . . . . using transmission of frequency-modulated waves and the received signal, or a signal derived therefrom, being heterodyned with a locally-generated signal related to the contemporaneous transmitted signal to give a beat-frequency signal **[3]**
13/36 . . . . . with phase comparison between the received signal and the contemporaneously transmitted signal **[3]**
13/38 . . . . . wherein more than one modulation frequency is used **[3]**
13/40 . . . . . wherein the frequency of transmitted signal is adjusted to give a predetermined phase relationship **[3]**
13/42 . . . Simultaneous measurement of distance and other coordinates (indirect measurement G01S 13/46) **[3]**
13/44 . . . . Monopulse radar, i.e. simultaneous lobing **[3]**
13/46 . . . Indirect determination of position data **[3]**
13/48 . . . . using multiple beams at emission or reception **[3]**
13/50 . . Systems of measurement based on relative movement of target **[3]**
13/52 . . . Discriminating between fixed and moving objects or between objects moving at different speeds **[3]**
13/522 . . . . using transmissions of interrupted pulse modulated waves **[5]**
13/524 . . . . . based upon the phase or frequency shift resulting from movement of objects, with reference to the transmitted signals, e.g. coherent MTi **[5]**
13/526 . . . . . performing filtering on the whole spectrum without loss of range information, e.g. using delay line cancellers or comb filters **[5]**
13/528 . . . . . with elimination of blind speeds **[5]**
13/53 . . . . . performing filtering on a single spectral line and associated with one or more range gates with a phase detector or a frequency mixer to extract the Doppler information, e.g. pulse Doppler radar **[5]**
13/532 . . . . . using a bank of range gates or a memory matrix **[5]**
13/534 . . . . . based upon amplitude or phase shift resulting from movement of objects, with reference to the surrounding clutter echo signal, e.g. non-coherent MTi, clutter referenced MTi, externally coherent MTi **[5]**
13/536 . . . . using transmission of continuous unmodulated waves, amplitude-, frequency-, or phase-modulated waves **[5]**
13/538 . . . . eliminating objects that have not moved between successive antenna scans, e.g. area MTi **[5]**
13/56 . . . . for presence detection **[3]**
13/58 . . . Velocity or trajectory determination systems; Sense-of-movement determination systems **[3]**
13/60 . . . . wherein the transmitter and receiver are mounted on the moving object, e.g. for determining ground speed, drift angle, ground track (G01S 13/64 takes precedence) **[3]**
13/62 . . . . Sense-of-movement determination **[3]**
13/64 . . . . Velocity measuring systems using range gates **[3]**
13/66 . Radar-tracking systems; Analogous systems **[3]**
13/68 . . for angle tracking only **[3]**
13/70 . . for range tracking only **[3]**
13/72 . . for two-dimensional tracking, e.g. combination of angle and range tracking, track-while-scan radar **[3]**
13/74 . Systems using reradiation of radio waves, e.g. secondary radar systems; Analogous systems **[3,6]**
13/75 . . using transponders powered from received waves, e.g. using passive transponders **[6]**
13/76 . . wherein pulse-type signals are transmitted **[3]**
13/78 . . . discriminating between different kinds of targets, e.g. IFF-radar, i.e. identification of friend or foe (G01S 13/75, G01S 13/79 takes precedence) **[3]**
13/79 . . Systems using random coded signals or random pulse repetition frequencies **[6]**
13/82 . . wherein continuous-type signals are transmitted **[3]**
13/84 . . . for distance determination by phase measurement **[3]**
13/86 . Combinations of radar systems with non-radar systems, e.g. sonar, direction finder **[3]**
13/87 . Combinations of radar systems, e.g. primary radar and secondary radar **[3]**

13/88 . Radar or analogous systems, specially adapted for specific applications (electromagnetic prospecting or detecting of objects, e.g. near-field detection, G01V 3/00) **[3,6]**
13/89 . . for mapping or imaging **[3]**
13/90 . . . using synthetic aperture techniques **[3,6]**
13/91 . . for traffic control (G01S 13/93 takes precedence) **[3]**
13/92 . . . for velocity measurement **[3]**
13/93 . . for anti-collision purposes **[3]**
13/94 . . for terrain-avoidance **[3]**
13/95 . . for meteorological use **[3]**

15/00 Systems using the reflection or reradiation of acoustic waves, e.g. sonar systems [3]
15/02 . using reflection of acoustic waves (G01S 15/66 takes precedence) **[3]**
15/04 . . Systems determining presence of a target **[3]**
15/06 . . Systems determining position data of a target **[3]**
15/08 . . . Systems for measuring distance only (indirect measurement G01S 15/46) **[3]**
15/10 . . . . using transmission of interrupted pulse-modulated waves (determination of distance by phase measurement G01S 15/32) **[3]**
15/12 . . . . . wherein the pulse-recurrence frequency is varied to provide a desired time relationship between the transmission of a pulse and the receipt of the echo of a preceding pulse **[3]**
15/14 . . . . . wherein a voltage or current pulse is initiated and terminated in accordance respectively with the pulse transmission and echo reception **[3]**
15/18 . . . . . wherein range gates are used **[3]**
15/32 . . . . using transmission of continuous unmodulated waves, amplitude-, frequency- or phase-modulated waves **[3]**
15/34 . . . . . using transmission of frequency-modulated waves and the received signal, or a signal derived therefrom, being heterodyned with a locally-generated signal related to the contemporaneous transmitted signal to give a beat-frequency signal **[3]**
15/36 . . . . . with phase comparison between the received signal and the contemporaneously transmitted signal **[3]**
15/42 . . . Simultaneous measurement of distance and other coordinates (indirect measurement G01S 15/46) **[3]**
15/46 . . . Indirect determination of position data **[3]**
15/50 . . Systems of measurement based on relative movement of target **[3]**
15/52 . . . Discriminating between fixed and moving objects or between objects moving at different speeds **[3]**
15/58 . . . Velocity or trajectory determination systems; Sense-of-movement determination systems **[3]**
15/60 . . . . wherein the transmitter and receiver are mounted on the moving object, e.g. for determining ground speed, drift angle, ground track **[3]**
15/62 . . . . Sense-of-movement determination **[3]**
15/66 . Sonar tracking systems **[3]**
15/74 . Systems using reradiation of acoustic waves, e.g. IFF, i.e. identification of friend or foe **[3]**
15/87 . Combinations of sonar systems **[3]**
15/88 . Sonar systems, specially adapted for specific applications (seismic or acoustic prospecting or detecting G01V 1/00) **[3,6]**
15/89 . . for mapping or imaging **[3]**
15/93 . . for anti-collision purposes **[3]**
15/96 . . for locating fish **[3]**

17/00 Systems using the reflection or reradiation of electromagnetic waves other than radio waves, e.g. lidar systems [3]
17/02 . Systems using the reflection of electromagnetic waves other than radio waves (G01S 17/66 takes precedence) **[3]**
17/06 . . Systems determining position data of a target **[3]**
17/08 . . . for measuring distance only (indirect measurement G01S 17/46; active triangulation systems G01S 17/48) **[3,8]**
17/10 . . . . using transmission of interrupted pulse-modulated waves (determination of distance by phase measurements G01S 17/32) **[3]**
17/32 . . . . using transmission of continuous unmodulated waves, amplitude-, frequency-, or phase-modulated waves **[3]**
17/36 . . . . . with phase comparison between the received signal and the contemporaneously transmitted signal **[3]**
17/42 . . . Simultaneous measurement of distance and other coordinates (indirect measurement G01S 17/46) **[3]**
17/46 . . . Indirect determination of position data **[3]**
17/48 . . . . Active triangulation systems, i.e. using the transmission and reflection of electromagnetic waves other than radio waves **[8]**
17/50 . . Systems of measurement based on relative movement of target **[3]**
17/58 . . . Velocity or trajectory determination systems; Sense-of-movement determination systems **[3]**
17/66 . Tracking systems using electromagnetic waves other than radio waves **[3]**
17/74 . Systems using reradiation of electromagnetic waves other than radio waves, e.g. IFF, i.e. identification of friend or foe **[3]**
17/87 . Combinations of systems using electromagnetic waves other than radio waves **[3]**
17/88 . Lidar systems, specially adapted for specific applications **[3]**
17/89 . . for mapping or imaging **[6,8]**
17/93 . . for anti-collision purposes **[6,8]**
17/95 . . for meteorological use **[6,8]**

19/00 Satellite radio beacon positioning systems; **Determining position, velocity or attitude using signals transmitted by such systems [2010.01]**
19/01 . Satellite radio beacon positioning systems transmitting time-stamped messages, e.g. GPS [Global Positioning System], GLONASS [Global Orbiting Navigation Satellite System] or GALILEO **[2010.01]**
19/02 . . Details of the space or ground control segments **[2010.01]**
19/03 . . Cooperating elements; Interaction or communication between different cooperating elements or between cooperating elements and receivers **[2010.01]**

Note

The term “cooperating elements” designates additional elements or subsystems, including receivers of other users, which interact or communicate with the receiver or the satellite positioning system. **[2010.01]**

19/04 . . . providing carrier phase data **[2010.01]**
19/05 . . . providing aiding data **[2010.01]**
19/06 . . . . employing an initial estimate of the location of the receiver as aiding data or in generating aiding data **[2010.01]**
19/07 . . . providing data for correcting measured positioning data, e.g. DGPS [differential GPS] or ionosphere corrections **[2010.01]**
19/08 . . . providing integrity information, e.g. health of satellites or quality of ephemeris data **[2010.01]**
19/09 . . . providing processing capability normally carried out by the receiver **[2010.01]**
19/10 . . . providing dedicated supplementary positioning signals **[2010.01]**
19/11 . . . . wherein the cooperating elements are pseudolites or satellite radio beacon positioning system signal repeaters **[2010.01]**
19/12 . . . . wherein the cooperating elements are telecommunication base stations **[2010.01]**
19/13 . . Receivers **[2010.01]**
19/14 . . . specially adapted for specific applications **[2010.01]**
19/15 . . . . Aircraft landing systems **[2010.01]**
19/16 . . . . Anti-theft; Abduction **[2010.01]**
19/17 . . . . Emergency applications **[2010.01]**
19/18 . . . . Military applications **[2010.01]**
19/19 . . . . Sporting applications **[2010.01]**
19/20 . . . Integrity monitoring, fault detection or fault isolation of space segment **[2010.01]**
19/21 . . . Interference related issues **[2010.01]**
19/22 . . . Multipath-related issues **[2010.01]**
19/23 . . . Testing, monitoring, correcting or calibrating of a receiver element **[2010.01]**
19/24 . . . Acquisition or tracking of signals transmitted by the system **[2010.01]**
19/25 . . . . involving aiding data received from a cooperating element, e.g. assisted GPS **[2010.01]**
19/26 . . . . involving a sensor measurement for aiding acquisition or tracking **[2010.01]**
19/27 . . . . creating, predicting or correcting ephemeris or almanac data within the receiver **[2010.01]**
19/28 . . . . Satellite selection **[2010.01]**
19/29 . . . . carrier related **[2010.01]**
19/30 . . . . code related **[2010.01]**
19/31 . . . Acquisition or tracking of other signals for positioning **[2010.01]**
19/32 . . . Multimode operation in a single same satellite system, e.g. GPS L1/L2 **[2010.01]**
19/33 . . . Multimode operation in different systems which transmit time stamped messages, e.g. GPS/GLONASS **[2010.01]**
19/34 . . . Power consumption **[2010.01]**
19/35 . . . Constructional details or hardware or software details of the signal processing chain **[2010.01]**
19/36 . . . . relating to the receiver frond end **[2010.01]**
19/37 . . . . Hardware or software details of the signal processing chain **[2010.01]**
19/38 . Determining a navigation solution using signals transmitted by a satellite radio beacon positioning system **[2010.01]**
19/39 . . the satellite radio beacon positioning system transmitting time-stamped messages, e.g. GPS [Global Positioning System], GLONASS [Global Orbiting Navigation Satellite System] or GALILEO **[2010.01]**
19/40 . . . Correcting position, velocity or attitude **[2010.01]**
19/41 . . . . Differential correction, e.g. DGPS [differential GPS] **[2010.01]**
19/42 . . . Determining position **[2010.01]**
19/43 . . . . using carrier phase measurements, e.g. kinematic positioning; using long or short baseline interferometry **[2010.01]**
19/44 . . . . . Carrier phase ambiguity resolution; Floating ambiguity; LAMBDA [Least-squares AMBiguity Decorrelation Adjustment] method **[2010.01]**
19/45 . . . . by combining measurements of signals from the satellite radio beacon positioning system with a supplementary measurement **[2010.01]**
19/46 . . . . . the supplementary measurement being of a radio-wave signal type **[2010.01]**
19/47 . . . . . the supplementary measurement being an inertial measurement, e.g. tightly coupled inertial **[2010.01]**
19/48 . . . . by combining or switching between position solutions derived from the satellite radio beacon positioning system and position solutions derived from a further system **[2010.01]**
19/49 . . . . . whereby the further system is an inertial position system, e.g. loosely-coupled **[2010.01]**
19/50 . . . . whereby the position solution is constrained to lie upon a particular curve or surface, e.g. for locomotives on railway tracks **[2010.01]**
19/51 . . . . Relative positioning **[2010.01]**
19/52 . . . Determining velocity **[2010.01]**
19/53 . . . Determining attitude **[2010.01]**
19/54 . . . . using carrier phase measurements; using long or short baseline interferometry **[2010.01]**
19/55 . . . . . Carrier phase ambiguity resolution; Floating ambiguity; LAMBDA [Least-squares AMBiguity Decorrelation Adjustment] method **[2010.01]**

G01T MEASUREMENT OF NUCLEAR OR X-RADIATION (radiation analysis of materials, mass spectrometry G01N 23/00; tubes for determining the presence, intensity, density or energy of radiation or particles H01J 47/00)

(1) This subclass covers the measurement of X-radiation, gamma radiation, corpuscular radiation, cosmic radiation, or neutron radiation.
(2) Attention is drawn to the Notes following the title of class G01.

1/00 Measuring X-radiation, gamma radiation, corpuscular radiation, or cosmic radiation (G01T 3/00, G01T 5/00 take precedence) **[2]**
1/02 . Dosimeters (G01T 1/15 takes precedence) **[2]**
1/04 . . Chemical dosimeters (G01T 1/06, G01T 1/08 take precedence)
1/06 . . Glass dosimeters
1/08 . . Photographic dosimeters
1/10 . . Luminescent dosimeters
1/105 . . . Read-out devices (G01T 1/115 takes precedence) **[2]**
1/11 . . . Thermo-luminescent dosimeters
1/115 . . . . Read-out devices **[2]**
1/12 . . Calorimetric dosimeters
1/14 . . Electrostatic dosimeters (construction of ionisation chambers H01J 47/02)
1/142 . . . Charging devices; Read-out devices **[2]**
1/15 . Instruments in which pulses generated by a radiation detector are integrated, e.g. by a diode pump circuit
1/16 . Measuring radiation intensity (G01T 1/29 takes precedence) **[2]**
1/161 . . Applications in the field of nuclear medicine, e.g. in vivo counting **[2]**
1/163 . . . Whole-body counters **[2]**
1/164 . . . Scintigraphy **[2]**
1/166 . . . . involving relative movement between detector and subject **[2]**
1/167 . . Measuring radioactive content of objects, e.g. contamination (whole-body counters G01T 1/163) **[2]**
1/169 . . Exploration, location of contaminated surface areas **[2]**
1/17 . . Circuit arrangements not adapted to a particular type of detector
1/172 . . . with coincidence circuit arrangements (G01T 1/178 takes precedence) **[2]**
1/175 . . . Power supply circuits **[2]**
1/178 . . . for measuring specific activity in the presence of other radioactive substances, e.g. natural, in the air or in liquids such as rain-water **[2]**
1/18 . . with counting-tube arrangements, e.g. with Geiger counters (tubes H01J 47/00)
1/185 . . with ionisation-chamber arrangements **[2]**
1/20 . . with scintillation detectors
1/202 . . . the detector being a crystal
1/203 . . . the detector being made of plastics
1/204 . . . the detector being a liquid
1/205 . . . the detector being a gas
1/208 . . . Circuits specially adapted for scintillation detectors, e.g. for the photo-multiplier section **[2]**
1/22 . . with Cerenkov detectors
1/24 . . with semiconductor detectors
1/26 . . with resistance detectors
1/28 . . with secondary-emission detectors
1/29 . Measurement performed on radiation beams, e.g. position or section of the beam; Measurement of spatial distribution of radiation **[2]**
1/30 . Measuring half-life of a radioactive substance
1/32 . Measuring polarisation of particles
1/34 . Measuring cross-section, e.g. absorption cross-section of particles
1/36 . Measuring spectral distribution of X-rays or of nuclear radiation
1/38 . . Particle discrimination and measurement of relative mass, e.g. by measurement of loss of energy with distance (dE/dx) **[2]**
1/40 . . Stabilisation of spectrometers **[2]**

3/00 Measuring neutron radiation (G01T 5/00 takes precedence) **[2]**
3/02 . by shielding other radiation
3/04 . using calorimetric devices
3/06 . with scintillation detectors **[2]**
3/08 . with semiconductor detectors **[2]**

5/00 Recording of movements or tracks of particles (spark chambers H01J 47/14); **Processing or analysis of such tracks [2]**
5/02 . Processing of tracks; Analysis of tracks
5/04 . Cloud chambers, e.g. Wilson chamber
5/06 . Bubble chambers
5/08 . Scintillation chambers (discharge tubes H01J 40/00, H01J 47/00)
5/10 . Plates or blocks in which tracks of nuclear particles are made visible by after-treatment, e.g. using photographic emulsion, using mica
5/12 . Circuit arrangements with multi-wire or parallel-plate chambers, e.g. spark chambers (tubes per se H01J 47/00) **[2]**

7/00 Details of radiation-measuring instruments
7/02 . Collecting-means for receiving or storing samples to be investigated
7/04 . . by filtration
7/06 . . by electrostatic precipitation (G01T 7/04 takes precedence)
7/08 . Means for conveying samples received
7/10 . . using turntables
7/12 . Provision for actuation of an alarm

G01V **GEOPHYSICS**; **GRAVITATIONAL MEASUREMENTS**; **DETECTING MASSES OR OBJECTS**; **TAGS** (means for indicating the location of accidentally buried, e.g. snow-buried, persons A63B 29/02) **[4,6]**

(1) This subclass covers radar, sonar, lidar or analogous systems specifically designed for geophysical use. Radar, sonar, lidar or analogous systems, or details of such systems, if of a general interest, are also classified in subclass G01S. **[6]**

(2) In this subclass, the following term is used with the meaning indicated: **[6]**
– "tags" means arrangements cooperating with a detecting field, e.g. near field, and designed to produce a specific detectable effect; "tags" also means active markers capable of generating a detectable field. **[6]**

(3) In this subclass, the geophysical methods apply both to the earth and to other celestial objects, e.g. planets.

(4) Attention is drawn to the Notes following the title of class G01.

Subclass index

1/00 **Seismology**; **Seismic or acoustic prospecting or detecting**

1/02 . Generating seismic energy

1/04 . . Details

1/047 . . . Arrangements for coupling the generator to the ground **[3]**

1/053 . . . . for generating transverse waves **[3]**

1/06 . . . Ignition devices (G01V 1/393 takes precedence) **[3]**

1/08 . . . . involving time-delay devices

1/09 . . . Transporting arrangements, e.g. on vehicles (G01V 1/38 takes precedence) **[3]**

1/104 . . using explosive charges (G01V 1/157 takes precedence) **[3]**

1/108 . . . by deforming or displacing surfaces of enclosures **[3]**

1/112 . . . . for use on the surface of the earth **[3]**

1/116 . . . where pressurised combustion gases escape from the generator in a pulsating manner, e.g. for generating bursts **[3]**

1/13 . . . Arrangements or disposition of charges to produce a desired pattern in space or time

1/133 . . using fluidic driving means, e.g. using highly pressurised fluids (G01V 1/104 takes precedence) **[3]**

1/135 . . . by deforming or displacing surfaces of enclosures **[3]**

1/137 . . . which fluids escape from the generator in a pulsating manner, e.g. for generating bursts **[3]**

1/143 . . using mechanical driving means (G01V 1/104, G01V 1/133 takes precedence) **[3]**

1/145 . . . by deforming or displacing surfaces **[3]**

1/147 . . . using impact of dropping masses **[3]**

1/153 . . . using rotary unbalanced masses **[3]**

1/155 . . . using reciprocating masses **[3]**

1/157 . . using spark discharges; using exploding wires **[3]**

1/16 . Receiving elements for seismic signals; Arrangements or adaptations of receiving elements

1/18 . . Receiving elements, e.g. seismometer, geophone **[2]**

1/20 . . Arrangements of receiving elements, e.g. geophone pattern

1/22 . Transmitting seismic signals to recording or processing apparatus

1/24 . Recording seismic data

1/26 . . Reference-signal-transmitting devices, e.g. indicating moment of firing of shot

1/28 . Processing seismic data, e.g. analysis, for interpretation, for correction (G01V 1/48 takes precedence) **[6]**

1/30 . . Analysis (G01V 1/50 takes precedence) **[6]**

1/32 . . Transforming one recording into another

1/34 . . Displaying seismic recordings

1/36 . . Effecting static or dynamic corrections on records, e.g. correcting spread; Correlating seismic signals; Eliminating effects of unwanted energy

1/37 . . . specially adapted for seismic systems using continuous agitation of the ground **[3]**

1/38 . specially adapted for water-covered areas (G01V 1/28 takes precedence)

1/387 . . Reducing secondary bubble pulse, i.e. reducing the detected signals resulting from the generation and release of gas bubbles after the primary explosion **[3]**

1/393 . . Means for loading explosive underwater charges, e.g. combined with ignition devices **[3]**

1/40 . specially adapted for well-logging

1/42 . . using generators in one well and receivers elsewhere or vice-versa (G01V 1/52 takes precedence) **[6]**

1/44 . . using generators and receivers in the same well (G01V 1/52 takes precedence) **[6]**

1/46 . . . Data acquisition **[6]**

1/48 . . . Processing data **[6]**

1/50 . . . . Analysing data **[6]**

1/52 . . Structural details **[6]**

3/00 **Electric or magnetic prospecting or detecting**; **Measuring magnetic field characteristics of the earth, e.g. declination or deviation [2,4]**

Note

Groups G01V 3/15 to G01V 3/18 take precedence over groups G01V 3/02 to G01V 3/14. **[3]**

3/02 . operating with propagation of electric current
3/04 . . using dc
3/06 . . using ac
3/08 . operating with magnetic or electric fields produced or modified by objects or geological structures or by detecting devices (with electromagnetic waves G01V 3/12)
3/10 . . using induction coils
3/11 . . . for detecting conductive objects, e.g. firearms, cables or pipes **[3]**
3/12 . operating with electromagnetic waves
3/14 . operating with electron or nuclear magnetic resonance
3/15 . specially adapted for use during transport, e.g. by a person, vehicle or boat **[3]**
3/16 . . specially adapted for use from aircraft (G01V 3/165 to G01V 3/175 take precedence) **[3]**
3/165 . . operating with magnetic or electric fields produced or modified by the object or by the detecting device (with electromagnetic waves G01V 3/17) **[3]**
3/17 . . operating with electromagnetic waves **[3]**
3/175 . . operating with electron or nuclear magnetic resonance **[3]**
3/18 . specially adapted for well-logging
3/20 . . operating with propagation of electric current **[3]**
3/22 . . . using dc **[3]**
3/24 . . . using ac **[3]**
3/26 . . operating with magnetic or electric fields produced or modified either by the surrounding earth formation or by the detecting device (with electromagnetic waves G01V 3/30) **[3]**
3/28 . . . using induction coils **[3]**
3/30 . . operating with electromagnetic waves **[3]**
3/32 . . operating with electron or nuclear magnetic resonance **[3]**
3/34 . . Transmitting data to recording or processing apparatus; Recording data **[3]**
3/36 . Recording data (G01V 3/34 takes precedence) **[3]**
3/38 . Processing data, e.g. for analysis, for interpretation or for correction **[3]**
3/40 . specially adapted for measuring magnetic field characteristics of the earth **[3]**

5/00 Prospecting or detecting by the use of nuclear radiation, e.g. of natural or induced radioactivity

5/02 . specially adapted for surface logging, e.g. from aircraft **[3]**
5/04 . specially adapted for well-logging **[3]**
5/06 . . for detecting naturally radioactive minerals **[3]**
5/08 . . using primary nuclear radiation sources or X-rays **[3]**
5/10 . . . using neutron sources **[3]**
5/12 . . . using gamma- or X-ray sources **[3]**
5/14 . . . using a combination of several sources, e.g. a neutron and a gamma source **[3]**

7/00 Measuring gravitational fields or waves; **Gravimetric prospecting or detecting**

7/02 . Details
7/04 . . Electric, photoelectric, or magnetic indicating or recording means
7/06 . . Analysis or interpretation of gravimetric records
7/08 . using balances
7/10 . . using torsion balances, e.g. Eötvös balance
7/12 . using pendulums
7/14 . using free-fall time
7/16 . specially adapted for use on moving platforms, e.g. ship, aircraft

8/00 Prospecting or detecting by optical means [6]

Note

This group covers the use of infra-red, visible or ultra-violet light. **[6]**

8/02 . Prospecting **[6]**
8/10 . Detecting, e.g. by using light barriers (by reflection from the object G01S 17/00) **[6]**
8/12 . . using one transmitter and one receiver **[6]**
8/14 . . . using reflectors **[6]**
8/16 . . . using optical fibres **[6]**
8/18 . . . using mechanical scanning systems **[6]**
8/20 . . using multiple transmitters or receivers **[6]**
8/22 . . . using reflectors **[6]**
8/24 . . . using optical fibres **[6]**
8/26 . . . using mechanical scanning systems **[6]**

9/00 Prospecting or detecting by methods not provided for in groups G01V 1/00 to G01V 8/00 [6]

9/02 . Determining existence or flow of underground water

11/00 Prospecting or detecting by methods combining techniques covered by two or more of main groups G01V 1/00 to G01V 9/00

13/00 Manufacturing, calibrating, cleaning, or repairing instruments or devices covered by groups G01V 1/00 to G01V 11/00

15/00 Tags attached to, or associated with, an object, in order to enable detection of the object (record carriers for use with machines having a detectable tag or marker G06K 19/00) **[6]**

Note

This group does not cover detectors or detection methods, e.g. methods in which the object to be detected produces or modifies magnetic or electric fields, which are covered elsewhere, e.g. in group G01V 3/00. **[6]**

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

G01W **METEOROLOGY** (radar, sonar, lidar or analogous systems, designed for meteorological use G01S 13/95, G01S 15/88, G01S 17/95)

(1) In this subclass, the following term is used with the meaning indicated:
– "meteorology" includes measurement of certain ambient atmospheric conditions.

(2) Attention is drawn to the Notes following the title of class G01.

1/00 **Meteorology**

1/02 . Instruments for indicating weather conditions by measuring two or more variables, e.g. humidity, pressure, temperature, cloud cover, wind speed (G01W 1/10 takes precedence)

1/04 . . giving only separate indications of the variables measured

1/06 . . giving a combined indication of weather conditions (catathermometers for measuring "cooling value" related either to weather conditions or to comfort of other human environment G01W 1/17)

1/08 . Adaptations of balloons, missiles, or aircraft for meteorological purposes; Radiosondes

1/10 . Devices for predicting weather conditions

1/11 . Weather houses or other ornaments for indicating humidity

1/12 . Sunshine-duration recorders

1/14 . Rainfall or precipitation gauges

1/16 . Measuring atmospheric potential differences, e.g. due to electrical charges in clouds

1/17 . Catathermometers for measuring "cooling value" related either to weather conditions or to comfort of other human environment

1/18 . Testing or calibrating meteorological apparatus

G02 OPTICS

Note

In this class, the following expression is used with the meaning indicated:
– "optical" applies not only to visible light but also to ultra-violet or infra-red radiations. **[4]**

G02B **OPTICAL ELEMENTS, SYSTEMS, OR APPARATUS** (G02F takes precedence; optical elements specially adapted for use in lighting devices or systems thereof F21V 1/00 to F21V 13/00; measuring-instruments, see the relevant subclass of class G01, e.g. optical rangefinders G01C; testing of optical elements, systems, or apparatus G01M 11/00; spectacles G02C; apparatus or arrangements for taking photographs or for projecting or viewing them G03B; sound lenses G10K 11/30; electron and ion "optics" H01J; X-ray "optics" H01J, H05G 1/00; optical elements structurally combined with electric discharge tubes H01J 5/16, H01J 29/89, H01J 37/22; microwave "optics" H01Q; combination of optical elements with television receivers H04N 5/72; optical systems or arrangements in colour television systems H04N 9/00; heating arrangements specially adapted for transparent or reflecting areas H05B 3/84) **[1,7]**

(1) In this subclass, the following terms or expressions are used with the meanings indicated:
– "simple lens or prism" means a single lens or prism;
– "compound lens or prism" means an optical member, the constituents of which either are close together without air-space or (except in group G02B 11/00) are "in broken contact", i.e. with the air-space between the constituents having no essential optical influence;
– "objective" means a lens or an optical system designed to produce a real image of a real object;
– "eyepiece" means a lens or an optical system designed to produce a virtual image for viewing by the eye or by another optical system;
– "front" or "rear" is determined by looking from the more distant conjugate.

(2) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems". **[7]**

Subclass index

1/00 **Optical elements characterised by the material of which they are made** (compositions of optical glasses C03C 3/00); **Optical coatings for optical elements**

1/02 . made of crystals, e.g. rock-salt, semiconductors (G02B 1/08 takes precedence)

1/04 . made of organic materials, e.g. plastics (G02B 1/08 takes precedence)

1/06 . made of fluids in transparent cells

1/08 . made of polarising materials

1/10 . Optical coatings produced by application to, or surface treatment of, optical elements (G02B 1/08 takes precedence)

1/11 . . Anti-reflection coatings **[6]**

1/12 . . by surface treatment, e.g. by irradiation

3/00 **Simple or compound lenses** (artificial eyes A61F 2/14; spectacle lenses or contact lenses for the eyes G02C; watch or clock glasses G04B 39/00)

3/02 . with non-spherical faces (G02B 3/10 takes precedence)

3/04 . . with continuous faces that are rotationally symmetrical but deviate from a true sphere

3/06 . . with cylindrical or toric faces

3/08 . . with discontinuous faces, e.g. Fresnel lens

3/10 . Bifocal lenses; Multifocal lenses

3/12 . Fluid-filled or evacuated lenses

3/14 . . of variable focal length

5/00 **Optical elements other than lenses** (light guides G02B 6/00; optical logic elements G02F 3/00) **[4]**

5/02 . Diffusing elements; Afocal elements

5/04 . Prisms
5/06 . . Fluid-filled or evacuated prisms
5/08 . Mirrors
5/09 . . Multifaceted or polygonal mirrors **[6]**
5/10 . . with curved faces
5/12 . Reflex reflectors
5/122 . . cube corner, trihedral or triple reflector type **[2]**
5/124 . . . plural reflecting elements forming part of a unitary plate or sheet **[2]**
5/126 . . including curved refracting surface **[2]**
5/128 . . . transparent spheres being embedded in matrix **[2]**
5/13 . . . plural curved refracting elements forming part of a unitary body **[2]**
5/132 . . . with individual reflector mounting means **[2]**
5/134 . . . . including a threaded mounting member **[2]**
5/136 . . plural reflecting elements forming part of a unitary body (G02B 5/124 takes precedence) **[2]**
5/18 . Diffracting gratings
5/20 . Filters (polarising elements G02B 5/30; filters specially adapted for photographic purposes G03B 11/00)
5/22 . . Absorbing filters
5/23 . . . Photochromic filters **[2]**
5/24 . . . Liquid filters (G02B 5/23 takes precedence) **[2]**
5/26 . . Reflecting filters (G02B 5/28 takes precedence)
5/28 . . Interference filters
5/30 . Polarising elements (light-modulating devices G02F 1/00)
5/32 . Holograms used as optical elements (processes or apparatus for producing holograms G03H) **[2]**

6/00 Light guides; **Structural details of arrangements comprising light guides and other optical elements, e.g. couplings [4,6]**

6/02 . Optical fibre with cladding (mechanical structures for providing tensile strength and external protection G02B 6/44) **[4,8]**
6/024 . . with polarisation-maintaining properties **[8]**
6/028 . . with core or cladding having graded refractive index **[8]**
6/032 . . with non-solid core or cladding **[8]**
6/036 . . core or cladding comprising multiple layers **[8]**
6/04 . formed by bundles of fibres (G02B 6/24 takes precedence) **[4]**
6/06 . . the relative position of the fibres being the same at both ends, e.g. for transporting images **[4]**
6/08 . . . with fibre bundle in form of plate **[4]**
6/10 . of the optical waveguide type (G02B 6/02, G02B 6/24 take precedence; devices or arrangements for the control of light by electric, magnetic, electro-magnetic or acoustic means G02F 1/00; transferring the modulation of modulated light G02F 2/00; optical logic elements G02F 3/00; optical analogue/digital converters G02F 7/00; stores using opto-electronic devices G11C 11/42; electric waveguides H01P; transmission of information by optical means H04B 10/00; multiplex systems H04J 14/00) **[4,8]**
6/12 . . of the integrated circuit kind (production or processing of single crystals C30B; electric integrated circuits H01L 27/00) **[4]**
6/122 . . . Basic optical elements, e.g. light-guiding paths **[6]**
6/124 . . . . Geodesic lenses or integrated gratings **[6]**
6/125 . . . . Bends, branchings or intersections **[6]**
6/126 . . . using polarisation effects **[6]**
6/13 . . . Integrated optical circuits characterised by the manufacturing method **[6]**
6/132 . . . . by deposition of thin films **[6]**
6/134 . . . . by substitution by dopant atoms **[6]**
6/136 . . . . by etching **[6]**
6/138 . . . . by using polymerisation **[6]**
6/14 . . Mode converters **[4]**
6/24 . Coupling light guides (for electric waveguides H01P 1/00) **[4,5]**
6/245 . . Removing protective coverings of light guides before coupling **[5]**
6/25 . . Preparing the ends of light guides for coupling, e.g. cutting **[5]**
6/255 . . Splicing of light guides, e.g. by fusion or bonding **[5]**
6/26 . . Optical coupling means (G02B 6/36, G02B 6/42 take precedence) **[4]**
6/27 . . . with polarisation selective and adjusting means (polarisation elements in general G02B 5/30; polarisation systems in general G02B 27/28; optical polarisation multiplex systems H04J 14/06) **[6]**
6/28 . . . having data bus means, i.e. plural waveguides interconnected and providing an inherently bidirectional system by mixing and splitting signals **[4]**
6/287 . . . . Structuring of light guides to shape optical elements with heat application (G02B 6/255 takes precedence) **[6]**
6/293 . . . . with wavelength selective means (for optical elements in use, see the relevant subgroups of this subclass; optical wavelength-division multiplexing systems H04J 14/02) **[6]**
6/30 . . . for use between fibre and thin-film device **[4]**
6/32 . . . having lens focusing means **[4]**
6/34 . . . utilising prism or grating **[4]**
6/35 . . . having switching means (optical switching in general G02B 26/08; by changing the optical properties of the medium G02F 1/00) **[6]**
6/36 . . Mechanical coupling means (G02B 6/255, G02B 6/42 take precedence) **[4,5]**
6/38 . . . having fibre to fibre mating means **[4]**
6/40 . . . having fibre bundle mating means **[4]**
6/42 . . Coupling light guides with opto-electronic elements **[4]**
6/43 . . . Arrangements comprising a plurality of opto-electronic elements and associated optical interconnections (light-emissive or light-sensitive semiconductor devices H01L 27/00, H01L 31/00, H01L 33/00; semiconductor lasers monolithically integrated with other components H01S 5/026) **[6]**
6/44 . Mechanical structures for providing tensile strength and external protection for fibres, e.g. optical transmission cables (cables incorporating electric conductors and optical fibres H01B 11/22) **[4]**
6/46 . Processes or apparatus adapted for installing optical fibres or optical cables (installation of cables containing electric conductors and optical fibres H02G) **[6]**
6/48 . . Overhead installation **[6]**
6/50 . . Underground or underwater installation; Installation through tubing, conduits or ducts **[6]**
6/52 . . . using fluid, e.g. air **[6]**
6/54 . . . using mechanical means, e.g. pulling or pushing devices **[6]**

7/00 **Mountings, adjusting means, or light-tight connections, for optical elements**

7/02 . for lenses
7/04 . . with mechanism for focusing or varying magnification **[2]**
7/06 . . . Focusing binocular pairs
7/08 . . . adapted to co-operate with a remote control mechanism
7/09 . . . adapted for automatic focusing or varying magnification (automatic generation of focusing signals G02B 7/28) **[5]**
7/10 . . . by relative axial movement of several lenses, e.g. of varifocal objective lens
7/105 . . . . with movable lens means specially adapted for focusing at close distances **[4]**
7/12 . . Adjusting pupillary distance of binocular pairs
7/14 . . adapted to interchange lenses
7/16 . . . Rotatable turrets
7/18 . for prisms; for mirrors
7/182 . . for mirrors (optical devices or arrangements using movable or deformable optical elements for controlling the intensity, colour, phase, polarisation or direction of light G02B 26/00) **[5]**
7/183 . . . specially adapted for very large mirrors, e.g. for astronomy (G02B 7/185, G02B 7/192, G02B 7/198 take precedence) **[6]**
7/185 . . . with means for adjusting the shape of the mirror surface (mirrors with curved faces G02B 5/10) **[5]**
7/188 . . . . Membrane mirrors **[5]**
7/192 . . . with means for minimising internal mirror stresses **[5]**
7/195 . . . . Fluid-cooled mirrors **[5]**
7/198 . . . with means for adjusting the mirror relative to its support **[5]**
7/20 . Light-tight connections for movable optical elements
7/22 . . Extensible connections, e.g. bellows
7/24 . . Pivoted connections
7/28 . Systems for automatic generation of focusing signals (measuring distance per se G01C, G01S; using such signals to control focus of particular apparatus, see the subclasses for the apparatus, e.g. G03B, G03F) **[5]**
7/30 . . using parallactic triangle with a base line **[5]**
7/32 . . . using active means, e.g. light emitter **[5]**
7/34 . . using different areas in a pupil plane **[5]**
7/36 . . using image sharpness techniques **[5]**
7/38 . . . measured at different points on the optical axis **[5]**
7/40 . . using time delay of the reflected waves, e.g. of ultrasonic waves **[5]**

9/00 **Optical objectives characterised both by the number of the components and their arrangements according to their sign, i.e. + or −**(G02B 13/00, G02B 15/00 take precedence)

Note

In this group, a component is deemed to be a simple lens or a compound lens or a divided lens equivalent to a simple or to a compound lens.

9/02 . having one + component only (simple lenses G02B 3/00)
9/04 . having two components only
9/06 . . two + components
9/08 . . . arranged about a stop
9/10 . . one + and one −component
9/12 . having three components only
9/14 . . arranged + −+
9/16 . . . all the components being simple
9/18 . . . only one component having a compound lens (G02B 9/30 takes precedence)
9/20 . . . . the rear component having the compound
9/22 . . . . the middle component having the compound
9/24 . . . two of the components having compound lenses (G02B 9/30 takes precedence)
9/26 . . . . the front and rear components having compound lenses
9/28 . . . . the middle and rear components having compound lenses
9/30 . . . the middle component being a −compound meniscus having a + lens
9/32 . . . . the + lens being a meniscus
9/34 . having four components only
9/36 . . arranged + −−+

Note

In this group, the first place priority rule is applied.

9/38 . . . both −components being meniscus
9/40 . . . . one −component being compound
9/42 . . . . two −components being compound
9/44 . . . both −components being biconcave
9/46 . . . . one −component being compound
9/48 . . . . two −components being compound
9/50 . . . both + components being meniscus
9/52 . . . the rear + component being compound
9/54 . . . the front + component being compound
9/56 . . . all components being simple lenses
9/58 . . arranged −+ + −
9/60 . having five components only
9/62 . having six components only
9/64 . having more than six components

11/00 **Optical objectives characterised by the total number of simple and compound lenses forming the objective and their arrangement** (G02B 9/00 takes precedence; having only one simple lens G02B 3/00)

Note

In groups G02B 11/02 to G02B 11/34, lenses in broken contact are counted separately. Simple lenses are denoted by L, compound lenses by C, and the front lens is mentioned first.

11/02 . having two lenses only
11/04 . . arranged C C
11/06 . having three lenses only
11/08 . . arranged L L L
11/10 . . arranged L C L
11/12 . . arranged L L C
11/14 . . arranged C L C
11/16 . . arranged C C L
11/18 . . arranged C C C
11/20 . having four lenses only
11/22 . . arranged L L L L
11/24 . . arranged C L L C
11/26 . . arranged L C C L

11/28 . . arranged C C C C
11/30 . having five lenses only
11/32 . having six lenses only
11/34 . having more than six lenses

13/00 **Optical objectives specially designed for the purposes specified below** (with variable magnification G02B 15/00)

13/02 . Telephoto objectives, i.e. systems of the type + − in which the distance from the front vertex to the image plane is less than the equivalent focal length
13/04 . Reversed telephoto objectives
13/06 . Panoramic objectives; So-called “sky lenses”
13/08 . Anamorphotic objectives
13/10 . . involving prisms (G02B 13/12 takes precedence)
13/12 . . with variable magnification
13/14 . for use with infra-red or ultra-violet radiation (G02B 13/16 takes precedence)
13/16 . for use in conjunction with image converters or intensifiers
13/18 . with lenses having one or more non-spherical faces, e.g. for reducing geometrical aberration
13/20 . Soft-focus objectives (diffusing elements in general G02B 5/02)
13/22 . Telecentric objectives or lens systems
13/24 . for reproducing or copying at short object distances
13/26 . . for reproducing with unit magnification **[3]**

15/00 **Optical objectives with means for varying the magnification** (anamorphotic objectives G02B 13/08)

15/02 . by changing, adding, or subtracting a part of the objective, e.g. convertible objective
15/04 . . by changing a part
15/06 . . . by changing the front part
15/08 . . . by changing the rear part
15/10 . . by adding a part, e.g. close-up attachment
15/12 . . . by adding telescopic attachments (G02B 15/14 takes precedence)
15/14 . by axial movement of one or more lenses or groups of lenses relative to the image plane for continuously varying the equivalent focal length of the objective **[4]**
15/15 . . compensation by means of only one movement or by means of only linearly related movements, e.g. optical compensation **[4]**
15/16 . . with interdependent non-linearly related movements between one lens or lens group, and another lens or lens group (G02B 15/22 takes precedence) **[4]**
15/163 . . . having a first movable lens or lens group and a second movable lens or lens group, both in front of a fixed lens or lens group (G02B 15/177 takes precedence) **[4]**
15/167 . . . . having an additional fixed front lens or group of lenses **[4]**
15/17 . . . . . arranged + − − **[4]**
15/173 . . . . . arranged + − + **[4]**
15/177 . . . having a negative front lens or group of lenses **[4]**
15/20 . . . having an additional movable lens or lens group for varying the objective focal length **[4]**
15/22 . . with movable lens means specially adapted for focusing at close distances **[4]**
15/24 . . . having a front fixed lens or lens group and two movable lenses or lens groups in front of a fixed lens or lens group **[4]**
15/26 . . . . arranged + − − **[4]**
15/28 . . . . arranged + − + **[4]**

17/00 **Systems with reflecting surfaces, with or without refracting elements** (microscopes G02B 21/00; telescopes, periscopes G02B 23/00; beam shaping not otherwise provided for G02B 27/09; for beam splitting or combining G02B 27/10; for optical projection G02B 27/18) **[6]**

17/02 . Catoptric systems, e.g. image erecting and reversing system
17/04 . . using prisms only
17/06 . . using mirrors only
17/08 . Catadioptric systems

19/00 **Condensers** (for microscopes G02B 21/08)

21/00 **Microscopes** (eyepieces G02B 25/00; polarising systems G02B 27/28; measuring microscopes G01B 9/04; microtomes G01N 1/06; scanning-probe techniques or apparatus G01Q) **[1,7]**

21/02 . Objectives
21/04 . . involving mirrors
21/06 . Means for illuminating specimen
21/08 . . Condensers
21/10 . . . affording dark-field illumination (G02B 21/14 takes precedence)
21/12 . . . affording bright-field illumination (G02B 21/14 takes precedence)
21/14 . . . affording illumination for phase-contrast observation
21/16 . adapted for ultra-violet illumination
21/18 . Arrangements with more than one light-path, e.g. for comparing two specimens
21/20 . . Binocular arrangements
21/22 . . . Stereoscopic arrangements
21/24 . Base structure
21/26 . . Stages; Adjusting means therefor
21/28 . . with cooling device
21/30 . . with heating device
21/32 . Micromanipulators structurally combined with microscopes
21/33 . Immersion oils **[6]**
21/34 . Microscope slides, e.g. mounting specimens on microscope slides (preparing specimens for investigation G01N 1/28; means for supporting the objects or the materials to be analysed in electron microscopes H01J 37/20)
21/36 . arranged for photographic purposes or projection purposes (G02B 21/18 takes precedence)

23/00 **Telescopes, e.g. binoculars** (measuring telescopes G01B 9/06); **Periscopes**; **Instruments for viewing the inside of hollow bodies** (diagnostic instruments A61B); **Viewfinders** (objectives G02B 9/00, G02B 11/00, G02B 15/00, G02B 17/00; eyepieces G02B 25/00); **Optical aiming or sighting devices** (non-optical aspects of weapon aiming or sighting devices F41G) **[4]**

23/02 . involving prisms or mirrors (G02B 23/14 takes precedence)
23/04 . . for the purpose of beam splitting or combining, e.g. fitted with eyepieces for more than one observer (G02B 23/10 takes precedence)
23/06 . . having a focusing action, e.g. parabolic mirror
23/08 . . Periscopes
23/10 . . reflecting into the field of view additional indications, e.g. from collimator (collimators in general G02B 27/30; graticules G02B 27/34)

23/12 . with means for image conversion or intensification (objectives for image conversion or intensification G02B 13/16; electrical image converters with optical input and optical output H01J 31/50)
23/14 . Viewfinders (for photographic apparatus G03B 13/02)
23/16 . Housings; Caps; Mountings; Supports, e.g. with counterweight (cases or receptacles A45C)
23/18 . . for binocular arrangements
23/20 . . Collapsible housings (G02B 23/18 takes precedence)
23/22 . . Underwater equipments, e.g. for submarine periscope
23/24 . Instruments for viewing the inside of hollow bodies, e.g. fibrescopes **[4]**
23/26 . . using light guides **[4]**

25/00 **Eyepieces**; **Magnifying glasses** (simple lenses G02B 3/00)
25/02 . with means for illuminating object viewed
25/04 . affording a wide-angle view, e.g. through a spy-hole

26/00 **Optical devices or arrangements using movable or deformable optical elements for controlling the intensity, colour, phase, polarisation or direction of light, e.g. switching, gating, modulating** (mechanically operable parts of lighting devices for the control of light order F21V; specially adapted for measuring characteristics of light G01J; devices or arrangements, the optical operation of which is modified by changing the optical properties of the medium of the devices or arrangements G02F 1/00; control of light in general G05D 25/00; control of light sources H01S 3/10, H05B 37/00 to H05B 43/00) **[4]**
26/02 . for controlling the intensity of light **[4]**
26/04 . . by periodically varying the intensity of light, e.g. using choppers **[4]**
26/06 . for controlling the phase of light (G02B 26/08 takes precedence) **[4]**
26/08 . for controlling the direction of light (in light guides G02B 6/35) **[4]**
26/10 . . Scanning systems (for special applications, see the relevant places, e.g. G03B 27/32, G03F 3/08, G03G 15/04, G09G 3/00, H04N) **[4]**
26/12 . . . using multifaceted mirrors **[6]**

27/00 **Other optical systems**; **Other optical apparatus** (means for bringing-about special optical effects in shop-windows, showcases A47F, e.g. A47F 11/06; optical toys A63H 33/22; designs or pictures characterised by special light effects B44F 1/00)
27/01 . Head-up displays **[6]**
27/02 . Viewing or reading apparatus (stereoscopic systems G02B 27/22; of the projection type G03B; slide-changing apparatus G03B)
27/04 . . having collapsible parts
27/06 . . with moving-picture effect
27/08 . . Kaleidoscopes
27/09 . Beam shaping, e.g. changing the cross-sectioned area, not otherwise provided for **[6]**
27/10 . Beam splitting or combining systems (mixing and splitting light signals using optical waveguides G02B 6/28; polarising systems G02B 27/28) **[4]**
27/12 . . operating by refraction only
27/14 . . operating by reflection only
27/16 . . used as aids for focusing
27/18 . for optical projection, e.g. combination of mirror and condenser and objective
27/20 . . for imaging minute objects, e.g. light-pointer
27/22 . for producing stereoscopic or other three-dimensional effects (in microscopes G02B 21/22; viewing apparatus G02B 27/02)
27/24 . . involving reflecting prisms and mirrors only
27/26 . . involving polarising means
27/28 . for polarising (used in stereoscopes G02B 27/26)
27/30 . Collimators
27/32 . Fiducial marks or measuring scales within the optical system
27/34 . . illuminated
27/36 . . adjustable
27/40 . Optical focusing aids (beam splitting or combining systems G02B 27/10)
27/42 . Diffraction optics (G02B 27/60 takes precedence) **[3]**
27/44 . . Grating systems; Zone plate systems (G02B 27/46 takes precedence; spectrometry G01J) **[3]**
27/46 . . Systems using spatial filters (character recognition G06K 9/00) **[3]**

Note

In this group, the filter may be in any plane, e.g. the image or the Fourier transfer plane. **[3]**

27/48 . Laser speckle optics (speckle suppression in holography G03H 1/32) **[3]**
27/50 . Optics for phase object visualisation (in microscopes G02B 21/14) **[3]**
27/52 . . Phase contrast optics **[3]**
27/54 . . Schlieren-optical systems **[3]**
27/56 . Optics using evanescent waves, i.e. inhomogeneous waves **[3]**
27/58 . Optics for apodization or superresolution; Optical synthetic aperture systems **[3]**
27/60 . Systems using moire fringes (means for converting the output of a sensing member using diffraction gratings G01D 5/38) **[3]**
27/62 . Optical apparatus specially adapted for adjusting optical elements during the assembly of optical systems (adjusting means being part of the system to be assembled G02B 7/00) **[3]**
27/64 . Imaging systems using optical elements for stabilisation of the lateral and angular position of the image (focusing systems G02B 7/04; adjustment of optical system relative to image or object surface G03B 5/00) **[3]**

G02C **SPECTACLES**; **SUNGLASSES OR GOGGLES INSOFAR AS THEY HAVE THE SAME FEATURES AS SPECTACLES**; **CONTACT LENSES** (trial frames for testing the eyes A61B 3/04; goggles or eyeshields not having the same features as spectacles A61F 9/00)

Note

This subclass also covers monocles, pince-nez or lorgnettes.

Subclass index

1/00 **Assemblies of lenses with bridges or browbars**

1/02 . Bridge or browbar secured to lenses without the use of rims

1/04 . Bridge or browbar secured to, or integral with, partial rims, e.g. with partially-flexible rim for holding the lens

1/06 . Bridge or browbar secured to, or integral with, closed rigid rims for the lenses

1/08 . . the rims being transversely-split and provided with securing means

3/00 **Special supporting arrangement for lens assemblies or monocles** (lenses therefor G02C 7/00; by walking-sticks A45B 3/00)

3/02 . Arrangements for supporting by headgear

3/04 . Arrangements for supporting by hand, e.g. lorgnette; Arrangements for supporting by articles

5/00 **Constructions of non-optical parts**

5/02 . Bridges; Browbars; Intermediate bars (nose-engaging surfaces G02C 5/12)

5/04 . . with adjustable means

5/06 . . with resilient means

5/08 . . foldable

5/10 . . Intermediate bar or bars between bridge and side-members

5/12 . Nose-pads; Nose-engaging surfaces of bridges or rims

5/14 . Side-members

5/16 . . resilient or with resilient parts

5/18 . . reinforced

5/20 . . adjustable, e.g. telescopic

5/22 . Hinges (pivotal connection in general F16C 11/00)

7/00 **Optical parts** (characterised by the material G02B 1/00)

7/02 . Lenses; Lens systems

7/04 . . Contact lenses for the eyes (disinfection or sterilisation of contact lenses A61L 12/00)

7/06 . . bifocal; multifocal

7/08 . . Auxiliary lenses; Arrangements for varying focal length

7/10 . Filters, e.g. for facilitating adaptation of the eyes to the dark; Sunglasses

7/12 . Polarisers

7/14 . Mirrors; Prisms

7/16 . Shades, shields; Obturators, e.g. with pinhole, with slot

9/00 **Attaching auxiliary optical parts**

9/02 . by hinging

9/04 . by fitting over or clamping on

11/00 **Non-optical adjuncts** (H05B 3/84 takes precedence); **Attachment thereof** (G02C 7/16 takes precedence; cases A45C 11/04)

11/02 . Ornaments, e.g. exchangeable

11/04 . Illuminating means

11/06 . Hearing aids (construction of hearing aids H04R 25/00)

11/08 . Anti-misting means, e.g. ventilating, heating; Wipers **[5]**

13/00 **Assembling** (producing spectacle frames from plastics or from substances in a plastic state B29D 12/02); **Repairing**; **Cleaning** (disinfection or sterilisation of contact lenses A61L 12/00)

G02F DEVICES OR ARRANGEMENTS, THE OPTICAL OPERATION OF WHICH IS MODIFIED BY CHANGING THE OPTICAL PROPERTIES OF THE MEDIUM OF THE DEVICES OR ARRANGEMENTS FOR THE CONTROL OF THE INTENSITY, COLOUR, PHASE, POLARISATION OR DIRECTION OF LIGHT, E.G. SWITCHING, GATING, MODULATING OR DEMODULATING; **TECHNIQUES OR PROCEDURES FOR THE OPERATION THEREOF**; **FREQUENCY-CHANGING**; **NON-LINEAR OPTICS**; **OPTICAL LOGIC ELEMENTS**; **OPTICAL ANALOGUE/DIGITAL CONVERTERS** (optical transfer means between sensing member and indicating or recording part in connection with measuring G01D 5/26; devices in which mathematical operations are carried out with optical elements G06E 3/00; electrical signal transmission systems using optical means to convert the input signal G08C 19/36; information-recording by electric or magnetic means and reproducing by sensing optical properties G11B 11/00; static stores using optical elements G11C 13/04; transmission systems employing electromagnetic waves other than radio waves, e.g. light, infra-red radiation, H04B 10/00; optical multiplex systems H04J 14/00; pictorial communication, e.g. television H04N) **[2,4]**

1/00 Devices or arrangements for the control of the intensity, colour, phase, polarisation or direction of light arriving from an independent light source, e.g. switching, gating or modulating; **Non-linear optics** (thermometers using change of colour or translucency G01K 11/12, using changes in fluorescence G01K 11/32; light guide devices G02B 6/00; optical devices or arrangements using movable or deformable elements for controlling light independent of the light source G02B 26/00; control of light in general G05D 25/00; visible signalling systems G08B 5/00; indicating arrangements for variable information by selection or combination of individual elements G09F 9/00; control arrangements or circuits for visual indicators other than cathode-ray tubes G09G 3/00; control of light sources H01S 3/10, H05B 33/08, H05B 35/00 to H05B 43/00) **[2,4]**

Note

This group covers only:
- devices or arrangements, e.g. cells, the optical operation of which is modified by changing the optical properties of the medium of the devices or arrangements by the influence or control of physical parameters, e.g. electric fields, electric current, magnetic fields, sound or mechanical vibrations, stress or thermal effects; **[2]**
- devices or arrangements in which the electric or magnetic field component of the light beams influences the optical properties of the medium, i.e. non-linear optics; **[2]**
- control of light by electromagnetic waves, e.g. radio waves, or by electrons or other elementary particles. **[2]**

1/01 . for the control of the intensity, phase, polarisation or colour (G02F 1/29, G02F 1/35 take precedence; polarizing elements per se G02B 5/30; static storage per se G11C; image tube screens acting as light valves by shutter operation H01J 29/12; such screen acting by discoloration H01J 29/14) **[2,7]**

1/015 . . based on semiconductor elements with at least one potential jump barrier, e.g. PN, PIN junction (G02F 1/03 takes precedence) **[3]**

1/017 . . . Structures with periodic or quasi periodic potential variation, e.g. superlattices, quantum wells **[7]**

1/025 . . . in an optical waveguide structure (G02F 1/017 takes precedence) **[5,7]**

1/03 . . based on ceramics or electro-optical crystals, e.g. exhibiting Pockels or Kerr effect (G02F 1/061 takes precedence) **[2,4,7]**

1/035 . . . in an optical waveguide structure **[5]**

1/05 . . . with ferro-electric properties (G02F 1/035, G02F 1/055 take precedence) **[2,5]**

1/055 . . . the active material being a ceramic (G02F 1/035 takes precedence) **[4,5]**

1/061 . . based on electro-optical organic material (G02F 1/07 takes precedence) **[7]**

1/065 . . . in an optical waveguide structure **[7]**

1/07 . . based on electro-optical liquids exhibiting Kerr effect **[2]**

1/09 . . based on magneto-optical elements, e.g. exhibiting Faraday effect **[2]**

1/095 . . . in an optical waveguide structure **[5]**

1/11 . . based on acousto-optical elements, e.g. using variable diffraction by sound or like mechanical waves (acousto-optical deflection G02F 1/33) **[2]**

1/125 . . . in an optical waveguide structure **[5]**

1/13 . . based on liquid crystals, e.g. single liquid crystal display cells (liquid crystal materials C09K 19/00) **[2]**

1/133 . . . Constructional arrangements; Operation of liquid crystal cells; Circuit arrangements (arrangements or circuits for control of liquid crystal elements in a matrix, not structurally associated with these elements G09G 3/36) **[3,7]**

1/1333 . . . . Constructional arrangements (G02F 1/135, G02F 1/136 take precedence) **[5]**

1/1334 . . . . . based on polymer-dispersed liquid crystals, e.g. microencapsulated liquid crystals **[7]**

1/1335 . . . . . Structural association of optical devices, e.g. polarisers, reflectors, with the cell **[5]**

1/13357. . . . . Illuminating devices **[7]**

1/13363. . . . . Birefringent elements, e.g. for optical compensation **[7]**

1/1337 . . . . . Surface-induced orientation of the liquid crystal molecules, e.g. by alignment layers **[5]**

1/1339 . . . . . Gaskets; Spacers; Sealing of the cell **[5]**

1/1341 . . . . . Filling or closing of the cell **[5]**

1/1343 . . . . . Electrodes **[5]**

1/1345 . . . . . Conductors connecting electrodes to cell terminals **[5]**

1/1347 . . . . . Arrangement of liquid crystal layers or cells in which the final condition of one light beam is achieved by the addition of the effects of two or more layers or cells **[5]**

1/135 . . . . Liquid crystal cells structurally associated with a photoconducting or a ferro-electric layer, the properties of which can be optically or electrically varied **[3]**

1/136 . . . . Liquid crystal cells structurally associated with a semi-conducting layer or substrate, e.g. cells forming part of an integrated circuit (G02F 1/135 takes precedence) **[5]**

1/1362 . . . . . Active matrix addressed cells **[7]**
1/1365 . . . . . . in which the switching element is a two-electrode device **[7]**
1/1368 . . . . . . in which the switching element is a three-electrode device **[7]**
1/137 . . . characterised by a particular electro- or magneto-optical effect, e.g. field-induced phase transition, orientation effect, guest-host interaction, dynamic scattering **[3]**
1/139 . . . . based on orientation effects in which the liquid crystal remains transparent **[6]**
1/141 . . . . . using ferroelectric liquid crystals **[6]**
1/15 . . based on electrochromic elements **[5]**
1/153 . . . Constructional arrangements **[5]**
1/155 . . . . Electrodes **[5]**
1/157 . . . . Structural association of optical devices, e.g. reflectors or illuminating devices, with the cell **[5]**
1/161 . . . . Gaskets; Spacers; Sealing of the cell; Filling or closing of the cell **[5]**
1/163 . . . Operation of electrochromic cells; Circuit arrangements **[5]**
1/167 . . based on electrophoresis **[5]**
1/17 . . based on variable absorption elements (G02F 1/015 to G02F 1/167 take precedence) **[2,5]**
1/19 . . based on variable reflection or refraction elements (G02F 1/015 to G02F 1/167 take precedence) **[2,5]**
1/21 . . by interference **[2]**
1/225 . . . in an optical waveguide structure **[5]**
1/23 . . for the control of the colour (G02F 1/03 to G02F 1/21 take precedence) **[2]**
1/25 . . . as to hue or predominant wavelength **[2]**
1/29 . for the control of the position or the direction of light beams, i.e. deflection (static stores with electric or magnetic read-in and optical read-out G11C; lasers provided with means to change the location from which, or the direction in which, laser radiation is emitted H01S 3/101) **[4]**
1/295 . . in an optical waveguide structure (G02F 1/313, G02F 1/335 take precedence) **[5]**
1/31 . . Digital deflection devices (G02F 1/33 takes precedence) **[2]**
1/313 . . . in an optical waveguide structure **[5]**
1/315 . . . based on the use of controlled total internal reflection **[3]**
1/33 . . Acousto-optical deflection devices **[2]**
1/335 . . . having an optical waveguide structure **[5]**
1/35 . Non-linear optics (optical bistable devices G02F 3/02; lasers using stimulated Brillouin or Raman effect H01S 3/30) **[2,5]**
1/355 . . characterised by the materials used **[7]**
1/361 . . . Organic materials **[7]**
1/365 . . in an optical waveguide structure (G02F 1/377 takes precedence) **[7]**
1/37 . . for second-harmonic generation **[2]**
1/377 . . . in an optical waveguide structure **[7]**
1/383 . . . . of the optical fibre type **[7]**
1/39 . . for parametric generation or amplification of light, infra-red, or ultra-violet waves (electrical parametric amplifiers H03F 7/00) **[2]**

2/00 **Demodulating light**; **Transferring the modulation of modulated light**; **Frequency-changing of light** (G02F 1/35 takes precedence; photoelectric detecting or measuring devices G01J, H01J 40/00, H01L 31/00; demodulating laser arrangements H01S 3/10; demodulation or transference of modulation of modulated electromagnetic waves in general H03D 9/00) **[2]**
2/02 . Frequency-changing of light, e.g. by quantum counters (luminescent materials C09K 11/00) **[2]**

3/00 **Optical logic elements** (electric-pulse generators using opto-electronic devices as active elements H03K 3/42; logic circuits using opto-electronic devices H03K 19/14); **Optical bistable devices [5]**
3/02 . Optical bistable devices **[5]**

7/00 **Optical analogue/digital converters**

Note

This group covers only converters based in substantial manner on elements which are provided for in group G02F 1/00. **[4]**

G03 PHOTOGRAPHY; CINEMATOGRAPHY; ANALOGOUS TECHNIQUES USING WAVES OTHER THAN OPTICAL WAVES; ELECTROGRAPHY; HOLOGRAPHY [4]

(1) *This class does not cover reproduction of pictures or patterns by scanning and converting into electrical signals, which is covered by subclass H04N.* **[2011.01]**

(2) In this class, the following terms are used with the meaning indicated:
- "records" means photographs or any other kind of latent, directly-visible or permanent storage of pictorial information, which consist of an imagewise distribution of a quantity, e.g. an electric charge pattern, recorded on a carrier member;
- "optical" applies not only to visible light but also to ultra-violet or infra-red radiations. **[4]**

G03B APPARATUS OR ARRANGEMENTS FOR TAKING PHOTOGRAPHS OR FOR PROJECTING OR VIEWING THEM; APPARATUS OR ARRANGEMENTS EMPLOYING ANALOGOUS TECHNIQUES USING WAVES OTHER THAN OPTICAL WAVES; ACCESSORIES THEREFOR (optical parts of such apparatus G02B; photosensitive materials or processes for photographic purposes G03C; apparatus for processing exposed photographic materials G03D) **[4]**

Note

This subclass covers, as far as processes are concerned, only processes characterised by the use or manipulation of apparatus classifiable per se in this subclass.

Subclass index

Details common to at least two of the following types of apparatus: cameras, projectors, printers

1/00 Film-strip handling of general interest for cameras, projectors or printers

1/02 . Moving film strip by pull on end thereof
1/04 . . Pull exerted by take-up spool
1/06 . . . rotated by lever-operated ratchet and pawl
1/08 . . . rotated by band, chain, rack, or other linear reciprocating operation
1/10 . . . rotated by knob through gearing
1/12 . . . rotated by motor, e.g. spring
1/14 . . Special arrangements to ensure constant length of movement of film
1/16 . . . by film-arresting pins
1/18 . Moving film strip by means which act on the film between the ends thereof
1/20 . . Acting means
1/22 . . . Claws or pins engaging holes in the film
1/24 . . . Sprockets engaging holes in the film
1/26 . . . Spiked wheels or pins not penetrating the film
1/28 . . . Shuttle feed
1/30 . . . Belt feed
1/32 . . . Friction grippers or rollers
1/34 . . . Beaters
1/36 . . . Pneumatic acting means
1/38 . . embodying Geneva motion, e.g. Maltese-cross gearing
1/40 . embodying frictional coupling or clutches
1/42 . Guiding, framing, or constraining film in desired position relative to lens system
1/44 . . Guides engaging edge of film (gates G03B 1/48)
1/46 . . Rollers engaging face of film, e.g. barrel, waisted, conical (gates G03B 1/48)
1/48 . . Gates or pressure devices, e.g. plate
1/50 . . . adjustable or interchangeable, e.g. for different film widths
1/52 . . . Pneumatic pressure devices
1/54 . . Tensioning or loop-maintaining devices
1/56 . Threading; Loop forming
1/58 . . automatic

1/60 . Measuring or indicating length of the used or unused film; Counting number of exposures (measuring length in general G01B)
1/62 . . involving locking or stop-motion devices
1/64 . . by means which ascertain the radius of the film coiled on a spool
1/66 . . Counting number of exposures (counting mechanisms per se G06M)

3/00 Focusing arrangements of general interest for cameras, projectors or printers (focusing means, autofocus systems for cameras G03B 13/00; means for automatic focusing of projectors G03B 21/53; means for automatic focusing of projection-printing apparatus or copying cameras G03B 27/34, G03F)
3/02 . moving lens along baseboard
3/04 . adjusting position of image plane without moving lens
3/06 . . using movable reflectors to alter length of light-path
3/10 . Power-operated focusing
3/12 . . adapted for remote control (control systems in general G05)

5/00 Adjustment of optical system relative to image or object surface other than for focusing of general interest for cameras, projectors or printers
5/02 . Lateral adjustment of lens
5/04 . Vertical adjustment of lens; Rising fronts
5/06 . Swinging lens about normal to the optical axis
5/08 . Swing backs

Details common to cameras

7/00 Control of exposure by setting shutters, diaphragms, or filters separately or conjointly (measuring intensity of light G01J; control of exposure in television cameras by means of circuitry for compensating for variation in the brightness of the object H04N 5/235)
7/02 . Control effected by setting a graduated member on the camera in accordance with indication or reading afforded by a light meter, which may be either separate from, or built into, camera body
7/04 . Control effected by hand adjustment of a member that senses indication of a pointer of a built-in light-sensitive device, e.g. by restoring pointer to a fixed associated reference mark
7/06 . . by a follow-up movement of an associated reference mark to the pointer
7/08 . Control effected solely by response to built-in light-sensitive device to the intensity of light received by the camera
7/081 . . Analogue circuits **[3]**
7/083 . . . for control of exposure time **[3]**
7/085 . . . for control of aperture **[3]**
7/087 . . . for control of both exposure time and aperture **[3]**
7/089 . . . for storage of exposure value in mirror reflex cameras **[3]**
7/091 . . Digital circuits **[3]**
7/093 . . . for control of exposure time **[3]**
7/095 . . . for control of aperture **[3]**
7/097 . . . for control of both exposure time and aperture **[3]**
7/099 . . Arrangement of photoelectric elements in or on the camera **[3]**
7/10 . . a servo-motor providing energy to move the setting member
7/12 . . a hand-actuated member moved from one position to another providing the energy to move the setting member, e.g. depression of shutter release button causes a stepped feeler to co-operate with the pointer of the light-sensitive device to set the diaphragm and thereafter release the shutter
7/14 . . . setting of both shutter and diaphragm aperture being effected so as to give the optimum compromise between depth of field and shortness of exposure
7/16 . in accordance with both the intensity of the flash source and the distance of the flash source from object, e.g. in accordance with "guide number" of flash bulb and the focusing of the camera
7/18 . in accordance with light-reducing "factor" of filter or other obturator used with or on the lens of the camera
7/20 . in accordance with change of lens
7/22 . in accordance with temperature or height, e.g. in aircraft
7/24 . automatically in accordance with markings or other means indicating film speed or kind of film on the magazine to be inserted in the camera **[3]**
7/26 . Power supplies; Circuitry or arrangement to switch on the power source; Circuitry to check the power source voltage **[3]**
7/28 . Circuitry to measure or to take account of the object contrast **[3]**

9/00 Exposure-making shutters; **Diaphragms**
9/02 . Diaphragms **[2]**
9/04 . . Single movable plate with two or more apertures of graded size, e.g. sliding plate, pivoting plate
9/06 . . Two or more co-operating pivoted blades e.g. iris type (shutters functioning as diaphragms by limiting extent of opening movement G03B 9/08)
9/07 . . with means for presetting the diaphragm
9/08 . Shutters (electro-, magneto-, or acousto-optical shutters G02F 1/00) **[2]**
9/10 . . Blade or disc rotating or pivoting about axis normal to its plane
9/12 . . . Two relatively-adjustable aperture-defining members moving as a unit
9/14 . . . Two separate members moving in opposite directions
9/16 . . . Two separate members moving in the same direction
9/18 . . . More than two members
9/20 . . . . each moving in a single direction first to open and then to reclose
9/22 . . . . each moving in one direction to open and then in opposite direction to close, e.g. iris type
9/24 . . . Adjusting size of aperture formed by members when fully open so as to constitute a virtual diaphragm that is adjustable
9/26 . . . incorporating cover blade or blades
9/28 . . Roller blind or flexible plate
9/30 . . . Single blind with multiple slots or other aperture
9/32 . . . Double blind
9/34 . . . . with adjustable slot; with mechanism controlling relative movement of blinds to form slot
9/36 . . Sliding rigid plate
9/38 . . . Single rigid plate with multiple slots or other apertures
9/40 . . . Double plate

9/42 . . . . with adjustable slot; with mechanism controlling relative movement of plates to form slot
9/44 . . . Curved track and plate
9/46 . . Flap shutters pivoting about axis in plane of flap
9/48 . . . Double flap
9/50 . . . Louvre type
9/52 . . Barrel shutters
9/54 . . Conical shutters; Rotating plate with axis of rotation inclined to optical axis of shutter
9/58 . Means for varying duration of "open" period of shutter
9/60 . . by varying speed of movement of obturating members
9/62 . . by varying interval of time between end of opening movement and beginning of closing movement
9/64 . Mechanism for delaying opening of shutter (separate from shutter G03B 17/38)
9/66 . Means for cocking shutter separate from means for releasing shutter
9/68 . . Cocking effected by movement of film
9/70 . with flash-synchronising contacts

11/00 Filters or other obturators specially adapted for photographic purposes (filters per se G02B)
11/02 . Sky masks
11/04 . Hoods or caps for eliminating unwanted light from lenses, viewfinders, or focusing aids
11/06 . . Lens caps for exposure making

13/00 Viewfinders; **Focusing aids for cameras**; **Means for focusing for cameras**; **Autofocus systems for cameras** (hoods, caps G03B 11/04; reflex camera arrangements G03B 19/12, G03B 19/14; rangefinders per se G01C 3/00; automatic focusing in general G02B 7/09; systems for automatic generation of focusing signals G02B 7/28) **[5]**
13/02 . Viewfinders
13/04 . . of direct-vision type, e.g. frame, sighting mark
13/06 . . with lenses with or without reflectors
13/08 . . . with reflected image of frame
13/10 . . adjusting viewfinder field
13/12 . . . to compensate for change of camera lens or size of picture
13/14 . . . to compensate for parallax due to short range
13/16 . . combined with focusing aids
13/18 . Focusing aids
13/20 . . Rangefinders coupled with focusing arrangements, e.g. adjustment of rangefinder automatically focusing camera
13/22 . . . coupling providing for compensation upon change of camera lens
13/24 . . Focusing screens
13/26 . . . with magnifiers for inspecting image formed on screen
13/28 . . . Image-splitting devices
13/30 . . indicating depth of field **[5]**
13/32 . Means for focusing **[5]**
13/34 . . Power focusing **[5]**
13/36 . . . Autofocus systems **[5]**

15/00 Special procedures for taking photographs; **Apparatus therefor**
15/02 . Illuminating scene
15/03 . . Combinations of cameras with lighting apparatus; Flash units
15/035 . . . Combinations of cameras with incandescent lamps
15/04 . . . Combinations of cameras with non-electronic flash apparatus; Non-electronic flash units (light sources using a charge of combustible material F21K 5/00; ignition circuits H05B 43/02)
15/05 . . . Combinations of cameras with electronic flash apparatus; Electronic flash units (discharge lamps per se H01J; circuit arrangements H05B 41/00)
15/06 . . Special arrangements of screening, diffusing, or reflecting devices, e.g. in studio
15/07 . . . Arrangements of lamps in studios
15/08 . Trick photography
15/10 . . using back-projection, i.e. blending artificial background with real foreground
15/12 . . using mirrors
15/14 . for taking photographs during medical operations
15/16 . for photographing the track of moving objects (high-speed photography G03B 39/00; recording tracks of nuclear particles G01T 5/00)

17/00 Details of cameras or camera bodies; **Accessories therefor** (lens hoods or caps G03B 11/04)
17/02 . Bodies
17/04 . . collapsible, foldable, or extensible, e.g. book type (bellows for instruments in general G12B)
17/06 . . with exposure meters or other indicators built into body but not connected to other camera members
17/08 . . Waterproof bodies or housings
17/10 . . Soundproof bodies
17/12 . . with means for supporting objectives, supplementary lenses, filters, masks, or turrets
17/14 . . . interchangeably
17/16 . . for containing both motion-picture camera and still-picture camera
17/17 . . with reflectors arranged in beam forming the photographic image, e.g. for reducing dimensions of camera
17/18 . Signals indicating condition of a camera member or suitability of light (indicating depth of field G03B 13/30)
17/20 . . visible in viewfinder
17/22 . with means for cutting-off film
17/24 . with means for separately producing marks on the film, e.g. title, time of exposure
17/26 . Holders for containing light-sensitive material and adapted to be inserted within the camera (holders for X-ray films G03B 42/04) **[2]**
17/28 . Locating light-sensitive material within camera
17/30 . . Locating spools or other rotatable holders of coiled film
17/32 . . Locating plates or cut films
17/34 . . . Changing plates or cut films
17/36 . Counting number of exposures (of film strips G03B 1/66; counting mechanisms in general G06M)
17/38 . Releasing-devices separate from shutter (integral with shutter G03B 9/08)
17/40 . . with delayed or timed action
17/42 . Interlocking between shutter operation and advance of film or change of plate or cut-film
17/44 . Means for exchanging focusing screen and light-sensitive material
17/46 . Means for exposing single frames in motion-picture camera

17/48 . adapted for combination with other photographic or optical apparatus (with microscopes, with telescopes G02B)
17/50 . . with both developing and finishing apparatus (processing apparatus G03D)
17/52 . . . of the Land type
17/53 . . . for automatically delivering a finished picture after a signal causing exposure has been given, e.g. by pushing a button, by inserting a coin
17/54 . . with projector
17/55 . with provision for heating or cooling, e.g. in aircraft
17/56 . Accessories (carrying-cases A45C)
17/58 . . Attachments for converting cameras into reflex cameras

---

19/00 **Cameras** (details G03B 17/00)
19/02 . Still-picture cameras
19/04 . . Roll-film cameras
19/06 . . . adapted to be loaded with more than one film, e.g. with exposure of one or the other at will (G03B 19/07 takes precedence)
19/07 . . . having more than one objective
19/08 . . . with provision for alternative use with plates or cut-films
19/10 . . Plate or cut-film cameras (with provision for alternative use with roll film G03B 19/08)
19/12 . . Reflex cameras with single objective and a movable reflector or a partly-transmitting mirror
19/14 . . with paired lenses, one of which forms image on photographic material and the other forms a corresponding image on a focusing screen
19/16 . . Pin-hole cameras
19/18 . Motion-picture cameras (with non-intermittently running film G03B 41/02)
19/20 . . Reflex cameras
19/22 . . Double cameras
19/24 . . adapted to be loaded with more than one film, e.g. with exposure of one or the other at will
19/26 . . with fade-in and fade-out effects **[4]**

21/00 **Projectors or projection-type viewers**; **Accessories therefor** (devices for changing pictures G03B 23/00; zoetropes G03B 25/00; photographic printing apparatus G03B 27/00; devices or systems producing a varying lighting effect F21S 10/00; optical projection comparators G01B 9/08; projection microscopes G02B 21/36)
21/02 . Multiple-film apparatus
21/04 . . Picture "juke-boxes"
21/06 . affording only episcopic projection
21/08 . affording epidiascopic projection
21/10 . Projectors with built-in or built-on screen (projection screens in general G03B 21/56)
21/11 . . for microfilm reading
21/12 . adapted for projection of either still pictures or motion pictures (prolonged exhibition of single frame G03B 21/38)
21/13 . Projectors for producing special effects at the edges of picture, e.g. blurring
21/132 . Overhead projectors, i.e. capable of projecting hand-writing or drawing during action (epidiascopic projectors G03B 21/08)
21/134 . Projectors combined with typing apparatus or with printing apparatus
21/14 . Details
21/16 . . Cooling; Preventing overheating
21/18 . . Fire preventing or extinguishing
21/20 . . Lamp housings (condensers per se G02B)
21/22 . . Soundproof bodies
21/26 . . Projecting separately subsidiary matter simultaneously with main image (light pointers G02B 27/20)
21/28 . . Reflectors in projection beam
21/30 . . adapted to collapse or fold, e.g. for portability
21/32 . . Details specially adapted for motion-picture projection (with film moving continuously through the gate G03B 41/02)
21/34 . . . Change-over arrangements
21/36 . . . . Fades, dissolves, or wipes
21/38 . . . Prolonged exhibition of single frame
21/40 . . . Eliminating or reducing effect of flicker
21/42 . . . Preventing damage to film due to abnormal operation of projector
21/43 . . . Driving mechanisms
21/44 . . . . Mechanisms transmitting motion to film-strip feed; Mechanical linking of shutter and intermittent feed (film-strip feed per se G03B 1/00)
21/46 . . . . . affording adjustment for framing
21/48 . . . . . for altering frame speed; for regulating constancy of film speed
21/50 . . . Control devices operated by the film strip during the run (controlling or regulating speed G03B 21/48)
21/52 . . . . by prepared film
21/53 . . Means for automatic focusing, e.g. to compensate thermal effects (automatic focusing in general G02B 7/09; systems for automatic generation of focusing signals G02B 7/28) **[5]**
21/54 . Accessories
21/56 . . Projection screens
21/58 . . . collapsible, e.g. foldable; of variable area
21/60 . . . characterised by the nature of the surface, e.g. lenticular, fluid
21/62 . . . . translucent
21/64 . . Means for mounting individual pictures to be projected, e.g. frame for transparency

23/00 **Devices for changing pictures in viewing apparatus or projectors** (film-strip handling G03B 1/00; direct viewers G02B)

Note

In this group, the following term is used with the meaning indicated:
– "picture" means any flat representation, whether transparent or not, e.g. produced by photography, writing, or printing.

23/02 . in which a picture is removed from a stock and returned to the same stock or another one; Magazines therefor
23/04 . . with linear movement
23/06 . . with rotary movement
23/08 . in which pictures are attached to a movable carrier
23/10 . . drum or disc carrier
23/12 . . linear strip carrier
23/14 . Carriers operable to move pictures into, and out of, the projection or viewing position and carrying one or two pictures only in a removable manner (G03B 23/18 takes precedence) **[4]**
23/18 . with fade-in and fade-out effects **[4]**

25/00 **Viewers, other than projection viewers, giving motion-picture effects by persistence of vision, e.g. zoetrope** (high-speed photography G03B 39/00)

25/02 . with interposed lenticular or line screen

27/00 **Photographic printing apparatus** (film-strip handling G03B 1/00)

27/02 . Exposure apparatus for contact printing

27/04 . . Copying apparatus without a relative movement between the original and the light source during exposure, e.g. printing frame, printing box

27/06 . . . for automatic repeated copying of the same original

27/08 . . . for automatic copying of several originals one after the other, e.g. for copying cinematograph film

27/10 . . Copying apparatus with a relative movement between the original and the light source during exposure

27/12 . . . for automatic repeated copying of the same original

27/14 . . Details

27/16 . . . Illumination arrangements, e.g. positioning of lamps, positioning of reflectors (controlling the exposure G03B 27/72)

27/18 . . . Maintaining or producing contact pressure between original and light-sensitive material

27/20 . . . . by using a vacuum or fluid pressure

27/22 . . . . by stretching over a curved surface

27/24 . . . Separating the original from the print

27/26 . . . Cooling

27/28 . . . Edge-masking devices

27/30 . . . adapted to be combined with processing apparatus (processing apparatus per se G03D)

27/32 . Projection printing apparatus, e.g. enlarger, copying camera

27/34 . . Means for automatic focusing therefor (systems for automatic generation of focusing signals G02B 7/28; means for automatic focusing for photomechanical production G03F 7/207) **[4]**

27/36 . . . by mechanical connections, e.g. by cam, by linkage

27/38 . . . . embodying screws with non-uniform pitch

27/40 . . . . adapted for use with lenses of different focal length

27/42 . . for automatic sequential copying of the same original (G03B 27/34, G03B 27/53 take precedence) **[4]**

27/44 . . for multiple copying of the same original at the same time (G03B 27/34, G03B 27/53 take precedence) **[4]**

27/46 . . for automatic sequential copying of different originals, e.g. enlargers, roll film printers (G03B 27/34, G03B 27/50, G03B 27/53 take precedence) **[4]**

27/465 . . . at different positions of the same strip, e.g. microfilm **[4]**

27/47 . . . at different positions of the same sheet, e.g. microfiche **[4]**

27/475 . . . copying cinematographic film (G03B 27/48 takes precedence) **[4]**

27/48 . . . with original in the form of a film strip moving continuously and compensation for consequent image movement

27/50 . . with slit or like diaphragm moving over original for progressive exposure (G03B 27/34 takes precedence) **[4]**

27/52 . . Details

27/53 . . . Automatic registration or positioning of originals with respect to each other or the photosensitive layer (within photo-mechanical production of textured or patterned surfaces, e.g. of integrated circuits, G03F 9/00) **[4]**

27/54 . . . Lamp housings; Illuminating means (controlling the exposure G03B 27/72)

27/56 . . . Mounting enlarger head on column

27/58 . . . Baseboards, masking frames, or other holders for the sensitive material (G03B 27/53 takes precedence) **[4]**

27/60 . . . . using a vacuum or fluid pressure

27/62 . . . Holders for the original (G03B 27/53 takes precedence) **[4]**

27/64 . . . . using a vacuum or fluid pressure

27/66 . . . specially adapted for holding half-tone screens

27/68 . . . Introducing or correcting distortion, e.g. in connection with oblique projection

27/70 . . . Reflectors in printing beam

27/72 . Controlling or varying light intensity, spectral composition, or exposure time in photographic printing apparatus (exposure meters per se G01J; control of light intensity in general G05D 25/00)

27/73 . . Controlling exposure by variation of spectral composition, e.g. multicolor printers **[3]**

27/74 . . Positioning exposure meters in the apparatus

27/80 . . in dependence upon automatic analysis of the original (G03B 27/73 takes precedence) **[3]**

29/00 **Combinations of cameras, projectors, or photographic printing apparatus with non-photographic non-optical apparatus, e.g. clocks, weapons**; **Cameras having the shape of other objects** (combinations with flash apparatus G03B 15/03; combinations with instruments for medical examination of cavities or tubes of the body A61B 1/04; arrangements specially adapted for eye photography A61B 3/14; combinations with surveying instruments G01C; combinations with core or moderator structure of nuclear reactors G21C 17/08; structural combinations with electric discharge tubes H01J 5/16, H01J 29/89, H01J 37/22)

Special techniques

31/00 **Associated working of cameras or projectors with sound-recording or -reproducing means** (record carriers characterised by the selection of the material and comprising cinematographic film and magnetic track G11B 5/633)

31/02 . in which sound track is on a moving-picture film

31/04 . in which sound track is not on, but is synchronised with, a moving-picture film

31/06 . in which sound track is associated with successively-shown still pictures

31/08 . with fade-in and fade-out effects **[4]**

33/00 **Colour photography, other than mere exposure or projection of a colour film** (printing apparatus G03B 27/00; stereoscopic colour photography G03B 35/00)

33/02 . by two-colour separation records, e.g. red-aspect and white complete records; using Land effect

33/04 . by four or more separation records

33/06 . by additive-colour projection apparatus

33/08 . Sequential recording or projection (G03B 33/02, G03B 33/04, G03B 33/06 take precedence)

33/10 . Simultaneous recording or projection (G03B 33/02, G03B 33/04, G03B 33/06 take precedence)
33/12 . . using beam-splitting or beam-combining systems, e.g. dichroic mirrors
33/14 . . using lenticular screens (integral with film G03C)
33/16 . . using colour-pattern screens (integral with film G03C)

35/00 Stereoscopic photography (panoramic or wide-screen systems G03B 37/00; photogrammetry G01C)
35/02 . by sequential recording
35/04 . . with movement of beam-selecting members in a system defining two or more viewpoints
35/06 . . with axial movement of lens or gate between exposures
35/08 . by simultaneous recording
35/10 . . having single camera with stereoscopic-base-defining system
35/12 . . involving recording of different viewpoint images in different colours on a colour film
35/14 . Printing apparatus specially adapted for conversion between different types of record (G03B 42/08 takes precedence) **[4]**
35/16 . by sequential viewing
35/18 . by simultaneous viewing
35/20 . . using two or more projectors
35/22 . . using single projector with stereoscopic-base-defining system
35/24 . . using apertured or refractive resolving means on screen or between screen and eye
35/26 . . using polarised or coloured light for separating different viewpoint images

37/00 Panoramic or wide-screen photography; **Photographing extended surfaces, e.g. for surveying**; **Photographing internal surfaces, e.g. of pipe**
37/02 . with scanning movement of lens or camera
37/04 . with cameras or projectors providing touching or overlapping fields of view
37/06 . involving anamorphosis (G03B 37/02, G03B 37/04 take precedence)

39/00 High-speed photography
39/02 . using stationary plate or film (G03B 39/06 takes precedence)
39/04 . using moving plate or film (G03B 39/06 takes precedence)
39/06 . using light-guides for transferring image frame or elements thereof into different array, e.g. into a line

41/00 Special photographic techniques not covered by groups G03B 31/00 to G03B 39/00; **Apparatus therefor [2]**
41/02 . using non-intermittently-running film
41/04 . . with optical compensator
41/06 . . . with rotating reflecting member
41/08 . . . with rotating transmitting member
41/10 . . . with oscillating reflecting member
41/12 . . . with oscillating transmitting member
41/14 . . Overcoming image movement by brief flashes of light

42/00 Obtaining records using waves other than optical waves; **Visualisation of such records by using optical means** (investigating or analysing materials using electromagnetic or sonic waves G01N; using radar, sonar or analogous techniques G01S) **[4]**
42/02 . using X-rays (measurement of X-radiation G01T; X-ray apparatus, circuits therefor H05G 1/00) **[4]**
42/04 . . Holders for X-ray films **[4]**
42/06 . using ultrasonic, sonic or infrasonic waves (measurement of ultrasonic, sonic or infrasonic waves G01H) **[4]**
42/08 . Visualisation of records by optical means (optical systems using spatial filters G02B 27/46; optics for phase object visualisation G02B 27/50) **[4]**

43/00 Testing correct operation of photographic apparatus or parts thereof (measuring specific variables G01)
43/02 . Testing shutters (measuring time intervals G04F)

G03C PHOTOSENSITIVE MATERIALS FOR PHOTOGRAPHIC PURPOSES (for photomechanical purposes G03F); **PHOTOGRAPHIC PROCESSES, E.G. CINE, X-RAY, COLOUR, STEREO-PHOTOGRAPHIC PROCESSES**; **AUXILIARY PROCESSES IN PHOTOGRAPHY** (photographic processes characterised by the use or manipulation of apparatus classifiable per se in subclass G03B, see G03B; photomechanical production of textured or patterned surfaces G03F; electrography, electrophotography, magnetography G03G)

Note

In this subclass, the following expressions are used with the meanings indicated:
– "photosensitive compositions" covers photosensitive substances, e.g. silver halides, and, if applicable, binders or additives;
– "photosensitive materials" covers the photosensitive compositions, e.g. emulsions, the bases carrying them, and, if applicable, auxiliary layers. **[5]**

Subclass index

1/00 **Photosensitive materials** (photosensitive materials for multicolour processes G03C 7/00; for diffusion transfer processes G03C 8/00; photosensitive glass C03C 4/04) **[5]**

1/005 . Silver halide emulsions; Preparation thereof; Physical treatment thereof; Incorporation of additives therein (catalytic amounts of silver halide in dry silver systems G03C 1/498) **[5]**

1/015 . . Apparatus or processes for the preparation of emulsions (coating, drying G03C 1/74) **[5]**

1/025 . . Physical treatment of emulsions, e.g. by ultrasonics, refrigeration, pressure (coating, drying G03C 1/74) **[5]**

1/035 . . characterised by the crystal form or composition, e.g. mixed grain **[5]**

1/04 . . with macromolecular additives; with layer-forming substances **[5]**

1/043 . . . Polyalkylene oxides; Polyalkylene sulfides; Polyalkylene selenides; Polyalkylene tellurides **[5]**

1/047 . . . Proteins, e.g. gelatine derivatives; Hydrolysis or extraction products of proteins **[5]**

1/053 . . . Polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds, e.g. vinyl polymers **[5]**

1/06 . . with non-macromolecular additives (G03C 1/04 takes precedence) **[5]**

1/07 . . . Substances influencing grain growth during silver salt formation **[5]**

1/08 . . . Sensitivity-increasing substances **[5]**

1/09 . . . . Noble metals or mercury; Salts or compounds thereof; Sulfur, selenium or tellurium, or compounds thereof, e.g. for chemical sensitising (G03C 1/34, G03C 1/35 take precedence) **[5]**

1/10 . . . . Organic substances

1/12 . . . . . Methine or polymethine dyes

1/14 . . . . . with an odd number of CH groups

1/16 . . . . . with one CH group

1/18 . . . . . with three CH groups

1/20 . . . . . with more than three CH groups

1/22 . . . . . with an even number of CH groups

1/24 . . . . . Styryl dyes

1/26 . . . . . Polymethine chain forming part of a heterocyclic ring

1/28 . . . . together with supersensitising substances

1/29 . . . . . the supersensitising mixture being solely composed of dyes **[5]**

1/295 . . . Development accelerators **[5]**

1/30 . . . Hardeners

1/31 . . . Plasticisers **[2]**

1/32 . . . Matting agents

1/33 . . . Spot-preventing agents **[2]**

1/34 . . . Fog-inhibitors; Stabilisers; Agents inhibiting latent image regression **[5]**

1/35 . . . Antiplumming agents, i.e. antibronzing agents; Toners **[2,5]**

1/36 . . . Desensitisers (direct positive emulsions G03C 1/485) **[5]**

1/37 . . . Antiseptic agents **[2]**

1/38 . . . Dispersants; Agents facilitating spreading **[5]**

1/40 . . . Dyestuffs not covered by groups G03C 1/08 to G03C 1/38 or G03C 1/42 **[5]**

1/42 . . . Developers or their precursors **[5]**

1/43 . . . Processing agents or their precursors, not covered by groups G03C 1/07 to G03C 1/42 **[5]**

1/46 . . having more than one photosensitive layer

1/485 . . Direct positive emulsions **[2,5]**

1/49 . . Print-out and photodevelopable emulsions **[2,5]**

1/492 . . Photosoluble emulsions **[5]**

1/494 . Silver salt compositions other than silver halide emulsions; Photothermographic systems **[5]**

1/496 . . Binder-free compositions, e.g. evaporated **[5]**

1/498 . . Photothermographic systems, e.g. dry silver **[5]**

1/50 . Compositions containing noble metal salts other than silver salts, as photosensitive substances **[5]**

1/52 . Compositions containing diazo compounds as photosensitive substances (G03C 1/64 takes precedence) **[5]**

1/54 . . Diazonium salts or diazo anhydrides

1/56 . . Diazo sulfonates

1/58 . . Coupling substances therefor **[5]**

1/60 . . with macromolecular additives **[5]**

1/61 . . with non-macromolecular additives **[5]**

1/62 . . . Metal compounds reducible to metal

1/64 . Compositions containing iron compounds as photosensitive substances **[5]**

1/66 . Compositions containing chromates as photosensitive substances **[5]**

1/67 . Compositions containing cobalt compounds as photosensitive substances **[5]**

1/675 . Compositions containing polyhalogenated compounds as photosensitive substances (for photopolymerisable or photocrosslinkable compositions G03F 7/028, G03F 7/038) **[5]**

1/685 . Compositions containing spiro-condensed pyran compounds or derivatives thereof, as photosensitive substances **[5]**

1/695 . Compositions containing azides as photosensitive substances (for photopolymerisable or photocrosslinkable compositions G03F 7/008) **[5]**

1/705 . Compositions containing chalcogenides, metals or alloys thereof, as photosensitive substances, e.g. photodope systems (used as photoresists G03F 7/004) **[5]**

1/72 . Photosensitive compositions not covered by groups G03C 1/005 to G03C 1/705 **[5]**

1/725 . . containing inorganic compounds **[5]**

1/73 . . containing organic compounds **[5]**

1/735 . . . Organo-metallic compounds **[5]**

1/74 . Applying photosensitive compositions to the base; Drying processes therefor (G03C 1/496 takes precedence) **[2,5]**

1/76 . Photosensitive materials characterised by the base or auxiliary layers **[5]**

1/765 . . characterised by the shape of the base, e.g. arrangement of perforations, jags **[5]**

1/77 . . the base being of metal **[5]**

1/775 . . the base being of paper **[5]**

1/785 . . . translucent **[5]**

1/79 . . . Macromolecular coatings or impregnations therefor, e.g. varnishes **[5]**

1/795 . . the base being formed of macromolecular substances (G03C 1/775 takes precedence) **[5]**

1/805 . . characterised by stripping layers or stripping means **[5]**

1/81 . . characterised by anti-coiling means **[5]**

1/815 . . characterised by means for filtering or absorbing ultra-violet light, e.g. optical bleaching agents (for photoprinting G03C 5/10; for intensifying X-ray images G03C 5/17) **[5]**

1/825 . . characterised by antireflecting means or visible-light filtering means, e.g. anti-halation **[5]**
1/83 . . . Organic dyestuffs therefor **[5]**
1/835 . . . Macromolecular substances therefor, e.g. mordants **[5]**
1/85 . . characterised by antistatic additives or coatings **[5]**
1/89 . . . Macromolecular substances therefor **[5]**
1/91 . . characterised by subbing layers or subbing means **[5]**
1/93 . . . Macromolecular substances therefor **[5]**
1/95 . . rendered opaque or writable, e.g. with inert particulate additives (G03C 1/775 takes precedence) **[5]**

3/00 Packages of films for inserting into cameras, e.g. roll-films, film-packs; **Wrapping materials for light-sensitive plates, films, or papers, e.g. materials characterised by the use of special dyes, printing inks, adhesives** (wrapping materials in general B65D)
3/02 . Photographic roll-films with paper strips

5/00 Photographic processes or agents therefor; **Regeneration of such processing agents** (multicolour processes G03C 7/00; diffusion transfer processes G03C 8/00; stereo-photographic processes G03C 9/00; photomechanical processes G03F) **[4,5]**
5/02 . Sensitometric processes, e.g. determining sensitivity, colour sensitivity, gradation, graininess, density; Making sensitometric wedges
5/04 . Photo-taking processes
5/06 . . Travelling-mask processes
5/08 . Photoprinting (G03C 5/18 takes precedence); Processes or means for preventing photoprinting **[3,5]**
5/10 . . Reflex-printing; Photoprinting using fluorescent or phosphorescent means **[5]**
5/12 . Cinematographic processes of taking pictures or printing
5/14 . . combined with sound-recording (sound-recording in general G11B)
5/16 . X-ray, infra-red, or ultra-violet ray processes
5/17 . . using screens to intensify X-ray images (X-ray conversion screens G21K 4/00) **[2,4]**
5/18 . Diazo-type processes, e.g. thermal development, or agents therefor **[3,5]**
5/20 . . Reflex-printing
5/22 . Direct chromate processes, i.e. without preceding silver picture, or agents therefor **[5]**
5/26 . Processes using silver-salt-containing photosensitive materials or agents therefor (physical development G03C 5/58) **[5]**
5/28 . . Cinematographic-film processes **[5]**
5/29 . . Development processes or agents therefor (G03C 5/38, G03C 5/50 take precedence) **[5]**
5/30 . . . Developers
5/305 . . . Additives other than developers **[5]**
5/31 . . . Regeneration; Replenishers **[5]**
5/315 . . . Tanning development **[5]**
5/32 . . Latensification; Desensitising **[5]**
5/38 . . Fixing; Developing-fixing; Hardening-fixing (bleach-fixing G03C 5/44) **[5]**
5/39 . . . Stabilising, i.e. fixing without washing out **[2,5]**
5/395 . . Regeneration of photographic processing agents other than developers; Replenishers therefor **[4,5]**
5/40 . . Chemically transforming developed images (G03C 5/50 takes precedence) **[5]**
5/42 . . . Reducing; Intensifying **[5]**
5/44 . . . Bleaching; Bleach-fixing **[5]**
5/46 . . . Toning **[5]**
5/48 . . . Mordanting **[5]**
5/50 . . Reversal development; Contact processes (G03C 5/315, G03C 8/00 take precedence) **[5]**
5/56 . Processes using photosensitive compositions covered by groups G03C 1/64 to G03C 1/72 or agents therefor (G03C 5/58 takes precedence) **[5]**
5/58 . Processes for obtaining metallic images by vapour deposition or physical development (images obtained by photomechanical means, e.g. by etching, G03F) **[5]**
5/60 . Processes for obtaining vesicular images **[5]**

7/00 Multicolour photographic processes or agents therefor; **Regeneration of such processing agents**; **Photosensitive materials for multicolour processes** (diffusion transfer processes G03C 8/00) **[4,5]**
7/02 . Direct bleach-out processes; Materials therefor; Preparing or processing such materials **[5]**
7/04 . Additive processes using colour screens; Materials therefor; Preparing or processing such materials **[5]**
7/06 . . Manufacture of colour screens
7/08 . . . from diversely-coloured grains irregularly distributed
7/10 . . . with regular areas of colour, e.g. bands, lines, dots
7/12 . . . . by photo-exposure
7/14 . Additive processes using lenticular screens; Materials therefor; Preparing or processing such materials **[5]**
7/18 . Processes for the correction of the colour image in subtractive colour photography (using coloured colour-couplers G03C 7/333) **[5]**
7/20 . Subtractive colour processes using differently sensitised films, each coated on its own base, e.g. bipacks, tripacks **[5]**
7/22 . Subtractive cinematographic processes; Materials therefor; Preparing or processing such materials **[5]**
7/24 . . combined with sound-recording (sound-recording in general G11B)
7/25 . . Dye-imbibition processes; Materials therefor; Preparing or processing such materials **[5]**
7/26 . Silver halide emulsions for subtractive colour processes (G03C 7/28 to G03C 7/30 take precedence) **[5]**
7/28 . Silver dye bleach processes; Materials therefor; Preparing or processing such materials **[5]**
7/29 . . Azo dyes therefor **[5]**
7/30 . Colour processes using colour-coupling substances; Materials therefor; Preparing or processing such materials **[5]**
7/305 . . Substances liberating photographically active agents, e.g. development-inhibiting releasing couplers (G03C 7/388 takes precedence) **[5]**
7/32 . . Colour-coupling substances (G03C 7/305, G03C 7/388 take precedence) **[5]**
7/327 . . . Macromolecular coupling substances **[5]**
7/333 . . . Coloured coupling substances, e.g. for the correction of the coloured image **[5]**
7/34 . . . Couplers containing phenols (G03C 7/327, G03C 7/333 take precedence) **[5]**
7/36 . . . Couplers containing compounds with active methylene groups (G03C 7/327, G03C 7/333 take precedence) **[5]**
7/38 . . . . in rings **[5]**
7/384 . . . . . in pyrazolone rings **[5]**

7/388 . . Processes for the incorporation in the emulsion of substances liberating photographically active agents or colour-coupling substances; Solvents therefor **[5]**
7/392 . . Additives (G03C 7/305, G03C 7/32 take precedence) **[5]**
7/396 . . . Macromolecular additives **[5]**
7/407 . . Development processes or agents therefor **[5]**
7/413 . . . Developers **[5]**
7/42 . . Bleach-fixing or agents therefor **[3,5]**
7/44 . . Regeneration; Replenishers (G03C 7/42 takes precedence) **[5]**
7/46 . Subtractive colour processes not covered by group G03C 7/26; Materials therefor; Preparing or processing such materials **[5]**

8/00 Diffusion transfer processes or agents therefor; Photosensitive materials for such processes [5]
8/02 . Photosensitive materials characterised by the image-forming section **[5]**
8/04 . . the substances transferred by diffusion consisting of inorganic compounds or of organo-metallic compounds derived from photosensitive noble metals **[5]**
8/06 . . . Silver salt diffusion transfer **[5]**
8/08 . . the substances transferred by diffusion consisting of organic compounds (G03C 8/04 takes precedence) **[5]**
8/10 . . . of dyes or their precursors **[5]**
8/12 . . . . characterised by the release mechanism **[5]**
8/14 . . . . . Oxidation of the chromogenic substance **[5]**
8/16 . . . . . initially diffusable in alkaline environment **[5]**
8/18 . . . . . Dye developers **[5]**
8/20 . . . . . initially non-diffusable in alkaline environment **[5]**
8/22 . . . . . Reduction of the chromogenic substance **[5]**
8/24 . Photosensitive materials characterised by the image-receiving section **[5]**
8/26 . . Image-receiving layers (G03C 8/52 takes precedence) **[5]**
8/28 . . . containing development nuclei or compounds forming such nuclei **[5]**
8/30 . Additive processes using colour screens; Materials therefor; Preparing or processing such materials **[5]**
8/32 . Development processes or agents therefor (G03C 8/18 takes precedence) **[5]**
8/34 . . Containers for the agents (G03C 8/48, G03B 17/50 take precedence) **[5]**
8/36 . . Developers **[5]**
8/38 . . . containing viscosity increasing substances **[5]**
8/40 . . Development by heat **[5]**
8/42 . Structural details **[5]**
8/44 . . Integral units, i.e. the image-forming section not being separated from the image-receiving section **[5]**
8/46 . . . characterised by the trapping means or by gas releasing means **[5]**
8/48 . . . characterised by substances used for masking the image-forming section **[5]**
8/50 . . Peel-apart units, i.e. the image-forming section being separated from the image-receiving section **[5]**
8/52 . . Bases or auxiliary layers; Substances therefor **[5]**
8/54 . . . Timing layers **[5]**
8/56 . . . Mordant layers **[5]**

9/00 Stereo-photographic or similar processes
9/02 . Parallax-stereogram
9/04 . Vectographic-image
9/06 . Anaglyph
9/08 . producing three-dimensional images

11/00 Auxiliary processes in photography (characterised by apparatus used G03D 15/00)
11/02 . Marking or applying of text
11/04 . Retouching
11/06 . Smoothing; Renovating; Roughening; Matting; Cleaning; Lubricating; Flame retardant treatments **[5]**
11/08 . Varnishing, e.g. application of protective layers on finished photographic prints **[5]**
11/10 . . for protection from ultra-violet light
11/12 . Stripping or transferring intact photographic layers
11/14 . Pasting; Mounting
11/16 . Drying
11/18 . Colouring
11/20 . . with powdered or molten colours
11/22 . Preparing plates or films for the manufacture of photographic negatives by non-photographic processes
11/24 . Removing emulsion from waste photographic material; Recovery of photosensitive substances (electrolytic recovery of metals C25C 1/00) **[5]**

G03D APPARATUS FOR PROCESSING EXPOSED PHOTOGRAPHIC MATERIALS (apparatus specially adapted for photomechanical production of textured or patterned surfaces G03F); **ACCESSORIES THEREFOR** (photosensitive materials or processes for photographic purposes G03C; electrographic, electrophotographic, or magnetographic methods or apparatus G03G)

Subclass index

3/00 **Liquid processing apparatus involving immersion**; **Washing apparatus involving immersion** (G03D 9/00, G03D 11/00 take precedence)
3/02 . Details of liquid circulation
3/04 . . Liquid agitators (in general B01F)
3/06 . . Liquid supply; Liquid circulation outside tanks
3/08 . having progressive mechanical movement of exposed material
3/10 . . for plates, films, or prints held individually
3/12 . . for plates, films, or prints spread onto belt conveyers **[2]**
3/13 . . for long films or prints in the shape of strips, e.g. fed by roller assembly **[2]**
3/14 . . . with means for taking into account of elongation or contraction of films
3/16 . Treating exposed material in original holder

5/00 **Liquid processing apparatus in which no immersion is effected**; **Washing apparatus in which no immersion is effected** (G03D 9/00, G03D 11/00 take precedence; application of liquids in general B05)
5/02 . using rupturable ampoules of liquid
5/04 . using liquid sprays
5/06 . Applicator pads, rollers, or strips **[2]**

7/00 **Gas processing apparatus**

9/00 **Diffusion development apparatus**
9/02 . using rupturable ampoules of liquid

11/00 **Reversal processing apparatus**

13/00 **Processing apparatus or accessories therefor, not covered by groups G03D 3/00 to G03D 11/00**
13/02 . Containers; Holding-devices
13/04 . . Trays; Dishes; Tanks
13/06 . . . Light-tight tanks with provision for loading in daylight
13/08 . . Devices for holding exposed material; Devices for supporting exposed material
13/10 . . . Clips (G03D 13/14 takes precedence)
13/12 . . . Frames (G03D 13/14 takes precedence)
13/14 . . . for holding films in spaced convolutions

15/00 **Apparatus for treating processed material**
15/02 . Drying; Glazing (combined with processing apparatus G03D 3/00 to G03D 13/00; drying in general F26B)
15/04 . Cutting; Splicing
15/06 . Applying varnish or other coating
15/08 . Flattening prints
15/10 . Mounting, e.g. of processed material in a frame (frames specially adapted for projection G03B 21/64)

17/00 **Dark-room arrangements not provided for in the other groups of this subclass**; **Portable dark-rooms**

G03F **PHOTOMECHANICAL PRODUCTION OF TEXTURED OR PATTERNED SURFACES, E.G. FOR PRINTING, FOR PROCESSING OF SEMICONDUCTOR DEVICES**; **MATERIALS THEREFOR**; **ORIGINALS THEREFOR**; **APPARATUS SPECIALLY ADAPTED THEREFOR** (phototypographic composing devices B41B; photosensitive materials or processes for photographic purposes G03C; electrography, sensitive layers or processes G03G)

Note

In this subclass, the following terms or expressions are used with the meanings indicated:
– "photosensitive" means not only sensitive of electromagnetic radiation but also to corpuscular radiation;
– "photosensitive compositions" covers photosensitive substances, e.g. quinonediazides, and, if applicable, binders or additives;
– "photosensitive materials" covers the photosensitive compositions, e.g. photoresists, the bases carrying them and, if applicable, auxiliary layers. **[5]**

1/00 **Preparation of originals for the photomechanical production of textured or patterned surfaces** (photomechanical processes in general G03F 7/00) **[3]**
1/02 . by photographic processes for production of originals simulating relief
1/04 . by montage processes
1/06 . from printing surfaces **[5]**
1/08 . Originals having inorganic imaging layers, e.g. chrome masks (G03F 1/12 takes precedence) **[5]**
1/10 . by exposing and washing out pigmented or coloured organic layers; by colouring macromolecular patterns **[5]**
1/12 . by exposing silver-halide-containing photosensitive materials or diazo-type photosensitive materials **[5]**
1/14 . Originals characterised by structural details, e.g. supports, cover layers, pellicle rings **[5]**
1/16 . Originals having apertures, e.g. for corpuscular lithography **[5]**

3/00 **Colour separation**; **Correction of tonal value** (photographic copying apparatus in general G03B)
3/02 . by retouching
3/04 . by photographic means
3/06 . . by masking
3/08 . by photoelectric means
3/10 . Checking the colour or tonal value of separation negatives or positives

5/00 **Screening processes**; **Screens therefor**
5/02 . by projecting methods (cameras G03B)
5/04 . . changing the screen effect
5/06 . . changing the diaphragm effect
5/08 . . using line screens
5/10 . . using cross-line screens
5/12 . . using other screens, e.g. granulated screen
5/14 . by contact methods
5/16 . . using grey half-tone screens
5/18 . . using colour half-tone screens
5/20 . using screens for gravure printing
5/22 . combining several screens; Elimination of moire
5/24 . by multiple exposure, e.g. combined processes for line photo and screen

7/00 **Photomechanical, e.g. photolithographic, production of textured or patterned surfaces, e.g. printed surfaces**; **Materials therefor, e.g. comprising photoresists**; **Apparatus specially adapted therefor** (using photoresist structures for special production processes, see the relevant places, e.g. B44C, H01L, e.g. H01L 21/00, H05K) **[3,5]**

7/004 . Photosensitive materials (G03F 7/12, G03F 7/14 take precedence) **[5]**

7/008 . . Azides (G03F 7/075 takes precedence) **[5]**

7/012 . . . Macromolecular azides; Macromolecular additives, e.g. binders **[5]**

7/016 . . Diazonium salts or compounds (G03F 7/075 takes precedence) **[5]**

7/021 . . . Macromolecular diazonium compounds; Macromolecular additives, e.g. binders **[5]**

7/022 . . Quinonediazides (G03F 7/075 takes precedence) **[5]**

7/023 . . . Macromolecular quinonediazides; Macromolecular additives, e.g. binders **[5]**

7/025 . . Non-macromolecular photopolymerisable compounds having carbon-to-carbon triple bonds, e.g. acetylenic compounds (G03F 7/075 takes precedence) **[5]**

7/027 . . Non-macromolecular photopolymerisable compounds having carbon-to-carbon double bonds, e.g. ethylenic compounds (G03F 7/075 takes precedence) **[5]**

7/028 . . . with photosensitivity-increasing substances, e.g. photoinitiators **[5]**

7/029 . . . . Inorganic compounds; Onium compounds; Organic compounds having hetero atoms other than oxygen, nitrogen or sulfur **[5]**

7/031 . . . . Organic compounds not covered by group G03F 7/029 **[5]**

7/032 . . . with binders **[5]**

7/033 . . . . the binders being polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds, e.g. vinyl polymers **[5]**

7/035 . . . . the binders being polyurethanes **[5]**

7/037 . . . . the binders being polyamides or polyimides **[5]**

7/038 . . Macromolecular compounds which are rendered insoluble or differentially wettable (G03F 7/075 takes precedence; macromolecular azides G03F 7/012; macromolecular diazonium compounds G03F 7/021) **[5]**

7/039 . . Macromolecular compounds which are photodegradable, e.g. positive electron resists (G03F 7/075 takes precedence; macromolecular quinonediazides G03F 7/023) **[5]**

7/04 . . Chromates (G03F 7/075 takes precedence) **[5]**

7/06 . . Silver salts (G03F 7/075 takes precedence) **[5]**

7/07 . . . used for diffusion transfer **[5]**

7/075 . . Silicon-containing compounds **[5]**

7/085 . . Photosensitive compositions characterised by adhesion-promoting non-macromolecular additives (G03F 7/075 takes precedence) **[5]**

7/09 . . characterised by structural details, e.g. supports, auxiliary layers (supports for printing plates in general B41N) **[5]**

7/095 . . . having more than one photosensitive layer (G03F 7/075 takes precedence) **[5]**

7/105 . . . having substances, e.g. indicators, for forming visible images **[5]**

7/11 . . . having cover layers or intermediate layers, e.g. subbing layers **[5]**

7/115 . . . having supports or layers with means for obtaining a screen effect or for obtaining better contact in vacuum printing **[5]**

7/12 . Production of screen printing forms or similar printing forms, e.g. stencils

7/14 . Production of collotype printing forms

7/16 . Coating processes; Apparatus therefor (applying coatings to base materials in general B05; applying photosensitive compositions to the base for photographic purposes G03C 1/74)

7/18 . . Coating curved surfaces

7/20 . Exposure; Apparatus therefor (photographic printing apparatus for making copies G03B 27/00) **[4]**

7/207 . . Means for focusing, e.g. automatically (combination of positioning and focusing G03F 9/02; systems for automatic generation of focusing signals in general G02B 7/28; means for automatic focusing of projection printing apparatus G03B 27/34) **[4]**

7/213 . . Exposing with the same light pattern different positions of the same surface at the same time (G03F 7/207 takes precedence) **[4]**

7/22 . . Exposing sequentially with the same light pattern different positions of the same surface (G03F 7/207 takes precedence) **[4]**

7/23 . . . Automatic means therefor **[4]**

7/24 . . Curved surfaces

7/26 . Processing photosensitive materials; Apparatus therefor (G03F 7/12 to G03F 7/24 take precedence) **[3,5]**

7/28 . . for obtaining powder images (G03F 3/10 takes precedence) **[5]**

7/30 . . Imagewise removal using liquid means **[5]**

7/32 . . . Liquid compositions therefor, e.g. developers **[5]**

7/34 . . Imagewise removal by selective transfer, e.g. peeling away **[5]**

7/36 . . Imagewise removal not covered by groups G03F 7/30 to G03F 7/34, e.g. using gas streams, using plasma **[5]**

7/38 . . Treatment before imagewise removal, e.g. prebaking **[5]**

7/40 . . Treatment after imagewise removal, e.g. baking **[5]**

7/42 . . Stripping or agents therefor **[5]**

9/00 **Registration or positioning of originals, masks, frames, photographic sheets or textured or patterned surfaces, e.g. automatically** (G03F 7/22 takes precedence; preparation of photographic masks G03F 1/00; within photographic printing apparatus for making copies G03B 27/00) **[4]**

9/02 . combined with means for automatic focusing (automatic focusing in general G02B 7/09; systems for automatic generation of focusing signals G02B 7/28) **[4]**

G03G **ELECTROGRAPHY**; **ELECTROPHOTOGRAPHY**; **MAGNETOGRAPHY** (information storage based on relative movement between record carrier and transducer G11B; static stores with means for writing-in or reading-out information G11C; recording of television signals H04N 5/76)

(1) This subclass covers:
- the production of permanent directly-visible pictures in conformity with an original picture or document, using an intermediate imagewise distribution of an electric or magnetic quantity, such as a charge pattern, an electric conductivity pattern, or a magnetic pattern;
- the production of permanent directly-visible pictures using an intermediate imagewise distribution of an electric or magnetic quantity, when the origin and the way of generating said intermediate distribution are not relevant.

(2) This subclass does not cover:
- use of electric signals for the transmission of the picture information from the original to the reproduction, i.e. pictorial communication, which is covered by subclass H04N;
- production of pictures by heat patterns exclusively, not using an electrostatic or magnetic pattern, which is covered by group B41M 5/00;
- production of prints by transferring ink from a printing form to a printing surface, without physical contact and using the force of an electrostatic field, which is covered by subclass B41M;
- selective printing mechanisms characterised by the selective supply of electric current, or the selective application of magnetism or radiation, to a printing material or impression-transfer material, which are covered by groups B41J 2/385, B41J 2/435. **[5]**

Subclass index

5/00 **Recording-members for original recording by exposure e.g. to light, to heat, to electrons**; **Manufacture thereof**; **Selection of materials therefor** (recording surfaces for measuring apparatus G01D 15/34; photosensitive materials for photographic purposes G03C)

5/02 . Charge-receiving layers (G03G 5/153 takes precedence) **[5]**

5/022 . . Layers for surface-deformation imaging, e.g. frost imaging **[2]**

5/024 . . Photoelectret layers **[2]**

5/026 . . Layers in which during the irradiation a chemical reaction occurs whereby electrically conductive patterns are formed in the layers, e.g. for chemixerography **[2]**

5/028 . . Layers in which after being exposed to heat patterns electrically conductive patterns are formed in the layers, e.g. for thermoxerography **[2]**

5/04 . . Photoconductive layers; Charge-generation layers or charge-transporting layers; Additives therefor; Binders therefor **[2,5]**

5/043 . . . Photoconductive layers characterised by having two or more layers or characterised by their composite structure **[5]**

5/047 . . . . characterised by the charge-generation layers or charge-transporting layers **[5]**

5/05 . . . Organic bonding materials; Methods for coating a substrate with a photoconductive layer; Inert supplements for use in photoconductive layers **[2]**

5/06 . . . characterised by the photoconductive material being organic **[5]**

5/07 . . . . Polymeric photoconductive materials **[2]**

5/08 . . . characterised by the photoconductive material being inorganic **[2,5]**

5/082 . . . . and not being incorporated in a bonding material, e.g. vacuum deposited **[2]**

5/085 . . . . and being incorporated in an inorganic bonding material, e.g. glass-like layers **[2]**

5/087 . . . . and being incorporated in an organic bonding material **[2]**

5/09 . . . Sensitisers or activators, e.g. dyestuffs (G03G 5/12 takes precedence) **[2]**

5/10 . Bases for charge-receiving or other layers

5/12 . Recording members for multicolour processes **[2]**

5/14 . Inert intermediate or cover layers for charge-receiving layers (G03G 5/04 takes precedence) **[2,5]**

5/147 . . Cover layers **[5]**

5/153 . Charge-receiving layers combined with additional photo- or thermo-sensitive, but not photoconductive, layers, e.g. silver-salt layers **[5]**

5/16 . Layers for recording by changing the magnetic properties, e.g. for Curie-point-writing **[3]**

7/00 **Selection of materials for use in image-receiving members, i.e. for reversal by physical contact**; **Manufacture thereof** (photosensitive materials for photographic purposes G03C)

8/00 **Layers covering the final reproduction, e.g. for protecting, for writing thereon [2]**

9/00 **Developers [5]**

9/06 . the developer being electrolytic

9/08 . with toner particles **[2]**

Note

In groups G03G 9/083 to G03G 9/12, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[5]**

9/083 . . Magnetic toner particles **[5]**
9/087 . . Binders for toner particles **[5]**
9/09 . . Colouring agents for toner particles **[5]**
9/093 . . Encapsulated toner particles **[5]**
9/097 . . Plasticisers; Charge controlling agents **[5]**
9/10 . . characterised by carrier particles **[2,5]**
9/107 . . . having magnetic components **[5]**
9/113 . . . having coatings applied thereto **[5]**
9/12 . . in liquid developer mixtures **[2]**
9/125 . . . characterised by the liquid **[5]**
9/13 . . . characterised by polymer components **[5]**
9/135 . . . characterised by stabiliser or charge-controlling agents **[5]**
9/16 . Developers not provided for in groups G03G 9/06 to G03G 9/135, e.g. solutions, aerosols **[2]**
9/18 . . Differentially-wetting liquid developers **[2]**

11/00 Selection of substances for use as fixing agents

13/00 Electrographic processes using a charge pattern (G03G 15/00, G03G 16/00, G03G 17/00 take precedence) **[2,5]**

13/01 . for multicoloured copies **[2]**
13/02 . Sensitising, i.e. laying-down a uniform charge (devices for corona discharge per se H01T 19/00)
13/04 . Exposing, i.e. imagewise exposure by optically projecting the original image on a photoconductive recording material **[6]**
13/045 . . Charging or discharging distinct portions of the charge pattern on the recording material, e.g. discharging non-image areas, contrast enhancement (G03G 13/34, G03G 15/36, G03G 21/06 take precedence) **[6]**
13/05 . Imagewise charging, i.e. laying-down a charge in the configuration of an original image using a modulated stream of charged particles, e.g. of corona ions, modulated by a photoconductive control screen bearing a charge pattern or by optically activated charging means (using charging means controlled by electric image signals B41J) **[6]**
13/054 . using X-rays, e.g. electroradiography **[6]**
13/056 . using internal polarisation **[2,6]**
13/06 . Developing
13/08 . . using a solid developer, e.g. powder developer
13/09 . . . using magnetic brush **[2]**
13/095 . . . Removing excess solid developer **[6]**
13/10 . . using a liquid developer
13/11 . . . Removing excess liquid developer, e.g. by heat **[6]**
13/14 . Transferring a pattern to a second base
13/16 . . of a toner pattern, e.g. a powder pattern
13/18 . . of a charge pattern
13/20 . Fixing, e.g. by using heat
13/22 . Processes involving the combination of more than one step according to groups G03G 13/02 to G03G 13/20 (G03G 13/01 takes precedence) **[2]**
13/23 . . specially adapted for copying both sides of an original or for copying on both sides of a recording or image-receiving material **[6]**
13/24 . . whereby at least two steps are performed simultaneously **[2]**
13/26 . for the production of printing plates for non-xerographic printing processes **[2]**
13/28 . . Planographic printing plates **[2]**
13/30 . . Hectographic masters **[2]**
13/32 . . Relief printing plates **[2]**
13/34 . Editing, i.e. producing a composite image by copying one or more original images or parts thereof **[6]**

15/00 Apparatus for electrographic processes using a charge pattern (G03G 16/00, G03G 17/00 take precedence) **[2,5]**

Note

This group covers also processes in so far as they are characterised by the use or manipulation of apparatus classifiable per se in this group.

15/01 . for producing multicoloured copies **[2]**
15/02 . for laying down a uniform charge, e.g. for sensitising; Corona discharge devices (G03G 15/14 takes precedence) **[6]**
15/04 . for exposing, i.e. imagewise exposure by optically projecting the original image on a photoconductive recording material **[6]**
15/041 . . with variable magnification **[6]**
15/043 . . with means for controlling illumination or exposure (G03G 15/041 takes precedence) **[6]**
15/045 . . with means for charging or discharging distinct portions of the charge pattern on the recording material, e.g. for contrast enhancement or discharging non-image areas (G03G 15/36, G03G 21/06 take precedence) **[6]**
15/047 . . . for discharging non-image areas **[6]**
15/05 . for imagewise charging, e.g. photoconductive control screen, optically activated charging means (charging means controlled by electric image signals B41J) **[6]**
15/054 . using X-rays, e.g. electroradiography **[6]**
15/056 . using internal polarisation **[2,6]**
15/06 . for developing
15/08 . . using a solid developer, e.g. powder developer
15/09 . . . using magnetic brush **[2]**
15/095 . . . Removing excess solid developer **[6]**
15/10 . . using a liquid developer
15/11 . . . Removing excess liquid developer e.g. by heat **[6]**
15/14 . for transferring a pattern to a second base
15/16 . . of a toner pattern, e.g. a powder pattern
15/18 . . of a charge pattern
15/20 . for fixing, e.g. by using heat
15/22 . involving the combination of more than one step according to groups G03G 13/02 to G03G 13/20 (G03G 15/01 takes precedence) **[2]**
15/23 . . specially adapted for copying both sides of an original or for copying on both sides of a recording or image-receiving material **[6]**
15/24 . . whereby at least two steps are performed simultaneously **[2]**
15/26 . . in which the charge pattern is obtained by projection of the entire image, i.e. whole-frame projection (G03G 15/04 takes precedence) **[2,6]**
15/28 . . in which projection is obtained by line scanning (G03G 15/04 takes precedence) **[2,6]**
15/30 . . . in which projection is formed on a drum **[2]**
15/32 . . in which the charge pattern is formed dotwise (G03G 15/04, G03G 15/05, G03G 15/34 take precedence) **[2,6]**

15/34 . . in which the powder image is formed directly on the recording material **[6]**

15/36 . Editing, i.e. producing a composite image by copying one or more original images or parts thereof **[6]**

16/00 Electrographic processes using deformation of thermoplastic layers (layers for surface-deformation imaging G03G 5/022); **Apparatus therefor [2,6]**

17/00 Electrographic processes using patterns other than charge patterns, e.g. an electric conductivity pattern; **Processes involving a migration**; **e.g. photoelectrophoresis, photoelectrosolography**; **Processes involving a selective transfer, e.g. electrophoto-adhesive processes**; **Apparatus essentially involving a single such process [5]**

17/02 . with electrolytic development **[2]**

17/04 . using photoelectrophoresis **[2]**

17/06 . . Apparatus therefor **[5]**

17/08 . using an electrophoto-adhesive process, e.g. manifold imaging **[5]**

17/10 . using migration imaging, e.g. photoelectrosolography (G03G 17/04 takes precedence) **[5]**

19/00 Processes using magnetic patterns; **Apparatus therefor**

21/00 Arrangements not provided for by groups G03G 13/00 to G03G 19/00, e.g. cleaning, elimination of residual charge [2]

21/02 . Counting the number of copies; Billing **[6]**

21/04 . Preventing copies being made of an original **[6]**

21/06 . Eliminating residual charges from a reusable imaging member **[6]**

21/08 . . using optical radiation **[6]**

21/10 . Collecting or recycling waste developer **[6]**

21/12 . . Toner waste containers **[6]**

21/14 . Electronic sequencing control **[6]**

21/16 . Mechanical means for facilitating the maintenance of the apparatus, e.g. modular arrangements **[6]**

21/18 . . using a processing cartridge **[6]**

21/20 . Humidity or temperature control **[6]**

G03H HOLOGRAPHIC PROCESSES OR APPARATUS (holograms, e.g. point holograms, used as ordinary optical elements G02B 5/32; producing stereoscopic or other three-dimensional effects G02B 27/22; diffraction-grating systems G02B 27/44; systems using moire fringes G02B 27/60; optical logic elements G02F 3/00; stereo-photography G03B 35/00; photosensitive materials or processes for photographic purposes G03C; apparatus for processing exposed photographic materials G03D; analogue computers performing mathematical operations with the aid of optical elements G06E 3/00; authentication, by radiation, of concealed information carried by holograms or diffraction gratings G06K 19/16; holographic storage G11B 7/0065, G11C 13/04) **[2]**

Note

This subclass covers means for producing a record of the phase and amplitude information of a wave-front, which information can be used to reconstruct the original wave-front, or means to reconstruct the original wave-front from a record containing the phase and amplitude information of the wave-front. **[2]**

1/00 Holographic processes or apparatus using light, infra-red, or ultra-violet waves for obtaining holograms or for obtaining an image from them; **Details peculiar thereto [2]**

1/02 . Details **[2]**

1/04 . Processes or apparatus for producing holograms (G03H 1/26 takes precedence) **[2]**

1/06 . . using incoherent light **[2]**

1/08 . . Synthesising holograms (using electric digital computers G06F, G06T) **[2]**

1/10 . . using modulated reference beam **[2]**

1/12 . . . Spatial modulation, e.g. ghost imaging **[2]**

1/14 . . . Temporal modulation, e.g. extending depth of field or phase compensation for object motion **[2]**

1/16 . . using Fourier transform (G03H 1/12, G03H 1/14 take precedence; analogue computers G06G, e.g. G06G 7/19) **[2]**

1/18 . . Particular processing of hologram record carriers, e.g. for obtaining blazed holograms **[2]**

1/20 . . Copying holograms by holographic means **[2]**

1/22 . Processes or apparatus for obtaining an optical image from holograms (G03H 1/26 to G03H 1/34 take precedence) **[2]**

1/24 . . using white light **[2]**

1/26 . Processes or apparatus specially adapted to produce multiple holograms or to obtain images from them, e.g. multicolour technique **[2]**

1/28 . . superimposed holograms only **[2]**

1/30 . . discrete holograms only **[2]**

1/32 . Systems for obtaining speckle elimination **[2]**

1/34 . Systems for reducing the space-spatial bandwidth product **[2]**

3/00 Holographic processes or apparatus using ultrasonic, sonic, or infrasonic waves for obtaining holograms; **Processes or apparatus for obtaining an optical image from them** (G03H 1/22 takes precedence) **[2]**

5/00 Holographic processes or apparatus using particles or using waves other than those covered by groups G03H 1/00 or G03H 3/00 for obtaining holograms; **Processes or apparatus for obtaining an optical image from them** (G03H 1/22 takes precedence; construction of electron microscopes H01J 37/26) **[2]**

G04 HOROLOGY

G04B **MECHANICALLY-DRIVEN CLOCKS OR WATCHES**; **MECHANICAL PARTS OF CLOCKS OR WATCHES IN GENERAL**; **TIME-PIECES USING THE POSITION OF THE SUN, MOON, OR STARS** (spring- or weight-driven mechanisms in general F03G; electromechanical clocks or watches G04C; electromechanical clocks with attached or built-in means operating any device at preselected times or after predetermined time intervals G04C 23/00; clocks or watches with stop devices G04F 7/08; structural details or housings specially adapted for electronic time-pieces with no moving parts G04G 17/00)

Note

This subclass covers mechanically-driven calendar clocks or clockwork calendars, and the mechanical part of such clocks or calendars.

Subclass index

Driving mechanisms

1/00 **Driving mechanisms**

1/02 . with driving weight

1/04 . . Mechanisms in which the clockwork acts as the driving weight

1/06 . . with several weights

1/08 . . Driving weights; Chains; Chain wheels; Arbors for chain wheels

1/10 . with mainspring

1/12 . . with several mainsprings

1/14 . . Mainsprings; Bridles therefor (mainsprings with bridles G04B 1/18; alloys C22C; springs in general F16F)

1/16 . . Barrels; Arbors; Barrel axles (arrangements facilitating the removal of the mainspring G04B 33/14)

1/18 . . Constructions for connecting the ends of mainsprings with the barrel or the arbor

1/20 . . . Protecting arrangements against rupture or overwinding of the mainspring located in the barrel or attached to the barrel (in connection with keys or the like G04B 3/06, G04B 3/10; in connection with automatic winding devices G04B 5/24)

1/22 . . Compensation of changes in the motive power of the mainspring (by mechanical shaping of the mainspring G04B 1/14)

1/24 . with both mainsprings and driving weights

1/26 . driven by liquids or gases; Liquid or gaseous drives for mechanically-controlled secondary clocks

Winding

3/00 **Normal winding of clockworks by hand or mechanically**; **Winding-up several mainsprings or driving weights simultaneously**

3/02 . Removably-mounted keys or the like

3/04 . Rigidly-mounted keys, knobs, or crowns (divided winding stems G04B 37/06)

3/06 . Keys or the like with means preventing overwinding (protecting devices arranged in, or attached to, the barrel G04B 1/20; in connection with automatic winding devices G04B 5/24)

3/08 . by parts of the cases

3/10 . . Protecting means preventing overwinding (arranged in, or attached to, the barrel G04B 1/20; in connection with keys G04B 3/06; in connection with automatic winding devices G04B 5/24)

3/12 . by mechanical means, e.g. pneumatic motor (winding-up with electric or electromechanical means G04C)

5/00 **Automatic winding-up**

5/02 . by self-winding caused by movement of the watch

5/04 . . by oscillating weights the movement of which is limited

5/06 . . . acting in one direction only

5/08 . . . acting in both directions

5/10 . . by oscillating weights the movement of which is not limited

5/12 . . . acting in one direction only

5/14 . . . acting in both directions

5/16 . . Construction of the weights

5/18 . . Supports, suspensions, or guide arrangements, for oscillating weights

5/19 . . . Suspension of the oscillating weight at its centre of rotation **[3]**

5/20 . by movements of other objects, e.g. by opening hand-bag, by opening case, by opening door; Winding-up by wind power

5/22 . by thermometric, barometric, or like effects or alterations

5/24 . Protecting means preventing overwinding (arranged in, or attached to, the barrel G04B 1/20; in connection with keys or the like G04B 3/06; in connection with parts of the cases G04B 3/10)

7/00 Combined normal and automatic winding-up

9/00 Supervision of the state of winding, e.g. indicating the amount of winding

9/02 . Devices controlled by such state, e.g. device affording protection against overwinding (protecting means preventing overwinding arranged in or on the barrel G04B 1/20; protecting means in connection with keys or the like G04B 3/06; in connection with parts of the cases G04B 3/10; in connection with automatic winding devices G04B 5/24)

11/00 Click devices, stop clicks or clutches for winding

11/02 . Devices allowing the motion of a rotatable part in only one direction **[3]**

11/04 . . Pawl constructions therefor, e.g. pawl secured to an oscillating member actuating a ratchet **[3]**

13/00 Gearwork

13/02 . Wheels; Pinions; Spindles; Pivots (bearings G04B 31/00)

15/00 Escapements (electric or magnetic means for converting oscillatory to rotary motion in electromechanical time-pieces G04C 5/00)

15/02 . permanently in contact with the regulating mechanism

15/04 . . Cylinder escapements

15/06 . Free escapements

15/08 . . Lever escapements

15/10 . with constant impulses for the regulating mechanism

15/12 . Adjusting (tools therefor G04D 1/02); Restricting the amplitude of the lever or the like

15/14 . Component parts or constructional details, e.g. construction of the lever or the escape wheel

17/00 Mechanisms for stabilising frequency [3]

17/02 . Oscillators acting by gravity, e.g. pendulum swinging in a plane

17/04 . Oscillators acting by spring tension

17/06 . . Oscillators with hairsprings, e.g. balance

17/08 . . Oscillators with coil springs stretched and unstretched axially

17/10 . . Oscillators with torsion strips or with springs acting in the same manner as torsion strips, e.g. weight oscillating in a horizontal plane

17/20 . Compensation of mechanisms for stabilizing frequency

17/22 . . for the effect of variations of temperature (alloys independent of variations of temperature C22C)

17/24 . . for the effect of variations of atmospheric pressure

17/26 . . for the effect of variations of the impulses

17/28 . . for the effect of unbalance of the weights, e.g. tourbillon

17/30 . Rotating governors, e.g. centrifugal governors, fan governors (for striking mechanism G04B 21/06)

17/32 . Component parts or constructional details, e.g. collet, stud

17/34 . . for fastening the hairspring onto the balance **[3]**

18/00 Mechanisms for setting frequency [3]

18/02 . Regulator devices; Indexing devices **[3]**

18/04 . Adjusting the beat of the pendulum, balance, or the like, e.g. putting into beat **[3]**

18/06 . . by setting the collet or the stud of a hairspring **[3]**

18/08 . Component parts or constructional details **[3]**

Time indicating

19/00 Indicating the time by visual means (by electric lamps G04C 17/02; display arrangements in general G09)

19/02 . Back-gearing arrangements between gear train and hands

19/04 . Hands; Discs with a single mark or the like

19/06 . Dials (for time-pieces without clockwork G04B 49/04)

19/08 . . Geometrical arrangement of the graduations

19/10 . . Ornamental shape of the graduations or the surface of the dial; Attachment of graduations to the dial

19/12 . . Selection of materials for dials or graduations

19/14 . . Fastening the dials to the clock or the watch plates

19/16 . . Shiftable dials, e.g. indicating alternately from 1 to 12 and from 13 to 24

19/18 . . Graduations on the crystal or glass, on the bezel, or on the rim

19/20 . Indicating by numbered bands, drums, discs, or sheets

19/21 . . Drums **[3]**

19/22 . Arrangements for indicating different local apparent times; Universal time-pieces

19/23 . . by means of additional hands or additional pairs of hands **[3]**

19/24 . Clocks or watches with date indicators; Clockwork calendars

19/243 . . characterised by the shape of the date indicator **[3]**

19/247 . . . disc-shaped **[3]**

19/25 . . . . Devices for setting the date indicators manually **[3]**

19/253 . . . . Driving or releasing mechanisms **[3]**

19/257 . . . drum-shaped **[3]**

19/26 . Clocks or watches with indicators for tides, for the phases of the moon, or the like

19/28 . Adjustable guide marks or pointers for indicating determined points of time

19/30 . Illumination of dials or hands

19/32 . . by luminescent substances

19/34 . Position of the hands projected optically

21/00 Indicating the time by acoustic means (at preselected times G04B 23/00; by electro-acoustic means G04C 21/04; sound-producing apparatus per se G10)

21/02 . Regular striking mechanisms giving the full hour, half hour, or quarter hour

21/04 . . Hour wheels; Racks or rakes; Snails or similar control mechanisms

21/06 . . Details of striking mechanisms, e.g. hammer, fan governor

21/08 . . Sounding bodies; Whistles; Musical apparatus (with electro-acoustic transmitters G04C 21/00)

21/10 . . Releasing or locking the regular stroke, e.g. for silence during the night

21/12 . . Reiterating watches or clocks
21/14 . . Winding-up the striking mechanism by the clockwork; Winding-up the clockwork by the striking mechanism

23/00 Arrangements producing acoustic signals at preselected times (electrically-released alarm signals G04C 21/00; metronomes G04F 5/02; sound-producing apparatus per se G10)
23/02 . Alarm clocks
23/03 . . Alarm signal stop arrangements **[3]**
23/04 . . with coarse and fine setting of the preselected time
23/06 . . adjustable for several preselected times with automatic stopping of the signal
23/08 . . operating on successive days without resetting; operating only once in each 24 hours
23/10 . . with presignal; with repeated signal; with changeable intensity of sound
23/12 . . Alarm watches to be worn in pockets or on the wrist (giving signals by stimulating the skin G04B 25/04)

25/00 Indicating the time by other means or by combined means (electric or electromechanical indicating G04C)
25/02 . by feeling; Clocks or watches for blind persons
25/04 . . Alarm clocks or watches with devices stimulating the skin
25/06 . by moving figures, e.g. cuckoo-clock, trumpet clock

27/00 Mechanical devices for setting the time-indicating means
27/02 . by making use of the winding means
27/04 . . with clutch wheel
27/06 . . with rocking bar
27/08 . by using parts of the case

Frameworks, supports, or arrangements of the clockwork parts in relation to each other, so-called "calibers"

29/00 Frameworks
29/02 . Plates; Bridges; Cocks
29/04 . Connecting or supporting parts

31/00 Bearings; **Point suspensions or counter-point suspensions**; **Pivot bearings**; **Single parts therefor** (bearings in general F16C)
31/004 . characterised by the material used **[3]**
31/008 . . Jewel bearings (G04B 31/04 takes precedence) **[3]**
31/012 . . Metallic bearings **[3]**
31/016 . . Plastic bearings **[3]**
31/02 . Shock-damping bearings
31/04 . . with jewel hole and cap jewel **[3]**
31/06 . Manufacture or mounting processes **[3]**
31/08 . Lubrication **[3]**

33/00 Calibers
33/02 . Circular calibers
33/04 . Non-circular calibers
33/06 . of extremely flat shape
33/08 . in which the gear train is arranged in different planes, e.g. parallel or inclined to each other (G04B 33/10 takes precedence)
33/10 . with seconds hand arranged in the centre of the dial
33/12 . for extremely-long running times
33/14 . Calibers of which the mainsprings or barrels are easily removable (mainsprings G04B 1/14; barrels, arbors G04B 1/16)
33/16 . with arrangements affording protection of the clockwork against damage as a consequence of a rupture of the mainspring

35/00 Adjusting the gear train, e.g. the backlash of the arbors, depth of meshing of the gears

Protection of the clockwork against damage from outside

37/00 Cases
37/02 . Evacuated cases; Cases filled with gases or liquids; Cases containing substances for absorbing or binding moisture or dust
37/04 . Mounting the clockwork in the case; Shock-absorbing mountings
37/05 . . Fixed mountings for pocket or wrist watches **[3]**
37/06 . Forming the passage for the winding stem through the case; Divided winding stems
37/08 . Hermetic sealing of openings, joints, passages, or slits
37/10 . . of winding stems
37/11 . . of the back cover of pocket or wrist watches **[3]**
37/12 . Cases for special purposes, e.g. watch combined with ring, watch combined with button (watch guards or protectors A45C 11/10, A45C 11/12; watches combined with cosmetic powder containers A45D 33/30)
37/14 . Suspending devices, supports, or stands for time-pieces in so far as they form part of the case (wrist-watch straps, fastening means therefor A44C 5/00)
37/16 . . Fastening the case to the bracelet **[3]**
37/18 . for pocket or wrist watches (G04B 37/02 to G04B 37/16 takes precedence) **[3]**
37/20 . . with hinged covers or backs **[3]**
37/22 . Materials or processes of manufacturing pocket watch or wrist watch cases **[3]**

39/00 Watch crystals; **Fastening or sealing crystals**; **Clock glasses**
39/02 . Sealing crystals or glasses **[3]**

41/00 Locking or holding devices for pendulums, chimes, or the like, for use during transport

43/00 Protecting clockworks by shields or other means against external influences, e.g. magnetic fields

Clocks with unusual features

45/00 Time-pieces of which the indicating means or cases provoke special effects, e.g. aesthetic effect (ornamental shaping of dials G04B 19/10)
45/02 . Time-pieces of which the clockwork is visible partly or wholly
45/04 . Time-pieces with invisible drive, e.g. with hands attached to rotating glass disc

47/00 Time-pieces combined with other articles which do not interfere with the running or the time-keeping of the time-piece (G04B 37/12 takes precedence; writing or drawing implements with devices for indicating time B43K 29/087; combinations with vehicle mirror assemblies B60R 1/12; combined with cameras, projectors, or photographic printing apparatus G03B 29/00)
47/02 . Installations within mirrors, pictures, furniture, or other household articles

47/04 . with attached ornaments or amusement apparatus
47/06 . with attached measuring instruments, e.g. pedometer, barometer, thermometer, compass

49/00 Time-pieces using the position of the sun, moon, or stars
49/02 . Sundials
49/04 . . Graduation or shaping of dials

99/00 Subject matter not provided for in other groups of this subclass [8]

G04C ELECTROMECHANICAL CLOCKS OR WATCHES (mechanical parts of clocks or watches in general G04B; electronic time-pieces with no moving parts, electronic circuitry for producing timing pulses G04G)

Note

This subclass covers electric features of mechanically-driven clocks or watches, such as electric winding of such clocks or the provision of electric contacts thereon.

Subclass index

Electric winding of mechanical clocks; **Independent electric clocks or watches**

1/00 Winding mechanical clocks electrically (winding mechanically G04B 3/00)
1/02 . by electromagnets
1/04 . by electric motors with rotating or with reciprocating movement
1/06 . . winding-up springs
1/08 . . raising weights
1/10 . Protection against overwinding (in mechanical clocks or watches G04B 1/20, G04B 3/06, G04B 3/10)
1/12 . . of the spring
1/14 . . of the weights

3/00 Electromechanical clocks or watches independent of other time-pieces and in which the movement is maintained by electric means (clocks driven by synchronous motors G04C 15/00)
3/02 . wherein movement is regulated by a pendulum
3/027 . . using electromagnetic coupling between electric power source and pendulum (G04C 3/033 takes precedence) **[3]**
3/033 . . using torsion pendulums; using conical pendulums (construction thereof G04B 17/00) **[3]**
3/04 . wherein movement is regulated by a balance
3/06 . . using electromagnetic coupling between electric power source and balance **[3]**
3/08 . wherein movement is regulated by a mechanical oscillator other than a pendulum or balance, e.g. by a tuning fork **[3]**
3/10 . . driven by electromagnetic means **[3]**
3/12 . . driven by piezo-electric means; driven by magneto-strictive means **[3]**
3/14 . incorporating a stepping motor (G04C 3/02 to G04C 3/12 take precedence) **[3]**
3/16 . incorporating an electro-dynamic continuously rotating motor (G04C 3/02 to G04C 3/12 take precedence) **[3]**
3/18 . incorporating electro-thermal or electro-pneumatic driving means **[3]**

5/00 Electric or magnetic means for converting oscillatory to rotary motion in time-pieces, i.e. electric or magnetic escapements (regulators G04C 3/00) **[3]**

9/00 Electrically-actuated devices for setting the time-indicating means (of slave clocks G04C 13/03; mechanical setting devices G04B 27/00) **[3]**
9/02 . brought into action by radio transmission
9/04 . by blocking the driving means **[3]**
9/06 . by decoupling the driving means (combined with blocking means G04C 9/04) **[3]**
9/08 . by electric drive **[3]**

10/00 Arrangements of electric power supplies in time-pieces [3]
10/02 . the power supply being a radioactive source **[3]**
10/04 . with means for indicating the condition of the power supply **[3]**

Electric clock installations; **Master-and-slave clock systems**; **Synchronous-motor clocks**

11/00 Synchronisation of independently-driven clocks
11/02 . by radio
11/04 . over a line (transmitting time signals over telephone networks H04M 11/06)
11/06 . with direct mechanical action on the time-indicating means **[3]**
11/08 . using an electric magnet or motor **[3]**

13/00 Driving mechanisms for clocks by master clocks
13/02 . Circuit arrangements; Electric clock installations

13/03 . . Pulse transmission systems with additional means for setting the time indication of slave clocks **[3]**
13/04 . . Master clocks
13/06 . . . Contact devices (for simultaneously winding several clocks G04C 1/00)
13/08 . Slave clocks actuated intermittently
13/10 . . by electromechanical step-advancing mechanisms
13/11 . . . with rotating armature **[3]**
13/12 . . by continuously-rotating electric motors **[3]**
13/14 . . by electrically-released mechanical driving mechanisms

15/00 Clocks driven by synchronous motors

Indicating the time or producing time signals electrically

17/00 Indicating the time optically by electric means (G04C 19/00 takes precedence; liquid crystal materials C09K 19/00; by mechanical means G04B 19/00, G04B 19/20) **[3]**
17/02 . by electric lamps

19/00 Producing optical time signals at prefixed times by electric means
19/02 . by electric lamps
19/04 . by indicating members moved electrically, e.g. flap, band

21/00 Producing acoustic time signals by electrical means
21/02 . Constructional details (G04C 21/04, G04C 21/16 take precedence)
21/04 . Indicating the time of the day (acoustic indication of time G04B 21/00)
21/06 . . by striking mechanism
21/08 . . . with snail
21/10 . . . with locking plate
21/12 . . by electro-acoustic means
21/14 . . . Electro-acoustic time announcement, i.e. spoken
21/16 . producing the signals at adjustable fixed times
21/18 . . by mechanically unlocking an electromechanical vibrator, e.g. actuated by the leakage flux of the electric driving means
21/20 . . by closing a contact to ring an electromechanical alarm
21/22 . . . put into action by the arbor of a mechanical alarm work
21/24 . . . put into action by the spring of a mechanical alarm work
21/26 . . . put into action by the vibrations caused by the operation of a mechanical alarm work
21/28 . . by closing a contact to put into action electro-acoustic means, e.g. awakening by music
21/30 . . with provision for a number of operations at different times, e.g. ringing the bells in a school
21/32 . . . giving indications at a number of places, each at a different time, e.g. system of alarms in a hotel
21/34 . . Devices on watches or similar portable time-pieces
21/36 . . Signal-repeating devices
21/38 . . Adjusting the duration of signals

23/00 Clocks with attached or built-in means operating any device at preselected times or after preselected time-intervals (if restricted to producing acoustic time signals by electrical means G04C 21/00; mechanical alarm clocks G04B 23/02; apparatus which can be set and started to measure-off predetermined intervals G04F 3/06; time or time-programme switches which automatically terminate their operation after the programme is completed H01H 43/00)
23/02 . Constructional details
23/04 . . Housings, supports, shielding, or similar stationary parts
23/06 . . Driving or regulating means
23/08 . . Programming means
23/10 . . for actuating any element which operates, or initiates the operation of, the device concerned
23/12 . . Electric circuitry
23/14 . Mechanisms continuously running to relate the operation(s) to the time of day
23/16 . . acting only at one preselected time or during one adjustable time interval
23/18 . . for operating one device at a number of different times
23/20 . . . with contacts operated, or formed, by clock hands or elements of similar form
23/22 . . . with the actuating element carried by a disc
23/24 . . . . the actuating element controlling another element mechanically
23/26 . . for operating a number of devices at different times
23/28 . . . with contacts operated, or formed, by clock hands or elements of similar form
23/30 . . . with the actuating element carried by a disc
23/32 . . . . the actuating element controlling another element mechanically
23/34 . . with provision for automatic modification of the programme, e.g. on Sunday
23/36 . . . by external influences
23/38 . Mechanisms measuring a chosen time interval independently of the time of day at which the interval starts
23/40 . . using continuously-running mechanism
23/42 . . acting only at the end of a single time interval
23/44 . . . with provision for selection from a number of preset intervals
23/46 . . . with provision for adjustment of the interval (G04C 23/44 takes precedence)
23/48 . . acting at the ends of successive time intervals
23/50 . . with provision for modification of the interval(s) by external influences

99/00 Subject matter not provided for in other groups of this subclass [8]

G04D APPARATUS OR TOOLS SPECIALLY DESIGNED FOR MAKING OR MAINTAINING CLOCKS OR WATCHES (machine tools in general B23, B24; hand tools in general B25)

Subclass index

1/00 Gripping, holding, or supporting devices
1/02 . Tweezers; Vice clamps or other special hand tools for watchmakers
1/04 . Tools for setting springs
1/06 . Supporting devices for clockworks or parts of time-pieces
1/08 . Tools for setting or removing hands
1/10 . Devices for opening or closing watch bottoms or covers

3/00 Watchmakers' or watch-repairers' machines or tools for working materials
3/02 . Lathes, with one or more supports; Burnishing machines, with one or more supports
3/04 . Devices for placing bearing jewels, bearing sleeves, or the like in position
3/06 . Devices for shaping or setting watch glasses
3/08 . Machines or apparatus for cleaning

5/00 Oiling devices; **Special lubricant containers for watchmakers**

7/00 Measuring, counting, calibrating, testing, or regulating apparatus
7/02 . for mainsprings
7/04 . for gearwork
7/06 . for escapements
7/08 . for balance wheels
7/10 . for hairsprings
7/12 . Timing devices for clocks or watches for comparing the rate of the oscillating member with a standard

9/00 Demagnetising devices (demagnetising in general H01F 13/00)

99/00 Subject matter not provided for in other groups of this subclass [8]

G04F TIME-INTERVAL MEASURING (measuring pulse characteristics G01R, e.g. G01R 29/02; in radar or like systems G01S; masers H01S 1/00; generation of oscillations H03B; generation or counting of pulses, frequency dividing H03K; analogue/digital conversion in general H03M 1/00) **[2]**

Note

This subclass covers:
– apparatus for measuring-off predetermined time intervals; **[2]**
– apparatus for producing such intervals as timing standards, e.g. metronomes; **[2]**
– apparatus for measuring unknown intervals, e.g. precision systems for short-time-interval measurement. **[2]**

Subclass index

1/00 Apparatus which can be set and started to measure-off predetermined or adjustably-fixed time intervals without driving mechanisms, e.g. egg timer (time or time-programme switches which automatically terminate their operation after the programme is completed H01H 43/00)
1/02 . by consuming prefixed quantities of materials, e.g. by burning candle
1/04 . by movement or acceleration due to gravity
1/06 . . by flowing-away of a prefixed quantity of fine-granular or liquid materials, e.g. sand-glass, water-clock
1/08 . . by a body falling a prefixed distance in air or in a viscous material

3/00 Apparatus which can be set and started to measure-off predetermined or adjustably-fixed time intervals with driving mechanisms, e.g. dosimeter with clockwork (time or time-programme switches which automatically terminate their operation after the programme is completed H01H 43/00)
3/02 . with mechanical driving mechanisms
3/04 . . Additional arrangements in connection with ordinary non-electric clocks for this purpose
3/06 . with electric driving mechanisms
3/08 . . Additional arrangements in connection with ordinary electric clocks for this purpose

5/00 **Apparatus for producing preselected time intervals for use as timing standards** (generating clock signals for electric digital computers G06F 1/04; automatic frequency control or stabilisation of generators in general H03L)
5/02 . Metronomes
5/04 . using oscillators with electromechanical resonators **[2]**
5/06 . . using piezo-electric resonators **[2]**
5/08 . . using magnetostrictive resonators **[2]**
5/10 . using electric or electronic resonators (G04F 5/14 takes precedence) **[2]**
5/12 . using fluidic devices **[2]**
5/14 . using atomic clocks **[2]**
5/16 . using pulses produced by radio-isotopes **[2]**

7/00 **Apparatus for measuring unknown time intervals by non-electric means** (G04F 13/06 takes precedence) **[2]**
7/02 . by measuring the distance of fall or the final velocity of a falling body
7/04 . using a mechanical oscillator **[2]**
7/06 . . running only during the time interval to be measured, e.g. stop-watch
7/08 . . Watches or clocks with stop devices, e.g. chronograph
7/10 . Means used apart from the time-piece for starting or stopping same **[2]**

8/00 **Apparatus for measuring unknown time intervals by electromechanical means [2]**
8/02 . using an electromechanical oscillator **[2]**
8/04 . . using a piezo-electric oscillator **[2]**
8/06 . . using a magnetostrictive oscillator **[2]**
8/08 . Means used apart from the time-piece for starting or stopping same **[2]**

10/00 **Apparatus for measuring unknown time intervals by electric means [2]**
10/02 . using oscillators with passive electric resonator, e.g. lumped LC **[2]**
10/04 . by counting pulses or half-cycles of an ac **[2]**
10/06 . by measuring phase **[2]**
10/08 . using pulses produced by radio-isotopes **[2]**
10/10 . by measuring electric or magnetic quantities changing in proportion to time **[2]**

13/00 **Apparatus for measuring unknown time intervals by means not provided for in groups G04F 5/00 to G04F 10/00 [2]**
13/02 . using optical means **[2]**
13/04 . using electrochemical means **[2]**
13/06 . using fluidic means **[2]**

G04G ELECTRONIC TIME-PIECES [3]

(1) This subclass covers:
– electronic time-pieces with no moving parts; **[3]**
– electronic circuitry for producing timing pulses irrespective of the nature of the time-indicating means utilised. **[3]**
(2) This subclass does not cover electronic time-pieces with moving parts, which are covered by subclass G04C. **[3]**

Subclass index

3/00 **Producing timing pulses** (driving circuits for stepping motors G04C 3/14; producing preselected time intervals for use as timing standards G04F 5/00; pulse technique in general H03K; control, synchronisation, or stabilisation of generators in general H03L) **[3]**
3/02 . Circuits for deriving low frequency timing pulses from pulses of higher frequency (pulse frequency dividers in general H03K 23/00 to H03K 29/00) **[3]**
3/04 . Temperature-compensating arrangements **[7]**

5/00 **Setting, i.e. correcting or changing, the time-indication [3]**
5/02 . by temporarily changing the number of pulses per unit time, e.g. quick-feed method **[3]**
5/04 . by setting each of the displayed values, e.g. date, hour, independently **[3]**

7/00 **Synchronisation [3]**
7/02 . by radio **[3]**

9/00 **Visual time or date indication means [3]**
9/02 . by selecting desired characters out of a number of characters or by selecting indicating elements the position of which represent the time, e.g. by using multiplexing techniques **[3]**
9/04 . . by controlling light sources, e.g. electroluminescent diodes **[3]**
9/06 . . using light valves, e.g. liquid crystals **[3]**
9/08 . by building-up characters using a combination of indicating elements, e.g. by using multiplexing techniques **[3]**
9/10 . . by controlling light sources, e.g. electroluminescent diodes **[3]**
9/12 . . using light valves, e.g. liquid crystals **[3]**

11/00 Producing optical signals at preselected times [3]

13/00 Producing acoustic time signals [3]

13/02 . at preselected times, e.g. alarm clocks **[3]**

15/00 Time-pieces comprising means to be operated at preselected times or after preselected time intervals (G04G 11/00, G04G 13/00 take precedence; pulse delay circuits H03K 5/13; electronic time-delay switches H03K 17/28; electronic time-programme switches which automatically terminate their operation after the programme is completed H03K 17/296; time programming for television signal recording H04N 5/761) **[3]**

17/00 Structural details; **Housings [7]**

17/02 . Component assemblies **[7]**

17/04 . . Mounting of electronic components **[7]**

17/06 . . Electric connectors, e.g. conductive elastomers **[7]**

17/08 . Housings **[7]**

19/00 Electric power supply circuits specially adapted for use in electronic time-pieces [7]

19/02 . Conversion or regulation of current or voltage **[7]**

99/00 Subject matter not provided for in other groups of this subclass [2010.01]

G05 CONTROLLING; REGULATING

(1) This class covers methods, systems, and apparatus for controlling, in general.
(2) In this class, the following terms or expressions are used with the meanings indicated:
- "controlling" means influencing a variable in any way, e.g. changing its direction or its value (including changing it to or from zero), maintaining it constant, limiting its range of variation;
- "regulation" means maintaining a variable automatically at a desired value or within a desired range of values. The desired value or range may be fixed, or manually varied, or may vary with time according to a predetermined "programme" or according to variation of another variable. Regulation is a form of control;
- "automatic control" is often used in the art as a synonym for "regulation".

(3) Attention is drawn to the Notes following the title of section G, especially as regards the definition of the term "variable".

G05B CONTROL OR REGULATING SYSTEMS IN GENERAL; FUNCTIONAL ELEMENTS OF SUCH SYSTEMS; MONITORING OR TESTING ARRANGEMENTS FOR SUCH SYSTEMS OR ELEMENTS (fluid-pressure actuators or systems acting by means of fluids in general F15B; valves per se F16K; characterised by mechanical features only G05G; sensitive elements, see the appropriate subclasses, e.g. G12B, subclasses of G01, H01; correcting units, see the appropriate subclasses, e.g. H02K)

(1) This subclass covers features of control systems or elements for regulating specific variables, which are clearly more generally applicable.
(2) This subclass does not cover : **[7]**
(a) systems for controlling or regulating non-electric variables in general, which are covered by subclass G05D; **[7]**
(b) systems for regulating electric or magnetic variables in general, which are covered by subclass G05F; **[7]**
(c) systems specially adapted for the control of particular machines or apparatus provided for in a single other subclass, which are classified in the relevant subclass for such machines or apparatus, provided that there is specific provision for control or regulation relevant to the special adaptation (see Note (5), below). Otherwise, classification is made in the most appropriate place in this subclass. **[7]**
(3) In this subclass, the following terms or expressions are used with the meanings indicated:
- "automatic controller" means a system, circuit, or device in which a signal from the detecting element is compared with a signal representing the desired value and which operates in such a way as to reduce the deviation. The automatic controller generally does not include the sensitive element, i.e. that element which measures the value of the condition to be corrected, or the correcting element, i.e. that element which adjusts the condition to be corrected;
- "electric" includes "electromechanical", "electrohydraulic" or "electropneumatic".

(4) In this subclass, details of specific control systems are classified in the group relevant to the system, if not otherwise provided for.
(5) This Note lists places in the IPC where there is specific provision of the kind referred to in Note (2)(c), above; where such provision is at a general level, the places are listed under the heading "General references"; where the provision is related to programme control, the places are listed under the heading "Places related to group G05B 19/00". **[7]**

Subclass index

1/00 Comparing elements, i.e. elements for effecting comparison directly or indirectly between a desired value and existing or anticipated values (comparing phase or frequency of two electric signals H03D 13/00)

1/01 . electric **[2]**
1/02 . . for comparing analogue signals **[2]**
1/03 . . for comparing digital signals **[2]**
1/04 . . with sensing of the position of the pointer of a measuring instrument
1/06 . . . continuous sensing
1/08 . . . stepwise sensing
1/11 . fluidic **[2]**

5/00 Anti-hunting arrangements

5/01 . electric
5/04 . fluidic **[2]**

6/00 Internal feedback arrangements for obtaining particular characteristics, e.g. proportional, integral, differential (in automatic controllers G05B 11/00)

6/02 . electric
6/05 . fluidic **[2]**

7/00 **Arrangements for obtaining smooth engagement or disengagement of automatic control**

7/02 . electric **[2]**

7/04 . fluidic **[2]**

9/00 **Safety arrangements** (G05B 7/00 takes precedence; safety arrangements in programme-control systems G05B 19/048, G05B 19/406; safety valves F16K 17/00; emergency protective circuit arrangements in general H02H)

9/02 . electric

9/03 . . with multiple-channel loop, i.e. redundant control systems **[2]**

9/05 . fluidic **[2]**

11/00 **Automatic controllers** (G05B 13/00 takes precedence)

11/01 . electric

11/06 . . in which the output signal represents a continuous function of the deviation from the desired value, i.e. continuous controllers (G05B 11/26 takes precedence)

11/10 . . . the signal transmitted being dc

11/12 . . . the signal transmitted being modulated on an ac carrier

11/14 . . in which the output signal represents a discontinuous function of the deviation from the desired value, i.e. discontinuous controllers (G05B 11/26 takes precedence)

11/16 . . . Two-step controllers, e.g. with on/off action

11/18 . . . Multi-step controllers

11/26 . . in which the output signal is a pulse-train

11/28 . . . using pulse-height modulation; using pulse-width modulation

11/30 . . . using pulse-frequency modulation

11/32 . . with inputs from more than one sensing element; with outputs to more than one correcting element

11/36 . . with provision for obtaining particular characteristics, e.g. proportional, integral, differential

11/38 . . . for obtaining a proportional characteristic

11/40 . . . for obtaining an integral characteristic

11/42 . . . for obtaining a characteristic which is both proportional and time-dependent, e.g. P. I., P. I. D.

11/44 . pneumatic only

11/46 . . without auxiliary power

11/48 . . with auxiliary power

11/50 . . . in which the output signal represents a continuous function of the deviation from the desired value, i.e. continuous controllers

11/52 . . . in which the output signal represents a discontinuous function of the deviation from the desired value, i.e. discontinuous controllers

11/54 . . . . Two-step controllers, e.g. with on/off action

11/56 . . . . Multi-step controllers

11/58 . . with inputs from more than one sensing element; with outputs to more than one correcting element

11/60 . hydraulic only

13/00 **Adaptive control systems, i.e. systems automatically adjusting themselves to have a performance which is optimum according to some preassigned criterion** (G05B 19/00 takes precedence; details of the computer G06F 15/18) **[3]**

13/02 . electric

13/04 . . involving the use of models or simulators **[3]**

15/00 **Systems controlled by a computer** (G05B 13/00, G05B 19/00 take precedence; automatic controllers with particular characteristics G05B 11/00; computers per se G06) **[3]**

15/02 . electric

17/00 **Systems involving the use of models or simulators of said systems** (G05B 13/00, G05B 15/00, G05B 19/00 take precedence; analogue computers for specific processes, systems or devices, e.g. simulators, G06G 7/48) **[3]**

17/02 . electric

19/00 **Programme-control systems** (specific applications, see the relevant places, e.g. A47L 15/46; clocks with attached or built-in means operating any device at a preselected time interval G04C 23/00; marking or sensing record carriers with digital information G06K; information storage G11; time or time-programme switches which automatically terminate their operation after the programme is completed H01H 43/00)

19/02 . electric

19/04 . . Programme control other than numerical control, i.e. in sequence controllers or logic controllers (G05B 19/418 takes precedence; numerical control G05B 19/18)

19/042 . . . using digital processors (G05B 19/05 takes precedence) **[6]**

19/045 . . . using logic state machines, consisting only of a memory or a programmable logic device containing the logic for the controlled machine and in which the state of its outputs is dependent on the state of its inputs or part of its own output states, e.g. binary decision controllers, finite state controllers **[6]**

19/048 . . . Monitoring; Safety **[6]**

19/05 . . . Programmable logic controllers, e.g. simulating logic interconnections of signals according to ladder diagrams or function charts **[5]**

19/06 . . . using cams, discs, rods, drums, or the like (mechanical programme-control apparatus G05G 21/00)

19/07 . . . where the programme is defined in the fixed connection of electrical elements, e.g. potentiometers, counters, transistors **[6]**

19/08 . . . using plugboards, cross-bar distributors, matrix switches, or the like

19/10 . . . using selector switches

19/12 . . . using record carriers

19/14 . . . . using punched cards or tapes

19/16 . . . . using magnetic record carriers

19/18 . . Numerical control (NC), i.e. automatically operating machines, in particular machine tools, e.g. in a manufacturing environment, so as to execute positioning, movement or co-ordinated operations by means of programme data in numerical form (G05B 19/418 takes precedence) **[6]**

19/19 . . . characterised by positioning or contouring control systems, e.g. to control position from one programmed point to another or to control movement along a programmed continuous path **[3,6]**

Note

In this group, the measuring system for an axis is used to measure the displacement along that axis. This measurement is used as position-feedback in the servo-control system. **[6]**

19/21 . . . . using an incremental digital measuring device **[3]**
19/23 . . . . . for point-to-point control **[3]**
19/25 . . . . . for continuous-path control **[3]**
19/27 . . . . using an absolute digital measuring device **[3]**
19/29 . . . . . for point-to-point control **[3]**
19/31 . . . . . for continuous-path control **[3]**
19/33 . . . . using an analogue measuring device **[3]**
19/35 . . . . . for point-to-point control **[3]**
19/37 . . . . . for continuous-path control **[3]**
19/39 . . . . using a combination of the means covered by at least two of the preceding groups G05B 19/21, G05B 19/27 and G05B 19/33 **[3]**
19/40 . . . . Open loop systems, e.g. using stepping motor **[3]**
19/401 . . . characterised by control arrangements for measuring, e.g. calibration and initialisation, measuring workpiece for machining purposes (G05B 19/19 takes precedence) **[6]**
19/402 . . . characterised by control arrangements for positioning, e.g. centring a tool relative to a hole in the workpiece, additional detection means to correct position (G05B 19/19 takes precedence) **[6]**
19/404 . . . characterised by control arrangements for compensation, e.g. for backlash, overshoot, tool offset, tool wear, temperature, machine construction errors, load, inertia (G05B 19/19, G05B 19/41 take precedence) **[6]**
19/406 . . . characterised by monitoring or safety (G05B 19/19 takes precedence) **[6]**
19/4061 . . . . Avoiding collision or forbidden zones **[6]**
19/4062 . . . . Monitoring servoloop, e.g. overload of servomotor, loss of feedback or reference **[6]**
19/4063 . . . . Monitoring general control system (G05B 19/4062 takes precedence) **[6]**
19/4065 . . . . Monitoring tool breakage, life or condition **[6]**
19/4067 . . . . Restoring data or position after power failure or other interruption **[6]**
19/4068 . . . . Verifying part programme on screen, by drawing or other means **[6]**
19/4069 . . . . Simulating machining process on screen (G05B 19/4068 takes precedence) **[6]**
19/408 . . . characterised by data handling or data format, e.g. reading, buffering or conversion of data **[6]**
19/409 . . . characterised by using manual data input (MDI) or by using control panel, e.g. controlling functions with the panel; characterised by control panel details, by setting parameters (G05B 19/408, G05B 19/4093 take precedence) **[6]**
19/4093 . . . characterised by part programming, e.g. entry of geometrical information as taken from a technical drawing, combining this with machining and material information to obtain control information, named part programme, for the NC machine **[6]**
19/4097 . . . characterised by using design data to control NC machines, e.g. CAD/CAM (G05B 19/4093 takes precedence; CAD in general G06F 17/50) **[6]**
19/4099 . . . . Surface or curve machining, making 3D objects, e.g. desktop manufacturing **[6]**
19/41 . . . characterised by interpolation, e.g. the computation of intermediate points between programmed end points to define the path to be followed and the rate of travel along that path (G05B 19/25, G05B 19/31, G05B 19/37, G05B 19/39, G05B 19/40 take precedence) **[3,6]**
19/4103 . . . . Digital interpolation **[6]**
19/4105 . . . . Analog interpolation **[6]**
19/414 . . . Structure of the control system, e.g. common controller or multiprocessor systems, interface to servo, programmable interface controller **[6]**
19/4155 . . . characterised by programme execution, i.e. part programme or machine function execution, e.g. selection of a programme **[6]**
19/416 . . . characterised by control of velocity, acceleration or deceleration (G05B 19/19 takes precedence) **[6]**
19/418 . . Total factory control, i.e. centrally controlling a plurality of machines, e.g. direct or distributed numerical control (DNC), flexible manufacturing systems (FMS), integrated manufacturing systems (IMS), computer integrated manufacturing (CIM) **[6]**
19/42 . . Recording and playback systems, i.e. in which the programme is recorded from a cycle of operations, e.g. the cycle of operations being manually controlled, after which this record is played back on the same machine
19/421 . . . Teaching successive positions by mechanical means, e.g. by mechanically-coupled handwheels to position tool head or end effector (G05B 19/423 takes precedence) **[6]**
19/423 . . . Teaching successive positions by walk-through, i.e. the tool head or end effector being grasped and guided directly, with or without servo-assistance, to follow a path **[6]**
19/425 . . . Teaching successive positions by numerical control, i.e. commands being entered to control the positioning servo of the tool head or end effector **[6]**
19/427 . . . Teaching successive positions by tracking the position of a joystick or handle to control the positioning servo of the tool head, master-slave control (G05B 19/423 takes precedence) **[6]**
19/43 . fluidic **[3]**
19/44 . . pneumatic **[3]**
19/46 . . hydraulic **[3]**

21/00 **Systems involving sampling of the variable controlled** (G05B 13/00 to G05B 19/00 take precedence; transmission systems for measured values G08C; electronic switching or gating H03K 17/00)
21/02 . electric

23/00 **Testing or monitoring of control systems or parts thereof** (monitoring of programme-control systems G05B 19/048, G05B 19/406)

23/02 . Electric testing or monitoring

24/00 **Open-loop automatic control systems not otherwise provided for [2]**

24/02 . electric **[2]**

24/04 . fluidic **[2]**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

G05D **SYSTEMS FOR CONTROLLING OR REGULATING NON-ELECTRIC VARIABLES** (for continuous casting of metals B22D 11/16; valves per se F16K; sensing non-electric variables, see the relevant subclasses of G01; for regulating electric or magnetic variables G05F)

(1) This subclass does not cover features of general applicability to regulating systems, e.g. anti-hunting arrangements, which are covered by subclass G05B.

(2) In this subclass, the following term is used with the meaning indicated:
– "systems" includes self-contained devices such as speed governors, pressure regulators.

(3) Control systems specially adapted for particular apparatus, machines or processes are classified in the subclasses for the apparatus, machines or processes, provided that there is specific provision for control or regulation relevant to the special adaptation, either at a detailed level (e.g. A21B 1/40: "for regulating temperature in bakers' ovens") or at a general level (e.g. B23K 9/095: "for automatic control of welding parameters in arc welding"). Otherwise, classification is made in the most appropriate place in this subclass.
The following are lists of places where there is specific provision of the kind referred to above. Where such provision is at a detailed level, the places have been grouped according to the main groups of this subclass. Where the provision is at a general level (e.g. of a kind appropriate to more than one of the main groups specified in the lists, or to main groups G05D 27/00or G05D 29/00), the places are listed under the title "General References".

Subclass index

1/00 **Control of position, course, altitude, or attitude of land, water, air, or space vehicles, e.g. automatic pilot** (radio navigation systems or analogous systems using other waves G01S)

1/02 . Control of position or course in two dimensions **[2]**

1/03 . . using near-field transmission systems, e.g. inductive-loop type

1/04 . Control of altitude or depth

1/06 . . Rate of change of altitude or depth

1/08 . Control of attitude, i.e. control of roll, pitch, or yaw

1/10 . Simultaneous control of position or course in three dimensions (G05D 1/12 takes precedence)

1/12 . Target-seeking control

3/00 **Control of position or direction** (G05D 1/00 takes precedence; for numerical control G05B 19/18)

3/10 . without using feedback **[3]**

3/12 . using feedback **[3]**

3/14 . . using an analogue comparing device **[3]**

3/16 . . . whose output amplitude can only take a number of discrete values (G05D 3/18 takes precedence) **[3]**

3/18 . . . delivering a series of pulses **[3]**

3/20 . . using a digital comparing device **[3]**

5/00 **Control of dimensions of material**

5/02 . of thickness, e.g. of rolled material

5/03 . . characterised by the use of electric means

5/04 . of the size of items, e.g. of particles

5/06 . . characterised by the use of electric means

7/00 **Control of flow** (level control G05D 9/00; ratio control G05D 11/00; weighing apparatus G01G)

7/01 . without auxiliary power

7/03 . with auxiliary non-electric power **[2]**

7/06 . characterised by the use of electric means

9/00 **Level control, e.g. controlling quantity of material stored in vessel**

9/02 . without auxiliary power

9/04 . with auxiliary non-electric power **[2]**

9/12 . characterised by the use of electric means

11/00 **Ratio control** (control of chemical or physico-chemical variables, e.g. pH-value, G05D 21/00; humidity control G05D 22/00; control of viscosity G05D 24/00) **[3]**

11/02 . Controlling ratio of two or more flows of fluid or fluent material

11/03 . . without auxiliary power

11/035 . . with auxiliary non-electric power **[2]**

11/04 . . . by sensing weight of individual components, e.g. gravimetric procedure

11/06 . . . by sensing density of mixture, e.g. using aerometer

11/08 . . . by sensing concentration of mixture, e.g. by measuring pH-value **[3]**

11/10 . . . . by sensing moisture of non-aqueous liquids

11/12 . . . by sensing viscosity of mixture

11/13 . . characterised by the use of electric means

11/16 . Controlling mixing ratio of fluids having different temperatures, e.g. by sensing the temperature of a mixture of fluids having different viscosities

13/00 **Control of linear speed**; **Control of angular speed**; **Control of acceleration or deceleration, e.g. of a prime mover** (synchronising telegraph receiver and transmitter H04L 7/00)

13/02 . Details

13/04 . . providing for emergency tripping of an engine in case of exceeding maximum speed

13/06 . . providing for damping of erratic vibrations in governors

13/08 . without auxiliary power

13/10 . . Centrifugal governors with fly-weights

13/12 . . . Details

13/14 . . . . Fly-weights; Mountings thereof; Adjusting equipment for limits, e.g. temporarily

13/16 . . . . Risers; Transmission gear therefor; Restoring mechanisms therefor

13/18 . . . counterbalanced by spider springs acting immediately upon the fly-weights

13/20 . . . counterbalanced by spider springs acting upon the articulated riser

13/22 . . . counterbalanced by fluid pressure acting upon the articulated riser

13/24 . . . counterbalanced by two or more different appliances acting simultaneously upon the riser, e.g. with both spring force and fluid pressure, with both spring force and electromagnetic force

13/26 . . . with provision for modulating the degree of non-uniformity of speed

13/28 . . . with provision for performing braking effects in case of increased speed

13/30 . . Governors characterised by fluid features in which the speed of a shaft is converted into fluid pressure (transducers converting variations of physical quantities into fluid-pressure variations F15B 5/00)

13/32 . . . using a pump

13/34 . with auxiliary non-electric power (fluid-pressure converters F15B 3/00) **[2]**

13/36 . . using regulating devices with proportional band, i.e. P. regulating devices

13/38 . . . involving centrifugal governors of fly-weight type

13/40 . . . involving centrifugal governors of pump type

13/42 . . . involving fluid governors of flow-controller type, i.e. the width of liquid flow being controlled by fly-weights

13/44 . . . involving fluid governors of jet type

13/46 . . using regulating devices with proportional band and integral action, i.e. P.I. regulating devices

13/48 . . . involving resilient restoring mechanisms

13/50 . . . involving connecting means for superimposing a proportional regulating device and an integral regulating device

13/52 . . using regulating devices with proportional band and derivative action, i.e. P.D. regulating devices

13/54 . . . involving centrifugal governors of fly-weight type exerting an acceleratory effect

13/56 . . . involving restoring mechanisms exerting a delay effect

13/58 . . . involving means for connecting a speed-regulating device and an acceleration-regulating device

13/60 . . using regulating devices with proportional band, derivative, and integral action, i.e. P.I.D. regulating devices

13/62 . characterised by the use of electric means, e.g. use of a tachometric dynamo, use of a transducer converting an electric value into a displacement

13/64 . Compensating the speed difference between engines meshing by a differential gearing or the speed difference between a controlling shaft and a controlled shaft

13/66 . Governor units providing for co-operation with control dependent upon a variable other than speed

15/00 Control of mechanical force or stress; **Control of mechanical pressure**

15/01 . characterised by the use of electric means

16/00 Control of fluid pressure

16/02 . Modifications to reduce the effects of instability, e.g. due to vibrations, friction, abnormal temperature, overloading, unbalance (vibration-dampers F16F 7/00)

16/04 . without auxiliary power

16/06 . . the sensing element being a flexible member yielding to pressure, e.g. diaphragm, bellows, capsule

16/08 . . . Control of liquid pressure

16/10 . . the sensing element being a piston or plunger

16/12 . . the sensing element being a float

16/14 . with auxiliary non-electric power **[2]**

16/16 . . derived from the controlled fluid

16/18 . . derived from an external source

16/20 . characterised by the use of electric means

17/00 Control of torque; **Control of mechanical power**

17/02 . characterised by the use of electric means

19/00 Control of mechanical oscillations, e.g. of amplitude, of frequency, of phase

19/02 . characterised by the use of electric means

21/00 Control of chemical or physico-chemical variables, e.g. pH-value [3]

21/02 . characterised by the use of electric means

22/00 Control of humidity [2]

22/02 . characterised by the use of electric means

23/00 Control of temperature (automatic switching arrangements for electric heating apparatus H05B 1/02)

23/01 . without auxiliary power

23/02 . . with sensing element expanding and contracting in response to changes of temperature (G05D 23/13 takes precedence)

23/08 . . . with bimetallic element (arrangement of valves and flow lines specially adapted for mixing fluid F16K 11/00)

23/10 . . . . with snap-action elements (for valves F16K 31/56)

23/12 . . with sensing element responsive to pressure or volume changes in a confined fluid

23/13 . . by varying the mixing ratio of two fluids having different temperatures

23/185 . with auxiliary non-electric power **[2]**

23/19 . characterised by the use of electric means

23/20 . . with sensing elements having variation of electric or magnetic properties with change of temperature (G05D 23/13 takes precedence)

23/22 . . . the sensing element being a thermocouple

23/24 . . . the sensing element having a resistance varying with temperature, e.g. thermistor

23/26 . . . the sensing element having a permeability varying with temperature

23/27 . . with sensing element responsive to radiation

23/275 . . with sensing element expanding, contracting, or fusing in response to changes of temperature

23/30 . . Automatic controllers with an auxiliary heating device affecting the sensing element, e.g. for anticipating change of temperature (automatic controllers in general and not restricted to control of temperature G05B)

23/32 . . . with provision for adjustment of the effect of the auxiliary heating device, e.g. as a function of time

24/00 Control of viscosity

24/02 . characterised by the use of electric means

25/00 Control of light, e.g. intensity, colour, phase (mechanically operable parts of lighting devices for the control of light F21V; optical devices or arrangements using movable or deformable elements for controlling light independent of the light source G02B 26/00; devices or arrangements, the optical operation of which is modified by changing the optical properties of the medium of the devices or arrangements for the control of light, circuit arrangements specially adapted therefor, control of light by electro-magnetic waves, electrons or other elementary particles G02F 1/00) **[4]**

25/02 . characterised by the use of electric means

27/00 Simultaneous control of variables covered by two or more of main groups G05D 1/00 to G05D 25/00

27/02 . characterised by the use of electric means

29/00 Simultaneous control of electric and non-electric variables

99/00 Subject matter not provided for in other groups of this subclass [8]

G05F **SYSTEMS FOR REGULATING ELECTRIC OR MAGNETIC VARIABLES** (regulating the timing or recurrence frequency of pulses in radar or radio navigation systems G01S; regulation of current or voltage, specially adapted for use in electronic time-pieces G04G 19/02; closed-loop systems for regulating non-electric variables by electric means G05D; regulating power supply of digital computers G06F 1/26; for obtaining desired operating characteristics of electromagnets with armatures H01F 7/18; regulating electric power distribution networks H02J; regulating the charging of batteries H02J 7/00; regulating of the output of static converters, e.g. switching regulators, H02M; regulation of the output of electric generators H02N, H02P 9/00; controlling transformers, reactors or choke coils H02P 13/00; regulating frequency response, gain, maximum output, amplitude or bandwidth of amplifiers H03G; regulating tuning of resonant circuits H03J; controlling generators of electronic oscillations or pulses H03L; regulating characteristics of transmission lines H04B; controlling electric light sources H05B 37/02, H05B 39/04, H05B 41/36; electric control of X-ray apparatus H05G 1/30) **[4,5]**

(1) This subclass covers:
- systems only;
- use of hydraulic, pneumatic, mechanical, and electrical motors for varying electric characteristics of devices which restore the quantity regulated;
- the combination of static converters and current or voltage regulators, if the essential characteristic resides in the combination. **[4]**

(2) This subclass does not cover elements per se, which are covered by the relevant subclasses.

1/00 **Automatic systems in which deviations of an electric quantity from one or more predetermined values are detected at the output of the system and fed back to a device within the system to restore the detected quantity to its predetermined value or values, i.e. retroactive systems**

1/02 . Regulating electric characteristics of arcs (arrangements for feeding or moving of electrodes for spot or seam welding or cutting B23K 9/12; arrangements for feeding electrodes for electric heating or electric lighting H05B 7/109, H05B 31/18; automatic control of power for heating by discharge H05B 7/148) **[2]**

1/04 . . by means of saturable magnetic devices

1/06 . . by means of discharge tubes

1/08 . . by means of semiconductor devices

1/10 . Regulating voltage or current (G05F 1/02 takes precedence; for electric railways B60M 3/02)

1/12 . . wherein the variable is actually regulated by the final control device is ac (G05F 1/625 takes precedence) **[4]**

1/13 . . . using ferroresonant transformers as final control devices **[4]**

1/14 . . . using tap transformers or tap changing inductors as final control devices **[4]**

1/147 . . . . with motor driven tap switch **[4]**

1/153 . . . . . controlled by discharge tubes or semiconductor devices **[4]**

1/16 . . . . combined with discharge tubes or semiconductor devices

1/20 . . . . . semiconductor devices only

1/22 . . . . combined with separate magnetic control devices having a controllable degree of saturation

1/24 . . . using bucking or boosting transformers as final control devices

1/247 . . . . with motor in control circuit **[4]**

1/253 . . . . the transformers including plural windings in series between source and load (G05F 1/247 takes precedence) **[4]**

1/26 . . . . combined with discharge tubes or semiconductor devices

1/30 . . . . . semiconductor devices only

1/32 . . . using magnetic devices having a controllable degree of saturation as final control devices

1/325 . . . . with specific core structure, e.g. gap, aperture, slot, permanent magnet **[4]**

1/33 . . . . with plural windings through which current to be controlled is conducted **[4]**

1/335 . . . . . on different cores **[4]**

1/34 . . . . combined with discharge tubes or semiconductor devices

1/38 . . . . . semiconductor devices only

1/40 . . . using discharge tubes or semiconductor devices as final control devices

1/42 . . . . discharge tubes only

1/44 . . . . semiconductor devices only

1/445 . . . . . being transistors in series with the load **[3]**

1/45 . . . . . being controlled rectifiers in series with the load **[3]**

1/455 . . . . . with phase control **[3]**

1/46 . . wherein the variable actually regulated by the final control device is dc (G05F 1/625 takes precedence) **[4]**

1/52 . . . using discharge tubes in series with the load as final control devices

1/54 . . . . additionally controlled by the unregulated supply

1/56 . . . using semiconductor devices in series with the load as final control devices

1/563 . . . . including two stages of regulation, at least one of which is output level responsive, e.g. coarse and fine regulation **[4]**

1/565 . . . . sensing a condition of the system or its load in addition to means responsive to deviations in the output of the system, e.g. current, voltage, power factor (G05F 1/563 takes precedence) **[4]**

1/567 . . . . . for temperature compensation **[4]**

1/569 . . . . . for protection **[4]**

1/571 . . . . . with overvoltage detector **[4]**

1/573 . . . . . with overcurrent detector **[4]**

1/575 . . . . characterised by the feedback circuit **[4]**

1/577 . . . . for plural loads **[4]**

1/585 . . . . . providing voltages of opposite polarities **[4]**

1/59 . . . . including plural semiconductor devices as final control devices for a single load **[4]**

1/595 . . . . . semiconductor devices connected in series **[4]**
1/607 . . . using discharge tubes in parallel with the load as final control devices **[3]**
1/61 . . . . including two stages of regulation, at least one of which is output level responsive **[4]**
1/613 . . . using semiconductor devices in parallel with the load as final control devices **[3]**
1/614 . . . . including two stages of regulation, at least one of which is output level responsive **[4]**
1/618 . . . using semiconductor devices in series and in parallel with the load as final control devices **[4]**
1/62 . . . using bucking or boosting dc sources
1/625 . . wherein it is irrelevant whether the variable actually regulated is ac or dc **[4]**
1/63 . . . using variable impedances in series with the load as final control devices **[4]**
1/635 . . . . being Hall effect devices, magnetoresistors or thermistors **[4]**
1/644 . . . . being pressure-sensitive resistors **[4]**
1/648 . . . . being plural resistors among which a selection is made **[4]**
1/652 . . . using variable impedances in parallel with the load as final control devices **[4]**
1/656 . . . using variable impedances in series and in parallel with the load as final control devices **[4]**
1/66 . Regulating electric power
1/67 . . to the maximum power available from a generator, e.g. from solar cell **[4]**
1/70 . Regulating power factor; Regulating reactive current or power **[3]**

3/00 Non-retroactive systems for regulating electric variables by using an uncontrolled element, or an uncontrolled combination of elements, such element or such combination having self-regulating properties

3/02 . Regulating voltage or current
3/04 . . wherein the variable is ac
3/06 . . . using combinations of saturated and unsaturated inductive devices, e g. combined with resonant circuit
3/08 . . wherein the variable is dc
3/10 . . . using uncontrolled devices with non-linear characteristics **[4]**
3/12 . . . . being glow discharge tubes
3/16 . . . . being semiconductor devices **[3]**
3/18 . . . . . using Zener diodes **[3]**
3/20 . . . . . using diode-transistor combinations (G05F 3/18 takes precedence) **[3]**
3/22 . . . . . wherein the transistors are of the bipolar type only (G05F 3/26, G05F 3/30 take precedence) **[4]**
3/24 . . . . . wherein the transistors are of the field-effect type only (G05F 3/26, G05F 3/30 take precedence) **[4]**
3/26 . . . . . Current mirrors **[4]**
3/28 . . . . . combined with a non-linear current amplifier **[4]**
3/30 . . . . . Regulators using the difference between the base-emitter voltages of two bipolar transistors operating at different current densities (G05F 3/26 takes precedence) **[4]**

5/00 Systems for regulating electric variables by detecting deviations in the electric input to the system and thereby controlling a device within the system to obtain a regulated output

5/02 . Phase controlled switching using electronic tubes or three or more terminal semiconductive devices **[4]**
5/04 . using a transformer or inductor as the final control device **[4]**
5/06 . . saturable **[4]**
5/08 . using a linearly acting final control device **[4]**

7/00 Regulating magnetic variables (details of apparatus for measuring magnetic variables involving magnetic resonance G01R 33/28) **[5]**

G05G CONTROL DEVICES OR SYSTEMS INSOFAR AS CHARACTERISED BY MECHANICAL FEATURES ONLY (“Bowden” or like mechanisms F16C 1/10; gearings or mechanisms not peculiar to this purpose F16H; speed changing or reversing mechanisms for gearings conveying rotary motion F16H 59/00 to F16H 63/00)

(1) This subclass covers:
– members of general applicability for mechanical control;
– mechanical systems for moving members to one or more definite settings.

(2) Systems peculiar to the control of particular machines or apparatus provided for in a single other class are classified in the relevant class for such machines or apparatus, for example:

A61G	13/02	Controls for adjusting operating tables
A61G	15/02	Controls for adjusting operating chairs
A63F	13/02	Accessories for games using an electronically generated display
B25J		Manipulators, e.g. controls therefor
B60K	26/00	Arrangement or mounting of propulsion-unit control devices in vehicles
B60T	7/00	Vehicle brake-action initiating means
B62D	33/073	Adaptations of control devices for movable vehicle cabs
B62K	21/00	Cycle-steering devices
B62K	23/00	Rider-operated controls specially adapted for cycles
B62L	3/00	Brake-actuating mechanisms specially adapted for cycles
B63H	25/02	Marine steering initiating means
B66B	1/00	Controls for elevators
B66C	13/18	Control systems or devices for cranes
B66C	13/56	Arrangements of handles or pedals for crane operation

E02F	9/20		Control devices for dredging or soil shifting machines
F16C	3/28		Adjustable cranks or eccentrics
F16D	43/00		Automatic clutches
F16K	31/00,		Controls for valves
F16K	33/00		
F16P	3/00		Safety devices acting in conjunction with the control or operation of a machine
F16P	7/02		Stopping machines on occurrence of dangerous conditions therein
G02B	21/32		Micromanipulators structurally combined with microscopes
G04B	1/00	to	Driving mechanisms in clocks or watches
G04B	18/00		
G06C			Digital computers in which all the computation is effected mechanically
G06F	3/01		Manual computer input arrangements
G06K	11/00		Converting a pattern of mechanical parameters into electric signals
G21C	7/08		Displacement of solid control elements in nuclear reactors
H01H			Mechanisms for operating switch contacts
H03J	1/00		Mechanical control of resonant circuits.

Subclass index

1/00 **Controlling members, e.g. knobs or handles**; **Assemblies or arrangements thereof**; **Indicating position of controlling members** (joysticks G05G 9/04; steering wheels for motor vehicles B62D)

Note

In this group the first place priority rule is applied, i.e. at each hierarchical level classification is made in the first appropriate place. **[2008.04]**

1/01 . Arrangements of two or more controlling members with respect to one another (double foot control, e.g. for instruction vehicles G05G 1/34; mounting units comprising an assembly with two or more pedals G05G 1/36) **[2008.04]**

1/015 . Arrangements for indicating the position of a controlling member (means for continuously detecting pedal position G05G 1/38; means for detecting position through tactile feedback G05G 5/03) **[2008.04]**

1/02 . Controlling members for hand-actuation by linear movement, e.g. push buttons **[1,7]**

1/04 . Controlling members for hand-actuation by pivoting movement, e.g. levers **[1,7]**

1/06 . . Details of their grip parts **[1,7]**

1/08 . Controlling members for hand-actuation by rotary movement, e.g. hand wheels **[1,7]**

1/10 . . Details, e.g. of discs, knobs, wheels or handles

1/12 . . . Means for securing the members on rotatable spindles or the like

1/30 . Controlling members actuated by foot **[2008.04]**

1/32 . . with means to prevent injury **[2008.04]**

1/323 . . . means disconnecting the connection between pedal and controlled member, e.g. by breaking or bending the connecting rod **[2008.04]**

1/327 . . . means disconnecting the pedal from its hinge or support, e.g. by breaking or bending the support **[2008.04]**

1/34 . . Double foot controls, e.g. for instruction vehicles **[2008.04]**

1/36 . . Mounting units comprising an assembly of two or more pedals, e.g. for facilitating mounting **[2008.04]**

1/38 . . comprising means to continuously detect pedal position **[2008.04]**

1/40 . . adjustable **[2008.04]**

1/405 . . . infinitely adjustable **[2008.04]**

1/42 . . non-pivoting, e.g. sliding **[2008.04]**

1/44 . . pivoting **[2008.04]**

1/445 . . . about a central fulcrum **[2008.04]**

1/46 . . Means, e.g. links, for connecting the pedal to the controlled unit **[2008.04]**

1/48 . . Non-slip pedal treads; Pedal extensions or attachments characterised by mechanical features only **[2008.04]**

1/483 . . . Non-slip treads **[2008.04]**

1/487 . . . Pedal extensions **[2008.04]**

1/50 . . Manufacturing of pedals; Pedals characterised by the material used **[2008.04]**

1/52 . Controlling members specially adapted for actuation by other parts of the human body than hand or foot **[2008.04]**

1/54 . Controlling members specially adapted for actuation by auxiliary operating members or extensions; Operating members or extensions therefor (pedal extensions G05G 1/487) **[2008.04]**

1/56 . . Controlling members specially adapted for actuation by keys, screwdrivers or like tools **[2008.04]**

1/58 . Rests or guides for relevant parts of the operator's body **[2008.04]**

1/60 . . Foot rests or foot guides **[2008.04]**

1/62 . . Arm rests **[2008.04]**

3/00 **Controlled members** (gear shifter yokes F16H 63/32); **Assemblies or arrangements thereof** (interlocking of controlled members G05G 5/08) **[1,7]**

5/00 **Means for preventing, limiting or returning the movements of parts of a control mechanism, e.g. locking controlling member** (G05G 17/00 takes precedence) **[5]**

5/02 . Means preventing undesired movements of a controlling member which can be moved in two or more separate steps or ways, e.g. restricting to a stepwise movement or to a particular sequence of movements (G05G 5/28 takes precedence)

5/03 . Means for enhancing the operator's awareness of the arrival of the controlling member at a command or datum position; Providing feel, e.g. means for creating a counterforce (arrangements for indicating the position of the controlling member G05G 1/015) **[5,2008.04]**

5/04 . Stops for limiting movement of members, e.g. adjustable stop (G05G 5/03, G05G 5/05, G05G 5/28 take precedence) **[5]**

5/05 . Means for returning or tending to return controlling members to an inoperative or neutral position, e.g. by providing return springs or resilient end-stops (G05G 5/28 takes precedence) **[5]**

5/06 . for holding members in one or a limited number of definite positions only (G05G 5/03, G05G 5/05, G05G 5/28 take precedence) **[5]**

5/08 . . Interlocking of members, e.g. locking a member in a particular position before or during the movement of another member

5/12 . for holding members in an indefinite number of positions, e.g. by a toothed quadrant (G05G 5/28 takes precedence) **[5]**

5/14 . . by locking a member with respect to a fixed quadrant, rod, or the like

5/16 . . . by friction

5/18 . . . by positive interengagement, e.g. by a pawl

5/20 . . by locking a quadrant, rod, or the like carried by the member

5/22 . . . by friction

5/24 . . . by positive interengagement, e.g. by a pawl

5/26 . . by other means than a quadrant, rod, or the like

5/28 . for preventing unauthorised access to the controlling member or its movement to a command position **[5]**

7/00 **Manually-actuated control mechanisms provided with one single controlling member co-operating with one single controlled member**; **Details thereof** (controlling members G05G 1/00)

7/02 . characterised by special provisions for conveying or converting motion, or for acting at a distance

7/04 . . altering the ratio of motion or force between controlling member and controlled member as a function of the position of the controlling member

7/06 . . in which repeated movement of the controlling member produces increments of movement of the controlled member (G05G 7/08 takes precedence)

7/08 . . in which repeated movement of the controlling member moves the controlled member through a cycle of distinct positions

7/10 . . specially adapted for remote control (G05G 7/04 to G05G 7/08 take precedence)

7/12 . specially adapted for actuating a member on a system in motion with respect to the controlling member, e.g. on a rotating shaft

7/14 . characterised by means for delaying initiation of, or making more gradual throughout, the movement of the controlled member in response to a given input from the controlling member, e.g. by providing lost motion in the command train

7/16 . Special provisions for reducing the effect of slight relative movement between supports of the mechanism, e.g. resulting from resilient mounting of a controlled mechanism

9/00 **Manually-actuated control mechanisms provided with one single controlling member co-operating with two or more controlled members, e.g. selectively, simultaneously**

9/02 . the controlling member being movable in different independent ways, movement in each individual way actuating one controlled member only

9/04 . . in which movement in two or more ways can occur simultaneously

9/047 . . . the controlling member being movable by hand about orthogonal axes, e.g. joysticks **[5]**

9/053 . . . . the controlling member comprising a ball **[5]**

9/06 . the controlled members being actuated successively by repeated movement of the controlling member

9/08 . the controlled members being actuated successively by progressive movement of the controlling member

9/10 . with preselection and subsequent movement of each controlled member by movement of the controlling member in two different ways, e.g. guided by a shift gate

11/00 **Manually-actuated control mechanisms provided with two or more controlling members co-operating with one single controlled member**

13/00 **Manually-actuated control mechanisms provided with two or more controlling members and also two or more controlled members** (interlocking G05G 5/08)

13/02 . with separate controlling members for preselection and shifting of controlled members

15/00 **Mechanical devices for initiating a movement automatically due to a specific cause**

15/02 . due to alteration of the sense of movement of a member

15/04 . due to distance or angle travelled by a member

15/06 . due to the speed of rotation or of bodily movement of a member, e.g. passing an upper or lower limit thereof (speedometers G01P)

15/08 . due to the load or torque on a member, e.g. if exceeding a predetermined value thereof

17/00 **Mechanical devices for moving a member after being released**; **Trip or release mechanisms characterised thereby**

19/00 **Servo-mechanisms with follow-up action, e.g. occurring in steps**

21/00 **Mechanical apparatus for control of a series of operations, i.e. programme control, e.g. involving a set of cams** (G05G 5/02 takes precedence)

23/00 **Means for ensuring the correct positioning of parts of control mechanisms, e.g. for taking-up play**

23/02 . self-adjusting

25/00 **Other details, features or accessories of control mechanisms, e.g. supporting intermediate members elastically**

25/02 . Inhibiting the generation or transmission of noise **[5]**

25/04 . Sealing against entry of dust, weather or the like **[5]**

G06 COMPUTING; CALCULATING; COUNTING

(1) This class covers :
- simulators which are concerned with the mathematics of computing the existing or anticipated conditions within the real device or system;
- simulators which demonstrate, by means involving computing, the function of apparatus or of a system, if no provision exists elsewhere;
- image data processing or generation.

(2) This class does not cover :
- *combinations of writing implements with computing devices, which are covered by group B43K 29/08;* **[2011.01]**
- control functions derived from simulators, in general, which are covered by class G05, although such functions may be covered by the subclass of this class for the device controlled;
- measurement or analysis of an individual variable to serve as an input to a simulator, which is covered by class G01;
- simulators regarded as teaching or training devices which is the case if they give perceptible sensations having a likeness to the sensations a student would experience in reality in response to actions taken by him. Such simulators are covered by class G09;
- components of simulators, if identical with real devices or machines, which are covered by the relevant subclass for these devices or machines (and not by class G09).

(3) In this class, the following terms or expressions are used with the meanings indicated:
- "data" is used as the synonym of "information". Therefore, the term "information" is not used in subclasses G06C, G06For G06Q;
- "calculating or computing" includes, inter alia, operations on numerical values and on data expressed in numerical form. Of these terms "computing" is used throughout the class;
- "computation" is derived from this interpretation of "computing". In the French language the term "calcul" will serve for either term;
- "simulator" is a device which may use the same time scale as the real device or operate on an expanded or compressed time scale. In interpreting this term models of real devices to reduced or expanded scales are not regarded as simulators;
- "record carrier" means a body, such as a cylinder, disc, card, tape, or wire, capable of permanently holding information, which can be read-off by a sensing element movable relative to the recorded information.

(4) Attention is drawn to the Notes following the title of section G, especially as regards the definition of the term "variable".

G06C DIGITAL COMPUTERS IN WHICH ALL THE COMPUTATION IS EFFECTED MECHANICALLY (score computers for card games A63F 1/18; construction of keys, printing mechanisms, or other parts of general application to the typewriting or printing art B41; keys or printing mechanisms for special applications, see the relevant subclass, e.g. G05G, G06K; cash registers G07G 1/00) **[4]**

Note

This subclass does not cover details of mechanisms covered by main groups G06C 9/00, G06C 11/00 or G06C 15/00, which are applicable to mechanical counters driven only through the lowest denomination. Such details are covered by subclass G06M.

Subclass index

1/00 Computing aids in which the computing members form at least part of the displayed result and are manipulated directly by hand, e.g. abacus, pocket adding device

3/00 Arrangements for table look-up, e.g. menstruation table

5/00 Non-functional elements

5/02 . Housings; Frameworks

7/00 Input mechanisms (pin carriage G06C 13/02)

7/02 . Keyboards

7/04 . . Interlocking devices, e.g. between keys (interlocking devices covered by this subclass, in general G06C 25/00)

7/06 . . with one set of keys for each denomination

7/08 . . with one set of keys for all denominations, e.g. ten-key board

7/09 . Transfer of data from record carrier to computing mechanisms (sensing record carriers G06K 7/00)
7/10 . Transfer mechanisms, e.g. transfer of a figure from a ten-key keyboard into the pin carriage
7/12 . Resetting devices, e.g. for the keyboard

9/00 Transfer mechanisms, e.g. for transmitting figures from the input mechanism into the computing mechanism (G06C 7/10, G06C 11/00, G06C 15/00 take precedence)
9/02 . Back-transfer arrangements, e.g. to transfer a value accumulated in a register back into the selection mechanism

11/00 Output mechanisms (marking record carriers in general, visual presentation in general of results of the mathematical operations G06K)
11/02 . with visual indication, e.g. counter drum
11/04 . with printing mechanisms, e.g. for character-at-a-time or line-at-a-time printing
11/06 . . having type hammers
11/08 . with punching mechanism
11/10 . Arrangements for feeding single sheets or continuous web or tape, e.g. ejection device (conveying record carriers G06K 13/00); Line-spacing devices
11/12 . . for feeding tape

13/00 Storage mechanisms (mechanical counters with input only to the lowest order G06M; information storage in general G11)
13/02 . Operand stores, e.g. pin carriage (input mechanisms G06C 7/00)
13/04 . Print buffer stores

15/00 Computing mechanisms; **Actuating devices therefor** (mechanisms for operating automatically upon more than two numbers otherwise than by repeated addition or subtraction G06C 21/00)
15/02 . operating on the binary scale

Note

Group G06C 15/02 takes precedence over groups G06C 15/04 to G06C 15/42.

15/04 . Adding or subtracting devices (G06C 15/08 takes precedence)
15/06 . . having balance totalising; Obtaining sub-total
15/08 . Multiplying or dividing devices; Devices for computing the exponent or root
15/10 . . having more than one denominational set of keys operating directly on computing mechanism
15/12 . . having pin carriage
15/14 . . having pin wheel, e.g. Odhner type
15/16 . . having stepped-toothed actuating drums, e.g. Thomas type
15/18 . . having multiplication table for forming partial products
15/20 . . adapted for short-cut multiplication or division **[2]**
15/22 . Arrangements for two or more computing devices; Arrangements for subdivision into two or more computing mechanisms, e.g. splitting
15/24 . Devices for counting the cycles of operation in division or multiplication (item-counting devices G06C 25/02)
15/26 . Devices for transfer between orders, e.g. tens-transfer device
15/28 . . where transfer is effected in one step
15/30 . . where transfer is effected in two steps
15/32 . . . with provision for simultaneous transfer between all orders
15/34 . . where transfer is effected by planet gear, i.e. crawl type
15/36 . . . with aligning means
15/38 . . for pin-wheel computing mechanisms
15/40 . . for stepped-toothed-drum computing mechanism
15/42 . Devices for resetting to zero or other datum
15/44 . Devices for comparing numerical values, e.g. zero check
15/46 . Arrangements for rounding-off
15/48 . Arrangements for selection of one out of several counting registers (arrangements for controlling subsequent operating functions G06C 21/04; item counters G06C 25/02)

17/00 Mechanisms for converting from one notational system to another, i.e. radix conversion

19/00 Decimal-point mechanisms; **Analogous mechanisms for non-decimal notations**
19/02 . Devices for indicating the point
19/04 . Devices for printing the point

21/00 Programming-mechanisms for determining the steps to be performed by the computing machine, e.g. when a key or certain keys are depressed (mechanisms merely for producing multiplication by repeated addition G06C 15/08)
21/02 . in which the operation of the mechanism is determined by the position of the carriage
21/04 . Conditional arrangements for controlling subsequent operating functions, e.g. control arrangement triggered by a function key and depending on the condition of the register (arrangements for selection of one out of several counting registers G06C 15/48)

23/00 Driving mechanisms for functional elements

Note

Group G06C 23/08 takes precedence over groups G06C 23/02 to G06C 23/06.

23/02 . of main shaft
23/04 . of pin carriage, e.g. for step-by-step movement
23/06 . of tabulation devices, e.g. of carriage skip
23/08 . Hydraulic or pneumatic actuation

25/00 Auxiliary functional arrangements, e.g. interlocks (interlocks in keyboards G06C 7/04) **[2]**
25/02 . Item-counting devices (devices for counting the cycles of operation in division or multiplication G06C 15/24)

27/00 Computing machines characterised by the structural interrelation of their functional units, e.g. invoicing machines

29/00 Combinations of computing machines with other machines, e.g. with typewriter, with money-changing apparatus

G06D DIGITAL FLUID-PRESSURE COMPUTING DEVICES

Note

This subclass covers all devices in which at least one computing function is performed by hydraulic or pneumatic means.

1/00 **Details, e.g. functional units** (individual logic elements F15C; valves F16K)
1/02 . having at least one moving part, e.g. spool valve
1/04 . . Adding; Subtracting
1/06 . . Multiplying; Dividing
1/08 . having no moving parts
1/10 . . Adding; Subtracting
1/12 . . Multiplying; Dividing

3/00 **Computing devices characterised by the interrelationship of the functional units and having at least one moving part**

5/00 **Computing devices characterised by the interrelationship of the functional units and having no moving parts**

7/00 **Computing devices characterised by the combination of hydraulic or pneumatic functional elements with at least one other type of functional element**

G06E OPTICAL COMPUTING DEVICES (optical logic elements per se G02F 3/00; computer systems based on specific computational models G06N; digital storage using optical elements G11C 13/04) **[5]**

(1) This subclass covers all devices in which at least one computing function is performed by optical means. **[5]**
(2) If other aspects, for example mechanical, fluid pressure or electrical computing, are of interest, classification is also made in the relevant subclass for such aspects. **[5]**

1/00 **Devices for processing exclusively digital data [5]**
1/02 . operating upon the order or content of the data handled **[5]**
1/04 . . for performing computations using exclusively denominational number representation, e.g. using binary, ternary, decimal representation **[5]**
1/06 . . for performing computations using a digital non-denominational number representation, i.e. number representation without radix; using combinations of denominational and non-denominational number representations **[5]**

3/00 **Devices not provided for in group G06E 1/00, e.g. for processing analogue or hybrid data [5]**

G06F ELECTRIC DIGITAL DATA PROCESSING (computers in which a part of the computation is effected hydraulically or pneumatically G06D, optically G06E; computer systems based on specific computational models G06N; impedance networks using digital techniques H03H)

Note

In this subclass, the following terms or expressions are used with the meaning indicated:
– "handling" includes processing or transporting of data;
– "data processing equipment" means an association of an electric digital data processor classifiable under group G06F 7/00, with one or more arrangements classifiable under groups G06F 1/00 to G06F 5/00 and G06F 9/00 to G06F 13/00.

Subclass index

1/00 **Details not covered by groups G06F 3/00 to G06F 13/00 and G06F 21/00** (architectures of general purpose stored programme computers G06F 15/76) **[1,8]**

1/02 . Digital function generators

1/025 . . for functions having two-valued amplitude, e.g. Walsh functions **[5]**

1/03 . . working, at least partly, by table look-up (G06F 1/025 takes precedence) **[5]**

Note

In order to be classified in this group, the table must contain function values of the desired or an intermediate function, not merely coefficients. **[5]**

1/035 . . . Reduction of table size **[5]**

1/04 . Generating or distributing clock signals or signals derived directly therefrom

1/06 . . Clock generators producing several clock signals **[5]**

1/08 . . Clock generators with changeable or programmable clock frequency **[5]**

1/10 . . Distribution of clock signals **[5]**

1/12 . . Synchronisation of different clock signals **[5]**

1/14 . . Time supervision arrangements, e.g. real time clock **[5]**

1/16 . Constructional details or arrangements (instrument details G12B) **[5]**

1/18 . . Packaging or power distribution **[5]**

1/20 . . Cooling means **[5]**

1/22 . Means for limiting or controlling the pin/gate ratio **[5]**

1/24 . Resetting means (micro-programme loading G06F 9/24; restoration from data faults G06F 11/00) **[5]**

1/26 . Power supply means, e.g. regulation thereof (for memories G11C) **[5]**

1/28 . . Supervision thereof, e.g. detecting power-supply failure by out of limits supervision **[5]**

1/30 . . Means for acting in the event of power-supply failure or interruption, e.g. power-supply fluctuations (for resetting only G06F 1/24; involving the processing of data-words G06F 11/00) **[5]**

1/32 . . Means for saving power **[5]**

3/00 **Input arrangements for transferring data to be processed into a form capable of being handled by the computer**; **Output arrangements for transferring data from processing unit to output unit, e.g. interface arrangements** (typewriters B41J; conversion of physical variables F15B 5/00, G01; image acquisition G06T 1/00, G06T 9/00; coding, decoding or code conversion, in general H03M; transmission of digital information H04L) **[4]**

3/01 . Input arrangements or combined input and output arrangements for interaction between user and computer (G06F 3/16 takes precedence) **[8]**

3/02 . . Input arrangements using manually operated switches, e.g. using keyboards or dials (keyboard switches per se H01H 13/70; electronic switches characterised by the way in which the control signals are generated H03K 17/94) **[3,8]**

3/023 . . . Arrangements for converting discrete items of information into a coded form, e.g. arrangements for interpreting keyboard generated codes as alphanumeric codes, operand codes or instruction codes (coding in connection with keyboards or like devices in general H03M 11/00) **[3,8]**

3/027 . . . . for insertion of the decimal point **[3,8]**

3/03 . . Arrangements for converting the position or the displacement of a member into a coded form **[3,8]**

Note

In this group, the first place priority rule is applied, i.e. at each hierarchical level, classification is made in the first appropriate place. **[8]**

3/033 . . . Pointing devices displaced or positioned by the user, e.g. mice, trackballs, pens or joysticks; Accessories therefor **[3,8]**

3/037 . . . . using the raster scan of a cathode-ray tube (CRT) for detecting the position of the member, e.g. light pens cooperating with CRT monitors **[3,8]**

3/038 . . . . Control and interface arrangements therefor, e.g. drivers or device-embedded control circuitry **[8]**

3/039 . . . . Accessories therefor, e.g. mouse pads (furniture aspects A47B 21/00) **[8]**

3/041 . . . Digitisers, e.g. for touch screens or touch pads, characterised by the transducing means **[8]**

3/042 . . . . by opto-electronic means **[8]**

3/043 . . . . using propagating acoustic waves **[8]**

3/044 . . . . by capacitive means **[8]**

3/045 . . . . using resistive elements, e.g. a single continuous surface or two parallel surfaces put in contact **[8]**

3/046 . . . . by electromagnetic means **[8]**

3/047 . . . . using sets of wires, e.g. crossed wires **[8]**

3/048 . . Interaction techniques for graphical user interfaces, e.g. interaction with windows, icons or menus **[8]**

3/05 . Digital input using the sampling of an analogue quantity at regular intervals of time (sample-and-hold arrangements G11C 27/02; sampling per se H03K 17/00; analogue/digital conversion, in general H03M 1/00)

3/06 . Digital input from, or digital output to, record carriers

3/08 . . from or to individual record carriers, e.g. punched card

3/09 . Digital output to typewriters **[3]**

3/12 . Digital output to print unit (digital output to typewriter G06F 3/09; arrangements for producing a permanent visual presentation of the output data using printers G06K 15/02)

3/13 . Digital output to plotter (arrangements for producing a permanent visual presentation of the output data using plotters G06K 15/22) **[3]**

3/14 . Digital output to display device (arrangements for producing a permanent visual presentation of the output data G06K 15/00; control of display in general G09G)

3/147 . . using display panels **[3]**

3/153 . . using cathode-ray tubes **[3]**

3/16 . Sound input; Sound output (conversion of speech into digital information or vice versa G10L)

3/18 . Digital input from automatic curve follower (automatic curve followers per se G06K 11/02) **[3]**

5/00 Methods or arrangements for data conversion without changing the order or content of the data handled (coding, decoding or code conversion, in general H03M) **[4]**

5/01 . for shifting, e.g. justifying, scaling, normalising **[5]**

5/06 . for changing the speed of data flow, i.e. speed regularising

5/08 . . having a sequence of storage locations, the intermediate ones not being accessible for either enqueue or dequeue operations, e.g. using a shift register **[8]**

5/10 . . having a sequence of storage locations each being individually accessible for both enqueue and dequeue operations, e.g. using random access memory **[8]**

5/12 . . . Means for monitoring the fill level; Means for resolving contention, i.e. conflicts between simultaneous enqueue and dequeue operations **[8]**

5/14 . . . . for overflow or underflow handling, e.g. full or empty flags **[8]**

5/16 . . Multiplexed systems, i.e. using two or more similar devices which are alternately accessed for enqueue and dequeue operations, e.g. ping-pong buffers **[8]**

7/00 Methods or arrangements for processing data by operating upon the order or content of the data handled (logic circuits H03K 19/00)

7/02 . Comparing digital values (G06F 7/06, G06F 7/38 take precedence; information retrieval G06F 17/30; comparing pulses H03K 5/22)

7/04 . . Identity comparison, i.e. for like or unlike values

7/06 . Arrangements for sorting, selecting, merging, or comparing data on individual record carriers (sorting of postal letters B07C; conveying record carriers from one station to another G06K 13/02)

7/08 . . Sorting, i.e. grouping record carriers in numerical or other ordered sequence according to the classification of at least some of the information they carry (by merging two or more sets of carriers in ordered sequence G06F 7/16)

7/10 . . Selecting, i.e. obtaining data of one kind from those record carriers which are identifiable by data of a second kind from a mass of ordered or randomly-distributed record carriers

7/12 . . . with provision for printing-out a list of selected items

7/14 . . Merging, i.e. combining at least two sets of record carriers each arranged in the same ordered sequence to produce a single set having the same ordered sequence

7/16 . . . Combined merging and sorting

7/20 . . Comparing separate sets of record carriers arranged in the same sequence to determine whether at least some of the data in one set is identical with that in the other set or sets

7/22 . Arrangements for sorting or merging computer data on continuous record carriers, e.g. tape, drum, disc

7/24 . . Sorting, i.e. extracting data from one or more carriers, re-arranging the data in numerical or other ordered sequence, and re-recording the sorted data on the original carrier or on a different carrier or set of carriers (G06F 7/36 takes precedence)

7/26 . . . the sorted data being recorded on the original record carrier within the same space in which the data had been recorded prior to their sorting, without using intermediate storage

7/32 . . Merging, i.e. combining data contained in ordered sequence on at least two record carriers to produce a single carrier or set of carriers having all the original data in the ordered sequence (G06F 7/36 takes precedence)

7/36 . . Combined merging and sorting

7/38 . Methods or arrangements for performing computations using exclusively denominational number representation, e.g. using binary, ternary, decimal representation **[3]**

7/40 . . using contact-making devices, e.g. electromagnetic relay (G06F 7/46 takes precedence)

7/42 . . . Adding; Subtracting

7/44 . . . Multiplying; Dividing

7/46 . . using electromechanical counter-type accumulators

7/48 . . using non-contact-making devices, e.g. tube, solid state device; using unspecified devices **[3]**

7/483 . . . Computations with numbers represented by a non-linear combination of denominational numbers, e.g. rational numbers, logarithmic number system, floating-point numbers (conversion to or from floating-point codes H03M 7/24) **[8]**

7/485 . . . . Adding; Subtracting **[8]**

7/487 . . . . Multiplying; Dividing **[8]**

7/49 . . . Computations with a radix, other than binary, 8, 16 or decimal, e.g. ternary, negative or imaginary radices, mixed radix **[3]**

7/491 . . . Computations with decimal numbers **[8]**

7/492 . . . . using a binary weighted representation within each denomination **[8]**

7/493 . . . . . the representation being the natural binary coded representation, i.e. 8421-code **[8]**

7/494 . . . . . Adding; Subtracting **[8]**

7/495 . . . . . in digit-serial fashion, i.e. having a single digit-handling circuit treating all denominations after each other **[8]**

7/496 . . . . . Multiplying; Dividing **[8]**

7/498 . . . . using counter-type accumulators **[8]**

7/499 . . . Denomination or exception handling, e.g. rounding, overflow **[8]**

7/50 . . . Adding; Subtracting (G06F 7/483 to G06F 7/491, G06F 7/544 to G06F 7/556 take precedence) **[3,8]**

7/501 . . . . Half or full adders, i.e. basic adder cells for one denomination (EXCLUSIVE-OR circuits H03K 19/21) **[8]**

7/502 . . . . . Half adders; Full adders consisting of two cascaded half adders **[8]**

7/503 . . . . . using carry switching, i.e. the incoming carry being connected directly, or only via an inverter, to the carry output under control of a carry propagate signal **[8]**

7/504 . . . . in bit-serial fashion, i.e. having a single digit-handling circuit treating all denominations after each other **[8]**

7/505 . . . . in bit-parallel fashion, i.e. having a different digit-handling circuit for each denomination (half or full adders G06F 7/501) **[8]**

7/506 . . . . . with simultaneous carry generation for, or propagation over, two or more stages **[8]**

7/507 . . . . . using selection between two conditionally calculated carry or sum values **[8]**

7/508 . . . . . using carry look-ahead circuits **[8]**
7/509 . . . . . for multiple operands, e.g. digital integrators **[8]**
7/52 . . . Multiplying; Dividing (G06F 7/483 to G06F 7/491, G06F 7/544 to G06F 7/556 take precedence) **[3,8]**
7/523 . . . . Multiplying only **[8]**
7/525 . . . . . in serial-serial fashion, i.e. both operands being entered serially (G06F 7/533 takes precedence) **[8]**
7/527 . . . . . in serial-parallel fashion, i.e. one operand being entered serially and the other in parallel (G06F 7/533 takes precedence) **[8]**
7/53 . . . . . in parallel-parallel fashion, i.e. both operands being entered in parallel (G06F 7/533 takes precedence) **[8]**
7/533 . . . . . Reduction of the number of iteration steps or stages, e.g. using the Booth algorithm, log-sum, odd-even **[8]**
7/535 . . . . Dividing only **[8]**
7/537 . . . . . Reduction of the number of iteration steps or stages, e.g. using the Sweeny-Robertson-Tocher (SRT) algorithm **[8]**
7/544 . . . for evaluating functions by calculation (with a look-up table G06F 1/02) **[3]**
7/548 . . . . Trigonometric functions; Co-ordinate transformations **[3]**
7/552 . . . . Powers or roots **[3]**
7/556 . . . . Logarithmic or exponential functions **[3]**
7/57 . . . Arithmetic logic units (ALU), i.e. arrangements or devices for performing two or more of the operations covered by groups G06F 7/483 to G06F 7/556 or for performing logical operations (instruction execution G06F 9/30) **[8]**
7/575 . . . . Basic arithmetic logic units, i.e. devices selectable to perform either addition, subtraction or one of several logical operations, using, at least partially, the same circuitry **[8]**
7/58 . Random or pseudo-random number generators **[3]**
7/60 . Methods or arrangements for performing computations using a digital non-denominational number representation, i.e. number representation without radix; Computing devices using combinations of denominational and non-denominational quantity representations **[3]**
7/62 . . Performing operations exclusively by counting total number of pulses **[3]**
7/64 . . Digital differential analysers, i.e. computing devices for differentiation, integration or solving differential or integral equations, using pulses representing increments; Other incremental computing devices for solving difference equations (G06F 7/70 takes precedence; differential analysers using hybrid computing techniques G06J 1/02) **[3]**
7/66 . . . wherein pulses represent unitary increments only **[3]**
7/68 . . using pulse rate multipliers or dividers (G06F 7/70 takes precedence) **[3]**
7/70 . . using stochastic pulse trains, i.e. randomly occurring pulses the average pulse rates of which represent numbers **[3]**
7/72 . . using residue arithmetic **[3]**
7/74 . Selecting or encoding within a word the position of one or more bits having a specified value, e.g. most or least significant one or zero detection, priority encoders **[8]**
7/76 . Arrangements for rearranging, permuting or selecting data according to predetermined rules, independently of the content of the data (according to the content of the data G06F 7/06, G06F 7/22; parallel/series conversion or vice versa H03M 9/00) **[8]**
7/78 . . for changing the order of data flow, e.g. matrix transposition, LIFO buffers; Overflow or underflow handling therefor **[8]**

9/00 Arrangements for programme control, e.g. control unit (programme control for peripheral devices G06F 13/10) **[4]**
9/02 . using wired connections, e.g. plugboard
9/04 . using record carriers containing only programme instructions (G06F 9/06 takes precedence)
9/06 . using stored programme, i.e. using internal store of processing equipment to receive and retain programme
9/22 . . Micro-control or micro-programme arrangements **[3]**
9/24 . . . Loading of the micro-programme **[3]**
9/26 . . . Address formation of the next micro-instruction (G06F 9/28 takes precedence) **[3]**
9/28 . . . Enhancement of operational speed, e.g. by using several micro-control devices operating in parallel **[3]**
9/30 . . Arrangements for executing machine- instructions, e.g. instruction decode (for executing micro-instructions G06F 9/22; for executing subprogrammes G06F 9/40) **[3]**
9/302 . . . Controlling the executing of arithmetic operations **[5]**
9/305 . . . Controlling the executing of logical operations **[5]**
9/308 . . . Controlling single bit operations (G06F 9/305 takes precedence) **[5]**
9/312 . . . Controlling loading, storing or clearing operations **[5]**
9/315 . . . Controlling moving, shifting or rotation operations **[5]**
9/318 . . . with operation extension or modification **[5]**
9/32 . . . Address formation of the next instruction, e.g. incrementing the instruction counter, jump (G06F 9/38 takes precedence; subprogramme jump G06F 9/42) **[3]**
9/34 . . . Addressing or accessing the instruction operand or the result (address translation G06F 12/00) **[3,5]**
9/345 . . . . of multiple operands or results **[5]**
9/35 . . . . Indirect addressing **[5]**
9/355 . . . . Indexed addressing **[5]**
9/38 . . . Concurrent instruction execution, e.g. pipeline, look ahead **[3]**
9/40 . . Arrangements for executing subprogrammes, i.e. combinations of several instructions **[3]**
9/42 . . . Formation of subprogramme-jump address or of return address **[3]**
9/44 . . Arrangements for executing specific programmes **[3]**
9/445 . . . Programme loading or initiating **[5]**
9/45 . . . Compilation or interpretation of high level programme languages **[5]**
9/455 . . . Emulation; Software simulation **[5]**

9/46 . . Multiprogramming arrangements **[3]**
9/48 . . . Programme initiating; Programme switching, e.g. by interrupt **[7]**
9/50 . . . Allocation of resources, e.g. of the central processing unit (CPU) **[7]**
9/52 . . . Programme synchronisation; Mutual exclusion, e.g. by means of semaphores **[7]**
9/54 . . . Interprogramme communication **[7]**

11/00 **Error detection**; **Error correction**; **Monitoring** (methods or arrangements for verifying the correctness of marking on a record carrier G06K 5/00; in information storage based on relative movement between record carrier and transducer G11B, e.g. G11B 20/18; in static stores G11C 29/00; coding, decoding or code conversion, for error detection or error correction, in general H03M 13/00) **[4]**
11/07 . Responding to the occurrence of a fault, e.g. fault tolerance **[7]**
11/08 . . Error detection or correction by redundancy in data representation, e.g. by using checking codes
11/10 . . . Adding special bits or symbols to the coded information, e.g. parity check, casting out nines or elevens
11/14 . . Error detection or correction of the data by redundancy in operation, e.g. by using different operation sequences leading to the same result (G06F 11/16 takes precedence) **[3]**
11/16 . . Error detection or correction of the data by redundancy in hardware **[3]**
11/18 . . . using passive fault-masking of the redundant circuits, e.g. by quadding or by majority decision circuits **[3]**
11/20 . . . using active fault-masking, e.g. by switching out faulty elements or by switching in spare elements **[3]**
11/22 . Detection or location of defective computer hardware by testing during standby operation or during idle time, e.g. start-up testing (testing of digital circuits, e.g. of separate computer components, G01R 31/317) **[3]**
11/24 . . Marginal testing **[3]**
11/25 . . Testing of logic operation, e.g. by logic analysers **[6]**
11/26 . . Functional testing **[3]**
11/263 . . . Generation of test inputs, e.g. test vectors, patterns or sequences **[6]**
11/267 . . . Reconfiguring circuits for testing, e.g. LSSD, partitioning **[6]**
11/27 . . . Built-in tests **[6]**
11/273 . . . Tester hardware, i.e. output processing circuits **[6]**
11/277 . . . . with comparison between actual response and known fault-free response **[6]**
11/28 . by checking the correct order of processing (G06F 11/07, G06F 11/22 take precedence; monitoring patterns of pulse trains H03K 5/19) **[3]**
11/30 . Monitoring **[3]**
11/32 . . with visual indication of the functioning of the machine **[3]**
11/34 . . Recording or statistical evaluation of computer activity, e.g. of down time, of input/output operation **[3]**
11/36 . Preventing errors by testing or debugging of software **[7]**

12/00 **Accessing, addressing or allocating within memory systems or architectures** (information storage in general G11) **[4,5]**
12/02 . Addressing or allocation; Relocation (programme address sequencing G06F 9/00; arrangements for selecting an address in a digital store G11C 8/00) **[4]**
12/04 . . Addressing variable-length words or parts of words **[4]**
12/06 . . Addressing a physical block of locations, e.g. base addressing, module addressing, address space extension, memory dedication (G06F 12/08 takes precedence) **[4]**
12/08 . . in hierarchically structured memory systems, e.g. virtual memory systems **[4]**
12/10 . . . Address translation **[4]**
12/12 . . . Replacement control **[4]**
12/14 . Protection against unauthorised use of memory **[4]**
12/16 . Protection against loss of memory contents **[4]**

13/00 **Interconnection of, or transfer of information or other signals between, memories, input/output devices or central processing units** (interface circuits for specific input/output devices G06F 3/00; multi-processor systems G06F 15/16; transmission of digital information in general H04L; selecting H04Q) **[4]**
13/10 . Programme control for peripheral devices (G06F 13/14 to G06F 13/42 take precedence) **[4]**
13/12 . . using hardware independent of the central processor, e.g. channel or peripheral processor **[4]**
13/14 . Handling requests for interconnection or transfer **[4]**
13/16 . . for access to memory bus (G06F 13/28 takes precedence) **[4]**
13/18 . . . with priority control **[4]**
13/20 . . for access to input/output bus **[4]**
13/22 . . . using successive scanning, e.g. polling (G06F 13/24 takes precedence) **[4]**
13/24 . . . using interrupt (G06F 13/32 takes precedence) **[4]**
13/26 . . . . with priority control **[4]**
13/28 . . . using burst mode transfer, e.g. direct memory access, cycle steal (G06F 13/32 takes precedence) **[4]**
13/30 . . . . with priority control **[4]**
13/32 . . . using combination of interrupt and burst mode transfer **[4]**
13/34 . . . . with priority control **[4]**
13/36 . . for access to common bus or bus system **[4]**
13/362 . . . with centralised access control **[5]**
13/364 . . . . using independent requests or grants, e.g. using separated request and grant lines **[5]**
13/366 . . . . using a centralised polling arbiter **[5]**
13/368 . . . with decentralised access control **[5]**
13/37 . . . . using a physical-position-dependent priority, e.g. daisy chain, round robin or token passing **[5]**
13/372 . . . . using a time-dependent priority, e.g. individually loaded time counters or time slot **[5]**
13/374 . . . . using a self-select method with individual priority code comparator **[5]**
13/376 . . . . using a contention resolving method, e.g. collision detection, collision avoidance **[5]**
13/378 . . . . using a parallel poll method **[5]**
13/38 . Information transfer, e.g. on bus (G06F 13/14 takes precedence) **[4]**

13/40 . . Bus structure **[4]**

13/42 . . Bus transfer protocol, e.g. handshake; Synchronisation (synchronisation in transmission of digital information in general H04L 7/00) **[4]**

15/00 Digital computers in general (details G06F 1/00 to G06F 13/00); **Data processing equipment in general** (neural networks for image data processing G06T)

15/02 . manually operated with input through keyboard and computation using a built-in programme, e.g. pocket calculators

15/04 . programmed simultaneously with the introduction of data to be processed, e.g. on the same record carrier

15/08 . using a plugboard for programming **[5]**

15/10 . . Tabulators **[5]**

15/12 . . . having provision for both printed and punched output **[5]**

15/14 . . Calculating-punches **[5]**

15/16 . Combinations of two or more digital computers each having at least an arithmetic unit, a programme unit and a register, e.g. for a simultaneous processing of several programmes (interface circuits for specific input/output devices G06F 3/00; multi-programming arrangements G06F 9/46; transmission of digital information in general H04L, e.g. in computer networks H04L 12/00; selecting H04Q)

15/163 . . Interprocessor communication **[6]**

15/167 . . . using a common memory, e.g. mailbox (memory protection G06F 12/14; memory access priority G06F 13/18) **[6]**

15/17 . . . using an input/output type connection, e.g. channel, I/O port **[6]**

15/173 . . . using an interconnection network, e.g. matrix, shuffle, pyramid, star, snowflake (interface switching circuits G06F 13/40) **[6]**

15/177 . . Initialisation or configuration control (configuration control for monitoring, testing or in case of failure G06F 11/00) **[6]**

15/18 . in which a programme is changed according to experience gained by the computer itself during a complete run; Learning machines (adaptive control systems G05B 13/00)

15/76 . Architectures of general purpose stored programme computers (with programme plugboard G06F 15/08; multicomputers G06F 15/16; general purpose image data processing G06T 1/00) **[5,6]**

15/78 . . comprising a single central processing unit **[5]**

15/80 . . comprising an array of processing units with common control, e.g. single instruction multiple data processors (G06F 15/82 takes precedence) **[5]**

15/82 . . data or demand driven **[5]**

17/00 Digital computing or data processing equipment or methods, specially adapted for specific functions [6]

17/10 . Complex mathematical operations **[6]**

17/11 . . for solving equations **[6]**

17/12 . . . Simultaneous equations **[6]**

17/13 . . . Differential equations (using digital differential analysers G06F 7/64) **[6]**

17/14 . . Fourier, Walsh or analogous domain transformations **[6]**

17/15 . . Correlation function computation **[6]**

17/16 . . Matrix or vector computation **[6]**

17/17 . . Function evaluation by approximation methods, e.g. inter- or extrapolation, smoothing, least mean square method (interpolation for numerical control G05B 19/18) **[6]**

17/18 . . for evaluating statistical data **[6]**

17/20 . Handling natural language data (speech analysis or synthesis G10L) **[6]**

17/21 . . Text processing (G06F 17/27, G06F 17/28 take precedence; systems for composing machines B41B 27/00) **[6]**

17/22 . . . Manipulating or registering by use of codes, e.g. in sequence of text characters **[6]**

17/24 . . . Editing, e.g. insert/delete **[6]**

17/25 . . . Automatic justification **[6]**

17/26 . . . Automatic hyphenation **[6]**

17/27 . . Automatic analysis, e.g. parsing, orthograph correction **[6]**

17/28 . . Processing or translating of natural language (G06F 17/27 takes precedence) **[6]**

17/30 . Information retrieval; Database structures therefor **[6]**

17/40 . Data acquisition and logging (for input to computer G06F 3/00) **[6]**

17/50 . Computer-aided design (for the design of test circuits for static stores G11C 29/54) **[6,8]**

19/00 Digital computing or data processing equipment or methods, specially adapted for specific applications *(G06F 17/00 takes precedence; data processing systems or methods specially adapted for administrative, commercial, financial, managerial, supervisory or forecasting purposes G06Q)* **[6,8,2011.01]**

Note

This group covers: **[6]**
- special constructions of computers to permit or facilitate use in specific applications; **[6]**
- non-structural adaptations of computers to a specific application, e.g. computing methods. **[6]**

19/10 . Bioinformatics, i.e. methods or systems for genetic or protein-related data processing in computational molecular biology (in silico methods of screening virtual chemical libraries C40B 30/02; in silico or mathematical methods of creating virtual chemical libraries C40B 50/02) **[2011.01]**

(1) This group also covers bioinformatics methods or systems where digital data processing is inherent or implicit, but not explicitly mentioned. **[2011.01]**

(2) In this group, the following term is used with the meaning indicated:
- *"systems" includes apparatus.* **[2011.01]**

(3) In this group, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place. **[2011.01]**

19/12 . . for modelling or simulation in systems biology, e.g. probabilistic or dynamic models, gene-regulatory networks, protein interaction networks or metabolic networks **[2011.01]**

19/14 . . for phylogeny or evolution, e.g. evolutionarily conserved regions determination or phylogenetic tree construction **[2011.01]**

19/16 . . for molecular structure, e.g. structure alignment, structural or functional relations, protein folding, domain topologies, drug targeting using structure data, involving two-dimensional or three-dimensional structures **[2011.01]**

19/18 . . *for functional genomics or proteomics, e.g. genotype-phenotype associations, linkage disequilibrium, population genetics, binding site identification, mutagenesis, genotyping or genome annotation, protein-protein interactions or protein-nucleic acid interactions* **[2011.01]**

19/20 . . *for hybridisation or gene expression, e.g. microarrays, sequencing by hybridisation, normalisation, profiling, noise correction models, expression ratio estimation, probe design or probe optimisation* **[2011.01]**

19/22 . . *for sequence comparison involving nucleotides or amino acids, e.g. homology search, motif or SNP [Single-Nucleotide Polymorphism] discovery or sequence alignment* **[2011.01]**

19/24 . . *for machine learning, data mining or biostatistics, e.g. pattern finding, knowledge discovery, rule extraction, correlation, clustering or classification* **[2011.01]**

19/26 . . *for data visualisation, e.g. graphics generation, display of maps or networks or other visual representations* **[2011.01]**

19/28 . . *for programming tools or database systems, e.g. ontologies, heterogeneous data integration, data warehousing or computing architectures* **[2011.01]**

21/00 **Security arrangements for protecting computers or computer systems against unauthorised activity** (multiprogramming G06F 9/46; protection against unauthorised use of memory G06F 12/14; dispensing apparatus actuated by coded identity card or credit card G07F 7/08; equipment anti-theft monitoring by a central station G08B 26/00; secret or secure communication H04L 9/00; data switching networks H04L 12/00) **[8]**

21/02 . by protecting specific internal components of computers **[8]**

21/04 . by protecting specific peripheral devices, e.g. keyboards or displays **[8]**

21/06 . by sensing unauthorised manipulation of, or intrusion into, an enclosure e.g. a housing or a room **[8]**

21/20 . by restricting access to nodes in a computer system or computer network **[8]**

21/22 . by restricting access to, or manipulation of, programmes or processes **[8]**

21/24 . by protecting data directly, e.g. by labelling **[8]**

G06G **ANALOGUE COMPUTERS** (analogue optical computing devices G06E 3/00; computer systems based on specific computational models G06N)

1/00 **Hand-manipulated computing devices** (planimeters G01B 5/26)

1/02 . Devices in which computing is effected by adding, subtracting, or comparing lengths of parallel or concentric graduated scales

1/04 . . characterised by construction (G06G 1/10 takes precedence)

1/06 . . . with rectilinear scales, e.g. slide rule

1/08 . . . with circular or helical scales

1/10 . . characterised by the graduation

1/12 . . . logarithmic graduations, e.g. for multiplication

1/14 . in which a straight or curved line has to be drawn from given points on one or more input scales to one or more points on a result scale

1/16 . in which a straight or curved line has to be drawn through related points on one or more families of curves

3/00 **Devices in which the computing operation is performed mechanically** (G06G 1/00 takes precedence)

3/02 . for performing additions or subtractions, e.g. differential gearing

3/04 . for performing multiplications or divisions, e.g. variable-ratio gearing

3/06 . for evaluating functions by using cams and cam followers

3/08 . for integrating or differentiating, e.g. by wheel and disc

3/10 . for simulating specific processes, systems, or devices

5/00 **Devices in which the computing operation is performed by means of fluid-pressure elements** (such elements in general F15C)

7/00 **Devices in which the computing operation is performed by varying electric or magnetic quantities** (neural networks for image data processing G06T; speech analysis or synthesis G10L)

7/02 . Details not covered by groups G06G 7/04 to G06G 7/10

7/04 . Input or output devices (graph readers G06K 11/00; using function plotters, co-ordinate plotters G06K 15/22)

7/06 . Programming arrangements, e.g. plugboard for interconnecting functional units of the computer; Digital programming

7/10 . Power supply arrangements

7/12 . Arrangements for performing computing operations, e.g. amplifiers specially adapted therefor (amplifiers in general H03F)

7/122 . . for optimisation, e.g. least square fitting, linear programming, critical path analysis, gradient method **[2]**

7/14 . . for addition or subtraction (of vector quantities G06G 7/22)

7/16 . . for multiplication or division

7/161 . . . with pulse modulation, e.g. modulation of amplitude, width, frequency, phase, or form **[2]**

7/162 . . . using galvano-magnetic effects, e.g. Hall effect; using similar magnetic effects **[2]**

7/163 . . . using a variable impedance controlled by one of the input signals, variable amplification or transfer function **[2]**

7/164 . . . using means for evaluating powers, e.g. quarter square multiplier (evaluating powers G06G 7/20) **[3]**

7/18 . . for integration or differentiation (G06G 7/19 takes precedence) **[3]**

7/182 . . . using magnetic elements **[3]**

7/184 . . . using capacitive elements **[3]**
7/186 . . . . using an operational amplifier comprising a capacitor or a resistor in the feedback loop **[3]**
7/188 . . . using electromechanical elements **[3]**
7/19 . . for forming integrals of products, e.g. Fourier integrals, Laplace integrals, correlation integrals; for analysis or synthesis of functions using orthogonal functions (Fourier or spectrum analysis G01R 23/16) **[3]**
7/195 . . . using electro-acoustic elements **[3]**
7/20 . . for evaluating powers, roots, polynomes, mean square values, standard deviation (G06G 7/122, G06G 7/28 take precedence; gamma correction in television systems H04N 5/202, H04N 9/69) **[3]**
7/22 . . for evaluating trigonometric functions; for conversion of co-ordinates; for computations involving vector quantities (trigonometric computations using simultaneous equations G06G 7/34)
7/24 . . for evaluating logarithmic or exponential functions, e.g. hyperbolic functions
7/25 . . for discontinuous functions, e.g. backlash, dead zone, limiting, absolute value, or peak value **[2]**
7/26 . . Arbitrary function generators (using orthogonal functions, e.g. Fourier series, G06G 7/19; using curve follower G06K 11/02)
7/28 . . . for synthesising functions by piecewise approximation
7/30 . . for interpolation or extrapolation (G06G 7/122 takes precedence) **[2]**
7/32 . . for solving of equations
7/34 . . . of simultaneous equations (G06G 7/122 takes precedence) **[2]**
7/36 . . . of single equations of quadratic or higher degree (G06G 7/22, G06G 7/24 take precedence)
7/38 . . . of differential or integral equations
7/40 . . . . of partial differential equations (simulating specific devices G06G 7/48)
7/42 . . . . . using electrolytic tank
7/44 . . . . . using continuous medium, current-sensitive paper
7/46 . . . . . using discontinuous medium, e.g. resistance network
7/48 . Analogue computers for specific processes, systems, or devices, e.g. simulators **[2]**
7/50 . . for distribution networks, e.g. for fluids (G06G 7/62 takes precedence)
7/52 . . for economic systems; for statistics (G06G 7/122, G06G 7/19, G06G 7/20 take precedence) **[3]**
7/54 . . for nuclear physics, e.g. nuclear reactors, radioactive fallout
7/56 . . for heat flow (G06G 7/58 takes precedence)
7/57 . . for fluid flow (G06G 7/50 takes precedence)
7/58 . . for chemical processes (G06G 7/75 takes precedence)
7/60 . . for living beings, e.g. their nervous systems
7/62 . . for electric systems or apparatus
7/625 . . . for impedance networks, e.g. determining response, determining poles or zeros, determining the Nyquist diagram (measuring impedance G01R 27/00) **[2]**
7/63 . . . for power apparatus, e.g. motors, or supply distribution networks **[2]**
7/635 . . . . for determining the most economical distribution in power systems **[2]**
7/64 . . for non-electric machines, e.g. turbine
7/66 . . for control systems
7/68 . . for civil-engineering structures, e.g. beam, strut, girder
7/70 . . for vehicles, e.g. to determine permissible loading of ships
7/72 . . . Flight simulators (Link trainers G09B 9/08)
7/75 . . for component analysis, e.g. of mixtures, of colours (G06G 7/122 takes precedence) **[2]**
7/76 . . for traffic
7/78 . . for direction-finding, locating, distance or velocity measuring, or navigation systems
7/80 . . for gun-laying; for bomb aiming; for guiding missiles **[2]**

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

G06J HYBRID COMPUTING ARRANGEMENTS (optical hybrid computing devices G06E 3/00; computer systems based on specific computational models G06N; neural networks for image data processing G06T; analogue/digital conversion, in general H03M 1/00)

Note

In this subclass, the following expression is used with the meaning indicated:
– "hybrid computing arrangement" is an arrangement in which part of the computation is digital and part is analogue.

1/00 Hybrid computing arrangements (digitally-programmed analogue computers G06G 7/06)
1/02 . Differential analysers

3/00 Systems for conjoint operation of complete digital and complete analogue computers

G06K RECOGNITION OF DATA; PRESENTATION OF DATA; RECORD CARRIERS; HANDLING RECORD CARRIERS (postal sorting B07C; secondary surveillance radar G01S; detecting presence of transponders or tags G01S, G01V)

(1) This subclass covers:
- marking, sensing, and conveying of record carriers;
- recognising characters or other data;
- presenting visually or otherwise the data recognised or the result of a computation.

(2) This subclass does not cover printing per se.

Subclass index

1/00 Methods or arrangements for marking the record carrier in digital fashion (interpreting G06K 3/02)

1/02 . by punching (punching in general B26F)
1/04 . . controlled by sensing markings on the record carrier being punched (sensing of record carriers G06K 7/00)
1/05 . . High-speed punches, e.g. controlled by electric computer
1/06 . . Manually-controlled devices
1/08 . . . Card punches
1/10 . . . Tape punches (specially adapted for a particular purpose, see the relevant subclass, e.g. for transmission of digital information H04L)
1/12 . otherwise than by punching (printing in general B41, e.g. B41J)
1/14 . by transferring data from a similar or dissimilar record carrier
1/16 . . by reproducing data from one punched card on to one or more punched cards without the code representation, i.e. duplicating
1/18 . . by transferring data from one type of record carrier on to another type of record carrier, e.g. from magnetic tape to punched card
1/20 . Simultaneous marking of record carrier and printing-out of data, e.g. printing-punch
1/22 . . Simultaneous marking and printing on different record carriers, e.g. on different types of record carrier

3/00 Methods or arrangements for printing of data in the shape of alphanumeric or other characters from a record carrier, e.g. interpreting, printing-out from a magnetic tape

3/02 . Translating markings on a record carrier into printed data on the same record carrier, i.e. interpreting

5/00 Methods or arrangements for verifying the correctness of markings on a record carrier; Column-detection devices

5/02 . the verifying forming a part of the marking action
5/04 . Verifying the alignment of markings

7/00 Methods or arrangements for sensing record carriers (G06K 9/00 takes precedence)

7/01 . Details
7/015 . . Aligning or centring of the sensing device with respect to the record carrier (in general G11B)
7/016 . . Synchronisation of sensing process (in general G11B)
7/02 . by pneumatic or hydraulic means, e.g. sensing punched holes with compressed air; by sonic means
7/04 . by mechanical means, e.g. by pins operating electric contacts
7/06 . by means which conduct current when a mark is sensed or absent, e.g. contact brush for a conductive mark
7/08 . by means detecting the change of an electrostatic or magnetic field, e.g. by detecting change of capacitance between electrodes
7/10 . by electromagnetic radiation, e.g. optical sensing; by corpuscular radiation
7/12 . . using a selected wavelength, e.g. to sense red marks and ignore blue marks
7/14 . . using light without selection of wavelength, e.g. sensing reflected white light

9/00 Methods or arrangements for reading or recognising printed or written characters or for recognising patterns, e.g. fingerprints (processing or analysis of tracks of nuclear particles G01T 5/02; testing patterns on paper currency or similar valuable papers G07D 7/20; speech recognition G10L 15/00) **[1,7]**

9/03 . Detection or correction of errors, e.g. by rescanning the pattern **[3]**
9/18 . using printed characters having additional code marks or containing code marks, e.g. the character being composed of individual strokes of different shape, each representing a different code value
9/20 . Image acquisition **[3]**
9/22 . . using hand-held instruments **[3]**
9/24 . . . Construction of the instrument **[3]**
9/26 . . using a slot moved over the image **[3]**
9/28 . . using discrete sensing elements at predetermined points **[3]**

9/30 . . using automatic curve following means **[3]**
9/32 . . Aligning or centering of the image pick-up or image-field **[3]**
9/34 . . Segmentation of touching or overlapping patterns in the image field **[3]**
9/36 . Image preprocessing, i.e. processing the image information without deciding about the identity of the image (image data processing or generation, in general G06T) **[3]**

Note

Group G06K 9/58 takes precedence over groups G06K 9/38 to G06K 9/54. **[3]**

9/38 . . Quantising the analogue image signal **[3]**
9/40 . . Noise filtering **[3]**
9/42 . . Normalisation of the pattern dimensions **[3]**
9/44 . . Smoothing or thinning of the pattern **[3]**
9/46 . . Extraction of features or characteristics of the image **[3]**
9/48 . . . by coding the contour of the pattern **[3]**
9/50 . . . by analysing segments intersecting the pattern **[3]**
9/52 . . . by deriving mathematical or geometrical properties from the whole image **[3]**
9/54 . . Combinations of preprocessing functions **[3]**
9/56 . . . using a local operator, i.e. means to operate on an elementary image point in terms of the immediate surroundings of this point **[3]**
9/58 . . using optical means **[3]**
9/60 . Combination of image acquisition and preprocessing functions **[3]**
9/62 . Methods or arrangements for recognition using electronic means (learning machines G06F 15/18; digital correlation G06F 17/15; analogue correlation G06G 7/19) **[3]**
9/64 . . using simultaneous comparisons or correlations of the image signals with a plurality of references, e.g. resistor matrix **[3]**
9/66 . . . references adjustable by an adaptive method, e.g. learning **[3]**
9/68 . . using sequential comparisons of the image signals with a plurality of reference, e.g. addressable memory **[3]**
9/70 . . . the selection of the next reference depending on the result of the preceding comparison **[3]**
9/72 . . using context analysis based on the provisionally recognised identity of a number of successive patterns, e.g. a word **[3]**
9/74 . Arrangements for recognition using optical reference masks (optical analogue correlation G06E 3/00) **[3]**
9/76 . . using holographic masks **[3]**
9/78 . Combination of image acquisition and recognition functions **[3]**
9/80 . Combination of image preprocessing and recognition functions **[3]**
9/82 . . using optical means in one or both functions **[3]**

11/00 Methods or arrangements for graph-reading or for converting the pattern of mechanical parameters, e.g. force or presence, into electrical signals (combined with character or pattern recognition G06K 9/00; feelers for copying devices on machine tools B23Q 35/00; arrangements for measuring areas G01B; measuring force G01L; adapted as input devices to computers G06F 3/00; systems for transmitting the position of an object with respect to a predetermined reference system, e.g. tele-autographic system, G08C 21/00) **[2]**
11/02 . Automatic curve followers
11/04 . . using an auxiliary scanning pattern **[2]**
11/06 . Devices for converting the position of a manually-operated writing or tracing member into an electrical signal **[3]**

13/00 Conveying record carriers from one station to another, e.g. from stack to punching mechanism (transport devices in general B65G)
13/02 . the record carrier having longitudinal dimension comparable with transverse dimension, e.g. punched card
13/04 . . Details, e.g. flaps in card-sorting apparatus
13/05 . . . Capstans; Pinch rollers
13/06 . . Guiding cards; Checking correct operation of card-conveying mechanisms **[2]**
13/063 . . . Aligning cards **[2]**
13/067 . . . Checking presence, absence, correct position, or moving status of cards **[2]**
13/07 . . Transporting of cards between stations
13/073 . . . with continuous movement **[2]**
13/077 . . . with intermittent movement; Braking or stopping movement **[2]**
13/08 . . Feeding or discharging cards
13/10 . . . from magazine to conveying arrangement
13/103 . . . . using mechanical means **[2]**
13/107 . . . . using pneumatic means **[2]**
13/12 . . . from conveying arrangement to magazine
13/14 . . . Card magazines, e.g. pocket, hopper (card magazines in general B42F)
13/16 . . Handling flexible sheets, e.g. cheques
13/18 . the record carrier being longitudinally extended, e.g. punched tape (features of interest apart from data processing G11B; magnetic-tape drive G11B 15/00)
13/20 . . Details
13/22 . . . Capstans; Pinch rollers
13/24 . . Guiding of record carriers; Recognising end of record carrier
13/26 . . Winding-up or unwinding of record carriers; Driving of record carriers **[2]**
13/28 . . . continuously **[2]**
13/30 . . . intermittently **[2]**

15/00 Arrangements for producing a permanent visual presentation of the output data [3]
15/02 . using printers (printers per se B41J)
15/04 . . by rack-type printers
15/06 . . by type-wheel printers
15/07 . . . by continuously-rotating-type-wheel printers, e.g. rotating-type-drum printers **[2]**
15/08 . . by flight printing with type font moving in the direction of the printed line, e.g. chain printers
15/10 . . by matrix printers
15/12 . . by photographic printing
15/14 . . by electrographic printing, e.g. xerography; by magnetographic printing

15/16 . . Means for paper feeding or form feeding
15/22 . using plotters (plotters per se B43L 13/00) **[3]**

17/00 Methods or arrangements for effecting co-operative working between equipments covered by two or more of main groups G06K 1/00 to G06K 15/00, e.g. automatic card files incorporating conveying and reading operations

19/00 Record carriers for use with machines and with at least a part designed to carry digital markings (record carriers adapted for controlling specific machines, see the appropriate subclass for the machine, e.g. B23Q, D03C, G10F, H04L; form printing B41; file cards B42F 19/00; record carriers in general G11)

19/02 . characterised by the selection of materials, e.g. to avoid wear during transport through the machine
19/04 . characterised by the shape
19/06 . characterised by the kind of the digital marking, e.g. shape, nature, code
19/063 . . the carrier being marginally punched or notched, e.g. having elongated slots **[5]**
19/067 . . Record carriers with conductive marks, printed circuits or semiconductor circuit elements, e.g. credit or identity cards (using a coded card to authorise calls from a telephone set H04M 1/675) **[5]**
19/07 . . . with integrated circuit chips **[5]**
19/073 . . . . Special arrangements for circuits, e.g. for protecting identification code in memory (protection against unauthorised use of computer memory G06F 12/14) **[5]**
19/077 . . . . Constructional details, e.g. mounting of circuits in the carrier **[5]**
19/08 . . using markings of different kinds in the same record carrier, e.g. one marking being sensed by optical and the other by magnetic means
19/10 . . . at least one kind of marking being used for authentication, e.g. of credit or identity cards (verification of coded identity or credit cards in mechanisms actuated by them G07F 7/12) **[5]**
19/12 . . . . the marking being sensed by magnetic means **[5]**
19/14 . . . . the marking being sensed by radiation **[5]**
19/16 . . . . . the marking being a hologram or diffraction grating **[5]**
19/18 . . . . Constructional details **[5]**

21/00 Information retrieval from punched cards designed for manual use or handling by machine (G06K 19/00 takes precedence); **Apparatus for handling such cards, e.g. marking or correcting**

21/02 . in which coincidence of markings is sensed mechanically, e.g. by needle
21/04 . in which coincidence of markings is sensed optically, e.g. peek-a-boo system
21/06 . Apparatus or tools adapted for slotting or otherwise marking information-retrieval cards (tools for perforating in general B26F)
21/08 . Apparatus or tools for correcting punching or slotting errors **[2]**

G06M COUNTING MECHANISMS; **COUNTING OF OBJECTS NOT OTHERWISE PROVIDED FOR** (counting by measuring volume or weight of articles to be counted G01F, G01G; adaptation of counters to electricity meters in electromechanical arrangements for measuring time integral of electric power or current G01R 11/16; computers G06C to G06J; counting electric pulses H03K; counting characters, words or messages in switching networks for transmission of digital information H04L 12/08; metering arrangements in telephonic systems H04M 15/00)

Note

This subclass covers:
– stepping or continuously-moving mechanical counters operated through one or more inputs applied to the lowest order mechanically or electrically;
– counting systems involving applications of either mechanical, electrical, or electronic counters.

1/00 Design features of general application

1/02 . Housing (for measuring instruments in general G01D)
1/04 . for driving the stage of lowest order (with variable ratio of drive G06M 1/38)
1/06 . . producing continuous revolution of the stage, e.g. with gear train
1/08 . for actuating the drive
1/10 . . by electric or magnetic means
1/12 . . by fluid means
1/14 . for transferring a condition from one stage to a higher stage (with variable ratio of transfer G06M 1/38)
1/16 . . self-operating, e.g. by Geneva mechanism
1/18 . . requiring external operation, e.g. by electromagnetic force
1/20 . . specially adapted for denominations with unequal numbers in each stage, e.g. degrees and minutes of angle
1/22 . for visual indication of the result of count on counting mechanisms, e.g. by window with magnifying lens
1/24 . . Drums; Dials; Pointers
1/26 . . Aligning means
1/27 . for representing the result of count in the form of electric signals, e.g. by sensing markings on the counter drum
1/272 . . using photoelectric means
1/274 . . using magnetic means; using Hall-effect devices
1/276 . . using mechanically-actuated contacts
1/28 . for zeroising or setting to a particular value
1/30 . . using heart-shaped or similar cams; using levers
1/32 . . . Actuating means, e.g. magnet, spring, weight
1/34 . . using reset shafts
1/36 . . . Actuating means, e.g. magnet, spring, weight
1/38 . for varying ratio of drive or transfer mechanism, e.g. by using alternative counting trains

3/00 **Counters with additional facilities** (generating electric pulses at random intervals H03K 3/84)

3/02 . for performing an operation at a predetermined value of the count, e.g. arresting a machine

3/04 . . with an additional counter train operating in the reverse direction

3/06 . for printing or separately displaying result of count (display systems G09)

3/08 . for counting the input from several sources; for counting inputs of different amounts

3/10 . for counting denominations with unequal numbers in each stage, e.g. degrees and minutes of angle (transfer mechanism therefor G06M 1/20)

3/12 . for preventing incorrect actuation, e.g. for preventing falsification

3/14 . for registering difference of positive and negative actuations

Counting of objects

7/00 **Counting of objects carried by a conveyer**

7/02 . wherein objects ahead of the sensing element are separated to produce a distinct gap between successive objects

7/04 . . Counting of piece goods, e.g. of boxes

7/06 . . Counting of flat articles, e.g. of sheets of paper

7/08 . wherein the direction of movement of the objects is changed at the station where they are sensed

7/10 . . Counting of flat overlapped articles, e.g. of cards

9/00 **Counting of objects in a stack thereof**

9/02 . by using a rotating separator incorporating pneumatic suction nozzles

11/00 **Counting of objects distributed at random, e.g. on a surface**

11/02 . using an electron beam scanning a surface line by line, e.g. of blood cells on a substrate

11/04 . . with provision for distinguishing between different sizes of objects (investigating particle size in general G01N 15/00)

15/00 ***Counting of objects, not otherwise provided for*** **[2011.01]**

G06N COMPUTER SYSTEMS BASED ON SPECIFIC COMPUTATIONAL MODELS [7]

3/00 **Computer systems based on biological models** (analogue computers simulating functional aspects of living beings G06G 7/60) **[7]**

3/02 . using neural network models (for adaptive control G05B 13/00; for image pattern matching G06K 9/00; for image data processing G06T 1/40; for phonetic pattern matching G10L 15/16) **[7]**

3/04 . . Architecture, e.g. interconnection topology **[7]**

3/06 . . Physical realisation, i.e. hardware implementation of neural networks, neurons or parts of neurons **[7]**

3/063 . . . using electronic means **[7]**

3/067 . . . using optical means **[7]**

3/08 . . Learning methods **[7]**

3/10 . . Simulation on general purpose computers **[7]**

3/12 . using genetic models **[7]**

5/00 **Computer systems utilizing knowledge based models [7]**

5/02 . Knowledge representation **[7]**

5/04 . Inference methods or devices **[7]**

7/00 **Computer systems based on specific mathematical models [7]**

7/02 . using fuzzy logic (G06N 3/00, G06N 5/00 take precedence; for adaptive control G05B 13/00) **[7]**

7/04 . . Physical realisation **[7]**

7/06 . . Simulation on general purpose computers **[7]**

7/08 . using chaos models or non-linear system models **[7]**

99/00 **Subject matter not provided for in other groups of this subclass [2010.01]**

G06Q DATA PROCESSING SYSTEMS OR METHODS, SPECIALLY ADAPTED FOR ADMINISTRATIVE, COMMERCIAL, FINANCIAL, MANAGERIAL, SUPERVISORY OR FORECASTING PURPOSES; SYSTEMS OR METHODS SPECIALLY ADAPTED FOR ADMINISTRATIVE, COMMERCIAL, FINANCIAL, MANAGERIAL, SUPERVISORY OR FORECASTING PURPOSES, NOT OTHERWISE PROVIDED FOR [8]

(1) Groups G06Q 10/00 to G06Q 50/00 and G06Q 99/00 only cover systems or methods that involve significant data processing operations, i.e. data processing operations that need to be carried out by a technological, e.g. computing, system or device. **[8]**
Group G06Q 90/00 covers systems or methods that do not involve significant data processing, when both of the following conditions are fulfilled: **[8]**
- the systems or methods are specially adapted for the purposes mentioned in the subclass title or the titles of groups G06Q 10/00 to G06Q 50/00; and **[8]**
- the systems or methods cannot be classified elsewhere in the IPC, for example by applying the principles described in paragraph 96 of the Guide. **[8]**

When classifying such systems or methods in group G06Q 90/00, additional classification may be made in the most closely related group of this or any other subclass, if this classification gives information about the application of the systems or methods that could be of interest for search. Such non-obligatory classification must be given as "additional information". **[8]**

(2) When classifying in groups G06Q 10/00 to G06Q 40/00, systems or methods that are specially adapted for a specific business sector must also be classified in group G06Q 50/00, when the special adaptation is determined to be novel and non-obvious. **[8]**

(3) In this subclass, the first place priority rule is applied, i.e. at each hierarchical level, classification is made in the first appropriate place. **[8]**

10/00 **Administration, e.g. office automation or reservations**; **Management, e.g. resource or project management [8]**

20/00 **Payment schemes, architectures or protocols** (apparatus for performing or posting payment transactions G07F 7/08, G07F 19/00; electronic cash registers G07G 1/12) **[8]**

Note

This group covers: **[8]**
- protocols or schemes which include procedures whereby a payment is made between a merchant, a bank, a user and sometimes a third party; the procedure usually includes verification and authentication of all parties involved. **[8]**

30/00 **Commerce, e.g. marketing, shopping, billing, auctions or e-commerce [8]**

40/00 **Finance, e.g. banking, investment or tax processing**; **Insurance, e.g. risk analysis or pensions [8]**

50/00 **Systems or methods specially adapted for a specific business sector, e.g. health care, utilities, tourism or legal services [8]**

90/00 **Systems or methods specially adapted for administrative, commercial, financial, managerial, supervisory or forecasting purposes, not involving significant data processing [8]**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

G06T **IMAGE DATA PROCESSING OR GENERATION, IN GENERAL** (specially adapted for particular applications, see the relevant subclasses, e.g. G01C, G06K, G09G, H04N) **[6,8]**

(1) This subclass covers: **[6]**
- arrangements for geometrically modelling objects, whether the final model is used for display of an image of the object or for some other purpose, such as manufacture of a corresponding object; **[6]**
- arrangements for analysing the geometric attributes of an image of an object. **[6]**

(2) This subclass does not cover: **[6]**
- photogrammetry or videogrammetry, which are covered by subclass G01C; **[8]**
- reading or recognising printed or written characters or recognising patterns, e.g. fingerprints, which is covered by subclass G06K; **[6]**
- modification of image data to allow display using multiple viewports, which is covered by subclass G09G; **[6]**
- circuits for generating functions for visual indicators, which are covered by subclass G09G; **[6]**
- scanning of documents or the like in pictorial communication, which is covered by subclass H04N. **[6]**

Subclass index

1/00 **General purpose image data processing [6]**

1/20 . Processor architectures; Processor configuration, e.g. pipelining (architectures of general purpose stored programme computers G06F 15/76) **[6]**

1/40 . . Neural networks **[6]**

1/60 . Memory management **[6]**

3/00 **Geometric image transformation in the plane of the image, e.g. from bit-mapped to bit-mapped creating a different image [6]**

3/20 . Linear translation of a whole image or part thereof, e.g. panning **[6]**

3/40 . Scaling of a whole image or part thereof **[6]**

3/60 . Rotation of a whole image or part thereof **[6]**

5/00 **Image enhancement or restoration, e.g. from bit-mapped to bit-mapped creating a similar image [6]**

5/10 . by non-spatial domain filtering **[6]**

5/20 . by the use of local operators **[6]**
5/30 . . Erosion or dilatation, e.g. thinning **[6]**
5/40 . by the use of histogram techniques **[6]**
5/50 . by the use of more than one image, e.g. averaging, subtraction **[6]**

7/00 Image analysis, e.g. from bit-mapped to non bit-mapped [6]
7/20 . Analysis of motion **[6]**
7/40 . Analysis of texture **[6]**
7/60 . Analysis of geometric attributes, e.g. area, centre of gravity, perimeter, from an image **[6]**

9/00 Image coding, e.g. from bit-mapped to non bit-mapped (compression in general H03M; compression for image communication H04N) **[6]**
9/20 . Contour coding, e.g. using detection of edges **[6]**
9/40 . Tree coding, e.g. quadtree, octree **[6]**

11/00 2D [Two Dimensional] image generation [6]
11/20 . Drawing from basic elements, e.g. lines or circles **[6]**
11/40 . Filling a planar surface by adding surface attributes, e.g. colour or texture **[6]**
11/60 . Editing figures and text; Combining figures or text **[6]**
11/80 . Creating or modifying a manually drawn or painted image using a manual input device, e.g. mouse, light pen, direction keys on keyboard **[6]**

***13/00 Animation* [6,2011.01]**
13/20 . *3D [Three Dimensional] animation* **[2011.01]**
13/40 . . *of characters, e.g. humans, animals or virtual beings* **[2011.01]**
13/60 . . *of natural phenomena, e.g. rain, snow, water or plants* **[2011.01]**
13/80 . *2D animation, e.g. using sprites* **[2011.01]**

***15/00 3D [Three Dimensional] image rendering* [6,2011.01]**
15/02 . *Non-photorealistic rendering* **[2011.01]**
15/04 . *Texture mapping* **[2011.01]**
15/06 . *Ray-tracing* **[2011.01]**
15/08 . *Volume rendering* **[2011.01]**
15/10 . *Geometric effects* **[6,2011.01]**
15/20 . . *Perspective computation* **[6,2011.01]**
15/30 . . *Clipping* **[6,2011.01]**
15/40 . . *Hidden part removal* **[6,2011.01]**
15/50 . *Lighting effects* **[6,2011.01]**
15/55 . . *Radiosity* **[2011.01]**
15/60 . . Shadow generation **[6]**
15/70 (transferred to G06T 13/00 to G06T 13/60)
15/80 . . *Shading* **[2011.01]**
15/83 . . . *Phong shading* **[2011.01]**
15/87 . . . *Gouraud shading* **[2011.01]**

17/00 3D modelling for computer graphics [6]
17/05 . *Geographic models* **[2011.01]**
17/10 . Volume description, e.g. cylinders, cubes or using CSG [Constructive Solid Geometry] **[6]**
17/20 . Wire-frame description, e.g. polygonalisation or tessellation **[6]**
17/30 . Surface description, e.g. polynomial surface description **[6]**

***19/00 Manipulating 3D models or images for computer graphics* [2011.01]**
19/20 . *Editing of 3D images, e.g. changing shapes or colours, aligning objects or positioning parts* **[2011.01]**

G07 CHECKING-DEVICES

G07B TICKET-ISSUING APPARATUS; TAXIMETERS; ARRANGEMENTS OR APPARATUS FOR COLLECTING FARES, TOLLS OR ENTRANCE FEES AT ONE OR MORE CONTROL POINTS; FRANKING APPARATUS

Subclass index

1/00 **Machines for printing and issuing tickets** (printing mechanisms per se B41; output mechanisms of digital computers G06C 11/00)

1/02 . employing selectable printing plates

1/04 . . wherein the plates are inserted

1/06 . without selectable printing plates

1/08 . portable

3/00 **Machines for issuing preprinted tickets**

3/02 . from stock in wound strip form

3/04 . from a stack

5/00 **Details of, or auxiliary devices for, ticket-issuing machines** (for validating inserted tickets G07B 11/02)

5/02 . for cutting-off or separating tickets

5/04 . for recording or registering tickets issued

5/06 . for preventing fraudulent operation

5/08 . for avoiding incorrect action of the machine

5/10 . . indicating when ticket supply is exhausted

5/12 . allowing manual writing on the tickets

7/00 **Holders providing direct manual access to the tickets**

9/00 **Ticket punches** (perforating pliers B26F 1/36; marking record carriers in digital fashion by punching G06K 1/02)

9/02 . Toy ticket-punches

11/00 **Apparatus for validating or cancelling issued tickets [2]**

11/02 . for validating inserted tickets

11/03 . . by printing **[2]**

11/05 . . by perforating **[2]**

11/07 . . by separating part of ticket **[2]**

11/09 . . . combined with receptacle for separated part of ticket (refuse receptacles in general B65F 1/00) **[2]**

11/11 . for cancelling tickets **[2]**

13/00 **Taximeters** (measuring distance travelled G01C; measuring time G04)

13/02 . Details; Accessories

13/04 . . for indicating fare or state of hire

13/06 . . Driving arrangements

13/08 . . Tariff-changing arrangements

13/10 . . . automatically actuated

15/00 ***Arrangements or apparatus for collecting fares, tolls or entrance fees at one or more control points*** *(handling coins or paper currency G07D; apparatus for vending or hiring articles or services activated by coins, credit cards, paper currency or the like G07F 7/00, G07F 17/00)* **[1,2011.01]**

Note

Data processing aspects of payment systems or protocols relating to toll, entrance fee or fare collection, e.g. in road pricing or congestion charging, are also classified in G06Q 20/00. **[2011.01]**

15/02 . *taking into account a variable factor such as distance or time, e.g. for passenger transport, parking systems or car rental systems (G07B 15/06 takes precedence; taximeters G07B 13/00; parking meters per se G07F 17/24)* **[1,2011.01]**

15/04 . . comprising devices to free a barrier, turnstile, or the like (coin-freed turnstiles in general G07C 9/00)

15/06 . *Arrangements for road pricing or congestion charging of vehicles or vehicle users, e.g. automatic toll systems* **[2011.01]**

Note

This group covers the identification or tracking of vehicles or vehicle users for the purpose of road pricing or congestion charging, which means that vehicles or vehicle users are not necessarily channelled through fixed control points, e.g. toll booths or overhead gantries, but may be detected at a number of places when they travel in normal fashion in a pre-defined locality, e.g. a defined area in a city centre or an expressway, and where the information so generated is then used to determine a charge to be paid. **[2011.01]**

17/00 **Franking apparatus** (printing aspects B41)

17/02 . with means for computing or counting

17/04 . with means for avoiding misuse

G07C TIME OR ATTENDANCE REGISTERS; **REGISTERING OR INDICATING THE WORKING OF MACHINES**; **GENERATING RANDOM NUMBERS**; **VOTING OR LOTTERY APPARATUS**; **ARRANGEMENTS, SYSTEMS, OR APPARATUS FOR CHECKING NOT PROVIDED FOR ELSEWHERE** (identification of persons, e.g. finger-printing, foot-printing, A61B 5/117; indicating or recording apparatus for measuring in general, analogous apparatus but in which the input is not a variable to be measured, e.g. a hand operation, G01D; clocks, clock mechanisms G04B, G04C; time-interval measuring G04F; counting mechanisms per se G06M)

Subclass index

1/00 Registering, indicating, or recording the time of events or elapsed time, e.g. time-recorders for work people (registering or indicating the working of machines or vehicles G07C 3/00, G07C 5/00)

Note

Groups G07C 1/20 to G07C 1/32 take precedence over groups G07C 1/02 to G07C 1/10.

1/02 . not involving the registering, indicating, or recording of other data
1/04 . . wherein the time is indicated in figures
1/06 . . . with apparatus adapted for use with individual cards
1/08 . . wherein the time is indicated by marking an element, e.g. a card or tape, in a position determined by the time
1/10 . together with the recording, indicating, or registering of other data, e.g. of signs of identity (together with the recording of a continuously-varying variable G01D or the appropriate other subclass of class G01, dependent on the variable)
1/12 . . wherein the time is indicated in figures
1/14 . . . with apparatus adapted for use with individual cards
1/16 . . wherein the time is indicated by marking an element, e.g. a card or tape, in a position determined by the time
1/18 . . . with apparatus adapted for use with individual cards
1/20 . Checking timed patrols, e.g. of watchman
1/22 . in connection with sports or games
1/24 . . Race time-recorders (race-finish cameras G03B 41/00)
1/26 . . Pigeon-timing or like equipment
1/28 . . Indicating playing time
1/30 . Parking meters (registering or indicating waiting time of vehicles by means driven by the vehicle G07C 5/02; coin-freed parking meters G07F 17/24)
1/32 . Time-recording locks (locks giving indication of unauthorised unlocking E05B 39/00)

3/00 Registering or indicating the condition or the working of machines or other apparatus, other than vehicles (engine indicators G01L; testing apparatus incident to its manufacture G01M; signalling arrangements per se, indicating undesired or abnormal working conditions G08B)

3/02 . Registering or indicating working or idle time only
3/04 . . using counting means or digital clocks
3/06 . . in graphical form
3/08 . Registering or indicating the production of the machine either with or without registering working or idle time
3/10 . . using counting means
3/12 . . in graphical form
3/14 . Quality control systems

5/00 Registering or indicating the working of vehicles (for measuring distance travelled or combinations of speed and distance G01C; engine indicators G01L; devices for measuring speed or acceleration G01P; apparatus forming part of taximeters G07B)

5/02 . Registering or indicating driving, working, idle, or waiting time only
5/04 . . using counting means or digital clocks
5/06 . . in graphical form
5/08 . Registering or indicating performance data other than driving, working, idle, or waiting time, with or without registering driving, working, idle, or waiting time
5/10 . . using counting means or digital clocks
5/12 . . in graphical form

7/00 Details or accessories common to the registering or indicating apparatus of groups G07C 3/00 and G07C 5/00

9/00 Individual entry or exit registers

9/02 . Turnstiles with registering means (coin-freed aspects G07F)

11/00 Arrangements, systems, or apparatus for checking, e.g. the occurrence of a condition, not provided for elsewhere (for checking lottos or bingo games A63F 3/06; signalling or alarm arrangements G08B)

13/00 Voting apparatus

13/02 . Ballot boxes

15/00 Generating random numbers; **Lottery apparatus** (digital computer arrangements for generating random or pseudo-random numbers G06F 7/58; generating electric pulses at random intervals H03K 3/84) **[3]**

G07D HANDLING OF COINS OR OF PAPER CURRENCY OR SIMILAR VALUABLE PAPERS, E.G. TESTING, SORTING BY DENOMINATIONS, COUNTING, DISPENSING, CHANGING OR DEPOSITING [2]

Note

In this subclass, the following terms or expressions are used with the meaning indicated:
– "coins" also covers tokens of similar nature;
– *"paper currency or similar valuable papers" covers banknotes, bills, cheques, vouchers, securities, bonds or the like.* **[2011.01]**

1/00 Coin dispensers
1/02 . giving change
1/04 . . dispensing change equal to a sum deposited
1/06 . . dispensing the difference between a sum paid and a sum charged
1/08 . . hand actuated

3/00 Sorting a mixed bulk of coins into denominations [1,7]
3/02 . Sorting coins by means of graded apertures
3/04 . . arranged on an inclined rail
3/06 . . arranged along a circular path
3/08 . . arranged on a helix
3/10 . . provided by sieves arranged in series
3/12 . Sorting coins by means of stepped deflectors
3/14 . Apparatus driven under control of coin-sensing elements
3/16 . in combination with coin-counting

5/00 Testing specially adapted to determine the identity or genuineness of coins, e.g. for segregating coins which are unacceptable or alien to a currency [1,7]

Note

In groups G07D 5/02 to G07D 5/10, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[3]**

5/02 . Testing the dimensions, e.g. thickness, diameter; Testing the deformation **[3]**
5/04 . Testing the weight **[3]**
5/06 . Testing the hardness or elasticity **[3]**
5/08 . Testing the magnetic or electric properties **[3]**
5/10 . Testing the rim, e.g. the milling of the rim **[3]**

7/00 Testing specially adapted to determine the identity or genuineness of paper currency or similar valuable papers, e.g. for segregating those which are unacceptable or alien to a currency [2]

Note

Groups G07D 7/16 to G07D 7/20 take precedence over groups G07D 7/02 to G07D 7/14 **[7]**

7/02 . using electric means (G07D 7/04, G07D 7/06 take precedence) **[7]**
7/04 . using magnetic means, e.g. detection of magnetic imprint **[7]**
7/06 . using wave or particle radiation **[7]**
7/08 . . Acoustic waves **[7]**
7/10 . . Microwaves **[7]**
7/12 . . Visible light, infra-red or ultra-violet radiation **[7]**
7/14 . using chemical means **[7]**
7/16 . Testing the dimensions **[7]**
7/18 . Testing the stiffness **[7]**
7/20 . Testing patterns thereon **[7]**

9/00 Counting coins (in combination with coin-sorting G07D 3/16); **Handling of coins not provided for in the other groups of this subclass**
9/02 . Change trays
9/04 . Hand- or motor-driven devices for counting coins
9/06 . Devices for stacking or otherwise arranging coins on a support, e.g. apertured plate for use in counting coins

11/00 Devices accepting coins or paper currency, e.g. depositing machines (apparatus freed or actuated by coins or the like G07F; apparatus freed or actuated by paper currency G07F 7/04; complete banking systems G07F 19/00) **[5]**

13/00 Handling of coins or of paper currency or similar valuable papers, characterised by a combination of mechanisms not covered by a single one of groups G07D 1/00 to G07D 11/00 [5]

G07F COIN-FREED OR LIKE APPARATUS (coin sorting G07D 3/00; coin testing G07D 5/00) **[1,7]**

(1) This subclass does not cover constructions or details of apparatus which includes, or is combined with, coin-actuated mechanisms but is not specially adapted or modified for use therewith. Such constructions or details are covered by the relevant subclass for the particular apparatus.
(2) In this subclass, the following term is used with the meaning indicated:
– "coins" covers also tokens or the like.

Subclass index

1/00 **Coin inlet arrangements**; **Coins specially adapted to operate coin-freed mechanisms** (coins in general A44C)

1/02 . Coin slots

1/04 . Coin chutes

1/06 . Coins specially adapted to operate coin-freed mechanisms

5/00 **Coin-actuated mechanisms**; **Interlocks**

5/02 . actuated mechanically by coins, e.g. by a single coin

5/04 . . wherein two or more coins of the same denomination are required for each transaction

5/06 . . wherein two or more coins of different denominations are required for each transaction

5/08 . . wherein the use of two or more coins or an equivalent single coin is optional for each transaction; wherein the use of two or more coins or an alternative equivalent combination of coins is optional for each transaction

5/10 . actuated electrically by the coin, e.g. by a single coin

5/12 . . wherein two or more coins of the same denomination are required for each transaction

5/14 . . wherein two or more coins of different denominations are required for each transaction

5/16 . . wherein the use of two or more coins or an equivalent single coin is optional for each transaction; wherein the use of two or more coins or an alternative equivalent combination of coins is optional for each transaction

5/18 . specially adapted for controlling several coin-freed apparatus from one place (interlocks G07F 5/26)

5/20 . specially adapted for registering coins as credit, e.g. mechanically actuated

5/22 . . electrically actuated

5/24 . with change-giving (coin-changing mechanisms per se G07D)

5/26 . Interlocks, e.g. for locking the doors of compartments other than that to be used

7/00 **Mechanisms actuated by objects other than coins to free or to actuate vending, hiring, coin or paper currency dispensing or refunding apparatus** (complete banking systems G07F 19/00; handling coins or paper currencies apart from coin-freed or like apparatus G07D) **[2]**

7/02 . by keys or other credit registering devices (for producing a coded signal for use together with coded identity cards G07F 7/10) **[2]**

7/04 . by paper currency

7/06 . by returnable containers, e.g. bottles

7/08 . by coded identity card or credit card **[2]**

7/10 . . together with a coded signal **[2]**

7/12 . . Card verification **[5]**

9/00 **Details other than those peculiar to special kinds or types of apparatus** (coin inlet arrangements G07F 1/00; coin-actuated mechanisms, interlocks G07F 5/00)

9/02 . Devices for alarm or indication, e.g. when empty; Advertising arrangements in coin-freed apparatus (alarms or warning devices indicating the interruption of flow to be metered G07F 15/10)

9/04 . Means for returning surplus or unused coins

9/06 . Coin boxes

9/08 . Counting total of coins inserted

9/10 . Casings, e.g. with means for heating or cooling

11/00 **Coin-freed apparatus for dispensing, or the like, discrete articles**

11/02 . from non-movable magazines

11/04 . . in which magazines the articles are stored one vertically above the other

11/06 . . . supported individually on pivotally-mounted flaps or shelves

11/08 . . . arranged in two columns in staggered relationship

11/10 . . . two or more magazines having a common delivery chute

11/12 . . . with means for automatically changing to reserve stacks

11/14 . . . with means for raising the stack of articles to permit delivery of the topmost

11/16 . . . Delivery means

11/18 . . . . Recessed drawers

11/20 . . . . Pushers actuated directly by hand

11/22 . . . . Pushers actuated indirectly by hand, e.g. through cranks or levers

11/24 . . . . Rotary or oscillatory members

11/26 . . . . Endless bands

11/28 . . in which the magazines are inclined

11/30 . . . two or more magazines having independent delivery

11/32 . . . two or more magazines having a common delivery chute

11/34 . . in which the magazines are of zig-zag form

11/36 . . in which the magazines are of helical or spiral form

11/38 . . in which the magazines are horizontal

11/40 . . . the articles being delivered by hand-operated means

11/42 . . . the articles being delivered by motor-driven means

11/44 . . in which magazines the articles are stored in bulk

11/46 . from movable storage containers or supports

11/48 . . the storage containers or supports, e.g. magazine, being pivotally mounted (articles supported on pivotally-mounted flaps or shelves in magazines G07F 11/06)

11/50 . . the storage containers or supports being rotatably mounted

11/52 . . . about horizontal axes
11/54 . . . about vertical axes
11/56 . . . . the storage containers or supports both rotating and moving axially
11/58 . . the articles being supported on or by endless belts or like conveyers
11/60 . . the storage containers or supports being rectilinearly movable (endless belts or like conveyers G07F 11/58)
11/62 . in which the articles are stored in compartments in fixed receptacles
11/64 . in which the articles are individually suspended from stationary supports
11/66 . in which the articles are dispensed by cutting from a mass
11/68 . in which the articles are torn or severed from strips or sheets
11/70 . in which the articles are formed in the apparatus from components, blanks, or material constituents
11/72 . Auxiliary equipments, e.g. for lighting cigars, opening bottles

13/00 Coin-freed apparatus for controlling dispensing of fluids, semiliquids or granular material from reservoirs
13/02 . by volume
13/04 . by weight
13/06 . with selective dispensing of different fluids or materials or mixtures thereof
13/08 . in the form of a spray
13/10 . with associated dispensing of containers, e.g. cups or other articles (dispensing discrete articles per se G07F 11/00)

15/00 Coin-freed apparatus with meter-controlled dispensing of liquid, gas, or electricity (tariff-metering apparatus in general G01D 4/00)
15/02 . in which the quantity mechanism is set forward by hand after insertion of a coin
15/04 . in which the quantity mechanism is set forward automatically by the insertion of a coin
15/06 . with means for prepaying basic charges, e.g. rent for meters
15/08 . with means for varying the tariff or changing the price
15/10 . with alarm or warning devices, e.g. indicating the interrupting of the supply
15/12 . in which metering is on a time basis

17/00 Coin-freed apparatus for hiring articles; **Coin-freed facilities or services** (picture juke-boxes G03B; prepayment telephone systems H04M 17/00)
17/02 . for optical devices, e.g. telescopes
17/04 . for anthropometrical measurements such as weight, height, strength
17/06 . for inflating-pumps
17/08 . for seats or footstools
17/10 . for means for safe-keeping of property, left temporarily, e.g. by fastening the property
17/12 . . comprising lockable containers, e.g. for accepting clothes to be cleaned
17/14 . for fastenings for doors (of containers for safe-keeping G07F 17/12); for turnstiles
17/16 . for devices exhibiting advertisements, announcements, pictures, or the like
17/18 . for washing or drying persons
17/20 . for washing or drying articles, e.g. clothes, motor cars
17/22 . for cleaning and polishing boots or shoes
17/24 . for parking meters (devices for checking parking time G07C 1/30)
17/26 . for printing, stamping, franking, typing, or teleprinting apparatus (ticket printing or like apparatus G07F 17/42)
17/28 . for radio apparatus
17/30 . for musical instruments (recording or playback apparatus G11B)
17/32 . for games, toys, sports, or amusements
17/34 . . depending on the stopping of moving members, e.g. "fruit" machines
17/36 . . Age, character, or fortune telling apparatus
17/38 . . Ball games; Shooting apparatus
17/40 . for devices for accepting orders, advertisements, or the like
17/42 . for ticket printing or like apparatus

19/00 Complete banking systems; **Coded card-freed arrangements adapted for dispensing or receiving monies or the like and posting such transactions to existing accounts, e.g. automatic teller machines** (mechanisms in general actuated by objects other than coins G07F 7/00; data processing equipment for bank accounting G06Q 40/00; handling coins or paper currencies apart from coin-freed or like apparatus G07D) **[5]**

G07G REGISTERING THE RECEIPT OF CASH, VALUABLES, OR TOKENS (digital computing in general G06C, G06F) **[4]**

1/00 Cash registers (alarm indicators G07G 3/00)
1/01 . Details for indicating (displaying information in general G09F, G09G) **[4]**
1/06 . . with provision for the noting of the money to be paid **[4]**
1/08 . . with rotating drums which display the money entered **[4]**
1/10 . mechanically operated **[4]**
1/12 . electronically operated (digital data processing aspects G06Q 20/00) **[4]**
1/14 . . Systems including one or more distant stations co-operating with a central processing unit (data transmission in general H04L; telemetry systems for selectively calling a substation from a main station H04Q 9/00) **[4]**

3/00 Alarm indicators, e.g. bells

5/00 Receipt-giving machines (cash registers giving receipts G07G 1/00)

G08 SIGNALLING

G08B **SIGNALLING OR CALLING SYSTEMS**; **ORDER TELEGRAPHS**; **ALARM SYSTEMS** (signalling arrangements on vehicles B60Q, B62D 41/00; railway signalling systems or devices B61L; on cycles B62J 3/00, B62J 6/00; safes or strong-rooms with alarm devices E05G; signalling or alarm devices in mines E21F 17/18; sensitive measuring elements, see the appropriate subclasses of G01; traffic control systems G08G; visual indicating means G09; sound-producing devices G10; radio or near-field calling systems H04B 5/00, H04B 7/00; loudspeakers, microphones, gramophone pick-ups or like acoustic electromechanical transducers H04R)

(1) This subclass covers also means for identifying or incapacitating burglars or the like.
(2) This subclass does not cover:
- the mere provision of an audible or visible signalling device on measuring or switching apparatus;
- alarm systems for indicating that a specific variable has exceeded, or fallen below, a predetermined value, which are covered by the relevant subclasses of class G01 for the measurement of that variable.
- alarms for specific processes or types of machines or apparatus, which are covered by the relevant subclasses for the processes, machines, or apparatus.

(3) In this subclass, the following term is used with the meaning indicated:
- "systems" may cover also devices peculiar thereto.

Subclass index

1/00 **Systems for signalling characterised solely by the form of transmission of the signal**

1/02 . using only mechanical transmission
1/04 . using hydraulic transmission; using pneumatic transmission
1/06 . . hydraulic only
1/08 . using electric transmission

3/00 **Audible signalling systems**; **Audible personal calling systems** (audible indication of time signals G04B 21/00, G04C 21/00)

3/02 . using only mechanical transmission
3/06 . using hydraulic transmission; using pneumatic transmission
3/10 . using electric transmission; using electromagnetic transmission
3/14 . using explosives

5/00 **Visible signalling systems, e.g. personal calling systems, remote indication of seats occupied** (display of time signals G04B 19/00, G04C 17/00, G04C 19/00, G04G 9/00; for display of alphanumeric information G09F; flags, banners G09F)

5/02 . using only mechanical transmission
5/06 . using hydraulic transmission; using pneumatic transmission
5/14 . . with indicator element moving about a pivot, e.g. hinged flap, rotating vane
5/16 . . . with reset means necessitating a separate operation to return the indicator element
5/18 . . with indicator element moving rectilinearly
5/20 . . . with reset means necessitating a separate operation to return the indicator element
5/22 . using electric transmission; using electromagnetic transmission
5/24 . . with indicator element moving about a pivot, e.g. hinged flap, rotating vane
5/26 . . . with reset means necessitating a separate operation to return the indicator element
5/28 . . . with hinged flap or arm
5/30 . . . with rotating or oscillating members, e.g. vanes
5/32 . . with indicator element moving rectilinearly
5/34 . . . with reset means necessitating a separate operation to return the indicator element
5/36 . . using visible light sources
5/38 . . . using flashing light
5/40 . using smoke, fire, or coloured gases (sky-writing G09F 21/16)

6/00 **Tactile signalling systems, e.g. personal calling systems** (indication of time by feeling G04B 25/02; deaf-aid sets H04R 25/00) **[6]**

7/00 **Signalling systems according to more than one of groups G08B 3/00 to G08B 6/00** (combinations of display arrangements with audible advertising G09F 27/00); **Personal calling systems according to more than one of groups G08B 3/00 to G08B 6/00**

7/02 . using mechanical transmission

7/04 . using hydraulic transmission; using pneumatic transmission
7/06 . using electric transmission
7/08 . using explosives

9/00 Order telegraph apparatus, i.e. means for transmitting one of a finite number of different orders at the discretion of the user, e.g. bridge to engine room orders in ships (signalling devices in mines E21F 17/18)

9/02 . Details
9/04 . . Means for recording operation of the apparatus
9/06 . . Means for indicating disagreement between orders given and those carried out
9/08 . mechanical
9/10 . . using ratchet
9/12 . . using rotary shaft
9/14 . hydraulic; pneumatic
9/16 . . using ratchet
9/18 . . by varying displacement of the fluid
9/20 . . by varying pressure of the fluid

13/00 Burglar, theft, or intruder alarms (vehicle theft alarms B60R 25/10; cycle theft alarms B62H 5/00)

13/02 . Mechanical actuation
13/04 . . by breaking of glass
13/06 . . by tampering with fastening (alarm locks E05B 45/00; alarm devices on safes E05G 1/10)
13/08 . . by opening, e.g. of door, of window, of drawer, of shutter, of curtain, of blind
13/10 . . by pressure on floors, floor coverings, stair treads, counters, or tills
13/12 . . by the breaking or disturbance of stretched cords or wires
13/14 . . by lifting or attempted removal of hand-portable articles
13/16 . Actuation by interference with mechanical vibrations in air or other fluid
13/18 . Actuation by interference with heat, light, or radiation of shorter wavelength; Actuation by intruding sources of heat, light, or radiation of shorter wavelength
13/181 . . using active radiation detection systems **[5]**
13/183 . . . by interruption of a radiation beam or barrier (light barriers G01V 8/10) **[5]**
13/184 . . . . using radiation reflectors **[5]**
13/186 . . . . using light guides, e.g. optical fibres **[5]**
13/187 . . . by interference of a radiation field **[5]**
13/189 . . using passive radiation detection systems **[5]**
13/19 . . . using infra-red-radiation detection systems **[5]**
13/191 . . . . using pyroelectric sensor means **[5]**
13/193 . . . . using focusing means **[5]**
13/194 . . . using image scanning and comparing systems **[5]**
13/196 . . . . using television cameras **[5]**
13/20 . Actuation by change of fluid pressure
13/22 . Electrical actuation
13/24 . . by interference with electromagnetic field distribution
13/26 . . by proximity of an intruder causing variation in capacitance or inductance of a circuit

15/00 Identifying, scaring, or incapacitating burglars, thieves, or intruders, e.g. by explosives (burglar traps, or the like, on safes E05G 5/02)

15/02 . with smoke, gas, or coloured or odorous powder or liquid

17/00 Fire alarms; **Alarms responsive to explosion** (temperature-responsive elements G01K)

17/02 . Mechanical actuation of the alarm, e.g. by the breaking of a wire
17/04 . Hydraulic or pneumatic actuation of the alarm, e.g. by change of fluid pressure
17/06 . Electric actuation of the alarm, e.g. using a thermally-operated switch (thermally-operated electric switches per se H01H 37/00)
17/08 . Actuation involving the use of explosive means
17/10 . Actuation by presence of smoke or gases
17/103 . . using a light emitting and receiving device **[5]**
17/107 . . . for detecting light-scattering due to smoke **[5]**
17/11 . . using an ionisation chamber for detecting smoke or gas (vacuum gauges making use of ionisation effects G01L 21/30; gas analysis by investigating the ionisation G01N 27/62) **[5]**
17/113 . . . Constructional details (discharge tubes for measuring pressure of introduced gas, or for detecting presence of gas, in general H01J 41/02) **[5]**
17/117 . . by using a detection device for specific gases, e.g. combustion products, produced by the fire (G08B 17/103, G08B 17/11 take precedence; investigating or analysing gases in general G01N, e.g. by using electric means G01N 27/00) **[5]**
17/12 . Actuation by presence of radiation or particles, e.g. of infra-red radiation, of ions

19/00 Alarms responsive to two or more different undesired or abnormal conditions, e.g. burglary and fire, abnormal temperature and abnormal rate of flow

19/02 . Alarm responsive to formation or anticipated formation of ice (indicating weather conditions G01W 1/00)

21/00 Alarms responsive to a single specified undesired or abnormal condition and not otherwise provided for

21/02 . Alarms for ensuring the safety of persons **[7]**
21/04 . . responsive to non-activity, e.g. of elderly persons (G08B 21/06 takes precedence) **[7]**
21/06 . . indicating a condition of sleep, e.g. anti-dozing alarms (safety devices for propulsion-unit control of vehicles responsive to incapacity of driver B60K 28/06) **[7]**
21/08 . . responsive to the presence of persons in a body of water, e.g. a swimming pool; responsive to an abnormal condition of a body of water **[7]**
21/10 . . responsive to calamitous events, e.g. tornados, earthquakes (seismology G01V 1/00; indicating weather conditions G01W 1/00) **[7]**
21/12 . . responsive to undesired emission of substances, e.g. pollution alarms (alarms on pipe-lines F17D 3/01) **[7]**
21/14 . . . Toxic gas alarms (G08B 21/16 takes precedence) **[7]**
21/16 . . . Combustible gas alarms **[7]**
21/18 . Status alarms (G08B 21/02 takes precedence) **[7]**
21/20 . . responsive to moisture **[7]**
21/22 . . responsive to presence or absence of persons **[7]**
21/24 . . Reminder alarms, e.g. anti-loss alarms (devices to prevent loss of bags or the like A45C 13/24) **[7]**

23/00 Alarms responsive to unspecified undesired or abnormal conditions

25/00 **Alarm systems in which the location of the alarm condition is signalled to a central station, e.g. fire or police telegraphic systems**

25/01 . characterised by the transmission medium **[5]**

25/04 . . using a single signalling line, e.g. in a closed loop **[5]**

25/06 . . using power transmission lines (systems in general for transmission of information via power distribution lines H04B 3/54) **[5]**

25/08 . . using communication transmission lines (telephonic communication systems combined with alarm systems H04M 11/04) **[5]**

25/10 . . using wireless transmission systems **[5]**

25/12 . Manually actuated calamity alarm transmitting arrangements **[5]**

25/14 . Central alarm receiver or annunciator arrangements **[5]**

26/00 **Alarm systems in which substations are interrogated in succession by a central station**

27/00 **Alarm systems in which the alarm condition is signalled from a central station to a plurality of substations**

29/00 **Checking or monitoring of signalling or alarm systems**; **Prevention or correction of operating errors, e.g. preventing unauthorised operation**

29/02 . Monitoring continuously signalling or alarm systems **[5]**

29/04 . . Monitoring of the detection circuits **[5]**

29/06 . . Monitoring of the line circuits, e.g. signalling of line faults (testing or locating faults in cables or lines in general G01R 31/02, G01R 31/08) **[5]**

29/08 . . . Signalling of tampering with the line circuit **[5]**

29/10 . . Monitoring of the annunciator circuits **[5]**

29/12 . Checking intermittently signalling or alarm systems **[5]**

29/14 . . checking the detection circuits **[5]**

29/16 . Security signalling or alarm systems, e.g. redundant systems **[5]**

29/18 . Prevention or correction of operating errors (G08B 29/02, G08B 29/12 take precedence) **[5]**

29/20 . . Calibration, including self-calibrating arrangements **[5]**

29/22 . . . Provisions facilitating manual calibration, e.g. input or output provisions for testing; Holding of intermittent values to permit measurement **[5]**

29/24 . . . Self-calibration, e.g. compensating for environmental drift or ageing of components **[5]**

29/26 . . . . by updating and storing reference thresholds **[5]**

29/28 . . . . by changing the gain of an amplifier **[5]**

31/00 **Predictive alarm systems characterised by extrapolation or other computation using updated historic data [5]**

G08C **TRANSMISSION SYSTEMS FOR MEASURED VALUES, CONTROL OR SIMILAR SIGNALS** (fluid pressure transmission systems F15B; mechanical means for transferring the output of a sensing member into a different variable G01D 5/00; mechanical control systems G05G) **[4]**

Subclass index

13/00 **Arrangements for influencing the relationship between signals at input and output, e.g. differentiating, delaying**

13/02 . to yield a signal which is a function of two or more signals, e.g. sum, product

15/00 **Arrangements characterised by the use of multiplexing for the transmission of a plurality of signals over a common path**

15/02 . simultaneously, i.e. using frequency division

15/04 . . the signals being modulated on carrier frequencies

15/06 . successively, i.e. using time division

15/08 . . the signals being represented by amplitude of current or voltage in transmission link

15/10 . . the signals being represented by frequencies or phase of current or voltage in transmission link

15/12 . . the signals being represented by pulse characteristics in transmission link

17/00 **Arrangements for transmitting signals characterised by the use of a wireless electrical link [6]**

17/02 . using a radio link **[6]**

17/04 . using magnetically coupled devices **[6]**

17/06 . using capacity coupling **[6]**

19/00 **Electric signal transmission systems** (G08C 17/00 takes precedence)

19/02 . in which the signal transmitted is magnitude of current or voltage (G08C 19/36, G08C 19/38 take precedence)

19/04 . . using variable resistance

19/06 . . using variable inductance

19/08 . . . differentially influencing two coils

19/10 . . using variable capacitance

19/12 . in which the signal transmitted is frequency or phase of ac

19/14 . . using combination of fixed frequencies

19/16 . in which transmission is by pulses

19/18 . . using a variable number of pulses in a train
19/20 . . . operating on dynamo-electric devices, e.g. step motor
19/22 . . by varying the duration of individual pulses
19/24 . . using time shift of pulses
19/26 . . by varying pulse repetition frequency
19/28 . . using pulse code
19/30 . in which transmission is by selection of one or more conductors or channels from a plurality of conductors or channels (G08C 19/38 takes precedence)
19/32 . . of one conductor or channel
19/34 . . of a combination of conductors or channels
19/36 . using optical means to convert the input signal
19/38 . using dynamo-electric devices (operated by pulses G08C 19/20)
19/40 . . of which only the rotor or the stator carries a winding to which a signal is applied, e.g. using step motor
19/42 . . . having three stator poles
19/44 . . . having more than three stator poles
19/46 . . of which both rotor and stator carry windings (having squirrel-cage rotor G08C 19/40)
19/48 . . . being of the type with a three-phase stator and a rotor fed by constant-frequency ac, e.g. selsyn, magslip

21/00 Systems for transmitting the position of an object with respect to a predetermined reference system, e.g. tele-autographic system [5]

23/00 Non-electric signal transmission systems, e.g. optical systems
23/02 . using acoustic waves **[6]**
23/04 . using light waves, e.g. infra-red **[6]**
23/06 . . through light guides, e.g. optical fibres **[6]**

25/00 Arrangements for preventing or correcting errors; Monitoring arrangements
25/02 . by signalling back from receiving station to transmitting station
25/04 . by recording transmitted signals

G08G TRAFFIC CONTROL SYSTEMS (guiding railway traffic, ensuring the safety of railway traffic B61L; arrangement of road signs or traffic signals E01F 9/00; radar systems or analogous systems, designed for traffic control G01S 13/91; sonar or lidar systems specially designed for traffic control G01S 15/88, G01S 17/88) **[2]**

Note

This subclass covers:
– identification of traffic offenders;
– indicating the position of vehicles for traffic control purposes; **[7]**
– navigation systems for traffic control purposes, i.e. systems in which the navigation is not performed autonomously by or in the vehicles, but where the vehicles are guided by instructions transmitted to them; **[7]**
– indication of free spaces in parking areas.

1/00 Traffic control systems for road vehicles
1/005 . including pedestrian guidance indicator **[5]**
1/01 . Detecting movement of traffic to be counted or controlled (G08G 1/07 to G08G 1/14 take precedence; road pricing or congestion charging of vehicles or vehicle users G07B 15/06)
1/015 . . with provision for distinguishing between motor cars and cycles
1/017 . . identifying vehicles (G08G 1/015, G08G 1/054 take precedence) **[5]**
1/02 . . using treadles built into the road (pads or other sensitive devices responsive to passage of vehicles E01F 11/00)
1/04 . . using optical or ultrasonic detectors
1/042 . . using inductive or magnetic detectors **[5]**
1/048 . . with provision for compensation of environmental or other condition, e.g. snow, vehicle stopped at detector **[5]**
1/052 . . with provision for determining speed or overspeed **[5]**
1/054 . . . photographing overspeeding vehicles **[5]**
1/056 . . with provision for distinguishing direction of travel **[5]**
1/065 . by counting the vehicles in a section of the road or in a parking area, i.e. comparing incoming count with outgoing count (road pricing or congestion charging of vehicles or vehicle users G07B 15/06)
1/07 . Controlling traffic signals
1/08 . . according to detected number or speed of vehicles
1/081 . . Plural intersections under common control **[5]**
1/082 . . . Controlling the time between beginning of the same phase of a cycle at adjacent intersections **[5]**
1/083 . . . Controlling the allocation of time between phases of a cycle **[5]**
1/085 . . using a free-running cyclic timer
1/087 . . Override of traffic control, e.g. by signal transmitted by an emergency vehicle **[5]**
1/09 . Arrangements for giving variable traffic instructions (indicating arrangements for variable information by selection or combination of individual elements G09F 9/00)
1/095 . . Traffic lights
1/0955 . . . transportable **[5]**
1/096 . . provided with indicators in which a mark progresses showing the time elapsed, e.g. of green phase
1/0962 . . having an indicator mounted inside the vehicle, e.g. giving voice messages **[5]**
1/0965 . . . responding to signals from another vehicle, e.g. emergency vehicle **[5]**
1/0967 . . . Systems involving transmission of highway information, e.g. weather, speed limits (transmission of navigation instructions to the vehicle G08G 1/0968) **[5]**
1/0968 . . . Systems involving transmission of navigation instructions to the vehicle **[5]**
1/0969 . . . . having a display in the form of a map **[5]**

1/097 . Supervising of traffic control systems, e.g. by giving an alarm if two crossing streets have green light simultaneously

1/123 . indicating the position of vehicles, e.g. scheduled vehicles (transmission of navigation instructions to vehicles G08G 1/0968) **[5]**

1/127 . . to a central station **[5]**

1/13 . . . the indicator being in the form of a map **[5]**

1/133 . . within the vehicle **[5]**

1/137 . . . the indicator being in the form of a map **[5]**

1/14 . indicating individual free spaces in parking areas

1/16 . Anti-collision systems (road vehicle drive control systems for predicting or avoiding probable or impending collision otherwise than by control of a particular sub-unit B60W 30/08) **[2,8]**

3/00 **Traffic control systems for marine craft** (marking of navigational route B63B 22/16, B63B 51/00)

3/02 . Anti-collision systems

5/00 **Traffic control systems for aircraft [2]**

5/02 . Automatic landing aids, i.e. systems in which flight data of incoming planes are processed to provide landing data (landing aids fitted in or to aircraft B64D 45/04; visual or acoustic landing aids B64F 1/18)

5/04 . Anti-collision systems

5/06 . for control when on the ground **[2]**

7/00 **Traffic control systems for simultaneous control of two or more different kinds of craft [2]**

7/02 . Anti-collision systems **[2]**

9/00 **Traffic control systems for craft where the kind of craft is irrelevant or unspecified [2]**

9/02 . Anti-collision systems **[2]**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

G09 EDUCATING; CRYPTOGRAPHY; DISPLAY; ADVERTISING; SEALS

G09B EDUCATIONAL OR DEMONSTRATION APPLIANCES; APPLIANCES FOR TEACHING, OR COMMUNICATING WITH, THE BLIND, DEAF OR MUTE; MODELS; PLANETARIA; GLOBES; MAPS; DIAGRAMS (devices for psychotechnics or for testing reaction times A61B 5/16; games, sports, amusements A63; projectors, projector screens G03B)

(1) This subclass covers :
- simulators regarded as teaching or training devices, which is the case if they give perceptible sensations having a likeness to the sensations a student would experience in reality in response to actions taken by him;
- models of buildings, installations, or the like.

(2) This subclass does not cover :
- simulators which merely demonstrate or illustrate the function of an apparatus or of a system by means involving computing, and therefore cannot be regarded as teaching or training devices. Such simulators are covered by class G06, if no provision exists elsewhere;
- components of simulators, if identical with real devices or machines, which are covered by the relevant subclasses for these devices or machines and not by class G09.

Subclass index

1/00 Manually- or mechanically-operated educational appliances using elements forming or bearing symbols, signs, pictures, or the like which are arranged or adapted to be arranged in one or more particular ways (puzzle-games A63F 9/00; advertising or displaying in general G09F)

1/02 . and having a support carrying or adapted to carry the elements

1/04 . . the elements each bearing a single symbol or a single combination of symbols

1/06 . . . and being attachable to, or mounted on, the support

1/08 . . . . by means of magnets

1/10 . . . . by means of pins and holes

1/12 . . . . by means of ring-like securing elements (sheets temporarily attached together by rings or coils B42F 3/00, B42F 5/00)

1/14 . . . . the elements being slidably mounted on the support

1/16 . . the elements each bearing a plurality of different symbols, signs, or combinations of symbols and signs, only one symbol, sign, or combination thereof, of each element to be used at a time

1/18 . . . the elements being rotatable

1/20 . . . . and bearing the symbols on a surface parallel to the axis of rotation

1/22 . . . . and bearing the symbols on a surface perpendicular to the axis of rotation

1/24 . . . the elements being in flexible-strip form, e.g. endless bands

1/26 . . . the elements being arranged in fan form

1/28 . . . the elements being slidable

1/30 . . wherein the elements are adapted to be arranged in co-operation with the support to form symbols (without special support G09B 1/40)

1/32 . comprising elements to be used without a special support

1/34 . . the elements to be placed loosely in adjacent relationship

1/36 . . the elements being connectible by corresponding projections and recesses

1/38 . . the elements being connectible magnetically

1/40 . . to form symbols or signs by appropriate arrangement

3/00 Manually- or mechanically-operated teaching appliances working with questions and answers (electrically-operated G09B 7/00; advertising or displaying in general G09F)

3/02 . of the type wherein the student is expected to construct an answer to the question which is presented or wherein the machine gives an answer to the question presented by the student

3/04 . . of chart form (masks G09B 17/02)

3/06 . of the multiple-choice answer type, i.e. where a given question is provided with a series of answers and a choice has to be made

3/08 . . of chart form (having one set of answers common to a plurality of questions G09B 3/12)

3/10 . . wherein one set of answers is common to a plurality of questions

3/12 . . . of chart form

5/00 **Electrically-operated educational appliances** (working with questions and answers G09B 7/00; simulators G09B 9/00; advertising or displaying in general G09F) **[2]**

Note

Group G09B 5/08 takes precedence over groups G09B 5/02 to G09B 5/06. **[2]**

5/02 . with visual presentation of the material to be studied, e.g. using film strip
5/04 . with audible presentation of the material to be studied (reading and recognising printed or written characters G06K 9/00; sound-recording or reproducing G11B)
5/06 . with both visual and audible presentation of the material to be studied
5/08 . providing for individual presentation of information to a plurality of student stations **[2]**
5/10 . . all student stations being capable of presenting the same information simultaneously (G09B 5/14 takes precedence) **[2]**
5/12 . . different stations being capable of presenting different information simultaneously (G09B 5/14 takes precedence) **[2]**
5/14 . . with provision for individual teacher-student communication **[2]**

7/00 **Electrically-operated teaching apparatus or devices working with questions and answers** (mechanically-operated G09B 3/00; computing arrangements G06F)
7/02 . of the type wherein the student is expected to construct an answer to the question which is presented or wherein the machine gives an answer to the question presented by the student
7/04 . . characterised by modifying the teaching programme in response to a wrong answer, e.g. repeating the question, supplying a further explanation
7/06 . of the multiple-choice answer type, i.e. where a given question is provided with a series of answers and a choice has to be made from the answers
7/07 . . providing for individual presentation of questions to a plurality of student stations **[2]**
7/073 . . . all student stations being capable of presenting the same questions simultaneously **[2]**
7/077 . . . different stations being capable of presenting different questions simultaneously **[2]**
7/08 . . characterised by modifying the teaching programme in response to a wrong answer, e.g. repeating the question, supplying further information
7/10 . . wherein a set of answers is common to a plurality of questions
7/12 . . . characterised by modifying the teaching programme in response to a wrong answer, e.g. repeating the question, supplying further information

9/00 **Simulators for teaching or training purposes** (for the use of weapons F41; computing aspects G06)
9/02 . for teaching control of vehicles or other craft
9/04 . . for teaching control of land vehicles
9/042 . . . providing simulation in a real vehicle (G09B 9/052, G09B 9/058 take precedence) **[5]**
9/048 . . . a model being viewed and manoeuvred from a remote point (G09B 9/052, G09B 9/058 take precedence) **[5]**
9/05 . . . the view from a vehicle being simulated (G09B 9/052, G09B 9/058 take precedence) **[5]**
9/052 . . . characterised by provision for recording or measuring trainee's performance (devices for psychotechnics, e.g. for vehicle drivers, A61B 5/16, A61B 5/18) **[5]**
9/058 . . . for teaching control of cycles or motocycles **[5]**
9/06 . . for teaching control of ships, boats, or other waterborne vehicles **[2]**
9/08 . . for teaching control of aircraft, e.g. Link trainer
9/10 . . . with simulated flight- or engine-generated force being applied to aircraft occupant (G09B 9/28 takes precedence) **[5]**
9/12 . . . Motion systems for aircraft simulators **[5]**
9/14 . . . . controlled by fluid actuated piston or cylinder ram **[5]**
9/16 . . . Ambient or aircraft conditions simulated or indicated by instrument or alarm **[5]**
9/18 . . . . Condition of engine or fuel supply **[5]**
9/20 . . . . Simulation or indication of aircraft attitude **[5]**
9/22 . . . including aircraft sound simulation **[5]**
9/24 . . . including display or recording of simulated flight path **[5]**
9/26 . . . Simulation of radio-navigation **[5]**
9/28 . . . Simulation of stick forces or the like **[5]**
9/30 . . . Simulation of view from aircraft **[5]**
9/32 . . . . by projected image (G09B 9/36 takes precedence) **[5]**
9/34 . . . . by cathode-ray screen display (G09B 9/36 takes precedence) **[5]**
9/36 . . . . Simulation of night or reduced visibility flight **[5]**
9/38 . . . . . Simulation of runway outlining or approach lights **[5]**
9/40 . . . Simulation of airborne radar **[5]**
9/42 . . . Aircraft, aircraft simulator, or means connected thereto, travelling on the ground or water during simulated flight training **[5]**
9/44 . . . providing simulation in a real aircraft flying through the atmosphere without restriction of its path **[5]**
9/46 . . . the aircraft being a helicopter **[5]**

Note

When classifying in group G09B 9/46, classification is also made in other appropriate subgroups of group G09B 9/08, if of interest. **[5]**

9/48 . . . a model being viewed and manoeuvred from a remote point **[5]**
9/50 . . . Automatically directing the course of the aircraft **[5]**
9/52 . . for teaching control of an outer space vehicle **[5]**
9/54 . Simulation of radar (G09B 9/40 takes precedence) **[5]**
9/56 . Simulation of sonar **[5]**

11/00 **Teaching hand-writing, shorthand, drawing, or painting**
11/02 . Finger, hand, or arm supporting devices
11/04 . Guide sheets or plates; Tracing charts (templets for drawing purposes B43L 13/20)
11/06 . Devices involving the use of transparent or translucent tracing material, e.g. copy books
11/08 . Teaching shorthand
11/10 . Teaching painting

13/00 Teaching typing

13/02 . Dummy practice keyboard apparatus (for teaching music G09B 15/08)

13/04 . Devices used in association with a real typewriter, teleprinter, or the like

15/00 Teaching music (metronomes G04F 5/02)

15/02 . Boards or like means for providing an indication of notes

15/04 . . with sound-emitters

15/06 . Devices for exercising or strengthening fingers or arms; Devices for holding fingers or arms in a proper position for playing (for teaching typing G09B 13/00; exercising apparatus for developing or strengthening the muscles for physical training A63B 21/00, A63B 23/00)

15/08 . Practice keyboards (for teaching typing G09B 13/02)

17/00 Teaching reading (teaching lip-reading G09B 21/06)

17/02 . Line indicators or other guides or masks

17/04 . for increasing the rate of reading; Reading rate control

19/00 Teaching not covered by other main groups of this subclass (teaching or practice apparatus for gun-aiming or gun-laying F41G 3/26)

19/02 . Counting; Calculating (abacus G06C 1/00)

19/04 . Speaking (with audible presentation of the material to be studied G09B 5/04)

19/06 . Foreign languages (with audible presentation of the material to be studied G09B 5/04)

19/08 . . Printed or written appliances, e.g. textbooks, bilingual letter assemblies, charts

19/10 . Modelling

19/12 . Clock-reading

19/14 . Traffic procedures, e.g. traffic regulations

19/16 . Control of vehicles or other craft (simulators G09B 9/02)

19/18 . Book-keeping or economics

19/20 . Needlework

19/22 . Games, e.g. card games

19/24 . Use of tools

19/26 . Dot-and-dash telegraph codes **[2]**

21/00 Teaching, or communicating with, the blind, deaf or mute (audible presentation of material to be studied G09B 5/04; devices or methods for replacing direct visual or auditory perception by another kind of perception A61F 9/08, A61F 11/04; audible indication of meter readings or of colour G01D 7/12; watches for blind persons G04B 25/02; methods or arrangements for reading or recognising printed or written characters G06K 9/00; speech analysis, speech recognition G10L; sound-recording or reproducing, per se G11B) **[2,4]**

21/02 . Devices for Braille writing (typewriters for Braille B41J 3/32)

21/04 . Devices for conversing with the deaf-blind

21/06 . Devices for teaching lip-reading

23/00 Models for scientific, medical, or mathematical purposes, e.g. full-sized device for demonstration purposes (in the nature of toys A63H)

23/02 . for mathematics (for statics or dynamics G09B 23/08)

23/04 . . for geometry, trigonometry, projection, or perspective (for surveying G09B 25/06)

23/06 . for physics

23/08 . . for statics or dynamics

23/10 . . . of solid bodies

23/12 . . . of liquids or gases

23/14 . . for acoustics

23/16 . . for science of heat

23/18 . . for electricity or magnetism

23/20 . . for atomic physics or nucleonics

23/22 . . for optics

23/24 . for chemistry

23/26 . for molecular structures; for crystallography

23/28 . for medicine

23/30 . . Anatomical models (dental articulators A61C 11/00)

23/32 . . . with moving parts

23/34 . . . with removable parts

23/36 . for zoology

23/38 . for botany

23/40 . for geology

25/00 Models for purposes not provided for in group G09B 23/00, e.g. full-sized devices for demonstration purposes (model vehicles, tracks therefor, models in the nature of toys A63H)

25/02 . of industrial processes; of machinery

25/04 . of buildings

25/06 . for surveying; for geography, e.g. relief models (globes G09B 27/00; maps G09B 29/00)

25/08 . of scenic effects, e.g. trees, rocks, water surfaces (for stage purposes A63J 1/00)

27/00 Planetaria; **Globes**

27/02 . Tellurions; Orreries

27/04 . Star maps

27/06 . Celestial globes

27/08 . Globes (celestial globes G09B 27/06)

29/00 Maps; **Plans**; **Charts**; **Diagrams, e.g. route diagram** (star maps G09B 27/04; devices for holding or supporting maps A47B 97/02; for computing purposes G06G 1/14, G06G 1/16; display boards G09F)

29/02 . sectional

29/04 . . the sections being arranged in the form of a foldable sheet or sheets

29/06 . of belt form, e.g. endless belt

29/08 . Hanging maps or the like

29/10 . Map spot or co-ordinate position indicators; Map-reading aids (optical projection apparatus G03B)

29/12 . Relief maps (relief models G09B 25/06)

29/14 . Local-time charts

G09C CIPHERING OR DECIPHERING APPARATUS FOR CRYPTOGRAPHIC OR OTHER PURPOSES INVOLVING THE NEED FOR SECRECY (secret communication H04K; arrangements for transmitting secret digital information H04L 9/00)

1/00 Apparatus or methods whereby a given sequence of signs, e.g. an intelligible text, is transformed into an unintelligible sequence of signs by transposing the signs or groups of signs or by replacing them by others according to a predetermined system (cryptographic typewriters G09C 3/00)
1/02 . by using a ciphering code in chart form
1/04 . with sign carriers or indicators moved relative to one another to positions determined by a permutation code or key, so as to indicate the appropriate corresponding clear or ciphered text
1/06 . wherein elements corresponding to the signs making up the clear text are operatively connected with elements corresponding to the signs making up the ciphered text, the connections, during operation of the apparatus, being automatically and continuously permuted by a coding or key member
1/08 . . the connections being mechanical
1/10 . . the connections being electrical
1/12 . . . comprising contact-bearing permutation discs
1/14 . . involving removable or interchangeable coding numbers, e.g. master tapes, punched cards

3/00 Typewriters for ciphering or deciphering cryptographic text (marking record carriers G06K)
3/02 . with auxiliary keys or keyboards acting on the original keys or keyboards
3/04 . wherein the operative connections between the keys and the type-bars are automatically and continuously permuted, during operation, by a coding or key member
3/06 . . the connections being mechanical
3/08 . . the connections being electrical
3/10 . . involving removable or interchangeable coding members, e.g. master tapes, punched cards

5/00 Ciphering or deciphering apparatus or methods not provided for in other groups of this subclass, e.g. involving the concealment or deformation of graphic data such as designs, written or printed messages

---

G09D RAILWAY OR LIKE TIME OR FARE TABLES; **PERPETUAL CALENDARS** (calendar blocks B42D 5/04; clockwork-driven G04B; comprising computing means G06C)

1/00 Railway or like time or fare tables; **Indicating or reading aids therefor** (essentially incorporating maps or route diagrams G09B; railway routing charts G09B; display devices, e.g. railway indicator boards, G09F)

3/00 Perpetual calendars
3/02 . with interchangeable members bearing the indicia
3/04 . wherein members bearing the indicia are movably mounted in the calendar
3/06 . . with rotatable members
3/08 . . . of disc form
3/10 . . with members in band form
3/12 . electrically operated

G09F DISPLAYING; **ADVERTISING**; **SIGNS**; **LABELS OR NAME-PLATES**; **SEALS** (display cases A47F; designs or pictures characterised by special or unusual light effects, e.g. changing, B44F 1/00; disposition of road signs or traffic signals E01F 9/00; lighting in general F21; arrangements for controlling light beams G02F 1/00; visible signalling arrangements or devices G08B 5/00; traffic control systems G08G; arrangements or circuits for control of indicating devices using static means to present variable information G09G; static indicating arrangements comprising integral associations of a plurality of light sources H01J, H01K, H01L, H05B 33/12)

(1) In this subclass, the following term is used with the meaning indicated:
– "sign" designates a mark or indication serving to make something recognisable, the information presented being non-varying, even if it is flashing; by way of example it covers, therefore, advertising hoardings, or luminous, or light reflecting, safety arrangements. **[3]**
(2) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems". **[7]**

Subclass index

1/00 Cardboard or like show-cards of foldable or flexible material

1/02 . Single substantially-flat cards

1/04 . Folded cards

1/06 . . to be erected in three dimensions (G09F 1/08 takes precedence)

1/08 . wholly or partly imitating the form of an object, e.g. of the article to be advertised

1/10 . Supports or holders for show-cards

1/12 . . Frames therefor

1/14 . . in the form of legs

3/00 Labels, tag tickets, or similar identification or indication means (medals or badges A44C 3/00; making labels B31D 1/02; sheets temporarily attached together B42F; labelling B65C; tags attached to, or associated with, an object, in order to enable detection of the object G01V 15/00; labels on record carriers G11B 23/38); **Seals**; **Postage or like stamps**

3/02 . Forms or constructions (layered products B32B)

3/03 . . of security seals

3/04 . to be fastened or secured by the material of the label itself, e.g. by thermo-adhesion (by a separate adhesive layer G09F 3/10)

3/06 . . by clamping action (by separate clamps G09F 3/16)

3/08 . Fastening or securing by means not forming part of the material of the label itself

3/10 . . by an adhesive layer

3/12 . . by pins, staples, or the like

3/14 . . by strings, straps, chains, or wires

3/16 . . by clamps

3/18 . . Casings, frames, or enclosures for labels

3/20 . . . for adjustable, removable, or interchangeable labels

5/00 Means for displaying samples

5/02 . Portable sample cases

5/04 . Cards of samples; Books of samples (packages comprising articles attached to cards, sheets, or webs for removal therefrom B65D 73/00)

7/00 Signs, name or number plates, letters, numerals, or symbols (vehicle registration number plates B60R 13/10); **Panels or boards** (show-cards G09F 1/00; indicating arrangements for variable information G09F 9/00, G09F 11/00; illuminated signs G09F 13/00; boards for notices or posters G09F 15/00)

7/02 . Signs, plates, panels, or boards using readily-detachable elements bearing or forming symbols

7/04 . . the elements being secured or adapted to be secured by magnetic means

7/06 . . the elements being secured or adapted to be secured by means of pins and holes

7/08 . . the elements being secured or adapted to be secured by means of grooves, rails, or slits

7/10 . . . and slidably mounted

7/12 . . the elements being secured or adapted to be secured by self-adhesion, moisture, suction, slow-drying adhesive, or the like

7/14 . . Constructional features of the symbol-bearing or -forming elements

7/16 . Letters, numerals, or other symbols, adapted for permanent fixing to a support

7/18 . Means for attaching signs, plates, panels, or boards to a supporting structure

7/20 . . for adjustably mounting

7/22 . . for rotatably or swingably mounting, e.g. for boards adapted to be rotated by the wind

9/00 Indicating arrangements for variable information in which the information is built-up on a support by selection or combination of individual elements (in which the variable information is permanently attached to a movable support G09F 11/00; light guides G02B 6/00; abacus G06C 1/00; slide rules G06G 1/00)

9/30 . in which the desired character or characters are formed by combining individual elements (panels comprising a number of electrodes in a single cell controlling light arriving from an independent light source, e.g. electro-optical or magneto-optical cell, G02F 1/00)

9/302 . . characterised by the form or geometrical disposition of the individual elements **[7]**

9/305 . . being the ends of optical fibres (G09F 9/302 takes precedence) **[7]**

9/307 . . being incandescent filaments (G09F 9/302 takes precedence; incandescent panels comprising a number of separate incandescent bodies, per se H01K 9/00) **[3,7]**

9/313 . . being gas discharge devices (G09F 9/302 takes precedence; gas discharge panels comprising a number of discharge gaps, per se H01J 17/49) **[3,7]**

9/33 . . being semiconductor devices, e.g. diodes (G09F 9/302 takes precedence; semiconductor integrated circuits comprising components specially adapted for emission of light, per se H01L 27/15) **[3,7]**

9/35 . . being liquid crystals (G09F 9/302 takes precedence; liquid crystal materials C09K 19/00) **[3,7]**

9/37 . . being movable elements (G09F 9/302 takes precedence) **[3,7]**

9/40 . in which the desired character is selected from a number of characters arranged one beside the other, e.g. on a common carrier plate

9/46 . in which the desired character is selected from a number of characters arranged one behind the other

11/00 Indicating arrangements for variable information in which the complete information is permanently attached to a movable support which brings it to the display position (using static means to present variable information G09F 9/00; showcases or show-cabinets with arrangements for continuously or intermittently moving the merchandise A47F 3/08)

11/02 . the display elements being secured to rotating members, e.g. drums, spindles

11/04 . . the elements being secured to rotating discs

11/06 . . the elements being stiff plates or cards (on rotating discs G09F 11/04)

11/08 . . the elements being flexible sheets (on rotating discs G09F 11/04)
11/10 . . Electric control therefor
11/12 . the display elements being carried by endless belts, chains, or the like
11/14 . . the elements being in the form of stiff flaps, boards, cards, or the like
11/15 . . the elements being flexible sheets
11/16 . . Electric control therefor
11/18 . the display elements being carried by belts, chains, or the like, other than endless
11/20 . . the elements being in the form of stiff flaps, boards, cards, or the like
11/21 . . the elements being flexible sheets
11/22 . . Electric control therefor
11/23 . the advertising or display material forming part of rotating members, e.g. in the form of perforations, prints, or transparencies on a drum or disc
11/235 . . Electric control therefor
11/24 . the advertising or display material forming part of a moving band, e.g. in the form of perforations, prints, or transparencies
11/26 . . of an endless band
11/28 . . . Electric control therefor
11/29 . . of a band other than endless
11/295 . . . Electric control therefor
11/30 . the display elements being fed one by one from a storage place to a display position
11/32 . . the feeding means comprising belts or chains, e.g. endless belts or chains
11/34 . . the feeding means comprising electromagnets

13/00 Illuminated signs; **Luminous advertising** (G09F 9/00, G09F 11/00 take precedence; control of displays in general using static means to present variable information G09G)

13/02 . Signs, boards, or panels, illuminated by artificial light sources positioned in front of the insignia
13/04 . Signs, boards, or panels, illuminated from behind the insignia
13/06 . . using individual cut-out symbols or cut-out silhouettes, e.g. perforated signs
13/08 . . using both translucent and non-translucent layers (backlighting of liquid crystal display panels G02F 1/13357)
13/10 . . . using transparencies
13/12 . . using a transparent mirror or other light- reflecting surface transparent to transmitted light whereby a sign, symbol, picture, or other information is visible only when illuminated
13/14 . . Arrangements of reflectors therein
13/16 . Signs formed of, or incorporating, reflecting elements or surfaces, e.g. warning signs having triangular or other geometrical shape
13/18 . Edge-illuminated signs
13/20 . with luminescent surfaces or parts (luminescent materials C09K 11/00; light sources using luminescence F21K 2/00)
13/22 . . electroluminescent (electroluminescent light sources per se H05B 33/00)
13/24 . using tubes or the like filled with liquid, e.g. bubbling liquid
13/26 . Signs formed by electric discharge tubes (by selective lighting G09F 9/00)
13/28 . Signs formed by filament-type lamps (by selective lighting G09F 9/00)
13/30 . with moving light sources, e.g. rotating luminous tubes
13/32 . with moving optical part or parts, e.g. mirrors
13/34 . with light sources co-operating with movable members, e.g. with shutters to cover or uncover the light source (apparatus wherein advertising or display material is moved in a continuous or intermittent succession G09F 11/00)
13/36 . . co-operating with rotating screening means
13/42 . with light sources activated by non-visible radiation (cathode ray image or pattern display tubes H01J 31/10; lamps with luminescent screens excited by cathode rays H01J 63/06)
13/44 . with gas as lighting source
13/46 . Advertising by fireworks

15/00 Boards, hoardings, pillars, or like structures for notices, placards, posters, or the like

15/02 . Bills, posters, or the like therefor

17/00 Flags; **Banners**; **Mountings therefor** (devices specially adapted or mounted for storing and repeatedly paying-out and re-storing lengths of material B65H 75/34)

19/00 Advertising or display means not otherwise provided for

19/02 . incorporating moving display members
19/04 . . operated by the opening or closing of doors, e.g. shop door
19/06 . . Writing devices
19/08 . . Dolls, faces, or other representations of living forms with moving parts (in the nature of toys A63H)
19/10 . . Devices demonstrating the action of an article to be advertised
19/12 . using special optical effects (designs or pictures characterised by special light effects B44F 1/00, e.g. changing pictures B44F 1/10)
19/14 . . displaying different signs depending upon the view-point of the observer
19/16 . . involving the use of mirrors
19/18 . . involving the use of optical projection means, e.g. projection of images on clouds (projection apparatus per se G03B)
19/20 . . with colour-mixing effects
19/22 . Advertising or display means on roads, walls, or similar surfaces, e.g. illuminated (illuminated signs in general G09F 13/00)

21/00 Mobile visual advertising

21/02 . by a carrier person or animal
21/04 . by land vehicles
21/06 . by aeroplanes, airships, balloons, or kites
21/08 . . the advertising matter being arranged on the aircraft
21/10 . . . illuminated
21/12 . . the advertising matter being towed by the aircraft (kites per se B64C 31/06)
21/14 . . . illuminated
21/16 . . Sky-writing (aircraft adaptation for sky-writing B64D 1/20)
21/18 . by ships or other floating means
21/20 . . illuminated
21/22 . Dispensing devices for pamphlets or similar advertising matter from vehicles (from aircraft B64D 1/00)

23/00 **Advertising on or in specific articles, e.g. ashtrays, letter-boxes** (on or in vehicles G09F 21/00; containers, packaging-elements, or packages, with auxiliary means or provisions for displaying articles B65D)

23/02 . the advertising matter being displayed by the operation of the article

23/04 . . illuminated

23/06 . the advertising matter being combined with articles for restaurants, shops, or offices (on paper articles G09F 23/10)

23/08 . . with tableware

23/10 . on paper articles, e.g. booklets, newspapers

23/12 . . on toilet paper

23/14 . on toys, games, puzzles, or similar devices

23/16 . on clocks, e.g. controlled by the clock mechanism

25/00 **Audible advertising** (sound-recording or reproducing in general G11B; public address systems H04R 27/00)

27/00 **Combined visual and audible advertising or displaying, e.g. for public address**

G09G **ARRANGEMENTS OR CIRCUITS FOR CONTROL OF INDICATING DEVICES USING STATIC MEANS TO PRESENT VARIABLE INFORMATION** (lighting in general F21; arrangements for displaying electric variables or waveforms G01R 13/00; devices or arrangements for the control of light beams G02F 1/00; indicating of time by visual means G04B 19/00, G04C 17/00, G04G 9/00; arrangements for transferring data between computers and peripheral equipment G06F 3/00; visible signalling arrangements or devices G08B 5/00; traffic control systems G08G; display, advertising, signs G09F, e.g. static indicating arrangements comprising an association of a number of separate sources or light control cells G09F 9/00; static indicating arrangements comprising integral associations of a number of light sources H01J, H01K, H01L, H05B 33/12; circuits in pulse counters for indicating the result H03K 21/18; coding, decoding or code conversion, in general H03M; reproducing a picture or pattern using electric signals representing parts thereof and produced by scanning an original H04N) **[3,4,5]**

(1) This subclass covers indicator consoles, i.e. arrangements or circuits for processing control signals to achieve the display, e.g. for the calling up, reception, storage, regeneration, coding, decoding, addressing of control signals. **[3]**

(2) This subclass does not cover the structural details of the indicating devices, such as panels or tubes per se, or assemblies of individual light sources, which are covered by the relevant subclasses, e.g. H01J, H01K, H01L, G02F, G09F, H05B. **[3]**

(3) Contrary to subclass H04N, in which are classified display devices capable of representing continuous brightness value scales, this subclass is limited to devices using only a discrete number of brightness values, e.g. visible/non-visible. **[3]**

(4) The visual effect may be produced by a luminescent screen scanned by an electron beam, directly by controlled light sources, by projection of light, from controlled light sources onto characters, symbols, or elements thereof drawn on a support, or by electric, magnetic, or acoustic control of the parameters of light rays from an independent source. **[3]**

1/00 **Control arrangements or circuits, of interest only in connection with cathode-ray tube indicators** (cathode-ray oscilloscopes G01R 13/20; television H04N) **[3]**

1/02 . Storage circuits (G09G 1/06 to G09G 1/28 take precedence) **[3]**

1/04 . Deflection circuits **[3]**

1/06 . using single beam tubes (G09G 1/26, G09G 1/28 take precedence) **[3]**

1/07 . . with combined raster scan and calligraphic display **[5]**

1/08 . . the beam directly tracing characters, the information to be displayed controlling the deflection as a function of time in two spatial co-ordinates, e.g. according to a cartesian co-ordinate system **[3]**

1/10 . . . the deflection signals being produced by essentially digital means, e.g. incrementally **[3]**

1/12 . . . the deflection signals being produced by essentially analogue means **[3]**

1/14 . . the beam tracing a pattern independent of the information to be displayed, this latter determining the parts of the pattern rendered respectively visible and invisible **[3]**

1/16 . . . the pattern of rectangular co-ordinates extending over the whole area of the screen, i.e. television type raster **[3]**

1/18 . . . a small local pattern covering only a single character, and stepping to a position for the following character, e.g. in rectangular or polar co-ordinates, or in the form of a framed star **[3]**

1/20 . using multi-beam tubes (G09G 1/26, G09G 1/28 take precedence) **[3]**

1/22 . using tubes permitting selection of a complete character from a number of characters **[3]**

1/24 . using tubes permitting selection of individual elements forming in combination a character **[3]**

1/26 . using storage tubes **[3]**

1/28 . using colour tubes **[3]**

3/00 **Control arrangements or circuits, of interest only in connection with visual indicators other than cathode-ray tubes** (optical scanning systems in general G02B 26/10) **[3]**

3/02 . by tracing or scanning a light beam on a screen **[3]**

3/04 . for presentation of a single character by selection from a plurality of characters, or by composing the character by combination of individual elements, e.g. segments **[3]**

3/06 . . using controlled light sources **[3]**

3/08 . . . using incandescent filaments **[3]**

3/10 . . . using gas tubes **[3]**

3/12 . . . using electroluminescent elements (using cathode-ray tubes with phosphor screens G09G 1/00) **[3]**

3/14 . . . . Semiconductor devices, e.g. diodes **[3]**

3/16 . . by control of light from an independent source **[3]**

3/18 . . . using liquid crystals **[3]**

3/19 . . . using electrochromic devices **[5]**

3/20 . for presentation of an assembly of a number of characters, e.g. a page, by composing the assembly by combination of individual elements arranged in a matrix **[3]**
3/22 . . using controlled light sources **[3]**
3/24 . . . using incandescent filaments **[3]**
3/26 . . . . to give the appearance of moving signs **[3]**
3/28 . . . using luminous gas-discharge panels, e.g. plasma **[3]**
3/282 . . . . using direct current (DC) panels **[7]**
3/285 . . . . . using self-scanning **[7]**
3/288 . . . . using alternating current (AC) panels **[7]**
3/29 . . . . . using self-shift panels **[5]**
3/30 . . . using electroluminescent panels **[3]**
3/32 . . . . semiconductive, e.g. diodes **[3]**
3/34 . . by control of light from an independent source **[3]**
3/36 . . . using liquid crystals **[3]**
3/38 . . . using electrochromic devices **[5]**

5/00 Control arrangements or circuits for visual indicators common to cathode-ray tube indicators and other visual indicators (image data processing or generation, in general G06T) **[5]**
5/02 . characterised by the way in which colour is displayed **[5]**
5/04 . . using circuits for interfacing with colour displays **[5]**
5/06 . . using colour palettes, e.g. look-up tables **[5]**
5/08 . Cursor circuits **[5]**
5/10 . Intensity circuits **[5]**
5/12 . Synchronisation between the display unit and other units, e.g. other display units, video-disc players **[5]**
5/14 . Display of multiple viewports **[5]**
5/16 . Display of right-to-left language **[5]**
5/18 . Timing circuits for raster scan displays (specially adapted for television H04N) **[5]**
5/20 . Function-generator circuits, e.g. circle generators **[5]**
5/22 . characterised by the display of individual characters or indicia using display control signals derived from coded signals representing the characters or indicia with a character-code memory (G09G 5/42 takes precedence) **[5,7]**
5/24 . . Generation of individual character patterns **[5]**
5/26 . . . for modifying the character dimension, e.g. double width, double height **[5]**
5/28 . . . for enhancement of character form, e.g. smoothing **[5]**
5/30 . . Control of display attribute **[5]**
5/32 . . with means for controlling the display position **[5]**
5/34 . for rolling or scrolling **[5]**
5/36 . characterised by the display of individual graphic patterns using a bit-mapped memory (G09G 5/42 takes precedence) **[5,7]**
5/37 . . Details of the operation on graphic patterns (G09G 5/38 takes precedence) **[7]**
5/373 . . . for modifying the size of the graphic pattern **[7]**
5/377 . . . for mixing or overlaying two or more graphic patterns (G09G 5/02, G09G 5/397 take precedence) **[7]**
5/38 . . with means for controlling the display position **[5]**
5/39 . . Control of the bit-mapped memory **[7]**
5/391 . . . Resolution modifying circuits, e.g. variable screen formats **[7]**
5/393 . . . Arrangements for updating the contents of the bit-mapped memory **[7]**
5/395 . . . Arrangements specially adapted for transferring the contents of the bit-mapped memory to the screen (G09G 5/399 takes precedence) **[7]**
5/397 . . . . Arrangements specially adapted for transferring the contents of two or more bit-mapped memories to the screen simultaneously, e.g. for mixing or overlay (G09G 5/02 takes precedence) **[7]**
5/399 . . . using two or more bit-mapped memories, the operations of which are switched in time, e.g. ping-pong buffers **[7]**
5/40 . characterised by the way in which both a pattern determined by character code and another pattern are displayed simultaneously, or either pattern is displayed selectively, e.g. with character code memory and a bit-mapped memory **[5]**
5/42 . characterised by the display of patterns using a display memory without fixed position correspondence between the display memory contents and the display position on the screen **[7]**

G10 MUSICAL INSTRUMENTS; ACOUSTICS

(1) This class covers all sound-emitting devices, in general, whether or not they may be considered as being musical.
(2) In this class, the following expression is used with the meaning indicated:
– "musical instrument" does not exclude devices emitting a single sound signal.
(3) The following Class Index is given in place of subclass indexes, to show the grouping of the elaborations belonging to different subclasses, under the following three fundamental types:
– wind instruments;
– string instruments;
– percussion instruments,
which relate clearly to the majority of instruments.
(4) There are of course some instruments of which the principle of operation belongs less clearly to one of the three types mentioned in Note (3). They correspond to groups G10D 17/00 or G10K 7/00, G10K 9/00 or G10K 15/04, all the other groups normally finding a definite place.

Class index

ACOUSTICS; OPERATIONS ON SOUND WAVES
- Speech analysis or synthesis; speech recognition; audio analysis or processing G10L
- Methods or devices for transmission of sound or protection against sound, not otherwise provided for G10K 11/00, 13/00
- Acoustics not otherwise provided for G10K 15/00

WIND INSTRUMENTS
- General features; details or accessories G10D 7/00; 9/00
- Organs, harmoniums or similar instruments G10B 1/00, 3/00
- Accordions, concertinas or similar instruments; other types of instruments G10D 11/00; 7/00
- Whistles; horns G10K 5/00; 9/00

STRINGED INSTRUMENTS
- General features; details or accessories G10D 1/00; 3/00
- Pianos, harpsichords, spinets or similar stringed musical instruments with one or more keyboards; tools and methods for the manufacture or maintenance thereof G10C 1/00, 3/00; 9/00
- Other instruments G10D 1/00

PERCUSSION INSTRUMENTS
- Bells, rattles or similar instruments G10K 1/00, 3/00
- Other instruments G10D 13/00

OTHER PARTICULAR DEVICES; DEVICES USING UNDEFINED PRINCIPLES; COMBINATIONS OF INSTRUMENTS; MUSIC ACCESSORIES
- Electrophonic musical instruments G10H
- Automatic musical instruments G10F
- Sirens; devices with vibrators G10K 7/00; 9/00
- Combinations: of pianos with other instruments; of other instruments G10C 5/00; G10D 15/00
- Music accessories G10G

INSTRUMENTS NOT OTHERWISE PROVIDED FOR G10D 17/00

G10B ORGANS; HARMONIUMS OR LIKE WIND-ACTUATED MUSICAL INSTRUMENTS (mouth organs G10D 7/12; accordions G10D 11/00; aspects of automatic actuation G10F 1/12; combinations of microphones, pick-ups or amplifiers with musical instruments G10H; electronic organs G10H 7/00)

1/00 General design
1/02 . of organs
1/04 . . electrically operated
1/06 . . fluid operated
1/08 . of harmoniums

3/00 Details or accessories
3/02 . Blowers
3/04 . Reservoirs
3/06 . Valves; Sleeves
3/08 . Pipes, e.g. open pipes or reed pipes
3/10 . Actions, e.g. coupler
3/12 . Keys or keyboards; Manuals
3/14 . Pedals or pedal boards
3/16 . Swell chambers; Accentuating means
3/18 . Tremolo-producing devices
3/20 . Transposing devices
3/22 . Details specially adapted for electrically-operated organs, e.g. contacts therein

G10C PIANOS, HARPSICHORDS, SPINETS OR SIMILAR STRINGED MUSICAL INSTRUMENTS WITH ONE OR MORE KEYBOARDS (non-musical aspects of toy pianos A63H 5/00; aspects of automatic actuation G10F; combinations of microphones, pick-ups or amplifiers with musical instruments G10H)

1/00 General design
1/02 . of upright pianofortes
1/04 . of grand pianofortes
1/06 . of harpsichords, spinets or similar stringed instruments

3/00 Details or accessories
3/02 . Cases
3/04 . Frames; Bridges; Bars
3/06 . Resonating means, e.g. resonant strings, soundboards; Fastenings of the resonating means
3/08 . Arrangements of strings
3/10 . Tuning pins or straining devices
3/12 . Keyboards; Keys
3/14 . . for actuation by the feet
3/16 . Actions
3/18 . . Hammers
3/20 . . involving the use of hydraulic, pneumatic, or electromagnetic means
3/22 . . for grand pianofortes
3/24 . . for reciprocating of tremolo
3/26 . Pedals or pedal mechanisms for half-blow or similar sound-modifying
3/28 . Transposing devices
3/30 . Couplers, e.g. for playing octaves

5/00 Combinations with other musical instruments, e.g. with bells or xylophones

9/00 Methods or tools specially adapted for the manufacture or maintenance of musical instruments covered by this subclass

---

G10D STRINGED MUSICAL INSTRUMENTS; **WIND-ACTUATED MUSICAL INSTRUMENTS**; **ACCORDIONS OR CONCERTINAS**; **PERCUSSION MUSICAL INSTRUMENTS**; **MUSICAL INSTRUMENTS NOT OTHERWISE PROVIDED FOR** (automatic musical instruments G10F; combinations of musical instruments with microphones, pick-ups or amplifiers G10H; sound-producing devices not regarded as musical instruments G10K)

(1) This subclass covers certain stringed musical instruments that can optionally include a keyboard, e.g. zithers. **[2010.01]**
(2) This subclass does not cover pianos, harpsichords, spinets or similar stringed instruments provided by design with one or more keyboards, which are covered by subclass G10C. **[2010.01]**

1/00 General design of stringed musical instruments, e.g. violins, harps, mandolins, guitars, banjos or zithers
1/02 . of violins, violas, violoncellos, basses
1/04 . of harps, lyres
1/06 . of mandolins
1/08 . of guitars
1/10 . of banjos
1/12 . of zithers, e.g. autoharp

3/00 Details of, or accessories for, stringed musical instruments, e.g. slide-bars
3/02 . Resonating means, horns, or diaphragms
3/04 . Bridges, mutes, or capo-tastos
3/06 . Fingerboards
3/08 . . in the form of keyboards
3/10 . Strings
3/12 . Anchoring devices for strings, e.g. tail pieces or hitchpins
3/14 . Tuning devices, e.g. pegs, pins or friction discs
3/16 . Bows; Guides for bows; Plectra or like playing means
3/18 . Chin-rests, hand-rests or guards as part of the instrument

7/00 General design of wind-actuated musical instruments, e.g. flutes, ocarinas, oboes, clarinets, bagpipes, saxophones, trumpets or mouth-organs (accordions or concertinas G10D 11/00; organs or harmoniums G10B; whistles G10K)
7/02 . of the type wherein an air current is directed against a ramp edge, e.g. flutes or recorders
7/04 . . Ocarinas
7/06 . of the type with a beating reed [Rohrblatt] or reeds, e.g. oboes, clarinets, bassoons or bagpipes
7/08 . . Saxophones
7/10 . of the type with a cupped mouthpiece, e.g. cornets, orchestral trumpets or trombones
7/12 . of the type with free reeds [Zunge], e.g. mouth-organs or trumpets for children

9/00 Details of, or accessories for, wind-actuated musical instruments
9/02 . Mouthpieces; Reeds
9/04 . Valves; Valve controls
9/06 . Mutes

11/00 Accordions, concertinas or the like; **Keyboards therefor**
11/02 . Actions

13/00 Percussion musical instruments, e.g. drums, tambourines, timpani, castanets, cymbals, triangles, gongs or plates; **Details or accessories**
13/02 . Drums; Tambourines
13/04 . Timpani

13/06 . Castanets, cymbals, triangles or other single-toned percussion musical instruments (bells G10K 1/00)

13/08 . Multi-toned musical instruments, with sonorous bars, blocks, forks, gongs, plates, rods, or teeth

15/00 Combinations of different musical instruments (combinations with pianos, harpsichords, spinets or similar stringed instruments with one or more keyboards G10C 5/00)

17/00 Musical instruments not provided for in any other group of this subclass, e.g. Aeolian harp, singing-flame musical instrument

---

G10F AUTOMATIC MUSICAL INSTRUMENTS (non-musical aspects of toy instruments A63H 5/00; sound-recording or reproducing G11B; working in association with recording or reproducing apparatus G11B 31/02)

Note

This subclass does not cover aspects of musical instruments which are independent of the automatic actuation, which are covered by subclass G10B, G10C or G10D.

1/00 Automatic musical instruments

1/02 . Pianofortes with keyboard

1/04 . Pianofortes which have no keyboard

1/06 . Musical boxes with plucked teeth, blades, or the like (combinations with other articles, see the relevant classes for the articles)

1/08 . Percussion musical instruments

1/10 . . Carillons

1/12 . Wind-actuated instruments

1/14 . . Barrel-organs

1/16 . Stringed musical instruments other than pianofortes

1/18 . . to be played by a bow

1/20 . . to be plucked

1/22 . Combinations of two or more instruments

3/00 Independent players for keyboard instruments

5/00 Details or accessories

5/02 . Actions

5/04 . Tune barrels, sheets, rollers, spools, or the like

5/06 . . Driving or setting of tune barrels, discs, or the like; Winding, rewinding, or guiding of tune sheets or the like

---

G10G AIDS FOR MUSIC (teaching music G09B 15/00); **SUPPORTS FOR MUSICAL INSTRUMENTS**; **OTHER AUXILIARY DEVICES OR ACCESSORIES FOR MUSIC OR MUSICAL INSTRUMENTS** (metronomes G04F 5/02)

1/00 Means for the representation of music

1/02 . Chord or note indicators, fixed or adjustable, for keyboards or fingerboards

1/04 . Transposing; Transcribing

3/00 Recording music in notation form, e.g. recording the mechanical operation of a musical instrument

3/02 . using mechanical means only

3/04 . using electrical means

5/00 Supports for musical instruments

7/00 Other auxiliary devices or accessories, e.g. conductors' batons or separate holders for resin or strings

7/02 . Tuning forks or like devices

G10H ELECTROPHONIC MUSICAL INSTRUMENTS; **INSTRUMENTS IN WHICH THE TONES ARE GENERATED BY ELECTROMECHANICAL MEANS OR ELECTRONIC GENERATORS, OR IN WHICH THE TONES ARE SYNTHESISED FROM A DATA STORE**

Note

This subclass covers musical instruments in which individual notes are constituted as electric oscillations under the control of a performer and the oscillations are converted to sound-vibrations by a loudspeaker or equivalent device.

1/00 Details of electrophonic musical instruments (keyboards applicable also to other musical instruments G10B, G10C; arrangements for producing a reverberation or echo sound G10K 15/08) **[5]**

1/02 . Means for controlling the tone frequencies, e.g. attack or decay; Means for producing special musical effects, e.g. vibratos or glissandos

1/04 . . by additional modulation

1/043 . . . Continuous modulation **[3]**

1/045 . . . . by electromechanical means **[3]**

1/047 . . . . by acousto-mechanical means, e.g. rotating speakers or sound deflectors **[3]**

1/053 . . during execution only **[3]**

1/055 . . . . by switches with variable impedance elements **[3]**
1/057 . . . . by envelope-forming circuits **[3]**
1/06 . . Circuits for establishing the harmonic content of tones
1/08 . . . by combining tones (G10H 1/14, G10H 1/16 take precedence; chord G10H 1/38; speech analysis or synthesis, G10L) **[3]**
1/10 . . . . for obtaining chorus, celeste or ensemble effects (continuous modulation G10H 1/043) **[3]**
1/12 . . . by filtering complex waveforms (G10H 1/14, G10H 1/16 take precedence) **[3]**
1/14 . . . during execution (modulation during execution G10H 1/053) **[3]**
1/16 . . . by non-linear elements (G10H 1/14 takes precedence; generation of non-sinusoidal basic tones G10H 5/10) **[3]**
1/18 . Selecting circuits **[3]**
1/20 . . for transposition **[3]**
1/22 . . for suppressing tones; Preference networks **[3]**
1/24 . . for selecting plural preset register stops **[3]**
1/26 . . for automatically producing a series of tones **[3]**
1/28 . . . to produce arpeggios **[3]**
1/30 . . . to reiteratively sound two tones **[3]**
1/32 . Constructional details **[3]**
1/34 . . Switch arrangements, e.g. keyboards or mechanical switches peculiar to electrophonic musical instruments (keyboards applicable also to other musical instruments G10B, G10C) **[3]**
1/36 . Accompaniment arrangements **[3]**
1/38 . . Chord **[3]**
1/40 . . Rhythm (metronomes G04F 5/02) **[3]**
1/42 . . . comprising tone forming circuits **[3]**
1/44 . Tuning means **[3]**
1/46 . Volume control **[3]**

3/00 Instruments in which the tones are generated by electromechanical means

3/02 . using mechanical interrupters
3/03 . using pick-up means for reading recorded waves, e.g. on rotating discs **[3]**
3/06 . . using photoelectric pick-up means
3/08 . . using inductive pick-up means
3/09 . . . using tapes or wires **[3]**
3/10 . . using capacitive pick-up means
3/12 . using mechanical resonant generators, e.g. strings or percussion instruments, the tones of which are picked up by electromechanical transducers, the electrical signals being further manipulated or amplified and subsequently converted to sound by a loudspeaker or equivalent device **[3]**
3/14 . . using mechanically actuated vibrators with pick-up means (G10H 3/24 takes precedence) **[3]**
3/16 . . . using a reed **[3]**
3/18 . . . using strings, e.g. electric guitars **[3]**
3/20 . . . using a tuning fork, rod or tube **[3]**
3/22 . . using electromechanically actuated vibrators with pick-up means (G10H 3/24 takes precedence) **[3]**
3/24 . . incorporating feedback means, e.g. acoustic **[3]**
3/26 . . . using electric feedback **[3]**

5/00 Instruments in which the tones are generated by means of electronic generators (G10H 7/00 takes precedence) **[3]**

5/02 . using generation of basic tones
5/04 . . with semiconductor devices as active elements (G10H 5/10, G10H 5/12 take precedence)
5/06 . . tones generated by frequency multiplication or division of a basic tone
5/07 . . . resulting in complex waveforms **[3]**
5/08 . . tones generated by heterodyning
5/10 . using generation of non-sinusoidal basic tones, e.g. sawtooth
5/12 . . using semiconductor devices as active elements
5/14 . using electromechanical resonators, e.g. quartz crystals, as frequency-determining elements **[3]**
5/16 . using cathode ray tubes **[3]**

7/00 Instruments in which the tones are synthesised from a data store, e.g. computer organs (synthesis of acoustic waves not specific to musical instruments G10K 15/02, G10L) **[3,5]**

7/02 . in which amplitudes at successive sample points of a tone waveform are stored in one or more memories **[5]**
7/04 . . in which amplitudes are read at varying rates, e.g. according to pitch **[5]**
7/06 . . in which amplitudes are read at a fixed rate, the read-out address varying stepwise by a given value, e.g. according to pitch **[5]**
7/08 . by calculating functions or polynomial approximations to evaluate amplitudes at successive sample points of a tone waveform **[5]**
7/10 . . using coefficients or parameters stored in a memory, e.g. Fourier coefficients (G10H 7/12 takes precedence) **[5]**
7/12 . . by means of a recursive algorithm using one or more sets of parameters stored in a memory and the calculated amplitudes of one or more preceding sample points **[5]**

G10K SOUND-PRODUCING DEVICES (sound-producing toys A63H 5/00); **METHODS OR DEVICES FOR PROTECTING AGAINST, OR FOR DAMPING, NOISE OR OTHER ACOUSTIC WAVES IN GENERAL**; **ACOUSTICS NOT OTHERWISE PROVIDED FOR [6]**

(1) This subclass covers arrangements for generating mechanical vibrations in fluids. **[6]**
(2) This subclass covers also the production of sounds which may not be audible to human beings but which are audible to animals.

(3) In this subclass, the following terms are used with the meanings indicated: **[6]**
– "acoustics" and "sound" cover the technical field dealing with mechanical vibrations at all infrasonic-, sonic- and ultrasonic frequencies. However, generation or transmission of mechanical waves, in general, is covered by subclass B06B, subject to the exception specified in Note (1) above. **[6]**

1/00 **Devices in which sound is produced by striking a resonating body, e.g. bells, chimes or gongs** (combinations with clocks or watches G04B, G04C; multi-toned musical instruments G10D 13/08; automatic carillons G10F 1/10)
1/06 . the resonating device having the shape of a bell, plate, rod, or tube (bells for towers G10K 1/28)
1/062 . . electrically operated
1/063 . . . the sounding member being a bell
1/064 . . . . Operating or striking mechanisms therefor
1/065 . . . . . for timed or repeated operation
1/066 . . . the sounding member being a tube, plate, or rod
1/067 . . . . Operating or striking mechanisms therefor
1/068 . . hydraulically operated; pneumatically operated
1/07 . . mechanically operated; Hand bells; Bells for animals
1/071 . . . Hand bells; Bells for animals
1/072 . . . Operating or striking mechanisms therefor
1/074 . . . . with rotary clappers or shells
1/076 . . . . for timed or repeated operation
1/08 . . Details or accessories of general applicability
1/10 . . . Sounding members; Mounting thereof; Clappers or other strikers
1/26 . . . Mountings; Casings
1/28 . Bells for towers or the like
1/30 . . Details or accessories
1/32 . . . Sounding members; Clappers or other strikers
1/34 . . . Operating mechanisms
1/36 . . . Means for silencing or damping (means or arrangements for avoiding or reducing out-of-balance forces due to motion F16F 15/00)
1/38 . . . Supports; Mountings

3/00 **Rattles or like noise-producing devices**

5/00 **Whistles**
5/02 . Ultrasonic whistles **[3]**

7/00 **Sirens**
7/02 . in which the sound-producing member is rotated manually or by a motor (G10K 7/06 takes precedence)
7/04 . . by an electric motor
7/06 . in which the sound-producing member is driven by a fluid, e.g. by a compressed gas

9/00 **Devices in which sound is produced by vibrating a diaphragm or analogous element, e.g. fog horns, vehicle hooters or buzzers** (loudspeakers or like acoustic electromechanical transducers H04R)
9/02 . driven by gas, e.g. suction operated
9/04 . . by compressed gases, e.g. compressed air
9/06 . . produced by detonation
9/08 . driven by water or other liquids
9/10 . driven by mechanical means only
9/12 . electrically operated

Note

This group does not cover the construction of, or circuits for, broadband-transducers such as loudspeakers or microphones, which are covered by subclass H04R. **[6]**

9/122 . . using piezo-electric driving means **[6]**
9/125 . . . with a plurality of active elements **[6]**
9/128 . . using magnetostrictive driving means **[6]**
9/13 . . using electromagnetic driving means **[3]**
9/15 . . . Self-interrupting arrangements **[3]**
9/16 . . with means for generating the current by muscle power
9/18 . Details, e.g. bulbs, pumps, pistons, switches or casings
9/20 . . Sounding members
9/22 . . Mountings; Casings

11/00 **Methods or devices for transmitting, conducting or directing sound in general**; **Methods or devices for protecting against, or for damping, noise or other acoustic waves in general**
11/02 . Mechanical acoustic impedances; Impedance matching, e.g. by horns; Acoustic resonators **[3]**
11/04 . . Acoustic filters **[3]**
11/08 . Non-electric sound-amplifying devices, e.g. non-electric megaphones (amplifying by horns G10K 11/02; amplifying by focusing G10K 11/26)
11/16 . Methods or devices for protecting against, or for damping, noise or other acoustic waves in general (G10K 11/36 takes precedence) **[3]**
11/162 . . Selection of materials **[6]**
11/165 . . . Particles in a matrix **[6]**
11/168 . . . Plural layers of different materials, e.g. sandwiches **[6]**

Note

When classifying in this group, classification is also made in subclass B32B, insofar as any layered product is concerned. **[6]**

11/172 . . using resonance effects **[6]**
11/175 . . using interference effects; Masking sound **[6]**
11/178 . . . by electro-acoustically regenerating the original acoustic waves in anti-phase **[6]**
11/18 . Methods or devices for transmitting, conducting or directing sound (G10K 11/02, G10K 11/36 take precedence; medical stethoscopes A61B 7/02) **[3]**
11/20 . . Reflecting arrangements (G10K 11/28 takes precedence) **[3]**
11/22 . . for conducting sound through hollow pipes, e.g. speaking tubes **[3]**
11/24 . . for conducting sound through solid bodies, e.g. wires **[3]**
11/26 . . Sound-focusing or directing, e.g. scanning **[3]**
11/28 . . . using reflection, e.g. parabolic reflectors **[3]**
11/30 . . . using refraction, e.g. acoustic lenses **[3]**
11/32 . . . characterised by shape of the source **[3]**
11/34 . . . using electrical steering of transducer arrays, e.g. beam steering **[3]**

11/35 . . . using mechanical steering of transducers **[6]**
11/36 . Devices for manipulating acoustic surface waves (electro-acoustic amplifiers H03F 13/00; networks comprising electro-acoustic elements H03H 9/00) **[3]**

13/00 Cones, diaphragms, or the like, for emitting or receiving sound in general (for electromechanical transducers H04R 7/00)

15/00 Acoustics not otherwise provided for [4]
15/02 . Synthesis of acoustic waves (synthesis of speech G10L 13/00) **[4]**
15/04 . Sound-producing devices (G10K 15/02 takes precedence) **[4]**
15/06 . . using electric discharge **[4]**
15/08 . Arrangements for producing a reverberation or echo sound **[5]**
15/10 . . using time-delay networks comprising electromechanical or electro-acoustic devices **[5]**
15/12 . . using electronic time-delay networks **[5]**

G10L SPEECH ANALYSIS OR SYNTHESIS; **SPEECH RECOGNITION**; **AUDIO ANALYSIS OR PROCESSING [4]**

Note

This subclass does not cover :
– devices for the storage of speech or audio signals, which are covered by subclasses G11B and G11C; **[2010.01]**
– encoding of compressed speech signals for transmission or storage, which is covered by group H03M 7/30. **[2010.01]**

11/00 Determination or detection of speech or audio characteristics not restricted to a single one of groups G10L 15/00 to G10L 21/00 [7]
11/02 . Detection of presence or absence of speech signals **[7]**
11/04 . Pitch determination of speech signals **[7]**
11/06 . Discriminating between voiced and unvoiced parts of speech signals (G10L 11/04 takes precedence) **[7]**

13/00 Speech synthesis; **Text to speech systems [7]**
13/02 . Methods for producing synthetic speech; Speech synthesisers **[7]**
13/04 . . Details of speech synthesis systems, e.g. synthesiser structure or memory management **[7]**
13/06 . Elementary speech units used in speech synthesisers; Concatenation rules **[7]**
13/08 . Text analysis or generation of parameters for speech synthesis out of text, e.g. grapheme to phoneme translation, prosody generation or stress or intonation determination **[7]**

15/00 Speech recognition (G10L 17/00 takes precedence) **[7]**
15/02 . Feature extraction for speech recognition; Selection of recognition unit **[7]**
15/04 . Segmentation or word limit detection **[7]**
15/06 . Creation of reference templates; Training of speech recognition systems, e.g. adaptation to the characteristics of the speaker's voice (G10L 15/14 takes precedence) **[7]**
15/08 . Speech classification or search **[7]**
15/10 . . using distance or distortion measures between unknown speech and reference templates **[7]**
15/12 . . using dynamic programming techniques, e.g. Dynamic Time Warping [DTW] **[7]**
15/14 . . using statistical models, e.g. Hidden Markov Models [HMM] (G10L 15/18 takes precedence) **[7]**
15/16 . . using artificial neural networks **[7]**
15/18 . . using natural language modelling **[7]**
15/20 . Speech recognition techniques specially adapted for robustness in adverse environments, e.g. in noise or of stress induced speech (G10L 21/02 takes precedence) **[7]**
15/22 . Procedures used during a speech recognition process, e.g. man-machine dialog **[7]**
15/24 . Speech recognition using non-acoustical features, e.g. position of the lips **[7]**
15/26 . Speech to text systems (G10L 15/08 takes precedence) **[7]**
15/28 . Constructional details of speech recognition systems **[7]**

17/00 Speaker identification or verification [7]

19/00 Speech or audio signal analysis-synthesis techniques for redundancy reduction, e.g. in vocoders; **Coding or decoding of speech or audio signals, e.g. for compression or expansion, source-filter models or psychoacoustic analysis [7]**
19/02 . using spectral analysis, e.g. transform vocoders or subband vocoders **[7]**
19/04 . using predictive techniques **[7]**
19/06 . . Determination or coding of the spectral characteristics, e.g. of the short term prediction coefficients **[7]**
19/08 . . Determination or coding of the excitation function; Determination or coding of the long-term prediction parameters **[7]**
19/10 . . . Determination or coding of a multipulse excitation **[7]**
19/12 . . . Determination or coding of a code excitation, e.g. in code excited linear prediction [CELP] vocoders **[7]**
19/14 . . Details not provided for in groups G10L 19/06 to G10L 19/12, e.g. gain coding, post filtering design or vocoder structure **[7]**

21/00 Processing of the speech signal to produce another audible or non-audible signal, e.g. visual or tactile, in order to modify its quality or its intelligibility (G10L 19/00 takes precedence) **[7]**
21/02 . Speech enhancement, e.g. noise reduction or echo cancellation (reducing echo effects in line transmission systems H04B 3/20; echo suppression in hand-free telephones H04M 9/08) **[7]**

21/04 . Time compression or expansion **[7]**

21/06 . Transformation of speech into a non-audible representation, e.g. speech visualisation or speech processing for tactile aids (G10L 15/26 takes precedence) **[7]**

23/00 Speech analysis not provided for in other groups of this subclass [2009.01]

G11 INFORMATION STORAGE

G11B INFORMATION STORAGE BASED ON RELATIVE MOVEMENT BETWEEN RECORD CARRIER AND TRANSDUCER (recording measured values in a way that does not require playback through a transducer G01D 9/00; recording or playback apparatus using mechanically marked tape, e.g. punched paper tape, or using unit records, e.g. punched or magnetically marked cards G06K; transferring data from one type of record carrier to another G06K 1/18; circuits for coupling output of reproducer to radio receiver H04B 1/20; gramophone pick-ups or like acoustic electromechanical transducers or circuits therefor H04R)

(1) This subclass covers:
- recording or playback of information by relative movement between a record track and a transducer, the transducer directly producing, or being directly actuated by, modulation in the track being recorded or played-back, and the extent of modulation corresponding to the signal being recorded or played-back;
- apparatus and machines for recording or playback, and parts thereof, such as heads;
- record carriers for use with such apparatus and machines;
- associated working of other apparatus with such apparatus and machines.

(2) In this subclass, the following terms or expressions are used with the meanings indicated:
- "record carrier" means a body, such as a cylinder, disc, card, tape, or wire, capable of permanently holding information, which can be read-off by a sensing element movable relatively to the record carrier; **[7]**
- "head" includes any means for converting sinusoidal or non-sinusoidal electric wave-forms into variations of the physical condition of at least the adjacent surface of the record carrier, or vice versa;
- "near-field interaction" means a very short distance interaction using scanning-probe techniques, e.g. quasi- contact or evanescent contact between head and record carrier. **[7]**

(3) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems". **[7]**

Subclass index

3/00 **Recording by mechanical cutting, deforming or pressing, e.g. of grooves or pits**; **Reproducing by mechanical sensing**; **Record carriers therefor** (G11B 11/00 takes precedence)

3/02 . Arrangements of heads

3/04 . . Multiple, convertible, or alternative transducing arrangements

3/06 . . Determining or indicating position of head

3/08 . . Raising, lowering, traversing otherwise than for transducing, arresting, or holding-up heads against record carriers

3/085 . . . using automatic means (G11B 3/095 takes precedence) **[4]**

3/09 . . . using manual means only (G11B 3/095 takes precedence) **[4]**

3/095 . . . for repeating a part of the record; for beginning or stopping at a desired point of the record **[4]**

3/10 . . Arranging, supporting, or driving of heads or of transducers relatively to record carriers

3/12 . . . Supporting in balanced, counterbalanced, or loaded operative position, e.g. loading in direction of traverse

3/14 . . . . by using effects of gravity or inertia, e.g. counterweight (G11B 3/28 takes precedence) **[4]**

3/16 . . . . . adjustable

3/18 . . . . . Damping by using viscosity effect

3/20 . . . . by elastic means, e.g. spring (G11B 3/28 takes precedence) **[4]**

3/22 . . . . . adjustable

3/24 . . . . . acting to decrease pressure on record

3/26 . . . . . acting to increase pressure on record

3/28 . . . . providing transverse bias parallel to record

3/30 . . . Supporting in inoperative position
3/31 . . . . Construction of arms **[4]**
3/32 . . . . Construction or arrangement of support pillars
3/34 . . . Driving or guiding during transducing operation
3/36 . . . . Automatic-feed mechanisms producing progressive transducing traverse across record carriers otherwise than by grooves, e.g. by lead-screw
3/38 . . . . Guiding, e.g. constructions or arrangements providing linear or other special tracking characteristics
3/40 . . . . Driving of heads relatively to stationary record carriers for transducing
3/42 . . . with provision for adaptation or interchange of heads
3/44 . Styli, e.g. sapphire, diamond
3/46 . . Constructions or forms, e.g. attachment of point to shank
3/48 . . . Needles
3/50 . . Anvils or other supports opposing stylus forces
3/52 . . Arrangements permitting styli to yield under excessive pressure
3/54 . . Storing; Manipulating, e.g. feeding styli to and from heads
3/56 . . Sharpening (by grinding B24B 19/16)
3/58 . Cleaning record carriers or styli, e.g. removing shavings or dust
3/60 . Turntables for record carriers
3/61 . . Damping of vibrations of record carriers on turntables **[4]**
3/64 . Re-recording, i.e. transcribing information from one grooved record carrier on to one or more similar or dissimilar record carriers
3/66 . Erasing information, e.g. for reuse of record carrier
3/68 . Record carriers
3/70 . . characterised by the selection of material or structure; Processes or apparatus specially adapted for manufacturing record carriers **[4]**
3/72 . . Groove formations, e.g. run-in groove, run-out groove
3/74 . . . Multiple output tracks, e.g. binaural stereophonic
3/76 . . . forming part of cinematograph films
3/78 . . Multiple-track arrangements
3/80 . . incorporating subsidiary guide means for heads, other than modulated grooves; Part-formed unmodulated grooves for conversion into transducing grooves
3/90 . . with means indicating prior or unauthorised use

5/00 Recording by magnetisation or demagnetisation of a record carrier; **Reproducing by magnetic means**; **Record carriers therefor** (G11B 11/00 takes precedence) **[4]**

Note

Groups G11B 5/02 to G11B 5/86 take precedence over groups G11B 5/004 to G11B 5/012. **[2]**

5/004 . Recording on, or reproducing or erasing from, magnetic drums (G11B 19/00 takes precedence) **[2]**
5/008 . Recording on, or reproducing or erasing from, magnetic tapes or wires (G11B 15/00 takes precedence) **[2]**
5/012 . Recording on, or reproducing or erasing from, magnetic discs (G11B 17/00, G11B 19/00 take precedence) **[2]**
5/016 . . using magnetic foils **[2]**
5/02 . Recording, reproducing or erasing methods; Read, write or erase circuits therefor **[2]**
5/024 . . Erasing **[4]**
5/027 . . Analogue recording **[2]**
5/03 . . . Biasing **[4]**
5/035 . . . Equalising **[4]**
5/09 . . Digital recording **[2]**
5/10 . Structure or manufacture of housings or shields for heads **[4]**
5/105 . . Mounting of head within housing **[2]**
5/11 . . Shielding of head against electric or magnetic fields **[2]**
5/115 . . . Shielding device arranged between heads or windings (G11B 5/29 takes precedence) **[2]**
5/127 . Structure or manufacture of heads, e.g. inductive **[4]**
5/133 . . with cores composed of particles, e.g. with dust cores, with ferrite cores **[4]**
5/147 . . with cores being composed of metal sheets, i.e. laminated cores **[4]**
5/153 . . . with tape-wound cores **[4]**
5/17 . . Construction or disposition of windings **[4]**
5/187 . . Structure or manufacture of the surface of the head in physical contact with, or immediately adjacent to, the recording medium; Pole pieces; Gap features (G11B 5/265, G11B 5/31 take precedence) **[4]**
5/193 . . . the pole pieces being ferrite **[4]**
5/21 . . . the pole pieces being of ferrous sheet metal **[4]**
5/23 . . . Gap features **[4]**
5/235 . . . . Selection of material for gap filler **[4]**
5/245 . . . comprising means for controlling the reluctance of the magnetic circuit (G11B 5/255 takes precedence) **[4]**
5/255 . . . comprising means for protection against wear **[4]**
5/265 . . Structure or manufacture of a head with more than one gap for erasing, recording or reproducing on the same track (G11B 5/33 takes precedence) **[4]**
5/29 . . Structure or manufacture of unitary devices formed of plural heads for more than one track **[4]**
5/31 . . using thin film (G11B 5/33 takes precedence) **[4]**
5/325 . . Erasing heads using permanent magnets (general details therefor G11B 5/133 to G11B 5/255) **[4]**
5/33 . . Structure or manufacture of flux-sensitive heads (general details therefor G11B 5/133 to G11B 5/255) **[4]**
5/335 . . . with saturated jig, e.g. for detecting second harmonic, balanced-flux head **[4]**
5/35 . . . having vibrating elements **[4]**
5/37 . . . using galvano-magnetic devices, e.g. Hall-effect devices (G11B 5/39 takes precedence) **[4]**
5/39 . . . using magneto-resistive devices **[4]**
5/40 . Protective measures on heads, e.g. against excessive temperature (G11B 5/31 takes precedence; protection against wear G11B 5/255) **[4]**
5/41 . Cleaning of heads **[2]**
5/455 . Arrangements for functional testing of heads; Measuring arrangements for heads **[4]**
5/465 . Arrangements for demagnetisation of heads **[4]**
5/48 . Disposition or mounting of heads relative to record carriers

5/49 . . Fixed mountings **[2]**
5/50 . . Interchangeable mountings, e.g. for replacement of head without readjustment
5/52 . . with simultaneous movement of head and record carrier, e.g. rotation of head (G11B 5/588 takes precedence) **[4]**
5/53 . . . Disposition or mounting of heads on rotating support **[4]**
5/54 . . with provision for moving the head into, or out of, its operative position or across tracks **[2]**
5/55 . . . Track change, selection, or acquisition by displacement of the head **[2]**
5/56 . . with provision for moving the head for the purpose of adjusting the position of the head relative to the record carrier, e.g. manual adjustment for azimuth correction or track centering (G11B 5/54, G11B 5/58 take precedence) **[2]**
5/58 . . with provision for moving the head for the purpose of maintaining alignment of the head relative to the record carrier during transducing operation, e.g. to compensate for surface irregularities of the latter or for track following **[2]**
5/584 . . . for track following on tapes **[4]**
5/588 . . . . by controlling the position of the rotating heads (by controlling the speed of the record carrier G11B 15/467; by controlling the speed of the rotating heads G11B 15/473) **[4]**
5/592 . . . . . using bimorph elements supporting the heads **[4]**
5/596 . . . for track following on discs **[4]**
5/60 . . . Fluid-dynamic spacing of heads from record carriers
5/62 . Record carriers characterised by the selection of the material

Note

This group does not cover compositions, materials or processes, per se, which are covered by the relevant subclasses of section B or C. **[4]**

5/627 . . of leaders for magnetic tapes, e.g. non-magnetic strips on the tapes or for connection **[4]**
5/633 . . of cinematographic films or slides with integral magnetic track **[4]**
5/64 . . comprising only the magnetic material without bonding agent
5/65 . . . characterised by its composition (G11B 5/66 takes precedence) **[7]**
5/66 . . . the record carriers consisting of several layers
5/667 . . . . including a soft magnetic layer **[7]**
5/673 . . . . comprising the repeated occurrence of two or more layers **[7]**
5/68 . . comprising one or more layers of magnetisable particles homogeneously mixed with a bonding agent
5/70 . . . on a base layer **[1,7]**
5/702 . . . . characterised by the bonding agent **[4]**
5/706 . . . . characterised by the composition of the magnetic material **[4]**
5/708 . . . . characterised by the addition of non-magnetic particles to the magnetic layer **[4]**
5/71 . . . . characterised by the lubricant **[4]**
5/712 . . . . characterised by the surface treatment or coating of magnetic particles **[4]**
5/714 . . . . characterised by the dimension of the magnetic particles **[4]**
5/716 . . . . characterised by two or more magnetic layers **[4]**
5/718 . . . . . at least one on each side of the base layer **[4]**
5/72 . . Protective coatings, e.g. anti-static
5/725 . . . containing a lubricant **[7]**
5/73 . . Base layers **[7]**
5/733 . . . characterised by the addition of non-magnetic particles **[7]**
5/735 . . . characterised by the back layer **[7]**
5/738 . . . characterised by the intermediate layer **[7]**
5/74 . Record carriers characterised by the form, e.g. sheet shaped to wrap around a drum
5/76 . . Drum carriers
5/78 . . Tape carriers
5/80 . . Card carriers
5/82 . . Disc carriers
5/84 . Processes or apparatus specially adapted for manufacturing record carriers
5/842 . . Coating a support with a liquid magnetic dispersion **[4]**
5/845 . . . in a magnetic field **[4]**
5/848 . . Coating a support with a magnetic layer by extrusion **[4]**
5/85 . . Coating a support with a magnetic layer by vapour deposition **[4]**
5/851 . . Coating a support with a magnetic layer by sputtering **[7]**
5/852 . . Orientation in a magnetic field (G11B 5/845 takes precedence) **[4]**
5/855 . . Coating only part of a support with a magnetic layer **[4]**
5/858 . . Producing a magnetic layer by electro-plating or electroless plating **[4]**
5/86 . Re-recording, i.e. transcribing information from one magnetisable record carrier on to one or more similar or dissimilar record carriers

7/00 Recording or reproducing by optical means, e.g. recording using a thermal beam of optical radiation, reproducing using an optical beam at lower power; **Record carriers therefor** (G11B 11/00, G11B 13/00 take precedence) **[4,7]**

7/002 . Recording, reproducing or erasing systems characterised by the shape of the carrier **[7]**
7/0025 . . with cylinders or cylinder-like carriers, e.g. truncated cones **[7]**
7/003 . . with webs, e.g. belts, spooled tapes or films of quasi-infinite extent **[7]**
7/0033 . . with cards **[7]**
7/0037 . . with discs **[7]**
7/004 . Recording, reproducing or erasing methods; Read, write or erase circuits therefor **[7]**
7/0045 . . Recording (G11B 7/006, G11B 7/0065 take precedence) **[7]**
7/005 . . Reproducing (G11B 7/0065 takes precedence) **[7]**
7/0055 . . Erasing (G11B 7/006, G11B 7/0065 take precedence) **[7]**
7/006 . . Overwriting (G11B 7/0065 takes precedence) **[7]**
7/0065 . . Recording, reproducing or erasing by using optical interference patterns, e.g. holograms **[7]**
7/007 . Arrangement of the information on the record carrier, e.g. form of tracks **[4]**

7/013 . . for discrete information, i.e. where each information unit is stored in a distinct location **[4]**

7/08 . Disposition or mounting of heads or light sources relatively to record carriers

7/085 . . with provision for moving the light beam into, or out of, its operative position (modulating by information signals G11B 7/12) **[4]**

7/09 . . with provision for moving the light beam or focus plane for the purpose of maintaining alignment of the light beam relative to the record carrier during transducing operation, e.g. to compensate for surface irregularities of the latter or for track following **[4]**

7/095 . . . specially adapted for discs, e.g. for compensation of eccentricity or wobble **[4]**

7/10 . . Interchangeable mountings, e.g. for replacement of head without readjustment

7/12 . Heads

7/125 . . Optical beam sources therefor; Modulators, e.g. means for controlling the size or intensity of the optical spot or of the optical trace **[4]**

7/13 . . Optical detectors therefor **[4]**

7/135 . . Means for guiding the beam from source to record carrier or from record carrier to detector **[4]**

7/14 . . adapted to record on, or to reproduce from, more than one track simultaneously (G11B 7/20 takes precedence)

7/16 . . using filters, e.g. colour filter

7/18 . . using optical slits

7/20 . . Dual-recording arrangements, i.e. in which the information is recorded in two different forms simultaneously on the same or related tracks, e.g. recording instantaneous and mean values (sound-recording combined with cinematography G03C 5/14)

7/22 . . Apparatus or processes specially adapted for the manufacture of heads, e.g. assembly

7/24 . Record carriers characterised by the selection of the material or by the structure or form (characterised by the arrangement of information on the carrier G11B 7/007) **[4]**

7/241 . . characterised by the selection of the material **[8]**

7/242 . . . of recording layers **[8]**

7/243 . . . . comprising inorganic material only, e.g. ablative layers **[8]**

7/244 . . . . comprising organic material only **[8]**

7/245 . . . . . containing a polymeric component **[8]**

7/246 . . . . . containing dyes **[8]**

7/247 . . . . . Methine or polymethine dyes **[8]**

7/248 . . . . . Porphines; Azaporphines, e.g. phthalocyanines **[8]**

7/249 . . . . . containing organo-metallic compounds (G11B 7/246 takes precedence) **[8]**

7/25 . . . . . containing liquid crystals **[8]**

7/251 . . . . comprising inorganic material dispersed in an organic matrix **[8]**

7/252 . . . of layers other than recording layers **[8]**

Note

In group G11B 7/252, multi-aspect classification is applied, so that if subject matter is characterised by aspects covered by more than one of its subgroups, the subject matter should be classified in each of those subgroups. **[8]**

7/253 . . . . Base layers **[8]**

7/254 . . . . Protective topcoat layers **[8]**

7/256 . . . . Layers improving adhesion between layers **[8]**

7/257 . . . . Layers having properties involved in recording or reproduction, e.g. optical interference layers or sensitising layers **[8]**

7/258 . . . . Reflective layers **[8]**

7/26 . . Apparatus or processes specially adapted for the manufacture of record carriers

7/28 . Re-recording, i.e. transcribing information from one optical record carrier on to one or more similar or dissimilar record carriers using optical sensing means

7/30 . Rewritable carriers (G11B 7/24 takes precedence) **[7]**

9/00 **Recording or reproducing using a method or means not covered by one of the main groups G11B 3/00 to G11B 7/00**; **Record carriers therefor** (G11B 11/00 takes precedence) **[4]**

Note

Group G11B 9/12 takes precedence over groups G11B 9/02 to G11B 9/10 **[7]**

9/02 . using ferroelectric record carriers; Record carriers therefor

9/04 . using record carriers having variable electric resistance; Record carriers therefor

9/06 . using record carriers having variable electrical capacitance; Record carriers therefor (G11B 9/02 takes precedence)

9/07 . . Heads for reproducing capacitive information **[4]**

9/08 . using electrostatic charge injection; Record carriers therefor

9/10 . using electron beam; Record carriers therefor (G11B 9/08 takes precedence) **[4]**

9/12 . using near-field interactions; Record carriers therefor **[7]**

9/14 . . using microscopic probe means **[7]**

11/00 **Recording on, or reproducing from, the same record carrier wherein for these two operations the methods or means are covered by different main groups of groups G11B 3/00 to G11B 7/00 or by different subgroups of group G11B 9/00**; **Record carriers therefor**

Note

Group G11B 11/24 takes precedence over groups G11B 11/03 to G11B 11/16. **[7]**

11/03 . using recording by deforming with non-mechanical means, e.g. laser, beam of particles **[4]**

11/05 . . with reproducing by capacitive means **[4]**

11/06 . . with reproducing by mechanical sensing **[4]**

11/08 . using recording by electric charge or by variation of electric resistance or capacitance

11/10 . using recording by magnetisation or demagnetisation **[4]**

11/105 . . using a beam of light or a magnetic field for recording and a beam of light for reproducing, e.g. light-induced thermo-magnetic recording, Kerr effect reproducing **[7]**

11/11 . . using a beam other than a beam of light for recording **[7]**

11/115 . . using a beam other than a beam of light for reproducing **[7]**

11/12 . using recording by optical means (G11B 11/03 takes precedence) **[4]**
11/14 . . with reproducing by magnetic means
11/16 . using recording by mechanical cutting, deforming or pressing
11/18 . . with reproducing by optical means
11/20 . . with reproducing by magnetic means
11/22 . . with reproducing by capacitive means **[4]**
11/24 . using recording by near-field interactions **[7]**
11/26 . . using microscopic probe means **[7]**

13/00 Recording simultaneously or selectively by methods or means covered by different main groups; **Record carriers therefor**; **Reproducing simultaneously or selectively therefrom [1,7]**

(1) This group covers arrangements in which there are at least two recordings of information involving two different methods or means or two different physical properties, at the same or different locations, on the same record carrier, the recordings being made or reproduced simultaneously or selectively. **[7]**
(2) Where such combinations of means are used for changing only one main property, classification is only made in one of the relevant main groups G11B 3/00, G11B 5/00, G11B 7/00, G11B 9/00 or G11B 11/00. **[7]**

13/02 . magnetically and by styli (G11B 13/08 takes precedence) **[1,7]**
13/04 . magnetically and optically (G11B 13/08 takes precedence) **[1,7]**
13/06 . optically and by styli (G11B 13/08 takes precedence) **[1,7]**
13/08 . using near-field interactions or transducing means and at least one other method or means for recording or reproducing **[7]**

15/00 Driving, starting or stopping record carriers of filamentary or web form; **Driving both such record carriers and heads**; **Guiding such record carriers or containers therefor**; **Control thereof**; **Control of operating function** (driving or guiding heads G11B 3/00 to G11B 7/00, G11B 21/00) **[2]**

15/02 . Control of operating function, e.g. switching from recording to reproducing
15/03 . . by using counters **[4]**
15/04 . . Preventing, inhibiting, or warning against accidental erasing or double recording (G11B 15/05 takes precedence) **[4]**
15/05 . . by sensing features present on, or derived from, record carrier or container (G11B 15/16 takes precedence) **[4]**
15/06 . . . by sensing auxiliary features on record carriers or containers, e.g. to stop machine near the end of a tape
15/07 . . . . on containers **[4]**
15/08 . . . . by photoelectric sensing (G11B 15/07 takes precedence) **[4]**
15/087 . . . by sensing recorded signals **[4]**
15/093 . . . by sensing driving condition of record carrier, e.g. travel, tape tension **[4]**
15/10 . . Manually-operated control; Solenoid-operated control
15/12 . . Masking of heads; Selecting or switching of heads between operative and inoperative functions; Masking of beams, e.g. of light beams
15/14 . . . Masking or switching periodically, e.g. of rotating heads
15/16 . . by sensing presence, absence or position of record carrier or container
15/17 . . . of container **[4]**
15/18 . Driving; Starting; Stopping; Arrangements for control or regulation thereof
15/20 . . Moving record carrier backwards or forwards by finite amounts, i.e. back-spacing, forward-spacing
15/22 . . Stopping means (slowing-down preparatory to stopping by means which are different from the stopping means G11B 15/48; slowing-down preparatory to stopping by a mechanical linkage which is different from the stopping means G11B 15/50)
15/24 . . Drive-disengaging means
15/26 . . Driving record carriers by members acting directly or indirectly thereon
15/28 . . . through rollers driving by frictional contact with the record carrier, e.g. capstan; Multiple arrangements of capstans or drums coupled to means for controlling the speed of the drive; Multiple capstan systems alternately engageable with record carrier to provide reversal
15/29 . . . . through pinch-rollers (G11B 15/295 takes precedence) **[4]**
15/295 . . . . with single capstan or drum simultaneously driving the record carrier at two separate points of an isolated part thereof, e.g. the capstan acting directly on the tape rollers **[4]**
15/30 . . . through the means for supporting the record carrier, e.g. mandrel, turntable
15/32 . . . through the reels or cores on to which the record carrier is wound
15/34 . . . through non-slip drive means, e.g. sprocket
15/38 . . Driving record carriers by pneumatic means
15/40 . . Driving record carriers otherwise than by electric motor
15/42 . . . manually
15/43 . . Control or regulation of mechanical tension of record carrier, e.g. tape tension
15/44 . . Speed-changing arrangements; Reversing arrangements; Drive-transfer means therefor
15/46 . . Controlling, regulating, or indicating speed
15/467 . . . in arrangements for recording or reproducing wherein both record carriers and heads are driven **[4]**
15/473 . . . . by controlling the speed of the heads **[4]**
15/48 . . . Starting; Accelerating; Decelerating; Arrangements preventing malfunction during drive change
15/50 . . . by mechanical linkage, e.g. clutch
15/52 . . . by using signals recorded on, or derived from, record carrier
15/54 . . . by stroboscope; by tachometer
15/56 . the record carrier having reserve loop, e.g. to minimise inertia during acceleration
15/58 . . with vacuum column
15/60 . Guiding record carriers (guiding devices structurally associated with magazines or cassettes G11B 23/04) **[4]**
15/61 . . on drum, e.g. on drum containing rotating heads **[4]**
15/62 . . Maintaining desired spacing between record carrier and head
15/64 . . . by fluid-dynamic spacing

15/66 . . Threading; Loading; Automatic self-loading
15/665 . . . by extracting loop of record carrier from container **[4]**
15/67 . . . by extracting end of record carrier from container or spool **[4]**
15/675 . Guiding containers **[4]**
15/68 . . Automatic cassette-changing arrangements **[2]**
15/70 . the record carrier being an endless-loop record-carrier **[2]**

17/00 Guiding record carriers not specifically of filamentary or web form, or of supports therefor (guiding cards or sheets G06K 13/00)
17/02 . Details
17/022 . . Positioning or locking of single discs **[4]**
17/025 . . . of discs which are stationary during transducing operation **[4]**
17/028 . . . of discs rotating during transducing operation **[4]**
17/03 . . . . in containers or trays **[4]**
17/032 . . . . Positioning by moving the door or the cover **[4]**
17/035 . . . . Positioning by moving the loading station **[4]**
17/038 . . Centering or locking of a plurality of discs in a single cartridge **[4]**
17/04 . . Feeding or guiding single record carrier to or from transducing unit
17/041 . . . specially adapted for discs contained within cartridges **[8]**
17/043 . . . . Direct insertion, i.e. without external loading means **[8]**
17/044 . . . . Indirect insertion, i.e. with external loading means **[8]**
17/046 . . . . . with pivoting loading means **[8]**
17/047 . . . . . with sliding loading means **[8]**
17/049 . . . . Insertion of discs having to be extracted from the cartridge prior to recording or reproducing **[8]**
17/05 . . . specially adapted for discs not contained within cartridges **[8]**
17/051 . . . . Direct insertion, i.e. without external loading means **[8]**
17/053 . . . . Indirect insertion, i.e. with external loading means **[8]**
17/054 . . . . . with pivoting loading means **[8]**
17/056 . . . . . with sliding loading means **[8]**
17/057 . . . specially adapted for handling both discs contained within cartridges and discs not contained within cartridges **[8]**
17/08 . from consecutive-access magazine of disc records
17/10 . . with horizontal transfer to the turntable from a stack arranged with a vertical axis
17/12 . . with axial transfer to the turntable from a stack with a vertical axis
17/14 . . . by mechanism in rotating centre post, e.g. permitting the playing of both sides of a record
17/16 . . . by mechanism in stationary centre post, e.g. with stepped post, using fingers on post
17/18 . . . by mechanism operating on the edge of the disc record
17/20 . . with transfer away from stack on turntable after playing
17/22 . from random-access magazine of disc records

Note

Group G11B 17/30 takes precedence over groups G11B 17/24 to G11B 17/28.

17/24 . . the magazine having a toroidal or part-toroidal shape
17/26 . . the magazine having a cylindrical shape with vertical axis
17/28 . . the magazine having a cylindrical shape with horizontal axis
17/30 . . wherein the playing unit is moved accordingly to the location of the selected record
17/32 . Maintaining desired spacing between record carrier and head, e.g. by fluid-dynamic spacing **[2]**
17/34 . Guiding record carriers during transducing operation, e.g. for track following (G11B 17/32 takes precedence) **[4]**

19/00 Driving, starting, stopping record carriers not specifically of filamentary or web form, or of supports therefor; **Control thereof**; **Control of operating function**
19/02 . Control of operating function, e.g. switching from recording to reproducing **[4]**
19/04 . . Arrangements for preventing, inhibiting, or warning against, double recording on the same blank, or against other recording or reproducing malfunctions
19/06 . . by counting or timing of machine operations
19/08 . . by using devices external to the driving mechanisms, e.g. coin-freed switch (coin actuated mechanisms G07F 5/00) **[4]**
19/10 . . by sensing presence or absence of record in accessible stored position or on turntable
19/12 . . by sensing distinguishing features of records, e.g. diameter
19/14 . . by sensing movement or position of head, e.g. means moving in correspondence with head movements
19/16 . . Manual control
19/18 . . . Manual action on one element producing control effect indirectly by consequent action of driving mechanism
19/20 . Driving; Starting; Stopping; Control thereof **[4]**
19/22 . . Brakes other than speed-regulating brakes
19/24 . . Arrangements for providing constant relative speed between record carrier and head
19/247 . . . using electrical means **[4]**
19/253 . . . using mechanical means **[4]**
19/26 . . Speed-changing arrangements; Reversing arrangements; Drive-transfer means therefor **[4]**
19/265 . . . Friction wheel drive **[4]**
19/27 . . . Belt drive **[4]**
19/275 . . . Gear wheel drive **[4]**
19/28 . . Speed controlling, regulating or indicating (G11B 19/24takes precedence)

20/00 Signal processing not specific to the method of recording or reproducing; **Circuits therefor [4]**
20/02 . Analogue recording or reproducing **[4]**
20/04 . . Direct recording or reproducing **[4]**
20/06 . . Angle-modulation recording or reproducing **[4]**
20/08 . . Pulse-modulation recording or reproducing (pulse-code-modulation recording G11B 20/10) **[4]**
20/10 . Digital recording or reproducing **[4]**

20/12 . . Formatting, e.g. arrangement of data block or words on the record carriers **[4]**
20/14 . . using self-clocking codes **[4]**
20/16 . . using non self-clocking codes, i.e. the clock signals being either recorded in a separate clocking track or in a combination of several information tracks **[4]**
20/18 . . Error detection or correction; Testing **[4]**
20/20 . for correction of skew for multitrack recording **[4]**
20/22 . for reducing distortions **[4]**
20/24 . for reducing noise **[4]**

21/00 Head arrangements not specific to the method of recording or reproducing

21/02 . Driving or moving of heads
21/03 . . for correcting time base error **[4]**
21/04 . . Automatic feed mechanism producing a transducing traverse of the head in a direction which cuts across the direction of travel of the recording medium, e.g. helical scan
21/06 . . . the record carrier having means to ensure traverse movement of the head
21/08 . . Track changing or selecting (G11B 21/12 takes precedence)
21/10 . . Track finding or aligning by moving the head
21/12 . . Raising and lowering; Back-spacing or forward-spacing along track; Returning to starting position
21/14 . . . manually
21/16 . Supporting the heads; Supporting the sockets for plug-in heads
21/18 . . while the head is moving
21/20 . . while the head is in operative position but stationary or permitting minor movements to follow irregularities in surface of record carrier
21/21 . . . with provision for maintaining desired spacing of head from record carrier, e.g. fluid-dynamic spacing, slider **[4]**
21/22 . . while the head is out of operative position
21/24 . . Head support adjustments
21/26 . . Means for interchange or replacement of head or head element

23/00 Record carriers not specific to the method of recording or reproducing; **Accessories, e.g. containers, specially adapted for co-operation with the recording or reproducing apparatus [4]**

Note

In group G11B 23/00, recording or reproducing apparatus does not include the record carriers. **[5]**

23/02 . Containers; Storing means (cabinets, cases, stands, modified to store record carriers G11B 33/04) **[4]**
23/023 . . Containers for magazines or cassettes **[4]**
23/027 . . Containers for single reels or spools **[4]**
23/03 . . Containers for flat record carriers **[4]**
23/033 . . . for flexible discs **[4]**
23/037 . . Single reels or spools **[4]**
23/04 . . Magazines; Cassettes (G11B 23/12 takes precedence)
23/06 . . . for housing endless webs or filaments
23/07 . . . . using a single reel or core **[4]**
23/08 . . . for housing webs or filaments having two distinct ends
23/087 . . . . using two different reels or cores **[4]**
23/093 . . . . . the reels or cores being coaxial **[4]**
23/107 . . . . using one reel or core, one end of the record carrier coming out of the magazine or cassette **[4]**
23/113 . . Apparatus or processes specially adapted for the manufacture of magazines or cassettes **[4]**
23/12 . . Bins for random storage of webs or filaments
23/14 . providing ability to repeat location, e.g. using sprocket holes
23/16 . Record carriers with single track for recording at spaced intervals along the track thereof, e.g. for speech or language training
23/18 . Record carriers with multiple tracks, e.g. with complementary and partial tracks such as paired "stereo" tracks
23/20 . with provision for splicing to provide permanent or temporary connections
23/22 . . of endless belts; of tapes forming Möbius loops
23/24 . . of tapes having multiple tracks parallel to edge of record carrier by offset splicing to form endless loop with one or more helical tracks
23/26 . . of leaders for loading or threading, e.g. to form a temporary connection
23/28 . indicating prior or unauthorised use
23/30 . with provision for auxiliary signals
23/32 . . Electrical or mechanical contacting means; Tape stop foils
23/34 . . Signal means additional to the main recording track, e.g. photoelectric sensing of sprocket holes for timing
23/36 . . Signals on record carriers or on containers and recorded by the same method as the main recording
23/38 . Visual features other than those contained in record tracks or represented by sprocket holes
23/40 . . Identifying or analogous means applied to, or incorporated in, the record carrier and not intended for visual display simultaneously with the playing-back of the record carrier, e.g. label, leader, photograph
23/42 . . Marks for indexing, speed-controlling, synchronising, or timing
23/44 . . Information for display simultaneously with playback of the record, e.g. photographic matter (associated working of cameras or projectors with sound-recording or -reproducing means G03B 31/00) **[4]**
23/50 . Reconditioning of record carriers; Cleaning of record carriers (G11B 3/58 takes precedence) **[2]**

25/00 Apparatus characterised by the shape of record carrier employed but not specific to the method of recording or reproducing [4]

25/02 . using cylindrical record carriers
25/04 . using flat record carriers, e.g. disc, card
25/06 . using web-form record carriers, e.g. tape
25/08 . using filamentary record carriers, e.g. wire
25/10 . Apparatus capable of using record carriers defined in more than one of the groups G11B 25/02 to G11B 25/08

27/00 Editing; **Indexing**; **Addressing**; **Timing or synchronising**; **Monitoring**; **Measuring tape travel [2,4]**

27/02 . Editing, e.g. varying the order of information signals recorded on, or reproduced from, record carriers **[5]**
27/022 . . Electronic editing of analogue information signals, e.g. audio or video signals **[5]**

27/024 . . . on tapes (G11B 27/028, G11B 27/029 take precedence) **[5]**
27/026 . . . on discs (G11B 27/028, G11B 27/029 take precedence) **[5]**
27/028 . . . with computer assistance **[5]**
27/029 . . . Insert-editing **[5]**
27/031 . . Electronic editing of digitised analogue information signals, e.g. audio or video signals **[5]**
27/032 . . . on tapes (G11B 27/036, G11B 27/038 take precedence) **[5]**
27/034 . . . on discs (G11B 27/036, G11B 27/038 take precedence) **[5]**
27/036 . . . Insert-editing **[5]**
27/038 . . . Cross-faders therefor **[5]**
27/04 . . using differential drive of record carrier and head
27/06 . . Cutting and rejoining; Notching, or perforating record carriers otherwise than by recording styli (record carriers with provision for splicing G11B 23/20)
27/10 . Indexing; Addressing; Timing or synchronising; Measuring tape travel **[2]**
27/11 . . by using information not detectable on the record carrier **[4]**
27/13 . . . the information being derived from movement of the record carrier, e.g. using tachometer **[4]**
27/15 . . . . using mechanical sensing means **[4]**
27/17 . . . . using electrical sensing means **[4]**
27/19 . . by using information detectable on the record carrier **[4]**
27/22 . . . Means responsive to presence or absence of recorded information signals
27/24 . . . by sensing features on the record carrier other than the transducing track
27/26 . . . . by photoelectric detection, e.g. of sprocket holes
27/28 . . . by using information signals recorded by the same method as the main recording
27/30 . . . . on the same track as the main recording
27/32 . . . . on separate auxiliary tracks of the same or an auxiliary record carrier
27/34 . . Indicating arrangements
27/36 . Monitoring, i.e. supervising the progress of recording or reproducing

31/00 Arrangements for the associated working of recording or reproducing apparatus with related apparatus (with cameras or projectors G03B 31/00) **[1,7]**
31/02 . with automatic musical instruments

33/00 Constructional parts, details or accessories not provided for in the other groups of this subclass [4]
33/02 . Cabinets; Cases; Stands; Disposition of apparatus therein or thereon **[4]**
33/04 . . modified to store record carriers **[4]**
33/06 . . combined with other apparatus having a different main function **[4]**
33/08 . . Insulation or absorption of undesired vibrations or sounds **[4]**
33/10 . Indicating arrangements; Warning arrangements **[4]**
33/12 . Disposition of constructional parts in the apparatus, e.g. of power supply, of modules **[4]**
33/14 . Reducing influence of physical parameters, e.g. temperature change, moisture, dust **[4]**

G11C STATIC STORES (information storage based on relative movement between record carrier and transducer G11B; semiconductor devices for storage H01L, e.g. H01L 27/108 to H01L 27/115; pulse technique in general H03K, e.g. electronic switches H03K 17/00)

(1) This subclass covers devices or arrangements for storage of digital or analogue information:
(i) in which no relative movement takes place between an information storage element and a transducer;
(ii) which incorporate a selecting-device for writing-in or reading-out the information into or from the store.
(2) This subclass does not cover elements not adapted for storage and not provided with such means as referred to in Note (3) below, which elements are classified in the appropriate subclass, e.g. of H01, H03K.
(3) In this subclass, the following terms are used with the meaning indicated: **[8]**
– "storage element" is an element which can hold at least one item of information and is provided with means for writing-in or reading-out this information; **[8]**
– "memory" is a device, including storage elements, which can hold information to be extracted when desired. **[8]**

Subclass index

5/00 Details of stores covered by group G11C 11/00

5/02 . Disposition of storage elements, e.g. in the form of a matrix array

5/04 . . Supports for storage elements; Mounting or fixing of storage elements on such supports

5/05 . . . Supporting of cores in matrix **[2]**

5/06 . Arrangements for interconnecting storage elements electrically, e.g. by wiring

5/08 . . for interconnecting magnetic elements, e.g. toroidal cores

5/10 . . for interconnecting capacitors

5/12 . Apparatus or processes for interconnecting storage elements, e.g. for threading magnetic cores

5/14 . Power supply arrangements (auxiliary circuits for stores using semiconductor devices G11C 11/4063, G11C 11/413, G11C 11/4193; in general G05F, H02J, H02M) **[5,7]**

7/00 Arrangements for writing information into, or reading information out from, a digital store (G11C 5/00 takes precedence; auxiliary circuits for stores using semiconductor devices G11C 11/4063, G11C 11/413, G11C 11/4193) **[2,5]**

7/02 . with means for avoiding parasitic signals

7/04 . with means for avoiding disturbances due to temperature effects

7/06 . Sense amplifiers; Associated circuits (amplifiers per se H03F, H03K) **[1,7]**

7/08 . . Control thereof **[7]**

7/10 . Input/output (I/O) data interface arrangements, e.g. I/O data control circuits, I/O data buffers (level conversion circuits in general H03K 19/0175) **[7]**

7/12 . Bit line control circuits, e.g. drivers, boosters, pull-up circuits, pull-down circuits, precharging circuits, equalising circuits, for bit lines **[7]**

7/14 . Dummy cell management; Sense reference voltage generators **[7]**

7/16 . Storage of analogue signals in digital stores using an arrangement comprising analogue/digital (A/D) converters, digital memories and digital/analogue (D/A) converters **[7]**

7/18 . Bit line organisation; Bit line lay-out **[7]**

7/20 . Memory cell initialisation circuits, e.g. when powering up or down, memory clear, latent image memory **[7]**

7/22 . Read-write (R-W) timing or clocking circuits; Read-write (R-W) control signal generators or management **[7]**

7/24 . Memory cell safety or protection circuits, e.g. arrangements for preventing inadvertent reading or writing; Status cells; Test cells **[7]**

8/00 Arrangements for selecting an address in a digital store (auxiliary circuits for stores using semiconductor devices G11C 11/4063, G11C 11/413, G11C 11/4193) **[2,5]**

8/02 . using selecting matrix **[2]**

8/04 . using a sequential addressing device, e.g. shift register, counter (using first in first out (FIFO) registers for changing speed of digital data flow G06F 5/06; using last in first out (LIFO) registers for processing digital data by operating upon their order G06F 7/00) **[5]**

8/06 . Address interface arrangements, e.g. address buffers (level conversion circuits in general H03K 19/0175) **[7]**

8/08 . Word line control circuits, e.g. drivers, boosters, pull-up circuits, pull-down circuits, precharging circuits, for word lines **[7]**

8/10 . Decoders **[7]**

8/12 . Group selection circuits, e.g. for memory block selection, chip selection, array selection **[7]**

8/14 . Word line organisation; Word line lay-out **[7]**

8/16 . Multiple access memory array, e.g. addressing one storage element via at least two independent addressing line groups **[7]**

8/18 . Address timing or clocking circuits; Address control signal generation or management, e.g. for row address strobe (RAS) or column address strobe (CAS) signals **[7]**

8/20 . Address safety or protection circuits, i.e. arrangements for preventing unauthorized or accidental access **[7]**

11/00 Digital stores characterised by the use of particular electric or magnetic storage elements; **Storage elements therefor** (G11C 14/00 to G11C 21/00 take precedence) **[5]**

Note

Group G11C 11/56 takes precedence over groups G11C 11/02 to G11C 11/54. **[2]**

11/02 . using magnetic elements

11/04 . . using storage elements having cylindrical form, e.g. rod, wire (G11C 11/12, G11C 11/14 take precedence) **[2]**

11/06 . . using single-aperture storage elements, e.g. ring core; using multi-aperture plates in which each individual aperture forms a storage element

11/061 . . . using elements with single aperture or magnetic loop for storage, one element per bit, and for destructive read-out **[2]**

11/063 . . . . bit-organized, such as, 2L/2D-, 3D-organization, i.e. for selection of an element by means of at least two coincident partial currents both for reading and for writing **[2]**

11/065 . . . . word-organized, such as 2D-organization, or linear selection, i.e. for selection of all the elements of a word by means of a single full current for reading **[2]**

11/067 . . . using elements with single aperture or magnetic loop for storage, one element per bit, and for non-destructive read-out **[2]**

11/08 . . using multi-aperture storage elements, e.g. using transfluxors; using plates incorporating several individual multi-aperture storage elements (G11C 11/10 takes precedence; using multi-aperture plates in which each individual aperture forms a storage element G11C 11/06) **[2]**

11/10 . . using multi-axial storage elements

11/12 . . using tensors; using twistors, i.e. elements in which one axis of magnetisation is twisted

11/14 . . using thin-film elements

11/15 . . . using multiple magnetic layers (G11C 11/155 takes precedence) **[2]**

11/155 . . . with cylindrical configuration **[2]**

11/16 . . using elements in which the storage effect is based on magnetic spin effect

11/18 . using Hall-effect devices

11/19 . using non-linear reactive devices in resonant circuits **[2]**

11/20 . . using parametrons **[2]**

11/21 . using electric elements **[2]**
11/22 . . using ferroelectric elements **[2]**
11/23 . . using electrostatic storage on a common layer, e.g. Forrester-Haeff tubes (G11C 11/22 takes precedence) **[2]**
11/24 . . using capacitors (G11C 11/22 takes precedence; using a combination of semiconductor devices and capacitors G11C 11/34, e.g. G11C 11/40) **[2,5]**
11/26 . . using discharge tubes **[2]**
11/28 . . . using gas-filled tubes **[2]**
11/30 . . . using vacuum tubes (G11C 11/23 takes precedence) **[2]**
11/34 . . using semiconductor devices **[2]**
11/35 . . . with charge storage in a depletion layer, e.g. charge coupled devices **[7]**
11/36 . . . using diodes, e.g. as threshold elements **[2]**
11/38 . . . . using tunnel diodes **[2]**
11/39 . . . using thyristors **[5]**
11/40 . . . using transistors **[2]**
11/401 . . . . forming cells needing refreshing or charge regeneration, i.e. dynamic cells **[5]**
11/402 . . . . . with charge regeneration individual to each memory cell, i.e. internal refresh **[5]**
11/403 . . . . . with charge regeneration common to a multiplicity of memory cells, i.e. external refresh **[5]**
11/404 . . . . . with one charge-transfer gate, e.g. MOS transistor, per cell **[5]**
11/405 . . . . . with three charge-transfer gates, e.g. MOS transistors, per cell **[5]**
11/406 . . . . . Management or control of the refreshing or charge-regeneration cycles **[5]**
11/4063 . . . . . Auxiliary circuits, e.g. for addressing, decoding, driving, writing, sensing or timing **[7]**
11/4067 . . . . . for memory cells of the bipolar type **[7]**
11/407 . . . . . for memory cells of the field-effect type **[5]**
11/4072 . . . . . Circuits for initialization, powering up or down, clearing memory or presetting **[7]**
11/4074 . . . . . Power supply or voltage generation circuits, e.g. bias voltage generators, substrate voltage generators, back-up power, power control circuits **[7]**
11/4076 . . . . . Timing circuits (for regeneration management G11C 11/406) **[7]**
11/4078 . . . . . Safety or protection circuits, e.g. for preventing inadvertent or unauthorised reading or writing; Status cells; Test cells (protection of memory contents during checking or testing G11C 29/52) **[7]**
11/408 . . . . . Address circuits **[5]**
11/409 . . . . . Read-write (R-W) circuits **[5]**
11/4091 . . . . . Sense or sense/refresh amplifiers, or associated sense circuitry, e.g. for coupled bit-line precharging, equalising or isolating **[7]**
11/4093 . . . . . Input/output (I/O) data interface arrangements, e.g. data buffers (level conversion circuits in general H03K 19/0175) **[7]**
11/4094 . . . . . Bit-line management or control circuits **[7]**
11/4096 . . . . . Input/output (I/O) data management or control circuits, e.g. reading or writing circuits, I/O drivers, bit-line switches **[7]**
11/4097 . . . . . Bit-line organisation, e.g. bit-line layout, folded bit lines **[7]**
11/4099 . . . . . Dummy cell treatment; Reference voltage generators **[7]**
11/41 . . . . forming cells with positive feedback, i.e. cells not needing refreshing or charge regeneration, e.g. bistable multivibrator or Schmitt trigger **[5]**
11/411 . . . . . using bipolar transistors only **[5]**
11/412 . . . . . using field-effect transistors only **[5]**
11/413 . . . . . Auxiliary circuits, e.g. for addressing, decoding, driving, writing, sensing, timing or power reduction **[5]**
11/414 . . . . . for memory cells of the bipolar type **[5]**
11/415 . . . . . Address circuits **[5]**
11/416 . . . . . Read-write (R-W) circuits **[5]**
11/417 . . . . . for memory cells of the field-effect type **[5]**
11/418 . . . . . Address circuits **[5]**
11/419 . . . . . Read-write (R-W) circuits **[5]**
11/4193 . . . Auxiliary circuits specific to particular types of semiconductor storage devices, e.g. for addressing, driving, sensing, timing, power supply, signal propagation (G11C 11/4063, G11C 11/413 take precedence) **[7]**
11/4195 . . . . Address circuits **[7]**
11/4197 . . . . Read-write (R-W) circuits **[7]**
11/42 . . using opto-electronic devices, i.e. light-emitting and photoelectric devices electrically- or optically-coupled
11/44 . . using super-conductive elements, e.g. cryotron **[2]**
11/46 . using thermoplastic elements
11/48 . using displaceable coupling elements, e.g. ferromagnetic cores, to produce change between different states of mutual or self-inductance
11/50 . using actuation of electric contacts to store the information (mechanical stores G11C 23/00; switches providing a selected number of consecutive operations of the contacts by a single manual actuation of the operating part H01H 41/00)
11/52 . . using electromagnetic relays
11/54 . using elements simulating biological cells, e.g. neuron
11/56 . using storage elements with more than two stable states represented by steps, e.g. of voltage, current, phase, frequency (counting arrangements comprising multi-stable elements of this type H03K 25/00, H03K 29/00) **[2]**

13/00 Digital stores characterised by the use of storage elements not covered by groups G11C 11/00, G11C 23/00, or G11C 25/00

13/02 . using elements whose operation depends upon chemical change (using electrochemical charge G11C 11/00)
13/04 . using optical elements
13/06 . . using magneto-optical elements (magneto-optics in general G02F) **[2]**

14/00 **Digital stores characterised by arrangements of cells having volatile and non-volatile storage properties for back-up when the power is down [5]**

15/00 **Digital stores in which information comprising one or more characteristic parts is written into the store and in which information is read-out by searching for one or more of these characteristic parts, i.e. associative or content-addressed stores** (in which information is addressed to a specific location G11C 11/00) **[2]**

15/02 . using magnetic elements **[2]**

15/04 . using semiconductor elements **[2]**

15/06 . using cryogenic elements **[2]**

16/00 **Erasable programmable read-only memories** (G11C 14/00 takes precedence) **[5]**

16/02 . electrically programmable **[5]**

16/04 . . using variable threshold transistors, e.g. FAMOS **[5]**

16/06 . . Auxiliary circuits, e.g. for writing into memory (in general G11C 7/00) **[5]**

16/08 . . . Address circuits; Decoders; Word-line control circuits **[7]**

16/10 . . . Programming or data input circuits **[7]**

16/12 . . . . Programming voltage switching circuits **[7]**

16/14 . . . . Circuits for erasing electrically, e.g. erase voltage switching circuits **[7]**

16/16 . . . . . for erasing blocks, e.g. arrays, words, groups **[7]**

16/18 . . . . Circuits for erasing optically **[7]**

16/20 . . . . Initialising; Data preset; Chip identification **[7]**

16/22 . . . Safety or protection circuits preventing unauthorised or accidental access to memory cells **[7]**

16/24 . . . Bit-line control circuits **[7]**

16/26 . . . Sensing or reading circuits; Data output circuits **[7]**

16/28 . . . . using differential sensing or reference cells, e.g. dummy cells **[7]**

16/30 . . . Power supply circuits **[7]**

16/32 . . . Timing circuits **[7]**

16/34 . . . Determination of programming status, e.g. threshold voltage, overprogramming or underprogramming, retention **[7]**

17/00 **Read-only memories programmable only once**; **Semi-permanent stores, e.g. manually-replaceable information cards** (erasable programmable read-only memories G11C 16/00; coding, decoding or code conversion, in general H03M) **[2,5]**

17/02 . using magnetic or inductive elements (G11C 17/14 takes precedence) **[2,5]**

17/04 . using capacitive elements (G11C 17/06, G11C 17/14 take precedence) **[2,5]**

17/06 . using diode elements (G11C 17/14 takes precedence) **[2,5]**

17/08 . using semiconductor devices, e.g. bipolar elements (G11C 17/06, G11C 17/14 take precedence) **[5]**

17/10 . . in which contents are determined during manufacturing by a predetermined arrangement of coupling elements, e.g. mask-programmable ROM **[5]**

17/12 . . . using field-effect devices **[5]**

17/14 . in which contents are determined by selectively establishing, breaking or modifying connecting links by permanently altering the state of coupling elements, e.g. PROM **[5]**

17/16 . . using electrically-fusible links **[5]**

17/18 . . Auxiliary circuits, e.g. for writing into memory (in general G11C 7/00) **[5]**

19/00 **Digital stores in which the information is moved stepwise, e.g. shift registers** (counting chains H03K 23/00)

19/02 . using magnetic elements (G11C 19/14 takes precedence) **[2]**

19/04 . . using cores with one aperture or magnetic loop **[2]**

19/06 . . using structures with a number of apertures or magnetic loops, e.g. transfluxors **[2]**

19/08 . . using thin films in plane structure **[2]**

19/10 . . using thin films on rods; with twistors **[2]**

19/12 . using non-linear reactive devices in resonant circuits **[2]**

19/14 . using magnetic elements in combination with active elements, e.g. discharge tubes, semiconductor elements (G11C 19/34 takes precedence) **[2,7]**

19/18 . using capacitors as main elements of the stages **[2]**

19/20 . using discharge tubes (G11C 19/14 takes precedence) **[2]**

19/28 . using semiconductor elements (G11C 19/14, G11C 19/36 take precedence) **[2,7]**

19/30 . using opto-electronic devices, i.e. light-emitting and photoelectric devices electrically- or optically-coupled **[2]**

19/32 . using super-conductive elements **[2]**

19/34 . using storage elements with more than two stable states represented by steps, e.g. of voltage, current, phase, frequency **[7]**

19/36 . . using semiconductor elements **[7]**

19/38 . two-dimensional, e.g. horizontal and vertical shift registers **[7]**

21/00 **Digital stores in which the information circulates** (stepwise G11C 19/00)

21/02 . using electromechanical delay lines, e.g. using a mercury tank

23/00 **Digital stores characterised by movement of mechanical parts to effect storage, e.g. using balls**; **Storage elements therefor** (storing by actuating contacts G11C 11/48)

25/00 **Digital stores characterised by the use of flowing media**; **Storage elements therefor**

27/00 **Electric analogue stores, e.g. for storing instantaneous values**

27/02 . Sample-and-hold arrangements (G11C 27/04 takes precedence; sampling electrical signals, in general H03K) **[2,4]**

27/04 . Shift registers (charge coupled devices per se H01L 29/76) **[4]**

29/00 **Checking stores for correct operation**; **Testing stores during standby or offline operation [1,8]**

29/02 . Detection or location of defective auxiliary circuits, e.g. defective refresh counters **[8]**

29/04 . Detection or location of defective memory elements **[8]**

29/06 . . Acceleration testing **[8]**

29/08 . . Functional testing, e.g. testing during refresh, power-on self testing (POST) or distributed testing **[8]**

29/10 . . . Test algorithms, e.g. memory scan (MScan) algorithms; Test patterns, e.g. checkerboard patterns **[8]**

29/12 . . . Built-in arrangements for testing, e.g. built-in self testing (BIST) **[8]**

29/14 . . . . Implementation of control logic, e.g. test mode decoders **[8]**

29/16 . . . . . using microprogrammed units, e.g. state machines **[8]**

29/18 . . . . Address generation devices; Devices for accessing memories, e.g. details of addressing circuits **[8]**

29/20 . . . . . using counters or linear-feedback shift registers (LFSR) **[8]**

29/22 . . . . . Accessing serial memories **[8]**

29/24 . . . . . Accessing extra cells, e.g. dummy cells or redundant cells **[8]**

29/26 . . . . . Accessing multiple arrays (G11C 29/24 takes precedence) **[8]**

29/28 . . . . . Dependent multiple arrays, e.g. multi-bit arrays **[8]**

29/30 . . . . . Accessing single arrays **[8]**

29/32 . . . . . Serial access; Scan testing **[8]**

29/34 . . . . . Accessing multiple bits simultaneously **[8]**

29/36 . . . . Data generation devices, e.g. data inverters **[8]**

29/38 . . . . Response verification devices **[8]**

29/40 . . . . . using compression techniques **[8]**

29/42 . . . . . using error correcting codes (ECC) or parity check **[8]**

29/44 . . . . Indication or identification of errors, e.g. for repair **[8]**

29/46 . . . . Test trigger logic **[8]**

29/48 . . . Arrangements in static stores specially adapted for testing by means external to the store, e.g. using direct memory access (DMA) or using auxiliary access paths (external testing equipment G11C 29/56) **[8]**

29/50 . . Marginal testing, e.g. race, voltage or current testing **[8]**

29/52 . Protection of memory contents; Detection of errors in memory contents **[8]**

29/54 . Arrangements for designing test circuits, e.g. design for test (DFT) tools **[8]**

29/56 . External testing equipment for static stores, e.g. automatic test equipment (ATE); Interfaces therefor **[8]**

99/00 Subject matter not provided for in other groups of this subclass [8]

G12 INSTRUMENT DETAILS

G12B DETAILS OF INSTRUMENTS, OR COMPARABLE DETAILS OF OTHER APPARATUS, NOT OTHERWISE PROVIDED FOR

(1) This subclass covers only details which are not restricted to measuring instruments or to any other apparatus covered by a single class.

(2) This subclass does not cover:
- details covered by any other subclass in section A, F, G or H. In particular, details restricted to the measuring instruments are covered by the relevant subclasses of class G01, e.g. G01D;
- constructional details restricted to electric apparatus, e.g. casings, screenings, which are covered by subclass H05K or the relevant subclass in section H.

(3) Attention is drawn to the Notes following the title of section G, especially as regards to the definition of the term “measuring” in Note (2) following the title of class G01.

Subclass index

1/00 **Sensitive elements capable of producing movement or displacement for purposes not limited to measurement**; **Associated transmission mechanisms therefor**

1/02 . Compound strips or plates, e.g. bimetallic (thermometers using bimetallic elements G01K 5/62)

1/04 . Hollow bodies having parts which are deformable or displaceable under pressure, e.g. Bourdon tube, bellows (bellows in general F16J 3/00)

3/00 **Details of movements not otherwise provided for** (damping of shock or vibrations in general F16F; avoiding out-of-balance forces F16F 15/00; testing balance G01M) **[1,7]**

3/02 . Caging of movements, i.e. locking of movements when not in use

3/04 . Suspensions (bearings F16C)

3/06 . Reducing effects of friction, e.g. by vibration (by lubrication F16N)

3/08 . Damping of movements, e.g. to promote rapid non-oscillatory movement to a final reading

3/10 . . using eddy currents

5/00 **Adjusting position or attitude, e.g. level, of instruments or other apparatus, or of parts thereof** (levels per se G01C 9/00); **Compensating for the effects of tilting or acceleration, e.g. for optical apparatus**

7/00 **Compensating for the effects of temperature** (by cooling G12B 15/00)

9/00 **Housing or supporting of instruments or other apparatus**

9/02 . Casings; Housings; Cabinets (sealing arrangements for transmission members F16J, particularly F16J 15/50)

9/04 . . Details, e.g. cover

9/06 . . . Metal casings

9/08 . Supports; Devices for carrying

9/10 . . Instrument boards; Panels; Desks; Racks; Frameworks

11/00 **Indicating elements**; **Illumination thereof**

11/02 . Scales; Dials

11/04 . Pointers; Setting-mechanisms therefor

13/00 **Calibrating of instruments or apparatus** (calibrating of measuring instruments G01)

15/00 **Cooling** (by refrigeration, e.g. circulation of refrigerated fluid, F25D; heat-exchange or heat-transfer details of general application F28F)

15/02 . by closed-cycle fluid-circulating systems

15/04 . by currents of fluid, e.g. air, in open cycle

15/06 . by contact with heat-absorbing or radiating masses, e.g. heat-sink

17/00 **Screening** (insulation or other protection of buildings E04B; emergency protection of apparatus in general F16P 7/00; in connection with acoustic waves G10K 11/00; in connection with nuclear radiation G21F)

Note

This group covers:
- the protection of instruments or other apparatus from external radiation or other influences;
- the prevention of the emission of undesirable radiation or other influences by instruments or other apparatus.

17/02 . from electric or magnetic fields, e.g. radio waves

17/04 . from ultra-violet, visible, or infra-red light (screening of lighting devices F21V; optical filters G02B 5/20)

17/06 . from heat (G12B 17/04 takes precedence; cooling G12B 15/00)

17/08 . from influences producing mechanical damage, e.g. caused by blast, by external object, by person (G12B 17/02 to G12B 17/06 take precedence)

NUCLEONICS

G21 NUCLEAR PHYSICS; NUCLEAR ENGINEERING

G21B FUSION REACTORS (uncontrolled fusion, applications thereof G21J)

Subclass index

1/00 Thermonuclear fusion reactors [1,8]
1/01 . Hybrid fission-fusion nuclear reactors **[8]**
1/03 . with inertial plasma confinement **[8]**
1/05 . with magnetic or electric plasma confinement **[8]**
1/11 . Details **[8]**
1/13 . . First wall; Blanket; Divertor **[8]**
1/15 . . Particle injectors for producing thermonuclear fusion reactions, e.g. pellet injectors **[8]**
1/17 . . Vacuum chambers; Vacuum systems **[8]**
1/19 . . Targets for producing thermonuclear fusion reactions **[8]**
1/21 . . Electric power supply systems, e.g. for magnet systems **[8]**
1/23 . . Optical systems, e.g. for irradiating targets, for heating plasma or for plasma diagnostics **[8]**
1/25 . Maintenance, e.g. repair or remote inspection **[8]**

3/00 Low-temperature nuclear fusion reactors, e.g. alleged cold fusion reactors [8]

G21C NUCLEAR REACTORS (analogue computers therefor G06G 7/54; fusion reactors, hybrid fission-fusion reactors G21B; nuclear explosives G21J)

Subclass index

1/00 Reactors
1/01 . General details not provided for in groups G21C 3/00 to G21C 19/00 **[3]**
1/02 . Fast fission reactors, i.e. reactors not using a moderator
1/03 . . cooled by a coolant not essentially pressurised, e.g. pool-type reactors **[5]**
1/04 . Thermal reactors
1/06 . . Heterogeneous reactors, i.e. in which fuel and moderator are separated
1/07 . . . Pebble-bed reactors; Reactors with granular fuel **[5]**
1/08 . . . moderator being highly pressurised, e.g. boiling-water reactor, integral-superheat reactor, pressurised-water reactor (G21C 1/22 takes precedence)
1/09 . . . . Pressure regulating arrangements, i.e. pressurisers **[5]**
1/10 . . . . moderator and coolant being different or separated
1/12 . . . . . moderator being solid, e.g. Magnox reactor
1/14 . . . moderator being substantially not pressurised, e.g. swimming-pool reactor (G21C 1/22 takes precedence)
1/16 . . . . moderator and coolant being different or separated, e.g. sodium-graphite reactor
1/18 . . . . . coolant being pressurised
1/20 . . . . . moderator being liquid, e.g. pressure-tube reactor
1/22 . . . using liquid or gaseous fuel
1/24 . . Homogeneous reactors, i.e. in which fuel and moderator present an effectively homogeneous medium to the neutrons
1/26 . . . Single-region reactors
1/28 . . . Two-region reactors
1/30 . Subcritical reactors
1/32 . Integral reactors, i.e. reactors wherein parts functionally associated with the reactor but not essential to the reaction, e.g. heat exchangers, are disposed inside the enclosure with the core (G21C 1/02 to G21C 1/30 take precedence) **[3]**

3/00 Reactor fuel elements or their assemblies; Selection of substances for use as reactor fuel elements
3/02 . Fuel elements
3/04 . . Constructional details
3/06 . . . Casings; Jackets
3/07 . . . . characterised by their material, e.g. alloys **[5]**

3/08 . . . . provided with external means to promote heat-transfer, e.g. fins, baffles, corrugations
3/10 . . . . End closures
3/12 . . . . Means forming part of the element for locating it within the reactor core; External spacers for this purpose
3/14 . . . . Means forming part of the element for inserting it into, or removing it from, the core; Means for coupling adjacent elements
3/16 . . . Details of the construction within the casing
3/17 . . . . Means for storage or immobilisation of gases in fuel elements **[5]**
3/18 . . . . Internal spacers or other non-active material within the casing, e.g. compensating for expansion of fuel rods or for compensating excess reactivity (interlayers G21C 3/20)
3/20 . . . . with coating on fuel or on inside of casing; with non-active interlayer between casing and active material
3/22 . . with fissile or breeder material in contact with coolant
3/24 . . with fissile or breeder material in fluid form within a non-active casing
3/26 . . with fissile or breeder material in powder form within a non-active casing
3/28 . . with fissile or breeder material in solid form within a non-active casing
3/30 . Assemblies of a number of fuel elements in the form of a rigid unit
3/32 . . Bundles of parallel pin-, rod-, or tube-shaped fuel elements
3/322 . . . Means to influence the coolant flow through or around the bundles **[5]**
3/324 . . . Coats or envelopes for the bundles **[5]**
3/326 . . . comprising fuel elements of different composition; Comprising, in addition to the fuel elements, other pin-, rod-, or tube-shaped elements, e.g. control rods, grid support rods, fertile rods, poison rods or dummy rods **[5]**
3/328 . . . . Relative disposition of the elements in the bundle lattice **[5]**
3/33 . . . Supporting or hanging of elements in the bundle (spacer grids G21C 3/34); Means forming part of the bundle for inserting it into, or removing it from, the core; Means for coupling adjacent bundles **[5]**
3/332 . . . . Supports for spacer grids **[5]**
3/334 . . . Assembling the bundles **[5]**
3/335 . . . Exchanging elements in irradiated bundles **[5]**
3/336 . . . Spacer elements for fuel rods in the bundle (spacer grids G21C 3/34) **[5]**
3/338 . . . . Helicoidal spacer elements **[5]**
3/34 . . . Spacer grids
3/344 . . . . formed of assembled tubular elements **[5]**
3/348 . . . . formed of assembled non-intersecting strips **[5]**
3/352 . . . . formed of assembled intersecting strips **[5]**
3/356 . . . . being provided with fuel element supporting members **[5]**
3/36 . . Assemblies of plate-shaped fuel elements or coaxial tubes
3/38 . Fuel units consisting of a single fuel element in a supporting sleeve
3/40 . Structural combination of fuel element with thermoelectric element for direct production of electric energy from fission heat (for temperature measurement G21C 17/10)
3/42 . Selection of substances for use as reactor fuel
3/44 . . Fluid or fluent reactor fuel
3/46 . . . Aqueous compositions
3/48 . . . . True or colloidal solutions of the active constituent
3/50 . . . . Suspensions of the active constituent; Slurries
3/52 . . . Liquid metal compositions
3/54 . . . Fused salt, oxide, or hydroxide compositions
3/56 . . . Gaseous compositions; Suspensions in a gaseous carrier
3/58 . . Solid reactor fuel
3/60 . . . Metallic fuel; Intermetallic dispersions
3/62 . . . Ceramic fuel
3/64 . . . . Ceramic dispersion fuel, e.g. cermet

5/00 Moderator or core structure; **Selection of materials for use as moderator**

5/02 . Details
5/04 . . Spatial arrangements allowing for Wigner growth
5/06 . . Means for locating or supporting fuel elements
5/08 . . Means for preventing undesired asymmetric expansion of the complete structure
5/10 . . Means for supporting the complete structure
5/12 . characterised by composition, e.g. the moderator containing additional substances which ensure improved heat resistance of the moderator
5/14 . characterised by shape
5/16 . . Shape of its constituent parts
5/18 . characterised by the provision of more than one active zone
5/20 . . wherein one zone contains fissile material and another zone contains breeder material
5/22 . . wherein one zone is a superheating zone

7/00 Control of nuclear reaction

7/02 . by using self-regulating properties of reactor materials (arrangements that involve temperature stability G21C 7/32)
7/04 . . of burnable poisons (burnable poisons in fuel rods G21C 3/326) **[5]**
7/06 . by application of neutron-absorbing material, i.e. material with absorption cross-section very much in excess of reflection cross-section
7/08 . . by displacement of solid control elements, e.g. control rods
7/10 . . . Construction of control elements
7/103 . . . . Control assemblies containing one or more absorbants as well as other elements, e.g. fuel or moderator elements **[5]**
7/107 . . . . Control elements adapted for pebble-bed reactors **[5]**
7/11 . . . . Deformable control elements, e.g. flexible, telescopic, articulated **[5]**
7/113 . . . . Control elements made of flat elements; Control elements having cruciform cross-section **[5]**
7/117 . . . . Clusters of control rods; Spider construction **[5]**
7/12 . . . Means for moving control elements to desired position (dropping rods in an emergency G21C 9/02)
7/14 . . . . Mechanical drive arrangements
7/16 . . . . Hydraulic or pneumatic drive arrangements
7/18 . . . Means for obtaining differential movement of control elements

7/20 . . . Disposition of shock-absorbing devices (shock-absorbers in general F16F)
7/22 . . by displacement of a fluid or fluent neutron-absorbing material
7/24 . . Selection of substances for use as neutron-absorbing material
7/26 . by displacement of the moderator or parts thereof
7/27 . . Spectral shift control **[5]**
7/28 . by displacement of the reflector or parts thereof
7/30 . by displacement of reactor fuel or fuel elements
7/32 . by varying flow of coolant through the core
7/34 . by utilisation of a primary neutron source
7/36 . Control circuits

9/00 Emergency protection arrangements structurally associated with the reactor (emergency cooling arrangements G21C 15/18)
9/004 . Pressure suppression **[5]**
9/008 . . by rupture-discs or -diaphragms **[5]**
9/012 . . by thermal accumulation or by steam condensation, e.g. ice condensers **[5]**
9/016 . Core catchers **[5]**
9/02 . Means for effecting very rapid reduction of the reactivity factor under fault conditions, e.g. reactor fuse
9/027 . . by fast movement of a solid, e.g. pebbles **[5]**
9/033 . . by an absorbent fluid **[5]**
9/04 . Means for suppressing fires
9/06 . . Means for preventing accumulation of explosives gases, e.g. recombiners **[5]**

11/00 Shielding structurally associated with the reactor
11/02 . Biological shielding (in general G21F)
11/04 . . on waterborne craft
11/06 . Reflecting shields, i.e. for minimising loss of neutrons
11/08 . Thermal shields; Thermal linings, i.e. for dissipating heat from gamma radiation which would otherwise heat an outer biological shield

13/00 Pressure vessels; **Containment vessels**; **Containment in general** (for chemical or physical processes B01J 3/00; pressure vessels in general F16J 12/00)
13/02 . Details
13/024 . . Supporting constructions for pressure vessels or containment vessels **[5]**
13/028 . . Seals, e.g. for pressure vessels or containment vessels **[5]**
13/032 . . Joints between tubes and vessel walls, e.g. taking into account thermal stresses **[5]**
13/036 . . . the tube passing through the vessel wall, i.e. continuing on both sides of the wall **[5]**
13/04 . . Arrangements for expansion and contraction
13/06 . . Sealing-plugs (for pressure vessels in general F16J 13/00)
13/067 . . . for tubes, e.g. standpipes; Locking devices for plugs **[5]**
13/073 . . . Closures for reactor-vessels, e.g. rotatable **[5]**
13/08 . Vessels characterised by the material; Selection of materials for pressure vessels
13/087 . . Metallic vessels **[5]**
13/093 . . Concrete vessels **[5]**
13/10 . Means for preventing contamination in event of leakage

15/00 Cooling arrangements within the pressure vessel containing the core; **Selection of specific coolants**
15/02 . Arrangement or disposition of passages in which heat is transferred to the coolant, e.g. for coolant circulation through the supports of the fuel elements
15/04 . . from fissile or breeder material
15/06 . . . in fuel elements
15/08 . . from moderating material
15/10 . . from reflector or thermal shield
15/12 . . from pressure vessel; from containment vessel
15/14 . . from ducts conducting a hot fluid; from ducts comprising auxiliary apparatus, e.g. pumps, cameras
15/16 . comprising means for separating liquid and steam (separating in general B01D; steam traps F16T)
15/18 . Emergency cooling arrangements; Removing shut-down heat
15/20 . Partitions or thermal insulation between fuel channel and moderator, e.g. in pressure tube reactors
15/22 . Structural association of coolant tubes with headers or other pipes, e.g. in pressure tube reactors (joints of tubes in general F16L) **[4]**
15/24 . Promoting flow of the coolant (electrodynamic pumps H02K 44/02)
15/243 . . for liquids **[5]**
15/247 . . . for liquid metals **[5]**
15/25 . . . using jet pumps **[5]**
15/253 . . for gases, e.g. blowers **[5]**
15/257 . . using heat-pipes **[5]**
15/26 . . by convection, e.g. using chimneys, using divergent channels
15/28 . Selection of specific coolants (if serving as the moderator G21C 5/12; heat-transfer or heat-exchange materials C09K 5/00)

17/00 Monitoring; **Testing** (measuring in general G01)
17/003 . Remote inspection of vessels, e.g. pressure vessels **[5]**
17/007 . . Inspection of the outer surfaces of vessels **[5]**
17/01 . . Inspection of the inner surfaces of vessels **[5]**
17/013 . . Inspection vehicles **[5]**
17/017 . Inspection or maintenance of pipe-lines or tubes in nuclear installations **[5]**
17/02 . Devices or arrangements for monitoring coolant or moderator
17/022 . . for monitoring liquid coolants or moderators **[5]**
17/025 . . . for monitoring liquid metal coolants **[5]**
17/028 . . for monitoring gaseous coolants **[5]**
17/032 . . Reactor-coolant flow measuring or monitoring **[5]**
17/035 . . Moderator- or coolant-level detecting devices **[5]**
17/038 . . Boiling detection in moderator or coolant **[5]**
17/04 . . Detecting burst slugs
17/06 . Devices or arrangements for monitoring or testing fuel or fuel elements outside the reactor core, e.g. for burn-up, for contamination (G21C 17/08, G21C 17/10 take precedence; detecting leaking fuel elements during reactor operation G21C 17/04)
17/07 . . Leak testing **[5]**
17/08 . Structural combination of reactor core or moderator structure with viewing means, e.g. with television camera, periscope, window
17/10 . Structural combination of fuel element, control rod, reactor core, or moderator structure with sensitive instruments, e.g. for measuring radioactivity, strain
17/104 . . Measuring reactivity **[5]**
17/108 . . Measuring reactor flux **[5]**

17/112 . . Measuring temperature **[5]**
17/116 . . Passages or insulators, e.g. for electric cables **[5]**
17/12 . . Sensitive element forming part of control element
17/14 . Period meters

19/00 Arrangements for treating, for handling, or for facilitating the handling of, fuel or other materials which are used within the reactor, e.g. within its pressure vessel [2]
19/02 . Details of handling arrangements
19/04 . . Means for controlling flow of coolant over objects being handled; Means for controlling flow of coolant through channel being serviced
19/06 . . Means for supporting or storing fuel elements or control elements **[4]**
19/07 . . . Storage racks; Storage pools **[5]**
19/08 . . Means for heating fuel elements before introduction into the core; Means for heating or cooling fuel elements after removal from the core
19/10 . . Lifting devices or pulling devices adapted for co-operation with fuel elements or with control elements (manipulators B25J)
19/105 . . . with grasping or spreading coupling elements **[5]**
19/11 . . . with revolving coupling elements, e.g. socket coupling **[5]**
19/115 . . . with latching devices and ball couplings **[5]**
19/12 . . Arrangements for exerting direct hydraulic or pneumatic force on fuel element or on control element
19/14 . characterised by their adaptation for use with horizontal channels in the reactor core
19/16 . Articulated or telescopic chutes or tubes for connection to channels in the reactor core
19/18 . Apparatus for bringing fuel elements to the reactor charge area, e.g. from a storage place
19/19 . Reactor parts specifically adapted to facilitate handling, e.g. to facilitate charging or discharging of fuel elements **[3]**
19/20 . Arrangements for introducing objects into the pressure vessel; Arrangements for handling objects within the pressure vessel; Arrangements for removing objects from the pressure vessel
19/22 . . Arrangements for obtaining access to the interior of a pressure vessel whilst the reactor is operating
19/24 . . . by using an auxiliary vessel which is temporarily sealed to the pressure vessel
19/26 . Arrangements for removing jammed or damaged fuel elements or control elements; Arrangements for moving broken parts thereof
19/28 . Arrangements for introducing fluent material into the reactor core; Arrangements for removing fluent material from the reactor core (pumping coolant G21D)
19/30 . . with continuous purification of circulating fluent material, e.g. by extraction of fission products
19/303 . . . specially adapted for gases (decontamination of gases G21F 9/02) **[5]**
19/307 . . . specially adapted for liquids (decontamination of liquids G21F 9/04) **[5]**
19/31 . . . . for molten metals **[5]**
19/313 . . . . . using cold traps **[5]**
19/317 . . . Recombination devices for radiolytic dissociation products **[5]**
19/32 . Apparatus for removing radioactive objects or materials from the reactor discharge area, e.g. to a storage place; Apparatus for handling radioactive objects or materials within a storage place or removing them therefrom (disposal of waste material G21F 9/00)
19/33 . Apparatus or processes for dismantling strings of spent fuel elements (G21C 19/34 takes precedence) **[2]**
19/34 . Apparatus or processes for dismantling nuclear fuel, e.g. before reprocessing (shielded cells G21F 7/00) **[5]**
19/36 . . Mechanical means only
19/365 . . . Removing cannings or casings from fuel **[5]**
19/37 . . . . by separating into pieces both the canning or the casing and the fuel element, e.g. by cutting or shearing **[5]**
19/375 . . . Compacting devices, e.g. for fuel assemblies **[5]**
19/38 . . Chemical means only
19/40 . Arrangements for preventing occurrence of critical conditions, e.g. during storage
19/42 . Reprocessing of irradiated fuel
19/44 . . of irradiated solid fuel
19/46 . . . Aqueous processes
19/48 . . . Non-aqueous processes
19/50 . . of irradiated fluid fuel

21/00 Apparatus or processes specially adapted to the manufacture of reactors or parts thereof (in general, section B, e.g. B23)
21/02 . Manufacture of fuel elements or breeder elements contained in non-active casings
21/04 . . by vibrational compaction or tamping
21/06 . . by swaging
21/08 . . by a slip-fit cladding process
21/10 . . by extrusion, drawing, or stretching
21/12 . . by hydrostatic or thermo-pneumatic canning
21/14 . . by plating in a fluid
21/16 . . by casting or dipping techniques
21/18 . Manufacture of control elements covered by group G21C 7/00

23/00 Adaptations of reactors to facilitate experimentation or irradiation [3]

G21D NUCLEAR POWER PLANT

1/00 Details of nuclear power plant (control G21D 3/00)
1/02 . Arrangements of auxiliary equipment
1/04 . Pumping arrangements (by means within the reactor pressure vessel G21C 15/24)

3/00 Control of nuclear power plant (control of nuclear reaction G21C 7/00)
3/02 . Manual control
3/04 . Safety arrangements (emergency protection of reactor G21C 9/00)

3/06 . . responsive to faults within the plant (in the reactor G21C 9/02)
3/08 . Regulation of any parameters in the plant
3/10 . . by a combination of a variable derived from neutron flux with other controlling variables, e.g. derived from temperature, cooling flow, pressure
3/12 . . by adjustment of the reactor in response only to changes in engine demand
3/14 . . . Varying flow of coolant
3/16 . . . Varying reactivity
3/18 . . by adjustment of plant external to the reactor only in response to change in reactivity

5/00 Arrangements of reactor and engine in which reactor-produced heat is converted into mechanical energy
5/02 . Reactor and engine structurally combined, e.g. portable
5/04 . Reactor and engine not structurally combined
5/06 . . with engine working medium circulating through reactor core
5/08 . . with engine working medium heated in a heat exchanger by the reactor coolant
5/10 . . . Liquid working medium partially heated by reactor and vaporised by heat source external to the core, e.g. with oil heating
5/12 . . . Liquid working medium vaporised by reactor coolant
5/14 . . . . and also superheated by reactor coolant
5/16 . . . . superheated by separate heat source

7/00 Arrangements for direct production of electric energy from fusion or fission reactions (obtaining electric energy from radioactive sources G21H 1/00)
7/02 . using magneto-hydrodynamic generators
7/04 . using thermoelectric elements (structural combination of fuel element with thermoelectric element G21C 3/40)

9/00 Arrangements to provide heat for purposes other than conversion into power, e.g. for heating buildings

---

G21F PROTECTION AGAINST X-RADIATION, GAMMA RADIATION, CORPUSCULAR RADIATION OR PARTICLE BOMBARDMENT; TREATING RADIOACTIVELY CONTAMINATED MATERIAL; DECONTAMINATION ARRANGEMENTS THEREFOR (radiation protection by pharmaceutical means A61K 8/00, A61Q 17/04; in cosmonautic vehicles B64G 1/54; combined with a reactor G21C 11/00; combined with X-ray tubes H01J 35/16; combined with X-ray apparatus H05G 1/02)

1/00 Shielding characterised by the composition of the material
1/02 . Selection of uniform shielding materials
1/04 . . Concretes; Other hydraulic hardening materials
1/06 . . Ceramics; Glasses; Refractories (cermets G21F 1/08)
1/08 . . Metals; Alloys; Cermets, i.e. sintered mixtures of ceramics and metals
1/10 . . Organic substances; Dispersions in organic carriers
1/12 . Laminated shielding materials

3/00 Shielding characterised by its physical form, e.g. granules, or shape of the material
3/02 . Clothing
3/025 . . Clothing completely surrounding the wearer **[5]**
3/03 . . Aprons **[5]**
3/035 . . Gloves (mounting means on glove boxes G21F 7/053) **[5]**
3/04 . Bricks; Shields made up therefrom

5/00 Transportable or portable shielded containers
5/002 . Containers for fluid radioactive wastes **[5]**
5/005 . Containers for solid radioactive wastes, e.g. for ultimate disposal **[5]**
5/008 . . Containers for fuel elements **[5]**
5/012 . . . Fuel element racks in the containers **[5]**
5/015 . for storing radioactive sources, e.g. source carriers for irradiation units; Radioisotope containers **[5]**
5/018 . . Syringe shields or holders (syringe shielding for applying radioactive material to the body A61M 36/08) **[5]**
5/02 . with provision for restricted exposure of a radiation source within the container
5/04 . . Means for controlling exposure, e.g. time, size of aperture (controlling exposure to X-radiation H05G 1/30)
5/06 . Details of, or accessories to, the containers **[5]**
5/08 . . Shock-absorbers, e.g. impact buffers for containers **[5]**
5/10 . . Heat-removal systems, e.g. using circulating fluid or cooling fins **[5]**
5/12 . . Closures for containers; Sealing arrangements **[5]**
5/14 . . Devices for handling containers or shipping-casks, e.g. transporting devices **[5]**

7/00 Shielded cells or rooms
7/005 . Shielded passages through walls; Locks; Transferring devices between rooms (between glove-boxes G21F 7/047) **[5]**
7/01 . . Transferring by fluidic means **[5]**
7/015 . Room atmosphere, temperature or pressure control devices **[5]**
7/02 . Observation devices permitting vision but shielding the observer
7/03 . . Windows, e.g. shielded **[5]**
7/04 . Shielded glove-boxes
7/047 . . Shielded passages; Closing or transferring means between glove-boxes **[5]**
7/053 . . Glove mounting means **[5]**
7/06 . Structural combination with remotely-controlled apparatus, e.g. with manipulators

9/00 Treating radioactively contaminated material; Decontamination arrangements therefor [2,5]
9/02 . Treating gases **[2]**
9/04 . Treating liquids **[2]**
9/06 . . Processing
9/08 . . . by evaporation; by distillation
9/10 . . . by flocculation

9/12 . . . by absorption; by adsorption; by ion-exchange
9/14 . . . by incineration; by calcination, e.g. desiccation
9/16 . . . by fixation in stable solid media
9/18 . . . by biological processes
9/20 . . Disposal of liquid waste
9/22 . . . by storage in a tank or other container
9/24 . . . by storage in the ground; by storage under water, e.g. in ocean
9/26 . . . by dilution in water, e.g. in ocean, in stream
9/28 . Treating solids **[2]**
9/30 . . Processing
9/32 . . . by incineration
9/34 . . Disposal of solid waste
9/36 . . . by packaging; by baling

G21G CONVERSION OF CHEMICAL ELEMENTS; RADIOACTIVE SOURCES [2]

1/00 Arrangements for converting chemical elements by electromagnetic radiation, corpuscular radiation, or particle bombardment, e.g. producing radioactive isotopes (by thermonuclear reactions in nuclear reactors G21B; conversion of nuclear fuel in nuclear reactors G21C) **[2]**
1/02 . in nuclear reactors
1/04 . outside of nuclear reactors or particle accelerators **[2]**
1/06 . . by neutron irradiation **[2]**
1/08 . . . accompanied by nuclear fission **[2]**
1/10 . . by bombardment with electrically-charged particles (irradiation devices G21K 5/00) **[2]**
1/12 . . by electromagnetic irradiation, e.g. with gamma or X-rays (irradiation devices G21K 5/00) **[2]**

4/00 Radioactive sources [2]
4/02 . Neutron sources **[2]**
4/04 . Radioactive sources other than neutron sources (radioactive dressings A61M 36/14) **[2]**
4/06 . . characterised by constructional features **[2]**
4/08 . . . specially adapted for medical applications (radiation therapy using radioactive sources A61N 5/10) **[2]**
4/10 . . with radium emanation **[2]**

5/00 Alleged conversion of chemical elements by chemical reaction

7/00 Conversion of chemical elements not provided for in other groups of this subclass [2009.01]

G21H OBTAINING ENERGY FROM RADIOACTIVE SOURCES; APPLICATIONS OF RADIATION FROM RADIOACTIVE SOURCES; UTILISING COSMIC RADIATION (fusion reactors G21B; nuclear reactors G21C)

1/00 Arrangements for obtaining electrical energy from radioactive sources, e.g. from radioactive isotopes
1/02 . Cells charged directly by beta radiation
1/04 . Cells using secondary emission induced by alpha radiation, beta radiation, or gamma radiation
1/06 . Cells wherein radiation is applied to the junction of different semiconductor materials
1/08 . Cells in which radiation ionises a gas in the presence of a junction of two dissimilar metals, i.e. contact potential-difference cells
1/10 . Cells in which radiation heats a thermoelectric junction or a thermionic converter **[2]**
1/12 . Cells using conversion of the radiation into light combined with subsequent photoelectric conversion into electric energy

3/00 Arrangements for direct conversion of radiation energy from radioactive sources into forms of energy other than electric energy, e.g. light
3/02 . in which material is excited to luminesce by the radiation (lamps in which a gas filling or screen or coating is excited to luminesce by radioactive material structurally associated with the lamp H01J 65/00)

5/00 Applications of radiation from radioactive sources or arrangements therefor (producing mutation in plants A01H 1/06; preservation of dairy products A23C 3/07; preservation of foodstuffs A23L 3/26; for therapeutic purposes A61N 5/10; in chemical, physical or physicochemical processes in general B01J 19/08; in electrostatic separation B03C 3/38; for after-treatment of coatings applied as liquids or other fluent materials B05D 3/06; for action between electric vehicles and tracked apparatus B61L 1/10, B61L 3/06; for preparation of organic chemical compounds C07, C08F 2/46; for treating macromolecular substances or articles made therefrom B29C 71/04, C08J 3/28, C08J 7/18; for cracking of hydrocarbon oils C10G 15/10, C10G 32/04; for reforming naphtha C10G 35/16; preservation or ageing of products obtained from fermentation processes C12H 1/06, C12H 1/16; for bleaching fibres D06L 3/04; measuring G01T; irradiation devices, gamma- or X-ray microscopes G21K; in discharge tubes H01J; apparatus for generating ions to be introduced into non-enclosed gases, e.g. into the atmosphere, H01T 23/00; for carrying-off electrostatic charges H05F 3/06)
5/02 . as tracers

7/00 Use of effects of cosmic radiation

G21J NUCLEAR EXPLOSIVES; APPLICATIONS THEREOF

Note

This subclass covers uncontrollable fission or fusion reactions.

1/00 Nuclear explosive devices

3/00 Peaceful applications of nuclear explosive devices

3/02 . for excavation

5/00 Detection arrangements for nuclear explosions

G21K TECHNIQUES FOR HANDLING PARTICLES OR ELECTROMAGNETIC RADIATION NOT OTHERWISE PROVIDED FOR; IRRADIATION DEVICES; GAMMA- OR X-RAY MICROSCOPES (X-ray technique H05G; plasma technique H05H) **[2]**

1/00 Arrangements for handling radiation or particles, e.g. focusing, moderating (radiation filters G21K 3/00) **[2]**

1/02 . using diaphragms, collimators **[2]**

1/04 . . using variable diaphragms, shutters, choppers **[2]**

1/06 . using diffraction, refraction, or reflection, e.g. monochromators (G21K 1/10, G21K 7/00 take precedence) **[2]**

1/08 . Deviation, concentration, or focusing of the beam by electric or magnetic means (electron-optical arrangements in electric discharge tubes H01J 29/46) **[2]**

1/087 . . by electrical means **[4]**

1/093 . . by magnetic means **[4]**

1/10 . Scattering devices; Absorbing devices **[2]**

1/12 . . Resonant absorbers or driving arrangements therefor, e.g. for Mössbauer-effect devices **[3]**

1/14 . using charge exchange devices, e.g. for neutralising or changing the sign of the electrical charges of beams (producing or accelerating neutral particle beams H05H 3/00) **[3]**

1/16 . using polarising devices, e.g. for obtaining a polarised ion beam **[3]**

3/00 Radiation filters, e.g. X-ray filters [2]

4/00 Conversion screens for the conversion of the spatial distribution of X-rays or particle radiation into visible images, e.g. fluoroscopic screens (photographic processes using X-ray intensifiers G03C 5/17; discharge tubes comprising luminescent screens H01J 1/62; cathode ray tubes for X-ray conversion with optical output H01J 31/50) **[3]**

5/00 Irradiation devices (adaptations of reactors to facilitate irradiation G21C 23/00; discharge tubes for irradiating H01J 33/00, H01J 37/00) **[2]**

5/02 . having no beam-forming means **[2]**

5/04 . with beam-forming means **[2]**

5/08 . Holders for targets or for objects to be irradiated **[2]**

5/10 . with provision for relative movement of beam source and object to be irradiated **[3]**

7/00 Gamma- or X-ray microscopes [2]

G99 SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

G99Z SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

Note

This subclass covers subject matter that: **[8]**
(a) is not provided for, but is most closely related to, the subject matter covered by the subclasses of this section, and **[8]**
(b) is not explicitly covered by any subclass of another section. **[8]**

99/00 Subject matter not otherwise provided for in this section [8]

SECTION H – ELECTRICITY

Note

These Notes cover the basic principles and general instructions for use of section H.

(I) Section H covers:
- (a) basic electric elements, which cover all electric units and the general mechanical structure of apparatus and circuits, including the assembly of various basic elements into what are called printed circuits and also cover to a certain extent the manufacture of these elements (when not covered elsewhere);
- (b) generation of electricity, which covers the generation, conversion and distribution of electricity together with the controlling of the corresponding gear;
- (c) applied electricity, which covers:
  - (i) general utilisation techniques, viz. those of electric heating and electric lighting circuits;
  - (ii) some special utilisation techniques, either electric or electronic in the strict sense, which are not covered by other sections of the Classification, including:
    - (1) electric light sources, including lasers;
    - (2) electric X-ray technique;
    - (3) electric plasma technique and the generation and acceleration of electrically charged particles or neutrons;
- (d) basic electronic circuits and their control;
- (e) radio or electric communication technique;
- (f) the use of a specified material for the manufacture of the article or element described. In this connection, paragraphs 88 to 90 of the Guide should be referred to.

(II) In this section, the following general rules apply:
- (a) Subject to the exceptions stated in I(c), above, any electric aspect or part peculiar to a particular operation, process, apparatus, object or article, classified in one of the sections of the Classification other than section H, is always classified in the subclass for that operation, process, apparatus, object or article. Where common characteristics concerning technical subjects of similar nature have been brought out at class level, the electric aspect or part is classified, in conjunction with the operation, process, apparatus, object or article, in a subclass which covers entirely the general electrical applications for the technical subject in question;
- (b) The electrical applications referred to under (a), above, either general or particular, include:
  - (i) the therapeutic processes and apparatus, in class A61;
  - (ii) the electric processes and apparatus used in various laboratory or industrial operations, in classes B01 and B03 and in subclass B23K;
  - (iii) the electricity supply, electric propulsion and electric lighting of vehicles in general and of particular vehicles, in the subsection “Transporting” of section B;
  - (iv) the electric ignition systems of internal-combustion engines, in subclass F02P, and of combustion apparatus in general, in subclass F23Q;
  - (v) the whole electrical part of section G, i.e. measuring devices including apparatus for measuring electric variables, checking, signalling and calculating. Electricity in that section is generally dealt with as a means and not as an end in itself;
- (c) All electrical applications, both general and particular, presuppose that the “basic electricity” aspect appears in section H (see I(a) above) as regards the electric “basic elements” which they comprise. This rule is also valid for applied electricity, referred to in I(c), above, which appears in section H itself.

(III) In this section, the following special cases occur:
- (a) Among the general applications covered by sections other than section H, it is worth noting that electric heating in general is covered by subclasses F24D or F24H or class F27, and that electric lighting in general is partly covered by class F21, since in section H (see I(c), above) there are places in H05B which cover the same technical subjects;
- (b) In the two cases referred to under (a), above, the subclasses of section F, which deal with the respective subjects, essentially cover in the first place the whole mechanical aspect of the apparatus or devices, whereas the electrical aspect, as such, is covered by subclass H05B;
- (c) In the case of lighting, this mechanical aspect should be taken to cover the material arrangement of the various electric elements, i.e., their geometrical or physical position in relation to one another; this aspect is covered by subclass F21V, the elements themselves and the primary circuits remaining in section H. The same applies to electric light sources, when combined with light sources of a different kind. These are covered by subclass H05B, whereas the physical arrangement which their combination constitutes is covered by the various subclasses of class F21;
- (d) As regards heating, not only the electric elements and circuitry designs, as such, are covered by subclass H05B, but also the electric aspects of their arrangement, where these concern cases of general application; electric furnaces being considered as such. The physical disposition of the electric elements in furnaces is covered by section F. If a comparison is made with electric welding circuits, which are covered by subclass B23K in connection with welding, it can be seen that electric heating is not covered by the general rule stated in II, above.

H01 BASIC ELECTRIC ELEMENTS

(1) Processes involving only a single technical art, e.g. drying, coating, for which provision exists elsewhere are classified in the relevant class for that art.

(2) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems". **[7]**

H01B CABLES; **CONDUCTORS**; **INSULATORS**; **SELECTION OF MATERIALS FOR THEIR CONDUCTIVE, INSULATING, OR DIELECTRIC PROPERTIES** (selection for magnetic properties H01F 1/00; waveguides H01P; installation of cables or lines, or of combined optical and electric, cables or lines H02G)

Subclass index

1/00 Conductors or conductive bodies characterised by the conductive materials; **Selection of materials as conductors** (superconductive or hyperconductive conductors, cables, or transmission lines characterised by the materials H01B 12/00; resistors H01C; details of devices using superconductivity or hyperconductivity, characterised by the material H01L 39/12) **[4]**

Note

Groups H01B 1/14 to H01B 1/24 take precedence over groups H01B 1/02 to H01B 1/06. **[3]**

1/02 . mainly consisting of metals or alloys
1/04 . mainly consisting of carbon-silicon compounds, carbon, or silicon
1/06 . mainly consisting of other non-metallic substances
1/08 . . oxides
1/10 . . sulfides
1/12 . . organic substances **[3]**
1/14 . Conductive material dispersed in non-conductive inorganic material **[3]**
1/16 . . the conductive material comprising metals or alloys **[3]**
1/18 . . the conductive material comprising carbon-silicon compounds, carbon, or silicon **[3]**
1/20 . Conductive material dispersed in non-conductive organic material **[3]**
1/22 . . the conductive material comprising metals or alloys **[3]**
1/24 . . the conductive material comprising carbon-silicon compounds, carbon, or silicon **[3]**

3/00 Insulators or insulating bodies characterised by the insulating materials; **Selection of materials for their insulating or dielectric properties** (selection of piezo-electric or electrostrictive materials H01L 41/00)

3/02 . mainly consisting of inorganic substances
3/04 . . mica
3/06 . . asbestos
3/08 . . quartz; glass; glass wool; slag wool; vitreous enamels
3/10 . . metallic oxides (ceramics H01B 3/12)
3/12 . . ceramics
3/14 . . cements
3/16 . . gases
3/18 . mainly consisting of organic substances
3/20 . . liquids, e.g. oils (silicone oils H01B 3/46)
3/22 . . . hydrocarbons
3/24 . . . containing halogen in the molecules, e.g. halogenated oils
3/26 . . asphalts; bitumens; pitches
3/28 . . natural or synthetic rubbers
3/30 . . plastics; resins; waxes

Note

Group H01B 3/47 takes precedence over groups H01B 3/32 to H01B 3/46. **[8]**

3/32 . . . natural resins
3/34 . . . waxes (silicone waxes H01B 3/46)
3/36 . . . condensation products of phenols with aldehydes or ketones
3/38 . . . condensation products of aldehydes with amines or amides
3/40 . . . epoxy resins
3/42 . . . polyesters; polyethers; polyacetals
3/44 . . . vinyl resins; acrylic resins (silicones H01B 3/46)
3/46 . . . silicones
3/47 . . . fibre-reinforced plastics, e.g. glass-reinforced plastics **[8]**
3/48 . . fibrous materials (fibre-reinforced plastics H01B 3/47) **[1,8]**
3/50 . . . fabric
3/52 . . . wood; paper; pressboard (insulating paper per se D21H 27/12)
3/54 . . . hard paper; hard fabrics
3/56 . . gases

Note

Group H01B 12/00 takes precedence over groups H01B 5/00 to H01B 11/00.

5/00 Non-insulated conductors or conductive bodies characterised by their form

5/02 . Single bars, rods, wires or strips; Bus-bars (aspects of connection with their counterparts H01R 25/00; bus-bar layouts H02B 1/20; installations of bus-bars H02G 5/00) **[1,7]**
5/04 . . wound or coiled
5/06 . Single tubes
5/08 . Several wires or the like stranded in the form of a rope

5/10 . . stranded around a space, insulating material, or dissimilar conducting material
5/12 . Braided wires or the like
5/14 . comprising conductive layers or films on insulating-supports (insulating-layers or insulating-films on metal bodies H01B 17/62)
5/16 . comprising conductive material in insulating or poorly conductive material, e.g. conductive rubber (H01B 1/14, H01B 1/20 take precedence; insulating bodies with conductive admixtures H01B 17/64; conductive paints C09D 5/24) **[3]**

7/00 Insulated conductors or cables characterised by their form
7/02 . Disposition of insulation (materials H01B 3/00; insulators H01B 17/00)
7/04 . Flexible cables, conductors, or cords, e.g. trailing cables
7/06 . Extensible conductors or cables, e.g. self-coiling cords (arrangements for storing and repeatedly paying-out and re-storing lengths of conductors or cables B65H 75/34)
7/08 . Flat or ribbon cables
7/10 . Contact cables, i.e. having conductors which may be brought into contact by distortion of the cable
7/12 . Floating cables (installations of cables supported on or from floats H02G 9/12)
7/14 . Submarine cables
7/16 . Rigid-tube cables (heating elements of similar construction H05B)
7/17 . Protection against damage caused by external factors, e.g. sheaths or armouring (power cables with screens H01B 9/02; communication cables with screens H01B 11/06; installation of conduits H02G) **[7]**
7/18 . . by wear, mechanical force or pressure **[1,7]**
7/20 . . . Metal tubes, e.g. lead sheaths **[1,7]**
7/22 . . . Metal wires or tapes, e.g. made of steel **[1,7]**
7/24 . . . Devices affording localised protection against mechanical force or pressure **[1,7]**
7/26 . . . Reduction of losses in sheaths or armouring **[1,7]**
7/28 . . by moisture, corrosion, chemical attack or weather **[1,7]**
7/282 . . . Preventing penetration of fluid into conductor or cable (insulators or insulating bodies with surfaces specially treated for preserving insulating properties, e.g. for protection against moisture, dirt, or the like, H01B 17/50) **[7]**
7/285 . . . . by completely or partially filling interstices in the cable **[7]**
7/288 . . . . . using hygroscopic material or material swelling in the presence of liquid **[7]**
7/29 . . by extremes of temperature or by flame (H01B 7/42 takes precedence) **[7]**
7/295 . . . using material resistant to flame **[7]**
7/30 . with arrangements for reducing conductor losses when carrying ac, e.g. due to skin effect
7/32 . with arrangements for indicating defects, e.g. breaks, leaks (locating defects by measuring G01)
7/36 . with distinguishing or length marks
7/38 . with arrangements for facilitating removal of insulation **[7]**
7/40 . with arrangements for facilitating mounting or securing **[7]**
7/42 . with arrangements for heat dissipation or conduction (insulators or insulating bodies having heating or cooling devices H01B 17/54) **[7]**

9/00 Power cables
9/02 . with screens or conductive layers, e.g. for avoiding large potential gradients
9/04 . Concentric cables
9/06 . Gas-pressure cables; Oil-pressure cables; Cables for use in conduits under fluid pressure

11/00 Communication cables or conductors (waveguides H01P)
11/02 . Cables with twisted pairs or quads (transposing, crossing, or twisting at joints H04B; balancing of earth capacitance H04B)
11/04 . . with pairs or quads mutually positioned to reduce cross-talk (balancing by making use of additional capacitors or coils H04B)
11/06 . . with means for reducing effects of electromagnetic or electrostatic disturbances, e.g. screen (screening in general H05K 9/00)
11/08 . . . Screens specially adapted for reducing cross-talk
11/10 . . . Screens specially adapted for reducing interference from external sources
11/12 . . Arrangements for exhibiting specific transmission characteristics (loading coils per se H01F 17/08; coil-loaded circuits H04B)
11/14 . . . Continuously inductively loaded cables, e.g. Krarup cables
11/16 . . . Cables, e.g. submarine cable, with coils or other devices incorporated during cable manufacture (junction boxes for cables H02G 15/10)
11/18 . Coaxial cables; Analogous cables having more than one inner conductor within a common outer conductor (suitable for handling frequencies considerably beyond the audio range H01P 3/06)
11/20 . . Cables having a multiplicity of coaxial lines **[3]**
11/22 . Cables including at least one electrical conductor together with optical fibres **[4]**

12/00 Superconductive or hyperconductive conductors, cables, or transmission lines (superconductors characterised by the ceramic-forming technique or the ceramic composition C04B 35/00; details or devices using superconductivity or hyperconductivity characterised by the material H01L 39/12) **[2,4]**
12/02 . characterised by their form **[4]**

Note

Group H01B 12/12 takes precedence over groups H01B 12/04 to H01B 12/10. **[4]**

12/04 . . Single wire **[4]**
12/06 . . Films or wires on bases or cores **[4]**
12/08 . . Stranded or braided wires **[4]**
12/10 . . Multi-filaments embedded in normal conductors **[4]**
12/12 . . Hollow conductors **[4]**
12/14 . characterised by the disposition of thermal insulation **[4]**
12/16 . characterised by cooling **[4]**

13/00 Apparatus or processes specially adapted for manufacturing conductors or cables
13/004 . for manufacturing rigid-tube cables **[7]**
13/008 . for manufacturing extensible conductors or cables **[7]**
13/012 . for manufacturing wire harnesses **[7]**
13/016 . for manufacturing co-axial cables (applying discontinuous insulation H01B 13/20) **[7]**

13/02 . Stranding-up (stranding-up ropes D07B)
13/04 . . Mutually-positioning pairs or quads to reduce cross-talk
13/06 . Insulating conductors or cables (H01B 13/32 takes precedence) **[4]**
13/08 . . by winding
13/10 . . by longitudinal lapping
13/12 . . by applying loose fibres
13/14 . . by extrusion
13/16 . . by passing through, or dipping in, a liquid bath; by spraying
13/18 . . Applying discontinuous insulation, e.g. discs, beads
13/20 . . . for concentric or coaxial cables
13/22 . Sheathing; Armouring; Screening; Applying other protective layers (H01B 13/32 takes precedence) **[4]**
13/24 . . by extrusion
13/26 . . by winding, braiding, or longitudinal lapping (winding in general B65H)
13/28 . Applying continuous inductive loading, e.g. Krarup loading
13/30 . Drying (in general F26B); Impregnating (H01B 13/32 takes precedence) **[4]**
13/32 . Filling or coating with impervious material (for cable installations H02G 15/00) **[4]**
13/34 . for marking conductors or cables **[7]**

15/00 Apparatus or processes for salvaging material from cables (insulated conductors or cables with arrangements for facilitating removal of insulation H01B 7/38; methods or apparatus specially adapted for removing insulation from conductors H02G 1/12)

17/00 Insulators or insulating bodies characterised by their form (section insulators for electric traction B60M 1/18; insulating rail-joints E01B 11/54)
17/02 . Suspension insulators; Strain insulators
17/04 . . Chains; Multiple chains
17/06 . . Fastening of insulator to support, to conductor, or to adjoining insulator
17/08 . . . by cap-and-bolt
17/10 . . . by intermediate link
17/12 . . Special features of strain insulators (devices for relieving mechanical tension of electric lines or cables H02G 7/04)
17/14 . Supporting insulators (pin insulators H01B 17/20; apertured insulators H01B 17/24)
17/16 . . Fastening of insulators to support, to conductor, or to adjoining insulator
17/18 . . for very heavy conductors, e.g. bus-bars, rails
17/20 . Pin insulators
17/22 . . Fastening of conductors to insulator
17/24 . Insulators apertured for fixing by nail, screw, wire, or bar, e.g. diabolo, bobbin
17/26 . Lead-in insulators; Lead-through insulators
17/28 . . Capacitor type (capacitors H01G)
17/30 . . Sealing (packings in general F16J)
17/32 . Single insulators consisting of two or more dissimilar insulating bodies
17/34 . Insulators containing liquid, e.g. oil
17/36 . Insulators having evacuated or gas-filled spaces
17/38 . Fittings, e.g. caps; Fastenings therefor
17/40 . . Cementless fittings
17/42 . Means for obtaining improved distribution of voltage (capacitor-type lead-through insulators H01B 17/28); Protection against arc discharges
17/44 . . Structural association of insulators with corona rings (corona rings H01T 19/02)
17/46 . . Means for providing an external arc-discharge path (spark-gap arresters H01T)
17/48 . . over chains or other serially-arranged insulators
17/50 . with surfaces specially treated for preserving insulating properties, e.g. for protection against moisture, dirt, or the like
17/52 . having cleaning devices (H01B 17/54 takes precedence)
17/54 . having heating or cooling devices
17/56 . Insulating bodies
17/58 . . Tubes, sleeves, beads, or bobbins through which the conductor passes (protective tubings for the installation of lines or cables in buildings H02G 3/04)
17/60 . . Composite insulating bodies (cables or conductors H01B 7/00, H01B 9/00; resistors H01C; capacitors H01G)
17/62 . . Insulating-layers or insulating-films on metal bodies (conductive layers or films on insulating bodies H01B 5/14)
17/64 . . with conductive admixtures, inserts, or layers (conductive bodies comprising conductive material dispersed in insulating material H01B 5/16)
17/66 . . Joining insulating bodies together, e.g. by bonding

19/00 Apparatus or processes specially adapted for manufacturing insulators or insulating bodies
19/02 . Drying (in general F26B); Impregnating
19/04 . Treating the surfaces, e.g. applying coatings

H01C RESISTORS

(1) In this subclass, the following term is used with the meaning indicated:
– "adjustable" means mechanically adjustable. **[2]**
(2) Variable resistors, the value of which is changed non-mechanically, e.g. by voltage or temperature, are classified in group H01C 7/00. **[2]**

Subclass index

1/00 Details

1/01 . Mounting; Supporting **[2]**

1/012 . . the base extending along, and imparting rigidity or reinforcement to, the resistive element (H01C 1/016 takes precedence; the resistive element being formed in two or more coils or loops as a spiral, helical, or toroidal winding H01C 3/18, H01C 3/20; the resistive element being formed as one or more layers or coatings on a base H01C 7/00) **[2]**

1/014 . . the resistor being suspended between, and being supported by, two supporting sections (H01C 1/016 takes precedence) **[2]**

1/016 . . with compensation for resistor expansion or contraction **[2]**

1/02 . Housing; Enclosing; Embedding; Filling the housing or enclosure **[2]**

1/022 . . the housing or enclosure being openable or separable from the resistive element **[2]**

1/024 . . the housing or enclosure being hermetically sealed (H01C 1/028, H01C 1/032, H01C 1/034 take precedence) **[2]**

1/026 . . . with gaseous or vacuum spacing between the resistive element and the housing or casing **[2]**

1/028 . . the resistive element being embedded in insulation with outer enclosing sheath **[2]**

1/03 . . . with powdered insulation **[2]**

1/032 . . plural layers surrounding the resistive element (H01C 1/028 takes precedence) **[2]**

1/034 . . the housing or enclosure being formed as coating or mould without outer sheath (H01C 1/032 takes precedence) **[2]**

1/036 . . . on wound resistive element **[2]**

1/04 . Arrangements of distinguishing marks, e.g. colour coding

1/06 . Electrostatic or electromagnetic shielding arrangements

1/08 . Cooling, heating, or ventilating arrangements

1/082 . . using forced fluid flow **[2]**

1/084 . . using self-cooling, e.g. fins, heat sinks **[2]**

1/12 . Arrangements of current collectors

1/125 . . of fluid contacts **[2]**

1/14 . Terminals or tapping points specially adapted for resistors (in general H01R); Arrangements of terminals or tapping points on resistors

1/142 . . the terminals or tapping points being coated on the resistive element **[2]**

1/144 . . the terminals or tapping points being welded or soldered **[2]**

1/146 . . the resistive element surrounding the terminal **[2]**

1/148 . . the terminals embracing or surrounding the resistive element (H01C 1/142 takes precedence) **[2]**

1/16 . Resistor networks not otherwise provided for

3/00 Non-adjustable metal resistors made of wire or ribbon, e.g. coiled, woven, or formed as grids

3/02 . arranged or constructed for reducing self-induction, capacitance, or variation with frequency

3/04 . Iron-filament ballast resistors; Other resistors having variable temperature coefficient

3/06 . Flexible or folding resistors, whereby such a resistor can be looped or collapsed upon itself **[2]**

3/08 . Dimension or characteristic of resistive element changing gradually or in discrete steps from one terminal to another **[2]**

3/10 . the resistive element having zig-zag or sinusoidal configuration **[2]**

3/12 . . lying in one plane **[2]**

3/14 . the resistive element being formed in two or more coils or loops continuously wound as a spiral, helical, or toroidal winding (H01C 3/02 to H01C 3/12 take precedence) **[2]**

3/16 . . including two or more distinct wound elements, or two or more winding patterns **[2]**

3/18 . . wound on a flat or ribbon base (H01C 3/16 takes precedence) **[2]**

3/20 . . wound on cylindrical or prismatic base (H01C 3/16 takes precedence) **[2]**

7/00 Non-adjustable resistors formed as one or more layers or coatings; **Non-adjustable resistors made from powdered conducting material or powdered semi-conducting material with or without insulating material** (consisting of loose powdered or granular material H01C 8/00; resistors with a potential-jump barrier or surface barrier, e.g. field effect resistors, H01L 29/00; semiconductor devices sensitive to electromagnetic or corpuscular radiation, e.g. photoresistors, H01L 31/00; devices using superconductivity or hyperconductivity H01L 39/00; devices using galvano-magnetic or similar magnetic effects, e.g. magnetic-field-controlled resistors, H01L 43/00; solid state devices for rectifying, amplifying, oscillating, or switching without a potential-jump barrier or surface barrier H01L 45/00; bulk negative resistance effect devices H01L 47/00) **[2]**

7/02 . having positive temperature coefficient

7/04 . having negative temperature coefficient

7/06 . including means to minimise changes in resistance with changes in temperature

7/10 . voltage responsive, i.e. varistors **[6]**

7/102 . . Varistor boundary, e.g. surface layers (H01C 7/12 takes precedence) **[6]**

7/105 . . Varistor cores (H01C 7/12 takes precedence) **[6]**

7/108 . . . Metal oxide **[6]**

7/112 . . . . ZnO type **[6]**

7/115 . . . . Titanium dioxide- or titanate type **[6]**

7/118 . . . Carbide, e.g. SiC type **[6]**

7/12 . . Overvoltage protection resistors; Arresters **[3]**

7/13 . current-responsive **[2]**

Note

Groups H01C 7/02 to H01C 7/13 take precedence over groups H01C 7/18 to H01C 7/22. **[2]**

7/18 . comprising a plurality of layers stacked between terminals **[2]**

7/20 . the resistive layer or coating being tapered **[2]**

7/22 . Elongated resistive element being bent or curved, e.g. sinusoidal, helical **[2]**

8/00 Non-adjustable resistors consisting of loose powdered or granular conducting, or powdered or granular semi-conducting material [2]

8/02 . Coherers or like imperfect resistors for detecting electromagnetic waves **[2]**

8/04 . Overvoltage protection resistors; Arresters **[2,3]**

10/00 Adjustable resistors [2]

10/02 . Liquid resistors **[2]**

10/04 . with specified mathematical relationship between movement of resistor actuating means and value of resistance, other than direct proportional relationship **[2]**

10/06 . adjustable by short-circuiting different amounts of the resistive element **[2]**

10/08 . . with intervening conducting structure between the resistive element and the short-circuiting means, e.g. taps **[2]**

10/10 . adjustable by mechanical pressure or force **[2]**

10/12 . . by changing surface pressure between resistive masses or resistive and conductive masses, e.g. pile type **[2]**

10/14 . adjustable by auxiliary driving means **[2]**

10/16 . including plural resistive elements **[2]**

10/18 . . including coarse and fine resistive elements **[2]**

10/20 . . Contact structure or movable resistive elements being ganged **[2]**

10/22 . resistive-element dimensions changing gradually in one direction, e.g. tapered resistive element (H01C 10/04 takes precedence) **[2]**

10/23 . resistive-element dimensions changing in a series of discrete, progressive steps **[2]**

10/24 . the contact moving along turns of a helical resistive element, or vice versa **[2]**

10/26 . resistive element moving (H01C 10/16, H01C 10/24 take precedence) **[2]**

Note

Groups H01C 10/02 to H01C 10/26 take precedence over groups H01C 10/28 to H01C 10/50. **[2]**

10/28 . the contact rocking or rolling along resistive element or taps **[2]**

10/30 . the contact sliding along resistive element **[2]**

10/32 . . the contact moving in an arcuate path **[2]**

10/34 . . . the contact or the associated conducting structure riding on collector formed as a ring or portion thereof **[2]**

10/36 . . . structurally combined with switching arrangements **[2]**

10/38 . . the contact moving along a straight path **[2]**

10/40 . . . screw-operated **[2]**

10/42 . . . . the contact bridging and sliding along resistive element and parallel conducting bar or collector **[2]**

10/44 . . . the contact bridging and sliding along resistive element and parallel conducting bar or collector (H01C 10/42 takes precedence) **[2]**

10/46 . Arrangements of fixed resistors with intervening connectors, e.g. taps (H01C 10/28, H01C 10/30 take precedence) **[2]**

10/48 . . including contact movable in an arcuate path **[2]**

10/50 . structurally combined with switching arrangement (H01C 10/36 takes precedence) **[2]**

11/00 Non-adjustable liquid resistors [2]

13/00 Resistors not provided for elsewhere

13/02 . Structural combinations of resistors (impedance networks H03H) **[2]**

17/00 Apparatus or processes specially adapted for manufacturing resistors (providing fillings for housings or enclosures H01C 1/02; reducing insulation surrounding a resistor to powder H01C 1/03; manufacture of thermally variable resistors H01C 7/02, H01C 7/04) **[2]**

17/02 . adapted for manufacturing resistors with envelope or housing (apparatus or processes for filling or compressing insulating material in heating element tubes H05B 3/52) **[2]**

17/04 . adapted for winding the resistive element **[2]**

17/06 . adapted for coating resistive material on a base **[2]**

17/065 . . by thick-film techniques, e.g. serigraphy **[6]**

17/07 . . by resistor foil bonding, e.g. cladding **[6]**

17/075 . . by thin-film techniques **[6]**

17/08 . . . by vapour deposition **[2]**

17/10 . . . by flame spraying **[2]**

17/12 . . . by sputtering **[2]**

17/14 . . . by chemical deposition **[2]**

17/16 . . . . using electric current **[2]**

17/18 . . . . without using electric current **[2]**

17/20 . . by pyrolytic processes **[2]**

17/22 . adapted for trimming **[2]**

17/23 . . by opening or closing resistor tracks of predetermined resistive values **[6]**

17/232 . . Adjusting the temperature coefficient; Adjusting value of resistance by adjusting temperature coefficient **[6]**

17/235 . . Initial adjustment of potentiometer parts for calibration **[6]**

17/24 . . by removing or adding resistive material (H01C 17/23, H01C 17/232, H01C 17/235 take precedence) **[2,6]**

17/242 . . . by laser **[6]**

17/245 . . . by mechanical means, e.g. sand-blasting, cutting, ultrasonic treatment **[6]**

17/26 . . by converting resistive material **[2]**

17/28 . adapted for applying terminals **[2]**

17/30 . adapted for baking **[2]**

H01F MAGNETS; **INDUCTANCES**; **TRANSFORMERS**; **SELECTION OF MATERIALS FOR THEIR MAGNETIC PROPERTIES** (ceramics based on ferrites C04B 35/26; alloys C22C; thermomagnetic devices H01L 37/00; loudspeakers, microphones, gramophone pick-ups or like acoustic electromechanical transducers H04R) **[2]**

Subclass index

1/00 **Magnets or magnetic bodies characterised by the magnetic materials therefor**; **Selection of materials for their magnetic properties** (thin magnetic films characterised by their composition H01F 10/10)

Note

Attention is drawn to Note (3) after the title of section C, which Note indicates to which version of the periodic table of chemical elements the IPC refers. **[2010.01]**

1/01 . of inorganic materials (H01F 1/44 takes precedence) **[6]**
1/03 . . characterised by their coercivity **[6]**

Note

Group H01F 1/40 takes precedence over H01F 1/03 **[6]**

1/032 . . . of hard-magnetic materials **[6]**
1/04 . . . . metals or alloys **[6]**
1/047 . . . . . Alloys characterised by their composition **[5,6]**
1/053 . . . . . containing rare earth metals **[5,6]**
1/055 . . . . . and magnetic transition metals, e.g. $SmCo_5$ **[6]**
1/057 . . . . . and IIIa elements, e.g. $Nd_2Fe_{14}B$ **[6]**
1/058 . . . . . and IVa elements, e.g. $Gd_2Fe_{14}C$ **[6]**
1/059 . . . . . and Va elements, e.g. $Sm_2Fe_{17}N_2$ **[6]**
1/06 . . . . . in the form of particles, e.g. powder (H01F 1/047 takes precedence) **[5,6]**
1/08 . . . . . pressed, sintered, or bound together **[6]**
1/09 . . . . mixtures of metallic and non-metallic particles; metallic particles having oxide skin **[6]**
1/10 . . . . non-metallic substances, e.g. ferrites **[6]**
1/11 . . . . . in the form of particles **[6]**
1/113 . . . . . in a bonding agent **[6]**
1/117 . . . . . Flexible bodies **[6]**
1/12 . . . of soft-magnetic materials **[6]**
1/14 . . . . metals or alloys **[6]**
1/147 . . . . . Alloys characterised by their composition **[5,6]**
1/153 . . . . . Amorphous metallic alloys, e.g. glassy metals **[5,6]**
1/16 . . . . . in the form of sheets (H01F 1/147 takes precedence) **[5,6]**
1/18 . . . . . with insulating coating **[6]**
1/20 . . . . . in the form of particles, e.g. powder (H01F 1/147 takes precedence) **[5,6]**
1/22 . . . . . pressed, sintered, or bound together **[6]**
1/24 . . . . . the particles being insulated **[6]**
1/26 . . . . . by macromolecular organic substances **[6]**
1/28 . . . . . dispersed or suspended in a bonding agent **[6]**
1/33 . . . . mixtures of metallic and non-metallic particles; metallic particles having oxide skin **[6]**
1/34 . . . . non-metallic substances, e.g. ferrites **[6]**
1/36 . . . . . in the form of particles **[6]**
1/37 . . . . . in a bonding agent **[6]**
1/375 . . . . . Flexible bodies **[6]**
1/38 . . . . . amorphous, e.g. amorphous oxides **[6]**
1/40 . . of magnetic semiconductor materials, e.g. $CdCr_2S_4$ (devices using galvano-magnetic or similar effects H01L 43/00) **[6]**
1/42 . of organic or organo-metallic materials (H01F 1/44 takes precedence) **[6]**
1/44 . of magnetic liquids, e.g. ferrofluids (particles in a bonding agent H01F 1/28, H01F 1/36) **[6]**

3/00 **Cores, yokes, or armatures** (magnetic materials H01F 1/00; permanent magnets H01F 7/02)
3/02 . made from sheets
3/04 . made from strips or ribbons
3/06 . made from wires
3/08 . made from powder (powder coatings on sheets H01F 3/02, on strips or ribbons H01F 3/04, on wires H01F 3/06)
3/10 . Composite arrangements of magnetic circuits
3/12 . . Magnetic shunt paths
3/14 . . Constrictions; Gaps, e.g. air-gaps (in magnetic shunt paths H01F 3/12)

5/00 **Coils** (superconducting coils H01F 6/06; fixed inductances of the signal type H01F 17/00)
5/02 . wound on non-magnetic supports, e.g. formers
5/04 . Arrangements of electric connections to coils, e.g. leads
5/06 . Insulation of windings

6/00 **Superconducting magnets**; **Superconducting coils [6]**
6/02 . Quenching; Protection arrangements during quenching **[6]**
6/04 . Cooling **[6]**
6/06 . Coils, e.g. winding, insulating, terminating or casing arrangements therefor **[6]**

7/00 **Magnets** (superconducting magnets H01F 6/00; for separation of solid materials from solid materials or fluids B03C 1/00; for bench or like work-holders B23B 31/28, B23Q 3/00; work-holding devices B25B 11/00; lifting magnets B66C 1/00; for electric meters G01R; for relays H01H; for dynamo-electric machines H02K)

7/02 . Permanent magnets

7/04 . . Means for releasing the attractive force

7/06 . Electromagnets; Actuators including electromagnets **[6]**

7/08 . . with armatures

7/10 . . . specially adapted for ac

7/11 . . . . reducing or eliminating the effects of eddy currents **[6]**

7/12 . . . . having anti-chattering arrangements

7/121 . . . Guiding or setting position of armatures, e.g. retaining armatures in their end position **[6]**

7/122 . . . . by permanent magnet **[6]**

7/123 . . . . by ancillary coil **[6]**

7/124 . . . . by mechanical latch, e.g. detent **[6]**

7/126 . . . Supporting or mounting **[6]**

7/127 . . . Assembling **[6]**

7/128 . . . Encapsulating, encasing or sealing **[6]**

7/129 . . . . of armatures **[6]**

7/13 . . . characterised by pulling-force characteristic

7/14 . . . Pivoting armatures (H01F 7/17 takes precedence) **[6]**

7/16 . . . Rectilinearly-movable armatures (H01F 7/17 takes precedence) **[6]**

7/17 . . . Pivoting and rectilinearly-movable armatures **[6]**

7/18 . . . Circuit arrangements for obtaining desired operating characteristics, e.g. for slow operation, for sequential energisation of windings, for high-speed energisation of windings

7/20 . . without armatures (cores H01F 3/00; coils H01F 5/00)

10/00 **Thin magnetic films, e.g. of one-domain structure** (magnetic record carriers G11B 5/00; thin-film magnetic stores G11C)

10/06 . characterised by the coupling or physical contact with connecting or interacting conductors

10/08 . characterised by magnetic layers (applying magnetic films to substrates H01F 41/14) **[3]**

10/10 . . characterised by the composition **[3]**

10/12 . . . being metals or alloys (intermetallic compounds H01F 10/18) **[3]**

10/13 . . . . Amorphous metallic alloys, e.g. glassy metals **[7]**

10/14 . . . . containing iron or nickel (H01F 10/13, H01F 10/16 take precedence) **[3,7]**

10/16 . . . . containing cobalt (H01F 10/13 takes precedence) **[3,7]**

10/18 . . . being compounds **[3]**

10/187 . . . . Amorphous compounds **[7]**

10/193 . . . . Magnetic semiconductor compounds **[7]**

10/20 . . . . Ferrites **[3]**

10/22 . . . . . Orthoferrites **[3]**

10/24 . . . . . Garnets **[3]**

10/26 . characterised by the substrate or intermediate layers (H01F 10/32 takes precedence) **[3,7]**

10/28 . . characterised by the composition of the substrate **[3]**

10/30 . . characterised by the composition of intermediate layers **[3]**

10/32 . Spin-exchange-coupled multilayers, e.g. nanostructured superlattices **[7]**

13/00 **Apparatus or processes for magnetising or demagnetising** (for degaussing ships B63G 9/06; for clocks or watches G04D 9/00; demagnetising arrangements for colour television H04N 9/29)

Note

Groups H01F 17/00 to H01F 38/00, with the exception of groups H01F 27/42 and H01F 38/32, cover only structural or constructional aspects of transformers, inductive reactors, chokes or the like. These groups do not cover circuit arrangement of such devices, which are covered by the appropriate functional places. **[6]**

17/00 **Fixed inductances of the signal type** (coils in general H01F 5/00)

17/02 . without magnetic core

17/03 . . with ceramic former

17/04 . with magnetic core

17/06 . . with core substantially closed in itself, e.g. toroid

17/08 . . . Loading coils for telecommunication circuits

19/00 **Fixed transformers or mutual inductances of the signal type** (H01F 36/00 takes precedence) **[3]**

19/02 . Audio-frequency transformers or mutual inductances, i.e. not suitable for handling frequencies considerably beyond the audio range

19/04 . Transformers or mutual inductances suitable for handling frequencies considerably beyond the audio range (resonant circuits H03H)

19/06 . . Broad-band transformers, e.g. suitable for handling frequencies well down into the audio range

19/08 . . Transformers having magnetic bias, e.g. for handling pulses

21/00 **Variable inductances or transformers of the signal type** (H01F 36/00 takes precedence) **[3]**

21/02 . continuously variable, e.g. variometers

21/04 . . by relative movement of turns or parts of windings

21/06 . . by movement of core or part of core relative to the windings as a whole

21/08 . . by varying the permeability of the core, e.g. by varying magnetic bias

21/10 . . by means of a movable shield

21/12 . discontinuously variable, e.g. tapped

27/00 **Details of transformers or inductances, in general [6]**

27/02 . Casings

27/04 . . Leading of conductors or axles through casings, e.g. for tap-changing arrangements

27/06 . Mounting, supporting, or suspending transformers, reactors, or choke coils

27/08 . Cooling (heat-transfer elements F28F); Ventilating (structural details of casings H01F 27/02)

27/10 . . Liquid cooling

27/12 . . . Oil cooling

27/14 . . . . Expansion chambers; Oil conservators; Gas cushions; Arrangements for purifying, drying, or filling

27/16 . . . Water cooling

27/18 . . . by evaporating liquids

27/20 . . Cooling by special gases or non-ambient air

27/22 . . Cooling by heat conduction through solid or powdered fillings
27/23 . Corrosion protection **[6]**
27/24 . Magnetic cores
27/245 . . made from sheets, e.g. grain-oriented (H01F 27/26 takes precedence) **[5]**
27/25 . . made from strips or ribbons (H01F 27/26 takes precedence) **[5]**
27/255 . . made from particles (H01F 27/26 takes precedence) **[5]**
27/26 . . Fastening parts of the core together; Fastening or mounting the core on casing or support (on coil H01F 27/30)
27/28 . Coils; Windings; Conductive connections
27/29 . . Terminals; Tapping arrangements **[6]**
27/30 . . Fastening or clamping coils, windings, or parts thereof together; Fastening or mounting coils or windings on core, casing, or other support
27/32 . . Insulating of coils, windings, or parts thereof
27/33 . Arrangements for noise damping
27/34 . Special means for preventing or reducing unwanted electric or magnetic effects, e.g. no-load losses, reactive currents, harmonics, oscillations, leakage fields
27/36 . . Electric or magnetic shields or screens (movable for varying inductance H01F 21/10) **[6]**
27/38 . . Auxiliary core members; Auxiliary coils or windings
27/40 . Structural association with built-in electric component, e.g. fuse
27/42 . Circuits specially adapted for the purpose of modifying, or compensating for, electric characteristics of transformers, reactors, or choke coils (circuits for controlling transformers, reactors or choke coils, for the purpose of obtaining a desired output H02P 13/00; impedance networks H03H) **[6]**

29/00 Variable transformers or inductances not covered by group H01F 21/00

29/02 . with tappings on coil or winding; with provision for rearrangement or interconnection of windings
29/04 . . having provision for tap-changing without interrupting the load current
29/06 . with current collector gliding or rolling on or along winding
29/08 . with core, coil, winding, or shield movable to offset variation of voltage or phase shift, e.g. induction regulators
29/10 . . having movable part of magnetic circuit
29/12 . . having movable coil, winding, or part thereof; having movable shield
29/14 . with variable magnetic bias (magnetic amplifiers H03F)

30/00 Fixed transformers not covered by group H01F 19/00 [6]

30/02 . Auto-transformers **[6]**
30/04 . having two or more secondary windings, each supplying a separate load, e.g. for radio set power supplies **[6]**
30/06 . characterised by the structure **[6]**
30/08 . . without magnetic core **[6]**
30/10 . . Single-phase transformers (H01F 30/16 takes precedence) **[6]**
30/12 . . Two-phase, three-phase or polyphase transformers **[6]**
30/14 . . . for changing the number of phases **[6]**
30/16 . . Toroidal transformers **[6]**

36/00 Transformers with superconductive windings or with windings operating at cryogenic temperatures (superconducting magnets or superconducting coils H01F 6/00) **[3]**

37/00 Fixed inductances not covered by group H01F 17/00 [6]

38/00 Adaptations of transformers or inductances for specific applications or functions [6]

38/02 . for non-linear operation **[6]**
38/04 . . for frequency changing **[6]**
38/06 . . for changing the wave shape **[6]**
38/08 . High-leakage transformers or inductances **[6]**
38/10 . . Ballasts, e.g. for discharge lamps **[6]**
38/12 . Ignition, e.g. for IC engines **[6]**
38/14 . Inductive couplings **[6]**
38/16 . Cascade transformers, e.g. for use with extra high tension **[6]**
38/18 . Rotary transformers **[6]**
38/20 . Instrument transformers **[6]**
38/22 . . for single phase ac **[6]**
38/24 . . . Voltage transformers **[6]**
38/26 . . . . Constructions **[6]**
38/28 . . . Current transformers **[6]**
38/30 . . . . Constructions **[6]**
38/32 . . . . Circuit arrangements **[6]**
38/34 . . . Combined voltage and current transformers **[6]**
38/36 . . . . Constructions **[6]**
38/38 . . for polyphase ac **[6]**
38/40 . . for dc **[6]**
38/42 . Flyback transformers **[6]**

41/00 Apparatus or processes specially adapted for manufacturing or assembling the devices covered by this subclass

41/02 . for manufacturing cores, coils, or magnets (H01F 41/14 takes precedence; for dynamo-electric machines H02K 15/00) **[3]**
41/04 . . for manufacturing coils
41/06 . . . Winding
41/08 . . . . Winding conductors on to or threading conductors through cores or formers which are closed in themselves, e.g. toroids (for interconnecting digital storage elements G11C 5/12)
41/10 . . . Connecting leads to windings (making electric connections in general H01R 43/00)
41/12 . . . Insulating of windings (of conductors in general H01B 13/06)
41/14 . for applying magnetic films to substrates (covering metals, or materials with metals, in general C23C; manufacturing record carriers G11B 5/84) **[3]**

Note

Group H01F 41/30 takes precedence over groups H01F 41/16 to H01F 41/24. **[7]**

41/16 . . the magnetic material being applied in the form of particles, e.g. by serigraphy (H01F 41/18 takes precedence) **[3,7]**
41/18 . . by cathode sputtering **[3]**
41/20 . . by evaporation **[3]**

41/22 . . Heat treatment; Thermal decomposition; Chemical vapour deposition **[3]**
41/24 . . from liquids **[3]**
41/26 . . . using electric currents **[3]**
41/28 . . . by liquid phase epitaxy **[3]**
41/30 . . for applying nanostructures, e.g. by molecular beam epitaxy (MBE) **[7]**
41/32 . for applying conductive, insulating or magnetic material on a magnetic film **[7]**
41/34 . . in patterns, e.g. by lithography **[7]**

H01G CAPACITORS; **CAPACITORS, RECTIFIERS, DETECTORS, SWITCHING DEVICES, LIGHT-SENSITIVE OR TEMPERATURE-SENSITIVE DEVICES OF THE ELECTROLYTIC TYPE** (selection of specified materials as dielectric H01B 3/00; capacitors with potential-jump or surface barrier H01L 29/00)

Subclass index

2/00 Details applicable to more than one of groups H01G 4/00 to H01G 9/00 [6]
2/02 . Mountings **[6]**
2/04 . . specially adapted for mounting on a chassis **[6]**
2/06 . . specially adapted for mounting on a printed-circuit support **[6]**
2/08 . Cooling arrangements; Heating arrangements; Ventilating arrangements **[6]**
2/10 . Housing; Encapsulation **[6]**
2/12 . Protection against corrosion (H01G 2/10 takes precedence) **[6]**
2/14 . Protection against electric or thermal overload (by cooling H01G 2/08) **[6]**
2/16 . . with fusing elements **[6]**
2/18 . . with breakable contacts **[6]**
2/20 . Arrangements for preventing discharge from edges of electrodes **[6]**
2/22 . Electrostatic or magnetic shielding **[6]**
2/24 . Distinguishing marks, e.g. colour coding **[6]**

4/00 Fixed capacitors; **Processes of their manufacture** (electrolytic capacitors H01G 9/00) **[2]**
4/002 . Details **[6]**
4/005 . . Electrodes **[6]**
4/008 . . . Selection of materials **[6]**
4/01 . . . Form of self-supporting electrodes **[6]**
4/012 . . . Form of non-self-supporting electrodes **[6]**
4/015 . . . Special provisions for self-healing **[6]**
4/018 . . Dielectrics **[6]**
4/02 . . . Gas or vapour dielectrics **[2,6]**
4/04 . . . Liquid dielectrics **[2,6]**
4/06 . . . Solid dielectrics **[2,6]**
4/08 . . . . Inorganic dielectrics **[2,6]**
4/10 . . . . . Metal-oxide dielectrics **[2,6]**
4/12 . . . . . Ceramic dielectrics **[2,6]**
4/14 . . . . Organic dielectrics **[2,6]**
4/16 . . . . . of fibrous material, e.g. paper **[2,6]**
4/18 . . . . . of synthetic material, e.g. derivatives of cellulose (H01G 4/16 takes precedence) **[2,6]**
4/20 . . . using combinations of dielectrics from more than one of groups H01G 4/02 to H01G 4/06 (H01G 4/12 takes precedence) **[2,6]**
4/22 . . . . impregnated **[2,6]**
4/224 . . Housing; Encapsulation **[6]**
4/228 . . Terminals **[6]**
4/232 . . . electrically connecting two or more layers of a stacked or rolled capacitor **[6]**
4/236 . . . leading through the housing, i.e. lead-through **[6]**
4/242 . . . the capacitive element surrounding the terminal **[6]**
4/245 . . . . Tabs between the layers of a rolled electrode **[6]**
4/248 . . . the terminals embracing or surrounding the capacitive element, e.g. caps (H01G 4/252 takes precedence) **[6]**
4/252 . . . the terminals being coated on the capacitive element (H01G 4/232 takes precedence) **[6]**
4/255 . . Means for correcting the capacitance value **[6]**
4/258 . . Temperature compensation means **[6]**
4/26 . Folded capacitors **[2]**
4/28 . Tubular capacitors **[2]**
4/30 . Stacked capacitors (H01G 4/33 takes precedence) **[2,6]**
4/32 . Wound capacitors **[2]**
4/33 . Thin- or thick-film capacitors (thin- or thick-film circuits H01L 27/00) **[6]**
4/35 . Feed-through capacitors or anti-noise capacitors **[6]**
4/38 . Multiple capacitors, i.e. structural combinations of fixed capacitors **[2]**
4/40 . Structural combinations of fixed capacitors with other electric elements not covered by this subclass, the structure mainly consisting of a capacitor, e.g. RC combinations (thin-or thick-film circuits H01L 27/00; RC-filters H03H) **[2]**

5/00 Capacitors in which the capacitance is varied by mechanical means, e.g. by turning a shaft; **Processes of their manufacture [2]**
5/01 . Details
5/011 . . Electrodes **[6]**
5/012 . . . at least one of the electrodes being a displaceable liquid or powder **[6]**
5/013 . . Dielectrics **[6]**
5/014 . . Housing; Encapsulation **[6]**
5/015 . . Current collectors
5/017 . . Temperature compensation **[6]**
5/019 . . Means for correcting the capacitance characteristics **[6]**

5/04 . using variation of effective area of electrode **[6]**
5/06 . . due to rotation of flat or substantially flat electrodes **[6]**
5/08 . . . becoming active in succession **[6]**
5/10 . . due to rotation of helical electrodes **[6]**
5/12 . . due to rotation of part-cylindrical, conical, or spherical electrodes **[6]**
5/14 . . due to longitudinal movement of electrodes **[6]**
5/16 . using variation of distance between electrodes **[6]**
5/18 . . due to change in inclination, e.g. by flexing, by spiral wrapping **[6]**
5/38 . Multiple capacitors, e.g. ganged
5/40 . Structural combinations of variable capacitors with other electric elements not covered by this subclass, the structure mainly consisting of a capacitor, e.g. RC combinations (RC-filters H03H) **[6]**

7/00 Capacitors in which the capacitance is varied by non-mechanical means; **Processes of their manufacture [2]**

7/02 . Electrets, i.e. having a permanently-polarised dielectric
7/04 . having a dielectric selected for the variation of its permitivity with applied temperature
7/06 . having a dielectric selected for the variation of its permitivity with applied voltage, i.e. ferroelectric capacitors (electrets H01G 7/02)

9/00 Electrolytic capacitors, rectifiers, detectors, switching devices, light-sensitive or temperature-sensitive devices; **Processes of their manufacture [2]**

9/004 . Details **[6]**
9/008 . . Terminals **[6]**
9/012 . . . specially adapted for solid capacitors **[6]**
9/016 . . . specially adapted for double-layer capacitors **[6]**
9/02 . . Diaphragms; Separators **[6]**
9/022 . . Electrolytes, absorbents (electrolytic or electrophoretic processes, apparatus therefor C25; for primary, secondary or fuel cells H01M) **[6]**
9/025 . . . Solid electrolytes (H01G 9/038 takes precedence) **[6]**
9/028 . . . . Organic semiconducting electrolytes, e.g. TCNQ **[6]**
9/032 . . . . Inorganic semiconducting electrolytes, e.g. MnO_2 **[6]**
9/035 . . . Liquid electrolytes, e.g. impregnating materials (H01G 9/038 takes precedence) **[6]**
9/038 . . . Electrolytes specially adapted for double-layer capacitors **[6]**
9/04 . . Electrodes **[6]**
9/042 . . . characterised by the material (H01G 9/058 takes precedence) **[6]**
9/045 . . . . based on aluminium **[6]**
9/048 . . . characterised by their structure (H01G 9/058 takes precedence) **[6]**
9/052 . . . . Sintered electrodes **[6]**
9/055 . . . . Etched foil electrodes **[6]**
9/058 . . . specially adapted for double-layer capacitors **[6]**
9/06 . . . Mounting in containers **[6]**
9/07 . . Dielectric layers **[6]**
9/08 . . Housing; Encapsulation **[6]**
9/10 . . . Sealing, e.g. of lead-in wires **[6]**
9/12 . . . Vents or other means allowing expansion **[6]**
9/14 . . Structural combinations for modifying, or compensating for, electric characteristics of electrolytic capacitors (impedance networks H03H)
9/145 . Liquid electrolytic capacitors (H01G 9/155 takes precedence) **[6]**
9/15 . Solid electrolytic capacitors (H01G 9/155 takes precedence) **[6]**
9/155 . Double-layer capacitors **[6]**
9/16 . specially adapted for use as rectifiers or detectors (H01G 9/22 takes precedence)
9/18 . Self-interrupters
9/20 . Light-sensitive devices
9/21 . Temperature-sensitive devices **[6]**
9/22 . Devices using combined reduction and oxidation, e.g. redox arrangement, solion
9/26 . Structural combinations of electrolytic capacitors, rectifiers, detectors, switching devices, light-sensitive or temperature-sensitive devices with each other **[6]**
9/28 . Structural combinations of electrolytic capacitors, rectifiers, detectors, switching devices with other electric components not covered by this subclass **[6]**

13/00 Apparatus specially adapted for manufacturing capacitors; **Processes specially adapted for manufacturing capacitors not provided for in groups H01G 4/00 to H01G 9/00 [2]**

13/02 . Machines for winding capacitors **[2]**
13/04 . Drying (in general F26B); Impregnating **[2]**
13/06 . with provision for removing metal surfaces **[2]**

15/00 Structural combinations of capacitors or other devices covered by at least two different main groups of this subclass with each other [6]

17/00 Structural combinations of capacitors or other devices covered by at least two different main groups of this subclass with other electric elements, not covered by this subclass, e.g. RC combinations (thin- or thick-film circuits H01L 27/00; RC-filters H03H) **[6]**

H01H ELECTRIC SWITCHES; **RELAYS**; **SELECTORS**; **EMERGENCY PROTECTIVE DEVICES** (contact cables H01B 7/10; electrolytic self-interrupters H01G 9/18; emergency protective circuit arrangements H02H; switching by electronic means without contact-making H03K 17/00)

(1) This subclass covers (in groups H01H 69/00 to H01H 87/00) devices for the protection of electric lines or electric machines or apparatus in the event of undesired change from normal electric working conditions, the electrical condition serving directly as the input to the device.
(2) This subclass does not cover bases, casings, or covers accommodating two or more switching devices or for accommodating a switching device as well as another electric component, e.g. bus-bar, line connector. Those bases, casings or covers are covered by group H02B 1/26.

(3) In this subclass, the following terms or expressions are used with the meanings indicated:
- "relay" means a switching device having contacts which are operated from electric inputs which supply, directly or indirectly, all the mechanical energy necessary to cause both the closure and the opening of the contacts;
- "driving mechanism" refers to the means by which an operating force applied to the switch is transmitted to the moving contact or contacts;
- "operating" is used in a broader sense than "actuating" which is reserved for those parts not touched by hand to effect switching;
- "acting" or "action" means a self-induced movements of parts at one stage of the switching. These connotations apply to all parts of the verbs "to operate"; "to actuate", and "to act", and to words derived therefrom, e.g. to "actuation".

(4) In this subclass, details are classified as follows:
- details of an unspecified type of switching device, or disclosed as applicable to two or more kinds of switching devices designated by the terms or expressions "switches", "relays", "selector switches", and "emergency protective devices", are classified in groups H01H 1/00 to H01H 9/00;
- details of an unspecified type of switch, or disclosed as applicable to two or more types of switches as defined by groups H01H 13/00 to H01H 43/00 and subgroups H01H 35/02, H01H 35/06, H01H 35/14, H01H 35/18, H01H 35/24, and H01H 35/42, all hereinafter called basic types, are classified in groups H01H 1/00 to H01H 9/00;
- details of an unspecified type of relay, or disclosed as applicable to two or more types of relays as defined by groups H01H 51/00 to H01H 61/00, hereinafter called basic types, are classified in group H01H 45/00;
- details of an unspecified protective device, or applicable to two or more types of protective devices as defined by groups H01H 73/00 to H01H 83/00, hereinafter called basic types, are classified in group H01H 71/00.
- However, details only described with reference to, or clearly only applicable to, switching devices of a single basic type, are classified in the group appropriate to switching devices of that basic type, e.g. H01H 19/02, H01H 75/04;
- mechanical structural details of control members of switches or of keyboards such as keys, push-buttons, levers or other mechanisms for transferring the force to the activated elements are classified in this subclass, even when they are used for controlling electronic switches.

However, mechanical details directly producing electronic effects are classified in group H03K 17/94. **[4]**

Subclass index

Electric switches

1/00 **Contacts** (liquid contacts H01H 29/04)
1/02 . characterised by the material thereof
1/021 . . Composite material **[8]**

(1) In this group, the following expression is used with the meaning indicated: **[8]**
– "composite material" is a material made of two or more different materials, e.g. coated material, layered materials or carbon fibres in a copper base or matrix. **[8]**
(2) Subject matter classifiable in more than one of groups H01H 1/023 to H01H 1/029 should be classified in all relevant groups. **[8]**

1/023 . . . having a noble metal as the basic material **[8]**
1/0233 . . . . and containing carbides **[8]**
1/0237 . . . . and containing oxides **[8]**
1/025 . . . having copper as the basic material **[8]**
1/027 . . . containing carbon particles or fibres **[8]**
1/029 . . . comprising conducting material dispersed in an elastic support or binding material **[8]**
1/04 . . Co-operating contacts of different material
1/06 . characterised by the shape or structure of the contact-making surface, e.g. grooved
1/08 . . wetted with mercury
1/10 . . Laminated contacts with divided contact surface
1/12 . characterised by the manner in which co-operating contacts engage
1/14 . . by abutting
1/16 . . . by rolling; by wrapping; Roller or ball contacts
1/18 . . . with subsequent sliding
1/20 . . . Bridging contacts
1/22 . . . with rigid pivoted member carrying the moving contact
1/24 . . . with resilient mounting
1/26 . . . . with spring blade support
1/28 . . . . . Assembly of three or more contact-supporting spring blades
1/30 . . . . within supporting guides
1/32 . . . Self-aligning contacts
1/34 . . . with provision for adjusting position of contact relative to its co-operating contact
1/36 . . by sliding
1/38 . . . Plug-and-socket contacts
1/40 . . . Contact mounted so that its contact-making surface is flush with adjoining insulation
1/42 . . . Knife-and-clip contacts
1/44 . . . with resilient mounting
1/46 . . . self-aligning contacts
1/48 . . . with provision for adjusting position of contact relative to its co-operating contact
1/50 . Means for increasing contact pressure, preventing vibration of contacts, holding contacts together after engagement, or biasing contacts to the open position
1/52 . . Contacts adapted to act as latches
1/54 . . by magnetic force
1/56 . Contact arrangements for providing make-before-break operation, e.g. for on-load tap-changing
1/58 . Electric connections to or between contacts; Terminals
1/60 . Auxiliary means structurally associated with the switch for cleaning or lubricating contact-making surfaces (cleaning by normal sliding of contacts H01H 1/18, H01H 1/36)
1/62 . Heating or cooling of contacts
1/64 . Protective enclosures, baffle plates, or screens for contacts
1/66 . . Contacts sealed in an evacuated or gas-filled envelope, e.g. magnetic dry-reed contacts

3/00 **Mechanisms for operating contacts** (thermal actuating or release means H01H 37/02)
3/02 . Operating parts, i.e. for operating driving mechanism by a mechanical force external to the switch
3/04 . . Levers (tumblers H01H 23/14)
3/06 . . . Means for securing to shaft of driving mechanism
3/08 . . Turn knobs
3/10 . . . Means for securing to shaft of driving mechanism
3/12 . . Push-buttons
3/14 . . adapted for operation by a part of the human body other than the hand, e.g. by foot
3/16 . . adapted for actuation at a limit or other predetermined position in the path of a body, the relative movement of switch and body being primarily for a purpose other than the actuation of the switch, e.g. for a door switch, a limit switch, a floor-levelling switch of a lift
3/18 . . . the movement in one direction being intentionally by hand, e.g. for setting automatically cancelled trafficators
3/20 . . wherein an auxiliary movement thereof, or of an attachment thereto, is necessary before the main movement is possible or effective, e.g. for unlatching, for coupling
3/22 . Power arrangements internal to the switch for operating the driving mechanism
3/24 . . using pneumatic or hydraulic actuator
3/26 . . using dynamo-electric motor (for storing energy in a spring motor H01H 3/30)
3/28 . . using electromagnet (for storing energy in a spring motor H01H 3/30; for operating relays H01H 45/00)
3/30 . . using spring motor
3/32 . Driving mechanisms, i.e. for transmitting driving force to the contacts (snap-action arrangements H01H 5/00; introducing a predetermined time delay H01H 7/00)
3/34 . . using ratchet
3/36 . . using belt, chain, or cord
3/38 . . using spring or other flexible shaft coupling
3/40 . . using friction, toothed, or screw-and-nut gearing
3/42 . . using cam or eccentric
3/44 . . using Geneva movement
3/46 . . using rod or lever linkage, e.g. toggle
3/48 . . using lost-motion device
3/50 . . with indexing or locating means, e.g. indexing by ball and spring
3/52 . . with means to ensure stopping at intermediate operative positions
3/54 . Mechanisms for coupling or uncoupling operating parts, driving mechanisms, or contacts
3/56 . . using electromagnetic clutch
3/58 . . using friction, toothed, or other mechanical clutch

3/60 . Mechanical arrangements for preventing or damping vibration or shock

3/62 . Lubricating means structurally associated with the switch (for lubricating contact-making surfaces H01H 1/60)

5/00 Snap-action arrangements, i.e. in which during a single opening operation or a single closing operation energy is first stored and then released to produce or assist the contact movement

5/02 . Energy stored by the attraction or repulsion of magnetic parts

5/04 . Energy stored by deformation of elastic members (by deformation of bimetallic element in thermally-actuated switches H01H 37/54)

5/06 . . by compression or extension of coil springs

5/08 . . . one end of spring transmitting movement to the contact member when the other end is moved by the operating part

5/10 . . . one end of spring being fixedly connected to the stationary or movable part of the switch, and the other end reacting with a movable or stationary rigid member respectively through pins, cams, toothed, or other shaped surfaces

5/12 . . . having two or more snap-action motions in succession

5/14 . . by twisting of torsion members

5/16 . . . with auxiliary means for temporarily holding parts until torsion member is sufficiently strained

5/18 . . by flexing of blade springs

5/20 . . . single blade moved across dead-centre position

5/22 . . . blade spring with at least one snap-acting leg and at least one separate contact-carrying or contact-actuating leg

5/24 . . . . having three legs

5/26 . . . having two or more snap-action motions in succession

5/28 . . . two separate blade springs forming a toggle

5/30 . . by buckling of disc springs

7/00 Devices for introducing a predetermined time delay between the initiation of the switching operation and the opening or closing of the contacts (time or time-programme switches H01H 43/00)

7/02 . with fluid timing means

7/03 . . with dash-pots

7/04 . . with flies, i.e. fan governors

7/06 . with thermal timing means

7/08 . with timing by mechanical speed-control devices

7/10 . . by escapement

7/12 . . . mechanical

7/14 . . . electromagnetic

7/16 . Devices for ensuring operation of the switch at a predetermined point in the ac cycle (circuit arrangements H01H 9/56)

9/00 Details of switching devices, not covered by groups H01H 1/00 to H01H 7/00

9/02 . Bases, casings, or covers (accommodating more than one switch or a switch and another electrical component H02B 1/26)

9/04 . . Dustproof, splashproof, drip-proof, waterproof, or flameproof casings

9/06 . . Casing of switch constituted by a handle serving a purpose other than the actuation of the switch, e.g. by the handle of a vacuum cleaner

9/08 . Arrangements to facilitate replacement of switch, e.g. cartridge housing

9/10 . Adaptation for built-in fuses (mounting switch and fuse separately on, or in, common support H02B 1/18)

9/12 . Means for earthing parts of switch not normally conductively connected to the contacts

9/14 . Adaptation for built-in safety spark gaps

9/16 . Indicators for switching condition, e.g. ”on” or “off”

9/18 . Distinguishing marks on switches, e.g. for indicating switch location in the dark; Adaptation of switches to receive distinguishing marks

9/20 . Interlocking, locking, or latching mechanisms

9/22 . . for interlocking between casing, cover, or protective shutter and mechanism for operating contacts

9/24 . . for interlocking two or more parts of the mechanism for operating contacts

9/26 . . for interlocking two or more switches (by a detachable member H01H 9/28)

9/28 . . for locking switch parts by a key or equivalent removable member (switches operated by a key H01H 27/00; locking by removable part of two-part coupling device H01R)

9/30 . Means for extinguishing or preventing arc between current-carrying parts

9/32 . . Insulating body insertable between contacts

9/34 . . Stationary parts for restricting or subdividing the arc, e.g. barrier plate

9/36 . . . Metal parts

9/38 . . Auxiliary contacts on to which the arc is transferred from the main contacts (using arcing-horns H01H 9/46)

9/40 . . Multiple main contacts for the purpose of dividing the current through, or potential drop along, the arc

9/42 . . Impedances connected with contacts

9/44 . . using blow-out magnet

9/46 . . using arcing horns (using blow-out magnet H01H 9/44)

9/48 . Means for preventing discharge to non-current-carrying parts, e.g. using corona ring

9/50 . Means for detecting the presence of an arc or discharge

9/52 . Cooling of switch parts (cooling of contacts H01H 1/62)

9/54 . Circuit arrangements not adapted to a particular application of the switching device and for which no provision exists elsewhere

9/56 . . for ensuring operation of the switch at a predetermined point in the ac cycle

11/00 Apparatus or processes specially adapted for the manufacture of electric switches (processes specially adapted for manufacture of rectilinearly movable switches having a plurality of operating members associated with different sets of contacts, e.g. keyboards, H01H 13/88) **[1,8]**

11/02 . for mercury switches

11/04 . of switch contacts

11/06 . . Fixing of contacts to carrier

13/00 Switches having rectilinearly-movable operating part or parts adapted for pushing or pulling in one direction only, e.g. push-button switch (wherein the operating part is flexible H01H 17/00)

13/02 . Details **[1,8]**

13/04 . . Cases; Covers

13/06 . . . Dustproof, splashproof, drip-proof, waterproof, or flameproof casings

13/08 . . . Casing of switch constituted by a handle serving a purpose other than the actuation of the switch

13/10 . . Bases; Stationary contacts mounted thereon

13/12 . . Movable parts; Contacts mounted thereon

13/14 . . . Operating parts, e.g. push-button

13/16 . . . . adapted for operation by a part of the human body other than the hand, e.g. by foot

13/18 . . . . adapted for actuation at a limit or other predetermined position in the path of a body, the relative movement of switch and body being primarily for a purpose other than the actuation of the switch, e.g. door switch, limit switch, floor-levelling switch of a lift

13/20 . . . Driving mechanisms

13/22 . . . . acting with snap action (depending upon deformation of elastic members H01H 13/26)

13/24 . . . . with means for introducing a predetermined time delay

13/26 . . Snap-action arrangements depending upon deformation of elastic members

13/28 . . . using compression or extension of coil springs

13/30 . . . . one end of spring transmitting movement to the contact member when the other end is moved by the operating part

13/32 . . . . one end of spring being fixedly connected to the stationary or movable part of the switch and the other end reacting with a movable or stationary rigid member respectively through pins, cams, toothed, or other shaped surfaces

13/34 . . . . having two or more snap-action motions in succession

13/36 . . . using flexing of blade springs

13/38 . . . . Single blade moved across dead-centre position

13/40 . . . . Blade spring with at least one snap-acting leg and at least one separate contactcarrying or contact-actuating leg

13/42 . . . . . having three legs

13/44 . . . . having two or more snap-action motions in succession

13/46 . . . . two separate blade springs forming a toggle

13/48 . . . using buckling of disc springs

13/50 . having a single operating member

13/52 . . the contact returning to its original state immediately upon removal of operating force, e.g. bell push switch

13/54 . . the contact returning to its original state a predetermined time interval after removal of operating force, e.g. for staircase lighting

13/56 . . the contact returning to its original state upon the next application of operating force

13/58 . . . with contact-driving member rotated step-wise in one direction

13/60 . . . with contact-driving member moved alternately in opposite directions

13/62 . . the contact returning to its original state upon manual release of a latch (latch released by second push-button H01H 13/68)

13/64 . . wherein the switch has more than two electrically distinguishable positions, e.g. multi-position push-button switches

13/66 . . . the operating member having only two positions

13/68 . having two operating members, one for opening and one for closing the same set of contacts (single operating member protruding from different sides of switch casing for alternate pushing upon opposite ends H01H 15/22)

13/70 . having a plurality of operating members associated with different sets of contacts, e.g. keyboard (mounting together a plurality of independent switches H02B)

13/702 . . with contacts carried by or formed from layers in a multilayer structure, e.g. membrane switches **[7]**

13/703 . . . characterised by spacers between contact carrying layers **[8]**

13/704 . . . characterised by the layers, e.g. by their material or structure (H01H 13/703 takes precedence) **[8]**

13/705 . . . characterised by construction, mounting or arrangement of operating parts, e.g. push-buttons or keys **[7]**

13/7057 . . . . characterised by the arrangement of operating parts in relation to each other, e.g. pre-assembled groups of keys **[8]**

13/7065 . . . . characterised by the mechanism between keys and layered keyboards **[8]**

13/7073 . . . . . characterised by springs, e.g. Euler springs **[8]**

13/708 . . . in which all fixed and movable contacts are carried by insulating members (H01H 13/705 takes precedence) **[7]**

13/712 . . . . all of the insulating members being substantially flat **[7]**

13/715 . . . in which each contact set includes a contact which is not secured to or part of a supporting layer, e.g. a snap dome (H01H 13/705 takes precedence) **[7]**

13/718 . . . in which some or all of the movable contacts are formed in a single conductive plate, e.g. formed by punching sheet metal (H01H 13/705 takes precedence) **[7]**

13/72 . . wherein the switch has means for limiting the number of operating members that can concurrently be in the actuated position

13/74 . . . each contact set returning to its original state only upon actuation of another of the operating members

13/76 . . wherein some or all of the operating members actuate different combinations of the contact sets, e.g. ten operating members actuating different combinations of four contact sets

13/78 . . characterised by the contacts or the contact sites **[8]**

13/785 . . . characterised by the material of the contacts, e.g. conductive polymers **[8]**

13/79 . . . characterised by the form of the contacts, e.g. interspersed fingers or helical networks **[8]**

13/80 . . . characterised by the manner of cooperation of the contacts, e.g. with both contacts movable or with bounceless contacts **[8]**

13/803 . . . characterised by the switching function thereof, e.g. normally closed contacts or consecutive operation of contacts **[8]**

13/807 . . . characterised by the spatial arrangement of the contact sites, e.g. superimposed sites **[8]**

13/81 . . characterised by electrical connections to external devices **[8]**

13/82 . . characterised by contact space venting means **[8]**

13/83 . . characterised by legends, e.g. Braille, liquid crystal displays, light emitting or optical elements **[8]**

13/84 . . characterised by ergonomic functions, e.g. for miniature keyboards; characterised by operational sensory functions, e.g. sound feedback (legends H01H 13/83) **[8]**

13/85 . . . characterised by tactile feedback features **[8]**

13/86 . . characterised by the casing, e.g. sealed casings or casings reducible in size **[8]**

13/88 . . Processes specially adapted for manufacture of rectilinearly movable switches having a plurality of operating members associated with different sets of contacts, e.g. keyboards **[8]**

15/00 Switches having rectilinearly-movable operating part or parts adapted for actuation in opposite directions, e.g. slide switch

15/02 . Details

15/04 . . Stationary parts; Contacts mounted thereon

15/06 . . Movable parts; Contacts mounted thereon

15/08 . . . Contact arrangements for providing make-before-break operation, e.g. for on-load tap-changing

15/10 . . . Operating parts

15/12 . . . . adapted for operation by a part of the human body other than the hand, e.g. by foot

15/14 . . . . adapted for actuation at a limit or other predetermined position in the path of a body, the relative movement of switch and body being primarily for a purpose other than the actuation of the switch, e.g. door switch, limit switch, floor-levelling switch of a lift

15/16 . . . Driving mechanisms

15/18 . . . . acting with snap action

15/20 . . . . with means for introducing a predetermined time delay

15/22 . having a single operating part protruding from different sides of switch casing for alternate actuation from opposite ends

15/24 . having a single operating part only protruding from one side of the switch casing for alternate pushing and pulling

17/00 Switches having flexible operating part adapted only for pulling, e.g. cord, chain

17/02 . Details

17/04 . . Stationary parts (guides H01H 17/14)

17/06 . . Movable parts (guides H01H 17/14)

17/08 . . . Operating part, e.g. cord

17/10 . . . . adapted for operation by a part of the human body other than the hand, e.g. by foot

17/12 . . . . adapted for actuation at a limit or other predetermined position in the path of a body, the relative movement of switch and body being primarily for a purpose other than the actuation of the switch, e.g. door switch, limit switch, floor-levelling switch of a lift

17/14 . . Guiding means for flexible operating part

17/16 . having a single flexible operating part adapted for pulling at one end only

17/18 . . secured to a part of the switch driving mechanism that has only angular movement

17/20 . . . the contact returning to its original state immediately upon removal of operating force

17/22 . . . the contact returning to its original state upon the next application of operating force

17/24 . . secured to a part of the switch driving mechanism that has both angular and rectilinear motion

17/26 . having two flexible operating parts; having a single operating part adapted for pulling at both ends

17/28 . . secured to a part or parts of the switch driving mechanism having only rectilinear motion

17/30 . . secured to a part or parts of the switch driving mechanism having only angular motion

19/00 Switches operated by an operating part which is rotatable about a longitudinal axis thereof and which is acted upon directly by a solid body external to the switch, e.g. by a hand [1,8]

19/02 . Details

19/03 . . Means for limiting the angle of rotation of the operating part **[8]**

19/04 . . Cases; Covers

19/06 . . . Dustproof, splashproof, drip-proof, waterproof, or flameproof casings

19/08 . . Bases; Stationary contacts mounted thereon

19/10 . . Movable parts; Contacts mounted thereon

19/11 . . . with indexing means **[8]**

19/12 . . . Contact arrangements for providing make-before-break operation, e.g. for on-load tap-changing

19/14 . . . Operating parts, e.g. turn knob

19/16 . . . . adapted for operation by a part of the human body other than the hand, e.g. by foot

19/18 . . . . adapted for actuation at a limit or other predetermined position in the path of a body, the relative movement of switch and body being primarily for a purpose other than the actuation of the switch, e.g. door switch, limit switch, floor-levelling switch of a lift

19/20 . . . Driving mechanisms allowing angular displacement of the operating part to be effective in either direction

19/22 . . . . incorporating lost motion

19/24 . . . . acting with snap action

19/26 . . . . with means for introducing a predetermined time delay

19/28 . . . Driving mechanisms allowing angular displacement of the operating part to be effective or possible in only one direction

19/30 . . . . incorporating lost motion

19/32 . . . . acting with snap action

19/34 . . . . with means for introducing a predetermined time delay

19/36 . the operating part having only two operative positions, e.g. relatively displaced by 180°

19/38 . . Change-over switches

19/40 . . . having only axial contact pressure

19/42 . . providing more than two electrically-different conditions, e.g. for closing either or both of two circuits

19/44 . . . having only axial contact pressure

19/46 . the operating part having three operative positions, e.g. off/star/delta

19/48 . . having only axial contact pressure

19/50 . the operating part having four operative positions, e.g. off/two-in-series/one-only/two-in-parallel

19/52 . . having only axial contact pressure

19/54 . the operating part having at least five or an unspecified number of operative positions

19/56 . . Angularly-movable actuating part carrying contacts, e.g. drum switch

19/58 . . . having only axial contact pressure, e.g. disc switch, wafer switch

19/60 . . Angularly-movable actuating part carrying no contacts

19/62 . . . Contacts actuated by radial cams

19/63 . . . Contacts actuated by axial cams **[2]**

19/635 . . . Contacts actuated by rectilinearly-movable member linked to operating part, e.g. by pin and slot **[8]**

19/64 . Encased switches adapted for ganged operation when assembled in a line with identical switches, e.g. stacked switches

21/00 Switches operated by an operating part in the form of a pivotable member acted upon directly by a solid body, e.g. by a hand (tumbler or rocker switches H01H 23/00; switches having an operating part movable angularly in more than one plane H01H 25/04) **[1,8]**

21/02 . Details

21/04 . . Cases; Covers

21/06 . . . interlocked with operating mechanism

21/08 . . . Dustproof, splashproof, drip-proof, waterproof, or flameproof casings

21/10 . . . Casing of switch constituted by a handle serving a purpose other than the actuation of the switch

21/12 . . Bases; Stationary contacts mounted thereon

21/14 . . Means for increasing contact pressure

21/16 . . Adaptation for built-in fuse

21/18 . . Movable parts; Contacts mounted thereon

21/20 . . . Contact arrangements for providing make-before-break operation, e.g. for on-load tap-changing

21/22 . . . Operating parts, e.g. handle

21/24 . . . . biased to return to original position upon removal of operating force

21/26 . . . . . adapted for operation by a part of the human body other than the hand, e.g. by foot

21/28 . . . . . adapted for actuation at a limit or other predetermined position in the path of a body, the relative movement of switch and body being primarily for a purpose other than the actuation of the switch, e.g. door switch, limit switch, floor-levelling switch of a lift

21/30 . . . . not biased to return to original position upon removal of operating force

21/32 . . . . . adapted for operation by a part of the human body other than the hand, e.g. by foot

21/34 . . . . . adapted for actuation at a limit or other predetermined position in the path of a body, the relative movement of switch and body being primarily for a purpose other than the actuation of the switch, e.g. door switch, limit switch, floor-levelling switch of a lift

21/36 . . . Driving mechanisms

21/38 . . . . incorporating lost motion

21/40 . . . . having snap action

21/42 . . . . . produced by compression or extension of coil spring

21/44 . . . . . produced by flexing blade springs

21/46 . . . . . with two or more snap-action motions in succession

21/48 . . . . incorporating a ratchet mechanism

21/50 . . . . with indexing or latching means, e.g. indexing by ball and spring; with means to ensure stopping at intermediate operative positions

21/52 . . . . with means for introducing a predetermined time delay

21/54 . Lever switches with blade-type contact co-operating with one or two spring-clip contacts, e.g. knife switch, sectionalisers

21/56 . . making contact in one position only

21/58 . . Change-over switches without stable intermediate position

21/60 . . Change-over switches with stable intermediate position

21/86 . Switches with abutting contact carried by operating part, e.g. telegraph tapping key

21/88 . . with intermediate position of rest

23/00 Tumbler or rocker switches, i.e. switches characterised by being operated by rocking an operating member in the form of a rocker button

Note

In this group, the term “rocking” is defined as pivotal motion in one plane about an axis parallel to the switch faceplate and located substantially centrally between the ends of the rocker button. **[8]**

23/02 . Details

23/04 . . Cases; Covers

23/06 . . . Dustproof, splashproof, drip-proof, waterproof, or flameproof casings

23/08 . . Bases; Stationary contacts mounted thereon

23/10 . . Adaptation for built-in fuse

23/12 . . Movable parts; Contacts mounted thereon

23/14 . . . Tumblers

23/16 . . . Driving mechanisms

23/18 . . . . incorporating lost motion

23/20 . . . . having snap action

23/22 . . . . with means for introducing a predetermined time delay

23/24 . with two operating positions

23/26 . . one of which positions is unstable

23/28 . with three operating positions

23/30 . . with stable centre position and one or both end positions unstable

25/00 Switches with compound movement of handle or other operating part

25/04 . Operating part movable angularly in more than one plane, e.g. joystick

25/06 . Operating part movable both angularly and rectilinearly, the rectilinear movement being along the axis of angular movement

27/00 Switches operated by a removable member, e.g. key, plug or plate; **Switches operated by setting members according to a single predetermined combination out of several possible settings** (combined with plug-and-socket connectors H01R 13/70; with current-carrying plug H01R 31/08)

27/04 . Insulating plug or plate inserted between normally-closed contacts

27/06 . Key inserted and then turned to effect operation of the switch

27/08 . . wherein the key cannot be removed until the switch is returned to its original position

27/10 . Switch operated by setting members according to a single predetermined combination out of several possible settings

29/00 Switches having at least one liquid contact (solid contacts wetted or soaked with mercury H01H 1/08)

29/02 . Details

29/04 . . Contacts; Containers for liquid contacts

29/06 . . . Liquid contacts characterised by the material thereof

29/08 . . Means for introducing a predetermined time delay

29/10 . . . by constricting the flow of the contact liquid

29/12 . . Operating mechanisms adapted for operation by a part of the human body other than the hand, e.g. by foot

29/14 . . Operating mechanisms adapted for actuation at a limit or other predetermined position in the path of a body, the relative movement of switch and body being primarily for a purpose other than the actuation of the switch, e.g. door switch, limit switch, floor-levelling switch of a lift

29/16 . operated by dipping solid contact into stationary contact liquid

29/18 . with level of surface of contact liquid displaced by non-electrical contact-making plunger

29/20 . operated by tilting contact-liquid container

29/22 . . wherein contact is made and broken between liquid and solid

29/24 . . wherein contact is made and broken between liquid and liquid

29/26 . with level of surface of contact liquid displaced by centrifugal action

29/28 . with level of surface of contact liquid displaced by fluid pressure

29/30 . with level of surface of contact liquid displaced by expansion or evaporation thereof

29/32 . with contact made by a liquid jet, e.g. earthing switch with contact made by jet of water

31/00 Air-break switches for high tension without arc-extinguishing or arc-preventing means (in combination with high tension or heavy-current switches with arc-extinguishing or arc-preventing means H01H 33/00) **[3]**

31/02 . Details

31/04 . . Interlocking mechanisms

31/06 . . . for interlocking between casing, cover, or protective shutter and mechanism for operating contacts

31/08 . . . for interlocking two or more parts of the mechanism for operating contacts

31/10 . . . for interlocking two or more switches

31/12 . . Adaptation for built-in fuse

31/14 . with bridging contact that is not electrically connected to either line contact in open position of switch

31/16 . . with angularly-movable bridging contact or contact-carrying member

31/18 . . . actuated through the movement of one or more insulators

31/20 . . . . at least one insulator being rotatable about its own geometrical axis

31/22 . . . wherein the contact or contacts are rectilinearly movable with respect to the carrying member

31/24 . . with rectilinearly-movable bridging contact

31/26 . with movable contact that remains electrically connected to one line in open position of switch

31/28 . . with angularly-movable contact

31/30 . . . actuated-through the movement of one or more insulators

31/32 . . with rectilinearly-movable contact

31/34 . with movable contact adapted to engage an overhead transmission line, e.g. for branching

31/36 . . Contact moved by pantograph

33/00 High-tension or heavy-current switches with arc-extinguishing or arc-preventing means

33/02 . Details

33/04 . . Means for extinguishing or preventing arc between current-carrying parts

33/06 . . . Insulating body insertable between contacts

33/08 . . . Stationary parts for restricting or subdividing the arc, e.g. barrier plate

33/10 . . . . Metal parts

33/12 . . . Auxiliary contacts on to which the arc is transferred from the main contacts (using arcing horns H01H 33/20)

33/14 . . . Multiple main contacts for the purpose of dividing the current through, or potential drop along, the arc

33/16 . . . Impedances connected with contacts

33/18 . . . using blow-out magnet

33/20 . . . using arcing horns (using blow-out magnet H01H 33/18)

33/22 . . . Selection of fluids for arc-extinguishing

33/24 . . Means for preventing discharge to non-current-carrying parts, e.g. using corona ring

33/26 . . Means for detecting the presence of an arc or other discharge

33/28 . . Power arrangements internal to the switch for operating the driving mechanism

33/30 . . . using fluid actuator

33/32 . . . . pneumatic

33/34 . . . . hydraulic

33/36 . . . using dynamo-electric motor

33/38 . . . using electromagnet

33/40 . . . using spring motor

33/42 . . Driving mechanisms

33/44 . . Devices for ensuring operation of the switch at a predetermined point in the ac cycle (circuit arrangements H01H 33/59)

33/46 . . Interlocking mechanisms

33/48 . . . for interlocking between casing or cover and mechanism for operating contacts

33/50 . . . for interlocking two or more parts of the mechanism for operating contacts

33/52 . . . for interlocking two or more switches

33/53 . . Cases (for switchgear H02B 1/26); Reservoirs, tanks, piping or valves, for arc-extinguishing fluid; Accessories therefor, e.g. safety arrangements, pressure relief devices **[3]**

33/55 . . . Oil reservoirs or tanks; Lowering means therefor (associated with withdrawal mechanism for isolation of switch H02B 11/08)

33/56 . . . Gas reservoirs

33/57 . . . Recuperation of liquid or gas

33/575 . . . Pressure relief devices for normal or emergency use **[3]**

33/58 . . . Silencers for suppressing noise of switch operation **[3]**

33/59 . . Circuit arrangements not adapted to a particular application of the switch and not otherwise provided for, e.g. for ensuring operation of the switch at a predetermined point in the ac cycle

33/60 . Switches wherein the means for extinguishing or preventing the arc do not include separate means for obtaining or increasing flow of arc-extinguishing fluid

33/64 . . wherein the break is in gas (vacuum switches H01H 33/66)

33/65 . . . wherein the break is in air at atmospheric pressure, e.g. in open air **[2009.01]**

33/66 . . Vacuum switches

33/662 . . . Housings or protective screens **[7]**

33/664 . . . Contacts; Arc-extinguishing means, e.g. arcing rings **[7]**

33/666 . . . Operating arrangements **[7]**

33/668 . . . Means for obtaining or monitoring the vacuum **[7]**

33/68 . . Liquid-break switches, e.g. oil-break

33/70 . Switches with separate means for directing, obtaining, or increasing flow of arc-extinguishing fluid

33/72 . . having stationary parts for directing the flow of arc-extinguishing fluid, e.g. arc-extinguishing chamber

33/73 . . . wherein the break is in air at atmospheric pressure, e.g. in open air

33/74 . . . wherein the break is in gas (in air at atmospheric pressure H01H 33/73)

33/75 . . . Liquid-break switches, e.g. oil-break

33/76 . . wherein arc-extinguishing gas is evolved from stationary parts; Selection of material therefor

33/77 . . . wherein the break is in air at atmospheric pressure

33/78 . . . wherein the break is in gas (in air at atmospheric pressure H01H 33/77)

33/80 . . flow of arc-extinguishing fluid from a pressure source being controlled by a valve

33/82 . . . the fluid being air or gas

33/825 . . . . with closed circuit of air or gas (H01H 33/835 takes precedence) **[3]**

33/83 . . . . wherein the contacts are opened by the flow of air or gas

33/835 . . . . . with closed circuit of air or gas **[3]**

33/84 . . . the fluid being liquid, e.g. oil

33/85 . . . . wherein the contacts are opened by the flow of liquid

33/86 . . the flow of arc-extinguishing fluid under pressure from the contact space being controlled by a valve

33/867 . . . the fluid being air or gas **[3]**

33/873 . . . . with closed circuit of air or gas **[3]**

33/88 . . the flow of arc-extinguishing fluid being produced or increased by movement of pistons or other pressure-producing parts

33/90 . . . this movement being effected by, or in conjunction with, the contact-operating mechanism

33/91 . . . . the arc-extinguishing fluid being air or gas

33/915 . . . . . with closed circuit of air or gas **[3]**

33/92 . . . . the arc-extinguishing fluid being liquid, e.g. oil

33/94 . . . this movement being effected solely due to the pressure caused by the arc itself or by an auxiliary arc

33/95 . . . . the arc-extinguishing fluid being air or gas

33/96 . . . . the arc-extinguishing fluid being liquid, e.g. oil

33/98 . . the flow of arc-extinguishing fluid being initiated by an auxiliary arc or a section of the arc, without any moving parts for producing or increasing the flow

33/985 . . . the fluid being air or gas **[3]**

33/99 . . . the fluid being liquid **[3]**

35/00 Switches operated by change of a physical condition (operated by change of magnetic or electric field H01H 36/00; thermally-actuated switches H01H 37/00)

Note

A switching device is classified according to that physical condition which when changed acts as input to the device, e.g. external explosion causing pressure wave to act upon switch is classified in group H01H 35/24, an explosion produced within the switch in group H01H 37/00 if initiated by heat, in group H01H 39/00 if initiated electrically, and in group H01H 35/14 if initiated by an external blow.

35/02 . Switches operated by change of position, inclination, or orientation of the switch itself in relation to gravitational field (tilting mercury container H01H 29/20; change of position due to change of liquid level H01H 35/18)

35/06 . Switches operated by change of speed (operated by change of fluid flow H01H 35/24)

35/10 . . Centrifugal switches (level of mercury displaced by centrifugal action H01H 29/26)

35/12 . . operated by reversal of direction of movement

35/14 . Switches operated by change of acceleration, e.g. by shock or vibration, inertia switch

35/18 . Switches operated by change of liquid level or of liquid density, e.g. float switch (by magnet carried on a float H01H 36/02)

35/24 . Switches operated by change of fluid pressure, by fluid pressure waves, or by change of fluid flow (wherein the change of pressure is caused by change of temperature H01H 37/36)

35/26 . . Details

35/28 . . . Compensation for variation of ambient pressure or temperature

35/30 . . . Means for transmitting pressure to pressure-responsive operating part, e.g. by capsule and capillary tube

35/32 . . actuated by bellows

35/34 . . actuated by diaphragm

35/36 . . actuated by curled flexible tube, e.g. Bourdon tube

35/38 . . actuated by piston and cylinder

35/40 . . actuated by devices allowing continual flow of fluid, e.g. vane

35/42 . Switches operated by change of humidity

36/00 Switches actuated by change of magnetic field or of electric field, e.g. by change of relative position of magnet and switch, by shielding

36/02 . actuated by movement of a float carrying a magnet

37/00 Thermally-actuated switches

37/02 . Details

37/04 . . Bases; Housings; Mountings

37/06 . . . to facilitate replacement, e.g. cartridge housing

37/08 . . Indicators; Distinguishing marks

37/10 . . Compensation for variation of ambient temperature or pressure
37/12 . . Means for adjustment of "on" or "off" operating temperature
37/14 . . . by anticipatory electric heater
37/16 . . . by varying the proportion of input heat received by the thermal element, e.g. by displacement of a shield
37/18 . . . by varying bias on the thermal element due to a separate spring
37/20 . . . by varying the position of the thermal element in relation to switch base or casing
37/22 . . . by adjustment of a member transmitting motion from the thermal element to contacts or latch
37/24 . . . by adjustment of position of the movable contact on its driving member
37/26 . . . by adjustment of abutment for "off" position of the movable contact
37/28 . . . by adjustment of the position of the fixed contact
37/30 . . . by varying the position of the contact unit in relation to switch base or casing
37/32 . . Thermally-sensitive members
37/34 . . . Means for transmitting heat thereto, e.g. capsule remote from contact member
37/36 . . . actuated due to expansion or contraction of a fluid with or without vaporisation (the fluid forming a contact of the switch H01H 29/04, H01H 29/30)
37/38 . . . . with bellows
37/40 . . . . with diaphragm
37/42 . . . . with curled flexible tube, e.g. Bourdon tube
37/44 . . . . with piston and cylinder
37/46 . . . actuated due to expansion or contraction of a solid (deflection of a bimetallic element H01H 37/52)
37/48 . . . . with extensible rigid rods or tubes
37/50 . . . . with extensible wires under tension
37/52 . . . actuated due to deflection of bimetallic element
37/54 . . . . wherein the bimetallic element is inherently snap acting
37/56 . . . . having spirally wound or helically wound bimetallic element
37/58 . . . actuated due to thermally controlled change of magnetic permeability
37/60 . . Means for producing snap action (inherent in bimetallic element H01H 37/54; caused by a magnet H01H 37/66)
37/62 . . Means other than thermal means for introducing a predetermined time delay
37/64 . . Contacts
37/66 . . . Magnetic reinforcement of contact pressure; Magnet causing snap action
37/68 . . . sealed in evacuated or gas-filled tube
37/70 . . . Resetting means
37/72 . Switches in which the opening movement and the closing movement of a contact are effected respectively by heating and cooling or vice versa
37/74 . Switches in which only the opening movement or only the closing movement of a contact is effected by heating or cooling
37/76 . . Contact member actuated by melting of fusible material, actuated due to burning of combustible material or due to explosion of explosive material

39/00 Switching devices actuated by an explosion produced within the device and initiated by an electric current

41/00 Switches providing a selected number of consecutive operations of the contacts by a single manual actuation of the operating part

41/04 . Switches without means for setting or mechanically storing a multidigit number
41/06 . . dial or slide operated
41/08 . . keyboard operated
41/10 . Switches with means for setting or mechanically storing a multidigit number
41/12 . . dial or slide operated
41/14 . . keyboard operated

43/00 Time or time-programme switches providing a choice of time-intervals for executing one or more switching actions and automatically terminating their operation after the programme is completed

43/02 . Details
43/04 . . Means for time setting
43/06 . . . comprising separately adjustable parts for each programme step, e.g. with tappets
43/08 . . . comprising an interchangeable programme part which is common for all programme steps, e.g. with a punched card
43/10 . with timing of actuation of contacts due to a part rotating at substantially constant speed
43/12 . . stopping automatically after a single cycle of operation
43/14 . . . wherein repetition of operation necessitates resetting of time intervals
43/16 . . stopping automatically after a predetermined plurality of cycles of operation
43/24 . with timing of actuation of contacts due to a non-rotatably moving part
43/26 . . the actuation being produced by a substance flowing due to gravity, e.g. sand, water
43/28 . . the actuation being produced by a part, the speed of which is controlled by fluid-pressure means, e.g. by piston and cylinder
43/30 . with timing of actuation of contacts due to thermal action
43/32 . with timing of actuation of contacts due to electrolytic processes; with timing of actuation of contacts due to chemical processes

Relays

45/00 Details of relays (electric circuit arrangements H01H 47/00; of electromagnetic relays H01H 50/00; details of electrically-operated selector switches H01H 63/00)

45/02 . Bases; Casings; Covers (frames for mounting two or more relays or for mounting a relay and another electric component H02B 1/01, H04Q 1/08, H05K)
45/04 . . Mounting complete relay or separate parts of relay on a base or inside a case
45/06 . . having windows; Transparent cases or covers
45/08 . Indicators; Distinguishing marks
45/10 . Electromagnetic or electrostatic shielding (casings H01H 45/02)
45/12 . Ventilating; Cooling; Heating (for operating electrothermal relays H01H 61/013)
45/14 . Terminal arrangements

47/00 Circuit arrangements not adapted to a particular application of the relay and designed to obtain desired operating characteristics or to provide energising current

47/02 . for modifying the operation of the relay

47/04 . . for holding armature in attracted position, e.g. when initial energising circuit is interrupted; for maintaining armature in attracted position, e.g. with reduced energising current
47/06 . . . by changing number of serially-connected turns or winding
47/08 . . . by changing number of parallel-connected turns or windings
47/10 . . . by switching-in or -out impedance external to the relay winding
47/12 . . for biasing the electromagnet
47/14 . . for differential operation of the relay
47/16 . . for conjoint, e.g. additive, operation of the relay
47/18 . . for introducing delay in the operation of the relay (short-circuited conducting sleeves, bands, or discs H01H 50/46)
47/20 . . for producing frequency-selective operation of the relay
47/22 . for supplying energising current for relay coil
47/24 . . having light-sensitive input
47/26 . . having thermo-sensitive input
47/28 . . Energising current supplied by discharge tube
47/30 . . . by gas-filled discharge tube
47/32 . . Energising current supplied by semiconductor device
47/34 . . Energising current supplied by magnetic amplifier
47/36 . . Relay coil or coils forming part of a bridge circuit

49/00 Apparatus or processes specially adapted to the manufacture of relays or parts thereof

50/00 Details of electromagnetic relays (electric circuit arrangements H01H 47/00; details of electrically-operated selector switches H01H 63/00)
50/02 . Bases; Casings; Covers (frames for mounting two or more relays or for mounting a relay and another electric component H02B 1/01, H04Q 1/08, H05K)
50/04 . . Mounting complete relay or separate parts of relay on a base or inside a case
50/06 . . having windows; Transparent cases or covers
50/08 . Indicators; Distinguishing marks
50/10 . Electromagnetic or electrostatic shielding (casings H01H 50/02)
50/12 . Ventilating; Cooling; Heating (for operating electrothermal relays H01H 61/013)
50/14 . Terminal arrangements
50/16 . Magnetic circuit arrangements
50/18 . . Movable parts of magnetic circuits, e.g. armature
50/20 . . . movable inside coil and substantially lengthwise with respect to axis thereof; movable coaxially with respect to coil
50/22 . . . . wherein the magnetic circuit is substantially closed
50/24 . . . Parts rotatable or rockable outside coil
50/26 . . . . Parts movable about a knife edge
50/28 . . . . Parts movable due to bending of a blade spring or reed
50/30 . . . Mechanical arrangements for preventing or damping vibration or shock, e.g. by balancing of armature
50/32 . . . Latching movable parts mechanically
50/34 . . . Means for adjusting limits of movement; Mechanical means for adjusting returning force
50/36 . . Stationary parts of magnetic circuit, e.g. yoke
50/38 . . . Part of main magnetic circuit shaped to suppress arcing between the contacts of the relay
50/40 . . . Branched or multiple-limb main magnetic circuits
50/42 . . . Auxiliary magnetic circuits, e.g. for maintaining armature in, or returning armature to, position of rest, for damping or accelerating movement
50/44 . Magnetic coils or windings
50/46 . . Short-circuited conducting sleeves, bands, or discs
50/54 . Contact arrangements
50/56 . . Contact spring sets
50/58 . . . Driving arrangements structurally associated therewith; Mounting of driving arrangement on armature
50/60 . . moving contact being rigidly combined with movable part of magnetic circuit
50/62 . . Co-operating movable contacts operated by separate electrical actuating means
50/64 . Driving arrangements between movable part of magnetic circuit and contact (structurally associated with contact spring sets H01H 50/58)
50/66 . . with lost motion
50/68 . . with snap action
50/70 . . operating contact momentarily during stroke of armature
50/72 . . for mercury contact
50/74 . . Mechanical means for producing a desired natural frequency of operation of the contacts, e.g. for self-interrupter
50/76 . . . using reed or blade spring
50/78 . . . using diaphragm; using stretched wire or ribbon vibrating sideways
50/80 . . . using torsionally vibrating member, e.g. wire, strip
50/82 . . . using spring-loaded pivoted inertia member
50/84 . . . with means for adjustment of frequency or of make-to-break ratio
50/86 . Means for introducing a predetermined time delay between the initiation of the switching operation and the opening or closing of the contacts (circuit arrangements for introducing delay H01H 47/18; short-circuited conducting sleeves, bands, or discs H01H 50/46)
50/88 . . Mechanical means, e.g. dash-pot
50/90 . . . the delay being effective in both directions of operation
50/92 . . Thermal means (inherent in electrothermal relays H01H 61/00)

51/00 Electromagnetic relays (relays using the dynamo-electric effect H01H 53/00)
51/01 . Relays in which the armature is maintained in one position by a permanent magnet and freed by energisation of a coil producing an opposing magnetic field **[3]**
51/02 . Non-polarised relays (H01H 51/01 takes precedence) **[3]**
51/04 . . with single armature; with single set of ganged armatures
51/06 . . . Armature is movable between two limit positions of rest and is moved in one direction due to energisation of an electromagnet and after the electromagnet is de-energised is returned by energy stored during the movement in the first direction, e.g. by using a spring, by using a permanent magnet, by gravity

51/08 . . . . Contacts alternately opened and closed by successive cycles of energisation and de-energisation of the electromagnet, e.g. by use of a ratchet
51/10 . . . . Contacts retained open or closed by a mechanical latch which is controlled by an electromagnet
51/12 . . . Armature is movable between two limit positions of rest and is moved in both directions due to the energisation of one or the other of two electromagnets without the storage of energy to effect the return movement
51/14 . . . . without intermediate neutral position of rest
51/16 . . . . with intermediate neutral position of rest
51/18 . . . Armature is rotatable through an unlimited number of revolutions
51/20 . . with two or more independent armatures
51/22 . Polarised relays
51/24 . . without intermediate neutral position of rest
51/26 . . with intermediate neutral position of rest
51/27 . Relays with armature having two stable magnetic states and operated by change from one state to the other
51/28 . Relays having both armature and contacts within a sealed casing outside which the operating coil is located, e.g. contact carried by a magnetic leaf spring or reed (H01H 51/27 takes precedence)
51/29 . Relays having armature, contacts, and operating coil within a sealed casing (H01H 51/27 takes precedence)
51/30 . specially adapted for actuation by ac
51/32 . . Frequency relays; Mechanically-tuned relays
51/34 . Self-interrupters, i.e. with periodic or other repetitive opening and closing of contacts
51/36 . . wherein the make-to-break ratio is varied by hand setting or current strength

53/00 Relays using the dynamo-electric effect, i.e. relays in which contacts are opened or closed due to relative movement of current-carrying conductor and magnetic field caused by force of interaction between them
53/01 . Details
53/015 . . Moving coils; Contact-driving arrangements associated therewith
53/02 . Electrodynamic relays, i.e. relays in which the interaction is between two current-carrying conductors
53/04 . . Ferrodynamic relays, i.e. relays in which the magnetic field is concentrated in ferromagnetic parts
53/06 . Magnetodynamic relays, i.e. relays in which the magnetic field is produced by a permanent magnet
53/08 . wherein a mercury contact constitutes the current-carrying conductor
53/10 . Induction relays, i.e. relays in which the interaction is between a magnetic field and current induced thereby in a conductor
53/12 . . Ferraris relays
53/14 . Contacts actuated by an electric motor through fluid-pressure transmission, e.g. using a motor-driven pump

55/00 Magnetostrictive relays

57/00 Electrostrictive relays; Piezo-electric relays

59/00 Electrostatic relays; Electro-adhesion relays

61/00 Electrothermal relays (thermal switches not operated by electrical input, thermal switches with anticipating electrical input H01H 37/00; thermally-sensitive members H01H 37/32)
61/01 . Details
61/013 . . Heating arrangements for operating relays
61/017 . . . Heating by glow discharge or arc in confined space
61/02 . wherein the thermally-sensitive member is heated indirectly, e.g. resistively, inductively
61/04 . wherein the thermally-sensitive member is only heated directly
61/06 . Self-interrupters, i.e. with periodic or other repetitive opening and closing of contacts
61/08 . . wherein the make-to-break ratio is varied by hand setting or current strength

Selectors [3]

63/00 Details of electrically-operated selector switches
63/02 . Contacts; Wipers; Connections thereto
63/04 . . Contact-making or contact-breaking wipers; Position indicators therefor
63/06 . . Contact banks
63/08 . . . cylindrical
63/10 . . . plane
63/12 . . Multiplying connections to contact banks, e.g. using ribbon cables
63/14 . . . without soldering
63/16 . Driving arrangements for multi-position wipers
63/18 . . with step-by-step motion of wiper to a selector position
63/20 . . . using stepping magnet and ratchet
63/22 . . . using step-by-step electromagnetic drive without ratchet, e.g. self-interrupting driving magnet
63/24 . . with continuous motion of wiper until a selected position is reached
63/26 . . . with an individual clutch-drive from a shaft common to more than one selector switch
63/28 . . . with an individual motor for each selector switch
63/30 . . . . Pneumatic motor for moving wiper to selected position
63/32 . . . . Spring motor for moving wiper to selected position
63/33 . Constructional details of co-ordinate-type selector switches not having relays at cross-points
63/34 . Bases; Cases; Covers; Mountings (racks for mounting selectors with or without other exchange equipment H04Q 1/04); Mounting of fuses on selector switch
63/36 . Circuit arrangements for ensuring correct or desired operation and not adapted to a particular application of the selector switch
63/38 . . for multi-position wiper switches
63/40 . . for multi-position switches without wipers
63/42 . . . for co-ordinate-type selector switches not having relays at cross-points

65/00 Apparatus or processes specially adapted to the manufacture of selector switches or parts thereof

67/00 Electrically-operated selector switches
67/02 . Multi-position wiper switches
67/04 . . having wipers movable only in one direction for purpose of selection

67/06 . . . Rotary switches, i.e. having angularly movable wipers
67/08 . . . . with wiper selection
67/10 . . . . with coarse and fine positioning of wipers
67/12 . . . Linear-motion switches
67/14 . . having wipers movable in two mutually perpendicular directions for purpose of selection
67/16 . . . one motion being rotary and the other being parallel to the axis of rotation, e.g. Strowger or "up and around" switches
67/18 . . . one motion being rotary and the other being perpendicular to the axis of rotation, e.g. "round and in" switches
67/20 . . . both motions being linear
67/22 . Switches without multi-position wipers
67/24 . . Co-ordinate-type relay switches having an individual electromagnet at each cross-point
67/26 . . Co-ordinate-type selector switches not having relays at cross-points but involving mechanical movement, e.g. cross-bar switch, code-bar switch
67/30 . . Co-ordinate-type selector switches with field of co-ordinate coil acting directly upon magnetic leaf spring or reed-type contact member
67/32 . . having a multiplicity of interdependent armatures operated in succession by a single coil and each controlling one contact or set of contacts, e.g. counting relay

Emergency protective devices

69/00 Apparatus or processes for the manufacture of emergency protective devices
69/01 . for calibrating or setting of devices to function under predetermined conditions
69/02 . Manufacture of fuses

71/00 Details of the protective switches or relays covered by groups H01H 73/00 to H01H 83/00
71/02 . Housings; Casings; Bases; Mountings
71/04 . Means for indicating condition of the switching device
71/06 . Distinguishing marks, e.g. colour coding
71/08 . Terminals; Connections
71/10 . Operating or release mechanisms
71/12 . . Automatic release mechanisms with or without manual release
71/14 . . . Electrothermal mechanisms
71/16 . . . . with bimetal element
71/18 . . . . with expanding rod, strip, or wire
71/20 . . . . with fusible mass
71/22 . . . . with compensation for variation of ambient temperature
71/24 . . . Electromagnetic mechanisms
71/26 . . . . with windings acting in opposition
71/28 . . . . with windings acting in conjunction
71/30 . . . . having additional short-circuited winding
71/32 . . . . having permanently magnetised part
71/34 . . . . having two or more armatures controlled by a common winding
71/36 . . . . frequency selective
71/38 . . . . wherein the magnet coil also acts as arc blow-out device
71/40 . . . Combined electrothermal and electromagnetic mechanisms
71/42 . . . Induction-motor, induced-current, or electrodynamic release mechanisms
71/43 . . . . Electrodynamic release mechanisms
71/44 . . . having means for introducing a predetermined time delay (by short-circuited winding H01H 71/30; by additional armature H01H 71/34)
71/46 . . . having means for operating auxiliary contacts additional to the main contacts
71/48 . . . . with provision for short-circuiting the electrical input to the release mechanism after release of the switch, e.g. for protection of heating wire
71/50 . . Manual reset mechanisms
71/52 . . . actuated by lever
71/54 . . . actuated by tumbler
71/56 . . . actuated by rotatable knob or wheel
71/58 . . . actuated by push-button, pull-knob, or slide
71/60 . . . actuated by closure of switch casing
71/62 . . . with means for preventing resetting while abnormal condition persists, e.g. loose handle arrangement
71/64 . . . . incorporating toggle linkage
71/66 . . Power reset mechanisms
71/68 . . . actuated by electromagnet
71/70 . . . actuated by electric motor
71/72 . . . actuated automatically a limited number of times
71/74 . Means for adjusting the conditions under which the device will function to provide protection

73/00 Protective overload circuit-breaking switches in which excess current opens the contacts by automatic release of mechanical energy stored by previous operation of a hand reset mechanism
73/02 . Details
73/04 . . Contacts
73/06 . . Housings; Casings; Bases; Mountings
73/08 . . . Plug-in housings
73/10 . . . Cartridge housings, e.g. screw-in housing
73/12 . . Means for indicating condition of the switch
73/14 . . . Indicating lamp structurally associated with the switch
73/16 . . Distinguishing marks, e.g. colour coding
73/18 . . Means for extinguishing or suppressing arc
73/20 . . Terminals; Connections
73/22 . having electrothermal release and no other automatic release (cartridge type H01H 73/62)
73/24 . . reset by lever
73/26 . . reset by tumbler
73/28 . . reset by rotatable knob or wheel
73/30 . . reset by push-button, pull-knob, or slide
73/32 . . reset by closure of switch casing
73/34 . . reset action requiring replacement or reconditioning of a fusible or explosive part
73/36 . having electromagnetic release and no other automatic release (cartridge type H01H 73/64)
73/38 . . reset by lever
73/40 . . reset by tumbler
73/42 . . reset by rotatable knob or wheel
73/44 . . reset by push-button, pull-knob, or slide
73/46 . . reset by closure of switch casing
73/48 . having both electrothermal and electromagnetic automatic release (cartridge type H01H 73/66)
73/50 . . reset by lever
73/52 . . reset by tumbler
73/54 . . reset by rotatable knob or wheel

73/56 . . reset by push-button, pull-knob, or slide
73/58 . . reset by closure of switch casing
73/60 . cartridge type, e.g. screw-in cartridge
73/62 . . having only electrothermal release
73/64 . . having only electromagnetic release
73/66 . . having combined electrothermal and electromagnetic release

75/00 Protective overload circuit-breaking switches in which excess current opens the contacts by automatic release of mechanical energy stored by previous operation of power reset mechanism

75/02 . Details
75/04 . . Reset mechanisms for automatically reclosing a limited number of times (circuit arrangements H02H 3/06)
75/06 . . . effecting one reclosing action only
75/08 . having only electrothermal release
75/10 . having only electromagnetic release
75/12 . having combined electrothermal and electromagnetic release

77/00 Protective overload circuit-breaking switches operated by excess current and requiring separate action for resetting (H01H 73/00, H01H 75/00 take precedence)

77/02 . in which the excess current itself provides the energy for opening the contacts, and having a separate reset mechanism
77/04 . . with electrothermal opening
77/06 . . with electromagnetic opening
77/08 . . . retained closed by permanent or remanent magnetism and opened by windings acting in opposition
77/10 . . with electrodynamic opening

79/00 Protective switches in which excess current causes the closing of contacts, e.g. for short-circuiting the apparatus to be protected

81/00 Protective switches in which contacts are normally closed but are repeatedly opened and reclosed as long as a condition causing excess current persists, e.g. for current limiting

81/02 . electrothermally-operated
81/04 . electromagnetically-operated

83/00 Protective switches, e.g. circuit-breaking switches, or protective relays operated by abnormal electrical conditions otherwise than solely by excess current

83/02 . operated by earth fault currents (H01H 83/14 takes precedence)
83/04 . . with testing means for indicating the ability of the switch or relay to function properly
83/06 . operated by current falling below a predetermined value
83/08 . operated by reversal of dc
83/10 . operated by excess voltage, e.g. for lightning protection
83/12 . operated by voltage falling below a predetermined value, e.g. for no-volt protection
83/14 . operated by unbalance of two or more currents or voltages, e.g. for differential protection
83/16 . operated by abnormal ratio of voltage and current, e.g. distance relay
83/18 . operated by abnormal product of, or abnormal phase angle between, voltage and current, e.g. directional relay
83/20 . operated by excess current as well as by some other abnormal electrical condition
83/22 . . the other condition being unbalance of two or more currents or voltages

85/00 Protective devices in which the current flows through a part of fusible material and this current is interrupted by displacement of the fusible material when this current becomes excessive (switches actuated by melting of fusible material H01H 37/76; disposition or arrangement of fuses on boards H02B 1/18)

85/02 . Details
85/04 . . Fuses, i.e. expendable parts of the protective device, e.g. cartridges
85/041 . . . characterised by the type **[5]**
85/042 . . . . General constructions or structure of high voltage fuses, i.e. above 1,000 V **[5]**
85/044 . . . . General constructions or structure of low voltage fuses, i.e. below 1,000 V, or of fuses where the applicable voltage is not specified (H01H 85/046 to H01H 85/048 take precedence) **[5]**
85/0445 . . . . . fast or slow type (H01H 85/045 to H01H 85/048 take precedence) **[5]**
85/045 . . . . . cartridge type **[5]**
85/046 . . . . Fuses formed as printed circuits **[5]**
85/047 . . . . Vacuum fuses **[5]**
85/048 . . . . Fuse resistors **[5]**
85/05 . . . Component parts thereof **[5]**
85/055 . . . . Fusible members **[5]**
85/06 . . . . . characterised by the fusible material (H01H 85/11 takes precedence) **[5]**
85/08 . . . . . characterised by the shape or form of the fusible member **[5]**
85/10 . . . . . with constriction for localised fusing (H01H 85/11 takes precedence) **[5]**
85/11 . . . . . with applied local area of a metal which, on melting, forms a eutectic with the main material of the fusible member, i.e. M-effect devices **[5]**
85/12 . . . . . Two or more separate fusible members in parallel **[5]**
85/143 . . . . Electrical contacts; Fastening fusible members to such contacts **[5]**
85/147 . . . . . Parallel-side contacts **[5]**
85/15 . . . . . Screw-in contacts **[5]**
85/153 . . . . . Knife-blade-end contacts **[5]**
85/157 . . . . . Ferrule-end contacts **[5]**
85/165 . . . . Casings **[5]**
85/17 . . . . . characterised by the casing material **[5]**
85/175 . . . . . characterised by the casing shape or form **[5]**
85/18 . . . . Casing fillings, e.g. powder
85/20 . . Bases for supporting the fuse; Separate parts thereof
85/22 . . Intermediate or auxiliary parts for carrying, holding, or retaining fuse, co-operating with base or fixed holder, and removable therefrom for renewing the fuse
85/24 . . Means for preventing insertion of incorrect fuse
85/25 . . Safety arrangements preventing or inhibiting contact with live parts, including operation of isolation on removal of cover **[5]**
85/26 . . Magazine arrangements
85/28 . . . effecting automatic replacement

85/30 . . Means for indicating condition of fuse structurally associated with the fuse
85/32 . . . Indicating lamp structurally associated with the protective device
85/34 . . Distinguishing marks, e.g. colour coding
85/36 . . Means for applying mechanical tension to fusible member
85/38 . . Means for extinguishing or suppressing arc (by powder filling H01H 85/18; by mechanical tension applied to fusible member H01H 85/36)
85/40 . . . using an arc-extinguishing liquid (characterised by the composition of the liquid H01H 33/22)
85/42 . . . using an arc-extinguishing gas (characterised by the composition of the gas H01H 33/22)
85/43 . . Means for exhausting or absorbing gases liberated by fusing arc, or for ventilating excess pressure generated by heating **[5]**
85/44 . . Structural association with spark-gap arrester
85/46 . . Circuit arrangements not adapted to a particular application of the protective device
85/47 . . Means for cooling **[5]**
85/48 . Protective devices wherein the fuse is carried or held directly by the base
85/50 . . the fuse having contacts at opposite ends for co-operation with the base
85/52 . . the fuse being adapted for screwing into the base
85/54 . Protective devices wherein the fuse is carried, held, or retained by an intermediate or auxiliary part removable from the base, or used as sectionalisers
85/56 . . the intermediate or auxiliary part having side contacts for plugging into the base, e.g. bridge-carrier type
85/58 . . . with intermediate auxiliary part and base shaped to interfit and thereby enclose the fuse
85/60 . . the intermediate or auxiliary part having contacts at opposite ends for co-operation with the base
85/62 . . the intermediate or auxiliary part being adapted for screwing into the base

87/00 Protective devices in which a current flowing through a liquid or solid is interrupted by the evaporation of the liquid or by the melting and evaporation of the solid when the current becomes excessive, the circuit continuity being reestablished on cooling [3]

89/00 Combinations of two or more different basic types of electric switches, relays, selectors and emergency protective devices, not covered by any single one of the other main groups of this subclass [8]
89/02 . Combination of a key operated switch with a manually operated switch, e.g. ignition and lighting switches **[8]**
89/04 . Combination of a thermally actuated switch with a manually operated switch **[8]**
89/06 . Combination of a manual reset circuit with a contactor, i.e. the same circuit controlled by both a protective and a remote control device **[8]**
89/08 . . with both devices using the same contact pair **[8]**
89/10 . . . with each device controlling one of the two co-operating contacts **[8]**

H01J ELECTRIC DISCHARGE TUBES OR DISCHARGE LAMPS (spark-gaps H01T; arc lamps with consumable electrodes H05B; particle accelerators H05H)

(1) This subclass covers only devices for producing, influencing, or using a flow of electrons or ions, e.g. for controlling, indicating, or switching of electric current, counting electric pulses, producing light or other electromagnetic oscillations, such as X-rays, or for separating or analysing radiation or particles, and having a closed or substantially closed casing containing a chosen gas, vapour, or vacuum, upon the pressure and nature of which the characteristics of the device depend.
Light sources using a combination (other than covered by group H01J 61/96 of this subclass) of discharge and other kinds of light generation are covered by group H05B 35/00.
(2) In this subclass, groups H01J 1/00 to H01J 7/00 relate only to:
(i) details of an unspecified kind of discharge tube or lamp, or
(ii) details mentioned in a specification as applicable to two or more kinds of tubes or lamps as defined by groups H01J 11/00, H01J 13/00, H01J 15/00, H01J 17/00, H01J 21/00, H01J 25/00, H01J 27/00, H01J 31/00, H01J 33/00, H01J 35/00, H01J 37/00, H01J 40/00, H01J 41/00, H01J 47/00, H01J 49/00, H01J 61/00, H01J 63/00 or H01J 65/00, hereinafter called basic kinds. A detail only described with reference to, or clearly only applicable to, tubes or lamps of a single basic kind is classified in the detail group appropriate to tubes or lamps of that basic kind, e.g. H01J 17/04.
(3) In this subclass, the following term is used with the meaning indicated:
– "lamp" includes tubes emitting ultra-violet or infra-red light.
(4) Attention is drawn to the definition of the expression "spark gaps" given in the Note following the title of subclass H01T. **[4]**
(5) Apparatus or processes specially adapted for the manufacture of electric discharge tubes, discharge lamps, or parts thereof are classified in group H01J 9/00.

Subclass index

SPECIAL TUBES

For emergence of electrons or ions; particle spectrometers or separator tubes 33/00; 49/00

Vacuum gauges, evacuation by ion diffusion; secondary-emission tubes, electron multipliers; thermionic generators 41/00; 43/00; 45/00

Photoelectric; radiation and particle detectors 40/00; 47/00

DISCHARGE LAMPS

Gas discharge lamps; cathode ray or electron stream lamps; without electrode inside 61/00; 63/00; 65/00

DETAILS

Electrodes; electron optics; vessels; other details 1/00; 3/00; 5/00; 7/00

MANUFACTURE; REPAIR; REGENERATION; RECOVERY OF MATERIAL 9/00

SUBJECT MATTER NOT PROVIDED FOR IN OTHER GROUPS OF THIS SUBCLASS 99/00

1/00 **Details of electrodes, of magnetic control means, of screens, or of the mounting or spacing thereof, common to two or more basic types of discharge tubes or lamps** (details of electron-optical arrangements or of ion traps H01J 3/00)

1/02 . Main electrodes

1/04 . . Liquid electrodes, e.g. liquid cathode

1/05 . . . characterised by material

1/06 . . . Containers for liquid-pool electrodes; Arrangement or mounting thereof

1/08 . . . Positioning or moving the cathode spot on the surface of a liquid-pool cathode

1/10 . . . Cooling, heating, circulating, filtering, or controlling level of liquid in a liquid-pool electrode

1/12 . . Cathodes having mercury or liquid alkali metal deposited on the cathode surface during operation of the tube

1/13 . . Solid thermionic cathodes

1/14 . . . characterised by the material

1/142 . . . . with alkaline-earth metal oxides, or such oxides used in conjunction with reducing agents, as an emissive material **[6]**

1/144 . . . . with other metal oxides as an emissive material **[6]**

1/146 . . . . with metals or alloys as an emissive material **[6]**

1/148 . . . . with compounds having metallic conductive properties, e.g. lanthanum boride, as an emissive material **[6]**

1/15 . . . Cathodes heated directly by an electric current

1/16 . . . . characterised by the shape

1/18 . . . . Supports; Vibration-damping arrangements

1/20 . . . Cathodes heated indirectly by an electric current; Cathodes heated by electron or ion bombardment

1/22 . . . . Heaters (filaments for incandescent lamps H01K 1/02)

1/24 . . . . Insulating layer or body located between heater and emissive material

1/26 . . . . Supports for the emissive material

1/28 . . . . Dispenser-type cathodes, e.g. L-cathode

1/30 . . Cold cathodes

1/304 . . . Field-emissive cathodes **[7]**

1/308 . . . Semiconductor cathodes, e.g. cathodes with PN junction layers **[7]**

1/312 . . . having an electric field perpendicular to the surface, e.g. tunnel-effect cathodes of Metal-Insulator-Metal (MIM) type **[7]**

1/316 . . . having an electric field parallel to the surface, e.g. thin film cathodes **[7]**

1/32 . . Secondary-electron-emitting electrodes (H01J 1/35 takes precedence; luminescent screens H01J 1/62; charge-storage screens in general H01J 1/78; charge-storage screens using secondary emission for image tubes H01J 29/41; dynodes for secondary-emission tubes H01J 43/10; secondary-emission detectors for measurement of nuclear or X-radiation G01T 1/28)

1/34 . . Photo-emissive cathodes (H01J 1/35 takes precedence; photoelectric screens H01J 1/78)

1/35 . . Electrodes exhibiting both secondary emission and photo-emission

1/36 . . Solid anodes; Solid auxiliary anodes for maintaining a discharge

1/38 . . . characterised by the material

1/40 . . . forming part of the envelope of the tube or lamp

1/42 . . . Cooling of anodes (cooling rotary anodes H01J 1/44); Heating of anodes

1/44 . . . Rotary anodes; Arrangements for rotating anodes; Cooling rotary anodes

1/46 . Control electrodes, e.g. grid (for igniting arrangements H01J 7/30); Auxiliary electrodes (auxiliary anodes for maintaining a discharge H01J 1/36)

1/48 . . characterised by the material

1/50 . Magnetic means for controlling the discharge

1/52 . Screens for shielding (screens acting as control electrodes H01J 1/46); Guides for influencing the discharge; Masks interposed in the electron stream

1/53 . Electrodes intimately associated with a screen on or from which an image or pattern is formed, picked-up, converted, or stored

1/54 . Screens on or from which an image or pattern is formed, picked-up, converted, or stored; Luminescent coatings on vessels

1/56 . . acting as light valves by shutter operation, e.g. for eidophor

1/58 . . acting by discolouration, e.g. halide screen

1/60 . . Incandescent screens

1/62 . . Luminescent screens; Selection of materials for luminescent coatings on vessels

1/63 . . . characterised by the luminescent material (luminescent materials C09K 11/00)

1/64 . . . characterised by the binder or adhesive for securing the luminescent material to its support

1/66 . . . Supports for luminescent material (vessels H01J 5/02)
1/68 . . . with superimposed luminescent layers
1/70 . . . with protective, conductive, or reflective layers
1/72 . . . with luminescent material discontinuously arranged, e.g. in dots or lines
1/74 . . . . with adjacent dots or lines of different luminescent material
1/76 . . . provided with permanent marks or references
1/78 . . Photoelectric screens; Charge-storage screens
1/88 . Mounting, supporting, spacing, or insulating of electrodes or of electrode assemblies
1/90 . . Insulation between electrodes or supports within the vacuum space (leading-in conductors H01J 5/46)
1/92 . . Mountings for the electrode assembly as a whole
1/94 . . Mountings for individual electrodes (for directly-heated cathodes H01J 1/15)
1/96 . . Spacing members extending to the envelope
1/98 . . . without fixed connection between spacing member and envelope

3/00 Details of electron-optical or ion-optical arrangements or of ion traps common to two or more basic types of discharge tubes or lamps

3/02 . Electron guns
3/04 . Ion guns
3/06 . two or more guns being arranged in a single vacuum space, e.g. for plural-ray tubes (H01J 3/07 takes precedence) **[2]**
3/07 . Arrangements for controlling convergence of a plurality of beams **[2]**
3/08 . Arrangements for controlling intensity of ray or beam (H01J 3/02, H01J 3/04 take precedence)
3/10 . Arrangements for centering ray or beam (H01J 3/02, H01J 3/04 take precedence)
3/12 . Arrangements for controlling cross-section of ray or beam; Arrangements for correcting aberration of beam, e.g. due to lenses (H01J 3/02, H01J 3/04 take precedence)
3/14 . Arrangements for focusing or reflecting ray or beam (H01J 3/02, H01J 3/04 take precedence)
3/16 . . Mirrors
3/18 . . Electrostatic lenses
3/20 . . Magnetic lenses
3/22 . . . using electromagnetic means only
3/24 . . . using permanent magnets only
3/26 . Arrangements for deflecting ray or beam (circuit arrangements for producing sawtooth pulses or other deflecting voltages or currents H03K)
3/28 . . along one straight line or along two perpendicular straight lines
3/30 . . . by electric fields only
3/32 . . . by magnetic fields only
3/34 . . along a circle, spiral, or rotating radial line
3/36 . Arrangements for controlling the ray or beam after passing the main deflection system, e.g. for post-acceleration or post-concentration
3/38 . Mounting, supporting, spacing, or insulating electron-optical or ion-optical arrangements
3/40 . Traps for removing or diverting unwanted particles, e.g. negative ions, fringing electrons; Arrangements for velocity or mass selection

5/00 Details relating to vessels or to leading-in conductors common to two or more basic types of discharge tubes or lamps

5/02 . Vessels; Containers; Shields associated therewith; Vacuum locks
5/03 . . Arrangements for preventing or mitigating effects of implosion of vessels or containers **[2]**
5/04 . . Vessels or containers characterised by the material thereof (selection of the material of the coating H01J 5/08)
5/06 . . Vessels or containers specially adapted for operation at high tension, e.g. by improved potential distribution over surface of vessel
5/08 . . provided with coatings on the walls thereof; Selection of materials for the coatings (luminescent coatings H01J 1/62)
5/10 . . . on internal surfaces
5/12 . . Double-wall vessels or containers
5/14 . . Dismountable vessels or containers, e.g. for replacing cathode heater
5/16 . . Optical or photographic arrangements structurally combined with the vessel (luminescent coatings H01J 1/62)
5/18 . . Windows permeable to X-rays, gamma-rays, or particles
5/20 . Seals between parts of vessels
5/22 . . Vacuum-tight joints between parts of vessel
5/24 . . . between insulating parts of vessel
5/26 . . . between insulating and conductive parts of vessel
5/28 . . . between conductive parts of vessel
5/30 . . . using packing material, e.g. sealing liquid or elastic insert
5/32 . Seals for leading-in conductors
5/34 . . for an individual conductor (pinched-stem seals H01J 5/38; end-disc seals H01J 5/40; annular seals H01J 5/44)
5/36 . . . using intermediate part
5/38 . . Pinched-stem or analogous seals
5/40 . . End-disc seals, e.g. flat header
5/42 . . . using intermediate part
5/44 . . Annular seals disposed between the ends of the vessel
5/46 . Leading-in conductors
5/48 . Means forming part of the tube or lamp for the purpose of supporting it (associated with electrical connecting means H01J 5/50)
5/50 . Means forming part of the tube or lamp for the purpose of providing electrical connection to it (electric coupling devices comprising a holder adapted for supporting a tube or lamp and not forming part of the tube or lamp H01R 33/00)
5/52 . . directly applied to, or forming part of, the vessel
5/54 . . supported by a separate part, e.g. base
5/56 . . . Shape of the separate part
5/58 . . . Means for fastening the separate part to the vessel, e.g. by cement
5/60 . . . . for fastening by mechanical means
5/62 . . . Connection of wires protruding from the vessel to connectors carried by the separate part

7/00 Details not provided for in groups H01J 1/00 to H01J 5/00 and common to two or more basic types of discharge tubes or lamps

7/02 . Selection of substances for gas fillings; Specified operating pressure or temperature (radioactive fillings H01J 7/40)

7/04 . . having one or more carbon compounds as the principal constituent
7/06 . . having helium, argon, neon, krypton, or xenon as the principal constituent
7/08 . . having a metallic vapour as the principal constituent
7/10 . . . mercury vapour
7/12 . . . vapour of an alkali metal
7/14 . Means for obtaining or maintaining the desired pressure within the vessel
7/16 . . Means for permitting pumping during operation of the tube or lamp
7/18 . . Means for absorbing or adsorbing gas, e.g. by gettering
7/20 . . Means for producing, introducing, or replenishing gas or vapour during operation of the tube or lamp
7/22 . . Tubulations therefor, e.g. for exhausting; Closures therefor
7/24 . Cooling arrangements (for main electrodes H01J 1/02); Heating arrangements (for main electrodes H01J 1/02); Means for circulating gas or vapour within the discharge space
7/26 . . by flow of fluid through passages associated with tube or lamp
7/28 . . by latent heat or evaporation of cooling liquid
7/30 . Igniting arrangements (circuit arrangements H02M 1/02, H05B)
7/32 . . having resistive or capacitative igniter
7/34 . . . having resistive igniter only
7/36 . . Igniting by movement of a solid electrode
7/38 . . Igniting by movement of vessel as a whole, e.g. tilting
7/40 . . Igniting by associated radioactive materials or fillings
7/42 . Means structurally associated with the tube or lamp for indicating defects or previous use
7/44 . One or more circuit elements structurally associated with the tube or lamp
7/46 . . Structurally associated resonator having distributed inductance and capacitance

9/00 Apparatus or processes specially adapted for the manufacture of electric discharge tubes, discharge lamps, or parts thereof (manufacture of vessels or containers from metal B21, e.g. B21D 51/00, from glass C03B); **Recovery of material from discharge tubes or lamps [1,7]**

9/02 . Manufacture of electrodes or electrode systems
9/04 . . of thermionic cathodes
9/06 . . . Machines therefor
9/08 . . Manufacture of heaters for indirectly-heated cathodes
9/10 . . . Machines therefor
9/12 . . of photo-emissive cathodes; of secondary-emission electrodes
9/14 . . of non-emitting electrodes
9/16 . . . Machines for making wire grids
9/18 . . Assembling together the component parts of electrode systems
9/20 . Manufacture of screens on or from which an image or pattern is formed, picked-up, converted or stored; Applying coatings to the vessel
9/22 . . Applying luminescent coatings
9/227 . . . with luminescent material discontinuously arranged, e.g. in dots or lines **[2]**
9/233 . . Manufacture of photoelectric screens or charge-storage screens **[2]**
9/236 . Manufacture of magnetic deflecting devices for cathode-ray tubes (manufacturing coils for transformers, inductances, reactors or choke coils H01F 41/04) **[3]**
9/24 . Manufacture or joining of vessels, leading-in conductors, or bases
9/26 . . Sealing together parts of vessels
9/28 . . Manufacture of leading-in conductors
9/30 . . Manufacture of bases
9/32 . . Sealing leading-in conductors
9/34 . . Joining base to vessel
9/36 . . Joining connectors to internal electrode system
9/38 . Exhausting, degassing, filling, or cleaning vessels
9/385 . . Exhausting vessels **[2]**
9/39 . . Degassing vessels **[2]**
9/395 . . Filling vessels **[2]**
9/40 . Closing vessels
9/42 . Measurement or testing during manufacture
9/44 . Factory adjustment of completed discharge tubes or lamps to comply with desired tolerances
9/46 . Machines having sequentially-arranged operating stations
9/48 . . with automatic transfer of workpieces between operating stations
9/50 . Repairing or regenerating used or defective discharge tubes, lamps or their salvageable components
9/52 . Recovery of material from discharge tubes or lamps (H01J 9/50 takes precedence) **[7]**

11/00 Gas-filled discharge tubes without any main electrode inside the vessel; **Gas-filled discharge tubes with at least one main electrode outside the vessel** (lamps H01J 65/00)

11/02 . Details, e.g. gas filling, shape of vessel
11/04 . . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for

13/00 Discharge tubes with liquid-pool cathodes, e.g. metal-vapour rectifying tubes (lamps H01J 61/00)

13/02 . Details
13/04 . . Main electrodes; Auxiliary anodes
13/06 . . . Cathodes
13/08 . . . . characterised by the material
13/10 . . . . Containers for the liquid pool; Arrangement or mounting thereof
13/12 . . . . Positioning or moving the cathode spot on the surface of the pool
13/14 . . . . Cooling, heating, circulating, filtering, or controlling level of the liquid
13/16 . . . Anodes; Auxiliary anodes for maintaining the discharge (screens H01J 13/22)
13/18 . . . . Cooling or heating of anodes
13/20 . . Control electrodes, e.g. grid (for igniting arrangements H01J 13/34)
13/22 . . Screens, e.g. for preventing or eliminating arcing-back
13/24 . . Vessels; Containers
13/26 . . Seals between parts of vessels; Seals for leading-in conductors; Leading-in conductors
13/28 . . Selection of substances for gas filling; Means for obtaining or maintaining the desired pressure within the tube **[2]**
13/30 . . . Means for permitting pumping during operation of the tube
13/32 . . Cooling arrangements; Heating arrangements (for cathodes H01J 13/14; for anodes H01J 13/18)

13/34 . . Igniting arrangements (circuit arrangements H02M 1/02)
13/36 . . . having resistive or capacitative igniter
13/38 . . . . having resistive igniter only
13/40 . . . Igniting by movement of a solid electrode
13/42 . . . Igniting by movement of vessel as a whole, e.g. tilting
13/44 . . Devices for preventing or eliminating arcing-back (screens therefor H01J 13/22)
13/46 . . One or more circuit elements structurally associated with the tube
13/48 . . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for
13/50 . Tubes having a single main anode
13/52 . . with control by one or more intermediate control electrodes
13/54 . . with control by igniter, e.g. single-anode ignitron
13/56 . Tubes having two or more main anodes
13/58 . . with control by one or more intermediate control electrodes

15/00 Gas-filled discharge tubes with gaseous cathodes, e.g. plasma cathode (lamps H01J 61/62)
15/02 . Details, e.g. electrode, gas filling, shape of vessel
15/04 . . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for

17/00 Gas-filled discharge tubes with solid cathode (H01J 25/00, H01J 27/00, H01J 31/00 to H01J 41/00 take precedence; gas or vapour discharge lamps H01J 61/00; gas filled spark gaps H01T; Marx converters H02M 7/26; tubes for generating potential differences by charges carried in a gas stream H02N)
17/02 . Details
17/04 . . Electrodes; Screens
17/06 . . . Cathodes
17/08 . . . . having mercury or liquid alkali metal deposited on the cathode surface during operation of the tube
17/10 . . . Anodes
17/12 . . . Control electrodes
17/14 . . Magnetic means for controlling the discharge
17/16 . . Vessels; Containers
17/18 . . Seals between parts of vessels; Seals for leading-in conductors; Leading-in conductors
17/20 . . Selection of substances for gas fillings; Specified operating pressure or temperature (radioactive fillings H01J 17/32)
17/22 . . Means for obtaining or maintaining the desired pressure within the tube
17/24 . . . Means for absorbing or adsorbing gas, e.g. by gettering
17/26 . . . Means for producing, introducing, or replenishing gas or vapour during operation of the tube
17/28 . . Cooling arrangements
17/30 . . Igniting arrangements
17/32 . . . Igniting by associated radioactive materials or fillings
17/34 . . One or more circuit elements structurally associated with the tube
17/36 . . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for
17/38 . Cold-cathode tubes (TR boxes H01J 17/64)
17/40 . . with one cathode and one anode, e.g. glow tube, tuning-indicator glow tube, voltage-stabiliser tube, voltage-indicator tube (cathode-glow lamps H01J 61/64)
17/42 . . . having one or more probe electrodes, e.g. for potential dividing
17/44 . . . having one or more control electrodes
17/46 . . . . for preventing and then permitting ignition, but thereafter having no control
17/48 . . with more than one cathode or anode, e.g. sequence-discharge tube, counting tube, dekatron
17/49 . . . Display panels, e.g. with crossed electrodes (gas-discharge-type indicating arrangements effected by the combination of a number of individual lamps G09F 9/313) **[3]**
17/50 . Thermionic-cathode tubes (TR boxes H01J 17/64)
17/52 . . with one cathode and one anode
17/54 . . . having one or more control electrodes
17/56 . . . . for preventing and then permitting ignition, but thereafter having no control
17/58 . . with more than one cathode or anode
17/60 . . . the discharge paths priming each other in a predetermined sequence, e.g. counting tube
17/62 . . . with independent discharge paths controlled by intermediate electrodes, e.g. polyphase rectifier
17/64 . Tubes specially designed for switching or modulating in a waveguide, e.g. TR box

19/00 Details of vacuum tubes of the types covered by group H01J 21/00
19/02 . Electron-emitting electrodes; Cathodes
19/04 . . Thermionic cathodes
19/06 . . . characterised by the material
19/062 . . . . with alkaline-earth metal oxides, or such oxides used in conjunction with reducing agents, as an emissive material **[6]**
19/064 . . . . with other metal oxides as an emissive material **[6]**
19/066 . . . . with metals or alloys as an emissive material **[6]**
19/068 . . . . with compounds having metallic conductive properties, e.g. lanthanum boride, as an emissive material **[6]**
19/08 . . . Cathodes heated directly by an electric current
19/10 . . . characterised by the shape
19/12 . . . . Supports; Vibration-damping arrangements
19/14 . . . Cathodes heated indirectly by an electric current; Cathodes heated by electron or ion bombardment
19/16 . . . . Heaters (filaments for incandescent lamps H01K 1/02)
19/18 . . . . Insulating layer or body located between heater and emissive material
19/20 . . . . Supports for the emissive material
19/22 . . . . Dispenser-type cathodes, e.g. L-cathode
19/24 . . Cold cathodes, e.g. field-emissive cathode
19/28 . Non-electron-emitting electrodes; Screens
19/30 . . characterised by the material
19/32 . . Anodes
19/34 . . . forming part of the envelope
19/36 . . . Cooling of anodes
19/38 . . Control electrodes, e.g. grid
19/40 . . Screens for shielding (screens acting as control electrodes H01J 19/38)

19/42 . Mounting, supporting, spacing, or insulating of electrodes or of electrode assemblies
19/44 . . Insulation between electrodes or supports within the vacuum space (leading-in conductors H01J 19/62)
19/46 . . Mountings for the electrode assembly as a whole
19/48 . . Mountings for individual electrodes (for directly-heated cathodes H01J 19/12)
19/50 . . Spacing members extending to the envelope
19/52 . . . without fixed connection between spacing member and envelope
19/54 . Vessels; Containers; Shields associated therewith
19/56 . . characterised by the material of the vessel or container
19/57 . . provided with coatings on the walls thereof; Selection of materials for the coatings
19/58 . Seals between parts of vessels
19/60 . Seals for leading-in conductors
19/62 . Leading-in conductors
19/64 . Means forming part of the tube for the purpose of supporting it (associated with electrical connecting means H01J 19/66)
19/66 . Means forming part of the tube for the purpose of providing electrical connection to it (construction of connectors H01R)
19/68 . Specified gas introduced into the tube at low pressure, e.g. for reducing or influencing space charge
19/70 . Means for obtaining or maintaining the vacuum, e.g. by gettering
19/72 . . Tubulations therefor, e.g. for exhausting; Closures therefor
19/74 . Cooling arrangements (cooling of anodes H01J 19/36)
19/76 . Means structurally associated with the tube for indicating defects or previous use
19/78 . One or more circuit elements structurally associated with the tube
19/80 . . Structurally associated resonator having distributed inductance and capacitance
19/82 . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for

21/00 **Vacuum tubes** (H01J 25/00, H01J 31/00 to H01J 40/00, H01J 43/00, H01J 47/00, H01J 49/00 take precedence; details of vacuum tubes H01J 19/00; cathode-ray or electron-stream lamps H01J 63/00)

21/02 . Tubes with a single discharge path
21/04 . . without control means, i.e. diodes
21/06 . . having electrostatic control means only
21/08 . . . with movable electrode or electrodes
21/10 . . . with one or more immovable internal control electrodes, e.g. triode, pentode, octode
21/12 . . . . Tubes with variable amplification factor
21/14 . . . . Tubes with means for concentrating the electron stream, e.g. beam tetrode
21/16 . . . with external electrostatic control means and with or without internal control electrodes
21/18 . . having magnetic control means; having both magnetic and electrostatic control means
21/20 . Tubes with more than one discharge path; Multiple tubes, e.g. double diode, triode-hexode (secondary-emission tubes, electron-multiplier tubes H01J 43/00)
21/22 . . with movable electrode or electrodes
21/24 . . with variable amplification factor
21/26 . . with means for concentrating the electron stream
21/34 . Tubes with electrode system arranged or dimensioned so as to eliminate transit-time effect (with flat electrodes H01J 21/36)
21/36 . Tubes with flat electrodes, e.g. disc electrode

23/00 **Details of transit-time tubes of the types covered by group H01J 25/00**

23/02 . Electrodes; Magnetic control means; Screens (associated with resonator or delay system H01J 23/16)
23/027 . . Collectors **[2]**
23/033 . . . Collector cooling devices **[2]**
23/04 . . Cathodes
23/05 . . . having a cylindrical emissive surface, e.g. cathodes for magnetrons **[3]**
23/06 . . Electron or ion guns
23/065 . . . producing a solid cylindrical beam (H01J 23/075 takes precedence) **[3]**
23/07 . . . producing a hollow cylindrical beam (H01J 23/075 takes precedence) **[3]**
23/075 . . . Magnetron injection guns **[3]**
23/08 . . Focusing arrangements, e.g. for concentrating stream of electrons, for preventing spreading of stream
23/083 . . . Electrostatic focusing arrangements **[3]**
23/087 . . . Magnetic focusing arrangements **[3]**
23/09 . . Electric systems for directing or deflecting the discharge along a desired path, e.g. E-type (focusing arrangements H01J 23/08)
23/10 . . Magnet systems for directing or deflecting the discharge along a desired path, e.g. a spiral path (magnetic focusing arrangements H01J 23/08)
23/11 . . Means for reducing noise (in electron or ion gun H01J 23/06)
23/12 . Vessels; Containers
23/14 . Leading-in arrangements; Seals therefor
23/15 . . Means for preventing wave energy leakage structurally associated with tube leading-in arrangements, e.g. filters, chokes, attenuating devices **[4]**
23/16 . Circuit elements, having distributed capacitance and inductance, structurally associated with the tube and interacting with the discharge (circuit elements, having distributed capacitance and inductance, in general H01P)
23/18 . . Resonators
23/20 . . . Cavity resonators; Adjustment or tuning thereof
23/207 . . . . Tuning of single resonator **[2]**
23/213 . . . . Simultaneous tuning of more than one resonator, e.g. resonant cavities of a magnetron **[2]**
23/22 . . . Connections between resonators, e.g. strapping for connecting resonators of a magnetron
23/24 . . Slow-wave structures
23/26 . . . Helical slow-wave structures; Adjustment therefor
23/27 . . . . Helix-derived slow-wave structures **[3]**
23/28 . . . Interdigital slow-wave structures; Adjustment therefor
23/30 . . . Damping arrangements associated with slow-wave structures, e.g. for suppression of unwanted oscillations
23/34 . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for
23/36 . Coupling devices having distributed capacitance and inductance, structurally associated with the tube, for introducing or removing wave energy **[4]**

23/38 . . to or from the discharge **[4]**
23/40 . . to or from the interaction circuit **[4]**
23/42 . . . the interaction circuit being a helix or a helix-derived slow-wave structure (H01J 23/44 to H01J 23/48 take precedence) **[4]**
23/44 . . . Rod-type coupling devices (H01J 23/46, H01J 23/48, H01J 23/54 take precedence) **[4]**
23/46 . . . Loop coupling devices **[4]**
23/48 . . . for linking interaction circuit with coaxial lines; Devices of the coupled helices type (H01J 23/46 takes precedence) **[4]**
23/50 . . . . the interaction circuit being a helix or derived from a helix (H01J 23/52 takes precedence) **[4]**
23/52 . . . . the coupled helices being disposed coaxially around one another **[4]**
23/54 . . Filtering devices preventing unwanted frequencies or modes to be coupled to, or out of, the interaction circuit; Prevention of high frequency leakage in the environment **[4]**

25/00 Transit-time tubes, e.g. klystrons, travelling-wave tubes, magnetrons (details of transit-time tubes H01J 23/00; particle accelerators H05H)
25/02 . Tubes with electron stream modulated in velocity or density in a modulator zone and thereafter giving-up energy in an inducing zone, the zones being associated with one or more resonators (tubes in which a travelling wave is simulated at spaced gaps H01J 25/34)
25/04 . . Tubes having one or more resonators, without reflection of the electron stream, and in which the modulation produced in the modulator zone is mainly density modulation, e.g. Haeff tube
25/06 . . Tubes having only one resonator, without reflection of the electron stream, and in which the modulation produced in the modulator zone is mainly velocity modulation, e.g. Lüdi klystron
25/08 . . . with electron stream perpendicular to the axis of the resonator
25/10 . . Klystrons, i.e. tubes having two or more resonators, without reflection of the electron stream, and in which the stream is modulated mainly by velocity in the zone of the input resonator
25/11 . . . Extended interaction klystrons **[2]**
25/12 . . . with pencil-like electron stream in the axis of the resonators
25/14 . . . with tube-like electron stream coaxial with the axis of the resonators
25/16 . . . with pencil-like electron stream perpendicular to the axis of the resonators
25/18 . . . with radial or disc-like electron stream perpendicular to the axis of the resonators
25/20 . . . having special arrangements in the space between resonators, e.g. resistive-wall amplifier tube, space-charge amplifier tube, velocity-jump tube
25/22 . . Reflex klystrons, i.e. tubes having one or more resonators, with a single reflection of the electron stream, and in which the stream is modulated mainly by velocity in the modulator zone
25/24 . . . in which the electron stream is in the axis of the resonator or resonators and is pencil-like before reflection
25/26 . . . in which the electron stream is coaxial with the axis of the resonator or resonators and is tube-like before reflection
25/28 . . . in which the electron stream is perpendicular to the axis of the resonator or resonators and is pencil-like before reflection
25/30 . . . in which the electron stream is perpendicular to the axis of the resonator or resonators and is radial or disc-like before reflection
25/32 . . Tubes with plural reflection, e.g. Coeterier tube
25/34 . Travelling-wave tubes; Tubes in which a travelling wave is simulated at spaced gaps
25/36 . . Tubes in which an electron stream interacts with a wave travelling along a delay line or equivalent sequence of impedance elements, and without magnet system producing an H-field crossing the E-field
25/38 . . . the forward-travelling wave being utilised
25/40 . . . the backward-travelling wave being utilised
25/42 . . Tubes in which an electron stream interacts with a wave travelling along a delay line or equivalent sequence of impedance elements, and with a magnet system producing an H-field crossing the E-field (with travelling wave moving completely around the electron space H01J 25/50)
25/44 . . . the forward-travelling wave being utilised
25/46 . . . the backward-travelling wave being utilised
25/48 . . Tubes in which two electron streams of different velocities interact with one another, e.g. electron-wave tube
25/49 . . Tubes using the parametric principle, e.g. for parametric amplification
25/50 . Magnetrons, i.e. tubes with a magnet system producing an H-field crossing the E-field (with travelling wave not moving completely around the electron space H01J 25/42; functioning with plural reflection or with reversed cyclotron action H01J 25/62, H01J 25/64)
25/52 . . with an electron space having a shape that does not prevent any electron from moving completely around the cathode or guide electrode
25/54 . . . having only one cavity or other resonator, e.g. neutrode tube (having a composite resonator H01J 25/58)
25/55 . . . . Coaxial-cavity magnetrons **[2]**
25/56 . . . . with interdigital arrangement of anodes, e.g. turbator tube
25/58 . . . having a number of resonators; having a composite resonator, e.g. a helix
25/587 . . . . Multi-cavity magnetrons **[2]**
25/593 . . . . . Rising-sun magnetrons **[2]**
25/60 . . with an electron space having a shape that prevents any electron from moving completely around the cathode or guide electrode; Linear magnetrons
25/61 . Hybrid tubes, i.e. tubes comprising a klystron section and a travelling-wave section **[2]**
25/62 . Strophotrons, i.e. tubes with H-field crossing the E-field and functioning with plural reflection
25/64 . Turbine tubes, i.e. tubes with H-field crossing the E-field and functioning with reversed cyclotron action
25/66 . Tubes with electron stream crossing itself and thereby interrupting, or interfering with, itself
25/68 . Tubes specially designed to act as oscillator with positive grid and retarding field, e.g. for Barkhausen-Kurz oscillators (with secondary emission H01J 25/76)
25/70 . . with resonator having distributed inductance and capacitance, e.g. Pintsch tube

25/72 . . in which a standing wave or a considerable part thereof is produced along an electrode, e.g. Clavier tube (with resonator having distributed inductance and capacitance H01J 25/70)

25/74 . Tubes specially designed to act as transit-time diode oscillators, e.g. monotron (with secondary emission H01J 25/76)

25/76 . Dynamic electron-multiplier tubes, e.g. Farnsworth multiplier tube, multipactor

25/78 . Tubes with electron stream modulated by deflection in a resonator

27/00 Ion beam tubes (H01J 25/00, H01J 33/00, H01J 37/00 take precedence; particle accelerators H05H)

27/02 . Ion sources; Ion guns (arrangements for handling particles, e.g. focusing, G21K 1/00; generating ions to be introduced into non-enclosed gases H01T 23/00; generating plasma H05H 1/24) **[3]**

27/04 . . using reflex discharge, e.g. Penning ion sources **[3]**

27/06 . . . without applied magnetic field **[3]**

27/08 . . using arc discharge **[3]**

27/10 . . . Duoplasmatrons (for use in particle accelerators H05H 7/00) **[3]**

27/12 . . . . provided with an expansion cup **[3]**

27/14 . . . Other arc discharge ion sources using an applied magnetic field **[3]**

27/16 . . using high-frequency excitation, e.g. microwave excitation **[3]**

27/18 . . . with an applied axial magnetic field **[3]**

27/20 . . using particle bombardment, e.g. ionisers **[3]**

27/22 . . . Metal ion sources **[3]**

27/24 . . using photo-ionisation, e.g. using laser beam **[3]**

27/26 . . using surface ionisation, e.g. field effect ion sources, thermionic ion sources (H01J 27/20, H01J 27/24 take precedence) **[3]**

29/00 Details of cathode-ray tubes or of electron-beam tubes of the types covered by group H01J 31/00

29/02 . Electrodes; Screens; Mounting, supporting, spacing, or insulating thereof

29/04 . . Cathodes (electron guns H01J 29/48)

29/06 . . Screens for shielding; Masks interposed in the electron stream

29/07 . . . Shadow masks for colour-television tubes **[2]**

29/08 . . Electrodes intimately associated with a screen on or from which an image or pattern is formed, picked-up converted, or stored, e.g. backing-plate for storage tube, for collecting secondary electrons (arrangements for colour switching H01J 29/80)

29/10 . . Screens on, or from, which an image or pattern is formed, picked-up, converted, or stored

29/12 . . . acting as light valves by shutter operation, e.g. for eidophor

29/14 . . . acting by discolouration, e.g. halide screen

29/16 . . . Incandescent screens

29/18 . . . Luminescent screens

29/20 . . . . characterised by the luminescent material

29/22 . . . . characterised by the binder or adhesive for securing the luminescent material to its support, e.g. vessel

29/24 . . . . Supports for luminescent material

29/26 . . . . with superimposed luminescent layers

29/28 . . . . with protective, conductive, or reflective layers

29/30 . . . . with luminescent material discontinuously arranged, e.g. in dots or lines

29/32 . . . . . with adjacent dots or lines of different luminescent material, e.g. for colour television

29/34 . . . . provided with permanent marks or references

29/36 . . . Photoelectric screens; Charge-storage screens

29/38 . . . . not using charge storage, e.g. photo-emissive screen, extended cathode

29/39 . . . . Charge-storage screens

29/41 . . . . . using secondary emission, e.g. for supericonoscope

29/43 . . . . . using photo-emissive mosaic, e.g. for orthicon, for iconoscope

29/44 . . . . . exhibiting internal electric effects caused by particle radiation, e.g. bombardment-induced conductivity

29/45 . . . . . exhibiting internal electric effects caused by electromagnetic radiation, e.g. photoconductive screen, photodielectric screen, photovoltaic screen

29/46 . Arrangements of electrodes and associated parts for generating or controlling the ray or beam, e.g. electron-optical arrangement

29/48 . . Electron guns

29/50 . . . two or more guns being arranged in a single vacuum space, e.g. for plural-ray tubes (H01J 29/51 takes precedence) **[2]**

29/51 . . . Arrangements for controlling convergence of a plurality of beams **[2]**

Note

Group H01J 29/48 takes precedence over groups H01J 29/52 to H01J 29/58.

29/52 . . Arrangements for controlling intensity of ray or beam, e.g. for modulation

29/54 . . Arrangements for centring ray or beam

29/56 . . Arrangements for controlling cross-section of ray or beam; Arrangements for correcting aberration of beam, e.g. due to lenses

29/58 . . Arrangements for focusing or reflecting ray or beam

29/60 . . . Mirrors

29/62 . . . Electrostatic lenses

29/64 . . . Magnetic lenses

29/66 . . . . using electromagnetic means only

29/68 . . . . using permanent magnets only

29/70 . . Arrangements for deflecting ray or beam (circuit arrangements for producing sawtooth pulses or other deflecting voltages or currents H03K)

29/72 . . . along one straight line or along two perpendicular straight lines

29/74 . . . . Deflecting by electric fields only

29/76 . . . . Deflecting by magnetic fields only

29/78 . . . along a circle, spiral, or rotating radial line, e.g. for radar display

29/80 . . Arrangements for controlling the ray or beam after passing the main deflection system, e.g. for post-acceleration or post-concentration, for colour switching

29/81 . . . using shadow masks (shadow masks per se H01J 29/07) **[3]**

29/82 . . Mounting, supporting, spacing, or insulating electron-optical or ion-optical arrangements

29/84 . Traps for removing or diverting unwanted particles, e.g. negative ions, fringing electrons; Arrangements for velocity or mass selection (particle spectrometers or separator tubes H01J 49/00)

29/86 . Vessels; Containers; Vacuum locks

29/87 . . Arrangements for preventing or mitigating effects of implosion of vessels or containers **[2]**

29/88 . . provided with coatings on the walls thereof; Selection of materials for the coatings (luminescent screens H01J 29/18)

29/89 . . Optical or photographic arrangements structurally combined with the vessel

29/90 . Leading-in arrangements; Seals therefor

29/92 . Means forming part of the tube for the purpose of providing electrical connection to it (construction of connectors H01R)

29/94 . Selection of substances for gas fillings; Means for obtaining or maintaining the desired pressure within the tube, e.g. by gettering

29/96 . One or more circuit elements structurally associated with the tube

29/98 . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for

31/00 Cathode-ray tubes; **Electron-beam tubes** (H01J 25/00, H01J 33/00, H01J 35/00, H01J 37/00 take precedence; details of cathode-ray tubes or of electron-beam tubes H01J 29/00; cathode-ray or electron-stream lamps H01J 63/00)

31/02 . having one or more output electrodes which may be impacted selectively by the ray or beam, and onto, from, or over which the ray or beam may be deflected or de-focused

31/04 . . with only one or two output electrodes

31/06 . . with more than two output electrodes, e.g. for multiple switching or counting

31/08 . having a screen on or from which an image or pattern is formed, picked-up, converted, or stored

31/10 . . Image or pattern display tubes, i.e. having electrical input and optical output; Flying-spot tubes for scanning purposes

31/12 . . . with luminescent screen

31/14 . . . . Magic-eye or analogous tuning indicators

31/15 . . . . with ray or beam selectively directed to luminescent anode segments **[3]**

31/16 . . . . with mask carrying a number of selectively displayable signs, e.g. numeroscope

31/18 . . . . with image written by a ray or beam on a grid-like charge-accumulating screen, and with a ray or beam passing through, and influenced by, this screen before striking the luminescent screen, e.g. direct-view storage tube

31/20 . . . for displaying images or patterns in two or more colours

31/22 . . . for stereoscopic displays

31/24 . . . with screen acting as light valve by shutter operation, e.g. eidophor

31/26 . . Image pick-up tubes having an input of visible light and electric output (tubes without defined electron beams and having a light ray scanning a photo-emissive screen H01J 40/20)

31/28 . . . with electron ray scanning the image screen

31/30 . . . . having regulation of screen potential at anode potential, e.g. iconoscope

31/32 . . . . . Tubes with image-amplification section, e.g. image-iconoscope, supericonoscope

31/34 . . . . having regulation of screen potential at cathode potential, e.g. orthicon

31/36 . . . . . Tubes with image-amplification section, e.g. image-orthicon

31/38 . . . . . Tubes with photoconductive screen, e.g. vidicon

31/40 . . . . having grid-like image screen through which the electron ray passes and by which the ray is influenced before striking the output electrode, i.e. having “triode action”

31/42 . . . with image screen generating a composite electron beam which is deflected as a whole past a stationary probe to simulate a scanning effect, e.g. Farnsworth pick-up tube

31/44 . . . . Tubes with image-amplification section

31/46 . . . Tubes in which electrical output represents both intensity and colour of image

31/48 . . . Tubes with amplification of output effected by electron-multiplier arrangements within the vacuum space

31/49 . . Pick-up tubes adapted for an input of electromagnetic radiation other than visible light and having an electric output, e.g. for an input of X-rays, for an input of infra-red radiation

31/495 . . Pick-up tubes adapted for an input of sonic, ultrasonic, or mechanical vibrations and having an electric output

31/50 . . Image-conversion or image-amplification tubes, i.e. having optical, X-ray, or analogous input, and optical output

31/52 . . . having grid-like image screen through which the electron ray or beam passes and by which the ray or beam is influenced before striking the luminescent output screen, i.e. having “triode action”

31/54 . . . in which the electron ray or beam is reflected by the image input screen on to the image output screen

31/56 . . . for converting or amplifying images in two or more colours

31/58 . . Tubes for storage of image or information pattern or for conversion of definition of television or like images, i.e. having electrical input and electrical output

31/60 . . . having means for deflecting, either selectively or sequentially, an electron ray on to separate surface elements of the screen (by circuitry alone H01J 29/98)

31/62 . . . . with separate reading and writing rays

31/64 . . . . . on opposite sides of screen, e.g. for conversion of definition

31/66 . . . having means for allowing all but selected cross-section elements of a homogeneous electron beam to reach corresponding elements of the screen, e.g. selectron

31/68 . . . in which the information pattern represents two or more colours

33/00 Discharge tubes with provision for emergence of electrons or ions from the vessel (particle accelerators H05H); **Lenard tubes**

33/02 . Details

33/04 . . Windows

35/00 **X-ray tubes** (X-ray lasers H01S 4/00; X-ray technique in general H05G)
35/02 . Details
35/04 . . Electrodes
35/06 . . . Cathodes
35/08 . . . Anodes; Anticathodes
35/10 . . . . Rotary anodes; Arrangements for rotating anodes; Cooling rotary anodes
35/12 . . . . Cooling non-rotary anodes
35/14 . . Arrangements for concentrating, focusing, or directing the cathode ray
35/16 . . Vessels; Containers; Shields associated therewith
35/18 . . . Windows
35/20 . . Selection of substances for gas fillings; Means for obtaining or maintaining the desired pressure within the tube, e.g. by gettering
35/22 . specially designed for passing a very high current for a very short time, e.g. for flash operation
35/24 . Tubes wherein the point of impact of the cathode ray on the anode or anticathode is movable relative to the surface thereof
35/26 . . by rotation of the anode or anticathode
35/28 . . by vibration, oscillation, reciprocation, or swash-plate motion of the anode or anticathode
35/30 . . by deflection of the cathode ray
35/32 . Tubes wherein the X-rays are produced at or near the end of the tube or a part thereof, which tube or part has a small cross-section to facilitate introduction into a small hole or cavity

37/00 **Discharge tubes with provision for introducing objects or material to be exposed to the discharge, e.g. for the purpose of examination or processing thereof** (H01J 33/00, H01J 40/00, H01J 41/00, H01J 47/00, H01J 49/00 take precedence; scanning-probe techniques or apparatus G01Q; contactless testing of electronic circuits using electron beams G01R 31/305) **[2,5]**
37/02 . Details
37/04 . . Arrangements of electrodes and associated parts for generating or controlling the discharge, e.g. electron-optical arrangement, ion-optical arrangement
37/05 . . . Electron- or ion-optical arrangements for separating electrons or ions according to their energy (particle separator tubes H01J 49/00) **[3]**
37/06 . . . Electron sources; Electron guns
37/063 . . . . Geometrical arrangement of electrodes for beam-forming **[3]**
37/065 . . . . Construction of guns or parts thereof (H01J 37/067 to H01J 37/077 take precedence) **[3]**
37/067 . . . . Replacing parts of guns; Mutual adjustment of electrodes (H01J 37/073 to H01J 37/077 take precedence; vacuum locks H01J 37/18) **[3]**
37/07 . . . . Eliminating deleterious effects due to thermal effects or electric or magnetic fields (H01J 37/073 to H01J 37/077 take precedence) **[3]**
37/073 . . . . Electron guns using field emission, photo emission, or secondary emission electron sources **[3]**
37/075 . . . . Electron guns using thermionic emission from cathodes heated by particle bombardment or by irradiation, e.g. by laser **[3]**
37/077 . . . . Electron guns using discharge in gases or vapours as electron sources **[3]**
37/08 . . . Ion sources; Ion guns
37/09 . . . Diaphragms; Shields associated with electron- or ion-optical arrangements; Compensation of disturbing fields **[3]**
37/10 . . . Lenses
37/12 . . . . electrostatic
37/14 . . . . magnetic
37/141 . . . . . Electromagnetic lenses **[3]**
37/143 . . . . . Permanent magnetic lenses **[3]**
37/145 . . . . Combinations of electrostatic and magnetic lenses **[3]**
37/147 . . . Arrangements for directing or deflecting the discharge along a desired path (lenses H01J 37/10) **[2]**
37/15 . . . . External mechanical adjustment of electron- or ion-optical components (H01J 37/067, H01J 37/20 take precedence) **[3]**
37/153 . . . Electron-optical or ion-optical arrangements for the correction of image defects, e.g. stigmators **[2]**
37/16 . . Vessels; Containers
37/18 . . Vacuum locks
37/20 . . Means for supporting or positioning the object or the material; Means for adjusting diaphragms or lenses associated with the support (preparing specimens for investigation G01N 1/28)
37/21 . . Means for adjusting the focus **[2]**
37/22 . . Optical or photographic arrangements associated with the tube
37/24 . . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for
37/244 . . Detectors; Associated components or circuits therefor **[3]**
37/248 . . Components associated with high voltage supply (high voltage supply in general H02J, H02M) **[3]**
37/252 . Tubes for spot-analysing by electron or ion beams; Microanalysers (investigating or analysing thereby G01N 23/22) **[3]**
37/256 . . using scanning beams **[3]**
37/26 . Electron or ion microscopes; Electron- or ion-diffraction tubes **[2]**
37/27 . . Shadow microscopy **[3]**
37/28 . . with scanning beams (microanalysers using scanning beams H01J 37/256)
37/285 . . Emission microscopes, e.g. field-emission microscopes **[2]**
37/29 . . Reflection microscopes **[2]**
37/295 . . Electron- or ion-diffraction tubes **[2]**
37/30 . Electron-beam or ion-beam tubes for localised treatment of objects
37/301 . . Arrangements enabling beams to pass between regions of different pressure **[3]**
37/302 . . Controlling tubes by external information, e.g. programme control (H01J 37/304 takes precedence) **[3]**
37/304 . . Controlling tubes by information coming from the objects, e.g. correction signals **[3]**
37/305 . . for casting, melting, evaporating, or etching **[2]**
37/31 . . for cutting or drilling **[2]**
37/315 . . for welding **[2]**
37/317 . . for changing properties of the objects or for applying thin layers thereon, e.g. ion implantation (H01J 37/36 takes precedence) **[3]**

37/32 . Gas-filled discharge tubes (heating by discharge H05B)

37/34 . . operating with cathodic sputtering (H01J 37/36 takes precedence) **[3]**

37/36 . . for cleaning surfaces while plating with ions of materials introduced into the discharge, e.g. introduced by evaporation **[3]**

40/00 **Photoelectric discharge tubes not involving the ionisation of a gas** (H01J 49/00 takes precedence; cathode-ray or image-pick-up tubes H01J 31/26) **[3]**

40/02 . Details **[3]**

40/04 . . Electrodes **[3]**

40/06 . . . Photo-emissive cathodes **[3]**

40/08 . . Magnetic means for controlling discharge **[3]**

40/10 . . Selection of substances for gas fillings **[3]**

40/12 . . One or more circuit elements structurally associated with the tube **[3]**

40/14 . . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for **[3]**

40/16 . having photo-emissive cathode, e.g. alkaline photoelectric cell (operating with secondary emission H01J 43/00) **[3]**

40/18 . . with luminescent coatings for influencing the sensitivity of the tube, e.g. by converting the input wavelength (image-conversion or image-amplification tubes H01J 31/50) **[3]**

40/20 . . wherein a light-ray scans a photo-emissive screen **[3]**

41/00 **Discharge tubes and means integral therewith for measuring gas pressure** (vacuum gauge systems using such tubes G01L 21/30); **Discharge tubes for evacuation by diffusion of ions**

41/02 . Discharge tubes and means integral therewith for measuring gas pressure **[2]**

41/04 . . with ionisation by means of thermionic cathodes **[2]**

41/06 . . with ionisation by means of cold cathodes **[2]**

41/08 . . with ionisation by means of radioactive substances, e.g. alphatrons **[2]**

41/10 . . of particle-spectrometer type (particle spectrometers in general H01J 49/00) **[2]**

41/12 . Discharge tubes for evacuating by diffusion of ions, e.g. ion pumps, getter ion pumps **[2]**

41/14 . . with ionisation by means of thermionic cathodes **[2]**

41/16 . . . using gettering substances **[2]**

41/18 . . with ionisation by means of cold cathodes **[2]**

41/20 . . . using gettering substances **[2]**

43/00 **Secondary-emission tubes**; **Electron-multiplier tubes** (dynamic electron-multiplier tubes H01J 25/76; secondary-emission detectors for measurement of nuclear or X-radiation G01T 1/28)

43/02 . Tubes in which one or a few electrodes are secondary-electron-emitting electrodes

43/04 . Electron multipliers

43/06 . . Electrode arrangements

43/08 . . . Cathode arrangements (construction of photo cathodes H01J 40/06, H01J 40/16, H01J 47/00, H01J 49/08)

43/10 . . . Dynodes (H01J 43/24, H01J 43/26 take precedence; secondary-electron-emitting electrodes in general H01J 1/32)

43/12 . . . Anode arrangements

43/14 . . . Control of electron beam by magnetic field

43/16 . . . Electrode arrangements using essentially one dynode

43/18 . . . Electrode arrangements using essentially more than one dynode

43/20 . . . . Dynodes consisting of sheet material, e.g. plane, bent

43/22 . . . . Dynodes consisting of electron-permeable material, e.g. foil, grid, tube, venetian blind

43/24 . . . . Dynodes having potential gradient along their surfaces

43/26 . . . . Box dynodes

43/28 . . Vessels; Windows; Screens; Suppressing undesired discharges or currents

43/30 . . Circuit arrangements not adapted to a particular application of the tube and not otherwise provided for

45/00 **Discharge tubes functioning as thermionic generators**

47/00 **Tubes for determining the presence, intensity, density or energy of radiation or particles** (photoelectric discharge tubes not involving the ionisation of a gas H01J 40/00) **[3]**

47/02 . Ionisation chambers **[3]**

47/04 . . Capacitive ionisation chambers, e.g. the electrodes of which are used as electrometers (electrostatic dosimeters in general G01T 1/14) **[3]**

47/06 . Proportional counter tubes **[3]**

47/08 . Geiger-Müller counter tubes **[3]**

47/10 . Spark counters (H01J 47/14 takes precedence; spark gaps H01T) **[3]**

47/12 . Neutron detector tubes, e.g. BF_3 tubes **[3]**

47/14 . Parallel electrode spark or streamer chambers; Wire spark or streamer chambers **[3]**

47/16 . . characterised by readout of each individual wire **[3]**

47/18 . . . the readout being electrical (H01J 47/20 takes precedence) **[3]**

47/20 . . . the readout employing electrical or mechanical delay lines, e.g. magnetostrictive delay lines **[3]**

47/22 . . characterised by another type of readout **[3]**

47/24 . . . the readout being acoustical **[3]**

47/26 . . . the readout being optical **[3]**

49/00 **Particle spectrometers or separator tubes** (for measuring gas pressure H01J 41/10) **[3]**

Note

In classifying particle separators, no distinction is made between spectrometry and spectrography, the difference being only in the manner of detection which in the first case is electrical and in the second case is by means of a photographic film. **[3]**

49/02 . Details **[3]**

49/04 . . Arrangements for introducing or extracting samples to be analysed, e.g. vacuum locks; Arrangements for external adjustment of electron- or ion-optical components **[3]**

49/06 . . Electron- or ion-optical arrangements (H01J 49/04 takes precedence) **[3]**

49/08 . . Electron sources, e.g. for generating photo-electrons, secondary electrons or Auger electrons **[3]**

49/10 . . Ion sources; Ion guns **[3]**

49/12 . . . using an arc discharge, e.g. of the duoplasmatron type **[3]**
49/14 . . . using particle bombardment, e.g. ionisation chambers **[3]**
49/16 . . . using surface ionisation, e.g. field-, thermionic- or photo-emission **[3]**
49/18 . . . using spark ionisation **[3]**
49/20 . . Magnetic deflection **[3]**
49/22 . . Electrostatic deflection **[3]**
49/24 . . Vacuum systems, e.g. maintaining desired pressures **[3]**
49/26 . Mass spectrometers or separator tubes (isotope separation using these tubes B01D 59/44; mass spectrometers specially adapted for column chromatography G01N 30/72) **[3]**
49/28 . . Static spectrometers **[3]**
49/30 . . . using magnetic analysers **[3]**
49/32 . . . using double focusing **[3]**
49/34 . . Dynamic spectrometers **[3]**
49/36 . . . Radio frequency spectrometers, e.g. Bennett-type spectrometers, Redhead-type spectrometers **[3]**
49/38 . . . . Omegatrons **[3]**
49/40 . . . Time-of-flight spectrometers (H01J 49/36 takes precedence) **[3]**
49/42 . . . Stability-of-path spectrometers, e.g. monopole, quadrupole, multipole, farvitrons **[3]**
49/44 . Energy spectrometers, e.g. alpha-, beta-spectrometers **[3]**
49/46 . . Static spectrometers **[3]**
49/48 . . . using electrostatic analysers, e.g. cylindrical sector, Wien filter **[3]**

Discharge lamps

61/00 **Gas- or vapour-discharge lamps** (use for sterilising milk products A23C; use for medical purposes A61N 5/00; use for disinfecting water C02F; use for lighting F21; circuits therefor H05B; arc lamps with consumable electrodes H05B; electroluminescent lamps H05B)
61/02 . Details
61/04 . . Electrodes (for igniting H01J 61/54); Screens; Shields
61/06 . . . Main electrodes
61/067 . . . . for low-pressure discharge lamps **[2]**
61/073 . . . . for high-pressure discharge lamps **[2]**
61/09 . . . . Hollow cathodes **[2]**
61/10 . . . Shield, screens, or guides for influencing the discharge
61/12 . . Selection of substances for gas fillings; Specified operating pressure or temperature
61/14 . . . having one or more carbon compounds as the principal constituents
61/16 . . . having helium, argon, neon, krypton, or xenon as the principle constituent
61/18 . . . having a metallic vapour as the principal constituent
61/20 . . . . mercury vapour
61/22 . . . . vapour of an alkali metal
61/24 . . Means for obtaining or maintaining the desired pressure within the vessel
61/26 . . . Means for absorbing or adsorbing gas, e.g. by gettering; Means for preventing blackening of the envelope
61/28 . . . Means for producing, introducing, or replenishing gas or vapour during operation of the lamp
61/30 . . Vessels; Containers
61/32 . . . Special longitudinal shape, e.g. for advertising purposes
61/33 . . . Special shape of cross-section, e.g. for producing cool spot
61/34 . . . Double-wall vessels or containers
61/35 . . . provided with coatings on the walls thereof; Selection of materials for the coatings (using coloured coatings H01J 61/40; using luminescent coatings H01J 61/42)
61/36 . . Seals between parts of vessels; Seals for leading-in conductors; Leading-in conductors
61/38 . . Devices for influencing the colour or wavelength of the light
61/40 . . . by light-filters; by coloured coatings in or on the envelope
61/42 . . . by transforming the wavelength of the light by luminescence
61/44 . . . . Devices characterised by the luminescent material (luminescent materials C09K 11/00)
61/46 . . . . Devices characterised by the binder or other non-luminescent constituent of the luminescent material, e.g. for obtaining desired pouring or drying properties
61/48 . . . . Separate coatings of different luminous materials
61/50 . . Auxiliary parts or solid material within the envelope for reducing risk of explosion upon breakage of the envelope, e.g. for use in mines
61/52 . . Cooling arrangements; Heating arrangements; Means for circulating gas or vapour within the discharge space
61/54 . . Igniting arrangements, e.g. promoting ionisation for starting (circuit arrangements H05B)
61/56 . . One or more circuit elements structurally associated with the lamp
61/58 . Lamps with both liquid anode and liquid cathode
61/60 . Lamps in which the discharge space is substantially filled with mercury before ignition
61/62 . Lamps with gaseous, e.g. plasma cathode
61/64 . Cathode glow lamps (designed as tuning or voltage indicators H01J 17/40)
61/66 . . having one or more specially shaped cathodes, e.g. for advertising purposes
61/68 . Lamps in which the main discharge is between parts of a current-carrying guide, e.g. halo lamp
61/70 . Lamps with low-pressure unconstricted discharge
61/72 . . having a main light-emitting filling of easily vaporisable metal vapour, e.g. mercury
61/74 . . having a main light-emitting filling of difficult vaporisable metal vapour, e.g. sodium
61/76 . . having a filling of permanent gas or gases only
61/78 . . . with cold cathode; with cathode heated only by discharge, e.g. high-tension lamp for advertising
61/80 . . Lamps suitable only for intermittent operation, e.g. flash lamp
61/82 . Lamps with high-pressure unconstricted discharge
61/84 . Lamps with discharge constricted by high pressure
61/86 . . with discharge additionally constricted by close spacing of electrodes, e.g. for optical projection
61/88 . . with discharge additionally constricted by envelope

61/90 . . Lamps suitable only for intermittent operation, e.g. flash lamp
61/92 . Lamps with more than one main discharge path
61/94 . . Paths producing light of different wavelengths, e.g. for simulating daylight
61/95 . Lamps with control electrode for varying intensity or wavelength of the light, e.g. for producing modulated light
61/96 . Lamps with light-emitting discharge path and separately-heated incandescent body within a common envelope, e.g. for simulating daylight (lamps with filament heated only by non-luminous discharge H01K)
61/98 . Lamps with closely spaced electrodes heated to incandescence by light-emitting discharge, e.g. tungsten arc lamp

63/00 Cathode-ray or electron-stream lamps (flying-spot tubes H01J 31/10; magic-eye tuning indicators H01J 31/14; lamps with incandescent body heated by the ray or stream H01K)
63/02 . Details, e.g. electrode, gas filling, shape of vessel
63/04 . . Vessels provided with luminescent coatings; Selection of materials for the coatings
63/06 . Lamps with luminescent screen excited by the ray or stream
63/08 . Lamps with gas plasma excited by the ray or stream

65/00 Lamps without any electrode inside the vessel; **Lamps with at least one main electrode outside the vessel**
65/04 . Lamps in which a gas filling is excited to luminesce by an external electromagnetic field or by external corpuscular radiation, e.g. for indicating
65/06 . Lamps in which a gas filling is excited to luminesce by radioactive material structurally associated with the lamp, e.g. inside the vessel
65/08 . Lamps in which a screen or coating is excited to luminesce by radioactive material located inside the vessel

99/00 Subject matter not provided for in other groups of this subclass [8]

H01K ELECTRIC INCANDESCENT LAMPS (details or apparatus or processes for manufacture applicable to both discharge devices and incandescent lamps H01J; light sources using a combination of incandescent and other types of light generation H01J 61/96, H05B 35/00; circuits therefor H05B)

Note

In this subclass, the following term is used with the meaning indicated:
– "lamp" includes tubes emitting ultra-violet or infra-red light.

Subclass index

1/00 Details
1/02 . Incandescent bodies
1/04 . . characterised by the material thereof
1/06 . . . Carbon bodies
1/08 . . . Metallic bodies
1/10 . . . Bodies of metal or carbon combined with other substance
1/12 . . . Bodies which are non-conductive when cold, e.g. for Nernst lamp
1/14 . . characterised by the shape
1/16 . . Electric connection thereto
1/18 . Mountings or supports for the incandescent body
1/20 . . characterised by the material thereof
1/22 . . Lamp stems (seals for leading conductors therethrough H01K 1/38)
1/24 . . Mounts for lamps with connections at opposite ends, e.g. for tubular lamp
1/26 . Screens; Filters (associated with envelope H01K 1/28)
1/28 . Envelopes; Vessels
1/30 . . incorporating lenses
1/32 . . provided with coatings on the walls; Vessels or coatings thereon characterised by the material thereof
1/34 . . Double-wall vessels
1/36 . Seals between parts of vessel, e.g. between stem and envelope
1/38 . Seals for leading-in conductors
1/40 . Leading-in conductors
1/42 . Means forming part of the lamp for the purpose of providing electrical connection to, or support for, the lamp (electric coupling devices comprising a holder adapted for supporting a lamp and not forming part of the lamp H01R 33/00)
1/44 . . directly applied to, or forming part of, the vessel
1/46 . . supported by a separate part, e.g. base, cap
1/48 . . . Removable caps
1/50 . Selection of substances for gas fillings; Specified pressure thereof
1/52 . Means for obtaining or maintaining the desired pressure within the vessel

1/54 . . Means for adsorbing or absorbing gas, or for preventing or removing efflorescence, e.g. by gettering

1/56 . . . characterised by the material of the getter

1/58 . Cooling arrangements

1/60 . Means structurally associated with the lamp for indicating defects or previous use

1/62 . One or more circuit elements structurally associated with the lamp

1/64 . . with built-in switch

1/66 . . with built-in fuse

1/68 . . with built-in spark gap

1/70 . . with built-in short-circuiting device, e.g. for serially-connected lamps

3/00 Apparatus or processes adapted to the manufacture, installing, removal, or maintenance of incandescent lamps or parts thereof (manufacture of vessels from glass C03B)

3/02 . Manufacture of incandescent bodies

3/04 . . Machines therefor

3/06 . Attaching of incandescent bodies to mount

3/08 . Manufacture of mounts or stems

3/10 . . Machines therefor

3/12 . Joining of mount or stem to vessel; Joining parts of the vessel, e.g. by butt sealing

3/14 . . Machines therefor

3/16 . Joining of caps to vessel

3/18 . . Machines therefor

3/20 . Sealing-in wires directly into the envelope

3/22 . Exhausting, degassing, filling, or cleaning vessels

3/24 . . Machines therefor

3/26 . Closing of vessels

3/28 . Machines having sequentially arranged operating stations

3/30 . Repairing or regenerating used or defective lamps

3/32 . Auxiliary devices for cleaning, placing, or removing incandescent lamps

5/00 Lamps for general lighting (H01K 9/00 to H01K 13/00 take precedence)

5/02 . with connections made at opposite ends, e.g. tubular lamp with axially arranged filament

7/00 Lamps for purposes other than general lighting (H01K 9/00 to H01K 13/00 take precedence)

7/02 . for producing a narrow beam of light; for approximating a point-like source of light, e.g. for searchlight, for cinematographic projector (producing narrow beams by optical means external to lamp F21V)

7/04 . for indicating

7/06 . for decorative purposes

9/00 Lamps having two or more incandescent bodies separately heated (H01K 11/00, H01K 13/00 take precedence; incandescent-filament-type indicating arrangements affected by the combination of a number of individual lamps G09F 9/307)

9/02 . to provide substitution in the event of failure of one of the bodies

9/04 . . with built-in manually-operated switch

9/06 . . with built-in device, e.g. switch, for automatically completing circuit of reserve body

9/08 . to provide selectively different light effects, e.g. for automobile headlamp

11/00 Lamps having an incandescent body which is not conductively heated, e.g. heated inductively, heated by electronic discharge (H01K 13/00 takes precedence; heated by light-emitting discharge H01J 61/98)

13/00 Lamps having an incandescent body which is substantially non-conductive until heated, e.g. Nernst lamp

13/02 . Heating arrangements

13/04 . . using electric discharge

13/06 . . using induction heating; using high-frequency field

---

H01L SEMICONDUCTOR DEVICES; **ELECTRIC SOLID STATE DEVICES NOT OTHERWISE PROVIDED FOR** (use of semiconductor devices for measuring G01; resistors in general H01C; magnets, inductors, transformers H01F; capacitors in general H01G; electrolytic devices H01G 9/00; batteries, accumulators H01M; waveguides, resonators, or lines of the waveguide type H01P; line connectors, current collectors H01R; stimulated-emission devices H01S; electromechanical resonators H03H; loudspeakers, microphones, gramophone pick-ups or like acoustic electromechanical transducers H04R; electric light sources in general H05B; printed circuits, hybrid circuits, casings or constructional details of electrical apparatus, manufacture of assemblages of electrical components H05K; use of semiconductor devices in circuits having a particular application, see the subclass for the application) **[2]**

(1) This subclass covers:
- electric solid state devices which are not covered by any other subclass and details thereof, and includes: semiconductor devices adapted for rectifying, amplifying, oscillating or switching; semiconductor devices sensitive to radiation; electric solid state devices using thermoelectric, superconductive, piezo-electric, electrostrictive, magnetostrictive, galvano-magnetic or bulk negative resistance effects and integrated circuit devices; **[2]**
- photoresistors, magnetic field dependent resistors, field effect resistors, capacitors with potential-jump barrier, resistors with potential-jump barrier or surface barrier, incoherent light emitting diodes and thin-film or thick-film circuits; **[2]**
- processes and apparatus adapted for the manufacture or treatment of such devices, except where such processes relate to single-step processes for which provision exists elsewhere. **[2]**

(2) In this subclass, the following terms or expressions are used with the meaning indicated:
- "wafer" means a slice of semiconductor or crystalline substrate material, which can be modified by impurity diffusion (doping), ion implantation or epitaxy, and whose active surface can be processed into arrays of discrete components or integrated circuits; **[8]**

– "solid state body" means the body of material within which, or at the surface of which, the physical effects characteristic of the device occur. In thermoelectric devices, it includes all materials in the current path.

Regions in or on the body of the device (other than the solid state body itself), which exert an influence on the solid state body electrically, are considered to be "electrodes" whether or not an external electrical connection is made thereto. An electrode may include several portions and the term includes metallic regions which exert influence on the solid state body through an insulating region (e.g. capacitive coupling) and inductive coupling arrangements to the body. The dielectric region in a capacitive arrangement is regarded as part of the electrode. In arrangements including several portions, only those portions which exert an influence on the solid state body by virtue of their shape, size, or disposition or the material of which they are formed are considered to be part of the electrode. The other portions are considered to be "arrangements for conducting electric current to or from the solid state body" or "interconnections between solid state components formed in or on a common substrate", i.e. leads; **[2]**

- "device" means an electric circuit element; where an electric circuit element is one of a plurality of elements formed in or on a common substrate it is referred to as a "component"; **[2]**
- "complete device" is a device in its fully assembled state which may or may not require further treatment, e.g. electroforming, before it is ready for use but which does not require the addition of further structural units; **[2]**
- "parts" includes all structural units which are included in a complete device; **[2]**
- "container" is an enclosure forming part of the complete device and is essentially a solid construction in which the body of the device is placed, or which is formed around the body without forming an intimate layer thereon. An enclosure which consists of one or more layers formed on the body and in intimate contact therewith is referred to as an "encapsulation"; **[2]**
- "integrated circuit" is a device where all components, e.g. diodes, resistors, are built up on a common substrate and form the device including interconnections between the components; **[2]**
- "assembly" of a device is the building up of the device from its component constructional units and includes the provision of fillings in containers. **[2]**

(3) In this subclass, both the process or apparatus for the manufacture or treatment of a device and the device itself are classified, whenever both of these are described sufficiently to be of interest. **[6]**

(4) Attention is drawn to Note (3) after the title of section C, which Note indicates to which version of the periodic table of chemical elements the IPC refers. **[2010.01]**

Subclass index

21/00 Processes or apparatus specially adapted for the manufacture or treatment of semiconductor or solid state devices or of parts thereof [2,8]

Note

Group H01L 21/70 takes precedence over groups H01L 21/02 to H01L 21/67. **[2]**

21/02 . Manufacture or treatment of semiconductor devices or of parts thereof **[2,8]**

21/027 . . Making masks on semiconductor bodies for further photolithographic processing, not provided for in group H01L 21/18 or H01L 21/34 **[5]**

21/033 . . . comprising inorganic layers **[5]**

21/04 . . the devices having at least one potential-jump barrier or surface barrier, e.g. PN junction, depletion layer, carrier concentration layer **[2]**

21/06 . . . the devices having semiconductor bodies comprising selenium or tellurium in uncombined form other than as impurities in semiconductor bodies of other materials **[2]**

21/08 . . . . Preparation of the foundation plate **[2]**

21/10 . . . . Preliminary treatment of the selenium or tellurium, its application to the foundation plate, or the subsequent treatment of the combination **[2]**

21/103 . . . . . Conversion of the selenium or tellurium to the conductive state **[2]**

21/105 . . . . . Treatment of the surface of the selenium or tellurium layer after having been made conductive **[2]**

21/108 . . . . . Provision of discrete insulating layers, i.e. non-genetic barrier layers **[2]**

21/12 . . . . Application of an electrode to the exposed surface of the selenium or tellurium after the selenium or tellurium has been applied to the foundation plate **[2]**

21/14 . . . . Treatment of the complete device, e.g. by electroforming to form a barrier **[2]**

21/145 . . . . . Ageing **[2]**

21/16 . . . the devices having semiconductor bodies comprising cuprous oxide or cuprous iodide **[2]**

21/18 . . . the devices having semiconductor bodies comprising elements of the fourth group of the Periodic System or $A_{III}B_V$ compounds with or without impurities, e.g. doping materials **[2,6,7]**

Note

This group covers also processes and apparatus which, by using the appropriate technology, are clearly suitable for manufacture or treatment of devices whose bodies comprise elements of the fourth group of the Periodic System or $A_{III}B_V$ compounds, even if the material used is not explicitly specified. **[7]**

21/20 . . . . Deposition of semiconductor materials on a substrate, e.g. epitaxial growth **[2]**
21/203 . . . . . using physical deposition, e.g. vacuum deposition, sputtering **[2]**
21/205 . . . . . using reduction or decomposition of a gaseous compound yielding a solid condensate, i.e. chemical deposition **[2]**
21/208 . . . . . using liquid deposition **[2]**
21/22 . . . . Diffusion of impurity materials, e.g. doping materials, electrode materials, into, or out of, a semiconductor body, or between semiconductor regions; Redistribution of impurity materials, e.g. without introduction or removal of further dopant **[2]**
21/223 . . . . . using diffusion into, or out of, a solid from or into a gaseous phase **[2]**
21/225 . . . . . using diffusion into, or out of, a solid from or into a solid phase, e.g. a doped oxide layer **[2]**
21/228 . . . . . using diffusion into, or out of, a solid from or into a liquid phase, e.g. alloy diffusion processes **[2]**
21/24 . . . . Alloying of impurity materials, e.g. doping materials, electrode materials, with a semiconductor body **[2]**
21/26 . . . . Bombardment with wave or particle radiation **[2]**
21/261 . . . . . to produce a nuclear reaction transmuting chemical elements **[6]**
21/263 . . . . . with high-energy radiation (H01L 21/261 takes precedence) **[2,6]**
21/265 . . . . . producing ion implantation **[2]**
21/266 . . . . . using masks **[5]**
21/268 . . . . . using electromagnetic radiation, e.g. laser radiation **[2]**
21/28 . . . . Manufacture of electrodes on semiconductor bodies using processes or apparatus not provided for in groups H01L 21/20 to H01L 21/268 **[2]**
21/283 . . . . . Deposition of conductive or insulating materials for electrodes **[2]**
21/285 . . . . . from a gas or vapour, e.g. condensation **[2]**
21/288 . . . . . from a liquid, e.g. electrolytic deposition **[2]**
21/30 . . . . Treatment of semiconductor bodies using processes or apparatus not provided for in groups H01L 21/20 to H01L 21/26 (manufacture of electrodes thereon H01L 21/28) **[2]**
21/301 . . . . . to subdivide a semiconductor body into separate parts, e.g. making partitions (cutting H01L 21/304) **[6]**
21/302 . . . . . to change the physical characteristics of their surfaces, or to change their shape, e.g. etching, polishing, cutting **[2]**
21/304 . . . . . Mechanical treatment, e.g. grinding, polishing, cutting **[2]**
21/306 . . . . . Chemical or electrical treatment, e.g. electrolytic etching (to form insulating layers H01L 21/31; after-treatment of insulating layers H01L 21/3105) **[2]**
21/3063 . . . . . Electrolytic etching **[6]**
21/3065 . . . . . Plasma etching; Reactive-ion etching **[6]**
21/308 . . . . . using masks (H01L 21/3063, H01L 21/3065, take precedence) **[2,6]**
21/31 . . . . to form insulating layers thereon, e.g. for masking or by using photolithographic techniques (encapsulating layers H01L 21/56); After-treatment of these layers; Selection of materials for these layers **[2,5]**
21/3105 . . . . . After-treatment **[5]**
21/311 . . . . . Etching the insulating layers **[5]**
21/3115 . . . . . Doping the insulating layers **[5]**
21/312 . . . . . Organic layers, e.g. photoresist (H01L 21/3105, H01L 21/32 take precedence) **[2,5]**
21/314 . . . . . Inorganic layers (H01L 21/3105, H01L 21/32 take precedence) **[2,5]**
21/316 . . . . . composed of oxides or glassy oxides or oxide-based glass **[2]**
21/318 . . . . . composed of nitrides **[2]**
21/32 . . . . . using masks **[2,5]**
21/3205 . . . . . Deposition of non-insulating-, e.g. conductive- or resistive-, layers, on insulating layers; After-treatment of these layers (manufacture of electrodes H01L 21/28) **[5]**
21/321 . . . . . After-treatment **[5]**
21/3213 . . . . . Physical or chemical etching of the layers, e.g. to produce a patterned layer from a pre-deposited extensive layer **[6]**
21/3215 . . . . . Doping the layers **[5]**
21/322 . . . . . to modify their internal properties, e.g. to produce internal imperfections **[2]**
21/324 . . . . . Thermal treatment for modifying the properties of semiconductor bodies, e.g. annealing, sintering (H01L 21/20 to H01L 21/288, H01L 21/302 to H01L 21/322 take precedence) **[2]**
21/326 . . . . . Application of electric currents or fields, e.g. for electroforming (H01L 21/20 to H01L 21/288, H01L 21/302 to H01L 21/324 take precedence) **[2]**
21/328 . . . . Multistep processes for the manufacture of devices of the bipolar type, e.g. diodes, transistors, thyristors **[5]**
21/329 . . . . . the devices comprising one or two electrodes, e.g. diodes **[5]**
21/33 . . . . . the devices comprising three or more electrodes **[5]**
21/331 . . . . . Transistors **[5]**
21/332 . . . . . Thyristors **[5]**
21/334 . . . . Multistep processes for the manufacture of devices of the unipolar type **[5]**

21/335 . . . . . Field-effect transistors **[5]**
21/336 . . . . . with an insulated gate **[5]**
21/337 . . . . . with a PN junction gate **[5]**
21/338 . . . . . with a Schottky gate **[5]**
21/339 . . . . . Charge transfer devices **[5,6]**
21/34 . . . the devices having semiconductor bodies not provided for in groups H01L 21/06, H01L 21/16, and H01L 21/18 with or without impurities, e.g. doping materials **[2]**
21/36 . . . . Deposition of semiconductor materials on a substrate, e.g. epitaxial growth **[2]**
21/363 . . . . . using physical deposition, e.g. vacuum deposition, sputtering **[2]**
21/365 . . . . . using reduction or decomposition of a gaseous compound yielding a solid condensate, i.e. chemical deposition **[2]**
21/368 . . . . . using liquid deposition **[2]**
21/38 . . . . Diffusion of impurity materials, e.g. doping materials, electrode materials, into, or out of, a semiconductor body, or between semiconductor regions **[2]**
21/383 . . . . . using diffusion into, or out of, a solid from or into a gaseous phase **[2]**
21/385 . . . . . using diffusion into, or out of, a solid from or into a solid phase, e.g. a doped oxide layer **[2]**
21/388 . . . . . using diffusion into, or out of, a solid from or into a liquid phase, e.g. alloy diffusion processes **[2]**
21/40 . . . . Alloying of impurity materials, e.g. doping materials, electrode materials, with a semiconductor body **[2]**
21/42 . . . . Bombardment with radiation **[2]**
21/423 . . . . . with high-energy radiation **[2]**
21/425 . . . . . producing ion implantation **[2]**
21/426 . . . . . using masks **[5]**
21/428 . . . . . using electromagnetic radiation, e.g. laser radiation **[2]**
21/44 . . . . Manufacture of electrodes on semiconductor bodies using processes or apparatus not provided for in groups H01L 21/36 to H01L 21/428 **[2]**
21/441 . . . . . Deposition of conductive or insulating materials for electrodes **[2]**
21/443 . . . . . from a gas or vapour, e.g. condensation **[2]**
21/445 . . . . . from a liquid, e.g. electrolytic deposition **[2]**
21/447 . . . . . involving the application of pressure, e.g. thermo-compression bonding (H01L 21/607 takes precedence) **[2]**
21/449 . . . . . involving the application of mechanical vibrations, e.g. ultrasonic vibrations **[2]**
21/46 . . . . Treatment of semiconductor bodies using processes or apparatus not provided for in groups H01L 21/36 to H01L 21/428 (manufacture of electrodes thereon H01L 21/44) **[2]**
21/461 . . . . . to change their surface-physical characteristics or shape, e.g. etching, polishing, cutting **[2]**
21/463 . . . . . Mechanical treatment, e.g. grinding, ultrasonic treatment **[2]**
21/465 . . . . . Chemical or electrical treatment, e.g. electrolytic etching (to form insulating layers H01L 21/469) **[2]**
21/467 . . . . . using masks **[2]**
21/469 . . . . . to form insulating layers thereon, e.g. for masking or by using photolithographic techniques (encapsulating layers H01L 21/56); After-treatment of these layers **[2,5]**
21/47 . . . . . Organic layers, e.g. photoresist (H01L 21/475, H01L 21/4757 take precedence) **[2,5]**
21/471 . . . . . Inorganic layers (H01L 21/475, H01L 21/4757 take precedence) **[2,5]**
21/473 . . . . . composed of oxides or glassy oxides or oxide-based glass **[2]**
21/475 . . . . . using masks **[2,5]**
21/4757 . . . . . After-treatment **[5]**
21/4763 . . . . . Deposition of non-insulating-, e.g. conductive-, resistive-, layers on insulating layers; After-treatment of these layers (manufacture of electrodes H01L 21/28) **[5]**
21/477 . . . . . Thermal treatment for modifying the properties of semiconductor bodies, e.g. annealing, sintering (H01L 21/36 to H01L 21/449, H01L 21/461 to H01L 21/475 take precedence) **[2]**
21/479 . . . . . Application of electric currents or fields, e.g. for electroforming (H01L 21/36 to H01L 21/449, H01L 21/461 to H01L 21/477 take precedence) **[2]**
21/48 . . . Manufacture or treatment of parts, e.g. containers, prior to assembly of the devices, using processes not provided for in a single one of the groups H01L 21/06 to H01L 21/326 **[2]**
21/50 . . . Assembly of semiconductor devices using processes or apparatus not provided for in a single one of the groups H01L 21/06 to H01L 21/326 **[2]**
21/52 . . . . Mounting semiconductor bodies in containers **[2]**
21/54 . . . . Providing fillings in containers, e.g. gas fillings **[2]**
21/56 . . . . Encapsulations, e.g. encapsulating layers, coatings **[2]**
21/58 . . . . Mounting semiconductor devices on supports **[2]**
21/60 . . . . Attaching leads or other conductive members, to be used for carrying current to or from the device in operation **[2]**
21/603 . . . . . involving the application of pressure, e.g. thermo-compression bonding (H01L 21/607 takes precedence) **[2]**
21/607 . . . . . involving the application of mechanical vibrations, e.g. ultrasonic vibrations **[2]**
21/62 . . the devices having no potential-jump barriers or surface barriers **[2]**
21/64 . Manufacture or treatment of solid state devices other than semiconductor devices, or of parts thereof, not specially adapted for a single type of device provided for in groups H01L 31/00 to H01L 51/00 **[2,8]**
21/66 . Testing or measuring during manufacture or treatment **[2]**
21/67 . Apparatus specially adapted for handling semiconductor or electric solid state devices during manufacture or treatment thereof; Apparatus specially adapted for handling wafers during manufacture or treatment of semiconductor or electric solid state devices or components **[8]**

21/673 . . using specially adapted carriers **[8]**
21/677 . . for conveying, e.g. between different work stations **[8]**
21/68 . . for positioning, orientation or alignment **[2,8]**
21/683 . . for supporting or gripping (for positioning, orientation or alignment H01L 21/68) **[8]**
21/687 . . . using mechanical means, e.g. chucks, clamps or pinches **[8]**
21/70 . Manufacture or treatment of devices consisting of a plurality of solid state components or integrated circuits formed in or on a common substrate or of specific parts thereof; Manufacture of integrated circuit devices or of specific parts thereof (manufacture of assemblies consisting of preformed electrical components H05K 3/00, H05K 13/00) **[2]**
21/71 . . Manufacture of specific parts of devices defined in group H01L 21/70 (H01L 21/28, H01L 21/44, H01L 21/48 take precedence) **[6]**
21/74 . . . Making of buried regions of high impurity concentration, e.g. buried collector layers, internal connections **[2]**
21/76 . . . Making of isolation regions between components **[2]**
21/761 . . . . PN junctions **[6]**
21/762 . . . . Dielectric regions **[6]**
21/763 . . . . Polycrystalline semiconductor regions **[6]**
21/764 . . . . Air gaps **[6]**
21/765 . . . . by field-effect **[6]**
21/768 . . . Applying interconnections to be used for carrying current between separate components within a device **[6]**
21/77 . . Manufacture or treatment of devices consisting of a plurality of solid state components or integrated circuits formed in, or on, a common substrate **[6]**
21/78 . . . with subsequent division of the substrate into plural individual devices (cutting to change the surface-physical characteristics or shape of semiconductor bodies H01L 21/304) **[2,6]**
21/782 . . . . to produce devices, each consisting of a single circuit element (H01L 21/82 takes precedence) **[6]**
21/784 . . . . . the substrate being a semiconductor body **[6]**
21/786 . . . . . the substrate being other than a semiconductor body, e.g. insulating body **[6]**
21/82 . . . . to produce devices, e.g. integrated circuits, each consisting of a plurality of components **[2]**
21/822 . . . . . the substrate being a semiconductor, using silicon technology (H01L 21/8258 takes precedence) **[6]**
21/8222 . . . . . Bipolar technology **[6]**
21/8224 . . . . . comprising a combination of vertical and lateral transistors **[6]**
21/8226 . . . . . comprising merged transistor logic or integrated injection logic **[6]**
21/8228 . . . . . Complementary devices, e.g. complementary transistors **[6]**
21/8229 . . . . . Memory structures **[6]**
21/8232 . . . . . Field-effect technology **[6]**
21/8234 . . . . . MIS technology **[6]**
21/8236 . . . . . Combination of enhancement and depletion transistors **[6]**
21/8238 . . . . . Complementary field-effect transistors, e.g. CMOS **[6]**
21/8239 . . . . . Memory structures **[6]**
21/8242 . . . . . Dynamic random access memory structures (DRAM) **[6]**
21/8244 . . . . . Static random access memory structures (SRAM) **[6]**
21/8246 . . . . . Read-only memory structures (ROM) **[6]**
21/8247 . . . . . electrically-programmable (EPROM) **[6]**
21/8248 . . . . . Combination of bipolar and field-effect technology **[6]**
21/8249 . . . . . Bipolar and MOS technology **[6]**
21/8252 . . . . the substrate being a semiconductor, using III-V technology (H01L 21/8258 takes precedence) **[6]**
21/8254 . . . . the substrate being a semiconductor, using II-VI technology (H01L 21/8258 takes precedence) **[6]**
21/8256 . . . . the substrate being a semiconductor, using technologies not covered by one of groups H01L 21/822, H01L 21/8252 or H01L 21/8254 (H01L 21/8258 takes precedence) **[6]**
21/8258 . . . . the substrate being a semiconductor, using a combination of technologies covered by H01L 21/822, H01L 21/8252, H01L 21/8254 or H01L 21/8256 **[6]**
21/84 . . . . the substrate being other than a semiconductor body, e.g. being an insulating body **[2,6]**
21/86 . . . . . the insulating body being sapphire, e.g. silicon on sapphire structure, i.e. SOS **[2,6]**
21/98 . . Assembly of devices consisting of solid state components formed in or on a common substrate; Assembly of integrated circuit devices (H01L 21/50 takes precedence) **[2,5]**

23/00 Details of semiconductor or other solid state devices (H01L 25/00 takes precedence) **[2,5]**

Note

This group does not cover:
– details of semiconductor bodies or of electrodes of devices provided for in group H01L 29/00, which details are covered by that group;
– details peculiar to devices provided for in a single main group of groups H01L 31/00 to H01L 51/00, which details are covered by those groups.

23/02 . Containers; Seals (H01L 23/12, H01L 23/34, H01L 23/48, H01L 23/552 take precedence) **[2,5]**
23/04 . . characterised by the shape **[2]**
23/043 . . . the container being a hollow construction and having a conductive base as a mounting as well as a lead for the semiconductor body **[5]**
23/045 . . . . the other leads having an insulating passage through the base **[5]**
23/047 . . . . the other leads being parallel to the base **[5]**
23/049 . . . . the other leads being perpendicular to the base **[5]**
23/051 . . . . another lead being formed by a cover plate parallel to the base plate, e.g. sandwich type **[5]**
23/053 . . . the container being a hollow construction and having an insulating base as a mounting for the semiconductor body **[5]**

23/055 . . . . the leads having a passage through the base **[5]**
23/057 . . . . the leads being parallel to the base **[5]**
23/06 . . characterised by the material of the container or its electrical properties **[2]**
23/08 . . . the material being an electrical insulator, e.g. glass **[2]**
23/10 . . characterised by the material or arrangement of seals between parts, e.g. between cap and base of the container or between leads and walls of the container **[2]**
23/12 . Mountings, e.g. non-detachable insulating substrates **[2]**
23/13 . . characterised by the shape **[5]**
23/14 . . characterised by the material or its electrical properties **[2]**
23/15 . . . Ceramic or glass substrates **[5]**
23/16 . Fillings or auxiliary members in containers, e.g. centering rings (H01L 23/42, H01L 23/552 take precedence) **[2,5]**
23/18 . . Fillings characterised by the material, its physical or chemical properties, or its arrangement within the complete device **[2]**

Note

Group H01L 23/26 takes precedence over groups H01L 23/20 to H01L 23/24. **[2]**

23/20 . . . gaseous at the normal operating temperature of the device **[2]**
23/22 . . . liquid at the normal operating temperature of the device **[2]**
23/24 . . . solid or gel, at the normal operating temperature of the device **[2]**
23/26 . . . including materials for absorbing or reacting with moisture or other undesired substances **[2]**
23/28 . Encapsulation, e.g. encapsulating layers, coatings (H01L 23/552 takes precedence) **[2,5]**
23/29 . . characterised by the material **[5]**
23/31 . . characterised by the arrangement **[5]**
23/32 . Holders for supporting the complete device in operation, i.e. detachable fixtures (H01L 23/40 takes precedence) **[2,5]**
23/34 . Arrangements for cooling, heating, ventilating or temperature compensation **[2,5]**
23/36 . . Selection of materials, or shaping, to facilitate cooling or heating, e.g. heat sinks **[2]**
23/367 . . . Cooling facilitated by shape of device **[5]**
23/373 . . . Cooling facilitated by selection of materials for the device **[5]**
23/38 . . Cooling arrangements using the Peltier effect **[2]**
23/40 . . Mountings or securing means for detachable cooling or heating arrangements **[2]**
23/42 . . Fillings or auxiliary members in containers selected or arranged to facilitate heating or cooling **[2,5]**
23/427 . . . Cooling by change of state, e.g. use of heat pipes **[5]**
23/433 . . . Auxiliary members characterised by their shape, e.g. pistons **[5]**
23/44 . . the complete device being wholly immersed in a fluid other than air (H01L 23/427 takes precedence) **[2,5]**
23/46 . . involving the transfer of heat by flowing fluids (H01L 23/42, H01L 23/44 take precedence) **[2]**
23/467 . . . by flowing gases, e.g. air **[5]**
23/473 . . . by flowing liquids **[5]**
23/48 . Arrangements for conducting electric current to or from the solid state body in operation, e.g. leads or terminal arrangements **[2]**
23/482 . . consisting of lead-in layers inseparably applied to the semiconductor body **[5]**
23/485 . . . consisting of layered constructions comprising conductive layers and insulating layers, e.g. planar contacts **[5]**
23/488 . . consisting of soldered or bonded constructions **[5,8]**
23/49 . . . wire-like **[5]**
23/492 . . . Bases or plates **[5]**
23/495 . . . Lead-frames **[5]**
23/498 . . . Leads on insulating substrates **[5]**
23/50 . . for integrated circuit devices (H01L 23/482 to H01L 23/498 take precedence) **[2,5]**
23/52 . Arrangements for conducting electric current within the device in operation from one component to another **[2]**
23/522 . . including external interconnections consisting of a multilayer structure of conductive and insulating layers inseparably formed on the semiconductor body **[5]**
23/525 . . . with adaptable interconnections **[5]**
23/528 . . . Layout of the interconnection structure **[5]**
23/532 . . . characterised by the materials **[5]**
23/535 . . including internal interconnections, e.g. cross-under constructions **[5]**
23/538 . . the interconnection structure between a plurality of semiconductor chips being formed on, or in, insulating substrates **[5]**
23/544 . Marks applied to semiconductor devices, e.g. registration marks, test patterns **[5]**
23/552 . Protection against radiation, e.g. light **[5]**
23/556 . . against alpha rays **[5]**
23/58 . Structural electrical arrangements for semiconductor devices not otherwise provided for **[5]**
23/60 . . Protection against electrostatic charges or discharges, e.g. Faraday shields **[5]**
23/62 . . Protection against overcurrent or overload, e.g. fuses, shunts **[5]**
23/64 . . Impedance arrangements **[5]**
23/66 . . . High-frequency adaptations **[5]**

25/00 Assemblies consisting of a plurality of individual semiconductor or other solid state devices (devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00; assemblies of photoelectronic cells H01L 31/042) **[2,5]**
25/03 . all the devices being of a type provided for in the same subgroup of groups H01L 27/00 to H01L 51/00, e.g. assemblies of rectifier diodes **[5,8]**
25/04 . . the devices not having separate containers **[2]**
25/065 . . . the devices being of a type provided for in group H01L 27/00 **[5]**
25/07 . . . the devices being of a type provided for in group H01L 29/00 **[5]**
25/075 . . . the devices being of a type provided for in group H01L 33/00 **[5]**
25/10 . . the devices having separate containers **[2]**
25/11 . . . the devices being of a type provided for in group H01L 29/00 **[5]**
25/13 . . . the devices being of a type provided for in group H01L 33/00 **[5]**

25/16 . the devices being of types provided for in two or more different main groups of groups H01L 27/00 to H01L 51/00, e.g. forming hybrid circuits **[2,8]**

25/18 . the devices being of types provided for in two or more different subgroups of the same main group of groups H01L 27/00 to H01L 51/00 **[5,8]**

27/00 Devices consisting of a plurality of semiconductor or other solid-state components formed in or on a common substrate (details thereof H01L 23/00, H01L 29/00 to H01L 51/00; assemblies consisting of a plurality of individual solid state devices H01L 25/00) **[2,8]**

Note

In groups H01L 27/01 to H01L 27/28, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[2]**

27/01 . comprising only passive thin-film or thick-film elements formed on a common insulating substrate **[3]**

27/02 . including semiconductor components specially adapted for rectifying, oscillating, amplifying or switching and having at least one potential-jump barrier or surface barrier; including integrated passive circuit elements with at least one potential-jump barrier or surface barrier **[2]**

27/04 . . the substrate being a semiconductor body **[2]**

27/06 . . . including a plurality of individual components in a non-repetitive configuration **[2]**

27/07 . . . . the components having an active region in common **[5]**

27/08 . . . including only semiconductor components of a single kind **[2]**

27/082 . . . . including bipolar components only **[5]**

27/085 . . . . including field-effect components only **[5]**

27/088 . . . . . the components being field-effect transistors with insulated gate **[5]**

27/092 . . . . . . complementary MIS field-effect transistors **[5]**

27/095 . . . . . the components being Schottky barrier gate field-effect transistors **[5]**

27/098 . . . . . the components being PN junction gate field-effect transistors **[5]**

27/10 . . . including a plurality of individual components in a repetitive configuration **[2]**

27/102 . . . . including bipolar components **[5]**

27/105 . . . . including field-effect components **[5]**

27/108 . . . . . Dynamic random access memory structures **[5]**

27/11 . . . . . Static random access memory structures **[5]**

27/112 . . . . . Read-only memory structures **[5]**

27/115 . . . . . Electrically programmable read-only memories **[5]**

27/118 . . . . Masterslice integrated circuits **[5]**

27/12 . . the substrate being other than a semiconductor body, e.g. an insulating body **[2]**

27/13 . . . combined with thin-film or thick-film passive components **[3]**

27/14 . including semiconductor components sensitive to infra-red radiation, light, electromagnetic radiation of shorter wavelength or corpuscular radiation and specially adapted either for the conversion of the energy of such radiation into electrical energy or for the control of electrical energy by such radiation (radiation-sensitive components structurally associated with one or more electric light sources only H01L 31/14; couplings of light guides with optoelectronic elements G02B 6/42) **[2]**

27/142 . . Energy conversion devices **[5]**

27/144 . . Devices controlled by radiation **[5]**

27/146 . . . Imager structures **[5]**

27/148 . . . . Charge coupled imagers **[5]**

27/15 . including semiconductor components with at least one potential-jump barrier or surface barrier, specially adapted for light emission **[2]**

27/16 . including thermoelectric components with or without a junction of dissimilar materials; including thermomagnetic components (using the Peltier effect only for cooling of semiconductor or other solid state devices H01L 23/38) **[2]**

27/18 . including components exhibiting superconductivity **[2]**

27/20 . including piezo-electric components; including electrostrictive components; including magnetostrictive components **[2,7]**

27/22 . including components using galvano-magnetic effects, e.g. Hall effect; using similar magnetic field effects **[2]**

27/24 . including solid state components for rectifying, amplifying, or switching without a potential-jump barrier or surface barrier **[2]**

27/26 . including bulk negative resistance effect components **[2]**

27/28 . including components using organic materials as the active part, or using a combination of organic materials with other materials as the active part **[8]**

27/30 . . with components specially adapted for sensing infra-red radiation, light, electromagnetic radiation of shorter wavelength, or corpuscular radiation; with components specially adapted for either the conversion of the energy of such radiation into electrical energy or for the control of electrical energy by such radiation **[8]**

27/32 . . with components specially adapted for light emission, e.g. flat-panel displays using organic light-emitting diodes **[8]**

29/00 Semiconductor devices specially adapted for rectifying, amplifying, oscillating or switching and having at least one potential-jump barrier or surface barrier; **Capacitors or resistors with at least one potential-jump barrier or surface barrier, e.g.** PN-**junction depletion layer or carrier concentration layer**; **Details of semiconductor bodies or of electrodes thereof** (H01L 31/00 to H01L 47/00, H01L 51/05 take precedence; details other than of semiconductor bodies or of electrodes thereof H01L 23/00; devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00) **[2,6]**

Note

In this main group, classification is made in all of groups H01L 29/02, H01L 29/40 and H01L 29/66 if all of these groups are relevant. **[2]**

29/02 . Semiconductor bodies **[2]**
29/04 . . characterised by their crystalline structure, e.g. polycrystalline, cubic or particular orientation of crystalline planes (characterized by physical imperfections H01L 29/30) **[2]**
29/06 . . characterised by their shape; characterised by the shapes, relative sizes, or dispositions of the semiconductor regions **[2]**
29/08 . . . with semiconductor regions connected to an electrode carrying current to be rectified, amplified, or switched and such electrode being part of a semiconductor device which comprises three or more electrodes **[2]**
29/10 . . . with semiconductor regions connected to an electrode not carrying current to be rectified, amplified, or switched and such electrode being part of a semiconductor device which comprises three or more electrodes **[2]**
29/12 . . characterised by the materials of which they are formed **[2]**
29/15 . . . Structures with periodic or quasi periodic potential variation, e.g. multiple quantum wells, superlattices (such structures applied for the control of light G02F 1/017, applied in semiconductor lasers H01S 5/34) **[6]**

Note

Group H01L 29/15 takes precedence over groups H01L 29/16 to H01L 29/26. **[6]**

29/16 . . . including, apart from doping materials or other impurities, only elements of the fourth group of the Periodic System in uncombined form **[2]**
29/161 . . . . including two or more of the elements provided for in group H01L 29/16 **[2]**
29/165 . . . . . in different semiconductor regions **[2]**
29/167 . . . . further characterised by the doping material **[2]**
29/18 . . . Selenium or tellurium only, apart from doping materials or other impurities **[2]**
29/20 . . . including, apart from doping materials or other impurities, only $A_{III}B_{V}$ compounds **[2,6]**
29/201 . . . . including two or more compounds **[2]**
29/205 . . . . . in different semiconductor regions **[2]**
29/207 . . . . further characterised by the doping material **[2]**
29/22 . . . including, apart from doping materials or other impurities, only $A_{II}B_{VI}$ compounds **[2]**
29/221 . . . . including two or more compounds **[2]**
29/225 . . . . . in different semiconductor regions **[2]**
29/227 . . . . further characterised by the doping material **[2]**
29/24 . . . including, apart from doping materials or other impurities, only inorganic semiconductor materials not provided for in groups H01L 29/16, H01L 29/18, H01L 29/20 or H01L 29/22 **[2]**
29/26 . . . including, apart from doping materials or other impurities, elements provided for in two or more of the groups H01L 29/16, H01L 29/18, H01L 29/20, H01L 29/22, H01L 29/24 **[2]**
29/267 . . . . in different semiconductor regions **[2]**
29/30 . . characterised by physical imperfections; having polished or roughened surface **[2]**
29/32 . . . the imperfections being within the semiconductor body **[2]**
29/34 . . . the imperfections being on the surface **[2]**
29/36 . . characterised by the concentration or distribution of impurities **[2]**
29/38 . . characterised by combination of features provided for in two or more of the groups H01L 29/04, H01L 29/06, H01L 29/12, H01L 29/30, H01L 29/36 **[2]**
29/40 . Electrodes **[2]**
29/41 . . characterised by their shape, relative sizes or dispositions **[6]**
29/417 . . . carrying the current to be rectified, amplified or switched **[6]**
29/423 . . . not carrying the current to be rectified, amplified or switched **[6]**
29/43 . . characterised by the materials of which they are formed **[6]**
29/45 . . . Ohmic electrodes **[6]**
29/47 . . . Schottky barrier electrodes **[6]**
29/49 . . . Metal-insulator semiconductor electrodes **[6]**
29/51 . . . . Insulating materials associated therewith **[6]**
29/66 . Types of semiconductor device **[2]**
29/68 . . controllable by only the electric current supplied, or only the electric potential applied, to an electrode which does not carry the current to be rectified, amplified, or switched (H01L 29/96 takes precedence) **[2]**
29/70 . . . Bipolar devices **[2]**
29/72 . . . . Transistor-type devices, i.e. able to continuously respond to applied control signals **[2]**
29/73 . . . . . Bipolar junction transistors **[5]**
29/732 . . . . . Vertical transistors **[6]**
29/735 . . . . . Lateral transistors **[6]**
29/737 . . . . . Hetero-junction transistors **[6]**
29/739 . . . . . controlled by field effect **[6]**
29/74 . . . . Thyristor-type devices, e.g. having four-zone regenerative action **[2]**
29/744 . . . . . Gate-turn-off devices **[6]**
29/745 . . . . . with turn-off by field effect **[6]**
29/747 . . . . . Bidirectional devices, e.g. triacs **[2]**
29/749 . . . . . with turn-on by field effect **[6]**
29/76 . . . Unipolar devices **[2]**
29/762 . . . . Charge transfer devices **[6]**
29/765 . . . . . Charge-coupled devices **[6]**
29/768 . . . . . with field effect produced by an insulated gate **[6]**
29/772 . . . . Field-effect transistors **[6]**
29/775 . . . . . with one-dimensional charge carrier gas channel, e.g. quantum wire FET **[6]**
29/778 . . . . . with two-dimensional charge carrier gas channel, e.g. HEMT **[6]**
29/78 . . . . . with field effect produced by an insulated gate **[2]**
29/786 . . . . . Thin-film transistors **[6]**
29/788 . . . . . with floating gate **[5]**
29/792 . . . . . with charge trapping gate insulator, e.g. MNOS-memory transistor **[5]**
29/80 . . . . . with field effect produced by a PN or other rectifying junction gate **[2]**
29/808 . . . . . with a PN junction gate **[5]**

29/812 . . . . . with a Schottky gate **[5]**
29/82 . . controllable by variation of the magnetic field applied to the device (H01L 29/96 takes precedence) **[2,6]**
29/84 . . controllable by variation of applied mechanical force, e.g. of pressure (H01L 29/96 takes precedence) **[2,6]**
29/86 . . controllable only by variation of the electric current supplied, or only the electric potential applied, to one or more of the electrodes carrying the current to be rectified, amplified, oscillated, or switched (H01L 29/96 takes precedence) **[2]**
29/8605 . . . Resistors with PN junction **[6]**
29/861 . . . Diodes **[6]**
29/862 . . . . Point contact diodes **[6]**
29/864 . . . . Transit-time diodes, e.g. IMPATT, TRAPATT diodes **[6]**
29/866 . . . . Zener diodes **[6]**
29/868 . . . . PIN diodes **[6]**
29/87 . . . . Thyristor diodes, e.g. Shockley diodes, break-over diodes **[6]**
29/872 . . . . Schottky diodes **[6]**
29/88 . . . . Tunnel-effect diodes **[2]**
29/885 . . . . . Esaki diodes **[6]**
29/92 . . . Capacitors with potential-jump barrier or surface barrier **[2]**
29/93 . . . . Variable-capacitance diodes, e.g. varactors **[2]**
29/94 . . . . Metal-insulator-semiconductors, e.g. MOS **[2]**
29/96 . . of a type covered by more than one of groups H01L 29/68, H01L 29/82, H01L 29/84 or H01L 29/86 **[2]**

31/00 Semiconductor devices sensitive to infra-red radiation, light, electromagnetic radiation of shorter wavelength, or corpuscular radiation and specially adapted either for the conversion of the energy of such radiation into electrical energy or for the control of electrical energy by such radiation; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof**; **Details thereof** (H01L 51/42 takes precedence; devices consisting of a plurality of solid state components formed in, or on, a common substrate, other than combinations of radiation-sensitive components with one or more electric light sources, H01L 27/00) **[2,6,8]**

31/02 . Details **[2]**
31/0203 . . Containers; Encapsulations **[5]**
31/0216 . . Coatings **[5]**
31/0224 . . Electrodes **[5]**
31/0232 . . Optical elements or arrangements associated with the device **[5]**
31/0236 . . Special surface textures **[5]**
31/024 . . Arrangements for cooling, heating, ventilating or temperature compensation **[5]**
31/0248 . characterised by their semiconductor bodies **[5]**
31/0256 . . characterised by the material **[5]**
31/0264 . . . Inorganic materials **[5]**
31/0272 . . . . Selenium or tellurium **[5]**
31/028 . . . . including, apart from doping material or other impurities, only elements of the fourth group of the Periodic System **[5]**
31/0288 . . . . . characterised by the doping material **[5]**
31/0296 . . . . including, apart from doping materials or other impurities, only $A_{II}B_{VI}$ compounds, e.g. CdS, ZnS, HgCdTe **[5]**
31/0304 . . . . including, apart from doping materials or other impurities, only $A_{III}B_{V}$ compounds **[5]**
31/0312 . . . . including, apart from doping materials or other impurities, only $A_{IV}B_{IV}$ compounds, e.g. SiC **[5]**
31/032 . . . . including, apart from doping materials or other impurities, only compounds not provided for in groups H01L 31/0272 to H01L 31/0312 **[5]**
31/0328 . . . . including, apart from doping materials or other impurities, semiconductor materials provided for in two or more of groups H01L 31/0272 to H01L 31/032 **[5]**
31/0336 . . . . . in different semiconductor regions, e.g. Cu_2X/CdX hetero-junctions, X being an element of the sixth group of the Periodic System **[5]**
31/0352 . . characterised by their shape or by the shapes, relative sizes or disposition of the semiconductor regions **[5]**
31/036 . . characterised by their crystalline structure or particular orientation of the crystalline planes **[5]**
31/0368 . . . including polycrystalline semiconductors (H01L 31/0392 takes precedence) **[5]**
31/0376 . . . including amorphous semiconductors (H01L 31/0392 takes precedence) **[5]**
31/0384 . . . including other non-monocrystalline materials, e.g. semiconductor particles embedded in an insulating material (H01L 31/0392 takes precedence) **[5]**
31/0392 . . . including thin films deposited on metallic or insulating substrates **[5]**
31/04 . adapted as conversion devices **[2]**
31/042 . . including a panel or array of photoelectric cells, e.g. solar cells **[5]**
31/045 . . . collapsible or foldable **[5]**
31/048 . . . encapsulated or with housing **[5]**
31/05 . . . characterised by special interconnection means **[5]**
31/052 . . . with cooling, light-reflecting or light-concentrating means **[5]**
31/055 . . . . where light is absorbed and re-emitted at a different wavelength by the concentrator, e.g. by using luminescent material **[5]**
31/058 . . . including means to utilise heat energy, e.g. hybrid systems, or a supplementary source of electric energy **[5]**
31/06 . . characterised by at least one potential-jump barrier or surface barrier **[2]**
31/062 . . . the potential barriers being only of the metal-insulator-semiconductor type **[5]**
31/065 . . . the potential barriers being only of the graded gap type **[5]**
31/068 . . . the potential barriers being only of the PN homojunction type **[5]**
31/07 . . . the potential barriers being only of the Schottky type **[5]**
31/072 . . . the potential barriers being only of the PN heterojunction type **[5]**
31/075 . . . the potential barriers being only of the PIN type **[5]**
31/078 . . . including potential barriers provided for in two or more of groups H01L 31/062 to H01L 31/075 **[5]**
31/08 . in which radiation controls flow of current through the device, e.g. photoresistors **[2]**

31/09 . . Devices sensitive to infra-red, visible or ultra-violet radiation (H01L 31/101 takes precedence) **[5]**

31/10 . . characterised by at least one potential-jump barrier or surface barrier, e.g. phototransistors **[2]**

31/101 . . . Devices sensitive to infra-red, visible or ultra-violet radiation **[5]**

31/102 . . . . characterised by only one potential barrier or surface barrier **[5]**

31/103 . . . . . the potential barrier being of the PN homojunction type **[5]**

31/105 . . . . . the potential barrier being of the PIN type **[5]**

31/107 . . . . . the potential barrier working in avalanche mode, e.g. avalanche photodiode **[5]**

31/108 . . . . . the potential barrier being of the Schottky type **[5]**

31/109 . . . . . the potential barrier being of the PN heterojunction type **[5]**

31/11 . . . . characterised by two potential barriers or surface barriers, e.g. bipolar phototransistor **[5]**

31/111 . . . . characterised by at least three potential barriers, e.g. photothyristor **[5]**

31/112 . . . . characterised by field-effect operation, e.g. junction field-effect photo- transistor **[5]**

31/113 . . . . . being of the conductor-insulator-semiconductor type, e.g. metal- insulator-semiconductor field-effect transistor **[5]**

31/115 . . . Devices sensitive to very short wavelength, e.g. X-rays, gamma-rays or corpuscular radiation **[5]**

31/117 . . . . of the bulk effect radiation detector type, e.g. Ge-Li compensated PIN gamma-ray detectors **[5]**

31/118 . . . . of the surface barrier or shallow PN junction detector type, e.g. surface barrier alpha-particle detectors **[5]**

31/119 . . . . characterised by field-effect operation, e.g. MIS type detectors **[5]**

31/12 . structurally associated with, e.g. formed in or on a common substrate with, one or more electric light sources, e.g. electroluminescent light sources, and electrically or optically coupled thereto (electroluminescent light sources per se H05B 33/00) **[2,5]**

31/14 . . the light source or sources being controlled by the semiconductor device sensitive to radiation, e.g. image converters, image amplifiers, image storage devices **[2]**

31/147 . . . the light sources and the devices sensitive to radiation all being semiconductor devices characterised by at least one potential or surface barrier **[5]**

31/153 . . . . formed in, or on, a common substrate **[5]**

31/16 . . the semiconductor device sensitive to radiation being controlled by the light source or sources **[2]**

31/167 . . . the light sources and the devices sensitive to radiation all being semiconductor devices characterised by at least one potential or surface barrier **[5]**

31/173 . . . . formed in, or on, a common substrate **[5]**

31/18 . Processes or apparatus specially adapted for the manufacture or treatment of these devices or of parts thereof **[2]**

31/20 . . such devices or parts thereof comprising amorphous semiconductor material **[5]**

33/00 Semiconductor devices with at least one potential-jump barrier or surface barrier specially adapted for light emission; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof**; **Details thereof** (H01L 51/50 takes precedence; devices consisting of a plurality of semiconductor components formed in or on a common substrate and including semiconductor components with at least one potential-jump barrier or surface barrier, specially adapted for light emission H01L 27/15; semiconductor lasers H01S 5/00) **[2,8,2010.01]**

(1) This group covers light emitting diodes [LEDs] or superluminescent diodes [SLDs], including LEDs or SLDs emitting infra-red [IR] light or ultra-violet [UV] light. **[2010.01]**

(2) In this group, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place. **[2010.01]**

33/02 . characterised by the semiconductor bodies **[2010.01]**

33/04 . . with a quantum effect structure or superlattice, e.g. tunnel junction **[2010.01]**

33/06 . . . within the light emitting region, e.g. quantum confinement structure or tunnel barrier **[2010.01]**

33/08 . . with a plurality of light emitting regions, e.g. laterally discontinuous light emitting layer or photoluminescent region integrated within the semiconductor body (H01L 27/15 takes precedence) **[2010.01]**

33/10 . . with a light reflecting structure, e.g. semiconductor Bragg reflector **[2010.01]**

33/12 . . with a stress relaxation structure, e.g. buffer layer **[2010.01]**

33/14 . . with a carrier transport control structure, e.g. highly-doped semiconductor layer or current-blocking structure **[2010.01]**

33/16 . . with a particular crystal structure or orientation, e.g. polycrystalline, amorphous or porous **[2010.01]**

33/18 . . . within the light emitting region **[2010.01]**

Note

When classifying in this group, classification is also made in group H01L 33/26 or one of its subgroups in order to identify the chemical composition of the light emitting region. **[2010.01]**

33/20 . . with a particular shape, e.g. curved or truncated substrate **[2010.01]**

33/22 . . . Roughened surfaces, e.g. at the interface between epitaxial layers **[2010.01]**

33/24 . . . of the light emitting region, e.g. non-planar junction **[2010.01]**

33/26 . . Materials of the light emitting region **[2010.01]**

33/28 . . . containing only elements of group II and group VI of the periodic system **[2010.01]**

33/30 . . . containing only elements of group III and group V of the periodic system **[2010.01]**

33/32 . . . . containing nitrogen **[2010.01]**

33/34 . . . containing only elements of group IV of the periodic system **[2010.01]**

33/36 . characterised by the electrodes **[2010.01]**

33/38 . . with a particular shape **[2010.01]**

33/40 . . Materials therefor **[2010.01]**
33/42 . . . Transparent materials **[2010.01]**
33/44 . characterised by the coatings, e.g. passivation layer or anti-reflective coating **[2010.01]**
33/46 . . Reflective coating, e.g. dielectric Bragg reflector **[2010.01]**
33/48 . characterised by the semiconductor body packages **[2010.01]**

Note

This group covers elements in intimate contact with the semiconductor body or integrated with the package. **[2010.01]**

33/50 . . Wavelength conversion elements **[2010.01]**
33/52 . . Encapsulations **[2010.01]**
33/54 . . . having a particular shape **[2010.01]**
33/56 . . . Materials, e.g. epoxy or silicone resin **[2010.01]**
33/58 . . Optical field-shaping elements **[2010.01]**
33/60 . . . Reflective elements **[2010.01]**
33/62 . . Arrangements for conducting electric current to or from the semiconductor body, e.g. leadframe, wire-bond or solder balls **[2010.01]**
33/64 . . Heat extraction or cooling elements **[2010.01]**

35/00 Thermoelectric devices comprising a junction of dissimilar materials, i.e. exhibiting Seebeck or Peltier effect with or without other thermoelectric effects or thermomagnetic effects; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof**; **Details thereof** (devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00) **[2]**

35/02 . Details **[2]**
35/04 . . Structural details of the junction; Connections of leads **[2]**
35/06 . . . detachable, e.g. using a spring **[2]**
35/08 . . . non-detachable, e.g. cemented, sintered, soldered **[2]**
35/10 . . . Connections of leads **[2]**
35/12 . Selection of the material for the legs of the junction **[2]**
35/14 . . using inorganic compositions **[2]**
35/16 . . . comprising tellurium or selenium or sulfur **[2]**
35/18 . . . comprising arsenic or antimony or bismuth (H01L 35/16 takes precedence) **[2]**
35/20 . . . comprising metals only (H01L 35/16, H01L 35/18 take precedence) **[2]**
35/22 . . . comprising compounds containing boron, carbon, oxygen, or nitrogen **[2]**
35/24 . . using organic compositions **[2]**
35/26 . . using compositions changing continuously or discontinuously inside the material **[2]**
35/28 . operating with Peltier or Seebeck effect only **[2]**
35/30 . . characterised by the heat-exchanging means at the junction **[2]**
35/32 . . characterised by the structure or configuration of the cell or thermo-couple forming the device **[2]**
35/34 . Processes or apparatus specially adapted for the manufacture or treatment of these devices or of parts thereof **[2]**

37/00 Thermoelectric devices without a junction of dissimilar materials; **Thermomagnetic devices, e.g. using Nernst-Ettinghausen effect**; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof** (devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00) **[2]**

37/02 . using thermal change of dielectric constant, e.g. working above and below the Curie point **[2]**
37/04 . using thermal change of magnetic permeability, e.g. working above and below the Curie point **[2]**

39/00 Devices using superconductivity or hyperconductivity; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof** (devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00; superconductors characterised by the ceramic-forming technique or the ceramic composition C04B 35/00; superconductive or hyperconductive conductors, cables, or transmission lines H01B 12/00; superconductive coils or windings H01F; amplifiers using superconductivity H03F 19/00) **[2,4]**

39/02 . Details **[2]**
39/04 . . Containers; Mountings **[2]**
39/06 . . characterised by the current path **[2]**
39/08 . . characterised by the shape of the element **[2]**
39/10 . . characterised by the means for switching **[2]**
39/12 . . characterised by the material **[2]**
39/14 . Permanent superconductor devices **[2]**
39/16 . Devices switchable between superconductive and normal states **[2]**
39/18 . . Cryotrons **[2]**
39/20 . . . Power cryotrons **[2]**
39/22 . Devices comprising a junction of dissimilar materials, e.g. Josephson-effect devices **[2]**
39/24 . Processes or apparatus specially adapted for the manufacture or treatment of devices provided for in group H01L 39/00 or of parts thereof **[2]**

41/00 Piezo-electric elements in general; **Electrostrictive elements in general**; **Magnetostrictive elements in general**; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof**; **Details thereof** (devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00) **[2]**

(1) This group does not cover adaptations for particular purposes, which are covered by the relevant places. **[6]**
(2) Attention is drawn to the following such places: **[6]**

B06B		for adaptations for generating or transmitting mechanical vibrations
G01		for transducers as sensing elements for measuring
G04C, G04F		for transducers adapted for use in time-pieces
G10K		for adaptations for generating or transmitting sound
H02N		for arrangements of elements in electric machines
H03H	9/00	for networks comprising electro-mechanical or electro-acoustic elements, e.g. resonant circuits

H04R for loudspeakers, microphones, gramophone pick-ups or like transducers.

41/02 . Details **[2]**
41/04 . . of piezo-electric or electrostrictive elements **[2]**
41/047 . . . Electrodes **[6]**
41/053 . . . Mounts, supports, enclosures or casings **[6]**
41/06 . . of magnetostrictive elements **[2]**
41/08 . Piezo-electric or electrostrictive elements **[2]**
41/083 . . having a stacked or multilayer structure **[6]**
41/087 . . formed as coaxial cables **[6]**

Note

Groups H01L 41/083 and H01L 41/087 take precedence over groups H01L 41/09 to H01L 41/113. **[6]**

41/09 . . with electrical input and mechanical output **[5]**
41/107 . . with electrical input and electrical output **[5]**
41/113 . . with mechanical input and electrical output **[5]**
41/12 . Magnetostrictive elements **[2]**
41/16 . Selection of materials **[2]**
41/18 . . for piezo-electric or electrostrictive elements **[2]**
41/187 . . . Ceramic compositions **[5]**
41/193 . . . Macromolecular compositions **[5]**
41/20 . . for magnetostrictive elements **[2]**
41/22 . Processes or apparatus specially adapted for the manufacture or treatment of these elements or of parts thereof **[2]**
41/24 . . of elements of ceramic composition **[5]**
41/26 . . of elements of macromolecular composition **[5]**

43/00 Devices using galvano-magnetic or similar magnetic effects; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof** (devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00) **[2]**

43/02 . Details **[2]**
43/04 . . of Hall-effect devices **[2]**
43/06 . Hall-effect devices **[2]**
43/08 . Magnetic-field-controlled resistors **[2]**
43/10 . Selection of materials **[2]**
43/12 . Processes or apparatus specially adapted for the manufacture or treatment of these devices or of parts thereof **[2]**
43/14 . . for Hall-effect devices **[2]**

45/00 Solid state devices specially adapted for rectifying, amplifying, oscillating, or switching without a potential-jump barrier or surface barrier, e.g. dielectric triodes; **Ovshinsky-effect devices**; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof** (devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00; devices using superconductivity or hyperconductivity H01L 39/00; piezo-electric elements H01L 41/00; bulk negative resistance effect devices H01L 47/00) **[2]**

45/02 . Solid state travelling-wave devices **[2]**

47/00 Bulk negative resistance effect devices, e.g. Gunn-effect devices; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof** (devices consisting of a plurality of solid state components formed in or on a common substrate H01L 27/00) **[2]**

47/02 . Gunn-effect devices **[2]**

49/00 Solid state devices not provided for in groups H01L 27/00 to H01L 47/00 and H01L 51/00 and not provided for in any other subclass; **Processes or apparatus specially adapted for the manufacture or treatment thereof or of parts thereof [2,8]**

49/02 . Thin-film or thick-film devices **[2]**

51/00 Solid state devices using organic materials as the active part, or using a combination of organic materials with other materials as the active part; **Processes or apparatus specially adapted for the manufacture or treatment of such devices, or of parts thereof** (devices consisting of a plurality of components formed in or on a common substrate H01L 27/28; thermoelectric devices using organic material H01L 35/00, H01L 37/00; piezo-electric, electrostrictive or magnetostrictive elements using organic material H01L 41/00) **[6,8]**

51/05 . specially adapted for rectifying, amplifying, oscillating or switching and having at least one potential-jump barrier or surface barrier; Capacitors or resistors with at least one potential-jump barrier or surface barrier **[8]**
51/10 . . Details of devices **[6]**
51/30 . . Selection of materials **[6]**
51/40 . . Processes or apparatus specially adapted for the manufacture or treatment of such devices or of parts thereof **[6,8]**
51/42 . specially adapted for sensing infra-red radiation, light, electromagnetic radiation of shorter wavelength, or corpuscular radiation; specially adapted either for the conversion of the energy of such radiation into electrical energy or for the control of electrical energy by such radiation **[8]**
51/44 . . Details of devices **[8]**
51/46 . . Selection of materials **[8]**
51/48 . . Processes or apparatus specially adapted for the manufacture or treatment of such devices or of parts thereof **[8]**
51/50 . specially adapted for light emission, e.g. organic light emitting diodes (OLED) or polymer light emitting devices (PLED) (organic semiconductor lasers H01S 5/36) **[8]**
51/52 . . Details of devices **[8]**
51/54 . . Selection of materials **[8]**
51/56 . . Processes or apparatus specially adapted for the manufacture or treatment of such devices or of parts thereof **[8]**

H01M PROCESSES OR MEANS, E.G. BATTERIES, FOR THE DIRECT CONVERSION OF CHEMICAL ENERGY INTO ELECTRICAL ENERGY (electrochemical processes or apparatus in general C25; semiconductor or other solid state devices for converting light or heat into electrical energy H01L, e.g. H01L 31/00, H01L 35/00, H01L 37/00) **[2]**

(1) This subclass covers galvanic primary or secondary cells or batteries, fuel cells or batteries.
(2) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

2/00 Constructional details, or processes of manufacture, of the non-active parts [2]

2/02 . Cases, jackets, or wrappings (working of plastics or substances in a plastic state B29) **[2]**
2/04 . . Lids or covers **[2]**
2/06 . . Arrangements for introducing electric connectors into or through cases **[2]**
2/08 . . Sealing materials **[2]**
2/10 . Mountings; Suspension devices; Shock absorbers; Transport or carrying devices; Holders (structural combination of accumulators with charging apparatus H01M 10/46) **[2]**
2/12 . Vent plugs or other mechanical arrangements for facilitating escape of gases **[2]**
2/14 . Separators; Membranes; Diaphragms; Spacing elements **[2]**
2/16 . . characterised by the material **[2]**
2/18 . . characterised by the shape **[2]**
2/20 . Current-conducting connections for cells **[2]**
2/22 . . Fixed connections, i.e. not intended for disconnection **[2]**
2/24 . . . Intercell connections through partitions, e.g. in a battery case **[2]**
2/26 . . . Electrode connections **[2]**
2/28 . . . . for lead-acid accumulators **[2]**
2/30 . . Terminals **[2]**
2/32 . . Methods or arrangements for affording protection against corrosion; Selection of materials therefor **[2]**
2/34 . . with provision for preventing undesired use or discharge **[2]**
2/36 . Arrangements for filling, topping-up or emptying cases with or of liquid, e.g. for filling with electrolytes, for washing-out **[2]**
2/38 . Arrangements for moving electrolytes **[2]**
2/40 . . with external circulating path (H01M 8/04 takes precedence) **[2]**

4/00 Electrodes (electrodes for electrolytic processes C25) **[2]**

Note

In classifying electrodes of hybrid cells, the individual half-cells of the hybrid cell are considered separately, e.g. an electrode in the primary half of a primary/fuel type hybrid cell is considered to be a primary-cell electrode covered by H01M 4/06. **[2]**

4/02 . Electrodes composed of, or comprising, active material **[2]**
4/04 . . Processes of manufacture in general **[2]**
4/06 . . Electrodes for primary cells **[2]**
4/08 . . . Processes of manufacture **[2]**
4/10 . . . . of pressed electrodes with central core, i.e. dollies **[2]**
4/12 . . . . of consumable metal or alloy electrodes (use of alloy compositions as active materials H01M 4/38) **[2]**
4/13 . . Electrodes for accumulators with non-aqueous electrolyte, e.g. for lithium-accumulators; Processes of manufacture thereof **[2010.01]**

Note

This group does not cover electrodes for accumulators working at high temperatures, e.g. molten sodium electrodes, which subject matter is classified in group H01M 10/39. **[2010.01]**

4/131 . . . Electrodes based on mixed oxides or hydroxides, or on mixtures of oxides or hydroxides, e.g. LiCoOx **[2010.01]**
4/1315 . . . . containing halogen atoms, e.g. LiCoOxFy **[2010.01]**
4/133 . . . Electrodes based on carbonaceous material, e.g. graphite-intercalation compounds or CFx **[2010.01]**
4/134 . . . Electrodes based on metals, Si or alloys **[2010.01]**

4/136 . . . Electrodes based on inorganic compounds other than oxides or hydroxides, e.g. sulfides, selenides, tellurides, halogenides or LiCoFy **[2010.01]**
4/137 . . . Electrodes based on electro-active polymers **[2010.01]**
4/139 . . . Processes of manufacture **[2010.01]**
4/1391 . . . . of electrodes based on mixed oxides or hydroxides, or on mixtures of oxides or hydroxides, e.g. LiCoOx **[2010.01]**
4/13915. . . . . containing halogen atoms, e.g. LiCoOxFy **[2010.01]**
4/1393 . . . . of electrodes based on carbonaceous material, e.g. graphite-intercalation compounds or CFx **[2010.01]**
4/1395 . . . . of electrodes based on metals, Si or alloys **[2010.01]**
4/1397 . . . . of electrodes based on inorganic compounds other than oxides or hydroxides, e.g. sulfides, selenides, tellurides, halogenides or LiCoFy **[2010.01]**
4/1399 . . . . of electrodes based on electro-active polymers **[2010.01]**
4/14 . . Electrodes for lead-acid accumulators **[2]**
4/16 . . . Processes of manufacture **[2]**
4/18 . . . . of Plante electrodes **[2]**
4/20 . . . . of pasted electrodes **[2]**
4/21 . . . . . Drying of pasted electrodes **[2]**
4/22 . . . . Forming of electrodes **[2]**
4/23 . . . . . Drying or preserving electrodes after forming **[2]**
4/24 . . Electrodes for alkaline accumulators **[2]**
4/26 . . . Processes of manufacture **[2]**
4/28 . . . . Precipitating active material on the carrier **[2]**
4/29 . . . . . by electrochemical methods **[2]**
4/30 . . . . Pressing **[2]**
4/32 . . . Nickel oxide or hydroxide electrodes **[2]**
4/34 . . . Silver oxide or hydroxide electrodes **[2]**
4/36 . . Selection of substances as active materials, active masses, active liquids **[2]**
4/38 . . . of elements or alloys **[2]**
4/40 . . . . Alloys based on alkali metals **[2]**
4/42 . . . . Alloys based on zinc **[2]**
4/44 . . . . Alloys based on cadmium **[2]**
4/46 . . . . Alloys based on magnesium or aluminium **[2]**
4/48 . . . of inorganic oxides or hydroxides **[2,2010.01]**
4/485 . . . . of mixed oxides or hydroxides for inserting or intercalating light metals, e.g. $LiTi_2O_4$ or $LiTi_2OxFy$ (H01M 4/505, H01M 4/525 take precedence) **[2010.01]**
4/50 . . . . of manganese **[2,2010.01]**
4/505 . . . . . of mixed oxides or hydroxides containing manganese for inserting or intercalating light metals, e.g. $LiMn_2O_4$ or $LiMn_2OxFy$ **[2010.01]**
4/52 . . . . of nickel, cobalt or iron **[2,2010.01]**
4/525 . . . . . of mixed oxides or hydroxides containing iron, cobalt or nickel for inserting or intercalating light metals, e.g. $LiNiO_2$, $LiCoO_2$ or LiCoOxFy **[2010.01]**
4/54 . . . . of silver **[2]**
4/56 . . . . of lead **[2]**
4/57 . . . . . of “grey lead”, i.e. powders containing lead and lead oxide **[2]**
4/58 . . . of inorganic compounds other than oxides or hydroxides, e.g. sulfides, selenides, tellurides, halogenides or LiCoFy **[2,2010.01]**
4/583 . . . . Carbonaceous material, e.g. graphite-intercalation compounds or CFx **[2010.01]**
4/587 . . . . . for inserting or intercalating light metals **[2010.01]**
4/60 . . . of organic compounds **[2]**
4/62 . . Selection of inactive substances as ingredients for active masses, e.g. binders, fillers **[2]**
4/64 . . Carriers or collectors **[2]**
4/66 . . . Selection of materials **[2]**
4/68 . . . . for use in lead-acid accumulators **[2]**
4/70 . . . characterised by shape or form **[2]**
4/72 . . . . Grids **[2]**
4/73 . . . . . for lead-acid accumulators, e.g. frame plates **[2]**
4/74 . . . . . Meshes or woven material; Expanded metal **[2]**
4/75 . . . . Wires, rods, or strips **[2]**
4/76 . . . . Containers for holding the active material, e.g. tubes, capsules **[2]**
4/78 . . . . Shapes other than plane or cylindrical, e.g. helical **[2]**
4/80 . . . . Porous plates, e.g. sintered carriers **[2]**
4/82 . . . Multi-step processes for manufacturing carriers for lead-acid accumulators (single-step processes, see the relevant subclasses, e.g. B21D, B22D) **[2]**
4/84 . . . . involving casting **[2]**
4/86 . Inert electrodes with catalytic activity, e.g. for fuel cells **[2]**
4/88 . . Processes of manufacture **[2]**
4/90 . . Selection of catalytic material **[2]**
4/92 . . . Metals of platinum group (H01M 4/94 takes precedence) **[2]**
4/94 . . Non-porous diffusion electrodes, e.g. palladium membranes, ion exchange membranes **[2]**
4/96 . . Carbon-based electrodes **[2]**
4/98 . . Raney-type electrodes **[2]**

6/00 Primary cells; **Manufacture thereof** **[2]**

Note

In this group, primary cells are electrochemical generators in which the cell energy is present in chemical form and is not regenerated. **[2]**

6/02 . Details (of non-active parts H01M 2/00, of electrodes H01M 4/00) **[2]**
6/04 . Cells with aqueous electrolyte **[2]**
6/06 . . Dry cells, i.e. cells wherein the electrolyte is rendered non-fluid **[2]**
6/08 . . . with cup-shaped electrodes **[2]**
6/10 . . . with wound or folded electrodes **[2]**
6/12 . . . with flat electrodes **[2]**
6/14 . Cells with non-aqueous electrolyte **[2]**
6/16 . . with organic electrolyte (H01M 6/18 takes precedence) **[2]**
6/18 . . with solid electrolyte **[2]**
6/20 . . . working at high temperature (deferred-action thermal cells H01M 6/36) **[2]**
6/22 . Immobilising of electrolyte **[2]**

6/24 . Cells comprising two different electrolytes **[2]**
6/26 . Cells without oxidising active material, e.g. Volta cells **[2]**
6/28 . Standard cells, e.g. Weston cells **[2]**
6/30 . Deferred-action cells **[2]**
6/32 . . activated through external addition of electrolyte or of electrolyte components **[2]**
6/34 . . . Immersion cells, e.g. sea-water cells **[2]**
6/36 . . containing electrolyte and made operational by physical means, e.g. thermal cells (thermoelectric solid state devices H01L 35/00, H01L 37/00) **[2]**
6/38 . . . by mechanical means **[2]**
6/40 . Printed batteries **[2]**
6/42 . Grouping of primary cells into batteries (H01M 6/40 takes precedence) **[2]**
6/44 . . of tubular or cup-shaped cells **[2]**
6/46 . . of flat cells **[2]**
6/48 . . . with bipolar electrodes **[2]**
6/50 . Methods or arrangements for servicing or maintenance, e.g. maintaining operating temperature **[2]**
6/52 . Reclaiming serviceable parts of waste cells or batteries **[2]**

8/00 Fuel cells; **Manufacture thereof [2]**

Note

In this group, fuel cells are electrochemical generators wherein the reactants are supplied from outside. **[2]**

8/02 . Details (of non-active parts H01M 2/00, of electrodes H01M 4/00) **[2]**
8/04 . Auxiliary arrangements or processes, e.g. for control of pressure, for circulation of fluids **[2]**
8/06 . Combination of fuel cell with means for production of reactants or for treatment of residues (regenerative fuel cells H01M 8/18; production of reactants per se, see sections B or C) **[2]**
8/08 . Fuel cells with aqueous electrolytes **[2]**
8/10 . Fuel cells with solid electrolytes **[2]**
8/12 . . operating at high temperature, e.g. with stabilised ZrO_2 electrolyte **[2]**
8/14 . Fuel cells with fused electrolytes **[2]**
8/16 . Biochemical fuel cells, i.e. cells in which micro-organisms function as catalysts **[2]**
8/18 . Regenerative fuel cells **[2]**
8/20 . Indirect fuel cells, e.g. redox cells (H01M 8/18 takes precedence) **[2]**
8/22 . Fuel cells in which the fuel is based on materials comprising carbon or oxygen or hydrogen and other elements; Fuel cells in which the fuel is based on materials comprising only elements other than carbon, oxygen, or hydrogen **[2]**
8/24 . Grouping of fuel cells into batteries, e.g. modules **[2]**

10/00 Secondary cells; **Manufacture thereof [2]**

Note

In this group, secondary cells are accumulators receiving and supplying electrical energy by means of reversible electrochemical reactions. **[2]**

10/02 . Details (of non-active parts H01M 2/00, of electrodes H01M 4/00) **[2]**
10/04 . Construction or manufacture in general (H01M 10/12, H01M 10/28, H01M 10/38 take precedence) **[2]**
10/05 . Accumulators with non-aqueous electrolyte (H01M 10/39 takes precedence) **[2010.01]**
10/052 . . Li-accumulators **[2010.01]**
10/0525 . . . Rocking-chair batteries, i.e. batteries with lithium insertion or intercalation in both electrodes; Lithium-ion batteries **[2010.01]**
10/054 . . Accumulators with insertion or intercalation of metals other than lithium, e.g. with magnesium or aluminium **[2010.01]**
10/056 . . characterized by the materials used as electrolytes, e.g. mixed inorganic/organic electrolytes **[2010.01]**
10/0561 . . . the electrolyte being constituted of inorganic materials only **[2010.01]**
10/0562 . . . . Solid materials **[2010.01]**
10/0563 . . . . Liquid materials, e.g. for Li-$SOCl_2$ cells **[2010.01]**
10/0564 . . . the electrolyte being constituted of organic materials only **[2010.01]**
10/0565 . . . . Polymeric materials, e.g. gel-type or solid-type **[2010.01]**
10/0566 . . . . Liquid materials **[2010.01]**
10/0567 . . . . . characterised by the additives **[2010.01]**
10/0568 . . . . . characterised by the solutes **[2010.01]**
10/0569 . . . . . characterised by the solvents **[2010.01]**
10/058 . . Construction or manufacture **[2010.01]**
10/0583 . . . of accumulators with folded construction elements except wound ones, i.e. folded positive or negative electrodes or separators, e.g. with ''Z''-shaped electrodes or separators **[2010.01]**
10/0585 . . . of accumulators having only flat construction elements, i.e. flat positive electrodes, flat negative electrodes and flat separators **[2010.01]**
10/0587 . . . of accumulators having only wound construction elements, i.e. wound positive electrodes, wound negative electrodes and wound separators **[2010.01]**
10/06 . Lead-acid accumulators (semi-lead accumulators H01M 10/20) **[2]**
10/08 . . Selection of materials as electrolytes **[2]**
10/10 . . . Immobilising of electrolyte **[2]**
10/12 . . Construction or manufacture **[2]**
10/14 . . . Assembling a group of electrodes or separators **[2]**
10/16 . . . Suspending or supporting electrodes or groups of electrodes in the case **[2]**
10/18 . . with bipolar electrodes **[2]**
10/20 . Semi-lead accumulators, i.e. accumulators in which only one electrode contains lead **[2]**
10/22 . . Selection of materials as electrolytes **[2]**
10/24 . Alkaline accumulators **[2]**
10/26 . . Selection of materials as electrolytes **[2]**
10/28 . . Construction or manufacture **[2]**
10/30 . . Nickel accumulators (H01M 10/34 takes precedence) **[2]**
10/32 . . Silver accumulators (H01M 10/34 takes precedence) **[2]**
10/34 . Gastight accumulators **[2]**
10/36 . Accumulators not provided for in groups H01M 10/05 to H01M 10/34 **[2,2010.01]**
10/38 . . Construction or manufacture **[2]**

10/39 . . working at high temperature **[2]**
10/42 . Methods or arrangements for servicing or maintenance of secondary cells or secondary half-cells **[2]**
10/44 . . Methods for charging or discharging (circuits for charging H02J 7/00) **[2]**
10/46 . . Accumulators structurally combined with charging apparatus (circuits for charging H02J 7/00) **[2]**
10/48 . . Accumulators combined with arrangements for measuring, testing, or indicating condition, e.g. level or density of the electrolyte (indicating or measuring level of liquid in general G01F 23/00; measuring density G01N, e.g. G01N 9/00; measuring electric variables G01R) **[2]**
10/50 . . Heating or cooling or regulating temperature (control of temperature in general G05D 23/00) **[2]**
10/52 . . Removing gases inside the secondary cell, e.g. by absorption (vent plugs or other mechanical arrangements for facilitating escape of gases H01M 2/12) **[2]**
10/54 . Reclaiming serviceable parts of waste accumulators **[2]**

12/00 Hybrid cells; **Manufacture thereof [2]**

Note

In this group, hybrid cells are electrochemical generators having two different types of half-cells, the half-cell being an electrode-electrolyte combination of either a primary, a secondary, or a fuel cell. **[2]**

12/02 . Details (of non-active parts H01M 2/00, of electrodes H01M 4/00) **[2]**
12/04 . composed of a half-cell of the fuel-cell type and of a half-cell of the primary-cell type (methods or arrangements for servicing or maintenance H01M 6/50) **[2]**
12/06 . . with one metallic and one gaseous electrode **[2]**
12/08 . composed of a half-cell of a fuel-cell type and a half-cell of the secondary-cell type (methods or arrangements for servicing or maintenance, e.g. for charging, H01M 10/42) **[2]**

14/00 Electrochemical current or voltage generators not provided for in groups H01M 6/00 to H01M 12/00; **Manufacture thereof [2]**

16/00 Structural combinations of different types of electrochemical generators [2]

H01P WAVEGUIDES; **RESONATORS, LINES OR OTHER DEVICES OF THE WAVEGUIDE TYPE** (operating at optical frequencies G02B)

Note

In this subclass, the following expression is used with the meaning indicated:
– "waveguide type" as applied to transmission lines includes only high-frequency coaxial cables or Lecher lines, and as applied to resonators, delay lines, or other devices includes all devices having distributed inductance and capacitance.

Subclass index

1/00 Auxiliary devices (coupling devices of the waveguide type H01P 5/00)
1/02 . Bends; Corners; Twists
1/04 . Fixed joints
1/06 . Movable joints, e.g. rotating joints
1/08 . Dielectric windows
1/10 . for switching or interrupting
1/11 . . by ferromagnetic devices **[3]**
1/12 . . by mechanical chopper
1/14 . . by electric discharge devices (discharge devices H01J 17/64)
1/15 . . by semiconductor devices **[2]**
1/16 . for mode selection, e.g. mode suppression or mode promotion; for mode conversion **[3]**
1/161 . . sustaining two independent orthogonal modes, e.g. orthomode transducer **[3]**
1/162 . . absorbing spurious or unwanted modes of propagation **[3]**
1/163 . . specifically adapted for selection or promotion of the TE_{01} circular-electric mode **[3]**
1/165 . for rotating the plane of polarisation **[2]**
1/17 . . for producing a continuously rotating polarisation, e.g. circular polarisation **[2]**
1/175 . . using Faraday rotators **[3]**
1/18 . Phase-shifters (H01P 1/165 takes precedence) **[2]**
1/185 . . using a diode or a gas filled discharge tube **[3]**
1/19 . . using a ferromagnetic device **[3]**
1/195 . . . having a toroidal shape **[3]**
1/20 . Frequency-selective devices, e.g. filters
1/201 . . Filters for transverse electromagnetic waves (H01P 1/212, H01P 1/213, H01P 1/215, H01P 1/219 take precedence) **[3]**
1/202 . . . Coaxial filters (cascaded coaxial cavities H01P 1/205) **[3]**
1/203 . . . Strip line filters **[3]**
1/205 . . . Comb or interdigital filters; Cascaded coaxial cavities (H01P 1/203 takes precedence) **[3]**

1/207 . . Hollow waveguide filters (H01P 1/212, H01P 1/213, H01P 1/215, H01P 1/219 take precedence) **[3]**
1/208 . . . Cascaded cavities; Cascaded resonators inside a hollow waveguide structure (H01P 1/205 takes precedence) **[3]**
1/209 . . . comprising one or more branching arms or cavities wholly outside the main waveguide **[3]**
1/211 . . . Waffle-iron filters; Corrugated structures **[3]**
1/212 . . suppressing or attenuating harmonic frequencies (H01P 1/215 takes precedence) **[3]**
1/213 . . combining or separating two or more different frequencies (H01P 1/215 takes precedence) **[3]**
1/215 . . using ferromagnetic material **[3]**
1/217 . . . the ferromagnetic material acting as a tuning element in resonators **[3]**
1/218 . . . the ferromagnetic material acting as a frequency selective coupling element, e.g. YIG-filters **[3]**
1/219 . . Evanescent mode filters **[3]**
1/22 . Attenuating devices (dissipative terminating devices H01P 1/26)
1/23 . . using ferromagnetic material **[3]**
1/24 . Terminating devices
1/26 . . Dissipative terminations
1/28 . . Short-circuiting plungers
1/30 . for compensation of, or protection against, temperature or moisture effects
1/32 . Non-reciprocal transmission devices (H01P 1/02 to H01P 1/30 take precedence) **[3]**
1/36 . . Isolators **[2,3]**
1/365 . . . Resonance absorption isolators **[3]**
1/37 . . . Field displacement isolators **[3]**
1/375 . . . using Faraday rotators **[3]**
1/38 . . Circulators **[2,3]**
1/383 . . . Junction circulators, e.g. Y-circulators **[3]**
1/387 . . . . Strip line circulators **[3]**
1/39 . . . . Hollow waveguide circulators **[3]**
1/393 . . . using Faraday rotators **[3]**
1/397 . . . using non-reciprocal phase shifters (H01P 1/393 takes precedence) **[3]**

3/00 Waveguides; Transmission lines of the waveguide type

3/02 . with two longitudinal conductors
3/04 . . Lines formed as Lecher wire pairs
3/06 . . Coaxial lines
3/08 . . Microstrips; Strip lines
3/10 . Wire waveguides, i.e. with a single solid longitudinal conductor
3/12 . Hollow waveguides (H01P 3/20 takes precedence)
3/123 . . with a complex or stepped cross-section, e.g. ridged or grooved waveguides (H01P 3/14 takes precedence) **[3]**
3/127 . . with a circular, elliptic, or parabolic cross-section **[3]**
3/13 . . specially adapted for transmission of the TE_{01} circular-electric mode **[2]**
3/14 . . flexible
3/16 . Dielectric waveguides, i.e. without a longitudinal conductor
3/18 . built-up from several layers to increase operating surface, i.e. alternately conductive and dielectric layers
3/20 . Quasi-optical arrangements for guiding a wave, e.g. focusing by dielectric lenses

5/00 Coupling devices of the waveguide type

5/02 . with invariable factor of coupling (H01P 5/12 takes precedence) **[3]**
5/04 . with variable factor of coupling
5/08 . for linking lines or devices of different kinds (H01P 1/16, H01P 5/04 take precedence; linking lines of the same kind but with different dimensions H01P 5/02) **[3]**
5/10 . . for coupling balanced with unbalanced lines or devices
5/103 . . . Hollow-waveguide/coaxial-line transitions **[3]**
5/107 . . . Hollow-waveguide/strip-line transitions **[3]**
5/12 . Coupling devices having more than two ports (H01P 5/04 takes precedence) **[3]**
5/16 . . Conjugate devices, i.e. devices having at least one port decoupled from one other port **[2]**
5/18 . . . consisting of two coupled guides, e.g. directional couplers **[2]**
5/19 . . . of the junction type **[3]**
5/20 . . . . Magic-T junctions **[2,3]**
5/22 . . . . Hybrid ring junctions **[2,3]**

7/00 Resonators of the waveguide type

7/02 . Lecher resonators
7/04 . Coaxial resonators
7/06 . Cavity resonators
7/08 . Strip line resonators **[3]**
7/10 . Dielectric resonators **[3]**

9/00 Delay lines of the waveguide type

9/02 . Helical lines
9/04 . Interdigital lines

11/00 Apparatus or processes specially adapted for manufacturing waveguides or resonators, lines, or other devices of the waveguide type

---

H01Q AERIALS (microwave radiators for near-field therapeutic treatment A61N 5/04; apparatus for testing aerials or for measuring aerial characteristics G01R; waveguides H01P; radiators or aerials for microwave heating H05B 6/72)

(1) This subclass covers:
– in addition to the primary active radiating elements,
(i) secondary devices for absorbing or for modifying the direction or polarisation of waves radiated from aerials, and
(ii) combinations with auxiliary devices such as earthing switches, lead-in devices, and lightning protectors;
– both transmitting and receiving aerials. **[3]**

(2) This subclass does not cover devices of the waveguide type, such as resonators or lines, not designed as radiating elements, which are covered by subclass H01P.

(3) In this subclass, the following expression is used with the meaning indicated:
– "active radiating element" covers corresponding parts of a receiving aerial. **[3]**

Subclass index

1/00 Details of, or arrangements associated with, aerials (arrangements for varying orientation of directional pattern H01Q 3/00)

(1) This group covers only:
– structural details or features of aerials not dependent on electric operation;
– structural details or features applicable to more than one type of aerial or aerial element.

(2) Structural details or features described with reference to, or clearly applicable only to, aerials or aerial elements of a particular type are classified in the group appropriate to that type.

1/02 . Arrangements for de-icing; Arrangements for drying-out

1/04 . Adaptation for subterranean or subaqueous use

1/06 . Means for the lighting or illuminating of aerials, e.g. for purpose of warning

1/08 . Means for collapsing aerials or parts thereof (collapsible loop aerials H01Q 7/02; collapsible H-aerials or Yagi aerials H01Q 19/04)

1/10 . . Telescopic elements

1/12 . Supports; Mounting means (supporting conductors in general H02G 7/00)

1/14 . . for wire or other non-rigid radiating elements

1/16 . . . Strainers, spreaders, or spacers

1/18 . . Means for stabilising aerials on an unstable platform

1/20 . . Resilient mountings

1/22 . . by structural association with other equipment or articles

1/24 . . . with receiving set

1/26 . . . with electric discharge tube

1/27 . Adaptation for use in or on movable bodies (H01Q 1/08, H01Q 1/12, H01Q 1/18 take precedence) **[3]**

1/28 . . Adaptation for use in or on aircraft, missiles, satellites, or balloons **[3]**

1/30 . . . Means for trailing aerials **[3]**

1/32 . . Adaptation for use in or on road or rail vehicles (telescopic elements H01Q 1/10; resilient mountings for aerials H01Q 1/20) **[3]**

1/34 . . Adaptation for use in or on ships, submarines, buoys, or torpedoes (for subaqueous use H01Q 1/04; retractable loop aerials H01Q 7/02) **[3]**

1/36 . Structural form of radiating elements, e.g. cone, spiral, umbrella (H01Q 1/08, H01Q 1/14 take precedence)

1/38 . . formed by a conductive layer on an insulating support (conductors in general H01B 5/14)

1/40 . Radiating elements coated with, or embedded in, protective material

1/42 . Housings not intimately mechanically associated with radiating elements, e.g. radome

1/44 . using equipment having another main function to serve additionally as an aerial (H01Q 1/28 to H01Q 1/34 take precedence)

1/46 . . Electric supply lines or communication lines

1/48 . Earthing means; Earth screens; Counterpoises (earthing pins H01R 4/66)

1/50 . Structural association of aerials with earthing switches, lead-in devices, or lightning protectors (lead-in devices H01B; lightning protectors, switches H01H)

1/52 . Means for reducing coupling between aerials; Means for reducing coupling between an aerial and another structure (absorbing means H01Q 17/00)

3/00 Arrangements for changing or varying the orientation or the shape of the directional pattern of the waves radiated from an aerial or aerial system

3/01 . varying the shape of the aerial or aerial system **[3]**

3/02 . using mechanical movement of aerial or aerial system as a whole

3/04 . . for varying one co-ordinate of the orientation

3/06 . . . over a restricted angle

3/08 . . for varying two co-ordinates of the orientation

3/10 . . . to produce a conical or spiral scan

3/12 . using mechanical relative movement between primary active elements and secondary devices of aerials or aerial systems

3/14 . . for varying the relative position of primary active element and a refracting or diffracting device

3/16 . . for varying relative position of primary active element and a reflecting device

3/18 . . . wherein the primary active element is movable and the reflecting device is fixed

3/20 . . . wherein the primary active element is fixed and the reflecting device is movable

3/22 . varying the orientation in accordance with variation of frequency of radiated wave

3/24 . varying the orientation by switching energy from one active radiating element to another, e.g. for beam switching

3/26 . varying the relative phase or relative amplitude of energisation between two or more active radiating elements; varying the distribution of energy across a radiating aperture (H01Q 3/22, H01Q 3/24 take precedence)
3/28 . . varying the amplitude **[3]**
3/30 . . varying the phase **[3]**
3/32 . . . by mechanical means **[3]**
3/34 . . . by electrical means (active lenses or reflecting arrays H01Q 3/46) **[3]**
3/36 . . . . with variable phase-shifters **[3]**
3/38 . . . . . the phase-shifters being digital **[3]**
3/40 . . . . with phasing matrix **[3]**
3/42 . . . . using frequency-mixing **[3]**
3/44 . varying the electric or magnetic characteristics of reflecting, refracting, or diffracting devices associated with the radiating element **[3]**
3/46 . . Active lenses or reflecting arrays **[3]**

5/00 Arrangements for simultaneous operation of aerials on two or more different wavebands (length of elements adjustable H01Q 9/14; combinations of separate active aerial units operating in different wavebands and connected to a common feeder system H01Q 21/30) **[3]**
5/01 . Resonant aerials **[3]**
5/02 . . for operation of centre-fed aerials which comprise a single, or two or more collinear, substantially straight elongated active elements **[3]**

7/00 Loop aerials with a substantially uniform current distribution around the loop and having a directional radiation pattern in a plane perpendicular to the plane of the loop
7/02 . Collapsible aerials; Retractable aerials
7/04 . Screened aerials (H01Q 7/02, H01Q 7/06 take precedence)
7/06 . with core of ferromagnetic material (H01Q 7/02 takes precedence)
7/08 . . Ferrite rod or like elongated core

9/00 Electrically-short aerials having dimensions not more than twice the operating wavelength and consisting of conductive active radiating elements (loop aerials H01Q 7/00; waveguide horns or mouths H01Q 13/00; slot aerials H01Q 13/00; combinations of active elements with secondary devices to give desired directional characteristic H01Q 19/00; combinations of two or more active elements H01Q 21/00)
9/02 . Non-resonant aerials
9/04 . Resonant aerials
9/06 . . Details
9/08 . . . Junction boxes specially adapted for supporting adjacent ends of collinear rigid elements
9/10 . . . Junction boxes specially adapted for supporting adjacent ends of divergent elements
9/12 . . . . adapted for adjustment of angle between elements
9/14 . . . Length of element or elements adjustable (telescopic elements H01Q 1/10)
9/16 . . with feed intermediate between the extremities of the aerial, e.g. centre-fed dipole (H01Q 9/44 takes precedence)
9/18 . . . Vertical disposition of the aerial
9/20 . . . Two collinear substantially straight active elements; Substantially straight single active elements (H01Q 9/28 takes precedence)
9/22 . . . . Rigid rod or equivalent tubular element or elements
9/24 . . . . Shunt feed arrangements to single active elements, e.g. for delta matching
9/26 . . . with folded element or elements, the folded parts being spaced apart a small fraction of operating wavelength (resonant loop aerials H01Q 7/00)
9/27 . . . . Spiral aerials **[3]**
9/28 . . . Conical, cylindrical, cage, strip, gauze, or like elements having an extended radiating surface; Elements comprising two conical surfaces having collinear axes and adjacent apices and fed by two-conductor transmission lines (biconical horns H01Q 13/04)
9/30 . . with feed to end of elongated active element, e.g. unipole (H01Q 9/44 takes precedence)
9/32 . . . Vertical arrangement of element (H01Q 9/40 takes precedence)
9/34 . . . . Mast, tower, or like self-supporting or stay-supported aerials
9/36 . . . . with top loading
9/38 . . . . with counterpoise (with counterpoise comprising elongated elements coplanar with the active element H01Q 9/44)
9/40 . . . Element having extended radiating surface
9/42 . . . with folded element, the folded parts being spaced apart a small fraction of the operating wavelength
9/43 . . . . Scimitar aerials **[3]**
9/44 . . with plurality of divergent straight elements, e.g. V-dipole, X-aerial; with plurality of elements having mutually inclined substantially straight portions (turnstile aerials H01Q 21/26)
9/46 . . . with rigid elements diverging from single point

11/00 Electrically-long aerials having dimensions more than twice the shortest operating wavelength and consisting of conductive active radiating elements (leaky-waveguide aerials, slot aerials H01Q 13/00; combinations of active elements with secondary devices to give desired directional characteristic H01Q 19/00; aerial arrays or systems H01Q 21/00)
11/02 . Non-resonant aerials, e.g. travelling-wave aerial
11/04 . . with parts bent, folded, shaped, screened, or electrically loaded to obtain desired phase relation of radiation from selected sections of the aerial (rhombic aerials, V-aerials H01Q 11/06)
11/06 . . Rhombic aerials; V-aerials
11/08 . . Helical aerials
11/10 . . Log-periodic aerials (H01Q 11/08 takes precedence) **[3]**
11/12 . Resonant aerials
11/14 . . with parts bent, folded, shaped, or screened, or with phasing impedances, to obtain desired phase relation of radiation from selected sections of the aerial or to obtain desired polarisation effects
11/16 . . . in which the selected sections are collinear
11/18 . . . in which the selected sections are parallelly spaced **[3]**
11/20 . . V-aerials

13/00 Waveguide horns or mouths; **Slot aerials**; **Leaky-waveguide aerials**; **Equivalent structures causing radiation along the transmission path of a guided wave** (multimode aerials H01Q 25/04)
13/02 . Waveguide horns

13/04 . . Biconical horns (biconical dipoles comprising two conical surfaces having collinear axes and adjacent apices and fed by a two-conductor transmission line H01Q 9/28)
13/06 . Waveguide mouths (horns H01Q 13/02)
13/08 . Radiating ends of two-conductor microwave transmission lines, e.g. of coaxial lines, of microstrip lines
13/10 . Resonant slot aerials
13/12 . . Longitudinally slotted cylinder aerials; Equivalent structures
13/14 . . . Skeleton cylinder aerials
13/16 . . Folded slot aerials
13/18 . . the slot being backed by, or formed in boundary wall of, a resonant cavity (longitudinally slotted cylinder H01Q 13/12)
13/20 . Non-resonant leaky-waveguide or transmission-line aerials; Equivalent structures causing radiation along the transmission path of a guided wave
13/22 . . Longitudinal slot in boundary wall of waveguide or transmission line
13/24 . . constituted by a dielectric or ferromagnetic rod or pipe (H01Q 13/28 takes precedence)
13/26 . . Surface waveguide constituted by a single conductor, e.g. strip conductor
13/28 . . comprising elements constituting electric discontinuities and spaced in direction of wave propagation, e.g. dielectric elements, conductive elements forming artificial dielectric (Yagi aerials H01Q 19/30)

15/00 Devices for reflection, refraction, diffraction, or polarisation of waves radiated from an aerial, e.g. quasi-optical devices (variable for purpose of altering directivity H01Q 3/00; arrangements of such devices for guiding waves H01P 3/20; variable for purpose of modulation H03C 7/02)

15/02 . Refracting or diffracting devices, e.g. lens, prism
15/04 . . comprising wave-guiding channel or channels bounded by effective conductive surfaces substantially perpendicular to the electric vector of the wave, e.g. parallel-plate waveguide lens
15/06 . . comprising plurality of wave-guiding channels of different length
15/08 . . formed of solid dielectric material
15/10 . . comprising three-dimensional array of impedance discontinuities, e.g. holes in conductive surfaces or conductive discs forming artificial dielectric (leaky-waveguide aerials H01Q 13/28)
15/12 . . functioning also as polarisation filter
15/14 . Reflecting surfaces; Equivalent structures
15/16 . . curved in two dimensions, e.g. paraboloidal
15/18 . . comprising plurality of mutually inclined plane surfaces, e.g. corner reflector
15/20 . . . Collapsible reflectors
15/22 . . functioning also as polarisation filter
15/23 . Combinations of reflecting surfaces with refracting or diffracting devices **[3]**
15/24 . Polarising devices; Polarisation filters (devices functioning simultaneously both as polarisation filters and as refracting or diffracting devices or as reflectors H01Q 15/12, H01Q 15/22)

17/00 Devices for absorbing waves radiated from an aerial; Combinations of such devices with active aerial elements or systems

19/00 Combinations of primary active aerial elements and units with secondary devices, e.g. with quasi-optical devices, for giving the aerial a desired directional characteristic

19/02 . Details
19/04 . . Means for collapsing H-aerials or Yagi aerials
19/06 . using refracting or diffracting devices, e.g. lens
19/08 . . for modifying the radiation pattern of a radiating horn in which it is located
19/09 . . wherein the primary active element is coated with or embedded in a dielectric or magnetic material (protective material H01Q 1/40; with variable characteristics H01Q 3/44) **[3]**
19/10 . using reflecting surfaces
19/12 . . wherein the surfaces are concave (H01Q 19/18 takes precedence) **[3]**
19/13 . . . the primary radiating source being a single radiating element, e.g. a dipole, a slot, a waveguide termination (H01Q 19/15 takes precedence) **[3]**
19/15 . . . the primary radiating source being a line source, e.g. leaky waveguide aerials **[3]**
19/17 . . . the primary radiating source comprising two or more radiating elements (H01Q 19/15, H01Q 25/00 take precedence) **[3]**
19/18 . . having two or more spaced reflecting surfaces (producing pencil beam by two cylindrical reflectors with their focal lines orthogonally disposed H01Q 19/20)
19/185 . . . wherein the surfaces are plane **[3]**
19/19 . . . comprising one main concave reflecting surface associated with an auxiliary reflecting surface **[3]**
19/195 . . . . wherein a reflecting surface acts also as a polarisation filter or a polarising device **[3]**
19/20 . Producing pencil beam by two cylindrical focusing devices with their focal lines orthogonally disposed
19/22 . using a secondary device in the form of a single substantially straight conductive element
19/24 . . the primary active element being centre-fed and substantially straight, e.g. H-aerial
19/26 . . the primary active element being end-fed and elongated
19/28 . using a secondary device in the form of two or more substantially straight conductive elements (log-periodic aerials H01Q 11/10; constituting a reflecting surface H01Q 19/10)
19/30 . . the primary active element being centre-fed and substantially straight, e.g. Yagi aerial
19/32 . . the primary active element being end-fed and elongated

21/00 Aerial arrays or systems (producing a beam the orientation or the shape of the directional pattern of which can be changed or varied H01Q 3/00; electrically-long aerials H01Q 11/00)

21/06 . Arrays of individually energised aerial units similarly polarised and spaced apart
21/08 . . the units being spaced along, or adjacent to, a rectilinear path
21/10 . . . Collinear arrangements of substantially straight elongated conductive units
21/12 . . . Parallel arrangements of substantially straight elongated conductive units (travelling-wave aerials comprising transmission line loaded with transverse elements, e.g. "fishbone" aerial, H01Q 11/04)
21/14 . . . . Adcock aerials

21/16 . . . . . U-type
21/18 . . . . . H-type
21/20 . . the units being spaced along, or adjacent to, a curvilinear path
21/22 . . Aerial units of the array energised non-uniformly in amplitude or phase, e.g. tapered array, binomial array
21/24 . Combinations of aerial units polarised in different directions for transmitting or receiving circularly and elliptically polarised waves or waves linearly polarised in any direction
21/26 . . Turnstile or like aerials comprising arrangements of three or more elongated elements disposed radially and symmetrically in a horizontal plane about a common centre
21/28 . Combinations of substantially independent non-interacting aerial units or systems
21/29 . Combinations of different interacting aerial units for giving a desired directional characteristic (H01Q 25/00 takes precedence) **[3]**
21/30 . Combinations of separate aerial units operating in different wavebands and connected to a common feeder system

23/00 Aerials with active circuits or circuit elements integrated within them or attached to them [3]

(1) This group covers only such combinations in which the type of aerial or aerial element is immaterial. **[3]**
(2) Combinations with a particular type of aerial are classified in the group appropriate to that type. **[3]**

25/00 Aerials or aerial systems providing at least two radiating patterns (arrangements for changing or varying the orientation or the shape of the directional pattern H01Q 3/00) **[3]**
25/02 . providing sum and difference patterns (multimode aerials H01Q 25/04) **[3]**
25/04 . Multimode aerials **[3]**

H01R ELECTRICALLY-CONDUCTIVE CONNECTIONS; **STRUCTURAL ASSOCIATIONS OF A PLURALITY OF MUTUALLY-INSULATED ELECTRICAL CONNECTING ELEMENTS**; **COUPLING DEVICES**; **CURRENT COLLECTORS** (switches, fuses H01H; coupling devices of the waveguide type H01P 5/00; switching arrangements for the supply or distribution of electric power H02B; installations of electric cables or lines, or of combined optical and electric cables or lines, or of auxiliary apparatus H02G; printed means for providing electric connections to or between printed circuits H05K)

(1) This subclass covers:
– all kinds of contact-making disconnectable and non-disconnectable electric line connecting devices, coupling devices, lamp or similar holders or current collectors for all kinds of electric lines, cables or apparatus;
– non-printed means for electric connections to or between printed circuits.
(2) This subclass does not cover mounting of connections in or on specified apparatus. Such mounting is covered by the relevant subclass for such apparatus, e.g. mounting in junction or distribution boxes is covered by subclass H02B or H02G, high-temperature connections for heating elements is covered by group H05B 3/08. Structural association of one part of a coupling device with specific electric apparatus is classified with the apparatus, e.g. association of cap with incandescent lamp is covered by subclass H01K.
(3) In this subclass, the following expressions are used with the meaning indicated: **[7]**
– "pin" is a rigid or flexible conductor for engagement with an appropriately shaped socket to establish contact therewith; **[7]**
– "socket" is a rigid or flexible conductor for receiving an appropriate pin to establish electrical contact therewith; **[7]**
– "coupling devices" are devices having two or more parts specially adapted so as to be capable of ready and repeated physical engagement or disengagement, without the use of a tool, for the purpose of establishing or breaking an electrical path. Examples of such devices having more than two parts are: a) adapters for linking two coupling parts; and b) rails or bus-bars provided with a plurality of discrete connecting locations for counterparts. **[7]**
(4) General details are classified in groups H01R 4/00, H01R 9/00, H01R 11/00, H01R 12/00.

Subclass index

3/00 **Electrically-conductive connections not otherwise provided for**

3/08 . for making connection to a liquid (electrodes for batteries or accumulators H01M)

4/00 **Electrically-conductive connections between two or more conductive members in direct contact, i.e. touching one another**; **Means for effecting or maintaining such contact**; **Electrically-conductive connections having two or more spaced connecting locations for conductors and using contact members penetrating insulation** (details of contacts of coupling devices H01R 13/00; coupling devices H01R 12/70, H01R 24/00 to H01R 33/00; flexible or turnable line connectors H01R 35/00 non-rotary current collectors H01R 41/00) **[3]**

4/01 . Connections using shape memory materials, e.g. shape memory metal **[7]**

4/02 . Soldered or welded connections (H01R 4/62, H01R 12/59, H01R 12/65 take precedence) **[3,7]**

4/04 . using electrically conductive adhesives **[3]**

4/06 . Riveted connections (by explosion H01R 4/08) **[3]**

4/08 . effected by an explosion **[3]**

4/10 . effected solely by twisting, wrapping, bending, crimping, or other permanent deformation **[3]**

4/12 . . by twisting **[3]**

4/14 . . by wrapping **[3]**

4/16 . . by bending **[3]**

4/18 . . by crimping (H01R 4/01, H01R 4/24 take precedence) **[3,7]**

4/20 . . . using a crimping sleeve **[3]**

4/22 . End caps, i.e. caps of insulating or conductive material for covering or maintaining connections between wires entering the cap from the same end **[3]**

4/24 . Connections using needle-point, slotted-plate, or analogous contact members penetrating insulation or cable strands **[3]**

4/26 . Connections in which at least one of the connecting parts has projections which bite into or engage the other connecting part in order to improve the contact (using shape memory materials H01R 4/01) **[3]**

4/28 . Clamped connections; Spring connections (made by means of terminals specially adapted for contact with, or insertion into, printed circuits H01R 12/00) **[3,7]**

4/30 . . using a screw or nut clamping member (H01R 4/50 takes precedence; using a clamping member acted on by screw or nut H01R 4/38) **[3]**

4/32 . . . Conductive members located in slot or hole in screw **[3]**

4/34 . . . Conductive members located under head of screw **[3]**

4/36 . . . Conductive members located under tip of screw **[3]**

4/38 . . using a clamping member acted on by screw or nut (H01R 4/50 takes precedence) **[3]**

4/40 . . . Pivotable clamping member **[3]**

4/42 . . . Clamping area to one side of screw only **[3]**

4/44 . . . Clamping areas on both sides of screw **[3]**

4/46 . . . Clamping area between two screws placed side by side **[3]**

4/48 . . using a spring, clip or other resilient member (H01R 4/52 takes precedence) **[3]**

4/50 . . using a cam, wedge, cone or ball **[3]**

4/52 . . . which is spring loaded **[3]**

4/56 . one conductor screwing into another **[3]**

4/58 . characterised by the form or material of the contacting members (H01R 4/01 takes precedence) **[3,7]**

4/60 . . Connections between or with tubular conductors (H01R 4/56 takes precedence) **[3]**

4/62 . . Connections between conductors of different materials; Connections between or with aluminium or steel-core aluminium conductors (H01R 4/68 takes precedence) **[3]**

4/64 . . Connections between or with conductive parts having primarily a non-electric function, e.g. frame, casing, rail **[3]**

4/66 . . Connections with the terrestrial mass, e.g. earth plate, earth pin **[3]**

4/68 . . Connections to or between superconductive conductors **[3]**

4/70 . Insulation of connections (end caps H01R 4/22) **[3]**

4/72 . . using a heat shrinking insulating sleeve **[4]**

9/00 **Structural associations of a plurality of mutually-insulated electrical connecting elements, e.g. terminal strips, terminal blocks**; **Terminals or binding posts mounted upon a base or in a case**; **Bases therefor** (details of direct connections or connections using contact members penetrating insulation H01R 4/00; specially adapted for printed circuits, flat or ribbon cables, or like generally planar structures H01R 12/00; coupling devices H01R 12/70, H01R 24/00 to H01R 33/00; flexible or turnable line connectors H01R 35/00) **[3]**

9/03 . Connectors arranged to contact a plurality of the conductors of a multiconductor cable **[3]**

9/05 . . for coaxial cables **[3]**

9/053 . . . using contact members penetrating insulation **[7]**

9/11 . End pieces for multiconductor cables supported by the cable and for facilitating connections to other conductive members **[3]**

9/15 . Connectors for wire wrapping **[3]**

9/16 . Fastening of connecting parts to base or case; Insulating connecting parts from base or case (lead-through insulators H01B 17/26) **[3]**

9/18 . . Fastening by means of screw or nut **[3]**

9/20 . . Fastening by means of rivet or eyelet **[3]**

9/22 . Bases, e.g. strip, block, panel **[3]**

9/24 . . Terminal blocks **[3]**

9/26 . . . Clip-on terminal blocks for side-by-side rail or strip-mounting **[3]**

9/28 . . Terminal boards **[3]**

11/00 **Individual connecting elements providing two or more spaced connecting locations for conductive members which are, or may be, thereby interconnected, e.g. end pieces for wires or cables supported by the wire or cable and having means for facilitating electrical connection to some other wire, terminal, or conductive member, blocks of binding posts** (connections between members in direct contact H01R 4/00; structural associations of a plurality of mutually-insulated electrical connecting elements H01R 9/00; coupling devices H01R 12/70, H01R 24/00 to H01R 29/00, H01R 33/00; flexible or turnable line connectors H01R 35/00) **[3]**

11/01 . characterised by the form or arrangement of the conductive interconnection between their connecting locations **[3]**

11/03 . characterised by the type of the connecting locations on the individual element or by the type of the connections between the connecting locations and the conductive members (H01R 11/11 takes precedence) **[3]**

11/05 . . the connecting locations having different types of direct connections **[3]**

11/07 . . the connecting locations being of the same type but different sizes **[3]**

11/09 . . the connecting locations being identical **[3]**

11/11 . End pieces or tapping pieces for wires or cables, supported by the wire or cable and having means for facilitating electrical connection to some other wire, terminal, or conductive member (H01R 11/01 takes precedence) **[3]**

11/12 . . End pieces terminating in an eye, hook, or fork **[3]**

11/14 . . . the hook being adapted for hanging on overhead or other suspended lines, e.g. hot line clamp **[3]**

11/15 . . . . Hook in the form of a screw clamp **[3]**

11/16 . . End pieces terminating in a soldering tip or socket **[3]**

11/18 . . End pieces terminating in a probe **[3]**

11/20 . . End pieces terminating in a needle point or analogous contact for penetrating insulation or cable strands **[3]**

11/22 . . End pieces terminating in a spring clip **[3]**

11/24 . . . with gripping jaws, e.g. crocodile clip **[3]**

11/26 . . End pieces terminating in a screw clamp, screw or nut **[3]**

11/28 . . End pieces consisting of a ferrule or sleeve **[3]**

11/30 . . End pieces held in contact by a magnet **[3]**

11/32 . . End pieces with two or more terminations **[3]**

12/00 **Structural associations of a plurality of mutually-insulated electrical connecting elements, specially adapted for printed circuits, e.g. printed circuit boards (PCBs), flat or ribbon cables, or like generally planar structures, e.g. terminal strips, terminal blocks**; **Coupling devices specially adapted for printed circuits, flat or ribbon cables, or like generally planar structures**; **Terminals specially adapted for contact with, or insertion into, printed circuits, flat or ribbon cables, or like generally planar structures** (printed connections to, or between, printed circuits H05K 1/11) **[7]**

12/50 . *Fixed connections* **[2011.01]**

12/51 . . *for rigid printed circuits or like structures* **[2011.01]**

12/52 . . . *connecting to other rigid printed circuits or like structures* **[2011.01]**

12/53 . . . *connecting to cables except for flat or ribbon cables* **[2011.01]**

12/55 . . . *characterised by the terminals* **[2011.01]**

12/57 . . . . *surface mounting terminals* **[2011.01]**

12/58 . . . . *terminals for insertion into holes* **[2011.01]**

12/59 . . *for flexible printed circuits, flat or ribbon cables or like structures* **[2011.01]**

12/61 . . . *connecting to flexible printed circuits, flat or ribbon cables or like structures* **[2011.01]**

12/62 . . . *connecting to rigid printed circuits or like structures* **[2011.01]**

12/63 . . . *connecting to another shape cable* **[2011.01]**

12/65 . . . *characterised by the terminal* **[2011.01]**

12/67 . . . . *insulation penetrating terminals* **[2011.01]**

12/68 . . . . . *comprising deformable portions* **[2011.01]**

12/69 . . . . *deformable terminals e.g. crimping terminals* **[2011.01]**

12/70 . *Coupling devices* **[2011.01]**

12/71 . . *for rigid printing circuits or like structures* **[2011.01]**

12/72 . . . *coupling with the edge of the rigid printed circuits or like structures* **[2011.01]**

12/73 . . . . *connecting to other rigid printed circuits or like structures* **[2011.01]**

12/75 . . . *connecting to cables except for flat or ribbon cables* **[2011.01]**

12/77 . . *for flexible printed circuits, flat or ribbon cables or like structures* **[2011.01]**

12/78 . . . *connecting to other flexible printed circuits, flat or ribbon cables or like structures* **[2011.01]**

12/79 . . . *connecting to rigid printed circuits or like structures* **[2011.01]**

12/81 . . . *connecting to another cable except for flat or ribbon cable* **[2011.01]**

12/82 . . *connected with low or zero insertion force* **[2011.01]**

12/83 . . . *connected with pivoting of printed circuits or like after insertion* **[2011.01]**

12/85 . . . *contact pressure producing means, contacts activated after insertion of printed circuits or like structures* **[2011.01]**

12/87 . . . . *acting automatically by insertion of rigid printed or like structures* **[2011.01]**

12/88 . . . . *acting manually by rotating or pivoting connector housing parts* **[2011.01]**

12/89 . . . . *acting manually by moving connector housing parts linearly e.g. slider* **[2011.01]**

12/91 . . *allowing relative movement between coupling parts e.g. floating or self aligning* **[2011.01]**

13/00 **Details of coupling devices of the kinds covered by groups H01R 12/70 or H01R 24/00 to H01R 33/00 [1,7]**

13/02 . Contact members

13/03 . . characterised by the material, e.g. plating or coating materials **[4]**

13/04 . . Pins or blades for co-operation with sockets

13/05 . . . Resilient pins or blades (carrying separate resilient parts H01R 13/15) **[3]**

13/08 . . . Resiliently-mounted rigid pins or blades

13/10 . . Sockets for co-operation with pins or blades

13/11 . . . Resilient sockets (carrying separate resilient parts H01R 13/15) **[3]**

13/115 . . . . U-shaped sockets having inwardly-bent legs **[3]**

13/14 . . . Resiliently-mounted rigid sockets
13/15 . . Pins, blades or sockets having separate spring member for producing or increasing contact pressure **[3]**
13/17 . . . the spring member being on the pin **[3]**
13/18 . . . with the spring member surrounding the socket
13/187 . . . the spring member being in the socket **[3]**
13/193 . . Means for increasing contact pressure at the end of engagement of coupling part **[3]**
13/20 . . Pins, blades, or sockets shaped, or provided with separate member, to retain co-operating parts together
13/207 . . . by screw-in connection **[3]**
13/213 . . . by bayonet connection **[3]**
13/22 . . Contacts for co-operating by abutting
13/24 . . . resilient; resiliently mounted
13/26 . . Pin or blade contacts for sliding co-operation on one side only
13/28 . . Contacts for sliding co-operation with identically-shaped contact, e.g. for hermaphroditic coupling devices
13/33 . . Contact members made of resilient wire **[3]**
13/35 . . for non-simultaneous co-operation with different types of contact member, e.g. socket co-operating with either round or flat pin **[3]**
13/40 . Securing contact members in or to a base or case; Insulating of contact members
13/405 . . Securing in non-demountable manner, e.g. moulding, riveting **[3]**
13/41 . . . by frictional grip in grommet, panel or base **[3]**
13/415 . . . by permanent deformation of contact member **[3]**
13/42 . . Securing in a demountable manner
13/422 . . . in resilient one-piece base or case; One-piece base or case formed with resilient locking means **[3]**
13/424 . . . in base or case composed of a plurality of insulating parts having at least one resilient insulating part **[3]**
13/426 . . . by separate resilient retaining piece supported by base or case, e.g. collar **[3]**
13/428 . . . by resilient locking means on the contact members; by locking means on resilient contact members **[3]**
13/432 . . . . by stamped-out resilient tongue snapping behind shoulder in base or case **[3]**
13/434 . . . . by separate resilient locking means on contact member, e.g. retainer collar or ring around contact member **[3]**
13/436 . . . Securing a plurality of contact members by one locking piece **[3]**
13/44 . Means for preventing access to live contacts
13/443 . . Dummy plugs **[7]**
13/447 . . Shutter or cover plate **[3]**
13/453 . . . Shutter or cover plate opened by engagement of counterpart **[3]**
13/46 . Bases; Cases
13/50 . . formed as an integral body (H01R 13/514 takes precedence) **[3]**
13/502 . . composed of different pieces (H01R 13/514 takes precedence) **[3]**
13/504 . . . different pieces being moulded, cemented, welded, e.g. ultrasonic, or swaged together **[3]**
13/506 . . . assembled by snap action of the parts **[3]**
13/508 . . . assembled by clip or spring **[3]**
13/512 . . . assembled by screw or screws **[3]**
13/514 . . formed as a modular block or assembly, i.e. composed of co-operating parts provided with contact members or holding contact members between them **[3]**
13/516 . . Means for holding or embracing insulating body, e.g. casing **[3]**
13/518 . . . for holding or embracing several coupling parts, e.g. frames **[3]**
13/52 . . Dustproof, splashproof, drip-proof, waterproof, or flameproof cases
13/523 . . . for use under water **[3]**
13/527 . . . Flameproof cases (H01R 13/70 takes precedence) **[3]**
13/53 . . Bases or cases for heavy duty; Bases or cases with means for preventing corona or arcing **[3]**
13/533 . . Bases or cases made for use in extreme conditions, e.g. high temperature, radiation, vibration, corrosive environment, pressure (H01R 13/52 takes precedence) **[3]**
13/56 . Means for preventing chafing or fracture of flexible leads at outlet from coupling part
13/58 . Means for relieving strain on wire connection, e.g. cord grip
13/585 . . Grip increasing with strain force **[3]**
13/59 . . Threaded ferrule or bolt operating in a direction parallel to the cable or wire **[3]**
13/595 . . Bolts operating in a direction transverse to the cable or wire **[3]**
13/60 . Means for supporting coupling part when not engaged
13/62 . Means for facilitating engagement or disengagement of coupling parts or for holding them in engagement **[3]**
13/621 . . Bolt, set screw or screw clamp **[3,5]**
13/622 . . Screw-ring or screw-casing (H01R 13/623 takes precedence) **[5]**
13/623 . . Casing or ring with helicoidal groove **[3,5]**
13/625 . . Casing or ring with bayonet engagement **[3,5]**
13/627 . . Snap-action fastening **[3]**
13/629 . . Additional means for facilitating engagement or disengagement of coupling parts, e.g. aligning or guiding means, levers, gas pressure **[3]**
13/631 . . . for engagement only **[3]**
13/633 . . . for disengagement only **[3]**
13/635 . . . . by mechanical pressure, e.g. spring force **[3]**
13/637 . . . . by fluid pressure, e.g. explosion **[3]**
13/639 . . Additional means for holding or locking coupling parts together after engagement **[3]**
13/64 . Means for preventing, inhibiting or avoiding incorrect coupling
13/641 . . by indicating incorrect coupling; by indicating correct or full engagement **[7]**
13/642 . . by position or shape of contact members **[3]**
13/645 . . by exchangeable elements on case or base **[3]**
13/646 . *specially adapted for high-frequency, e.g. structures providing an impedance match or phase match (non-coaxed protective earth or shield arrangements H01R 13/648 to H01R 13/6599; coaxed connectors specifically adapted for high frequency H01R 24/40 to H01R 24/56)* **[7,2011.01]**
13/6461 . . *Means for preventing cross-talk* **[2011.01]**
13/6463 . . . *using twisted pairs of wires* **[2011.01]**
13/6464 . . . *by adding capacitive elements* **[2011.01]**
13/6466 . . . . *on substrates, e.g. PCBs [Printed Circuit Boards]* **[2011.01]**
13/6467 . . . *by cross-over of signal conductors* **[2011.01]**

13/6469 . . . . *on substrates* **[2011.01]**
13/6471 . . . *by special arrangement of ground and signal conductors, e.g. GSGS [Ground-Signal-Ground-Signal]* **[2011.01]**
13/6473 . . *Impedance matching* **[2011.01]**
13/6474 . . . *by variation of conductive properties, e.g. by variation of dimensions* **[2011.01]**
13/6476 . . . . *by making an aperture, e.g. a hole* **[2011.01]**
13/6477 . . . *by variation of dielectric properties* **[2011.01]**
13/648 . Protective earth or shield arrangements on coupling devices (coaxially arranged shields H01R 24/38) **[3]**
13/652 . . with earth pin, blade or socket **[3]**
13/655 . . with earth brace **[3]**
13/658 . . *High frequency shielding arrangements, e.g. against EMI [Electro-Magnetic Interference] or EMP [Electro-Magnetic Pulse]* **[3,2011.01]**
13/6581 . . . *Shield structure* **[2011.01]**
13/6582 . . . . *with resilient means for engaging mating connector* **[2011.01]**
13/6583 . . . . . *with separate conductive resilient members between mating shield members* **[2011.01]**
13/6584 . . . . . . *formed by conductive elastomeric members, e.g. flat gaskets or O-rings* **[2011.01]**
13/6585 . . . . *Shielding material individually surrounding or interposed between mutually spaced contacts* **[2011.01]**
13/6586 . . . . . *for separating multiple connector modules* **[2011.01]**
13/6587 . . . . . . *for mounting on PCBs* **[2011.01]**
13/6588 . . . . . *with through openings for individual contacts* **[2011.01]**
13/6589 . . . . . *with wires separated by conductive housing parts* **[2011.01]**
13/659 . . . . *with plural ports for distinct connectors* **[2011.01]**
13/6591 . . . *Specific features or arrangements of connection of shield to conductive members* **[2011.01]**
13/6592 . . . . *the conductive member being a shielded cable* **[2011.01]**
13/6593 . . . . . *the shield being composed of different pieces* **[2011.01]**
13/6594 . . . . *the shield being mounted on a PCB and connected to conductive members* **[2011.01]**
13/6595 . . . . . *with separate members fixing the shield to the PCB* **[2011.01]**
13/6596 . . . . *the conductive member being a metal grounding panel* **[2011.01]**
13/6597 . . . . *the conductive member being a contact of the connector* **[2011.01]**
13/6598 . . . *Shield material* **[2011.01]**
13/6599 . . . . *Dielectric material made conductive, e.g. plastic material coated with metal* **[2011.01]**
13/66 . Structural association with built-in electrical component (coupling devices having concentrically or coaxially-arranged contacts H01R 24/38 to H01R 24/56)
13/68 . . *with built-in fuse* **[1,2011.01]**
13/684 . . . *the fuse being removable* **[2011.01]**
13/688 . . . . *with housing part adapted for accessing the fuse* **[2011.01]**
13/692 . . . . . *Turnable housing part* **[2011.01]**
13/696 . . . *the fuse being integral with the terminal, e.g. pin or socket* **[2011.01]**
13/70 . . with built-in switch
13/703 . . . operated by engagement or disengagement of coupling parts (H01R 13/71 takes precedence) **[3]**
13/707 . . . interlocked with contact members or counterpart **[3]**
13/71 . . . Contact members of coupling parts operating as switch **[3]**
13/713 . . . the switch being a safety switch **[3]**
13/717 . . with built-in light source **[3]**
13/719 . . *specially adapted for high frequency, e.g. with filters* **[4,2011.01]**
13/7193 . . . *with ferrite filters* **[2011.01]**
13/7195 . . . *with planar filters with openings for contacts* **[2011.01]**
13/7197 . . . *with filters integral with or fitted onto contacts, e.g. tubular filters* **[2011.01]**
13/72 . Means for accommodating flexible lead within the holder
13/73 . Means for mounting coupling parts to apparatus or structures, e.g. to a wall **[4]**
13/74 . . for mounting coupling parts in openings of a panel **[3]**

24/00 ***Two-part coupling devices, or either of their cooperating parts, characterised by their overall structure*** *(specially adapted for printed circuits, flat or ribbon cables, or like structures H01R 12/00; specially adapted for supporting apparatus H01R 33/00)* **[7,2011.01]**

Note

In this group, it is desirable to add the indexing codes of groups H01R 101/00 to H01R 107/00.

24/20 . *Coupling parts carrying sockets, clips or analogous contacts and secured only to wire or cable* **[2011.01]**
24/22 . . *with additional earth or shield contacts* **[2011.01]**
24/28 . *Coupling parts carrying pins, blades or analogous contacts and secured only to wire or cable* **[2011.01]**
24/30 . . *with additional earth or shield contacts* **[2011.01]**
24/38 . *having concentrically or coaxially arranged contacts* **[2011.01]**
24/40 . . *specially adapted for high frequency* **[2011.01]**
24/42 . . . *comprising impedance matching means or electrical components, e.g. filters or switches* **[2011.01]**
24/44 . . . . *comprising impedance matching means* **[2011.01]**
24/46 . . . . *comprising switches* **[2011.01]**
24/48 . . . . *comprising protection devices, e.g. overvoltage protection* **[2011.01]**
24/50 . . . *mounted on a PCB [Printed Circuit Board]* **[2011.01]**
24/52 . . . *mounted in or to a panel or structure* **[2011.01]**
24/54 . . . *Intermediate parts, e.g. adapters, splitters or elbows* **[2011.01]**
24/56 . . . *specially adapted for specific shapes of cables, e.g. corrugated cables, twisted pair cables, cables with two screens or hollow cables* **[2011.01]**
24/58 . *Contacts spaced along longitudinal axis of engagement* **[2011.01]**
24/60 . *Contacts spaced along planar side wall transverse to longitudinal axis of engagement* **[2011.01]**

24/62 . . *Sliding engagements with one side only, e.g. modular jack coupling devices* **[2011.01]**
24/64 . . . *for high frequency, e.g. RJ 45* **[2011.01]**
24/66 . *with pins, blades or analogous contacts and secured to apparatus or structure, e.g. to a wall* **[2011.01]**
24/68 . . *mounted on directly pluggable apparatus* **[2011.01]**
24/70 . . *with additional earth or shield contacts* **[2011.01]**
24/76 . *with sockets, clips or analogous contacts and secured to apparatus or structure, e.g. to a wall* **[2011.01]**
24/78 . . *with additional earth or shield contacts* **[2011.01]**
24/84 . *Hermaphroditic coupling devices* **[2011.01]**
24/86 . *Parallel contacts arranged about a common axis* **[2011.01]**

25/00 **Coupling parts adapted for simultaneous co-operation with two or more identical counterparts, e.g. for distributing energy to two or more circuits** (supported only by co-operation with a counterpart H01R 31/00; with a holder adapted for supporting apparatus to which its counterpart is attached H01R 33/88)
25/14 . Rails or bus-bars constructed so that the counterparts can be connected thereto at any point along their length (supporting elements for lighting devices, displaceable along guiding elements and making electrical contact with conductors running along the guiding elements F21V 21/35; installations of bus-bars H02G 5/00) **[3]**
25/16 . Rails or bus-bars provided with a plurality of discrete connecting locations for counterparts (installations of bus-bars H02G 5/00) **[3]**

27/00 **Coupling parts adapted for co-operation with two or more dissimilar counterparts** (supported only by co-operation with a counterpart H01R 31/00; with a holder adapted for supporting apparatus to which its counterpart is attached H01R 33/90)
27/02 . for simultaneous co-operation with two or more counterparts

29/00 **Coupling parts for selective co-operation with a counterpart in different ways to establish different circuits, e.g. for voltage selection, for series/parallel selection**

31/00 **Coupling parts supported only by co-operation with counterpart**
31/02 . Intermediate parts for distributing energy to two or more circuits in parallel, e.g. splitter (for linking two coupling parts H01R 31/06; with a holder adapted for supporting apparatus to which its counterpart is attached H01R 33/92)
31/06 . Intermediate parts for linking two coupling parts, e.g. adapter (with a holder adapted for supporting apparatus to which its counterpart is attached H01R 33/94) **[4]**
31/08 . Short-circuiting members for bridging contacts in a counterpart (insulating members inserted between normally-closed contacts H01H 27/04)

33/00 **Coupling devices specially adapted for supporting apparatus and having one part acting as a holder providing support and electrical connection via a counterpart which is structurally associated with the apparatus, e.g. lamp holders**; **Separate parts thereof** (structural association of counterpart with specific apparatus, see the relevant subclass for the apparatus)
33/02 . Single-pole devices, e.g. holder for supporting one end of a tubular incandescent or neon lamp
33/05 . Two-pole devices **[4]**
33/06 . . with two current-carrying pins, blades, or analogous contacts, having their axes parallel to each other **[4]**
33/08 . . . for supporting tubular fluorescent lamp **[4]**
33/09 . . . for baseless lamp bulb **[4]**
33/18 . . having only abutting contacts
33/20 . . having concentrically or coaxially arranged contacts
33/22 . . for screw type base, e.g. for lamp **[4]**
33/46 . . for bayonet type base **[4]**
33/72 . Three-pole devices
33/74 . Devices having four or more poles
33/76 . . Holders with sockets, clips or analogous contacts, adapted for axially-sliding engagement with parallely-arranged pins, blades, or analogous contacts on counterpart, e.g. electronic tube socket
33/88 . adapted for simultaneous co-operation with two or more identical counterparts
33/90 . adapted for co-operation with two or more dissimilar counterparts
33/92 . Holders formed as intermediate parts for distributing energy in parallel through two or more counterparts at least one of which is attached to apparatus to be held
33/94 . Holders formed as intermediate parts for linking a counter-part to a coupling part
33/945 . Holders with built-in electrical component **[4]**
33/95 . . with fuse; with thermal switch **[4]**
33/955 . . with switch operated manually and independent of engagement or disengagement of coupling **[4]**
33/96 . . with switch operated by engagement or disengagement of coupling **[4]**
33/965 . Dustproof, splashproof, drip-proof, waterproof, or flameproof holders **[4]**
33/97 . Holders with separate means to prevent loosening of the coupling or unauthorised removal of apparatus held **[4]**
33/975 . Holders with resilient means for protecting apparatus against vibrations or shocks **[4]**

35/00 **Flexible or turnable line connectors** (rotary current collectors, distributors H01R 39/00)
35/02 . Flexible line connectors **[4]**
35/04 . Turnable line connectors with limited rotation angle **[4]**

39/00 **Rotary current collectors, distributors, or interrupters** (cam-operated switches H01H 19/00; structural associations of current collectors with, or disposition of current collectors in, dynamo-electric motors or generators H02K 13/00)
39/02 . Details
39/04 . . Commutators (wherein the segments are formed by extensions of dynamo-electric machine winding H02K)
39/06 . . . other than with external cylindrical contact surface, e.g. flat commutators
39/08 . . Slip-rings
39/10 . . . other than with external cylindrical contact surface, e.g. flat slip-rings
39/12 . . . using bearing or shaft surface as contact surface
39/14 . . Fastenings of commutators or slip-rings to shafts
39/16 . . . by means of moulded or cast material applied during or after assembly
39/18 . . Contacts for co-operation with commutator or slip-ring, e.g. contact brush

39/20 . . . characterised by the material thereof
39/22 . . . . incorporating lubricating or polishing ingredient
39/24 . . . Laminated contacts; Wire contacts, e.g. metallic brush, carbon fibres
39/26 . . . Solid sliding contacts, e.g. carbon brush
39/27 . . . . End caps on carbon brushes to transmit spring pressure
39/28 . . . Roller contacts; Ball contacts
39/30 . . . Liquid contacts
39/32 . . Connections of conductor to commutator segment
39/34 . . Connections of conductor to slip-ring
39/36 . . Connections of cable or wire to brush
39/38 . . Brush holders
39/39 . . . wherein the brush is fixedly mounted in the holder
39/40 . . . enabling brush movement within holder during current collection
39/41 . . . cartridge type
39/415 . . . . with self-recoiling spring **[4]**
39/42 . . Devices for lifting brushes
39/44 . . Devices for shifting brushes
39/46 . . Auxiliary means for improving current transfer, or for reducing or preventing sparking or arcing
39/48 . . . by air blast; by surrounding collector with non-conducting liquid or gas
39/50 . . . Barriers placed between brushes
39/52 . . . by use of magnets
39/54 . . . by use of impedance between brushes or segments
39/56 . . Devices for lubricating or polishing slip-rings or commutators during operation of the collector
39/58 . . Means structurally associated with the current collector for indicating condition thereof, e.g. for indicating brush wear
39/59 . . Means structurally associated with the brushes for interrupting current (H01R 39/58 takes precedence) **[4]**
39/60 . Devices for interrupted current collection, e.g. commutating device, distributor, interrupter (self-interrupters H01H, e.g. H01H 51/34)
39/62 . . with more than one brush co-operating with the same set of segments
39/64 . Devices for uninterrupted current collection

41/00 Non-rotary current collectors for maintaining contact between moving and stationary parts of an electric circuit (end pieces terminating in a hook or the like H01R 11/12; current collectors for power supply lines of electrically-propelled vehicles B60L 5/00)

41/02 . Devices for interrupted current collection, e.g. distributor (electrically-operated selector switches H01H 67/00)

43/00 Apparatus or processes specially adapted for manufacturing, assembling, maintaining, or repairing of line connectors or current collectors or for joining electric conductors (of trolley lines B60M 1/28; joining cables H02G 1/14)

43/01 . for connecting unstripped conductors to contact members having insulation cutting edges **[4]**
43/02 . for soldered or welded connections (soldering or welding in general B23K)
43/027 . for connecting conductors by clips **[4]**
43/033 . for wrapping or unwrapping wire connections **[4]**
43/04 . for forming connections by deformation, e.g. crimping tool
43/042 . . Hand tools for crimping **[4]**
43/045 . . . with contact member feeding mechanism **[4]**
43/048 . . Crimping apparatus or processes (H01R 43/042 takes precedence) **[4]**
43/05 . . . with wire-insulation stripping **[4]**
43/052 . . . with wire-feeding mechanism **[4]**
43/055 . . . with contact member feeding mechanism **[4]**
43/058 . . Crimping mandrels **[4]**
43/06 . Manufacture of commutators
43/08 . . in which segments are not separated until after assembly
43/10 . Manufacture of slip-rings
43/12 . Manufacture of brushes
43/14 . Maintenance of current collectors, e.g. reshaping of brushes, cleaning of commutators
43/16 . for manufacturing contact members, e.g. by punching and by bending **[4]**
43/18 . for manufacturing bases or cases for contact members **[4]**
43/20 . for assembling or disassembling contact members with insulating base, case or sleeve **[4]**
43/22 . . Hand tools **[4]**
43/24 . . Assembling by moulding on contact members **[4]**
43/26 . for engaging or disengaging the two parts of a coupling device (structural association with coupling device H01R 13/629) **[4]**
43/28 . for wire processing before connecting to contact members (H01R 43/02 to H01R 43/26 take precedence) **[4]**

Indexing scheme associated with group H01R 24/00, relating to the number of poles in a two-part coupling device. [7]

101/00 One pole [7]

103/00 Two poles [7]

105/00 Three poles [7]

107/00 Four or more poles [7]

H01S DEVICES USING STIMULATED EMISSION

Note

This subclass covers:
- devices for the generation or amplification, by using stimulated emission, of coherent electromagnetic waves or other forms of wave energy; **[2]**
- such functions as modulating, demodulating, controlling, or stabilising such waves. **[2]**

Subclass index

1/00 Masers, i.e. devices for generation, amplification, modulation, demodulation, or frequency-changing, using stimulated emission, of electromagnetic waves of wavelength longer than that of infra-red waves

1/02 . solid
1/04 . liquid
1/06 . gaseous

3/00 Lasers, i.e. devices for generation, amplification, modulation, demodulation, or frequency-changing, using stimulated emission, of infra-red, visible, or ultra-violet waves (semiconductor lasers H01S 5/00)

3/02 . Constructional details
3/03 . . of gas laser discharge tubes **[2]**
3/032 . . . for confinement of the discharge, e.g. by special features of the discharge constricting tube **[5]**
3/034 . . . Optical devices within, or forming part of, the tube, e.g. windows, mirrors (reflectors having variable properties or positions for initial adjustment of the resonator H01S 3/086) **[5]**
3/036 . . . Means for obtaining or maintaining the desired gas pressure within the tube, e.g. by gettering, replenishing; Means for circulating the gas, e.g. for equalising the pressure within the tube (cooling arrangements for gas lasers H01S 3/041; gas dynamic lasers H01S 3/0979) **[5]**
3/038 . . . Electrodes, e.g. special shape, configuration or composition **[5]**
3/04 . . Cooling arrangements
3/041 . . . for gas lasers **[5]**
3/042 . . . for solid state lasers **[5]**
3/05 . Construction or shape of optical resonators; Accommodation of active medium therein; Shape of active medium
3/06 . . Construction or shape of active medium
3/063 . . . Waveguide lasers, e.g. laser amplifiers **[7]**
3/067 . . . . Fibre lasers **[7]**
3/07 . . . consisting of a plurality of parts, e.g. segments (H01S 3/067 takes precedence) **[2,7]**
3/08 . . Construction or shape of optical resonators or components thereof **[2]**
3/081 . . . comprising more than two reflectors **[2]**
3/082 . . . . defining a plurality of resonators, e.g. for mode selection **[2]**
3/083 . . . . Ring lasers (ring laser gyrometers G01C 19/66) **[2]**
3/086 . . . One or more reflectors having variable properties or positions for initial adjustment of the resonator (varying a parameter of the laser output during operation H01S 3/10; stabilisation of the laser output H01S 3/13) **[2]**
3/09 . Processes or apparatus for excitation, e.g. pumping
3/091 . . using optical pumping **[2]**
3/0915 . . . by incoherent light **[5]**
3/092 . . . . of flash lamp (H01S 3/0937 takes precedence) **[2,5]**
3/093 . . . . . focusing or directing the excitation energy into the active medium **[2,5]**
3/0933 . . . . of a semiconductor, e.g. light emitting diode **[5]**
3/0937 . . . . produced by exploding or combustible material **[5]**
3/094 . . . by coherent light **[2]**
3/0941 . . . . of a semiconductor laser, e.g. of a laser diode **[6]**
3/0943 . . . . of a gas laser **[5]**
3/0947 . . . . of an organic dye laser **[5]**
3/095 . . using chemical or thermal pumping **[2]**
3/0951 . . . by increasing the pressure in the laser gas medium **[5]**
3/0953 . . . . Gas dynamic lasers, i.e. with expansion of the laser gas medium to supersonic flow speeds **[5]**
3/0955 . . using pumping by high energy particles **[5]**
3/0957 . . . by high energy nuclear particles **[5]**
3/0959 . . . by an electron beam **[5]**
3/097 . . by gas discharge of a gas laser **[2]**
3/0971 . . . transversely excited (H01S 3/0975 takes precedence) **[5]**
3/0973 . . . . having a travelling wave passing through the active medium **[5]**
3/0975 . . . using inductive or capacitive excitation **[5]**
3/0977 . . . having auxiliary ionisation means **[5]**
3/0979 . . . Gas dynamic lasers, i.e. with expansion of the laser gas medium to supersonic flow speeds **[5]**
3/098 . Mode locking; Mode suppression (mode suppression using a plurality of resonators H01S 3/082) **[2]**
3/10 . Controlling the intensity, frequency, phase, polarisation or direction of the emitted radiation, e.g. switching, gating, modulating or demodulating (mode locking H01S 3/098; controlling of light beams, frequency-changing, non-linear optics, optical logic elements, in general G02F) **[2]**
3/101 . . Lasers provided with means to change the location from which, or the direction in which, laser radiation is emitted (optical scanning systems in general G02B 26/10; devices or arrangements for the electro-, magneto-, or acousto-optical deflection G02F 1/29) **[2]**
3/102 . . by controlling the active medium, e.g. by controlling the processes or apparatus for excitation (H01S 3/13 takes precedence) **[4]**
3/104 . . . in gas lasers **[4]**
3/105 . . by controlling the mutual position or the reflecting properties of the reflectors of the cavity (H01S 3/13 takes precedence) **[4]**
3/1055 . . . one of the reflectors being constituted by a diffraction grating **[4]**
3/106 . . by controlling a device placed within the cavity (H01S 3/13 takes precedence) **[4]**
3/107 . . . using an electro-optical device, e.g. exhibiting Pockels- or Kerr-effect **[4]**

3/108 . . . using a non-linear optical device, e.g. exhibiting Brillouin- or Raman-scattering **[4]**

3/109 . . . . Frequency multiplying, e.g. harmonic generation **[4]**

3/11 . . in which the quality factor of the optical resonator is rapidly changed, i.e. giant-pulse technique

3/113 . . . using bleachable or solarising media **[2]**

3/115 . . . using an electro-optical device **[4]**

3/117 . . . using an acousto-optical device **[4]**

3/121 . . . using a mechanical device **[4]**

3/123 . . . . Rotating mirror **[4]**

3/125 . . . . Rotating prism **[4]**

3/127 . . . Plural Q-switches **[4]**

3/13 . . Stabilisation of laser output parameters, e.g. frequency, amplitude **[2]**

3/131 . . . by controlling the active medium, e.g. by controlling the processes or apparatus for excitation **[4]**

3/134 . . . . in gas lasers **[4]**

3/136 . . . by controlling a device placed within the cavity **[4]**

3/137 . . . . for stabilising of frequency **[4]**

3/139 . . . by controlling the mutual position or the reflecting properties of the reflectors of the cavity **[4]**

3/14 . characterised by the material used as the active medium

3/16 . . Solid materials

3/17 . . . amorphous, e.g. glass **[2]**

3/20 . . Liquids

3/207 . . . including a chelate **[5]**

3/213 . . . including an organic dye **[5]**

3/22 . . Gases

3/223 . . . the active gas being polyatomic, i.e. containing more than one atom (H01S 3/227 takes precedence) **[2,5]**

3/225 . . . . comprising an excimer or exciplex **[5]**

3/227 . . . Metal vapour **[5]**

3/23 . Arrangement of two or more lasers not provided for in groups H01S 3/02 to H01S 3/14, e.g. tandem arrangement of separate active media (involving only semiconductor lasers H01S 5/40) **[2,7]**

3/30 . using scattering effects, e.g. stimulated Brillouin or Raman effects **[2]**

4/00 Devices using stimulated emission of wave energy other than those covered by groups H01S 1/00, H01S 3/00 or H01S 5/00, e.g. phonon maser, gamma maser

5/00 Semiconductor lasers [7]

Note

Attention is drawn to Note (3) after the title of section C, which Note indicates to which version of the periodic table of chemical elements the IPC refers. **[2010.01]**

5/02 . Structural details or components not essential to laser action **[7]**

5/022 . . Mountings; Housings **[7]**

5/024 . . Cooling arrangements **[7]**

5/026 . . Monolithically integrated components, e.g. waveguides, monitoring photo-detectors, drivers (stabilisation of output H01S 5/06; coupling light guides with opto-electronic elements G02B 6/42; devices consisting of a plurality of semiconductor or other solid state components formed in or on a common substrate, specially adapted for light emission H01L 27/15) **[7]**

5/028 . . Coatings **[7]**

5/04 . Processes or apparatus for excitation, e.g. pumping (H01S 5/06 takes precedence) **[7]**

5/042 . . Electrical excitation **[7]**

5/06 . Arrangements for controlling the laser output parameters, e.g. by operating on the active medium (transmission systems employing light H04B 10/00) **[7]**

5/062 . . by varying the potential of the electrodes (H01S 5/065 takes precedence) **[7]**

5/0625 . . . in multi-section lasers **[7]**

5/065 . . Mode locking; Mode suppression; Mode selection **[7]**

5/068 . . Stabilisation of laser output parameters (H01S 5/0625 takes precedence) **[7]**

5/0683 . . . by monitoring the optical output parameters **[7]**

5/0687 . . . . Stabilising the frequency of the laser **[7]**

5/10 . Construction or shape of the optical resonator **[7]**

5/12 . . the resonator having a periodic structure, e.g. in distributed feed-back lasers (DFB-lasers) (H01S 5/18 takes precedence) **[7]**

5/125 . . . Distributed Bragg reflector lasers (DBR-lasers) **[7]**

5/14 . . External cavity lasers (H01S 5/18 takes precedence; mode locking H01S 5/065) **[7]**

5/16 . . Window-type lasers, i.e. with a region of non-absorbing material between the active region and the reflecting surface (H01S 5/14 takes precedence) **[7]**

5/18 . . Surface-emitting lasers (SE-lasers) **[7]**

5/183 . . . having a vertical cavity (VCSE-lasers) **[7]**

5/187 . . . using a distributed Bragg reflector (SE-DBR-lasers) (H01S 5/183 takes precedence) **[7]**

5/20 . Structure or shape of the semiconductor body to guide the optical wave **[7]**

5/22 . . having a ridge or a stripe structure **[7]**

5/223 . . . Buried stripe structure (H01S 5/227 takes precedence) **[7]**

5/227 . . . Buried mesa structure **[7]**

5/24 . . having a grooved structure, e.g. V-grooved **[7]**

5/30 . Structure or shape of the active region; Materials used for the active region **[7]**

5/32 . . comprising PN junctions, e.g. hetero- or double-hetero-structures (H01S 5/34, H01S 5/36 take precedence) **[7]**

5/323 . . . in $A_{III}B_{V}$ compounds, e.g. AlGaAs-laser **[7]**

5/327 . . . in $A_{II}B_{VI}$ compounds, e.g. ZnCdSe-laser **[7]**

5/34 . . comprising quantum well or superlattice structures, e.g. single quantum well lasers (SQW-lasers), multiple quantum well lasers (MQW-lasers), graded index separate confinement heterostructure lasers (GRINSCH-lasers) (H01S 5/36 takes precedence) **[7]**

5/343 . . . in $A_{III}B_{V}$ compounds, e.g. AlGaAs-laser **[7]**

5/347 . . . in $A_{II}B_{VI}$ compounds, e.g. ZnCdSe-laser **[7]**

5/36 . . comprising organic materials (dye lasers H01S 3/213) **[8]**

5/40 . Arrangement of two or more semiconductor lasers, not provided for in groups H01S 5/02 to H01S 5/30 (H01S 5/50 takes precedence) **[7]**

5/42 . . Arrays of surface emitting lasers **[7]**

5/50 . Amplifier structures not provided for in groups H01S 5/02 to H01S 5/30 (as repeaters in transmission systems H04B 10/17) **[7]**

H01T **SPARK GAPS**; **OVERVOLTAGE ARRESTERS USING SPARK GAPS**; **SPARKING PLUGS**; **CORONA DEVICES**; **GENERATING IONS TO BE INTRODUCED INTO NON-ENCLOSED GASES** (working of metal by the action of a high concentration of electric current B23H; welding, e.g. arc welding, electron beam welding or electrolytic welding, B23K; gas-filled discharge tubes with solid cathode H01J 17/00; electric arc lamps H05B 31/00)

Note

In this subclass, the following expression is used with the meaning indicated:
– "spark gaps" means enclosed or non-enclosed discharge device having cold electrodes and used exclusively to discharge a quantity of electrical energy in a small time duration. **[4]**

Subclass index

1/00 Details of spark gaps

1/02 . Means for extinguishing arc
1/04 . . using magnetic blow-out
1/06 . . . with permanent magnet
1/08 . . using flow of arc-extinguishing fluid
1/10 . . . with extinguishing fluid evolved from solid material by heat of arc
1/12 . Means structurally associated with spark gap for recording operation thereof
1/14 . Means structurally associated with spark gap for protecting it against overload or for disconnecting it in case of failure (H01T 1/15, H01T 1/16, H01T 1/18 take precedence) **[4]**
1/15 . for protection against excessive pressure **[4]**
1/16 . Series resistor structurally associated with spark gap
1/18 . Electrolytic device structurally associated with spark gap
1/20 . Means for starting arc or facilitating ignition of spark gap **[3]**
1/22 . . by the shape or the composition of the electrodes **[4]**
1/24 . Selection of materials for electrodes (H01T 1/22 takes precedence) **[4]**

2/00 Spark gaps comprising auxiliary triggering means (triggering circuits H01T 15/00) **[4]**

2/02 . comprising a trigger electrode or an auxiliary spark gap **[4]**

4/00 Overvoltage arresters using spark gaps (H01T 2/00 takes precedence; overvoltage protection circuits using spark gaps H02H 9/06) **[4]**

4/02 . Details (of spark gaps H01T 1/00) **[4]**
4/04 . Housings (H01T 4/06 takes precedence) **[4]**
4/06 . Mounting arrangements for a plurality of overvoltage arresters **[4]**
4/08 . structurally associated with protected apparatus (with switches H01H 9/14; with fuses H01H 85/44) **[4]**
4/10 . having a single gap or a plurality of gaps in parallel (sparking plugs H01T 13/00) **[4]**
4/12 . . hermetically sealed **[4]**
4/14 . . Arcing horns (associated with insulators H01B 17/46) **[4]**
4/16 . having a plurality of gaps arranged in series **[4]**
4/18 . . Arrangements for reducing height of stacked spark gaps **[4]**
4/20 . . Arrangements for improving potential distribution **[4]**

7/00 Rotary spark gaps, i.e. devices having one or more rotating electrodes

9/00 Spark gaps specially adapted for generating oscillations

11/00 Spark gaps specially adapted as rectifiers

13/00 Sparking plugs

13/02 . Details
13/04 . . Means providing electrical connection to sparking plug (electric connections in general H01R)
13/05 . . . combined with interference suppressing or shielding means **[4]**
13/06 . . Covers forming a part of the plug and protecting it against adverse environment
13/08 . . Mounting, fixing, or sealing of sparking plugs, e.g. in combustion chamber
13/10 . . . by bayonet-type connection
13/12 . . Means on sparking plugs for facilitating engagement by tool or by hand
13/14 . . Means for self-cleaning
13/16 . . Means for dissipating heat
13/18 . . Means for heating, e.g. for drying

13/20 . characterised by features of the electrodes or insulation

13/22 . . having two or more electrodes embedded in insulation (for two or more sparks H01T 13/46)

13/24 . . having movable electrodes (H01T 13/28 takes precedence)

13/26 . . . for adjusting spark gap otherwise than by bending of electrode

13/28 . . having spherically shaped electrodes, e.g. ball-shaped

13/30 . . . mounted so as to permit free movement

13/32 . . characterised by features of the earthed electrode

13/34 . . characterised by the mounting of electrodes in insulation, e.g. by embedding

13/36 . . characterised by the joint between insulation and body, e.g. using cement

13/38 . . Selection of materials for insulation (in general H01B 3/00)

13/39 . . Selection of materials for electrodes **[4]**

13/40 . structurally combined with other devices (combined or associated with fuel injectors F02M 57/06; structurally combined with other parts of internal-combustion engines F02P 13/00)

13/41 . . with interference suppressing or shielding means **[4]**

13/42 . . with magnetic spark generators

13/44 . . with transformers, e.g. for high-frequency ignition

13/46 . having two or more spark gaps

13/48 . having means for rendering sparks visible

13/50 . having means for ionisation of gap (H01T 13/52 takes precedence) **[4]**

13/52 . characterised by a discharge along a surface

13/54 . having electrodes arranged in a partly-enclosed ignition chamber

13/56 . characterised by having component parts which are easily assembled or disassembled

13/58 . *Testing (testing characteristics of the spark in internal-combustion engine ignition F02P 17/12)* **[2011.01]**

13/60 . . *of electrical properties* **[2011.01]**

14/00 **Spark gaps not provided for in groups H01T 2/00 to H01T 13/00** (devices providing for corona discharge H01T 19/00) **[4]**

15/00 **Circuits specially adapted for spark gaps, e.g. ignition circuits** (ignition circuits for internal-combustion engines F02P; electric spark ignition for combustion apparatus F23Q; protection circuits using spark gaps H02H 9/06) **[4]**

19/00 **Devices providing for corona discharge** (for charging electrographic elements G03G 15/02) **[4]**

19/02 . Corona rings

19/04 . having pointed electrodes

21/00 **Apparatus or processes specially adapted for the manufacture or maintenance of spark gaps or sparking plugs**

21/02 . of sparking plugs

21/04 . . Cleaning (means for self-cleaning H01T 13/14; abrasive blasting devices for cleaning sparking plugs B24C 3/34)

21/06 . Adjustment of spark gaps (sparking plugs having movable electrodes for adjusting the gap H01T 13/26) **[4]**

23/00 **Apparatus for generating ions to be introduced into non-enclosed gases, e.g. into the atmosphere** (discharge tubes with provision for emergence of ions from the vessel H01J 33/00; generating plasma H05H) **[4]**

H02 GENERATION, CONVERSION, OR DISTRIBUTION OF ELECTRIC POWER

H02B BOARDS, SUBSTATIONS, OR SWITCHING ARRANGEMENTS FOR THE SUPPLY OR DISTRIBUTION OF ELECTRIC POWER (basic electric elements, their assembly, including the mounting in enclosures or on bases, or the mounting of covers thereon, see the subclasses for such elements, e.g. transformers H01F, switches, fuses H01H, line connectors H01R; installation of electric cables or lines, or of combined optical and electric cables or lines, or other conductors for supply or distribution H02G)

Note

This subclass covers boards, switchyards, switchgear or their installation, or the association of switching devices with each other or with other devices, e.g. transformers, fuses, meters or distribution boards; such associations constitute substations or distribution points.

Subclass index

1/00 Frameworks, boards, panels, desks, casings; Details of substations or switching arrangements [5]

1/01 . Frameworks **[5]**
1/015 . Boards, panels, desks; Parts thereof or accessories therefor **[5]**
1/03 . . for energy meters **[5]**
1/04 . . Mounting thereon of switches or of other devices in general, the switch or device having, or being without, casing
1/044 . . . Mounting through openings **[5]**
1/048 . . . . Snap mounting **[5]**
1/052 . . . Mounting on rails **[5]**
1/056 . . . Mounting on plugboards **[5]**
1/06 . . having associated enclosures, e.g. for preventing access to live parts (shutters or guards for contacts H02B 1/14)
1/14 . Shutters or guards for preventing access to contacts (shielding of isolating-contacts in withdrawable switchgear H02B 11/24)
1/16 . Earthing arrangements (earthing arrangements for substations H02B 5/01, for switchgear H02B 11/28, H02B 13/075; earth plates, pins, or other contacts H01R 4/66) **[5]**
1/18 . Disposition or arrangement of fuses (for switchgear having a withdrawable carriage H02B 11/26) **[5]**
1/20 . Bus-bar or other wiring layouts, e.g. in cubicles, in switchyards (installations of bus-bars H02G 5/00)
1/21 . . Bus-bar arrangements for rack-mounted devices with withdrawable units **[5]**
1/22 . . Layouts for duplicate bus-bar selection
1/24 . Circuit arrangements for boards or switchyards (devices for displaying diagrams H02B 15/00; service supply H02J 11/00)

Note

In groups H02B 1/26 to H02B 1/56, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[5]**

1/26 . Casings; Parts thereof or accessories therefor (adapted for a single switch H01H; enclosures for cables, lines or bus-bars H02G; distribution, connection or junction boxes H02G 3/08; casings in general H05K) **[5]**
1/28 . . dustproof, splashproof, drip-proof, waterproof or flameproof **[5]**
1/30 . . Cabinet-type casings; Parts thereof or accessories therefor **[5]**
1/32 . . . Mounting of devices therein **[5]**
1/34 . . . . Racks **[5]**
1/36 . . . . . with withdrawable units **[5]**
1/38 . . . Hinged covers or doors **[5]**
1/40 . . Wall-mounted casings; Parts thereof or accessories therefor **[5]**
1/42 . . . Mounting of devices therein **[5]**
1/44 . . . Hinged covers or doors **[5]**
1/46 . . Boxes; Parts thereof or accessories therefor **[5]**
1/48 . . . Mounting of devices therein **[5]**
1/50 . . Pedestal- or pad-mounted casings; Parts thereof or accessories therefor **[5]**
1/52 . . Mobile units, e.g. for work sites **[5]**
1/54 . Anti-seismic devices or installations (for buildings in general E04B 1/98) **[5]**
1/56 . Cooling; Ventilation **[5]**

3/00 Apparatus specially adapted for the manufacture, assembly, or maintenance of boards or switchgear

5/00 Non-enclosed substations; Substations with enclosed and non-enclosed equipment

5/01 . Earthing arrangements, e.g. earthing rods **[5]**
5/02 . mounted on pole, e.g. pole transformer substation
5/06 . gas-insulated **[5]**

7/00 Enclosed substations, e.g. compact substations [5]

7/01 . gas-insulated **[5]**
7/06 . Distribution substations, e.g. for urban network (H02B 7/01 takes precedence) **[5]**
7/08 . . Underground substations

11/00 Switchgear having carriage withdrawable for isolation

11/02 . Details
11/04 . . Isolating-contacts, e.g. mountings, shieldings (shutters or guards for isolating contacts H02B 1/14, H02B 11/24; switch contacts H01H; line connectors in general H01R) **[5]**
11/06 . . Means for duplicate bus-bar selection (layouts for duplicate bus-bar selection H02B 1/22)

11/08 . . Oil-tank lowering means associated with withdrawal mechanism
11/10 . . Indicating electrical condition of gear; Arrangement of test sockets
11/12 . with isolation by horizontal withdrawal
11/127 . . Withdrawal mechanism **[5]**
11/133 . . . with interlock (interlock for switches in general H01H) **[5]**
11/167 . . truck type (H02B 11/127 takes precedence) **[5]**
11/173 . . drawer type (H02B 11/127 takes precedence) **[5]**
11/18 . with isolation by vertical withdrawal
11/20 . . having an enclosure
11/22 . . . wherein front of enclosure moves with carriage upon horizontal withdrawal subsequent to isolation
11/24 . Shutters or guards **[5]**
11/26 . Arrangement of fuses, resistors, voltage arresters or the like **[5]**
11/28 . Earthing arrangements **[5]**

13/00 Arrangement of switchgear in which switches are enclosed in, or structurally associated with, a casing, e.g. cubicle (in association with main transformer H02B 5/00, H02B 7/00; switchgear having carriage withdrawable for isolation H02B 11/00) **[5]**

13/01 . with resin casing **[5]**
13/02 . with metal casing
13/025 . . Safety arrangements, e.g. in case of excessive pressure or fire due to electrical defect (for buildings in general E04B 1/94; devices for opening or closing safety wings E05F 1/00; emergency protective circuit arrangements for distribution gear, e.g. bus-bar systems, or for switching devices H02H 7/22) **[5]**
13/035 . . Gas-insulated switchgear **[5]**
13/045 . . . Details of casing, e.g. gas tightness (gas reservoirs for switches H01H 33/56) **[5]**
13/055 . . . Features relating to the gas (selection of fluids for switches H01H 33/22) **[5]**
13/065 . . . Means for detecting or reacting to mechanical or electrical defects (for switches H01H 9/50, H01H 33/26, H01H 33/53) **[5]**
13/075 . . . Earthing arrangements **[5]**
13/08 . with stone, brick, or concrete casing

15/00 Supervisory desks or panels for centralised control or display (desks in general A47B)

15/02 . with mimic diagrams
15/04 . . consisting of building blocks

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

H02G INSTALLATION OF ELECTRIC CABLES OR LINES, OR OF COMBINED OPTICAL AND ELECTRIC CABLES OR LINES (insulated conductors or cables with arrangements for facilitating mounting or securing H01B 7/40; distribution points incorporating switches H02B; guiding telephone cords H04M 1/15; cable ducts or mountings for telephone or telegraph exchange installations H04Q 1/06)

(1) This subclass covers installation of communication cables or lines, including those comprising a combination of optical and electrical conductors, or of lightning conductors as well as installation of power cables or lines.
(2) This subclass does not cover installation of purely optical cables, which is covered by group G02B 6/46. **[6]**
(3) In this subclass, the following expression is used with the meaning indicated: **[6]**
– "electric cable" includes cables comprising optical conductors, e.g. fibres, in combination with electrical conductors. **[6]**

Subclass index

1/00 Methods or apparatus specially adapted for installing, maintaining, repairing, or dismantling electric cables or lines

1/02 . for overhead lines or cables
1/04 . . for mounting or stretching (wire stretchers in general B25B 25/00)
1/06 . for laying cables, e.g. laying apparatus on vehicle (combined with trench digging or back-filling machines or dredgers E02F 5/00)
1/08 . . through tubing or conduit, e.g. rod or draw wire for pushing or pulling
1/10 . . in or under water
1/12 . for removing insulation or armouring from cables, e.g. from the end thereof (pliers in general B25B; cutters in general B26B; insulated conductors or cables with arrangements for facilitating removal of insulation H01B 7/38)
1/14 . for joining or terminating cables (joining electric conductors H01R 43/00)
1/16 . for repairing insulation or armouring of cables

3/00 **Installations of electric cables or lines or protective tubing therefor in or on buildings, equivalent structures or vehicles** (installations of bus-bars H02G 5/00; overhead installations H02G 7/00; installations in or on the ground H02G 9/00; channels or vertical ducts for receiving utility lines E04F 17/08; wiring of electric apparatus in general H05K)

3/02 . Details

3/03 . . Cooling **[2]**

3/04 . . Protective tubing or conduits, e.g. cable ladders, cable troughs (pipes or tubing in general F16L)

3/06 . . Joints for connecting lengths of protective tubing to each other or to casings, e.g. to distribution box; Ensuring electrical continuity in the joint

3/08 . . Distribution boxes; Connection or junction boxes (cable terminations H02G 15/02)

3/10 . . . for surface mounting on a wall

3/12 . . . for flush mounting

3/14 . . . Fastening of cover or lid to box

3/16 . . . structurally associated with support for line-connecting terminals within the box (terminals H01R 9/00)

3/18 . . . providing line outlets

3/20 . . . . Ceiling roses

3/22 . Installations of cables or lines through walls, floors, or ceilings, e.g. into buildings (devices for use where pipes or cables pass through walls or partitions F16L 5/00; lead-in or lead-through insulators H01B 17/26; insulating tubes or sleeves H01B 17/58)

3/30 . Installations of cables or lines on walls, floors or ceilings (supports for pipes, cables or protective tubing F16L 3/00; hose-clips F16L 33/02) **[7]**

3/32 . . using mounting clamps **[7]**

3/34 . . using separate protective tubing **[7]**

3/36 . Installations of cables or lines in walls, floors or ceilings (H02G 3/22 takes precedence) **[7]**

3/38 . . the cables or lines being installed in preestablished conduits or ducts **[7]**

3/40 . . . using separate protective tubing in the conduits or ducts **[7]**

5/00 **Installations of bus-bars**

5/02 . Open installations

5/04 . Partially-enclosed installations, e.g. in ducts and adapted for sliding or rolling current collection (non-rotary current collectors H01R 41/00)

5/06 . Totally-enclosed installations, e.g. in metal casings

5/08 . . Connection boxes therefor

5/10 . Cooling **[2]**

7/00 **Overhead installations of electric lines or cables** (installations of bus-bars H02G 5/00; trolley wires or contact lines for electric railways B60M; fastening conductors to insulators H01B 17/00, e.g. H01B 17/06, H01B 17/16, H01B 17/22; protection against abnormal electric conditions H01H; hook contacts for temporary connections to overhead lines H01R 11/14)

7/02 . Devices for adjusting or maintaining mechanical tension, e.g. take-up device

7/04 . Arrangements or devices for relieving mechanical tension

7/05 . Suspension arrangements or devices for electric cables or lines **[3]**

7/06 . . Suspensions for lines or cables along a separate supporting wire, e.g. S-hook **[3]**

7/08 . . . Members clamped to the supporting wire or to the line or cable **[3]**

7/10 . . . Flexible members or lashings wrapped around both the supporting wire and the line or cable **[3]**

7/12 . Devices for maintaining distance between parallel conductors, e.g. spacer

7/14 . Arrangements or devices for damping mechanical oscillations of lines, e.g. for reducing production of sound

7/16 . Devices for removing snow or ice from lines or cables (from insulators H01B 17/52)

7/18 . Devices affording mechanical protection in the event of breakage of a line or cable, e.g. net for catching broken lines

7/20 . Spatial arrangements or dispositions of lines or cables on poles, posts, or towers (construction of poles, posts, or towers E04H 12/22)

7/22 . Arrangements of earthing wires suspended between mastheads

9/00 **Installations of electric cables or lines in or on the ground or water** (cathodic protection C23F 13/02; detection of buried cables G01V)

9/02 . laid directly in or on the ground, river-bed or sea-bottom; Coverings therefor, e.g. tile

9/04 . in surface ducts; Ducts or covers therefor

9/06 . in underground tubes or conduits; Tubes or conduits therefor

9/08 . in tunnels

9/10 . in cable chambers, e.g. in manhole, in handhole (building aspects of cable chambers section E, e.g. E04H 5/06)

9/12 . supported on or from floats, e.g. in water (floating cables H01B 7/12)

11/00 **Arrangements of electric cables or lines between relatively-movable parts** (current collectors H01R)

11/02 . using take-up reel or drum

13/00 **Installations of lightning conductors**; **Fastening thereof to supporting structure** (indicating, counting or recording lightning strokes G01; lightning arrestors H01C 7/12, H01C 8/04, H01G 9/18, H01T; earth plates, pins or other contacts H01R)

15/00 **Cable fittings**

15/007 . Devices for relieving mechanical stress **[3]**

15/013 . Sealing means for cable inlets (inlets for cables filled with, or surrounded by, gas or oil H02G 15/32) **[3]**

15/02 . Cable terminations (for gas- or oil-filled cables H02G 15/22)

15/04 . . Cable-end sealings

15/06 . . Cable terminating boxes, frames, or other structures (terminal blocks H01R 9/00)

15/064 . . . with devices for relieving electrical stress **[3]**

15/068 . . . . connected to the cable shield only (H02G 15/072 takes precedence) **[3]**

15/072 . . . . of the condenser type **[3]**

15/076 . . . for multi-conductor cables **[3]**

15/08 . Cable junctions (for gas or oil filled cables H02G 15/24; disconnectable junctions, electrical connections H01R)

15/10 . . protected by boxes, e.g. by distribution, connection or junction boxes (terminal blocks H01R 9/00)

15/103 . . . with devices for relieving electrical stress **[3]**

15/105 . . . . connected to the cable shield only (H02G 15/107 takes precedence) **[3]**

15/107 . . . . of the condenser type **[3]**

15/113 . . . Boxes split longitudinally in main cable direction **[3]**
15/115 . . . Boxes split perpendicularly to main cable direction **[3]**
15/117 . . . for multiconductor cables **[3]**
15/12 . . . for incorporating transformers, loading coils or amplifiers
15/14 . . . . specially adapted for submarine cables
15/16 . . . structurally associated with support for line-connecting terminals within the box
15/18 . . protected by sleeves, e.g. for communication cable (two-part covers H02G 15/10)
15/184 . . . with devices for relieving electrical stress **[3]**
15/188 . . . . connected to cable shield only **[3]**
15/192 . . . with support means for ends of the sleeves **[3]**
15/196 . . . having lapped insulation **[3]**
15/20 . Cable fittings for cables filled with or surrounded by gas or oil (H02G 15/34 takes precedence) **[3]**
15/22 . . Cable terminations
15/23 . . . Cable-end sealings **[3]**
15/24 . . Cable junctions
15/25 . . . Stop junctions **[3]**
15/26 . . Expansion vessels; Locking heads; Auxiliary pipe-lines
15/28 . . structurally associated with devices for indicating the presence or location of non-electric faults (combined with electric protective means H02H)
15/30 . . with devices for relieving electrical stress **[3]**
15/32 . . Cable inlets **[3]**
15/34 . Cable fittings for cryogenic cables **[3]**

H02H **EMERGENCY PROTECTIVE CIRCUIT ARRANGEMENTS** (indicating or signalling undesired working conditions G01R, e.g. G01R 31/00, G08B; locating faults along lines G01R 31/08; emergency protective devices H01H)

Note

This subclass covers only circuit arrangements for the automatic protection of electric lines or electric machines or apparatus in the event of an undesired change from normal working conditions.

Subclass index

1/00 **Details of emergency protective circuit arrangements**
1/04 . Arrangements for preventing response to transient abnormal conditions, e.g. to lightning
1/06 . Arrangements for supplying operative power **[3]**

3/00 **Emergency protective circuit arrangements for automatic disconnection directly responsive to an undesired change from normal electric working condition, with or without subsequent reconnection** (specially adapted for specific types of electric machines or apparatus or for sectionalised protection of cable or line systems H02H 7/00; systems for change-over to standby supply H02J 9/00)
3/02 . Details
3/027 . . with automatic disconnection after a predetermined time (H02H 3/033, H02H 3/06 take precedence) **[3]**
3/033 . . with several disconnections in a preferential order (H02H 3/06 takes precedence) **[3]**
3/04 . . with warning or supervision in addition to disconnection, e.g. for indicating that protective apparatus has functioned
3/05 . . with means for increasing reliability, e.g. redundancy arrangements **[3]**
3/06 . . with automatic reconnection
3/07 . . . and with permanent disconnection after a predetermined number of reconnection cycles **[3]**
3/08 . responsive to excess current (responsive to abnormal temperature caused by excess current H02H 5/04)
3/087 . . for dc applications **[3]**
3/093 . . with timing means **[3]**
3/10 . . additionally responsive to some other abnormal electrical conditions
3/12 . responsive to underload or no-load
3/13 . . for multiphase applications, e.g. phase interruption **[3]**
3/14 . responsive to occurrence of voltage on parts normally at earth potential
3/16 . responsive to fault current to earth, frame or mass (with balanced or differential arrangement H02H 3/26)
3/17 . . by means of an auxiliary voltage injected into the installation to be protected **[3]**
3/18 . responsive to reversal of direct current
3/20 . responsive to excess voltage
3/22 . . of short duration, e.g. lightning
3/24 . responsive to undervoltage or no-voltage
3/247 . . having timing means **[3]**
3/253 . . for multiphase applications, e.g. phase interruption **[3]**
3/26 . responsive to difference between voltages or between currents; responsive to phase angle between voltages or between currents

3/28 . . involving comparison of the voltage or current values at two spaced portions of a single system, e.g. at opposite ends of one line, at input and output of apparatus
3/30 . . . using pilot wires or other signalling channel
3/32 . . involving comparison of the voltage or current values at corresponding points in different conductors of a single system, e.g. of currents in go and return conductors
3/33 . . . using summation current transformers (H02H 3/347 takes precedence) **[3]**
3/34 . . . of a three-phase system
3/347 . . . . using summation current transformers **[3]**
3/353 . . . . involving comparison of phase voltages **[3]**
3/36 . . involving comparison of the voltage or current values at corresponding points of different systems, e.g. of parallel feeder systems
3/38 . responsive to both voltage and current; responsive to phase angle between voltage and current
3/40 . responsive to ratio of voltage and current
3/42 . responsive to product of voltage and current
3/44 . responsive to the rate of change of electrical quantities **[3]**
3/46 . responsive to frequency deviations **[3]**
3/48 . responsive to loss of synchronism **[3]**
3/50 . responsive to the appearance of abnormal wave forms, e.g. ac in dc installations **[3]**
3/52 . . responsive to the appearance of harmonics **[3]**

5/00 Emergency protective circuit arrangements for automatic disconnection directly responsive to an undesired change from normal non-electric working conditions with or without subsequent reconnection (using simulators of the apparatus being protected H02H 6/00; specially adapted for specific types of electric machines or apparatus or for sectionalised protection of cable or line systems H02H 7/00) **[3]**

5/04 . responsive to abnormal temperature
5/06 . . in oil-filled electric apparatus
5/08 . responsive to abnormal fluid pressure, liquid level or liquid displacement, e.g. Buchholz relays
5/10 . responsive to mechanical injury, e.g. rupture of line, breakage of earth connection
5/12 . responsive to undesired approach to, or touching of, live parts by living beings

6/00 Emergency protective circuit arrangements responsive to undesired changes from normal non-electric working conditions using simulators of the apparatus being protected, e.g. using thermal images [3]

7/00 Emergency protective circuit arrangements specially adapted for specific types of electric machines or apparatus or for sectionalised protection of cable or line systems, and effecting automatic switching in the event of an undesired change from normal working conditions (structural association of protective devices with specific machines or apparatus and their protection without automatic disconnection, see the relevant subclass for the machine or apparatus)

7/04 . for transformers
7/045 . . Differential protection of transformers **[3]**
7/05 . . for capacitive voltage transformers, e.g. against resonant conditions **[3]**
7/055 . . for tapped transformers or tap-changing means thereof **[3]**
7/06 . for dynamo-electric generators; for synchronous capacitors
7/08 . for dynamo-electric motors
7/085 . . against excessive load
7/09 . . against over-voltage; against reduction of voltage; against phase interruption
7/093 . . against increase beyond, or decrease below, a predetermined level of rotational speed (centrifugal switches H01H 35/10)
7/097 . . against wrong direction of rotation
7/10 . for converters; for rectifiers
7/12 . . for static converters or rectifiers
7/122 . . . for inverters, i.e. dc/ac converters **[2]**
7/125 . . . for rectifiers **[2]**
7/127 . . . . having auxiliary control electrode to which blocking control voltages or currents are applied in case of emergency **[2]**
7/16 . for capacitors (for synchronous capacitors H02H 7/06)
7/18 . for batteries; for accumulators
7/20 . for electronic equipment (for converters H02H 7/10; for electric measuring instruments G01R 1/36; for dc voltage or current semiconductor regulators G05F 1/569; for amplifiers H03F 1/52; for electronic switching circuits H03K 17/08)
7/22 . for distribution gear, e.g. bus-bar systems; for switching devices
7/24 . for spark-gap arresters
7/26 . Sectionalised protection of cable or line systems, e.g. for disconnecting a section on which a short-circuit, earth fault, or arc discharge has occurred (locating faults in cables G01R 31/08)
7/28 . . for meshed systems
7/30 . . Staggered disconnection **[3]**

9/00 Emergency protective circuit arrangements for limiting excess current or voltage without disconnection (structural association of protective devices with specific machines or apparatus, see the relevant subclass for the machine or apparatus)

9/02 . responsive to excess current
9/04 . responsive to excess voltage (lightning arrestors H01C 7/12, H01C 8/04, H01G 9/18, H01T)
9/06 . . using spark-gap arresters
9/08 . Limitation or suppression of earth fault currents, e.g. Petersen coil **[3]**

11/00 Emergency protective circuit arrangements for preventing the switching-on in case an undesired electric working condition might result

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

H02J CIRCUIT ARRANGEMENTS OR SYSTEMS FOR SUPPLYING OR DISTRIBUTING ELECTRIC POWER; SYSTEMS FOR STORING ELECTRIC ENERGY (power supply circuits for apparatus for measuring X-radiation, gamma radiation, corpuscular radiation or cosmic radiation G01T 1/175; electric power supply circuits specially adapted for use in electronic time-pieces with no moving parts G04G 19/00; for digital computers G06F 1/18; for discharge tubes H01J 37/248; circuits or apparatus for the conversion of electric power, arrangements for control or regulation of such circuits or apparatus H02M; interrelated control of several motors, control of a prime-mover/generator combination H02P; control of high-frequency power H03L; additional use of power line or power network for transmission of information H04B)

(1) This subclass covers:
- ac or dc mains or distribution networks;
- circuit arrangements for battery supplies, including charging or control thereof, or co-ordinated supply from two or more sources of any kind;
- systems for supplying or distributing electric power by electromagnetic waves.

(2) This subclass does not cover:
- control of a single motor, generator or dynamo-electric converter, of the types covered by subclass H01F or H02K, which is covered by subclass H02P;
- control of a single motor or generator, of the types covered by subclass H02N, which is covered by that subclass.

Subclass index

1/00 Circuit arrangements for dc mains or dc distribution networks

1/02 . Arrangements for reducing harmonics or ripples (in converters H02M 1/14)

1/04 . Constant-current supply systems

1/06 . Two-wire systems

1/08 . Three-wire systems; Systems having more than three wires

1/10 . Parallel operation of dc sources (involving batteries H02J 7/34)

1/12 . . Parallel operation of dc generators with converters, e.g. with mercury-arc rectifier

1/14 . Balancing the load in a network (by batteries H02J 7/34)

1/16 . . using dynamo-electric machines coupled to flywheels

3/00 Circuit arrangements for ac mains or ac distribution networks

3/01 . Arrangements for reducing harmonics or ripples (in converters H02M 1/12) **[3]**

3/02 . using a single network for simultaneous distribution of power at different frequencies; using a single network for simultaneous distribution of ac power and of dc power

3/04 . for connecting networks of the same frequency but supplied from different sources

3/06 . . Controlling transfer of power between connected networks; Controlling sharing of load between connected networks

3/08 . . Synchronising of networks

3/10 . Constant-current supply systems

3/12 . for adjusting voltage in ac networks by changing a characteristic of the network load

3/14 . . by switching loads on to, or off from, network, e.g. progressively balanced loading

3/16 . . by adjustment of reactive power

3/18 . Arrangements for adjusting, eliminating, or compensating reactive power in networks (for adjustment of voltage H02J 3/12; use of Petersen coils H02H 9/08)

3/20 . . in long overhead lines

3/22 . . in cables

3/24 . Arrangements for preventing or reducing oscillations of power in networks (by control effected upon a single generator H02P 9/00)

3/26 . Arrangements for eliminating or reducing asymmetry in polyphase networks

3/28 . Arrangements for balancing the load in a network by storage of energy

3/30 . . using dynamo-electric machines coupled to flywheels

3/32 . . using batteries with converting means

3/34 . Arrangements for transfer of electric power between networks of substantially different frequency (frequency converters H02M)

3/36 . Arrangements for transfer of electric power between ac networks via a high-tension dc link

3/38 . Arrangements for parallelly feeding a single network by two or more generators, converters, or transformers

3/40 . . Synchronising a generator for connection to a network or to another generator

3/42 . . . with automatic parallel connection when synchronism is achieved

3/44 . . . with means for ensuring correct phase sequence

3/46 . . Controlling the sharing of output between the generators, converters, or transformers

3/48 . . . Controlling the sharing of the in-phase component

3/50 . . . Controlling the sharing of the out-of-phase component

4/00 Circuit arrangements for mains or distribution networks not specified as ac or dc [2]

5/00 Circuit arrangements for transfer of electric power between ac networks and dc networks (H02J 3/36 takes precedence)

7/00 Circuit arrangements for charging or depolarising batteries or for supplying loads from batteries

7/02 . for charging batteries from ac mains by converters

7/04 . . Regulation of the charging current or voltage

7/06 . . . using discharge tubes or semiconductor devices

7/08 . . . . using discharge tubes only

7/10 . . . . using semiconductor devices only

7/12 . . . using magnetic devices having controllable degree of saturation, i.e. transductors

7/14 . for charging batteries from dynamo-electric generators driven at varying speed, e.g. on vehicle

7/16 . . Regulation of the charging current or voltage by variation of field

7/18 . . . due to variation of ohmic resistance in field circuit, using resistance switching in or out of circuit step by step

7/20 . . . due to variation of continuously-variable ohmic resistor

7/22 . . . due to variation of make-to-break ratio of intermittently-operating contacts, e.g. using Tirrill regulator

7/24 . . . using discharge tubes or semiconductor devices

7/26 . . . using magnetic devices with controllable degree of saturation

7/28 . . . using magnetic devices with controllable degree of saturation in combination with controlled discharge tube or controlled semiconductor device

7/30 . . . using armature-reaction-excited machines

7/32 . for charging batteries from a charging set comprising a non-electric prime mover

7/34 . Parallel operation in networks using both storage and other dc sources, e.g. providing buffering (H02J 7/14 takes precedence) **[4]**

7/35 . . with light sensitive cells **[4]**

7/36 . Arrangements using end-cell switching

9/00 Circuit arrangements for emergency or stand-by power supply, e.g. for emergency lighting (with provision for charging standby battery H02J 7/00)

9/02 . in which an auxiliary distribution system and its associated lamps are brought into service

9/04 . in which the distribution system is disconnected from the normal source and connected to a standby source

9/06 . . with automatic change-over

9/08 . . . requiring starting of a prime-mover

11/00 Circuit arrangements for providing service supply to auxiliaries of stations in which electric power is generated, distributed, or converted (emergency or standby arrangements H02J 9/00)

13/00 Circuit arrangements for providing remote indication of network conditions, e.g. an instantaneous record of the open or closed condition of each circuitbreaker in the network; **Circuit arrangements for providing remote control of switching means in a power distribution network, e.g. switching in and out of current consumers by using a pulse code signal carried by the network**

15/00 Systems for storing electric energy (mechanical systems therefor F01 to F04; in chemical form H01M) **[2]**

17/00 Systems for supplying or distributing electric power by electromagnetic waves [3]

H02K DYNAMO-ELECTRIC MACHINES (measuring instruments G01; dynamo-electric relays H01H 53/00; conversion of dc or ac input power into surge output power H02M 9/00; loudspeakers, microphones, gramophone pick-ups or like acoustic electromechanical transducers H04R)

(1) This subclass covers the structural adaptation of the machines for the purposes of their control.

(2) This subclass does not cover starting, regulating, electronically commutating, braking, or otherwise controlling motors, generators or dynamo-electric converters, in general, which are covered by subclass H02P.

(3) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to “micro-structural devices” and “micro-structural systems”. **[7]**

Subclass index

1/00 **Details of the magnetic circuit** (magnetic circuits or magnets in general, magnetic circuits for transformers for power supply H01F; magnetic circuits for relays H01H 50/16)

1/02 . characterised by the magnetic material

1/04 . characterised by the material used for insulating the magnetic circuit or parts thereof (insulation of windings H02K 3/30)

1/06 . characterised by the shape, form, or construction

1/08 . . Salient poles

1/10 . . . Commutating poles

1/12 . . Stationary parts of the magnetic circuit

1/14 . . . Stator cores with salient poles

1/16 . . . Stator cores with slots for windings

1/17 . . . Stator cores with permanent magnets **[5]**

1/18 . . . Means for mounting or fastening magnetic stationary parts on to, or to, the stator structures

1/20 . . . with channels or ducts for flow of cooling medium

1/22 . . Rotating parts of magnetic circuit

1/24 . . . Rotor cores with salient poles

1/26 . . . Rotor cores with slots for windings

1/27 . . . Rotor cores with permanent magnets **[5]**

1/28 . . . Means for mounting or fastening rotating magnetic parts on to, or to, the rotor structures

1/30 . . . . using intermediate part or parts, e.g. spider

1/32 . . . with channels or ducts for flow of cooling medium

1/34 . . Reciprocating, oscillating, or vibrating part of magnetic circuit

3/00 **Details of windings** (coils in general H01F 5/00)

3/02 . Windings characterised by the conductor material (conductors in general H01B 1/00, H01B 5/00)

3/04 . Windings characterised by the conductor shape, form, or construction, e.g. with bar conductor

3/12 . . arranged in slots

3/14 . . . with transposed conductors, e.g. twisted conductor

3/16 . . . for damping, commutating, or other auxiliary purposes

3/18 . . Windings for salient poles

3/20 . . . for damping, commutating, or other auxiliary purposes

3/22 . . consisting of hollow conductors

3/24 . . with channels or ducts between the conductors for flow of cooling medium

3/26 . . consisting of printed conductors

3/28 . . Layout of windings or of connections between windings (windings for pole-changing H02K 17/06, H02K 17/14, H02K 19/12, H02K 19/32)

3/30 . Windings characterised by the insulating material (insulating bodies in general H01B 3/00, H01B 17/00)

3/32 . Windings characterised by the shape, form, or construction of the insulation

3/34 . . between conductors or between conductor and core, e.g. slot insulation **[3]**

3/38 . . around winding heads, equalising connectors, or connections thereto

3/40 . . for high voltage, e.g. affording protection against corona

3/42 . Means for preventing or reducing eddy-current losses in the winding heads, e.g. by shielding **[2]**

3/44 . Protection against moisture or chemical attack; Windings specially adapted for operation in liquid or gas

3/46 . Fastening of windings on stator or rotor structure

3/47 . . Air-gap windings, i.e. iron-free windings **[3]**

3/48 . . in slots

3/487 . . . Slot-closing devices **[3]**

3/493 . . . . where the devices are magnetic **[3]**

3/50 . . Fastening of winding heads, equalising connectors, or connections thereto

3/51 . . . applicable to rotors only **[3]**

3/52 . . Fastening salient pole windings or connections thereto

5/00 **Casings**; **Enclosures**; **Supports** (casings for electric apparatus in general H05K 5/00)

5/02 . Casings or enclosures characterised by the material thereof

5/04 . Casings or enclosures characterised by the shape, form, or construction thereof

5/06 . . Cast metal casings

5/08 . . Insulating casings

5/10 . . affording protection from ingress, e.g. of water, of fingers

5/12 . . specially adapted for operating in liquid or gas (combined with cooling arrangements H02K 9/00)

5/124 . . . Sealing of the shaft **[3]**

5/128 . . . using air-gap sleeve or air-gap disc **[3]**

5/132 . . . Submersible electric motor (H02K 5/128 takes precedence; pumping installations or systems for submerged use F04D 13/08) **[3]**

5/136 . . . explosion-proof **[3]**

5/14 . . Means for supporting or protecting brushes or brush holders **[3]**

5/15 . . Mounting arrangements for bearing-shields or end plates **[3]**

5/16 . . Means for supporting bearings, e.g. insulating support, means for fitting the bearing in the bearing-shield (magnetic bearings H02K 7/09)

5/167 . . . using sliding-contact or spherical cap bearings **[3]**

5/173 . . . using ball bearings or bearings with rolling contact **[3]**

5/18 . . with ribs or fins for improving heat transfer

5/20 . . with channels or ducts for flow of cooling medium

5/22 . . Other additional parts of casings, e.g. shaped to form connection or terminal box

5/24 . specially adapted for suppression or reduction of noise or vibration

5/26 . Means for adjusting the casing relative to its support

7/00 Arrangements for handling mechanical energy structurally associated with the machine, e.g. structural association with mechanical driving motor or auxiliary dynamo-electric machine

7/02 . Additional mass for increasing inertia, e.g. flywheel

7/04 . Balancing means

7/06 . Means for converting reciprocating into rotary motion or vice versa

7/065 . . Electromechanical oscillators; Vibrating magnetic drives (in time-pieces G04C 5/00) **[3]**

7/07 . . using pawl and ratchet wheel **[3]**

7/075 . . using crankshaft or eccentric **[3]**

7/08 . Structural association with bearings (support in machine casing H02K 5/16)

7/09 . . with magnetic bearings **[3]**

7/10 . Structural association with clutches, brakes, gears, pulleys, mechanical starters

7/102 . . with friction brakes

7/104 . . with eddy-current brakes

7/106 . . with dynamo-electric brakes

7/108 . . with friction clutches

7/11 . . with dynamo-electric clutches

7/112 . . with friction clutches and brakes

7/114 . . with dynamo-electric clutches and brakes

7/116 . . with gears

7/118 . . with starting device

7/12 . . with auxiliary limited movement of stator, rotor, or core parts, e.g. rotor axially movable for the purpose of clutching or braking

7/14 . Structural association with mechanical load, e.g. hand-held machine tool, fan (with fan or impeller for cooling the machine H02K 9/06; for suction cleaners A47L)

7/16 . . for operation above critical speed of vibration of rotating parts

7/18 . Structural association of electric generator with mechanical driving motor, e.g. turbine (if the driving-motor aspect predominates, see the relevant place of section F, e.g. F03B 13/00)

7/20 . Structural association with auxiliary dynamo-electric machine, e.g. with electric starter motor, with exciter

9/00 Systems for cooling or ventilating (channels or ducts in parts of the magnetic circuit H02K 1/20, H02K 1/32; channels or ducts in or between conductors H02K 3/22, H02K 3/24)

9/02 . by ambient air flowing through the machine

9/04 . . having means for generating flow of cooling medium, e.g. having fan

9/06 . . . with fan or impeller driven by the machine shaft

9/08 . by gaseous cooling medium circulating wholly within the machine casing (H02K 9/10 takes precedence)

9/10 . by gaseous cooling medium flowing in closed circuit, a part of which is external to the machine casing

9/12 . . wherein the cooling medium circulates freely within the casing

9/14 . wherein gaseous cooling medium circulates between the machine casing and a surrounding mantle

9/16 . . wherein the cooling medium circulates through ducts or tubes within the casing

9/18 . . wherein the external part of the closed circuit comprises a heat exchanger structurally associated with the machine casing

9/19 . for machines with closed casing and with closed-circuit cooling using a liquid cooling medium, e.g. oil

9/193 . . with provision for replenishing the cooling medium; with means for preventing leakage of the cooling medium

9/197 . . in which the rotor or stator space is fluid-tight, e.g. to provide for different cooling media for rotor and stator

9/20 . . wherein the cooling medium vaporises within the machine casing

9/22 . by solid heat conducting material embedded in, or arranged in contact with, stator or rotor, e.g. heat bridge

9/24 . Protection against failure of cooling arrangements, e.g. due to loss of cooling medium, due to interruption of the circulation of cooling medium (circuit arrangements affording such protection H02H 7/00)

9/26 . Structural association with machine of devices for cleaning or drying cooling medium, e.g. of filter

9/28 . Cooling of commutators, slip-rings, or brushes, e.g. by ventilating (current collectors in general H01R 39/00)

11/00 Structural association with measuring or protective devices or electric components, e.g. with resistor, with switch, with suppressor for radio interference

11/02 . for suppression of radio interference **[6]**

11/04 . for rectification **[6]**

13/00 Structural associations of current collectors with motors or generators, e.g. brush mounting plates, connections to windings (supporting or protecting brushes or brush holders in motor casings or enclosures H02K 5/14); **Disposition of current collectors in motors or generators**; **Arrangements for improving commutation**

13/02 . Connections of slip-rings with the winding

13/04 . Connections of commutator segments with the winding

13/06 . . Resistive connections between winding and commutator segments, e.g. by high-resistance choke, by transistor

13/08 . . Segments formed by extensions of winding

13/10 . Special arrangements of brushes or commutators for the purpose of improving commutation

13/12 . Means for producing an axial reciprocation of the rotor and its associated current collector part, e.g. for polishing commutator surface

13/14 . Circuit arrangements for improvement of commutation, e.g. by use of unidirectionally conductive element

15/00 Methods or apparatus specially adapted for manufacturing, assembling, maintaining, or repairing dynamo-electric machines (manufacture of current collectors in general H01R 43/00)

15/02 . of stator or rotor bodies

15/03 . . having permanent magnets **[5]**

15/04 . of windings, prior to mounting into the machine (insulating windings H02K 15/10, H02K 15/12; coil manufacture in general H01F 41/02)

15/06 . Embedding prefabricated windings in the machine

15/08 . Forming windings by laying conductors into or around core part

15/085 . . by laying conductors into slotted stators

15/09 . . by laying conductors into slotted rotors

15/095 . . by laying conductors around salient poles

15/10 . Applying solid insulation to the windings, the stator, or the rotor

15/12 . Impregnating, heating or drying of windings, stators, rotors, or machines

15/14 . Casings; Enclosures; Supports

15/16 . Centering the rotor within the stator; Balancing the rotor (balancing in general G01M)

16/00 Machines with more than one rotor or stator [2]

16/02 . Machines with one stator and two rotors **[2]**

16/04 . Machines with one rotor and two stators **[2]**

Note

Group H02K 16/00 takes precedence over groups H02K 17/00 to H02K 53/00. **[2]**

17/00 Asynchronous induction motors; **Asynchronous induction generators**

17/02 . Asynchronous induction motors

17/04 . . for single phase current

17/06 . . . having windings arranged for permitting pole-changing

17/08 . . . Motors with auxiliary phase obtained by externally fed auxiliary winding, e.g. capacitor motor

17/10 . . . Motors with auxiliary phase obtained by split-pole carrying short-circuited winding

17/12 . . for multi-phase current

17/14 . . . having windings arranged for permitting pole-changing

17/16 . . having rotor with internally short-circuited windings, e.g. cage rotor

17/18 . . . having double- or multiple-cage rotor

17/20 . . . having deep-bar rotor

17/22 . . having rotor with windings connected to slip-rings

17/24 . . . in which both stator and rotor are fed with ac

17/26 . . having rotor or stator designed to permit synchronous operation

17/28 . . having compensating winding for improving phase angle

17/30 . . Structural association with auxiliary electric devices influencing the characteristic of, or controlling, the motor, e.g. with impedance, with switch (control arrangements external to the motor H02P)

17/32 . . Structural association with auxiliary mechanical devices, e.g. clutch, brake (control arrangements external to the motor H02P)

17/34 . . Cascade arrangement of an asynchronous motor with another dynamo-electric motor or converter (control of cascade arrangements H02P)

17/36 . . . with another asynchronous induction motor

17/38 . . . with a commutator machine

17/40 . . . with a rotary ac/dc converter (cascade ac/dc converters H02K 47/06)

17/42 . Asynchronous induction generators (H02K 17/02 takes precedence) **[4]**

17/44 . . Structural association with exciting machine

19/00 Synchronous motors or generators (having permanent magnet H02K 21/00)

19/02 . Synchronous motors

19/04 . . for single-phase current

19/06 . . . Motors having windings on the stator and a variable-reluctance soft-iron rotor without windings, e.g. inductor motor

19/08 . . . Motors having windings on the stator and a smooth rotor of material with large hysteresis without windings, e.g. hysteresis motor

19/10 . . for multi-phase current

19/12 . . . characterised by the arrangement of exciting windings, e.g. for self-excitation, for compounding, for pole-changing

19/14 . . having additional short-circuited winding for starting as an asynchronous motor

19/16 . Synchronous generators

19/18 . . having windings each turn of which co-operates only with poles of one polarity, e.g. homopolar generator

19/20 . . . with variable-reluctance soft-iron rotor without winding

19/22 . . having windings each turn of which co-operates alternately with poles of opposite polarity, e.g. heteropolar generator

19/24 . . . with variable-reluctance soft-iron rotor without winding

19/26 . . characterised by the arrangement of exciting winding

19/28 . . . for self-excitation

19/30 . . . for compounding

19/32 . . . for pole-changing

19/34 . . Generators with two or more outputs

19/36 . . Structural association with auxiliary electric devices influencing the characteristic of, or controlling, the generator, e.g. with impedance, with switch (control arrangements external to the generator H02P)

19/38 . . Structural association with exciting machine

21/00 Synchronous motors having permanent magnet; **Synchronous generators having permanent magnet** (stator cores with permanent magnets H02K 1/17; rotor cores with permanent magnets H02K 1/27)

21/02 . Details

21/04 . . Windings on magnet for additional excitation

21/10 . . Rotating armatures

21/12 . with stationary armature and rotating magnet

21/14 . . magnet rotating within armature
21/16 . . . having an annular armature core with salient poles (with homopolar co-operation H02K 21/20)
21/18 . . . having horse-shoe armature core (with homopolar co-operation H02K 21/20)
21/20 . . . having windings each turn of which co-operates only with poles of one polarity, e.g. homopolar machine
21/22 . . magnet rotating around armature, e.g. flywheel magneto
21/24 . . magnet axially facing armature, e.g. hub-type cycle dynamo
21/26 . with rotating armature and stationary magnet
21/28 . . armature rotating within magnet
21/30 . . . having an annular armature core with salient poles (with homopolar co-operation H02K 21/36)
21/32 . . . having a horse-shoe magnet (with homopolar co-operation H02K 21/36)
21/34 . . . having bell-shaped or bar-shaped magnet, e.g. for cycle lighting (with homopolar co-operation H02K 21/36)
21/36 . . . with homopolar co-operation
21/38 . with rotating flux distributor, and armature and magnet both stationary
21/40 . . flux distributor rotating around magnet and within armature
21/42 . . flux distributor rotating around armature and within magnet
21/44 . . armature windings wound upon magnet
21/46 . Motors having additional short-circuited winding for starting as an asynchronous motor
21/48 . Generators with two or more outputs

23/00 Dc commutator motors or generators having mechanical commutator; **Universal ac/dc commutator motors**

23/02 . characterised by the exciting arrangement
23/04 . . having permanent magnet excitation
23/06 . . having shunt connection of excitation windings
23/08 . . having series connection of excitation windings
23/10 . . having compound connection of excitation windings
23/12 . . having excitation produced by a current source independent of the armature circuit
23/14 . . having high-speed excitation or de-excitation, e.g. by neutralising the remanent excitation field
23/16 . . having angularly adjustable excitation field, e.g. by pole reversing, by pole switching
23/18 . . having displaceable main or auxiliary brushes
23/20 . . having additional brushes spaced intermediately of the main brushes on the commutator, e.g. cross-field machine, metadyne, amplidyne, other armature-reaction excited machine
23/22 . . having compensating or damping winding
23/24 . . having commutating-pole winding
23/26 . characterised by the armature winding
23/28 . . having open winding, i.e. not closed within armature
23/30 . . having lap winding; having loop winding
23/32 . . having wave winding; having undulating winding
23/34 . . having mixed windings
23/36 . . having more than one winding; having more than one commutator; having more than one stator
23/38 . . having winding or connection for improving commutation, e.g. equipotential connection
23/40 . characterised by the arrangement of the magnet circuit
23/42 . . having split poles, i.e. zones for varying reluctance by gaps in poles or by poles with different spacing of the air gap
23/44 . . having movable or turnable iron parts
23/46 . . having stationary shunts, i.e. magnetic cross flux
23/48 . . having adjustable armature
23/50 . Generators with two or more outputs
23/52 . Motors acting also as generators, e.g. starting motor used as generator for ignition or lighting
23/54 . Disc armature motors or generators
23/56 . Motors or generators having the iron core separated from armature winding
23/58 . Motors or generators having no iron core
23/60 . Motors or generators having a rotating armature and a rotating excitation field
23/62 . Motors or generators with stationary armature and rotating excitation field
23/64 . Motors specially adapted for running on dc or ac by choice
23/66 . Structural association with auxiliary electric devices influencing the characteristic of, or controlling, the machine, e.g. with impedance, with switch (control arrangements external to the machine H02P)
23/68 . Structural association with auxiliary mechanical devices, e.g. with clutch, with brake (control arrangements external to the machine H02P)

24/00 Machines adapted for the instantaneous transmission or reception of the angular displacement of rotating parts, e.g. synchro, selsyn

25/00 Dc interrupter motors or generators

26/00 Machines adapted to function as torque motors, i.e. to exert a torque when stalled

27/00 Ac commutator motors or generators having mechanical commutator (universal ac/dc motors H02K 23/64)

27/02 . characterised by the armature winding
27/04 . having single-phase operation in series or shunt connection
27/06 . . with a single or multiple short-circuited commutator, e.g. repulsion motor
27/08 . . with multiple-fed armature
27/10 . . with switching devices for different modes of operation, e.g. repulsion-induction motor
27/12 . having multi-phase operation
27/14 . . in series connection
27/16 . . in shunt connection with stator feeding
27/18 . . in shunt connection with rotor feeding
27/20 . Structural association with a speed regulating device
27/22 . having means for improving commutation, e.g. auxiliary fields, double windings, double brushes
27/24 . having two or more commutators
27/26 . having disc armature
27/28 . Structural association with auxiliary electric devices influencing the characteristic of, or controlling, the machine (control arrangements external to the machine H02P)
27/30 . Structural association with auxiliary mechanical devices, e.g. clutch, brake (control arrangements external to the machine H02P)

29/00 Motors or generators having non-mechanical commutating devices, e.g. discharge tubes, semiconductor devices

29/03 . with a magnetic circuit specially adapted for avoiding torque ripples or self-starting problems **[6]**

29/06 . with position sensing devices (H02K 29/03 takes precedence) **[4,6]**

29/08 . . using magnetic effect devices, e.g. Hall-plates, magneto-resistors (H02K 29/12 takes precedence) **[4]**

29/10 . . using light effect devices **[4]**

29/12 . . using detecting coils **[4]**

29/14 . with speed sensing devices (H02K 29/03 takes precedence) **[4,6]**

31/00 Acyclic motors or generators, i.e. dc machines having a drum or disc armature with continuous current collectors

31/02 . with solid-contact collectors

31/04 . with at least one liquid-contact collector

33/00 Motors with reciprocating, oscillating, or vibrating magnet, armature, or coil system (arrangements for handling mechanical energy structurally associated with motors H02K 7/00, e.g. H02K 7/06)

33/02 . with armature moved one way by energisation of a single coil system and returned by mechanical force, e.g. by spring

33/04 . . wherein the frequency of operation is determined by the frequency of uninterrupted ac energisation

33/06 . . . with polarised armature

33/08 . . . with dc energisation superimposed on ac energisation

33/10 . . wherein the alternate energisation and de-energisation of the single coil system is effected or controlled by movement of the armature

33/12 . with armature moving in alternate directions by alternate energisation of two coil systems

33/14 . . wherein the alternate energisation and de-energisation of the two coil systems are effected or controlled by movement of the armature

33/16 . with polarised armature moving in alternate directions by reversal or energisation of a single coil system

33/18 . with coil system moving upon intermittent or reversed energisation thereof by interaction with a fixed field system, e.g. permanent magnet

35/00 Generators with reciprocating, oscillating, or vibrating coil system, magnet, armature, or other part of the magnetic circuit (arrangements for handling mechanical energy structurally associated with generators H02K 7/00, e.g. H02K 7/06)

35/02 . with moving magnet and stationary coil system

35/04 . with moving coil system and stationary magnet

35/06 . with moving flux distributor, and both coil system and magnet stationary

37/00 Motors with rotor rotating step by step and without interrupter or commutator driven by the rotor, e.g. stepping motors

37/02 . variable reluctance type **[4]**

37/04 . . Rotor situated within stator **[4]**

37/06 . . Rotor situated around stator **[4]**

37/08 . . Rotor axially facing stator **[4]**

37/10 . permanent magnet type (H02K 37/02 takes precedence) **[4]**

37/12 . . with stationary armature and rotating magnet **[4]**

37/14 . . . Magnet rotating within armature **[4]**

37/16 . . . . having horseshoe armature core **[4]**

37/18 . . . . homopolar type **[4]**

37/20 . . with rotating flux distributor, the armature and magnet both being stationary **[4]**

37/22 . Damping units **[4]**

37/24 . Structural association with auxiliary mechanical devices **[4]**

39/00 Generators specially adapted for producing a desired non-sinusoidal waveform

41/00 Propulsion systems in which a rigid body is moved along a path due to dynamo-electric interaction between the body and a magnetic field travelling along the path

41/02 . Linear motors; Sectional motors **[3]**

41/025 . . Asynchronous motors **[3]**

41/03 . . Synchronous motors; Motors moving step by step; Reluctance motors (H02K 41/035 takes precedence) **[3]**

41/035 . . Dc motors; Unipolar motors **[3]**

41/06 . Rolling motors, i.e. having the rotor axis parallel to the stator axis and following a circular path as the rotor rolls around the inside or outside of the stator

44/00 Machines in which the dynamo-electric interaction between a plasma or flow of conductive liquid or of fluid-borne conductive or magnetic particles and a coil system or magnetic field converts energy of mass flow into electrical energy or vice versa [3]

44/02 . Electrodynamic pumps **[3]**

44/04 . . Conduction pumps **[3]**

44/06 . . Induction pumps **[3]**

44/08 . Magnetohydrodynamic (MHD) generators **[3]**

44/10 . . Constructional details of electrodes **[3]**

44/12 . . Constructional details of fluid channel **[3]**

44/14 . . . Circular or screw-shaped channel **[3]**

44/16 . . Constructional details of the magnetic circuit **[3]**

44/18 . . for generating ac power **[3]**

44/20 . . . by changing the polarity of the magnetic field **[3]**

44/22 . . . by changing the conductivity of the fluid **[3]**

44/24 . . . by reversing the direction of fluid **[3]**

44/26 . . . by creating a travelling magnetic field **[3]**

44/28 . Association of MHD generators with conventional generators (nuclear power plants including a MHD generator G21D 7/02) **[3]**

47/00 Dynamo-electric converters

47/02 . Ac/dc converters or vice versa

47/04 . . Motor/generators

47/06 . . Cascade converters

47/08 . . Single-armature converters

47/10 . . . with booster machine on the ac side

47/12 . Dc/dc converters

47/14 . . Motor/generators

47/16 . . Single-armature converters, e.g. metadyne

47/18 . Ac/ac converters

47/20 . . Motor/generators

47/22 . . Single-armature frequency converters with or without phase-number conversion

47/24 . . . having windings for different numbers of poles

47/26 . . . operating as under- or over-synchronously running asynchronous induction machines, e.g. cascade arrangement of asynchronous and synchronous machines

47/28 . . . operating as commutator machines with added slip-rings
47/30 . . Single-armature phase-number converters without frequency conversion

49/00 Dynamo-electric clutches; **Dynamo-electric brakes** (electrically or magnetically actuated clutches or brakes F16D 27/00, F16D 29/00, F16D 65/34, F16D 65/36; magnetic-particle clutches F16D 37/02; adapted for use as dynamometers G01L)
49/02 . of the asynchronous induction type
49/04 . . of the eddy-current hysteresis type
49/06 . of the synchronous type
49/08 . of the collector armature type
49/10 . of the permanent-magnet type
49/12 . of the acyclic type

51/00 Dynamo-electric gears, i.e. dynamo-electric means for transmitting mechanical power from a driving shaft to a driven shaft and comprising structurally interrelated motor and generator parts

53/00 Alleged dynamo-electric perpetua mobilia

55/00 Dynamo-electric machines having windings operating at cryogenic temperatures [3]
55/02 . of the synchronous type **[3]**
55/04 . . with rotating field windings **[3]**
55/06 . of the homopolar type **[3]**

57/00 Dynamo-electric machines not provided for in groups H02K 17/00 to H02K 55/00 [3]

H02M APPARATUS FOR CONVERSION BETWEEN AC AND AC, BETWEEN AC AND DC, OR BETWEEN DC AND DC, AND FOR USE WITH MAINS OR SIMILAR POWER SUPPLY SYSTEMS; **CONVERSION OF DC OR AC INPUT POWER INTO SURGE OUTPUT POWER**; **CONTROL OR REGULATION THEREOF** (conversion of current or voltage specially adapted for use in electronic time-pieces with no moving parts G04G 19/02; systems for regulating electric or magnetic variables in general, e.g. using transformers, reactors or choke coils, combination of such systems with static converters G05F; for digital computers G06F 1/00; transformers H01F; connection or control of one converter with regard to conjoint operation with a similar or other source of supply H02J; dynamo-electric converters H02K 47/00; controlling transformers, reactors or choke coils, control or regulation of electric motors, generators or dynamo-electric converters H02P; pulse generators H03K) **[4,5]**

(1) This subclass covers only circuits or apparatus for the conversion of electric power, or arrangements for control or regulation of such circuits or apparatus.
(2) This subclass does not cover the individual electro-technical devices employed when converting electric power. Such devices are covered by the relevant subclasses, e.g. inductors, transformers H01F, capacitors, electrolytic rectifiers H01G, mercury-vapour rectifying or other discharge tubes H01J, semiconductor devices H01L, impedance networks or resonant circuits not primarily concerned with the transfer of electric power H03H.
(3) In this subclass, the following term is used with the meaning indicated:
– "conversion", in respect of an electric variable, e.g. voltage or current, means the change of one or more of the parameters of the variable, e.g. amplitude, frequency, phase, polarity. **[4]**

Subclass index

1/00 Details of apparatus for conversion [1,2007.01]
1/02 . Circuits specially adapted for the generation of grid-control or igniter-control voltages for discharge tubes incorporated in static converters
1/04 . . for tubes with grid control
1/06 . Circuits specially adapted for rendering non-conductive gas discharge tubes or equivalent semiconductor devices, e.g. thyratrons, thyristors **[2]**
1/08 . Circuits specially adapted for the generation of control voltages for semiconductor devices incorporated in static converters
1/084 . . using a control circuit common to several phases of a multi-phase system **[4]**
1/088 . . for the simultaneous control of series or parallel connected semiconductor devices **[4]**
1/092 . . . the control signals being transmitted optically **[4]**
1/096 . . . the power supply of the control circuit being connected in parallel to the main switching element (H02M 1/092 takes precedence) **[4]**
1/10 . Arrangements incorporating converting means for enabling loads to be operated at will from different kinds of power supplies, e.g. from ac or dc
1/12 . Arrangements for reducing harmonics from ac input or output
1/14 . Arrangements for reducing ripples from dc input or output
1/15 . . using active elements **[4]**
1/16 . Means for providing current step on switching, e.g. with saturable reactor
1/20 . Contact mechanisms of dynamic converters
1/22 . . incorporating collectors and brushes
1/24 . . incorporating rolling or tumbling contacts
1/26 . . incorporating cam-operated contacts
1/28 . . incorporating electromagnetically-operated vibrating contacts

1/30 . . incorporating liquid contacts
1/32 . Means for protecting converters other than by automatic disconnection (emergency protective circuit arrangements specially adapted for converters with automatic disconnection H02H 7/10) **[2007.01]**
1/34 . . Snubber circuits **[2007.01]**
1/36 . Means for starting or stopping converters **[2007.01]**
1/38 . Means for preventing simultaneous conduction of switches **[2007.01]**
1/40 . Means for preventing magnetic saturation **[2007.01]**
1/42 . Circuits or arrangements for compensating for or adjusting power factor in converters or inverters **[2007.01]**
1/44 . Circuits or arrangements for compensating for electromagnetic interference in converters or inverters **[2007.01]**

3/00 Conversion of dc power input into dc power output
3/02 . without intermediate conversion into ac
3/04 . . by static converters
3/06 . . . using resistors or capacitors, e.g. potential divider
3/07 . . . . using capacitors charged and discharged alternately by semiconductor devices with control electrode **[4]**
3/08 . . . using discharge tubes without control electrode or semiconductor devices without control electrode
3/10 . . . using discharge tubes with control electrode or semiconductor devices with control electrode (H02M 3/07 takes precedence) **[4]**
3/125 . . . . using devices of a thyratron or thyristor type requiring extinguishing means **[2]**
3/13 . . . . . using discharge tubes only **[2]**
3/135 . . . . . using semiconductor devices only **[2]**
3/137 . . . . . with automatic control of output voltage or current, e.g. switching regulators **[4]**
3/139 . . . . . with digital control **[4]**
3/142 . . . . . including plural semiconductor devices as final control devices for a single load **[4]**
3/145 . . . . using devices of a triode or transistor type requiring continuous application of a control signal **[2]**
3/15 . . . . . using discharge tubes only **[2]**
3/155 . . . . . using semiconductor devices only **[2]**
3/156 . . . . . with automatic control of output voltage or current, e.g. switching regulators **[4]**
3/157 . . . . . with digital control **[4]**
3/158 . . . . . including plural semiconductor devices as final control devices for a single load **[4]**
3/16 . . by dynamic converters
3/18 . . . using capacitors or batteries which are alternately charged and discharged, e.g. charged in parallel and discharged in series
3/20 . . by combination of static with dynamic converters; by combination of dynamo-electric with other dynamic or static converters
3/22 . with intermediate conversion into ac
3/24 . . by static converters
3/26 . . . using discharge tubes without control electrode or semiconductor devices without control electrode to produce the intermediate ac
3/28 . . . using discharge tubes with control electrode or semiconductor devices with control electrode to produce the intermediate ac
3/305 . . . . using devices of a thyratron or thyristor type requiring extinguishing means **[2]**
3/31 . . . . . using discharge tubes only **[2]**
3/315 . . . . . using semiconductor devices only **[2]**
3/325 . . . . using devices of a triode or a transistor type requiring continuous application of a control signal **[2]**
3/33 . . . . . using discharge tubes only **[2]**
3/335 . . . . . using semiconductor devices only **[2]**
3/337 . . . . . in push-pull configuration **[4]**
3/338 . . . . . in a self-oscillating arrangement (H02M 3/337 takes precedence) **[4]**
3/34 . . by dynamic converters
3/36 . . . using mechanical parts to select progressively or to vary continuously the input potential
3/38 . . . using mechanical contact-making and -breaking parts to interrupt a single potential
3/40 . . . . wherein the parts are rotating and collectors co-operate with brushes or rollers
3/42 . . . . with electromagnetically-operated vibrating contacts, e.g. chopper (self-interrupters in general H01H 51/34)
3/44 . . by combination of static with dynamic converters; by combination of dynamo-electric with other dynamic or static converters

5/00 Conversion of ac power input into ac power output, e.g. for change of voltage, for change of frequency, for change of number of phases
5/02 . without intermediate conversion into dc
5/04 . . by static converters (controlling transformers, reactors or choke coils, e.g. by tap changing, H02P 13/00) **[4]**
5/06 . . . using impedances
5/08 . . . . using capacitors only
5/10 . . . using transformers
5/12 . . . . for conversion of voltage or current amplitude only
5/14 . . . . for conversion between circuits of different phase number
5/16 . . . . for conversion of frequency
5/18 . . . . for conversion of waveform
5/20 . . . using discharge tubes without control electrode or semiconductor devices without control electrode
5/22 . . . using discharge tubes with control electrode or semiconductor devices with control electrode
5/25 . . . . using devices of a thyratron or thyristor type requiring extinguishing means (H02M 5/27 takes precedence) **[2]**
5/253 . . . . . using discharge tubes only **[2]**
5/257 . . . . . using semiconductor devices only **[2]**
5/27 . . . . . for conversion of frequency **[2]**
5/275 . . . . using devices of a triode or transistor type requiring continuous application of a control signal (H02M 5/297 takes precedence) **[2]**
5/29 . . . . . using discharge tubes only **[2]**
5/293 . . . . . using semiconductor devices only **[2]**
5/297 . . . . . for conversion of frequency **[2]**
5/32 . . by dynamic converters
5/34 . . . using mechanical contact-making and -breaking parts

5/36 . . . . wherein the parts are rotating and collectors co-operate with brushes or rollers
5/38 . . by combination of static with dynamic converters; by combination of dynamo-electric with other dynamic or static converters
5/40 . with intermediate conversion into dc
5/42 . . by static converters
5/44 . . . using discharge tubes or semiconductor devices to convert the intermediate dc into ac
5/443 . . . . using devices of a thyratron or thyristor type requiring extinguishing means **[2]**
5/447 . . . . . using discharge tubes only **[2]**
5/45 . . . . . using semiconductor devices only **[2]**
5/451 . . . . . with automatic control of output voltage or frequency **[4]**
5/452 . . . . . with automatic control of output waveform **[4]**
5/453 . . . . using devices of a triode or transistor type requiring continuous application of a control signal **[2]**
5/456 . . . . . using discharge tubes only **[2]**
5/458 . . . . . using semiconductor devices only **[2]**
5/46 . . by dynamic converters
5/48 . . by combination of static with dynamic converters; by combination of dynamo-electric with other dynamic or static converters

7/00 Conversion of ac power input into dc power output; Conversion of dc power input into ac power output
7/02 . Conversion of ac power input into dc power output without possibility of reversal
7/04 . . by static converters
7/06 . . . using discharge tubes without control electrode or semiconductor devices without control electrode
7/08 . . . . arranged for operation in parallel
7/10 . . . . arranged for operation in series, e.g. for multiplication of voltage
7/12 . . . using discharge tubes with control electrode or semiconductor devices with control electrode
7/145 . . . . using devices of a thyratron or thyristor type requiring extinguishing means **[2,4]**
7/15 . . . . . using discharge tubes only **[2]**
7/155 . . . . . using semiconductor devices only **[2]**
7/162 . . . . . in a bridge configuration **[4]**
7/17 . . . . . arranged for operation in parallel **[2,4]**
7/19 . . . . . arranged for operation in series, e.g. for voltage multiplication **[2,4]**
7/21 . . . . using devices of a triode or transistor type requiring continuous application of a control signal **[2,4]**
7/213 . . . . . using discharge tubes only **[2]**
7/217 . . . . . using semiconductor devices only **[2]**
7/219 . . . . . in a bridge configuration **[4]**
7/23 . . . . . arranged for operation in parallel **[2,4]**
7/25 . . . . . arranged for operation in series, e.g. for multiplication of voltage **[2,4]**
7/26 . . . using open-spark devices, e.g. Marx rectifier
7/28 . . . using electrolytic rectifiers
7/30 . . by dynamic converters
7/32 . . . using mechanical contact-making and -breaking parts
7/34 . . . . wherein the parts are rotating and collectors co-operate with brushes or rollers
7/36 . . . . with electromagnetically-operated vibrating contacts, e.g. chopper (self-interrupters in general H01H 51/34)
7/38 . . . using one or more sparking electrodes rotating over counterelectrodes
7/40 . . by combination of static with dynamic converters; by combination of dynamo-electric with other dynamic or static converters
7/42 . Conversion of dc power input into ac power output without possibility of reversal
7/44 . . by static converters
7/46 . . . using discharge tubes without control electrode or semiconductor devices without control electrode
7/48 . . . using discharge tubes with control electrode or semiconductor devices with control electrode **[1,2007.01]**
7/483 . . . . Converters with outputs that each can have more than two voltage levels **[2007.01]**
7/487 . . . . . Neutral point clamped inverters **[2007.01]**
7/49 . . . . . Combination of the output voltage waveforms of a plurality of converters **[2007.01]**
7/493 . . . . the static converters being arranged for operation in parallel **[2007.01]**
7/497 . . . . sinusoidal output voltages being obtained by combination of several voltages being out of phase **[2007.01]**
7/501 . . . . sinusoidal output voltages being obtained by the combination of several pulse-voltages having different amplitude and width **[2007.01]**
7/505 . . . . using devices of a thyratron or thyristor type requiring extinguishing means **[2]**
7/51 . . . . . using discharge tubes only **[2]**
7/515 . . . . . using semiconductor devices only **[2,2007.01]**
7/516 . . . . . Self-oscillating arrangements **[2007.01]**
7/517 . . . . . with special starting equipment **[4]**
7/519 . . . . . in a push-pull configuration (H02M 7/517 takes precedence) **[4]**
7/521 . . . . . in a bridge configuration **[4]**
7/523 . . . . . with LC-resonance circuit in the main circuit **[4]**
7/525 . . . . . with automatic control of output waveform or frequency (H02M 7/517 to H02M 7/523 take precedence) **[4]**
7/527 . . . . . by pulse width modulation **[4]**
7/529 . . . . . using digital control **[4]**
7/53 . . . . using devices of a triode or transistor type requiring continuous application of a control signal **[2]**
7/533 . . . . . using discharge tubes only **[2]**
7/537 . . . . . using semiconductor devices only, e.g. single switched pulse inverters **[2]**
7/5375 . . . . . with special starting equipment **[4]**
7/538 . . . . . in a push-pull configuration (H02M 7/5375 takes precedence) **[4,2007.01]**
7/5381 . . . . . Parallel type **[2007.01]**
7/5383 . . . . . in a self-oscillating arrangement (H02M 7/538 takes precedence) **[4,2007.01]**
7/53838 . . . . . using a single commutation path **[2007.01]**
7/53846 . . . . . Control circuits **[2007.01]**

7/53854 . . . . . using thyristor type converters **[2007.01]**
7/53862 . . . . . using transistor type converters **[2007.01]**
7/5387 . . . . . in a bridge configuration **[4,2007.01]**
7/5388 . . . . . with asymmetrical configuration of switches **[2007.01]**
7/539 . . . . . with automatic control of output wave form or frequency (H02M 7/5375 to H02M 7/5387 take precedence) **[4]**
7/5395 . . . . . by pulse-width modulation **[4]**
7/54 . . by dynamic converters
7/56 . . . using mechanical parts to select progressively, or to vary continuously, the input potential
7/58 . . . using mechanical contact-making and -breaking parts to interrupt a single potential
7/60 . . . . wherein the parts are rotating and collectors co-operate with brushes or rollers
7/62 . . . . with electromagnetically-operated vibrating contacts, e.g. chopper (self-interrupters in general H01H 51/34)
7/64 . . by combination of static with dynamic converters; by combination of dynamo-electric with other dynamic or static converters
7/66 . with possibility of reversal
7/68 . . by static converters
7/70 . . . using discharge tubes without control electrode or semiconductor devices without control electrode
7/72 . . . using discharge tubes with control electrode or semiconductor devices with control electrode
7/75 . . . . using devices of a thyratron or thyristor type requiring extinguishing means (H02M 7/77 takes precedence) **[2]**
7/753 . . . . . using discharge tubes only **[2]**
7/757 . . . . . using semiconductor devices only **[2]**
7/758 . . . . . with automatic control of output waveform or frequency **[4]**
7/77 . . . . . arranged for operation in parallel **[2]**
7/79 . . . . using devices of a triode or transistor type requiring continuous application of a control signal (H02M 7/81 takes precedence) **[2]**
7/793 . . . . . using discharge tubes only **[2]**
7/797 . . . . . using semiconductor devices only **[2]**
7/81 . . . . . arranged for operation in parallel **[2]**
7/82 . . . using open-spark devices, e.g. Marx rectifier
7/84 . . . using electrolytic rectifiers
7/86 . . by dynamic converters
7/88 . . . using mechanical parts to select progressively or to vary continuously the input potential
7/90 . . . using mechanical contact-making and -breaking parts to interrupt a single potential
7/92 . . . . wherein the parts are rotating and collectors co-operate with brushes or rollers
7/94 . . . . wherein the parts are operated by rotating cams or cam-like devices
7/95 . . . . with electromagnetically-operated vibrating contacts, e.g. chopper (self-interrupters in general H01H 51/34)
7/96 . . . . with moving liquid contacts
7/98 . . by combination of static with dynamic converters; by combination of dynamo-electric with other dynamic or static converters

9/00 Conversion of dc or ac input power into surge output power [2]
9/02 . with dc input power **[2]**
9/04 . . using capacitative stores **[2]**
9/06 . with ac input power **[2]**

11/00 Power conversion systems not covered by the other groups of this subclass [4]

H02N ELECTRIC MACHINES NOT OTHERWISE PROVIDED FOR

(1) This subclass covers:
- electrostatic generators, motors, clutches, or holding devices;
- other non-dynamo-electric generators or motors;
- holding or levitation devices using magnetic attraction or repulsion;
- arrangements for starting, regulating, braking, or otherwise controlling such machines unless in conjoint operation with a second machine.

(2) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to “micro-structural devices” and “micro-structural systems”. **[7]**

(3) Specific provision for generators, motors, or other means for converting between electric and other forms of energy also exists in other subclasses, e.g. in subclasses H01L, H01M, H02K, H04R.

Subclass index

1/00 **Electrostatic generators or motors using a solid moving electrostatic charge carrier**
1/04 . Friction generators
1/06 . Influence generators
1/08 . . with conductive charge carrier, i.e. capacitor machines
1/10 . . with non-conductive charge carrier
1/12 . . . in the form of a conveyer belt, e.g. van de Graaff machine

2/00 **Electric machines in general using piezo-electric effect, electrostriction or magnetostriction** (generating mechanical vibrations in general B06B; piezo-electric, electrostrictive or magnetostrictive elements in general H01L 41/00) **[4]**
2/02 . producing linear motion, e.g. actuators; Linear positioners **[6]**
2/04 . . Constructional details **[6]**
2/06 . . Drive circuits; Control arrangements **[6]**
2/08 . . using travelling waves, e.g. linear motors **[6]**
2/10 . producing rotary motion, e.g. rotary motors **[6]**
2/12 . . Constructional details **[6]**
2/14 . . Drive circuits; Control arrangements **[6]**
2/16 . . using travelling waves **[6]**
2/18 . producing electrical output from mechanical input, e.g. generators (for measurement devices G01) **[6]**

3/00 **Generators in which thermal or kinetic energy is converted into electrical energy by ionisation of a fluid and removal of the charge therefrom** (discharge tubes functioning as thermionic generators H01J 45/00) **[3]**

6/00 **Generators in which light radiation is directly converted into electrical energy** (solar cells or assemblies thereof H01L 25/00, H01L 31/00) **[4]**

10/00 **Electric motors using thermal effects [3]**

11/00 **Generators or motors not provided for elsewhere**; **Alleged perpetua mobilia obtained by electric or magnetic means** (by hydrostatic pressure F03B 17/04; by dynamo-electric means H02K 53/00)

13/00 **Clutches or holding devices using electrostatic attraction, e.g. using Johnson-Rahbek effect**

15/00 **Holding or levitation devices using magnetic attraction or repulsion, not otherwise provided for** (electric or magnetic devices for holding work on machine tools B23Q 3/15; sliding or levitation devices for railway systems B61B 13/08; material handling devices associated with conveyers incorporating devices with electrostatic or magnetic grippers B65G 47/92; separating thin or filamentary articles from piles using magnetic force B65H 3/16; delivering thin or filamentary articles from magnetic holders by air blast or suction B65H 29/24; bearings using magnetic or electric supporting means F16C 32/04; relieving bearing loads using magnetic means F16C 39/06; magnets H01F 7/00; dynamo-electric clutches or brakes H02K 49/00) **[3]**
15/02 . by Foucault currents **[3]**
15/04 . Repulsion by the Meissner effect (superconductors or hyperconductors in general H01L 39/00) **[3]**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

H02P **CONTROL OR REGULATION OF ELECTRIC MOTORS, GENERATORS, OR DYNAMO-ELECTRIC CONVERTERS**; **CONTROLLING TRANSFORMERS, REACTORS OR CHOKE COILS** (structure of the starter, brake, or other control devices, see the relevant subclasses, e.g. mechanical brake F16D, mechanical speed regulator G05D, variable resistor H01C, starter switch H01H; systems for regulating electric or magnetic variables using transformers, reactors or choke coils G05F; arrangements structurally associated with motors, generators, dynamo-electric converters, transformers, reactors or choke coils, see the relevant subclasses, e.g. H01F, H02K; connection or control of one generator, transformer, reactor, choke coil, or dynamo-electric converter with regard to conjoint operation with similar or other source of supply H02J; control or regulation of static converters H02M) **[4]**

(1) This subclass covers arrangements for starting, regulating, electronically commutating, braking, or otherwise controlling motors, generators, dynamo-electric converters, clutches, brakes, gears, transformers, reactors or choke coils, of the types classified in the relevant subclasses, e.g. H01F, H02K.
(2) This subclass does not cover similar arrangements for the apparatus of the types classified in subclass H02N, which arrangements are covered by that subclass.
(3) In this subclass, the following terms or expressions are used with the meanings indicated: **[6]**
– "control" means influencing a variable in any way, e.g. changing its direction or its value (including changing it to or from zero), maintaining it constant, limiting its range of variation; **[6]**
– "regulation" means maintaining a variable at a desired value, or within a desired range of values, by comparison of the actual value with the desired value. **[6]**

Subclass index

1/00 **Arrangements for starting electric motors or dynamo-electric converters** (starting of synchronous motors with electronic commutators H02P 6/20, H02P 6/22; starting dynamo-electric motors rotating step by step H02P 8/04; vector control H02P 21/00) **[4,8]**

1/02 . Details

1/04 . . Means for controlling progress of starting sequence in dependence upon time or upon current, speed, or other motor parameter

1/06 . . . Manually-operated multi-position starters

1/08 . . . Manually-operated on/off switch controlling power-operated multi-position switch or impedances for starting a motor

1/10 . . . Manually-operated on/off switch controlling relays or contactors operating sequentially for starting a motor (sequence determined by power-operated multi-position switch H02P 1/08)

1/12 . . . Switching devices centrifugally operated by the motor

1/14 . . . Pressure-sensitive resistors centrifugally operated by the motor

1/16 . for starting dynamo-electric motors or dynamo-electric converters

1/18 . . for starting an individual dc motor

1/20 . . . by progressive reduction of resistance in series with armature winding

1/22 . . . in either direction of rotation

1/24 . . for starting an individual ac commutator motor (starting of ac/dc commutator motors H02P 1/18)

1/26 . . for starting an individual polyphase induction motor

1/28 . . . by progressive increase of voltage applied to primary circuit of motor

1/30 . . . by progressive increase of frequency of supply to primary circuit of motor

1/32 . . . by star/delta switching

1/34 . . . by progressive reduction of impedance in secondary circuit

1/36 . . . . the impedance being a liquid resistance

1/38 . . . by pole-changing

1/40 . . . in either direction of rotation

1/42 . . for starting an individual single-phase induction motor

1/44 . . . by phase-splitting with a capacitor

1/46 . . for starting an individual synchronous motor

1/48 . . . by pole-changing

1/50 . . . by changing over from asynchronous to synchronous operation (H02P 1/48 takes precedence)

1/52 . . . by progressive increase of frequency of supply to motor

1/54 . . for starting two or more dynamo-electric motors

1/56 . . . simultaneously

1/58 . . . sequentially

3/00 **Arrangements for stopping or slowing electric motors, generators, or dynamo-electric converters** (stopping of synchronous motors with electronic commutators H02P 6/24; stopping dynamo-electric motors rotating step by step H02P 8/24; vector control H02P 21/00) **[2,4,8]**

3/02 . Details

3/04 . . Means for stopping or slowing by a separate brake, e.g. friction brake, eddy-current brake (brakes F16D, H02K 49/00) **[2]**

3/06 . for stopping or slowing an individual dynamo-electric motor or dynamo-electric converter **[2]**

3/08 . . for stopping or slowing a dc motor **[2]**

3/10 . . . by reversal of supply connections

3/12 . . . by short-circuit or resistive braking

3/14 . . . by regenerative braking

3/16 . . . by combined electrical and mechanical braking

3/18 . . for stopping or slowing an ac motor **[2]**

3/20 . . . by reversal of phase sequence of connections to the motor

3/22 . . . by short-circuit or resistive braking

3/24 . . . by applying dc to the motor

3/26 . . . by combined electrical and mechanical braking

4/00 **Arrangements specially adapted for regulating or controlling the speed or torque of electric motors that can be connected to two or more different voltage or current supplies** (starting H02P 1/00; stopping or slowing H02P 3/00; vector control H02P 21/00) **[8]**

5/00 **Arrangements specially adapted for regulating or controlling the speed or torque of two or more electric motors** (starting H02P 1/00; stopping or slowing H02P 3/00; vector control H02P 21/00) **[1,8]**

5/46 . for speed regulation of two or more dynamo-electric motors in relation to one another

5/48 . . by comparing mechanical values representing the speeds

5/50 . . by comparing electrical values representing the speeds

5/52 . . additionally providing control of relative angular displacement

5/60 . controlling combinations of dc and ac dynamo-electric motors (H02P 5/46 takes precedence) **[8]**

5/68 . controlling two or more dc dynamo-electric motors (H02P 5/46, H02P 5/60 take precedence) **[8]**

5/685 . . electrically connected in series, i.e. carrying the same current **[8]**
5/69 . . mechanically coupled by gearing **[8]**
5/695 . . . Differential gearing **[8]**
5/74 . controlling two or more ac dynamo-electric motors (H02P 5/46, H02P 5/60 take precedence) **[8]**
5/747 . . mechanically coupled by gearing **[8]**
5/753 . . . Differential gearing **[8]**

6/00 Arrangements for controlling synchronous motors or other dynamo-electric motors with electronic commutators in dependence on the rotor position; Electronic commutators therefor (stepping motors H02P 8/00; vector control H02P 21/00) **[3,4,6]**

6/04 . Arrangements for controlling or regulating speed or torque of more than one motor **[6]**
6/06 . Arrangements for speed regulation of a single motor wherein the motor speed is measured and compared with a given physical value so as to adjust the motor speed **[6]**
6/08 . Arrangements for controlling the speed or torque of a single motor **[6]**
6/10 . . providing reduced torque ripple; controlling torque ripple **[6]**
6/12 . Monitoring commutation; Providing indication of commutation failure **[6]**
6/14 . Electronic commutators **[6]**
6/16 . . Circuit arrangements for detecting position (structural arrangement of position sensors H02K 29/06) **[6]**
6/18 . . . without separate position detecting element, e.g. using back-emf in windings **[6]**
6/20 . Arrangements for starting (H02P 6/08, H02P 6/22 take precedence) **[6]**
6/22 . Arrangements for starting in a selected direction of rotation **[6]**
6/24 . Arrangements for stopping **[6]**

7/00 Arrangements for regulating or controlling the speed or torque of electric dc-motors (starting H02P 1/00; stopping or slowing H02P 3/00; vector control H02P 21/00) **[2,8]**

7/06 . for regulating or controlling an individual dc dynamo-electric motor by varying field or armature current
7/08 . . by manual control without auxiliary power
7/10 . . . of motor field only
7/12 . . . . Switching field from series to shunt excitation or vice versa
7/14 . . . of voltage applied to the armature with or without control of field
7/18 . . by master control with auxiliary power
7/20 . . . using multi-position switch, e.g. drum, controlling motor circuit by means of relays (H02P 7/24, H02P 7/30 take precedence)
7/22 . . . using multi-position switch, e.g. drum, controlling motor circuit by means of pilot-motor-operated multi-position switch or pilot-motor-operated variable resistance (H02P 7/24, H02P 7/30 take precedence)
7/24 . . . using discharge tubes or semiconductor devices
7/26 . . . . using discharge tubes
7/28 . . . . using semiconductor devices
7/282 . . . . . controlling field supply only **[4]**
7/285 . . . . . controlling armature supply only **[4]**
7/288 . . . . . using variable impedance **[4]**
7/29 . . . . . using pulse modulation **[4]**
7/292 . . . . . using static converters, e.g. ac to dc **[4]**
7/295 . . . . . of the kind having one thyristor or the like in series with the power supply and the motor **[4]**
7/298 . . . . . controlling armature and field supply **[4]**
7/30 . . . using magnetic devices with controllable degree of saturation, i.e. transductors
7/32 . . . using armature-reaction-excited machines, e.g. metadyne, amplidyne, rototrol
7/34 . . . using Ward-Leonard arrangements

8/00 Arrangements for controlling dynamo-electric motors rotating step by step (vector control H02P 21/00) **[2,6,8]**

8/02 . specially adapted for single-phase or bi-pole stepper motors, e.g. watch-motors, clock-motors **[6]**
8/04 . Arrangements for starting **[6]**
8/06 . . in selected direction of rotation **[6]**
8/08 . . Determining position before starting **[6]**
8/10 . . Shaping pulses for starting; Boosting current during starting **[6]**
8/12 . Control or stabilisation of current **[6]**
8/14 . Arrangements for controlling speed or speed and torque (H02P 8/12, H02P 8/22 take precedence) **[6]**
8/16 . . Reducing energy dissipated or supplied **[6]**
8/18 . . Shaping of pulses, e.g. to reduce torque ripple **[6]**
8/20 . . characterised by bidirectional operation **[6]**
8/22 . Control of step size; Intermediate stepping, e.g. micro-stepping **[6]**
8/24 . Arrangements for stopping (H02P 8/32 take precedence) **[6]**
8/26 . . Memorising final pulse when stopping **[6]**
8/28 . . Disconnecting power source when stopping **[6]**
8/30 . . Holding position when stopped **[6]**
8/32 . Reducing overshoot or oscillation, e.g. damping **[6]**
8/34 . Monitoring operation (H02P 8/36 takes precedence) **[6]**
8/36 . Protection against faults, e.g. against overheating, step-out; Indicating faults (emergency protective arrangements with automatic interruption of supply H02H 7/08) **[6]**
8/38 . . the fault being step-out **[6]**
8/40 . Special adaptations for controlling two or more stepping motors **[6]**
8/42 . characterised by non-stepper motors being operated step by step **[6]**

9/00 Arrangements for controlling electric generators for the purpose of obtaining a desired output (Ward-Leonard arrangements H02P 7/34; vector control H02P 21/00; feeding a network by two or more generators H02J; for charging batteries H02J 7/14) **[1,8]**

9/02 . Details
9/04 . Control effected upon non-electric prime mover and dependent upon electric output value of the generator (effecting control of the prime mover in general, see the relevant class for such prime mover) **[2]**
9/06 . Control effected upon clutch or other mechanical power transmission means and dependent upon electric output value of the generator (effecting control of the power transmission means, see the relevant class for such means) **[2]**
9/08 . Control of generator circuit during starting or stopping of driving means, e.g. for initiating excitation **[2]**

9/10 . Control effected upon generator excitation circuit to reduce harmful effects of overloads or transients, e.g. sudden application of load, sudden removal of load, sudden change of load **[2]**

9/12 . . for demagnetising; for reducing effects of remanence; for preventing pole reversal **[2]**

9/14 . by variation of field (H02P 9/08, H02P 9/10 take precedence) **[2]**

9/16 . . due to variation of ohmic resistance in field circuit, using resistances switched in or out of circuit step by step

9/18 . . . the switching being caused by a servomotor, measuring instrument, or relay

9/20 . . due to variation of continuously-variable ohmic resistance

9/22 . . . comprising carbon pile resistance

9/24 . . due to variation of make-to-break ratio of intermittently-operating contacts, e.g. using Tirrill regulator

9/26 . . using discharge tubes or semiconductor devices (H02P 9/34 takes precedence) **[2]**

9/28 . . . using discharge tubes

9/30 . . . using semiconductor devices

9/32 . . using magnetic devices with controllable degree of saturation (H02P 9/34 takes precedence) **[2]**

9/34 . . using magnetic devices with controllable degree of saturation in combination with controlled discharge tube or controlled semiconductor device

9/36 . . using armature-reaction-excited machines

9/38 . . Self-excitation by current derived from rectification of both output voltage and output current of generator

9/40 . by variation of reluctance of magnetic circuit of generator

9/42 . to obtain desired frequency without varying speed of the generator

9/44 . Control of frequency and voltage in predetermined relation, e.g. constant ratio

9/46 . Control of asynchronous generator by variation of capacitor

9/48 . Arrangements for obtaining a constant output value at varying speed of the generator, e.g. on vehicle (H02P 9/04 to H02P 9/46 take precedence) **[3]**

11/00 Arrangements for controlling dynamo-electric converters (starting H02P 1/00; stopping or slowing H02P 3/00; vector control H02P 21/00; feeding a network in conjunction with a generator or another converter H02J) **[4,8]**

11/04 . for controlling dynamo-electric converters having a dc output

11/06 . for controlling dynamo-electric converters having an ac output

13/00 Arrangements for controlling transformers, reactors or choke coils, for the purpose of obtaining a desired output (regulation systems using transformers, reactors or choke coils G05F; transformers H01F; feeding a network in conjunction with a generator or a converter H02J; control or regulation of converters H02M) **[4]**

13/06 . by tap-changing; by rearranging interconnections of windings

13/08 . by sliding current collector along winding

13/10 . by moving core, coil winding, or shield, e.g. by induction regulator

13/12 . by varying magnetic bias

15/00 Arrangements for controlling dynamo-electric brakes or clutches (controlling speed of dynamo-electric motors by means of a separate brake H02P 29/04, vector control H02P 21/00) **[1,8]**

15/02 . Conjoint control of brakes and clutches **[3]**

17/00 Arrangements for controlling dynamo-electric gears (vector control H02P 21/00) **[3,8]**

21/00 Arrangements or methods for the control of electric machines by vector control, e.g. by control of field orientation [6,8]

Note

When classifying in this group, it is desirable to also classify in groups H02P 25/00 to H02P 27/00 if the kind of ac-motor, structural details, or the kind of supply voltage are of interest. **[8]**

21/02 . specially adapted for optimising the efficiency at low load **[8]**

21/04 . specially adapted for very low speeds **[8]**

21/05 . specially adapted for damping motor oscillations, e.g. for reducing hunting **[8]**

21/06 . Rotor flux based control **[8]**

21/08 . . Indirect field-oriented control, e.g. field phase angle calculation based on rotor voltage equation by adding slip frequency and speed proportional frequency **[8]**

21/10 . . Direct field-oriented control **[8]**

21/12 . Stator flux based control **[8]**

21/13 . Observer control, e.g. using Luenberger observers or Kalman filters **[8]**

21/14 . Estimation or adaptation of machine parameters, e.g. rotor time constant, flux, speed, current or voltage **[8]**

23/00 Arrangements or methods for the control of ac-motors characterised by a control method other than vector control (starting H02P 1/00; stopping or slowing H02P 3/00; of two or more motors H02P 5/00; of synchronous motors with electronic commutators H02P 6/00; of dc-motors H02P 7/00; of stepping motors H02P 8/00) **[8]**

Note

When classifying in this group, it is desirable to also classify in groups H02P 25/00 to H02P 27/00 if the kind of ac-motor, structural details, or the kind of supply voltage are of interest. **[8]**

23/02 . specially adapted for optimising the efficiency at low load **[8]**

23/03 . specially adapted for very low speeds **[8]**

23/04 . specially adapted for damping motor oscillations, e.g. for reducing hunting **[8]**

23/06 . Controlling the motor in four quadrants **[8]**

23/08 . Controlling based on slip frequency, e.g. adding slip frequency and speed proportional frequency **[8]**

23/10 . Controlling by adding a dc current (dc current braking H02P 3/24) **[8]**

23/12 . Observer control, e.g. using Luenberger observers or Kalman filters **[8]**

23/14 . Estimation or adaptation of motor parameters, e.g. rotor time constant, flux, speed, current or voltage **[8]**

25/00 **Arrangements or methods for the control of ac-motors characterised by the kind of ac-motor or by structural details** (starting H02P 1/00; stopping or slowing H02P 3/00; of two or more motors H02P 5/00; of synchronous motors with electronic commutators H02P 6/00; of dc-motors H02P 7/00; of stepping motors H02P 8/00) **[8]**

Note

When classifying in this group, it is desirable to also classify in groups H02P 21/00, H02P 23/00 or H02P 27/00 if the control method or the kind of supply voltage are of interest. **[8]**

25/02 . characterised by the kind of motor **[8]**
25/04 . . Single phase motors, e.g. capacitor motors **[8]**
25/06 . . Linear motors **[8]**
25/08 . . Reluctance motors **[8]**
25/10 . . Commutator motors, e.g. repulsion motors **[8]**
25/12 . . . with shiftable brushes **[8]**
25/14 . . . Universal motors (H02P 25/12 takes precedence) **[8]**
25/16 . characterised by the circuit arrangement or by the kind of wiring **[8]**
25/18 . . with arrangements for switching the windings, e.g. with mechanical switches or relays **[8]**
25/20 . . . for pole-changing **[8]**
25/22 . . Multiple windings; Windings for more than three phases **[8]**
25/24 . . Variable impedance in stator or rotor circuit **[8]**
25/26 . . . with arrangements for controlling secondary impedance **[8]**
25/28 . . using magnetic devices with controllable degree of saturation, e.g. transductors **[8]**
25/30 . . the motor being controlled by a control effected upon an ac generator supplying it **[8]**
25/32 . . using discharge tubes **[8]**

27/00 **Arrangements or methods for the control of ac-motors characterised by the kind of supply voltage** (starting H02P 1/00; stopping or slowing H02P 3/00; of two or more motors H02P 5/00; of synchronous motors with electronic commutators H02P 6/00; of dc-motors H02P 7/00; of stepping motors H02P 8/00) **[8]**

Note

When classifying in this group, it is desirable to also classify in groups H02P 21/00, H02P 23/00 or H02P 25/00 if the control method, the kind of the ac-motor or structural details are of interest. **[8]**

27/02 . using supply voltage with constant frequency and variable amplitude **[8]**
27/04 . using variable-frequency supply voltage, e.g. inverter or converter supply voltage **[8]**
27/05 . . using ac supply for both rotor and stator circuits, the frequency of supply to at least one circuit being variable **[8]**
27/06 . . using dc to ac converters or inverters (H02P 27/05 takes precedence) **[8]**
27/08 . . . with pulse width modulation **[8]**
27/10 . . . . using bang-bang controllers **[8]**
27/12 . . . . pulsing by guiding the flux-, current-, or voltage-vector on a circle or a closed curve, e.g. direct torque control **[8]**
27/14 . . . . with three or more levels of voltage **[8]**
27/16 . . using ac to ac converters without intermediate conversion to dc (H02P 27/05 takes precedence) **[8]**
27/18 . . . varying the frequency by omitting half waves **[8]**

29/00 **Arrangements for regulating or controlling electric motors, appropriate for both ac- and dc-motors** (starting H02P 1/00; stopping or slowing H02P 3/00; control of motors that can be connected to two or more different voltage or current supplies H02P 4/00; vector control H02P 21/00) **[8]**

29/02 . Providing protection against overload without automatic interruption of supply, e.g. monitoring **[8]**
29/04 . by means of a separate brake **[8]**

31/00 **Arrangements for regulating or controlling electric motors not provided for in groups H02P 1/00 to H02P 5/00, H02P 7/00 or H02P 21/00 to H02P 29/00 [8]**

H03 BASIC ELECTRONIC CIRCUITRY

H03B GENERATION OF OSCILLATIONS, DIRECTLY OR BY FREQUENCY-CHANGING, BY CIRCUITS EMPLOYING ACTIVE ELEMENTS WHICH OPERATE IN A NON-SWITCHING MANNER; GENERATION OF NOISE BY SUCH CIRCUITS

(measuring, testing G01R; generators adapted for electrophonic musical instruments G10H; speech synthesis G10L 13/00; masers, lasers H01S; dynamo-electric machines H02K; power inverter circuits H02M; by using pulse techniques H03K; automatic control of generators H03L; starting, synchronisation or stabilisation of generators where the type of generator is irrelevant or unspecified H03L; generation of oscillations in plasma H05H)

Subclass index

1/00 Details

1/02 . Structural details of power oscillators, e.g. for heating

1/04 . Reducing undesired oscillations, e.g. harmonics

5/00 Generation of oscillations using amplifier with regenerative feedback from output to input (H03B 9/00, H03B 15/00 take precedence)

5/02 . Details

5/04 . . Modifications of generator to compensate for variations in physical values, e.g. power supply, load, temperature

5/06 . . Modifications of generator to ensure starting of oscillations

5/08 . with frequency-determining element comprising lumped inductance and capacitance

5/10 . . active element in amplifier being vacuum tube (H03B 5/14 takes precedence)

5/12 . . active element in amplifier being semiconductor device (H03B 5/14 takes precedence)

5/14 . . frequency-determining element connected via bridge circuit to closed ring around which signal is transmitted

5/16 . . . active element in amplifier being vacuum tube

5/18 . with frequency-determining element comprising distributed inductance and capacitance

5/20 . with frequency-determining element comprising resistance and either capacitance or inductance, e.g. phase-shift oscillator

5/22 . . active element in amplifier being vacuum tube (H03B 5/26 takes precedence)

5/24 . . active element in amplifier being semiconductor device (H03B 5/26 takes precedence)

5/26 . . frequency-determining element being part of bridge circuit in closed ring around which signal is transmitted; frequency-determining element being connected via a bridge circuit to such a closed ring, e.g. Wien-Bridge oscillator, parallel-T oscillator

5/28 . . . active element in amplifier being vacuum tube

5/30 . with frequency-determining element being electromechanical resonator

5/32 . . being a piezo-electric resonator (piezo-electric elements in general H01L 41/00)

5/34 . . . active element in amplifier being vacuum tube (H03B 5/38 takes precedence)

5/36 . . . active element in amplifier being semiconductor device (H03B 5/38 takes precedence)

5/38 . . . frequency-determining element being connected via bridge circuit to closed ring around which signal is transmitted

5/40 . . being a magnetostrictive resonator (H03B 5/42 takes precedence; magnetostrictive elements in general H01L 41/00)

5/42 . . frequency-determining element connected via bridge circuit to closed ring around which signal is transmitted

7/00 Generation of oscillations using active element having a negative resistance between two of its electrodes (H03B 9/00 takes precedence)

7/02 . with frequency-determining element comprising lumped inductance and capacitance

7/04 . . active element being vacuum tube

7/06 . . active element being semiconductor device

7/08 . . . being a tunnel diode

7/10 . . active element being gas-discharge or arc-discharge tube

7/12 . with frequency-determining element comprising distributed inductance and capacitance

7/14 . . active element being semiconductor device

9/00 Generation of oscillations using transit-time effects [2]

9/01 . using discharge tubes **[2]**

9/02 . . using a retarding-field tube (using klystrons H03B 9/04) **[2]**

9/04 . . using a klystron **[2]**

9/06 . . . using a reflex klystron **[2]**

9/08 . . using a travelling-wave tube **[2]**

9/10 . . using a magnetron **[2]**
9/12 . using solid state devices, e.g. Gunn-effect devices **[2]**
9/14 . . and elements comprising distributed inductance and capacitance **[3]**

11/00 Generation of oscillations using a shock-excited tuned circuit (with feedback H03B 5/00)
11/02 . excited by spark (spark gaps therefor H01T 9/00)
11/04 . excited by interrupter
11/06 . . by mechanical interrupter
11/08 . . interrupter being discharge tube
11/10 . . interrupter being semiconductor device

13/00 Generation of oscillations using deflection of electron beam in a cathode-ray tube

15/00 Generation of oscillations using galvano-magnetic devices, e.g. Hall-effect devices, or using super-conductivity effects (galvano-magnetic devices per se H01L 43/00)

17/00 Generation of oscillations using radiation source and detector, e.g. with interposed variable obturator

19/00 Generation of oscillations by non-regenerative frequency multiplication or division of a signal from a separate source (transference of modulation from one carrier to another H03D 7/00)
19/03 . using non-linear inductance **[3]**
19/05 . using non-linear capacitance, e.g. varactor diodes **[3]**
19/06 . by means of discharge device or semiconductor device with more than two electrodes
19/08 . . by means of a discharge device
19/10 . . . using multiplication only
19/12 . . . using division only
19/14 . . by means of a semiconductor device
19/16 . using uncontrolled rectifying devices, e.g. rectifying diodes or Schottky diodes **[3]**
19/18 . . and elements comprising distributed inductance and capacitance **[3]**
19/20 . . being diodes exhibiting charge storage or enhancement effects **[3]**

21/00 Generation of oscillations by combining unmodulated signals of different frequencies (H03B 19/00 takes precedence; frequency changing circuits in general H03D) **[3]**
21/01 . by beating unmodulated signals of different frequencies **[3]**
21/02 . . by plural beating, i.e. for frequency synthesis **[3]**
21/04 . . using several similar stages **[3]**

23/00 Generation of oscillations periodically swept over a predetermined frequency range (angle-modulating circuits in general H03C 3/00)

25/00 Simultaneous generation by a free-running oscillator of oscillations having different frequencies

27/00 Generation of oscillations providing a plurality of outputs of the same frequency but differing in phase, other than merely two anti-phase outputs

28/00 Generation of oscillations by methods not covered by groups H03B 5/00 to H03B 27/00, including modification of the waveform to produce sinusoidal oscillations (analogue function generators for performing computing operations G06G 7/26; use of transformers for conversion of waveform in ac–ac converters H02M 5/18) **[4]**

29/00 Generation of noise currents and voltages

H03C MODULATION (measuring, testing G01R; masers, lasers H01S; modulators specially adapted for use in dc amplifiers H03F 3/38; modulating pulses H03K 7/00; so-called modulators capable only of switching between predetermined states of amplitude, frequency or phase H03K 17/00, H04L; coding, decoding or code conversion, in general H03M; synchronous modulators specially adapted for colour television H04N 9/65)

(1) This subclass covers only modulation, keying, or interruption of sinusoidal oscillations or electromagnetic waves, the modulating signal having any desired waveform.
(2) In this subclass, circuits usable both as modulator and demodulator are classified in the group dealing with the type of modulator involved.

1/00 Amplitude modulation (H03C 5/00, H03C 7/00 take precedence)
1/02 . Details
1/04 . . Means in, or combined with, modulating stage for reducing angle modulation
1/06 . . Modifications of modulator to reduce distortion, e.g. by feedback, and clearly applicable to more than one type of modulator
1/08 . by means of variable impedance element (H03C 1/28 to H03C 1/34, H03C 1/46 to H03C 1/52, H03C 1/62 take precedence)
1/10 . . the element being a current-dependent inductor
1/12 . . the element being a voltage-dependent capacitor
1/14 . . the element being a diode
1/16 . by means of discharge device having at least three electrodes (H03C 1/28 to H03C 1/34, H03C 1/50, H03C 1/52, H03C 1/62 take precedence)
1/18 . . carrier applied to control grid
1/20 . . . modulating signal applied to anode
1/22 . . . modulating signal applied to same grid
1/24 . . . modulating signal applied to different grid
1/26 . . . modulating signal applied to cathode
1/28 . by means of transit-time tube
1/30 . . by means of a magnetron
1/32 . by deflection of electron beam in discharge tube
1/34 . by means of light-sensitive element
1/36 . by means of semiconductor device having at least three electrodes (H03C 1/34, H03C 1/50, H03C 1/52, H03C 1/62 take precedence)
1/38 . . carrier applied to base of a transistor

1/40 . . . modulating signal applied to collector
1/42 . . . modulating signal applied to base
1/44 . . . modulating signal applied to emitter
1/46 . Modulators with mechanically- or acoustically-driven parts
1/48 . by means of Hall-effect devices
1/50 . by converting angle modulation to amplitude modulation (H03C 1/28 to H03C 1/34, H03C 1/46, H03C 1/48 take precedence)
1/52 . Modulators in which carrier or one sideband is wholly or partially suppressed (H03C 1/28 to H03C 1/34, H03C 1/46, H03C 1/48 take precedence)
1/54 . . Balanced modulators, e.g. bridge type, ring type, double balanced type
1/56 . . . comprising variable two-pole elements only
1/58 . . . . comprising diodes
1/60 . . with one sideband wholly or partially suppressed
1/62 . Modulators in which amplitude of carrier component in output is dependent upon strength of modulating signal, e.g. no carrier output when no modulating signal is present (H03C 1/28 to H03C 1/34, H03C 1/46, H03C 1/48 take precedence)

3/00 **Angle modulation** (H03C 5/00, H03C 7/00 take precedence)
3/02 . Details
3/04 . . Means in, or combined with, modulating stage for reducing amplitude modulation
3/06 . . Means for changing frequency deviation
3/08 . . Modifications of modulator to linearise modulation, e.g. by feedback, and clearly applicable to more than one type of modulator
3/09 . . Modifications of modulator for regulating the mean frequency **[3]**
3/10 . by means of variable impedance (H03C 3/30 to H03C 3/38 take precedence)
3/12 . . by means of a variable reactive element
3/14 . . . simulated by circuit comprising active element with at least three electrodes, e.g. reactance-tube circuit
3/16 . . . . in which the active element simultaneously serves as the active element of an oscillator
3/18 . . . the element being a current-dependent inductor
3/20 . . . the element being a voltage-dependent capacitor
3/22 . . . the element being a semiconductor diode, e.g. varicap diode
3/24 . . by means of a variable resistive element, e.g. tube
3/26 . . . comprising two elements controlled in push-pull by modulating signal
3/28 . . using variable impedance driven mechanically or acoustically
3/30 . by means of transit-time tube
3/32 . . the tube being a magnetron
3/34 . by deflection of electron beam in discharge tube
3/36 . by means of light-sensitive element
3/38 . by converting amplitude modulation to angle modulation
3/40 . . using two signal paths the outputs of which have a predetermined phase difference and at least one output being amplitude-modulated
3/42 . by means of electromechanical devices (H03C 3/28 takes precedence) **[3]**

5/00 **Amplitude modulation and angle modulation produced simultaneously or at will by the same modulating signal** (H03C 7/00 takes precedence)
5/02 . by means of transit-time tube
5/04 . . the tube being a magnetron
5/06 . by deflection of electron beam in discharge tube

7/00 **Modulating electromagnetic waves** (devices or arrangements for the modulation of light G02F 1/00; for generating oscillations H03B, H03K)
7/02 . in transmission line, waveguide, cavity resonator, or radiation field of aerial
7/04 . . Polarisation of transmitted wave being modulated

99/00 **Subject matter not provided for in other groups of this subclass [8]**

H03D **DEMODULATION OR TRANSFERENCE OF MODULATION FROM ONE CARRIER TO ANOTHER** (masers, lasers H01S; circuits capable of acting both as modulator and demodulator H03C; details applicable to both modulators and frequency-changers H03C; demodulating pulses H03K 9/00; transforming types of pulse modulation H03K 11/00; coding, decoding or code conversion, in general H03M; repeater stations H04B 7/14; demodulators adapted for digitally modulated-carrier systems H04L 27/00; synchronous demodulators adapted for colour television H04N 9/66)

Note

This subclass covers only:
– demodulation or transference of signals modulated on a sinusoidal carrier or on electromagnetic waves;
– comparing phase or frequency of two mutually-independent oscillations.

Subclass index

1/00 **Demodulation of amplitude-modulated oscillations** (H03D 5/00, H03D 9/00, H03D 11/00 take precedence)
1/02 . Details
1/04 . . Modifications of demodulators to reduce interference by undesired signals
1/06 . . Modifications of demodulators to reduce distortion, e.g. by negative feedback

1/08 . by means of non-linear two-pole elements (H03D 1/22, H03D 1/26, H03D 1/28 take precedence)
1/10 . . of diodes
1/12 . . . with provision for equalising ac and dc loads
1/14 . by means of non-linear elements having more than two poles (H03D 1/22, H03D 1/26, H03D 1/28 take precedence)
1/16 . . of discharge tubes
1/18 . . of semiconductor devices
1/20 . . with provision for preventing undesired type of demodulation, e.g. preventing anode detection in a grid detection circuit
1/22 . Homodyne or synchrodyne circuits
1/24 . . for demodulation of signals wherein one sideband or the carrier has been wholly or partially suppressed
1/26 . by means of transit-time tubes
1/28 . by deflecting an electron beam in a discharge tube (H03D 1/26 takes precedence)

3/00 Demodulation of angle-modulated oscillations (H03D 5/00, H03D 9/00, H03D 11/00 take precedence)
3/02 . by detecting phase difference between two signals obtained from input signal (H03D 3/28 to H03D 3/32 take precedence; limiting arrangements H03G 11/00)
3/04 . . by counting or integrating cycles of oscillations
3/06 . . by combining signals additively or in product demodulators
3/08 . . . by means of diodes, e.g. Foster-Seeley discriminator
3/10 . . . . in which the diodes are simultaneously conducting during the same half period of the signal, e.g. ratio detector
3/12 . . . by means of discharge tubes having more than two electrodes
3/14 . . . by means of semiconductor devices having more than two electrodes
3/16 . . . by means of electromechanical resonators
3/18 . . by means of synchronous gating arrangements
3/20 . . . producing pulses whose amplitude or duration depends on the phase difference
3/22 . . by means of active elements with more than two electrodes to which two signals are applied derived from the signal to be demodulated and having a phase difference related to the frequency deviation, e.g. phase detector
3/24 . . Modifications of demodulators to reject or remove amplitude variations by means of locked-in oscillator circuits
3/26 . by means of sloping amplitude/frequency characteristic of tuned or reactive circuit (H03D 3/28 to H03D 3/32 take precedence)
3/28 . Modifications of demodulators to reduce effect of temperature variations (automatic frequency control H03L)
3/30 . by means of transit-time tubes
3/32 . by deflecting an electron beam in a discharge tube (H03D 3/30 takes precedence)
3/34 . by means of electromechanical devices (H03D 3/16 takes precedence) **[3]**

5/00 Circuits for demodulating amplitude-modulated or angle-modulated oscillations at will (H03D 9/00, H03D 11/00 take precedence)

7/00 Transference of modulation from one carrier to another, e.g. frequency-changing (H03D 9/00, H03D 11/00 take precedence; dielectric amplifiers, magnetic amplifiers, parametric amplifiers used as frequency-changers H03F)
7/02 . by means of diodes (H03D 7/14 to H03D 7/22 take precedence)
7/04 . . having negative resistance characteristic, e.g. tunnel diode
7/06 . by means of discharge tubes having more than two electrodes (H03D 7/14 to H03D 7/22 take precedence)
7/08 . . the signals to be mixed being applied between the same two electrodes
7/10 . . the signals to be mixed being applied between different pairs of electrodes
7/12 . by means of semiconductor devices having more than two electrodes (H03D 7/14 to H03D 7/22 take precedence)
7/14 . Balanced arrangements
7/16 . Multiple frequency-changing
7/18 . Modifications of frequency-changers for eliminating image frequencies
7/20 . by means of transit-time tubes
7/22 . by deflecting an electron beam in a discharge tube (H03D 7/20 takes precedence)

9/00 Demodulation or transference of modulation of modulated electromagnetic waves (devices or arrangements for demodulating light, transferring modulation in light waves G02F 2/00)
9/02 . Demodulation using distributed inductance and capacitance, e.g. in feeder lines
9/04 . . for angle-modulated oscillations
9/06 . Transference of modulation using distributed inductance and capacitance

11/00 Super-regenerative demodulator circuits
11/02 . for amplitude-modulated oscillations
11/04 . . by means of semiconductor devices having more than two electrodes
11/06 . for angle-modulated oscillations
11/08 . . by means of semiconductor devices having more than two electrodes

13/00 Circuits for comparing the phase or frequency of two mutually-independent oscillations

99/00 Subject matter not provided for in other groups of this subclass [8]

H03F **AMPLIFIERS** (measuring, testing G01R; optical parametric amplifiers G02F; circuit arrangements with secondary emission tubes H01J 43/30; masers, lasers H01S; dynamo-electric amplifiers H02K; control of amplification H03G; coupling arrangements independent of the nature of the amplifier, voltage dividers H03H; amplifiers capable only of dealing with pulses H03K; repeater circuits in transmission lines H04B 3/36, H04B 3/58; application of speech amplifiers in telephonic communication H04M 1/60, H04M 3/40)

Note

This subclass covers:
- linear amplification, there being linear relationship between the amplitudes of input and output, and the output having substantially the same waveform as the input;
- dielectric amplifiers, magnetic amplifiers, and parametric amplifiers when used as oscillators or frequency-changers;
- constructions of active elements of dielectric amplifiers and parametric amplifiers if no provision exists elsewhere.

Subclass index

1/00 Details of amplifiers with only discharge tubes, only semiconductor devices or only unspecified devices as amplifying elements

1/02 . Modifications of amplifiers to raise the efficiency, e.g. gliding Class A stages, use of an auxiliary oscillation

1/04 . . in discharge-tube amplifiers

1/06 . . . to raise the efficiency of amplifying modulated radio frequency waves; to raise the efficiency of amplifiers acting also as modulators **[2]**

1/07 . . . . Doherty-type amplifiers **[2]**

1/08 . Modifications of amplifiers to reduce detrimental influences of internal impedances of amplifying elements (wide-band amplifiers with inter-stage coupling networks incorporating these impedances H03F 1/42; eliminating transit-time effects in vacuum tubes H01J 21/34)

1/10 . . by use of amplifying elements with multiple electrode connections

1/12 . . by use of attenuating means

1/13 . . . in discharge-tube amplifiers **[2]**

1/14 . . by use of neutralising means

1/16 . . . in discharge-tube amplifiers

1/18 . . by use of distributed coupling

1/20 . . . in discharge-tube amplifiers

1/22 . . by use of cascode coupling, i.e. earthed cathode or emitter stage followed by earthed grid or base stage respectively

1/24 . . . in discharge-tube amplifiers

1/26 . Modifications of amplifiers to reduce influence of noise generated by amplifying elements

1/28 . . in discharge-tube amplifiers

1/30 . Modifications of amplifiers to reduce influence of variations of temperature or supply voltage

1/32 . Modifications of amplifiers to reduce non-linear distortion (by negative feedback H03F 1/34)

1/33 . . in discharge-tube amplifiers **[2]**

1/34 . Negative-feedback-circuit arrangements with or without positive feedback (H03F 1/02 to H03F 1/30, H03F 1/38 to H03F 1/50, H03F 3/50 take precedence) **[3]**

1/36 . . in discharge-tube amplifiers

1/38 . Positive-feedback circuit arrangements without negative feedback

1/40 . . in discharge-tube amplifiers

1/42 . Modifications of amplifiers to extend the bandwidth

1/44 . . of tuned amplifiers

1/46 . . . with tubes only

1/48 . . of aperiodic amplifiers

1/50 . . . with tubes only

1/52 . Circuit arrangements for protecting such amplifiers **[3]**

1/54 . . with tubes only **[3]**

1/56 . Modifications of input or output impedances, not otherwise provided for **[3]**

3/00 Amplifiers with only discharge tubes or only semiconductor devices as amplifying elements

Note

Groups H03F 3/20 to H03F 3/72 take precedence over groups H03F 3/02 to H03F 3/189. **[2]**

3/02 . with tubes only (subsequent subgroups take precedence)

3/04 . with semiconductor devices only (subsequent subgroups take precedence)

3/06 . . using hole storage effect

3/08 . . controlled by light

3/10 . . with diodes

3/12 . . . with Esaki diodes

3/14 . . with amplifying devices having more than three electrodes or more than two PN junctions

3/16 . . with field-effect devices

3/18 . with semiconductor devices of complementary types (subsequent subgroups take precedence)

3/181 . Low-frequency amplifiers, e.g. audio preamplifiers **[2]**

3/183 . . with semiconductor devices only **[2]**

3/185 . . . with field-effect devices (H03F 3/187 takes precedence) **[2]**

3/187 . . . in integrated circuits **[2]**

3/189 . High-frequency amplifiers, e.g. radio frequency amplifiers **[2]**
3/19 . . with semiconductor devices only **[2]**
3/191 . . . Tuned amplifiers (H03F 3/193, H03F 3/195 take precedence) **[2]**
3/193 . . . with field-effect devices (H03F 3/195 takes precedence) **[2]**
3/195 . . . in integrated circuits **[2]**
3/20 . Power amplifiers, e.g. Class B amplifiers, Class C amplifiers (H03F 3/26 to H03F 3/30 take precedence)
3/21 . . with semiconductor devices only **[2]**
3/213 . . . in integrated circuits **[2]**
3/217 . . . Class D power amplifiers; Switching amplifiers **[2]**
3/22 . . with tubes only (H03F 3/24 takes precedence)
3/24 . . of transmitter output stages
3/26 . Push-pull amplifiers; Phase-splitters therefor (duplicated single-ended push-pull arrangements or phase-splitters therefor H03F 3/30)
3/28 . . with tubes only
3/30 . Single-ended push-pull amplifiers; Phase-splitters therefor
3/32 . . with tubes only
3/34 . Dc amplifiers in which all stages are dc-coupled (H03F 3/45 takes precedence) **[3]**
3/343 . . with semiconductor devices only **[2]**
3/345 . . . with field-effect devices (H03F 3/347 takes precedence) **[2]**
3/347 . . . in integrated circuits **[2]**
3/36 . . with tubes only
3/38 . Dc amplifiers with modulator at input and demodulator at output; Modulators or demodulators specially adapted for use in such amplifiers (modulators in general H03C; demodulators in general H03D; amplitude modulation of pulses in general H03K 7/02; amplitude demodulation of pulses in general H03K 9/02)
3/387 . . with semiconductor devices only **[2]**
3/393 . . . with field-effect devices **[2]**
3/40 . . with tubes only
3/42 . Amplifiers with two or more amplifying elements having their dc paths in series with the load, the control electrode of each element being excited by at least part of the input signal, e.g. so-called totem-pole amplifiers
3/44 . . with tubes only
3/45 . Differential amplifiers **[2]**
3/46 . Reflex amplifiers
3/48 . . with tubes only
3/50 . Amplifiers in which input is applied to, or output is derived from, an impedance common to input and output circuits of the amplifying element, e.g. cathode follower
3/52 . . with tubes only
3/54 . Amplifiers using transit-time effect in tubes or semiconductor devices (parametric amplifiers H03F 7/00; solid state travelling-wave devices H01L 45/02)
3/55 . . with semiconductor devices only **[2]**
3/56 . . using klystrons
3/58 . . using travelling-wave tubes
3/60 . Amplifiers in which coupling networks have distributed constants, e.g. with waveguide resonators (H03F 3/54 takes precedence)
3/62 . Two-way amplifiers
3/64 . . with tubes only
3/66 . Amplifiers simultaneously generating oscillations of one frequency and amplifying signals of another frequency
3/68 . Combinations of amplifiers, e.g. multi-channel amplifiers for stereophonics
3/70 . Charge amplifiers **[2]**
3/72 . Gated amplifiers, i.e. amplifiers which are rendered operative or inoperative by means of a control signal **[2]**

5/00 Amplifiers with both discharge tubes and semiconductor devices as amplifying elements

7/00 Parametric amplifiers (devices or arrangements for the parametric generation or amplification of light, infra-red or ultra-violet waves G02F 1/39)
7/02 . using variable-inductance element; using variable-permeability element
7/04 . using variable-capacitance element; using variable-permitivity element
7/06 . with electron beam tube

9/00 Magnetic amplifiers
9/02 . current-controlled, i.e. the load current flowing in both directions through a main coil **[2]**
9/04 . voltage-controlled, i.e. the load current flowing in only one direction through a main coil, e.g. Logan circuits (H03F 9/06 takes precedence) **[2]**
9/06 . Control by voltage time integral, i.e. the load current flowing in only one direction through a main coil, whereby the main coil winding also can be used as a control winding, e.g. Ramey circuits **[2]**

11/00 Dielectric amplifiers

13/00 Amplifiers using amplifying element consisting of two mechanically- or acoustically-coupled transducers, e.g. telephone-microphone amplifier

15/00 Amplifiers using galvano-magnetic effects not involving mechanical movement, e.g. using Hall effect

17/00 Amplifiers using electroluminescent element or photocell

19/00 Amplifiers using superconductivity effects

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

H03G CONTROL OF AMPLIFICATION (impedance networks, e.g. attenuators, H03H; control of transmission in lines H04B 3/04)

(1) This subclass covers:
– control of gain of amplifiers or frequency-changers;

– control of frequency range of amplifiers;
– limiting amplitude or rate of change of amplitude.

(2) Attention is drawn to the Note following the title of subclass H03F. **[3]**

Subclass index

1/00 Details of arrangements for controlling amplification

1/02 . Remote control of amplification, tone, or bandwidth (remote control in general G05, G08; combined with remote tuning or selection of resonant circuits H03J)

1/04 . Modifications of control circuit to reduce distortion caused by control (modifications to reduce influence of variations of internal impedance of amplifying elements caused by control H03F 1/08)

3/00 Gain control in amplifiers or frequency changers (gated amplifiers H03F 3/72; peculiar to television receivers H04N)

3/02 . Manually-operated control
3/04 . . in untuned amplifiers
3/06 . . . having discharge tubes
3/08 . . . . incorporating negative feedback
3/10 . . . having semiconductor devices
3/12 . . . . incorporating negative feedback
3/14 . . in frequency-selective amplifiers
3/16 . . . having discharge tubes
3/18 . . . having semiconductor devices
3/20 . Automatic control (combined with volume compression or expansion H03G 7/00)
3/22 . . in amplifiers having discharge tubes
3/24 . . . Control dependent upon ambient noise level or sound level
3/26 . . . Muting amplifier when no signal is present
3/28 . . . . in frequency-modulation receivers
3/30 . . in amplifiers having semiconductor devices
3/32 . . . the control being dependent upon ambient noise level or sound level
3/34 . . . Muting amplifier when no signal is present

5/00 Tone control or bandwidth control in amplifiers

5/02 . Manually-operated control (variable bandpass or bandstop filters H03H 7/12)
5/04 . . in untuned amplifiers
5/06 . . . having discharge tubes
5/08 . . . . incorporating negative feedback
5/10 . . . having semiconductor devices
5/12 . . . . incorporating negative feedback
5/14 . . in frequency-selective amplifiers
5/16 . Automatic control
5/18 . . in untuned amplifiers
5/20 . . . having discharge tubes
5/22 . . . having semiconductor devices
5/24 . . in frequency-selective amplifiers
5/26 . . . having discharge tubes
5/28 . . . having semiconductor devices

7/00 Volume compression or expansion in amplifiers

7/02 . having discharge tubes
7/04 . . incorporating negative feedback
7/06 . having semiconductor devices
7/08 . . incorporating negative feedback

9/00 Combinations of two or more types of control, e.g. gain control and tone control

9/02 . in untuned amplifiers (combined tone controls for low and high frequencies H03G 5/00)
9/04 . . having discharge tubes
9/06 . . . for gain control and tone control
9/08 . . . . incorporating negative feedback
9/10 . . . for tone control and volume expansion or compression
9/12 . . having semiconductor devices
9/14 . . . for gain control and tone control
9/16 . . . . incorporating negative feedback
9/18 . . . for tone control and volume expansion or compression
9/20 . in frequency-selective amplifiers
9/22 . . having discharge tubes
9/24 . . having semiconductor devices
9/26 . in untuned amplifying stages as well as in frequency-selective amplifying stages (gain control in both stages H03G 3/00; tone control or bandwidth control H03G 5/00)
9/28 . . all amplifying stages having discharge tubes
9/30 . . all amplifying stages having semiconductor devices

11/00 Limiting amplitude; **Limiting rate of change of amplitude**

11/02 . by means of diodes (H03G 11/04, H03G 11/06, H03G 11/08 take precedence)
11/04 . Limiting level dependent on strength of signal; Limiting level dependent on strength of carrier on which signal is modulated
11/06 . Limiters of angle-modulated signals; such limiters combined with discriminators (discriminators having an inherent limiting action H03D 3/00)
11/08 . Limiting rate of change of amplitude

99/00 Subject matter not provided for in other groups of this subclass [8]

H03H IMPEDANCE NETWORKS, E.G. RESONANT CIRCUITS; **RESONATORS** (measuring, testing G01R; arrangements for producing a reverberation or echo sound G10K 15/08; impedance networks or resonators consisting of distributed impedances, e.g. of the waveguide type, H01P; control of amplification, e.g. bandwidth control of amplifiers, H03G; tuning resonant circuits, e.g. tuning coupled resonant circuits, H03J; networks for modifying the frequency characteristics of communication systems H04B)

(1) This subclass covers:
- networks comprising lumped impedance elements;
- networks comprising distributed impedance elements together with lumped impedance elements;
- networks comprising electromechanical or electro-acoustic elements;
- networks simulating reactances and comprising discharge tubes or semiconductor devices;
- constructions of electromechanical resonators.

(2) In this subclass, the following expression is used with the meaning indicated:
- "passive elements" means resistors, capacitors, inductors, mutual inductors, or diodes. **[3]**

(3) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems". **[7]**

(4) In this subclass, main groups with a higher number take precedence. **[3]**

Subclass index

1/00 Constructional details of impedance networks whose electrical mode of operation is not specified or applicable to more than one type of network (constructional details of electromechanical transducers H03H 9/00)

1/02 . RC networks, e.g. filters (structural combinations of capacitors with other electric elements H01G) **[3]**

2/00 Networks using elements or techniques not provided for in groups H03H 3/00 to H03H 21/00 [3]

3/00 Apparatus or processes specially adapted for the manufacture of impedance networks, resonating circuits, resonators

3/007 . for the manufacture of electromechanical resonators or networks **[3]**

3/013 . . for obtaining desired frequency or temperature coefficient (H03H 3/04, H03H 3/10 take precedence) **[3]**

3/02 . . for the manufacture of piezo-electric or electrostrictive resonators or networks (H03H 3/08 takes precedence) **[3]**

3/04 . . . for obtaining desired frequency or temperature coefficient **[3]**

3/06 . . for the manufacture of magnetostrictive resonators or networks **[3]**

3/08 . . for the manufacture of resonators or networks using surface acoustic waves **[3]**

3/10 . . . for obtaining desired frequency or temperature coefficient **[3]**

5/00 One-port networks comprising only passive electrical elements as network components [3]

5/02 . without voltage- or current-dependent elements

5/10 . . comprising at least one element with prescribed temperature coefficient

5/12 . with at least one voltage- or current-dependent element

7/00 Multiple-port networks comprising only passive electrical elements as network components (receiver input circuits H04B 1/18; networks simulating a length of communication cable H04B 3/40) **[3]**

7/01 . Frequency selective two-port networks **[3]**

7/03 . . comprising means for compensation of loss **[3]**

7/06 . . including resistors (H03H 7/075, H03H 7/09, H03H 7/12, H03H 7/13 take precedence) **[3]**

7/065 . . . Parallel T-filters **[3]**

7/07 . . . Bridged T-filters **[3]**

7/075 . . Ladder networks, e.g. electric wave filters **[3]**

7/09 . . Filters comprising mutual inductance **[3]**

7/12 . . Bandpass or bandstop filters with adjustable bandwidth and fixed centre frequency (H03H 7/09 takes precedence; automatic control of bandwidth in amplifiers H03G 5/16)

7/13 . . using electro-optical elements **[3]**

7/18 . Networks for phase shifting

7/19 . . Two-port phase shifters providing a predetermined phase shift, e.g. "all-pass" filters **[3]**

7/20 . . Two-port phase shifters providing an adjustable phase shift **[3]**

7/21 . . providing two or more phase shifted output signals, e.g. n-phase output **[3]**

7/24 . Frequency-independent attenuators

7/25 . . comprising an element controlled by an electric or magnetic variable (H03H 7/27 takes precedence) **[3]**

7/27 . . comprising a photo-electric element **[3]**

7/30 . Time-delay networks

7/32 . . with lumped inductance and capacitance

7/34 . . with lumped and distributed reactance

7/38 . Impedance-matching networks

7/40 . . Automatic matching of load impedance to source impedance

7/42 . Balance/unbalance networks
7/46 . Networks for connecting several sources or loads, working on different frequencies or frequency bands, to a common load or source (for use in multiplex transmission systems H04J 1/00)
7/48 . Networks for connecting several sources or loads, working on the same frequency or frequency band, to a common load or source (phase shifters providing two or more output signals H03H 7/21) **[3]**
7/52 . One-way transmission networks, i.e. unilines
7/54 . Modifications of networks to reduce influence of variations of temperature **[3]**

9/00 Networks comprising electromechanical or electro-acoustic elements; **Electromechanical resonators** (manufacture of piezo-electric or magnetostrictive elements H01L 41/00; loudspeakers, microphones, gramophone pick-ups or the like H04R)
9/02 . Details **[3]**
9/05 . . Holders; Supports **[3]**
9/08 . . . Holders with means for regulating temperature
9/09 . . . Elastic or damping supports **[3]**
9/10 . . . Mounting in enclosures
9/12 . . . . for networks with interaction of optical and acoustic waves
9/125 . . Driving means, e.g. electrodes, coils **[3]**
9/13 . . . for networks consisting of piezo-electric or electrostrictive materials (H03H 9/145 takes precedence) **[3]**
9/135 . . . for networks consisting of magnetostrictive materials (H03H 9/145 takes precedence) **[3]**
9/145 . . . for networks using surface acoustic waves **[3]**
9/15 . Constructional features of resonators consisting of piezo-electric or electrostrictive material (H03H 9/25 takes precedence) **[3]**
9/17 . . having a single resonator (crystal tuning forks H03H 9/21) **[3]**
9/19 . . . consisting of quartz **[3]**
9/205 . . having multiple resonators (crystal tuning forks H03H 9/21) **[3]**
9/21 . . Crystal tuning forks **[3]**
9/215 . . . consisting of quartz **[3]**
9/22 . Constructional features of resonators consisting of magnetostricitve material
9/24 . Constructional features of resonators of material which is not piezo-electric, electrostrictive, or magnetostrictive
9/25 . Constructional features of resonators using surface acoustic waves **[3]**

Note

Groups H03H 9/15 to H03H 9/25 take precedence over groups H03H 9/30 to H03H 9/74. **[3]**

9/30 . Time-delay networks
9/36 . . with non-adjustable delay time (H03H 9/40, H03H 9/42 take precedence) **[3]**
9/38 . . with adjustable delay time (H03H 9/40, H03H 9/42 take precedence) **[3]**
9/40 . . Frequency-dependent delay lines, e.g. dispersive delay lines (H03H 9/42 takes precedence) **[3]**
9/42 . . using surface acoustic waves **[3]**
9/44 . . . Frequency-dependent delay lines, e.g. dispersive delay lines **[3]**
9/46 . Filters (multiple-port electromechanical filters H03H 9/70) **[3]**
9/48 . . Coupling means therefor **[3]**
9/50 . . . Mechanical coupling means **[3]**
9/52 . . . Electric coupling means **[3]**
9/54 . . comprising resonators of piezo-electric or electrostrictive material (H03H 9/64 takes precedence) **[3]**
9/56 . . . Monolithic crystal filters **[3]**
9/58 . . . Multiple crystal filters **[3]**
9/60 . . . . Electric coupling means therefor **[3]**
9/62 . . comprising resonators of magnetostrictive material (H03H 9/64 takes precedence) **[3]**
9/64 . . using surface acoustic waves **[3]**
9/66 . Phase shifters **[3]**
9/68 . . using surface acoustic waves **[3]**
9/70 . Multiple-port networks for connecting several sources or loads, working on different frequencies or frequency bands, to a common or source **[3]**
9/72 . . Networks using surface acoustic waves **[3]**
9/74 . Multiple-port networks for connecting several sources or loads, working on the same frequency or frequency band, to a common load or source (networks for phase shifting H03H 9/66) **[3]**
9/76 . . Networks using surface acoustic waves **[3]**

11/00 Networks using active elements
11/02 . Multiple-port networks **[3]**
11/04 . . Frequency selective two-port networks **[3]**
11/06 . . . comprising means for compensation of loss **[3]**
11/08 . . . using gyrators **[3]**
11/10 . . . using negative impedance converters (H03H 11/08 takes precedence) **[3]**
11/12 . . . using amplifiers with feedback (H03H 11/08, H03H 11/10 take precedence) **[3]**
11/14 . . . using electro-optical devices **[3]**
11/16 . . Networks for phase shifting **[3]**
11/18 . . . Two-port phase shifters providing a predetermined phase shift, e.g. "all-pass" filters **[3]**
11/20 . . . Two-port phase shifters providing an adjustable phase shift **[3]**
11/22 . . . providing two or more phase shifted output signals, e.g. n-phase output **[3]**
11/24 . . Frequency-independent attenuators **[3]**
11/26 . . Time-delay networks (analogue shift registers G11C 27/04) **[3]**
11/28 . . Impedance matching networks **[3]**
11/30 . . . Automatic matching of source impedance to load impedance **[3]**
11/32 . . Balance-unbalance networks **[3]**
11/34 . . Networks for connecting several sources or loads working on different frequencies or frequency bands, to a common load or source (for use in multiplex transmission systems H04J 1/00) **[3]**
11/36 . . Networks for connecting several sources or loads, working on the same frequency or frequency band, to a common load or source (phase shifters providing two or more output signals H03H 11/22) **[3]**
11/38 . . One-way transmission networks, i.e. unilines **[3]**
11/40 . . Impedance converters **[3]**
11/42 . . . Gyrators (used in frequency selective networks H03H 11/08) **[3]**
11/44 . . . Negative impedance converters (H03H 11/42 takes precedence; used in frequency-selective networks H03H 11/10) **[3]**
11/46 . One-port networks **[3]**

11/48 . . simulating reactances **[3]**
11/50 . . . using gyrators **[3]**
11/52 . . simulating negative resistances **[3]**
11/54 . Modifications of networks to reduce influence of variations of temperature **[3]**

15/00 **Transversal filters** (electromechanical filters H03H 9/46, H03H 9/70) **[3]**
15/02 . using analogue shift registers **[3]**

17/00 **Networks using digital techniques [3]**
17/02 . Frequency-selective networks **[3]**
17/04 . . Recursive filters **[3]**
17/06 . . Non-recursive filters **[3]**
17/08 . Networks for phase-shifting **[3]**

19/00 **Networks using time-varying elements, e.g. N-path filters [3]**

21/00 **Adaptive networks [3]**

H03J **TUNING RESONANT CIRCUITS**; **SELECTING RESONANT CIRCUITS** (indicating arrangements for measuring G01D; measuring, testing G01R; remote-control in general G05, G08; automatic control or stabilisation of generators H03L)

Note

This subclass covers also the control of tuning, including the combined control of tuning and other functions, e.g. combinations of tuning control and volume control, combinations of control of local oscillator and of supplementary resonant circuits. **[3]**

Subclass index

1/00 **Details of adjusting, driving, indicating, or mechanical control arrangements for resonant circuits in general** (machine elements in general F16; coupling of knobs to shafts F16D) **[3]**
1/02 . Indicating arrangements
1/04 . . with optical indicating means
1/06 . Driving or adjusting arrangements; combined with other driving or adjusting arrangements, e.g. of gain control

Note

Groups H03J 1/14, H03J 1/16 take precedence over groups H03J 1/08 to H03J 1/12.

1/08 . . Toothed-gear drive; Worm drive
1/10 . . Rope drive; Chain drive
1/12 . . Friction drive
1/14 . . Special arrangements for fine and coarse tuning
1/16 . . Single control means independently performing two or more functions
1/18 . Control by auxiliary power
1/20 . . the auxiliary power being switched on as long as controlling current is switched on
1/22 . . with stepping arrangements actuated by control pulses

3/00 **Continuous tuning** (H03J 7/00, H03J 9/00 take precedence; combination of continuous and discontinuous tuning other than for bandspreading H03J 5/00) **[3]**
3/02 . Details
3/04 . . Arrangements for compensating for variations of physical values, e.g. temperature (automatic control of ambient conditions G05D)
3/06 . . Arrangements for obtaining constant bandwidth or gain throughout tuning range or ranges (automatic gain control H03G)
3/08 . . . by varying a second parameter simultaneously with the tuning, e.g. coupling bandpass filter
3/10 . . Circuit arrangements for fine tuning, e.g. bandspreading
3/12 . . Electrically-operated arrangements for indicating correct tuning
3/14 . . . Visual indication, e.g. magic eye
3/16 . . Tuning without displacement of reactive element, e.g. by varying permeability
3/18 . . . by discharge tube or semiconductor device simulating variable reactance
3/20 . of single resonant circuit by varying inductance only or capacitance only
3/22 . of single resonant circuit by varying inductance and capacitance simultaneously
3/24 . of more than one resonant circuit simultaneously, the circuits being tuned to substantially the same frequency, e.g. for single-knob tuning
3/26 . . the circuits being coupled so as to form a bandpass filter
3/28 . of more than one resonant circuit simultaneously, the tuning frequencies of the circuits having a substantially constant difference throughout the tuning range
3/30 . . Arrangements for ensuring tracking with variable inductors
3/32 . . Arrangements for ensuring tracking with variable capacitors

5/00 **Discontinuous tuning**; **Selecting predetermined frequencies**; **Selecting frequency bands with or without continuous tuning in one or more of the bands, e.g. push-button tuning, turret tuner** (H03J 7/00, H03J 9/00 take precedence; for bandspreading H03J 3/10) **[3]**
5/02 . with variable tuning element having a number of predetermined settings and adjustable to a desired one of these settings
5/04 . . operated by hand

5/06 . . . Settings determined by single indexing means with snap action

5/08 . . . Settings determined by a number of separately-actuated positioning means

5/10 . . . Settings determined by a number of positioning means mounted on a common support, which is adjustable to desired positions, a different positioning means being in operation in each position

5/12 . . . Settings determined by a number of separately-actuated driving means which adjust the tuning element directly to desired settings

5/14 . . operated by auxiliary power

5/16 . . . Settings determined by a number of separate positioning means actuated by hand

5/18 . . . Settings determined by a number of separate positioning means actuated by electromagnets

5/20 . . . Settings determined by a number of positioning means actuated by a second means adjustable to different positions by the same or by a second auxiliary power

5/22 . . . Settings determined by a number of separately actuated driving means which adjust the tuning element directly to desired settings

5/24 . with a number of separate pretuned tuning circuits or separate tuning elements selectively brought into circuit, e.g. for waveband selection, for television channel selection (switches in general H01H)

5/26 . . operated by hand

5/28 . . . Tuning circuits or elements supported on a revolving member with contacts arranged in a plane perpendicular to the axis

5/30 . . . Tuning circuits or elements supported on a revolving member with contacts arranged in lines parallel to the axis

5/32 . . . Stationary tuning circuits or elements selected by push-button

7/00 Automatic frequency control; **Automatic scanning over a band of frequencies [3]**

7/02 . Automatic frequency control (H03J 7/18 takes precedence; automatic tuning control for television receivers H04N 5/50) **[3]**

7/04 . . where the frequency control is accomplished by varying the electrical characteristics of a non-mechanically adjustable element or where the nature of the frequency controlling element is not significant **[3]**

7/06 . . . using counters or frequency dividers **[3]**

7/08 . . . using varactors, i.e. voltage variable reactive diodes (H03J 7/06 takes precedence) **[3]**

7/10 . . . . Modification of automatic frequency control sensitivity or linearising automatic frequency control operation **[3]**

7/12 . . . . Combination of automatic frequency control voltage with stabilised varactor supply voltage **[3]**

7/14 . . . Controlling the magnetic state of inductor cores (H03J 7/06 takes precedence) **[3]**

7/16 . . where the frequency control is accomplished by mechanical means, e.g. by a motor **[3]**

7/18 . Automatic scanning over a band of frequencies **[3]**

7/20 . . where the scanning is accomplished by varying the electrical characteristics of a non-mechanically adjustable element **[3]**

7/22 . . . in which an automatic frequency control circuit is brought into action after the scanning action has been stopped (H03J 7/24 takes precedence) **[3]**

7/24 . . . using varactors, i.e. voltage variable reactive diodes (H03J 7/28 takes precedence) **[3]**

7/26 . . . . in which an automatic frequency control circuit is brought into action after the scanning action has been stopped **[3]**

7/28 . . . using counters or frequency dividers **[3]**

7/30 . . where the scanning is accomplished by mechanical means, e.g. by a motor **[3]**

7/32 . . with simultaneous display of received frequencies, e.g. panoramic receivers **[3]**

9/00 Remote-control of tuned circuits; **Combined remote-control of tuning and other functions, e.g. brightness, amplification** (mechanical remote-control arrangements H03J 1/00) **[3]**

9/02 . using radio transmission; using near-field transmission **[3]**

9/04 . using ultrasonic, sonic or infrasonic waves **[3]**

9/06 . using electromagnetic waves other than radio waves, e.g. light **[3]**

H03K PULSE TECHNIQUE (measuring pulse characteristics G01R; mechanical counters having an electrical input G06M; information storage devices in general G11; sample-and-hold arrangements in electric analogue stores G11C 27/02; construction of switches involving contact making and breaking for generation of pulses, e.g. by using a moving magnet, H01H; static conversion of electric power H02M; generation of oscillations by circuits employing active elements which operate in a non-switching manner H03B; modulating sinusoidal oscillations with pulses H03C, H04L; discriminator circuits involving pulse counting H03D; automatic control of generators H03L; starting, synchronisation, or stabilisation of generators where the type of generator is irrelevant or unspecified H03L; coding, decoding or code conversion, in general H03M) **[4]**

(1) This subclass covers :
- methods, circuits, devices, or apparatus using active elements operating in a discontinuous or switching manner for generating, counting, amplifying, shaping, modulating, demodulating, or otherwise manipulating signals;
- electronic switching not involving contact-making and breaking;
- logic circuits handling electric pulses.

(2) In this subclass, the following expression is used with the meaning indicated:
- "active element" exercises control over the conversion of input energy into an oscillation or a discontinuous flow of energy.

(3) In this subclass, where the claims of a patent document are not limited to a specific circuit element, the document is classified at least according to the elements used in the described embodiment. **[6]**

Subclass index

3/00 **Circuits for generating electric pulses**; **Monostable, bistable or multistable circuits** (H03K 4/00 takes precedence; for digital computers G06F 1/025) **[5]**

3/01 . Details **[3]**

3/011 . . Modifications of generator to compensate for variations in physical values, e.g. voltage, temperature **[6]**

3/012 . . Modifications of generator to improve response time or to decrease power consumption **[6]**

3/013 . . Modifications of generator to prevent operation by noise or interference **[3]**

3/014 . . Modifications of generator to ensure starting of oscillations **[6]**

3/015 . . Modifications of generator to maintain energy constant **[6]**

3/017 . . Adjustment of width or dutycycle of pulses (pulse width modulation H03K 7/08) **[3]**

3/02 . Generators characterised by the type of circuit or by the means used for producing pulses (H03K 3/64 to H03K 3/84 take precedence)

3/021 . . by the use, as active elements, of more than one type of element or means, e.g. BIMOS, composite devices such as IGBT **[6]**

3/023 . . by the use of differential amplifiers or comparators, with internal or external positive feedback **[3]**

3/0231 . . . Astable circuits **[6]**

3/0232 . . . Monostable circuits **[6]**

3/0233 . . . Bistable circuits **[6]**

3/0234 . . . Multistable circuits **[6]**

3/027 . . by the use of logic circuits, with internal or external positive feedback **[3]**

3/03 . . . Astable circuits **[3]**

3/033 . . . Monostable circuits **[3]**

3/037 . . . Bistable circuits **[3]**

3/038 . . . Multistable circuits **[6]**

3/04 . . by the use, as active elements, of vacuum tubes only, with positive feedback (H03K 3/023, H03K 3/027 take precedence) **[3]**

3/05 . . . using means other than a transformer for feedback

3/06 . . . . using at least two tubes so coupled that the input of one is derived from the output of another, e.g. multivibrator

3/08 . . . . . astable

3/09 . . . . . Stabilisation of output **[2]**

3/10 . . . . . monostable

3/12 . . . . . bistable

3/13 . . . . . Bistables with hysteresis, e.g. Schmitt trigger **[6]**

3/14 . . . . . multistable

3/16 . . . using a transformer for feedback, e.g. blocking oscillator with saturable core

3/22 . . . . specially adapted for amplitude comparison, i.e. Multiar

3/26 . . by the use, as active elements, of bipolar transistors with internal or external positive feedback (H03K 3/023, H03K 3/027 take precedence) **[2]**

3/28 . . . using means other than a transformer for feedback

3/281 . . . . using at least two transistors so coupled that the input of one is derived from the output of another, e.g. multivibrator

3/282 . . . . . astable

3/283 . . . . . Stabilisation of output **[2]**

3/284 . . . . . monostable

3/286 . . . . . bistable **[3]**

3/287 . . . . . using additional transistors in the feedback circuit (H03K 3/289 takes precedence) **[3]**

3/288 . . . . . using additional transistors in the input circuit (H03K 3/289 takes precedence) **[3]**

3/2885 . . . . . the input circuit having a differential configuration **[5]**

3/289 . . . . . of the master-slave type **[3]**

3/2893 . . . . . Bistables with hysteresis, e.g. Schmitt trigger **[6]**

3/2897 . . . . . with an input circuit of differential configuration **[6]**

3/29 . . . . . multistable

3/30 . . . using a transformer for feedback, e.g. blocking oscillator

3/313 . . by the use, as active elements, of semiconductor devices with two electrodes, one or two potential-jump barriers, and exhibiting a negative resistance characteristic **[3]**

3/315 . . . the devices being tunnel diodes

3/33 . . by the use, as active elements, of semiconductor devices exhibiting hole storage or enhancement effect

3/335 . . by the use, as active elements, of semiconductor devices with more than two electrodes and exhibiting avalanche effect

3/35 . . by the use, as active elements, of bipolar semiconductor devices with more than two PN junctions, or more than three electrodes, or more than one electrode connected to the same conductivity region (H03K 3/023, H03K 3/027 take precedence) **[3]**

3/351 . . . the devices being unijunction transistors (H03K 3/352 takes precedence) **[3]**

3/352 . . . the devices being thyristors **[3]**

3/3525 . . . . Anode gate thyristors or programmable unijunction transistors **[6]**

3/353 . . by the use, as active elements, of field-effect transistors with internal or external positive feedback (H03K 3/023, H03K 3/027 take precedence) **[2,3]**

3/354 . . . Astable circuits **[3]**

3/355 . . . Monostable circuits **[3]**

3/356 . . . Bistable circuits **[3]**

3/3562 . . . . of the master-slave type **[6]**

3/3565 . . . . Bistables with hysteresis, e.g. Schmitt trigger **[6]**

3/3568 . . . Multistable circuits **[6]**

3/357 . . by the use, as active elements, of bulk negative resistance devices, e.g. Gunn-effect devices **[2]**

3/36 . . by the use, as active elements, of semiconductors, not otherwise provided for **[2]**

3/37 . . by the use, as active elements, of gas-filled tubes, e.g. astable trigger circuits (H03K 3/55 takes precedence)

3/38 . . by the use, as active elements, of superconductive devices **[3]**

3/40 . . by the use, as active elements, of electrochemical cells

3/42 . . by the use, as active elements, of opto-electronic devices, i.e. light-emitting and photoelectric devices electrically- or optically-coupled

3/43 . . by the use, as active elements, of beam deflection tubes

3/45 . . by the use, as active elements, of non-linear magnetic or dielectric devices

3/47 . . . the devices being parametrons

3/49 . . . the devices being ferro-resonant

3/51 . . . the devices being multi-aperture magnetic cores, e.g. transfluxors

3/53 . . by the use of an energy-accumulating element discharged through the load by a switching device controlled by an external signal and not incorporating positive feedback (H03K 3/335 takes precedence)

3/537 . . . the switching device being a spark gap **[3]**

3/543 . . . the switching device being a vacuum tube **[3]**

3/55 . . . the switching device being a gas-filled tube having a control electrode

3/57 . . . the switching device being a semiconductor device

3/59 . . by the use of galvano-magnetic devices, e.g. Hall-effect devices **[2]**

3/64 . Generators producing trains of pulses, i.e. finite sequences of pulses

3/66 . . by interrupting the output of a generator

3/70 . . . time intervals between all adjacent pulses of one train being equal

3/72 . . with means for varying repetition rate of trains

3/78 . Generating a single train of pulses having a predetermined pattern, e.g. a predetermined number

3/80 . Generating trains of sinusoidal oscillations (by interrupting H03C, H04L)

3/84 . Generating pulses having a predetermined statistical distribution of a parameter, e.g. random pulse generators **[2]**

3/86 . Generating pulses by means of delay lines and not covered by the preceding subgroups **[2]**

4/00 Generating pulses having essentially a finite slope or stepped portions (generation of supply voltages from deflection waveforms H04N 3/18)

4/02 . having stepped portions, e.g. staircase waveform

4/04 . having parabolic shape

4/06 . having triangular shape

4/08 . . having sawtooth shape

4/10 . . . using as active elements vacuum tubes only

4/12 . . . . in which a sawtooth voltage is produced across a capacitor

4/14 . . . . . using two tubes so coupled that the input of each one is derived from the output of the other, e.g. multivibrator

4/16 . . . . . using a single tube with positive feedback through transformer, e.g. blocking oscillator

4/18 . . . . . using a single tube exhibiting negative resistance between two of its electrodes, e.g. transitron, dynatron

4/20 . . . . . using a tube with negative feedback by capacitor, e.g. Miller integrator

4/22 . . . . . combined with transitron, e.g. phantastron, sanatron

4/24 . . . . . Boot-strap generators

4/26 . . . . in which a sawtooth current is produced through an inductor

4/28 . . . . . using a tube operating as a switching device **[3]**

4/32 . . . . . combined with means for generating the driving pulses

4/34 . . . . . using a single tube with positive feedback through a transformer

4/36 . . . . . using a single tube exhibiting negative resistance between two of its electrodes, e.g. transitron, dynatron

4/38 . . . . . combined with Miller integrator

4/39 . . . . . using a tube operating as an amplifier **[3]**

4/41 . . . . . with negative feedback through a capacitor, e.g. Miller integrator **[3]**

4/43 . . . . . combined with means for generating the driving pulses **[3]**

4/48 . . . using as active elements semiconductor devices (H03K 4/787 to H03K 4/84 take precedence)

4/50 . . . . in which a sawtooth voltage is produced across a capacitor

4/501 . . . . . the starting point of the flyback period being determined by the amplitude of the voltage across the capacitor, e.g. by a comparator **[6]**

4/502 . . . . . the capacitor being charged from a constant-current source **[6]**

4/52 . . . . . using two semiconductor devices so coupled that the input of each one is derived from the output of the other, e.g. multivibrator

4/54 . . . . . using a single semiconductor device with positive feedback through a transformer, e.g. blocking oscillator

4/56 . . . . . using a semiconductor device with negative feedback through a capacitor, e.g. Miller integrator
4/58 . . . . . Boot-strap generators
4/60 . . . . in which a sawtooth current is produced through an inductor
4/62 . . . . . using a semiconductor device operating as a switching device **[3]**
4/64 . . . . . combined with means for generating the driving pulses
4/66 . . . . . using a single device with positive feedback, e.g. blocking oscillator
4/68 . . . . . Generators in which the switching device is conducting during the fly-back part of the cycle
4/69 . . . . . using a semiconductor device operating as an amplifier **[3]**
4/71 . . . . . with negative feedback through a capacitor, e.g. Miller integrator **[3]**
4/72 . . . . . combined with means for generating the driving pulses
4/787 . . . using as active elements semiconductor devices with two electrodes and exhibiting a negative resistance characteristic **[2]**
4/793 . . . . using tunnel diodes **[2]**
4/80 . . . using as active elements multi-layer diodes
4/83 . . . using as active elements semiconductor devices with more than two PN junctions or with more than three electrodes or more than one electrode connected to the same conductivity region **[2]**
4/84 . . . . Generators in which the semiconductor device is conducting during the fly-back part of the cycle
4/86 . . . using as active elements gas-filled tubes
4/88 . . . using as active elements electrochemical cells
4/90 . . . Linearisation of ramp (modifying slopes of pulses H03K 6/04; scanning correction for television receivers H04N 3/16); Synchronisation of pulses (in pictorial communication systems H04N 1/36, H04N 5/04; colour synchronisation H04N 9/44) **[2]**
4/92 . having a waveform comprising a portion of a sinusoid (generating sinusoidal oscillations H03B) **[2]**
4/94 . having trapezoidal shape **[2]**

5/00 Manipulating pulses not covered by one of the other main groups in this subclass (circuits with regenerative action H03K 3/00, H03K 4/00; by the use of non-linear magnetic or dielectric devices H03K 3/45)

Note

In this group, the input signals are of the pulse type. **[3]**

5/003 . Changing the DC level (television signals H04N 3/00) **[6]**
5/007 . . Base line stabilisation (thresholding H03K 5/08) **[6]**
5/01 . Shaping pulses (discrimination against noise or interference H03K 5/125)
5/02 . . by amplifying (H03K 5/04 takes precedence; wide-band amplifiers in general H03F)
5/04 . . by increasing duration; by decreasing duration
5/05 . . . by the use of clock signals or other time reference signals **[3]**
5/06 . . . by the use of delay lines or other analogue delay elements **[3]**
5/07 . . . by the use of resonant circuits **[3]**
5/08 . . by limiting, by thresholding, by slicing, i.e. combined limiting and thresholding (H03K 5/07 takes precedence; comparing one pulse with another H03K 5/22; providing a determined threshold for switching H03K 17/30) **[3]**
5/12 . . by steepening leading or trailing edges
5/125 . Discriminating pulses (measuring or indicating G01R 19/00, G01R 23/00, G01R 25/00, G01R 29/00; separation of synchronising signals in television systems H04N 5/08) **[6]**
5/1252 . . Suppression or limitation of noise or interference (specially adapted for transmission systems H04B 15/00, H04L 25/08) **[6]**
5/1254 . . . specially adapted for pulses generated by closure of switches, i.e. anti-bouncing devices (debouncing circuits for electronic time-pieces G04G 5/00) **[6]**
5/13 . Arrangements having a single output and transforming input signals into pulses delivered at desired time intervals
5/135 . . by the use of time reference signals, e.g. clock signals **[3]**
5/14 . . by the use of delay lines **[3]**
5/145 . . by the use of resonant circuits **[3]**
5/15 . Arrangements in which pulses are delivered at different times at several outputs, i.e. pulse distributors (distributing, switching, or gating arrangements H03K 17/00) **[2]**
5/151 . . with two complementary outputs **[6]**
5/153 . Arrangements in which a pulse is delivered at the instant when a predetermined characteristic of an input signal is present or at a fixed time interval after this instant (switching at zero crossing H03K 17/13)
5/1532 . . Peak detectors (measuring characteristics of individual pulses G01R 29/02) **[6]**
5/1534 . . Transition or edge detectors **[6]**
5/1536 . . Zero-crossing detectors (in measuring circuits G01R 19/175) **[6]**
5/156 . Arrangements in which a continuous pulse train is transformed into a train having a desired pattern
5/159 . Applications of delay lines not covered by the preceding subgroups
5/19 . Monitoring patterns of pulse trains (indicating amplitude G01R 19/00; indicating frequency G01R 23/00; measuring characteristics of individual pulses G01R 29/02) **[3]**
5/22 . Circuits having more than one input and one output for comparing pulses or pulse trains with each other according to input signal characteristics, e.g. slope, integral (indicating phase difference of two cyclic pulse trains G01R 25/00) **[3]**
5/24 . . the characteristic being amplitude **[3]**
5/26 . . the characteristic being duration, interval, position, frequency, or sequence **[3]**

6/00 **Manipulating pulses having a finite slope and not covered by one of the other main groups of this subclass** (circuits with regenerative action H03K 4/00)

Note

In this group, the input signals are of the pulse type. **[3]**

6/02 . Amplifying pulses
6/04 . Modifying slopes of pulses, e.g. S-correction (S-correction in television H04N 3/23)

7/00 **Modulating pulses with a continuously-variable modulating signal**

7/02 . Amplitude modulation, i.e. PAM
7/04 . Position modulation, i.e. PPM
7/06 . Frequency or rate modulation, i.e. PFM or PRM
7/08 . Duration or width modulation
7/10 . Combined modulation, e.g. rate modulation and amplitude modulation

9/00 **Demodulating pulses which have been modulated with a continuously-variable signal**

9/02 . of amplitude-modulated pulses
9/04 . of position-modulated pulses
9/06 . of frequency- or rate-modulated pulses
9/08 . of duration- or width-modulated pulses
9/10 . of pulses having combined modulation

11/00 **Transforming types of modulation, e.g. position-modulated pulses into duration-modulated pulses**

12/00 **Producing pulses by distorting or combining sinusoidal waveforms** (shaping pulses H03K 5/01; combining sinewaves using elements operating in a non-switching manner H03B) **[3]**

17/00 **Electronic switching or gating, i.e. not by contact-making and -breaking** (selection of the stylus or auxiliary electrode in electric printing B41J 2/405; sample-and-hold arrangements G11C 27/02; switching or interrupting devices in waveguides H01P; gated amplifiers H03F 3/72; switching arrangements for exchange systems using static devices H04Q 3/52)

17/04 . Modifications for accelerating switching **[3]**
17/041 . . without feedback from the output circuit to the control circuit **[6]**
17/0412 . . . by measures taken in the control circuit **[6]**
17/0414 . . . . Anti-saturation measures **[6]**
17/0416 . . . by measures taken in the output circuit **[6]**
17/042 . . by feedback from the output circuit to the control circuit **[6]**
17/0422 . . . Anti-saturation measures **[6]**
17/0424 . . . by the use of a transformer **[6]**
17/06 . Modifications for ensuring a fully conducting state **[3]**
17/08 . Modifications for protecting switching circuit against overcurrent or overvoltage **[3]**
17/081 . . without feedback from the output circuit to the control circuit **[6]**
17/0812 . . . by measures taken in the control circuit **[6]**
17/0814 . . . by measures taken in the output circuit **[6]**
17/082 . . by feedback from the output to the control circuit **[6]**
17/10 . Modifications for increasing the maximum permissible switched voltage **[3]**
17/12 . Modifications for increasing the maximum permissible switched current **[3]**
17/13 . Modifications for switching at zero crossing (generating an impulse at zero crossing H03K 5/1536) **[3]**
17/14 . Modifications for compensating variations of physical values, e.g. of temperature **[3]**
17/16 . Modifications for eliminating interference voltages or currents **[3]**
17/18 . Modifications for indicating state of switch **[3]**
17/20 . Modifications for resetting core switching units to a predetermined state **[3]**
17/22 . Modifications for ensuring a predetermined initial state when the supply voltage has been applied (bi-stable generators H03K 3/12) **[3]**
17/24 . . Storing the actual state when the supply voltage fails **[3]**
17/26 . Modifications for temporary blocking after receipt of control pulses **[3]**
17/28 . Modifications for introducing a time delay before switching (modifications to provide a choice of time-intervals for executing more than one switching action H03K 17/296) **[3]**
17/284 . . in field-effect transistor switches **[3]**
17/288 . . in tube switches **[3]**
17/292 . . in thyristor, unijunction transistor or programmable unijunction transistor switches **[3]**
17/296 . Modifications to provide a choice of time-intervals for executing more than one switching action and automatically terminating their operation after the programme is completed (electronic clocks comprising means to be operated at preselected times or after preselected time-intervals G04G 15/00) **[3]**
17/30 . Modifications for providing a predetermined threshold before switching (shaping pulses by thresholding H03K 5/08) **[3]**
17/51 . characterised by the use of specified components (H03K 17/04 to H03K 17/30, H03K 17/94 take precedence) **[3]**
17/52 . . by the use, as active elements, of gas-filled tubes **[3]**
17/54 . . by the use, as active elements, of vacuum tubes (using diodes H03K 17/74) **[3]**
17/56 . . by the use, as active elements, of semiconductor devices (using diodes H03K 17/74) **[3]**
17/567 . . . Circuits characterised by the use of more than one type of semiconductor device, e.g. BIMOS, composite devices such as IGBT **[6]**
17/58 . . . the devices being tunnel diodes **[3]**
17/60 . . . the devices being bipolar transistors (bipolar transistors having four or more electrodes H03K 17/72) **[3]**
17/605 . . . . with galvanic isolation between the control circuit and the output circuit (H03K 17/78 takes precedence) **[5]**
17/61 . . . . . using transformer coupling **[5]**
17/615 . . . . in a Darlington configuration **[5]**
17/62 . . . . Switching arrangements with several input- or output-terminals, e.g. multiplexers, distributors (logic circuits H03K 19/00; code converters H03M 5/00, H03M 7/00) **[3]**
17/64 . . . . having inductive loads **[3]**
17/66 . . . . Switching arrangements for passing the current in either direction at will; Switching arrangements for reversing the current at will **[3]**
17/68 . . . . specially adapted for switching ac currents or voltages **[3]**
17/687 . . . the devices being field-effect transistors **[3]**

17/689 . . . . with galvanic isolation between the control circuit and the output circuit (H03K 17/78 takes precedence) **[5]**
17/691 . . . . . using transformer coupling **[5]**
17/693 . . . . Switching arrangements with several input- or output-terminals, e.g. multiplexers, distributors (logic circuits H03K 19/00; code converters H03M 5/00, H03M 7/00) **[3]**
17/695 . . . . having inductive loads (protecting switching circuit against inductive flyback voltage H03K 17/08) **[6]**
17/70 . . . the devices having only two electrodes and exhibiting negative resistance (the devices being tunnel diodes H03K 17/58) **[3]**
17/72 . . . Bipolar semiconductor devices with more than two PN junctions, e.g. thyristors, programmable unijunction transistors, or with more than three electrodes, e.g. silicon controlled switches, or with more than one electrode connected to the same conductivity region, e.g. unijunction transistors **[3]**
17/722 . . . . with galvanic isolation between the control circuit and the output circuit (H03K 17/78 takes precedence) **[5]**
17/723 . . . . . using transformer coupling **[5]**
17/725 . . . . for ac voltages or currents (H03K 17/722, H03K 17/735 take precedence) **[3,5]**
17/73 . . . . for dc voltages or currents (H03K 17/722, H03K 17/735 take precedence) **[3,5]**
17/732 . . . . . Measures for enabling turn-off **[5]**
17/735 . . . . Switching arrangements with several input- or output-terminals, e.g. multiplexers, distributors (H03K 17/722 takes precedence; logic circuits H03K 19/00; code converters H03M 5/00, H03M 7/00) **[3,5]**
17/74 . . by the use, as active elements, of diodes (by the use of more than one type of semiconductor device H03K 17/567; by the use of tunnel diodes H03K 17/58; by the use of negative resistance diodes H03K 17/70) **[3]**
17/76 . . . Switching arrangements with several input- or output-terminals, e.g. multiplexers, distributors (logic circuits H03K 19/00; code H03M 5/00, H03M 7/00) **[3]**
17/78 . . by the use, as active elements, of opto-electronic devices, i.e. light-emitting and photoelectric devices electrically- or optically-coupled **[3]**
17/785 . . . controlling field-effect transistor switches **[5]**
17/79 . . . controlling semiconductor switches with more than two PN-junctions, or more than three electrodes, or more than one electrode connected to the same conductivity region **[5]**
17/795 . . . controlling bipolar transistors **[5]**
17/80 . . by the use, as active elements, of non-linear magnetic or dielectric devices **[3]**
17/81 . . . Switching arrangements with several input- or output-terminals, e.g. multiplexers, distributors (logic circuits H03K 19/00; code converters H03M 5/00, H03M 7/00) **[3]**
17/82 . . . the devices being transfluxors **[3]**
17/84 . . . the devices being thin-film devices **[3]**
17/86 . . . the devices being twistors **[3]**
17/88 . . by the use, as active elements, of beam-deflection tubes **[3]**
17/90 . . by the use, as active elements, of galvano-magnetic devices, e.g. Hall-effect devices (H03K 17/95, H03K 17/97 take precedence) **[2,3]**
17/92 . . by the use, as active elements, of superconductive devices **[2,3]**
17/94 . characterised by the way in which the control signals are generated (mechanical structural details of control members of switches or keyboards, such as keys, push-buttons, levers or other mechanisms for transferring force to the activated elements, not directly producing electronic effects H01H; keyboards for special applications, see the relevant places, e.g. B41J, G06F 3/023, H04L 15/00, H04L 17/00, H04M 1/00) **[3,4]**
17/945 . . Proximity switches (H03K 17/96 takes precedence) **[3]**
17/95 . . . using a magnetic detector **[3]**
17/955 . . . using a capacitive detector **[3]**
17/96 . . Touch switches (specially adapted for electronic time-pieces with no moving parts G04G 21/08) **[3]**
17/965 . . Switches controlled by moving an element forming part of the switch **[3]**
17/967 . . . having a plurality of control members, e.g. keyboard (H03K 17/969, H03K 17/972, H03K 17/98 take precedence) **[4]**
17/968 . . . using opto-electronic devices **[4]**
17/969 . . . . having a plurality of control members, e.g. keyboard **[4]**
17/97 . . . using a magnetic movable element **[3]**
17/972 . . . . having a plurality of control members, e.g. keyboard **[4]**
17/975 . . . using a capacitive movable element **[3]**
17/98 . . . . having a plurality of control members, e.g. keyboard **[4]**

19/00 Logic circuits, i.e. having at least two inputs acting on one output (circuits for computer systems using fuzzy logic G06N 7/02); **Inverting circuits**
19/003 . Modifications for increasing the reliability **[3]**
19/007 . Fail-safe circuits **[3]**
19/01 . Modifications for accelerating switching **[3]**
19/013 . . in bipolar transistor circuits **[3]**
19/017 . . in field-effect transistor circuits **[3]**
19/0175 . Coupling arrangements; Interface arrangements (interface arrangements for digital computers G06F 3/00, G06F 13/00) **[5]**
19/018 . . using bipolar transistors only **[5]**
19/0185 . . using field-effect transistors only **[5]**
19/02 . using specified components (H03K 19/003 to H03K 19/0175 take precedence) **[3,5]**
19/04 . . using gas-filled tubes
19/06 . . using vacuum tubes (using diode rectifiers H03K 19/12)
19/08 . . using semiconductor devices (H03K 19/173 takes precedence; wherein the semiconductor devices are only diode rectifiers H03K 19/12) **[3]**
19/082 . . . using bipolar transistors **[3]**
19/084 . . . . Diode−transistor logic **[3]**
19/086 . . . . Emitter coupled logic **[3]**
19/088 . . . . Transistor−transistor logic **[3]**
19/09 . . . . Resistor−transistor logic **[3]**
19/091 . . . . Integrated injection logic or merged transistor logic **[3]**
19/094 . . . using field-effect transistors **[3]**
19/0944 . . . . using MOSFET (H03K 19/096 takes precedence) **[5]**
19/0948 . . . . . using CMOS **[5]**
19/0952 . . . . using Schottky type FET (H03K 19/096 takes precedence) **[5]**

19/0956 . . . . Schottky diode FET logic (H03K 19/096 takes precedence) **[5]**
19/096 . . . . Synchronous circuits, i.e. using clock signals **[3]**
19/098 . . . using thyristors **[3]**
19/10 . . . using tunnel diodes **[3]**
19/12 . . using diode rectifiers
19/14 . . using opto-electronic devices, i.e. light-emitting and photoelectric devices electrically- or optically-coupled (optical logic elements G02F 3/00)
19/16 . . using saturable magnetic devices
19/162 . . . using parametrons
19/164 . . . using ferro-resonant devices
19/166 . . . using transfluxors
19/168 . . . using thin-film devices
19/17 . . using twistors
19/173 . . using elementary logic circuits as components **[3]**
19/177 . . . arranged in matrix form **[3]**
19/18 . . using galvano-magnetic devices, e.g. Hall-effect devices **[2]**
19/185 . . using dielectric elements with variable dielectric constant, e.g. ferro-electric capacitors **[2]**
19/19 . . . using ferro-resonant devices **[2]**
19/195 . . using superconductive devices **[2,3]**
19/20 . characterised by logic function, e.g. AND, OR, NOR, NOT circuits (H03K 19/003 to H03K 19/01 take precedence)
19/21 . . EXCLUSIVE-OR circuits, i.e. giving output if input signal exists at only one input; COINCIDENCE circuits, i.e. giving output only if all input signals are identical **[3]**
19/23 . . Majority or minority circuits, i.e. giving output having the state of the majority or the minority of the inputs **[3]**

21/00 Details of pulse counters or frequency dividers
21/02 . Input circuits **[4]**
21/08 . Output circuits **[4]**
21/10 . . comprising logic circuits
21/12 . . with parallel read-out **[4]**
21/14 . . with series read-out of number stored **[4]**
21/16 . Circuits for carrying-over pulses between successive decades
21/17 . . with field-effect transistors **[4]**
21/18 . Circuits for visual indication of the result **[4]**
21/20 . . using glow-discharge lamps
21/38 . Starting, stopping, or resetting the counter (counters with a base other than a power of two H03K 23/48, H03K 23/66) **[4]**
21/40 . Monitoring; Error detection; Preventing or correcting improper counter operation **[4]**

23/00 Pulse counters comprising counting chains; **Frequency dividers comprising counting chains** (H03K 29/00 takes precedence)
23/40 . Gating or clocking signals applied to all stages, i.e. synchronous counters **[4]**
23/42 . . Out-of-phase gating or clocking signals applied to counter stages **[4]**
23/44 . . . using field-effect transistors **[4]**
23/46 . . . using charge transfer devices, i.e. bucket brigade or charge coupled devices **[4]**
23/48 . . with a base or radix other than a power of two (H03K 23/42 takes precedence) **[4]**
23/50 . . using bi-stable regenerative trigger circuits (H03K 23/42 to H03K 23/48 take precedence) **[4]**
23/52 . . . using field-effect transistors **[4]**
23/54 . . . Ring counters, i.e. feedback shift register counters (H03K 23/52 takes precedence) **[4]**
23/56 . . . Reversible counters (H03K 23/52 takes precedence) **[4]**
23/58 . Gating or clocking signals not applied to all stages, i.e. asynchronous counters (H03K 23/74 to H03K 23/84 take precedence) **[4]**
23/60 . . with field-effect transistors **[4]**
23/62 . . reversible **[4]**
23/64 . with a base or radix other than a power of two (H03K 23/40 to H03K 23/62 take precedence) **[4]**
23/66 . . with a variable counting base, e.g. by presetting or by adding or suppressing pulses **[4]**
23/68 . . with a base which is a non-integer **[4]**
23/70 . . with a base which is an odd number (H03K 23/66 takes precedence) **[4]**
23/72 . . Decade counters (H03K 23/66 takes precedence) **[4]**
23/74 . using relays **[4]**
23/76 . using magnetic cores or ferro-electric capacitors **[4]**
23/78 . using opto-electronic devices **[4]**
23/80 . using semiconductor devices having only two electrodes, e.g. tunnel diode, multi-layer diode **[4]**
23/82 . using gas-filled tubes **[4]**
23/84 . using thyristors or unijunction transistors **[4]**
23/86 . reversible (H03K 23/40 to H03K 23/84 take precedence) **[4]**

25/00 Pulse counters with step-by-step integration and static storage; **Analogous frequency dividers**
25/02 . comprising charge storage, e.g. capacitor without polarisation hysteresis
25/04 . . using auxiliary pulse generator triggered by the incoming pulses **[4]**
25/12 . comprising hysteresis storage

27/00 Pulse counters in which pulses are continuously circulated in a closed loop; **Analogous frequency dividers** (feedback shift register counters H03K 23/54) **[4]**

29/00 Pulse counters comprising multi-stable elements, e.g. for ternary scale, for decimal scale; **Analogous frequency dividers**
29/04 . using multi-cathode gas discharge tubes **[4]**
29/06 . using beam-type tubes, e.g. magnetrons, cathode-ray tubes **[4]**

H03L AUTOMATIC CONTROL, STARTING, SYNCHRONISATION, OR STABILISATION OF GENERATORS OF ELECTRONIC OSCILLATIONS OR PULSES (of dynamo-electric generators H02P) **[3]**

(1) This subclass covers:
– automatic control circuits for generators of electronic oscillations or pulses; **[3]**

– starting, synchronisation, or stabilisation circuits for generators where the type of generator is irrelevant or unspecified. **[3]**

(2) This subclass does not cover stabilisation or starting circuits specially adapted to only one specific type of generator, which are covered by subclasses H03B, H03K. **[3]**

(3) In this subclass, the following expression is used with the meaning indicated:
– "automatic control" covers only closed loop systems. **[3]**

1/00 **Stabilisation of generator output against variations of physical values, e.g. power supply** (automatic control H03L 5/00, H03L 7/00) **[3]**

1/02 . against variations of temperature only **[3]**

1/04 . . Constructional details for maintaining temperature constant **[3]**

3/00 **Starting of generators [3]**

5/00 **Automatic control of voltage, current, or power [3]**

5/02 . of power **[3]**

7/00 **Automatic control of frequency or phase**; **Synchronisation** (tuning of resonant circuits in general H03J; synchronising in digital communication systems, see the relevant groups in class H04) **[3]**

7/02 . using a frequency discriminator comprising a passive frequency-determining element **[3]**

7/04 . . wherein the frequency-determining element comprises distributed inductance and capacitance **[3]**

7/06 . using a reference signal applied to a frequency- or phase-locked loop **[3]**

7/07 . . using several loops, e.g. for redundant clock signal generation (for indirect frequency synthesis H03L 7/22) **[5]**

7/08 . . Details of the phase-locked loop **[3]**

7/081 . . . provided with an additional controlled phase shifter **[5]**

7/083 . . . the reference signal being additionally directly applied to the generator (direct frequency synchronisation without loop H03L 7/24) **[5]**

7/085 . . . concerning mainly the frequency- or phase-detection arrangement including the filtering or amplification of its output signal (H03L 7/10 takes precedence; frequency or phase detection comparison in general H03D 3/00, H03D 13/00) **[5]**

7/087 . . . . using at least two phase detectors or a frequency and phase detector in the loop **[5]**

7/089 . . . . the phase or frequency detector generating up-down pulses (H03L 7/087 takes precedence) **[5]**

7/091 . . . . the phase or frequency detector using a sampling device (H03L 7/087 takes precedence) **[5]**

7/093 . . . . using special filtering or amplification characteristics in the loop (H03L 7/087 to H03L 7/091 take precedence) **[5]**

7/095 . . . . using a lock detector (H03L 7/087 takes precedence) **[5]**

7/097 . . . . using a comparator for comparing the voltages obtained from two frequency to voltage converters **[5]**

7/099 . . . concerning mainly the controlled oscillator of the loop **[5]**

7/10 . . . for assuring initial synchronisation or for broadening the capture range **[3]**

7/107 . . . . using a variable transfer function for the loop, e.g. low pass filter having a variable bandwidth **[5]**

7/113 . . . . using frequency discriminator **[5]**

7/12 . . . . using a scanning signal (tuning circuits with automatic scanning over a band of frequencies H03J 7/18) **[3]**

7/14 . . . for assuring constant frequency when supply or correction voltages fail **[3]**

7/16 . . Indirect frequency synthesis, i.e. generating a desired one of a number of predetermined frequencies using a frequency- or phase-locked loop **[3]**

7/18 . . . using a frequency divider or counter in the loop (H03L 7/20, H03L 7/22 take precedence) **[3]**

7/181 . . . . a numerical count result being used for locking the loop, the counter counting during fixed time intervals **[5]**

7/183 . . . . a time difference being used for locking the loop, the counter counting between fixed numbers or the frequency divider dividing by a fixed number **[5]**

7/185 . . . . . using a mixer in the loop (H03L 7/187 to H03L 7/195 take precedence) **[5]**

7/187 . . . . . using means for coarse tuning the voltage controlled oscillator of the loop (H03L 7/191 to H03L 7/195 take precedence) **[5]**

7/189 . . . . . comprising a D/A converter for generating a coarse tuning voltage **[5]**

7/191 . . . . . using at least two different signals from the frequency divider or the counter for determining the time difference (H03L 7/193, H03L 7/195 take precedence) **[5]**

7/193 . . . . . the frequency divider/counter comprising a commutable pre-divider, e.g. a two modulus divider (pulse counters/frequency dividers H03K 21/00 to H03K 29/00) **[5]**

7/195 . . . . . in which the counter of the loop counts between two different non zero numbers, e.g. for generating an offset frequency (H03L 7/193 takes precedence; pulse counters for predetermined counting H03K 21/00 to H03K 29/00) **[5]**

7/197 . . . . a time difference being used for locking the loop, the counter counting between numbers which are variable in time or the frequency divider dividing by a factor variable in time, e.g. for obtaining fractional frequency division **[5]**

7/199 . . . . . with reset of the frequency divider or the counter, e.g. for assuring initial synchronisation **[5]**

7/20 . . . using a harmonic phase-locked loop, i.e. a loop which can be locked to one of a number of harmonically related frequencies applied to it (H03L 7/22 takes precedence) **[3]**

7/22 . . . using more than one loop **[3]**

7/23 . . . . with pulse counters or frequency dividers **[5]**

7/24 . using a reference signal directly applied to the generator **[3]**

7/26 . using energy levels of molecules, atoms, or subatomic particles as a frequency reference **[3]**

9/00 Automatic control not provided for in other groups of this subclass [8]

H03M CODING, DECODING OR CODE CONVERSION, IN GENERAL (using fluidic means F15C 4/00; optical analogue/digital converters G02F 7/00; coding, decoding or code conversion, specially adapted for particular applications, see the relevant subclasses, e.g. G01D, G01R, G06F, G06T, G09G, G10L, G11B, G11C, H04B, H04L, H04M, H04N; ciphering or deciphering for cryptography or other purposes involving the need for secrecy G09C) **[4]**

Subclass index

1/00 Analogue/digital conversion; **Digital/analogue conversion** (conversion of analogue values to or from differential modulation H03M 3/00) **[4]**

1/02 . Reversible analogue/digital converters **[4]**

1/04 . using stochastic techniques **[4]**

1/06 . Continuously compensating for, or preventing, undesired influence of physical parameters (periodically H03M 1/10) **[4]**

1/08 . . of noise **[4]**

1/10 . Calibration or testing **[4]**

1/12 . Analogue/digital converters (H03M 1/02 to H03M 1/10 take precedence) **[4]**

1/14 . . Conversion in steps with each step involving the same or a different conversion means and delivering more than one bit **[4]**

1/16 . . . with scale factor modification, i.e. by changing the amplification between the steps **[4]**

1/18 . . Automatic control for modifying the range of signals the converter can handle, e.g. gain ranging **[4]**

1/20 . . Increasing resolution using an n bit system to obtain n + m bits, e.g. by dithering **[4]**

1/22 . . pattern-reading type **[4]**

1/24 . . . using relatively movable reader and disc or strip **[4,6]**

1/26 . . . . with weighted coding, i.e. the weight given to a digit depends on the position of the digit within the block or code word, e.g. there is a given radix and the weights are powers of this radix **[4]**

1/28 . . . . with non-weighted coding **[4]**

1/30 . . . . . incremental **[4]**

1/32 . . . using cathode-ray tubes **[4]**

1/34 . . Analogue value compared with reference values (H03M 1/48 takes precedence) **[4]**

1/36 . . . simultaneously only, i.e. parallel type **[4]**

1/38 . . . sequentially only, e.g. successive approximation type (converting more than one bit per step H03M 1/14) **[4]**

1/40 . . . . recirculation type **[4]**

1/42 . . . . Sequential comparisons in series-connected stages with no change in value of analogue signal **[4]**

1/44 . . . . Sequential comparisons in series-connected stages with change in value of analogue signal **[4]**

1/46 . . . . with digital/analogue converter for supplying reference values to converter **[4]**

1/48 . . Servo-type converters **[4]**

1/50 . . with intermediate conversion to time interval (H03M 1/64 takes precedence) **[4]**

1/52 . . . Input signal integrated with linear return to datum **[4]**

1/54 . . . Input signal sampled and held with linear return to datum **[4]**

1/56 . . . Input signal compared with linear ramp **[4]**

1/58 . . . Non-linear conversion **[4]**

1/60 . . with intermediate conversion to frequency of pulses **[4]**

1/62 . . . Non-linear conversion **[4]**

1/64 . . with intermediate conversion to phase of sinusoidal signals **[4]**

1/66 . Digital/analogue converters (H03M 1/02 to H03M 1/10 take precedence) **[4]**

1/68 . . with conversions of different sensitivity, i.e. one conversion relating to the more significant digital bits and another conversion to the less significant bits **[4]**

1/70 . . Automatic control for modifying converter range **[4]**

1/72 . . Sequential conversion in series-connected stages (H03M 1/68 takes precedence) **[4]**

1/74 . . Simultaneous conversion **[4]**

1/76 . . . using switching tree **[4]**

1/78 . . . using ladder network **[4]**

1/80 . . . using weighted impedances (H03M 1/76 takes precedence) **[4]**

1/82 . . with intermediate conversion to time interval **[4]**

1/84 . . . Non-linear conversion **[4]**

1/86 . . with intermediate conversion to frequency of pulses **[4]**

1/88 . . . Non-linear conversion **[4]**

3/00 Conversion of analogue values to or from differential modulation [4]

3/02 . Delta modulation, i.e. one-bit differential modulation **[4]**

3/04 . Differential modulation with several bits **[4]**

5/00 Conversion of the form of the representation of individual digits [4]

Note

In groups H03M 5/02 to H03M 5/22, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[4]**

5/02 . Conversion to or from representation by pulses **[4]**

5/04 . . the pulses having two levels **[4]**

5/06 . . . Code representation, e.g. transition, for a given bit cell depending only on the information in that bit cell **[4]**

5/08 . . . . Code representation by pulse width **[4]**

5/10 . . . . Code representation by pulse frequency **[4]**

5/12 . . . . Biphase level code, e.g. split phase code, Manchester code; Biphase space or mark code, e.g. double frequency code **[4]**

5/14 . . . Code representation, e.g. transition, for a given bit cell depending on the information in one or more adjacent bit cells, e.g. delay modulation code, double density code **[4]**

5/16 . . the pulses having three levels **[4]**

5/18 . . . two levels being symmetrical with respect to the third level, i.e. balanced bipolar ternary code **[4]**

5/20 . . the pulses having more than three levels **[4]**

5/22 . Conversion to or from representation by sinusoidal signals **[4]**

7/00 Conversion of a code where information is represented by a given sequence or number of digits to a code where the same information is represented by a different sequence or number of digits [4]

Note

In groups H03M 7/02 to H03M 7/30, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[4]**

7/02 . Conversion to or from weighted codes, i.e. the weight given to a digit depending on the position of the digit within the block or code word **[4]**

7/04 . . the radix thereof being two **[4]**

7/06 . . the radix thereof being a positive integer different from two **[4]**

7/08 . . . the radix being ten, i.e. pure decimal code **[4]**

7/10 . . the radix thereof being negative **[4]**

7/12 . . having two radices, e.g. binary-coded-decimal code **[4]**

7/14 . Conversion to or from non-weighted codes **[4]**

7/16 . . Conversion to or from unit-distance codes, e.g. Gray code, reflected binary code **[4]**

7/18 . . Conversion to or from residue codes **[4]**

7/20 . . Conversion to or from n-out-of-m codes **[4]**

7/22 . . . to or from one-out-of-m codes **[4]**

7/24 . . Conversion to or from floating-point codes **[4]**

7/26 . Conversion to or from stochastic codes **[4]**

7/28 . Programmable structures, i.e. where the code converter contains apparatus which is operator-changeable to modify the conversion process **[4]**

7/30 . Compression (speech analysis-synthesis for redundancy reduction G10L 19/00; for image communication H04N); Expansion; Suppression of unnecessary data, e.g. redundancy reduction **[4]**

7/32 . . Conversion to or from delta modulation, i.e. one-bit differential modulation **[4]**

7/34 . . . adaptive **[4]**

7/36 . . Conversion to or from differential modulation with several bits, i.e. the difference between successive samples being coded by more than one bit **[4]**

7/38 . . . adaptive **[4]**

7/40 . . Conversion to or from variable length codes, e.g. Shannon-Fano code, Huffman code, Morse code **[4]**

7/42 . . . using table look-up for the coding or decoding process, e.g. using read-only memory **[4]**

7/44 . . . Suppression of irrelevant zeroes **[4]**

7/46 . . Conversion to or from run-length codes, i.e. by representing the number of consecutive digits, or groups of digits, of the same kind by a code word and a digit indicative of that kind **[4]**

7/48 . . . alternating with other codes during the code conversion process, e.g. run-length coding being performed only as long as sufficiently long runs of digits of the same kind are present **[4]**

7/50 . . Conversion to or from non-linear codes, e.g. companding **[4]**

9/00 Parallel/series conversion or vice versa (digital stores in which the information is moved stepwise G11C 19/00) **[4]**

11/00 Coding in connection with keyboards or like devices, i.e. coding of the position of operated keys (keyboard switch arrangements, structural association of coders and keyboards H01H 13/70, H03K 17/94) **[4]**

11/02 . Details **[5]**

11/04 . . Coding of multifunction keys **[5]**

11/06 . . . by operating the multifunction key itself in different ways **[5]**

11/08 . . . . by operating selected combinations of multifunction keys **[5]**

11/10 . . . . by methods based on duration or pressure detection of keystrokes **[5]**

11/12 . . . . by operating a key a selected number of consecutive times whereafter a separate enter key is used which marks the end of the series **[5]**

11/14 . . . by using additional keys, e.g. shift keys, which determine the function performed by the multifunction key **[5]**

11/16 . . . . wherein the shift keys are operated after the operation of the multifunction keys **[5]**

11/18 . . . . wherein the shift keys are operated before the operation of the multifunction keys **[5]**

11/20 . Dynamic coding, i.e. by key scanning (H03M 11/26 takes precedence) **[5]**

11/22 . Static coding (H03M 11/26 takes precedence) **[5]**

11/24 . . using analogue means **[5]**

11/26 . using opto-electronic means **[5]**

13/00 **Coding, decoding or code conversion, for error detection or error correction**; **Coding theory basic assumptions**; **Coding bounds**; **Error probability evaluation methods**; **Channel models**; **Simulation or testing of codes** (error detection or error correction for analogue/digital, digital/analogue or code conversion H03M 1/00 to H03M 11/00; specially adapted for digital computers G06F 11/08, for information storage based on relative movement between record carrier and transducer G11B, e.g. G11B 20/18, for static stores G11C) **[4,7]**

13/01 . Coding theory basic assumptions; Coding bounds; Error probability evaluation methods; Channel models; Simulation or testing of codes **[7]**

13/03 . Error detection or forward error correction by redundancy in data representation, i.e. code words containing more digits than the source words **[7]**

13/05 . . using block codes, i.e. a predetermined number of check bits joined to a predetermined number of information bits **[7]**

13/07 . . . Arithmetic codes **[7]**

13/09 . . . Error detection only, e.g. using cyclic redundancy check (CRC) codes or single parity bit **[7]**

13/11 . . . using multiple parity bits **[7]**

13/13 . . . Linear codes **[7]**

13/15 . . . . Cyclic codes, i.e. cyclic shifts of codewords produce other codewords, e.g. codes defined by a generator polynomial, Bose-Chaudhuri-Hocquenghem (BCH) codes (H03M 13/17 takes precedence) **[7]**

13/17 . . . . Burst error correction, e.g. error trapping, Fire codes **[7]**

13/19 . . . . Single error correction without using particular properties of the cyclic codes, e.g. Hamming codes, extended or generalised Hamming codes **[7]**

13/21 . . . Non-linear codes, e.g. m-bit data word to n-bit code word (mBnB) conversion with error detection or error correction **[7]**

13/23 . . using convolutional codes, e.g. unit memory codes **[7]**

13/25 . Error detection or forward error correction by signal space coding, i.e. adding redundancy in the signal constellation, e.g. Trellis Coded Modulation (TCM) **[7]**

13/27 . using interleaving techniques **[7]**

13/29 . combining two or more codes or code structures, e.g. product codes, generalised product codes, concatenated codes, inner and outer codes **[7]**

13/31 . combining coding for error detection or correction and efficient use of the spectrum (without error detection or correction H03M 5/14) **[7]**

13/33 . Synchronisation based on error coding or decoding **[7]**

13/35 . Unequal or adaptive error protection, e.g. by providing a different level of protection according to significance of source information or by adapting the coding according to the change of transmission channel characteristics **[7]**

13/37 . Decoding methods or techniques, not specific to the particular type of coding provided for in groups H03M 13/03 to H03M 13/35 **[7]**

13/39 . . Sequence estimation, i.e using statistical methods for the reconstruction of the original codes **[7]**

13/41 . . . using the Viterbi algorithm or Viterbi processors **[7]**

13/43 . . Majority logic or threshold decoding **[7]**

13/45 . . Soft decoding, i.e. using symbol reliability information (H03M 13/41 takes precedence) **[7]**

13/47 . Error detection, forward error correction or error protection, not provided for in groups H03M 13/01 to H03M 13/37 **[7]**

13/49 . . Unidirectional error detection or correction **[7]**

13/51 . . Constant weight codes; n-out-of-m codes; Berger codes **[7]**

13/53 . . Codes using Fibonacci numbers series **[7]**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

H04 ELECTRIC COMMUNICATION TECHNIQUE

Note

This class covers electrical communication systems with propagation paths employing beams of corpuscular radiation, acoustic waves or electromagnetic waves, e.g. radio or optical communication. **[4]**

H04B **TRANSMISSION** (transmission systems for measured values, control or similar signals G08C; speech analysis or synthesis G10L; coding, decoding or code conversion, in general H03M; broadcast communication H04H; multiplex systems H04J; secret communication H04K; transmission of digital information H04L; wireless communication networks H04W) **[4]**

Note

This subclass covers the transmission of information-carrying signals, the transmission being independent of the nature of the information, and includes monitoring and testing arrangements and the suppression and limitation of noise and interference.

Subclass index

1/00 **Details of transmission systems, not covered by a single one of groups H04B 3/00 to H04B 13/00**; **Details of transmission systems not characterised by the medium used for transmission** (tuning resonant circuits H03J) **[4]**

1/02 . Transmitters (spatial arrangements of component circuits in radio pills for living beings A61B 5/07)

1/03 . . Constructional details, e.g. casings, housings **[2]**

1/034 . . . Portable transmitters **[2]**

1/036 . . . Cooling arrangements (cooling transformers H01F 27/08; cooling discharge tubes H01J 7/24, H01J 19/74) **[2]**

1/04 . . Circuits (of television transmitters H04N 5/38)

1/06 . Receivers (control of amplification H03G; television receivers H04N 5/44, H04N 5/64)

1/08 . . Constructional details, e.g. cabinet

1/10 . . Means associated with receiver for limiting or suppressing noise or interference

1/12 . . . Neutralising, balancing, or compensation arrangements

1/14 . . . Automatic detuning arrangements

1/16 . . Circuits

1/18 . . . Input circuits, e.g. for coupling to an aerial or a transmission line (input circuits for amplifiers in general H03F; coupling networks between aerials or lines and receivers independent of the nature of the receiver H03H)

1/20 . . . for coupling gramophone pick-up, recorder output, or microphone to receiver

1/22 . . . for receivers in which no local oscillation is generated

1/24 . . . . the receiver comprising at least one semiconductor device having three or more electrodes

1/26 . . . for superheterodyne receivers (multiple frequency-changing H03D 7/16)

1/28 . . . . the receiver comprising at least one semiconductor device having three or more electrodes

1/30 . . . for homodyne or synchrodyne receivers (demodulator circuits H03D 1/22)

1/38 . Transceivers, i.e. devices in which transmitter and receiver form a structural unit and in which at least one part is used for functions of transmitting and receiving

1/40 . . Circuits

1/44 . . . Transmit/receive switching (in radar systems G01S; tubes therefor H01J 17/64; waveguide switches H01P 1/10) **[2]**

1/46 . . . . by voice-frequency signals; by pilot signals

1/48 . . . . in circuit for connecting transmitter and receiver to a common transmission path, e.g. by energy of transmitter

1/50 . . . using different frequencies for the two directions of communication

1/52 . . . . Hybrid arrangements, i.e. for transition from single-path two-way transmission to single transmission on each of two paths, or vice versa

1/54 . . . using the same frequency for both directions of communication (H04B 1/44 takes precedence)

1/56 . . . . with provision for simultaneous communication in both directions

1/58 . . . . Hybrid arrangements, i.e. for transition from single-path two-way transmission to single transmission on each of two paths, or vice versa

1/59 . Responders; Transponders (relay systems H04B 7/14)

1/60 . Supervising unattended repeaters

1/62 . for providing a predistortion of the signal in the transmitter and corresponding correction in the receiver, e.g. for improving the signal/noise ratio

1/64 . . Volume compression or expansion arrangements

1/66 . for reducing bandwidth of signals (in speech analysis-synthesis techniques G10L 19/00; in pictorial communication systems H04N); for improving efficiency of transmission (H04B 1/68 takes precedence)

1/68 . for wholly or partially suppressing the carrier or one side band **[4]**

1/69 . *Spread spectrum techniques* **[6,2011.01]**

Note

When classifying in this group, any aspect of code division multiplexing, which is considered to represent information of interest for search, may also be classified in group H04J 13/00. **[2011.01]**

1/692 . . *Hybrid techniques using combinations of two or more spread spectrum techniques* **[2011.01]**

1/707 . . *using direct sequence modulation* **[6,2011.01]**

1/7073 . . . *Synchronisation aspects* **[2011.01]**

1/7075 . . . . *with code phase acquisition* **[2011.01]**

1/7077 . . . . . *Multi-step acquisition, e.g. multi-dwell, coarse-fine or validation* **[2011.01]**

1/708 . . . . . *Parallel implementation* **[2011.01]**

1/7083 . . . . *Cell search, e.g. using a three-step approach* **[2011.01]**

1/7085 . . . . *using a code tracking loop, e.g. a delay-locked loop* **[2011.01]**

1/7087 . . . . *Carrier synchronisation aspects* **[2011.01]**

1/709 . . . *Correlator structure* **[2011.01]**

1/7093 . . . . *Matched filter type* **[2011.01]**

1/7095 . . . . *Sliding correlator type* **[2011.01]**

1/7097 . . . *Interference-related aspects* **[2011.01]**

1/71 . . . . *the interference being narrowband interference* **[2011.01]**

1/7103 . . . . *the interference being multiple access interference* **[2011.01]**

1/7105 . . . . . *Joint detection techniques, e.g. linear detectors* **[2011.01]**

1/7107 . . . . . *Subtractive interference cancellation* **[2011.01]**

1/711 . . . . *the interference being multi-path interference* **[2011.01]**

1/7113 . . . . . *Determination of path profile* **[2011.01]**

1/7115 . . . . . *Constructive combining of multi-path signals, i.e. RAKE receivers* **[2011.01]**

1/7117 . . . . . *Selection, re-selection, allocation or re-allocation of paths to fingers, e.g. timing offset control of allocated fingers* **[2011.01]**

1/712 . . . . . *Weighting of fingers for combining, e.g. amplitude control or phase rotation using an inner loop* **[2011.01]**

1/713 . . *using frequency hopping* **[6,2011.01]**

1/7136 . . . *Arrangements for generation of hop frequencies, e.g. using a bank of frequency sources, using continuous tuning or using a transform* **[2011.01]**

1/7143 . . . *Arrangements for generation of hop patterns* **[2011.01]**

1/715 . . . *Interference-related aspects* **[2011.01]**

1/7156 . . . *Arrangements for sequence synchronisation* **[2011.01]**

1/7163 . . *using impulse radio* **[2011.01]**

1/717 . . . *Pulse-related aspects* **[2011.01]**

1/7176 . . . *Data mapping, e.g. modulation* **[2011.01]**

1/7183 . . . *Synchronisation* **[2011.01]**

1/719 . . . *Interference-related aspects* **[2011.01]**

1/72 . Circuits or components for simulating aerials, e.g. dummy aerial (dissipative waveguide terminations H01P 1/26)

1/74 . for increasing reliability, e.g. using redundant or spare channels or apparatus **[3]**

1/76 . Pilot transmitters or receivers for control of transmission or for equalising **[3]**

3/00 **Line transmission systems** (combined with near-field transmission systems H04B 5/00; constructional features of cables H01B 11/00)

3/02 . Details

3/03 . . Hybrid circuits (for transceivers H04B 1/52, H04B 1/58; hybrid junctions of the waveguide type H01P 5/16) **[3]**

3/04 . . Control of transmission; Equalising (control of amplification in general H03G)

3/06 . . . by the transmitted signal

3/08 . . . . in negative-feedback path of line amplifier

3/10 . . . by pilot signal

3/11 . . . . using pilot wire (H04B 3/12 take precedence) **[3]**

3/12 . . . . in negative-feedback path of line amplifier

3/14 . . . characterised by the equalising network used

3/16 . . . characterised by the negative-impedance network used

3/18 . . . . wherein the network comprises semiconductor devices

3/20 . . Reducing echo effects or singing; Opening or closing transmitting path; Conditioning for transmission in one direction or the other

3/21 . . . using a set of bandfilters **[3]**

3/23 . . . using a replica of transmitted signal in the time domain, e.g. echo cancellers **[3]**

3/26 . . Improving frequency characteristic by the use of loading coils (loading coils per se H01F 17/08)

3/28 . . Reducing interference caused by currents induced in cable sheathing or armouring

3/30 . . Reducing interference caused by unbalance current in a normally balanced line

3/32 . . Reducing cross-talk, e.g. by compensating

3/34 . . . by systematic interconnection of lengths of cable during laying; by addition of balancing components to cable during laying

3/36 . . Repeater circuits (H04B 3/58 takes precedence; amplifiers therefor H03F)

3/38 . . . for signals in two different frequency ranges transmitted in opposite directions over the same transmission path

3/40 . . Artificial lines; Networks simulating a line of certain length

3/42 . . Circuits for by-passing of ringing signals

3/44 . . Arrangements for feeding power to a repeater along the transmission line

3/46 . . Monitoring; Testing

3/48 . . . Testing attenuation

3/50 . Systems for transmission between fixed stations via two-conductor transmission lines (H04B 3/54 takes precedence)

3/52 . Systems for transmission between fixed stations via waveguides

3/54 . Systems for transmission via power distribution lines (in alarm signalling systems G08B 25/06; remote indication of power network conditions, remote control of switching means in a power distribution network H02J 13/00)

3/56 . . Circuits for coupling, blocking, or by-passing of signals

3/58 . . Repeater circuits (amplifiers therefor H03F)
3/60 . Systems for communication between relatively movable stations, e.g. for communication with lift (H04B 3/54 takes precedence)

5/00 Near-field transmission systems, e.g. inductive loop type
5/02 . using transceiver
5/04 . Calling systems, e.g. paging system
5/06 . using a portable transmitter associated with a microphone

7/00 Radio transmission systems, i.e. using radiation field (H04B 10/00, H04B 15/00 take precedence)
7/005 . Control of transmission; Equalising **[3]**
7/01 . Reducing phase shift **[3]**
7/015 . Reducing echo effects **[3]**
7/02 . Diversity systems (for direction finding G01S 3/72; aerial arrays or systems H01Q)
7/04 . . using a plurality of spaced independent aerials
7/06 . . . at transmitting station
7/08 . . . at receiving station
7/10 . . using a single aerial system characterised by its polarisation or directive properties, e.g. polarisation diversity, direction diversity
7/12 . . Frequency-diversity systems
7/14 . Relay systems (interrogator-responder radar systems G01S 13/74) **[2]**
7/145 . . Passive relay systems **[2]**
7/15 . . Active relay systems **[2]**
7/155 . . . Ground-based stations (H04B 7/204 takes precedence) **[2,5]**
7/165 . . . . employing angle modulation **[2]**
7/17 . . . . employing pulse modulation, e.g. pulse code modulation **[2]**
7/185 . . . Space-based or airborne stations (H04B 7/204 takes precedence) **[2,5]**
7/19 . . . . Earth-synchronous stations **[2]**
7/195 . . . . Non-synchronous stations **[2]**
7/204 . . . Multiple access **[5]**
7/208 . . . . Frequency-division multiple access **[5]**
7/212 . . . . Time-division multiple access **[5]**
7/216 . . . . Code-division or spread-spectrum multiple access (spread spectrum techniques in general H04B 1/69) **[5]**
7/22 . Scatter propagation systems
7/24 . for communication between two or more posts (wireless communication networks H04W) **[2]**
7/26 . . at least one of which is mobile **[2]**

10/00 Transmission systems employing beams of corpuscular radiation, or electromagnetic waves other than radio waves, e.g. light, infra-red (optical coupling, mixing or splitting G02B; light guides G02B 6/00; switching, modulation, demodulation of light beams G02B, G02F; devices or arrangements for the control, e.g. modulation, of light beams G02F 1/00; devices or arrangements for demodulating light, transferring the modulation or changing the frequency of light G02F 2/00; optical multiplex systems H04J 14/00) **[5]**
10/02 . Details **[5]**
10/04 . . Transmitters **[5]**
10/06 . . Receivers **[5]**
10/08 . . Equipment for monitoring, testing or fault measuring **[5]**
10/10 . Transmission through free space, e.g. through the atmosphere (H04B 10/22, H04B 10/24, H04B 10/30 take precedence) **[5,7]**
10/105 . . specially adapted for satellite links **[6]**
10/12 . Transmission through light guides, e.g. optical fibres (H04B 10/22, H04B 10/24, H04B 10/30 take precedence) **[5,7]**
10/13 . . using multimodal transmission **[6]**
10/135 . . using single mode transmission **[6]**
10/14 . . Terminal stations **[5]**
10/142 . . . Coherent homodyne or heterodyne systems **[6]**
10/145 . . . . Transmitters **[6]**
10/148 . . . . Receivers **[6]**
10/152 . . . Non-coherent direct-detection systems **[6]**
10/155 . . . . Transmitters **[6]**
10/158 . . . . Receivers **[6]**
10/16 . . Repeaters **[5]**
10/17 . . . in which processing or amplification is carried out without conversion of the signal from optical form **[6]**
10/18 . . Arrangements for reducing or eliminating distortion or dispersion, e.g. equalisers **[5]**
10/20 . . Arrangements for networking, e.g. bus or star coupling **[5]**
10/207 . . . using a star-type coupler **[6]**
10/213 . . . using a T-type coupler **[6]**
10/22 . Transmission between two stations which are mobile relative to each other (H04B 10/30 takes precedence) **[5,7]**
10/24 . Bidirectional transmission (H04B 10/22, H04B 10/30 take precedence) **[5,7]**
10/26 . . using a single light source for both stations involved **[6]**
10/28 . . using a single device as a light source or a light receiver **[6]**
10/30 . Transmission systems employing beams of corpuscular radiation (arrangements for handling beams of corpuscular radiation, e.g. focusing, moderating, G21K 1/00) **[7]**

11/00 Transmission systems employing ultrasonic, sonic or infrasonic waves

13/00 Transmission systems characterised by the medium used for transmission, not provided for in groups H04B 3/00 to H04B 11/00
13/02 . Transmission systems in which the medium consists of the earth or a large mass of water thereon, e.g. earth telegraphy (line transmission systems with earth or water return H04B 3/00)

14/00 Transmission systems not characterised by the medium used for transmission (details thereof H04B 1/00) **[4]**
14/02 . characterised by the use of pulse modulation (in radio transmission relays H04B 7/17) **[4]**
14/04 . . using pulse code modulation (analogue/digital or digital/analogue conversion H03M 1/00) **[4]**
14/06 . . using differential modulation, e.g. delta modulation (conversion of analogue values to or from differential modulation H03M 3/00) **[4]**
14/08 . characterised by the use of a sub-carrier **[4]**

15/00 **Suppression or limitation of noise or interference** (by means associated with receiver H04B 1/10)

15/02 . Reducing interference from electric apparatus by means located at or near the interfering apparatus (structural association with dynamo-electric machines H02K 11/00; screening H05K 9/00)

15/04 . . the interference being caused by substantially sinusoidal oscillations, e.g. in a receiver, in a tape-recorder (reducing parasitic oscillations H03B, H03F)

15/06 . . . by local oscillators of receivers

17/00 **Monitoring**; **Testing [2]**

17/02 . of relay systems **[2]**

H04H **BROADCAST COMMUNICATION** (multiplex communication H04J; pictorial communication aspects of broadcast systems H04N)

(1) In this subclass, the following terms or expressions are used with the meaning indicated: **[2008.01]**
- "broadcast" is simultaneous distribution of identical signals to plural receiving stations. The term "broadcast" does not include distribution to receiving stations which is controlled by requests or responses from the receiving stations; **[2008.01]**
- "broadcast information" covers all kinds of information distributed by broadcast systems; **[2008.01]**
- "broadcast-related information" is information required by services provided via broadcast systems, other than broadcast information; **[2008.01]**
- "broadcast time" is a time when particular broadcast information exists and is available; **[2008.01]**
- "broadcast channel" is a channel via which broadcast information is distributed, e.g. carrier waves, time slots, cables or wireless broadcast service areas; **[2008.01]**
- "broadcast space" is either a set of broadcast channels in which particular broadcast information exists and is available or a geographical area determined by the set of broadcast channels; **[2008.01]**
- "broadcast space-time" is space-time determined by broadcast space and broadcast time in which particular broadcast information exists and is available; **[2008.01]**
- "broadcast system" is a system which consists of transmitter, transponder and receiver for broadcast; **[2008.01]**
- "broadcast-related system" is a system which is directly affected by generation, broadcast, reception or use of broadcast information; **[2008.01]**
- "broadcast service" is a service directly provided by a broadcast system, i.e. distribution service of broadcast information; **[2008.01]**
- "broadcast-related service" is a service provided by broadcast-related systems; **[2008.01]**
- "A with a direct linkage to B" means that A directly affects B or that A is directly affected by B. **[2008.01]**

(2) In this subclass, multi-aspect classification is applied, so that subject matter characterised by aspects covered by more than one of its groups, which is considered to represent information of interest for search, may also be classified in each of those groups. **[2008.01]**

20/00 **Arrangements for broadcast or for distribution combined with broadcast [2008.01]**

20/02 . Arrangements for relaying broadcast information **[2008.01]**

20/04 . . from field pickup units [FPU] **[2008.01]**

20/06 . . among broadcast stations **[2008.01]**

20/08 . . among terminal devices **[2008.01]**

20/10 . Arrangements for replacing or switching information during the broadcast or during the distribution **[2008.01]**

20/12 . Arrangements for monitoring, testing or troubleshooting **[2008.01]**

20/14 . . for monitoring programmes **[2008.01]**

20/16 . Arrangements for broadcast or distribution of identical information repeatedly **[2008.01]**

20/18 . Arrangements for synchronising broadcast or distribution via plural systems **[2008.01]**

20/20 . Arrangements for broadcast or distribution of identical information via plural systems **[2008.01]**

20/22 . . Arrangements for broadcast of identical information via plural broadcast systems **[2008.01]**

20/24 . . Arrangements for distribution of identical information via broadcast system and non-broadcast system **[2008.01]**

20/26 . Arrangements for switching distribution systems **[2008.01]**

20/28 . Arrangements for simultaneous broadcast of plural pieces of information **[2008.01]**

20/30 . . by a single channel **[2008.01]**

20/31 . . . using in-band signals, e.g. subsonic or cue signal **[2008.01]**

20/33 . . by plural channels **[2008.01]**

20/34 . . . using an out-of-band subcarrier signal **[2008.01]**

20/36 . . for AM broadcasts **[2008.01]**

20/38 . Arrangements for distribution where lower stations, e.g. receivers, interact with the broadcast **[2008.01]**

20/40 . Arrangements for broadcast specially adapted for accumulation-type receivers **[2008.01]**

20/42 . Arrangements for resource management **[2008.01]**

20/44 . Arrangements characterised by circuits or components specially adapted for broadcast **[2008.01]**

20/46 . . specially adapted for broadcast systems covered by groups H04H 20/53 to H04H 20/86 **[2008.01]**

20/47 . . . specially adapted for stereophonic broadcast systems **[2008.01]**

20/48 . . . . for FM stereophonic broadcast systems **[2008.01]**

20/49 . . . . for AM stereophonic broadcast systems **[2008.01]**

20/51 . . . specially adapted for satellite broadcast systems **[2008.01]**

20/53 . Arrangements specially adapted for specific applications, e.g. for traffic information or for mobile receivers **[2008.01]**
20/55 . . for traffic information **[2008.01]**
20/57 . . for mobile receivers **[2008.01]**
20/59 . . for emergency or urgency **[2008.01]**
20/61 . . for local area broadcast, e.g. instore broadcast **[2008.01]**
20/62 . . . for transportation systems, e.g. in vehicles **[2008.01]**
20/63 . . . to plural spots in a confined site, e.g. MATV [Master Antenna Television] **[2008.01]**
20/65 . Arrangements characterised by transmission systems for broadcast **[2008.01]**
20/67 . . Common-wave systems, i.e. using separate transmitters operating on substantially the same frequency **[2008.01]**
20/69 . . Optical systems **[2008.01]**
20/71 . . Wireless systems **[2008.01]**
20/72 . . . of terrestrial networks **[2008.01]**
20/74 . . . of satellite networks **[2008.01]**
20/76 . . Wired systems **[2008.01]**
20/77 . . . using carrier waves **[2008.01]**
20/78 . . . . CATV [Community Antenna Television] systems **[2008.01]**
20/79 . . . . . using downlink of the CATV systems, e.g. audio broadcast via CATV network **[2008.01]**
20/80 . . . . having frequencies in two or more frequency bands, e.g. medium wave and VHF **[2008.01]**
20/81 . . . . combined with telephone network over which the broadcast is continuously available **[2008.01]**
20/82 . . . using signals not modulated onto a carrier **[2008.01]**
20/83 . . . . not sharing the network with any other service **[2008.01]**
20/84 . . . combined with power distribution network **[2008.01]**
20/86 . Arrangements characterised by special technical features of the broadcast information, e.g. signal form or information format **[2008.01]**
20/88 . . Stereophonic broadcast systems **[2008.01]**
20/89 . . . using three or more audio channels, e.g. triphonic or quadraphonic **[2008.01]**
20/91 . . broadcasting computer programmes **[2008.01]**
20/93 . . which locates resources of other pieces of information, e.g. URL [Uniform Resource Locator] **[2008.01]**
20/95 . . characterised by a specific format, e.g. MP3 [MPEG-1 Audio Layer 3] **[2008.01]**

40/00 Arrangements specially adapted for receiving broadcast information [2008.01]

40/09 . Arrangements for receiving desired information automatically according to timetables **[2008.01]**
40/18 . Arrangements characterised by circuits or components specially adapted for receiving **[2008.01]**
40/27 . . specially adapted for broadcast systems covered by groups H04H 20/53 to H04H 20/86 **[2008.01]**
40/36 . . . specially adapted for stereophonic broadcast receiving **[2008.01]**
40/45 . . . . for FM stereophonic broadcast receiving **[2008.01]**
40/54 . . . . . generating subcarriers **[2008.01]**
40/63 . . . . . for separation improvements or adjustments **[2008.01]**
40/72 . . . . . for noise suppression **[2008.01]**
40/81 . . . . . for stereo-monaural switching **[2008.01]**
40/90 . . . specially adapted for satellite broadcast receiving **[2008.01]**

60/00 Arrangements for broadcast applications with a direct linkage to broadcast information or to broadcast space-time; **Broadcast-related systems [2008.01]**

60/02 . Arrangements for generating broadcast information; Arrangements for generating broadcast-related information with a direct linkage to broadcast information or to broadcast space-time; Arrangements for simultaneous generation of broadcast information and broadcast-related information **[2008.01]**
60/04 . . Studio equipment; Interconnection of studios **[2008.01]**
60/05 . . . Mobile studios **[2008.01]**
60/06 . . Arrangements for scheduling broadcast services or broadcast-related services **[2008.01]**
60/07 . . characterised by processes or methods for the generation **[2008.01]**
60/09 . Arrangements for device control with a direct linkage to broadcast information or to broadcast space-time; Arrangements for control of broadcast-related services **[2008.01]**
60/11 . . Arrangements for counter-measures when a portion of broadcast information is unavailable **[2008.01]**
60/12 . . . wherein another information is substituted for the portion of broadcast information **[2008.01]**
60/13 . . Arrangements for device control affected by the broadcast information **[2008.01]**
60/14 . . Arrangements for conditional access to broadcast information or to broadcast-related services **[2008.01]**
60/15 . . . on receiving information **[2008.01]**
60/16 . . . on playing information **[2008.01]**
60/17 . . . on recording information **[2008.01]**
60/18 . . . on copying information **[2008.01]**
60/19 . . . on transmission of information **[2008.01]**
60/20 . . . on secondary editing information **[2008.01]**
60/21 . . . Billing for the use of broadcast information or broadcast-related information **[2008.01]**
60/22 . . . . per use **[2008.01]**
60/23 . . . using cryptography, e.g. encryption, authentication or key distribution **[2008.01]**
60/25 . Arrangements for updating broadcast information or broadcast-related information **[2008.01]**
60/27 . Arrangements for recording or accumulating broadcast information or broadcast-related information **[2008.01]**
60/29 . Arrangements for monitoring broadcast services or broadcast-related services **[2008.01]**
60/31 . . Arrangements for monitoring the use made of the broadcast services **[2008.01]**
60/32 . . Arrangements for monitoring conditions of receiving stations, e.g. malfunction or breakdown of receiving stations **[2008.01]**
60/33 . . Arrangements for monitoring the users' behaviour or opinions **[2008.01]**

60/35 . Arrangements for identifying or recognising characteristics with a direct linkage to broadcast information or to broadcast space-time, e.g. for identifying broadcast stations or for identifying users **[2008.01]**
60/37 . . for identifying segments of broadcast information, e.g. scenes or extracting programme ID **[2008.01]**
60/38 . . for identifying broadcast time or space **[2008.01]**
60/39 . . . for identifying broadcast space-time (use of Electronic Programme Guides H04H 60/72) **[2008.01]**
60/40 . . . for identifying broadcast time **[2008.01]**
60/41 . . . for identifying broadcast space, i.e. broadcast channels, broadcast stations or broadcast areas **[2008.01]**
60/42 . . . . for identifying broadcast areas **[2008.01]**
60/43 . . . . for identifying broadcast channels **[2008.01]**
60/44 . . . . for identifying broadcast stations **[2008.01]**
60/45 . . for identifying users **[2008.01]**
60/46 . . for recognising users' preferences **[2008.01]**
60/47 . . for recognising genres **[2008.01]**
60/48 . . for recognising items expressed in broadcast information **[2008.01]**
60/49 . . for identifying locations **[2008.01]**
60/50 . . . of broadcast or relay stations **[2008.01]**
60/51 . . . of receiving stations **[2008.01]**
60/52 . . . of users **[2008.01]**
60/53 . . . of destinations **[2008.01]**
60/54 . . . where broadcast information is generated **[2008.01]**
60/56 . Arrangements characterised by components specially adapted for monitoring, identification or recognition covered by groups H04H 60/29 or H04H 60/35 **[2008.01]**
60/58 . . of audio **[2008.01]**
60/59 . . of video **[2008.01]**
60/61 . Arrangements for services using the result of monitoring, identification or recognition covered by groups H04H 60/29 or H04H 60/35 **[2008.01]**
60/63 . . for services of sales **[2008.01]**
60/64 . . for providing detail information **[2008.01]**
60/65 . . for using the result on users' side **[2008.01]**
60/66 . . for using the result on distributors' side **[2008.01]**
60/68 . Systems specially adapted for using specific information, e.g. geographical or meteorological information **[2008.01]**
60/70 . . using geographical information, e.g. maps, charts or atlases **[2008.01]**
60/71 . . using meteorological information **[2008.01]**
60/72 . . using EPGs [Electronic Programme Guides] (focusing on identifying broadcast space-time H04H 60/39) **[2008.01]**
60/73 . . using meta-information **[2008.01]**
60/74 . . . using programme related information, e.g. title, composer or interpreter **[2008.01]**
60/76 . Arrangements characterised by transmission systems other than for broadcast, e.g. the Internet **[2008.01]**
60/78 . . characterised by source locations or destination locations **[2008.01]**
60/79 . . . characterised by transmission among broadcast stations **[2008.01]**
60/80 . . . characterised by transmission among terminal devices **[2008.01]**
60/81 . . characterised by the transmission system itself **[2008.01]**
60/82 . . . the transmission system being the Internet **[2008.01]**
60/83 . . . . accessed over telephonic networks **[2008.01]**
60/84 . . . . . which are fixed telephone networks **[2008.01]**
60/85 . . . . . which are mobile communication networks **[2008.01]**
60/86 . . . . accessed over CATV networks **[2008.01]**
60/87 . . . . accessed over computer networks **[2008.01]**
60/88 . . . . . which are wireless networks **[2008.01]**
60/89 . . . . . which are wired networks **[2008.01]**
60/90 . . . Wireless transmission systems **[2008.01]**
60/91 . . . . Mobile communication networks (for accessing the Internet H04H 60/85) **[2008.01]**
60/92 . . . . for local area **[2008.01]**
60/93 . . . Wired transmission systems **[2008.01]**
60/94 . . . . Telephonic networks (for accessing the Internet H04H 60/84) **[2008.01]**
60/95 . . . . for local area **[2008.01]**
60/96 . . . . CATV systems (for accessing the Internet H04H 60/86) **[2008.01]**
60/97 . . . . . using uplink of the CATV systems **[2008.01]**
60/98 . . . Physical distribution of media, e.g. postcards, CDs or DVDs **[2008.01]**

H04J **MULTIPLEX COMMUNICATION** (peculiar to transmission of digital information H04L 5/00; systems for the simultaneous or sequential transmission of more than one television signal H04N 7/08; in exchanges H04Q 11/00)

Note

This subclass covers:
– circuits or apparatus for combining or dividing signals for the purpose of transmitting them simultaneously or sequentially over the same transmission path;
– monitoring arrangements therefor.

1/00 **Frequency-division multiplex systems** (H04J 14/02 takes precedence) **[5]**
1/02 . Details
1/04 . . Frequency-transposition arrangements
1/05 . . . using digital techniques **[3]**
1/06 . . Arrangements for supplying the carrier waves
1/08 . . Arrangements for combining channels
1/10 . . Intermediate station arrangements, e.g. for branching, for tapping-off
1/12 . . Arrangements for reducing cross-talk between channels

1/14 . . Arrangements providing for calling or supervisory signals
1/16 . . Monitoring arrangements
1/18 . in which all the carriers are amplitude-modulated (H04J 1/02 takes precedence) **[3]**
1/20 . in which at least one carrier is angle-modulated (H04J 1/02 takes precedence) **[3]**

3/00 **Time-division multiplex systems** (H04J 14/08 takes precedence) **[4,5]**
3/02 . Details
3/04 . . Distributors combined with modulators or demodulators
3/06 . . Synchronising arrangements
3/07 . . . using pulse stuffing for systems with different or fluctuating information rates **[3]**
3/08 . . Intermediate station arrangements, e.g. for branching, for tapping-off
3/10 . . Arrangements for reducing cross-talk between channels
3/12 . . Arrangements providing for calling or supervisory signals
3/14 . . Monitoring arrangements
3/16 . in which the time allocation to individual channels within a transmission cycle is variable, e.g. to accommodate varying complexity of signals, to vary number of channels transmitted (H04J 3/17, H04J 3/24 take precedence) **[4]**
3/17 . in which the transmission channel allotted to a first user may be taken away and re-allotted to a second user if the first user becomes inactive, e.g. TASI **[4]**
3/18 . using frequency compression and subsequent expansion of the individual signals
3/20 . using resonant transfer **[2]**
3/22 . in which the sources have different rates or codes **[4]**
3/24 . in which the allocation is indicated by an address (H04J 3/17 takes precedence) **[4]**
3/26 . . in which the information and the address are simultaneously transmitted **[4]**

4/00 **Combined time-division and frequency-division multiplex systems** (H04J 13/00 takes precedence) **[2]**

7/00 **Multiplex systems in which the amplitudes or durations of the signals in individual channels are characteristic of those channels**
7/02 . in which the polarity of the amplitude is characteristic

9/00 **Multiplex systems in which each channel is represented by a different type of modulation of the carrier**

11/00 **Orthogonal multiplex systems** (H04J 13/00 takes precedence) **[2]**

13/00 ***Code division multiplex systems*** *(for frequency hopping H04B 1/713)* **[2,2011.01]**

Note

When classifying in this group, any aspect of spread spectrum techniques not specific to frequency hopping, and which is considered to represent information of interest for search, may also be classified in group H04B 1/69. **[2011.01]**

13/10 . *Code generation* **[2011.01]**
13/12 . . *Generation of orthogonal codes* **[2011.01]**
13/14 . . *Generation of codes with a zero correlation zone* **[2011.01]**
13/16 . *Code allocation* **[2011.01]**
13/18 . . *Allocation of orthogonal codes* **[2011.01]**
13/20 . . . *having an orthogonal variable spreading factor [OVSF]* **[2011.01]**
13/22 . . *Allocation of codes with a zero correlation zone* **[2011.01]**

14/00 **Optical multiplex systems [5]**
14/02 . Wavelength-division multiplex systems **[5]**
14/04 . Mode multiplex systems **[5]**
14/06 . Polarisation multiplex systems **[5]**
14/08 . Time-division multiplex systems **[5]**

99/00 **Subject matter not provided for in other groups of this subclass [2009.01]**

H04K SECRET COMMUNICATION; JAMMING OF COMMUNICATION

Note

In this subclass, the following expression is used with the meaning indicated:
– "secret communication" includes secret line and radiation transmission systems, i.e. those in which apparatus at the transmitting station modifies the signal in such a way that the information cannot be intelligibly received without corresponding modifying apparatus at the receiving station.

1/00 **Secret communication** (ciphering or deciphering apparatus per se G09C; systems with reduced bandwidth or suppressed carrier H04B 1/66; spread spectrum techniques H04B 1/69; by using a sub-carrier H04B 14/08; by multiplexing H04J; transmission systems for secret digital information H04L 9/00; secret or subscription television systems H04N 7/16, H04N 21/00)
1/02 . by adding a second signal to make the desired signal unintelligible
1/04 . by frequency scrambling, i.e. by transposing or inverting parts of the frequency band or by inverting the whole band
1/06 . by transmitting the information or elements thereof at unnatural speeds or in jumbled order or backwards
1/08 . by varying the polarisation of transmitted waves
1/10 . by using two signals transmitted simultaneously or successively

3/00 **Jamming of communication**; **Counter-measures** (counter-measures used in radar or analogous systems G01S 7/00)

H04L **TRANSMISSION OF DIGITAL INFORMATION, E.G. TELEGRAPHIC COMMUNICATION** (typewriters B41J; order telegraphs, fire or police telegraphs G08B; visual telegraphy G08B, G08C; teleautographic systems G08C; ciphering or deciphering apparatus per se G09C; coding, decoding or code conversion, in general H03M; arrangements common to telegraphic and telephonic communication H04M; selecting H04Q; wireless communication networks H04W) **[4]**

Note

This subclass covers transmission of signals having been supplied in digital form and includes data transmission, telegraphic communication, or methods or arrangements for monitoring.

Subclass index

1/00 **Arrangements for detecting or preventing errors in the information received** (correcting synchronisation H04L 7/00; arrangements in the transmission path H04B)

1/02 . by diversity reception (in general H04B 7/02)
1/04 . . using frequency diversity
1/06 . . using space diversity
1/08 . by repeating transmission, e.g. Verdan system
1/12 . by using return channel
1/14 . . in which the signals are sent back to the transmitter to be checked
1/16 . . in which the return channel carries supervisory signals, e.g. repetition request signals
1/18 . . . Automatic repetition systems, e.g. van Duuren system
1/20 . using signal-quality detector **[3]**
1/22 . using redundant apparatus to increase reliability **[3]**
1/24 . Testing correct operation **[3]**

5/00 **Arrangements affording multiple use of the transmission path** (multiplex communication in general H04J)

5/02 . Channels characterised by the type of signal
5/04 . . the signals being represented by different amplitudes or polarities, e.g. quadriplex
5/06 . . the signals being represented by different frequencies (combined with time-division multiplexing H04L 5/26)
5/08 . . . each combination of signals in different channels being represented by a fixed frequency
5/10 . . . with dynamo-electric generation of carriers; with mechanical filters or demodulators
5/12 . . the signals being represented by different phase modulations of a single carrier
5/14 . Two-way operation using the same type of signal, i.e. duplex (conditioning for two-way transmission in general H04B 3/20)
5/16 . . Half-duplex systems; Simplex/duplex switching; Transmission of break signals
5/18 . . Automatic changing of the traffic direction
5/20 . using different combinations of lines, e.g. phantom working
5/22 . using time-division multiplexing
5/24 . . with start-stop synchronous converters
5/26 . . combined with the use of different frequencies

7/00 **Arrangements for synchronising receiver with transmitter**

7/02 . Speed or phase control by the received code signals, the signals containing no special synchronisation information
7/027 . . extracting the synchronising or clock signal from the received signal spectrum, e.g. by using a resonant or bandpass circuit **[5]**
7/033 . . using the transitions of the received signal to control the phase of the synchronising-signal-generating means, e.g. using a phase-locked loop **[5]**
7/04 . Speed or phase control by synchronisation signals
7/06 . . the synchronisation signals differing from the information signals in amplitude, polarity, or frequency
7/08 . . the synchronisation signals recurring cyclically
7/10 . . Arrangements for initial synchronisation

9/00 **Arrangements for secret or secure communication** (spread spectrum techniques H04B 1/69)

Note

In group H04L 9/06 to H04L 9/32, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[5]**

9/06 . the encryption apparatus using shift registers or memories for blockwise coding, e.g. D.E.S. systems **[5]**
9/08 . . Key distribution **[5]**
9/10 . with particular housing, physical features or manual controls **[5]**
9/12 . Transmitting and receiving encryption devices synchronised or initially set up in a particular manner **[5]**
9/14 . using a plurality of keys or algorithms **[5]**
9/16 . . the keys or algorithms being changed during operation **[5]**

9/18 . Encryption by serially and continuously modifying data stream elements, e.g. stream cipher systems **[5]**
9/20 . . Pseudorandom key sequence combined element-for-element with data sequence **[5]**
9/22 . . . with particular pseudorandom sequence generator **[5]**
9/24 . . . . sequence produced by more than one generator **[5]**
9/26 . . . . producing a nonlinear pseudorandom sequence **[5]**
9/28 . using particular encryption algorithm **[5]**
9/30 . . Public key, i.e. encryption algorithm being computationally infeasible to invert and users' encryption keys not requiring secrecy **[5]**
9/32 . including means for verifying the identity or authority of a user of the system (security arrangements for protecting computers or computer systems against unauthorised activity G06F 21/00; dispensing apparatus actuated by coded identity card or credit card G07F 7/08; specially adapted for wireless communication networks H04W 12/00) **[5]**
9/34 . Bits, or blocks of bits, of the telegraphic message being interchanged in time **[5]**
9/36 . with means for detecting characters not meant for transmission **[5]**
9/38 . Encryption being effected by mechanical apparatus, e.g. rotating cams, switches, keytape punchers **[5]**

12/00 **Data switching networks** (interconnection of, or transfer of information or other signals between, memories, input/output devices or central processing units G06F 13/00) **[5]**
12/02 . Details **[5]**
12/04 . . Switchboards **[5]**
12/06 . . Answer-back mechanisms or circuits **[5]**
12/08 . . Allotting numbers to messages; Counting characters, words or messages **[5]**
12/10 . . Current supply arrangements **[5]**
12/12 . . Arrangements for remote connection or disconnection of substations or of equipment thereof **[5]**
12/14 . . Charging arrangements **[5]**
12/16 . . Arrangements for providing special services to substations **[5]**
12/18 . . . for broadcast or conference **[5]**
12/20 . . . for converting transmission speed from the inherent speed of a substation to the inherent speed of other substations **[5]**
12/22 . . Arrangements for preventing the taking of data from a data transmission channel without authorisation (means for verifying the identity or the authority of a user of a secure or secret communication system H04L 9/32) **[5]**
12/24 . . Arrangements for maintenance or administration **[5]**
12/26 . . Monitoring arrangements; Testing arrangements **[5]**
12/28 . characterised by path configuration, e.g. LAN [Local Area Networks] or WAN [Wide Area Networks] (wireless communication networks H04W) **[5,6]**
12/40 . . Bus networks **[5,6]**
12/403 . . . with centralised control, e.g. polling **[6]**
12/407 . . . with decentralised control **[6]**
12/413 . . . . with random access, e.g. carrier-sense multiple-access with collision detection (CSMA-CD) **[6]**
12/417 . . . . with deterministic access, e.g. token passing **[6]**
12/42 . . Loop networks **[5,6]**
12/423 . . . with centralised control, e.g. polling **[6]**
12/427 . . . with decentralised control **[6]**
12/43 . . . . with synchronous transmission, e.g. time division multiplex (TDM), slotted rings **[6]**
12/433 . . . . with asynchronous transmission, e.g. token ring, register insertion **[6]**
12/437 . . . Ring fault isolation or reconfiguration **[6]**
12/44 . . Star or tree networks **[5,6]**
12/46 . . Interconnection of networks **[5,6]**
12/50 . Circuit switching systems, i.e. systems in which the path is physically permanent during the communication **[5,6]**
12/52 . . using time division techniques (in digital transmission systems H04L 5/22) **[5,6]**
12/54 . Stored and forward switching systems **[5,6]**
12/56 . . Packet switching systems **[5,6]**
12/58 . . Message switching systems (permutation- code selecting H04Q 3/02) **[5,6]**
12/60 . . . Manual relay systems, e.g. push-button switching **[5,6]**
12/62 . . . . with perforated tape storage **[5,6]**
12/64 . Hybrid switching systems **[5,6]**
12/66 . Arrangements for connecting between networks having differing types of switching systems, e.g. gateways **[5,6]**

13/00 **Details of the apparatus or circuits covered by groups H04L 15/00 or H04L 17/00**
13/02 . Details not particular to receiver or transmitter
13/04 . . Driving mechanisms; Clutches (in general F16)
13/06 . . Tape or page guiding or feeding devices
13/08 . . Intermediate storage means
13/10 . . Distributors
13/12 . . . Non-mechanical distributors, e.g. relay distributors
13/14 . . . . Electronic distributors (in general H03K 17/00)
13/16 . of transmitters, e.g. code-bars, code-discs
13/18 . of receivers

15/00 **Apparatus or local circuits for transmitting or receiving dot-and-dash codes, e.g. Morse code** (teaching apparatus therefor G09B; keyboard switches in general H01H 13/70, H03K 17/94; telegraph tapping keys H01H 21/86; coding in connection with keyboards or like devices, in general H03M 11/00)
15/03 . Keys structurally combined with sound generators **[2]**
15/04 . Apparatus or circuits at the transmitting end
15/06 . . with a restricted number of keys, e.g. separate key for each type of code element
15/08 . . . with a single key which transmits dots in one position and dashes in a second position
15/10 . . . combined with perforating apparatus
15/12 . . with keyboard co-operating with code-bars
15/14 . . . combined with perforating apparatus
15/16 . . with keyboard co-operating with code discs
15/18 . . Automatic transmitters, e.g. controlled by perforated tape
15/20 . . . with optical sensing means
15/22 . . Apparatus or circuits for sending one or a restricted number of signals, e.g. distress signals
15/24 . Apparatus or circuits at the receiving end

15/26 . . operating only on reception of predetermined code signals, e.g. distress signals, party-line call signals
15/28 . . Code reproducing apparatus
15/30 . . . Writing recorders
15/32 . . . Perforating recorders
15/34 . . Apparatus for recording received coded signals after translation, e.g. as type-characters

17/00 Apparatus or local circuits for transmitting or receiving codes wherein each character is represented by the same number of equal-length code elements, e.g. Baudot code (keyboard switches in general H01H 13/70, H03K 17/94; coding in connection with keyboards or like devices, in general H03M 11/00)
17/02 . Apparatus or circuits at the transmitting end
17/04 . . with keyboard co-operating with code-bars
17/06 . . . Contact operating means
17/08 . . . combined with perforating apparatus
17/10 . . with keyboard co-operating with code-discs
17/12 . . Automatic transmitters, e.g. controlled by perforated tape
17/14 . . . with optical sensing means
17/16 . Apparatus or circuits at the receiving end
17/18 . . Code selection mechanisms
17/20 . . using perforating recorders
17/22 . . using mechanical translation and type-bar printing
17/24 . . using mechanical translation and type-head printing, e.g. type-wheel, type-cylinder
17/26 . . using aggregate motion translation
17/28 . . using pneumatic or hydraulic translation
17/30 . . using electric or electronic translation

19/00 Apparatus or local circuits for step-by-step systems

21/00 Apparatus or local circuits for mosaic printer telegraph systems
21/02 . at the transmitting end
21/04 . at the receiving end

23/00 Apparatus or local circuits for systems other than those covered by groups H04L 15/00 to H04L 21/00
23/02 . adapted for orthogonal signalling **[2]**

25/00 Baseband systems
25/02 . Details (circuits in general for handling pulses H03K; in line transmission systems in general H04B 3/02)
25/03 . . Shaping networks in transmitter or receiver, e.g. adaptive shaping networks (impedance networks per se H03H) **[2]**
25/04 . . . Passive shaping networks **[2]**
25/05 . . Electric or magnetic storage of signals before transmitting or retransmitting for changing the transmission rate **[7]**
25/06 . . Dc level restoring means; Bias distortion correction
25/08 . . Modifications for reducing interference; Modifications for reducing effects due to line faults
25/10 . . Compensating for variations in line balance
25/12 . . Compensating for variations in line impedance
25/14 . . Channel dividing arrangements
25/17 . . Interpolating arrangements **[4]**
25/18 . . Arrangements for inductively generating telegraphic signals (induction coil interrupters H01H 51/34; dynamo-electric generators H02K)
25/20 . . Repeater circuits; Relay circuits
25/22 . . . Repeaters for converting two wires to four wires (in general H04B); Repeaters for converting single current to double current
25/24 . . . Relay circuits using discharge tubes or semiconductor devices
25/26 . . . Circuits with optical sensing means
25/28 . . . Repeaters using modulation and subsequent demodulation
25/30 . Non-synchronous systems
25/32 . . characterised by the code employed
25/34 . . . using three or more different amplitudes, e.g. cable code
25/38 . Synchronous or start-stop systems, e.g. for Baudot code
25/40 . . Transmitting circuits; Receiving circuits (repeater circuits, relay circuits H04L 25/52)
25/42 . . . using mechanical distributors
25/44 . . . using relay distributors
25/45 . . . using electronic distributors (electronic distributors in general H03K 17/00) **[2]**
25/46 . . . using tuning forks or vibrating reeds
25/48 . . . characterised by the code employed (H04L 25/49 takes precedence) **[2]**
25/49 . . . using code conversion at the transmitter; using predistortion; using insertion of idle bits for obtaining a desired frequency spectrum; using three or more amplitude levels **[2]**
25/493 . . . . by transition coding, i.e. the time-position or direction of a transition being encoded before transmission **[3]**
25/497 . . . . by correlative coding, e.g. partial response coding or echo modulation coding **[3]**
25/52 . . Repeater circuits; Relay circuits
25/54 . . . using mechanical distributors
25/56 . . . Non-electrical regenerative repeaters
25/58 . . . using relay distributors
25/60 . . . Regenerative repeaters with electromagnetic switches
25/62 . . . using tuning forks or vibrating reeds
25/64 . . . Start-stop regenerative repeaters using discharge tubes or semiconductor devices
25/66 . . . Synchronous repeaters using discharge tubes or semiconductor devices

27/00 Modulated-carrier systems
27/01 . Equalisers **[5]**
27/02 . Amplitude-modulated carrier systems, e.g. using on/off keying; Single sideband or vestigial sideband modulation (H04L 27/32 takes precedence) **[2,5]**
27/04 . . Modulator circuits (in general H03C); Transmitter circuits
27/06 . . Demodulator circuits (in general H03D); Receiver circuits
27/08 . . Amplitude regulation arrangements
27/10 . Frequency-modulated carrier systems, i.e. using frequency-shift keying (H04L 27/32 takes precedence) **[5]**
27/12 . . Modulator circuits (in general H03C); Transmitter circuits
27/14 . . Demodulator circuits (in general H03D); Receiver circuits
27/144 . . . with demodulation using spectral properties of the received signal, e.g. by using frequency selective- or frequency sensitive elements **[6]**
27/148 . . . . using filters, including PLL-type filters **[6]**
27/152 . . . . using controlled oscillators, e.g. PLL arrangements **[6]**

27/156 . . . with demodulation using temporal properties of the received signal, e.g. detecting pulse width **[6]**
27/16 . . Frequency regulation arrangements
27/18 . Phase-modulated carrier systems, i.e. using phase-shift keying (H04L 27/32 takes precedence) **[5]**
27/20 . . Modulator circuits (in general H03C); Transmitter circuits
27/22 . . Demodulator circuits (in general H03D); Receiver circuits
27/227 . . . using coherent demodulation **[6]**
27/233 . . . using non-coherent demodulation **[6]**
27/24 . . Half-wave signalling systems
27/26 . Systems using multi-frequency codes (H04L 27/32 takes precedence) **[5]**
27/28 . . with simultaneous transmission of different frequencies each representing one code element
27/30 . . wherein each code element is represented by a combination of frequencies
27/32 . Carrier systems characterised by combinations of two or more of the types covered by groups H04L 27/02, H04L 27/10, H04L 27/18, or H04L 27/26 **[5]**
27/34 . . Amplitude- and phase-modulated carrier systems, e.g. quadrature-amplitude modulated carrier systems **[5]**
27/36 . . . Modulator circuits; Transmitter circuits **[5]**
27/38 . . . Demodulator circuits; Receiver circuits **[5]**

29/00 Arrangements, apparatus, circuits or systems, not covered by a single one of groups H04L 1/00 to H04L 27/00 (interconnection of, or transfer of information or other signals between, memories, input/output devices or central processing units G06F 13/00) **[5]**
29/02 . Communication control; Communication processing (H04L 29/12, H04L 29/14 take precedence) **[5]**
29/04 . . for plural communication lines **[5]**
29/06 . . characterised by a protocol **[5]**
29/08 . . . Transmission control procedure, e.g. data link level control procedure **[5]**
29/10 . . characterised by an interface, e.g. the interface between the data link level and the physical level **[5]**
29/12 . characterised by the data terminal **[5]**
29/14 . Counter-measures to a fault **[5]**

H04M TELEPHONIC COMMUNICATION (circuits for controlling other apparatus <u>via</u> a telephone cable and not involving telephone switching apparatus G08)

(1) This subclass <u>covers</u> :
– telephonic communication systems combined with other electrical systems;
– testing arrangements specially adapted for telephonic communication systems.
(2) In this subclass, the following terms or expressions are used with the meanings indicated:
– "subscriber" is a general term for terminal equipment, e.g. telephones for public use;
– "substation" means subscriber or monitoring equipment which may connect a single subscriber to a line without choice as to subscriber;
– "satellite" is a type of exchange the operation of which depends upon control signals received from a supervisory exchange;
– "switching centres" includes exchanges and satellites.

<u>Subclass index</u>

1/00 Substation equipment, e.g. for use by subscribers (subscriber services or facilities provided at exchanges H04M 3/00; prepayment telephone coin boxes H04M 17/00; current supply arrangements H04M 19/08) **[1,7]**
1/02 . Constructional features of telephone sets
1/03 . . Constructional features of telephone transmitters or receivers, e.g. telephone hand-sets **[2]**
1/04 . . Supports for telephone transmitters or receivers
1/05 . . . specially adapted for use on head, throat or breast
1/06 . . . Hooks; Cradles
1/08 . . . . associated with switches operated by the weight of the receiver or hand-set
1/10 . . . . associated with switches operated by magnetic effect due to proximity of receiver or hand-set
1/11 . . Supports for sets, e.g. incorporating armrests
1/12 . . . Adjustable supports, e.g. extensible
1/13 . . . . pantographic
1/14 . . . with resilient means to eliminate extraneous vibrations
1/15 . . Protecting or guiding telephone cords **[5]**
1/17 . . Hygienic or sanitary devices on telephone equipment (for mouthpieces or earpieces H04R 1/12) **[2]**
1/18 . . Telephone sets specially adapted for use in ships, mines, or other places exposed to adverse environment (H04M 1/19 takes precedence)

1/19 . . Arrangements of transmitters, receivers, or complete sets to prevent eavesdropping, to attenuate local noise or to prevent undesired transmission; Mouthpieces or receivers specially adapted therefor (circuit arrangements for preventing eavesdropping H04M 1/68; telephone cabinets E04H 1/14)

1/20 . . Arrangements for preventing acoustic feedback (H04M 1/62 takes precedence)

1/21 . . Combinations with auxiliary equipment, e.g. with clocks or memoranda pads

1/215 . . . by non-intrusive coupling means, e.g. acoustic couplers **[7]**

1/22 . . Illumination; Arrangements for improving the visibility of characters on dials

1/23 . . Construction or mounting of dials or of equivalent devices; Means for facilitating the use thereof (by improving visibility H04M 1/22)

1/24 . Arrangements for testing

1/247 . Telephone sets including user guidance or feature selection means facilitating their use **[7]**

1/253 . Telephone sets using digital voice transmission **[7]**

1/26 . Devices for calling a subscriber (H04M 1/66 takes precedence) **[1,7]**

1/27 . . Devices whereby a plurality of signals may be stored simultaneously **[2]**

1/272 . . . with provision for storing only one subscriber number at a time, e.g. by keyboard or dial **[2]**

1/274 . . . with provision for storing more than one subscriber number at a time **[2]**

1/2745 . . . . using static electronic memories, i.e. memories whose operation does not require relative movement between storage means and a transducer, e.g. chips **[7]**

1/275 . . . . . implemented by means of portable electronic directories **[7]**

1/2755 . . . . . whose contents are provided by optical scanning **[7]**

1/276 . . . . using magnetic recording, e.g. on tape **[2]**

1/278 . . . . using punched cards or tapes **[2]**

1/30 . . Devices which can set up and transmit only one digit at a time

1/31 . . . by interrupting current to generate trains of pulses; by periodically opening and closing contacts to generate trains of pulses **[2]**

1/315 . . . . Clutches, spring assemblies, speed regulators, e.g. centrifugal brakes (H04M 1/32 to H04M 1/40 take precedence) **[3]**

1/32 . . . . Locking setting devices during transmission to prevent interference by user

1/34 . . . . Lost-motion or other arrangements for ensuring a pause between successive digit transmissions

1/38 . . . . Pulses transmitted by a movement variably limited by the setting of a stop

1/40 . . . . wherein the setting-operation short-circuits or open-circuits the transmitting mechanism during a variable part of a cycle

1/50 . . . by generating or selecting currents of predetermined frequencies or combinations of frequencies **[2]**

1/515 . . by generating or selecting signals other than trains of pulses of similar shape, or signals other than currents of one or more different frequencies, e.g. generation of dc signals of alternating polarity, coded pulses or impedance dialling **[2]**

1/52 . . Arrangements wherein a dial or the like is mechanically coupled to a line selector

1/53 . . Generation of additional signals, e.g. additional pulses **[2]**

1/54 . . . Arrangements wherein a dial or the like generates identifying signals, e.g. in party-line systems **[2]**

1/56 . Arrangements for indicating or recording the called number at the calling subscriber's set

1/57 . Arrangements for indicating or recording the number of the calling subscriber at the called subscriber's set (at the operator set in a manual exchange H04M 5/20) **[2]**

1/58 . Anti-side-tone circuits

1/60 . including speech amplifiers

1/62 . . Constructional arrangements

1/64 . Automatic arrangements for answering calls; Automatic arrangements for recording messages for absent subscribers; Arrangements for recording conversations (centralised dictation systems H04M 11/10) **[1,7]**

1/65 . . Recording arrangements **[2,7]**

1/652 . . . Means for playing back the recorded messages by remote control over a telephone line (H04M 1/658 takes precedence) **[7]**

1/654 . . . Telephone line monitoring circuits therefor, e.g. ring detectors **[7]**

1/656 . . . for recording conversations **[7]**

1/658 . . . Means for redirecting recorded messages to other extensions or equipment **[7]**

1/66 . with means for preventing unauthorised or fraudulent calling (verifying user identity or authority in secret or secure digital communications H04L 9/32) **[1,7]**

1/663 . . Preventing unauthorised calls to a telephone set **[7]**

1/665 . . . by checking the validity of a code **[7]**

1/667 . . Preventing unauthorised calls from a telephone set (H04M 1/677 takes precedence) **[7]**

1/67 . . . by electronic means **[7]**

1/673 . . . . the user being required to key in a code **[7]**

1/675 . . . . the user being required to insert a coded card, e.g. a smart card carrying an integrated circuit chip **[7]**

1/677 . . Preventing the dialling or sending of predetermined telephone numbers or selected types of telephone numbers, e.g. long distance numbers **[7]**

1/68 . Circuit arrangements for preventing eavesdropping

1/70 . . Lock-out or secrecy arrangements in party-line systems

1/72 . Substation extension arrangements; Cordless telephones, i.e. devices for establishing wireless links to base stations without route selecting **[1,7]**

1/723 . . using two or more extensions per line (H04M 1/725 takes precedence) **[7]**

1/725 . . Cordless telephones **[7]**

1/727 . . . Identification code transfer arrangements **[7]**

1/73 . . . Battery saving arrangements **[7]**

1/733 . . . with a plurality of base stations connected to a plurality of lines **[7]**

1/737 . . . characterised by transmission of electromagnetic waves other than radio waves, e.g. infra-red waves **[7]**

1/738 . Interface circuits for coupling substations to external telephone lines (H04M 1/78 takes precedence) **[7]**

1/74 . . with means for reducing interference; with means for reducing effects due to line faults

1/76 . . Compensating for differences in line impedance
1/78 . Circuit arrangements in which low-frequency speech signals proceed in one direction on the line, while speech signals proceeding in the other direction on the line are modulated on a high-frequency carrier signal **[2]**
1/80 . Telephone line holding circuits **[7]**
1/82 . Line monitoring circuits for call progress or status discrimination **[7]**

3/00 Automatic or semi-automatic exchanges
3/02 . Calling substations, e.g. by ringing (selective calling H04Q)
3/04 . . the calling signal being supplied from the final selector
3/06 . . the calling signal being supplied from the subscriber's line circuit
3/08 . Indicating faults in circuits or apparatus
3/10 . . Providing fault- or trouble-signals
3/12 . . Marking faulty circuits "busy"; Enabling equipment to disengage itself from faulty circuits
3/14 . . Signalling existence of persistent "off-hook" condition
3/16 . with lock-out or secrecy provision in party-line systems
3/18 . with means for reducing interference; with means for reducing effects due to line faults
3/20 . with means for interrupting existing connections; with means for breaking-in on conversations
3/22 . Arrangements for supervision, monitoring or testing
3/24 . . with provision for checking the normal operation
3/26 . . with means for applying test signals
3/28 . . . Automatic routine testing
3/30 . . . . for subscribers' lines
3/32 . . . . for lines between exchanges
3/34 . . . Testing for cross-talk
3/36 . . Statistical metering, e.g. recording occasions when traffic exceeds capacity of trunks
3/38 . Graded-service arrangements, i.e. some subscribers prevented from establishing certain connections (queuing arrangements H04Q 3/64)
3/40 . Applications of speech amplifiers
3/42 . Systems providing special services or facilities to subscribers (specially adapted for wireless communication networks H04W 4/00)
3/424 . . Arrangements for automatic redialling (at the subscriber's set H04M 1/27) **[7]**
3/428 . . Arrangements for placing incoming calls on hold **[7]**
3/432 . . Arrangements for calling a subscriber at a specific time, e.g. morning call service **[7]**
3/436 . . Arrangements for screening incoming calls **[7]**
3/44 . . Additional connecting arrangements for providing access to frequently-wanted subscribers, e.g. abbreviated dialling (at the subscriber's set H04M 1/27; automatic redialling H04M 3/424) **[1,7]**
3/46 . . Arrangements for calling a number of substations in a predetermined sequence until an answer is obtained
3/48 . . Arrangements for recalling a calling subscriber when the wanted subscriber ceases to be busy
3/487 . . Arrangements for providing information services, e.g. recorded voice services or time announcements **[7]**
3/493 . . . Interactive information services, e.g. directory enquiries **[7]**
3/50 . . Centralised arrangements for answering calls; Centralised arrangements for recording messages for absent or busy subscribers (H04M 3/487 takes precedence; centralised dictation systems H04M 11/10) **[1,7]**
3/51 . . . Centralised call answering arrangements requiring operator intervention **[7]**
3/52 . . . . Arrangements for routing dead number calls to operators
3/523 . . . . with call distribution or queuing **[7]**
3/527 . . . Centralised call answering arrangements not requiring operator intervention **[7]**
3/53 . . . Centralised arrangements for recording incoming messages **[7]**
3/533 . . . . Voice mail systems **[7]**
3/537 . . . . Arrangements for indicating the presence of a recorded message **[7]**
3/54 . . Arrangements for diverting calls for one subscriber to another predetermined subscriber
3/56 . . Arrangements for connecting several subscribers to a common circuit, i.e. affording conference facilities (video conference systems H04N 7/15)
3/58 . . Arrangements for transferring received calls from one subscriber to another; Arrangements affording interim conversations between either the calling or the called party and a third party (substation line holding circuits H04M 1/80) **[1,7]**
3/60 . Semi-automatic systems, i.e. systems in which the numerical selection of the outgoing line is under the control of an operator
3/62 . . Keyboard equipment
3/64 . . Arrangements for signalling the number or class of the calling line to the operator (between operators in inter-exchange working H04M 5/18)

5/00 Manual exchanges (substation equipment in general H04M 1/00)
5/02 . Constructional details (jacks, jack-plugs H01R 24/58)
5/04 . Arrangements for indicating calls or supervising connections for calling or clearing
5/06 . . affording automatic call distribution
5/08 . using connecting means other than cords
5/10 . using separate plug for each subscriber
5/12 . Calling substations, e.g. by ringing
5/14 . Applications of speech amplifiers
5/16 . with means for reducing interference; with means for reducing effects due to line faults
5/18 . Arrangements for signalling the class or number of called or calling line from one exchange to another
5/20 . . Arrangements for indicating the numbers of the incoming lines

7/00 Arrangements for interconnection between switching centres
7/02 . for compensating differences of ground potential
7/04 . for compensating differences of line impedance
7/06 . using auxiliary connections for control or supervision
7/08 . for phantom working
7/10 . for two-way working, i.e. calls may be set-up in either direction over the same connection
7/12 . for working between exchanges having different types of switching equipment, e.g. power-driven and step by step or decimal and non-decimal

7/14 . in systems involving main and subordinate switching centres (current supply source at subordinate switching centre charged from main exchange H04M 19/06)
7/16 . in systems employing carrier frequencies

9/00 Arrangements for interconnection not involving centralised switching
9/02 . involving a common line for all parties
9/04 . involving a separate line for each pair of parties
9/06 . involving combinations of interconnecting lines
9/08 . Two-way loud-speaking telephone systems with means for conditioning the signal, e.g. for suppressing echoes for one or both directions of traffic
9/10 . . with switching of direction of transmission by voice frequency

11/00 Telephonic communication systems specially adapted for combination with other electrical systems
11/02 . with bell or annunciator systems
11/04 . with alarm systems, e.g. fire, police or burglar alarm systems
11/06 . Simultaneous speech and data transmission, e.g. telegraphic transmission over the same conductors
11/08 . specially adapted for optional reception of entertainment or informative matter
11/10 . with dictation recording and playback systems

13/00 Party-line systems (substation equipment H04M 1/00; exchange equipment H04M 3/00, H04M 5/00; metering arrangements H04M 15/36)

15/00 Arrangements for metering, time-control or time-indication
15/02 . Severing connection after a predetermined time
15/04 . Recording calls in printed, perforated, or other permanent form
15/06 . . Recording class or number of calling party or called party
15/08 . Metering calls to called party
15/10 . Metering calls from calling party
15/12 . . Discriminative metering
15/14 . . . according to class of calling party
15/16 . . . according to connection obtained
15/18 . . . according to duration of call
15/20 . . . . Operator's time recording or indicating arrangements
15/22 . . . according to time of day
15/24 . . . preventing metering of tax-free calls to certain lines, e.g. to fire or ambulance stations
15/26 . . with a meter at the exchange controlled by an operator
15/28 . with meter at substation
15/30 . . the meter not being controlled from an exchange
15/32 . Metering arrangements for satellites or concentrators which connect one or more exchange lines with a group of local lines
15/34 . Metering arrangements for private branch exchanges
15/36 . Metering arrangements for party-lines
15/38 . Metering by apparatus other than mechanical step-by-step counter type

17/00 Prepayment telephone systems (using a coded card to authorise calls from a telephone set H04M 1/675) **[1,7]**
17/02 . Coin-freed or check-freed systems

19/00 Current supply arrangements for telephone systems (for selecting equipment H04Q 1/28)
19/02 . providing ringing current or supervisory tones, e.g. dialling tone or busy tone
19/04 . . the ringing-current being generated at the substations
19/06 . in which current supply sources at subordinate switching centres are charged from the main exchange
19/08 . with current supply sources at the substations (generating ringing current H04M 19/04) **[1,7]**

99/00 Subject matter not provided for in other groups of this subclass [8]

H04N PICTORIAL COMMUNICATION, E.G. TELEVISION [4]

(1) This subclass covers:
- transmission of pictures or their transient or permanent reproduction either locally or remotely, by methods involving both the following steps:
  step (a): the scanning of a picture, i.e. resolving the whole picture-containing area into individual picture-elements and the derivation of picture-representative electric signals related thereto, simultaneously or in sequence;
  step (b): the reproduction of the whole picture-containing area by the reproduction of individual picture-elements into which the picture is resolved by means of picture-representative electric signals derived therefrom, simultaneously or in sequence; **[4]**
- (in group H04N 1/00) systems for the transmission or the reproduction of arbitrarily composed pictures or patterns in which the local light variations composing a picture are not subject to variation with time, e.g. documents (both written and printed), maps, charts, photographs (other than cinematograph films);
- circuits specially designed for dealing with pictorial communication signals, e.g. television signals, as distinct from merely signals of a particular frequency range.

(2) This subclass does not cover:
- circuits or other parts of systems which form the subject of other subclasses, which are covered by the corresponding subclasses, e.g. H03C, H03F, H03J, H04B, H04H;
- systems in which legible alphanumeric or like character forms are analysed according to step (a) of Note (1) to derive an electric signal from which the character is recognised by comparison with stored information, which are covered by subclass G06K;
- systems for the direct photographic copying of an original picture in which an electric signal representative of the picture is derived according to the said step (a) and employed to modify the operation of the system, e.g. to control exposure, which are covered by class G03;

– systems for the reproduction according to step (b) of Note (1) of pictures comprising alphanumeric or like character forms but involving the production of the equivalent of a signal which would be derived according to the above-mentioned step (a), e.g. by cams, punched card or tape, coded control signal, or other means, which are covered by the subclass for the application, e.g. G01D, G06T, H04L;
– systems for the reproduction according to the above-mentioned step (b) of pictures comprising alphanumeric or like character forms and involving the generation according to the above-mentioned step (a) of picture-representative electric signals from a pre-arranged assembly of such characters, or records thereof, forming an integral part of the systems, which are covered by the subclass for the application, e.g. B41B, G06K, subject to those applications which are covered by this subclass;
– printing, duplication or marking processes, or materials therefor, which are covered by the relevant subclasses, e.g. B41C, B41J, B41M, G03C, G03F, G03G. **[4]**

(3) In this subclass, the following expression is used with the meaning indicated:
– "television systems" means those systems for the transmission and reproduction of arbitrarily composed pictures in which the local light variations composing a picture may change with time, e.g. natural "live" scenes, recordings of such scenes such as cinematograph films.

Note

In groups H04N 1/00 to H04N 17/00, it is desirable to add the indexing code of group H04N 101/00. **[6]**

1/00 Scanning, transmission or reproduction of documents or the like, e.g. facsimile transmission; Details thereof [3,4]

1/024 . Details of scanning heads **[3,4]**
1/028 . . for picture-information pick-up **[3,4]**
1/029 . . . Heads optically focused on only one picture element at a time **[6]**
1/03 . . . with photodetectors arranged in a substantially linear array (scanning of linear arrays H04N 1/19) **[6]**
1/031 . . . . the photodetectors having a one-to-one and optically positive correspondence with the scanned picture elements, e.g. linear contact sensors **[6]**
1/032 . . for picture-information reproduction **[3,4]**
1/034 . . . using ink, e.g. ink-jet heads **[5]**
1/036 . . . for optical reproduction **[3,4]**
1/04 . Scanning arrangements (H04N 1/387 takes precedence) **[4]**
1/047 . . Detection, control or error compensation of scanning velocity or position (H04N 1/17 takes precedence) **[6]**
1/053 . . . in main scanning direction, e.g. synchronisation of line start or picture elements in a line **[6]**
1/06 . . using cylindrical picture-bearing surfaces **[4]**
1/08 . . . Mechanisms for mounting or holding the sheet around the drum **[4]**
1/10 . . using flat picture-bearing surfaces **[4]**
1/107 . . . with manual scanning **[6]**
1/113 . . using oscillating or rotating mirrors **[6]**
1/12 . . using the sheet-feed movement as the slow scanning component (using multi-element arrays H04N 1/19) **[4,6]**
1/14 . . . using a rotating endless belt carrying the scanning heads **[4]**
1/16 . . . using a rotating helical element **[4]**
1/17 . . the scanning speed being dependent on content of picture **[3,4]**
1/19 . . using multi-element arrays **[6]**
1/191 . . . the array comprising a one-dimensional array **[6]**
1/192 . . . . Simultaneously scanning picture elements on one main scanning line **[6]**
1/193 . . . . . using electrically scanned linear arrays **[6]**
1/195 . . . the array comprising a two-dimensional array **[6]**
1/203 . . Simultaneous scanning of two or more separate pictures **[6]**
1/207 . . Simultaneous scanning of the original picture and the reproduced picture with a common scanning device **[6]**
1/21 . Intermediate information storage (H04N 1/387, H04N 1/41 take precedence) **[4]**
1/23 . Reproducing arrangements (details of scanning heads H04N 1/024; scanning arrangements therefor H04N 1/04) **[4]**
1/27 . . involving production of a magnetic intermediate picture **[4]**
1/29 . . involving production of an electrostatic intermediate picture **[4]**
1/31 . . Mechanical arrangements for picture transmission, e.g. adaptation of clutches, gearing, gear transmissions **[4]**
1/32 . Circuits or arrangements for control or supervision between transmitter and receiver
1/327 . . Initiating, continuing or ending a single-mode communication; Handshaking therefor **[6]**
1/333 . . Mode signalling or mode changing; Handshaking therefor **[6]**
1/34 . . for coin-freed systems
1/36 . . for synchronising or phasing transmitter and receiver
1/38 . Circuits or arrangements for blanking or otherwise eliminating unwanted parts of pictures (H04N 1/387 takes precedence) **[4]**
1/387 . Composing, repositioning or otherwise modifying originals **[4]**
1/393 . . Enlarging or reducing **[4]**
1/40 . Picture signal circuits (H04N 1/387 takes precedence) **[4]**
1/401 . . Compensating positionaly unequal response of the pick-up or reproducing head (H04N 1/403 takes precedence) **[6]**
1/403 . . Discrimination between the two tones in the picture signal of a two-tone original **[6]**
1/405 . . Halftoning, i.e. converting the picture signal of a continuous-tone original into a corresponding signal showing only two levels **[6]**
1/407 . . Control or modification of tonal gradation or of extreme levels, e.g. background level **[6]**
1/409 . . Edge or detail enhancement; Noise or error suppression **[6]**
1/41 . Bandwidth or redundancy reduction (by scanning H04N 1/17) **[3]**

1/411 . . for the transmission or reproduction of two-tone pictures, e.g. black and white pictures **[4]**
1/413 . . . Systems or arrangements allowing the picture to be reproduced without loss or modification of picture-information **[4]**
1/415 . . . . in which the picture-elements are subdivided or grouped into fixed one-dimensional or two-dimensional blocks **[4]**
1/417 . . . . using predictive or differential encoding **[4]**
1/419 . . . . in which encoding of the length of a succession of picture-elements of the same value along a scanning line is the only encoding step **[4]**
1/42 . Systems for two-way working
1/44 . Secrecy systems
1/46 . Colour picture communication systems
1/48 . . Picture signal generators (for halftone screening H04N 1/52) **[6]**
1/50 . . Picture reproducers (for halftone screening H04N 1/52) **[6]**
1/52 . . Circuits or arrangements for halftone screening **[6]**
1/54 . . Conversion of colour picture signals to a plurality of signals some of which represent particular mixed colours, e.g. for textile printing **[6]**
1/56 . . Processing of colour picture signals (H04N 1/52 takes precedence) **[6]**
1/58 . . . Edge or detail enhancement; Noise or error suppression, e.g. colour misregistration correction (H04N 1/62 takes precedence) **[6]**
1/60 . . . Colour correction or control **[6]**
1/62 . . . . Retouching, i.e. modification of isolated colours only or in isolated picture areas only **[6]**
1/64 . . Systems for the transmission or the storage of the colour picture signal; Details therefor, e.g. coding or decoding means therefor **[6]**

3/00 Scanning details of television systems; **Combination thereof with generation of supply voltages [4]**

3/02 . by optical-mechanical means only (H04N 3/36 takes precedence) **[2]**
3/04 . . having a moving aperture
3/06 . . having a moving lens or other refractor
3/08 . . having a moving reflector
3/09 . . . for electromagnetic radiation in the invisible region, e.g. infra-red **[4]**
3/10 . by means not exclusively optical-mechanical (H04N 3/36 takes precedence; devices or arrangements for the electro-, magneto- or acousto-optical modulation or deflection of light beams G02F) **[2]**
3/12 . . by switched stationary formation of lamps, photocells, or light relays
3/14 . . by means of electrically scanned solid-state devices (for picture generation H04N 5/335)
3/15 (transferred to H04N 5/335)
3/16 . . by deflecting electron beam in cathode-ray tube
3/18 . . . Generation of supply voltages, in combination with electron beam deflecting **[4]**
3/185 . . . . Maintaining dc voltage constant **[4]**
3/19 . . . . Arrangements or assemblies in supply circuits for the purpose of withstanding high voltages **[3]**
3/20 . . . Prevention of damage to cathode-ray tubes in event of failure of scanning
3/22 . . . Circuits for controlling dimensions, shape or centering of picture on screen
3/223 . . . . Controlling dimensions (by maintaining the cathode-ray tube high voltage constant H04N 3/185) **[4]**
3/227 . . . . Centering **[4]**
3/23 . . . . Distortion correction, e.g. for pincushion distortion correction, S-correction **[4]**
3/233 . . . . . using active elements **[4]**
3/237 . . . . . using passive elements **[4]**
3/24 . . . Blanking circuits
3/26 . . . Modifications of scanning arrangements to improve focusing
3/27 . . . Circuits special to multi-standard receivers **[3,4]**
3/28 . . producing multiple scanning, i.e. using more than one spot at the same time
3/30 . . otherwise than with constant velocity or otherwise than in pattern formed by unidirectional, straight, substantially horizontal or vertical lines
3/32 . . . Velocity varied in dependence upon picture information
3/34 . . . Elemental scanning area oscillated rapidly in direction transverse to main scanning direction
3/36 . Scanning of motion picture films, e.g. for telecine **[2]**
3/38 . . with continuously moving film **[4]**
3/40 . . with intermittently moving film **[4]**

5/00 Details of television systems *(scanning details or combination thereof with generation of supply voltages H04N 3/00; specially adapted for colour television H04N 9/00; servers specially adapted for the distribution of content H04N 21/20; client devices specially adapted for the reception of or interaction with content H04N 21/40)* **[4,2011.01]**

5/04 . Synchronising (for television systems using pulse code modulation H04N 7/24) **[4]**
5/05 . . Synchronising circuits with arrangements for extending range of synchronisation, e.g. by using switching between several time constants **[2]**
5/06 . . Generation of synchronising signals
5/067 . . . Arrangements or circuits at the transmitter end **[4]**
5/073 . . . . for mutually locking plural sources of synchronising signals, e.g. studios or relay stations **[4]**
5/08 . . Separation of synchronising signals from picture signals
5/10 . . . Separation of line synchronising signal from frame synchronising signal
5/12 . . Devices in which the synchronising signals are only operative if a phase difference occurs between synchronising and synchronised scanning devices, e.g. flywheel synchronising **[2]**
5/14 . Picture signal circuitry for video frequency region (H04N 5/222 takes precedence) **[2]**
5/16 . . Circuitry for reinsertion of dc and slowly varying components of signal; Circuitry for preservation of black or white level
5/18 . . . by means of “clamp” circuit operated by switching circuit
5/20 . . Circuitry for controlling amplitude response
5/202 . . . Gamma control **[4]**
5/205 . . . for correcting amplitude versus frequency characteristic **[4]**
5/208 . . . . for compensating for attenuation of high frequency components, e.g. crispening, aperture distortion correction **[4]**

5/21 . . Circuitry for suppressing or minimising disturbance, e.g. moire, halo (suppression of noise in television recording H04N 5/911)
5/213 . . . Circuitry for suppressing or minimising impulsive noise (H04N 5/217 takes precedence) **[4]**
5/217 . . . *in picture signal generation (noise reduction or noise suppression involving solid-state image sensors H04N 5/357)* **[4,2011.01]**
5/222 . Studio circuitry; Studio devices; Studio equipment **[4]**
5/225 . . Television cameras **[4]**
5/228 . . . Circuit details for pick-up tubes **[4]**
5/232 . . . Devices for controlling television cameras, e.g. remote control (H04N 5/235 takes precedence) **[4]**
5/235 . . . Circuitry for compensating for variation in the brightness of the object **[4]**
5/238 . . . . by influencing optical part of the camera **[4]**
5/243 . . . . by influencing the picture signal **[4]**
5/247 . . . Arrangement of television cameras **[4]**
5/253 . . Picture signal generating by scanning motion picture films or slide opaques, e.g. for telecine (scanning details therefor H04N 3/36) **[4]**
5/257 . . Picture signal generators using flying-spot scanners (H04N 5/253 takes precedence) **[4]**
5/262 . . Studio circuits, e.g. for mixing, switching-over, change of character of image, other special effects **[4]**
5/265 . . . Mixing **[4]**
5/268 . . . Signal distribution or switching (for broadcasting H04H 20/00) **[4]**
5/272 . . . Means for inserting a foreground image in a background image, i.e. inlay, outlay **[4]**
5/275 . . . . Generation of keying signals **[4]**
5/278 . . . Subtitling **[4]**
5/28 . . Mobile studios
5/30 . Transforming light or analogous information into electric information (H04N 5/222 takes precedence; scanning details H04N 3/00) **[2,4,7]**
5/32 . . Transforming X-rays
5/321 . . . with video transmission of fluoroscopic images **[5]**
5/325 . . . . Image enhancement, e.g. by subtraction techniques using polyenergetic X-rays **[5]**
5/33 . . Transforming infra-red radiation **[2]**
5/335 . . *using solid-state image sensors [SSIS] (H04N 5/32, H04N 5/33 take precedence)* **[4,2011.01]**

Note

In this group, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place. **[2011.01]**

5/341 . . . *Extracting pixel data from an image sensor by controlling scanning circuits, e.g. by modifying the number of pixels having been sampled or to be sampled* **[2011.01]**
5/343 . . . . *by switching between different modes of operation using different resolutions or aspect ratios, e.g. between still and video mode or between interlaced and non-interlaced mode* **[2011.01]**
5/345 . . . . *by partially reading an SSIS array* **[2011.01]**
5/347 . . . . *by combining or binning pixels in SSIS* **[2011.01]**
5/349 . . . . *for increasing resolution by shifting the sensor relative to the scene* **[2011.01]**
5/351 . . . *Control of the SSIS depending on the scene, e.g. brightness or motion in the scene* **[2011.01]**
5/353 . . . . *Control of the integration time* **[2011.01]**
5/355 . . . . *Control of the dynamic range* **[2011.01]**
5/357 . . . *Noise processing, e.g. detecting, correcting, reducing or removing noise* **[2011.01]**
5/359 . . . . *applied to excess charges produced by the exposure, e.g. smear, blooming, ghost image, crosstalk or leakage between pixels* **[2011.01]**
5/361 . . . . *applied to dark current* **[2011.01]**
5/363 . . . . *applied to reset noise, e.g. KTC noise* **[2011.01]**
5/365 . . . . *applied to fixed-pattern noise, e.g. non-uniformity of response* **[2011.01]**
5/367 . . . . . *applied to defects, e.g. non-responsive pixels* **[2011.01]**
5/369 . . . *SSIS architecture; Circuitry associated therewith* **[2011.01]**
5/372 . . . . *Charge-coupled device [CCD] sensors; Time delay and integration [TDI] registers or shift registers specially adapted for SSIS* **[2011.01]**
5/3722 . . . . . *using frame interline transfer [FIT]* **[2011.01]**
5/3725 . . . . . *using frame transfer [FT]* **[2011.01]**
5/3728 . . . . . *using interline transfer [IT]* **[2011.01]**
5/374 . . . . *Addressed sensors, e.g. MOS or CMOS sensors* **[2011.01]**
5/3745 . . . . . *having additional components embedded within a pixel or connected to a group of pixels within a sensor matrix, e.g. memories, A/D converters, pixel amplifiers, shared circuits or shared components* **[2011.01]**
5/376 . . . . *Addressing circuits* **[2011.01]**
5/378 . . . . *Readout circuits, e.g. correlated double sampling [CDS] circuits, output amplifiers or A/D converters* **[2011.01]**
5/38 . Transmitter circuitry (H04N 5/14 takes precedence) **[4]**
5/40 . . Modulation circuits
5/42 . . for transmitting at will black-and-white or colour signals
5/44 . *Receiver circuitry (H04N 5/14 takes precedence)* **[4,2011.01]**
5/445 . . *for displaying additional information (H04N 5/50 takes precedence)* **[4,2011.01]**
5/45 . . . *Picture in picture* **[4,2011.01]**
5/455 . . Demodulation-circuits **[4]**
5/46 . . for receiving on more than one standard at will (deflecting circuits of multi-standard receivers H04N 3/27) **[4]**
5/50 . . Tuning indicators; Automatic tuning control **[4]**
5/52 . . Automatic gain control **[4]**
5/53 . . . Keyed automatic gain control **[4]**
5/54 . . . for positively-modulated picture signals (H04N 5/53 takes precedence) **[4]**
5/56 . . . for negatively-modulated picture signals (H04N 5/53 takes precedence) **[4]**
5/57 . . Control of contrast or brightness **[4]**
5/58 . . . in dependence upon ambient light **[4]**

5/59 . . . in dependence upon beam current of cathode ray tube **[4]**
5/60 . . for the sound signals
5/62 . . . Intercarrier circuits, i.e. heterodyning sound and vision carriers
5/63 . Generation or supply of power specially adapted for television receivers (generation of supply voltages in combination with electron beam deflecting H04N 3/18) **[4]**
5/64 . Constructional details of receivers, e.g. cabinets, dust covers (furniture aspects A47B, e.g. A47B 81/06) **[2]**
5/645 . . Mounting of picture tube on chassis or in housing
5/65 . . Holding-devices for protective discs or for picture masks
5/655 . . Construction or mounting of chassis, e.g. for varying the elevation of the tube
5/66 . Transforming electric information into light information (scanning details H04N 3/00)
5/68 . . Circuit details for cathode-ray display tubes
5/70 . . Circuit details for electroluminescent devices
5/72 . Modifying the appearance of television pictures by optical filters or diffusing screens
5/74 . Projection arrangements for image reproduction, e.g. using eidophor
5/76 . Television signal recording **[3,4]**
5/761 . . Systems for programming the time at which predetermined television channels will be selected for recording **[7]**
5/7613 . . . by using data entered by the user and a reference timing clock incorporated in the recorder **[7]**
5/7617 . . . by using data entered by the user and reference data transmitted by the broadcasting station **[7]**
5/765 . . Interface circuits between an apparatus for recording and another apparatus (associated working of recording or reproducing apparatus with a television camera or receiver in which the television signal is not significantly involved G11B 31/00) **[6]**
5/77 . . . between a recording apparatus and a television camera **[6]**
5/775 . . . between a recording apparatus and a television receiver **[6]**
5/78 . . using magnetic recording (H04N 5/91 takes precedence) **[3]**
5/781 . . . on discs or drums **[3]**
5/782 . . . on tape **[3]**
5/7822 . . . . with stationary magnetic heads **[6]**
5/7824 . . . . with rotating magnetic heads **[6]**
5/7826 . . . . . involving helical scanning of the magnetic tape **[6]**
5/7828 . . . . . involving transversal scanning of the magnetic tape **[6]**
5/783 . . . . Adaptations for reproducing at a rate different from the recording rate **[3]**
5/784 . . . on a sheet **[6]**
5/80 . . using electrostatic recording (H04N 5/91 takes precedence) **[3]**
5/82 . . . using deformable thermoplastic recording medium
5/83 . . . . on discs or drums **[3]**
5/84 . . using optical recording (H04N 5/80, H04N 5/89, H04N 5/91 take precedence) **[3,4]**
5/85 . . . on discs or drums **[3]**
5/87 . . . Producing a motion picture film from a television signal **[3,4]**
5/89 . . using holographic recording (H04N 5/91 take precedence) **[3]**
5/90 . . . on discs or drums **[3]**
5/903 . . using variable electrical capacitive recording (H04N 5/91 takes precedence) **[4]**
5/907 . . using static stores, e.g. storage tubes, semiconductor memories (H04N 5/91 takes precedence; based on relative movement between record carrier and transducer H04N 5/78 to H04N 5/903) **[4]**
5/91 . . Television signal processing therefor (of colour signals H04N 9/79) **[3]**
5/911 . . . for the suppression of noise **[6]**
5/913 . . . for scrambling **[6]**
5/915 . . . for field- or frame-skip recording or reproducing **[6]**
5/917 . . . for bandwidth reduction (using pulse code modulation H04N 7/24) **[6]**
5/919 . . . . by dividing samples or signal segments, e.g. television lines, among a plurality of recording channels **[6]**
5/92 . . . Transformation of the television signal for recording, e.g. modulation, frequency changing; Inverse transformation for playback **[3]**
5/921 . . . . by recording or reproducing the baseband signal **[6]**
5/922 . . . . by modulation of the signal on a carrier wave, e.g. amplitude or frequency modulation **[6]**
5/923 . . . . using preemphasis of the signal before modulation and deemphasis of the signal after demodulation **[6]**
5/924 . . . . using duty cycle modulation **[6]**
5/926 . . . . by pulse code modulation (H04N 5/919 takes precedence) **[6]**
5/928 . . . . the sound signal being pulse code modulated and recorded in time division multiplex with the modulated video signal **[6]**
5/93 . . . Regeneration of the television signal or of selected parts thereof **[3]**
5/931 . . . . for restoring the level of the reproduced signal **[6]**
5/932 . . . . Regeneration of analogue synchronisation signals **[6]**
5/935 . . . . Regeneration of digital synchronisation signals **[6]**
5/937 . . . . by assembling picture element blocks in an intermediate store **[6]**
5/94 . . . . Signal drop-out compensation **[3]**
5/945 . . . . . for signals recorded by pulse code modulation **[6]**
5/95 . . . . Time-base error compensation **[3]**
5/953 . . . . . by using an analogue memory, e.g. a CCD-shift register, the delay of which is controlled by a voltage controlled oscillator **[6]**
5/956 . . . . . by using a digital memory with independent write-in and read-out clock generators **[6]**

7/00 ***Television systems*** *(details H04N 3/00, H04N 5/00, specially adapted for colour television H04N 11/00; stereoscopic television systems H04N 13/00; selective content distribution H04N 21/00)* **[4,2011.01]**
7/01 . Conversion of standards **[4]**
7/015 . High-definition television systems **[6]**

7/025 . Systems for transmission of digital non-picture data, e.g. of text during the active part of a television frame **[6]**
7/03 . . Subscription systems therefor **[6]**
7/035 . . Circuits for the digital non-picture data signal, e.g. for slicing of the data signal, for regeneration of the data-clock signal, for error detection or correction of the data signal **[6]**
7/04 . Systems for the transmission of one television signal, i.e. both picture and sound, by a single carrier **[4]**
7/045 . . the carrier being frequency modulated **[6]**
7/06 . Systems for the simultaneous transmission of one television signal, i.e. both picture and sound, by more than one carrier **[4]**
7/08 . Systems for the simultaneous or sequential transmission of more than one television signal, e.g. additional information signals, the signals occupying wholly or partially the same frequency band **[4,6]**
7/081 . . the additional information signals being transmitted by means of a subcarrier **[6]**
7/083 . . with signal insertion during the vertical and the horizontal blanking interval **[6]**
7/084 . . with signal insertion during the horizontal blanking interval **[6]**
7/085 . . . the inserted signal being digital **[6]**
7/087 . . with signal insertion during the vertical blanking interval **[4]**
7/088 . . . the inserted signal being digital **[6]**
7/10 . Adaptations for transmission by electrical cable (H04N 7/12 takes precedence) **[4]**
7/12 . Systems in which the television signal is transmitted via one channel or a plurality of parallel channels, the bandwidth of each channel being less than the bandwidth of the television signal (H04N 7/24 takes precedence; high-definition television systems H04N 7/015) **[4]**
7/14 . Systems for two-way working (H04N 7/173 takes precedence) **[4]**
7/15 . . Conference systems (telephonic conference arrangements H04M 3/56) **[5]**
7/16 . *Analogue secrecy systems; Analogue subscription systems* **[1,2011.01]**
7/167 . . *Systems rendering the television signal unintelligible and subsequently intelligible* **[4,2011.01]**
7/169 . . . *Systems operating in the time domain of the television signal* **[6,2011.01]**
7/171 . . . *Systems operating in the amplitude domain of the television signal* **[6,2011.01]**
7/173 . . *with two-way working, e.g. subscriber sending a programme selection signal* **[4,2011.01]**
7/18 . Closed-circuit television systems, i.e. systems in which the signal is not broadcast
7/20 . Adaptations for transmission via a GHz frequency band, e.g. via satellite **[4]**
7/22 . Adaptations for optical transmission **[4]**
7/24 . *Systems for the transmission of television signals using pulse code modulation (H04N 21/00 takes precedence)* **[6,2011.01]**
7/26 . . using bandwidth reduction (information reduction by code conversion in general H03M 7/30) **[6]**
7/28 . . . using vector coding **[6]**
7/30 . . . involving transform coding (H04N 7/50 takes precedence; digital computers for performing complex mathematical operations, e.g. domain transformation, G06F 17/14) **[6]**
7/32 . . . involving predictive coding (H04N 7/48, H04N 7/50 take precedence) **[6]**
7/34 . . . . using spatial prediction **[6]**
7/36 . . . . using temporal prediction **[6]**
7/38 . . . . involving delta modulation **[6]**
7/40 . . . . . adaptive **[6]**
7/42 . . . . involving differential modulation **[6]**
7/44 . . . . . adaptive **[6]**
7/46 . . . . using subsampling at the coder and sample restitution by interpolation at the coder or decoder **[6]**
7/48 . . . involving pulse code modulation and predictive coding **[6]**
7/50 . . . involving transform and predictive coding **[6]**
7/52 . . *Systems for transmission of a pulse code modulated with one or more other pulse code modulated signals, e.g. an audio signal or a synchronizing signal (assembling of a multiplex stream by combining a video stream with other content or additional data, remultiplexing of multiplex streams, insertion of stuffing bits into the multiplex stream, assembling of a packetised elementary stream at server side H04N 21/236; disassembling of a multiplex stream, remultiplexing of multiplex streams, extraction or processing of Service Information, disassembling of packetised elementary stream at client side H04N 21/434)* **[6,2011.01]**
7/54 . . . the signals being synchronous **[6]**
7/56 . . . . Synchronising systems therefor **[6]**
7/58 *(transferred to H04N 21/2365, H04N 21/434)*
7/60 *(transferred to H04N 21/236, H04N 21/434)*
7/62 *(transferred to H04N 21/242, H04N 21/431, H04N 21/434, H04N 21/8547)*
7/64 . . Systems for detection or correction of transmission errors (coding, decoding or code conversion for error detection or error correction in general H03M 13/00) **[6]**
7/66 . . . using redundant codes **[6]**
7/68 . . . using error concealment **[6]**

9/00 Details of colour television systems [4]
9/04 . Picture signal generators **[4]**
9/07 . . with one pick-up device only **[2,4]**
9/077 . . . whereby the colour signals are characterised by their phase **[4]**
9/083 . . . whereby the colour signals are characterised by their frequency **[4]**
9/09 . . with more than one pick-up device **[4]**
9/093 . . . Systems for avoiding or correcting misregistration of video signals **[4]**
9/097 . . . Optical arrangements associated therewith, e.g. for beam-splitting, for colour correction **[4]**
9/10 . . using optical-mechanical scanning means only (H04N 9/11 takes precedence) **[2,4]**
9/11 . . Scanning of colour motion picture films, e.g. for telecine **[2,4]**
9/12 . Picture reproducers (H04N 9/11 takes precedence) **[2,4]**
9/14 . . using optical-mechanical scanning means only **[2,4]**
9/16 . . using cathode ray tubes (H04N 9/11 takes precedence) **[2,4]**
9/18 . . . using separate electron beams for the primary colour signals (H04N 9/27 takes precedence) **[2,4]**
9/20 . . . . with more than one beam in a tube **[4]**

9/22 . . . using the same beam for more than one primary colour information (H04N 9/27 takes precedence) **[2,4]**
9/24 . . . . using means, integral with, or external to, the tube, for producing signal indicating instantaneous beam position **[4]**
9/26 . . . . using electron-optical colour selection means, e.g. line grid, deflection means in or near the gun or near the phosphor screen **[4]**
9/27 . . . with variable depth of penetration of electron beam into the luminescent layer, e.g. penetrons **[2,4]**
9/28 . . . Arrangements for convergence or focusing **[4]**
9/285 . . . . using quadrupole lenses **[4]**
9/29 . . . using demagnetisation or compensation of external magnetic fields **[2,4]**
9/30 . . using solid-state colour display devices **[4]**
9/31 . . Projection devices for colour picture display **[2,4]**
9/43 . Conversion of monochrome picture signals to colour picture signals for colour picture display **[4]**
9/44 . Colour synchronisation **[4]**
9/45 . . Generation or recovery of colour sub-carriers **[4]**
9/455 . . Generation of colour burst signals; Insertion of colour burst signals in colour picture signals or separation of colour burst signals from colour picture signals (H04N 9/45 takes precedence) **[4]**
9/465 . . Synchronisation of the PAL-switch **[4]**
9/47 . . for sequential signals **[2,4]**
9/475 . . for mutually locking different synchronisation sources **[4]**
9/64 . Circuits for processing colour signals (H04N 9/77 takes precedence) **[4]**
9/65 . . for synchronous modulators **[4]**
9/66 . . for synchronous demodulators **[4]**
9/67 . . for matrixing **[4]**
9/68 . . for controlling the amplitude of colour signals, e.g. automatic chroma control circuits (H04N 9/71, H04N 9/73 take precedence) **[4]**
9/69 . . . for modifying the colour signals by gamma correction **[4]**
9/70 . . for colour killing **[4]**
9/71 . . . combined with colour gain control **[4]**
9/72 . . for reinsertion of dc and slowly varying components of colour signals **[4]**
9/73 . . colour balance circuits, e.g. white balance circuits, colour temperature control **[4]**
9/74 . . for obtaining special effects (H04N 9/65 to H04N 9/73 take precedence) **[4]**
9/75 . . . Chroma key **[4]**
9/76 . . . for mixing of colour signals (H04N 9/75 takes precedence) **[4]**
9/77 . Circuits for processing the brightness signal and the chrominance signal relative to each other, e.g. adjusting the phase of the brightness signal relative to the colour signal, correcting differential gain or differential phase (circuits for matrixing H04N 9/67) **[4]**
9/78 . . for separating the brightness signal or the chrominance signal from the colour television signal, e.g. using comb filter **[4]**
9/79 . Processing of colour television signals in connection with recording **[4]**
9/793 . . for controlling the level of the chrominance signal, e.g. by means of automatic chroma control circuits **[6]**
9/797 . . for recording the signal in a plurality of channels, the bandwidth of each channel being less than the bandwidth of the signal (H04N 9/804, H04N 9/81, H04N 9/82 take precedence) **[6]**
9/80 . . Transformation of the television signal for recording, e.g. modulation, frequency changing; Inverse transformation for playback **[4]**
9/802 . . . involving processing of the sound signal (H04N 9/806, H04N 9/835 take precedence) **[6]**
9/804 . . . involving pulse code modulation of the colour picture signal components **[6]**
9/806 . . . . with processing of the sound signal **[6]**
9/808 . . . involving pulse code modulation of the composite colour video-signal **[6]**
9/81 . . . the individual colour picture signal components being recorded sequentially only **[4]**
9/815 . . . . the luminance signal and the sequential colour component signals being recorded in separate recording channels **[6]**
9/82 . . . the individual colour picture signal components being recorded simultaneously only **[4]**
9/825 . . . . the luminance and chrominance signals being recorded in separate channels **[6]**
9/83 . . . . the recorded chrominance signal occupying a frequency band under the frequency band of the recorded brightness signal **[4]**
9/835 . . . . . involving processing of the sound signal **[6]**
9/84 . . . . . the recorded signal showing a feature, which is different in adjacent track parts, e.g. different phase or frequency **[4]**
9/85 . . . . the recorded brightness signal occupying a frequency band totally overlapping the frequency band of the recorded chrominance signal, e.g. frequency interleaving **[4]**
9/86 . . . the individual colour picture signal components being recorded sequentially and simultaneously, e.g. corresponding to SECAM-system **[4]**
9/87 . . Regeneration of colour television signals (H04N 9/80 takes precedence) **[4]**
9/873 . . . for restoring the colour component sequence of the reproduced signal **[6]**
9/877 . . . by assembling picture element blocks in an intermediate memory **[6]**
9/88 . . . Signal drop-out compensation **[4]**
9/882 . . . . the signal being a composite colour television signal **[6]**
9/885 . . . . . using a digital intermediate memory **[6]**
9/888 . . . . for signals recorded by pulse code modulation **[6]**
9/89 . . . Time-base error compensation **[4]**
9/893 . . . . using an analogue memory, e.g. a CCD-shift register, the delay of which is controlled by a voltage controlled oscillator **[6]**
9/896 . . . . using a digital memory with independent write-in and read-out clock generators **[6]**
9/898 . . . using frequency multiplication of the reproduced colour signal with another auxiliary reproduced signal, e.g. a pilot signal carrier **[6]**

11/00 **Colour television systems** (details H04N 9/00; stereoscopic H04N 15/00) **[4]**
11/02 . with bandwidth reduction (H04N 11/04 takes precedence) **[4]**
11/04 . using pulse code modulation **[4]**

11/06 . Transmission systems characterised by the manner in which the individual colour picture signal components are combined **[4]**

11/08 . . using sequential signals only (dot sequential systems H04N 11/12) **[4]**

11/10 . . . in which colour signals are inserted in the blanking interval of brightness signal **[4]**

11/12 . . using simultaneous signals only **[4]**

11/14 . . . in which one signal, modulated in phase and amplitude, conveys colour information and a second signal conveys brightness information, e.g. NTSC-system **[4]**

11/16 . . . . the chrominance signal alternating in phase, e.g. PAL-system **[4]**

11/18 . . using simultaneous and sequential signals, e.g. SECAM-system **[4]**

11/20 . . Conversion of the manner in which the individual colour picture signal components are combined, e.g. conversion of colour television standards **[4]**

11/22 . . . in which simultaneous signals are converted into sequential signals or vice versa **[4]**

11/24 . High-definition television systems **[6]**

13/00 Stereoscopic television systems; **Details thereof** (specially adapted for colour television H04N 15/00) **[4]**

13/02 . Picture signal generators **[4]**

13/04 . Picture reproducers **[4]**

15/00 Stereoscopic colour television systems; **Details thereof [4]**

17/00 Diagnosis, testing or measuring for television systems or their details [4]

17/02 . for colour television signals **[4]**

17/04 . for receivers **[4]**

17/06 . for recorders **[4]**

21/00 Selective content distribution, e.g. interactive television, VOD [Video On Demand] *(broadcast communication H04H; arrangements, apparatus, circuits or systems for communication control or processing being characterised by a protocol H04L 29/06; real-time bi-directional transmission of motion video data H04N 7/14)* **[2011.01]**

(1) *This group covers :*
- *interactive video distribution processes, systems, or elements thereof, which are characterised by point-to-multipoint system configurations, and which are mainly used for motion video data unidirectional distribution or delivery resulting from interactions between systems operators, e.g. access or service providers, or users e.g. subscribers, and system elements.* **[2011.01]**
- *such systems include dedicated communication systems, such as television distribution systems, which primarily distribute or deliver motion video data in the manner indicated, which may, in addition, provide a framework for further, diverse data communications or services in either unidirectional or bi-directional form. However, video will occupy most of the downlink bandwidth in the distribution process.* **[2011.01]**
- *typically, system operators interface with transmitter-side elements or users' interface with receiver-side elements in order to facilitate, through interaction with such elements, the dynamic control of data processing or data flow at various points in the system. This interaction is typically occasional or intermittent in nature.* **[2011.01]**
- *processes, systems or elements thereof specially adapted to the generation, distribution and processing of data, which is either associated with video content, e.g. metadata, ratings, or related to the user or his environment and which has been actively or passively gathered. This data is either used to facilitate interaction or to alter or target the content.* **[2011.01]**

(2) *In this main group, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place.* **[2011.01]**

21/20 . Servers specifically adapted for the distribution of content, e.g. VOD servers; Operations thereof **[2011.01]**

21/21 . . Server components or server architectures **[2011.01]**

21/214 . . . Specialised server platform, e.g. server located in an airplane, hotel or hospital **[2011.01]**

21/218 . . . Source of audio or video content, e.g. local disk arrays **[2011.01]**

21/2183 . . . . Cache memory **[2011.01]**

21/2187 . . . . Live feed **[2011.01]**

21/222 . . . Secondary servers, e.g. proxy server or cable television Head-end **[2011.01]**

21/2225 . . . . Local VOD servers **[2011.01]**

21/226 . . . Internal components of the server **[2011.01]**

21/23 . . Processing of content or additional data; Elementary server operations; Server middleware **[2011.01]**

21/231 . . . Content storage operation, e.g. caching movies for short term storage, replicating data over plural servers or prioritizing data for deletion **[2011.01]**

21/2312 . . . . Data placement on disk arrays **[2011.01]**

21/2315 . . . . . using interleaving **[2011.01]**

21/2318 . . . . . using striping **[2011.01]**

21/232 . . . Content retrieval operation within server, e.g. reading video streams from disk arrays **[2011.01]**

21/233 . . . Processing of audio elementary streams **[2011.01]**

21/234 . . . Processing of video elementary streams, e.g. splicing of video streams or manipulating MPEG-4 scene graphs (video encoding or transcoding processes per se H04N 7/26) **[2011.01]**

21/2343 . . . . involving reformatting operations of video signals for distribution or compliance with end-user requests or end-user device requirements **[2011.01]**

21/2347 . . . . involving video stream encryption (arrangements for secret or secure communication H04L 9/00; analogue secrecy systems H04N 7/16) **[2011.01]**

21/235 . . . Processing of additional data, e.g. scrambling of additional data or processing content descriptors **[2011.01]**

21/236 . . . *Assembling of a multiplex stream, e.g. transport stream, by combining a video stream with other content or additional data, e.g. inserting a URL [Uniform Resource Locator] into a video stream, multiplexing software data into a video stream; Remultiplexing of multiplex streams; Insertion of stuffing bits into the multiplex stream, e.g. to obtain a constant bit-rate; Assembling of a packetised elementary stream* **[2011.01]**

21/2362 . . . . *Generation or processing of SI [Service Information]* **[2011.01]**

21/2365 . . . . *Multiplexing of several video streams* **[2011.01]**

21/2368 . . . . *Multiplexing of audio and video streams* **[2011.01]**

21/237 . . . *Communication with additional data server* **[2011.01]**

21/238 . . . *Interfacing the downstream path of the transmission network, e.g. adapting the transmission rate of a video stream to network bandwidth; Processing of multiplex streams* **[2011.01]**

21/2381 . . . . *Adapting the multiplex stream to a specific network, e.g. an IP [Internet Protocol] network* **[2011.01]**

21/2383 . . . . *Channel coding of digital bit-stream, e.g. modulation* **[2011.01]**

21/2385 . . . . *Channel allocation (H04N 21/266 takes precedence); Bandwidth allocation (H04N 21/24 takes precedence)* **[2011.01]**

21/2387 . . . . *Stream processing in response to a playback request from an end-user, e.g. for trick-play* **[2011.01]**

21/2389 . . . . *Multiplex stream processing, e.g. multiplex stream encrypting* **[2011.01]**

21/239 . . . *Interfacing the upstream path of the transmission network, e.g. prioritizing client requests* **[2011.01]**

21/24 . . . *Monitoring of processes or resources, e.g. monitoring of server load, available bandwidth or upstream requests* **[2011.01]**

21/241 . . . *OS [Operating System] processes, e.g. server setup (arrangements for programme control G06F 9/00)* **[2011.01]**

21/242 . . . *Synchronization processes, e.g. processing of PCR [Program Clock References]* **[2011.01]**

21/25 . . *Management operations performed by the server for facilitating the content distribution or administrating data related to end-users or client devices, e.g. end-user or client device authentication or learning user preferences for recommending movies* **[2011.01]**

21/254 . . . *Management at additional data server, e.g. shopping server or rights management server* **[2011.01]**

21/2543 . . . . *Billing* **[2011.01]**

21/2547 . . . . . *Third party billing, e.g. billing of advertiser* **[2011.01]**

21/258 . . . *Client or end-user data management, e.g. managing client capabilities, user preferences or demographics or processing of multiple end-users preferences to derive collaborative data* **[2011.01]**

21/262 . . . *Content or additional data distribution scheduling, e.g. sending additional data at off-peak times, updating software modules, calculating the carousel transmission frequency, delaying a video stream transmission or generating play-lists* **[2011.01]**

21/266 . . . *Channel or content management, e.g. generation and management of keys and entitlement messages in a conditional access system or merging a VOD unicast channel into a multicast channel* **[2011.01]**

21/2662 . . . . *Controlling the complexity of the video stream, e.g. by scaling the resolution or bitrate of the video stream based on the client capabilities* **[2011.01]**

21/2665 . . . . *Gathering content from different sources, e.g. Internet and satellite* **[2011.01]**

21/2668 . . . . *Creating a channel for a dedicated end-user group, e.g. by inserting targeted commercials into a video stream based on end-user profiles* **[2011.01]**

21/27 . . *Server based end-user applications* **[2011.01]**

21/274 . . . *Storing end-user specific content or additional data in response to end-user request* **[2011.01]**

21/2743 . . . . *Video hosting of uploaded data from client* **[2011.01]**

21/2747 . . . . *Remote storage of video programs received via the downstream path, e.g. from the server* **[2011.01]**

21/278 . . . *Content descriptor database or directory service for end-user access* **[2011.01]**

21/40 . *Client devices specifically adapted for the reception of, or interaction with, content, e.g. STB [set-top-box]; Operations thereof* **[2011.01]**

21/41 . . *Structure of client; Structure of client peripherals* **[2011.01]**

21/414 . . . *Specialised client platforms, e.g. receiver in car or embedded in a mobile appliance* **[2011.01]**

21/4143 . . . . *PC [Personal Computer]* **[2011.01]**

21/4147 . . . . *PVR [Personal Video Recorder] (H04N 5/76 takes precedence)* **[2011.01]**

21/418 . . . *External card to be used in combination with the client device, e.g. for conditional access* **[2011.01]**

21/4185 . . . . *for payment* **[2011.01]**

21/422 . . . *Input-only peripherals, e.g. GPS [Global Positioning System] (input arrangements or combined input and output arrangements for interaction between user and computer G06F 3/01)* **[2011.01]**

21/4223 . . . . *Cameras (H04N 5/225 takes precedence)* **[2011.01]**

21/4227 . . . . *Remote input by a user located remotely from the client device, e.g. at work* **[2011.01]**

21/426 . . . *Internal components of the client (H04N 5/44 takes precedence)* **[2011.01]**

21/43 . . *Processing of content or additional data, e.g. demultiplexing additional data from a digital video stream; Elementary client operations, e.g. monitoring of home network or synchronizing decoder's clock; Client middleware* **[2011.01]**

21/431 . . . *Generation of visual interfaces; Content or additional data rendering (receiver circuitry for displaying additional information H04N 5/445)* **[2011.01]**

21/432 . . . *Content retrieval operation from a local storage medium, e.g. hard-disk* **[2011.01]**

21/433 . . . *Content storage operation, e.g. storage operation in response to a pause request or caching operations* **[2011.01]**

21/4335 . . . . *Housekeeping operations, e.g. prioritizing content for deletion because of storage space restrictions* **[2011.01]**

21/434 . . . *Disassembling of a multiplex stream, e.g. demultiplexing audio and video streams or extraction of additional data from a video stream; Remultiplexing of multiplex streams; Extraction or processing of SI; Disassembling of packetised elementary stream* **[2011.01]**

21/435 . . . *Processing of additional data, e.g. decrypting of additional data or reconstructing software from modules extracted from the transport stream* **[2011.01]**

21/436 . . . *Interfacing a local distribution network, e.g. communicating with another STB or inside the home* **[2011.01]**

21/4363 . . . . *Adapting the video stream to a specific local network, e.g. a IEEE 1394 or Bluetooth network* **[2011.01]**

21/4367 . . . . *Establishing a secure communication between the client and a peripheral device or smart card (arrangements for secret or secure communication H04L 9/00; security arrangements for protecting computers or computer systems against unauthorised activity G06F 21/00)* **[2011.01]**

21/437 . . . *Interfacing the upstream path of the transmission network, e.g. for transmitting client requests to a VOD server* **[2011.01]**

21/438 . . . *Interfacing the downstream path of the transmission network originating from a server, e.g. retrieving MPEG packets from an IP network* **[2011.01]**

21/4385 . . . . *Multiplex stream processing, e.g. multiplex stream decrypting* **[2011.01]**

21/439 . . . *Processing of audio elementary streams* **[2011.01]**

21/44 . . . *Processing of video elementary streams, e.g. splicing a video clip retrieved from local storage with an incoming video stream or rendering scenes according to MPEG-4 scene graphs* **[2011.01]**

21/4402 . . . . *involving reformatting operations of video signals for household redistribution, storage or real-time display* **[2011.01]**

21/4405 . . . . *involving video stream decryption (arrangements for secret or secure communication H04L 9/00)* **[2011.01]**

21/4408 . . . . *involving video stream encryption, e.g. re-encrypting a decrypted video stream for redistribution in a home network (arrangements for secret or secure communication H04L 9/00)* **[2011.01]**

21/441 . . . *Acquiring end-user identification* **[2011.01]**

21/4415 . . . . *using biometric characteristics of the user, e.g. by voice recognition or fingerprint scanning* **[2011.01]**

21/442 . . . *Monitoring of processes or resources, e.g. detecting the failure of a recording device, monitoring the downstream bandwidth, the number of times a movie has been viewed or the storage space available from the internal hard disk* **[2011.01]**

21/4425 . . . . *Monitoring of client processing errors or hardware failure (monitoring in electrical digital data processing G06F 11/00)* **[2011.01]**

21/443 . . . *OS processes, e.g. booting a STB, implementing a Java virtual machine in a STB or power management in a STB (arrangements for program loading or initiating G06F 9/445)* **[2011.01]**

21/45 . . *Management operations performed by the client for facilitating the reception of or the interaction with the content or administrating data related to the end-user or to the client device itself, e.g. learning user preferences for recommending movies or resolving scheduling conflicts* **[2011.01]**

21/454 . . . *Content filtering, e.g. blocking advertisements* **[2011.01]**

21/4545 . . . . *Input to filtering algorithms, e.g. filtering a region of the image* **[2011.01]**

21/458 . . . *Scheduling content for creating a personalised stream, e.g. by combining a locally stored advertisement with an incoming stream; Updating operations, e.g. for OS modules* **[2011.01]**

21/462 . . . *Content or additional data management e.g. creating a master electronic program guide from data received from the Internet and a Head-end or controlling the complexity of a video stream by scaling the resolution or bit-rate based on the client capabilities* **[2011.01]**

21/4623 . . . . *Processing of entitlement messages, e.g. ECM [Entitlement Control Message] or EMM [Entitlement Management Message]* **[2011.01]**

21/4627 . . . . *Rights management* **[2011.01]**

21/466 . . . *Learning process for intelligent management, e.g. learning user preferences for recommending movies* **[2011.01]**

21/47 . . *End-user applications (interaction techniques for graphical user interfaces G06F 3/048; receiver circuitry for displaying additional information H04N 5/445)* **[2011.01]**

21/472 . . . *End-user interface for requesting content, additional data or services; End-user interface for interacting with content, e.g. for content reservation or setting reminders, for requesting event notification or for manipulating displayed content* **[2011.01]**

21/4722 . . . . *for requesting additional data associated with the content* **[2011.01]**

21/4725 . . . . . *using interactive regions of the image, e.g. hot spots* **[2011.01]**

21/4728 . . . . *for selecting a ROI [Region Of Interest], e.g. for requesting a higher resolution version of a selected region* **[2011.01]**

21/475 . . . *End-user interface for inputting end-user data, e.g. PIN [Personal Identification Number] or preference data* **[2011.01]**

21/478 . . . *Supplemental services, e.g. displaying phone caller identification or shopping application* **[2011.01]**

21/4782 . . . . *Web browsing* **[2011.01]**

21/4784 . . . . *receiving rewards* **[2011.01]**

21/4786 . . . . *e-mailing* **[2011.01]**

21/4788 . . . . *communicating with other users, e.g. chatting* **[2011.01]**

21/482 . . . *End-user interface for program selection* **[2011.01]**

21/485 . . . *End-user interface for client configuration* **[2011.01]**
21/488 . . . *Data services, e.g. news ticker* **[2011.01]**
21/60 . *Network structure or processes for video distribution between server and client or between remote clients (data switching networks H04L 12/00; wireless communication networks H04W); Control signaling between clients, server and network components; Transmission of management data between server and client; Communication details between server and client* **[2011.01]**
21/61 . . *Network physical structure; Signal processing (H04B takes precedence)* **[2011.01]**
21/63 . . *Control signaling between client, server and network components; Network processes for video distribution between server and clients, e.g. transmitting basic layer and enhancement layers over different transmission paths, setting up a peer-to-peer communication via Internet between remote STB's; Communication protocols; Addressing* **[2011.01]**
21/633 . . . *Control signals issued by server directed to the network components or client* **[2011.01]**
21/6332 . . . . *directed to client* **[2011.01]**
21/6334 . . . . . *for authorization, e.g. by transmitting a key (arrangements for secret or secure communication H04L 9/00)* **[2011.01]**
21/6336 . . . . . *directed to decoder* **[2011.01]**
21/6338 . . . . *directed to network* **[2011.01]**
21/637 . . . *Control signals issued by the client directed to the server or network components* **[2011.01]**
21/6371 . . . . *directed to network* **[2011.01]**
21/6373 . . . . *for rate control* **[2011.01]**
21/6375 . . . . *for requesting retransmission* **[2011.01]**
21/6377 . . . . *directed to server* **[2011.01]**
21/6379 . . . . . *directed to encoder* **[2011.01]**
21/64 . . . *Addressing* **[2011.01]**
21/6402 . . . . *Address allocation for clients* **[2011.01]**
21/6405 . . . . *Multicasting* **[2011.01]**
21/6408 . . . . *Unicasting* **[2011.01]**

H04Q **SELECTING** (switches, relays, selectors H01H; wireless communication networks H04W) **[1,2009.01]**

(1) This subclass covers :
– methods, circuits, or apparatus for establishing selectively a connection between a desired number of stations (normally two), or between a main station and a desired number of substations (normally one) for the purpose of transferring information via this connection after it has been established;

– selective calling arrangements over connections already established. **[2009.01]**

(2) In this subclass, the following terms or expressions are used with the meanings indicated:
– "subscriber" is a general term for terminal equipment, e.g. telephone for public use;
– "substation" means a subscriber or monitoring equipment which may connect a single subscriber to a line without choice as to subscriber;
– "satellite" is a kind of exchange the operation of which depends upon control signals received from a supervisory exchange;
– "switching centres" includes exchanges and satellites.

Subclass index

1/00 Details of selecting apparatus or arrangements
1/02 . Constructional details
1/04 . . Frames or mounting racks for selector switches; Accessories therefor, e.g. frame cover
1/06 . . Cable ducts or mountings specially adapted for exchange installations
1/08 . . Frames or mounting racks for relays; Accessories therefor
1/10 . . Exchange station construction
1/12 . . Arrangements of multiple bars with or without pivotable frames
1/14 . . Distribution frames
1/16 . . Wiring arrangements for selector switches or relays in frames
1/18 . Electrical details
1/20 . . Testing circuits or apparatus; Circuits or apparatus for detecting, indicating, or signalling faults or troubles
1/22 . . . Automatic arrangements
1/24 . . . . for connection devices
1/26 . . . . for signalling trouble in unoccupied sub-exchanges
1/28 . . Current-supply circuits or arrangements for selection equipment at exchanges
1/30 . . Signalling arrangements; Manipulation of signalling currents (multiplex systems providing for calling or supervisory signals H04J 1/14, H04J 3/12)
1/32 . . . using trains of dc pulses (H04Q 1/39 takes precedence) **[3]**
1/34 . . . . Impulse regenerators with mechanical or other non-electrical marking arrangements
1/36 . . . . Pulse-correcting arrangements, e.g. for reducing effects due to interference
1/38 . . . using combinations of direct currents of different amplitudes or polarities over line conductors or combination of line conductors
1/39 . . . using coded pulse groups **[3]**
1/40 . . . whereby duration of pulse or interval between two pulses is variable
1/42 . . . . involving the position of a pulse in a cycle
1/44 . . . using ac (H04Q 1/50 takes precedence) **[3]**
1/442 . . . . with out-of-voice band signalling frequencies **[3]**
1/444 . . . . with voice-band signalling frequencies **[3]**
1/446 . . . . . using one signalling frequency (H04Q 1/46 takes precedence) **[3]**
1/448 . . . . . with conversion of a single frequency signal into a digital signal **[3]**
1/45 . . . . . using multi-frequency signalling (H04Q 1/46 takes precedence) **[3]**
1/453 . . . . . in which m-out-of-n signalling frequencies are transmitted **[3]**
1/457 . . . . . with conversion of multi-frequency signals into digital signals **[3]**
1/46 . . . . . comprising means for distinguishing between a signalling current of predetermined frequency and a complex current containing that frequency, e.g. speech current **[3]**
1/48 . . . Induced-current signalling arrangements
1/50 . . . Conversion between different kinds of signals
1/54 . . Amplifier switched-on automatically in dependence on automatically selected lines
1/56 . . Balancing circuitry switched-on automatically in dependence on automatically selected lines

3/00 Selecting arrangements (H04Q 5/00 to H04Q 11/00 take precedence)
3/02 . Circuit arrangements for selectors responsive to a permutation code
3/04 . Circuit arrangements for receivers of routing digits
3/06 . . for group or trunk group selectors
3/08 . . for local or long-distance selectors
3/10 . . for PBX selectors, i.e. private branch exchange selectors
3/12 . . for line selectors providing transfer of routing digits
3/14 . . for two-way operation selectors
3/16 . . for marking-switches
3/18 . Circuit arrangements for first stage of hunting switching
3/20 . . for preselectors
3/22 . . . comprising common calling and disconnecting circuit
3/24 . . for line finders
3/26 . . . comprising common calling and disconnecting circuit
3/28 . . . comprising main groups and subgroups
3/30 . . Selector finders, i.e. allotters
3/32 . Circuit arrangements for second or subsequent stages of hunting switching **[2]**
3/34 . . for the second preselection stage
3/36 . . for the second line-finder stage
3/38 . . for stages after the group-selector stage
3/40 . . for stages after the line selector, e.g. for extension selector
3/42 . Circuit arrangements for indirect selecting controlled by common circuits, e.g. register controller, marker
3/44 . . using revertive control
3/46 . . using signals other than revertive impulses
3/47 . . using translators

3/48 . . using markers
3/49 . . . for end-to-end marking
3/495 . . . for routing connecting paths
3/52 . . using static devices in switching stages, e.g. electronic switching arrangements **[2]**
3/54 . . in which the logic circuitry controlling the exchange is centralised
3/545 . . . using a stored programme **[4]**
3/55 . . . using wired logic circuitry **[4]**
3/555 . . . . being comprised by electro-magnetic devices **[4]**
3/56 . . in which the control signals are multiplexed **[2]**
3/58 . Arrangements providing connection between main exchange and sub-exchange or satellite
3/60 . . for connecting to satellites or concentrators which connect one or more exchange lines with a group of local lines
3/62 . . for connecting to private branch exchanges
3/64 . Distributing or queuing
3/66 . . Traffic distributors
3/68 . . Grouping or interlacing selector groups or stages
3/70 . Identification of class of calling subscriber
3/72 . Finding out and indicating number of calling subscriber
3/74 . . Identification of subscriber calling from a party-line
3/76 . Translation from the called subscriber's number to the outgoing or incoming control information **[4]**
3/78 . Temporary storage of information of calling or called subscriber (intermediate storage means for telegraphic communication H04L 13/08) **[4]**

5/00 Selecting arrangements wherein two or more subscriber stations are connected by the same line to the exchange

5/02 . with direct connection for all subscribers, i.e. party-line system (H04Q 5/24 takes precedence)
5/04 . . Signalling by currents in one or other or both line wires or additional wires
5/06 . . Signalling by amplitude or polarity of dc
5/08 . . Signalling by continuous ac
5/10 . . . using single frequencies for different subscribers
5/12 . . . using combinations of frequencies
5/14 . . Signalling by pulses
5/16 . . . by predetermined number of pulses
5/18 . with indirect connection, i.e. through subordinate switching centre
5/20 . . the subordinate centre permitting interconnection of subscribers connected thereto
5/22 . . the subordinate centre not permitting interconnection of subscribers connected thereto
5/24 . for two-party-line systems

9/00 Arrangements in telecontrol or telemetry systems for selectively calling a substation from a main station, in which substation desired apparatus is selected for applying a control signal thereto or for obtaining measured values therefrom

9/02 . Automatically-operated arrangements
9/04 . Arrangements for synchronous operation
9/06 . Calling by using amplitude or polarity of dc
9/08 . Calling by using continuous ac
9/10 . . using single different frequencies
9/12 . . using combinations of frequencies
9/14 . Calling by using pulses
9/16 . . by predetermined number of pulses

11/00 Selecting arrangements for multiplex systems (multiplex systems H04J)

11/02 . for frequency-division multiplexing
11/04 . for time-division multiplexing
11/06 . . Time-space-time switching **[5]**
11/08 . . Time only switching **[5]**

H04R LOUDSPEAKERS, MICROPHONES, GRAMOPHONE PICK-UPS OR LIKE ACOUSTIC ELECTROMECHANICAL TRANSDUCERS; **DEAF-AID SETS**; **PUBLIC ADDRESS SYSTEMS** (generating mechanical vibrations in general B06B; transducers for measuring particular variables G01; transducers in clocks G04; producing sounds with frequency not determined by supply frequency G10K; transducers in recording or reproducing heads G11B; transducers in motors H02) **[6]**

(1) This subclass covers:
- loudspeakers, microphones, gramophone pick-ups or like transducers producing acoustic waves or variations of electric current or voltage;
- arrangements actuated by variations of electric current or voltage for cutting grooves in records;
- circuits for the above-mentioned arrangements;
- monitoring or testing the above-mentioned equipment.

(2) Attention is drawn to the Notes following the titles of class B81 and subclass B81B relating to "micro-structural devices" and "micro-structural systems". **[7]**

Subclass index

1/00 **Details of transducers** (diaphragms H04R 7/00; characterised by the nature of the transducer, see the relevant group of main groups H04R 9/00 to H04R 23/00; mounting radio sets or communication systems in helmets A42B 3/30; mountings specially adapted for telephone equipment H04M 1/02)

1/02 . Casings; Cabinets; Mountings therein (H04R 1/28 takes precedence)

1/04 . . Structural association of microphone with electric circuitry therefor (in deaf-aid sets H04R 25/00)

1/06 . Arranging circuit leads; Relieving strain on circuit leads

1/08 . Mouthpieces; Attachments therefor

1/10 . Earpieces; Attachments therefor

1/12 . Sanitary or hygienic devices for mouthpieces or earpieces, e.g. for protecting against infection

1/14 . Throat mountings for microphones

1/16 . Mounting or connecting stylus to transducer with or without damping means

1/18 . . Holders for styli; Mounting holders on transducers

1/20 . Arrangements for obtaining desired frequency or directional characteristics (for stereophonic purposes H04R 5/00; speech enhancement by processing of the speech signal G10L 21/02)

1/22 . . for obtaining desired frequency characteristic only (circuits for combining transducers having different responses H04R 3/00)

1/24 . . . Structural combinations of separate transducers or of parts of the same transducer and responsive respectively to two or more frequency ranges

1/26 . . . Spatial arrangement of separate transducers responsive to two or more frequency ranges

1/28 . . . Transducer mountings or enclosures designed for specific frequency response; Transducer enclosures modified by provision of mechanical or acoustic impedances, e.g. resonator, damping means

1/30 . . . Combinations of transducers with horns, e.g. with mechanical matching means (horns in general G10K)

1/32 . . for obtaining desired directional characteristic only

1/34 . . . by using a single transducer with sound reflecting, diffracting, directing or guiding means

1/36 . . . . by using a single aperture of dimensions not greater than the shortest operating wavelength

1/38 . . . . in which sound waves act upon both sides of a diaphragm and incorporating acoustic phase-shifting means, e.g. pressure-gradient microphone

1/40 . . . by combining a number of identical transducers

1/42 . Combinations of transducers with fluid-pressure or other non-electrical amplifying means

1/44 . Special adaptations for subaqueous use, e.g. for hydrophone

1/46 . Special adaptations for use as contact microphones, e.g. on musical instrument, on stethoscope (throat mountings H04R 1/14)

3/00 **Circuits for transducers** (for stereophonic arrangements H04R 5/04; arrangements for producing a reverberation or echo sound G10K 15/08; amplifiers H03F)

3/02 . for preventing acoustic reaction

3/04 . for correcting frequency response

3/06 . . of electrostatic transducers

3/08 . . of electromagnetic transducers

3/10 . . of variable-resistance microphones

3/12 . for distributing signals to two or more loudspeakers

3/14 . . Cross-over networks

5/00 **Stereophonic arrangements** (stereophonic pick-ups H04R 9/16, H04R 11/12, H04R 17/08, H04R 19/10)

Note

In this group, the following expression is used with the meaning indicated:
– "stereophonic arrangements" covers quadraphonic or similar arrangements. **[3]**

5/02 . Spatial or constructional arrangements of loudspeakers

5/027 . Spatial or constructional arrangements of microphones, e.g. in dummy heads **[3]**

5/033 . Headphones for stereophonic communication **[3]**

5/04 . Circuit arrangements (combinations of amplifiers H03F 3/68; stereophonic systems H04S)

7/00 **Diaphragms for electromechanical transducers** (in general F16J 3/00); **Cones** (for musical instruments G10)

7/02 . characterised by the construction

7/04 . . Plane diaphragms

7/06 . . . comprising a plurality of sections or layers

7/08 . . . . comprising superposed layers separated by air or other fluid

7/10 . . . . comprising superposed layers in contact

7/12 . . Non-planar diaphragms or cones

7/14 . . . corrugated, pleated, or ribbed

7/16 . Mounting or tensioning of diaphragms or cones

7/18 . . at the periphery

7/20 . . . Securing diaphragm or cone resiliently to support by flexible material, springs, cords, or strands

7/22 . . . Clamping rim of diaphragm or cone against seating

7/24 . . Tensioning by means acting directly on free portion of diaphragm or cone

7/26 . Damping by means acting directly on free portion of diaphragm or cone (air damping H04R 1/28)

9/00 **Transducers of moving-coil, moving-strip, or moving-wire type**

9/02 . Details

9/04 . . Construction, mounting, or centering of coil

9/06 . Loudspeakers

9/08 . Microphones

9/10 . Telephone receivers

9/12 . Gramophone pick-ups using a stylus; Recorders using a stylus

9/14 . . comprising two or more styli or transducers (H04R 9/16 takes precedence)
9/16 . . signals being recorded or played-back by vibration of a stylus in two orthogonal directions simultaneously
9/18 . Resonant transducers, i.e. adapted to produce maximum output at a predetermined frequency

11/00 **Transducers of moving-armature or moving-core type** (acoustic diaphragm of magnetisable material directly co-acting with electromagnet H04R 13/00)
11/02 . Loudspeakers
11/04 . Microphones
11/06 . Telephone receivers
11/08 . Gramophone pick-ups using a stylus; Recorders using a stylus
11/10 . . comprising two or more styli or transducers (H04R 11/12 takes precedence)
11/12 . . signals being recorded or played-back by vibration of a stylus in two orthogonal directions simultaneously
11/14 . Resonant transducers, i.e. adapted to produce maximum output at a predetermined frequency

13/00 **Transducers having an acoustic diaphragm of magnetisable material directly co-acting with electromagnet**
13/02 . Telephone receivers

15/00 **Magnetostrictive transducers** (magnetostrictive elements in general H01L 41/00)
15/02 . Resonant transducers, i.e. adapted to produce maximum output at a predetermined frequency

17/00 **Piezo-electric transducers**; **Electrostrictive transducers** (piezo-electric or electrostrictive elements in general H01L 41/00; details of piezo-electric or electrostrictive motors, generators or positioners H02N 2/00)
17/02 . Microphones
17/04 . Gramophone pick-ups using a stylus; Recorders using a stylus
17/06 . . comprising two or more styli or transducers (H04R 17/08 takes precedence)
17/08 . . signals being recorded or played-back by vibration of a stylus in two orthogonal directions simultaneously
17/10 . Resonant transducers, i.e. adapted to produce maximum output at a predetermined frequency

19/00 **Electrostatic transducers**
19/01 . characterised by the use of electrets **[3]**
19/02 . Loudspeakers (H04R 19/01 takes precedence) **[3]**
19/04 . Microphones (H04R 19/01 takes precedence) **[3]**
19/06 . Gramophone pick-ups using a stylus; Recorders using a stylus (H04R 19/01 takes precedence) **[3]**
19/08 . . comprising two or more styli or transducers (H04R 19/10 takes precedence)
19/10 . . signals being recorded or played-back by vibration of a stylus in two orthogonal directions simultaneously

21/00 **Variable-resistance transducers** (gaseous-resistance transducers H04R 23/00; magneto-resistive transducers H04R 23/00)
21/02 . Microphones
21/04 . Gramophone pick-ups using a stylus; Recorders using a stylus

23/00 **Transducers other than those covered by groups H04R 9/00 to H04R 21/00**
23/02 . Transducers using more than one principle simultaneously

25/00 **Deaf-aid sets** (constructions of transducers per se H04R 9/00 to H04R 23/00; structural combination with spectacle frames G02C 11/06; processing of speech signals G10L 21/00)
25/02 . adapted to be supported entirely by ear
25/04 . comprising pocket amplifiers

27/00 **Public address systems** (circuits for preventing acoustic reaction H04R 3/02; circuits for distributing signals to loudspeakers H04R 3/12; amplifiers H03F)
27/02 . Amplifying systems for the deaf
27/04 . Electric megaphones

29/00 **Monitoring arrangements**; **Testing arrangements**

31/00 **Apparatus or processes specially adapted for the manufacture of transducers or diaphragms therefor** (processes or apparatus specially adapted for the manufacture of micro-structural devices or systems, e.g. in combination with electrical devices, B81C)

H04S **STEREOPHONIC SYSTEMS** (information storage on discs or tapes G11B; broadcast systems for the distribution of stereophonic information H04H 20/88; multiplex systems in general H04J) **[3]**

Note

In this subclass, the following expression is used with the meaning indicated:
– "stereophonic systems" covers quadraphonic or similar systems. **[3]**

1/00 **Two-channel systems** (H04S 5/00, H04S 7/00 take precedence) **[3]**

3/00 **Systems employing more than two channels, e.g. quadraphonic** (H04S 5/00, H04S 7/00 take precedence) **[3]**
3/02 . of the matrix type, i.e. in which input signals are combined algebraically, e.g. after having been phase shifted with respect to each other **[3]**

5/00 **Pseudo-stereo systems, e.g. in which additional channel signals are derived from monophonic signals by means of phase shifting, time delay or reverberation** (arrangements for producing a reverberation or echo sound G10K 15/08) **[3]**

5/02 **.** of the pseudo four-channel type, e.g. in which rear channel signals are derived from two-channel stereo signals **[3]**

7/00 **Indicating arrangements**; **Control arrangements, e.g. balance control [3]**

H04W WIRELESS COMMUNICATION NETWORKS [2009.01]

(1) This subclass covers:
- communication networks for selectively establishing one or a plurality of wireless communication links between a desired number of users or between users and network equipment, for the purpose of transferring information via these wireless communication links; **[2009.01]**
- networks deploying an infrastructure for mobility management of wireless users connected thereto, e.g. cellular networks, WLAN [Wireless Local Area Network], wireless access networks, e.g. WLL [Wireless Local Loop] or self-organising wireless communication networks, e.g. ad hoc networks; **[2009.01]**
- planning or deployment specially adapted for the above-mentioned wireless networks; **[2009.01]**
- services or facilities specially adapted for the above-mentioned wireless networks; **[2009.01]**
- arrangements or techniques specially adapted for the operation of the above-mentioned wireless networks. **[2009.01]**

(2) This subclass does not cover :
- communication systems using wireless extensions, i.e. wireless links without selective communication, e.g. cordless telephones, which are covered by group H04M 1/72; **[2009.01]**
- broadcast communication, which is covered by subclass H04H. **[2009.01]**

(3) In this subclass, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place. **[2009.01]**

4/00 **Services or facilities specially adapted for wireless communication networks [2009.01]**

4/02 **.** Services making use of the location of users or terminals **[2009.01]**

4/04 **. .** in a dedicated environment, e.g. buildings or vehicles **[2009.01]**

4/06 **.** Selective distribution of broadcast; Services to user groups; One-way selective calling services **[2009.01]**

4/08 **. .** User group management **[2009.01]**

4/10 **. .** Push-to-Talk or Push-on-Call services **[2009.01]**

4/12 **.** Messaging, e.g. SMS [Short Messaging Service]; Mailboxes; Announcements, e.g. informing users on the status or progress of a communication request **[2009.01]**

4/14 **. .** Short messaging services, e.g. SMS or USSD [Unstructured Supplementary Service Data] **[2009.01]**

4/16 **.** Communication-related supplementary services, e.g. call-transfer or call-hold **[2009.01]**

4/18 **.** Information format or content conversion, e.g. adaptation by the network of the transmitted or received information for the purpose of wireless delivery to users or terminals **[2009.01]**

4/20 **.** Auxiliary data signalling, i.e. transmitting data via a non-traffic channel **[2009.01]**

4/22 **.** Emergency connection handling **[2009.01]**

4/24 **.** Accounting or billing **[2009.01]**

4/26 **. .** Usage measurement **[2009.01]**

8/00 **Network data management [2009.01]**

8/02 **.** Processing of mobility data, e.g. registration information at HLR [Home Location Register] or VLR [Visitor Location Register]; Transfer of mobility data, e.g. between HLR, VLR or external networks **[2009.01]**

8/04 **. .** Registration at HLR or HSS [Home Subscriber Server] **[2009.01]**

8/06 **. .** Registration at serving network Location Register, VLR or user mobility server **[2009.01]**

8/08 **. .** Mobility data transfer **[2009.01]**

8/10 **. . .** between location register and external networks **[2009.01]**

8/12 **. . .** between location registers or mobility servers **[2009.01]**

8/14 **. . .** between corresponding nodes **[2009.01]**

8/16 **. . .** selectively restricting mobility tracking **[2009.01]**

8/18 **.** Processing of user or subscriber data, e.g. subscribed services, user preferences or user profiles; Transfer of user or subscriber data **[2009.01]**

8/20 **. .** Transfer of user or subscriber data **[2009.01]**

8/22 **.** Processing or transfer of terminal data, e.g. status or physical capabilities **[2009.01]**

8/24 **. .** Transfer of terminal data **[2009.01]**

8/26 **.** Network addressing or numbering for mobility support **[2009.01]**

8/28 **. .** Number portability **[2009.01]**

8/30 **.** Network data restoration **[2009.01]**

12/00 **Security arrangements, e.g. access security or fraud detection**; **Authentication, e.g. verifying user identity or authorisation**; **Protecting privacy or anonymity [2009.01]**

12/02 **.** Protecting privacy or anonymity **[2009.01]**

12/04 **.** Key management **[2009.01]**

12/06 **.** Authentication **[2009.01]**

12/08 **.** Access security **[2009.01]**

12/10 **.** Integrity **[2009.01]**

12/12 **.** Fraud detection **[2009.01]**

16/00 Network planning, e.g. coverage or traffic planning tools; **Network deployment, e.g. resource partitioning or cell structures [2009.01]**

16/02 . Resource partitioning among network components, e.g. reuse partitioning **[2009.01]**
16/04 . . Traffic adaptive resource partitioning **[2009.01]**
16/06 . . Hybrid resource partitioning, e.g. channel borrowing **[2009.01]**
16/08 . . . Load shedding arrangements **[2009.01]**
16/10 . . Dynamic resource partitioning **[2009.01]**
16/12 . . Fixed resource partitioning **[2009.01]**
16/14 . Spectrum sharing arrangements **[2009.01]**
16/16 . . for PBS [Private Base Station] arrangements **[2009.01]**
16/18 . Network planning tools **[2009.01]**
16/20 . . for indoor coverage or short range network deployment **[2009.01]**
16/22 . Traffic simulation tools or models **[2009.01]**
16/24 . Cell structures **[2009.01]**
16/26 . . Cell enhancers, e.g. for tunnels or building shadow **[2009.01]**
16/28 . . using beam steering **[2009.01]**
16/30 . . Special cell shapes, e.g. doughnuts or ring cells **[2009.01]**
16/32 . . Hierarchical cell structures **[2009.01]**

24/00 Supervisory, monitoring or testing arrangements [2009.01]

24/02 . Arrangements for optimising operational condition **[2009.01]**
24/04 . Arrangements for maintaining operational condition **[2009.01]**
24/06 . Testing using simulated traffic **[2009.01]**
24/08 . Testing using real traffic **[2009.01]**
24/10 . Scheduling measurement reports **[2009.01]**

28/00 Network traffic or resource management [2009.01]

28/02 . Traffic management, e.g. flow control or congestion control **[2009.01]**
28/04 . . Error control **[2009.01]**
28/06 . . Optimising, e.g. header compression, information sizing **[2009.01]**
28/08 . . Load balancing or load distribution **[2009.01]**
28/10 . . Flow control **[2009.01]**
28/12 . . . using signalling between network elements **[2009.01]**
28/14 . . . using intermediate storage **[2009.01]**
28/16 . Central resource management; Negotiation of resources, e.g. negotiating bandwidth or QoS [Quality of Service] **[2009.01]**
28/18 . . Negotiating wireless communication parameters **[2009.01]**
28/20 . . . Negotiating bandwidth **[2009.01]**
28/22 . . . Negotiating communication rate **[2009.01]**
28/24 . . Negotiating SLA [Service Level Agreement]; Negotiating QoS [Quality of Service] **[2009.01]**
28/26 . . Resource reservation **[2009.01]**

36/00 Handoff or reselecting arrangements [2009.01]

36/02 . Buffering or recovering information during reselection **[2009.01]**
36/04 . Reselecting a cell layer in multi-layered cells **[2009.01]**
36/06 . Reselecting a communication resource in the serving access point **[2009.01]**
36/08 . Reselecting an access point **[2009.01]**
36/10 . Reselecting an access point controller **[2009.01]**
36/12 . Reselecting a serving backbone network switching or routing node **[2009.01]**
36/14 . Reselecting a network or an air interface **[2009.01]**
36/16 . Performing reselection for specific purposes **[2009.01]**
36/18 . . for allowing seamless reselection, e.g. soft reselection **[2009.01]**
36/20 . . for optimising the interference level **[2009.01]**
36/22 . . for handling the traffic **[2009.01]**
36/24 . Reselection being triggered by specific parameters **[2009.01]**
36/26 . . by agreed or negotiated communication parameters **[2009.01]**
36/28 . . . involving a plurality of connections, e.g. multi-call or multi-bearer connections **[2009.01]**
36/30 . . by measured or perceived connection quality data **[2009.01]**
36/32 . . by location or mobility data, e.g. speed data **[2009.01]**
36/34 . Reselection control **[2009.01]**
36/36 . . by user or terminal equipment **[2009.01]**
36/38 . . by fixed network equipment **[2009.01]**

40/00 Communication routing or communication path finding [2009.01]

40/02 . Communication route or path selection, e.g. power-based or shortest path routing **[2009.01]**
40/04 . . based on wireless node resources **[2009.01]**
40/06 . . . based on characteristics of available antennas **[2009.01]**
40/08 . . . based on transmission power **[2009.01]**
40/10 . . . based on available power or energy **[2009.01]**
40/12 . . based on transmission quality or channel quality **[2009.01]**
40/14 . . . based on stability **[2009.01]**
40/16 . . . based on interference **[2009.01]**
40/18 . . based on predicted events **[2009.01]**
40/20 . . based on geographic position or location **[2009.01]**
40/22 . . using selective relaying for reaching a BTS [Base Transceiver Station] or an access point **[2009.01]**
40/24 . Connectivity information management, e.g. connectivity discovery or connectivity update **[2009.01]**
40/26 . . for hybrid routing by combining proactive and reactive routing **[2009.01]**
40/28 . . for reactive routing **[2009.01]**
40/30 . . for proactive routing **[2009.01]**
40/32 . . for defining a routing cluster membership **[2009.01]**
40/34 . Modification of an existing route **[2009.01]**
40/36 . . due to handover **[2009.01]**
40/38 . . adapting due to varying relative distances between nodes **[2009.01]**

48/00 Access restriction; **Network selection**; **Access point selection [2009.01]**

48/02 . Access restriction performed under specific conditions **[2009.01]**
48/04 . . based on user or terminal location or mobility data, e.g. moving direction or speed **[2009.01]**
48/06 . . based on traffic conditions **[2009.01]**
48/08 . Access restriction or access information delivery, e.g. discovery data delivery **[2009.01]**
48/10 . . using broadcasted information **[2009.01]**
48/12 . . using downlink control channel **[2009.01]**
48/14 . . using user query **[2009.01]**

48/16 . Discovering; Processing access restriction or access information **[2009.01]**
48/18 . Selecting a network or a communication service **[2009.01]**
48/20 . Selecting an access point **[2009.01]**

52/00 Power management, e.g. TPC [Transmission Power Control], power saving or power classes [2009.01]
52/02 . Power saving arrangements **[2009.01]**
52/04 . TPC [Transmission power control] **[2009.01]**
52/06 . . TPC algorithms **[2009.01]**
52/08 . . . Closed loop power control **[2009.01]**
52/10 . . . Open loop power control **[2009.01]**
52/12 . . . Outer and inner loops **[2009.01]**
52/14 . . . Separate analysis of uplink or downlink **[2009.01]**
52/16 . . . Deriving transmission power values from another channel **[2009.01]**
52/18 . . TPC being performed according to specific parameters **[2009.01]**
52/20 . . . using error rate **[2009.01]**
52/22 . . . taking into account previous information or commands **[2009.01]**
52/24 . . . using SIR [Signal to Interference Ratio] or other wireless path parameters **[2009.01]**
52/26 . . . using transmission rate or quality of service QoS [Quality of Service] **[2009.01]**
52/28 . . . using user profile, e.g. mobile speed, priority or network state, e.g. standby, idle or non-transmission **[2009.01]**
52/30 . . using constraints in the total amount of available transmission power **[2009.01]**
52/32 . . . TPC of broadcast or control channels **[2009.01]**
52/34 . . . TPC management, i.e. sharing limited amount of power among users or channels or data types, e.g. cell loading **[2009.01]**
52/36 . . . with a discrete range or set of values, e.g. step size, ramping or offsets **[2009.01]**
52/38 . . TPC being performed in particular situations **[2009.01]**
52/40 . . . during macro-diversity or soft handoff **[2009.01]**
52/42 . . . in systems with time, space, frequency or polarisation diversity **[2009.01]**
52/44 . . . in connection with interruption of transmission **[2009.01]**
52/46 . . . in multi-hop networks, e.g. wireless relay networks **[2009.01]**
52/48 . . . during retransmission after error or non-acknowledgment **[2009.01]**
52/50 . . . at the moment of starting communication in a multiple access environment **[2009.01]**
52/52 . . using AGC [Automatic Gain Control] circuits or amplifiers **[2009.01]**
52/54 . . Signalisation aspects of the TPC commands, e.g. frame structure **[2009.01]**
52/56 . . . Detection of errors of TPC bits **[2009.01]**
52/58 . . . Format of the TPC bits **[2009.01]**
52/60 . . . using different transmission rates for TPC commands **[2009.01]**

56/00 Synchronisation arrangements [2009.01]

60/00 Registration, e.g. affiliation to network; De-registration, e.g. terminating affiliation [2009.01]
60/02 . by periodical registration **[2009.01]**
60/04 . using triggered events **[2009.01]**
60/06 . De-registration or detaching **[2009.01]**

64/00 Locating users or terminals for network management purposes, e.g. mobility management [2009.01]

68/00 Notification of users, e.g. alerting for incoming communication or change of service [2009.01]
68/02 . Arrangements for increasing efficiency of notification or paging channel **[2009.01]**
68/04 . multi-step notification using statistical or historical mobility data **[2009.01]**
68/06 . using multi-step notification by changing the notification area **[2009.01]**
68/08 . using multi-step notification by increasing the notification area **[2009.01]**
68/10 . using simulcast notification **[2009.01]**
68/12 . Inter-network notification **[2009.01]**

72/00 Local resource management, e.g. selection or allocation of wireless resources or wireless traffic scheduling [2009.01]
72/02 . Selection of wireless resources by user or terminal **[2009.01]**
72/04 . Wireless resource allocation **[2009.01]**
72/06 . . based on ranking criteria of the wireless resources **[2009.01]**
72/08 . . based on quality criteria **[2009.01]**
72/10 . . based on priority criteria **[2009.01]**
72/12 . Wireless traffic scheduling **[2009.01]**
72/14 . . using a grant channel **[2009.01]**

74/00 Wireless channel access, e.g. scheduled or random access [2009.01]
74/02 . Hybrid access techniques **[2009.01]**
74/04 . Scheduled access **[2009.01]**
74/06 . . using polling **[2009.01]**
74/08 . Non-scheduled access, e.g. random access, ALOHA or CSMA [Carrier Sense Multiple Access] **[2009.01]**

76/00 Connection management, e.g. connection set-up, manipulation or release [2009.01]
76/02 . Connection set-up **[2009.01]**
76/04 . Connection manipulation **[2009.01]**
76/06 . Connection release **[2009.01]**

80/00 Wireless network protocols or protocol adaptations to wireless operation, e.g. WAP [Wireless Application Protocol] [2009.01]
80/02 . Data link layer protocols **[2009.01]**
80/04 . Network layer protocols, e.g. mobile IP [Internet Protocol] **[2009.01]**
80/06 . Transport layer protocols, e.g. TCP [Transport Control Protocol] over wireless **[2009.01]**
80/08 . Upper layer protocols **[2009.01]**
80/10 . . adapted for session management, e.g. SIP [Session Initiation Protocol] **[2009.01]**
80/12 . . Application layer protocols, e.g. WAP **[2009.01]**

84/00 Network topologies [2009.01]
84/02 . Hierarchically pre-organised networks, e.g. paging networks, cellular networks, WLAN [Wireless Local Area Network] or WLL [Wireless Local Loop] **[2009.01]**
84/04 . . Large scale networks; Deep hierarchical networks **[2009.01]**
84/06 . . . Airborne or Satellite Networks **[2009.01]**
84/08 . . . Trunked mobile radio systems **[2009.01]**

84/10 . . Small scale networks; Flat hierarchical networks **[2009.01]**
84/12 . . . WLAN [Wireless Local Area Networks] **[2009.01]**
84/14 . . . WLL [Wireless Local Loop]; RLL [Radio Local Loop] **[2009.01]**
84/16 . . . WPBX [Wireless Private Branch Exchange] **[2009.01]**
84/18 . Self-organising networks, e.g. ad hoc networks or sensor networks **[2009.01]**
84/20 . . Master-slave arrangements **[2009.01]**
84/22 . . with access to wired networks **[2009.01]**

88/00 Devices specially adapted for wireless communication networks, e.g. terminals, base stations or access point devices [2009.01]

88/02 . Terminal devices **[2009.01]**
88/04 . . adapted for relaying to or from another terminal or user **[2009.01]**
88/06 . . adapted for operation in multiple networks, e.g. multi-mode terminals **[2009.01]**
88/08 . Access point devices **[2009.01]**
88/10 . . adapted for operation in multiple networks, e.g. multi-mode access points **[2009.01]**
88/12 . Access point controller devices **[2009.01]**
88/14 . Backbone network devices **[2009.01]**
88/16 . Gateway arrangements **[2009.01]**
88/18 . Service support; Network management devices **[2009.01]**

92/00 Interfaces specially adapted for wireless communication networks [2009.01]

92/02 . Inter-networking arrangements **[2009.01]**
92/04 . Interfaces between hierarchically different network devices **[2009.01]**
92/06 . . between gateways and public network devices **[2009.01]**
92/08 . . between user and terminal device **[2009.01]**
92/10 . . between terminal device and access point, i.e. wireless air interface **[2009.01]**
92/12 . . between access points and access point controllers **[2009.01]**
92/14 . . between access point controllers and backbone network device **[2009.01]**
92/16 . Interfaces between hierarchically similar devices **[2009.01]**
92/18 . . between terminal devices **[2009.01]**
92/20 . . between access points **[2009.01]**
92/22 . . between access point controllers **[2009.01]**
92/24 . . between backbone network devices **[2009.01]**

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

H05 ELECTRIC TECHNIQUES NOT OTHERWISE PROVIDED FOR

H05B ELECTRIC HEATING; **ELECTRIC LIGHTING NOT OTHERWISE PROVIDED FOR** (apparatus for special application, see the relevant places, e.g. A47J, B21J, B21K, C21, C22, C23, F21, F24, F27)

Note

Attention is drawn to Note III following the Contents of Section of section H. **[3]**

Subclass index

Heating

1/00 Details of electric heating devices

1/02 . Automatic switching arrangements specially adapted to heating apparatus (control of temperature in general G05D 23/00; thermally-actuated switches H01H 37/00)

3/00 Ohmic-resistance heating

3/02 . Details

3/03 . . Electrodes (electrothermic treatment of ores C22B 4/00) **[2]**

3/04 . . Waterproof or air-tight seals for heaters

3/06 . . Heater elements structurally combined with coupling elements or with holders

3/08 . . . having electric connections specially adapted for high temperatures

3/10 . Heating elements characterised by the composition or nature of the materials or by the arrangement of the conductor (compositions per se, see the relevant subclasses)

3/12 . . characterised by the composition or nature of the conductive material

3/14 . . . the material being non-metallic

3/16 . . the conductor being mounted on an insulating base

3/18 . . the conductor being embedded in an insulating material

3/20 . Heating elements having extended surface area substantially in a two-dimensional plane, e.g. plate-heater (H05B 3/62, H05B 3/68, H05B 3/78, H05B 3/84 take precedence) **[5]**

3/22 . . non-flexible

3/24 . . . heating conductor being self-supporting

3/26 . . . heating conductor mounted on insulating base

3/28 . . . heating conductor embedded in insulating material

3/30 . . . . on or between metallic plates

3/32 . . . heating conductor mounted on insulators on a metallic frame

3/34 . . flexible, e.g. heating nets or webs

3/36 . . . heating conductor embedded in insulating material

3/38 . . . . Powder conductors

3/40 . Heating elements having the shape of rods or tubes (H05B 3/62, H05B 3/68, H05B 3/78 take precedence)

3/42 . . non-flexible

3/44 . . . heating conductor arranged within rods or tubes of insulating material

3/46 . . . heating conductor mounted on insulating base

3/48 . . . heating conductor embedded in insulating material

3/50 . . . . heating conductor arranged in metal tubes, the radiating surface having heat-conducting fins

3/52 . . . . Apparatus or processes for filling or compressing insulating material in tubes

3/54 . . flexible

3/56 . . . Heating cables

3/58 . . . Heating hoses; Heating collars

3/60 . Heating arrangements wherein the heating current flows through granular, powdered or fluid material, e.g. for salt-bath furnace, electrolytic heating (H05B 3/38 takes precedence)

3/62 . Heating elements specially adapted for furnaces (H05B 3/60 takes precedence; arrangements of such elements in furnaces F27, e.g. F27D 11/00)

3/64 . . using ribbon, rod, or wire heater

3/66 . . Supports or mountings for heaters on or in the wall or roof

3/68 . Heating arrangements specially adapted for cooking plates or analogous hot-plates

Note

Group H05B 3/76 takes precedence over groups H05B 3/70 to H05B 3/74. **[2]**

3/70 . . Plates of cast metal

3/72 . . Plates of sheet metal

3/74 . . Non-metallic plates

3/76 . . Plates with spirally-wound heating tubes

3/78 . Heating arrangements specially adapted for immersion heating

3/80 . . Portable immersion heaters
3/82 . . Fixedly-mounted immersion heaters
3/84 . Heating arrangements specially adapted for transparent or reflecting areas, e.g. for demisting or de-icing windows, mirrors or vehicle windshields **[5]**
3/86 . . the heating conductors being embedded in the transparent or reflecting material **[5]**

6/00 **Heating by electric, magnetic, or electromagnetic fields** (for therapeutic purposes A61N 5/00; joining of preformed parts by heating of plastics or substances in a plastic state B29C 65/02) **[3]**
6/02 . Induction heating **[3]**
6/04 . . Sources of current **[3]**
6/06 . . Control, e.g. of temperature, of power **[3]**
6/08 . . . using compensating or balancing arrangements **[3]**
6/10 . . Induction heating apparatus, other than furnaces, for specific applications **[3]**
6/12 . . . Cooking devices **[3]**
6/14 . . . Tools, e.g. nozzles, rollers, calenders **[3]**
6/16 . . Furnaces having endless cores (H05B 6/34 takes precedence) **[3]**
6/18 . . . having melting basin **[3]**
6/20 . . . having melting channel only **[3]**
6/22 . . Furnaces without an endless core (H05B 6/34 takes precedence) **[3]**
6/24 . . . Crucible furnaces (H05B 6/30 takes precedence) **[3]**
6/26 . . . . using vacuum or particular gas atmosphere **[3]**
6/28 . . . . Protective systems **[3]**
6/30 . . . Arrangements for remelting or zone melting **[3]**
6/32 . . . Arrangements for simultaneous levitation and heating **[3]**
6/34 . . Arrangements for circulation of melts **[3]**
6/36 . . Coil arrangements **[3]**
6/38 . . . specially adapted for fitting into hollow spaces of workpieces **[3]**
6/40 . . . Establishing desired heat distribution, e.g. to heat particular parts of workpieces **[3]**
6/42 . . . Cooling of coils **[3]**
6/44 . . . having more than one coil or coil segment **[3]**
6/46 . Dielectric heating (H05B 6/64 take precedence) **[3]**
6/48 . . Circuits **[3]**
6/50 . . . for monitoring or control **[3]**
6/52 . . Feed lines **[3]**
6/54 . . Electrodes **[3]**
6/56 . . . Rolling electrodes **[3]**
6/58 . . . "sewing machine" type **[3]**
6/60 . . Arrangements for continuous movement of material **[3]**
6/62 . . Apparatus for specific applications **[3]**
6/64 . Heating using microwaves **[3]**
6/66 . . Circuits **[3]**
6/68 . . . for monitoring or control **[3]**
6/70 . . Feed lines **[3]**
6/72 . . Radiators or aerials **[3]**
6/74 . . Mode transformers or mode stirrers **[3]**
6/76 . . Prevention of microwave leakage, e.g. door sealings **[3]**
6/78 . . Arrangements for continuous movement of material **[3]**
6/80 . . Apparatus for specific applications (stoves or ranges F24C 7/02) **[3]**

7/00 **Heating by electric discharge** (electron beam or ion beam tubes for localised treatment of objects H01J 37/30; plasma torches H05H 1/26)
7/02 . Details
7/06 . . Electrodes
7/07 . . . designed to melt in use **[2]**
7/08 . . . non-consumable **[2]**
7/085 . . . . mainly consisting of carbon **[2]**
7/09 . . . . . Self-baking electrodes **[2]**
7/10 . . Mountings, supports, terminals, or arrangements for feeding or guiding electrodes **[2]**
7/101 . . . Mountings, supports, or terminals at head of electrode, i.e. at the end remote from the arc **[2]**
7/102 . . . . specially adapted for consumable electrodes **[2]**
7/103 . . . Mountings, supports, or terminals with jaws (H05B 7/101 takes precedence) **[2]**
7/105 . . . . comprising more than two jaws equally spaced along circumference, e.g. ring holders **[2]**
7/107 . . . specially adapted for self-baking electrodes **[2]**
7/109 . . . Feeding arrangements (H05B 7/107 takes precedence; where the electrode movement is a part of a closed loop for automatic control of power H05B 7/148) **[2]**
7/11 . . Arrangements for conducting current to the electrode terminals (non-insulated conductors or conductive bodies in general H01B 5/00; insulated conductors or cables in general H01B 7/00) **[2]**
7/12 . . Arrangements for cooling, sealing, or protecting electrodes **[2]**
7/14 . . Arrangements or methods for connecting successive electrode sections **[2]**
7/144 . . Power supplies specially adapted for heating by electric discharge; Automatic control of power, e.g. by positioning of electrodes (circuit arrangements for supplying electric power in general H02J) **[2]**
7/148 . . . Automatic control of power (electrode feeding arrangements H05B 7/109; automatic feeding or moving of electrodes for spot or seam welding or cutting B23K 9/12; disposition of electrodes in or on furnaces F27D 11/10; control of position in general G05D 3/00; regulating electric characteristics of arcs in general G05F 1/02; regulating electric power in general G05F 1/66) **[2]**
7/152 . . . . by electromechanical means for positioning of electrodes **[2]**
7/156 . . . . by hydraulic or pneumatic means for positioning of electrodes **[2]**
7/16 . Heating by glow discharge
7/18 . Heating by arc discharge
7/20 . . Direct heating by arc discharge, i.e. where at least one end of the arc directly acts on the material to be heated, including additional resistance heating by arc current flowing through the material to be heated **[2]**
7/22 . . Indirect heating by arc discharge **[2]**

11/00 **Heating by combined application of processes covered by two or more of groups H05B 3/00 to H05B 7/00** (H05B 7/20 takes precedence)

Lighting

31/00 **Electric arc lamps** (regulating electric characteristics of arcs G05F 1/02; with non-consumable electrodes H01J 61/00)
31/02 . Details
31/04 . . Housings
31/06 . . Electrodes
31/08 . . . Carbon electrodes
31/10 . . . . Cored carbon electrodes
31/12 . . . . Beck-effect electrodes
31/14 . . . Metal electrodes
31/16 . . . Apparatus or processes specially adapted for manufacturing electrodes
31/18 . . Mountings for electrodes; Electrode feeding devices
31/20 . . . Mechanical arrangements for feeding electrodes
31/22 . . . Electromagnetic arrangements for feeding electrodes
31/24 . . Cooling arrangements
31/26 . . Influencing the shape of arc discharge by gas blowing devices
31/28 . . Influencing the shape of arc discharge by magnetic means
31/30 . . Starting; Igniting
31/32 . . Switching-off
31/34 . . Indicating consumption of electrodes
31/36 . having two electrodes in line
31/38 . . specially adapted for ac
31/40 . having two electrodes at an angle
31/42 . . specially adapted for ac
31/44 . having two parallel electrodes
31/46 . . specially adapted for ac
31/48 . having more than two electrodes
31/50 . . specially adapted for ac
31/52 . . . electrodes energised from different phases of the supply

33/00 **Electroluminescent light sources** (discharge lamps H01J 61/00 to H01J 65/00; semi-conductor devices with at least one particular jump barrier or surface barrier specially adapted for light emission H01L 27/15, H01L 33/00; organic light emitting devices H01L 27/32, H01L 51/50; lasers H01S 3/00, H01S 5/00; compositions per se, see the relevant subclasses) **[1,8]**
33/02 . Details
33/04 . . Sealing arrangements
33/06 . . Electrode terminals
33/08 . . Circuit arrangements not adapted to a particular application
33/10 . Apparatus or processes specially adapted to the manufacture of electroluminescent light sources
33/12 . Light sources with substantially two-dimensional radiating surfaces
33/14 . . characterised by the chemical or physical composition or the arrangement of the electroluminescent material
33/18 . . characterised by the nature or concentration of the activator
33/20 . . characterised by the chemical or physical composition or the arrangement of the material in which the electroluminescent material is embedded
33/22 . . characterised by the chemical or physical composition or the arrangement of auxiliary dielectric or reflective layers
33/24 . . . of metallic reflective layers (H05B 33/26 takes precedence)
33/26 . . characterised by the composition or arrangement of the conductive material used as an electrode
33/28 . . . of translucent electrodes

35/00 **Electric light sources using a combination of different types of light generation**

37/00 **Circuit arrangements for electric light sources in general**
37/02 . Controlling
37/03 . Detecting lamp failure
37/04 . . Circuits providing for substitution of the light source in case of its failure

39/00 **Circuit arrangements or apparatus for operating incandescent light sources and not adapted to a particular application**
39/02 . Switching-on, e.g. with predetermined rate of increase of lighting current
39/04 . Controlling
39/06 . . Switching arrangements, e.g. from series operation to parallel operation
39/08 . . by shifting phase of trigger voltage applied to gas-filled controlling tubes
39/09 . in which the lamp is fed by pulses
39/10 . Circuits providing for substitution of the light source in case of its failure

41/00 **Circuit arrangements or apparatus for igniting or operating discharge lamps**
41/02 . Details
41/04 . . Starting switches
41/06 . . . thermal only
41/08 . . . . heated by glow discharge
41/10 . . . magnetic only
41/12 . . . combined thermal and magnetic
41/14 . Circuit arrangements
41/16 . . in which the lamp is fed by dc or by low-frequency ac, e.g. by 50 cycles/sec ac (H05B 41/26 takes precedence)
41/18 . . . having a starting switch
41/19 . . . . for lamps having an auxiliary starting electrode
41/20 . . . having no starting switch
41/22 . . . . for lamps having an auxiliary starting electrode
41/23 . . . . for lamps not having an auxiliary starting electrode
41/231 . . . . . for high-pressure lamps
41/232 . . . . . for low-pressure lamps
41/233 . . . . . using resonance circuitry
41/234 . . . . . to eliminate stroboscopic effects, e.g. feeding two lamps with different phases
41/24 . . in which the lamp is fed by high-frequency ac (H05B 41/26 takes precedence)
41/26 . . in which the lamp is fed by power derived from dc by means of a converter, e.g. by high-voltage dc
41/28 . . . using static converters
41/282 . . . . with semiconductor devices (H05B 41/288, H05B 41/295 take precedence) **[7]**
41/285 . . . . . Arrangements for protecting lamps or circuits against abnormal operating conditions **[7]**

41/288 . . . . with semiconductor devices and specially adapted for lamps without preheating electrodes, e.g. for high-intensity discharge lamps, high-pressure mercury or sodium lamps or low-pressure sodium lamps **[7]**
41/292 . . . . . Arrangements for protecting lamps or circuits against abnormal operating conditions **[7]**
41/295 . . . . with semiconductor devices and specially adapted for lamps with preheating electrodes, e.g. for fluorescent lamps **[7]**
41/298 . . . . . Arrangements for protecting lamps or circuits against abnormal operating conditions **[7]**
41/30 . . in which the lamp is fed by pulses, e.g. flash lamp
41/32 . . . for single flash operation
41/34 . . . to provide a sequence of flashes
41/36 . . Controlling
41/38 . . . Controlling the intensity of light
41/39 . . . . continuously
41/391 . . . . . using saturable magnetic devices
41/392 . . . . . using semiconductor devices, e.g. thyristor
41/40 . . . . discontinuously
41/42 . . . . . in two steps only
41/44 . . . for providing special optical effects, e.g. progressive motion of light
41/46 . . Circuits providing for substitution in case of failure of the lamp

43/00 Circuit arrangements for light sources, not otherwise provided for (H05B 37/00 takes precedence)
43/02 . for light sources using a charge of combustible material

---

H05C ELECTRIC CIRCUITS OR APPARATUS SPECIALLY DESIGNED FOR USE IN EQUIPMENT FOR KILLING, STUNNING, ENCLOSING OR GUIDING LIVING BEINGS (stationary means for catching or killing insects by electric means A01M 1/22; apparatus for the destruction of noxious animals, other than insects, by electricity A01M 19/00; electric traps for animals A01M 23/38; slaughtering or stunning by electric current A22B 3/06)

1/00 Circuits or apparatus for generating electric shock effects
1/02 . providing continuous feeding of dc or ac voltage
1/04 . providing pulse voltages
1/06 . . operating only when touched

3/00 Other circuits or apparatus

H05F STATIC ELECTRICITY; NATURALLY-OCCURRING ELECTRICITY

(1) This subclass covers methods or arrangements for preventing the formation of electrostatic charges on bodies or for carrying-off these charges after their formation.
(2) This subclass does not cover specific applications of the above-mentioned methods or arrangements. Such arrangements are covered by the relevant subclasses, e.g. arrangements in large containers B65D 90/46.

1/00 Preventing the formation of electrostatic charges
1/02 . by surface treatment

3/00 Carrying-off electrostatic charges (from living beings A61N 1/14)
3/02 . by means of earthing connections
3/04 . by means of spark gaps or other discharge devices (devices providing for corona discharge H01T 19/00) **[2]**
3/06 . by means of ionising radiation

7/00 Use of naturally-occurring electricity

H05G X-RAY TECHNIQUE (apparatus for radiation diagnosis A61B 6/00; X-ray therapy A61N; testing by X-rays G01N; apparatus for X-ray photography G03B; filters, conversion screens, microscopes G21K; X-ray tubes H01J 35/00; TV systems having X-ray input H04N 5/321)

1/00 X-ray apparatus involving X-ray tubes; Circuits therefor
1/02 . Constructional details
1/04 . . Mounting the X-ray tube within a closed housing
1/06 . . . X-ray tube and at least part of the power supply apparatus being mounted within the same housing
1/08 . Electrical details
1/10 . . Power supply arrangements for feeding the X-ray tube
1/12 . . . with dc or rectified single-phase ac
1/14 . . . with single-phase low-frequency ac
1/16 . . . . Reducing the peak-inverse voltage
1/18 . . . with polyphase ac of low frequency
1/20 . . . with high-frequency ac; with pulse trains
1/22 . . . with single pulses
1/24 . . . . Obtaining pulses by using energy storage devices (pulse generators H03K)

1/26 . . Measuring, controlling, protecting (measuring electric values G01R; measuring X-ray intensity G01T)
1/28 . . . Measuring or recording actual exposure time; Counting number of exposures; Measuring required exposure time
1/30 . . . Controlling
1/32 . . . . Supply voltage of the X-ray apparatus or tube (regulating supply without reference to operating characteristics of the apparatus G05F)
1/34 . . . . Anode current, heater current, heater voltage of X-ray tube (regulating supply without reference to operating characteristics of the apparatus G05F)
1/36 . . . . Temperature of anode; Brightness of image
1/38 . . . . Exposure time
1/40 . . . . . using adjustable time switch
1/42 . . . . . using arrangements for switching when a predetermined dose of radiation has been applied, e.g. in which the switching instant is determined by measuring the electrical energy supplied to the tube
1/44 . . . . . in which the switching instant is determined by measuring the amount of radiation directly
1/46 . . . . Combined control of different quantities, e.g. exposure time as well as voltage or current
1/48 . . . . Compensating the voltage drop occurring at the instant of switching-on of the apparatus (regulating supply without reference to operating characteristics of the apparatus G05F)
1/50 . . . . Passing the tube current only during a restricted portion of the voltage waveform
1/52 . . . . Target size or shape; Direction of electron beam, e.g. in tubes with one anode and more than one cathode
1/54 . . . Protecting (overload protection combined with control H05G 1/46)
1/56 . . Switching-on; Switching-off
1/58 . . Switching arrangements for changing-over from one mode of operation to another, e.g. from radioscopy to radiography, from radioscopy to irradiation
1/60 . . Circuit arrangements for obtaining a series of X-ray photographs or for X-ray cinematography
1/61 . . . for obtaining stereoscopic photographs **[5]**
1/62 . . Circuit arrangements for obtaining X-ray photography at predetermined instants in the movement of an object, e.g. X-ray stroboscopy
1/64 . . Circuit arrangements for X-ray apparatus incorporating electronic image converters, e.g. image intensifiers **[5]**
1/66 . . Circuit arrangements for X-ray tubes with target movable relatively to the anode
1/68 . . Circuit arrangements for Lilienfeld tubes; Circuit arrangements for gas-filled X-ray tubes
1/70 . . Circuit arrangements for X-ray tubes with more than one anode; Circuit arrangements for apparatus comprising more than one X-ray tube

2/00 Apparatus or processes specially adapted for producing X-rays, not involving X-ray tubes, e.g. involving generation of a plasma (X-ray lasers H01S 4/00; plasma technique in general H05H) **[5]**

H05H PLASMA TECHNIQUE (ion-beam tubes H01J 27/00; magnetohydrodynamic generators H02K 44/08; producing X-rays involving plasma generation H05G 2/00); **PRODUCTION OF ACCELERATED ELECTRICALLY- CHARGED PARTICLES OR OF NEUTRONS** (obtaining neutrons from radioactive sources G21, e.g. G21B, G21C, G21G); **PRODUCTION OR ACCELERATION OF NEUTRAL MOLECULAR OR ATOMIC BEAMS** (atomic clocks G04F 5/14; devices using stimulated emission H01S; frequency regulation by comparison with a reference frequency determined by energy levels of molecules, atoms, or subatomic particles H03L 7/26)

(1) This subclass covers:
(a) generating or handling plasma;
(b) devices not covered by subclass H01J and in which electrons, ion beams, or neutral particles are accelerated to high energies;
(c) devices for producing neutral particle beams; **[3]**
(d) targets for (a), (b), or (c). **[3]**
(2) Attention is drawn to subclass G21K. **[3]**

Subclass index

1/00 **Generating plasma**; **Handling plasma** (application of plasma technique in thermonuclear fusion reactors G21B 1/00)
1/02 . Arrangements for confining plasma by electric or magnetic fields; Arrangements for heating plasma (electron optics H01J)
1/03 . . using electrostatic fields **[3]**
1/04 . . using magnetic fields substantially generated by the discharge in the plasma
1/06 . . . Longitudinal pinch devices
1/08 . . . Theta pinch devices
1/10 . . using applied magnetic fields only
1/11 . . . using cusp configuration (H05H 1/14 takes precedence) **[3]**
1/12 . . . wherein the containment vessel forms a closed loop, e.g. stellarator
1/14 . . . wherein the containment vessel is straight and has magnetic mirrors
1/16 . . using applied electric and magnetic fields
1/18 . . . wherein the fields oscillate at a very high frequency, e.g. in the microwave range
1/20 . . Ohmic heating
1/22 . . for injection heating
1/24 . Generating plasma **[2]**
1/26 . . Plasma torches **[2]**
1/28 . . . Cooling arrangements **[3]**
1/30 . . . using applied electromagnetic fields, e.g. high-frequency or microwave energy (H05H 1/28 takes precedence) **[3]**
1/32 . . . using an arc (H05H 1/28 takes precedence) **[3]**
1/34 . . . . Details, e.g. electrodes, nozzles **[3]**
1/36 . . . . . Circuit arrangements (H05H 1/38, H05H 1/40 take precedence) **[3]**
1/38 . . . . . Guiding or centering of electrodes **[3]**
1/40 . . . . . using applied magnetic fields, e.g. for focusing or rotating the arc **[3]**
1/42 . . . . with provisions for introducing materials into the plasma, e.g. powder, liquid (electrostatic spraying, spraying apparatus with means for charging the spray electrically B05B 5/00) **[3]**
1/44 . . . . using more than one torch **[3]**
1/46 . . using applied electromagnetic fields, e.g. high frequency or microwave energy (H05H 1/26 takes precedence) **[3]**
1/48 . . using an arc (H05H 1/26 takes precedence) **[3]**
1/50 . . . and using applied magnetic fields, e.g. for focusing or rotating the arc **[3]**
1/52 . . using exploding wires or spark gaps (H05H 1/26 takes precedence; spark gaps in general H01T) **[3]**
1/54 . Plasma accelerators **[3]**

3/00 **Production or acceleration of neutral particle beams, e.g. molecular or atomic beams [3]**
3/02 . Molecular or atomic-beam generation, e.g. resonant beam generation (gas masers H01S 1/06) **[3]**
3/04 . Acceleration by electromagnetic wave pressure **[3]**
3/06 . Generating neutron beams (targets for producing nuclear reactions H05H 6/00; neutron sources G21G 4/02) **[5]**

5/00 **Direct voltage accelerators**; **Accelerators using single pulses** (H05H 3/06 takes precedence) **[5]**
5/02 . Details (targets for producing nuclear reactions H05H 6/00) **[3]**
5/03 . . Accelerating tubes (vessels or containers of electric discharge tubes with improved potential distribution over surface of vessel H01J 5/06; shields of X-ray tubes associated with vessels or containers H01J 35/16) **[4]**
5/04 . energised by electrostatic generators, e.g. by van de Graaff generator **[4]**
5/06 . Tandem accelerators; Multi-stage accelerators
5/08 . Particle accelerators using step-up transformers, e.g. resonance transformers **[4]**

6/00 **Targets for producing nuclear reactions** (supports for targets or objects to be irradiated G21K 5/08) **[3]**

7/00 **Details of devices of the types covered by groups H05H 9/00 to H05H 13/00** (targets for producing nuclear reactions H05H 6/00) **[3]**
7/02 . Circuits or systems for supplying or feeding radio-frequency energy (radio-frequency generators H03B)
7/04 . Magnet systems; Energisation thereof
7/06 . Two-beam arrangements; Multi-beam arrangements
7/08 . Arrangements for injecting particles into orbits
7/10 . Arrangements for ejecting particles from orbits
7/12 . Arrangements for varying final energy of beam
7/14 . Vacuum chambers (H05H 5/03 takes precedence) **[4]**
7/16 . . of the waveguide type **[4]**
7/18 . . Cavities; Resonators **[4]**
7/20 . . . with superconductive walls **[4]**
7/22 . Details of linear accelerators, e.g. drift tubes (H05H 7/02 to H05H 7/20 take precedence) **[4]**

9/00 **Linear accelerators** (H05H 11/00 takes precedence)
9/02 . Travelling-wave linear accelerators
9/04 . Standing-wave linear accelerators

11/00 **Magnetic induction accelerators, e.g. betatrons**
11/02 . Air-cored betatrons
11/04 . Biased betatrons

13/00 **Magnetic resonance accelerators**; **Cyclotrons**
13/02 . Synchrocyclotrons, i.e. frequency-modulated cyclotrons
13/04 . Synchrotrons
13/06 . Air-cored magnetic resonance accelerators
13/08 . Alternating-gradient magnetic resonance accelerators
13/10 . Accelerators comprising one or more linear accelerating sections and bending magnets or the like to return the charged particles in a trajectory parallel to the first accelerating section, e.g. microtrons **[4]**

15/00 **Methods or devices for acceleration of charged particles not otherwise provided for [4]**

H05K **PRINTED CIRCUITS**; **CASINGS OR CONSTRUCTIONAL DETAILS OF ELECTRIC APPARATUS**; **MANUFACTURE OF ASSEMBLAGES OF ELECTRICAL COMPONENTS** (details of instruments or comparable details of other apparatus not otherwise provided for G12B; thin-film or thick-film circuits H01L 27/01, H01L 27/13; non-printed means for electric connections to or between printed circuits H01R; casings for, or constructional details of, particular types of apparatus, see the relevant subclasses; processes involving only a single technical art, e.g. heating, spraying, for which provision exists elsewhere, see the relevant classes)

(1) This subclass covers:
- combinations of a radio or television receiver with apparatus having a different main function;
- printed circuits structurally associated with non-printed electric components.

(2) In this subclass, the following expression is used with the meaning indicated:
- "printed circuits" covers all kinds of mechanical constructions of circuits that consist of an insulating base or support carrying the conductor and are combined structurally with the conductor throughout their length, especially in a two-dimensional plane, the conductors of which are secured to the base in a non-dismountable manner, and also covers the processes or apparatus for manufacturing such constructions, e.g. forming the circuit by mechanical or chemical treatment of a conductive foil, paste, or film on an insulating support.

Subclass index

1/00 **Printed circuits** (assemblies of a plurality of individual semiconductor or solid state devices H01L 25/00; devices consisting of a plurality of solid state components formed in or on a common substrate, e.g. integrated circuits, thin-film or thick-film circuits, H01L 27/00)

1/02 . Details

1/03 . . Use of materials for the substrate **[3]**

1/05 . . . Insulated metal substrate **[3]**

1/09 . . Use of materials for the metallic pattern **[3]**

1/11 . . Printed elements for providing electric connections to or between printed circuits **[3]**

1/14 . . Structural association of two or more printed circuits (providing electric connection to or between printed circuits H05K 1/11, H01R 12/00)

1/16 . incorporating printed electric components, e.g. printed resistor, capacitor, inductor

1/18 . Printed circuits structurally associated with non-printed electric components (H05K 1/16 takes precedence)

3/00 **Apparatus or processes for manufacturing printed circuits** (photomechanical production of textured or patterned surfaces, materials or originals therefor, apparatus specially adapted therefor, in general G03F; involving the manufacture of semiconductor devices H01L) **[3]**

3/02 . in which the conductive material is applied to the surface of the insulating support and is thereafter removed from such areas of the surface which are not intended for current conducting or shielding

3/04 . . the conductive material being removed mechanically, e.g. by punching

3/06 . . the conductive material being removed chemically or electrolytically, e.g. by photo-etch process

3/07 . . . being removed electrolytically **[3]**

3/08 . . the conductive material being removed by electric discharge, e.g. by spark erosion

3/10 . in which conductive material is applied to the insulating support in such a manner as to form the desired conductive pattern

3/12 . . using printing techniques to apply the conductive material

3/14 . . using spraying techniques to apply the conductive material

3/16 . . . by cathodic sputtering

3/18 . . using precipitation techniques to apply the conductive material

3/20 . . by affixing prefabricated conductor pattern

3/22 . Secondary treatment of printed circuits

3/24 . . Reinforcing of the conductive pattern

3/26 . . Cleaning or polishing of the conductive pattern

3/28 . . Applying non-metallic protective coatings

3/30 . Assembling printed circuits with electric components, e.g. with resistor

3/32 . . electrically connecting electric components or wires to printed circuits

3/34 . . . by soldering

3/36 . Assembling printed circuits with other printed circuits

3/38 . Improvement of the adhesion between the insulating substrate and the metal **[3]**

3/40 . Forming printed elements for providing electric connections to or between printed circuits **[3]**

3/42 . . Plated through-holes **[3]**

3/44 . Manufacturing insulated metal core circuits **[3]**

3/46 . Manufacturing multi-layer circuits **[3]**

5/00 **Casings, cabinets or drawers for electric apparatus** (in general A47B; radio receiver cabinets H04B 1/08; television receiver cabinets H04N 5/64)

5/02 . Details

5/03 . . Covers
5/04 . Metal casings
5/06 . Hermetically-sealed casings

7/00 Constructional details common to different types of electric apparatus (casings, cabinets, drawers H05K 5/00)

7/02 . Arrangements of circuit components or wiring on supporting structure
7/04 . . on conductive chassis
7/06 . . on insulating boards
7/08 . . . on perforated boards
7/10 . . Plug-in assemblages of components
7/12 . . Resilient or clamping means for holding component to structure (holding two-part couplings together H01R 13/00)
7/14 . Mounting supporting structure in casing or on frame or rack
7/16 . . on hinges or pivots
7/18 . Construction of rack or frame
7/20 . Modifications to facilitate cooling, ventilating, or heating

9/00 Screening of apparatus or components against electric or magnetic fields (devices for absorbing radiation from an aerial H01Q 17/00)

10/00 Arrangements for improving the operating reliability of electronic equipment, e.g. by providing a similar stand-by unit

Note

Attention is drawn to the following appropriate places:
[6]

G05B	9/03	Electric redundant control systems
G06F	11/16	Error detection or correction of data by redundancy in digital computer hardware
G08B	29/16	Security signalling or alarm systems
H02H	3/05	Redundant emergency protective circuit arrangements
H02J	3/38	Arrangements for parallelly feeding a single network
H02J	9/04	Circuit arrangements with stand-by power supply
H03K	19/003	Modifications for increasing the reliability of logic circuits or inverting circuits
H03K	19/007	Fail-safe logic circuits or inverting circuits
H03L	7/07	Redundant clock signal generation in generators of electronic oscillations or pulses
H04B	1/74	Transmission systems using redundant channels or apparatus
H04L	1/22	Redundant apparatus for increasing reliability of arrangements used for the transmission of digital information.

11/00 Combinations of a radio or television receiver with apparatus having a different main function

11/02 . with vehicles

13/00 Apparatus or processes specially adapted for manufacturing or adjusting assemblages of electric components

13/02 . Feeding of components (in general B65G)
13/04 . Mounting of components
13/06 . Wiring by machine
13/08 . Monitoring manufacture of assemblages

H99 SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

H99Z SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

Note

This subclass covers subject matter that: **[8]**
(a) is not provided for, but is most closely related to, the subject matter covered by the subclasses of this section, and **[8]**
(b) is not explicitly covered by any subclass of another section. **[8]**

99/00 Subject matter not otherwise provided for in this section [8]
