3/06 . . with racks comprising pivotable toothed sections or segments, e.g. arranged in pairs
3/08 . screw-operated (B66F 3/44 takes precedence; gearings F16H)
3/10 . . with telescopic sleeves
3/12 . . comprising toggle levers (lazy-tongs mechanisms B66F 3/22)
3/14 . . actuated through pawl-and-ratchet mechanisms
3/16 . . actuated through bevel-wheel gearings
3/18 . . actuated through worm gearings
3/20 . . actuated through multiple or change-speed gearings
3/22 . Lazy-tongs mechanisms
3/24 . fluid-pressure operated (water-pressure machines F03B; fluid-pressure servomotors F15B, e.g. pyrotechnical actuators F15B 15/19; hydraulic gearings F16H; cylinders, pistons F16J)
3/25 . . Constructional features **[3]**
3/26 . . . Adaptations or arrangements of pistons **[3]**
3/28 . . . . telescopic **[3]**
3/30 . . . Positive brakes or locks **[3]**
3/32 . . . Means for avoiding excessive shocks on completion movements **[3]**
3/35 . . . Inflatable flexible elements, e.g. bellows (inflatable load-engaging elements B66F 3/40; connection of valves to inflatable elastic bodies B60C 29/00) **[3]**
3/36 . . . Load-engaging elements **[3]**
3/38 . . . . adjustable relative to piston **[3]**
3/40 . . . . inflatable (connection of valves to inflatable elastic bodies B60C 29/00) **[3]**
3/42 . . . with self-contained pumps, e.g. actuated by hand **[3]**
3/43 . . Pyrotechnical jacks **[3]**
3/44 . with self-contained electric driving motors
3/46 . Combinations of several jacks with means for interrelating lifting or lowering movements

5/00 **Mobile jacks of the garage type mounted on wheels or rollers**
5/02 . with mechanical lifting gear
5/04 . with fluid-pressure-operated lifting gear

7/00 **Lifting frames, e.g. for lifting vehicles**; **Platform lifts** (for lift-truck platforms B66F 9/06)
7/02 . with platforms suspended from ropes, cables, or chains
7/04 . . hydraulically or pneumatically operated
7/06 . with platforms supported by levers for vertical movement
7/08 . . hydraulically or pneumatically operated
7/10 . with platforms supported directly by jacks
7/12 . . by mechanical jacks
7/14 . . . screw-operated

7/16 . . by one or more hydraulic or pneumatic jacks
7/18 . . . by a single central jack
7/20 . . . by several jacks with means for maintaining the platforms horizontal during movement
7/22 . with tiltable platforms (tilting vehicles for unloading B65G 67/34)
7/24 . for raising or lowering vehicles by their own power
7/26 . for selective lifting of parts of vehicles (mobile garage jacks B66F 5/00)
7/28 . Constructional details, e.g. end stops, pivoting supporting members, sliding runners adjustable to load dimensions

9/00 Devices for lifting or lowering bulky or heavy goods for loading or unloading purposes (mobile or transportable lifts in, or associated with, buildings and specially adapted to be shifted from one part of a building or other structure to another part or to another building or structure B66B 9/16; cranes B66C)

9/02 . Stationary loaders or unloaders, e.g. for sacks
9/04 . . hydraulically actuated or controlled
9/06 . movable, with their loads, on wheels or the like, e.g. fork-lift trucks (vehicle aspects B60 to B62; vehicles predominantly for transporting loads and modified to facilitate loading or unloading B60P 1/00; low-lift hand trucks for transporting goods B62B 3/06)
9/065 . . non-masted (mobile jacks of the garage type mounted on wheels or rollers B66F 5/00) **[3]**
9/07 . . Floor-to-roof stacking devices, e.g. stacker cranes, retrievers **[3]**
9/075 . . Constructional features or details **[3]**
9/08 . . . Masts; Guides; Chains **[3]**
9/10 . . . . movable in a horizontal direction relative to truck **[3]**
9/12 . . . Platforms; Forks; Other load-supporting or load-gripping members **[3]**
9/14 . . . . laterally movable, e.g. swingable, for slewing or transverse movements **[3]**
9/16 . . . . inclinable relative to mast **[3]**
9/18 . . . . Load gripping or retaining means **[3]**
9/19 . . . . Additional means for facilitating unloading **[3]**
9/20 . . . Means for actuating or controlling masts, platforms, or forks (power take-off from vehicle transmissions, combined with vehicle propulsion systems B60K) **[3]**
9/22 . . . . Hydraulic devices or systems **[3]**
9/24 . . . . Electrical devices or systems **[3]**

11/00 Lifting devices specially adapted for particular uses not otherwise provided for (ground-engaging vehicle fittings for supporting, lifting or manoeuvring the vehicle B60S 9/00)

11/04 . for movable platforms or cabins, e.g. on vehicles, permitting workmen to place themselves in any desired position for carrying out required operations (platforms for cleaning windows A47L 3/02; devices for rescuing persons from buildings A62B 1/02; vehicle aspects of service vehicles B60P 3/14; maintenance travellers for bridges E01D 19/10; scaffolds on an extensible substructure E04G 1/22; liftable or lowerable platforms for use on ladders E06C 7/16)

13/00 Common constructional features or accessories

15/00 Crowbars or levers

17/00 Safety devices, e.g. for limiting or indicating lifting force

19/00 Hoisting, lifting, hauling, or pushing, not otherwise provided for

19/02 . Hauling using anchors; Anchors therefor (marine anchors B63B 21/24; anchoring aircraft B64F 1/12; means for anchoring structural elements specially adapted to foundation engineering E02D 5/74) **[3]**

B67 OPENING OR CLOSING BOTTLES, JARS OR SIMILAR CONTAINERS; LIQUID HANDLING

B67B APPLYING CLOSURE MEMBERS TO BOTTLES, JARS, OR SIMILAR CONTAINERS; OPENING CLOSED CONTAINERS (opening or closing devices attached to, or incorporated in, containers or container closures B65D)

1/00 Closing bottles, jars, or similar containers by applying stoppers (stoppers per se B65D 39/00)

1/03 . Pretreatment of stoppers, e.g. cleaning, steaming, heating, impregnating or coating; Applying resilient rings to stoppers (mechanical working of cork B27J 5/00) **[5]**

1/04 . by inserting threadless stoppers, e.g. corks

1/06 . by inserting and rotating screw stoppers

1/08 . Securing stoppers, e.g. swing stoppers, which are held in position by associated pressure-applying means coacting with the bottle neck

1/10 . by inserting disc closures **[6]**

3/00 Closing bottles, jars, or similar containers by applying caps (caps per se B65D 41/00)

3/02 . by applying flanged caps, e.g. crown caps, and securing by deformation of flanges

3/04 . . Cutting caps from strip material in capping machines (devices for registering moving strip material B65H 23/00)

3/06 . . Feeding caps to capping heads

3/062 . . . from a magazine

3/064 . . . from a hopper

3/10 . . Capping heads for securing caps

3/12 . . . characterised by being movable axially relative to cap to deform flanges thereof, e.g. to press projecting flange rims inwardly

3/14 . . . characterised by having movable elements, e.g. hinged fingers, for applying radial pressure to the flange of the cap (B67B 3/16, B67B 3/18 take precedence) **[5]**

3/16 . . . characterised by having resilient deforming elements, e.g. resilient sleeves or collars (B67B 3/18 takes precedence) **[5]**

3/18 . . . characterised by being rotatable, e.g. for forming screw threads in situ **[5]**

3/20 . by applying and rotating preformed threaded caps (forming threads in situ by resilient deforming means B67B 3/16, by rotary capping heads B67B 3/18) **[5]**

3/22 . by applying snap-on caps

3/24 . Special measures for applying and securing caps under vacuum

3/26 . Applications of control, warning, or safety devices in capping machinery

3/28 . Mechanisms for causing relative movement between bottle or jar and capping head **[5]**

5/00 Applying protective or decorative covers to closures; Devices for securing bottle closures with wire (infant-feeding teats with means for fastening to bottles A61J 11/04) **[6]**

5/03 . Applying protective or decorative covers to closures, e.g. by forming in situ **[3]**

5/05 . . by applying liquids, e.g. by dipping **[3]**

5/06 . Devices for securing bottle closures with wire (B67B 1/08 takes precedence)

6/00 Closing bottles, jars or similar containers by applying closure members, not provided for in groups B67B 1/00 to B67B 5/00 [2009.01]

7/00 Hand- or power-operated devices for opening closed containers (nail pullers or extractors B25C 11/00; attached to, or incorporated in, containers or container closures B65D)

7/02 . for removing stoppers

7/04 . . Cork-screws

7/06 . . Other cork removers

7/08 . . . using air or gas pressure

7/10 . . with means for retrieving stoppers from the interior of the container

7/12 . for removing disc-closures

7/14 . for removing tightly-fitting lids or covers, e.g. of shoe-polish tins, by gripping and rotating

7/15 . . finger grapple type **[5]**

7/16 . for removing flanged caps, e.g. crown caps

7/18 . for removing threaded caps (B67B 7/14 takes precedence; wrenches B25B 13/00) **[2]**

7/20 . for breaking vacuum seals between lids or covers and bodies of preserving jars, e.g. by wedge action

7/22 . . incorporating loops, e.g. of wire, which are tightened around seal

7/40 . Devices for engaging tags, strips, or tongues for opening by tearing, e.g. slotted keys for opening sardine tins

7/42 . Devices for removing barrel bungs

7/44 . Combination tools, e.g. comprising cork-screws, can piercers, crown-cap removers (combinations of opening devices with cutting tools B26, with devices serving other purposes, see the appropriate places, e.g. B25F, B43K 29/00)

7/46 . Cutting devices, i.e. devices including at least one cutting element having one or more cutting edges for piercing through the wall of a closed container, e.g. can openers (B67B 7/44 takes precedence; machines for domestic use with a plurality of interchangeable units A47J 43/06, A47J 44/00; hand-held cutting tools, cutting, severing, in general B26) **[4]**

7/48 . . punch type, i.e. the cutting element including at least one sharp cutting edge adapted to pierce through the container wall in, ordinarily, a single operating stroke **[4]**

7/50 . . . with fulcrum, i.e. a lever-like actuating handle with provision to establish a pivot point **[4]**

7/52 . . . Plural spaced cutting edges adapted to pierce the container during a single operating stroke **[4]**

7/54 . . sweep cutter type, i.e. an opening device including means to establish a pivot point between the cutting element and the container and having means to move the cutting element about the pivot point **[4]**

7/56 . . . with container penetrating pivot and variable cutter radius, i.e. the distance between the cutting element and the penetrating pivot being changeable **[4]**

7/58 . . . . Freely slidable cutter **[4]**

7/60 . . having force multiplying means employed to relatively turn the container and cutting element about a fixed point to force the cutting element to traverse the container **[4]**

Note

In this group, a simple lever or handle to be manipulated by the operator to relatively rotate the container and opener is not considered to be a force multiplying means. **[4]**

7/62 . . Progressive fulcrum, i.e. having a lever-like actuating handle and provision to establish a pivot point which is progressively translated relative to the container during the opening operation **[4]**

Note

In this group, the pivot point may be established by (a) contact between the container and a portion of the handle engaging the container, or (b) contact between the handle and a reaction member engaging the container. **[4]**

7/64 . . . with guide means to engage container wall and guide the cutting element thereabout **[4]**

7/66 . . . cutter pivoted to reaction member **[4]**

7/68 . . shear type, i.e. including cutting elements co-operating with one another so that their respective cutting edges move pass and in substantial contact with each other to perform the cutting operation **[4]**

7/70 . . including an annular, driven, wheel-like roller member adapted to continuously engage a container chime during the opening operation **[4]**

7/72 . . . Cutter comprising rotatable disc **[4]**

7/74 . . . Roller drive means causes initial piercing, i.e. force applied to rotate the wheel-like member causes the cutting element to pierce the container wall **[4]**

7/76 . . . adapted to pierce container side wall **[4]**

7/78 . . including plural cutters **[4]**

7/80 . . with means to cover an opening in the container made by the cutting element **[4]**

7/82 . . with means to prevent the cut portion from dropping into the container or to raise the cut portion out of the container **[4]**

7/84 . . adapted for right or left-hand operation, i.e. the device is capable of being operated in either direction about the container **[4]**

Note

This group covers also a progressive fulcrum type container opener including a fulcrum extending from each side of the cutting blade. **[4]**

7/86 . . with spout or means to deform or bend the material of the container to form a spout **[4]**

7/88 . . with means to clean or sanitise the cutting element **[4]**

7/90 . . with sensor, activator and controller **[4]**

Note

In this group, the sensor, e.g. trip lever, push button, photo-cell system, or the like, detects a condition, such as the condition of the container, the container contents, the can opener itself or the environment of the opener which may affect the operation of the opener. The activator, e.g. circuit breaker, clutch, valve, or the like, causes a release of energy. The controller, e.g. motor, driver, or the like, changes or causes the operation of the opener. **[6]**

7/92 . by breaking, e.g. for ampoules **[5]**

B67C FILLING WITH LIQUIDS OR SEMILIQUIDS, OR EMPTYING, OF BOTTLES, JARS, CANS, CASKS, BARRELS, OR SIMILAR CONTAINERS, NOT OTHERWISE PROVIDED FOR; FUNNELS

Subclass index

3/00 Bottling liquids or semiliquids; Filling jars or cans with liquids or semiliquids using bottling or like apparatus; Filling casks or barrels with liquids or semiliquids (filling containers with liquids or semiliquids using apparatus other than bottling or like apparatus B65B 3/00)

3/02 . Bottling liquids or semiliquids; Filling jars or cans with liquids or semiliquids using bottling or like apparatus

3/04 . . without applying pressure

3/06 . . using counterpressure, i.e. filling while the container is under pressure

3/08 . . . and subsequently lowering the counterpressure

3/10 . . . preliminary filling with inert gases, e.g. carbon dioxide

3/12 . . . Pressure-control devices

3/14 . . . specially adapted for filling with hot liquids

3/16 . . using suction

3/18 . . using siphoning arrangements

3/20 . . with provision for metering the liquids to be introduced, e.g. when adding syrups (measuring volume, or volume flow, in general G01F)

3/22 . . Details

3/24 . . . Devices for supporting or handling bottles (transport or storing devices in general B65G)

3/26 . . . Filling-heads; Means for engaging filling-heads with bottle necks

3/28 . . . Flow-control devices, e.g. using valves (valves in general F16K)
3/30 . Filling of barrels or casks
3/32 . . using counterpressure, i.e. filling while the container is under pressure
3/34 . . Devices for engaging filling-heads with filling-apertures

7/00 Concurrent cleaning, filling, and closing of bottles; Processes or devices for at least two of these operations

9/00 Emptying bottles, jars, cans, casks, barrels, or similar containers, not otherwise provided for (devices for tilting and emptying containers B65G 65/23) **[3]**

11/00 Funnels, e.g. for liquids (filter funnels B01D 29/085; volume-flow meters G01F)
11/02 . without discharge valves
11/04 . with non-automatic discharge valves
11/06 . with automatic discharge valves

B67D DISPENSING, DELIVERING, OR TRANSFERRING LIQUIDS, NOT OTHERWISE PROVIDED FOR (cleaning pipes or tubes or systems of pipes or tubes B08B 9/02; emptying or filling of bottles, jars, cans, casks, barrels, or similar containers, not otherwise provided for B67C; water supply E03; pipe systems F17D; domestic hot-water supply systems F24D; measuring volume, volume flow, mass flow or liquid level, metering by volume G01F; coin-freed or like apparatus G07F) **[5]**

1/00 Apparatus or devices for dispensing beverages on draught (B67D 3/00 takes precedence; apparatus for making beverages A47J 31/00) **[3]**
1/02 . Beer engines or like manually-operable pumping apparatus
1/04 . Apparatus utilising compressed air or other gas acting directly or indirectly on beverages in storage containers
1/06 . Mountings or arrangements of dispensing apparatus in or on shop or bar counters (shop or bar counters per se A47F 9/00)
1/07 . Cleaning beverage-dispensing apparatus **[5]**
1/08 . Details
1/10 . . Pump mechanisms (in general F04)
1/12 . . Flow- or pressure-control devices or systems
1/14 . . . Reducing valves or control taps
1/16 . . Devices for collecting spilled beverages

3/00 Apparatus or devices for controlling flow of liquids under gravity from storage containers for dispensing purposes (separating and dispensing metered quantities of liquids G01F)
3/02 . Liquid-dispensing valves having operating members arranged to be pressed upwards, e.g. by the rims of receptacles held below the delivery orifice
3/04 . Liquid-dispensing taps or cocks adapted to seal and open tapping-holes of casks, e.g. for beer

7/00 Apparatus or devices for transferring liquids from bulk storage containers or reservoirs into vehicles or into portable containers, e.g. for retail sale purposes (general disposition of plant in stations for supplying fuel to vehicles B60S 5/02; for filling or emptying locomotive water tanks, e.g. water columns, B61K 11/00; for refuelling aircraft during flight B64D 39/00; liquid-handling ground installations specially adapted for fuelling stationary aircraft B64F 1/28) **[2010.01]**
7/02 . for transferring liquids other than fuel or lubricants **[2010.01]**
7/04 . for transferring fuels, lubricants or mixed fuels and lubricants **[2010.01]**
7/06 . Details or accessories **[2010.01]**
7/08 . . Arrangements of devices for controlling, indicating, metering or registering quantity or price of liquid transferred (arrangement of flow- or pressure-control valves B67D 7/36; computing, calculating, counting G06; coin-freed apparatus for dispensing fluids G07F 13/00; prepayment devices for metering liquids G07F 15/00) **[2010.01]**
7/10 . . . operated by keys, push-buttons or cash registers **[2010.01]**
7/12 . . . operated by movement of delivery hose or nozzle or by devices associated therewith **[2010.01]**
7/14 . . . responsive to input of recorded programmed information, e.g. on punched cards **[2010.01]**
7/16 . . . Arrangements of liquid meters **[2010.01]**
7/18 . . . . of piston type **[2010.01]**
7/20 . . . . of rotary type **[2010.01]**
7/22 . . . Arrangements of indicators or registers (indicating or recording in fluid meters G01F 15/06) **[2010.01]**
7/24 . . . . with means for producing or issuing a receipt or record of sale **[2010.01]**
7/26 . . . . with resetting or zeroing means **[2010.01]**
7/28 . . . with automatic means for reducing or intermittently interrupting flow before completion of delivery, e.g. to produce dribble feed **[2010.01]**
7/30 . . . with means for predetermining quantity of liquid to be transferred (B67D 7/10, B67D 7/14 take precedence) **[2010.01]**
7/32 . . Arrangements of safety or warning devices; Means for preventing unauthorised delivery of liquid **[2010.01]**
7/34 . . . Means for preventing unauthorised delivery of liquid **[2010.01]**
7/36 . . Arrangements of flow- or pressure-control valves (associated with nozzles B67D 7/42) **[2010.01]**
7/38 . . Arrangements of hoses, e.g. operative connection with pump motor (hoses in general F16L 11/00) **[2010.01]**
7/40 . . . Suspending, reeling or storing devices (supports for storing lengths of hoses, in general B65H 75/34) **[2010.01]**
7/42 . . Filling nozzles **[2010.01]**
7/44 . . . automatically closing **[2010.01]**

7/46 . . . . when liquid in container to be filled reaches a predetermined level **[2010.01]**

7/48 . . . . . by making use of air suction through an opening closed by the rising liquid **[2010.01]**

7/50 . . . . and provided with an additional hand lever **[2010.01]**

7/52 . . . . and provided with additional flow-controlling valve means **[2010.01]**

7/54 . . . with means for preventing escape of liquid or vapour or for recovering escaped liquid or vapour (B67D 7/44 takes precedence) **[2010.01]**

7/56 . . Arrangements of flow-indicators, e.g. transparent compartments, windows, rotary vanes (indicating or recording presence, absence or direction of movement G01P 13/00) **[2010.01]**

7/58 . . Arrangements of pumps **[2010.01]**

7/60 . . . manually operable **[2010.01]**

7/62 . . . power operated **[2010.01]**

7/64 . . . . of piston type **[2010.01]**

7/66 . . . . of rotary type **[2010.01]**

7/68 . . . submerged in storage tank or reservoir **[2010.01]**

7/70 . . . of two or more pumps in series or parallel **[2010.01]**

7/72 . . Devices for applying air or other gas pressure for forcing liquid to delivery point **[2010.01]**

7/74 . . Devices for mixing two or more different liquids to be transferred (coin-freed apparatus G07F 13/06) **[2010.01]**

7/76 . . Arrangements of devices for purifying liquids to be transferred, e.g. of filters, of air or water separators **[2010.01]**

7/78 . . Arrangements of storage tanks, reservoirs or pipe-lines **[2010.01]**

7/80 . . Arrangements of heating or cooling devices for liquids to be transferred **[2010.01]**

7/82 . . . Heating only **[2010.01]**

7/84 . . Casings, cabinets or frameworks; Trolleys or like movable supports **[2010.01]**

7/86 . . Illuminating arrangements **[2010.01]**

9/00 **Apparatus or devices for transferring liquids when loading or unloading ships** (ship-based equipment B63B 27/00) **[2010.01]**

9/02 . using articulated pipes **[2010.01]**

99/00 **Subject matter not provided for in other groups of this subclass [2010.01]**

B68 SADDLERY; UPHOLSTERY

B68B HARNESS; DEVICES USED IN CONNECTION THEREWITH; WHIPS OR THE LIKE

1/00 **Devices in connection with harness, for hitching, reining, training, breaking, or quietening horses or other traction animals** (devices of this kind combined with traction harness B68B 3/00; stable equipment A01K 1/00; devices forming part of a vehicle B62C)

1/02 . Halters

1/04 . Bridles; Reins

1/06 . . Bits

1/08 . Curbs

1/10 . Blinkers

1/12 . . movable

1/13 . Devices for preventing bolting (for unhitching bolting traction animals B68B 5/08)

1/14 . Hobbling devices

3/00 **Traction harnesses**; **Traction harnesses combined with devices referred to in group B68B 1/00**

3/02 . Yokes

3/04 . Horse collars; Manufacturing same

3/06 . . Adjustable collars

3/08 . . with protective pads

3/10 . . . Pneumatic collars

3/12 . . Locks therefor

3/14 . Breast collars

3/16 . Cruppers

3/18 . Breechings

3/20 . Traces (manufacture of belts C14B, of ropes D07)

3/22 . . Trace holders (devices forming part of a vehicle B62C)

5/00 **Details or accessories** (haberdashery A44); **Fastening devices for bridles, reins, harnesses, or the like** (devices forming part of a vehicle B62C)

5/02 . Fastening devices for traces (resilient attachments B68B 7/00)

5/04 . Tail holders as part of harness

5/06 . Devices for fastening special articles on harnesses, bridles, or the like

5/08 . Devices for unhitching bolting traction animals

7/00 **Horse protectors, e.g. resilient attachments** (protective covers B68C 5/00)

9/00 **Devices specially adapted for supporting harnesses when not in use**

11/00 **Whips or the like**

99/00 **Subject matter not provided for in other groups of this subclass [8]**

B68C SADDLES; STIRRUPS

1/00 **Saddling equipment for riding- or pack-animals**

1/02 . Saddles

1/04 . . Adjustable saddles

1/06 . . Side saddles

1/08 . . with pneumatic pads

1/10 . . with spring pads

1/12 . Bottom pads for saddles; Saddle cloths

1/14 . Belts or straps for saddles; Tighteners therefor

1/16 . Fastening stirrups to saddles; Stirrup-leathers (stirrups B68C 3/00)

1/18 . . with safety arrangements for loosening the connection between stirrup and saddle, e.g. in case of rider's fall

1/20 . Pockets, receptacles, or other supporting devices attached or attachable to saddle, e.g. for insertion of arms

3/00 **Stirrups**

3/02 . with side part or sole plate attached to other parts of the stirrup movably, e.g. pivotally

5/00 **Covers for animals when working, e.g. for protection**

B68F MAKING ARTICLES FROM LEATHER, CANVAS, OR THE LIKE

1/00 **Making articles from leather, canvas, or the like** (machines or equipment for saddle-making B68F 3/00; manufacturing footwear A43D; manufacture or treatment of leather in general, splitting leather, manufacture of driving or other belts C14)

3/00 **Machines or equipment specially adapted for saddle-making** (methods B68F 1/00)

3/02 . Machines

3/04 . Hand tools

B68G METHODS, EQUIPMENT, OR MACHINES FOR USE IN UPHOLSTERING; UPHOLSTERY NOT OTHERWISE PROVIDED FOR

Subclass index

1/00 **Loose filling materials for upholstery** (manufacture of the materials, see the relevant classes)

3/00 **Treating materials to adapt them specially as upholstery filling**

3/02 . Cleaning; Conditioning

3/04 . Teasing; Untwisting ropes or cords of filling materials

3/06 . Curling; Twisting filling materials into ropes or cords

3/08 . Preparation of bed feathers from natural feathers

3/10 . . Cleaning or conditioning of bed feathers (B68G 3/02 takes precedence)

3/12 . . Sorting of bed feathers

5/00 **Resilient upholstery pads** (finished upholstery B68G 11/00; waddings, fleeces, mats, or like products of fibrous structure, see the relevant classes)

5/02 . of cellular material, e.g. sponge rubber (shaping of plastics or substances in a plastic state for the production of porous or cellular articles B29C)

7/00 **Making upholstery** (manufacturing upholstered panels B68G 13/00; sewing-machines D05B)

7/02 . Making upholstery from waddings, fleeces, mats, or the like (filling methods B68G 7/06)

7/04 . . by conveyer-line methods

7/05 . Covering or enveloping cores of pads

7/052 . . with webs secured to the core, e.g. by stitching

7/054 . . Arrangements of sheathings between spring cores and overlying paddings

7/06 . Filling of cushions, mattresses, or the like

7/08 . Quilting (tools B68G 15/00); Elements therefor

7/10 . Finishing of edges

7/12 . Other elements specially adapted for fastening, fixing, or finishing, in upholstery work

9/00 **Placing upholstery springs in pockets**; **Fitting springs in upholstery**

11/00 **Finished upholstery not provided for in other classes**

11/02 . mainly composed of fibrous materials

11/03 . . with stitched or bonded fibre webs

11/04 . mainly composed of resilient materials, e.g. of foam rubber

11/06 . . with embedded springs, e.g. bonded

13/00 **Upholstered panels** (specially adapted for sound-absorption E04B, G10K)

13/02 . with indented pattern formed by stitching

13/04 . with indented pattern formed by bonding

15/00 **Auxiliary devices or tools specially for upholstery**

99/00 **Subject matter not provided for in other groups of this subclass [2009.01]**

MICRO-STRUCTURAL TECHNOLOGY; NANO-TECHNOLOGY

B81 MICRO-STRUCTURAL TECHNOLOGY [7]

(1) This class covers micro-structural devices or systems, including at least one essential element or formation characterised by its very small size, typically within the range of 10-4 to 10-7 meters, i.e. its significant features can not, in at least one dimension, be completely discerned without the use of an optical microscope. **[7]**

(2) In this class, the following expressions are used with the meaning indicated: **[7]**
- "micro-structural devices" covers: **[7]**
  - (i) micro-mechanical devices comprising movable, flexible or deformable elements; and **[7]**
  - (ii) three-dimensional structures without movable, flexible or deformable elements, comprising microformations designed to accomplish an essential structural function for interacting with their environment, as opposed to purely electronic or chemical functions, regardless of whether the structures are combined with micro-electronic devices or formed from specific materials; **[7]**
- "micro-structural systems" covers: **[7]**
  - (i) systems of cooperating micro-structural devices; and **[7]**
  - (ii) micro-electro-mechanical or micro-opto-mechanical systems, which combine on a common substrate the specific features of micro-structural devices and electrical or optical components, e.g. for controlling, analysing or signalling the functioning of micro-structural devices. **[7]**

B81B MICRO-STRUCTURAL DEVICES OR SYSTEMS, E.G. MICRO-MECHANICAL DEVICES (piezo-electric, electrostrictive or magnetostrictive elements per se H01L 41/00) **[7]**

(1) This subclass does not cover: **[7]**
- purely electrical or electronic devices per se which are covered by section H, e.g. subclass H01L; **[7]**
- purely optical devices per se which are covered by subclasses G02B or G02F; **[7]**
- essentially two-dimensional structures, e.g. layered products which are covered by subclass B32B; **[7]**
- chemical or biological structures per se which are covered by section C; **[7]**
- structures in atomic scale produced by manipulation of single atoms or molecules, which are covered by group B82B 1/00. **[7]**

(2) Devices or systems classified in this subclass are also classified in appropriate subclasses providing for their structural or functional features, if such features are of interest. **[7]**

1/00 Devices without movable or flexible elements, e.g. micro-capillary devices [7]

3/00 Devices comprising flexible or deformable elements, e.g. comprising elastic tongues or membranes (B81B 5/00 takes precedence) **[7]**

5/00 Devices comprising elements which are movable in relation to each other, e.g. comprising slidable or rotatable elements [7]

7/00 Micro-structural systems [7]

7/02 . containing distinct electrical or optical devices of particular relevance for their function, e.g. micro-electro-mechanical systems (MEMS) (B81B 7/04 takes precedence) **[7]**

7/04 . Networks or arrays of similar micro-structural devices **[7]**

B81C PROCESSES OR APPARATUS SPECIALLY ADAPTED FOR THE MANUFACTURE OR TREATMENT OF MICRO-STRUCTURAL DEVICES OR SYSTEMS (making microcapsules or microballoons B01J 13/02; processes or apparatus specially adapted for the manufacture or treatment of piezo-electric, electrostrictive or magnetostrictive elements per se H01L 41/22) **[7]**

Note

This subclass does not cover: **[7]**
- processes or apparatus for the manufacture or treatment of purely electrical or electronic devices, which are covered by section H, e.g. group H01L 21/00; **[7]**
- processes or apparatus involving the manipulation of single atoms or molecules, which are covered by group B82B 3/00. **[7]**

1/00 Manufacture or treatment of devices or systems in or on a substrate (B81C 3/00 takes precedence) **[7]**

3/00 Assembling of devices or systems from individually processed components [7]

99/00 Subject matter not provided for in other groups of this subclass [2010.01]

B82 NANO-TECHNOLOGY [7]

Note

In this class, the following terms are used with the meaning indicated:
- *"nano-size" or "nano-scale" relate to a controlled geometrical size below 100 nanometres (nm) in one or more dimensions;* **[2011.01]**
- *"nano-structure" means an entity having at least one nano-sized functional component that makes physical, chemical or biological properties or effects available, which are uniquely attributable to the nano-scale.* **[2011.01]**

B82B NANO-STRUCTURES FORMED BY MANIPULATION OF INDIVIDUAL ATOMS, MOLECULES, OR LIMITED COLLECTIONS OF ATOMS OR MOLECULES AS DISCRETE UNITS; MANUFACTURE OR TREATMENT THEREOF [7]

(1) This subclass does not cover chemical or biological nano-structures per se, provided for elsewhere, e.g., in classes C08 or C12. **[7]**

(2) Attention is drawn to the Note following the title of class B82, which defines the meaning of the terms "nano-size", "nano-scale" and "nano-structure" in this subclass. **[2011.01]**

(3) Subject matter classified in this subclass is further classified in subclass B82Y, in order to enable a comprehensive search of nano-structure technology using classification symbols of B82Y in combination with classification symbols of B82B. **[2011.01]**

(4) Nano-structures having specialised features or functions are further classified in appropriate places in other subclasses that provide for those features or functions, e.g. in G01Q, G02F 1/017, H01L 29/775. **[2011.01]**

1/00 Nano-structures formed by manipulation of individual atoms or molecules, or limited collections of atoms or molecules as discrete units [7]

3/00 Manufacture or treatment of nano-structures by manipulation of individual atoms or molecules, or limited collections of atoms or molecules as discrete units [7]

B82Y SPECIFIC USES OR APPLICATIONS OF NANO-STRUCTURES; MEASUREMENT OR ANALYSIS OF NANO-STRUCTURES; MANUFACTURE OR TREATMENT OF NANO-STRUCTURES [2011.01]

(1) This subclass covers applications and aspects of nano-structures which are produced by any method, and is not restricted to those that are formed by manipulation of individual atoms or molecules. **[2011.01]**

(2) Attention is drawn to the Note following the title of class B82, which defines the meaning of the terms "nano-size", "nano-scale" and "nano-structure" in this subclass. **[2011.01]**

(3) This subclass is intended to enable a comprehensive search of subject matter related to nano-structures by combination of classification symbols of this subclass with classification symbols from other subclasses. Therefore this subclass covers aspects of nano-structures that might also be entirely or partially covered elsewhere in the IPC. **[2011.01]**

(4) This subclass is for secondary classification, i.e. obligatory supplementary classification of subject matter already classified as such in other classification places, e.g.: **[2011.01]**

B82B		Nano-structures formed by individual manipulation of atoms, molecules, or limited collections of atoms or molecules as discrete units; manufacture or treatment thereof
A61K	9/51	Nano-capsules for medicinal preparations
B05D	1/20	Langmuir-Blodgett films
C01B	31/02	Carbon nano-structures, e.g. bucky-balls, nanotubes, nanocoils, nano-doughnuts or nano-onions
G01Q		Scanning probe techniques
G02F	1/017	Optical quantum wells or boxes
H01F	10/32	Nano-structured thin magnetic films
H01F	41/30	Molecular beam epitaxy [MBE]
H01L	29/775	Quantum wire FETs

(5) The classification symbols of this subclass are not listed first when assigned to patent documents. **[2011.01]**

(6) In this subclass, multi-aspects classification is applied, so that aspects of subject matter that are covered by more than one of its groups should be classified in each of those groups. **[2011.01]**

5/00 Nano-biotechnology or nano-medicine, e.g. protein engineering or drug delivery **[2011.01]**

10/00 Nano-technology for information processing, storage or transmission, e.g. quantum computing or single electron logic **[2011.01]**

15/00 ***Nano-technology for interacting, sensing or actuating, e.g. quantum dots as markers in protein assays or molecular motors*** **[2011.01]**

20/00 ***Nano-optics, e.g. quantum optics or photonic crystals*** **[2011.01]**

25/00 ***Nano-magnetism, e.g. magnetoimpedance, anisotropic magnetoresistance, giant magnetoresistance or tunneling magnetoresistance*** **[2011.01]**

30/00 ***Nano-technology for materials or surface science, e.g. nano-composites*** **[2011.01]**

35/00 ***Methods or apparatus for measurement or analysis of nano-structures*** **[2011.01]**

40/00 ***Manufacture or treatment of nano-structures*** **[2011.01]**

99/00 ***Subject matter not provided for in other groups of this subclass*** **[2011.01]**

B99 SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

B99Z SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

Note

This subclass covers subject matter that: **[8]**
(a) is not provided for, but is most closely related to, the subject matter covered by the subclasses of this section, and **[8]**
(b) is not explicitly covered by any subclass of another section. **[8]**

99/00 Subject matter not otherwise provided for in this section [8]

SECTION C – CHEMISTRY; METALLURGY

(1) In section C, the definitions of groups of chemical elements are as follows:
Alkali metals: Li, Na, K, Rb, Cs, Fr
Alkaline earth metals: Ca, Sr, Ba, Ra
Lanthanides: elements with atomic numbers 57 to 71 inclusive
Rare earths: Sc, Y, Lanthanides
Actinides: elements with atomic numbers 89 to 103 inclusive
Refractory metals: Ti, V, Cr, Zr, Nb, Mo, Hf, Ta, W
Halogens: F, Cl, Br, I, At
Noble gases: He, Ne, Ar, Kr, Xe, Rn
Platinum group: Os, Ir, Pt, Ru, Rh, Pd
Noble metals: Ag, Au, Platinum group
Light metals: alkali metals, alkaline earth metals, Be, Al, Mg
Heavy metals: metals other than light metals
Iron group: Fe, Co, Ni
Non-metals: H, B, C, Si, N, P, O, S, Se, Te, noble gases, halogens
Metals: elements other than non-metals
Transition elements: elements with atomic numbers 21 to 30 inclusive, 39 to 48 inclusive, 57 to 80 inclusive, 89 upwards

(2) Section C covers :
(a) pure chemistry, which covers inorganic compounds, organic compounds, macromolecular compounds, and their methods of preparation;
(b) applied chemistry, which covers compositions containing the above compounds, such as: glass, ceramics, fertilisers, plastics compositions, paints, products of the petroleum industry. It also covers certain compositions on account of their having particular properties rendering them suitable for certain purposes, as in the case of explosives, dyestuffs, adhesives, lubricants, and detergents;
(c) certain marginal industries, such as the manufacture of coke and of solid or gaseous fuels, the production and refining of oils, fats and waxes, the fermentation industry (e.g., brewing and wine-making), the sugar industry;
(d) certain operations or treatments, which are either purely mechanical, e.g., the mechanical treatment of leather and skins, or partly mechanical, e.g., the treatment of water or the prevention of corrosion in general;
(e) metallurgy, ferrous or non-ferrous alloys.

(3) In all sections of the IPC, in the absence of an indication to the contrary, the Periodic System of chemical elements referred to is the one with 8 groups as represented in the table below. For example, group C07F 3/00 "Compounds containing elements of the 2nd Group of the Periodic System" refers to the elements of columns IIa and IIb. **[2009.01]**

(4)
(a) In the case of operations, treatments, products or articles having both a chemical and a non-chemical part or aspect, the general rule is that the chemical part or aspect is covered by section C.
(b) In some of these cases, the chemical part or aspect brings with it a non-chemical one, even though purely mechanical, because this latter aspect either is essential to the operation or treatment or constitutes an important element thereof. It has seemed, in fact, more logical not to dissociate the different parts or aspects of a coherent whole. This is the case for applied chemistry and for the industries, operations and treatments mentioned in Notes (1)(c), (d) and (e). For example, furnaces peculiar to the manufacture of glass are covered by class C03 and not by class F27.
(c) There are, however, some exceptions in which the mechanical (or non-chemical) aspect carries with it the chemical aspect, for example:
– Certain extractive processes, in subclass A61K;
– The chemical purification of air, in subclass A61L;
– Chemical methods of fire-fighting, in subclass A62D;
– Chemical processes and apparatus, in class B01;
– Impregnation of wood, in subclass B27K;
– Chemical methods of analysis or testing, in subclass G01N;
– Photographic materials and processes, in class G03, and, generally, the chemical treatment of textiles and the production of cellulose or paper, in section D.
(d) In still other cases, the pure chemical aspect is covered by section C and the applied chemical aspect by another section, such as A, B or F, e.g., the use of a substance or composition for:
– treatment of plants or animals, covered by subclass A01N;
– foodstuffs, covered by class A23;

– ammunition or explosives, covered by class F42.

(e) When the chemical and mechanical aspects are so closely interlocked that a neat and simple division is not possible, or when certain mechanical processes follow as a natural or logical continuation of a chemical treatment, section C may cover, in addition to the chemical aspect, a part only of the mechanical aspect, e.g., after-treatment of artificial stone, covered by class C04. In this latter case, a note or a reference is usually given to make the position clear, even if sometimes the division is rather arbitrary.

CHEMISTRY

C01 INORGANIC CHEMISTRY

(1) In subclasses C01B to C01G, and within each of these subclasses, in the absence of an indication to the contrary, a compound is classified in the last appropriate place, e.g. potassium permanganate is classified only as a permanganate compound, in subclass C01G. **[3]**

(2) Biocidal, pest repellant, pest attractant or plant growth regulatory activity of compounds or preparations is further classified in subclass A01P. **[8]**

(3) Processes using enzymes or micro-organisms in order to: **[5]**
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

C01B NON-METALLIC ELEMENTS; **COMPOUNDS THEREOF** (fermentation or enzyme-using processes for the preparation of elements or inorganic compounds except carbon dioxide C12P 3/00; production of non-metallic elements or inorganic compounds by electrolysis or electrophoresis C25B)

(1) In this subclass, tradenames that are often found in scientific and patent literature have been used in order to define precisely the scope of the groups. **[6]**

(2) Attention is drawn to the definitions of groups of chemical elements following the title of section C. **[3]**

(3) Attention is drawn to Note (1) after class C01, which defines the last place priority rule applied in this class, i.e. in the range of subclasses C01B to C01G and within these subclasses. **[8]**

(4) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

Subclass index

Hydrogen; **Hydrides**; **Water**; **Synthesis gas from hydrocarbons**

3/00 **Hydrogen**; **Gaseous mixtures containing hydrogen**; **Separation of hydrogen from mixtures containing it**; **Purification of hydrogen** (production of water-gas or synthesis gas from solid carbonaceous material C10J) **[3]**

3/02 . Production of hydrogen or of gaseous mixtures containing hydrogen **[3]**

3/04 . . by decomposition of inorganic compounds, e.g. ammonia **[3]**

3/06 . . by reaction of inorganic compounds containing electro-positively bound hydrogen, e.g. water, acids, bases, ammonia, with inorganic reducing agents (by electrolysis of water C25B 1/04) **[3]**

3/08 . . . with metals **[3]**

3/10 . . . . by reaction of water vapour with metals **[3]**

3/12 . . . by reaction of water vapour with carbon monoxide **[3]**

3/14 . . . . Handling of heat and steam **[3]**

3/16 . . . . using catalysts **[3]**

3/18 . . . . using moving solid particles **[3]**

3/20 . . . by reaction of metal hydroxides with carbon monoxide **[3]**

3/22 . . by decomposition of gaseous or liquid organic compounds **[3]**

3/24 . . . of hydrocarbons **[3]**

3/26 . . . . using catalysts **[3]**

3/28 . . . . using moving solid particles **[3]**

3/30 . . . . . using the fluidised bed technique **[3]**

3/32 . . by reaction of gaseous or liquid organic compounds with gasifying agents, e.g. water, carbon dioxide, air **[3]**

3/34 . . . by reaction of hydrocarbons with gasifying agents **[3]**

3/36 . . . . using oxygen or mixtures containing oxygen as gasifying agents **[3]**

3/38 . . . . using catalysts **[3]**

3/40 . . . . . characterised by the catalyst **[3]**

3/42 . . . . . using moving solid particles **[3]**
3/44 . . . . . using the fluidised bed technique **[3]**
3/46 . . . . using discontinuously preheated non-moving solid materials, e.g. blast and run **[3]**
3/48 . . . . followed by reaction of water vapour with carbon monoxide **[3]**
3/50 . Separation of hydrogen or hydrogen containing gases from gaseous mixtures, e.g. purification (C01B 3/14 takes precedence) **[3]**
3/52 . . by contacting with liquids; Regeneration of used liquids **[3]**
3/54 . . . including a catalytic reaction **[3]**
3/56 . . by contacting with solids; Regeneration of used solids **[3]**
3/58 . . . including a catalytic reaction **[3]**

4/00 Hydrogen isotopes; **Inorganic compounds thereof prepared by isotope exchange, e.g.** $NH_3 + D_2 \rightarrow NH_2D + HD$ **[2]**

5/00 Water
5/02 . Heavy water; Preparation by chemical reaction of hydrogen isotopes or their compounds, e.g. $4ND_3+7O_2 \rightarrow 4NO_2+6D_2O$, $2D_2+O_2 \rightarrow 2D_2O$

6/00 Hydrides of metals; **Monoborane or diborane**; **Addition complexes thereof [2]**
6/02 . Hydrides of transition elements; Addition complexes thereof
6/04 . Hydrides of alkali metals, alkaline earth metals, beryllium or magnesium; Addition complexes thereof
6/06 . Hydrides of aluminium, gallium, indium, thallium, germanium, tin, lead, arsenic, antimony, bismuth or polonium; Monoborane; Diborane; Addition complexes thereof
6/10 . . Monoborane; Diborane; Addition complexes thereof **[2]**
6/11 . . . Preparation from boron or inorganic compounds containing boron and oxygen **[2]**
6/13 . . . Addition complexes of monoborane or diborane, e.g. with phosphine, arsine or hydrazine **[2]**
6/15 . . . . Metal borohydrides; Addition complexes thereof **[2]**
6/17 . . . . . Preparation from boron or inorganic compounds containing boron and oxygen **[2]**
6/19 . . . . . Preparation from other compounds of boron **[2]**
6/21 . . . . . Preparation of borohydrides of alkali metals, alkaline earth metals, magnesium or beryllium; Addition complexes thereof, e.g. $LiBH_4.2N_2H_4$, NaB_2H_7 **[2]**
6/23 . . . . . Preparation of borohydrides of other metals, e.g. aluminium borohydride; Addition complexes thereof, e.g. $Li[Al(BH_4)_3H]$ **[2]**
6/24 . Hydrides containing at least two metals, e.g. $Li(AlH_4)$; Addition complexes thereof (C01B 6/13 to C01B 6/23 take precedence) **[2]**
6/26 . . Preparation from the metal with the highest valency or from its oxides or salts of its oxyacids
6/34 . Purification; Stabilisation

Halogens; **Compounds thereof**

7/00 Halogens; **Halogen acids**
7/01 . Chlorine; Hydrogen chloride **[2]**
7/03 . . Preparation from chlorides **[2,3]**
7/04 . . . Preparation of chlorine from hydrogen chloride **[3]**
7/05 . . . Preparation from ammonium chloride **[2,3]**
7/07 . . Purification **[2,3]**
7/075 . . . of liquid chlorine **[2,3]**
7/09 . Bromine; Hydrogen bromide **[2]**
7/13 . Iodine; Hydrogen iodide **[2]**
7/14 . . Iodine **[2]**
7/16 . . . Preparation from seaweed **[2]**
7/19 . Fluorine; Hydrogen fluoride **[2]**
7/20 . . Fluorine **[2]**
7/24 . Inter-halogen compounds

9/00 General methods of preparing halides (particular individual halides, see the relevant groups in subclasses C01B to C01G according to the element combined with the halogen; electrolytic production of inorganic compounds C25B)
9/02 . Chlorides
9/04 . Bromides
9/06 . Iodides
9/08 . Fluorides

11/00 Oxides or oxyacids of halogens; **Salts thereof**
11/02 . Oxides of chlorine
11/04 . Hypochlorous acid
11/06 . . Hypochlorites, e.g. chlorinated lime
11/08 . Chlorous acid
11/10 . . Chlorites
11/12 . Chloric acid
11/14 . . Chlorates
11/16 . Perchloric acid
11/18 . . Perchlorates
11/20 . Oxygen compounds of bromine
11/22 . Oxygen compounds of iodine
11/24 . Oxygen compounds of fluorine

Oxygen; **Oxides or hydroxides in general**; **Per-compounds**

13/00 Oxygen; **Ozone**; **Oxides or hydroxides in general**
13/02 . Preparation of oxygen (by liquefying F25J)
13/08 . . from air with the aid of metal oxides, e.g. barium oxide, manganese oxide
13/10 . Preparation of ozone
13/11 . . by electric discharge **[2]**
13/14 . Methods for preparing oxides or hydroxides in general (particular individual oxides or hydroxides, see the relevant groups of subclasses C01B to C01G or C25B, according to the element combined with the oxygen or hydroxy group)
13/16 . . Purification **[3]**
13/18 . . by thermal decomposition of compounds, e.g. of salts or hydroxides **[3]**
13/20 . . by oxidation of elements in the gaseous state; by oxidation or hydrolysis of compounds in the gaseous state **[3]**
13/22 . . . of halides or oxyhalides **[3]**
13/24 . . . . in the presence of hot combustion gases **[3]**
13/26 . . . . in the presence of a fluidised bed **[3]**
13/28 . . . . using a plasma or an electric discharge **[3]**

13/30 . . . . Removal and cooling of the oxide containing suspension **[3]**
13/32 . . by oxidation or hydrolysis of elements or compounds in the liquid or solid state **[3]**
13/34 . . by oxidation or hydrolysis of sprayed or atomised solutions **[3]**
13/36 . . by precipitation reactions in solutions **[3]**

15/00 Peroxides; **Peroxyhydrates**; **Peroxyacids or salts thereof**; **Superoxides**; **Ozonides**
15/01 . Hydrogen peroxide **[3]**
15/013 . . Separation; Purification; Concentration **[3]**
15/017 . . . Anhydrous hydrogen peroxide; Anhydrous solutions or gaseous mixtures containing hydrogen peroxide **[3]**
15/022 . . Preparation from organic compounds **[2]**
15/023 . . . by the alkyl-anthraquinone process **[3]**
15/024 . . . from hydrocarbons **[3]**
15/026 . . . from alcohols **[3]**
15/027 . . Preparation from water **[3]**
15/029 . . Preparation from hydrogen and oxygen **[3]**
15/03 . . Preparation from inorganic peroxy-compounds, e.g. from peroxysulfates **[3]**
15/032 . . . from metal peroxides **[3]**
15/037 . . Stabilisation by additives **[3]**
15/04 . Metal peroxides or peroxyhydrates thereof; Superoxides; Ozonides **[3]**
15/043 . . of alkali metals, alkaline earth metals or of magnesium **[2,3]**
15/047 . . of heavy metals **[2,3]**
15/055 . Peroxyhydrates (C01B 15/04 takes precedence); Peroxyacids or salts thereof **[3]**
15/06 . . containing sulfur **[3]**
15/08 . . . Peroxysulfates **[3]**
15/10 . . containing carbon **[3]**
15/12 . . containing boron **[3]**
15/14 . . containing silicon **[3]**
15/16 . . containing phosphorus **[3]**

17/00 Sulfur; **Compounds thereof**
17/02 . Preparation of sulfur; Purification
17/027 . . Recovery of sulfur from material containing elemental sulfur, e.g. luxmasses; Purification **[3]**
17/033 . . . using a liquid extractant **[3]**
17/04 . . from gaseous sulfur compounds including gaseous sulfides
17/05 . . . by wet processes **[3]**
17/06 . . from non-gaseous sulfides or materials containing such sulfides, e.g. ores
17/10 . . Finely-divided sulfur, e.g. sublimed sulfur, flowers of sulfur
17/12 . . Insoluble sulfur (mu-sulfur)
17/16 . Hydrogen sulfides
17/18 . . Hydrogen polysulfides
17/20 . Methods for preparing sulfides or polysulfides, in general (ammonium sulfides or polysulfides C01C; sulfides or polysulfides of metals, other than alkali metals, magnesium, calcium, strontium, and barium, see the relevant groups of subclasses C01F or C01G, according to the metal)
17/22 . Alkali metal sulfides or polysulfides
17/24 . . Preparation by reduction
17/26 . . . with carbon
17/28 . . . with reducing gases
17/30 . . Preparation from sodium or potassium amalgam with sulfur or sulfides
17/32 . . Hydrosulfides of sodium or potassium
17/34 . . Polysulfides of sodium or potassium
17/36 . . Purification
17/38 . . Dehydration
17/40 . . Making shaped products, e.g. granules
17/42 . Sulfides or polysulfides of magnesium, calcium, strontium, or barium
17/43 . . from oxides or hydroxides with sulfur or hydrogen sulfide
17/44 . . by reduction of sulfates
17/45 . Compounds containing sulfur and halogen, with or without oxygen
17/46 . Compounds containing sulfur, halogen, hydrogen, and oxygen
17/48 . Sulfur dioxide; Sulfurous acid
17/50 . . Preparation of sulfur dioxide
17/52 . . . by roasting sulfides (C22B 1/00 takes precedence)
17/54 . . . by burning elemental sulfur
17/56 . . . Separation; Purification
17/58 . . . Recovery of sulfur dioxide from acid tar or the like
17/60 . . . Isolation of sulfur dioxide from gases
17/62 . Methods of preparing sulfites in general (particular individual sulfites, see the relevant groups of subclasses C01B to C01G, according to the cation)
17/64 . Thiosulfates; Dithionites; Polythionates
17/66 . . Dithionites
17/69 . Sulfur trioxide; Sulfuric acid **[3]**
17/70 . . Stabilisation of gamma-form sulfur trioxide
17/74 . . Preparation **[3]**
17/76 . . . by contact processes
17/765 . . . . Multi-stage SO_3-conversion **[3]**
17/77 . . . . Fluidised-bed processes **[3]**
17/775 . . . . Liquid phase contacting processes or wet catalysis processes **[3]**
17/78 . . . . characterised by the catalyst used
17/79 . . . . . containing vanadium **[3]**
17/80 . . . . Apparatus
17/82 . . . of sulfuric acid using a nitrogen oxide process
17/84 . . . . Chamber process
17/86 . . . . Tower process
17/88 . . Concentration of sulfuric acid
17/90 . . Separation; Purification
17/92 . . . Recovery from acid tar or the like
17/94 . . . Recovery from nitration acids
17/96 . Methods for the preparation of sulfates in general (particular individual sulfates, see the relevant groups of subclasses C01B to C01G, according to the cation)
17/98 . Other compounds containing sulfur and oxygen (persulfuric acids C01B 15/06; persulfates C01B 15/08)

19/00 Selenium; **Tellurium**; **Compounds thereof**
19/02 . Elemental selenium or tellurium **[3]**
19/04 . Binary compounds **[3]**

21/00 Nitrogen; **Compounds thereof**
21/02 . Preparation of nitrogen (by decomposition of ammonia C01B 3/04)
21/04 . Purification or separation of nitrogen (by liquefying F25J)

21/06 . Binary compounds of nitrogen with metals, with silicon, or with boron
21/064 . . with boron **[3]**
21/068 . . with silicon **[3]**
21/072 . . with aluminium **[3]**
21/076 . . with titanium or zirconium **[3]**
21/08 . Hydrazoic acid; Azides; Halogen azides
21/082 . Compounds containing nitrogen and non-metals (C01B 21/06, C01B 21/08 take precedence) **[3]**
21/083 . . containing one or more halogen atoms **[3]**
21/084 . . . containing also one or more oxygen atoms, e.g. nitrosyl halides **[3]**
21/086 . . containing one or more sulfur atoms **[3]**
21/087 . . containing one or more hydrogen atoms **[3]**
21/088 . . . containing also one or more halogen atoms **[3]**
21/09 . . . . Halogeno-amines, e.g. chloramine **[3]**
21/092 . . . containing also one or more metal atoms **[3]**
21/093 . . . containing also one or more sulfur atoms **[3]**
21/094 . . . . Nitrosyl containing acids **[3]**
21/096 . . . . Amidosulfonic acid; Salts thereof **[3]**
21/097 . . containing phosphorus atoms **[3]**
21/098 . . . Phosphonitrilic dihalides; Polymers thereof **[3]**
21/12 . . Carbamic acid; Salts thereof
21/14 . . Hydroxylamine; Salts thereof
21/16 . . Hydrazine; Salts thereof
21/20 . Nitrogen oxides; Oxyacids of nitrogen; Salts thereof
21/22 . . Nitrous oxide (N_2O)
21/24 . . Nitric oxide (NO)
21/26 . . . Preparation by catalytic oxidation of ammonia
21/28 . . . . Apparatus
21/30 . . . Preparation by oxidation of nitrogen
21/32 . . . . Apparatus
21/34 . . Nitrogen trioxide (N_2O_3)
21/36 . . Nitrogen dioxide (NO_2, N_2O_4) (C01B 21/26, C01B 21/30 take precedence)
21/38 . . Nitric acid
21/40 . . . Preparation by absorption of oxides of nitrogen
21/42 . . . Preparation from nitrates
21/44 . . . Concentration
21/46 . . . Purification; Separation
21/48 . . Methods for the preparation of nitrates in general (particular individual nitrates, see the relevant groups of subclasses C01B to C01G, according to the cation)
21/50 . . Nitrous acid; Salts thereof

23/00 **Noble gases**; **Compounds thereof** (liquefying F25J)

25/00 **Phosphorus**; **Compounds thereof** (C01B 21/00, C01B 23/00 take precedence; perphosphates C01B 15/16) **[3]**
25/01 . Treating phosphate ores or other raw phosphate materials to obtain phosphorus or phosphorus compounds **[2]**
25/02 . Preparation of phosphorus
25/023 . . of red phosphorus **[2]**
25/027 . . of yellow phosphorus **[2]**
25/04 . Purification of phosphorus
25/043 . . of red phosphorus **[2]**
25/047 . . of yellow phosphorus **[2]**
25/06 . Hydrogen phosphides
25/08 . Other phosphides
25/10 . Halides or oxyhalides of phosphorus **[2]**
25/12 . Oxides of phosphorus
25/14 . Sulfur, selenium, or tellurium compounds of phosphorus
25/16 . Oxyacids of phosphorus; Salts thereof (peroxyacids or salts thereof C01B 15/00)
25/163 . . Phosphorous acid; Salts thereof **[2]**
25/165 . . Hypophosphorous acid; Salts thereof **[2]**
25/168 . . Pyrophosphorous acid; Salts thereof **[2]**
25/18 . . Phosphoric acid
25/20 . . . Preparation from elemental phosphorus or phosphoric anhydride
25/22 . . . Preparation by reacting phosphate containing material with an acid, e.g. wet process
25/222 . . . . with sulfuric acid, a mixture of acids mainly consisting of sulfuric acid or a mixture of compounds forming it in situ, e.g. a mixture of sulfur dioxide, water and oxygen **[3]**
25/223 . . . . . only one form of calcium sulfate being formed **[3]**
25/225 . . . . . Dihydrate process **[3]**
25/226 . . . . . Hemihydrate process **[3]**
25/228 . . . . . one form of calcium sulfate being formed and then converted to another form **[3]**
25/229 . . . . . Hemihydrate-dihydrate process **[3]**
25/231 . . . . . Dihydrate-hemihydrate process **[3]**
25/232 . . . . . Preparation by reacting phosphate containing material with concentrated sulfuric acid and subsequently lixiviating the obtained mass, e.g. clincker process **[3]**
25/234 . . . Purification; Stabilisation; Concentration (purification concomitant with preparation C01B 25/22; preparation involving solvent-solvent extraction C01B 25/46) **[3]**
25/235 . . . . Clarification; Stabilisation to prevent post-precipitation of dissolved impurities **[3]**
25/237 . . . . Selective elimination of impurities **[3]**
25/238 . . . . . Cationic impurities **[3]**
25/24 . . Condensed phosphoric acids
25/26 . . Phosphates (perphosphates C01B 15/16)
25/28 . . . Ammonium phosphates
25/30 . . . Alkali metal phosphates
25/32 . . . Phosphates of magnesium, calcium, strontium, or barium
25/34 . . . . Magnesium phosphates
25/36 . . . Aluminium phosphates
25/37 . . . Phosphates of heavy metals **[2]**
25/38 . . . Condensed phosphates
25/39 . . . . of alkali metals **[3]**
25/40 . . . . Polyphosphates **[2]**
25/41 . . . . . of alkali metals **[3]**
25/42 . . . . Pyrophosphates **[2]**
25/44 . . . . Metaphosphates **[2]**
25/445 . . . . . of alkali metals **[3]**
25/45 . . . containing plural metal, or metal and ammonium **[3]**
25/455 . . . containing halogen **[3]**
25/46 . . Preparation involving solvent-solvent extraction **[2]**

31/00 **Carbon**; **Compounds thereof** (C01B 21/00, C01B 23/00 take precedence; percarbonates C01B 15/10; carbon black C09C 1/48) **[3]**
31/02 . Preparation of carbon (by using ultra-high pressure, e.g. for the formation of diamonds, B01J 3/06; by crystal growth C30B); Purification
31/04 . . Graphite

31/06 . . Diamond
31/08 . Active carbon
31/10 . . Preparation by using gaseous activating agents
31/12 . . Preparation by using non-gaseous activating agents
31/14 . . Granulation
31/16 . Preparation of ion-exchanging materials from carbonaceous material
31/18 . Carbon monoxide
31/20 . Carbon dioxide
31/22 . . Solidifying
31/24 . Methods for the preparation of carbonates or bicarbonates in general (percarbonates C01B 15/10; particular individual carbonates, see the relevant groups of subclasses C01B to C01G, according to the cation)
31/26 . Compounds containing carbon and sulfur, e.g. carbon disulfide, carbon oxysulfide; Thiophosgene
31/28 . Phosgene
31/30 . Carbides
31/32 . . Calcium carbide
31/34 . . Tungsten or molybdenum carbides
31/36 . . Carbides of silicon or boron

33/00 **Silicon**; **Compounds thereof** (C01B 21/00, C01B 23/00 take precedence; persilicates C01B 15/14; carbides C01B 31/36) **[3]**
33/02 . Silicon (forming single crystals or homogeneous polycrystalline material with defined structure C30B) **[5]**
33/021 . . Preparation (chemical coating from the vapour phase C23C 16/00) **[5]**
33/023 . . . by reduction of silica or silica-containing material **[5]**
33/025 . . . . with carbon or a solid carbonaceous material, i.e. carbo-thermal process **[5]**
33/027 . . . by decomposition or reduction of gaseous or vaporised silicon compounds other than silica or silica-containing material **[5]**
33/029 . . . . by decomposition of monosilane **[5]**
33/03 . . . . by decomposition of silicon halides or halosilanes or reduction thereof with hydrogen as the only reducing agent **[5]**
33/031 . . . . . by decomposition of silicon tetraiodide **[5]**
33/033 . . . . by reduction of silicon halides or halosilanes with a metal or a metallic alloy as the only reducing agents **[5]**
33/035 . . . . by decomposition or reduction of gaseous or vaporised silicon compounds in the presence of heated filaments of silicon, carbon or a refractory metal, e.g. tantalum or tungsten, or in the presence of heated silicon rods on which the formed silicon is deposited, a silicon rod being obtained, e.g. Siemens process **[5]**
33/037 . . Purification (by zone-melting C30B 13/00) **[5]**
33/039 . . . by conversion of the silicon into a compound, optional purification of the compound, and reconversion into silicon **[5]**
33/04 . Hydrides of silicon
33/06 . Metal silicides
33/08 . Compounds containing halogen
33/10 . . Compounds containing silicon, fluorine, and other elements
33/107 . . Halogenated silanes **[3]**
33/113 . Silicon oxides; Hydrates thereof **[3]**
33/12 . . Silica; Hydrates thereof, e.g. lepidoic silicic acid **[3]**
33/14 . . . Colloidal silica, e.g. dispersions, gels, sols **[3]**
33/141 . . . . Preparation of hydrosols or aqueous dispersions **[3]**
33/142 . . . . . by acidic treatment of silicates **[3]**
33/143 . . . . . of aqueous solutions of silicates **[3]**
33/145 . . . . Preparation of hydroorganosols, organosols or dispersions in an organic medium **[3]**
33/146 . . . . After-treatment of sols (preparation of hydroorganosols, organosols or dispersions in an organic medium from hydrosols C01B 33/145) **[3]**
33/148 . . . . . Concentration; Drying; Dehydration; Stabilisation; Purification **[3]**
33/149 . . . . . Coating **[3]**
33/151 . . . . . by progressively adding a sol to a different sol, i.e. “build up” of particles using a “heel” **[3]**
33/152 . . . . Preparation of hydrogels **[3]**
33/154 . . . . . by acidic treatment of aqueous silicate solutions **[3]**
33/155 . . . . Preparation of hydroorganogels or organogels **[3]**
33/157 . . . . After-treatment of gels **[3]**
33/158 . . . . . Purification; Drying; Dehydrating **[3]**
33/159 . . . . . Coating or hydrophobisation **[3]**
33/16 . . . Preparation of silica xerogels **[3]**
33/18 . . . Preparation of finely divided silica neither in sol nor in gel form; After-treatment thereof (treatment to enhance the pigmenting or filling properties C09C) **[3]**
33/187 . . . . by acidic treatment of silicates **[3]**
33/193 . . . . . of aqueous solutions of silicates **[3]**
33/20 . Silicates (persilicates C01B 15/14)
33/22 . . Magnesium silicates
33/24 . . Alkaline earth metal silicates
33/26 . . Aluminium-containing silicates **[5]**
33/32 . . Alkali metal silicates (C01B 33/26 takes precedence) **[3]**
33/36 . . having base-exchange properties but not having molecular sieve properties **[6]**
33/38 . . . Layered base-exchange silicates, e.g. clays, micas or alkali metal silicates of kenyaite or magadiite type **[6]**
33/40 . . . . Clays **[6]**
33/42 . . . . Micas **[6]**
33/44 . . . . Products obtained from layered base-exchange silicates by ion-exchange with organic compounds such as ammonium, phosphonium or sulfonium compounds or by intercalation of organic compounds, e.g. organoclay material **[6]**
33/46 . . . Amorphous silicates, e.g. so-called “amorphous zeolites” **[6]**

35/00 **Boron**; **Compounds thereof** (monoborane, diborane, metal borohydrides or addition complexes thereof C01B 6/00; perborates C01B 15/12; binary compounds with nitrogen C01B 21/06; phosphides C01B 25/08; carbides C01B 31/36) **[2]**
35/02 . Boron; Borides **[2]**
35/04 . . Metal borides **[2]**
35/06 . Boron halogen compounds **[2]**
35/08 . Compounds containing boron and nitrogen, phosphorus, oxygen, sulfur, selenium or tellurium **[2]**

35/10 . . Compounds containing boron and oxygen (C01B 35/06 takes precedence) **[2]**
35/12 . . . Borates **[2]**
35/14 . . Compounds containing boron and nitrogen, phosphorus, sulfur, selenium or tellurium **[2]**
35/16 . Compounds containing direct bonding between two boron atoms, e.g. Cl_2B-BCl_2 **[2]**
35/18 . Compounds containing three or more boron atoms, e.g. NaB_3H_8, $MgB_{10}Br_{10}$ (borazoles C01B 35/14) **[2]**

Compounds characterised primarily by their physical or chemical properties, rather than by their chemical constitution [6]

37/00 Compounds having molecular sieve properties but not having base-exchange properties [6]
37/02 . Crystalline silica-polymorphs, e.g. silicalites **[6]**
37/04 . Aluminophosphates (APO compounds) **[6]**
37/06 . Aluminophosphates containing other elements, e.g. metals, boron **[6]**
37/08 . . Silicoaluminophosphates (SAPO compounds) **[6]**

39/00 Compounds having molecular sieve and base-exchange properties, e.g. crystalline zeolites; **Their preparation**; **After-treatment, e.g. ion-exchange or dealumination** (treatment to modify the sorption properties, e.g. shaping using a binder, B01J 20/10; treatment to modify the catalytic properties, e.g. combination of treatments to make the zeolites appropriate to their use as a catalyst, B01J 29/04; treatment to improve the ion-exchange properties B01J 39/14) **[6]**

Note

In this group, the following term is used with the meaning indicated: **[6]**
– "zeolites" means: **[6]**
(i) crystalline aluminosilicates with base-exchange and molecular sieve properties, having three dimensional, microporous lattice framework structure of tetrahedral oxide units; **[6]**
(ii) compounds isomorphous to those of the former category, wherein the aluminium or silicon atoms in the framework are partly or wholly replaced by atoms of other elements, e.g. by gallium, germanium, phosphorus or boron. **[6]**

39/02 . Crystalline aluminosilicate zeolites; Isomorphous compounds thereof; Direct preparation thereof; Preparation thereof starting from a reaction mixture containing a crystalline zeolite of another type, or from preformed reactants: After-treatment thereof **[6]**
39/04 . . using at least one organic template directing agent, e.g. an ionic quaternary ammonium compound or an aminated compound **[6]**
39/06 . . Preparation of isomorphous zeolites characterised by measures to replace the aluminium or silicon atoms in the lattice framework by atoms of other elements **[6]**
39/08 . . . the aluminium atoms being wholly replaced **[6]**
39/10 . . . the replacing atoms being phosphorus atoms **[6]**
39/12 . . . the replacing atoms being boron atoms **[6]**
39/14 . . Type A **[6]**
39/16 . . . from aqueous solutions of an alkali metal aluminate and an alkali metal silicate excluding any other source of alumina or silica but seeds **[6]**
39/18 . . . from a reaction mixture containing at least one aluminium silicate or aluminosilicate of a clay type, e.g. kaolin or metakaolin or its exotherm modification or allophane **[6]**
39/20 . . Faujasite type, e.g. type X or Y **[6]**
39/22 . . . Type X **[6]**
39/24 . . . Type Y **[6]**
39/26 . . Mordenite type **[6]**
39/28 . . Phillipsite or harmotome type, e.g. type B **[6]**
39/30 . . Erionite or offretite type, e.g. zeolite T **[6]**
39/32 . . Type L **[6]**
39/34 . . Type ZSM-4 or type **[6]**
39/36 . . Pentasil type, e.g. types ZSM-5, ZSM-8 or ZSM-11 **[6]**
39/38 . . . Type ZSM-5 **[6]**
39/40 . . . . using at least one organic template directing agent **[6]**
39/42 . . Type ZSM-12 **[6]**
39/44 . . Ferrierite type, e.g. types ZSM-21, ZSM-35 or ZSM-38 **[6]**
39/46 . . Other types characterised by their X-ray diffraction pattern and their defined composition **[6]**
39/48 . . . using at least one organic template directing agent **[6]**
39/50 . Zeolites wherein inorganic bases or salts occlude channels in the lattice framework, e.g. sodalite, cancrinite, nosean, hauynite **[6]**
39/52 . . Sodalites **[6]**
39/54 . Phosphates, e.g. APO or SAPO compounds **[6]**

C01C **AMMONIA**; **CYANOGEN**; **COMPOUNDS THEREOF** (salts of oxyacids of halogens C01B 11/00; peroxides, salts of peroxyacids C01B 15/00; thiosulfates, dithionites, polythionates C01B 17/64; compounds containing selenium or tellurium C01B 19/00; azides C01B 21/08; metal amides C01B 21/092; nitrites C01B 21/50; phosphides C01B 25/08; salts of oxyacids of phosphorus C01B 25/16; compounds containing silicon C01B 33/00; compounds containing boron C01B 35/00; fermentation or enzyme-using processes for the preparation of elements or inorganic compounds except carbon dioxide C12P 3/00; production of non-metallic elements or inorganic compounds by electrolysis or electrophoresis C25B)

(1) Attention is drawn to Note (1) after class C01, which defines the last place priority rule applied in this class, i.e. in the range of subclasses C01B to C01G and within these subclasses. **[8]**

(2) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

1/00 **Ammonia**; **Compounds thereof**
1/02 . Preparation or separation of ammonia
1/04 . . Preparation of ammonia by synthesis (preparation or purification of gas mixtures for ammonia synthesis C01B 3/02)
1/08 . . Preparation of ammonia from nitrogenous organic substances
1/10 . . Separation of ammonia from ammonia liquors, e.g. gas liquors
1/12 . . Separation of ammonia from gases and vapours
1/14 . . . Saturators
1/16 . Halides of ammonium
1/18 . Nitrates of ammonium
1/20 . Sulfides; Polysulfides
1/22 . Sulfites of ammonium
1/24 . Sulfates of ammonium (C01C 1/14 takes precedence)
1/242 . . Preparation from ammonia and sulfuric acid or sulfur trioxide **[2]**
1/244 . . Preparation by double decomposition of ammonium salts with sulfates **[2]**
1/245 . . Preparation from compounds containing nitrogen and sulfur **[2]**
1/246 . . . from sulfur-containing ammonium compounds **[2]**
1/247 . . . . by oxidation with free oxygen **[2]**
1/248 . . Preventing coalescing or controlling form or size of crystals **[2]**
1/249 . . Deacidifying the crystals **[2]**
1/26 . Carbonates or bicarbonates of ammonium
1/28 . Methods of preparing ammonium salts in general

(1) This group does not cover ammonium salts of complex acids (other than complex cyanides) containing a metal in the anion, which are covered by the relevant groups of subclasses C01D to C01G, according to the metal.
(2) Salts of polybasic acids with ammonium and a metal as cations are classified as though the ammonium were hydrogen.
(3) Complex ammine salts are classified in the relevant groups of subclasses C01D to C01G, according to the metal.

3/00 **Cyanogen**; **Compounds thereof**
3/02 . Preparation of hydrogen cyanide
3/04 . . Separation from gases
3/06 . Stabilisation of hydrogen cyanide
3/08 . Simple or complex cyanides of metals
3/10 . . Simple alkali metal cyanides **[3]**
3/11 . . Complex cyanides **[3]**
3/12 . . Simple or complex iron cyanides **[2]**
3/14 . Cyanic acid; Salts thereof
3/16 . Cyanamide; Salts thereof
3/18 . . Calcium cyanamide
3/20 . Thiocyanic acid; Salts thereof

C01D **COMPOUNDS OF ALKALI METALS, I.E. LITHIUM, SODIUM, POTASSIUM, RUBIDIUM, CAESIUM, OR FRANCIUM** (metal hydrides C01B 6/00; salts of oxyacids of halogens C01B 11/00; peroxides, salts of peroxyacids C01B 15/00; sulfides or polysulfides C01B 17/22; thiosulfates, dithionites, polythionates C01B 17/64; compounds containing selenium or tellurium C01B 19/00; binary compounds of nitrogen with metals C01B 21/06; azides C01B 21/08; metal amides C01B 21/092; nitrites C01B 21/50; phosphides C01B 25/08; salts of oxyacids of phosphorus C01B 25/16; carbides C01B 31/30; compounds containing silicon C01B 33/00; compounds containing boron C01B 35/00; cyanides C01C 3/08; salts of cyanic acid C01C 3/14; salts of cyanamide C01C 3/16; thiocyanates C01C 3/20; fermentation or enzyme-using processes for the preparation of elements or inorganic compounds except carbon dioxide C12P 3/00; obtaining metal compounds from mixtures, e.g. ores, which are intermediate compounds in a metallurgical process for obtaining a free metal C22B; production of non-metallic elements or inorganic compounds by electrolysis or electrophoresis C25B)

(1) Attention is drawn to Note (1) after class C01, which defines the last place priority rule applied in this class, i.e. in the range of subclasses C01B to C01G and within these subclasses. **[8]**
(2) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

1/00 **Oxides or hydroxides of sodium, potassium, or alkali metals in general [2]**
1/02 . Oxides
1/04 . Hydroxides
1/20 . . Preparation by reacting oxides or hydroxides with alkali metal salts
1/22 . . . with carbonates or bicarbonates
1/24 . . . from or via fluorides or silico-fluorides
1/26 . . Preparation from or via cyano compounds, e.g. cyanides, cyanamides
1/28 . . Purification; Separation
1/30 . . . by crystallisation
1/32 . . . by adsorption or precipitation
1/34 . . . with selective solvents
1/36 . . . by oxidation
1/38 . . . by dialysis
1/40 . . . by electrolysis
1/42 . . Concentration; Dehydration
1/44 . . Preparation in the form of granules, pieces, or other shaped products

3/00 **Halides of sodium, potassium, or alkali metals in general [2]**
3/02 . Fluorides
3/04 . Chlorides

3/06 . . Preparation by working up brines, seawater or spent lyes
3/08 . . Preparation by working up natural or industrial salt mixtures or siliceous minerals
3/10 . Bromides
3/12 . Iodides
3/14 . Purification
3/16 . . by precipitation or adsorption
3/18 . . with selective solvents
3/20 . . by melting
3/22 . Preparation in the form of granules, pieces, or other shaped products
3/24 . . Influencing the crystallisation process
3/26 . Preventing the absorption of moisture or caking of the crystals

5/00 Sulfates or sulfites of sodium, potassium, or alkali metals in general [2]

5/02 . Preparation of sulfates from alkali metal salts and sulfuric acid or bisulfates; Preparation of bisulfates
5/04 . Preparation of sulfates with the aid of sulfurous acid or sulfites, e.g. Hargreaves process
5/06 . Preparation of sulfates by double decomposition
5/08 . . with each other or with ammonium sulfate
5/10 . . with sulfates of magnesium, calcium, strontium, or barium
5/12 . Preparation of double sulfates of magnesium with sodium or potassium **[2]**
5/14 . Preparation of sulfites (C01D 5/04 takes precedence)
5/16 . Purification
5/18 . Dehydration

7/00 Carbonates of sodium, potassium, or alkali metals in general [2]

7/02 . Preparation by double decomposition
7/04 . . with a fluoride or silico-fluoride (C01D 1/24 takes precedence)
7/06 . Preparation via sodium or potassium magnesium carbonate
7/07 . Preparation from the hydroxides **[2]**
7/08 . Preparation from or via cyano compounds of sodium or potassium (C01D 1/26 takes precedence)
7/10 . Preparation of bicarbonates from carbonates (ammonia-soda process C01D 7/18)
7/12 . Preparation of carbonates from bicarbonates
7/14 . Preparation of sesquicarbonates
7/16 . Preparation from compounds of sodium or potassium with amines and carbon dioxide
7/18 . Preparation by the ammonia-soda process
7/22 . Purification
7/24 . . Crystallisation
7/26 . . by precipitation or adsorption
7/28 . . with selective solvents
7/30 . . by oxidation
7/32 . . by dialysis
7/34 . . by electrolysis
7/35 . Varying the content of water of crystallisation or the specific gravity **[2]**
7/37 . . Densifying sodium carbonate **[2]**
7/38 . Preparation in the form of granules, pieces, or other shaped products
7/40 . . Influencing the crystallisation process
7/42 . Preventing the absorption of moisture or caking

9/00 Nitrates of sodium, potassium, or alkali metals in general [2]

9/02 . Preparation by working-up natural salt mixtures
9/04 . Preparation with liquid nitric acid
9/06 . Preparation with gaseous nitric acid or nitrogen oxides
9/08 . Preparation by double decomposition
9/10 . . with ammonium nitrate
9/12 . . with nitrates of magnesium, calcium, strontium, or barium
9/14 . . of salts of potassium with sodium nitrate
9/16 . Purification
9/18 . Preparation in the form of shaped products, e.g. granules
9/20 . Preventing the absorption of moisture or caking

13/00 Compounds of sodium or potassium not provided for elsewhere [2]

15/00 Lithium compounds [2]

15/02 . Oxides; Hydroxides **[2]**
15/04 . Halides **[2]**
15/06 . Sulfates; Sulfites **[2]**
15/08 . Carbonates; Bicarbonates **[2]**
15/10 . Nitrates **[2]**

17/00 Rubidium, caesium, or francium compounds [2]

C01F COMPOUNDS OF THE METALS BERYLLIUM, MAGNESIUM, ALUMINIUM, CALCIUM, STRONTIUM, BARIUM, RADIUM, THORIUM, OR OF THE RARE-EARTH METALS (metal hydrides C01B 6/00; salts of oxyacids of halogens C01B 11/00; peroxides, salts of peroxyacids C01B 15/00; sulfides or polysulfides of magnesium, calcium, strontium, or barium C01B 17/42; thiosulfates, dithionites, polythionates C01B 17/64; compounds containing selenium or tellurium C01B 19/00; binary compounds of nitrogen with metals C01B 21/06; azides C01B 21/08; metal amides C01B 21/092; nitrites C01B 21/50; phosphides C01B 25/08; salts of oxyacids of phosphorus C01B 25/16; carbides C01B 31/30; compounds containing silicon C01B 33/00; compounds containing boron C01B 35/00; compounds having molecular sieve properties but not having base-exchange properties C01B 37/00; compounds having molecular sieve and base-exchange properties, e.g. crystalline zeolites, C01B 39/00; cyanides C01C 3/08; salts of cyanic acid C01C 3/14; salts of cyanamide C01C 3/16; thiocyanates C01C 3/20; fermentation or enzyme-using processes for the preparation of elements or inorganic compounds except carbon dioxide C12P 3/00; obtaining metal compounds from mixtures, e.g. ores, which are intermediate compounds in a metallurgical process for obtaining a free metal C22B; production of non-metallic elements or inorganic compounds by electrolysis or electrophoresis C25B)

(1) Attention is drawn to Note (1) after class C01, which defines the last place priority rule applied in this class, i.e. in the range of subclasses C01B to C01G and within these subclasses. **[8]**

(2) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

1/00 Methods of preparing compounds of the metals beryllium, magnesium, aluminium, calcium, strontium, barium, radium, thorium, or the rare earths, in general

3/00 Compounds of beryllium

3/02 . Oxides; Hydroxides **[3]**

5/00 Compounds of magnesium

5/02 . Magnesia

5/04 . . by oxidation of metallic magnesium

5/06 . . by thermal decomposition of magnesium compounds (calcining magnesite or dolomite C04B 2/10)

5/08 . . . by calcining magnesium hydroxide

5/10 . . . by thermal decomposition of magnesium chloride with water vapour

5/12 . . . by thermal decomposition of magnesium sulfate, with or without reduction

5/14 . Magnesium hydroxide

5/16 . . by treating magnesia, e.g. calcined dolomite, with water or solutions of salts not containing magnesium

5/20 . . by precipitation from solutions of magnesium salts with ammonia

5/22 . . from magnesium compounds with alkali hydroxides or alkaline earth oxides or hydroxides

5/24 . Magnesium carbonates

5/26 . Magnesium halides

5/28 . . Fluorides

5/30 . . Chlorides

5/32 . . . Preparation of anhydrous magnesium chloride by chlorinating magnesium compounds

5/34 . . . Dehydrating magnesium chloride containing water of crystallisation

5/36 . . Bromides

5/38 . Magnesium nitrates

5/40 . Magnesium sulfates (double sulfates of magnesium with sodium or potassium C01D 5/12, with other alkali metals C01D 15/06, C01D 17/00) **[3]**

5/42 . Magnesium sulfites

7/00 Compounds of aluminium

7/02 . Aluminium oxide; Aluminium hydroxide; Aluminates

7/04 . . Preparation of alkali metal aluminates; Aluminium oxide or hydroxide therefrom

7/06 . . . by treating aluminous minerals with alkali hydroxide

7/08 . . . by treating aluminous minerals with sodium carbonate

7/10 . . . by treating aluminous minerals with alkali sulfates and reducing agents

7/12 . . . Alkali metal aluminates from alkaline earth metal aluminates

7/14 . . . Aluminium oxide or hydroxide from alkali metal aluminates

7/16 . . Preparation of alkaline earth metal aluminates; Aluminium oxide or hydroxide therefrom

7/18 . . . Aluminium oxide or hydroxide from alkaline earth metal aluminates

7/20 . . Preparation of aluminium oxide or hydroxide from aluminous ores with acids or salts

7/22 . . . with halides

7/24 . . . with nitric acid or nitrogen oxides

7/26 . . . with sulfuric acids or sulfates

7/28 . . . with sulfurous acid

7/30 . . Preparation of aluminium oxide or hydroxide by thermal decomposition of aluminium compounds

7/32 . . . of sulfates

7/34 . . Preparation of aluminium hydroxide by precipitation from solutions containing aluminium salts

7/36 . . . from organic aluminium salts

7/38 . . Preparation of aluminium oxide by thermal reduction of aluminous minerals

7/40 . . . in the presence of aluminium sulfide

7/42 . . Preparation of aluminium oxide or hydroxide from metallic aluminium, e.g. by oxidation

7/44 . . Dehydration of aluminium hydroxide

7/46 . . Purification of aluminium oxide, aluminium hydroxide or aluminates **[5]**

7/47 . . . of aluminates **[5]**

7/48 . Aluminium halides

7/50 . . Fluorides

7/52 . . . Double compounds containing both fluorine and other acid groups

7/54 . . . Double compounds containing both aluminium and alkali metals or alkaline earth metals

7/56 . . Chlorides (containing fluorine C01F 7/52) **[3]**

7/58 . . . Preparation of anhydrous aluminium chloride

7/60 . . . . from oxygen-containing aluminium compounds

7/62 . . . Purification

7/64 . . Bromides (containing fluorine C01F 7/52) **[3]**

7/66 . Aluminium nitrates (containing fluorine C01F 7/52) **[3]**

7/68 . Aluminium compounds containing sulfur (containing fluorine C01F 7/52) **[3]**

7/70 . . Sulfides

7/72 . . Sulfites

7/74 . . Sulfates

7/76 . . . Double salts, e.g. alums

11/00 Compounds of calcium, strontium, or barium (C01F 7/00 takes precedence) **[3]**

11/02 . Oxides or hydroxides (production of lime C04B 2/00)

11/04 . . by thermal decomposition

11/06 . . . of carbonates

11/08 . . by reduction of sulfates

11/10 . . from sulfides

11/12 . . from silicates

11/16 . . Purification

11/18 . Carbonates

11/20 . Halides

11/22 . . Fluorides

11/24 . . Chlorides

11/26 . . . from sulfides

11/28 . . . by chlorination of alkaline earth metal compounds

11/30 . . . Concentrating; Dehydrating; Preventing the absorption of moisture or caking

11/32 . . . Purification

11/34 . . Bromides

11/36 . Nitrates

11/38 . . Preparation with nitric acid or nitrogen oxides

11/40 . . Preparation by double decomposition with nitrates

11/42 . . Double salts (with magnesium C01F 5/38)
11/44 . . Concentrating; Crystallising; Dehydrating; Preventing the absorption of moisture or caking
11/46 . Sulfates (dehydration of gypsum C04B 11/02)
11/48 . Sulfites

13/00 Compounds of radium

15/00 Compounds of thorium

17/00 Compounds of the rare-earth metals, i.e. scandium, yttrium, lanthanum, or the group of the lanthanides

---

C01G COMPOUNDS CONTAINING METALS NOT COVERED BY SUBCLASSES C01D OR C01F (metal hydrides C01B 6/00; salts of oxyacids of halogens C01B 11/00; peroxides, salts of peroxyacids C01B 15/00; thiosulfates, dithionites, polythionates C01B 17/64; compounds containing selenium or tellurium C01B 19/00; binary compounds of nitrogen with metals C01B 21/06; azides C01B 21/08; metal amides C01B 21/092; nitrites C01B 21/50; phosphides C01B 25/08; salts of oxyacids of phosphorus C01B 25/16; carbides C01B 31/30; compounds containing silicon C01B 33/00; compounds containing boron C01B 35/00; compounds having molecular sieve properties but not having base-exchange properties C01B 37/00; compounds having molecular sieve and base-exchange properties, e.g. crystalline zeolites, C01B 39/00; cyanides C01C 3/08; salts of cyanic acid C01C 3/14; salts of cyanamide C01C 3/16; thiocyanates C01C 3/20; fermentation or enzyme-using processes for the preparation of elements or inorganic compounds except carbon dioxide C12P 3/00; obtaining metal compounds from mixtures, e.g. ores, which are intermediate compounds in a metallurgical process for obtaining a free metal C21B, C22B; production of non-metallic elements or inorganic compounds by electrolysis or electrophoresis C25B)

(1) Attention is drawn to Note (1) after class C01, which defines the last place priority rule applied in this class, i.e. in the range of subclasses C01B to C01G and within these subclasses. **[8]**
(2) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

37/027 . . Chromium dioxide **[3]**
37/033 . . Chromium trioxide; Chromic acid **[3]**
37/04 . Chromium halides
37/06 . . Chromylhalides
37/08 . Chromium sulfates
37/10 . . Chrome alum
37/14 . Chromates; Bichromates

39/00 Compounds of molybdenum
39/02 . Oxides; Hydroxides **[3]**
39/04 . Halides **[3]**
39/06 . Sulfides **[3]**

41/00 Compounds of tungsten
41/02 . Oxides; Hydroxides **[3]**
41/04 . Halides **[3]**

43/00 Compounds of uranium
43/01 . Oxides; Hydroxides **[3]**
43/025 . . Uranium dioxide **[3]**
43/04 . Halides of uranium
43/06 . . Fluorides
43/08 . . Chlorides
43/10 . . Bromides
43/12 . . Iodides

45/00 Compounds of manganese
45/02 . Oxides; Hydroxides
45/04 . Carbonyls
45/06 . Halides
45/08 . Nitrates
45/10 . Sulfates
45/12 . Manganates; Permanganates

47/00 Compounds of rhenium

49/00 Compounds of iron
49/02 . Oxides; Hydroxides
49/04 . . Ferrous oxide (FeO)
49/06 . . Ferric oxide (Fe_2O_3)
49/08 . . Ferroso-ferric oxide (Fe_3O_4)
49/10 . Halides
49/12 . Sulfides
49/14 . Sulfates
49/16 . Carbonyls

51/00 Compounds of cobalt
51/02 . Carbonyls
51/04 . Oxides; Hydroxides
51/06 . Carbonates
51/08 . Halides
51/10 . Sulfates
51/12 . Complexes with ammonia

53/00 Compounds of nickel

53/02 . Carbonyls

53/04 . Oxides; Hydroxides

53/06 . Carbonates

53/08 . Halides

53/09 . . Chlorides **[3]**

53/10 . Sulfates

53/11 . Sulfides **[3]**

53/12 . Complexes with ammonia

55/00 Compounds of ruthenium, rhodium, palladium, osmium, iridium, or platinum

56/00 Compounds of transuranic elements

99/00 Subject matter not provided for in other groups of this subclass [2010.01]

C02 TREATMENT OF WATER, WASTE WATER, SEWAGE, OR SLUDGE

C02F **TREATMENT OF WATER, WASTE WATER, SEWAGE, OR SLUDGE** (processes for making harmful chemical substances harmless, or less harmful, by effecting a chemical change in the substances A62D 3/00; separation, settling tanks or filter devices B01D; special arrangements on waterborne vessels of installations for treating water, waste water or sewage, e.g. for producing fresh water, B63J; adding materials to water to prevent corrosion C23F; treating radioactively-contaminated liquids G21F 9/04) **[3]**

(1) Processes using enzymes or micro-organisms classified in this subclass are not further classified in subclass C12S. **[5]**
(2) When classifying in this subclass, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned. **[8]**
(3) In this subclass, it is desirable to add the indexing codes of groups C02F 101/00 or C02F 103/00. **[7]**

Subclass index

1/00 **Treatment of water, waste water, or sewage** (C02F 3/00 to C02F 9/00 take precedence) **[3]**

1/02 . by heating **[3]**
1/04 . . by distillation or evaporation **[3]**
1/06 . . . Flash evaporation **[3]**
1/08 . . . Thin film evaporation **[3]**
1/10 . . . by direct contact with a particulate solid or with a fluid, as a heat transfer medium **[3]**
1/12 . . . . Spray evaporation **[3]**
1/14 . . . using solar energy **[3]**
1/16 . . . using waste heat from other processes **[3]**
1/18 . . . Transportable devices to obtain potable water **[3]**
1/20 . by degassing, i.e. liberation of dissolved gases **[3]**
1/22 . by freezing **[3]**
1/24 . by flotation (C02F 1/465 takes precedence) **[3,5]**
1/26 . by extraction **[3]**
1/28 . by sorption (using ion-exchange C02F 1/42; sorbent compositions B01J) **[3]**
1/30 . by irradiation **[3]**
1/32 . . with ultra-violet light **[3]**
1/34 . with mechanical oscillations **[3]**
1/36 . . ultrasonic vibrations **[3]**
1/38 . by centrifugal separation **[3]**
1/40 . Devices for separating or removing fatty or oily substances or similar floating material (cleaning or keeping clear the surface of open water from oil or like materials E02B 15/04; devices in sewers for separating liquid or solid substances from sewage E03F 5/14) **[3,5]**
1/42 . by ion-exchange **[3]**
1/44 . by dialysis, osmosis or reverse osmosis **[3]**
1/46 . by electrochemical methods **[3,5]**
1/461 . . by electrolysis **[5]**
1/463 . . . by electrocoagulation **[5]**
1/465 . . . by electroflotation **[5]**
1/467 . . . by electrochemical disinfection **[5]**
1/469 . . by electrochemical separation, e.g. by electro-osmosis, electrodialysis, electrophoresis **[5]**
1/48 . with magnetic or electric fields (C02F 1/46 takes precedence) **[3]**
1/50 . by addition or application of a germicide or by oligodynamic treatment (C02F 1/467 takes precedence) **[3,5]**
1/52 . by flocculation or precipitation of suspended impurities **[3]**
1/54 . . using organic material **[3]**
1/56 . . . Macromolecular compounds **[3]**
1/58 . by removing specified dissolved compounds (using ion-exchange C02F 1/42; softening water C02F 5/00) **[3]**
1/60 . . Silicon compounds **[3]**
1/62 . . Heavy metal compounds **[3]**
1/64 . . . of iron or manganese **[3]**
1/66 . by neutralisation; pH adjustment (for degassing C02F 1/20; using ion-exchange C02F 1/42; for flocculation or precipitation of suspended impurities C02F 1/52; for removing dissolved compounds C02F 1/58) **[3]**
1/68 . by addition of specified substances, e.g. trace elements, for ameliorating potable water **[3]**
1/70 . by reduction **[3]**
1/72 . by oxidation **[3]**
1/74 . . with air (aeration of stretches of water C02F 7/00) **[3]**
1/76 . . with halogens or compounds of halogens **[3]**
1/78 . . with ozone **[3]**

3/00 **Biological treatment of water, waste water, or sewage [3]**

3/02 . Aerobic processes **[3]**
3/04 . . using trickle filters **[3]**
3/06 . . using submerged filters **[3]**
3/08 . . using moving contact bodies **[3]**
3/10 . . Packings; Fillings; Grids **[3]**
3/12 . . Activated sludge processes **[3]**
3/14 . . . using surface aeration **[3]**
3/16 . . . . the aerator having a vertical axis **[3]**
3/18 . . . . the aerator having a horizontal axis **[3]**
3/20 . . . using diffusers **[3]**
3/22 . . . using circulation pipes **[3]**
3/24 . . . using free-fall aeration or spraying **[3]**
3/26 . . . using pure oxygen or oxygen-rich gas **[3]**
3/28 . Anaerobic digestion processes **[3]**

3/30 . Aerobic and anaerobic processes **[3]**
3/32 . characterised by the animals or plants used, e.g. algae **[3]**
3/34 . characterised by the micro-organisms used **[3]**

5/00 **Softening water**; **Preventing scale**; **Adding scale preventatives or scale removers to water, e.g. adding sequestering agents** (softening using ion-exchange C02F 1/42) **[3]**
5/02 . Softening water by precipitation of the hardness **[3]**
5/04 . . using phosphates (C02F 5/06 takes precedence) **[3]**
5/06 . . using calcium compounds **[3]**
5/08 . Treatment of water with complexing chemicals or other solubilising agents for softening, scale prevention or scale removal, e.g. adding sequestering agents **[3]**
5/10 . . using organic substances **[3]**
5/12 . . . containing nitrogen (C02F 5/14 takes precedence) **[3]**
5/14 . . . containing phosphorus **[3]**

7/00 **Aeration of stretches of water [3]**

9/00 **Multistep treatment of water, waste water or sewage [3]**

(1) This group covers only those combined treating operations where the essential characteristic resides in the combination of treatment steps. **[3]**
(2) This group does not cover treatments where the essential characteristic resides in an individual step of the treatment, which treatments are covered by groups C02F 1/00 to C02F 7/00. An example of such treatments is a treatment in which the essential characteristic resides in a chemical treatment step and in which the one or more other steps, such as filtration or settlement, are conventional. **[3]**
(3) In this group, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[7]**
(4) Any individual step of a multistep treatment, which is not identified by the classification in the last appropriate place, and which is considered to represent information of interest for search, may also be classified in one or more of groups C02F 1/00 to C02F 1/56 or C02F 1/66 to C02F 7/00. This can, for example, be the case which it is considered of interest to enable searching of multistep treatments using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

9/02 . involving a separation step **[7]**
9/04 . at least one step being a chemical treatment **[7]**
9/06 . . Electrochemical treatment **[7]**
9/08 . at least one step being a physical treatment **[7]**
9/10 . . Thermal treatment **[7]**
9/12 . . Irradiation or treatment with electric or magnetic fields **[7]**
9/14 . at least one step being a biological treatment **[7]**

11/00 **Treatment of sludge**; **Devices therefor [3]**
11/02 . Biological treatment **[3]**
11/04 . . Anaerobic treatment; Production of methane by such processes **[3]**
11/06 . by oxidation **[3]**
11/08 . . Wet air oxidation **[3]**
11/10 . by pyrolysis **[3]**
11/12 . by de-watering, drying, or thickening **[3]**
11/14 . . with addition of chemical agents **[3]**
11/16 . . using drying or composting beds **[3]**
11/18 . by thermal conditioning (by pyrolysis C02F 11/10) **[3]**
11/20 . . by freezing **[3]**

Indexing scheme associated with groups C02F 1/00 to C02F 11/00 relating to the nature of the contaminant in the water, waste water, sewage or sludge. [7]

101/00 **Nature of the contaminant [7]**
101/10 . Inorganic compounds **[7]**
101/12 . . Halogens or halogen-containing compounds **[7]**
101/14 . . . Fluorine or fluorine-containing compounds **[7]**
101/16 . . Nitrogen compounds, e.g. ammonia **[7]**
101/18 . . . Cyanides **[7]**
101/20 . . Heavy metals or heavy metal compounds **[7]**
101/22 . . . Chromium or chromium compounds, e.g. chromates **[7]**
101/30 . Organic compounds **[7]**
101/32 . . Hydrocarbons, e.g. oil **[7]**
101/34 . . containing oxygen **[7]**
101/36 . . containing halogen **[7]**
101/38 . . containing nitrogen **[7]**

Indexing scheme associated with groups C02F 1/00 to C02F 11/00, relating to the nature of the water, waste water, sewage or sludge to be treated. [7]

103/00 **Nature of the water, waste water, sewage or sludge to be treated [7]**
103/02 . Non-contaminated water, e.g. for industrial water supply **[7]**
103/04 . . for obtaining pure or ultra-pure water **[7]**
103/06 . Contaminated groundwater or leachate **[7]**
103/08 . Seawater, e.g. for desalination **[7]**
103/10 . from quarries or from mining activities **[7]**
103/12 . from the silicate or ceramic industries, e.g. waste waters from cement or glass factories **[7]**
103/14 . Paint wastes **[7]**
103/16 . from metallurgical processes, i.e. from the production, refining or treatment of metals, e.g. galvanic wastes **[7]**
103/18 . from the wet purification of gaseous effluents **[7]**
103/20 . from animal husbandry **[7]**
103/22 . from the processing of animals, e.g. poultry, fish, or parts thereof **[7]**
103/24 . . from tanneries **[7]**
103/26 . from the processing of plants or parts thereof **[7]**
103/28 . . from the paper or cellulose industry **[7]**
103/30 . from the textile industry **[7]**
103/32 . from the food or foodstuff industry, e.g. brewery waste waters **[7]**
103/34 . from the chemical industry not provided for in groups C02F 103/12 to C02F 103/32 **[7]**
103/36 . . from the manufacture of organic compounds **[7]**
103/38 . . . Polymers **[7]**
103/40 . . from the manufacture or use of photosensitive materials **[7]**
103/42 . from bathing facilities, e.g. swimming pools **[7]**
103/44 . from vehicle washing facilities **[7]**

C03 GLASS; MINERAL OR SLAG WOOL

C03B MANUFACTURE OR SHAPING OF GLASS, OR OF MINERAL OR SLAG WOOL; SUPPLEMENTARY PROCESSES IN THE MANUFACTURE OR SHAPING OF GLASS, OR OF MINERAL OR SLAG WOOL (surface treatment C03C)

Subclass index

Melting the raw material

1/00 Preparing the batches

1/02 . Compacting the glass batches, e.g. pelletising **[5]**

3/00 Charging the melting furnaces

3/02 . combined with preheating, premelting or pretreating the glass-making ingredients, pellets or cullet **[5]**

5/00 Melting in furnaces; Furnaces so far as specially adapted for glass manufacture

5/02 . in electric furnaces

5/027 . . by passing an electric current between electrodes immersed in the glass bath, i.e. by direct resistance heating **[3]**

5/03 . . . Tank furnaces **[5]**

5/033 . . by using resistance heaters above or in the glass bath, i.e. by indirect resistance heating **[3]**

Note

Group C03B 5/02 takes precedence over groups C03B 5/04 to C03B 5/14.

5/04 . in tank furnaces

5/05 . . Discontinuously-working tank furnaces, e.g. day tanks **[5]**

5/06 . in pot furnaces

5/08 . . Glass-melting pots

5/10 . in combined tank furnaces and pots

5/12 . in shaft furnaces

5/14 . in revolving cylindrical furnaces

5/16 . Special features of the melting process; Auxiliary means specially adapted for glass-melting furnaces

5/167 . . Means for preventing damage to equipment, e.g. by molten glass, hot gases, batches (C03B 5/20, C03B 5/42 take precedence) **[5]**

5/173 . . Apparatus for changing the composition of the molten glass in glass furnaces, e.g. for colouring the molten glass (chemical aspects C03C) **[5]**

5/18 . . Stirring devices; Homogenisation

5/182 . . . by moving the molten glass along fixed elements, e.g. deflectors, weirs, baffle plates **[5]**

5/183 . . . using thermal means, e.g. for creating convection currents **[5]**

5/185 . . . . Electric means **[5]**

5/187 . . . with moving elements **[3]**

5/193 . . . using gas, e.g. bubblers **[3]**

5/20 . . Bridges, shoes, throats, or other devices for withholding dirt, foam, or batch

5/225 . . Refining (C03B 5/18 takes precedence) **[3]**

5/23 . . Cooling the molten glass (C03B 5/18, C03B 5/225 take precedence) **[3]**

5/235 . . Heating the glass (C03B 5/02, C03B 5/18, C03B 5/225 take precedence) **[3]**

5/237 . . . Regenerators or recuperators specially adapted for glass-melting furnaces **[5]**

5/24 . . Automatically regulating the melting process

5/26 . . Outlets; Overflows

5/28 . . Siphons

5/42 . . Details of construction of furnace walls, e.g. to prevent corrosion; Use of materials for furnace walls **[3]**

5/425 . . . Preventing corrosion or erosion (C03B 5/44 takes precedence) **[5]**

5/43 . . . Use of materials for furnace walls, e.g. fire-bricks **[5]**

5/435 . . . Heating arrangements for furnace walls **[5]**

5/44 . . . Cooling arrangements for furnace walls **[3]**

7/00 Distributors for the molten glass; Means for taking-off charges of molten glass; Producing the gob

7/01 . Means for taking-off charges of molten glass **[5]**

7/02 . Forehearths, i.e. feeder channels **[3]**

7/04 . . Revolving forehearths **[3]**

7/06 . . Means for thermal conditioning or controlling the temperature of the glass **[3]**

7/07 . . . Electric means **[5]**

7/08 . Feeder spouts, e.g. gob feeders **[3]**

7/082 . . Pneumatic feeders **[5]**

7/084 . . Tube mechanisms **[5]**

7/086 . . Plunger mechanisms **[5]**

7/088 . . Outlets, e.g. orifice rings **[5]**

7/09 . . Spout blocks **[5]**

7/092 . . Stirring devices; Homogenisation (C03B 5/18 takes precedence) **[5]**

7/094 . . Means for heating, cooling or insulation **[5]**

7/096 . . . for heating **[5]**

7/098 . . . . electric **[5]**
7/10 . Cutting-off the glass flow with the aid of knives or scissors; Construction of the blades used **[3]**
7/11 . . Construction of the blades **[5]**
7/12 . . Cutting-off a free-hanging glass stream **[3]**
7/14 . Transferring molten glass or gobs to glass blowing or pressing machines (C03B 7/18 to C03B 7/22 take precedence) **[3]**
7/16 . . using deflector chutes **[3]**
7/18 . Suction feeders **[3]**
7/20 . Scoop feeders **[3]**
7/22 . Gathering-devices in the form of rods or pipes **[3]**

8/00 **Production of glass by other processes than melting processes** (C03B 37/014 takes precedence; preparation of finely divided silica, in general C01B 33/18) **[4]**
8/02 . by liquid phase reaction processes **[4]**
8/04 . by gas phase reaction processes **[4]**

Shaping of glass

9/00 **Blowing glass**; **Production of hollow glass articles**
9/02 . with the mouth; Auxiliary means therefor
9/03 . . Blow pipes **[3]**
9/04 . . Making hollow glass articles with feet or projections
9/06 . . Making hollow glass articles with double walls, e.g. vacuum flasks
9/08 . Finish-blowing with compressed air of blanks blown with the mouth
9/10 . Blowing glass cylinders for sheet manufacture
9/12 . starting from a ribbon of glass; Ribbon machines
9/13 . in gob feeder machines (C03B 9/28, C03B 9/29 take precedence) **[3]**
9/14 . . in "blow" machines or in "blow-and-blow" machines (C03B 9/193, C03B 9/20 take precedence) **[3]**
9/16 . . . in machines with turn-over moulds **[3]**
9/18 . . . . Rotary-table machines **[3]**
9/19 . . . . . having only one rotary table **[3]**
9/193 . . in "press-and-blow" machines **[3]**
9/195 . . . Rotary-table machines **[3]**
9/197 . . . Construction of the blank mould **[3]**
9/20 . in "vacuum blowing" or in "vacuum-and-blow" machines
9/22 . . Rotary table machines
9/24 . . Construction of the blank mould
9/28 . in machines of the endless-chain type (C03B 9/12 takes precedence) **[3]**
9/29 . Paste mould machines (C03B 9/28 takes precedence) **[3]**
9/295 . . Rotary table machines **[5]**
9/30 . Details of blowing glass (for blowing with the mouth C03B 9/02); Use of materials for the moulds
9/31 . . Blowing laminated glass articles or glass with enclosures, e.g. wires, bubbles **[5]**
9/32 . . Giving special shapes to parts of hollow glass articles
9/325 . . . Forming screw threads or lips at the mouth of hollow glass articles; Neck moulds **[3]**
9/33 . . . Making hollow glass articles with feet or projections; Moulds therefor **[3]**
9/335 . . . Forming bottoms to blown hollow glass articles; Bottom moulds **[3]**
9/34 . . Glass-blowing moulds not otherwise provided for
9/347 . . . Construction of the blank or blow mould **[3]**
9/353 . . . Mould holders **[3]**
9/36 . . Blow heads; Supplying, ejecting, or controlling the air
9/38 . . Means for cooling, heating, or insulating glass-blowing machines
9/40 . . Gearing or controlling mechanisms specially adapted for glass-blowing machines
9/41 . . . Electric or electronic systems (in general G05B 19/00) **[5]**
9/42 . . Means for fusing, burning-off, or edge-melting combined with glass-blowing machines (uniting glass pieces by fusing C03B 23/20)
9/44 . . Means for discharging combined with glass-blowing machines, e.g. take-outs
9/447 . . . Means for the removal of glass articles from the blow-mould, e.g. take-outs **[5]**
9/453 . . . Means for pushing newly formed glass articles onto a conveyer, e.g. sweep-out mechanisms; Dead-plate mechanisms **[5]**
9/46 . . Means for cutting the hot glass in glass-blowing machines (burning-off C03B 9/42)
9/48 . . Use of materials for the moulds **[3]**

11/00 **Pressing glass**
11/02 . in machines with rotary tables
11/04 . in machines with moulds fed by suction
11/05 . in machines with reciprocating moulds **[3]**
11/06 . Construction of plunger or mould
11/07 . . Suction moulds **[3]**
11/08 . . for making solid articles, e.g. lenses
11/10 . . for making hollow articles
11/12 . Cooling, heating, or insulating the plunger, the mould, or the glass-pressing machine (C03B 9/38 takes precedence) **[3]**
11/14 . with metal inserts
11/16 . Gearing or controlling mechanisms specially adapted for glass presses

13/00 **Rolling glass**
13/01 . Rolling profiled glass articles **[5]**
13/02 . Rolling non-patterned sheets discontinuously
13/04 . Rolling non-patterned sheets continuously
13/06 . Rolling corrugated sheets
13/08 . Rolling patterned sheets
13/10 . Rolling multi-layer sheets
13/12 . Rolling glass with enclosures, e.g. wire or asbestos
13/14 . Rolling other articles
13/16 . Construction of the glass rollers
13/18 . Auxiliary means for rolling glass, e.g. sheet supports, gripping devices, hand-ladles, means for moving glass pots

15/00 **Drawing glass upwardly from the melt**
15/02 . Drawing glass sheets
15/04 . . from the free surface of the melt
15/06 . . from a debiteuse
15/08 . . by means of bars below the surface of the melt
15/10 . . multi-layer glass sheets or glass sheets coated with coloured layers
15/12 . . Construction of the annealing tower
15/14 . Drawing tubes, cylinders, or rods from the melt
15/16 . . Drawing tubes, cylinders, or rods, coated with coloured layers
15/18 . Means for laying-down and conveying combined with the drawing of glass sheets, tubes, or rods

17/00 **Forming glass by flowing out, pushing-out, or drawing downwardly or laterally from forming slits or by overflowing over lips**
17/02 . Forming glass coated with coloured layers
17/04 . Forming tubes or rods by drawing from stationary or rotating tools or from forming nozzles
17/06 . Forming glass sheets **[3]**

18/00 **Shaping glass in contact with the surface of a liquid**
18/02 . Forming sheets
18/04 . . Changing or regulating the dimensions of the molten glass ribbon **[3]**
18/06 . . . using mechanical means, e.g. restrictor bars, edge rollers **[3]**
18/08 . . . using gas **[3]**
18/10 . . . using electric means **[3]**
18/12 . . Making multilayer, coloured or armoured glass (chemical aspects C03C) **[3]**
18/14 . . Changing the surface of the glass ribbon, e.g. roughening (by chemical methods C03C) **[3]**
18/16 . . Construction of the float tank; Use of material for the float tank; Coating or protection of the tank wall **[3]**
18/18 . . Controlling or regulating the temperature of the float bath; Composition or purification of the float bath **[3]**
18/20 . . Composition of the atmosphere above the float bath; Treating or purifying the atmosphere above the float bath **[3]**
18/22 . . . Controlling or regulating the temperature of the atmosphere above the float tank **[3]**

19/00 **Other methods of shaping glass** (manufacture or treatment of flakes, fibres, or filaments from softened glass, minerals, or slags C03B 37/00)
19/01 . by progressive fusion of powdered glass onto a shaping substrate, i.e. accretion **[5]**
19/02 . by casting
19/04 . by centrifuging
19/06 . by sintering (production of quartz or fused silica articles C03B 20/00) **[2]**
19/08 . by foaming
19/09 . by fusing powdered glass in a shaping mould **[3]**
19/10 . Forming beads
19/12 . by liquid-phase reaction processes **[5]**
19/14 . by gas-phase reaction processes **[5]**

20/00 **Processes specially adapted for the production of quartz or fused silica articles [3]**

21/00 **Severing glass sheets, tubes, or rods while still plastic**
21/02 . by cutting (C03B 9/46 takes precedence)
21/04 . by punching out
21/06 . by flashing-off, burning-off, or fusing (C03B 9/42 takes precedence) **[3]**

23/00 **Re-forming shaped glass** (re-forming fibres or filaments C03B 37/14)
23/02 . Re-forming glass sheets
23/023 . . by bending **[3]**
23/025 . . . by gravity **[3]**
23/027 . . . . with moulds having at least two upward pivotable mould sections **[3]**
23/03 . . . by press-bending between shaping moulds **[3]**
23/031 . . . . the glass sheets being in a vertical position (C03B 23/033 takes precedence) **[5]**
23/033 . . . . in a continuous way, e.g. roll forming **[3]**
23/035 . . . using a gas cushion or by changing gas pressure, e.g. by applying vacuum **[3]**
23/037 . . by drawing **[3]**
23/04 . Re-forming tubes or rods
23/043 . . Heating devices specially adapted for re-forming tubes or rods in general, e.g. burners **[5]**
23/045 . . Tools or apparatus specially adapted for re-forming tubes or rods in general, e.g. glass lathes, chucks (C03B 23/043 takes precedence) **[5]**
23/047 . . by drawing (C03B 37/025 takes precedence) **[5]**
23/049 . . by pressing (C03B 21/04, C03B 23/26 take precedence) **[5]**
23/051 . . by gravity, e.g. sagging **[5]**
23/053 . . by centrifuging (C03B 37/04 takes precedence) **[5]**
23/055 . . by rolling **[5]**
23/057 . . by fusing, e.g. for flame sealing (C03B 9/42, C03B 21/06, C03B 33/08 take precedence) **[5]**
23/06 . . by bending
23/07 . . by blowing, e.g. for making electric bulbs **[3]**
23/08 . . to exact dimensions, e.g. calibrating
23/09 . . Reshaping the ends, e.g. as grooves, threads or mouths **[3]**
23/11 . . Reshaping by drawing without blowing, in combination with separating, e.g. for making ampoules **[3]**
23/13 . . Reshaping combined with uniting or heat sealing, e.g. making vacuum bottles **[3]**
23/18 . Re-forming and sealing ampoules
23/20 . Uniting glass pieces by fusing without substantial reshaping
23/203 . . Uniting glass sheets (C03B 23/24 takes precedence) **[3]**
23/207 . . Uniting glass rods, glass tubes, or hollow glassware (C03B 23/24 takes precedence) **[3]**
23/213 . . . Joining projections or feet **[3]**
23/217 . . . for the production of cathode ray tubes or similarly shaped tubes **[3]**
23/22 . . Uniting glass lenses, e.g. forming bifocal lenses
23/24 . . Making hollow glass sheets or bricks
23/26 . Punching reheated glass

After-treatment of glass product

25/00 **Annealing glass products** (after-treatment of fibres C03B 37/10)
25/02 . in a discontinuous way
25/04 . in a continuous way
25/06 . . with horizontal displacement of the glass products **[3]**
25/08 . . . of glass sheets **[3]**
25/087 . . . . being in a vertical position **[5]**
25/093 . . . . being in a horizontal position on a fluid support, e.g. a gas or molten metal **[5]**
25/10 . . with vertical displacement of the glass products **[3]**
25/12 . . . of glass sheets **[3]**

27/00 **Tempering glass products** (after-treatment of fibres C03B 37/10)
27/004 . by bringing the hot glass product in contact with a solid cooling surface, e.g. sand grains **[5]**
27/008 . by using heat of sublimation of solid particles **[5]**
27/012 . by heat treatment, e.g. for crystallisation; Heat treatment of glass products before tempering by cooling (C03B 27/008, C03B 27/016 take precedence) **[5]**

27/016 . by absorbing heat radiated from the glass product **[5]**
27/02 . using liquid **[3,5]**
27/03 . . the liquid being a molten metal or a molten salt **[5]**
27/04 . using gas **[3]**
27/044 . . for flat or bent glass sheets being in a horizontal position **[5]**
27/048 . . . on a gas cushion **[5]**
27/052 . . for flat or bent glass sheets being in a vertical position **[5]**
27/056 . . . supported on the lower edge **[5]**
27/06 . . for glass products other than flat or bent glass plates, e.g. hollow glassware, lenses **[3]**

29/00 Reheating glass products for softening or fusing their surfaces; **Fire-polishing**; **Fusing of margins** (after-treatment of fibres C03B 37/10)
29/02 . in a discontinuous way
29/04 . in a continuous way
29/06 . . with horizontal displacement of the products **[5]**
29/08 . . . Glass sheets **[5]**
29/10 . . . . being in a vertical position **[5]**
29/12 . . . . being in a horizontal position on a fluid support, e.g. a gas or molten metal **[5]**
29/14 . . with vertical displacement of the products **[5]**
29/16 . . . Glass sheets **[5]**

31/00 Manufacture of rippled or crackled glass

32/00 Thermal after-treatment of glass products not provided for in groups C03B 25/00 to C03B 31/00, e.g. crystallisation, eliminating gas inclusions or other impurities (after-treatment of fibres C03B 37/10) **[2]**
32/02 . Thermal crystallisation, e.g. for crystallising glass bodies into glass-ceramic articles **[5]**

33/00 Severing cooled glass (severing glass fibres C03B 37/16)
33/02 . Cutting or splitting sheet glass; Apparatus or machines therefor (C03B 33/09 takes precedence; glass-cutting tools C03B 33/10) **[3]**
33/023 . . the sheet being in a horizontal position **[5]**
33/027 . . . Scoring tool holders; Driving mechanisms therefor **[5]**
33/03 . . . Glass cutting tables; Apparatus for transporting or handling sheet glass during the cutting or breaking operations **[5]**
33/033 . . . Apparatus for opening score lines in glass sheets **[5]**
33/037 . . . Controlling or regulating **[5]**
33/04 . . Cutting or splitting in curves, especially for making spectacle lenses
33/06 . Cutting or splitting glass tubes, rods, or hollow products (C03B 33/09 takes precedence) **[3]**
33/07 . Cutting armoured or laminated glass products **[3]**
33/08 . by fusing
33/085 . . Tubes, rods or hollow products **[5]**
33/09 . by thermal shock **[3]**
33/095 . . Tubes, rods or hollow products **[5]**
33/10 . Glass-cutting tools, e.g. scoring tools
33/12 . . Hand tools **[3]**
33/14 . . . specially adapted for cutting tubes, rods or hollow products **[5]**

35/00 Transporting of glass products during their manufacture (conveying systems for fragile sheets, e.g. glass, B65G 49/06) **[2]**
35/04 . Transporting of hot hollow glass products (C03B 35/26 takes precedence) **[3]**
35/06 . . Feeding of hot hollow glass products into annealing or heating kilns **[3]**
35/08 . . . using rotary means directly acting on the products **[3]**
35/10 . . . using reciprocating means directly acting on the products, e.g. pushers, stackers **[3]**
35/12 . . . by picking-up and depositing **[3]**
35/14 . Transporting hot glass sheets **[3]**
35/16 . . by roller conveyers **[3]**
35/18 . . . Construction of the conveyer rollers **[3]**
35/20 . . by gripping tongs or supporting frames **[3]**
35/22 . . on a fluid support bed, e.g. on molten metal **[3]**
35/24 . . . on a gas support bed **[3]**
35/26 . Transporting of glass tubes or rods **[3]**

37/00 Manufacture or treatment of flakes, fibres, or filaments from softened glass, minerals, or slags
37/005 . Manufacture of flakes **[5]**
37/01 . Manufacture of glass fibres or filaments **[3]**
37/012 . . Manufacture of preforms for drawing fibres or filaments **[4]**
37/014 . . . made entirely or partially by chemical means **[4]**
37/016 . . . . by a liquid phase reaction process, e.g. through a gel phase **[4]**
37/018 . . . . by glass deposition on a glass substrate, e.g. by chemical vapour deposition (C03B 37/016 takes precedence; surface treatment of glass by coating with glass C03C 17/02) **[4]**
37/02 . . by drawing or extruding (C03B 37/04 takes precedence) **[3]**
37/022 . . . from molten glass in which the resultant product consists of different sorts of glass or is characterised by shape, e.g. hollow fibres **[4]**
37/023 . . . . Fibres composed of different sorts of glass, e.g. fibre optics **[4]**
37/025 . . . from reheated softened tubes, rods, fibres or filaments **[3]**
37/026 . . . . Drawing fibres reinforced with a metal wire **[5]**
37/027 . . . . Fibres composed of different sorts of glass, e.g. fibre optics (C03B 37/028 takes precedence) **[4]**
37/028 . . . . Drawing fibre bundles, e.g. for making fibre bundles of multifibres **[4]**
37/029 . . . . Furnaces therefor **[5]**
37/03 . . . Drawing means, e.g. drawing drums **[3]**
37/035 . . . . having means for deflecting or stripping-off fibres **[3]**
37/04 . . by using centrifugal force **[3]**
37/05 . . . by projecting on a rotating body having no radial orifices **[3]**
37/06 . . by blasting or blowing molten glass, e.g. for making staple fibres **[3]**
37/065 . . . starting from tubes, rods, fibres, or filaments **[3]**
37/07 . Controlling or regulating (controlling or regulating in general G05) **[3]**

37/075 . Manufacture of fibres or filaments consisting of different sorts of glass or characterised by shape, e.g. hollow fibres, undulated fibres (C03B 37/022, C03B 37/027, C03B 37/028 take precedence) **[3,4]**
37/08 . Bushings; Spinnerettes; Nozzles; Nozzle plates (nozzles in general B05B)
37/081 . . Indirect-melting bushings **[5]**
37/083 . . Nozzles; Bushing nozzle plates (C03B 37/095 takes precedence) **[5]**
37/085 . . Feeding devices therefor **[3]**
37/09 . . electrically heated **[3]**
37/092 . . . Direct-resistance heating **[5]**
37/095 . . Use of materials therefor **[3]**
37/10 . Non-chemical treatment (C03C 25/00 takes precedence; yarns or threads D02; woven fabrics D03; non-woven fabrics D04)
37/12 . . of fibres or filaments during winding up **[3]**
37/14 . . Re-forming fibres or filaments (C03B 37/025 takes precedence) **[3]**
37/15 . . . with heat application, e.g. for making optical fibres (fusion-splicing of light guides G02B 6/255; treatment of light guides to shape optical elements G02B 6/287) **[5]**
37/16 . . Cutting or severing (light guides G02B 6/25) **[3,5]**

40/00 Preventing adhesion between glass and glass or between glass and the means used to shape it [3]

40/02 . by lubrication; Use of materials as release or lubricating compositions **[3]**
40/027 . . Apparatus for applying lubricants to glass shaping moulds or tools **[5]**
40/033 . . Means for preventing adhesion between glass and glass **[5]**
40/04 . using gas **[3]**

C03C CHEMICAL COMPOSITION OF GLASSES, GLAZES, OR VITREOUS ENAMELS; SURFACE TREATMENT OF GLASS; SURFACE TREATMENT OF FIBRES OR FILAMENTS FROM GLASS, MINERALS OR SLAGS; JOINING GLASS TO GLASS OR OTHER MATERIALS

Subclass index

Chemical composition of glasses, glazes, or vitreous enamels

Note

In groups C03C 1/00 to C03C 14/00, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[4]**

1/00 Ingredients generally applicable to manufacture of glasses, glazes or vitreous enamels

1/02 . Pretreated ingredients
1/04 . Opacifiers, e.g. fluorides or phosphates; Pigments
1/06 . . to produce non-uniformly pigmented, e.g. speckled, marbled, or veined products
1/08 . to produce crackled effects
1/10 . to produce uniformly-coloured transparent products

3/00 Glass compositions (glass batch compositions C03C 6/00) **[4]**

3/04 . containing silica **[4]**

Note

If silica is specified as being present in a percent range covered by two of the groups C03C 3/06, C03C 3/062 or C03C 3/076, classification is made in both groups. If the range is covered by the three groups, classification is made in group C03C 3/04 itself. **[4]**

3/06 . . with more than 90% silica by weight, e.g. quartz
3/062 . . with less than 40% silica by weight **[4]**
3/064 . . . containing boron **[4]**
3/066 . . . . containing zinc **[4]**
3/068 . . . . containing rare earths **[4]**
3/07 . . . containing lead **[4]**
3/072 . . . . containing boron **[4]**
3/074 . . . . . containing zinc **[4]**
3/076 . . with 40% to 90% silica by weight **[4]**
3/078 . . . containing an oxide of a divalent metal, e.g. an oxide of zinc **[4]**
3/083 . . . containing aluminium oxide or an iron compound **[4]**
3/085 . . . . containing an oxide of a divalent metal **[4]**
3/087 . . . . . containing calcium oxide, e.g. common sheet or container glass **[4]**
3/089 . . . containing boron **[4]**
3/091 . . . . containing aluminium **[4]**
3/093 . . . . . containing zinc or zirconium **[4]**
3/095 . . . containing rare earths **[4]**
3/097 . . . containing phosphorus, niobium or tantalum **[4]**
3/102 . . . containing lead **[4]**
3/105 . . . . containing aluminium **[4]**
3/108 . . . . containing boron **[4]**
3/11 . . . containing halogen or nitrogen **[4]**
3/112 . . . . containing fluorine **[4]**
3/115 . . . . . containing boron **[4]**
3/118 . . . . . containing aluminium **[4]**
3/12 . Silica-free oxide glass compositions **[4]**
3/14 . . containing boron **[4]**

3/145 . . . containing aluminium or beryllium **[4]**
3/15 . . . containing rare earths **[4]**
3/155 . . . . containing zirconium, titanium, tantalum or niobium **[4]**
3/16 . . containing phosphorus **[4]**
3/17 . . . containing aluminium or beryllium **[4]**
3/19 . . . containing boron **[4]**
3/21 . . . containing titanium, zirconium, vanadium, tungsten or molybdenum **[4]**
3/23 . . containing halogen and at least one oxide, e.g. oxide of boron **[4]**
3/247 . . . containing fluorine and phosphorus **[4]**
3/253 . . containing germanium **[4]**
3/32 . Non-oxide glass compositions, e.g. binary or ternary halides, sulfides, or nitrides of germanium, selenium or tellurium **[4]**

4/00 **Compositions for glass with special properties [4]**

Note

When classifying in group C03C 4/00, classification is also made in the appropriate subgroups of group C03C 3/00 according to the glass composition. **[4]**

4/02 . for coloured glass **[4]**
4/04 . for photosensitive glass **[4]**
4/06 . . for phototropic or photochromic glass **[4]**
4/08 . for glass selectively absorbing radiation of specified wave lengths **[4]**
4/10 . for infra-red transmitting glass **[4]**
4/12 . for luminescent glass; for fluorescent glass **[4]**
4/14 . for electro-conductive glass **[4]**
4/16 . for dielectric glass **[4]**
4/18 . for ion-sensitive glass **[4]**
4/20 . for chemical resistant glass **[4]**

6/00 **Glass batch compositions** (single ingredients of batch compositions C03C 1/00) **[4]**

Note

This group covers also compositions which are intended to be heated sufficiently for their ingredients to fuse into a glass, e.g. glass furnace charges. **[4]**

6/02 . containing silicates, e.g. cullet **[4]**
6/04 . containing uncombined silica, e.g. sand **[4]**
6/06 . containing halogen compounds **[4]**
6/08 . containing pellets or agglomerates **[4]**
6/10 . containing slag **[4]**

8/00 **Enamels**; **Glazes** (cold glazes for ceramics C04B 41/86); **Fusion seal compositions being frit compositions having non-frit additions [4]**
8/02 . Frit compositions, i.e. in a powdered or comminuted form **[4]**
8/04 . . containing zinc **[4]**
8/06 . . containing halogen **[4]**
8/08 . . containing phosphorus **[4]**
8/10 . . containing lead **[4]**
8/12 . . . containing titanium or zirconium **[4]**
8/14 . Glass frit mixtures having non-frit additions, e.g. opacifiers, colorants, mill additions **[4]**
8/16 . . with vehicle or suspending agents, e.g. slip **[4]**
8/18 . . containing free metals **[4]**
8/20 . . containing titanium compounds; containing zirconium compounds **[4]**
8/22 . containing two or more distinct frits having different compositions **[4]**
8/24 . Fusion seal compositions being frit compositions having non-frit additions, i.e. for use as seals between dissimilar materials, e.g. glass and metal; Glass solders **[4]**

10/00 **Devitrified glass ceramics, i.e. glass ceramics having a crystalline phase dispersed in a glassy phase and constituting at least 50% by weight of the total composition [4]**
10/02 . Non-silica and non-silicate crystalline phase, e.g. spinel, barium titanate **[4]**
10/04 . Silicate or polysilicate crystalline phase, e.g. mullite, diopside, sphene, plagioclase **[4]**
10/06 . . Divalent metal oxide aluminosilicate crystalline phase, e.g. anorthite, slagcerams **[4]**
10/08 . . . Magnesium aluminosilicate, e.g. cordierite **[4]**
10/10 . . Alkali metal aluminosilicate crystalline phase **[4]**
10/12 . . . Lithium aluminosilicate, e.g. spodumene, eucryptite **[4]**
10/14 . Silica crystalline phase, e.g. stuffed quartz, cristobalite **[4]**
10/16 . Halogen-containing crystalline phase **[4]**

11/00 **Multi-cellular glass**

12/00 **Powdered glass** (C03C 8/02 takes precedence); **Bead compositions [4]**
12/02 . Reflective beads **[4]**

13/00 **Fibre or filament compositions** (manufacture of fibres or filaments C03B 37/00)
13/02 . containing compounds of titanium or zirconium **[4]**
13/04 . Fibre optics, e.g. core and clad fibre compositions **[4]**
13/06 . Mineral fibres, e.g. slag wool, mineral wool, rock wool **[4]**

14/00 **Glass compositions containing a non-glass component, e.g. compositions containing fibres, filaments, whiskers, platelets, or the like, dispersed in a glass matrix** (glass batch compositions C03C 6/00; devitrified glass-ceramics C03C 10/00) **[4]**

Surface treatment of glass; **Surface treatment of fibres or filaments from glass, minerals or slags**

Note

Treatment of materials specially adapted to enhance their filling properties in mortars, concrete or artificial stone is classified in subclass C04B. **[4]**

15/00 **Surface treatment of glass, not in the form of fibres or filaments, by etching** (etching or surface-brightening compositions, in general C09K 13/00) **[2]**
15/02 . for making a smooth surface

17/00 **Surface treatment of glass, e.g. of devitrified glass, not in the form of fibres or filaments, by coating** (optical coatings of optical elements G02B 1/10)
17/02 . with glass (C03C 17/34, C03C 17/44 take precedence) **[3]**
17/04 . . by fritting glass powder
17/06 . with metals (C03C 17/34, C03C 17/44 take precedence) **[3]**
17/09 . . by deposition from the vapour phase **[3]**
17/10 . . by deposition from the liquid phase

17/22 . with other inorganic material (C03C 17/34, C03C 17/44 take precedence) **[3]**
17/23 . . Oxides (C03C 17/02 takes precedence) **[3]**
17/245 . . . by deposition from the vapour phase **[3]**
17/25 . . . by deposition from the liquid phase **[3]**
17/27 . . . by oxidation of a coating previously applied **[3]**
17/28 . with organic material (C03C 17/34, C03C 17/44 take precedence) **[3]**
17/30 . . with silicon-containing compounds
17/32 . . with synthetic or natural resins (C03C 17/30 takes precedence)
17/34 . with at least two coatings having different compositions (C03C 17/44 takes precedence) **[3]**
17/36 . . at least one coating being a metal **[3]**
17/38 . . . at least one coating being a coating of an organic material **[3]**
17/40 . . . all coatings being metal coatings **[3]**
17/42 . . at least one coating of an organic material and at least one non-metal coating **[3]**
17/44 . Lustring **[3]**

19/00 Surface treatment of glass, not in the form of fibres or filaments, by mechanical means (sand-blasting, grinding, or polishing glass B24)

21/00 Treatment of glass, not in the form of fibres or filaments, by diffusing ions or metals into the surface

23/00 Other surface treatment of glass not in the form of fibres or filaments

25/00 Surface treatment of fibres or filaments from glass, minerals, or slags

25/10 . by coating **[7]**
25/12 . . General methods for coating; Devices therefor **[7]**
25/14 . . . Spraying **[7]**
25/16 . . . Dipping **[7]**
25/18 . . . using extrusion devices **[7]**
25/20 . . . Contacting the fibres with applicators, e.g. rolls **[7]**
25/22 . . . Deposition from the vapour phase **[7]**

(1) In groups C03C 25/24 to C03C 25/48, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[7]**

(2) A coating composition, i.e. a mixture of two or more constituents, is classified in the last of groups C03C 25/24 to C03C 25/42 that provides for at least one of these constituents. **[8]**

(3) When classifying in groups C03C 25/24 to C03C 25/42 any individual constituent, i.e. compound or ingredient of a coating composition, which is not identified by the classification according to Note (2), and which itself is determined to be novel and non-obvious, must also be classified in the last appropriate place in groups C03C 25/24 to C03C 25/42. **[8]**

(4) When classifying in groups C03C 25/24 to C03C 25/42 any individual constituent of a coating composition which is not identified by the classification according to Note (2) or (3), and which is considered to represent information of interest for search, may also be classified in groups C03C 25/24 to C03C 25/42. This can, for example, be the case when it is considered of interest to enable searching of coating compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

25/24 . . Coatings containing organic materials **[7]**
25/26 . . . Macromolecular compounds or prepolymers **[7]**
25/28 . . . . obtained by reactions involving only carbon-to-carbon unsaturated bonds, e.g. acrylic resins **[7]**
25/30 . . . . . Polyolefins **[7]**
25/32 . . . . obtained otherwise than by reactions involving only carbon-to-carbon unsaturated bonds **[7]**
25/34 . . . . . Condensation polymers of aldehydes, e.g. with phenols, ureas, melamines, amides or amines **[7]**
25/36 . . . . . Epoxy resins **[7]**
25/38 . . . Organo-metallic compounds **[7]**
25/40 . . . Organo-silicon compounds **[7]**
25/42 . . Coatings containing inorganic materials **[7]**
25/44 . . . Carbon, e.g. graphite **[7]**
25/46 . . . Metals **[7]**
25/48 . . with two or more coatings having different compositions **[7]**

Note

When classifying in this group, any individual coating which itself is determined to be novel and non-obvious must also be classified in groups C03C 25/24 to C03C 25/42, according to Notes (1) to (4) before group C03C 25/24.

25/50 . . . Coatings containing organic materials only **[7]**
25/52 . . . Coatings containing inorganic materials only **[7]**
25/54 . . . Combinations of one or more coatings containing organic materials only with one or more coatings containing inorganic materials only **[7]**
25/60 . by diffusing ions or metals into the surface **[7]**
25/62 . by application of electric or wave energy or particle radiation, or by ion implantation (for drying or dehydration C03C 25/64) **[7]**
25/64 . Drying; Dehydration; Dehydroxylation **[7]**
25/66 . Chemical treatment, e.g. leaching, acid or alkali treatment (dehydroxylation C03C 25/64) **[7]**
25/68 . . by etching **[7]**
25/70 . Cleaning, e.g. for reuse (C03C 25/62 to C03C 25/66 take precedence) **[7]**

Joining glass to glass or to other materials

Note

Layered products classified in groups C03C 27/00 or C03C 29/00 are also classified in subclass B32B.

27/00 **Joining pieces of glass to pieces of other inorganic material**; **Joining glass to glass other than by fusing** (C03C 17/00takes precedence; fusion seal compositions C03C 8/24; wired glass C03B; joining glass to ceramics C04)

27/02 . by fusing glass directly to metal

27/04 . Joining glass to metal by means of an interlayer

27/06 . Joining glass to glass by processes other than fusing (fusing C03B 23/20; units for use as elements for closing wall or like openings and comprising two or more parallel glass panes in spaced relationship, the panes being permanently secured together E06B 3/66)

27/08 . . with the aid of intervening metal

27/10 . . with the aid of adhesive specially adapted for that purpose

27/12 . . . Laminated glass (mechanical features in manufacture of glass laminates part of which is of plastic material B32B)

29/00 **Joining metals with the aid of glass**

C04 CEMENTS; CONCRETE; ARTIFICIAL STONE; CERAMICS; REFRACTORIES [4]

Note

This class does not cover mechanical features provided for elsewhere, e.g. mechanical working B28, kilns F27.

C04B LIME; MAGNESIA; SLAG; CEMENTS; COMPOSITIONS THEREOF, E.G. MORTARS, CONCRETE OR LIKE BUILDING MATERIALS; ARTIFICIAL STONE; CERAMICS (devitrified glass-ceramics C03C 10/00); REFRACTORIES (alloys based on refractory metals C22C); TREATMENT OF NATURAL STONE [4]

Note

In this subclass, the following terms or expressions are used with the meanings indicated: **[6]**
- "fillers" includes pigments, aggregates and fibrous reinforcing materials; **[6]**
- "active ingredients" includes processing aids or property improvers, e.g. grinding aids used after the burning process or used in the absence of a burning process; **[6]**
- "mortars", "concrete" and "artificial stone" are to be considered as a single group of materials, and therefore, in the absence of an indication to be contrary, they include mortar, concrete and other cementitious compositions. **[6]**

Subclass index

Lime; **Magnesia**; **Slag**

2/00 Lime, magnesia or dolomite [4]
- 2/02 . Lime **[4]**
- 2/04 . . Slaking **[4]**
- 2/06 . . . with addition of substances, e.g. hydrophobic agents **[4]**
- 2/08 . . . Devices therefor **[4]**
- 2/10 . Preheating, burning, calcining or cooling (decarbonation during burning of cement raw materials C04B 7/43) **[4]**
- 2/12 . . in shaft or vertical furnaces **[4]**

5/00 Treatment of molten slag (manufacture of slag wool C03B; treatment of slag in or for the production of metals C21B, C22B); **Artificial stone from molten slag [4]**
- 5/02 . Granulating (granulating apparatus B01J 2/00); Dehydrating; Drying
- 5/06 . Ingredients, other than water, added to the molten slag; Treatment with gases or gas generating material, e.g. to obtain porous slag **[4]**

Cements

Note

In groups C04B 7/00 to C04B 32/00, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[4]**

7/00 Hydraulic cements
- 7/02 . Portland cement
- 7/04 . . using raw materials containing gypsum
- 7/06 . . using alkaline raw materials
- 7/12 . Natural pozzuolanas; Natural pozzuolana cements **[4]**
- 7/13 . . Mixtures thereof with inorganic cementitious materials, e.g. Portland cements **[4]**
- 7/14 . Cements containing slag
- 7/147 . . Metallurgical slag **[4]**
- 7/153 . . . Mixtures thereof with other inorganic cementitious materials or other activators **[4]**
- 7/17 . . . . with calcium oxide containing activators **[4]**
- 7/19 . . . . . Portland cements **[4]**
- 7/21 . . . . with calcium sulfate containing activators **[4]**
- 7/22 . Iron ore cements
- 7/24 . Cements from oil shales, residues or waste other than slag **[4]**
- 7/26 . . from raw materials containing flue dust
- 7/28 . . from combustion residues (C04B 7/26 takes precedence) **[4]**
- 7/30 . . from oil shale; from oil shale residues **[4]**
- 7/32 . Aluminous cements
- 7/34 . Hydraulic lime cements; Roman cements
- 7/345 . Hydraulic cements not provided for in one of the groups C04B 7/02 to C04B 7/34 **[4]**
- 7/36 . Manufacture of hydraulic cements in general
- 7/38 . . Preparing or treating the raw materials individually or as batches **[4]**
- 7/40 . . . Dehydrating; Forming, e.g. granulating (granulating apparatus B01J 2/00)
- 7/42 . . . Active ingredients added before, or during, the burning process

7/43 . . Heat treatment, e.g. precalcining, burning, melting; Cooling **[4]**
7/44 . . . Burning; Melting **[4]**
7/45 . . . . in fluidised beds **[4]**
7/46 . . . . electric **[4]**
7/47 . . . Cooling **[4]**
7/48 . . Clinker treatment (C04B 7/47 takes precedence) **[4]**
7/51 . . . Hydrating **[4]**
7/52 . . . Grinding
7/60 . . Methods for eliminating alkali metals or compounds thereof **[4]**

9/00 Magnesium cements or silimar cements
9/02 . Magnesium cements containing chlorides, e.g. Sorel cement
9/04 . Magnesium cements containing sulfates, nitrates, phosphates, or fluorides
9/06 . Cements containing metal compounds other than magnesium compounds, e.g. compounds of zinc or lead
9/11 . Mixtures thereof with other inorganic cementitious materials **[4]**
9/12 . . with hydraulic cements, e.g. Portland cements **[4]**
9/20 . Manufacture, e.g. preparing the batches (preheating, burning, calcining or cooling lime stone, magnesite or dolomite C04B 2/10)

11/00 Calcium sulfate cements
11/02 . Dehydrating gypsum
11/024 . . Ingredients added before, or during, the calcining process, e.g. calcination modifiers **[4]**
11/028 . . Devices therefor **[4]**
11/032 . . . for the wet process, e.g. dehydrating in solution or under saturated vapor conditions **[4]**
11/036 . . . for the dry process, e.g. dehydrating in a fluidised bed or in a rotary kiln **[4]**
11/05 . obtaining anhydrite (C04B 11/028 takes precedence) **[4]**
11/06 . starting from anhydrite
11/26 . starting from phosphogypsum or from waste, e.g. purification products of smoke (C04B 11/02 takes precedence) **[4]**
11/28 . Mixtures thereof with other inorganic cementitious materials (C04B 7/04, C04B 7/153 take precedence) **[4]**
11/30 . . with hydraulic cements, e.g. Portland cements **[4]**

12/00 Cements not provided for in groups C04B 7/00 to C04B 11/00 [4]
12/02 . Phosphate cements **[4]**
12/04 . Alkali metal or ammonium silicate cements **[4]**

Use of materials as fillers for mortars, concrete or artificial stone [4]

14/00 Use of inorganic materials as fillers, e.g. pigments, for mortars, concrete or artificial stone; **Treatment of inorganic materials specially adapted to enhance their filling properties in mortars, concrete or artificial stone** (reinforcing elements for building E04C 5/00) **[4]**
14/02 . Granular materials **[4]**
14/04 . . Silica-rich materials; Silicates **[4]**
14/06 . . . Quartz; Sand **[4]**
14/08 . . . Diatomaceous earth **[4]**
14/10 . . . Clay **[4]**
14/12 . . . . Expanded clay **[4]**
14/14 . . . Minerals of vulcanic origin **[4]**
14/16 . . . . porous, e.g. pumice **[4]**
14/18 . . . . Perlite **[4]**
14/20 . . . Mica; Vermiculite **[4]**
14/22 . . . Glass **[4]**
14/24 . . . . porous, e.g. foamed glass **[4]**
14/26 . . Carbonates **[4]**
14/28 . . . of calcium **[4]**
14/30 . . Oxides other than silica **[4]**
14/32 . . Carbides; Nitrides; Borides **[4]**
14/34 . . Metals **[4]**
14/36 . . Inorganic materials not provided for in groups C04B 14/04 to C04B 14/34 **[4]**
14/38 . Fibrous materials; Whiskers **[4]**
14/40 . . Asbestos **[4]**
14/42 . . Glass **[4]**
14/44 . . . Treatment for enhancing alkali resistance **[4]**
14/46 . . Rock wool **[4]**
14/48 . . Metal **[4]**

16/00 Use of organic materials as fillers, e.g. pigments, for mortars, concrete or artificial stone; **Treatment of organic materials specially adapted to enhance their filling properties in mortars, concrete or artificial stone** (reinforcing elements for building E04C 5/00) **[4]**
16/02 . Cellulosic materials **[4]**
16/04 . Macromolecular compounds (C04B 16/02 takes precedence) **[4]**
16/06 . . fibrous **[4]**
16/08 . . porous, e.g. expanded polystyrene beads **[4]**
16/10 . . . Treatment for enhancing the mixability with the mortar **[4]**
16/12 . characterised by the shape (fibrous macromolecular compounds C04B 16/06; porous macromolecular compounds C04B 16/08) **[4]**

18/00 Use of agglomerated or waste materials or refuse as fillers for mortars, concrete or artificial stone; **Treatment of agglomerated or waste materials or refuse, specially adapted to enhance their filling properties in mortars, concrete or artificial stone** (reinforcing elements for building E04C 5/00) **[4]**
18/02 . Agglomerated materials **[4]**
18/04 . Waste materials; Refuse **[4]**
18/06 . . Combustion residues, e.g. purification products of smoke, fumes or exhaust gases **[4]**
18/08 . . . Flue dust **[4]**
18/10 . . . Burned refuse **[4]**
18/12 . . from quarries, mining or the like **[4]**
18/14 . . from metallurgical processes (treatment of molten slag C04B 5/00) **[4]**
18/16 . . from building or ceramic industry **[4]**
18/18 . . organic (C04B 18/10 takes precedence) **[4]**
18/20 . . . from macromolecular compounds **[4]**
18/22 . . . . Rubber **[4]**
18/24 . . . Vegetable refuse, e.g. rice husks, maize-ear refuse; Cellulosic materials, e.g. paper **[4]**
18/26 . . . . Wood, e.g. sawdust, wood shavings **[4]**
18/28 . . . . Mineralising; Compositions therefor **[4]**
18/30 . . Mixed waste; Waste of undefined composition, e.g. municipal waste (C04B 18/10 takes precedence) **[4]**

20/00 **Use of materials as fillers for mortars, concrete or artificial stone according to more than one of groups C04B 14/00 to C04B 18/00 and characterised by shape or grain distribution**; **Treatment of materials according to more than one of the groups C04B 14/00 to C04B 18/00 specially adapted to enhance their filling properties in mortars, concrete or artificial stone**; **Expanding or defibrillating materials** (reinforcing elements for building E04C 5/00) **[4]**

20/02 . Treatment **[4]**
20/04 . . Heat treatment **[4]**
20/06 . . . Expanding clay, perlite, vermiculite or like granular materials **[4]**
20/08 . . Defibrillating asbestos **[4]**
20/10 . Coating or impregnating **[4]**
20/12 . . Multiple coating or impregnating **[4]**

Use of materials as active ingredients [4]

(1) Active ingredients which react with cement compounds for forming new or modified mineralogical phases and are added before the hardening process, as well as cements added as additives to other cements, are classified in groups C04B 7/00 to C04B 12/00. **[4]**

(2) In groups C04B 22/00 to C04B 24/00, it is desirable to add the indexing codes of group C04B 103/00. **[6]**

22/00 **Use of inorganic materials as active ingredients for mortars, concrete or artificial stone, e.g. accelerators [4]**

22/02 . Elements **[4]**
22/04 . . Metals, e.g. aluminium used as blowing agent **[4]**
22/06 . Oxides; Hydroxides **[4]**
22/08 . Acids or salts thereof **[4]**
22/10 . . containing carbon in the anion, e.g. carbonates **[4]**
22/12 . . containing halogen in the anion, e.g. calcium chloride **[4]**
22/14 . . containing sulfur in the anion, e.g. sulfides **[4]**
22/16 . . containing phosphorus in the anion, e.g. phosphates **[4]**

24/00 **Use of organic materials as active ingredients for mortars, concrete or artificial stone, e.g. plasticisers [4]**

24/02 . Alcohols; Phenols; Ethers **[4]**
24/04 . Carboxylic acids; Salts, anhydrides or esters thereof **[4]**
24/06 . . containing hydroxy groups **[4]**
24/08 . Fats; Fatty oils; Ester type waxes; Higher fatty acids, i.e. having at least seven carbon atoms in an unbroken chain bound to a carboxyl group; Oxidised oils or fats **[4]**
24/10 . Carbohydrates or derivatives thereof **[4]**
24/12 . Nitrogen containing compounds **[4]**
24/14 . . Peptides; Proteins; Derivatives thereof **[4]**
24/16 . Sulfur-containing compounds **[4]**
24/18 . . Lignin sulfonic acid or derivatives thereof, e.g. sulfite lye **[4]**
24/20 . . Sulfonated aromatic compounds **[4]**
24/22 . . . Condensation products thereof **[4]**
24/24 . Macromolecular compounds (C04B 24/14 takes precedence; macromolecular compounds comprising sulfonate or sulfate groups C04B 24/16) **[4,6]**
24/26 . . obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
24/28 . . obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
24/30 . . . Condensation polymers of aldehydes or ketones **[4]**
24/32 . . . Polyethers, e.g. alkylphenol polyglycolether **[4]**
24/34 . . Natural resins, e.g. rosin **[4]**
24/36 . . Bituminous materials, e.g. tar, pitch **[4]**
24/38 . . Polysaccharides or derivatives thereof **[4]**
24/40 . Compounds containing silicon, titanium or zirconium **[4]**
24/42 . . Compounds having one or more carbon-to-silicon linkages **[4]**

Compositions of mortars, concrete or artificial stone [4]

(1) Any ingredient of compositions of mortars, concrete or artificial stone, classified in groups C04B 26/00 to C04B 32/00 according to the last place rule, and which itself is determined to be novel and non-obvious, must also be classified in the last appropriate place in groups C04B 7/00 to C04B 24/00. **[4,8]**

(2) Any ingredient of compositions of mortars, concrete or artificial stone, which is not identified by the classification in groups C04B 26/00 to C04B 32/00 according to the last place rule, and which is considered to represent information of particular interest for search, may also be classified in the last appropriate place in groups C04B 7/00 to C04B 24/00. This can for example be the case when it is considered of interest to enable searching of compositions using a combination of classification symbols. Such non-obligatory classification should be given as “additional information”. For example, a well defined Portland cement mortar mixture containing clay as an essential or characterising filler is classified in group C04B 28/04 and may also additionally be classified in group C04B 14/10. **[4,8]**

(3) In groups C04B 26/00 to C04B 32/00, it is desirable to add the indexing codes of group C04B 111/00. **[6]**

26/00 **Compositions of mortars, concrete or artificial stone, containing only organic binders [4]**

26/02 . Macromolecular compounds **[4]**
26/04 . . obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
26/06 . . . Acrylates **[4]**
26/08 . . . containing halogen **[4]**
26/10 . . obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
26/12 . . . Condensation polymers of aldehydes or ketones **[4]**
26/14 . . . Polyepoxides **[4]**
26/16 . . . Polyurethanes **[4]**
26/18 . . . Polyesters; Polycarbonates **[4]**
26/20 . . . Polyamides **[4]**
26/22 . . Natural resins, e.g. rosin **[4]**
26/24 . . . Cellulosic waste liquor, e.g. sulfite lye **[4]**
26/26 . . Bituminous materials, e.g. tar, pitch **[4]**
26/28 . . Polysaccharides or derivatives thereof **[4]**
26/30 . Compounds having one or more carbon-to-metal or carbon-to-silicon linkages **[4]**
26/32 . . containing silicon **[4]**

28/00 **Compositions of mortars, concrete or artificial stone, containing inorganic binders or the reaction product of an inorganic and an organic binder, e.g. polycarboxylate cements [4]**
28/02 . containing hydraulic cements other than calcium sulfates **[4]**
28/04 . . Portland cements **[4]**
28/06 . . Aluminous cements **[4]**
28/08 . . Slag cements **[4]**
28/10 . . Lime cements or magnesium oxide cements **[4]**
28/12 . . . Hydraulic lime **[4]**
28/14 . containing calcium sulfate cements **[4]**
28/16 . . containing anhydrite **[4]**
28/18 . containing mixtures of the silica-lime type **[4]**
28/20 . . Sand-lime **[4]**
28/22 . . Lime and pozzuolanas **[4]**
28/24 . containing alkyl ammonium or alkali metal silicates; containing silica sols **[4]**
28/26 . . Silicates of the alkali metals **[4]**
28/28 . containing organic polyacids, e.g. polycarboxylate cements **[4]**
28/30 . containing magnesium cements (magnesium oxide cements C04B 28/10) **[4]**
28/32 . . Magnesium oxychloride cements, e.g. Sorel cement **[4]**
28/34 . containing cold phosphate binders **[4]**
28/36 . containing sulfur, sulfides or selenium **[4]**

30/00 **Compositions for artificial stone, not containing binders** (artificial stone from molten slag C04B 5/00) **[4]**
30/02 . containing fibrous materials **[4]**

32/00 **Artificial stone not provided for in other groups of this subclass** (artificial stone from molten slag C04B 5/00) **[4]**
32/02 . with reinforcements **[4]**

Ceramics

33/00 **Clay-wares** (monolithic refractories or refractory mortars C04B 35/66; porous products C04B 38/00) **[2]**
33/02 . Preparing or treating the raw materials individually or as batches
33/04 . . Clay; Kaolin
33/06 . . . Rendering lime harmless
33/08 . . . . Preventing efflorescence
33/10 . . Eliminating iron or lime
33/13 . . Compounding ingredients (C04B 33/36, C04B 35/71 take precedence) **[2]**
33/132 . . . Waste materials; Refuse (C04B 33/16 takes precedence) **[8]**
33/135 . . . . Combustion residues, e.g fly ash, incineration waste **[8]**
33/138 . . . . from metallurgical processes, e.g. slag, furnace dust, galvanic waste **[8]**
33/14 . . . Colouring matters
33/16 . . . Lean materials, e.g. grog, quartz
33/18 . . . for liquefying the batches
33/20 . . for dry-pressing (C04B 33/13 takes precedence)
33/22 . Grog products
33/24 . Manufacture of porcelain or white ware
33/26 . . of porcelain for electrical insulation
33/28 . Slip casting
33/30 . Drying methods
33/32 . Burning methods
33/34 . . combined with glazing
33/36 . Reinforced clay-wares **[2]**

35/00 **Shaped ceramic products characterised by their composition**; **Ceramic compositions** (containing free metal bonded to carbides, diamond, oxides, borides, nitrides, silicides, e.g. cermets, or other metal compounds, e.g. oxynitrides or sulfides, other than as macroscopic reinforcing agents C22C); **Processing powders of inorganic compounds preparatory to the manufacturing of ceramic products [4]**

(1) In this group, in the absence of an indication to the contrary, compositions are classified according to the constituent present in the highest proportion by weight. **[3]**
(2) In this group, magnesium is considered as an alkaline earth metal. **[6]**
(3) In this group, a composite is considered as a sintered mixture of different powdered materials, other than sintering aids, the materials being present as separate phases in the sintered product. **[6]**
(4) In this group, fine ceramics are considered as products having a polycrystalline fine-grained microstructure, e.g. of dimensions below 100 micrometers. **[6]**
(5) The production of ceramic powder is classified in this group in so far as it relates to the preparation of powder with specific characteristics. **[6]**

35/01 . based on oxides **[6]**
35/03 . . based on magnesium oxide, calcium oxide or oxide mixtures derived from dolomite **[6]**
35/035 . . . Refractories from grain sized mixtures containing non-oxide refractory materials, e.g. carbon **[6]**
35/04 . . . based on magnesium oxide **[6]**
35/043 . . . . Refractories from grain sized mixtures **[6]**
35/047 . . . . . containing chromium oxide or chrome ore **[6]**
35/05 . . . . Refractories by fusion casting **[6]**
35/053 . . . . Fine ceramics **[6]**
35/057 . . . based on calcium oxide **[6]**
35/06 . . . based on oxide mixtures derived from dolomite
35/08 . . based on beryllium oxide **[6]**
35/10 . . based on aluminium oxide **[6]**
35/101 . . . Refractories from grain sized mixtures **[6]**
35/103 . . . . containing non-oxide refractory materials, e.g. carbon (C04B 35/106 takes precedence) **[6]**
35/105 . . . . containing chromium oxide or chrome ore **[6]**
35/106 . . . . containing zirconium oxide or zircon ($ZrSiO_4$) **[6]**
35/107 . . . Refractories by fusion casting **[6]**
35/109 . . . . containing zirconium oxide or zircon ($ZrSiO_4$) **[6]**
35/111 . . . Fine ceramics **[6]**
35/113 . . . . based on beta-aluminium oxide **[6]**
35/115 . . . . Translucent or transparent products **[6]**
35/117 . . . . Composites **[6]**
35/119 . . . . . with zirconium oxide **[6]**
35/12 . . based on chromium oxide (C04B 35/047, C04B 35/105 take precedence) **[6]**
35/14 . . based on silica **[6]**
35/16 . . based on silicates other than clay **[6]**

35/18 . . . rich in aluminium oxide **[6]**
35/185 . . . . Mullite **[6]**
35/19 . . . . Alkali metal aluminosilicates, e.g. spodumene **[6]**
35/195 . . . . Alkaline earth aluminosilicates, e.g. cordierite **[6]**
35/20 . . . rich in magnesium oxide **[6]**
35/22 . . . rich in calcium oxide **[6]**
35/26 . . based on ferrites **[2,6]**
35/28 . . . with nickel oxide as the principal oxide **[2,6]**
35/30 . . . . with zinc oxide **[2,6]**
35/32 . . . with cobalt oxide as the principal oxide **[2,6]**
35/34 . . . . with zinc oxide **[2,6]**
35/36 . . . with manganese oxide as the principal oxide **[2,6]**
35/38 . . . . with zinc oxide **[2,6]**
35/40 . . . with rare earth oxide **[2,6]**
35/42 . . based on chromites (C04B 35/047, C04B 35/105 take precedence) **[2,6]**
35/44 . . based on aluminates **[2,6]**
35/443 . . . Magnesium aluminate spinel **[6]**
35/447 . . based on phosphates **[6]**
35/45 . . based on copper oxide or solid solutions thereof with other oxides **[6]**
35/453 . . based on zinc, tin or bismuth oxides or solid solutions thereof with other oxides, e.g. zincates, stannates or bismuthates **[6]**
35/457 . . . based on tin oxides or stannates **[6]**
35/46 . . based on titanium oxides or titanates (containing also zirconium or hafnium oxides, zirconates or hafnates C04B 35/49) **[6]**
35/462 . . . based on titanates **[6]**
35/465 . . . . based on alkaline earth metal titanates **[6]**
35/468 . . . . . based on barium titanates **[6]**
35/47 . . . . . based on strontium titanates **[6]**
35/472 . . . . based on lead titanates **[6]**
35/475 . . . . based on bismuth titanates **[6]**
35/478 . . . . based on aluminium titanates **[6]**
35/48 . . based on zirconium or hafnium oxides or zirconates or hafnates **[6]**
35/482 . . . Refractories from grain sized mixtures **[6]**
35/484 . . . Refractories by fusion casting **[6]**
35/486 . . . Fine ceramics **[6]**
35/488 . . . . Composites **[6]**
35/49 . . . containing also titanium oxide or titanates **[3,6]**
35/491 . . . . based on lead zirconates and lead titanates **[6]**
35/493 . . . . . containing also other lead compounds **[6]**
35/495 . . based on vanadium, niobium, tantalum, molybdenum or tungsten oxides or solid solutions thereof with other oxides, e.g. vanadates, niobates, tantalates, molybdates or tungstates **[6]**
35/497 . . . based on solid solutions with lead oxide **[6]**
35/499 . . . . containing also titanates **[6]**
35/50 . based on rare earth compounds
35/505 . . based on yttrium oxide **[6]**
35/51 . based on compounds of actinides **[2]**
35/515 . based on non-oxides (C04B 35/50, C04B 35/51 take precedence) **[6]**
35/52 . . based on carbon, e.g. graphite **[6]**
35/524 . . . obtained from polymer precursors, e.g. glass-like carbon material **[6]**
35/528 . . . obtained from carbonaceous particles with or without other non-organic components **[6]**
35/532 . . . . containing a carbonisable binder **[6]**
35/536 . . . based on expanded graphite **[6]**
35/547 . . based on sulfides or selenides **[6]**
35/553 . . based on fluorides **[6]**
35/56 . . based on carbides **[4]**
35/563 . . . based on boron carbide **[6]**
35/565 . . . based on silicon carbide **[6]**
35/567 . . . . Refractories from grain sized mixtures **[6]**
35/569 . . . . Fine ceramics **[6]**
35/571 . . . . . obtained from polymer precursors **[6]**
35/573 . . . . . obtained by reaction sintering **[6]**
35/575 . . . . . obtained by pressure sintering **[6]**
35/576 . . . . . obtained by sintering without pressure **[6]**
35/577 . . . . . Composites **[6]**
35/58 . . based on borides, nitrides or silicides **[4,6]**
35/581 . . . based on aluminium nitride **[6]**
35/582 . . . . Composites **[6]**
35/583 . . . based on boron nitride **[6]**
35/5831 . . . . based on cubic boron nitride **[6]**
35/5833 . . . . based on hexagonal boron nitride **[6]**
35/5835 . . . . Composites **[6]**
35/584 . . . based on silicon nitride **[6]**
35/586 . . . . Refractories from grain sized mixtures **[6]**
35/587 . . . . Fine ceramics **[6]**
35/589 . . . . . obtained from polymer precursors **[6]**
35/591 . . . . . obtained by reaction sintering **[6]**
35/593 . . . . . obtained by pressure sintering (C04B 35/594 takes precedence) **[6]**
35/594 . . . . . obtained by sintering a reaction-sintered product, with or without pressure **[6]**
35/596 . . . . . Composites **[6]**
35/597 . . . based on silicon oxynitrides **[6]**
35/599 . . . . based on silicon aluminium oxynitrides (SIALONS) **[6]**
35/622 . Forming processes; Processing powders of inorganic compounds preparatory to the manufacturing of ceramic products **[6]**
35/624 . . Sol-gel processing **[6]**
35/626 . . Preparing or treating the powders individually or as batches **[6]**
35/628 . . . Coating the powders **[6]**
35/63 . . . using additives specially adapted for forming the products **[6]**
35/632 . . . . Organic additives **[6]**
35/634 . . . . . Polymers (C04B 35/636 takes precedence) **[6]**
35/636 . . . . . Polysaccharides or derivatives thereof **[6]**
35/638 . . . . Removal thereof **[6]**
35/64 . . Burning or sintering processes (C04B 33/32 takes precedence) **[6]**
35/645 . . . Pressure sintering **[6]**
35/65 . . . Reaction sintering of free metal- or free silicon-containing compositions **[3]**
35/653 . . Processes involving a melting step **[6]**
35/657 . . . for manufacturing refractories (C04B 35/05, C04B 35/107, C04B 35/484 take precedence) **[6]**
35/66 . Monolithic refractories or refractory mortars, including those whether or not containing clay

Note

Any ingredient of a refractory mortar composition containing a hydraulic cement, e.g. aluminous cement, classified in group C04B 35/66, which is considered to represent information of interest for search, may also be classified in the last appropriate place in groups C04B 7/00 to C04B 24/00. This can, for example, be the case when it is considered of interest to enable searching of compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". For example, such an additional classification in group C04B 24/00 may be given for an organic retarder added to the mortar composition. **[8]**

35/71 . Ceramic products containing macroscopic reinforcing agents (C04B 35/66 takes precedence) **[3,4]**
35/74 . . containing shaped metallic materials **[2]**
35/76 . . . Fibres, filaments, whiskers, platelets, or the like **[2]**
35/78 . . containing non-metallic materials **[2]**
35/80 . . . Fibres, filaments, whiskers, platelets, or the like **[2]**
35/81 . . . . Whiskers **[6]**
35/82 . . . . Asbestos; Glass; Fused silica **[2]**
35/83 . . . . Carbon fibres in a carbon matrix **[6]**

Note

The products covered by this group are usually referred to as "carbon-carbon composites". **[6]**

35/84 . . . Impregnated or coated materials **[2]**

37/00 **Joining burned ceramic articles with other burned ceramic articles or other articles by heating**
37/02 . with metallic articles
37/04 . with articles made from glass

38/00 **Porous mortars, concrete, artificial stone or ceramic ware**; **Preparation thereof** (treating slag with gases or gas generating material C04B 5/06) **[4,6]**

Note

Porous mortars, concrete, artificial stone or ceramic ware characterised by the ingredients or compositions are also classified in groups C04B 2/00 to C04B 35/00. **[4]**

38/02 . by adding chemical blowing agents **[4]**
38/04 . by dissolving-out added substances **[4]**
38/06 . by burning-out added substances **[4]**
38/08 . by adding porous substances **[4]**
38/10 . by using foaming agents (C04B 38/02 takes precedence) **[4]**

40/00 **Processes, in general, for influencing or modifying the properties of mortars, concrete or artificial stone compositions, e.g. their setting or hardening ability** (by selecting active ingredients C04B 22/00 to C04B 24/00; hardening of a well-defined composition C04B 26/00 to C04B 28/00; making porous, cellular or lightening C04B 38/00) **[4,6]**
40/02 . Selection of the hardening environment **[4]**
40/04 . Preventing evaporation of the mixing water (permanent coverings C04B 41/00) **[4]**
40/06 . Inhibiting the setting, e.g. mortars of the deferred action type containing water in breakable containers **[4]**

41/00 **After-treatment of mortars, concrete, artificial stone or ceramics**; **Treatment of natural stone** (glazes, other than cold glazes, C03C 8/00) **[3]**

(1) In this group, the following terms or expressions are used with the meanings indicated: **[6]**
– "mortars", "concrete" and "artificial stone" cover materials after primary shaping. **[6]**
(2) Treating, e.g. coating or impregnating, a material with the same material or with a substance which ultimately is transformed into the same material is not considered after-treatment for this group but is classified as preparation of the material, e.g. a carbon body impregnated with a carbonisable substance is classified in C04B 35/52.
(3) In groups C04B 41/45 to C04B 41/80, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[4]**

41/45 . Coating or impregnating **[4]**
41/46 . . with organic materials **[4]**
41/47 . . . Oils, fats or waxes **[4]**
41/48 . . . Macromolecular compounds **[4]**
41/49 . . . Compounds having one or more carbon-to-metal or carbon-to-silicon linkages **[4]**
41/50 . . with inorganic materials **[4]**
41/51 . . . Metallising **[4]**
41/52 . . Multiple coating or impregnating **[4]**
41/53 . involving the removal of part of the materials of the treated article **[4]**
41/60 . of only artificial stone **[4]**
41/61 . . Coating or impregnating **[4]**
41/62 . . . with organic materials **[4]**
41/63 . . . . Macromolecular compounds **[4]**
41/64 . . . . Compounds having one or more carbon-to-metal or carbon-to-silicon linkages **[4]**
41/65 . . . with inorganic materials **[4]**
41/66 . . . . Fluorides, e.g. ocratation **[4]**
41/67 . . . . Phosphates **[4]**
41/68 . . . . Silicic acid; Silicates **[4]**
41/69 . . . . Metals **[4]**
41/70 . . . for obtaining at least two superposed coatings having different compositions **[4]**
41/71 . . . . at least one coating being an organic material **[4]**
41/72 . . involving the removal of part of the materials of the treated articles, e.g. etching **[4]**
41/80 . of only ceramics **[4]**
41/81 . . Coating or impregnating **[4]**
41/82 . . . with organic materials **[4]**
41/83 . . . . Macromolecular compounds **[4]**
41/84 . . . . Compounds having one or more carbon-to-metal or carbon-to-silicon linkages **[4]**
41/85 . . . with inorganic materials **[4]**
41/86 . . . . Glazes; Cold glazes **[4]**
41/87 . . . . Ceramics **[4]**
41/88 . . . . Metals **[4]**
41/89 . . . for obtaining at least two superposed coatings having different compositions **[4]**

41/90 . . . . at least one coating being a metal **[4]**
41/91 . . involving the removal of part of the materials of the treated articles, e.g. etching **[4]**

Indexing scheme associated with groups C04B 22/00 and C04B 24/00, relating to the function or property of the active ingredients. [6]

103/00 Function or property of the active ingredients [6]
103/10 . Accelerators **[6]**
103/12 . . Set accelerators **[6]**
103/14 . . Hardening accelerators **[6]**
103/20 . Retarders **[6]**
103/22 . . Set retarders **[6]**
103/24 . . Hardening retarders **[6]**
103/30 . Water reducers, plasticisers, air-entrainers **[6]**
103/32 . . Superplasticisers **[6]**
103/40 . Surface-active agents, dispersants **[6]**
103/42 . Pore formers **[6]**
103/44 . Thickening, gelling or viscosity increasing agents **[6]**
103/46 . Water-loss reducers, hygroscopic or hydrophilic agents **[6]**
103/48 . Foam stabilisers **[6]**
103/50 . Defoamers, air detrainers **[6]**
103/52 . Grinding aids **[6]**
103/54 . Pigments; Dyes **[6]**
103/56 . Opacifiers **[6]**
103/60 . Agents for protection against chemical, physical or biological attack **[6]**
103/61 . . Corrosion inhibitors **[6]**
103/63 . . Flame-proofing agents **[6]**
103/65 . . Water proofers or repellants **[6]**
103/67 . . Biocides **[6]**
103/69 . . . Fungicides **[6]**

Indexing scheme associated with groups C04B 26/00 to C04B 32/00, relating to the function, property or use of the mortars, concrete or artificial stone. [6]

111/00 Function, property or use of the mortars, concrete or artificial stone [6]
111/10 . Compositions characterized by the absence of a specified material **[6]**
111/12 . . Absence of asbestos, e.g. cement-asbestos substitutes **[6]**
111/20 . Resistance against chemical, physical or biological attack **[6]**
111/21 . . Efflorescence resistance **[6]**
111/22 . . Carbonation resistance **[6]**
111/23 . . Acid resistance **[6]**
111/24 . . Sea water resistance **[6]**
111/25 . . Graffiti resistance **[6]**
111/26 . . Corrosion of reinforcement resistance **[6]**
111/27 . . Water resistance, i.e. waterproof or water repellant materials **[6]**
111/28 . . Fire resistance **[6]**
111/30 . Nailable or sawable materials **[6]**
111/32 . Expansion inhibited materials **[6]**
111/34 . Non-shrinking materials **[6]**
111/40 . Porous or lightweight materials **[6]**
111/42 . . Floating materials **[6]**
111/50 . Flexible or elastic materials **[6]**
111/52 . Sound insulating materials **[6]**
111/54 . Substitutes for natural stone, e.g. artificial marble **[6]**
111/56 . Compositions suited for fabrication of pipes, e.g. by centrifugal casting **[6]**
111/60 . Flooring materials **[6]**
111/62 . . Self-levelling compositions **[6]**
111/70 . Grouts **[6]**
111/72 . Compositions used for repairing existing buildings or building materials **[6]**
111/74 . Underwater applications **[6]**
111/76 . Use at sub-zero temperatures **[6]**
111/80 . Optical properties, e.g. transparency **[6]**
111/82 . . Coloured materials **[6]**
111/90 . Electrical properties **[6]**
111/92 . . Electrically insulating materials **[6]**
111/94 . . Electrically conducting materials **[6]**

C05 FERTILISERS; MANUFACTURE THEREOF [4]

(1) An ingredient in a mixture of fertilisers, or a single fertiliser which contains more than one of the chemical elements on which the subdivision into subclasses is based, is classified only in the first of the appropriate subclasses. Thus, a nitrophosphate or an ammoniated superphosphate is classified in C05B but not in C05C, magnesium phosphate is classified in C05B but not in C05D, and calcium cyanamide in C05C but not in C05D.

(2) Any ingredient in a mixture, which is considered to represent information of interest for search, may also additionally be classified according to Note (1). This can, for example, be the case when it is considered of interest to enable searching of mixtures using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

C05B PHOSPHATIC FERTILISERS

Subclass index

1/00 Superphosphates, i.e. fertilisers produced by reacting rock or bone phosphates with sulfuric or phosphoric acid in such amounts and concentrations as to yield solid products directly

1/02 . Superphosphates

1/04 . Double-superphosphate; Triple-superphosphate Other fertilisers based essentially on monocalcium phosphate

1/06 . Ammoniation of superphosphates (fertilisers based essentially on ammonium orthophosphate C05B 7/00)

1/10 . Apparatus for the manufacture of superphosphates

3/00 Fertilisers based essentially on di-calcium phosphate (C05B 11/00 takes precedence)

5/00 Thomas phosphate; **Other slag phosphates**

7/00 Fertilisers based essentially on alkali or ammonium orthophosphates (C05B 11/00 takes precedence)

9/00 Fertilisers based essentially on phosphates or double phosphates of magnesium (C05B 11/00 takes precedence)

11/00 Fertilisers produced by wet-treating or leaching raw materials either with acids in such amounts and concentrations as to yield solutions followed by neutralisation, or with alkaline lyes

11/02 . Pretreatment

11/04 . using mineral acid

11/06 . . using nitric acid (nitrophosphates)

11/08 . . using sulfuric acid

11/10 . . using orthophosphoric acid

11/12 . . using aqueous hydrochloric acid

11/14 . . using wet gaseous acids

11/16 . using alkaline lyes

13/00 Fertilisers produced by pyrogenic processes from phosphatic materials

13/02 . from rock phosphates (C05B 13/06 takes precedence)

13/04 . from metallic phosphorus compounds, e.g. ferro-phosphorus

13/06 . Alkali or alkaline earth meta- or polyphosphate fertilisers

15/00 Organic phosphatic fertilisers (bone meal C05B 17/00)

17/00 Other phosphatic fertilisers, e.g. soft rock phosphates, bone meal

17/02 . containing manganese

19/00 Granulation or pelletisation of phosphatic fertilisers other than slag (granulating slag C04B)

19/02 . of superphosphates or mixtures containing them

21/00 Mixtures of phosphatic fertilisers covered by more than one of main groups C05B 1/00 to C05B 19/00

C05C NITROGENOUS FERTILISERS

Subclass index

1/00 **Ammonium nitrate fertilisers**
1/02 . Granulation; Pelletisation; Stabilisation; Colouring

3/00 **Fertilisers containing other salts of ammonia or ammonia itself, e.g. gas liquor**

5/00 **Fertilisers containing other nitrates**
5/02 . containing sodium or potassium nitrate
5/04 . containing calcium nitrate

7/00 **Fertilisers containing calcium or other cyanamides**
7/02 . Granulation; Pelletisation; De-gassing; Hydrating; Hardening; Stabilisation; Oiling

9/00 **Fertilisers containing urea or urea compounds**
9/02 . containing urea-formaldehyde condensates

11/00 **Other nitrogenous fertilisers**

13/00 **Mixtures of nitrogenous fertilisers covered by more than one of main groups C05C 1/00 to C05C 11/00**

C05D INORGANIC FERTILISERS NOT COVERED BY SUBCLASSES C05B, C05C; FERTILISERS PRODUCING CARBON DIOXIDE

1/00 **Fertilisers containing potassium** (C05D 7/00 takes precedence)
1/02 . Manufacture from potassium chloride or sulfate or double or mixed salts thereof
1/04 . from minerals or volcanic rocks

3/00 **Calcareous fertilisers** (C05D 7/00 takes precedence)
3/02 . from limestone, calcium carbonate, calcium hydrate, slaked lime, calcium oxide, waste calcium compounds
3/04 . from blast-furnace slag or other slags containing lime or calcium silicates

5/00 **Fertilisers containing magnesium** (C05D 7/00 takes precedence)

7/00 **Fertilisers producing carbon dioxide**

9/00 **Other inorganic fertilisers**
9/02 . containing trace elements

11/00 **Mixtures of fertilisers covered by more than one of main groups C05D 1/00 to C05D 9/00**

C05F ORGANIC FERTILISERS NOT COVERED BY SUBCLASSES C05B, C05C, E.G. FERTILISERS FROM WASTE OR REFUSE

(1) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

(2) Processes where the composting step is the characterising feature, or apparatus therefor, are classified in group C05F 17/00. **[5]**

1/00 **Fertilisers made from animal corpses, or parts thereof**
1/02 . Apparatus for their manufacture

3/00 **Fertilisers from human or animal excrements, e.g. manure**
3/02 . Guano
3/04 . from human faecal masses
3/06 . Apparatus for their manufacture

5/00 **Fertilisers from distillery wastes, molasses, vinasses, sugar plant, or similar wastes or residues**

7/00 **Fertilisers from waste water, sewage sludge, sea slime, ooze or similar masses** (methods or installations for de-watering, drying, or incineration of sludge C02F 11/00)
7/02 . from sulfite liquor or other waste lyes from the manufacture of cellulose
7/04 . from waste liquors in the potash industry

9/00 **Fertilisers from household or town refuse**
9/02 . Apparatus for the manufacture
9/04 . Biological compost

11/00 **Other organic fertilisers**
11/02 . from peat, brown coal, or similar vegetable deposits
11/04 . . Horticultural earth ("Gärtnerische Erden") from peat
11/06 . . Apparatus for their manufacture
11/08 . Organic fertilisers containing added bacterial cultures, mycelia or the like
11/10 . Fertilisers containing plant vitamins or hormones

15/00 **Mixtures of fertilisers covered by more than one of main groups C05F 1/00 to C05F 11/00; Fertilisers from mixtures of starting materials, all the starting materials being covered by this subclass but not by the same main group [5]**

17/00 **Preparation of fertilisers characterised by the composting step [5]**
17/02 . Apparatus therefor **[5]**

C05G MIXTURES OF FERTILISERS COVERED INDIVIDUALLY BY DIFFERENT SUBCLASSES OF CLASS C05; MIXTURES OF ONE OR MORE FERTILISERS WITH MATERIALS NOT HAVING A SPECIFIC FERTILISING ACTIVITY, E.G. PESTICIDES, SOIL-CONDITIONERS, WETTING AGENTS (organic fertilisers containing added bacterial cultures, mycelia, or the like C05F 11/08; organic fertilisers containing plant vitamins or hormones C05F 11/10); **FERTILISERS CHARACTERISED BY THEIR FORM [4]**

(1) This subclass covers mixtures of fertilisers with soil-conditioning or soil-stabilising materials characterised by their fertilising activity. **[6]**

(2) This subclass does not cover mixtures of fertilisers with soil-conditioning or soil-stabilising materials characterised by their soil-conditioning or soil-stabilising activity, which are covered by group C09K 17/00. **[6]**

1/00 Mixtures of fertilisers covered individually by different subclasses of class C05

1/02 . of superphosphates with ammonium nitrate

1/04 . of Thomas phosphate with potassium compounds

1/06 . of alkali or ammonium orthophosphates with ammonium nitrate or ammonium sulfate or other nitrates or potassium compounds

1/08 . of ammonium nitrate with limestone or calcium carbonate

1/10 . of ammonium sulfate with potassium compounds

3/00 Mixtures of one or more fertilisers with materials not having a specifically fertilising activity

3/02 . with pesticides

3/04 . with soil conditioners

3/06 . with wetting agents

3/08 . with agents affecting the nitrification of ammonium compounds or urea in the soil

3/10 . with dust-preventing coatings **[4]**

5/00 Fertilisers characterised by their form (granulating fertilisers characterised by their chemical constitution, see the relevant groups in C05B to C05G) **[4]**

C06 EXPLOSIVES; MATCHES

C06B EXPLOSIVE OR THERMIC COMPOSITIONS (blasting F42D); MANUFACTURE THEREOF; USE OF SINGLE SUBSTANCES AS EXPLOSIVES [2]

(1) This subclass covers:
- compositions which are:
  (a) explosive: compositions included are those containing both a fuel and sufficient oxidiser so that, upon initiation, they are capable of undergoing a chemical change of a relatively high rate of speed, resulting in the production of usable force for blasting, firearms, propelling missiles, or the like; **[2]**
  (b) thermic: compositions included have (i) a consumable fuel component which consists of any element which is a metal, B, Si, Se or Te, or mixtures, intercompounds, or hydrides thereof; and (ii) in combination an oxidant component which is either a metal oxide or a salt (organic or inorganic) capable of yielding a metal oxide on decomposition; **[2]**
  (c) fuels for rocket engines and intended for reaction with an oxidant, excluding air, in order to provide thrust for motive power purposes; **[2]**
  (d) for use in affecting the explosion environment, e.g. for neutralising the poisonous gases of explosives, for cooling the explosion gases, or the like; **[2]**
- methods or apparatus for preparing or treating such compositions not otherwise provided for; **[2]**
- methods of using single substances as explosives. **[2]**

(2) In this subclass, the following term is used with the meaning indicated:
- "nitrated" covers compounds having a nitro group or a nitrate ester group. **[2]**

(3) Methods or apparatus for preparing or treating such compositions are classified according to the particular components of the compositions. **[2]**

Subclass index

21/00 Apparatus or methods for working-up explosives, e.g. forming, cutting, drying

Note

In groups C06B 23/00 to C06B 49/00, in the absence of an indication to the contrary, a composition is classified in the last place that provides for an ingredient. **[2]**

23/00 Compositions characterised by non-explosive or non-thermic constituents [2]

23/02 . for neutralising poisonous gases from explosives produced during blasting **[2]**

23/04 . for cooling the explosion gases **[2]**

25/00 Compositions containing a nitrated organic compound [2]

25/02 . the nitrated compound being starch or sugar **[2]**

25/04 . the nitrated compound being an aromatic **[2]**

25/06 . . with two or more nitrated aromatic compounds present **[2]**

25/08 . . . at least one of which is nitrated toluene **[2]**

25/10 . the compound being nitroglycerine **[2]**

25/12 . . with other nitrated organic compound **[2]**

25/14 . . . the other compound being a nitrated aliphatic diol **[2]**

25/16 . . . the other compound being a nitrated aromatic **[2]**

25/18 . the compound being nitrocellulose present as 10% or more by weight of the total composition **[2]**

25/20 . . with a non-explosive or a non-thermic component **[2]**

25/22 . . with a nitrated aromatic compound **[2]**

25/24 . . with nitroglycerine **[2]**

25/26 . . . with an organic non-explosive or an organic non-thermic component **[2]**

25/28 . the compound being nitrocellulose present as less than 10% by weight of the total composition **[2]**

25/30 . . with nitroglycerine **[2]**

25/32 . the compound being nitrated pentaerythritol **[2]**

25/34 . the compound being a nitrated acyclic, alicyclic or heterocyclic amine **[2]**

25/36 . the compound being a nitroparaffin **[2]**

25/38 . . with other nitrated organic compound **[2]**

25/40 . . with two or more nitroparaffins present **[2]**

27/00 Compositions containing a metal, boron, silicon, selenium or tellurium or mixtures, intercompounds or hydrides thereof, and hydrocarbons or halogenated hydrocarbons [2]

29/00 Compositions containing an inorganic oxygen-halogen salt, e.g. chlorate, perchlorate [2]

29/02 . of an alkali metal **[2]**

29/04 . . with an inorganic non-explosive or an inorganic non-thermic component **[2]**
29/06 . . . the component being a cyanide; the component being an oxide of iron, chromium or manganese **[2]**
29/08 . . with an organic non-explosive or an organic non-thermic component **[2]**
29/10 . . . the component being a dye or a colouring agent **[2]**
29/12 . . with carbon or sulfur **[2]**
29/14 . . with iodine or an iodide **[2]**
29/16 . . with a nitrated organic compound **[2]**
29/18 . . . the compound being nitrated toluene or a nitrated phenol **[2]**
29/20 . . . the compound being nitrocellulose **[2]**
29/22 . the salt being ammonium perchlorate **[2]**

31/00 Compositions containing an inorganic nitrogen-oxygen salt [2]
31/02 . the salt being an alkali metal or an alkaline earth metal nitrate **[2]**
31/04 . . with carbon or sulfur **[2]**
31/06 . . . with an organic non-explosive or an organic non-thermic component **[2]**
31/08 . . with a metal oxygen-halogen salt, e.g. inorganic chlorate, inorganic perchlorate **[2]**
31/10 . . . with carbon or sulfur **[2]**
31/12 . . with a nitrated organic compound **[2]**
31/14 . . . the compound being an aromatic **[2]**
31/16 . . . . the compound being a nitrated toluene **[2]**
31/18 . . . . the compound being a nitrated phenol, e.g. picric acid **[2]**
31/20 . . . the compound being nitroglycerine **[2]**
31/22 . . . the compound being nitrocellulose **[2]**
31/24 . . . . with other explosive or thermic component **[2]**
31/26 . . . . . the other component being nitroglycerine **[2]**
31/28 . the salt being ammonium nitrate **[2]**
31/30 . . with vegetable matter; with resin; with rubber **[2]**
31/32 . . with a nitrated organic compound **[2]**
31/34 . . . the nitrated compound being starch or sugar **[2]**
31/36 . . . . with other explosive or thermic component **[2]**
31/38 . . . the nitrated compound being an aromatic **[2]**
31/40 . . . . with an organic non-explosive or an organic non-thermic component **[2]**
31/42 . . . . with other explosive or thermic component **[2]**
31/44 . . . the compound being nitroglycerine **[2]**
31/46 . . . . with a vegetable matter component, e.g. wood pulp, sawdust **[2]**
31/48 . . . . with other explosive or thermic component **[2]**
31/50 . . . . . the other component being a nitrated organic compound **[2]**
31/52 . . . the compound being nitrocellulose present as 10% or more by weight of the total composition **[2]**
31/54 . . . . with other nitrated organic compound **[2]**
31/56 . . . the compound being nitrocellulose present as less than 10% by weight of the total composition **[2]**

33/00 Compositions containing particulate metal, alloy, boron, silicon, selenium or tellurium with at least one oxygen supplying material which is either a metal oxide or a salt, organic or inorganic, capable of yielding a metal oxide [2]
33/02 . with an organic non-explosive or an organic non-thermic component **[2]**
33/04 . the material being an inorganic nitrogen-oxygen salt **[2]**
33/06 . the material being an inorganic oxygen-halogen salt **[2]**
33/08 . with a nitrated organic compound **[2]**
33/10 . . the compound being an aromatic **[2]**
33/12 . the material being two or more oxygen-yielding compounds **[2]**
33/14 . . at least one being an inorganic nitrogen-oxygen salt **[2]**

35/00 Compositions containing a metal azide [2]

37/00 Compositions containing a metal fulminate [2]
37/02 . with a nitrated organic compound or an inorganic oxygen-halogen salt **[2]**

39/00 Compositions containing free phosphorus or a binary compound of phosphorus, except with oxygen [2]
39/02 . with an inorganic oxygen-halogen salt **[2]**
39/04 . . with a binary compound of phosphorus, except with oxygen **[2]**
39/06 . with free metal, alloy, boron, silicon, selenium or tellurium **[2]**

41/00 Compositions containing a nitrated metallo-organic compound [2]
41/02 . the compound containing lead **[2]**
41/04 . . with an organic explosive or an organic thermic component **[2]**
41/06 . . . with an inorganic explosive or an inorganic thermic component **[2]**
41/08 . . with a metal azide or a metal fulminate **[2]**
41/10 . . with other nitrated metallo-organic compound **[2]**

43/00 Compositions characterised by explosive or thermic constituents not provided for in groups C06B 25/00 to C06B 41/00 [2]

45/00 Compositions or products which are defined by structure or arrangement of component or product (explosive charges of particular form or shape F42B 1/00, F42B 3/00) **[2]**
45/02 . comprising particles of diverse size or shape **[2]**
45/04 . comprising solid particles dispersed in solid solution or matrix **[2]**
45/06 . . the solid solution or matrix containing an organic component **[2]**
45/08 . . . the dispersed solid containing an inorganic explosive or an inorganic thermic component **[2]**
45/10 . . . the organic component containing a resin **[2]**
45/12 . having contiguous layers or zones **[2]**
45/14 . . a layer or zone containing an inorganic explosive or an inorganic thermic component **[2]**
45/16 . . . the layer or zone containing at least one inorganic component from the group of azide, fulminate, phosphorus and phosphide **[2]**
45/18 . comprising a coated component (particles dispersed in a matrix C06B 45/04; coated explosive charges F42B) **[2]**

45/20 . . the component base containing an organic explosive or an organic thermic component **[2]**
45/22 . . . the coating containing an organic compound **[2]**
45/24 . . . . the compound being an organic explosive or an organic thermic component **[2]**
45/26 . . . . . the compound being a nitrated toluene **[2]**
45/28 . . . the component base containing nitrocellulose and nitroglycerine **[2]**
45/30 . . the component base containing an inorganic explosive or an inorganic thermic component **[2]**
45/32 . . . the coating containing an organic compound **[2]**
45/34 . . . . the compound being an organic explosive or an organic thermic component **[2]**
45/36 . . the component base containing both an organic explosive or thermic component and an inorganic explosive or thermic component **[2]**

47/00 Compositions in which the components are separately stored until the moment of burning or explosion, e.g. "Sprengel"-type explosives; **Suspensions of solid component in a normally non-explosive liquid phase, including a thickened aqueous phase [2]**
47/02 . the components comprising a binary propellant **[2]**
47/04 . . a component containing a nitrogen oxide or acid thereof **[2]**
47/06 . . a component being a liquefied normally gaseous material supplying oxygen (C06B 47/04 takes precedence) **[2]**
47/08 . . a component containing hydrazine or a hydrazine derivative **[2]**
47/10 . . a component containing free boron, an organic borane or a binary compound of boron, except with oxygen **[2]**
47/12 . . a component being a liquefied normally gaseous fuel **[2]**
47/14 . comprising a solid component and an aqueous phase **[2]**

49/00 Use of single substances as explosives [2]

C06C DETONATING OR PRIMING DEVICES; FUSES; CHEMICAL LIGHTERS; PYROPHORIC COMPOSITIONS [2]

5/00 Fuses, e.g. fuse cords
5/04 . Detonating fuses
5/06 . Fuse igniting means; Fuse connectors
5/08 . Devices for the manufacture of fuses

7/00 Non-electric detonators; **Blasting caps**; **Primers**
7/02 . Manufacture; Packing

9/00 Chemical contact igniters; **Chemical lighters**

15/00 Pyrophoric compositions; **Flints** (chemical lighters C06C 9/00)

C06D MEANS FOR GENERATING SMOKE OR MIST; GAS-ATTACK COMPOSITIONS; GENERATION OF GAS FOR BLASTING OR PROPULSION (CHEMICAL PART) [2]

3/00 Generation of smoke or mist (chemical part) (compositions used as biocides, pest repellants or attractants, or plant growth regulators A01N 25/18)

5/00 Generation of pressure gas, e.g. for blasting cartridges, starting cartridges, rockets (explosive compositions containing an oxidizer, fuels for rocket engines intended for reaction with an oxidant other than air C06B)
5/02 . by decompressing compressed, liquefied, or solidified gases
5/04 . by auto-decomposition of single substances
5/06 . by reaction of two or more solids
5/08 . by reaction of two or more liquids
5/10 . by reaction of solids with liquids

7/00 Compositions for gas-attacks

C06F MATCHES; MANUFACTURE OF MATCHES

1/00 Mechanical manufacture of matches
1/02 . Cutting match splints
1/04 . Filling match splints into carrier bars; Discharging matches
1/06 . Dipping, coating, impregnating, or drying of matches **[2]**
1/08 . Carrier bars
1/10 . . Guiding means for carrier bars
1/12 . Filling matches into boxes
1/14 . Manufacture of ignition strips
1/16 . Manufacture of matches connected together, e.g. in bands or blocks
1/18 . Printing on matches or match-boxes when combined with match manufacture
1/20 . Applying strike-surfaces, e.g. on match-boxes, on match-books
1/22 . Assembling matches
1/24 . Safety devices against fire
1/26 . Machines for complete match manufacture

3/00 Chemical features in the manufacture of matches
3/02 . Wooden strip for matches or substitute therefor
3/04 . . Chemical treatment before or after dipping, e.g. dyeing, impregnating
3/08 . Strike-surface compositions

5/00 Matches (match-books A24F 27/12)
5/02 . Permanent matches
5/04 . Wax matches

C07 ORGANIC CHEMISTRY [2]

(1) In this class, the following term is used with the meaning indicated:
– "preparation" covers purification, separation, stabilisation or use of additives, unless a separate place is provided therefor. **[4]**

(2) Biocidal, pest repellant, pest attractant or plant growth regulatory activity of compounds or preparations is further classified in subclass A01P. **[8]**

(3) In subclasses C07C to C07K and within each of theses subclasses, in the absence of an indication to the contrary, and with the exception referred to below, a compound is classified in the last appropriate place. For example, 2-butyl-pyridine, which contains an acyclic chain and a heterocyclic ring, is classified only as a heterocyclic compound, in subclass C07D. In general, and in the absence of an indication to the contrary (such as groups C07C 59/58, C07C 59/70), the terms "acyclic" and "aliphatic" are used to describe compounds in which there is no ring; and, if a ring were present, the compound would be taken by the "last place" rule to a later group for cycloaliphatic or aromatic compounds, if such a group exists. Where a compound or an entire group of compounds exists in tautomeric forms, it is classified as though existing in the form which is classified last in the system, unless the other form is specifically mentioned earlier in the system.

(4) Chemical compounds and their preparation are classified in the groups for the type of compound prepared. The processes of preparation are also classified in the groups for the types of reaction employed, if of interest. General processes for the preparation of a class of compounds falling into more than one main group are classified in the groups for the processes employed, when such groups exist. The compounds prepared are also classified in the groups for the types of compound prepared, if of interest.

(5) In this class, in the absence of an indication to the contrary, the compounds containing carboxyl or thiocarboxyl groups are classified as the relevant carboxylic or thiocarboxylic acids, unless the "last place rule" (see Note (3), above) dictates otherwise; a carboxyl group being a carbon atom having three bonds, and no more than three, to hetero atoms, other than nitrogen atoms of nitro or nitroso groups, with at least one multiple bond to the same hetero atom and a thiocarboxyl group being a carboxyl group having at least one bond to a sulfur atom, e.g. amides or nitriles of carboxylic acids, are classified with the corresponding acids. **[5]**

(6) Salts of a compound, unless specifically provided for, are classified as that compound, e.g. aniline hydrochloride is classified as containing carbon, hydrogen and nitrogen only (in group C07C 211/46), sodium malonate is classified as malonic acid (in C07C 55/08), and a mercaptide is classified as the mercaptan. Metal chelates are dealt with in the same way. Similarly, metal alcoholates and metal phenates are classified in subclass C07C and not in subclass C07F, the alcoholates in groups C07C 31/28 to C07C 31/32 and the phenates as the corresponding phenols in group C07C 39/235 or C07C 39/44. Salts, adducts or complexes formed between two or more organic compounds are classified according to all compounds forming the salts, adducts or complexes. **[2]**

C07B GENERAL METHODS OF ORGANIC CHEMISTRY; APPARATUS THEREFOR (preparation of carboxylic acid esters by telomerisation C07C 67/47; processes for preparing macromolecular compounds, e.g. telomerisation C08F, C08G)

(1) In this subclass, a functional group which is already present in some residue being introduced and is not substantially involved in a chemical reaction, is not considered as the functional group which is formed or introduced as a result of the chemical reaction. **[4]**

(2) In this subclass, the following term is used with the meaning indicated:
– "separation" means separation only for the purposes of recovering organic compounds. **[4]**

(3) When classifying in this subclass, classification is also made in group B01D 15/08insofar as subject matter of general interest relating to chromatography is concerned. **[8]**

(4) In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place according to the type of reaction employed, noting the bond or the functional group which is formed or introduced as a result of the chemical reaction. **[4]**

Subclass index

31/00 Reduction in general [4]

33/00 Oxidation in general [4]

Reactions without formation or introduction of functional groups containing hetero atoms [4]

35/00 Reactions without formation or introduction of functional groups containing hetero atoms, involving a change in the type of bonding between two carbon atoms already directly linked [4]

35/02 . Reduction **[4]**
35/04 . Dehydrogenation **[4]**
35/06 . Decomposition, e.g. elimination of halogens, water or hydrogen halides **[4]**
35/08 . Isomerisation **[4]**

37/00 Reactions without formation or introduction of functional groups containing hetero atoms, involving either the formation of a carbon-to-carbon bond between two carbon atoms not directly linked already or the disconnection of two directly linked carbon atoms [4]

37/02 . Addition **[4]**
37/04 . Substitution **[4]**
37/06 . Decomposition, e.g. elimination of carbon dioxide **[4]**
37/08 . Isomerisation **[4]**
37/10 . Cyclisation **[4]**
37/12 . . Diels-Alder reactions **[4]**

Reactions with formation or introduction of functional groups containing hetero atoms [4]

39/00 Halogenation [4]

41/00 Formation or introduction of functional groups containing oxygen [4]

41/02 . of hydroxy or O-metal groups **[4]**
41/04 . of ether, acetal or ketal groups **[4]**
41/06 . of carbonyl groups **[4]**
41/08 . of carboxyl groups or salts, halides or anhydrides thereof **[4]**
41/10 . . Salts, halides or anhydrides of carboxyl groups **[4]**
41/12 . of carboxylic acid ester groups **[4]**
41/14 . of peroxy or hydroperoxy groups **[4]**

43/00 Formation or introduction of functional groups containing nitrogen [4]

43/02 . of nitro or nitroso groups **[4]**
43/04 . of amino groups **[4]**
43/06 . of amide groups **[4]**
43/08 . of cyano groups **[4]**
43/10 . of isocyanate groups **[4]**

45/00 Formation or introduction of functional groups containing sulfur [4]

45/02 . of sulfo or sulfonyldioxy groups **[4]**
45/04 . of sulfonyl or sulfinyl groups **[4]**
45/06 . of mercapto or sulfide groups **[4]**

47/00 Formation or introduction of functional groups not provided for in groups C07B 39/00 to C07B 45/00 [4]

49/00 Grignard reactions [4]

51/00 Introduction of protecting groups or activating groups, not provided for in groups C07B 31/00 to C07B 49/00 [4]

53/00 Asymmetric syntheses [4]

55/00 Racemisation; Complete or partial inversion [4]

57/00 Separation of optically-active organic compounds [4]

59/00 Introduction of isotopes of elements into organic compounds [4]

***60/00 Generation of organic free radicals* [2011.01]**

61/00 Other general methods [4]

Purification; Separation; Stabilisation [4]

63/00 Purification; Separation specially adapted for the purpose of recovering organic compounds (separation of optically-active organic compounds C07B 57/00); **Stabilisation; Use of additives [4]**

63/02 . by treatment giving rise to a chemical modification **[4]**
63/04 . Use of additives **[4]**

C07C ACYCLIC OR CARBOCYCLIC COMPOUNDS (preparation of macromolecular compounds C08F; production of organic compounds by electrolysis or electrophoresis C25B 3/00, C25B 7/00)

(1) In this subclass, the following terms or expressions are used with the meanings indicated:
- "bridged" means the presence of at least one fusion other than ortho, peri or spiro;
- two rings are "condensed" if they share at least one ring member, i.e. "spiro" and "bridged" are considered as condensed;
- "condensed ring system" is a ring system in which all rings are condensed among themselves;
- "number of rings" in a condensed ring system equals the number of scissions necessary to convert the ring system into one acyclic chain;
- "quinones" are compounds derived from compounds containing a six-membered aromatic ring or a system comprising six-membered aromatic rings (which system may be condensed or not condensed) by replacing two or four $\rangle CH$ groups of the six-membered aromatic rings by $\rangle C{=}O$ groups, and by removing one or two carbon-to-carbon double bonds, respectively, and rearranging the remaining carbon-to-carbon double bonds to give a ring or ring system with alternating double bonds, including the carbon-to-oxygen bonds; this means that acenaphthenequinone or camphorquinone are not considered as quinones. **[5]**

(2) Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C to C07K and within these subclasses. **[8]**

(3) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

(4) When classifying in this subclass, classification is also made in group B01D 15/08insofar as subject matter of general interest relating to chromatography is concerned. **[8]**

(5) In this subclass, in the absence of an indication to the contrary, a process is classified in the last appropriate place. **[3]**

(6) In this subclass, in the absence of an indication to the contrary, "quaternary ammonium compounds" are classified with the corresponding "non-quaternised nitrogen compounds". **[5]**

(7) For the classification of compounds in groups C07C 1/00 to C07C 71/00and C07C 401/00 to C07C 409/00:
- a compound is classified considering the molecule as a whole (rule of the "whole molecule approach");
- a compound is considered to be saturated if it does not contain carbon atoms bound to each other by multiple bonds;
- a compound is considered to be unsaturated if it contains carbon atoms bound to each other by multiple bonds, which includes a six-membered aromatic ring,

unless otherwise specified or implicitly derivable from the subdivision, as in group C07C 69/00, e.g. C07C 69/712.

(8) For the classification of compounds in groups C07C 201/00 to C07C 395/00, i.e. after the functional group has been determined according to the "last place rule", a compound is classified according to the following principles:
- compounds are classified in accordance with the nature of the carbon atom to which the functional group is attached;
- a carbon skeleton is a carbon atom, other than a carbon atom of a carboxyl group, or a chain of carbon atoms bound to each other; a carbon skeleton is considered to be terminated by every bond to an element other than carbon or to a carbon atom of a carboxyl group;
- when the molecule contains several functional groups, only functional groups linked to the same carbon skeleton as the one first determined are considered;
- a carbon skeleton is considered to be saturated if it does not contain carbon atoms bound to each other by multiple bonds;
- a carbon skeleton is considered to be unsaturated if it contains carbon atoms bound to each other by multiple bonds, which includes a six-membered aromatic ring. **[5]**

Subclass index

Hydrocarbons [3]

1/00 Preparation of hydrocarbons from one or more compounds, none of them being a hydrocarbon

1/02 . from oxides of carbon (preparation of liquid hydrocarbon mixtures of undefined composition C10G 2/00; of synthetic natural gas C10L 3/06) **[5]**
1/04 . . from carbon monoxide with hydrogen
1/06 . . . in the presence of organic compounds, e.g. hydrocarbons
1/08 . . . Isosyntheses
1/10 . . from carbon monoxide with water vapour
1/12 . . from carbon dioxide with hydrogen
1/20 . starting from organic compounds containing only oxygen atoms as hetero atoms
1/207 . . from carbonyl compounds **[5]**
1/213 . . . by splitting of esters **[5]**
1/22 . . by reduction
1/24 . . by elimination of water
1/247 . . by splitting of cyclic ethers **[3]**
1/26 . starting from organic compounds containing only halogen atoms as hetero atoms
1/28 . . by ring closure
1/30 . . by splitting-off the elements of hydrogen halide from a single molecule
1/32 . starting from compounds containing hetero atoms other than, or in addition to, oxygen or halogen **[3]**
1/34 . . reacting phosphines with aldehydes or ketones, e.g. Wittig reaction **[3]**
1/36 . by splitting of esters (C07C 1/213, C07C 1/30 take precedence) **[3,5]**

2/00 Preparation of hydrocarbons from hydrocarbons containing a smaller number of carbon atoms [3]

2/02 . by addition between unsaturated hydrocarbons **[3]**
2/04 . . by oligomerisation of well-defined unsaturated hydrocarbons without ring formation **[3]**
2/06 . . . of alkenes, i.e. acyclic hydrocarbons having only one carbon-to-carbon double bond **[3]**
2/08 . . . . Catalytic processes **[3]**
2/10 . . . . . with metal oxides **[3]**
2/12 . . . . . with crystalline alumino-silicates, e.g. molecular sieves **[3]**
2/14 . . . . . with inorganic acids; with salts or anhydrides of acids **[3]**
2/16 . . . . . Acids of sulfur; Salts thereof; Sulfur oxides **[3]**
2/18 . . . . . Acids of phosphorus; Salts thereof; Phosphorus oxides **[3]**
2/20 . . . . . Acids of halogen; Salts thereof **[3]**
2/22 . . . . . Metal halides; Complexes thereof with organic compounds **[3]**
2/24 . . . . . with metals **[3]**
2/26 . . . . . with hydrides or organic compounds (C07C 2/22 takes precedence) **[3]**
2/28 . . . . . with ion-exchange resins **[3]**
2/30 . . . . . containing a metal-to-carbon bond; Metal hydrides **[3]**
2/32 . . . . . as complexes, e.g. acetyl-acetonates **[3]**
2/34 . . . . . Metal-hydrocarbon complexes **[3]**
2/36 . . . . . as phosphines, arsines, stilbines or bismuthines **[3]**
2/38 . . . of dienes or alkynes **[3]**
2/40 . . . . of conjugated dienes **[3]**
2/42 . . homo- or co-oligomerisation with ring formation, not being a Diels-Alder conversion **[3]**
2/44 . . . of conjugated dienes only **[3]**
2/46 . . . . Catalytic processes **[3]**
2/48 . . . of only hydrocarbons containing a carbon-to-carbon triple bond **[3]**
2/50 . . Diels-Alder conversion **[3]**
2/52 . . . Catalytic processes **[3]**
2/54 . by addition of unsaturated hydrocarbons to saturated hydrocarbons, or to hydrocarbons containing a six-membered aromatic ring with no unsaturation outside the aromatic ring **[3]**
2/56 . . Addition to acyclic hydrocarbons **[3]**
2/58 . . . Catalytic processes **[3]**
2/60 . . . . with halides **[3]**
2/62 . . . . with acids **[3]**
2/64 . . Addition to a carbon atom of a six-membered aromatic ring **[3]**
2/66 . . . Catalytic processes **[3]**
2/68 . . . . with halides **[3]**
2/70 . . . . with acids **[3]**
2/72 . . Addition to a non-aromatic carbon atom of hydrocarbons containing a six-membered aromatic ring **[3]**
2/74 . by addition with simultaneous hydrogenation **[3]**
2/76 . by condensation of hydrocarbons with partial elimination of hydrogen **[3]**
2/78 . . Processes with partial combustion **[3]**
2/80 . . Processes with the aid of electrical means **[3]**
2/82 . . oxidative coupling **[3]**
2/84 . . . catalytic **[3]**
2/86 . by condensation between a hydrocarbon and a non-hydrocarbon **[3]**
2/88 . . Growth and elimination reactions **[3]**

4/00 Preparation of hydrocarbons from hydrocarbons containing a larger number of carbon atoms [3]

4/02 . by cracking a single hydrocarbon or a mixture of individually defined hydrocarbons or a normally gaseous hydrocarbon fraction **[3]**
4/04 . . Thermal processes **[3]**
4/06 . . Catalytic processes **[3]**
4/08 . by splitting-off an aliphatic or cycloaliphatic part from the molecule **[3]**
4/10 . . from acyclic hydrocarbons **[3]**
4/12 . . from hydrocarbons containing a six-membered aromatic ring, e.g. propyltoluene to vinyltoluene **[3]**
4/14 . . . splitting taking place at an aromatic-aliphatic bond **[3]**
4/16 . . . . Thermal processes **[3]**
4/18 . . . . Catalytic processes **[3]**
4/20 . . . . Hydrogen being formed in situ, e.g. from steam **[3]**
4/22 . by depolymerisation to the original monomer, e.g. dicyclopentadiene to cyclopentadiene **[3]**
4/24 . by splitting polyarylsubstituted aliphatic compounds at an aliphatic-aliphatic bond, e.g. 1,4-diphenylbutane to styrene **[3]**
4/26 . by splitting polyaryl compounds at a bond between uncondensed six-membered aromatic rings, e.g. biphenyl to benzene **[3]**

5/00 Preparation of hydrocarbons from hydrocarbons containing the same number of carbon atoms

5/02 . by hydrogenation

5/03 . . of non-aromatic carbon-to-carbon double bonds **[3]**
5/05 . . . Partial hydrogenation **[3]**
5/08 . . of carbon-to-carbon triple bonds
5/09 . . . to carbon-to-carbon double bonds **[3]**
5/10 . . of aromatic six-membered rings
5/11 . . . Partial hydrogenation **[3]**
5/13 . . with simultaneous isomerisation **[3]**
5/22 . by isomerisation (with simultaneous hydrogenation C07C 5/13)
5/23 . . Rearrangement of carbon-to-carbon unsaturated bonds **[3]**
5/25 . . . Migration of carbon-to-carbon double bonds **[3]**
5/27 . . Rearrangement of carbon atoms in the hydrocarbon skeleton **[3]**
5/29 . . . changing the number of carbon atoms in a ring while maintaining the number of rings **[3]**
5/31 . . . changing the number of rings **[3]**
5/32 . by dehydrogenation with formation of free hydrogen **[2]**
5/327 . . Formation of non-aromatic carbon-to-carbon double bonds only **[3]**
5/333 . . . Catalytic processes **[3]**
5/35 . . Formation of carbon-to-carbon triple bonds only **[3]**
5/367 . . Formation of an aromatic six-membered ring from an existing six-membered ring, e.g. dehydrogenation of ethylcyclohexane to ethylbenzene **[3]**
5/373 . . with simultaneous isomerisation **[3]**
5/387 . . . of cyclic compounds containing no six-membered ring to compounds containing a six-membered aromatic ring **[3]**
5/393 . . . with cyclisation to an aromatic six-membered ring, e.g. dehydrogenation of n-hexane to benzene **[3]**
5/41 . . . . Catalytic processes **[3]**
5/42 . by dehydrogenation with a hydrogen acceptor **[2]**

(1) In this group:
– the catalyst is considered as forming part of the acceptor system in case of simultaneous catalyst reduction; **[3]**
– compounds added for binding the reduced acceptor system are not considered as belonging to the acceptor system. **[3]**

(2) The acceptor system is classified according to the supplying substances in case of in situ formation of the acceptor system or of in situ regeneration of the reduced acceptor system. **[3]**

5/44 . . with a halogen or a halogen-containing compound as an acceptor **[2]**
5/46 . . with sulfur or a sulfur-containing compound as an acceptor **[2]**
5/48 . . with oxygen as an acceptor **[2]**
5/50 . . with an organic compound as an acceptor **[2]**
5/52 . . . with a hydrocarbon as an acceptor, e.g. hydrocarbon disproportionation, i.e. 2 $C_nH_p \rightarrow C_nH_{p+q} + C_nH_{p-q}$ **[2]**
5/54 . . with an acceptor system containing at least two compounds provided for in more than one of groups C07C 5/44 to C07C 5/50 **[3]**
5/56 . . . containing only oxygen and either halogens or halogen-containing compounds **[3]**

6/00 Preparation of hydrocarbons from hydrocarbons containing a different number of carbon atoms by redistribution reactions [3]
6/02 . Metathesis reactions at an unsaturated carbon-to-carbon bond **[3]**
6/04 . . at a carbon-to-carbon double bond **[3]**
6/06 . . . at a cyclic carbon-to-carbon double bond **[3]**
6/08 . by conversion at a saturated carbon-to-carbon bond **[3]**
6/10 . . in hydrocarbons containing no six-membered aromatic rings **[3]**
6/12 . . of exclusively hydrocarbons containing a six-membered aromatic ring **[3]**

7/00 Purification, separation or stabilisation of hydrocarbons; Use of additives [5]
7/04 . by distillation **[3]**
7/05 . . with the aid of auxiliary compounds **[3]**
7/06 . . . by azeotropic distillation
7/08 . . . by extractive distillation
7/09 . by fractional condensation **[3]**
7/10 . by extraction, i.e. purification or separation of liquid hydrocarbons with the aid of liquids **[3]**
7/11 . by absorption, i.e. purification or separation of gaseous hydrocarbons with the aid of liquids **[3]**
7/12 . by adsorption, i.e. purification or separation of hydrocarbons with the aid of solids, e.g. with ion-exchangers **[3]**
7/13 . . by molecular-sieve technique **[2,3]**
7/135 . by gas-chromatography **[3]**
7/14 . by crystallisation; Purification or separation of the crystals **[3]**
7/144 . using membranes, e.g. selective permeation **[3]**
7/148 . by treatment giving rise to a chemical modification of at least one compound **[3]**
7/152 . . by forming adducts or complexes **[3]**
7/156 . . . with solutions of copper salts **[3]**
7/163 . . by hydrogenation **[3]**
7/167 . . . for removal of compounds containing a triple carbon-to-carbon bond **[3]**
7/17 . . with acids or sulfur oxides **[3]**
7/171 . . . Sulfuric acid or oleum **[7]**
7/173 . . with the aid of organo-metallic compounds **[3]**
7/177 . . by selective oligomerisation or selective polymerisation of at least one compound of the mixture **[3]**
7/20 . Use of additives, e.g. for stabilisation **[3]**

9/00 Acyclic saturated hydrocarbons
9/02 . with one to four carbon atoms **[5]**
9/04 . . Methane (production by treatment of sewage C02F 11/04) **[5]**
9/06 . . Ethane
9/08 . . Propane
9/10 . . with four carbon atoms **[5]**
9/12 . . . Iso-butane
9/14 . with five to fifteen carbon atoms
9/15 . . Straight-chain hydrocarbons **[3]**
9/16 . . Branched-chain hydrocarbons
9/18 . . . with five carbon atoms **[5]**
9/21 . . . 2,2,4-Trimethylpentane **[3]**
9/22 . with more than fifteen carbon atoms

11/00 Acyclic unsaturated hydrocarbons
11/02 . Alkenes
11/04 . . Ethene

11/06 . . Propene
11/08 . . with four carbon atoms **[5]**
11/09 . . . Isobutene **[3]**
11/10 . . with five carbon atoms **[5]**
11/107 . . with six carbon atoms **[5]**
11/113 . . . Methylpentenes **[3]**
11/12 . Alkadienes
11/14 . . Allene
11/16 . . with four carbon atoms
11/167 . . . 1,3-Butadiene **[3]**
11/173 . . with five carbon atoms **[3]**
11/18 . . . Isoprene **[3]**
11/20 . . . 1,3-Pentadiene **[3]**
11/21 . Alkatrienes; Alkatetraenes; Other alkapolyenes **[2,3]**
11/22 . containing carbon-to-carbon triple bonds
11/24 . . Acetylene (production of acetylene gas by wet methods C10H) **[5]**
11/28 . containing carbon-to-carbon double bonds and carbon-to-carbon triple bonds
11/30 . . Butenyne

13/00 Cyclic hydrocarbons containing rings other than, or in addition to, six-membered aromatic rings

13/02 . Monocyclic hydrocarbons or acyclic hydrocarbon derivatives thereof
13/04 . . with a three-membered ring
13/06 . . with a four-membered ring
13/08 . . with a five-membered ring
13/10 . . . with a cyclopentane ring
13/11 . . . . substituted by unsaturated hydrocarbon groups **[2]**
13/12 . . . with a cyclopentene ring
13/15 . . . with a cyclopentadiene ring **[3]**
13/16 . . with a six-membered ring
13/18 . . . with a cyclohexane ring
13/19 . . . . substituted by unsaturated hydrocarbon groups **[2]**
13/20 . . . with a cyclohexene ring
13/21 . . . . Menthadienes **[2]**
13/23 . . . with a cyclohexadiene ring **[3]**
13/24 . . with a seven-membered ring
13/26 . . with an eight-membered ring
13/263 . . . with a cyclo-octene or cyclo-octadiene ring **[3]**
13/267 . . . with a cyclo-octatriene or cyclo-octatetraene ring **[3]**
13/271 . . with a nine- to eleven-membered ring **[3]**
13/273 . . with a twelve-membered ring **[3]**
13/275 . . . the twelve-membered ring being unsaturated **[3]**
13/277 . . . . with a cyclododecatriene ring **[3]**
13/28 . Polycyclic hydrocarbons or acyclic hydrocarbon derivatives thereof

Note

Ring systems consisting only of condensed six-membered rings with maximum number of non-cumulative double bonds are classified in group C07C 15/00. **[3]**

13/32 . . with condensed rings
13/34 . . . with a bicyclo ring system containing four carbon atoms
13/36 . . . with a bicyclo ring system containing five carbon atoms
13/38 . . . with a bicyclo ring system containing six carbon atoms
13/39 . . . with a bicyclo ring system containing seven carbon atoms **[3]**
13/40 . . . . with a bicycloheptane ring structure **[3]**
13/42 . . . . with a bicycloheptene ring structure **[3]**
13/43 . . . . . substituted by unsaturated acyclic hydrocarbon groups **[3]**
13/44 . . . with a bicyclo ring system containing eight carbon atoms
13/45 . . . with a bicyclo ring system containing nine carbon atoms **[3]**
13/465 . . . . Indenes; Completely or partially hydrogenated indenes **[3]**
13/47 . . . with a bicyclo ring system containing ten carbon atoms **[3]**
13/48 . . . . Completely or partially hydrogenated naphthalenes **[3]**
13/50 . . . . . Decahydronaphthalenes **[3]**
13/52 . . . . Azulenes; Completely or partially hydrogenated azulenes **[3]**
13/54 . . . with three condensed rings
13/547 . . . . at least one ring not being six-membered, the other rings being at the most six-membered **[3]**
13/553 . . . . . Indacenes; Completely or partially hydrogenated indacenes **[3]**
13/567 . . . . . Fluorenes; Completely or partially hydrogenated fluorenes **[3]**
13/573 . . . . with three six-membered rings **[3]**
13/58 . . . . . Completely or partially hydrogenated anthracenes **[3]**
13/60 . . . . . Completely or partially hydrogenated phenanthrenes **[3]**
13/605 . . . . with a bridged ring system **[3]**
13/61 . . . . . Bridged indenes, e.g. dicyclopentadiene **[3]**
13/615 . . . . . Adamantanes **[3]**
13/62 . . . with more than three condensed rings
13/64 . . . . with a bridged ring system **[3]**
13/66 . . . . the condensed ring system contains only four rings **[3]**
13/68 . . . . . with a bridged ring system **[3]**
13/70 . . . with a condensed ring system consisting of at least two mutually uncondensed aromatic ring systems, linked by an annular structure formed by carbon chains on non-adjacent positions of the aromatic ring, e.g. cyclophanes **[3]**
13/72 . . . Spiro hydrocarbons **[3]**

15/00 Cyclic hydrocarbons containing only six-membered aromatic rings as cyclic part [2]

15/02 . Monocyclic hydrocarbons
15/04 . . Benzene
15/06 . . Toluene
15/067 . . C_8H_{10} hydrocarbons **[3]**
15/073 . . . Ethylbenzene **[3]**
15/08 . . . Xylenes **[3]**
15/085 . . Isopropylbenzene **[3]**
15/107 . . having a saturated side-chain containing at least six carbon atoms, e.g. detergent alkylates **[3]**
15/113 . . . having at least two saturated side-chains, each containing at least six carbon atoms **[3]**
15/12 . Polycyclic non-condensed hydrocarbons
15/14 . . all phenyl groups being directly linked **[3]**

15/16 . . containing at least two phenyl groups linked by one single acyclic carbon atom
15/18 . . containing at least one group with formula

15/20 . Polycyclic condensed hydrocarbons
15/24 . . containing two rings
15/27 . . containing three rings **[3]**
15/28 . . . Anthracenes **[3]**
15/30 . . . Phenanthrenes **[3]**
15/38 . . containing four rings **[3]**
15/40 . substituted by unsaturated hydrocarbon radicals **[3]**
15/42 . . monocyclic **[3]**
15/44 . . . the hydrocarbon substituent containing a carbon-to-carbon double bond **[3]**
15/46 . . . . Styrene; Ring-alkylated styrenes **[3]**
15/48 . . . the hydrocarbon substituent containing a carbon-to-carbon triple bond **[3]**
15/50 . . polycyclic non-condensed **[3]**
15/52 . . . containing a group with formula

 **[3]**

15/54 . . . containing a group with formula

 **[3]**

15/56 . . polycyclic condensed **[3]**
15/58 . . . containing two rings **[3]**
15/60 . . . containing three rings **[3]**
15/62 . . . containing four rings **[3]**

Compounds containing carbon and halogens with or without hydrogen

17/00 Preparation of halogenated hydrocarbons
17/007 . from carbon or carbides and halogens **[6]**
17/013 . by addition of halogens **[6]**
17/02 . . to unsaturated hydrocarbons **[6]**
17/04 . . to unsaturated halogenated hydrocarbons **[6]**
17/06 . . combined with replacement of hydrogen atoms by halogens
17/07 . by addition of hydrogen halides **[6]**
17/08 . . to unsaturated hydrocarbons **[6]**
17/087 . . to unsaturated halogenated hydrocarbons **[6]**
17/093 . by replacement by halogens **[6]**
17/10 . . of hydrogen atoms (combined with addition of halogens to unsaturated hydrocarbons C07C 17/06) **[6]**
17/12 . . . in the ring of aromatic compounds **[6]**
17/14 . . . in the side-chain of aromatic compounds **[6]**
17/15 . . with oxygen as auxiliary reagent, e.g. oxychlorination **[2,6]**
17/152 . . . of hydrocarbons **[3,6]**
17/154 . . . . of saturated hydrocarbons **[3,6]**
17/156 . . . . of unsaturated hydrocarbons **[3,6]**
17/158 . . . of halogenated hydrocarbons **[3,6]**
17/16 . . of hydroxyl groups **[3,6]**
17/18 . . of oxygen atoms of carbonyl groups **[6]**
17/20 . . of halogen atoms by other halogen atoms **[6]**
17/21 . . . with simultaneous increase of the number of halogen atoms **[6]**
17/23 . by dehalogenation **[6]**
17/25 . by splitting-off hydrogen halides from halogenated hydrocarbons **[6]**
17/26 . by reactions involving an increase in the number of carbon atoms in the skeleton
17/263 . . by condensation reactions **[6]**
17/266 . . . of hydrocarbons and halogenated hydrocarbons **[6]**
17/269 . . . of only halogenated hydrocarbons **[6]**
17/272 . . by addition reactions **[6]**
17/275 . . . of hydrocarbons and halogenated hydrocarbons **[6]**
17/278 . . . of only halogenated hydrocarbons **[6]**
17/281 . . . . of only one compound **[6]**
17/30 . . by a Diels-Alder synthesis
17/32 . . by introduction of halogenated alkyl groups into ring compounds
17/35 . by reactions not affecting the number of carbon or halogen atoms in the molecules **[6]**
17/354 . . by hydrogenation **[6]**
17/357 . . by dehydrogenation **[6]**
17/358 . . by isomerisation **[6]**
17/361 . by reactions involving a decrease in the number of carbon atoms **[6]**
17/363 . . by elimination of carboxyl groups **[6]**
17/367 . . by depolymerisation **[6]**
17/37 . by disproportionation of halogenated hydrocarbons **[6]**
17/38 . Separation; Purification; Stabilisation; Use of additives
17/383 . . by distillation **[6]**
17/386 . . . with auxiliary compounds **[6]**
17/389 . . by adsorption on solids **[6]**
17/392 . . by crystallisation; Purification or separation of the crystals **[6]**
17/395 . . by treatment giving rise to a chemical modification of at least one compound **[6]**
17/42 . . Use of additives, e.g. for stabilisation **[3,6]**

19/00 Acyclic saturated compounds containing halogen atoms [5]
19/01 . containing chlorine **[6]**
19/03 . . Chloromethanes **[6]**
19/04 . . . Chloroform **[6]**
19/041 . . . Carbon tetrachloride **[6]**
19/043 . . Chloroethanes **[6]**
19/045 . . . Dichloroethanes **[3,6]**
19/05 . . . Trichloroethanes **[3,6]**
19/055 . . . Tetrachloroethanes **[3,6]**
19/07 . containing iodine **[2]**
19/075 . containing bromine **[6]**
19/08 . containing fluorine
19/10 . . and chlorine **[6]**
19/12 . . . having two carbon atoms **[6]**
19/14 . . and bromine **[6]**
19/16 . . and iodine **[6]**

21/00 Acyclic unsaturated compounds containing halogen atoms [5]
21/02 . containing carbon-to-carbon double bonds
21/04 . . Chloro-alkenes
21/06 . . . Vinyl chloride
21/067 . . . Allyl chloride; Methallyl chloride **[3]**
21/073 . . . Dichloro-alkenes **[3]**
21/08 . . . . Vinylidene chloride **[3]**
21/09 . . . . Dichloro-butenes **[3]**
21/10 . . . Trichloro-ethylene
21/12 . . . Tetrachloro-ethylene
21/14 . . containing bromine
21/16 . . . Crotyl bromide

21/17 . . containing iodine **[5]**
21/18 . . containing fluorine
21/185 . . . Tetrafluoroethene **[5]**
21/19 . . Halogenated dienes **[3]**
21/20 . . . Halogenated butadienes **[3]**
21/21 . . . . Chloroprene **[3]**
21/215 . . Halogenated polyenes with more than two carbon-to-carbon double bonds **[3]**
21/22 . containing carbon-to-carbon triple bonds

22/00 Cyclic compounds containing halogen atoms bound to an acyclic carbon atom [5]

22/02 . having unsaturation in the rings **[5]**
22/04 . . containing six-membered aromatic rings **[5]**
22/06 . . . Trichloromethylbenzene **[5]**
22/08 . . . containing fluorine **[5]**

23/00 Compounds containing at least one halogen atom bound to a ring other than a six-membered aromatic ring

23/02 . Monocyclic halogenated hydrocarbons
23/04 . . with a three-membered ring
23/06 . . with a four-membered ring
23/08 . . with a five-membered ring
23/10 . . with a six-membered ring
23/12 . . . Hexachlorocyclohexanes
23/14 . . with a seven-membered ring
23/16 . . with an eight-membered ring
23/18 . Polycyclic halogenated hydrocarbons
23/20 . . with condensed rings none of which is aromatic
23/22 . . . with a bicyclo ring system containing four carbon atoms
23/24 . . . with a bicyclo ring system containing five carbon atoms
23/26 . . . with a bicyclo ring system containing six carbon atoms
23/27 . . . with a bicyclo ring system containing seven carbon atoms **[5]**
23/28 . . . . Saturated bicyclo ring system **[5]**
23/30 . . . . Mono-unsaturated bicyclo ring system **[5]**
23/32 . . . with a bicyclo ring system containing eight carbon atoms
23/34 . . . Halogenated completely or partially hydrogenated indenes
23/36 . . . Halogenated completely or partially hydrogenated naphthalenes
23/38 . . . with three condensed rings
23/40 . . . . Halogenated completely or partially hydrogenated fluorenes
23/42 . . . . Halogenated completely or partially hydrogenated anthracenes
23/44 . . . . Halogenated completely or partially hydrogenated phenanthrenes
23/46 . . . with more than 3 condensed rings

25/00 Compounds containing at least one halogen atom bound to a six-membered aromatic ring

25/02 . Monocyclic aromatic halogenated hydrocarbons
25/06 . . Monochloro-benzene **[3]**
25/08 . . Dichloro-benzenes **[3]**
25/10 . . Trichloro-benzenes **[3]**
25/12 . . Hexachloro-benzene **[3]**
25/125 . . Halogenated xylenes **[2,3]**
25/13 . . containing fluorine **[2,3]**
25/18 . Polycyclic aromatic halogenated hydrocarbons
25/20 . . Dichloro-diphenyl-trichloro-ethane
25/22 . . with condensed rings
25/24 . Halogenated aromatic hydrocarbons with unsaturated side chains
25/28 . . Halogenated styrenes **[3]**

Compounds containing carbon and oxygen, with or without hydrogen or halogens [2]

27/00 Processes involving the simultaneous production of more than one class of oxygen-containing compounds

27/02 . Saponification of organic acid esters
27/04 . by reduction of oxygen-containing compounds (C07C 29/14 takes precedence)
27/06 . . by hydrogenation of oxides of carbon
27/08 . . . with moving catalysts
27/10 . by oxidation of hydrocarbons
27/12 . . with oxygen
27/14 . . . wholly gaseous reactions
27/16 . . with other oxidising agents
27/18 . by addition of alkynes to aldehydes, ketones, or alkylene oxides
27/20 . by oxo-reaction
27/22 . . with the use of catalysts which are specific for this process
27/24 . . with moving catalysts
27/26 . Purification; Separation; Stabilisation
27/28 . . by distillation
27/30 . . . by azeotropic distillation
27/32 . . . by extractive distillation
27/34 . . by extraction

29/00 Preparation of compounds having hydroxy or O-metal groups bound to a carbon atom not belonging to a six-membered aromatic ring

29/03 . by addition of hydroxy groups to unsaturated carbon-to-carbon bonds, e.g. with the aid of H_2O_2 **[3]**
29/04 . . by hydration of carbon-to-carbon double bonds
29/05 . . . with formation of absorption products in mineral acids and their hydrolysis **[3]**
29/06 . . . . the acid being sulfuric acid **[3]**
29/08 . . . . the acid being phosphoric acid **[3]**
29/09 . by hydrolysis (of esters of organic acids C07C 27/02) **[3]**
29/10 . . of ethers, including cyclic ethers, e.g. oxiranes
29/12 . . of esters of mineral acids **[3]**
29/124 . . . of halides **[3]**
29/128 . by alcoholysis (of esters of organic acids C07C 27/02) **[3]**
29/132 . by reduction of an oxygen-containing functional group **[3]**
29/136 . . of $\rangle C{=}O$ containing groups, e.g. $-COOH$ **[3]**
29/14 . . . of a $-CHO$ group **[3]**
29/141 . . . . with hydrogen or hydrogen-containing gases **[5]**
29/143 . . . of ketones **[5]**
29/145 . . . . with hydrogen or hydrogen-containing gases **[5]**
29/147 . . . of carboxylic acids or derivatives thereof **[5]**
29/149 . . . . with hydrogen or hydrogen-containing gases **[5]**
29/15 . by reduction of oxides of carbon exclusively **[3]**
29/151 . . with hydrogen or hydrogen-containing gases **[5]**
29/152 . . . characterised by the reactor used **[5]**
29/153 . . . characterised by the catalyst used **[5]**

29/154 . . . . containing copper, silver, gold, or compounds thereof **[5]**
29/156 . . . . containing iron group metals, platinum group metals, or compounds thereof **[5]**
29/157 . . . . . containing platinum group metals or compounds thereof **[5]**
29/158 . . . . . containing rhodium or compounds thereof **[5]**
29/159 . . with reducing agents other than hydrogen or hydrogen-containing gases **[5]**
29/16 . by oxo-reaction combined with reduction
29/17 . by hydrogenation of carbon-to-carbon double or triple bonds **[3]**
29/19 . . in six-membered aromatic rings **[3]**
29/20 . . . in non-condensed rings substituted with hydroxy groups **[3]**
29/32 . increasing the number of carbon atoms by reactions without formation of hydroxy groups **[3]**
29/34 . . by condensation involving hydroxy groups or the mineral ester groups derived therefrom, e.g. Guerbet reaction **[3]**
29/36 . increasing the number of carbon atoms by reactions with formation of hydroxy groups, which may occur via intermediates being derivatives of hydroxy groups, e.g. O-metal **[3]**
29/38 . . by reaction with aldehydes or ketones **[3]**
29/40 . . . with compounds containing carbon-to-metal bonds **[3]**
29/42 . . . with compounds containing triple carbon-to-carbon bonds, e.g. with metal-alkynes **[3]**
29/44 . increasing the number of carbon atoms by addition reactions, i.e. reactions involving at least one carbon-to-carbon double or triple bond (C07C 29/16 takes precedence) **[3]**
29/46 . . by diene-synthesis **[3]**
29/48 . by oxidation reactions with formation of hydroxy groups **[3]**
29/50 . . with molecular oxygen only **[3]**
29/52 . . . in the presence of mineral boron compounds with, when necessary, hydrolysis of the intermediate formed **[3]**
29/54 . . . starting from compounds containing carbon-to-metal bonds and followed by conversion of the O-metal to hydroxy groups **[3]**
29/56 . by isomerisation **[3]**
29/58 . by elimination of halogen, e.g. by hydrogenolysis, splitting-off (C07C 29/124 takes precedence) **[3]**
29/60 . by elimination of hydroxy groups, e.g. by dehydration (C07C 29/34 takes precedence) **[3]**
29/62 . by introduction of halogen; by substitution of halogen atoms by other halogen atoms **[3]**
29/64 . by simultaneous introduction of hydroxy groups and halogens **[3]**
29/66 . . by addition of hypohalogenous acids, which may be formed in situ, to carbon-to-carbon unsaturated bonds **[3]**
29/68 . Preparation of metal-alcoholates (C07C 29/42, C07C 29/54 take precedence) **[3]**
29/70 . . by converting hydroxy groups to O-metal groups **[3]**
29/72 . . by oxidation of carbon-to-metal bonds **[3]**
29/74 . Separation; Purification; Stabilisation; Use of additives **[3]**
29/76 . . by physical treatment **[3]**
29/78 . . . by condensation or crystallisation **[3]**
29/80 . . . by distillation **[3]**
29/82 . . . . by azeotropic distillation **[3]**
29/84 . . . . by extractive distillation **[3]**
29/86 . . . by liquid-liquid treatment **[3]**
29/88 . . by treatment giving rise to a chemical modification of at least one compound (chemisorption C07C 29/76) **[3]**
29/90 . . . using hydrogen only **[3]**
29/92 . . . by a consecutive conversion and reconstruction **[3]**
29/94 . . Use of additives, e.g. for stabilisation **[3]**

31/00 Saturated compounds having hydroxy or O-metal groups bound to acyclic carbon atoms

31/02 . Monohydroxylic acyclic alcohols
31/04 . . Methanol
31/08 . . Ethanol
31/10 . . containing three carbon atoms
31/12 . . containing four carbon atoms
31/125 . . containing five to twenty-two carbon atoms **[3]**
31/13 . Monohydroxylic alcohols containing saturated rings **[2,3]**
31/133 . . monocyclic **[3]**
31/135 . . . with five- or six-membered rings; Naphthenic alcohols **[3]**
31/137 . . polycyclic with condensed ring systems **[3]**
31/18 . Polyhydroxylic acyclic alcohols
31/20 . . Dihydroxylic alcohols
31/22 . . Trihydroxylic alcohols, e.g. glycerol **[3]**
31/24 . . Tetrahydroxylic alcohols, e.g. pentaerythritol **[3]**
31/26 . . Hexahydroxylic alcohols
31/27 . Polyhydroxylic alcohols containing saturated rings **[3]**
31/28 . Metal alcoholates
31/30 . . Alkali-metal or alkaline-earth-metal alcoholates
31/32 . . Aluminium alcoholates
31/34 . Halogenated alcohols
31/36 . . the halogen not being fluorine **[3]**
31/38 . . containing only fluorine as halogen **[3]**
31/40 . . perhalogenated **[3]**
31/42 . . Halogenated polyhydroxylic acyclic alcohols **[3]**
31/44 . . Halogenated alcohols containing saturated rings **[3]**

33/00 Unsaturated compounds having hydroxy or O-metal groups bound to acyclic carbon atoms

Note

In this group, in condensed ring systems of six-membered aromatic rings and other rings, the double bond belonging to a benzene ring is not considered as unsaturated for the non-aromatic ring condensed thereon, e.g. the 1,2,3,4-tetrahydro- naphthalene ring is considered to be saturated outside the aromatic ring. **[3]**

33/02 . Acyclic alcohols with carbon-to-carbon double bonds
33/025 . . with only one double bond **[3]**
33/03 . . . in beta-position, e.g. allyl alcohol, methallyl alcohol **[3]**
33/035 . . . Alkenediols **[3]**
33/04 . Acyclic alcohols with carbon-to-carbon triple bonds
33/042 . . with only one triple bond **[3]**
33/044 . . . Alkynediols **[3]**
33/046 . . . . Butynediols **[3]**
33/048 . . with double and triple bonds **[3]**

33/05 . Alcohols containing rings other than six-membered aromatic rings **[2]**
33/12 . . containing five-membered rings **[3]**
33/14 . . containing six-membered rings **[3]**
33/16 . . containing rings with more than six ring members **[3]**
33/18 . Monohydroxylic alcohols containing only six-membered aromatic rings as cyclic part **[3]**
33/20 . . monocyclic **[3]**
33/22 . . . Benzylalcohol; Phenylethyl alcohol **[3]**
33/24 . . polycyclic without condensed ring systems **[3]**
33/26 . Polyhydroxylic alcohols containing only six-membered aromatic rings as cyclic part **[3]**
33/28 . Alcohols containing only six-membered aromatic rings as cyclic part with unsaturation outside the aromatic rings **[3]**
33/30 . . monocyclic **[3]**
33/32 . . . Cinnamyl alcohol **[3]**
33/34 . Monohydroxylic alcohols containing six-membered aromatic rings and other rings **[3]**
33/36 . Polyhydroxylic alcohols containing six-membered aromatic rings and other rings **[3]**
33/38 . Alcohols containing six-membered aromatic rings and other rings and having unsaturation outside the aromatic rings **[3]**
33/40 . Halogenated unsaturated alcohols **[3]**
33/42 . . acyclic **[3]**
33/44 . . containing rings other than six-membered aromatic rings **[3]**
33/46 . . containing only six-membered aromatic rings as cyclic part **[3]**
33/48 . . . with unsaturation outside the aromatic rings **[3]**
33/50 . . containing six-membered aromatic rings and other rings **[3]**

35/00 Compounds having at least one hydroxy or O-metal group bound to a carbon atom of a ring other than a six-membered aromatic ring [2]

35/02 . monocyclic
35/04 . . containing three- or four-membered rings
35/06 . . containing five-membered rings
35/08 . . containing six-membered rings
35/12 . . . Menthol
35/14 . . . with more than one hydroxy group bound to the ring
35/16 . . . . Inositol
35/17 . . . with unsaturation only outside the ring **[3]**
35/18 . . . with unsaturation at least in the ring **[3]**
35/20 . . containing seven- or eight-membered rings
35/205 . . containing nine- to twelve-membered rings, e.g. cyclododecanols **[3]**
35/21 . polycyclic, at least one hydroxy group bound to a non-condensed ring **[2]**
35/22 . polycyclic, at least one hydroxy group bound to a condensed ring system **[2]**
35/23 . . with a hydroxy group on a condensed ring system having two rings **[3]**
35/24 . . . the condensed ring system containing five carbon atoms **[3]**
35/26 . . . . Bicyclopentadienols **[3]**
35/27 . . . the condensed ring system containing six carbon atoms **[3]**
35/28 . . . the condensed ring system containing seven carbon atoms **[3]**
35/29 . . . . being a [2.2.1] system **[3]**
35/30 . . . . . Borneol; Isoborneol **[3]**
35/31 . . . the condensed ring system containing eight carbon atoms **[3]**
35/32 . . . the condensed ring system being a [4.3.0] system, e.g. indenols **[3]**
35/34 . . . the condensed ring system being a [5.3.0] system, e.g. azulenols **[3]**
35/36 . . . the condensed ring system being a [4.4.0] system, e.g. hydrogenated naphthols **[3]**
35/37 . . with a hydroxy group on a condensed ring system having three rings **[3]**
35/38 . . . derived from the fluorene skeleton **[3]**
35/40 . . . derived from the anthracene skeleton **[3]**
35/42 . . . derived from the phenanthrene skeleton **[3]**
35/44 . . with a hydroxy group on a condensed ring system having more than three rings
35/46 . O-metal derivatives of the cyclically bound hydroxy groups **[3]**
35/48 . Halogenated derivatives **[3]**
35/50 . . Alcohols with at least two rings **[3]**
35/52 . . Alcohols with a condensed ring system **[3]**

37/00 Preparation of compounds having hydroxy or O-metal groups bound to a carbon atom of a six-membered aromatic ring

37/01 . by replacing functional groups bound to a six-membered aromatic ring by hydroxy groups, e.g. by hydrolysis **[3]**
37/02 . . by substitution of halogen **[3]**
37/04 . . by substitution of SO_3H groups or a derivative thereof **[3]**
37/045 . . by substitution of a group bound to the ring by nitrogen **[3]**
37/05 . . . by substitution of a NH_2 group **[3]**
37/055 . . by substitution of a group bound to the ring by oxygen, e.g. ether group **[3]**
37/06 . by conversion of non-aromatic six-membered rings or of such rings formed in situ into aromatic six-membered rings, e.g. by dehydrogenation
37/07 . . with simultaneous reduction of C=O group in that ring **[3]**
37/08 . by decomposition of hydroperoxides, e.g. cumene hydroperoxide
37/11 . by reactions increasing the number of carbon atoms **[3]**
37/14 . . by addition reactions, i.e. reactions involving at least one carbon-to-carbon unsaturated bond **[3]**
37/16 . . by condensation involving hydroxy groups of phenols or alcohols or the ether or mineral ester group derived therefrom **[3]**
37/18 . . by condensation involving halogen atoms of halogenated compounds
37/20 . . using aldehydes or ketones
37/48 . by exchange of hydrocarbon groups which may be substituted, from other compounds, e.g. transalkylation **[3]**
37/50 . by reactions decreasing the number of carbon atoms (C07C 37/01, C07C 37/08, C07C 37/48 take precedence) **[3]**
37/52 . . by splitting polyaromatic compounds, e.g. polyphenolalkanes **[3]**
37/54 . . . by hydrolysis of lignin or sulfite waste liquor **[3]**
37/56 . . by replacing a carboxyl or aldehyde group by a hydroxy group **[3]**

37/58 . by oxidation reactions introducing directly a hydroxy group on a CH-group belonging to a six-membered aromatic ring with the aid of molecular oxygen **[3]**

37/60 . by oxidation reactions introducing directly a hydroxy group on a CH-group belonging to a six-membered aromatic ring with the aid of other oxidants than molecular oxygen or their mixtures with molecular oxygen **[3]**

37/62 . by introduction of halogen; by substitution of halogen atoms by other halogen atoms **[3]**

37/64 . Preparation of O-metal compounds with the O-metal group linked to a carbon atom belonging to a six-membered aromatic ring **[3]**

37/66 . . by conversion of hydroxy groups to O-metal groups **[3]**

37/68 . Separation; Purification; Stabilisation; Use of additives **[3]**

37/70 . . by physical treatment **[3]**

37/72 . . . by liquid-liquid treatment **[3]**

37/74 . . . by distillation **[3]**

37/76 . . . . by steam distillation **[3]**

37/78 . . . . by azeotropic distillation **[3]**

37/80 . . . . by extractive distillation **[3]**

37/82 . . . by solid-liquid treatment; by chemisorption **[3]**

37/84 . . . by crystallisation **[3]**

37/86 . . by treatment giving rise to a chemical modification (by chemisorption C07C 37/82) **[3]**

37/88 . . Use of additives, e.g. for stabilisation **[3]**

39/00 Compounds having at least one hydroxy or O-metal group bound to a carbon atom of a six-membered aromatic ring

Note

In this group, in condensed ring systems of six-membered aromatic rings and other rings, the double bond belonging to the benzene ring is not considered as unsaturated for the non-aromatic ring condensed thereon. **[3]**

39/02 . monocyclic with no unsaturation outside the aromatic ring

39/04 . . Phenol

39/06 . . Alkylated phenols

39/07 . . . containing only methyl groups as alkyl groups, e.g. cresols, xylenols **[3]**

39/08 . . Dihydroxy benzenes; Alkylated derivatives thereof

39/10 . . Polyhydroxy benzenes; Alkylated derivatives thereof (C07C 39/08 takes precedence)

39/11 . . Alkylated hydroxy benzenes containing also acyclically bound hydroxy groups, e.g. saligenol **[3]**

39/12 . polycyclic with no unsaturation outside the aromatic rings

39/14 . . with at least one hydroxy group on a condensed ring system containing two rings **[3]**

39/15 . . with all hydroxy groups on non-condensed rings **[3]**

39/16 . . . Bis(hydroxy phenyl)alkanes; Tris(hydroxy phenyl)alkanes **[3]**

39/17 . . containing other rings in addition to the six-membered aromatic rings **[2]**

39/18 . monocyclic with unsaturation outside the aromatic ring

39/19 . . containing carbon-to-carbon double bonds but no carbon-to-carbon triple bonds **[3]**

39/20 . . . Hydroxy styrenes **[3]**

39/205 . polycyclic, containing only six-membered aromatic rings as cyclic part, with unsaturation outside the rings **[3]**

39/21 . . with at least one hydroxy group on a non-condensed ring **[3]**

39/215 . . . containing the

structure, e.g. diethylstilbestrol **[3]**

39/225 . . with at least one hydroxy group on a condensed ring system **[3]**

39/23 . polycyclic, containing six-membered aromatic rings and other rings, with unsaturation outside the aromatic rings **[3]**

39/235 . Metal derivatives of a hydroxy group bound to a six-membered aromatic ring **[3]**

39/24 . Halogenated derivatives

39/26 . . monocyclic monohydroxylic containing halogen bound to ring carbon atoms

39/27 . . . all halogen atoms being attached to the ring

39/28 . . . . the halogen being one chlorine atom

39/30 . . . . the halogen being two chlorine atoms

39/32 . . . . the halogen being three chlorine atoms

39/34 . . . . the halogen being four chlorine atoms

39/36 . . . . Pentachlorophenol

39/367 . . polycyclic non-condensed, containing only six-membered aromatic rings, e.g. halogenated poly-(hydroxy-phenyl)alkanes **[3]**

39/373 . . with all hydroxy groups on non-condensed rings and with unsaturation outside the aromatic rings **[3]**

39/38 . . with at least one hydroxy group on a condensed ring system containing two rings

39/40 . . with at least one hydroxy group on a condensed ring system containing more than two rings **[3]**

39/42 . . containing six-membered aromatic rings and other rings **[3]**

39/44 . . Metal derivatives of a hydroxy group bound to a carbon atom of a six-membered aromatic ring **[3]**

41/00 Preparation of ethers; **Preparation of compounds having**

 **groups,**

 **groups or**

 **groups [3]**

41/01 . Preparation of ethers **[3]**

41/02 . . from oxiranes **[3]**

41/03 . . . by reaction of an oxirane ring with a hydroxy group **[3]**

41/05 . . by addition of compounds to unsaturated compounds **[3]**

41/06 . . . by addition of organic compounds only **[3]**

41/08 . . . . to carbon-to-carbon triple bonds **[3]**

41/09 . . by dehydration of compounds containing hydroxy groups **[3]**

41/14 . . by exchange of organic parts on the ether-oxygen for other organic parts, e.g. by trans-etherification **[3]**

41/16 . . by reaction of esters of mineral or organic acids with hydroxy or O-metal groups **[3]**
41/18 . . by reactions not forming ether-oxygen bonds **[3]**
41/20 . . . by hydrogenation of carbon-to-carbon double or triple bonds **[3]**
41/22 . . . by introduction of halogen; by substitution of halogen atoms by other halogen atoms **[3]**
41/24 . . . by elimination of halogen, e.g. elimination of HCl **[3]**
41/26 . . . by introduction of hydroxy or O-metal groups **[3]**
41/28 . . . from acetals, e.g. by dealcoholysis **[3]**
41/30 . . . by increasing the number of carbon atoms, e.g. by oligomerisation **[3]**
41/32 . . by isomerisation **[3]**
41/34 . . Separation; Purification; Stabilisation; Use of additives **[3]**
41/36 . . . by solid-liquid treatment; by chemisorption **[3]**
41/38 . . . by liquid-liquid treatment **[3]**
41/40 . . . by change of physical state, e.g. by crystallisation **[3]**
41/42 . . . . by distillation **[3]**
41/44 . . . by treatment giving rise to a chemical modification (by chemisorption C07C 41/36) **[3]**
41/46 . . . Use of additives, e.g. for stabilisation **[3]**
41/48 . Preparation of compounds having

 groups **[3]**

41/50 . . by reactions producing

 groups **[3]**

41/52 . . . by substitution of halogen only **[3]**
41/54 . . . by addition of compounds to unsaturated carbon-to-carbon bonds **[3]**
41/56 . . . by condensation of aldehydes, paraformaldehyde, or ketones **[3]**
41/58 . . Separation; Purification; Stabilisation; Use of additives **[3]**
41/60 . Preparation of compounds having

 groups or

 groups **[3]**

43/00 Ethers; **Compounds having**

 **groups,**

 **groups or**

 **groups**

43/02 . Ethers
43/03 . . having all ether-oxygen atoms bound to acyclic carbon atoms **[3]**
43/04 . . . Saturated ethers **[3]**
43/06 . . . . Diethyl ether **[3]**
43/10 . . . . of polyhydroxy compounds **[3]**
43/11 . . . . . Polyethers containing $-O-(C-C-O-)_n$ units with 2 <= n <= 10 **[2,3]**
43/115 . . . . containing carbocyclic rings **[3]**
43/12 . . . . containing halogen **[3]**
43/13 . . . . containing hydroxy or O-metal groups (C07C 43/11 takes precedence) **[3]**
43/14 . . . Unsaturated ethers **[3]**
43/15 . . . . containing only non-aromatic carbon-to-carbon double bonds **[3]**
43/16 . . . . . Vinyl ethers **[3]**
43/162 . . . . containing rings other than six-membered aromatic rings **[3]**
43/164 . . . . containing six-membered aromatic rings **[3]**
43/166 . . . . . having unsaturation outside the aromatic rings **[3]**
43/168 . . . . . containing six-membered aromatic rings and other rings **[3]**
43/17 . . . . containing halogen **[2,3]**
43/172 . . . . . containing rings other than six-membered aromatic rings **[3]**
43/174 . . . . . containing six-membered aromatic rings **[3]**
43/176 . . . . . having unsaturation outside the aromatic rings **[3]**
43/178 . . . . containing hydroxy or O-metal groups **[3]**
43/18 . . having an ether-oxygen atom bound to a carbon atom of a ring other than a six-membered aromatic ring
43/184 . . . to a carbon atom of a non-condensed ring **[3]**
43/188 . . . Unsaturated ethers **[3]**
43/192 . . . containing halogen **[3]**
43/196 . . . containing hydroxy or O-metal groups **[3]**
43/20 . . having an ether-oxygen atom bound to a carbon atom of a six-membered aromatic ring
43/205 . . . the aromatic ring being a non-condensed ring **[3]**
43/21 . . . containing rings other than six-membered aromatic rings **[3]**
43/215 . . . having unsaturation outside the six-membered aromatic rings **[3]**
43/225 . . . containing halogen **[3]**
43/23 . . . containing hydroxy or O-metal groups **[3]**
43/235 . . having an ether-oxygen atom bound to a carbon atom of a six-membered aromatic ring and to a carbon atom of a ring, other than a six-membered aromatic ring **[3]**
43/243 . . . having unsaturation outside the six-membered aromatic rings **[3]**
43/247 . . . containing halogen **[3]**
43/253 . . . containing hydroxy or O-metal groups **[3]**
43/257 . . having an ether-oxygen atom bound to carbon atoms both belonging to six-membered aromatic rings **[3]**
43/263 . . . the aromatic rings being non-condensed **[3]**
43/267 . . . containing other rings **[3]**
43/275 . . . having all ether-oxygen atoms bound to carbon atoms of six-membered aromatic rings **[3]**
43/285 . . . having unsaturation outside the six-membered aromatic rings **[3]**
43/29 . . . containing halogen **[3]**
43/295 . . . containing hydroxy or O-metal groups **[3]**

43/30 . Compounds having  groups

Note

In this group, the acetal carbon atom is the carbon of the  group. **[3]**

43/303 . . having acetal carbon atoms bound to acyclic carbon atoms **[3]**
43/305 . . having acetal carbon atoms as ring members or bound to carbon atoms of rings other than six-membered aromatic rings **[3]**
43/307 . . having acetal carbon atoms bound to carbon atoms of six-membered aromatic rings **[3]**
43/313 . . containing halogen **[3]**
43/315 . . containing oxygen atoms singly bound to carbon atoms not being acetal carbon atoms **[3]**
43/317 . . having  groups, X being hydrogen or metal **[3]**
43/32 . Compounds having  groups or  groups

45/00 Preparation of compounds having 〉C=O groups bound only to carbon or hydrogen atoms; **Preparation of chelates of such compounds [2]**

45/26 . by hydration of carbon-to-carbon triple bonds **[3]**
45/27 . by oxidation **[3]**
45/28 . . of $-CH_x$-moieties **[3]**
45/29 . . of hydroxy groups **[3]**
45/30 . . with halogen containing compounds, e.g. hypohalogenation **[3]**
45/31 . . with compounds containing mercury atoms, which may be regenerated in situ, e.g. by oxygen **[3]**
45/32 . . with molecular oxygen **[3]**
45/33 . . . of CH_x-moieties **[3]**
45/34 . . . . in unsaturated compounds **[3]**
45/35 . . . . . in propene or isobutene **[3]**
45/36 . . . . . in compounds containing six-membered aromatic rings **[3]**
45/37 . . . of 〉C−O− functional groups to 〉C=O groups **[3]**
45/38 . . . . being a primary hydroxy group **[3]**
45/39 . . . . being a secondary hydroxy group **[3]**
45/40 . by oxidation with ozone; by ozonolysis **[3]**
45/41 . by hydrogenolysis or reduction of carboxylic groups or functional derivatives thereof **[3]**
45/42 . by hydrolysis **[3]**
45/43 . . of 〉CX_2 groups, X being halogen **[3]**
45/44 . by reduction and hydrolysis of nitriles **[3]**
45/45 . by condensation **[3]**
45/46 . . Friedel-Crafts reactions **[3]**
45/47 . . using phosgene **[3]**
45/48 . . involving decarboxylation **[3]**
45/49 . by reaction with carbon monoxide **[3]**
45/50 . . by oxo-reactions **[3]**
45/51 . by pyrolysis, rearrangement or decomposition **[3]**
45/52 . . by dehydration and rearrangement involving two hydroxy groups in the same molecule **[3]**
45/53 . . of hydroperoxides **[3]**
45/54 . . of compounds containing doubly bound oxygen atoms, e.g. esters **[3]**
45/55 . . of oligo- or polymeric oxo-compounds **[3]**
45/56 . from heterocyclic compounds (C07C 45/55 takes precedence) **[3]**
45/57 . . with oxygen as the only hetero atom **[3]**
45/58 . . . in three-membered rings **[3]**
45/59 . . . in five-membered rings (from ozonides C07C 45/40) **[3]**
45/60 . . . in six-membered rings **[3]**
45/61 . by reactions not involving the formation of 〉C=O groups **[3]**
45/62 . . by hydrogenation of carbon-to-carbon double or triple bonds **[3]**
45/63 . . by introduction of halogen; by substitution of halogen atoms by other halogen atoms **[3]**
45/64 . . by introduction of functional groups containing oxygen only in singly bound form **[3]**
45/65 . . by splitting-off hydrogen atoms or functional groups; by hydrogenolysis of functional groups **[3]**
45/66 . . . by dehydration **[3]**
45/67 . . by isomerisation; by change of size of the carbon skeleton **[3]**
45/68 . . . by increase in the number of carbon atoms **[3]**
45/69 . . . . by addition to carbon-to-carbon double or triple bonds **[3]**
45/70 . . . . by reaction with functional groups containing oxygen only in singly bound form **[3]**
45/71 . . . . . being hydroxy groups **[3]**
45/72 . . . . by reaction of compounds containing 〉C=O groups with the same or other compounds containing 〉C=O groups **[3]**
45/73 . . . . . combined with hydrogenation **[3]**
45/74 . . . . . combined with dehydration **[3]**
45/75 . . . . . Reactions with formaldehyde **[3]**
45/76 . . . with the aid of ketenes **[3]**
45/77 . Preparation of chelates of aldehydes or ketones **[3]**
45/78 . Separation; Purification; Stabilisation; Use of additives **[3]**
45/79 . . by solid-liquid treatment; by chemisorption **[3]**
45/80 . . by liquid-liquid treatment **[3]**
45/81 . . by change in the physical state, e.g. crystallisation **[3]**
45/82 . . . by distillation **[3]**
45/83 . . . . by extractive distillation **[3]**
45/84 . . . . by azeotropic distillation **[3]**
45/85 . . by treatment giving rise to a chemical modification **[3]**
45/86 . . Use of additives, e.g. for stabilisation **[3]**
45/87 . Preparation of ketenes or dimeric ketenes **[3]**
45/88 . . from ketones **[3]**
45/89 . . from carboxylic acids, their anhydrides, esters or halides **[3]**
45/90 . . Separation; Purification; Stabilisation; Use of additives **[3]**

46/00 Preparation of quinones [3]

46/02 . by oxidation giving rise to quinoid structures **[3]**

46/04 . . of unsubstituted ring carbon atoms in six-membered aromatic rings **[3]**
46/06 . . of at least one hydroxy group on a six-membered aromatic ring **[3]**
46/08 . . . with molecular oxygen **[3]**
46/10 . Separation; Purification; Stabilisation; Use of additives **[3]**

47/00 Compounds having −CHO groups

47/02 . Saturated compounds having −CHO groups bound to acyclic carbon atoms or to hydrogen
47/04 . . Formaldehyde
47/042 . . . Preparation from carbon monoxide **[3]**
47/045 . . . Preparation by depolymerisation **[3]**
47/048 . . . Preparation by oxidation of hydrocarbons **[3]**
47/052 . . . Preparation by oxidation of methanol **[3]**
47/055 . . . . using noble metals or compounds thereof as catalysts **[3]**
47/058 . . . Separation; Purification; Stabilisation; Use of additives **[3]**
47/06 . . Acetaldehyde
47/07 . . . Preparation by oxidation **[3]**
47/09 . . . Separation; Purification; Stabilisation; Use of additives **[3]**
47/105 . . containing rings **[3]**
47/11 . . . monocyclic **[3]**
47/115 . . . containing condensed ring systems **[3]**
47/12 . . containing more than one −CHO group
47/127 . . . Glyoxal **[3]**
47/133 . . . containing rings **[3]**
47/14 . . containing halogen
47/16 . . . Trichloroacetaldehyde
47/17 . . . containing rings **[3]**
47/19 . . containing hydroxy groups **[2,3]**
47/192 . . . containing rings **[3]**
47/195 . . . containing halogen **[3]**
47/198 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

47/20 . Unsaturated compounds having −CHO groups bound to acyclic carbon atoms
47/21 . . with only carbon-to-carbon double bonds as unsaturation **[3]**
47/22 . . . Acrylaldehyde; Methacrylaldehyde **[3]**
47/222 . . with only carbon-to-carbon triple bonds as unsaturation **[3]**
47/225 . . containing rings other than six-membered aromatic rings **[3]**
47/228 . . containing six-membered aromatic rings, e.g. phenylacetaldehyde **[3]**
47/23 . . . polycyclic **[3]**
47/232 . . . having unsaturation outside the aromatic rings **[3]**
47/235 . . containing six-membered aromatic rings and other rings **[3]**
47/238 . . . having unsaturation outside the aromatic rings **[3]**
47/24 . . containing halogen
47/26 . . containing hydroxy groups **[3]**
47/263 . . . acyclic **[3]**
47/267 . . . containing rings other than six-membered aromatic rings **[3]**
47/27 . . . containing six-membered aromatic rings **[3]**
47/273 . . . containing halogen **[3]**
47/277 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

47/28 . Saturated compounds having −CHO groups bound to carbon atoms of rings other than six-membered aromatic rings
47/293 . . with a three- or four-membered ring **[3]**
47/30 . . with a five-membered ring
47/32 . . with a six-membered ring
47/33 . . with a seven- to twelve-membered ring **[3]**
47/34 . . polycyclic
47/347 . . . having a −CHO group on a condensed ring system **[3]**
47/353 . . containing halogen **[3]**
47/36 . . containing hydroxy groups
47/37 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

47/38 . Unsaturated compounds having −CHO groups bound to carbon atoms of rings other than six-membered aromatic rings
47/395 . . with a three- or four-membered ring **[3]**
47/40 . . with a five-membered ring **[3]**
47/42 . . with a six-membered ring **[3]**
47/43 . . with a seven- to twelve-membered ring **[3]**
47/44 . . polycyclic **[3]**
47/445 . . . containing a condensed ring system **[3]**
47/45 . . having unsaturation outside the rings **[2]**
47/453 . . containing six-membered aromatic rings **[3]**
47/457 . . containing halogen **[3]**
47/46 . . containing hydroxy groups
47/47 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

47/52 . Compounds having −CHO groups bound to carbon atoms of six-membered aromatic rings
47/54 . . Benzaldehyde
47/542 . . Alkylated benzaldehydes **[3]**
47/544 . . Diformyl-benzenes; Alkylated derivatives thereof **[3]**
47/546 . . polycyclic **[3]**
47/548 . . having unsaturation outside the six-membered aromatic rings **[3]**
47/55 . . containing halogen **[2]**
47/56 . . containing hydroxy groups
47/565 . . . all hydroxy groups bound to the ring **[3]**
47/57 . . . polycyclic **[3]**
47/575 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

47/58 . . . Vanillin

49/00 Ketones; **Ketenes**; **Dimeric ketenes**; **Ketonic chelates**
49/04 . Saturated compounds containing keto groups bound to acyclic carbon atoms
49/08 . . Acetone **[3]**
49/10 . . Methyl-ethyl ketone **[3]**
49/105 . . containing rings **[3]**
49/11 . . . monocyclic **[3]**
49/115 . . . containing condensed ring systems **[3]**
49/12 . . Ketones containing more than one keto group
49/14 . . . Acetylacetone, i.e. 2,4-pentanedione
49/15 . . . containing rings **[3]**
49/16 . . containing halogen
49/163 . . . containing rings **[3]**
49/167 . . . containing only fluorine as halogen **[3]**
49/17 . . containing hydroxy groups **[2]**
49/172 . . . containing rings **[3]**
49/173 . . . containing halogen **[3]**
49/175 . . containing ether groups,

 groups,

 groups, or

 groups **[2,3]**

49/185 . . containing −CHO groups **[3]**
49/20 . Unsaturated compounds containing keto groups bound to acyclic carbon atoms
49/203 . . with only carbon-to-carbon double bonds as unsaturation **[3]**
49/205 . . . Methyl-vinyl ketone **[3]**
49/207 . . with only carbon-to-carbon triple bonds as unsaturation **[3]**
49/21 . . containing rings other than six-membered aromatic rings **[3]**
49/213 . . containing six-membered aromatic rings **[3]**
49/215 . . . polycyclic **[3]**
49/217 . . . having unsaturation outside the aromatic rings **[3]**
49/223 . . . . polycyclic **[3]**
49/225 . . containing six-membered aromatic rings and other rings **[3]**
49/227 . . containing halogen **[3]**
49/23 . . . containing rings other than six-membered aromatic rings **[3]**
49/233 . . . containing six-membered aromatic rings **[3]**
49/235 . . . . having unsaturation outside the aromatic rings **[3]**
49/237 . . . containing six-membered aromatic rings and other rings **[3]**
49/24 . . containing hydroxy groups
49/242 . . . containing rings other than six-membered aromatic rings **[3]**
49/245 . . . containing six-membered aromatic rings **[3]**
49/248 . . . . having unsaturation outside the aromatic rings **[3]**
49/252 . . . containing six-membered aromatic rings and other rings **[3]**
49/255 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

49/258 . . containing −CHO groups **[3]**
49/29 . Saturated compounds containing keto groups bound to rings **[3]**
49/293 . . to a three- or four-membered ring **[3]**
49/297 . . to a five-membered ring **[3]**
49/303 . . to a six-membered ring **[3]**
49/307 . . to a seven- to twelve-membered ring **[3]**
49/313 . . polycyclic **[3]**
49/317 . . . both carbon atoms bound to the keto group belonging to rings **[3]**
49/323 . . . having keto groups bound to condensed ring systems **[3]**
49/327 . . containing halogen **[3]**
49/333 . . . polycyclic **[3]**
49/337 . . containing hydroxy groups **[3]**
49/345 . . . polycyclic **[3]**
49/35 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

49/355 . . containing −CHO groups **[3]**
49/385 . Saturated compounds containing a keto group being part of a ring **[3]**
49/39 . . of a three- or four-membered ring **[3]**
49/395 . . of a five-membered ring **[3]**
49/403 . . of a six-membered ring **[3]**
49/407 . . . Menthones **[3]**

49/413 . . of a seven- to twelve-membered ring **[3]**
49/417 . . polycyclic **[3]**
49/423 . . . a keto group being part of a condensed ring system **[3]**
49/427 . . . . having two rings **[3]**
49/433 . . . . . the condensed ring system containing seven carbon atoms **[3]**
49/437 . . . . . Camphor; Fenchone **[3]**
49/443 . . . . . the condensed ring system containing eight or nine carbon atoms **[3]**
49/447 . . . . . the condensed ring system containing ten carbon atoms **[3]**
49/453 . . . . having three rings **[3]**
49/457 . . containing halogen **[3]**
49/463 . . . a keto group being part of a six-membered ring **[3]**
49/467 . . . polycyclic **[3]**
49/473 . . . . a keto group being part of a condensed ring system **[3]**
49/477 . . . . . having two rings **[3]**
49/483 . . . . . having three rings **[3]**
49/487 . . containing hydroxy groups **[3]**
49/493 . . . a keto group being part of a three- to five-membered ring **[3]**
49/497 . . . a keto group being part of a six-membered ring **[3]**
49/503 . . . a keto group being part of a seven- to twelve-membered ring **[3]**
49/507 . . . polycyclic **[3]**
49/513 . . . . a keto group being part of a condensed ring system **[3]**
49/517 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

49/523 . . containing −CHO groups **[3]**
49/527 . Unsaturated compounds containing keto groups bound to rings other than six-membered aromatic rings **[3]**
49/533 . . to a three- or four-membered ring **[3]**
49/537 . . to a five-membered ring **[3]**
49/543 . . to a six-membered ring **[3]**
49/547 . . to a seven- to twelve-membered ring **[3]**
49/553 . . polycyclic **[3]**
49/557 . . having unsaturation outside the rings **[3]**
49/563 . . containing six-membered aromatic rings **[3]**
49/567 . . containing halogen **[3]**
49/573 . . containing hydroxy groups **[3]**
49/577 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

49/583 . . containing −CHO groups **[3]**
49/587 . Unsaturated compounds containing a keto group being part of a ring **[3]**
49/593 . . of a three- or four-membered ring **[3]**
49/597 . . of a five-membered ring **[3]**
49/603 . . of a six-membered ring **[3]**
49/607 . . of a seven- to twelve-membered ring **[3]**
49/613 . . polycyclic **[3]**
49/617 . . . a keto group being part of a condensed ring system **[3]**
49/623 . . . . having two rings **[3]**
49/627 . . . . . the condensed ring system containing seven carbon atoms **[3]**
49/633 . . . . . the condensed ring system containing eight or nine carbon atoms **[3]**
49/637 . . . . . the condensed ring system containing ten carbon atoms **[3]**
49/643 . . . . having three rings **[3]**
49/647 . . having unsaturation outside the ring **[3]**
49/653 . . . polycyclic **[3]**
49/657 . . containing six-membered aromatic rings **[3]**
49/665 . . . a keto group being part of a condensed ring system **[3]**
49/67 . . . . having two rings, e.g. tetralones **[3]**
49/675 . . . . having three rings **[3]**
49/683 . . . having unsaturation outside the aromatic rings **[3]**
49/687 . . containing halogen **[3]**
49/693 . . . polycyclic **[3]**
49/697 . . . containing six-membered aromatic rings **[3]**
49/703 . . containing hydroxy groups **[3]**
49/707 . . . a keto group being part of a three- to five-membered ring **[3]**
49/713 . . . a keto group being part of a six-membered ring **[3]**
49/717 . . . a keto group being part of a seven- to twelve-membered ring **[3]**
49/723 . . . polycyclic **[3]**
49/727 . . . . a keto group being part of a condensed ring system **[3]**
49/733 . . . . . having two rings **[3]**
49/737 . . . . . having three rings **[3]**
49/743 . . . having unsaturation outside the rings, e.g. humulones, lupulones **[3]**
49/747 . . . containing six-membered aromatic rings **[3]**
49/753 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

49/755 . . . a keto group being part of a condensed ring system with two or three rings, at least one ring being a six-membered aromatic ring **[3]**
49/757 . . containing −CHO groups **[3]**
49/76 . Ketones containing a keto group bound to a six-membered aromatic ring (compounds having a keto group being part of a condensed ring system and being bound to a six-membered aromatic ring C07C 49/657 to C07C 49/757)
49/78 . . Acetophenone

49/782 . . polycyclic **[3]**
49/784 . . . with all keto groups bound to a non-condensed ring **[3]**
49/786 . . . . Benzophenone **[3]**
49/788 . . . with keto groups bound to a condensed ring system **[3]**
49/792 . . . containing rings other than six-membered aromatic rings **[3]**
49/794 . . having unsaturation outside an aromatic ring **[3]**
49/796 . . . polycyclic **[3]**
49/798 . . . containing rings other than six-membered aromatic rings **[3]**
49/80 . . containing halogen
49/807 . . . all halogen atoms bound to the ring **[3]**
49/813 . . . polycyclic **[3]**
49/82 . . containing hydroxy groups **[3]**
49/825 . . . all hydroxy groups bound to the ring **[3]**
49/83 . . . polycyclic **[3]**
49/835 . . . having unsaturation outside an aromatic ring **[3]**
49/84 . . containing ether groups,

 groups,

 groups, or

 groups **[2,3]**

49/86 . . containing $-CHO$ groups **[3]**
49/88 . Ketenes; Dimeric ketenes **[3]**
49/90 . . Ketene, i.e. C_2H_2O **[3]**
49/92 . Ketonic chelates **[3]**

50/00 **Quinones** (for quinone methides, see unsaturated ketones with a keto group being part of a ring) **[3]**

Note

In this group, quinhydrones are classified according to their quinoid part. **[3]**

50/02 . with monocyclic quinoid structure **[3]**
50/04 . . Benzoquinones, i.e. $C_6H_4O_2$ **[3]**
50/06 . . with unsaturation outside the quinoid structure **[3]**
50/08 . with polycyclic non-condensed quinoid structure **[3]**
50/10 . the quinoid structure being part of a condensed ring system containing two rings **[3]**
50/12 . . Naphthoquinones, i.e. $C_{10}H_6O_2$ **[3]**
50/14 . . with unsaturation outside the ring system, e.g. vitamin K_1 **[3]**
50/16 . the quinoid structure being part of a condensed ring system containing three rings **[3]**
50/18 . . Anthraquinones, i.e. $C_{14}H_8O_2$ **[3]**
50/20 . . with unsaturation outside the ring system **[3]**
50/22 . the quinoid structure being part of a condensed ring system containing four or more rings **[3]**
50/24 . containing halogen **[3]**
50/26 . containing groups having oxygen atoms singly bound to carbon atoms **[3]**
50/28 . . with monocyclic quinoid structure **[3]**
50/30 . . with polycyclic non-condensed quinoid structure **[3]**
50/32 . . the quinoid structure being part of a condensed ring system having two rings **[3]**
50/34 . . the quinoid structure being part of a condensed ring system having three rings **[3]**
50/36 . . the quinoid structure being part of a condensed ring system having four or more rings **[3]**
50/38 . containing $-CHO$ or non-quinoid keto groups **[3]**

51/00 **Preparation of carboxylic acids or their salts, halides, or anhydrides [2]**

51/02 . from salts of carboxylic acids
51/04 . from carboxylic acid halides
51/06 . from carboxylic acid amides
51/08 . from nitriles
51/083 . from carboxylic acid anhydrides **[3]**
51/087 . . by hydrolysis **[3]**
51/09 . from carboxylic acid esters or lactones (saponification of carboxylic acid esters C07C 27/02)
51/093 . by hydrolysis of $-CX_3$ groups, X being halogen **[3]**
51/097 . from or via nitro-substituted organic compounds **[3]**
51/10 . by reaction with carbon monoxide
51/12 . . on an oxygen-containing group in organic compounds, e.g. alcohols
51/14 . . on a carbon-to-carbon unsaturated bond in organic compounds **[3]**
51/145 . . with simultaneous oxidation **[3]**
51/15 . by reaction of organic compounds with carbon dioxide, e.g. Kolbe-Schmitt synthesis **[2]**
51/16 . by oxidation (C07C 51/145 takes precedence) **[3]**
51/21 . . with molecular oxygen **[3]**
51/215 . . . of saturated hydrocarbyl groups **[3]**
51/225 . . . . of paraffin waxes **[3]**
51/23 . . . of oxygen-containing groups to carboxyl groups **[3]**
51/235 . . . . of $-CHO$ groups or primary alcohol groups **[3]**
51/245 . . . . of keto groups or secondary alcohol groups **[3]**
51/25 . . . of unsaturated compounds containing no six-membered aromatic ring **[3]**
51/255 . . . of compounds containing six-membered aromatic rings without ring-splitting **[3]**
51/265 . . . . having alkyl side chains which are oxidised to carboxyl groups **[3]**
51/27 . . with oxides of nitrogen or nitrogen-containing mineral acids **[3]**
51/275 . . . of hydrocarbyl groups **[3]**
51/285 . . with peroxy-compounds **[3]**
51/29 . . with halogen-containing compounds which may be formed in situ **[3]**
51/295 . . with inorganic bases, e.g. by alkali fusion **[3]**
51/305 . . with sulfur or sulfur-containing compounds **[3]**
51/31 . . of cyclic compounds with ring-splitting **[3]**
51/34 . by oxidation with ozone; by hydrolysis of ozonides **[3]**
51/347 . by reactions not involving formation of carboxyl groups **[3]**
51/353 . . by isomerisation; by change of size of the carbon skeleton **[3]**
51/36 . . by hydrogenation of carbon-to-carbon unsaturated bonds **[3]**
51/363 . . by introduction of halogen; by substitution of halogen atoms by other halogen atoms **[3]**
51/367 . . by introduction of functional groups containing oxygen only in singly bound form **[3]**

51/373 . . by introduction of functional groups containing oxygen only in doubly bound form **[3]**
51/377 . . by splitting-off hydrogen or functional groups; by hydrogenolysis of functional groups **[3]**
51/38 . . . by decarboxylation **[3]**
51/41 . Preparation of salts of carboxylic acids by conversion of the acids or their salts into salts with the same carboxylic acid part (preparation of soap C11D) **[3]**
51/42 . Separation; Purification; Stabilisation; Use of additives **[3]**
51/43 . . by change of the physical state, e.g. crystallisation **[3]**
51/44 . . . by distillation **[3]**
51/46 . . . . by azeotropic distillation **[3]**
51/47 . . by solid-liquid treatment; by chemisorption **[3]**
51/48 . . by liquid-liquid treatment
51/487 . . by treatment giving rise to chemical modification (by chemisorption C07C 51/47) **[3]**
51/493 . . . whereby carboxylic acid esters are formed **[3]**
51/50 . . Use of additives, e.g. for stabilisation **[3]**
51/54 . Preparation of carboxylic acid anhydrides (by oxidation C07C 51/16)
51/56 . . from organic acids, their salts, or their esters
51/567 . . by reactions not involving the carboxylic acid anhydride group **[3]**
51/573 . . Separation; Purification; Stabilisation; Use of additives **[3]**
51/58 . Preparation of carboxylic acid halides
51/60 . . by conversion of carboxylic acids or their anhydrides into halides with the same carboxylic acid part **[3]**
51/62 . . by reactions not involving the carboxylic acid halide group **[3]**
51/64 . . Separation; Purification; Stabilisation; Use of additives **[3]**

53/00 Saturated compounds having only one carboxyl group bound to an acyclic carbon atom or hydrogen

53/02 . Formic acid
53/04 . . Preparation from carbon monoxide
53/06 . . Salts thereof
53/08 . Acetic acid
53/10 . . Salts thereof
53/12 . Acetic anhydride (ketene C07C 49/90)
53/122 . Propionic acid **[3]**
53/124 . Acids containing four carbon atoms **[3]**
53/126 . Acids containing more than four carbon atoms **[3]**
53/128 . . the carboxyl group being bound to a carbon atom bound to at least two other carbon atoms, e.g. neo-acids **[3]**
53/132 . containing rings **[3]**
53/134 . . monocyclic **[3]**
53/136 . . containing condensed ring systems **[3]**
53/138 . . . containing an adamantane ring system **[3]**
53/15 . containing halogen **[3]**
53/16 . . Halogenated acetic acids **[3]**
53/18 . . . containing fluorine **[3]**
53/19 . . Acids containing three or more carbon atoms **[3]**
53/21 . . . containing fluorine **[3]**
53/23 . . containing rings **[3]**
53/38 . Acyl halides **[3]**
53/40 . . Acetyl halides **[3]**
53/42 . . of acids containing three or more carbon atoms **[3]**
53/44 . . containing rings **[3]**
53/46 . . containing halogen outside the carbonyl halide group **[3]**
53/48 . . . Halogenated acetyl halides **[3]**
53/50 . . . of acids containing three or more carbon atoms **[3]**

55/00 Saturated compounds having more than one carboxyl group bound to acyclic carbon atoms [2]

55/02 . Dicarboxylic acids
55/06 . . Oxalic acid
55/07 . . . Salts thereof **[3]**
55/08 . . Malonic acid
55/10 . . Succinic acid
55/12 . . Glutaric acid
55/14 . . Adipic acid
55/16 . . Pimelic acid
55/18 . . Azelaic acid
55/20 . . Sebacic acid
55/21 . . Dicarboxylic acids having twelve carbon atoms **[3]**
55/22 . Tricarboxylic acids
55/24 . containing more than three carboxyl groups
55/26 . containing rings **[3]**
55/28 . . monocyclic **[3]**
55/30 . . containing condensed ring systems **[3]**
55/32 . containing halogen **[3]**
55/34 . . containing rings **[3]**
55/36 . Acyl halides **[3]**
55/38 . . containing rings **[3]**
55/40 . . containing halogen outside the carbonyl halide group **[3]**

57/00 Unsaturated compounds having carboxyl groups bound to acyclic carbon atoms [2]

57/02 . with only carbon-to-carbon double bonds as unsaturation
57/03 . . Monocarboxylic acids **[3]**
57/04 . . . Acrylic acid; Methacrylic acid **[3]**
57/045 . . . . Preparation by oxidation in the liquid phase **[3]**
57/05 . . . . Preparation by oxidation in the gaseous phase **[3]**
57/055 . . . . . starting from unsaturated aldehydes **[3]**
57/065 . . . . Preparation by splitting-off $H-X$, X being halogen, OR, or NR_2, R being hydrogen or a hydrocarbon group **[3]**
57/07 . . . . Separation; Purification; Stabilisation; Use of additives **[3]**
57/075 . . . . . Use of additives, e.g. for stabilisation **[3]**
57/08 . . . Crotonic acid **[3]**
57/10 . . . Sorbic acid **[3]**
57/12 . . . Straight chain carboxylic acids containing eighteen carbon atoms **[3]**
57/13 . . Dicarboxylic acids **[3]**
57/145 . . . Maleic acid **[3]**
57/15 . . . Fumaric acid **[3]**
57/155 . . . Citraconic acid **[3]**
57/16 . . . Muconic acid **[3]**
57/18 . with only carbon-to-carbon triple bonds as unsaturation
57/20 . . Propiolic acid
57/22 . . Acetylene dicarboxylic acid
57/24 . . Diacetylene or polyacetylene dicarboxylic acids
57/26 . containing rings other than six-membered aromatic rings **[3]**

57/28 . . containing an adamantane ring system **[3]**
57/30 . containing six-membered aromatic rings **[3]**
57/32 . . Phenylacetic acid **[3]**
57/34 . . containing more than one carboxyl group **[3]**
57/36 . . . Phenylmalonic acid **[3]**
57/38 . . polycyclic **[3]**
57/40 . . . containing condensed ring systems **[3]**
57/42 . . having unsaturation outside the rings **[3]**
57/44 . . . Cinnamic acid **[3]**
57/46 . containing six-membered aromatic rings and other rings, e.g. cyclohexylphenylacetic acid **[3]**
57/48 . . having unsaturation outside the aromatic rings **[3]**
57/50 . . containing condensed ring systems **[3]**
57/52 . containing halogen **[3]**
57/54 . . Halogenated acrylic or methacrylic acids **[3]**
57/56 . . containing rings other than six-membered aromatic rings **[3]**
57/58 . . containing six-membered aromatic rings **[3]**
57/60 . . . having unsaturation outside the rings **[3]**
57/62 . . containing six-membered aromatic rings and other rings **[3]**
57/64 . Acyl halides **[3]**
57/66 . . with only carbon-to-carbon double bonds as unsaturation **[3]**
57/68 . . with only carbon-to-carbon triple bonds as unsaturation **[3]**
57/70 . . containing rings other than six-membered aromatic rings **[3]**
57/72 . . containing six-membered aromatic rings **[3]**
57/74 . . containing six-membered aromatic rings and other rings **[3]**
57/76 . . containing halogen outside the carbonyl halide groups **[3]**

59/00 Compounds having carboxyl groups bound to acyclic carbon atoms and containing any of the groups OH, O-metal, −CHO, keto, ether,

 **groups,**

 **groups, or**

 **groups [2]**

59/01 . Saturated compounds having only one carboxyl group and containing hydroxy or O-metal groups **[3]**
59/06 . . Glycolic acid **[3]**
59/08 . . Lactic acid **[3]**
59/10 . . Polyhydroxy carboxylic acids
59/105 . . . having five or more carbon atoms, e.g. aldonic acids **[3]**
59/11 . . containing rings **[3]**
59/115 . . containing halogen **[3]**
59/125 . Saturated compounds having only one carboxyl group and containing ether groups,

 groups,

 groups, or

 groups **[3]**

59/13 . . containing rings **[3]**
59/135 . . containing halogen **[3]**
59/147 . Saturated compounds having only one carboxyl group and containing −CHO groups **[3]**
59/153 . . Glyoxylic acid **[3]**
59/185 . Saturated compounds having only one carboxyl group and containing keto groups **[3]**
59/19 . . Pyruvic acid **[3]**
59/195 . . Acetoacetic acid **[3]**
59/205 . . containing rings **[3]**
59/21 . . containing halogen **[3]**
59/215 . . containing singly bound oxygen-containing groups **[3]**
59/225 . . containing −CHO groups **[3]**
59/235 . Saturated compounds having more than one carboxyl group **[3]**
59/245 . . containing hydroxy or O-metal groups **[3]**
59/255 . . . Tartaric acid **[3]**
59/265 . . . Citric acid **[3]**
59/285 . . . Polyhydroxy dicarboxylic acids having five or more carbon atoms, e.g. saccharic acids **[3]**
59/29 . . . containing rings **[3]**
59/295 . . . containing halogen **[3]**
59/305 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

59/31 . . . containing rings **[3]**
59/315 . . . containing halogen **[3]**
59/325 . . containing −CHO groups **[3]**
59/347 . . containing keto groups **[3]**
59/353 . . . containing rings **[3]**
59/40 . Unsaturated compounds **[3]**
59/42 . . containing hydroxy or O-metal groups **[3]**
59/44 . . . Ricinoleic acid **[3]**
59/46 . . . containing rings other than six-membered aromatic rings **[3]**
59/48 . . . containing six-membered aromatic rings **[3]**
59/50 . . . . Mandelic acid **[3]**
59/52 . . . a hydroxy or O-metal group being bound to a carbon atom of a six-membered aromatic ring **[3]**
59/54 . . . containing six-membered aromatic rings and other rings **[3]**
59/56 . . . containing halogen **[3]**

59/58 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

59/60 . . . the non-carboxylic part of the ether being unsaturated **[3]**

59/62 . . . containing rings other than six-membered aromatic rings **[3]**

59/64 . . . containing six-membered aromatic rings **[3]**

59/66 . . . . the non-carboxylic part of the ether containing six-membered aromatic rings **[3]**

59/68 . . . . . the oxygen atom of the ether group being bound to a non-condensed six-membered aromatic ring **[3]**

59/70 . . . . . Ethers of hydroxy-acetic acid **[3]**

59/72 . . . containing six-membered aromatic rings and other rings **[3]**

59/74 . . containing −CHO groups **[3]**

59/76 . . containing keto groups **[3]**

59/80 . . . containing rings other than six-membered aromatic rings **[3]**

59/82 . . . . the keto group being part of a ring **[3]**

59/84 . . . containing six-membered aromatic rings **[3]**

59/86 . . . containing six-membered aromatic rings and other rings **[3]**

59/88 . . . containing halogen **[3]**

59/90 . . . containing singly bound oxygen-containing groups **[3]**

59/92 . . . containing −CHO groups **[3]**

61/00 Compounds having carboxyl groups bound to carbon atoms of rings other than six-membered aromatic rings

61/04 . Saturated compounds having a carboxyl group bound to a three- or four-membered ring **[3]**

61/06 . Saturated compounds having a carboxyl group bound to a five-membered ring **[3]**

61/08 . Saturated compounds having a carboxyl group bound to a six-membered ring **[3]**

61/09 . . Completely hydrogenated benzenedicarboxylic acids **[2,3]**

61/10 . Saturated compounds having a carboxyl group bound to a seven- to twelve-membered ring **[3]**

61/12 . Saturated polycyclic compounds **[3]**

61/125 . . having a carboxyl group bound to a condensed ring system **[3]**

61/13 . . . having two rings **[3]**

61/135 . . . having three rings **[3]**

61/15 . Saturated compounds containing halogen **[3]**

61/16 . Unsaturated compounds **[3]**

61/20 . . having a carboxyl group bound to a five-membered ring **[3]**

61/22 . . having a carboxyl group bound to a six-membered ring **[3]**

61/24 . . . Partially hydrogenated benzenedicarboxylic acids **[3]**

61/26 . . having a carboxyl group bound to a seven- to twelve-membered ring **[3]**

61/28 . . polycyclic **[3]**

61/29 . . . having a carboxyl group bound to a condensed ring system **[3]**

61/35 . . having unsaturation outside the rings **[3]**

61/37 . . . Chrysanthemumic acid **[3]**

61/39 . . containing six-membered aromatic rings **[3]**

61/40 . . containing halogen **[3]**

62/00 Compounds having carboxyl groups bound to carbon atoms of rings other than six-membered aromatic rings and containing any of the groups OH, O-metal, −CHO, keto, ether,

 **groups,**

 **groups, or**

 **groups [3]**

62/02 . Saturated compounds containing hydroxy or O-metal groups **[3]**

62/04 . . with a six-membered ring **[3]**

62/06 . . polycyclic **[3]**

62/08 . Saturated compounds containing ether groups,

 groups,

 groups, or

 groups **[3]**

62/10 . . with a six-membered ring **[3]**

62/12 . . polycyclic **[3]**

62/14 . . . having a carboxyl group on a condensed ring system **[3]**

62/16 . Saturated compounds containing −CHO groups **[3]**

62/18 . Saturated compounds containing keto groups **[3]**

62/20 . . with a six-membered ring **[3]**

62/22 . . polycyclic **[3]**

62/24 . . the keto group being part of a ring **[3]**

62/26 . . containing singly bound oxygen-containing groups **[3]**

62/28 . . containing −CHO groups **[3]**

62/30 . Unsaturated compounds **[3]**

62/32 . . containing hydroxy or O-metal groups **[3]**

62/34 . . containing ether groups,

 groups,

 groups, or

 groups **[3]**

62/36 . . containing −CHO groups **[3]**

62/38 . . containing keto groups **[3]**

63/00 Compounds having carboxyl groups bound to carbon atoms of six-membered aromatic rings [2]

63/04 . Monocyclic monocarboxylic acids

63/06 . . Benzoic acid
63/08 . . . Salts thereof
63/10 . . . Halides thereof
63/14 . Monocyclic dicarboxylic acids
63/15 . . all carboxyl groups bound to carbon atoms of the six-membered aromatic ring **[3]**
63/16 . . . 1,2-Benzenedicarboxylic acid **[3]**
63/20 . . . . Salts thereof **[3]**
63/22 . . . . Halides thereof **[3]**
63/24 . . . 1,3-Benzenedicarboxylic acid **[3]**
63/26 . . . 1,4-Benzenedicarboxylic acid **[3]**
63/28 . . . . Salts thereof **[3]**
63/30 . . . . Halides thereof **[3]**
63/307 . Monocyclic tricarboxylic acids **[3]**
63/313 . Monocyclic acids containing more than three carboxyl groups **[3]**
63/33 . Polycyclic acids **[2,3]**
63/331 . . with all carboxyl groups bound to non-condensed rings **[3]**
63/333 . . . 4,4'-Diphenyldicarboxylic acids **[2,3]**
63/337 . . with carboxyl groups bound to condensed ring systems **[2,3]**
63/34 . . . containing two rings **[3]**
63/36 . . . . containing one carboxyl group **[3]**
63/38 . . . . containing two carboxyl groups both bound to carbon atoms of the condensed ring system **[3]**
63/40 . . . . containing three or more carboxyl groups all bound to carbon atoms of the condensed ring system **[3]**
63/42 . . . containing three or more rings **[3]**
63/44 . . . . containing one carboxyl group **[3]**
63/46 . . . . containing two carboxyl groups both bound to carbon atoms of the condensed ring system **[3]**
63/48 . . . . containing three or more carboxyl groups all bound to carbon atoms of the condensed ring system **[3]**
63/49 . . containing rings other than six-membered aromatic rings **[3]**
63/64 . Monocyclic acids with unsaturation outside the aromatic ring **[3]**
63/66 . Polycyclic acids with unsaturation outside the aromatic rings **[3]**
63/68 . containing halogen **[3]**
63/70 . . Monocarboxylic acids **[3]**
63/72 . . Polycyclic acids **[3]**
63/74 . . having unsaturation outside the aromatic rings **[3]**

65/00 Compounds having carboxyl groups bound to carbon atoms of six-membered aromatic rings and containing any of the groups OH, O-metal, −CHO, keto, ether,

 **groups,**

 **groups, or**

 **groups**

65/01 . containing hydroxy or O-metal groups **[3]**
65/03 . . monocyclic and having all hydroxy or O-metal groups bound to the ring **[3]**
65/05 . . . o-Hydroxy carboxylic acids **[3]**
65/10 . . . . Salicylic acid **[3]**
65/105 . . polycyclic **[3]**
65/11 . . . with carboxyl groups on a condensed ring system containing two rings **[3]**
65/15 . . . with carboxyl groups on a condensed ring system containing more than two rings **[3]**
65/17 . . containing rings other than six-membered aromatic rings **[3]**
65/19 . . having unsaturation outside the aromatic ring **[3]**
65/21 . containing ether groups,

 groups,

 groups, or

 groups **[3]**

65/24 . . polycyclic **[3]**
65/26 . . . containing rings other than six-membered aromatic rings **[3]**
65/28 . . having unsaturation outside the aromatic rings **[3]**
65/30 . containing −CHO groups **[3]**
65/32 . containing keto groups **[3]**
65/34 . . polycyclic **[3]**
65/36 . . . containing rings other than six-membered aromatic rings **[3]**
65/38 . . having unsaturation outside the aromatic rings **[3]**
65/40 . . containing singly bound oxygen-containing groups **[3]**
65/42 . . containing −CHO groups **[3]**

66/00 Quinone carboxylic acids [2]
66/02 . Anthraquinone carboxylic acids **[2]**

67/00 Preparation of carboxylic acid esters

Note

In this group, lactones used as reactants are considered as being esters. **[3]**

67/02 . by interreacting ester groups, i.e. transesterification
67/03 . by reacting an ester group with a hydroxy group **[2]**
67/035 . by reacting carboxylic acids or symmetrical anhydrides with saturated hydrocarbons **[3]**
67/04 . by reacting carboxylic acids or symmetrical anhydrides onto unsaturated carbon-to-carbon bonds **[2]**
67/05 . . with oxidation **[2,3]**
67/055 . . . in the presence of platinum group metals or their compounds **[3]**
67/08 . by reacting carboxylic acids or symmetrical anhydrides with the hydroxy or O-metal group of organic compounds **[2]**
67/10 . by reacting carboxylic acids or symmetrical anhydrides with ester groups or with a carbon-halogen bond **[2]**
67/11 . . being mineral ester groups **[3]**
67/12 . from asymmetrical anhydrides **[2]**
67/14 . from carboxylic acid halides **[2]**
67/16 . from carboxylic acids, esters or anhydrides wherein one oxygen atom has been replaced by a sulfur, selenium or tellurium atom **[2]**

67/18 . by conversion of a group containing nitrogen into an ester group **[2]**
67/20 . . from amides or lactams **[2]**
67/22 . . from nitriles **[2]**
67/24 . by reacting carboxylic acids or derivatives thereof with a carbon-to-oxygen ether bond, e.g. acetal, tetrahydrofuran **[2]**
67/26 . . with an oxirane ring **[2]**
67/27 . from ortho-esters **[3]**
67/28 . by modifying the hydroxylic moiety of the ester, such modification not being an introduction of an ester group **[2]**
67/283 . . by hydrogenation of unsaturated carbon-to-carbon bonds **[3]**
67/287 . . by introduction of halogen; by substitution of halogen atoms by other halogen atoms **[3]**
67/29 . . by introduction of oxygen-containing functional groups **[3]**
67/293 . . by isomerisation; by change of size of the carbon skeleton **[3]**
67/297 . . by splitting-off hydrogen or functional groups; by hydrogenolysis of functional groups **[3]**
67/30 . by modifying the acid moiety of the ester, such modification not being an introduction of an ester group **[2]**
67/303 . . by hydrogenation of unsaturated carbon-to-carbon bonds **[3]**
67/307 . . by introduction of halogen; by substitution of halogen atoms by other halogen atoms **[3]**
67/31 . . by introduction of functional groups containing oxygen only in singly bound form **[3]**
67/313 . . by introduction of doubly bound oxygen containing functional groups, e.g. carboxyl groups **[3]**
67/317 . . by splitting-off hydrogen or functional groups; by hydrogenolysis of functional groups **[3]**
67/32 . . . Decarboxylation **[2,3]**
67/327 . . . by elimination of functional groups containing oxygen only in singly bound form **[3]**
67/333 . . by isomerisation; by change of size of the carbon skeleton (introduction or elimination of carboxyl groups C07C 67/313, C07C 67/32) **[3]**
67/34 . . . Migration of  groups in the molecule **[2,3]**
67/343 . . . by increase in the number of carbon atoms **[3]**
67/347 . . . . by addition to unsaturated carbon-to-carbon bonds **[3]**
67/36 . by reaction with carbon monoxide or formates (C07C 67/02, C07C 67/03, C07C 67/10 take precedence) **[2]**
67/37 . . by reaction of ethers with carbon monoxide **[2]**
67/38 . . by addition to an unsaturated carbon-to-carbon bond **[2]**
67/39 . by oxidation of groups which are precursors for the acid moiety of the ester **[3]**
67/40 . . by oxidation of primary alcohols **[2,3]**
67/42 . . by oxidation of secondary alcohols or ketones **[2,3]**
67/44 . by oxidation-reduction of aldehydes, e.g. Tishchenko reaction **[2]**
67/46 . from ketenes or polyketenes **[2]**
67/465 . by oligomerisation **[3]**
67/47 . by telomerisation (macromolecular compounds C08) **[3]**
67/475 . by splitting of carbon-to-carbon bonds and redistribution, e.g. disproportionation or migration of  groups between different molecules **[3]**
67/48 . Separation; Purification; Stabilisation; Use of additives **[2,3]**
67/52 . . by change in the physical state, e.g. crystallisation **[3]**
67/54 . . . by distillation **[3]**
67/56 . . by solid-liquid treatment; by chemisorption **[3]**
67/58 . . by liquid-liquid treatment **[3]**
67/60 . . by treatment giving rise to chemical modification (by chemisorption C07C 67/56) **[3]**
67/62 . . Use of additives, e.g. for stabilisation **[3]**

68/00 Preparation of esters of carbonic or haloformic acids [2]

68/02 . from phosgene or haloformates **[2]**
68/04 . from carbon dioxide or inorganic carbonates **[2]**
68/06 . from organic carbonates **[2]**
68/08 . Purification; Separation; Stabilisation **[2]**

69/00 Esters of carboxylic acids; **Esters of carbonic or haloformic acids**

Note

Attention is drawn to Note (6) following the title of this subclass. **[5]**

69/003 . Esters of saturated alcohols having the esterified hydroxy group bound to an acyclic carbon atom **[3]**
69/007 . Esters of unsaturated alcohols having the esterified hydroxy group bound to an acyclic carbon atom **[3]**
69/01 . . Vinyl esters **[3]**
69/013 . Esters of alcohols having the esterified hydroxy group bound to a carbon atom of a ring other than a six-membered aromatic ring **[3]**
69/017 . Esters of hydroxy compounds having the esterified hydroxy group bound to a carbon atom of a six-membered aromatic ring **[3]**

Note

Esters having a variably-specified acid moiety, i.e. covered by more than one of groups C07C 69/02, C07C 69/34, C07C 69/52, C07C 69/608, C07C 69/612, C07C 69/62, C07C 69/66, C07C 69/74, C07C 69/76, C07C 69/95, C07C 69/96, are covered by groups C07C 69/003 to C07C 69/017 according to their hydroxylic moiety. **[3]**

69/02 . Esters of acyclic saturated monocarboxylic acids having the carboxyl group bound to an acyclic carbon atom or to hydrogen
69/025 . . esterified with unsaturated alcohols having the esterified hydroxy group bound to an acyclic carbon atom **[3]**
69/03 . . esterified with alcohols having the esterified hydroxy group bound to a carbon atom of a ring other than a six-membered aromatic ring **[3]**
69/035 . . esterified with a hydroxy compound having the esterified hydroxy group bound to a carbon atom of a six-membered aromatic ring **[3]**
69/04 . . Formic acid esters
69/06 . . . of monohydroxylic compounds
69/07 . . . . of unsaturated alcohols **[2]**

69/08 . . . of dihydroxylic compounds
69/10 . . . of trihydroxylic compounds
69/12 . . Acetic acid esters
69/14 . . . of monohydroxylic compounds
69/145 . . . . of unsaturated alcohols **[2]**
69/15 . . . . . Vinyl acetate **[2]**
69/155 . . . . . Allyl acetate **[2]**
69/157 . . . . . containing six-membered aromatic rings **[3]**
69/16 . . . of dihydroxylic compounds
69/18 . . . of trihydroxylic compounds
69/21 . . . of hydroxy compounds with more than three hydroxy groups **[2]**
69/22 . . having three or more carbon atoms in the acid moiety
69/24 . . . esterified with monohydroxylic compounds
69/26 . . . . Synthetic waxes
69/28 . . . esterified with dihydroxylic compounds
69/30 . . . esterified with trihydroxylic compounds
69/33 . . . esterified with hydroxy compounds having more than three hydroxy groups **[2]**
69/34 . Esters of acyclic saturated polycarboxylic acids having an esterified carboxyl group bound to an acyclic carbon atom **[3]**
69/347 . . esterified with unsaturated alcohols having the esterified hydroxy group bound to an acyclic carbon atom **[3]**
69/353 . . esterified with a hydroxy compound having the esterified hydroxy group bound to a carbon atom of a six-membered aromatic ring **[3]**
69/36 . . Oxalic acid esters **[3]**
69/38 . . Malonic acid esters **[3]**
69/40 . . Succinic acid esters **[3]**
69/42 . . Glutaric acid esters **[3]**
69/44 . . Adipic acid esters **[3]**
69/46 . . Pimelic acid esters **[3]**
69/48 . . Azelaic acid esters **[3]**
69/50 . . Sebacic acid esters **[3]**
69/52 . Esters of acyclic unsaturated carboxylic acids having the esterified carboxyl group bound to an acyclic carbon atom **[3]**
69/527 . . of unsaturated hydroxy compounds **[3]**
69/533 . . Monocarboxylic acid esters having only one carbon-to-carbon double bond **[3]**
69/54 . . . Acrylic acid esters; Methacrylic acid esters **[3]**
69/56 . . . Crotonic acid esters; Vinyl acetic acid esters **[3]**
69/58 . . . Esters of straight chain acids with eighteen carbon atoms in the acid moiety **[3]**
69/587 . . Monocarboxylic acid esters having at least two carbon-to-carbon double bonds **[3]**
69/593 . . Dicarboxylic acid esters having only one carbon-to-carbon double bond **[3]**
69/60 . . . Maleic acid esters; Fumaric acid esters **[3]**
69/602 . . Dicarboxylic acid esters having at least two carbon-to-carbon double bonds **[3]**
69/604 . . Polycarboxylic acid esters, the acid moiety containing more than two carboxyl groups **[3]**
69/606 . . having only carbon-to-carbon triple bonds as unsaturation in the carboxylic acid moiety **[3]**
69/608 . Esters of carboxylic acids having a carboxyl group bound to an acyclic carbon atom and having a ring other than a six-membered aromatic ring in the acid moiety **[3]**
69/612 . Esters of carboxylic acids having a carboxyl group bound to an acyclic carbon atom and having a six-membered aromatic ring in the acid moiety **[3]**
69/614 . . of phenylacetic acid **[3]**
69/616 . . polycyclic **[3]**
69/618 . . having unsaturation outside the six-membered aromatic ring **[3]**
69/62 . Halogen-containing esters **[2]**
69/63 . . of saturated acids **[2]**
69/635 . . . containing rings in the acid moiety **[3]**
69/65 . . of unsaturated acids **[2]**
69/653 . . . Acrylic acid esters; Methacrylic acid esters; Haloacrylic acid esters; Halomethacrylic acid esters **[3]**
69/657 . . . Maleic acid esters; Fumaric acid esters; Halomaleic acid esters; Halofumaric acid esters **[3]**
69/66 . Esters of carboxylic acids having esterified carboxyl groups bound to acyclic carbon atoms and having any of the groups OH, O-metal, −CHO, keto, ether, acyloxy,

 groups,

 groups, or

 in the acid moiety

69/67 . . of saturated acids **[2]**
69/675 . . . of saturated hydroxy-carboxylic acids **[3]**
69/68 . . . . Lactic acid esters **[3]**
69/70 . . . . Tartaric acid esters **[3]**
69/704 . . . . Citric acid esters **[3]**
69/708 . . . Ethers **[3]**
69/712 . . . . the hydroxy group of the ester being etherified with a hydroxy compound having the hydroxy group bound to a carbon atom of a six-membered aromatic ring **[3]**
69/716 . . . Esters of keto-carboxylic acids **[3]**
69/72 . . . . Acetoacetic acid esters **[3]**
69/73 . . of unsaturated acids **[2]**
69/732 . . . of unsaturated hydroxy carboxylic acids **[3]**
69/734 . . . Ethers **[3]**
69/736 . . . . the hydroxy group of the ester being etherified with a hydroxy compound having the hydroxy group bound to a carbon atom of a six-membered aromatic ring **[3]**
69/738 . . . Esters of keto-carboxylic acids **[3]**
69/74 . Esters of carboxylic acids having an esterified carboxyl group bound to a carbon atom of a ring other than a six-membered aromatic ring
69/743 . . of acids with a three-membered ring and with unsaturation outside the ring **[3]**
69/747 . . . Chrysanthemumic acid esters **[3]**
69/75 . . of acids with a six-membered ring **[3]**
69/753 . . of polycyclic acids **[3]**

69/757 . . having any of the groups OH, O-metal, −CHO, keto, ether, acyloxy,  groups,  groups, or  in the acid moiety **[3]**

69/76 . Esters of carboxylic acids having an esterified carboxyl group bound to a carbon atom of a six-membered aromatic ring

69/767 . . esterified with unsaturated alcohols having the esterified hydroxy group bound to an acyclic carbon atom **[3]**

69/773 . . esterified with a hydroxy compound having the esterified hydroxy group bound to a carbon atom of a six-membered aromatic ring **[3]**

69/78 . . Benzoic acid esters

69/80 . . Phthalic acid esters **[2]**

69/82 . . . Terephthalic acid esters

69/83 . . . of unsaturated alcohols **[2]**

69/84 . . of monocyclic hydroxy carboxylic acids, the hydroxy groups and the carboxyl groups of which are bound to carbon atoms of a six-membered aromatic ring

69/86 . . . with esterified hydroxyl groups

69/88 . . . with esterified carboxyl groups

69/90 . . . with esterified hydroxyl and carboxyl groups

69/92 . . . with etherified hydroxyl groups **[2]**

69/94 . . of polycyclic hydroxy carboxylic acids, the hydroxy groups and the carboxyl groups of which are bound to carbon atoms of six-membered aromatic rings **[2]**

69/95 . Esters of quinone carboxylic acids **[2]**

69/96 . Esters of carbonic or haloformic acids **[2]**

71/00 Esters of oxyacids of halogens

Compounds containing carbon and nitrogen with or without hydrogen, halogens or oxygen [5]

201/00 Preparation of esters of nitric or nitrous acid or of compounds containing nitro or nitroso groups bound to a carbon skeleton [5]

201/02 . Preparation of esters of nitric acid **[5]**

201/04 . Preparation of esters of nitrous acid **[5]**

201/06 . Preparation of nitro compounds **[5]**

201/08 . . by substitution of hydrogen atoms by nitro groups **[5]**

201/10 . . by substitution of functional groups by nitro groups **[5]**

201/12 . . by reactions not involving the formation of nitro groups **[5]**

201/14 . . by formation of nitro groups together with reactions not involving the formation of nitro groups **[5]**

201/16 . . Separation; Purification; Stabilisation; Use of additives **[5]**

203/00 Esters of nitric or nitrous acid [5]

203/02 . Esters of nitric acid **[5]**

203/04 . . having nitrate groups bound to acyclic carbon atoms **[5]**

203/06 . . . Glycerol trinitrate **[5]**

203/08 . . having nitrate groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

203/10 . . having nitrate groups bound to carbon atoms of six-membered aromatic rings **[5]**

205/00 Compounds containing nitro groups bound to a carbon skeleton [5]

205/01 . having nitro groups bound to acyclic carbon atoms **[5]**

205/02 . . of a saturated carbon skeleton **[5]**

205/03 . . of an unsaturated carbon skeleton **[5]**

205/04 . . . containing six-membered aromatic rings **[5]**

205/05 . having nitro groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

205/06 . having nitro groups bound to carbon atoms of six-membered aromatic rings **[5]**

205/07 . the carbon skeleton being further substituted by halogen atoms **[5]**

205/08 . . having nitro groups bound to acyclic carbon atoms **[5]**

205/09 . . . of an unsaturated carbon skeleton **[5]**

205/10 . . having nitro groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

205/11 . . having nitro groups bound to carbon atoms of six-membered aromatic rings **[5]**

205/12 . . . the six-membered aromatic ring or a condensed ring system containing that ring being substituted by halogen atoms **[5]**

205/13 . the carbon skeleton being further substituted by hydroxy groups **[5]**

205/14 . . having nitro groups and hydroxy groups bound to acyclic carbon atoms **[5]**

205/15 . . . of a saturated carbon skeleton **[5]**

205/16 . . . of a carbon skeleton containing six-membered aromatic rings **[5]**

205/17 . . having nitro groups bound to acyclic carbon atoms and hydroxy groups bound to carbon atoms of six-membered aromatic rings **[5]**

205/18 . . having nitro groups or hydroxy groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

205/19 . . having nitro groups bound to carbon atoms of six-membered aromatic rings and hydroxy groups bound to acyclic carbon atoms **[5]**

205/20 . . having nitro groups and hydroxy groups bound to carbon atoms of six-membered aromatic rings **[5]**

205/21 . . . having nitro groups and hydroxy groups bound to carbon atoms of the same non-condensed six-membered aromatic ring **[5]**

205/22 . . . . having one nitro group bound to the ring **[5]**

205/23 . . . . having two nitro groups bound to the ring **[5]**

205/24 . . . . having three, and only three, nitro groups bound to the ring **[5]**

205/25 . . . having nitro groups bound to carbon atoms of six-membered aromatic rings being part of a condensed ring system **[5]**

205/26 . . and being further substituted by halogen atoms **[5]**

205/27 . the carbon skeleton being further substituted by etherified hydroxy groups **[5]**

205/28 . . having nitro groups and etherified hydroxy groups bound to acyclic carbon atoms of the carbon skeleton **[5]**

205/29 . . . the carbon skeleton being saturated **[5]**

205/30 . . . . the oxygen atom of at least one of the etherified hydroxy groups being further bound to a carbon atom of a six-membered aromatic ring **[5]**
205/31 . . . the carbon skeleton containing six-membered aromatic rings **[5]**
205/32 . . having nitro groups bound to acyclic carbon atoms and etherified hydroxy groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**
205/33 . . having nitro groups or etherified hydroxy groups bound to carbon atoms of rings other than six-membered aromatic rings of the carbon skeleton **[5]**
205/34 . . having nitro groups bound to carbon atoms of six-membered aromatic rings and etherified hydroxy groups bound to acyclic carbon atoms of the carbon skeleton **[5]**
205/35 . . having nitro groups and etherified hydroxy groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**
205/36 . . . to carbon atoms of the same non-condensed six-membered aromatic ring or to carbon atoms of six-membered aromatic rings being part of the same condensed ring system **[5]**
205/37 . . . . the oxygen atom of at least one of the etherified hydroxy groups being further bound to an acyclic carbon atom **[5]**
205/38 . . . . the oxygen atom of at least one of the etherified hydroxy groups being further bound to a carbon atom of a six-membered aromatic ring, e.g. nitrodiphenyl ethers **[5]**
205/39 . the carbon skeleton being further substituted by esterified hydroxy groups **[5]**
205/40 . . having nitro groups and esterified hydroxy groups bound to acyclic carbon atoms of the carbon skeleton **[5]**
205/41 . . having nitro groups or esterified hydroxy groups bound to carbon atoms of rings other than six-membered aromatic rings of the carbon skeleton **[5]**
205/42 . . having nitro groups or esterified hydroxy groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**
205/43 . . . to carbon atoms of the same non-condensed six-membered aromatic ring or to carbon atoms of six-membered aromatic rings being part of the same condensed ring system **[5]**
205/44 . the carbon skeleton being further substituted by −CHO groups **[5]**
205/45 . the carbon skeleton being further substituted by at least one doubly-bound oxygen atom, not being part of a −CHO group **[5]**
205/46 . . the carbon skeleton containing carbon atoms of quinone rings **[5]**
205/47 . . . Anthraquinones containing nitro groups **[5]**
205/48 . . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**
205/49 . the carbon skeleton being further substituted by carboxyl groups **[5]**
205/50 . . having nitro groups and carboxyl groups bound to acyclic carbon atoms of the carbon skeleton **[5]**
205/51 . . . the carbon skeleton being saturated **[5]**
205/52 . . . . Nitro-acetic acids **[5]**
205/53 . . . the carbon skeleton containing six-membered aromatic rings **[5]**
205/54 . . having nitro groups bound to acyclic carbon atoms and carboxyl groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**
205/55 . . having nitro groups or carboxyl groups bound to carbon atoms of rings other than six-membered aromatic rings of the carbon skeleton **[5]**
205/56 . . having nitro groups bound to carbon atoms of six-membered aromatic rings and carboxyl groups bound to acyclic carbon atoms of the carbon skeleton **[5]**
205/57 . . having nitro groups and carboxyl groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**
205/58 . . . the carbon skeleton being further substituted by halogen atoms **[5]**
205/59 . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**
205/60 . . . . in ortho-position to the carboxyl group, e.g. nitro-salicylic acids **[5]**
205/61 . . . the carbon skeleton being further substituted by doubly-bound oxygen atoms **[5]**

207/00 Compounds containing nitroso groups bound to a carbon skeleton [5]
207/02 . the carbon skeleton not being further substituted **[5]**
207/04 . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**

209/00 Preparation of compounds containing amino groups bound to a carbon skeleton [5]
209/02 . by substitution of hydrogen atoms by amino groups **[5]**
209/04 . by substitution of functional groups by amino groups **[5]**
209/06 . . by substitution of halogen atoms **[5]**
209/08 . . . with formation of amino groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings **[5]**
209/10 . . . with formation of amino groups bound to carbon atoms of six-membered aromatic rings or from amines having nitrogen atoms bound to carbon atoms of six-membered aromatic rings **[5]**
209/12 . . . with formation of quaternary ammonium compounds **[5]**
209/14 . . by substitution of hydroxy groups or of etherified or esterified hydroxy groups **[5]**
209/16 . . . with formation of amino groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings **[5]**
209/18 . . . with formation of amino groups bound to carbon atoms of six-membered aromatic rings or from amines having nitrogen atoms bound to carbon atoms of six-membered aromatic rings **[5]**
209/20 . . . with formation of quaternary ammonium compounds **[5]**
209/22 . . by substitution of other functional groups **[5]**
209/24 . by reductive alkylation of ammonia, amines or compounds having groups reducible to amino groups, with carbonyl compounds **[5]**
209/26 . . by reduction with hydrogen **[5]**
209/28 . . by reduction with other reducing agents **[5]**
209/30 . by reduction of nitrogen-to-oxygen or nitrogen-to-nitrogen bonds **[5]**

209/32 . . by reduction of nitro groups **[5]**
209/34 . . . by reduction of nitro groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings **[5]**
209/36 . . . by reduction of nitro groups bound to carbon atoms of six-membered aromatic rings **[5]**
209/38 . . by reduction of nitroso groups **[5]**
209/40 . . by reduction of hydroxylamino or oxyimino groups **[5]**
209/42 . . by reduction of nitrogen-to-nitrogen bonds **[5]**
209/44 . by reduction of carboxylic acids or esters thereof in presence of ammonia or amines, or by reduction of nitriles, carboxylic acid amides, imines or imino-ethers **[5]**
209/46 . . by reduction of carboxylic acids or esters thereof in presence of ammonia or amines **[5]**
209/48 . . by reduction of nitriles **[5]**
209/50 . . by reduction of carboxylic acid amides **[5]**
209/52 . . by reduction of imines or imino-ethers (C07C 209/24 takes precedence) **[5]**
209/54 . by rearrangement reactions **[5]**
209/56 . . from carboxylic acids involving a Hofmann, Curtius, Schmidt, or Lossen-type rearrangement **[5]**
209/58 . . from or via amides **[5]**
209/60 . by condensation or addition reactions, e.g. Mannich reaction, addition of ammonia or amines to alkenes or to alkynes or addition of compounds containing an active hydrogen atom to Schiff's bases, quinone imines, or aziranes **[5]**
209/62 . by cleaving carbon-to-nitrogen, sulfur-to-nitrogen, or phosphorus-to-nitrogen bonds, e.g. hydrolysis of amides, N-dealkylation of amines or quaternary ammonium compounds (C07C 209/24 takes precedence) **[5]**
209/64 . by disproportionation **[5]**
209/66 . from or via metallo-organic compounds **[5]**
209/68 . from amines, by reactions not involving amino groups, e.g. reduction of unsaturated amines, aromatisation, or substitution of the carbon skeleton **[5]**
209/70 . . by reduction of unsaturated amines **[5]**
209/72 . . . by reduction of six-membered aromatic rings **[5]**
209/74 . . by halogenation, hydrohalogenation, dehalogenation, or dehydrohalogenation **[5]**
209/76 . . by nitration **[5]**
209/78 . . from carbonyl compounds, e.g. from formaldehyde, and amines having amino groups bound to carbon atoms of six-membered aromatic rings, with formation of methylene-diarylamines **[5]**
209/80 . by photochemical reactions; by using free radicals **[5]**
209/82 . Purification; Separation; Stabilisation; Use of additives **[5]**
209/84 . . Purification **[5]**
209/86 . . Separation **[5]**
209/88 . . . Separation of optical isomers **[5]**
209/90 . . Stabilisation; Use of additives **[5]**

211/00 Compounds containing amino groups bound to a carbon skeleton [5]

211/01 . having amino groups bound to acyclic carbon atoms **[5]**
211/02 . . of an acyclic saturated carbon skeleton **[5]**
211/03 . . . Monoamines **[5]**
211/04 . . . . Mono-, di- or tri-methylamine **[5]**
211/05 . . . . Mono-, di- or tri-ethylamine **[5]**
211/06 . . . . containing only n- or iso-propyl groups **[5]**
211/07 . . . . containing one, two or three alkyl groups, each having the same number of carbon atoms in excess of three **[5]**
211/08 . . . . containing alkyl groups having a different number of carbon atoms **[5]**
211/09 . . . Diamines **[5]**
211/10 . . . . Diaminoethanes **[5]**
211/11 . . . . Diaminopropanes **[5]**
211/12 . . . . 1,6-Diaminohexanes **[5]**
211/13 . . . Amines containing three or more amino groups bound to the carbon skeleton **[5]**
211/14 . . . Amines containing amino groups bound to at least two aminoalkyl groups, e.g. diethylenetriamines **[5]**
211/15 . . . the carbon skeleton being further substituted by halogen atoms or by nitro or nitroso groups **[5]**
211/16 . . of a saturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**
211/17 . . . containing only non-condensed rings **[5]**
211/18 . . . containing at least two amino groups bound to the carbon skeleton **[5]**
211/19 . . . containing condensed ring systems **[5]**
211/20 . . of an acyclic unsaturated carbon skeleton **[5]**
211/21 . . . Monoamines **[5]**
211/22 . . . containing at least two amino groups bound to the carbon skeleton **[5]**
211/23 . . . the carbon skeleton containing carbon-to-carbon triple bonds **[5]**
211/24 . . . the carbon skeleton being further substituted by halogen atoms or by nitro or nitroso groups **[5]**
211/25 . . of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**
211/26 . . of an unsaturated carbon skeleton containing at least one six-membered aromatic ring **[5]**
211/27 . . . having amino groups linked to the six-membered aromatic ring by saturated carbon chains **[5]**
211/28 . . . having amino groups linked to the six-membered aromatic ring by unsaturated carbon chains **[5]**
211/29 . . . the carbon skeleton being further substituted by halogen atoms or by nitro or nitroso groups **[5]**
211/30 . . . the six-membered aromatic ring being part of a condensed ring system formed by two rings **[5]**
211/31 . . . the six-membered aromatic ring being part of a condensed ring system formed by at least three rings **[5]**
211/32 . . . . containing dibenzocycloheptane or dibenzocycloheptene ring systems or condensed derivatives thereof **[5]**
211/33 . having amino groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
211/34 . . of a saturated carbon skeleton **[5]**
211/35 . . . containing only non-condensed rings **[5]**
211/36 . . . containing at least two amino groups bound to the carbon skeleton **[5]**
211/37 . . . being further substituted by halogen atoms or by nitro or nitroso groups **[5]**
211/38 . . . containing condensed ring systems **[5]**
211/39 . . of an unsaturated carbon skeleton **[5]**
211/40 . . . containing only non-condensed rings **[5]**
211/41 . . . containing condensed ring systems **[5]**
211/42 . . . . with six-membered aromatic rings being part of the condensed ring systems **[5]**

211/43 . having amino groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**
211/44 . . having amino groups bound to only one six-membered aromatic ring **[5]**
211/45 . . . Monoamines **[5]**
211/46 . . . . Aniline **[5]**
211/47 . . . . Toluidines; Homologues thereof **[5]**
211/48 . . . . N-alkylated amines **[5]**
211/49 . . . having at least two amino groups bound to the carbon skeleton **[5]**
211/50 . . . . with at least two amino groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**
211/51 . . . . . Phenylenediamines **[5]**
211/52 . . . the carbon skeleton being further substituted by halogen atoms or by nitro or nitroso groups **[5]**
211/53 . . . having the nitrogen atom of at least one of the amino groups further bound to a hydrocarbon radical substituted by amino groups **[5]**
211/54 . . having amino groups bound to two or three six-membered aromatic rings **[5]**
211/55 . . . Diphenylamines **[5]**
211/56 . . . the carbon skeleton being further substituted by halogen atoms or by nitro or nitroso groups **[5]**
211/57 . . having amino groups bound to carbon atoms of six-membered aromatic rings being part of condensed ring systems of the carbon skeleton **[5]**
211/58 . . . Naphthylamines; N-substituted derivatives thereof **[5]**
211/59 . . . the carbon skeleton being further substituted by halogen atoms or by nitro or nitroso groups **[5]**
211/60 . . . containing a ring other than a six-membered aromatic ring forming part of at least one of the condensed ring systems **[5]**
211/61 . . . with at least one of the condensed ring systems formed by three or more rings **[5]**
211/62 . Quaternary ammonium compounds **[5]**
211/63 . . having quaternised nitrogen atoms bound to acyclic carbon atoms **[5]**
211/64 . . having quaternised nitrogen atoms bound to carbon atoms of six-membered aromatic rings **[5]**
211/65 . Metal complexes of amines **[5]**

213/00 Preparation of compounds containing amino and hydroxy, amino and etherified hydroxy or amino and esterified hydroxy groups bound to the same carbon skeleton [5]

213/02 . by reactions involving the formation of amino groups from compounds containing hydroxy groups or etherified or esterified hydroxy groups **[5]**
213/04 . by reaction of ammonia or amines with olefin oxides or halohydrins **[5]**
213/06 . from hydroxy amines by reactions involving the etherification or esterification of hydroxy groups **[5]**
213/08 . by reactions not involving the formation of amino groups, hydroxy groups or etherified or esterified hydroxy groups **[5]**
213/10 . Separation; Purification; Stabilisation; Use of additives **[5]**

215/00 Compounds containing amino and hydroxy groups bound to the same carbon skeleton [5]

215/02 . having hydroxy groups and amino groups bound to acyclic carbon atoms of the same carbon skeleton **[5]**
215/04 . . the carbon skeleton being saturated **[5]**
215/06 . . . and acyclic **[5]**
215/08 . . . . with only one hydroxy group and one amino group bound to the carbon skeleton **[5]**
215/10 . . . . with one amino group and at least two hydroxy groups bound to the carbon skeleton **[5]**
215/12 . . . . the nitrogen atom of the amino group being further bound to hydrocarbon groups substituted by hydroxy groups **[5]**
215/14 . . . . the nitrogen atom of the amino group being further bound to hydrocarbon groups substituted by amino groups **[5]**
215/16 . . . . the nitrogen atom of the amino group being further bound to carbon atoms of six-membered aromatic rings **[5]**
215/18 . . . . with hydroxy groups and at least two amino groups bound to the carbon skeleton **[5]**
215/20 . . . the carbon skeleton being saturated and containing rings **[5]**
215/22 . . the carbon skeleton being unsaturated **[5]**
215/24 . . . and acyclic **[5]**
215/26 . . . and containing rings other than six-membered aromatic rings **[5]**
215/28 . . . and containing six-membered aromatic rings **[5]**
215/30 . . . . containing hydroxy groups and carbon atoms of six-membered aromatic rings bound to the same carbon atom of the carbon skeleton **[5]**
215/32 . . . . . containing hydroxy groups and carbon atoms of two six-membered aromatic rings bound to the same carbon atom of the carbon skeleton **[5]**
215/34 . . . . containing hydroxy groups and carbon atoms of six-membered aromatic rings bound to the same carbon atom of the carbon skeleton and at least one hydroxy group bound to another carbon atom of the carbon skeleton **[5]**
215/36 . . . . . 1-Aryl-2-amino-1,3-propane diols **[5]**
215/38 . . . . with rings other than six-membered aromatic rings being part of the carbon skeleton **[5]**
215/40 . . with quaternised nitrogen atoms bound to carbon atoms of the carbon skeleton **[5]**
215/42 . having amino groups or hydroxy groups bound to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**
215/44 . . bound to carbon atoms of the same ring or condensed ring system **[5]**
215/46 . having hydroxy groups bound to carbon atoms of at least one six-membered aromatic ring and amino groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**
215/48 . . with amino groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by carbon chains not further substituted by hydroxy groups **[5]**
215/50 . . . with amino groups and the six-membered aromatic ring, or the condensed ring system containing that ring, bound to the same carbon atom of the carbon chain **[5]**
215/52 . . . linked by carbon chains having two carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring **[5]**
215/54 . . . linked by carbon chains having at least three carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring **[5]**

215/56 . . with amino groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by carbon chains further substituted by hydroxy groups **[5]**

215/58 . . . with hydroxy groups and the six-membered aromatic ring, or the condensed ring system containing that ring, bound to the same carbon atom of the carbon chain **[5]**

215/60 . . . . the chain having two carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring **[5]**

215/62 . . . . the chain having at least three carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring **[5]**

215/64 . . with rings other than six-membered aromatic rings being part of the carbon skeleton **[5]**

215/66 . . with quaternised amino groups bound to the carbon skeleton **[5]**

215/68 . having amino groups bound to carbon atoms of six-membered aromatic rings and hydroxy groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**

215/70 . . with rings other than six-membered aromatic rings being part of the carbon skeleton **[5]**

215/72 . . with quaternised amino groups bound to the carbon skeleton **[5]**

215/74 . having hydroxy groups and amino groups bound to carbon atoms of six-membered aromatic rings of the same carbon skeleton **[5]**

215/76 . . of the same non-condensed six-membered aromatic ring **[5]**

215/78 . . . containing at least two hydroxy groups bound to the carbon skeleton **[5]**

215/80 . . . containing at least two amino groups bound to the carbon skeleton **[5]**

215/82 . . . having the nitrogen atom of at least one of the amino groups further bound to a carbon atom of another six-membered aromatic ring **[5]**

215/84 . . having amino groups bound to carbon atoms of six-membered aromatic rings being part of condensed ring systems **[5]**

215/86 . . . being formed by two rings **[5]**

215/88 . . . being formed by at least three rings **[5]**

215/90 . . with quaternised amino groups bound to the carbon skeleton **[5]**

217/00 Compounds containing amino and etherified hydroxy groups bound to the same carbon skeleton [5]

217/02 . having etherified hydroxy groups and amino groups bound to acyclic carbon atoms of the same carbon skeleton **[5]**

217/04 . . the carbon skeleton being acyclic and saturated **[5]**

217/06 . . . having only one etherified hydroxy group and one amino group bound to the carbon skeleton, which is not further substituted **[5]**

217/08 . . . . the oxygen atom of the etherified hydroxy group being further bound to an acyclic carbon atom **[5]**

217/10 . . . . . to an acyclic carbon atom of a hydrocarbon radical containing six-membered aromatic rings **[5]**

217/12 . . . . the oxygen atom of the etherified hydroxy group being further bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

217/14 . . . . the oxygen atom of the etherified hydroxy group being further bound to a carbon atom of a six-membered aromatic ring **[5]**

217/16 . . . . . the six-membered aromatic ring or condensed ring system containing that ring not being further substituted **[5]**

217/18 . . . . . the six-membered aromatic ring or condensed ring system containing that ring being further substituted **[5]**

217/20 . . . . . by halogen atoms, by trihalomethyl, nitro or nitroso groups, or by singly-bound oxygen atoms **[5]**

217/22 . . . . . by carbon atoms having at least two bonds to oxygen atoms **[5]**

217/24 . . . . . the six-membered aromatic ring being part of a condensed ring system containing rings other than six-membered aromatic rings **[5]**

217/26 . . . having only one etherified hydroxy group and one amino group bound to the carbon skeleton, which is further substituted by halogen atoms or by nitro or nitroso groups **[5]**

217/28 . . . having one amino group and at least two singly-bound oxygen atoms, with at least one being part of an etherified hydroxy group, bound to the carbon skeleton, e.g. ethers of polyhydroxy amines **[5]**

217/30 . . . . having the oxygen atom of at least one of the etherified hydroxy groups further bound to a carbon atom of a six-membered aromatic ring **[5]**

217/32 . . . . . the six-membered aromatic ring or condensed ring system containing that ring being further substituted **[5]**

217/34 . . . . . by halogen atoms, by trihalomethyl, nitro or nitroso groups, or by singly-bound oxygen atoms **[5]**

217/36 . . . . . by carbon atoms having at least two bonds to oxygen atoms **[5]**

217/38 . . . . . the six-membered aromatic ring being part of a condensed ring system containing rings other than six-membered aromatic rings **[5]**

217/40 . . . . having at least two singly-bound oxygen atoms, with at least one being part of an etherified hydroxy group, bound to the same carbon atom of the carbon skeleton, e.g. amino-ketals, ortho esters **[5]**

217/42 . . . having etherified hydroxy groups and at least two amino groups bound to the carbon skeleton **[5]**

217/44 . . the carbon skeleton being saturated and containing rings **[5]**

217/46 . . the carbon skeleton being acyclic and unsaturated **[5]**

217/48 . . the carbon skeleton being unsaturated and containing rings **[5]**

217/50 . . Ethers of hydroxy amines of undetermined structure, e.g. obtained by reactions of epoxides with hydroxy amines **[5]**

217/52 . having etherified hydroxy groups or amino groups bound to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**

217/54 . having etherified hydroxy groups bound to carbon atoms of at least one six-membered aromatic ring and amino groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**

217/56 . . with amino groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by carbon chains not further substituted by singly-bound oxygen atoms **[5]**

217/58 . . . with amino groups and the six-membered aromatic ring, or the condensed ring system containing that ring, bound to the same carbon atom of the carbon chain **[5]**

217/60 . . . linked by carbon chains having two carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring **[5]**

217/62 . . . linked by carbon chains having at least three carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring **[5]**

217/64 . . with amino groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by carbon chains further substituted by singly-bound oxygen atoms **[5]**

217/66 . . . with singly-bound oxygen atoms and six-membered aromatic rings bound to the same carbon atom of the carbon chain **[5]**

217/68 . . . . with singly-bound oxygen atoms, six-membered aromatic rings and amino groups bound to the same carbon atom of the carbon chain **[5]**

217/70 . . . . linked by carbon chains having two carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring **[5]**

217/72 . . . . linked by carbon chains having at least three carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring **[5]**

217/74 . . with rings other than six-membered aromatic rings being part of the carbon skeleton **[5]**

217/76 . having amino groups bound to carbon atoms of six-membered aromatic rings and etherified hydroxy groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**

217/78 . having amino groups and etherified hydroxy groups bound to carbon atoms of six-membered aromatic rings of the same carbon skeleton **[5]**

217/80 . . having amino groups and etherified hydroxy groups bound to carbon atoms of non-condensed six-membered aromatic rings **[5]**

217/82 . . . of the same non-condensed six-membered aromatic ring **[5]**

217/84 . . . . the oxygen atom of at least one of the etherified hydroxy groups being further bound to an acyclic carbon atom **[5]**

217/86 . . . . . to an acyclic carbon atom of a hydrocarbon radical containing six-membered aromatic rings **[5]**

217/88 . . . . the oxygen atom of at least one of the etherified hydroxy groups being further bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

217/90 . . . . the oxygen atom of at least one of the etherified hydroxy groups being further bound to a carbon atom of a six-membered aromatic ring, e.g. amino-diphenylethers **[5]**

217/92 . . . . the nitrogen atom of at least one of the amino groups being further bound to a carbon atom of a six-membered aromatic ring **[5]**

217/94 . . having amino groups bound to carbon atoms of six-membered aromatic rings being part of condensed ring systems and etherified hydroxy groups bound to carbon atoms of six-membered aromatic rings of the same carbon skeleton **[5]**

219/00 Compounds containing amino and esterified hydroxy groups bound to the same carbon skeleton [5]

219/02 . having esterified hydroxy groups and amino groups bound to acyclic carbon atoms of the same carbon skeleton **[5]**

219/04 . . the carbon skeleton being acyclic and saturated **[5]**

219/06 . . . having the hydroxy groups esterified by carboxylic acids having the esterifying carboxyl groups bound to hydrogen atoms or to acyclic carbon atoms of an acyclic saturated carbon skeleton **[5]**

219/08 . . . having at least one of the hydroxy groups esterified by a carboxylic acid having the esterifying carboxyl group bound to an acyclic carbon atom of an acyclic unsaturated carbon skeleton **[5]**

219/10 . . . having at least one of the hydroxy groups esterified by a carboxylic acid having the esterifying carboxyl group bound to an acyclic carbon atom of a carbon skeleton containing rings **[5]**

219/12 . . . having at least one of the hydroxy groups esterified by a carboxylic acid having the esterifying carboxyl group bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

219/14 . . . having at least one of the hydroxy groups esterified by a carboxylic acid having the esterifying carboxyl group bound to a carbon atom of a six-membered aromatic ring **[5]**

219/16 . . . having at least one of the hydroxy groups esterified by an inorganic acid or a derivative thereof **[5]**

219/18 . . the carbon skeleton being saturated and containing rings **[5]**

219/20 . . the carbon skeleton being unsaturated **[5]**

219/22 . . . and containing six-membered aromatic rings **[5]**

219/24 . having esterified hydroxy groups or amino groups bound to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**

219/26 . having esterified hydroxy groups bound to carbon atoms of at least one six-membered aromatic ring and amino groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**

219/28 . . having amino groups bound to acyclic carbon atoms of the carbon skeleton **[5]**

219/30 . . . with amino groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by carbon chains further substituted by singly-bound oxygen atoms **[5]**

219/32 . having amino groups bound to carbon atoms of six-membered aromatic rings and esterified hydroxy groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**

219/34 . having amino groups and esterified hydroxy groups bound to carbon atoms of six-membered aromatic rings of the same carbon skeleton **[5]**

221/00 Preparation of compounds containing amino groups and doubly-bound oxygen atoms bound to the same carbon skeleton [5]

223/00 Compounds containing amino and −CHO groups bound to the same carbon skeleton [5]

223/02 . having amino groups bound to acyclic carbon atoms of the carbon skeleton **[5]**

223/04 . having amino groups bound to carbon atoms of rings other than six-membered aromatic rings of the carbon skeleton **[5]**

223/06 . having amino groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**

225/00 Compounds containing amino groups and doubly-bound oxygen atoms bound to the same carbon skeleton, at least one of the doubly-bound oxygen atoms not being part of a −CHO group, e.g. amino ketones [5]

225/02 . having amino groups bound to acyclic carbon atoms of the carbon skeleton **[5]**

225/04 . . the carbon skeleton being saturated **[5]**

225/06 . . . and acyclic **[5]**

225/08 . . . and containing rings **[5]**

225/10 . . . . with doubly-bound oxygen atoms bound to carbon atoms not being part of rings **[5]**

225/12 . . . . with doubly-bound oxygen atoms bound to carbon atoms being part of rings **[5]**

225/14 . . the carbon skeleton being unsaturated **[5]**

225/16 . . . and containing six-membered aromatic rings **[5]**

225/18 . . . . the carbon skeleton containing also rings other than six-membered aromatic rings **[5]**

225/20 . having amino groups bound to carbon atoms of rings other than six-membered aromatic rings of the carbon skeleton **[5]**

225/22 . having amino groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**

225/24 . the carbon skeleton containing carbon atoms of quinone rings **[5]**

225/26 . . having amino groups bound to carbon atoms of quinone rings or of condensed ring systems containing quinone rings **[5]**

225/28 . . . of non-condensed quinone rings **[5]**

225/30 . . . of condensed quinone ring systems formed by two rings **[5]**

225/32 . . . of condensed quinone ring systems formed by at least three rings **[5]**

225/34 . . . . Amino anthraquinones **[5]**

225/36 . . . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**

227/00 Preparation of compounds containing amino and carboxyl groups bound to the same carbon skeleton [5]

227/02 . Formation of carboxyl groups in compounds containing amino groups, e.g. by oxidation of amino alcohols **[5]**

227/04 . Formation of amino groups in compounds containing carboxyl groups **[5]**

227/06 . . by addition or substitution reactions, without increasing the number of carbon atoms in the carbon skeleton of the acid **[5]**

227/08 . . . by reaction of ammonia or amines with acids containing functional groups **[5]**

227/10 . . with simultaneously increasing the number of carbon atoms in the carbon skeleton **[5]**

227/12 . Formation of amino and carboxyl groups **[5]**

227/14 . from compounds containing already amino and carboxyl groups or derivatives thereof **[5]**

227/16 . . by reactions not involving the amino or carboxyl groups **[5]**

227/18 . . by reactions involving amino or carboxyl groups, e.g. hydrolysis of esters or amides, by formation of halides, salts or esters **[5]**

227/20 . . . by hydrolysis of N-acylated amino acids or derivatives thereof, e.g. hydrolysis of carbamates **[5]**

227/22 . from lactams, cyclic ketones or cyclic oximes, e.g. by reaction involving Beckmann rearrangement **[5]**

227/24 . from hydantoins **[5]**

227/26 . from compounds containing carboxyl groups by reaction with HCN, or a salt thereof, and amines, or from aminonitriles **[5]**

227/28 . from natural products **[5]**

227/30 . Preparation of optical isomers **[5]**

227/32 . . by stereospecific synthesis **[5]**

227/34 . . by separation of optical isomers **[5]**

227/36 . Racemisation of optical isomers **[5]**

227/38 . Separation; Purification; Stabilisation; Use of additives (separation of optical isomers C07C 227/34) **[5]**

227/40 . . Separation; Purification **[5]**

227/42 . . . Crystallisation **[5]**

227/44 . . Stabilisation; Use of additives **[5]**

229/00 Compounds containing amino and carboxyl groups bound to the same carbon skeleton [5]

229/02 . having amino and carboxyl groups bound to acyclic carbon atoms of the same carbon skeleton **[5]**

229/04 . . the carbon skeleton being acyclic and saturated **[5]**

229/06 . . . having only one amino and one carboxyl group bound to the carbon skeleton **[5]**

229/08 . . . . the nitrogen atom of the amino group being further bound to hydrogen atoms **[5]**

229/10 . . . . the nitrogen atom of the amino group being further bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings **[5]**

229/12 . . . . . to carbon atoms of acyclic carbon skeletons **[5]**

229/14 . . . . . to carbon atoms of carbon skeletons containing rings **[5]**

229/16 . . . . . to carbon atoms of hydrocarbon radicals substituted by amino or carboxyl groups, e.g. ethylenediamine-tetra-acetic acid, iminodiacetic acids **[5]**

229/18 . . . . the nitrogen atom of the amino group being further bound to carbon atoms of six-membered aromatic rings **[5]**

229/20 . . . the carbon skeleton being further substituted by halogen atoms or by nitro or nitroso groups **[5]**

229/22 . . . the carbon skeleton being further substituted by oxygen atoms **[5]**

229/24 . . . having more than one carboxyl group bound to the carbon skeleton, e.g. aspartic acid **[5]**
229/26 . . . having more than one amino group bound to the carbon skeleton, e.g. lysine **[5]**
229/28 . . the carbon skeleton being saturated and containing rings **[5]**
229/30 . . the carbon skeleton being acyclic and unsaturated **[5]**
229/32 . . the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings **[5]**
229/34 . . the carbon skeleton containing six-membered aromatic rings **[5]**
229/36 . . . with at least one amino group and one carboxyl group bound to the same carbon atom of the carbon skeleton **[5]**
229/38 . having amino groups bound to acyclic carbon atoms and carboxyl groups bound to carbon atoms of six-membered aromatic rings of the same carbon skeleton **[5]**
229/40 . having amino groups bound to carbon atoms of at least one six-membered aromatic ring and carboxyl groups bound to acyclic carbon atoms of the same carbon skeleton **[5]**
229/42 . . with carboxyl groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by saturated carbon chains **[5]**
229/44 . . with carboxyl groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by unsaturated carbon chains **[5]**
229/46 . having amino or carboxyl groups bound to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton **[5]**
229/48 . . with amino groups and carboxyl groups bound to carbon atoms of the same non-condensed ring **[5]**
229/50 . . with amino groups and carboxyl groups bound to carbon atoms being part of the same condensed ring system **[5]**
229/52 . having amino and carboxyl groups bound to carbon atoms of six-membered aromatic rings of the same carbon skeleton **[5]**
229/54 . . with amino and carboxyl groups bound to carbon atoms of the same non-condensed six-membered aromatic ring **[5]**
229/56 . . . with amino and carboxyl groups bound in ortho- position **[5]**
229/58 . . . . having the nitrogen atom of at least one of the amino groups further bound to a carbon atom of a six-membered aromatic ring, e.g. N-phenyl-anthranilic acids **[5]**
229/60 . . . with amino and carboxyl groups bound in meta- or para- positions **[5]**
229/62 . . . with amino groups and at least two carboxyl groups bound to carbon atoms of the same six-membered aromatic ring **[5]**
229/64 . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**
229/66 . . . the carbon skeleton being further substituted by doubly-bound oxygen atoms **[5]**
229/68 . . with amino and carboxyl groups bound to carbon atoms of six-membered aromatic rings being part of the same condensed ring system **[5]**
229/70 . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**
229/72 . . . the carbon skeleton being further substituted by doubly-bound oxygen atoms **[5]**
229/74 . . . . the condensed ring system being formed by at least three rings, e.g. amino anthraquinone carboxylic acids **[5]**
229/76 . Metal complexes of amino carboxylic acids **[5]**

231/00 Preparation of carboxylic acid amides [5]
231/02 . from carboxylic acids or from esters, anhydrides, or halides thereof by reaction with ammonia or amines **[5]**
231/04 . from ketenes by reaction with ammonia or amines **[5]**
231/06 . from nitriles by transformation of cyano groups into carboxamide groups **[5]**
231/08 . from amides by reaction at nitrogen atoms of carboxamide groups **[5]**
231/10 . from compounds not provided for in groups C07C 231/02 to C07C 231/08 **[5]**
231/12 . by reactions not involving the formation of carboxamide groups **[5]**
231/14 . by formation of carboxamide groups together with reactions not involving the carboxamide groups **[5]**
231/16 . Preparation of optical isomers **[5]**
231/18 . . by stereospecific synthesis **[5]**
231/20 . . by separation of optical isomers **[5]**
231/22 . Separation; Purification; Stabilisation; Use of additives (separation of optical isomers C07C 231/20) **[5]**
231/24 . . Separation; Purification **[5]**

233/00 Carboxylic acid amides [5]
233/01 . having carbon atoms of carboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**
233/02 . . having nitrogen atoms of carboxamide groups bound to hydrogen atoms or to carbon atoms of unsubstituted hydrocarbon radicals **[5]**
233/03 . . . with carbon atoms of carboxamide groups bound to hydrogen atoms **[5]**
233/04 . . . with carbon atoms of carboxamide groups bound to carbon atoms of an acyclic saturated carbon skeleton **[5]**
233/05 . . . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**
233/06 . . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**
233/07 . . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**
233/08 . . . with carbon atoms of carboxamide groups bound to acyclic carbon atoms of a saturated carbon skeleton containing rings **[5]**
233/09 . . . with carbon atoms of carboxamide groups bound to carbon atoms of an acyclic unsaturated carbon skeleton **[5]**
233/10 . . . with carbon atoms of carboxamide groups bound to carbon atoms of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**
233/11 . . . with carbon atoms of carboxamide groups bound to carbon atoms of an unsaturated carbon skeleton containing six-membered aromatic rings **[5]**
233/12 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by halogen atoms or by nitro or nitroso groups **[5]**

233/13 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by an acyclic carbon atom **[5]**

233/14 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a ring other than a six-membered aromatic ring **[5]**

233/15 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a six-membered aromatic ring **[5]**

233/16 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by singly-bound oxygen atoms **[5]**

233/17 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by an acyclic carbon atom **[5]**

233/18 . . . . having the carbon atom of the carboxamide group bound to a hydrogen atom or to a carbon atom of an acyclic saturated carbon skeleton **[5]**

233/19 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of a saturated carbon skeleton containing rings **[5]**

233/20 . . . . having the carbon atom of the carboxamide group bound to a carbon atom of an acyclic unsaturated carbon skeleton **[5]**

233/21 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**

233/22 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of a carbon skeleton containing six-membered aromatic rings **[5]**

233/23 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a ring other than a six-membered aromatic ring **[5]**

233/24 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a six-membered aromatic ring **[5]**

233/25 . . . . having the carbon atom of the carboxamide group bound to a hydrogen atom or to a carbon atom of an acyclic saturated carbon skeleton **[5]**

233/26 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of a saturated carbon skeleton containing rings **[5]**

233/27 . . . . having the carbon atom of the carboxamide group bound to a carbon atom of an acyclic unsaturated carbon skeleton **[5]**

233/28 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**

233/29 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of a carbon skeleton containing six-membered aromatic rings **[5]**

233/30 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by doubly-bound oxygen atoms **[5]**

233/31 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by an acyclic carbon atom **[5]**

233/32 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a ring other than a six-membered aromatic ring **[5]**

233/33 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a six-membered aromatic ring **[5]**

233/34 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by amino groups **[5]**

233/35 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by an acyclic carbon atom **[5]**

233/36 . . . . having the carbon atom of the carboxamide group bound to a hydrogen atom or to a carbon atom of an acyclic saturated carbon skeleton **[5]**

233/37 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of a saturated carbon skeleton containing rings **[5]**

233/38 . . . . having the carbon atom of the carboxamide group bound to a carbon atom of an acyclic unsaturated carbon skeleton **[5]**

233/39 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**

233/40 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of a carbon skeleton containing six-membered aromatic rings **[5]**

233/41 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a ring other than a six-membered aromatic ring **[5]**

233/42 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a six-membered aromatic ring **[5]**

233/43 . . . . having the carbon atom of the carboxamide group bound to a hydrogen atom or to a carbon atom of a saturated carbon skeleton **[5]**

233/44 . . . . having the carbon atom of the carboxamide group bound to a carbon atom of an unsaturated carbon skeleton **[5]**

233/45 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**

233/46 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by an acyclic carbon atom **[5]**

233/47 . . . . having the carbon atom of the carboxamide group bound to a hydrogen atom or to a carbon atom of an acyclic saturated carbon skeleton **[5]**

233/48 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of a saturated carbon skeleton containing rings **[5]**

233/49 . . . . having the carbon atom of the carboxamide group bound to a carbon atom of an acyclic unsaturated carbon skeleton **[5]**

233/50 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**

233/51 . . . . having the carbon atom of the carboxamide group bound to an acyclic carbon atom of a carbon skeleton containing six-membered aromatic rings **[5]**

233/52 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a ring other than a six-membered aromatic ring **[5]**

233/53 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a six-membered aromatic ring **[5]**

233/54 . . . . having the carbon atom of the carboxamide group bound to a hydrogen atom or to a carbon atom of a saturated carbon skeleton **[5]**

233/55 . . . . having the carbon atom of the carboxamide group bound to a carbon atom of an unsaturated carbon skeleton **[5]**

233/56 . . having carbon atoms of carboxamide groups bound to carbon atoms of carboxyl groups, e.g. oxamides **[5]**

233/57 . having carbon atoms of carboxamide groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

233/58 . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to carbon atoms of unsubstituted hydrocarbon radicals **[5]**

233/59 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by halogen atoms or by nitro or nitroso groups **[5]**

233/60 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by singly-bound oxygen atoms **[5]**

233/61 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by doubly-bound oxygen atoms **[5]**

233/62 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by amino groups **[5]**

233/63 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**

233/64 . having carbon atoms of carboxamide groups bound to carbon atoms of six-membered aromatic rings **[5]**

233/65 . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to carbon atoms of unsubstituted hydrocarbon radicals **[5]**

233/66 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by halogen atoms or by nitro or nitroso groups **[5]**

233/67 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by singly-bound oxygen atoms **[5]**

233/68 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by an acyclic carbon atom **[5]**

233/69 . . . . of an acyclic saturated carbon skeleton **[5]**

233/70 . . . . of a saturated carbon skeleton containing rings **[5]**

233/71 . . . . of an acyclic unsaturated carbon skeleton **[5]**

233/72 . . . . of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**

233/73 . . . . of a carbon skeleton containing six-membered aromatic rings **[5]**

233/74 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a ring other than a six-membered aromatic ring **[5]**

233/75 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a six-membered aromatic ring **[5]**

233/76 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by doubly-bound oxygen atoms **[5]**

233/77 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by amino groups **[5]**

233/78 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by an acyclic carbon atom **[5]**

233/79 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a ring other than a six-membered aromatic ring **[5]**

233/80 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by a carbon atom of a six-membered aromatic ring **[5]**

233/81 . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**

233/82 . . . with the substituted hydrocarbon radical bound to the nitrogen atom of the carboxamide group by an acyclic carbon atom **[5]**

233/83 . . . . of an acyclic saturated carbon skeleton **[5]**

233/84 . . . . of a saturated carbon skeleton containing rings **[5]**

233/85 . . . . of an acyclic unsaturated carbon skeleton **[5]**

233/86 . . . . of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**

233/87 . . . . of a carbon skeleton containing six-membered aromatic rings **[5]**

233/88 . having nitrogen atoms of carboxamide groups bound to an acyclic carbon atom and to a carbon atom of a six-membered aromatic ring wherein at least one ortho-hydrogen atom has been replaced **[5]**

233/89 . having nitrogen atoms of carboxamide groups quaternised **[5]**

233/90 . having nitrogen atoms of carboxamide groups further acylated **[5]**

233/91 . . with carbon atoms of the carboxamide groups bound to acyclic carbon atoms **[5]**

233/92 . . with at least one carbon atom of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**

235/00 Carboxylic acid amides, the carbon skeleton of the acid part being further substituted by oxygen atoms [5]

235/02 . having carbon atoms of carboxamide groups bound to acyclic carbon atoms and singly-bound oxygen atoms bound to the same carbon skeleton **[5]**

235/04 . . the carbon skeleton being acyclic and saturated **[5]**

235/06 . . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

235/08 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by singly-bound oxygen atoms **[5]**

235/10 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**

235/12 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**

235/14 . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

235/16 . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**

235/18 . . . having at least one of the singly-bound oxygen atoms further bound to a carbon atom of a six-membered aromatic ring, e.g. phenoxyacetamides **[5]**

235/20 . . . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

235/22 . . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

235/24 . . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**

235/26 . . the carbon skeleton being saturated and containing rings **[5]**

235/28 . . the carbon skeleton being acyclic and unsaturated **[5]**

235/30 . . the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings **[5]**

235/32 . . the carbon skeleton containing six-membered aromatic rings **[5]**

235/34 . . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

235/36 . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

235/38 . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**

235/40 . having carbon atoms of carboxamide groups bound to carbon atoms of rings other than six-membered aromatic rings and singly-bound oxygen atoms bound to the same carbon skeleton **[5]**

235/42 . having carbon atoms of carboxamide groups bound to carbon atoms of six-membered aromatic rings and singly-bound oxygen atoms bound to the same carbon skeleton **[5]**

235/44 . . with carbon atoms of carboxamide groups and singly-bound oxygen atoms bound to carbon atoms of the same non-condensed six-membered aromatic ring **[5]**

235/46 . . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

235/48 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by singly-bound oxygen atoms **[5]**

235/50 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**

235/52 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**

235/54 . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

235/56 . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**

235/58 . . . with carbon atoms of carboxamide groups and singly-bound oxygen atoms, bound in ortho-position to carbon atoms of the same non-condensed six-membered aromatic ring **[5]**

235/60 . . . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

235/62 . . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

235/64 . . . . having the nitrogen atom of at least one of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**

235/66 . . with carbon atoms of carboxamide groups bound to carbon atoms of six-membered aromatic rings being part of condensed ring systems and singly-bound oxygen atoms, bound to the same carbon skeleton **[5]**

235/68 . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom and to a carbon atom of a six-membered aromatic ring wherein at least one ortho-hydrogen atom has been replaced **[5]**

235/70 . having carbon atoms of carboxamide groups and doubly-bound oxygen atoms bound to the same carbon skeleton **[5]**

235/72 . . with the carbon atoms of the carboxamide groups bound to acyclic carbon atoms **[5]**

235/74 . . . of a saturated carbon skeleton **[5]**

235/76 . . . of an unsaturated carbon skeleton **[5]**

235/78 . . . . the carbon skeleton containing rings **[5]**

235/80 . . . having carbon atoms of carboxamide groups and keto groups bound to the same carbon atom, e.g. acetoacetamides **[5]**

235/82 . . with the carbon atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

235/84 . . with the carbon atom of at least one of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**

235/86 . having the nitrogen atom of at least one of the carboxamide groups quaternised **[5]**

235/88 . having the nitrogen atom of at least one of the carboxamide groups further acylated **[5]**

237/00 Carboxylic acid amides, the carbon skeleton of the acid part being further substituted by amino groups [5]

237/02 . having the carbon atoms of the carboxamide groups bound to acyclic carbon atoms of the carbon skeleton **[5]**

237/04 . . the carbon skeleton being acyclic and saturated **[5]**

237/06 . . . having the nitrogen atoms of the carboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

237/08 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by singly-bound oxygen atoms **[5]**

237/10 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**

237/12 . . . having the nitrogen atom of at least one of the carboxamide groups bound to an acyclic carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**

237/14 . . the carbon skeleton being saturated and containing rings **[5]**

237/16 . . the carbon skeleton being acyclic and unsaturated **[5]**

237/18 . . the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings **[5]**

237/20 . . the carbon skeleton containing six-membered aromatic rings **[5]**

237/22 . . having nitrogen atoms of amino groups bound to the carbon skeleton of the acid part, further acylated **[5]**

237/24 . having the carbon atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring of the carbon skeleton **[5]**

237/26 . . of a ring being part of a condensed ring system formed by at least four rings, e.g. tetracycline **[5]**

237/28 . having the carbon atom of at least one of the carboxamide groups bound to a carbon atom of a non-condensed six-membered aromatic ring of the carbon skeleton **[5]**

237/30 . . having the nitrogen atom of the carboxamide group bound to hydrogen atoms or to acyclic carbon atoms **[5]**

237/32 . . having the nitrogen atom of the carboxamide group bound to an acyclic carbon atom of a hydrocarbon radical substituted by oxygen atoms **[5]**

237/34 . . having the nitrogen atom of the carboxamide group bound to an acyclic carbon atom of a hydrocarbon radical substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**

237/36 . . having the nitrogen atom of the carboxamide group bound to an acyclic carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**

237/38 . . having the nitrogen atom of the carboxamide group bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

237/40 . . having the nitrogen atom of the carboxamide group bound to a carbon atom of a six-membered aromatic ring **[5]**

237/42 . . having nitrogen atoms of amino groups bound to the carbon skeleton of the acid part, further acylated **[5]**

237/44 . . having carbon atoms of carboxamide groups, amino groups and singly-bound oxygen atoms bound to carbon atoms of the same non-condensed six-membered aromatic ring **[5]**

237/46 . . having carbon atoms of carboxamide groups, amino groups and at least three atoms of bromine or iodine, bound to carbon atoms of the same non-condensed six-membered aromatic ring **[5]**

237/48 . having the carbon atom of at least one of the carboxamide groups bound to a carbon atom of a six-membered aromatic ring being part of a condensed ring system of the same carbon skeleton **[5]**

237/50 . having the nitrogen atom of at least one of the carboxamide groups quaternised **[5]**

237/52 . having the nitrogen atom of at least one of the carboxamide groups further acylated **[5]**

239/00 Compounds containing nitrogen-to-halogen bonds; Hydroxylamino compounds or ethers or esters thereof [5]

239/02 . Compounds containing nitrogen-to-halogen bonds **[5]**

239/04 . . N-halogenated amines **[5]**

239/06 . . N-halogenated carboxamides **[5]**

239/08 . Hydroxylamino compounds or their ethers or esters **[5]**

239/10 . . having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of unsubstituted hydrocarbon radicals or of hydrocarbon radicals substituted by halogen atoms or by nitro or nitroso groups **[5]**

239/12 . . having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen atoms **[5]**

239/14 . . having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of hydrocarbon radicals substituted by doubly-bound oxygen atoms **[5]**

239/16 . . having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of hydrocarbon radicals substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**

239/18 . . having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of hydrocarbon radicals substituted by carboxyl groups **[5]**

239/20 . . having oxygen atoms of hydroxylamino groups etherified **[5]**

239/22 . . having oxygen atoms of hydroxylamino groups esterified **[5]**

241/00 Preparation of compounds containing chains of nitrogen atoms singly-bound to each other, e.g. hydrazines, triazanes [5]

241/02 . Preparation of hydrazines **[5]**

241/04 . Preparation of hydrazides **[5]**

243/00 Compounds containing chains of nitrogen atoms singly-bound to each other, e.g. hydrazines, triazanes [5]

243/02 . N-nitro compounds **[5]**
243/04 . N-nitroso compounds **[5]**
243/06 . . N-nitroso-amines **[5]**
243/08 . . N-nitroso-carboxamides **[5]**
243/10 . Hydrazines **[5]**
243/12 . . having nitrogen atoms of hydrazine groups bound to acyclic carbon atoms **[5]**
243/14 . . . of a saturated carbon skeleton **[5]**
243/16 . . . of an unsaturated carbon skeleton **[5]**
243/18 . . . . containing rings **[5]**
243/20 . . having nitrogen atoms of hydrazine groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
243/22 . . having nitrogen atoms of hydrazine groups bound to carbon atoms of six-membered aromatic rings **[5]**
243/24 . Hydrazines having nitrogen atoms of hydrazine groups acylated by carboxylic acids **[5]**
243/26 . . with acylating carboxyl groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**
243/28 . . . to hydrogen atoms or to carbon atoms of a saturated carbon skeleton **[5]**
243/30 . . . to carbon atoms of an unsaturated carbon skeleton **[5]**
243/32 . . . . the carbon skeleton containing rings **[5]**
243/34 . . . to carbon atoms of a carbon skeleton further substituted by nitrogen atoms **[5]**
243/36 . . with acylating carboxyl groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
243/38 . . with acylating carboxyl groups bound to carbon atoms of six-membered aromatic rings **[5]**
243/40 . Hydrazines having nitrogen atoms of hydrazine groups being quaternised **[5]**
243/42 . Hydrazines having nitrogen atoms of hydrazine groups further singly-bound to hetero atoms **[5]**

245/00 Compounds containing chains of at least two nitrogen atoms with at least one nitrogen-to-nitrogen multiple bond (azoxy compound C07C 291/08) **[5]**

245/02 . Azo compounds, i.e. compounds having the free valencies of $-N=N-$ groups attached to different atoms, e.g. diazohydroxides **[5]**
245/04 . . with nitrogen atoms of azo groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings **[5]**
245/06 . . with nitrogen atoms of azo groups bound to carbon atoms of six-membered aromatic rings **[5]**
245/08 . . . with the two nitrogen atoms of azo groups bound to carbon atoms of six-membered aromatic rings, e.g. azobenzene **[5]**
245/10 . . . with nitrogen atoms of azo groups bound to carbon atoms of six-membered aromatic rings being part of condensed ring systems **[5]**
245/12 . Diazo compounds, i.e. compounds having the free valencies of $\rangle N_2$ groups attached to the same carbon atom **[5]**
245/14 . . having diazo groups bound to acyclic carbon atoms of a carbon skeleton **[5]**
245/16 . . . Diazomethane **[5]**
245/18 . . . the carbon skeleton being further substituted by carboxyl groups **[5]**
245/20 . Diazonium compounds **[5]**
245/22 . containing chains of three or more nitrogen atoms with one or more nitrogen-to-nitrogen double bonds **[5]**
245/24 . . Chains of only three nitrogen atoms, e.g. diazoamines **[5]**

247/00 Compounds containing azido groups [5]

247/02 . with azido groups bound to acyclic carbon atoms of a carbon skeleton **[5]**
247/04 . . being saturated **[5]**
247/06 . . . and containing rings **[5]**
247/08 . . being unsaturated **[5]**
247/10 . . . and containing rings **[5]**
247/12 . . being further substituted by carboxyl groups **[5]**
247/14 . with azido groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
247/16 . with azido groups bound to carbon atoms of six-membered aromatic rings of a carbon skeleton **[5]**
247/18 . . being further substituted by carboxyl groups **[5]**
247/20 . with azido groups acylated by carboxylic acids **[5]**
247/22 . . with the acylating carboxyl groups bound to hydrogen atoms, to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings **[5]**
247/24 . . with at least one of the acylating carboxyl groups bound to a carbon atom of a six-membered aromatic ring **[5]**

249/00 Preparation of compounds containing nitrogen atoms doubly-bound to a carbon skeleton (of diazo compounds C07C 245/12) **[5]**

249/02 . of compounds containing imino groups **[5]**
249/04 . of oximes **[5]**
249/06 . . by nitrosation of hydrocarbons or substituted hydrocarbons **[5]**
249/08 . . by reaction of hydroxylamines with carbonyl compounds **[5]**
249/10 . . from nitro compounds or salts thereof **[5]**
249/12 . . by reactions not involving the formation of oxyimino groups **[5]**
249/14 . . Separation; Purification; Stabilisation; Use of additives **[5]**
249/16 . of hydrazones **[5]**

251/00 Compounds containing nitrogen atoms doubly-bound to a carbon skeleton (diazo compounds C07C 245/12) **[5]**

251/02 . containing imino groups **[5]**
251/04 . . having carbon atoms of imino groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**
251/06 . . . to carbon atoms of a saturated carbon skeleton **[5]**
251/08 . . . . being acyclic **[5]**
251/10 . . . to carbon atoms of an unsaturated carbon skeleton **[5]**
251/12 . . . . being acyclic **[5]**
251/14 . . . . containing rings other than six-membered aromatic rings **[5]**
251/16 . . . . containing six-membered aromatic rings **[5]**
251/18 . . having carbon atoms of imino groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
251/20 . . having carbon atoms of imino groups being part of rings other than six-membered aromatic rings **[5]**
251/22 . . . Quinone imines **[5]**
251/24 . . having carbon atoms of imino groups bound to carbon atoms of six-membered aromatic rings **[5]**

251/26 . . having nitrogen atoms of imino groups further bound to halogen atoms **[5]**
251/28 . . having nitrogen atoms of imino groups acylated **[5]**
251/30 . . having nitrogen atoms of imino groups quaternised **[5]**
251/32 . Oximes **[5]**
251/34 . . with oxygen atoms of oxyimino groups bound to hydrogen atoms or to carbon atoms of unsubstituted hydrocarbon radicals **[5]**
251/36 . . . with the carbon atoms of the oxyimino groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**
251/38 . . . . to carbon atoms of a saturated carbon skeleton **[5]**
251/40 . . . . to carbon atoms of an unsaturated carbon skeleton **[5]**
251/42 . . . with the carbon atom of at least one of the oxyimino groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**
251/44 . . . with the carbon atom of at least one of the oxyimino groups being part of a ring other than a six-membered aromatic ring **[5]**
251/46 . . . . Quinone oximes **[5]**
251/48 . . . with the carbon atom of at least one of the oxyimino groups bound to a carbon atom of a six-membered aromatic ring **[5]**
251/50 . . having oxygen atoms of oxyimino groups bound to carbon atoms of substituted hydrocarbon radicals **[5]**
251/52 . . . of hydrocarbon radicals substituted by halogen atoms or by nitro or nitroso groups **[5]**
251/54 . . . of hydrocarbon radicals substituted by singly-bound oxygen atoms **[5]**
251/56 . . . of hydrocarbon radicals substituted by doubly-bound oxygen atoms **[5]**
251/58 . . . of hydrocarbon radicals substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**
251/60 . . . of hydrocarbon radicals substituted by carboxyl groups **[5]**
251/62 . . having oxygen atoms of oxyimino groups esterified **[5]**
251/64 . . . by carboxylic acids **[5]**
251/66 . . . . with the esterifying carboxyl groups bound to hydrogen atoms, to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings **[5]**
251/68 . . . . with at least one of the esterifying carboxyl groups bound to a carbon atom of a six-membered aromatic ring **[5]**
251/70 . . Metal complexes of oximes **[5]**
251/72 . Hydrazones **[5]**
251/74 . . having doubly-bound carbon atoms of hydrazone groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**
251/76 . . . to carbon atoms of a saturated carbon skeleton **[5]**
251/78 . . . to carbon atoms of an unsaturated carbon skeleton **[5]**
251/80 . . . . the carbon skeleton containing rings **[5]**
251/82 . . having doubly-bound carbon atoms of hydrazone groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
251/84 . . having doubly-bound carbon atoms of hydrazone groups being part of rings other than six-membered aromatic rings **[5]**
251/86 . . having doubly-bound carbon atoms of hydrazone groups bound to carbon atoms of six-membered aromatic rings **[5]**
251/88 . . having also the other nitrogen atom doubly-bound to a carbon atom, e.g. azines **[5]**

253/00 **Preparation of carboxylic acid nitriles** (of cyanogen or compounds thereof C01C 3/00) **[5]**
253/02 . by reaction of nitrogen oxide with organic compounds **[5]**
253/04 . by reaction of cyanogen halides, e.g. ClCN, with organic compounds **[5]**
253/06 . from N-formylated amino compounds **[5]**
253/08 . by addition of hydrogen cyanide or salts thereof to unsaturated compounds **[5]**
253/10 . . to compounds containing carbon-to-carbon double bonds **[5]**
253/12 . . to compounds containing carbon-to-carbon triple bonds **[5]**
253/14 . by reaction of cyanides with halogen-containing compounds with replacement of halogen atoms by cyano groups **[5]**
253/16 . by reaction of cyanides with lactones or compounds containing hydroxy groups or etherified or esterified hydroxy groups **[5]**
253/18 . by reaction of ammonia or amines with compounds containing carbon-to-carbon multiple bonds other than in six-membered aromatic rings **[5]**
253/20 . by dehydratation of carboxylic acid amides **[5]**
253/22 . by reaction of ammonia with carboxylic acids with replacement of carboxyl groups by cyano groups **[5]**
253/24 . by ammoxidation of hydrocarbons or substituted hydrocarbons **[5]**
253/26 . . containing carbon-to-carbon multiple bonds, e.g. unsaturated aldehydes **[5]**
253/28 . . containing six-membered aromatic rings, e.g. styrene **[5]**
253/30 . by reactions not involving the formation of cyano groups **[5]**
253/32 . Separation; Purification; Stabilisation; Use of additives **[5]**
253/34 . . Separation; Purification **[5]**

255/00 **Carboxylic acid nitriles** (cyanogen or compounds thereof C01C 3/00) **[5]**
255/01 . having cyano groups bound to acyclic carbon atoms **[5]**
255/02 . . of an acyclic and saturated carbon skeleton **[5]**
255/03 . . . Mononitriles **[5]**
255/04 . . . containing two cyano groups bound to the carbon skeleton **[5]**
255/05 . . . containing at least three cyano groups bound to the carbon skeleton **[5]**
255/06 . . of an acyclic and unsaturated carbon skeleton **[5]**
255/07 . . . Mononitriles **[5]**
255/08 . . . . Acrylonitrile; Methacrylonitrile **[5]**
255/09 . . . containing at least two cyano groups bound to the carbon skeleton **[5]**
255/10 . . containing cyano groups and halogen atoms, or nitro or nitroso groups, bound to the same acyclic carbon skeleton **[5]**
255/11 . . containing cyano groups and singly-bound oxygen atoms bound to the same saturated acyclic carbon skeleton **[5]**

255/12 . . . containing cyano groups and hydroxy groups bound to the carbon skeleton **[5]**
255/13 . . . containing cyano groups and etherified hydroxy groups bound to the carbon skeleton **[5]**
255/14 . . . containing cyano groups and esterified hydroxy groups bound to the carbon skeleton **[5]**
255/15 . . containing cyano groups and singly-bound oxygen atoms bound to the same unsaturated acyclic carbon skeleton **[5]**
255/16 . . containing cyano groups and singly-bound oxygen atoms bound to the same carbon atom of an acyclic carbon skeleton **[5]**
255/17 . . containing cyano groups and doubly-bound oxygen atoms bound to the same acyclic carbon skeleton **[5]**
255/18 . . containing cyano groups bound to carbon atoms of carboxyl groups **[5]**
255/19 . . containing cyano groups and carboxyl groups, other than cyano groups, bound to the same saturated acyclic carbon skeleton **[5]**
255/20 . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**
255/21 . . . the carbon skeleton being further substituted by doubly-bound oxygen atoms **[5]**
255/22 . . . containing cyano groups and at least two carboxyl groups bound to the carbon skeleton **[5]**
255/23 . . containing cyano groups and carboxyl groups, other than cyano groups, bound to the same unsaturated acyclic carbon skeleton **[5]**
255/24 . . containing cyano groups and singly-bound nitrogen atoms, not being further bound to other hetero atoms, bound to the same saturated acyclic carbon skeleton **[5]**
255/25 . . . Aminoacetonitriles **[5]**
255/26 . . . containing cyano groups, amino groups and singly-bound oxygen atoms bound to the carbon skeleton **[5]**
255/27 . . . containing cyano groups, amino groups and doubly-bound oxygen atoms bound to the carbon skeleton **[5]**
255/28 . . . containing cyano groups, amino groups and carboxyl groups, other than cyano groups, bound to the carbon skeleton **[5]**
255/29 . . . containing cyano groups and acylated amino groups bound to the carbon skeleton **[5]**
255/30 . . containing cyano groups and singly-bound nitrogen atoms, not being further bound to other hetero atoms, bound to the same unsaturated acyclic carbon skeleton **[5]**
255/31 . . having cyano groups bound to acyclic carbon atoms of a carbon skeleton containing rings other than six-membered aromatic rings **[5]**
255/32 . . having cyano groups bound to acyclic carbon atoms of a carbon skeleton containing at least one six-membered aromatic ring **[5]**
255/33 . . . with cyano groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by saturated carbon chains **[5]**
255/34 . . . with cyano groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by unsaturated carbon chains **[5]**
255/35 . . . the carbon skeleton being further substituted by halogen atoms, or by nitro or nitroso groups **[5]**
255/36 . . . the carbon skeleton being further substituted by hydroxy groups **[5]**
255/37 . . . the carbon skeleton being further substituted by etherified hydroxy groups **[5]**
255/38 . . . the carbon skeleton being further substituted by esterified hydroxy groups **[5]**
255/39 . . . . with hydroxy groups esterified by derivatives of 2,2-dimethylcyclopropane carboxylic acids, e.g. chrysanthemumic acids **[5]**
255/40 . . . the carbon skeleton being further substituted by doubly-bound oxygen atoms **[5]**
255/41 . . . the carbon skeleton being further substituted by carboxyl groups, other than cyano groups **[5]**
255/42 . . . the carbon skeleton being further substituted by singly-bound nitrogen atoms, not being further bound to other hetero atoms **[5]**
255/43 . . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**
255/44 . . . . at least one of the singly-bound nitrogen atoms being acylated **[5]**
255/45 . having cyano groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
255/46 . . to carbon atoms of non-condensed rings **[5]**
255/47 . . to carbon atoms of rings being part of condensed ring systems **[5]**
255/48 . . to carbon atoms of 2,2-dimethylcyclopropane rings, e.g. nitrile of chrysanthemumic acids **[5]**
255/49 . having cyano groups bound to carbon atoms of six-membered aromatic rings of a carbon skeleton **[5]**
255/50 . . to carbon atoms of non-condensed six-membered aromatic rings **[5]**
255/51 . . . containing at least two cyano groups bound to the carbon skeleton **[5]**
255/52 . . to carbon atoms of six-membered aromatic rings being part of condensed ring systems **[5]**
255/53 . . containing cyano groups and hydroxy groups bound to the carbon skeleton **[5]**
255/54 . . containing cyano groups and etherified hydroxy groups bound to the carbon skeleton **[5]**
255/55 . . containing cyano groups and esterified hydroxy groups bound to the carbon skeleton **[5]**
255/56 . . containing cyano groups and doubly-bound oxygen atoms bound to the carbon skeleton **[5]**
255/57 . . containing cyano groups and carboxyl groups, other than cyano groups, bound to the carbon skeleton **[5]**
255/58 . . containing cyano groups and singly-bound nitrogen atoms, not being further bound to other hetero atoms, bound to the carbon skeleton **[5]**
255/59 . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**
255/60 . . . at least one of the singly-bound nitrogen atoms being acylated **[5]**
255/61 . containing cyano groups and nitrogen atoms being part of imino groups bound to the same carbon skeleton **[5]**
255/62 . containing cyano groups and oxygen atoms being part of oxyimino groups bound to the same carbon skeleton **[5]**
255/63 . containing cyano groups and nitrogen atoms further bound to other hetero atoms, other than oxygen atoms of nitro or nitroso groups, bound to the same carbon skeleton **[5]**
255/64 . . with the nitrogen atoms further bound to oxygen atoms **[5]**
255/65 . . with the nitrogen atoms further bound to nitrogen atoms **[5]**

255/66 . . . having cyano groups and nitrogen atoms being part of hydrazine or hydrazone groups bound to the same carbon skeleton **[5]**

255/67 . . . having cyano groups and azido groups bound to the same carbon skeleton **[5]**

257/00 Compounds containing carboxyl groups, the doubly-bound oxygen atom of a carboxyl group being replaced by a doubly-bound nitrogen atom, this nitrogen atom not being further bound to an oxygen atom, e.g. imino-ethers, amidines [5]

257/02 . with replacement of the other oxygen atom of the carboxyl group by halogen atoms, e.g. imino-halides **[5]**

257/04 . without replacement of the other oxygen atom of the carboxyl group, e.g. imino-ethers **[5]**

257/06 . . having carbon atoms of imino-carboxyl groups bound to hydrogen atoms, to acyclic carbon atoms, or to carbon atoms of rings other than six-membered aromatic rings **[5]**

257/08 . . having carbon atoms of imino-carboxyl groups bound to carbon atoms of six-membered aromatic rings **[5]**

257/10 . with replacement of the other oxygen atom of the carboxyl group by nitrogen atoms, e.g. amidines **[5]**

257/12 . . having carbon atoms of amidino groups bound to hydrogen atoms **[5]**

257/14 . . having carbon atoms of amidino groups bound to acyclic carbon atoms **[5]**

257/16 . . having carbon atoms of amidino groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

257/18 . . having carbon atoms of amidino groups bound to carbon atoms of six-membered aromatic rings **[5]**

257/20 . . having nitrogen atoms of amidino groups acylated **[5]**

257/22 . . having nitrogen atoms of amidino groups further bound to nitrogen atoms, e.g. hydrazidines **[5]**

259/00 Compounds containing carboxyl groups, an oxygen atom of a carboxyl group being replaced by a nitrogen atom, this nitrogen atom being further bound to an oxygen atom and not being part of nitro or nitroso groups [5]

259/02 . with replacement of the other oxygen atom of the carboxyl group by halogen atoms **[5]**

259/04 . without replacement of the other oxygen atom of the carboxyl group, e.g. hydroxamic acids **[5]**

259/06 . . having carbon atoms of hydroxamic groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

259/08 . . having carbon atoms of hydroxamic groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

259/10 . . having carbon atoms of hydroxamic groups bound to carbon atoms of six-membered aromatic rings **[5]**

259/12 . with replacement of the other oxygen atom of the carboxyl group by nitrogen atoms, e.g. N-hydroxyamidines **[5]**

259/14 . . having carbon atoms of hydroxyamidine groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

259/16 . . having carbon atoms of hydroxyamidine groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

259/18 . . having carbon atoms of hydroxyamidine groups bound to carbon atoms of six-membered aromatic rings **[5]**

259/20 . . with at least one nitrogen atom of hydroxyamidine groups bound to another nitrogen atom **[5]**

261/00 Derivatives of cyanic acid [5]

261/02 . Cyanates **[5]**

261/04 . Cyanamides (unsubstituted cyanamide C01C 3/16) **[5]**

263/00 Preparation of derivatives of isocyanic acid [5]

263/02 . by reaction of halides with isocyanic acid or its derivatives **[5]**

263/04 . from or via carbamates or carbamoyl halides **[5]**

263/06 . from or via ureas **[5]**

263/08 . from or via heterocyclic compounds, e.g. pyrolysis of furoxans **[5]**

263/10 . by reaction of amines with carbonyl halides, e.g. with phosgene **[5]**

263/12 . from or via nitrogen analogues of carboxylic acids, e.g. from hydroxamic acids, involving a Hofmann, Curtius or Lossen-type rearrangement (C07C 209/56 takes precedence) **[5]**

263/14 . by catalytic reaction of nitro compounds with carbon monoxide **[5]**

263/16 . by reactions not involving the formation of isocyanate groups **[5]**

263/18 . Separation; Purification; Stabilisation; Use of additives **[5]**

263/20 . . Separation; Purification **[5]**

265/00 Derivatives of isocyanic acid [5]

265/02 . having isocyanate groups bound to acyclic carbon atoms **[5]**

265/04 . . of a saturated carbon skeleton **[5]**

265/06 . . of an unsaturated carbon skeleton **[5]**

265/08 . . . the carbon skeleton containing rings **[5]**

265/10 . having isocyanate groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

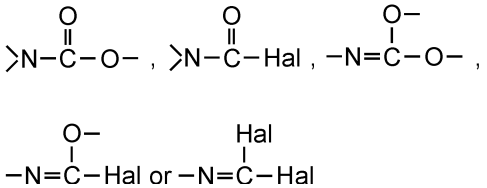
265/12 . having isocyanate groups bound to carbon atoms of six-membered aromatic rings **[5]**

265/14 . containing at least two isocyanate groups bound to the same carbon skeleton **[5]**

265/16 . having isocyanate groups acylated **[5]**

267/00 Carbodiimides [5]

269/00 Preparation of derivatives of carbamic acid, i.e. compounds containing any of the groups



the nitrogen atom not being part of nitro or nitroso groups [5]

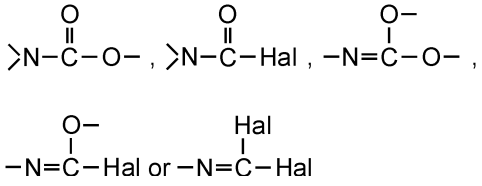
269/02 . from isocyanates with formation of carbamate groups **[5]**

269/04 . from amines with formation of carbamate groups **[5]**

269/06 . by reactions not involving the formation of carbamate groups **[5]**

269/08 . Separation; Purification; Stabilisation; Use of additives **[5]**

271/00 Derivatives of carbamic acid, i.e. compounds containing any of the groups



the nitrogen atom not being part of nitro or nitroso groups [5]

271/02 . Carbamic acids; Salts of carbamic acids (unsubstituted carbamic acid or salts thereof C01B 21/12) **[5]**

271/04 . Carbamic acid halides **[5]**

271/06 . Esters of carbamic acids **[5]**

271/08 . . having oxygen atoms of carbamate groups bound to acyclic carbon atoms **[5]**

271/10 . . . with the nitrogen atoms of the carbamate groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

271/12 . . . . to hydrogen atoms or to carbon atoms of unsubstituted hydrocarbon radicals **[5]**

271/14 . . . . to carbon atoms of hydrocarbon radicals substituted by halogen atoms or by nitro or nitroso groups **[5]**

271/16 . . . . to carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen atoms **[5]**

271/18 . . . . to carbon atoms of hydrocarbon radicals substituted by doubly-bound oxygen atoms **[5]**

271/20 . . . . to carbon atoms of hydrocarbon radicals substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**

271/22 . . . . to carbon atoms of hydrocarbon radicals substituted by carboxyl groups **[5]**

271/24 . . . with the nitrogen atom of at least one of the carbamate groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

271/26 . . . with the nitrogen atom of at least one of the carbamate groups bound to a carbon atom of a six-membered aromatic ring **[5]**

271/28 . . . . to a carbon atom of a non-condensed six-membered aromatic ring **[5]**

271/30 . . . . to a carbon atom of a six-membered aromatic ring being part of a condensed ring system **[5]**

271/32 . . having oxygen atoms of carbamate groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

271/34 . . . with the nitrogen atoms of the carbamate groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

271/36 . . . with the nitrogen atom of at least one of the carbamate groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

271/38 . . . with the nitrogen atom of at least one of the carbamate groups bound to a carbon atom of a six-membered aromatic ring **[5]**

271/40 . . having oxygen atoms of carbamate groups bound to carbon atoms of six-membered aromatic rings **[5]**

271/42 . . . with the nitrogen atoms of the carbamate groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

271/44 . . . . to hydrogen atoms or to carbon atoms of unsubstituted hydrocarbon radicals **[5]**

271/46 . . . . to carbon atoms of hydrocarbon radicals substituted by halogen atoms or by nitro or nitroso groups **[5]**

271/48 . . . . to carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen atoms **[5]**

271/50 . . . . to carbon atoms of hydrocarbon radicals substituted by doubly-bound oxygen atoms **[5]**

271/52 . . . . to carbon atoms of hydrocarbon radicals substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**

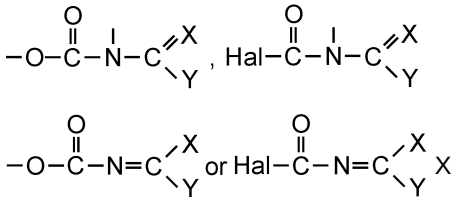
271/54 . . . . to carbon atoms of hydrocarbon radicals substituted by carboxyl groups **[5]**

271/56 . . . with the nitrogen atom of at least one of the carbamate groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

271/58 . . . with the nitrogen atom of at least one of the carbamate groups bound to a carbon atom of a six-membered aromatic ring **[5]**

271/60 . having oxygen atoms of carbamate groups bound to nitrogen atoms **[5]**

271/62 . Compounds containing any of the groups

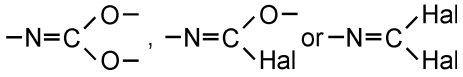


being a hetero atom, Y being any atom, e.g. N-acylcarbamates **[5]**

271/64 . . Y being a hydrogen or a carbon atom, e.g. benzoylcarbamates **[5]**

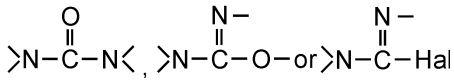
271/66 . . Y being a hetero atom **[5]**

271/68 . Compounds containing any of the groups



[5]

273/00 Preparation of urea or its derivatives, i.e. compounds containing any of the groups



the nitrogen atoms not being part of nitro or nitroso groups [5]

273/02 . of urea, its salts, complexes or addition compounds **[5]**

273/04 . . from carbon dioxide and ammonia **[5]**

273/06 . . from cyanamide or calcium cyanamide **[5]**

273/08 . . from ammoniacal liquor **[5]**

273/10 . . combined with the synthesis of ammonia **[5]**

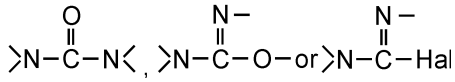
273/12 . . combined with the synthesis of melamine **[5]**

273/14 . . Separation; Purification; Stabilisation; Use of additives **[5]**

273/16 . . . Separation; Purification **[5]**

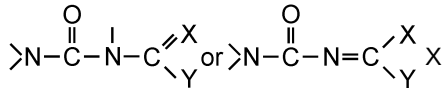
273/18 . of substituted ureas **[5]**

275/00 Derivatives of urea, i.e. compounds containing any of the groups



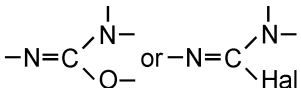
the nitrogen atoms not being part of nitro or nitroso groups [5]

275/02 . Salts; Complexes; Addition compounds **[5]**
275/04 . having nitrogen atoms of urea groups bound to acyclic carbon atoms **[5]**
275/06 . . of an acyclic and saturated carbon skeleton **[5]**
275/08 . . . being further substituted by halogen atoms, or by nitro or nitroso groups **[5]**
275/10 . . . being further substituted by singly-bound oxygen atoms **[5]**
275/12 . . . being further substituted by doubly-bound oxygen atoms **[5]**
275/14 . . . being further substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**
275/16 . . . being further substituted by carboxyl groups **[5]**
275/18 . . of a saturated carbon skeleton containing rings **[5]**
275/20 . . of an unsaturated carbon skeleton **[5]**
275/22 . . . containing rings other than six-membered aromatic rings **[5]**
275/24 . . . containing six-membered aromatic rings **[5]**
275/26 . having nitrogen atoms of urea groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
275/28 . having nitrogen atoms of urea groups bound to carbon atoms of six-membered aromatic rings of a carbon skeleton **[5]**
275/30 . . being further substituted by halogen atoms, or by nitro or nitroso groups **[5]**
275/32 . . being further substituted by singly-bound oxygen atoms **[5]**
275/34 . . . having nitrogen atoms of urea groups and singly-bound oxygen atoms bound to carbon atoms of the same non-condensed six-membered aromatic ring **[5]**
275/36 . . . . with at least one of the oxygen atoms further bound to a carbon atom of a six-membered aromatic ring, e.g. N-aryloxyphenylureas **[5]**
275/38 . . being further substituted by doubly-bound oxygen atoms **[5]**
275/40 . . being further substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**
275/42 . . being further substituted by carboxyl groups **[5]**
275/44 . having nitrogen atoms of urea groups doubly-bound to carbon atoms **[5]**
275/46 . containing any of the groups



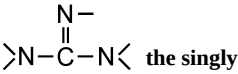
being a hetero atom, Y being any atom, e.g. acylureas **[5]**

275/48 . . Y being a hydrogen or a carbon atom **[5]**
275/50 . . . Y being a hydrogen or an acyclic carbon atom **[5]**
275/52 . . . Y being a carbon atom of a ring other than a six-membered aromatic ring **[5]**
275/54 . . . Y being a carbon atom of a six-membered aromatic ring, e.g. benzoylureas **[5]**
275/56 . . . X being a nitrogen atom **[5]**
275/58 . . Y being a hetero atom **[5]**
275/60 . . . Y being an oxygen atom, e.g. allophanic acids **[5]**
275/62 . . . Y being a nitrogen atom, e.g. biuret **[5]**
275/64 . having nitrogen atoms of urea groups singly-bound to oxygen atoms **[5]**
275/66 . having nitrogen atoms of urea groups bound to halogen atoms or to nitro or nitroso groups **[5]**
275/68 . . N-nitroso ureas **[5]**
275/70 . Compounds containing any of the groups



e.g. isoureas **[5]**

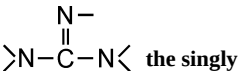
277/00 Preparation of guanidine or its derivatives, i.e. compounds containing the group



the singly-bound nitrogen atoms not being part of nitro or nitroso groups [5]

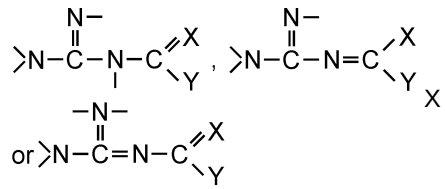
277/02 . of guanidine from cyanamide, calcium cyanamide or dicyandiamides **[5]**
277/04 . of guanidine from ammonium thiocyanate **[5]**
277/06 . Purification or separation of guanidine **[5]**
277/08 . of substituted guanidines **[5]**

279/00 Derivatives of guanidine, i.e. compounds containing the group



the singly-bound nitrogen atoms not being part of nitro or nitroso groups [5]

279/02 . Guanidine; Salts, complexes or addition compounds thereof **[5]**
279/04 . having nitrogen atoms of guanidine groups bound to acyclic carbon atoms of a carbon skeleton **[5]**
279/06 . . being further substituted by halogen atoms, or by nitro or nitroso groups **[5]**
279/08 . . being further substituted by singly-bound oxygen atoms **[5]**
279/10 . . being further substituted by doubly-bound oxygen atoms **[5]**
279/12 . . being further substituted by nitrogen atoms not being part of nitro or nitroso groups **[5]**
279/14 . . being further substituted by carboxyl groups **[5]**
279/16 . having nitrogen atoms of guanidine groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
279/18 . having nitrogen atoms of guanidine groups bound to carbon atoms of six-membered aromatic rings **[5]**
279/20 . containing any of the groups



being a hetero atom, Y being any atom, e.g. acylguanidines **[5]**

279/22 . . Y being a hydrogen or a carbon atom, e.g. benzoylguanidines **[5]**
279/24 . . Y being a hetero atom **[5]**
279/26 . . . X and Y being nitrogen atoms, i.e. biguanides **[5]**
279/28 . having nitrogen atoms of guanidine groups bound to cyano groups, e.g. cyanoguanidines, dicyandiamides **[5]**

279/30 . having nitrogen atoms of guanidine groups bound to nitro or nitroso groups **[5]**

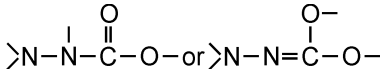
279/32 . . N-nitroguanidines **[5]**

279/34 . . . N-nitroguanidine **[5]**

279/36 . . . Substituted N-nitroguanidines **[5]**

281/00 Derivatives of carbonic acid containing functional groups covered by groups C07C 269/00 to C07C 279/00 in which at least one nitrogen atom of these functional groups is further bound to another nitrogen atom not being part of a nitro or nitroso group [5]

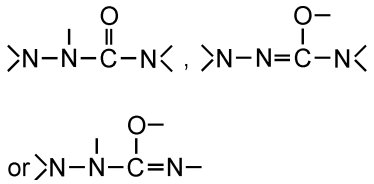
281/02 . Compounds containing any of the groups



e.g. carbazates **[5]**

281/04 . . the other nitrogen atom being further doubly-bound to a carbon atom **[5]**

281/06 . Compounds containing any of the groups



e.g. semicarbazides **[5]**

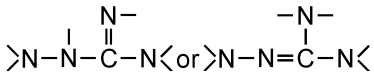
281/08 . . the other nitrogen atom being further doubly-bound to a carbon atom, e.g. semicarbazones **[5]**

281/10 . . . the carbon atom being further bound to an acyclic carbon atom or to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

281/12 . . . the carbon atom being part of a ring other than a six-membered aromatic ring **[5]**

281/14 . . . the carbon atom being further bound to a carbon atom of a six-membered aromatic ring **[5]**

281/16 . Compounds containing any of the groups



e.g. aminoguanidine **[5]**

281/18 . . the other nitrogen atom being further doubly-bound to a carbon atom, e.g. guanylhydrazones **[5]**

281/20 . the two nitrogen atoms of the functional groups being doubly-bound to each other, e.g. azoformamide **[5]**

291/00 Compounds containing carbon and nitrogen and having functional groups not covered by groups C07C 201/00 to C07C 281/00 [5]

291/02 . containing nitrogen-oxide bonds **[5]**

291/04 . . containing amino-oxide bonds **[5]**

291/06 . . Nitrile oxides **[5]**

291/08 . . Azoxy compounds **[5]**

291/10 . Isocyanides **[5]**

291/12 . Fulminates **[5]**

291/14 . containing at least one carbon atom bound to a nitro or nitroso group and doubly-bound to a hetero atom **[5]**

Compounds containing carbon together with sulfur, selenium or tellurium, with or without hydrogen, halogens, oxygen or nitrogen [5]

301/00 Esters of sulfurous acid [5]

301/02 . having sulfite groups bound to carbon atoms of six-membered aromatic rings **[5]**

303/00 Preparation of esters or amides of sulfuric acids; Preparation of sulfonic acids or of their esters, halides, anhydrides or amides [5]

303/02 . of sulfonic acids or halides thereof **[5]**

303/04 . . by substitution of hydrogen atoms by sulfo or halosulfonyl groups **[5]**

303/06 . . . by reaction with sulfuric acid or sulfur trioxide **[5]**

303/08 . . . by reaction with halogenosulfonic acids **[5]**

303/10 . . . by reaction with sulfur dioxide and halogen or by reaction with sulfuryl halides **[5]**

303/12 . . . by reaction with thionylhalides **[5]**

303/14 . . by sulfoxidation, i.e. by reaction with sulfur dioxide and oxygen with formation of sulfo or halosulfonyl groups **[5]**

303/16 . . by oxidation of thiols, sulfides, hydropolysulfides, or polysulfides with formation of sulfo or halosulfonyl groups **[5]**

303/18 . . by reaction of sulfides with compounds having functional groups with formation of sulfo or halosulfonyl groups **[5]**

303/20 . . by addition of sulfurous acid or salts thereof to compounds having carbon-to-carbon multiple bonds **[5]**

303/22 . . from sulfonic acids by reactions not involving the formation of sulfo or halosulfonyl groups **[5]**

303/24 . of esters of sulfuric acids **[5]**

303/26 . of esters of sulfonic acids **[5]**

303/28 . . by reaction of hydroxy compounds with sulfonic acids or derivatives thereof **[5]**

303/30 . . by reactions not involving the formation of esterified sulfo groups **[5]**

303/32 . of salts of sulfonic acids **[5]**

303/34 . of amides of sulfuric acids **[5]**

303/36 . of amides of sulfonic acids **[5]**

303/38 . . by reaction of ammonia or amines with sulfonic acids, or with esters, anhydrides, or halides thereof **[5]**

303/40 . . by reactions not involving the formation of sulfonamide groups **[5]**

303/42 . Separation; Purification; Stabilisation; Use of additives **[5]**

303/44 . . Separation; Purification **[5]**

303/46 . . . from by-products of refining mineral oils with sulfuric acid **[5]**

305/00 Esters of sulfuric acids [5]

305/02 . having oxygen atoms of sulfate groups bound to acyclic carbon atoms of a carbon skeleton **[5]**

305/04 . . being acyclic and saturated **[5]**

305/06 . . . Hydrogenosulfates **[5]**

305/08 . . . Dialkylsulfates; Substituted dialkylsulfates **[5]**

305/10 . . . being further substituted by singly-bound oxygen atoms **[5]**

305/12 . . being saturated and containing rings **[5]**

305/14 . . being acyclic and unsaturated **[5]**

305/16 . . being unsaturated and containing rings **[5]**

305/18 . . . containing six-membered aromatic rings **[5]**

305/20 . having oxygen atoms of sulfate groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

305/22 . having oxygen atoms of sulfate groups bound to carbon atoms of six-membered aromatic rings **[5]**

305/24 . . of non-condensed six-membered aromatic rings **[5]**

305/26 . Halogenosulfates, i.e. monoesters of halogenosulfuric acids **[5]**

307/00 Amides of sulfuric acids, i.e. compounds having singly-bound oxygen atoms of sulfate groups replaced by nitrogen atoms, not being part of nitro or nitroso groups [5]

307/02 . Monoamides of sulfuric acids or esters thereof, e.g. sulfamic acids **[5]**

307/04 . Diamides of sulfuric acids **[5]**

307/06 . . having nitrogen atoms of the sulfamide groups bound to acyclic carbon atoms **[5]**

307/08 . . having nitrogen atoms of the sulfamide groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

307/10 . . having nitrogen atoms of the sulfamide groups bound to carbon atoms of six-membered aromatic rings **[5]**

309/00 Sulfonic acids; **Halides, esters, or anhydrides thereof [5]**

309/01 . Sulfonic acids **[5]**

309/02 . . having sulfo groups bound to acyclic carbon atoms **[5]**

309/03 . . . of an acyclic saturated carbon skeleton **[5]**

309/04 . . . . containing only one sulfo group **[5]**

309/05 . . . . containing at least two sulfo groups bound to the carbon skeleton **[5]**

309/06 . . . . containing halogen atoms, or nitro or nitroso groups bound to the carbon skeleton **[5]**

309/07 . . . . containing oxygen atoms bound to the carbon skeleton **[5]**

309/08 . . . . . containing hydroxy groups bound to the carbon skeleton **[5]**

309/09 . . . . . containing etherified hydroxy groups bound to the carbon skeleton **[5]**

309/10 . . . . . . with the oxygen atom of at least one of the etherified hydroxy groups further bound to an acyclic carbon atom **[5]**

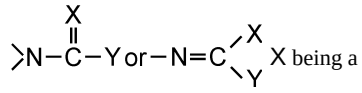
309/11 . . . . . . with the oxygen atom of at least one of the etherified hydroxy groups further bound to a carbon atom of a six-membered aromatic ring **[5]**

309/12 . . . . . containing esterified hydroxy groups bound to the carbon skeleton **[5]**

309/13 . . . . containing nitrogen atoms, not being part of nitro or nitroso groups, bound to the carbon skeleton **[5]**

309/14 . . . . . containing amino groups bound to the carbon skeleton **[5]**

309/15 . . . . . . the nitrogen atom of at least one of the amino groups being part of any of the groups



X being a hetero atom, Y being any atom **[5]**

309/16 . . . . . containing doubly-bound nitrogen atoms bound to the carbon skeleton **[5]**

309/17 . . . . . containing carboxyl groups bound to the carbon skeleton **[5]**

309/18 . . . . . containing amino groups bound to the same carbon skeleton **[5]**

309/19 . . . of a saturated carbon skeleton containing rings **[5]**

309/20 . . . of an acyclic unsaturated carbon skeleton **[5]**

309/21 . . . . containing nitrogen atoms, not being part of nitro or nitroso groups, bound to the carbon skeleton **[5]**

309/22 . . . . containing carboxyl groups bound to the carbon skeleton **[5]**

309/23 . . . of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings **[5]**

309/24 . . . of a carbon skeleton containing six-membered aromatic rings **[5]**

309/25 . . having sulfo groups bound to carbon atoms of rings other than six-membered aromatic rings of a carbon skeleton **[5]**

309/26 . . . containing nitrogen atoms, not being part of nitro or nitroso groups, bound to the carbon skeleton **[5]**

309/27 . . . containing carboxyl groups bound to the carbon skeleton **[5]**

309/28 . . having sulfo groups bound to carbon atoms of six-membered aromatic rings of a carbon skeleton **[5]**

309/29 . . . of non-condensed six-membered aromatic rings **[5]**

309/30 . . . . of six-membered aromatic rings substituted by alkyl groups **[5]**

309/31 . . . . . by alkyl groups containing at least three carbon atoms **[5]**

309/32 . . . . containing at least two non-condensed six-membered aromatic rings in the carbon skeleton **[5]**

309/33 . . . of six-membered aromatic rings being part of condensed ring systems **[5]**

309/34 . . . . formed by two rings **[5]**

309/35 . . . . . Naphthalene sulfonic acids **[5]**

309/36 . . . . . substituted by alkyl groups **[5]**

309/37 . . . . . by alkyl groups containing at least three carbon atoms **[5]**

309/38 . . . . formed by at least three rings **[5]**

309/39 . . . containing halogen atoms bound to the carbon skeleton **[5]**

309/40 . . . containing nitro or nitroso groups bound to the carbon skeleton **[5]**

309/41 . . . containing singly-bound oxygen atoms bound to the carbon skeleton **[5]**

309/42 . . . . having the sulfo groups bound to carbon atoms of non-condensed six-membered aromatic rings **[5]**

309/43 . . . . having at least one of the sulfo groups bound to a carbon atom of a six-membered aromatic ring being part of a condensed ring system **[5]**

309/44 . . . containing doubly-bound oxygen atoms bound to the carbon skeleton **[5]**

309/45 . . . containing nitrogen atoms, not being part of nitro or nitroso groups, bound to the carbon skeleton **[5]**

309/46 . . . . having the sulfo groups bound to carbon atoms of non-condensed six-membered aromatic rings **[5]**

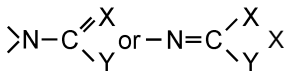
309/47 . . . . having at least one of the sulfo groups bound to a carbon atom of a six-membered aromatic ring being part of a condensed ring system **[5]**

309/48 . . . . the carbon skeleton being further substituted by halogen atoms **[5]**

309/49 . . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**

309/50 . . . . . having at least one of the sulfo groups bound to a carbon atom of a six-membered aromatic ring being part of a condensed ring system **[5]**

309/51 . . . . at least one of the nitrogen atoms being part of any of the groups

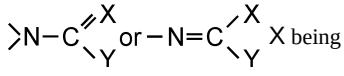


X being a hetero atom, Y being any atom **[5]**

309/52 . . . . the carbon skeleton being further substituted by doubly-bound oxygen atoms **[5]**

309/53 . . . . . the carbon skeleton containing carbon atoms of quinone rings **[5]**

309/54 . . . . . at least one of the nitrogen atoms being part of any of the groups



X being a hetero atom, Y being any atom **[5]**

309/55 . . . . . Y being a hydrogen or a carbon atom **[5]**

309/56 . . . . . Y being a hetero atom **[5]**

309/57 . . . containing carboxyl groups bound to the carbon skeleton **[5]**

309/58 . . . . Carboxylic acid groups or esters thereof **[5]**

309/59 . . . . Nitrogen analogues of carboxyl groups **[5]**

309/60 . . . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**

309/61 . . . . the carbon skeleton being further substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

309/62 . . Sulfonated fats, oils or waxes of undetermined constitution **[5]**

309/63 . Esters of sulfonic acids **[5]**

309/64 . . having sulfur atoms of esterified sulfo groups bound to acyclic carbon atoms **[5]**

309/65 . . . of a saturated carbon skeleton **[5]**

309/66 . . . . Methanesulfonates **[5]**

309/67 . . . of an unsaturated carbon skeleton **[5]**

309/68 . . . of a carbon skeleton substituted by singly-bound oxygen atoms **[5]**

309/69 . . . of a carbon skeleton substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

309/70 . . . of a carbon skeleton substituted by carboxyl groups **[5]**

309/71 . . having sulfur atoms of esterified sulfo groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

309/72 . . having sulfur atoms of esterified sulfo groups bound to carbon atoms of six-membered aromatic rings of a carbon skeleton **[5]**

309/73 . . . to carbon atoms of non-condensed six-membered aromatic rings **[5]**

309/74 . . . to carbon atoms of six-membered aromatic rings being part of condensed ring systems **[5]**

309/75 . . . containing singly-bound oxygen atoms bound to the carbon skeleton **[5]**

309/76 . . . containing nitrogen atoms, not being part of nitro or nitroso groups, bound to the carbon skeleton **[5]**

309/77 . . . containing carboxyl groups bound to the carbon skeleton **[5]**

309/78 . Halides of sulfonic acids **[5]**

309/79 . . having halosulfonyl groups bound to acyclic carbon atoms **[5]**

309/80 . . . of a saturated carbon skeleton **[5]**

309/81 . . . of an unsaturated carbon skeleton **[5]**

309/82 . . . of a carbon skeleton substituted by singly-bound oxygen atoms **[5]**

309/83 . . . of a carbon skeleton substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

309/84 . . . of a carbon skeleton substituted by carboxyl groups **[5]**

309/85 . . having halosulfonyl groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

309/86 . . having halosulfonyl groups bound to carbon atoms of six-membered aromatic rings of a carbon skeleton **[5]**

309/87 . . . containing singly-bound oxygen atoms bound to the carbon skeleton **[5]**

309/88 . . . containing nitrogen atoms, not being part of nitro or nitroso groups, bound to the carbon skeleton **[5]**

309/89 . . . containing carboxyl groups bound to the carbon skeleton **[5]**

311/00 Amides of sulfonic acids, i.e. compounds having singly-bound oxygen atoms of sulfo groups replaced by nitrogen atoms, not being part of nitro or nitroso groups [5]

311/01 . Sulfonamides having sulfur atoms of sulfonamide groups bound to acyclic carbon atoms **[5]**

311/02 . . of an acyclic saturated carbon skeleton **[5]**

311/03 . . . having the nitrogen atoms of the sulfonamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

311/04 . . . . to acyclic carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen atoms **[5]**

311/05 . . . . to acyclic carbon atoms of hydrocarbon radicals substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

311/06 . . . . to acyclic carbon atoms of hydrocarbon radicals substituted by carboxyl groups **[5]**

311/07 . . . having the nitrogen atom of at least one of the sulfonamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

311/08 . . . having the nitrogen atom of at least one of the sulfonamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**

311/09 . . . the carbon skeleton being further substituted by at least two halogen atoms **[5]**

311/10 . . of a saturated carbon skeleton containing rings **[5]**

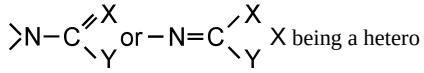
311/11 . . of an acyclic unsaturated carbon skeleton **[5]**

311/12 . . of an unsaturated carbon skeleton containing rings **[5]**

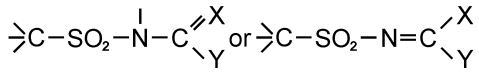
311/13 . . . the carbon skeleton containing six-membered aromatic rings **[5]**

311/14 . Sulfonamides having sulfur atoms of sulfonamide groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

311/15 . Sulfonamides having sulfur atoms of sulfonamide groups bound to carbon atoms of six-membered aromatic rings **[5]**
311/16 . . having the nitrogen atom of at least one of the sulfonamide groups bound to hydrogen atoms or to an acyclic carbon atom **[5]**
311/17 . . . to an acyclic carbon atom of a hydrocarbon radical substituted by singly-bound oxygen atoms **[5]**
311/18 . . . to an acyclic carbon atom of a hydrocarbon radical substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**
311/19 . . . to an acyclic carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**
311/20 . . having the nitrogen atom of at least one of the sulfonamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**
311/21 . . having the nitrogen atom of at least one of the sulfonamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**
311/22 . Sulfonamides, the carbon skeleton of the acid part being further substituted by singly-bound oxygen atoms **[5]**
311/23 . . having the sulfur atoms of the sulfonamide groups bound to acyclic carbon atoms **[5]**
311/24 . . . of an acyclic saturated carbon skeleton **[5]**
311/25 . . . of a saturated carbon skeleton containing rings **[5]**
311/26 . . . of an acyclic unsaturated carbon skeleton **[5]**
311/27 . . . of an unsaturated carbon skeleton containing rings **[5]**
311/28 . . having the sulfur atom of at least one of the sulfonamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**
311/29 . . having the sulfur atom of at least one of the sulfonamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**
311/30 . Sulfonamides, the carbon skeleton of the acid part being further substituted by singly-bound nitrogen atoms, not being part of nitro or nitroso groups **[5]**
311/31 . . having the sulfur atoms of the sulfonamide groups bound to acyclic carbon atoms **[5]**
311/32 . . . of an acyclic saturated carbon skeleton **[5]**
311/33 . . . of a saturated carbon skeleton containing rings **[5]**
311/34 . . . of an acyclic unsaturated carbon skeleton **[5]**
311/35 . . . of an unsaturated carbon skeleton containing rings **[5]**
311/36 . . having the sulfur atom of at least one of the sulfonamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**
311/37 . . having the sulfur atom of at least one of the sulfonamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**
311/38 . . . having sulfur atoms of sulfonamide groups and amino groups bound to carbon atoms of six-membered aromatic rings of the same carbon skeleton **[5]**
311/39 . . . . having the nitrogen atom of at least one of the sulfonamide groups bound to hydrogen atoms or to an acyclic carbon atom **[5]**
311/40 . . . . . to an acyclic carbon atom of a hydrocarbon radical substituted by singly-bound oxygen atoms **[5]**
311/41 . . . . . to an acyclic carbon atom of a hydrocarbon radical substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**
311/42 . . . . . to an acyclic carbon atom of a hydrocarbon radical substituted by carboxyl groups **[5]**
311/43 . . . . having the nitrogen atom of at least one of the sulfonamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**
311/44 . . . . having the nitrogen atom of at least one of the sulfonamide groups bound to a carbon atom of a six-membered aromatic ring **[5]**
311/45 . . at least one of the singly-bound nitrogen atoms being part of any of the groups



X being a hetero atom, Y being any atom, e.g. N-acylaminosulfonamides **[5]**
311/46 . . . Y being a hydrogen or a carbon atom **[5]**
311/47 . . . Y being a hetero atom **[5]**
311/48 . having nitrogen atoms of sulfonamide groups further bound to another hetero atom **[5]**
311/49 . . to nitrogen atoms **[5]**
311/50 . Compounds containing any of the groups



X being a hetero atom, Y being any atom **[5]**
311/51 . . Y being a hydrogen or a carbon atom **[5]**
311/52 . . Y being a hetero atom **[5]**
311/53 . . . X and Y not being nitrogen atoms, e.g. N-sulfonylcarbamic acid **[5]**
311/54 . . . either X or Y, but not both, being nitrogen atoms, e.g. N-sulfonylurea **[5]**
311/55 . . . . having sulfur atoms of the sulfonylurea groups bound to acyclic carbon atoms **[5]**
311/56 . . . . having sulfur atoms of the sulfonylurea groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
311/57 . . . . having sulfur atoms of the sulfonylurea groups bound to carbon atoms of six-membered aromatic rings **[5]**
311/58 . . . . . having nitrogen atoms of the sulfonylurea groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**
311/59 . . . . . having nitrogen atoms of the sulfonylurea groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
311/60 . . . . . having nitrogen atoms of the sulfonylurea groups bound to carbon atoms of six-membered aromatic rings **[5]**
311/61 . . . . . having nitrogen atoms of the sulfonylurea groups further bound to another hetero atom **[5]**
311/62 . . . . . having nitrogen atoms of the sulfonylurea groups further acylated **[5]**
311/63 . . . . N-sulfonylisoureas **[5]**
311/64 . . . X and Y being nitrogen atoms, e.g. N-sulfonylguanidine **[5]**
311/65 . N-sulfonylisocyanates **[5]**

313/00 **Sulfinic acids**; **Sulfenic acids**; **Halides, esters or anhydrides thereof**; **Amides of sulfinic or sulfenic acids, i.e. compounds having singly-bound oxygen atoms of sulfinic or sulfenic groups replaced by nitrogen atoms, not being part of nitro or nitroso groups [5]**

313/02 . Sulfinic acids; Derivatives thereof **[5]**

313/04 . . Sulfinic acids; Esters thereof **[5]**

313/06 . . Sulfinamides **[5]**

313/08 . Sulfenic acids; Derivatives thereof **[5]**

313/10 . . Sulfenic acids; Esters thereof **[5]**

313/12 . . . having sulfur atoms of sulfenic groups bound to acyclic carbon atoms **[5]**

313/14 . . . having sulfur atoms of sulfenic groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

313/16 . . . having sulfur atoms of sulfenic groups bound to carbon atoms of six-membered aromatic rings **[5]**

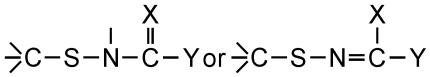
313/18 . . Sulfenamides **[5]**

313/20 . . . having sulfur atoms of sulfenamide groups bound to acyclic carbon atoms **[5]**

313/22 . . . having sulfur atoms of sulfenamide groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

313/24 . . . having sulfur atoms of sulfenamide groups bound to carbon atoms of six-membered aromatic rings **[5]**

313/26 . . . Compounds containing any of the groups



X being a hetero atom, Y being any atom **[5]**

313/28 . . . . Y being a hydrogen or a carbon atom **[5]**

313/30 . . . . Y being a hetero atom **[5]**

313/32 . . . . . X and Y not being nitrogen atoms, e.g. N-sulfenylcarbamic acid **[5]**

313/34 . . . . . either X or Y, but not both, being nitrogen atoms, e.g. N-sulfenylureas **[5]**

313/36 . . . having nitrogen atoms of sulfenamide groups further bound to other hetero atoms **[5]**

313/38 . . . N-sulfenylisocyanates **[5]**

315/00 **Preparation of sulfones**; **Preparation of sulfoxides [5]**

315/02 . by formation of sulfone or sulfoxide groups by oxidation of sulfides, or by formation of sulfone groups by oxidation of sulfoxides **[5]**

315/04 . by reactions not involving the formation of sulfone or sulfoxide groups **[5]**

315/06 . Separation; Purification; Stabilisation; Use of additives **[5]**

317/00 **Sulfones**; **Sulfoxides [5]**

317/02 . having sulfone or sulfoxide groups bound to acyclic carbon atoms **[5]**

317/04 . . of an acyclic saturated carbon skeleton **[5]**

317/06 . . of a saturated carbon skeleton containing rings **[5]**

317/08 . . of an acyclic unsaturated carbon skeleton **[5]**

317/10 . . of an unsaturated carbon skeleton containing rings **[5]**

317/12 . having sulfone or sulfoxide groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

317/14 . having sulfone or sulfoxide groups bound to carbon atoms of six-membered aromatic rings **[5]**

317/16 . having sulfone or sulfoxide groups and singly-bound oxygen atoms bound to the same carbon skeleton **[5]**

317/18 . . with sulfone or sulfoxide groups bound to acyclic carbon atoms of the carbon skeleton **[5]**

317/20 . . with sulfone or sulfoxide groups bound to carbon atoms of rings other than six-membered aromatic rings of the carbon skeleton **[5]**

317/22 . . with sulfone or sulfoxide groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**

317/24 . having sulfone or sulfoxide groups and doubly-bound oxygen atoms bound to the same carbon skeleton **[5]**

317/26 . having sulfone or sulfoxide groups and nitrogen atoms, not being part of nitro or nitroso groups, bound to the same carbon skeleton **[5]**

317/28 . . with sulfone or sulfoxide groups bound to acyclic carbon atoms of the carbon skeleton **[5]**

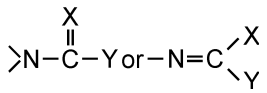
317/30 . . with sulfone or sulfoxide groups bound to carbon atoms of rings other than six-membered aromatic rings of the carbon skeleton **[5]**

317/32 . . with sulfone or sulfoxide groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**

317/34 . . . having sulfone or sulfoxide groups and amino groups bound to carbon atoms of six-membered aromatic rings being part of the same non-condensed ring or of a condensed ring system containing that ring **[5]**

317/36 . . . . with the nitrogen atoms of the amino groups bound to hydrogen atoms or to carbon atoms **[5]**

317/38 . . . . with the nitrogen atom of at least one amino group being part of any of the groups



X being a hetero atom, Y being any atom, e.g. N-acylaminosulfones **[5]**

317/40 . . . . . Y being a hydrogen or a carbon atom **[5]**

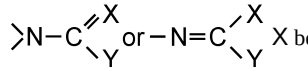
317/42 . . . . . Y being a hetero atom **[5]**

317/44 . having sulfone or sulfoxide groups and carboxyl groups bound to the same carbon skeleton **[5]**

317/46 . . the carbon skeleton being further substituted by singly-bound oxygen atoms **[5]**

317/48 . . the carbon skeleton being further substituted by singly-bound nitrogen atoms, not being part of nitro or nitroso groups **[5]**

317/50 . . . at least one of the nitrogen atoms being part of any of the groups



X being a hetero atom, Y being any atom **[5]**

319/00 **Preparation of thiols, sulfides, hydropolysulfides or polysulfides [5]**

319/02 . of thiols **[5]**

319/04 . . by addition of hydrogen sulfide or its salts to unsaturated compounds **[5]**

319/06 . . from sulfides, hydropolysulfides or polysulfides **[5]**

319/08 . . by replacement of hydroxy groups or etherified or esterified hydroxy groups **[5]**

319/10 . . . by replacement of hydroxy groups or etherified or esterified hydroxy groups bound to carbon atoms of six-membered aromatic rings **[5]**

319/12 . . by reactions not involving the formation of mercapto groups **[5]**

319/14 . of sulfides **[5]**

319/16 . . by addition of hydrogen sulfide or its salts to unsaturated compounds **[5]**
319/18 . . by addition of thiols to unsaturated compounds **[5]**
319/20 . . by reactions not involving the formation of sulfide groups **[5]**
319/22 . of hydropolysulfides or polysulfides **[5]**
319/24 . . by reactions involving the formation of sulfur-to-sulfur bonds **[5]**
319/26 . Separation; Purification; Stabilisation; Use of additives **[5]**
319/28 . . Separation; Purification **[5]**
319/30 . . . from the by-products of refining mineral oils **[5]**

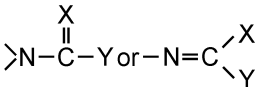
321/00 Thiols, sulfides, hydropolysulfides or polysulfides [5]
321/02 . Thiols having mercapto groups bound to acyclic carbon atoms **[5]**
321/04 . . of an acyclic saturated carbon skeleton **[5]**
321/06 . . of a saturated carbon skeleton containing rings **[5]**
321/08 . . of an acyclic unsaturated carbon skeleton **[5]**
321/10 . . of an unsaturated carbon skeleton containing rings **[5]**
321/12 . Sulfides, hydropolysulfides, or polysulfides having thio groups bound to acyclic carbon atoms **[5]**
321/14 . . of an acyclic saturated carbon skeleton **[5]**
321/16 . . of a saturated carbon skeleton containing rings **[5]**
321/18 . . of an acyclic unsaturated carbon skeleton **[5]**
321/20 . . of an unsaturated carbon skeleton containing rings **[5]**
321/22 . Thiols, sulfides, hydropolysulfides, or polysulfides having thio groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**
321/24 . Thiols, sulfides, hydropolysulfides, or polysulfides having thio groups bound to carbon atoms of six-membered aromatic rings **[5]**
321/26 . . Thiols **[5]**
321/28 . . Sulfides, hydropolysulfides, or polysulfides having thio groups bound to carbon atoms of six-membered aromatic rings **[5]**
321/30 . . . Sulfides having the sulfur atom of at least one thio group bound to two carbon atoms of six-membered aromatic rings **[5]**

323/00 Thiols, sulfides, hydropolysulfides or polysulfides substituted by halogen, oxygen or nitrogen atoms, or by sulfur atoms not being part of thio groups [5]
323/01 . containing thio groups and halogen atoms, or nitro or nitroso groups bound to the same carbon skeleton **[5]**
323/02 . . having sulfur atoms of thio groups bound to acyclic carbon atoms of the carbon skeleton **[5]**
323/03 . . . the carbon skeleton being acyclic and saturated **[5]**
323/04 . . . the carbon skeleton being saturated and containing rings **[5]**
323/05 . . . the carbon skeleton being acyclic and unsaturated **[5]**
323/06 . . . the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings **[5]**
323/07 . . . the carbon skeleton containing six-membered aromatic rings **[5]**
323/08 . . having sulfur atoms of thio groups bound to carbon atoms of rings other than six-membered aromatic rings of the carbon skeleton **[5]**
323/09 . . having sulfur atoms of thio groups bound to carbon atoms of six-membered aromatic rings of the carbon skeleton **[5]**
323/10 . containing thio groups and singly-bound oxygen atoms bound to the same carbon skeleton **[5]**
323/11 . . having the sulfur atoms of the thio groups bound to acyclic carbon atoms of the carbon skeleton **[5]**
323/12 . . . the carbon skeleton being acyclic and saturated **[5]**
323/13 . . . the carbon skeleton being saturated and containing rings **[5]**
323/14 . . . the carbon skeleton being acyclic and unsaturated **[5]**
323/15 . . . the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings **[5]**
323/16 . . . the carbon skeleton containing six-membered aromatic rings **[5]**
323/17 . . having the sulfur atom of at least one of the thio groups bound to a carbon atom of a ring other than a six-membered aromatic ring of the carbon skeleton **[5]**
323/18 . . having the sulfur atom of at least one of the thio groups bound to a carbon atom of a six-membered aromatic ring of the carbon skeleton **[5]**
323/19 . . . with singly-bound oxygen atoms bound to acyclic carbon atoms of the carbon skeleton **[5]**
323/20 . . . with singly-bound oxygen atoms bound to carbon atoms of the same non-condensed six-membered aromatic ring **[5]**
323/21 . . . with the sulfur atom of the thio group bound to a carbon atom of a six-membered aromatic ring being part of a condensed ring system **[5]**
323/22 . containing thio groups and doubly-bound oxygen atoms bound to the same carbon skeleton **[5]**
323/23 . containing thio groups and nitrogen atoms, not being part of nitro or nitroso groups, bound to the same carbon skeleton **[5]**
323/24 . . having the sulfur atoms of the thio groups bound to acyclic carbon atoms of the carbon skeleton **[5]**
323/25 . . . the carbon skeleton being acyclic and saturated **[5]**
323/26 . . . the carbon skeleton being saturated and containing rings **[5]**
323/27 . . . the carbon skeleton being acyclic and unsaturated **[5]**
323/28 . . . the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings **[5]**
323/29 . . . the carbon skeleton containing six-membered aromatic rings **[5]**
323/30 . . having the sulfur atom of at least one of the thio groups bound to a carbon atom of a ring other than a six-membered aromatic ring of the carbon skeleton **[5]**
323/31 . . having the sulfur atom of at least one of the thio groups bound to a carbon atom of a six-membered aromatic ring of the carbon skeleton **[5]**
323/32 . . . having at least one of the nitrogen atoms bound to an acyclic carbon atom of the carbon skeleton **[5]**
323/33 . . . having at least one of the nitrogen atoms bound to a carbon atom of the same non-condensed six-membered aromatic ring **[5]**
323/34 . . . . the thio group being a mercapto group **[5]**
323/35 . . . . the thio group being a sulfide group **[5]**
323/36 . . . . . the sulfur atom of the sulfide group being further bound to an acyclic carbon atom **[5]**

323/37 . . . . . the sulfur atom of the sulfide group being further bound to a carbon atom of a six-membered aromatic ring **[5]**

323/38 . . . with the sulfur atom of the thio group bound to a carbon atom of a six-membered aromatic ring being part of a condensed ring system **[5]**

323/39 . . at least one of the nitrogen atoms being part of any of the groups



X being a hetero atom, Y being any atom **[5]**

323/40 . . . Y being a hydrogen or a carbon atom **[5]**

323/41 . . . . Y being a hydrogen or an acyclic carbon atom **[5]**

323/42 . . . . Y being a carbon atom of a six-membered aromatic ring **[5]**

323/43 . . . Y being a hetero atom **[5]**

323/44 . . . . X or Y being nitrogen atoms **[5]**

323/45 . . having at least one of the nitrogen atoms doubly-bound to the carbon skeleton **[5]**

323/46 . . having at least one of the nitrogen atoms, not being part of nitro or nitroso groups, further bound to other hetero atoms **[5]**

323/47 . . . to oxygen atoms **[5]**

323/48 . . . to nitrogen atoms **[5]**

323/49 . . . to sulfur atoms **[5]**

323/50 . containing thio groups and carboxyl groups bound to the same carbon skeleton **[5]**

323/51 . . having the sulfur atoms of the thio groups bound to acyclic carbon atoms of the carbon skeleton **[5]**

323/52 . . . the carbon skeleton being acyclic and saturated **[5]**

323/53 . . . the carbon skeleton being saturated and containing rings **[5]**

323/54 . . . the carbon skeleton being acyclic and unsaturated **[5]**

323/55 . . . the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings **[5]**

323/56 . . . the carbon skeleton containing six-membered aromatic rings **[5]**

323/57 . . . the carbon skeleton being further substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

323/58 . . . . with amino groups bound to the carbon skeleton **[5]**

323/59 . . . . . with acylated amino groups bound to the carbon skeleton **[5]**

323/60 . . . with the carbon atom of at least one of the carboxyl groups bound to nitrogen atoms **[5]**

323/61 . . having the sulfur atom of at least one of the thio groups bound to a carbon atom of a ring other than a six-membered aromatic ring of the carbon skeleton **[5]**

323/62 . . having the sulfur atom of at least one of the thio groups bound to a carbon atom of a six-membered aromatic ring of the carbon skeleton **[5]**

323/63 . . . the carbon skeleton being further substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

323/64 . containing thio groups and sulfur atoms, not being part of thio groups, bound to the same carbon skeleton **[5]**

323/65 . . containing sulfur atoms of sulfone or sulfoxide groups bound to the carbon skeleton **[5]**

323/66 . . containing sulfur atoms of sulfo, esterified sulfo or halosulfonyl groups, bound to the carbon skeleton **[5]**

323/67 . . containing sulfur atoms of sulfonamide groups, bound to the carbon skeleton **[5]**

325/00 Thioaldehydes; **Thioketones**; **Thioquinones**; **Oxides thereof** **[5]**

325/02 . Thioketones; Oxides thereof **[5]**

325/04 . Thioquinones; Oxides thereof **[5]**

327/00 Thiocarboxylic acids **[5]**

327/02 . Monothiocarboxylic acids **[5]**

327/04 . . having carbon atoms of thiocarboxyl groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

327/06 . . . to hydrogen atoms or to carbon atoms of an acyclic saturated carbon skeleton **[5]**

327/08 . . . to carbon atoms of a saturated carbon skeleton containing rings **[5]**

327/10 . . . to carbon atoms of an acyclic unsaturated carbon skeleton **[5]**

327/12 . . . to carbon atoms of an unsaturated carbon skeleton containing rings **[5]**

327/14 . . having carbon atoms of thiocarboxyl groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

327/16 . . having carbon atoms of thiocarboxyl groups bound to carbon atoms of six-membered aromatic rings **[5]**

327/18 . Dithiocarboxylic acids **[5]**

327/20 . Esters of monothiocarboxylic acids **[5]**

327/22 . . having carbon atoms of esterified thiocarboxyl groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

327/24 . . having carbon atoms of esterified thiocarboxyl groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

327/26 . . having carbon atoms of esterified thiocarboxyl groups bound to carbon atoms of six-membered aromatic rings **[5]**

327/28 . . having sulfur atoms of esterified thiocarboxyl groups bound to carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen atoms **[5]**

327/30 . . having sulfur atoms of esterified thiocarboxyl groups bound to carbon atoms of hydrocarbon radicals substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

327/32 . . having sulfur atoms of esterified thiocarboxyl groups bound to carbon atoms of hydrocarbon radicals substituted by carboxyl groups **[5]**

327/34 . . . with amino groups bound to the same hydrocarbon radicals **[5]**

327/36 . Esters of dithiocarboxylic acids **[5]**

327/38 . Amides of thiocarboxylic acids **[5]**

327/40 . . having carbon atoms of thiocarboxamide groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

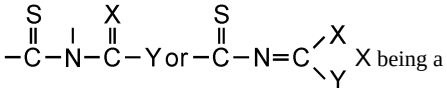
327/42 . . . to hydrogen atoms or to carbon atoms of a saturated carbon skeleton **[5]**

327/44 . . . to carbon atoms of an unsaturated carbon skeleton **[5]**

327/46 . . having carbon atoms of thiocarboxamide groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

327/48 . . having carbon atoms of thiocarboxamide groups bound to carbon atoms of six-membered aromatic rings **[5]**

327/50 . . Compounds containing any of the groups



X being a hetero atom, Y being any atom **[5]**

327/52 . . . Y being a hydrogen or a carbon atom **[5]**

327/54 . . . Y being a hetero atom **[5]**

327/56 . . having nitrogen atoms of thiocarboxamide groups further bound to another hetero atom **[5]**

327/58 . Derivatives of thiocarboxylic acids, the doubly-bound oxygen atoms being replaced by nitrogen atoms, e.g. imino-thio ethers **[5]**

327/60 . Thiocarboxylic acids having sulfur atoms of thiocarboxyl groups further doubly-bound to oxygen atoms **[5]**

329/00 Thiocarbonic acids; **Halides, esters or anhydrides thereof [5]**

329/02 . Monothiocarbonic acids; Derivatives thereof **[5]**

329/04 . . Esters of monothiocarbonic acids **[5]**

329/06 . . . having sulfur atoms of thiocarbonic groups bound to acyclic carbon atoms **[5]**

329/08 . . . having sulfur atoms of thiocarbonic groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

329/10 . . . having sulfur atoms of thiocarbonic groups bound to carbon atoms of six-membered aromatic rings **[5]**

329/12 . Dithiocarbonic acids; Derivatives thereof **[5]**

329/14 . . Esters of dithiocarbonic acids **[5]**

329/16 . . . having sulfur atoms of dithiocarbonic groups bound to acyclic carbon atoms **[5]**

329/18 . . . having sulfur atoms of dithiocarbonic groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

329/20 . . . having sulfur atoms of dithiocarbonic groups bound to carbon atoms of six-membered aromatic rings **[5]**

331/00 Derivatives of thiocyanic acid or of isothiocyanic acid [5]

331/02 . Thiocyanates **[5]**

331/04 . . having sulfur atoms of thiocyanate groups bound to acyclic carbon atoms **[5]**

331/06 . . having sulfur atoms of thiocyanate groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

331/08 . . having sulfur atoms of thiocyanate groups bound to carbon atoms of six-membered aromatic rings **[5]**

331/10 . . having sulfur atoms of thiocyanate groups bound to carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen atoms **[5]**

331/12 . . having sulfur atoms of thiocyanate groups bound to carbon atoms of hydrocarbon radicals substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

331/14 . . having sulfur atoms of thiocyanate groups bound to carbon atoms of hydrocarbon radicals substituted by carboxyl groups **[5]**

331/16 . Isothiocyanates **[5]**

331/18 . . having isothiocyanate groups bound to acyclic carbon atoms **[5]**

331/20 . . . of a saturated carbon skeleton **[5]**

331/22 . . . of an unsaturated carbon skeleton **[5]**

331/24 . . . . the carbon skeleton containing six-membered aromatic rings **[5]**

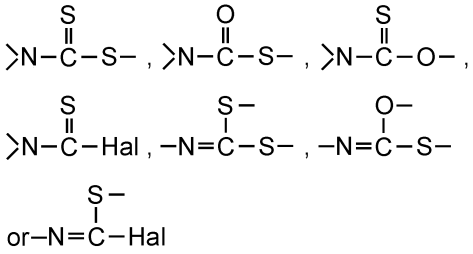
331/26 . . having isothiocyanate groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

331/28 . . having isothiocyanate groups bound to carbon atoms of six-membered aromatic rings **[5]**

331/30 . . containing at least two isothiocyanate groups bound to the same carbon skeleton **[5]**

331/32 . . having isothiocyanate groups acylated **[5]**

333/00 Derivatives of thiocarbamic acids, i.e. compounds containing any of the groups



the nitrogen atom not being part of nitro or nitroso groups [5]

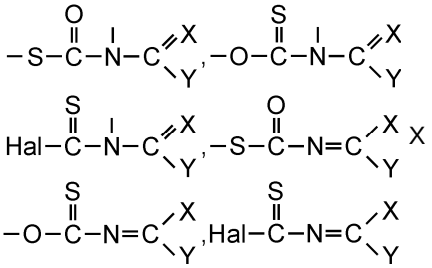
333/02 . Monothiocarbamic acids; Derivatives thereof **[5]**

333/04 . . having nitrogen atoms of thiocarbamic groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

333/06 . . having nitrogen atoms of thiocarbamic groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

333/08 . . having nitrogen atoms of thiocarbamic groups bound to carbon atoms of six-membered aromatic rings **[5]**

333/10 . . having nitrogen atoms of thiocarbamic groups being part of any of the groups



being a hetero atom, Y being any atom, e.g., N-acyl-thiocarbamates **[5]**

333/12 . . having nitrogen atoms of thiocarbamic groups bound to other hetero atoms **[5]**

333/14 . Dithiocarbamic acids; Derivatives thereof **[5]**

333/16 . . Salts of dithiocarbamic acids **[5]**

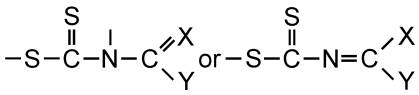
333/18 . . Esters of dithiocarbamic acids **[5]**

333/20 . . . having nitrogen atoms of dithiocarbamate groups bound to hydrogen atoms or to acyclic carbon atoms **[5]**

333/22 . . . having nitrogen atoms of dithiocarbamate groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

333/24 . . . having nitrogen atoms of dithiocarbamate groups bound to carbon atoms of six-membered aromatic rings **[5]**

333/26 . . . containing any of the groups



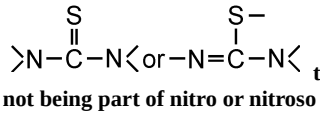
X being a hetero atom, Y being any atom, e.g. N-acyldithiocarbamates **[5]**

333/28 . . . having nitrogen atoms of dithiocarbamate groups bound to other hetero atoms **[5]**

333/30 . . having sulfur atoms of dithiocarbamic groups bound to other sulfur atoms **[5]**

333/32 . . . Thiuramsulfides; Thiurampolysulfides **[5]**

335/00 Thioureas, i.e. compounds containing any of the groups



the nitrogen atoms not being part of nitro or nitroso groups [5]

335/02 . Thiourea **[5]**

335/04 . Derivatives of thiourea **[5]**

335/06 . . having nitrogen atoms of thiourea groups bound to acyclic carbon atoms **[5]**

335/08 . . . of a saturated carbon skeleton **[5]**

335/10 . . . of an unsaturated carbon skeleton **[5]**

335/12 . . . . the carbon skeleton containing six-membered aromatic rings **[5]**

335/14 . . having nitrogen atoms of thiourea groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

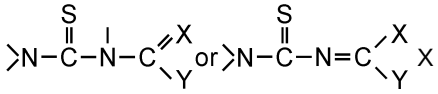
335/16 . . having nitrogen atoms of thiourea groups bound to carbon atoms of six-membered aromatic rings of a carbon skeleton **[5]**

335/18 . . . being further substituted by singly-bound oxygen atoms **[5]**

335/20 . . . being further substituted by nitrogen atoms, not being part of nitro or nitroso groups **[5]**

335/22 . . . being further substituted by carboxyl groups **[5]**

335/24 . . containing any of the groups



being a hetero atom, Y being any atom **[5]**

335/26 . . . Y being a hydrogen or a carbon atom, e.g. benzoylthioureas **[5]**

335/28 . . . Y being a hetero atom, e.g. thiobiuret **[5]**

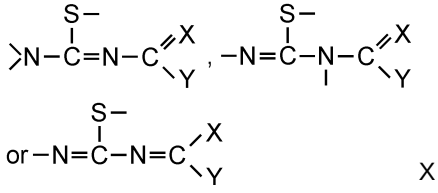
335/30 . Isothioureas **[5]**

335/32 . . having sulfur atoms of isothiourea groups bound to acyclic carbon atoms **[5]**

335/34 . . having sulfur atoms of isothiourea groups bound to carbon atoms of rings other than six-membered aromatic rings **[5]**

335/36 . . having sulfur atoms of isothiourea groups bound to carbon atoms of six-membered aromatic rings **[5]**

335/38 . . containing any of the groups



being a hetero atom, Y being any atom **[5]**

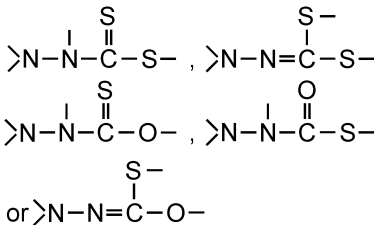
335/40 . having nitrogen atoms of thiourea or isothiourea groups further bound to other hetero atoms **[5]**

335/42 . . Sulfonylthioureas; Sulfonylisothioureas **[5]**

335/44 . . Sulfenylthioureas; Sulfenylisothioureas **[5]**

337/00 Derivatives of thiocarbonic acids containing functional groups covered by groups C07C 333/00 or C07C 335/00 in which at least one nitrogen atom of these functional groups is further bound to another nitrogen atom not being part of a nitro or nitroso group [5]

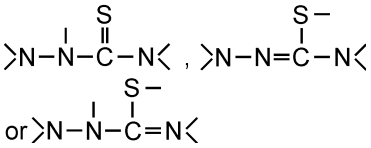
337/02 . Compounds containing any of the groups



e.g. thiocarbazates **[5]**

337/04 . . the other nitrogen atom being further doubly-bound to a carbon atom **[5]**

337/06 . Compounds containing any of the groups



e.g. thiosemicarbazides **[5]**

337/08 . . the other nitrogen atom being further doubly-bound to a carbon atom, e.g. thiosemicarbazones **[5]**

337/10 . the two nitrogen atoms of the functional group being doubly-bound to each other **[5]**

381/00 Compounds containing carbon and sulfur and having functional groups not covered by groups C07C 301/00 to C07C 337/00 [5]

381/02 . Thiosulfates **[5]**

381/04 . Thiosulfonates **[5]**

381/06 . Compounds containing sulfur atoms only bound to two nitrogen atoms **[5]**

381/08 . . having at least one of the nitrogen atoms acylated **[5]**

381/10 . Compounds containing sulfur atoms doubly-bound to nitrogen atoms **[5]**

381/12 . Sulfonium compounds **[5]**

381/14 . Compounds containing a carbon atom having four bonds to hetero atoms, with a double bond to one hetero atom and at least one bond to a sulfur atom further doubly-bound to oxygen atoms **[5]**

391/00 Compounds containing selenium [5]

391/02 . having selenium atoms bound to carbon atoms of six-membered aromatic rings **[5]**

395/00 Compounds containing tellurium [5]

401/00 Irradiation products of cholesterol or its derivatives; Vitamin D derivatives, 9,10-seco cyclopenta[a]phenanthrene or analogues obtained by chemical preparation without irradiation [5]

403/00 Derivatives of cyclohexane or of a cyclohexene, having a side-chain containing an acyclic unsaturated part of at least four carbon atoms, this part being directly attached to the cyclohexane or cyclohexene rings, e.g. vitamin A, beta-carotene, beta-ionone [5]

403/02 . having side-chains containing only carbon and hydrogen atoms **[5]**

403/04 . having side-chains substituted by halogen atoms **[5]**

403/06 . having side-chains substituted by singly-bound oxygen atoms **[5]**

403/08 . . by hydroxy groups **[5]**

403/10 . . by etherified hydroxy groups **[5]**

403/12 . . by esterified hydroxy groups **[5]**

403/14 . having side-chains substituted by doubly-bound oxygen atoms **[5]**

403/16 . . not being part of −CHO groups **[5]**

403/18 . having side-chains substituted by nitrogen atoms **[5]**

403/20 . having side-chains substituted by carboxyl groups **[5]**

403/22 . having side-chains substituted by sulfur atoms **[5]**

403/24 . having side-chains substituted by six-membered non-aromatic rings, e.g. beta-carotene **[5]**

405/00 Compounds containing a five-membered ring having two side-chains in ortho position to each other, and having oxygen atoms directly attached to the ring in ortho position to one of the side-chains, one side-chain containing, not directly attached to the ring, a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, and the other side-chain having oxygen atoms attached in gamma-position to the ring, e.g. prostaglandins [5]

407/00 Preparation of peroxy compounds [5]

409/00 Peroxy compounds [5]

409/02 . the −O−O− group being bound between a carbon atom, not further substituted by oxygen atoms, and hydrogen, i.e. hydroperoxides **[5]**

409/04 . . the carbon atom being acyclic **[5]**

409/06 . . . Compounds containing rings other than six-membered aromatic rings **[5]**

409/08 . . . Compounds containing six-membered aromatic rings **[5]**

409/10 . . . . Cumene hydroperoxide **[5]**

409/12 . . . . with two alpha,alpha-dialkylmethyl-hydroperoxy groups bound to carbon atoms of the same six-membered aromatic ring **[5]**

409/14 . . the carbon atom belonging to a ring other than a six-membered aromatic ring **[5]**

409/16 . the −O−O− group being bound between two carbon atoms not further substituted by oxygen atoms, i.e. peroxides **[5]**

409/18 . . at least one of the carbon atoms belonging to a ring other than a six-membered aromatic ring **[5]**

409/20 . the −O−O− group being bound to a carbon atom further substituted by singly-bound oxygen atoms **[5]**

409/22 . . having two −O−O− groups bound to the carbon atom **[5]**

409/24 . the −O−O− group being bound between a 〉C=O group and hydrogen, i.e. peroxy acids **[5]**

409/26 . . Peracetic acid **[5]**

409/28 . . a 〉C=O group being bound to a carbon atom of a ring other than a six-membered aromatic ring **[5]**

409/30 . . a 〉C=O group being bound to a carbon atom of a six-membered aromatic ring **[5]**

409/32 . the −O−O− group being bound between two 〉C=O groups **[5]**

409/34 . . both belonging to carboxylic acids **[5]**

409/36 . . . Diacetyl peroxide **[5]**

409/38 . the −O−O− group being bound between a 〉C=O group and a carbon atom, not further substituted by oxygen atoms, i.e. esters of peroxy acids **[5]**

409/40 . containing nitrogen atoms **[5]**

409/42 . containing sulfur atoms **[5]**

409/44 . . with sulfur atoms directly bound to the −O−O− groups, e.g. persulfonic acids **[5]**

C07D HETEROCYCLIC COMPOUNDS [2]

(1) This subclass does not cover compounds containing saccharide radicals (as defined in Note (3) following the title of subclass C07H), which are covered by subclass C07H. **[2]**

(2) In this subclass, in compounds containing a hetero ring covered by group C07D 295/00 and at least one other hetero ring, the hetero ring covered by group C07D 295/00 is considered as an acyclic chain containing nitrogen atoms. **[3]**

(3) In this subclass, the following terms or expressions are used with the meanings indicated:
- "hetero ring" is a ring having at least one halogen, nitrogen, oxygen, sulfur, selenium or tellurium atom as a ring member; **[2]**
- "bridged" means the presence of at least one fusion other than ortho, peri or spiro; **[2]**
- two rings are "condensed" if they share at least one ring member, i.e. "spiro" and "bridged" are considered as condensed; **[2]**
- "condensed ring system" is a ring system in which all rings are condensed among themselves; **[2]**
- "number of relevant rings" in a condensed ring system equals the number of scissions necessary to convert the ring system into one acyclic chain; **[2]**
- "relevant rings" in a condensed ring system, i.e. the rings which taken together describe all the links between every atom of the ring system, are chosen according to the following criteria consecutively:
  (a) lowest number of ring members;
  (b) highest number of hetero atoms as ring members;
  (c) lowest number of members shared with other rings;
  (d) last place in the classification scheme. **[2]**

(4) Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C to C07K and within these subclasses. **[8]**

(5) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

(6) In this subclass, in the absence of an indication to the contrary:

(a) compounds having only one hetero ring are classified in the last appropriate place in one of the groups C07D 203/00 to C07D 347/00. The same applies for compounds having more hetero rings covered by the same main group, neither condensed among themselves nor condensed with a common carbocyclic ring system; **[2]**

(b) compounds having two or more hetero rings covered by different main groups neither condensed among themselves nor condensed with a common carbocyclic ring system are classified in the last appropriate place in one of the groups C07D 401/00 to C07D 421/00; **[2]**

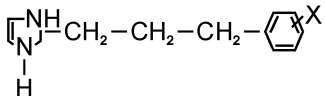
(c) compounds having two or more relevant hetero rings, covered by the same or by different main groups, which are condensed among themselves or condensed with a common carbocyclic ring system, are classified in the last appropriate place in one of the groups C07D 451/00 to C07D 519/00. **[2]**

(7) In this subclass:

– where a compound may exist in tautomeric forms, it is classified as though existing in the form which is classified last in the system. Therefore, double bonds between ring members and non-ring members and double bonds between ring members themselves are considered equivalent in determining the degree of hydrogenation of the ring. Formulae are considered to be written in Kekule form; **[2]**

– hydrocarbon radicals containing a carbocyclic ring and an acyclic chain by which it is linked to the hetero ring and being substituted on both the carbocyclic ring and the acyclic chain by hetero atoms or by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, are classified according to the substituents on the acyclic chain. For example, the compound

 is classified in group C07D 233/22, and the compound



is classified in groups C07D 233/24 and C07D 233/26, where X $-NH_2$, $-NHCOCH_3$, or $-COOCH_3$. **[2]**

Subclass index

Heterocyclic compounds having only nitrogen as ring hetero atom [2]

201/00 Preparation, separation, purification, or stabilisation of unsubstituted lactams [2]

201/02 . Preparation of lactams **[2]**
201/04 . . from or via oximes by Beckmann rearrangement **[2]**
201/06 . . . from ketones by simultaneous oxime formation and rearrangement **[2]**
201/08 . . from carboxylic acids or derivatives thereof, e.g. hydroxy carboxylic acids, lactones, nitriles **[2]**
201/10 . . from cycloaliphatic compounds by simultaneous nitrosylation and rearrangement **[2]**
201/12 . . by depolymerising polyamides **[2]**
201/14 . Preparation of salts or adducts of lactams **[2]**
201/16 . Separation or purification (separation of inorganic salts C01) **[2]**
201/18 . Stabilisation **[2]**

203/00 Heterocyclic compounds containing three-membered rings with one nitrogen atom as the only ring hetero atom [2]

203/02 . Preparation by ring-closure **[2]**
203/04 . not condensed with other rings **[2]**
203/06 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
203/08 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to the ring nitrogen atom **[2]**
203/10 . . . . Radicals substituted by singly bound oxygen atoms **[2]**
203/12 . . . . Radicals substituted by nitrogen atoms not forming part of a nitro radical **[2]**
203/14 . . . . with carbocyclic rings directly attached to the ring nitrogen atom **[2]**
203/16 . . . with acylated ring nitrogen atoms **[2]**
203/18 . . . . by carboxylic acids, or by sulfur or nitrogen analogues thereof **[2]**
203/20 . . . . by carbonic acid, or by sulfur or nitrogen analogues thereof, e.g. carbamates **[2]**
203/22 . . . with hetero atoms directly attached to the ring nitrogen atom **[2]**
203/24 . . . . Sulfur atoms **[2]**
203/26 . condensed with carbocyclic rings or ring systems **[2]**

205/00 Heterocyclic compounds containing four-membered rings with one nitrogen atom as the only ring hetero atom [2]

205/02 . not condensed with other rings **[2]**
205/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
205/06 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**
205/08 . . . with one oxygen atom directly attached in position 2, e.g. beta-lactams **[2]**
205/085 . . . . with a nitrogen atom directly attached in position 3 **[5]**
205/09 . . . . with a sulfur atom directly attached in position 4 **[5]**
205/095 . . . . . and with a nitrogen atom directly attached in position 3 **[5]**
205/10 . . having two double bonds between ring members or between ring members and non-ring members **[2]**
205/12 . condensed with carbocyclic rings or ring systems **[2]**

207/00 Heterocyclic compounds containing five-membered rings not condensed with other rings, with one nitrogen atom as the only ring hetero atom [2]

Note

Pyrrolidines having only hydrogen atoms attached to the ring carbon atoms are classified in group C07D 295/00. **[2]**

207/02 . with only hydrogen or carbon atoms directly attached to the ring nitrogen atom **[2]**
207/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
207/06 . . . with radicals, containing only hydrogen and carbon atoms, attached to ring carbon atoms **[2]**
207/08 . . . with hydrocarbon radicals, substituted by hetero atoms, attached to ring carbon atoms **[2]**
207/09 . . . . Radicals substituted by nitrogen atoms not forming part of a nitro radical **[3]**
207/10 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
207/12 . . . . Oxygen or sulfur atoms **[2]**

207/14 . . . . Nitrogen atoms not forming part of a nitro radical **[2]**
207/16 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
207/18 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**
207/20 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
207/22 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
207/24 . . . . Oxygen or sulfur atoms **[2]**
207/26 . . . . . 2-Pyrrolidones **[2]**
207/263 . . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms directly attached to other ring carbon atoms **[3]**
207/267 . . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms directly attached to the ring nitrogen atom **[3]**
207/27 . . . . . with substituted hydrocarbon radicals directly attached to the ring nitrogen atom **[3]**
207/273 . . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to other ring carbon atoms **[3]**
207/277 . . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[3]**
207/28 . . . . . 2-Pyrrolidone-5- carboxylic acids; Functional derivatives thereof, e.g. esters, nitriles **[2,3]**
207/30 . . having two double bonds between ring members or between ring members and non-ring members **[2]**
207/32 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
207/323 . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms directly attached to the ring nitrogen atoms **[3]**
207/325 . . . . with substituted hydrocarbon radicals directly attached to the ring nitrogen atom **[3]**
207/327 . . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[3]**
207/33 . . . . with substituted hydrocarbon radicals, directly attached to ring carbon atoms **[3]**
207/333 . . . . . Radicals substituted by oxygen or sulfur atoms **[3]**
207/335 . . . . . Radicals substituted by nitrogen atoms not forming part of a nitro radical **[3]**
207/337 . . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[3]**
207/34 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
207/36 . . . . Oxygen or sulfur atoms **[2]**
207/38 . . . . . 2-Pyrrolones **[2]**
207/40 . . . . . 2,5-Pyrrolidine-diones **[2]**
207/404 . . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms directly attached to other ring carbon atoms, e.g. succinimide **[3]**
207/408 . . . . . Radicals containing only hydrogen and carbon atoms attached to ring carbon atoms **[3]**
207/412 . . . . . Acyclic radicals containing more than six carbon atoms **[3]**
207/416 . . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to other ring carbon atoms **[3]**
207/42 . . . . Nitro radicals **[2]**
207/44 . . having three double bonds between ring members or between ring members and non-ring members **[2]**
207/444 . . . having two doubly-bound oxygen atoms directly attached in positions 2 and 5 **[3]**
207/448 . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms directly attached to other ring carbon atoms, e.g. maleimide **[3]**
207/452 . . . . . with hydrocarbon radicals, substituted by hetero atoms, directly attached to the ring nitrogen atom **[3]**
207/456 . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to other ring carbon atoms **[3]**
207/46 . with hetero atoms directly attached to the ring nitrogen atom **[2]**
207/48 . . Sulfur atoms **[2]**
207/50 . . Nitrogen atoms **[2]**

209/00 Heterocyclic compounds containing five-membered rings, condensed with other rings, with one nitrogen atom as the only ring hetero atom [2]

209/02 . condensed with one carbocyclic ring **[2]**
209/04 . . Indoles; Hydrogenated indoles **[2]**
209/06 . . . Preparation of indole from coal-tar **[2]**
209/08 . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to carbon atoms of the hetero ring **[2]**
209/10 . . . with substituted hydrocarbon radicals attached to carbon atoms of the hetero ring **[2]**
209/12 . . . . Radicals substituted by oxygen atoms **[2]**
209/14 . . . . Radicals substituted by nitrogen atoms, not forming part of a nitro radical **[2]**
209/16 . . . . . Tryptamines **[2]**

209/18 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**

209/20 . . . . . substituted additionally by nitrogen atoms, e.g. tryptophane **[2]**

209/22 . . . . . with an aralkyl radical attached to the ring nitrogen atom **[2]**

209/24 . . . . . with an alkyl or cycloalkyl radical attached to the ring nitrogen atom **[2]**

209/26 . . . . . with an acyl radical attached to the ring nitrogen atom **[2]**

209/28 . . . . . 1-(4-Chlorobenzoyl)-2-methyl-indolyl-3-acetic acid, substituted in position 5 by an oxygen or nitrogen atom; Esters thereof **[2]**

209/30 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, directly attached to carbon atoms of the hetero ring **[2]**

209/32 . . . . Oxygen atoms **[2]**

209/34 . . . . . in position 2 **[2]**

209/36 . . . . . in position 3, e.g. adrenochrome **[2]**

209/38 . . . . . in positions 2 and 3, e.g. isatin **[2]**

209/40 . . . . Nitrogen atoms, not forming part of a nitro radical, e.g. isatin semicarbazone **[2]**

209/42 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**

209/43 . . . with an $-OCH_2CH(OH)CH_2NH_2$ radical, which may be further substituted, attached in positions 4, 5, 6 or 7 **[5]**

209/44 . . Iso-indoles; Hydrogenated iso-indoles **[2]**

209/46 . . . with an oxygen atom in position 1 **[2]**

209/48 . . . with oxygen atoms in positions 1 and 3, e.g. phthalimide **[2]**

209/49 . . . . and having in the molecule an acyl radical containing a saturated three-membered ring, e.g. chrysanthemumic acid esters **[5]**

209/50 . . . with oxygen and nitrogen atoms in positions 1 and 3 **[2]**

209/52 . . condensed with a ring other than six-membered **[2]**

209/54 . . Spiro-condensed **[2]**

209/56 . Ring systems containing three or more rings **[2]**

209/58 . . [b]- or [c]-condensed **[2]**

209/60 . . . Naphtho [b] pyrroles; Hydrogenated naphtho [b] pyrroles **[2]**

209/62 . . . Naphtho [c] pyrroles; Hydrogenated naphtho [c] pyrroles **[2]**

209/64 . . . . with an oxygen atom in position 1 **[2]**

209/66 . . . . with oxygen atoms in positions 1 and 3 **[2]**

209/68 . . . . with oxygen and nitrogen atoms in positions 1 and 3 **[2]**

209/70 . . . containing carbocyclic rings other than six-membered **[2]**

209/72 . . . 4,7-Endo-alkylene-iso-indoles **[2]**

209/74 . . . . with an oxygen atom in position 1 **[2]**

209/76 . . . . with oxygen atoms in positions 1 and 3 **[2]**

209/78 . . . . with oxygen and nitrogen atoms in positions 1 and 3 **[2]**

209/80 . . [b, c]- or [b, d]-condensed **[2]**

209/82 . . . Carbazoles; Hydrogenated carbazoles **[2]**

209/84 . . . . Separation, e.g. from tar; Purification **[2]**

209/86 . . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to carbon atoms of the ring system **[2]**

209/88 . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to carbon atoms of the ring system **[2]**

209/90 . . . Benzo [c, d] indoles; Hydrogenated benzo [c, d] indoles **[2]**

209/92 . . . . Naphthostyrils **[2]**

209/94 . . . containing carbocyclic rings other than six-membered **[4]**

209/96 . . Spiro-condensed ring systems **[2]**

211/00 Heterocyclic compounds containing hydrogenated pyridine rings, not condensed with other rings [2]

(1) In this group, the following term is used with the meaning indicated:
– "hydrogenated" means having less than three double bonds between ring members or between ring members and non-ring members. **[2]**

(2) Piperidines having only hydrogen atoms attached to ring carbon atoms are classified in group C07D 295/00. **[2]**

211/02 . Preparation by ring-closure or hydrogenation **[2]**

211/04 . with only hydrogen or carbon atoms directly attached to the ring nitrogen atom **[2]**

211/06 . . having no double bonds between ring members or between ring members and non-ring members **[2]**

211/08 . . . with hydrocarbon or substituted hydrocarbon radicals directly attached to ring carbon atoms **[2,3]**

211/10 . . . . with radicals containing only carbon and hydrogen atoms attached to ring carbon atoms **[2,3]**

211/12 . . . . . with only hydrogen atoms attached to the ring nitrogen atom **[2,3]**

211/14 . . . . . with hydrocarbon or substituted hydrocarbon radicals attached to the ring nitrogen atom **[2]**

211/16 . . . . . with acylated ring nitrogen atom **[2]**

211/18 . . . . with substituted hydrocarbon radicals attached to ring carbon atoms **[2]**

211/20 . . . . . with hydrocarbon radicals, substituted by singly bound oxygen or sulfur atoms (bound to the same carbon atom C07D 211/30) **[2]**

211/22 . . . . . by oxygen atoms **[2]**

211/24 . . . . . by sulfur atoms to which a second hetero atom is attached **[2]**

211/26 . . . . . with hydrocarbon radicals, substituted by nitrogen atoms **[2]**

211/28 . . . . . to which a second hetero atom is attached **[2]**

211/30 . . . . . with hydrocarbon radicals, substituted by doubly bound oxygen or sulfur atoms or by two oxygen or sulfur atoms singly bound to the same carbon atom **[2]**

211/32 . . . . . by oxygen atoms **[2]**

211/34 . . . . . with hydrocarbon radicals, substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**

211/36 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
211/38 . . . . Halogen atoms or nitro radicals **[2]**
211/40 . . . . Oxygen atoms **[2]**
211/42 . . . . . attached in position 3 or 5 **[2]**
211/44 . . . . . attached in position 4 **[2]**
211/46 . . . . . having a hydrogen atom as the second substituent in position 4 **[2]**
211/48 . . . . . having an acyclic carbon atom attached in position 4 **[2]**
211/50 . . . . . Aroyl radical **[2]**
211/52 . . . . . having an aryl radical as the second substituent in position 4 **[2]**
211/54 . . . . Sulfur atoms **[2]**
211/56 . . . . Nitrogen atoms (nitro radicals C07D 211/38) **[2]**
211/58 . . . . . attached in position 4 **[2]**
211/60 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
211/62 . . . . . attached in position 4 **[2]**
211/64 . . . . . having an aryl radical as the second substituent in position 4 **[2]**
211/66 . . . . . having a hetero atom as the second substituent in position 4 **[2]**
211/68 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**
211/70 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
211/72 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms, with at the most one bond to halogen, directly attached to ring carbon atoms **[2]**
211/74 . . . . Oxygen atoms **[2]**
211/76 . . . . . attached in position 2 or 6 **[2]**
211/78 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**
211/80 . . having two double bonds between ring members or between ring members and non-ring members **[2]**
211/82 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
211/84 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, directly attached to ring carbon atoms **[2]**
211/86 . . . . Oxygen atoms **[2]**
211/88 . . . . . attached in positions 2 and 6, e.g. glutarimide **[2]**
211/90 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**
211/92 . with a hetero atom directly attached to the ring nitrogen atom **[2]**
211/94 . . Oxygen atom, e.g. piperidine N-oxide **[2]**
211/96 . . Sulfur atom **[2]**
211/98 . . Nitrogen atom **[2]**

213/00 Heterocyclic compounds containing six-membered rings, not condensed with other rings, with one nitrogen atom as the only ring hetero atom and three or more double bonds between ring members or between ring members and non-ring members [2]

213/02 . having three double bonds between ring members or between ring members and non-ring members **[2]**
213/04 . . having no bond between the ring nitrogen atom and a non-ring member or having only hydrogen or carbon atoms directly attached to the ring nitrogen atom **[2]**
213/06 . . . containing only hydrogen and carbon atoms in addition to the ring nitrogen atom **[2]**
213/08 . . . . Preparation by ring-closure **[2]**
213/09 . . . . . involving the use of ammonia, amines, amine salts, or nitriles **[3]**
213/10 . . . . . from acetaldehyde or cyclic polymers thereof **[3]**
213/12 . . . . . from unsaturated compounds **[3]**
213/127 . . . . Preparation from compounds containing pyridine rings **[3]**
213/133 . . . . Preparation by dehydrogenation of hydrogenated pyridine compounds **[3]**
213/14 . . . . Preparation from compounds containing heterocyclic oxygen **[2]**
213/16 . . . . containing only one pyridine ring **[2]**
213/18 . . . . . Salts thereof **[2]**
213/20 . . . . . Quaternary compounds thereof **[2]**
213/22 . . . . containing two or more pyridine rings directly linked together, e.g. bipyridyl **[2]**
213/24 . . . with substituted hydrocarbon radicals attached to ring carbon atoms **[2]**
213/26 . . . . Radicals substituted by halogen atoms or nitro radicals **[2]**
213/28 . . . . Radicals substituted by singly-bound oxygen or sulfur atoms (bound to the same carbon atom C07D 213/44) **[2]**
213/30 . . . . . Oxygen atoms **[2]**
213/32 . . . . . Sulfur atoms **[2]**
213/34 . . . . . to which a second hetero atom is attached **[2]**
213/36 . . . . Radicals substituted by singly-bound nitrogen atoms (nitro radicals C07D 213/26) **[2]**
213/38 . . . . . having only hydrogen or hydrocarbon radicals attached to the substituent nitrogen atom **[2]**
213/40 . . . . . Acylated substituent nitrogen atom **[2]**
213/42 . . . . . having hetero atoms attached to the substituent nitrogen atom (nitro radicals C07D 213/26) **[2]**
213/44 . . . . Radicals substituted by doubly-bound oxygen, sulfur, or nitrogen atoms, or by two such atoms singly-bound to the same carbon atom **[2]**
213/46 . . . . . Oxygen atoms **[2]**
213/48 . . . . . Aldehydo radicals **[2]**
213/50 . . . . . Ketonic radicals **[2]**
213/51 . . . . . Acetal radicals **[2]**
213/52 . . . . . Sulfur atoms **[2]**
213/53 . . . . . Nitrogen atoms **[2]**
213/54 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
213/55 . . . . . Acids; Esters **[2]**

213/56 . . . . . Amides **[2]**
213/57 . . . . . Nitriles **[2]**
213/58 . . . . . Amidines **[2]**
213/59 . . . . . with at least one of the bonds being to sulfur **[2]**
213/60 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
213/61 . . . . Halogen atoms or nitro radicals **[2]**
213/62 . . . . Oxygen or sulfur atoms **[2]**
213/63 . . . . . One oxygen atom **[2]**
213/64 . . . . . attached in position 2 or 6 **[2]**
213/643 . . . . . 2-Phenoxypyridines; Derivatives thereof **[5]**
213/647 . . . . . and having in the molecule an acyl radical containing a saturated three-membered ring, e.g. chrysanthemumic acid esters **[5]**
213/65 . . . . . attached in position 3 or 5 **[2]**
213/66 . . . . . having in position 3 an oxygen atom and in each of the positions 4 and 5 a carbon atom bound to an oxygen, sulfur, or nitrogen atom, e.g. pyridoxal **[2]**
213/67 . . . . . 2-Methyl-3-hydroxy-4,5-bis (hydroxy-methyl) pyridine, i.e. pyridoxine **[2]**
213/68 . . . . . attached in position 4 **[2]**
213/69 . . . . . Two or more oxygen atoms **[2]**
213/70 . . . . . Sulfur atoms **[4]**
213/71 . . . . . to which a second hetero atom is attached **[4]**
213/72 . . . . Nitrogen atoms (nitro radicals C07D 213/61) **[2]**
213/73 . . . . . Unsubstituted amino or imino radicals **[2]**
213/74 . . . . . Amino or imino radicals substituted by hydrocarbon or substituted hydrocarbon radicals **[2]**
213/75 . . . . . Amino or imino radicals, acylated by carboxylic or carbonic acids, or by sulfur or nitrogen analogues thereof, e.g. carbamates **[2]**
213/76 . . . . . to which a second hetero atom is attached (nitro radicals C07D 213/61) **[2]**
213/77 . . . . . Hydrazine radicals **[2]**
213/78 . . . . Carbon atoms having three bonds to hetero atoms, with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
213/79 . . . . . Acids; Esters **[2]**
213/80 . . . . . in position 3 **[2]**
213/803 . . . . . Processes of preparation **[3]**
213/807 . . . . . by oxidation of pyridines or condensed pyridines **[3]**
213/81 . . . . . Amides; Imides **[2]**
213/82 . . . . . in position 3 **[2]**
213/83 . . . . . Thioacids; Thioesters; Thioamides; Thioimides **[2]**
213/84 . . . . . Nitriles **[2]**
213/85 . . . . . in position 3 **[2]**
213/86 . . . . . Hydrazides; Thio or imino analogues thereof **[2]**
213/87 . . . . . in position 3 **[2]**
213/88 . . . . . Nicotinoylhydrazones **[2]**
213/89 . . with hetero atoms directly attached to the ring nitrogen atom **[2]**
213/90 . having more than three double bonds between ring members or between ring members and non-ring members **[2]**

215/00 Heterocyclic compounds containing quinoline or hydrogenated quinoline ring systems [2]

215/02 . having no bond between the ring nitrogen atom and a non-ring member or having only hydrogen atoms or carbon atoms directly attached to the ring nitrogen atom **[2]**
215/04 . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to the ring carbon atoms **[2]**
215/06 . . . having only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, attached to the ring nitrogen atom **[2]**
215/08 . . . with acylated ring nitrogen atom **[2]**
215/10 . . . Quaternary compounds **[2]**
215/12 . . with substituted hydrocarbon radicals attached to ring carbon atoms **[2]**
215/14 . . . Radicals substituted by oxygen atoms **[2]**
215/16 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
215/18 . . . Halogen atoms or nitro radicals **[2]**
215/20 . . . Oxygen atoms (quinophthalones C09B 25/00) **[2]**
215/22 . . . . attached in position 2 or 4 **[2]**
215/227 . . . . . only one oxygen atom which is attached in position 2 **[5]**
215/233 . . . . . only one oxygen atom which is attached in position 4 **[5]**
215/24 . . . . attached in position 8 **[2]**
215/26 . . . . . Alcohols; Ethers thereof **[2]**
215/28 . . . . . with halogen atoms or nitro radicals in positions 5, 6 or 7 **[2]**
215/30 . . . . . Metal salts; Chelates **[2]**
215/32 . . . . . Esters **[2]**
215/34 . . . . . Carbamates **[2]**
215/36 . . . Sulfur atoms (C07D 215/24 takes precedence) **[2]**
215/38 . . . Nitrogen atoms (nitro radicals C07D 215/18) **[2]**
215/40 . . . . attached in position 8 **[2]**
215/42 . . . . attached in position 4 **[2]**
215/44 . . . . . with aryl radicals attached to said nitrogen atoms **[2]**
215/46 . . . . . with hydrocarbon radicals, substituted by nitrogen atoms, attached to said nitrogen atoms **[2]**
215/48 . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**
215/50 . . . . attached in position 4 **[2]**
215/52 . . . . . with aryl radicals attached in position 2 **[2]**
215/54 . . . . attached in position 3 **[2]**
215/56 . . . . . with oxygen atoms in position 4 **[2]**
215/58 . with hetero atoms directly attached to the ring nitrogen atom **[2]**
215/60 . . N-oxides **[2]**

217/00 Heterocyclic compounds containing isoquinoline or hydrogenated isoquinoline ring systems [2]

217/02 . with only hydrogen atoms or radicals containing only carbon and hydrogen atoms, directly attached to carbon atoms of the nitrogen-containing ring; Alkylene-bis-isoquinolines **[2]**
217/04 . . with hydrocarbon or substituted hydrocarbon radicals attached to the ring nitrogen atom **[2]**
217/06 . . with the ring nitrogen atom acylated by carboxylic or carbonic acids, or with sulfur or nitrogen analogues thereof, e.g. carbamates **[2]**
217/08 . . with a hetero atom directly attached to the ring nitrogen atom **[2]**
217/10 . . Quaternary compounds **[2]**
217/12 . with radicals, substituted by hetero atoms, attached to carbon atoms of the nitrogen-containing ring **[2]**
217/14 . . other than aralkyl radicals **[2]**
217/16 . . . substituted by oxygen atoms **[2]**
217/18 . . Aralkyl radicals **[2]**
217/20 . . . with oxygen atoms directly attached to the aromatic ring of said aralkyl radical, e.g. papaverine **[2]**
217/22 . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to carbon atoms of the nitrogen-containing ring **[2]**
217/24 . . Oxygen atoms **[2]**
217/26 . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**

219/00 Heterocyclic compounds containing acridine or hydrogenated acridine ring systems [2]

219/02 . with only hydrogen, hydrocarbon or substituted hydrocarbon radicals, directly attached to carbon atoms of the ring system **[2]**
219/04 . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to carbon atoms of the ring system **[2]**
219/06 . . Oxygen atoms **[2]**
219/08 . . Nitrogen atoms (acridine dyes C09B 15/00) **[2]**
219/10 . . . attached in position 9 **[2]**
219/12 . . . . Aminoalkyl-amino radicals attached in position 9 **[2]**
219/14 . with hydrocarbon radicals, substituted by nitrogen atoms, attached to the ring nitrogen atom **[2]**
219/16 . with acyl radicals, substituted by nitrogen atoms, attached to the ring nitrogen atom **[2]**

221/00 Heterocyclic compounds containing six-membered rings having one nitrogen atom as the only ring hetero atom, not provided for by groups C07D 211/00 to C07D 219/00 [2]

221/02 . condensed with carbocyclic rings or ring systems **[2]**
221/04 . . Ortho- or peri-condensed ring systems **[2]**
221/06 . . . Ring systems of three rings **[2]**
221/08 . . . . Aza-anthracenes (acridine C07D 219/00) **[2]**
221/10 . . . . Aza-phenanthrenes **[2]**
221/12 . . . . . Phenanthridines **[2]**
221/14 . . . . Aza-phenalenes, e.g. 1,8-naphthalimide **[2]**
221/16 . . . . containing carbocyclic rings other than six-membered **[2]**
221/18 . . . Ring systems of four or more rings **[2]**
221/20 . . Spiro-condensed ring systems **[2]**
221/22 . . Bridged ring systems **[2]**
221/24 . . . Camphidines **[2]**
221/26 . . . Benzomorphans **[2]**
221/28 . . . Morphinans **[2]**

223/00 Heterocyclic compounds containing seven-membered rings having one nitrogen atom as the only ring hetero atom [2]

Note

Hexamethylene imines or 3-azabicyclo [3.2.2] nonanes, having only hydrogen atoms attached to the ring carbon atoms, are classified in group C07D 295/00. **[2]**

223/02 . not condensed with other rings **[2]**
223/04 . . with only hydrogen atoms, halogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
223/06 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms (halogen atoms C07D 223/04) **[2]**
223/08 . . . Oxygen atoms **[2]**
223/10 . . . . attached in position 2 **[2]**
223/12 . . . Nitrogen atoms not forming part of a nitro radical **[2]**
223/14 . condensed with carbocyclic rings or ring systems **[2]**
223/16 . . Benzazepines; Hydrogenated benzazepines **[2]**
223/18 . . Dibenzazepines; Hydrogenated dibenzazepines **[2]**
223/20 . . . Dibenz [b, e] azepines; Hydrogenated dibenz [b, e] azepines **[2]**
223/22 . . . Dibenz [b, f] azepines; Hydrogenated dibenz [b, f] azepines **[2]**
223/24 . . . . with hydrocarbon radicals, substituted by nitrogen atoms, attached to the ring nitrogen atom **[2]**
223/26 . . . . . having a double bond between positions 10 and 11 **[2]**
223/28 . . . . . having a single bond between positions 10 and 11 **[2]**
223/30 . . . . with hetero atoms directly attached to the ring nitrogen atom **[2]**
223/32 . . containing carbocyclic rings other than six-membered **[2]**

225/00 Heterocyclic compounds containing rings of more than seven members having one nitrogen atom as the only ring hetero atom [2]

Note

Polymethyleneimines with at least five ring members and having only hydrogen atoms attached to the ring carbon atoms are classified in group C07D 295/00. **[3]**

225/02 . not condensed with other rings **[2]**
225/04 . condensed with carbocyclic rings or ring systems **[2]**
225/06 . . condensed with one six-membered ring **[2]**
225/08 . . condensed with two six-membered rings **[2]**

227/00 Heterocyclic compounds containing rings having one nitrogen atom as the only ring hetero atom, according to more than one of groups C07D 203/00 to C07D 225/00 [2]

Note

Polymethyleneimines with at least five ring members and having only hydrogen atoms attached to the ring carbon atoms are classified in group C07D 295/00. **[3]**

227/02 . with only hydrogen or carbon atoms directly attached to the ring nitrogen atom **[2]**
227/04 . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, attached to ring carbon atoms **[2]**
227/06 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
227/08 . . . Oxygen atoms **[2]**
227/087 . . . . One doubly-bound oxygen atom in position 2, e.g. lactams **[3]**
227/093 . . . . Two doubly-bound oxygen atoms attached to the carbon atoms adjacent to the ring nitrogen atom, e.g. dicarboxylic acid imides **[3]**
227/10 . . . Nitrogen atoms not forming part of a nitro radical **[2]**
227/12 . with hetero atoms directly attached to the ring nitrogen atom **[2]**

229/00 Heterocyclic compounds containing rings of less than five members having two nitrogen atoms as the only ring hetero atoms [2]

229/02 . containing three-membered rings **[3]**

231/00 Heterocyclic compounds containing 1,2-diazole or hydrogenated 1,2-diazole rings [2]

231/02 . not condensed with other rings **[2]**
231/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
231/06 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**
231/08 . . . with oxygen or sulfur atoms directly attached to ring carbon atoms **[2]**
231/10 . . having two or three double bonds between ring members or between ring members and non-ring members **[2]**
231/12 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
231/14 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
231/16 . . . . Halogen atoms or nitro radicals **[2]**
231/18 . . . . One oxygen or sulfur atom **[2]**
231/20 . . . . . One oxygen atom attached in position 3 or 5 **[2]**
231/22 . . . . . with aryl radicals attached to ring nitrogen atoms **[2]**
231/24 . . . . . having sulfone or sulfonic acid radicals in the molecule **[2]**
231/26 . . . . . 1-Phenyl-3-methyl-5- pyrazolones, unsubstituted or substituted on the phenyl ring **[2]**
231/28 . . . . Two oxygen or sulfur atoms **[2]**
231/30 . . . . . attached in position 3 and 5 **[2]**
231/32 . . . . . Oxygen atoms **[2]**
231/34 . . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, attached in position 4 **[2]**
231/36 . . . . . with hydrocarbon radicals, substituted by hetero atoms, attached in position 4 **[2]**
231/38 . . . . Nitrogen atoms (nitro radicals C07D 231/16) **[2]**
231/40 . . . . . Acylated on said nitrogen atom **[2]**
231/42 . . . . . Benzene-sulfonamido pyrazoles **[2]**
231/44 . . . . Oxygen and nitrogen or sulfur and nitrogen atoms **[2]**
231/46 . . . . . Oxygen atom in position 3 or 5 and nitrogen atom in position 4 **[2]**
231/48 . . . . . with hydrocarbon radicals attached to said nitrogen atom **[2]**
231/50 . . . . . Acylated on said nitrogen atom **[2]**
231/52 . . . . . Oxygen atom in position 3 and nitrogen atom in position 5, or vice-versa **[2]**
231/54 . condensed with carbocyclic rings or ring systems **[2]**
231/56 . . Benzopyrazoles; Hydrogenated benzopyrazoles **[2]**

233/00 Heterocyclic compounds containing 1,3-diazole or hydrogenated 1,3-diazole rings, not condensed with other rings [2]

233/02 . having no double bonds between ring members or between ring members and non-ring members **[2]**
233/04 . having one double bond between ring members or between a ring member and a non-ring member **[2]**
233/06 . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to ring carbon atoms **[2]**
233/08 . . . with alkyl radicals, containing more than four carbon atoms, directly attached to ring carbon atoms **[2]**
233/10 . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to ring nitrogen atoms **[2]**
233/12 . . . . with substituted hydrocarbon radicals attached to ring nitrogen atoms **[2]**
233/14 . . . . . Radicals substituted by oxygen atoms **[2]**
233/16 . . . . . Radicals substituted by nitrogen atoms **[2]**
233/18 . . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
233/20 . . with substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
233/22 . . . Radicals substituted by oxygen atoms **[2]**
233/24 . . . Radicals substituted by nitrogen atoms not forming part of a nitro radical **[2]**
233/26 . . . Radicals substituted by carbon atoms having three bonds to hetero atoms **[2]**
233/28 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
233/30 . . . Oxygen or sulfur atoms **[2]**
233/32 . . . . One oxygen atom **[2]**
233/34 . . . . . Ethylene-urea **[2]**
233/36 . . . . . with hydrocarbon radicals, substituted by nitrogen atoms, attached to ring nitrogen atoms **[2]**
233/38 . . . . . with acyl radicals or hetero atoms directly attached to ring nitrogen atoms **[2]**

233/40 . . . . Two or more oxygen atoms **[2]**
233/42 . . . . Sulfur atoms **[2]**
233/44 . . . Nitrogen atoms not forming part of a nitro radical **[2]**
233/46 . . . . with only hydrogen atoms attached to said nitrogen atoms **[2]**
233/48 . . . . with acyclic hydrocarbon or substituted acyclic hydrocarbon radicals, attached to said nitrogen atoms **[2]**
233/50 . . . . with carbocyclic radicals directly attached to said nitrogen atoms **[2]**
233/52 . . . . with hetero atoms directly attached to said nitrogen atoms **[2]**
233/54 . having two double bonds between ring members or between ring members and non-ring members **[2]**
233/56 . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, attached to ring carbon atoms **[2]**
233/58 . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, attached to ring nitrogen atoms **[2]**
233/60 . . . with hydrocarbon radicals, substituted by oxygen or sulfur atoms, attached to ring nitrogen atoms **[2]**
233/61 . . . with hydrocarbon radicals, substituted by nitrogen atoms not forming part of a nitro radical, attached to ring nitrogen atoms **[3]**
233/62 . . . with triarylmethyl radicals attached to ring nitrogen atoms (triarylmethane dyes C09B 11/26) **[2]**
233/64 . . with substituted hydrocarbon radicals attached to ring carbon atoms, e.g. histidine **[2]**
233/66 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
233/68 . . . Halogen atoms **[2]**
233/70 . . . One oxygen atom **[2]**
233/72 . . . Two oxygen atoms, e.g. hydantoin **[2]**
233/74 . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, attached to other ring members **[2]**
233/76 . . . . with substituted hydrocarbon radicals attached to the third ring carbon atom **[2]**
233/78 . . . . . Radicals substituted by oxygen atoms **[2]**
233/80 . . . . with hetero atoms or acyl radicals directly attached to ring nitrogen atoms **[2]**
233/82 . . . . . Halogen atoms **[2]**
233/84 . . . Sulfur atoms **[2]**
233/86 . . . Oxygen and sulfur atoms, e.g. thiohydantoin **[2]**
233/88 . . . Nitrogen atoms, e.g. allantoin (nitro radicals C07D 233/91) **[2]**
233/90 . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
233/91 . . . Nitro radicals **[2]**
233/92 . . . . attached in position 4 or 5 **[2]**
233/93 . . . . . with hydrocarbon radicals, substituted by halogen atoms, attached to other ring members **[2]**
233/94 . . . . . with hydrocarbon radicals, substituted by oxygen or sulfur atoms, attached to other ring members **[2]**
233/95 . . . . . with hydrocarbon radicals, substituted by nitrogen atoms, attached to other ring members **[2]**
233/96 . having three double bonds between ring members or between ring members and non-ring members **[2]**

235/00 Heterocyclic compounds containing 1,3-diazole or hydrogenated 1,3-diazole rings, condensed with other rings [2]

235/02 . condensed with carbocyclic rings or ring systems **[2]**
235/04 . . Benzimidazoles; Hydrogenated benzimidazoles **[2]**
235/06 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached in position 2 **[2]**
235/08 . . . . Radicals containing only hydrogen and carbon atoms **[2]**
235/10 . . . . Radicals substituted by halogen atoms or nitro radicals **[2]**
235/12 . . . . Radicals substituted by oxygen atoms **[2]**
235/14 . . . . Radicals substituted by nitrogen atoms (by nitro radicals C07D 235/10) **[2]**
235/16 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
235/18 . . . with aryl radicals directly attached in position 2 **[2]**
235/20 . . . Two benzimidazolyl-2 radicals linked together directly or via a hydrocarbon or substituted hydrocarbon radical **[2]**
235/22 . . . with hetero atoms directly attached to ring nitrogen atoms (C07D 235/10 takes precedence) **[2]**
235/24 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 2 **[2]**
235/26 . . . . Oxygen atoms **[2]**
235/28 . . . . Sulfur atoms **[2]**
235/30 . . . . Nitrogen atoms not forming part of a nitro radical **[2]**
235/32 . . . . . Benzimidazole-2-carbamic acids, unsubstituted or substituted; Esters thereof; Thio-analogues thereof **[2]**

237/00 Heterocyclic compounds containing 1,2-diazine or hydrogenated 1,2-diazine rings [2]

237/02 . not condensed with other rings **[2]**
237/04 . . having less than three double bonds between ring members or between ring members and non-ring members **[2]**
237/06 . . having three double bonds between ring members or between ring members and non-ring members **[2]**
237/08 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
237/10 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
237/12 . . . . Halogen atoms or nitro radicals **[2]**
237/14 . . . . Oxygen atoms **[2]**
237/16 . . . . . Two oxygen atoms **[2]**
237/18 . . . . Sulfur atoms **[2]**

237/20 . . . . Nitrogen atoms (nitro radicals C07D 237/12) **[2]**
237/22 . . . . Nitrogen and oxygen atoms **[2]**
237/24 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**
237/26 . condensed with carbocyclic rings or ring systems **[2]**
237/28 . . Cinnolines **[2]**
237/30 . . Phthalazines **[2]**
237/32 . . . with oxygen atoms directly attached to carbon atoms of the nitrogen-containing ring **[2]**
237/34 . . . with nitrogen atoms directly attached to carbon atoms of the nitrogen-containing ring, e.g. hydrazine radicals **[2]**
237/36 . . Benzo-cinnolines **[2]**

239/00 Heterocyclic compounds containing 1,3-diazine or hydrogenated 1,3-diazine rings [2]

239/02 . not condensed with other rings **[2]**
239/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
239/06 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**
239/08 . . . with hetero atoms directly attached in position 2 **[2]**
239/10 . . . . Oxygen or sulfur atoms **[2]**
239/12 . . . . Nitrogen atoms not forming part of a nitro radical **[2]**
239/14 . . . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, attached to said nitrogen atoms **[2]**
239/16 . . . . . acylated on said nitrogen atoms **[2]**
239/18 . . . . . with hetero atoms attached to said nitrogen atoms, except nitro radicals, e.g. hydrazine radicals **[2]**
239/20 . . having two double bonds between ring members or between ring members and non-ring members **[2]**
239/22 . . . with hetero atoms directly attached to ring carbon atoms **[2]**
239/24 . . having three or more double bonds between ring members or between ring members and non-ring members **[2]**
239/26 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
239/28 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, directly attached to ring carbon atoms **[2]**
239/30 . . . . Halogen atoms or nitro radicals **[2]**
239/32 . . . . One oxygen, sulfur or nitrogen atom **[2]**
239/34 . . . . . One oxygen atom **[2]**
239/36 . . . . . as doubly bound oxygen atom or as unsubstituted hydroxy radical **[2]**
239/38 . . . . . One sulfur atom **[2]**
239/40 . . . . . as doubly bound sulfur atom or as unsubstituted mercapto radical **[2]**
239/42 . . . . . One nitrogen atom (nitro radicals C07D 239/30; benzenesulfonamido-pyrimidines C07D 239/69) **[2]**
239/46 . . . . Two or more oxygen, sulfur or nitrogen atoms (benzenesulfonamido- pyrimidines C07D 239/69) **[2]**
239/47 . . . . . One nitrogen atom and one oxygen or sulfur atom, e.g. cytosine **[3]**
239/48 . . . . . Two nitrogen atoms **[2]**
239/49 . . . . . with an aralkyl radical, or substituted aralkyl radical, attached in position 5, e.g. trimethoprim **[3]**
239/50 . . . . . Three nitrogen atoms **[2]**
239/52 . . . . . Two oxygen atoms **[2]**
239/54 . . . . . as doubly bound oxygen atoms or as unsubstituted hydroxy radicals **[2]**
239/545 . . . . . with other hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, directly attached to ring carbon atoms **[5]**
239/553 . . . . . with halogen atoms or nitro radicals directly attached to ring carbon atoms, e.g. fluorouracil **[5]**
239/557 . . . . . with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, directly attached to ring carbon atoms, e.g. orotic acid **[5]**
239/56 . . . . . One oxygen atom and one sulfur atom **[2]**
239/58 . . . . . Two sulfur atoms **[2]**
239/60 . . . . . Three or more oxygen or sulfur atoms **[2]**
239/62 . . . . . Barbituric acids **[2]**
239/64 . . . . . Salts of organic bases; Organic double compounds **[2]**
239/66 . . . . . Thiobarbituric acids **[2]**
239/68 . . . . . Salts of organic bases; Organic double compounds **[2]**
239/69 . . . . Benzenesulfonamido-pyrimidines **[3]**
239/70 . condensed with carbocyclic rings or ring systems **[2]**
239/72 . . Quinazolines; Hydrogenated quinazolines **[2]**
239/74 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, attached to ring carbon atoms of the hetero ring **[2]**
239/76 . . . . N-oxides **[2]**
239/78 . . . with hetero atoms directly attached in position 2 **[2]**
239/80 . . . . Oxygen atoms **[2]**
239/82 . . . . . with an aryl radical attached in position 4 **[2]**
239/84 . . . . Nitrogen atoms **[2]**
239/86 . . . with hetero atoms directly attached in position 4 **[2]**
239/88 . . . . Oxygen atoms **[2]**
239/90 . . . . . with acyclic radicals attached in position 2 or 3 **[2]**
239/91 . . . . . with aryl or aralkyl radicals attached in position 2 or 3 **[2]**
239/92 . . . . . with hetero atoms directly attached to nitrogen atoms of the hetero ring **[2]**
239/93 . . . . Sulfur atoms **[2]**
239/94 . . . . Nitrogen atoms **[2]**
239/95 . . . with hetero atoms directly attached in positions 2 and 4 **[2]**
239/96 . . . . Two oxygen atoms **[2]**

241/00 Heterocyclic compounds containing 1,4-diazine or hydrogenated 1,4-diazine rings [2]

Note

Piperazines with only hydrogen atoms directly attached to ring carbon atoms are classified in group C07D 295/00. **[2]**

241/02 . not condensed with other rings **[2]**
241/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
241/06 . . having one or two double bonds between ring members or between ring members and non-ring members **[2]**
241/08 . . . with oxygen atoms directly attached to ring carbon atoms **[2]**
241/10 . . having three double bonds between ring members or between ring members and non-ring members **[2]**
241/12 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
241/14 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
241/16 . . . . Halogen atoms; Nitro radicals **[2]**
241/18 . . . . Oxygen or sulfur atoms **[2]**
241/20 . . . . Nitrogen atoms (nitro radicals C07D 241/16) **[2]**
241/22 . . . . . Benzenesulfonamido pyrazines **[2]**
241/24 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
241/26 . . . . . with nitrogen atoms directly attached to ring carbon atoms **[2]**
241/28 . . . . . in which said hetero-bound carbon atoms have double bonds to oxygen, sulfur or nitrogen atoms **[2,5]**
241/30 . . . . . in which said hetero-bound carbon atoms are part of a substructure −C(=X)−X−C(=X)−X− in which X is an oxygen or sulfur atom or an imino radical, e.g. imidoylguanidines **[2,5]**
241/32 . . . . . (Amino-pyrazinoyl) guanidines **[2,5]**
241/34 . . . . . (Amino-pyrazine carbonamido) guanidines **[2,5]**
241/36 . condensed with carbocyclic rings or ring systems **[2]**
241/38 . . with only hydrogen or carbon atoms directly attached to the ring nitrogen atoms **[2]**
241/40 . . . Benzopyrazines **[2]**
241/42 . . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to carbon atoms of the hetero ring **[2]**
241/44 . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to carbon atoms of the hetero ring **[2]**
241/46 . . . Phenazines **[2]**
241/48 . . . . with hydrocarbon radicals, substituted by nitrogen atoms, directly attached to the ring nitrogen atoms **[2]**
241/50 . . with hetero atoms directly attached to ring nitrogen atoms **[2]**
241/52 . . . Oxygen atoms **[2]**
241/54 . . . Nitrogen atoms **[2]**

243/00 Heterocyclic compounds containing seven-membered rings having two nitrogen atoms as the only ring hetero atoms [2]

243/02 . having the nitrogen atoms in positions 1 and 2 **[2]**
243/04 . having the nitrogen atoms in positions 1 and 3 **[2]**
243/06 . having the nitrogen atoms in positions 1 and 4 **[2]**
243/08 . . not condensed with other rings **[2]**
243/10 . . condensed with carbocyclic rings or ring systems **[2]**
243/12 . . . 1,5-Benzodiazepines; Hydrogenated 1,5-benzodiazepines **[2]**
243/14 . . . 1,4-Benzodiazepines; Hydrogenated 1,4-benzodiazepines **[2]**
243/16 . . . . substituted in position 5 by aryl radicals **[2]**
243/18 . . . . . substituted in position 2 by nitrogen, oxygen or sulfur atoms **[2]**
243/20 . . . . . Nitrogen atoms **[2]**
243/22 . . . . . Sulfur atoms **[2]**
243/24 . . . . . Oxygen atoms **[2]**
243/26 . . . . . Preparation from compounds already containing the benzodiazepine skeleton **[2]**
243/28 . . . . . Preparation including building-up the benzodiazepine skeleton from compounds containing no hetero rings **[2]**
243/30 . . . . . Preparation including building-up the benzodiazepine skeleton from compounds already containing hetero rings **[2]**
243/32 . . . . . containing a phthalimide or hydrogenated phthalimide ring system **[2]**
243/34 . . . . . containing a quinazoline or hydrogenated quinazoline ring system **[2]**
243/36 . . . . . containing an indole or hydrogenated indole ring system **[2]**
243/38 . . . [b, e]- or [b, f]-condensed with six-membered rings **[2]**

245/00 Heterocyclic compounds containing rings of more than seven members having two nitrogen atoms as the only ring hetero atoms [2]

245/02 . not condensed with other rings **[2]**
245/04 . condensed with carbocyclic rings or ring systems **[2]**
245/06 . . condensed with one six-membered ring **[2]**

247/00 Heterocyclic compounds containing rings having two nitrogen atoms as the only ring hetero atoms, according to more than one of groups C07D 229/00 to C07D 245/00 [2]

247/02 . having the nitrogen atoms in positions 1 and 3 **[2]**

249/00 Heterocyclic compounds containing five-membered rings having three nitrogen atoms as the only ring hetero atoms [2]

249/02 . not condensed with other rings **[2]**
249/04 . . 1,2,3-Triazoles; Hydrogenated 1,2,3-triazoles **[2]**
249/06 . . . with aryl radicals directly attached to ring atoms **[2]**
249/08 . . 1,2,4-Triazoles; Hydrogenated 1,2,4-triazoles **[2]**

249/10 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
249/12 . . . . Oxygen or sulfur atoms **[2]**
249/14 . . . . Nitrogen atoms **[2]**
249/16 . condensed with carbocyclic rings or ring systems **[2]**
249/18 . . Benzotriazoles **[2]**
249/20 . . . with aryl radicals directly attached in position 2 **[2]**
249/22 . . Naphthotriazoles **[2]**
249/24 . . . with stilbene radicals directly attached in position 2 **[2]**

251/00 Heterocyclic compounds containing 1,3,5-triazine rings [2]

251/02 . not condensed with other rings **[2]**
251/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
251/06 . . . with hetero atoms directly attached to ring nitrogen atoms **[2]**
251/08 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**
251/10 . . having two double bonds between ring members or between ring members and non-ring members **[2]**
251/12 . . having three double bonds between ring members or between ring members and non-ring members **[2]**
251/14 . . . with hydrogen or carbon atoms directly attached to at least one ring carbon atom **[2]**
251/16 . . . . to only one ring carbon atom **[2]**
251/18 . . . . . with nitrogen atoms directly attached to the two other ring carbon atoms, e.g. guanamines **[2]**
251/20 . . . . . with no nitrogen atoms directly attached to a ring carbon atom **[2]**
251/22 . . . . to two ring carbon atoms **[2]**
251/24 . . . . to three ring carbon atoms **[2]**
251/26 . . . with only hetero atoms directly attached to ring carbon atoms **[2]**
251/28 . . . . Only halogen atoms, e.g. cyanuric chloride **[2]**
251/30 . . . . Only oxygen atoms **[2]**
251/32 . . . . . Cyanuric acid; Isocyanuric acid **[2]**
251/34 . . . . . Cyanuric or isocyanuric esters **[2]**
251/36 . . . . . having halogen atoms directly attached to ring nitrogen atoms **[2]**
251/38 . . . . Sulfur atoms **[2]**
251/40 . . . . Nitrogen atoms **[2]**
251/42 . . . . . One nitrogen atom **[2]**
251/44 . . . . . with halogen atoms attached to the two other ring carbon atoms **[2]**
251/46 . . . . . with oxygen or sulfur atoms attached to the two other ring carbon atoms **[2]**
251/48 . . . . . Two nitrogen atoms **[2]**
251/50 . . . . . with a halogen atom attached to the third ring carbon atom **[2]**
251/52 . . . . . with an oxygen or sulfur atom attached to the third ring carbon atom **[2]**
251/54 . . . . . Three nitrogen atoms **[2]**
251/56 . . . . . Preparation of melamine **[2]**
251/58 . . . . . from cyanamide, dicyanamide or calcium cyanamide **[2]**
251/60 . . . . . from urea or from carbon dioxide and ammonia **[2]**
251/62 . . . . . Purification of melamine **[2]**
251/64 . . . . . Condensation products of melamine with aldehydes; Derivatives thereof (polycondensation products C08G) **[2]**
251/66 . . . . . Derivatives of melamine in which a hetero atom is directly attached to a nitrogen atom of melamine **[2]**
251/68 . . . . . Triazinylamino stilbenes **[2]**
251/70 . . . . . Other substituted melamines **[2]**
251/72 . condensed with carbocyclic rings or ring systems **[2]**

253/00 Heterocyclic compounds containing six-membered rings having three nitrogen atoms as the only ring hetero atoms, not provided for by group C07D 251/00 [2]

253/02 . not condensed with other rings **[2]**
253/04 . . 1,2,3-Triazines **[2]**
253/06 . . 1,2,4-Triazines **[2]**
253/065 . . . having three double bonds between ring members or between ring members and non-ring members **[5]**
253/07 . . . . with hetero atoms, or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[5]**
253/075 . . . . . Two hetero atoms, in positions 3 and 5 **[5]**
253/08 . condensed with carbocyclic rings or ring systems **[2]**
253/10 . . Condensed 1,2,4-triazines; Hydrogenated condensed 1,2,4-triazines **[5]**

255/00 Heterocyclic compounds containing rings having three nitrogen atoms as the only ring hetero atoms, not provided for by groups C07D 249/00 to C07D 253/00 [2]

255/02 . not condensed with other rings **[2]**
255/04 . condensed with carbocyclic rings or ring systems **[2]**

257/00 Heterocyclic compounds containing rings having four nitrogen atoms as the only ring hetero atoms [2]

257/02 . not condensed with other rings **[2]**
257/04 . . Five-membered rings **[2]**
257/06 . . . with nitrogen atoms directly attached to the ring carbon atom **[2]**
257/08 . . Six-membered rings **[2]**
257/10 . condensed with carbocyclic rings or ring systems **[2]**
257/12 . . Six-membered rings having four nitrogen atoms **[2]**

259/00 Heterocyclic compounds containing rings having more than four nitrogen atoms as the only ring hetero atoms [2]

Heterocyclic compounds having nitrogen and oxygen as the only ring hetero atoms [2]

261/00 Heterocyclic compounds containing 1,2-oxazole or hydrogenated 1,2-oxazole rings [2]

261/02 . not condensed with other rings **[2]**
261/04 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**
261/06 . . having two or more double bonds between ring members or between ring members and non-ring members **[2]**

261/08 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**

261/10 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**

261/12 . . . . Oxygen atoms **[2]**

261/14 . . . . Nitrogen atoms **[2]**

261/16 . . . . . Benzene-sulfonamido isoxazoles **[2]**

261/18 . . . . Carbon atoms having three bonds to hetero atoms, with at the most one bond to halogen **[2]**

261/20 . condensed with carbocyclic rings or ring systems **[2]**

263/00 Heterocyclic compounds containing 1,3-oxazole or hydrogenated 1,3-oxazole rings [2]

263/02 . not condensed with other rings **[2]**

263/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**

263/06 . . . with hydrocarbon radicals, substituted by oxygen atoms, attached to ring carbon atoms **[2]**

263/08 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**

263/10 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**

263/12 . . . . with radicals containing only hydrogen and carbon atoms **[2]**

263/14 . . . . with radicals substituted by oxygen atoms **[2]**

263/16 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**

263/18 . . . . Oxygen atoms **[2]**

263/20 . . . . . attached in position 2 **[2]**

263/22 . . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to other ring carbon atoms **[2]**

263/24 . . . . . with hydrocarbon radicals, substituted by oxygen atoms, attached to other ring carbon atoms **[2]**

263/26 . . . . . with hetero atoms or acyl radicals directly attached to the ring nitrogen atom **[2]**

263/28 . . . . Nitrogen atoms not forming part of a nitro radical **[2]**

263/30 . . having two or three double bonds between ring members or between ring members and non-ring members **[2]**

263/32 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**

263/34 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**

263/36 . . . . One oxygen atom **[2]**

263/38 . . . . . attached in position 2 **[2]**

263/40 . . . . . attached in position 4 **[2]**

263/42 . . . . . attached in position 5 **[2]**

263/44 . . . . Two oxygen atoms **[2]**

263/46 . . . . Sulfur atoms **[2]**

263/48 . . . . Nitrogen atoms not forming part of a nitro radical **[2]**

263/50 . . . . . Benzene-sulfonamido oxazoles **[2]**

263/52 . condensed with carbocyclic rings or ring systems **[2]**

263/54 . . Benzoxazoles; Hydrogenated benzoxazoles **[2]**

263/56 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached in position 2 **[2]**

263/57 . . . . Aryl or substituted aryl radicals **[5]**

263/58 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 2 **[2]**

263/60 . . Naphthoxazoles; Hydrogenated naphthoxazoles **[2]**

263/62 . . having two or more ring systems containing condensed 1,3-oxazole rings **[2]**

263/64 . . . linked in positions 2 and 2' by chains containing six-membered aromatic rings or ring systems containing such rings **[5]**

265/00 Heterocyclic compounds containing six-membered rings having one nitrogen atom and one oxygen atom as the only ring hetero atoms [2]

Note

Morpholines having only hydrogen atoms attached to the ring carbon atoms are classified in group C07D 295/00. **[2]**

265/02 . 1,2-Oxazines; Hydrogenated 1,2-oxazines **[2]**

265/04 . 1,3-Oxazines; Hydrogenated 1,3-oxazines **[2]**

265/06 . . not condensed with other rings **[2]**

265/08 . . . having one double bond between ring members or between a ring member and a non-ring member **[2]**

265/10 . . . . with oxygen atoms directly attached to ring carbon atoms **[2]**

265/12 . . condensed with carbocyclic rings or ring systems **[2]**

265/14 . . . condensed with one six-membered ring **[2]**

265/16 . . . . with only hydrogen or carbon atoms directly attached in positions 2 and 4 **[2]**

265/18 . . . . with hetero atoms directly attached in position 2 **[2]**

265/20 . . . . with hetero atoms directly attached in position 4 **[2]**

265/22 . . . . . Oxygen atoms **[2]**

265/24 . . . . with hetero atoms directly attached in positions 2 and 4 **[2]**

265/26 . . . . . Two oxygen atoms, e.g. isatoic anhydride **[2]**

265/28 . 1,4-Oxazines; Hydrogenated 1,4-oxazines **[2]**

265/30 . . not condensed with other rings **[2]**

265/32 . . . with oxygen atoms directly attached to ring carbon atoms **[2]**

265/33 . . . . Two oxygen atoms, in positions 3 and 5 **[5]**

265/34 . . condensed with carbocyclic rings **[2]**

265/36 . . . condensed with one six-membered ring **[2]**

265/38 . . . [b, e]-condensed with two six-membered rings **[2]**

267/00 Heterocyclic compounds containing rings of more than six members having one nitrogen atom and one oxygen atom as the only ring hetero atoms [2]

267/02 . Seven-membered rings **[2]**
267/04 . . having the hetero atoms in positions 1 and 2 **[2]**
267/06 . . having the hetero atoms in positions 1 and 3 **[2]**
267/08 . . having the hetero atoms in positions 1 and 4 **[2]**
267/10 . . . not condensed with other rings **[2]**
267/12 . . . condensed with carbocyclic rings or ring systems **[2]**
267/14 . . . . condensed with one six-membered ring **[2]**
267/16 . . . . condensed with two six-membered rings **[2]**
267/18 . . . . . [b, e]-condensed **[2]**
267/20 . . . . . [b, f]-condensed **[2]**
267/22 . Eight-membered rings **[2]**

269/00 Heterocyclic compounds containing rings having one nitrogen atom and one oxygen atom as the only ring hetero atoms according to more than one of groups C07D 261/00 to C07D 267/00 [2]

269/02 . having the hetero atoms in positions 1 and 3 **[2]**

271/00 Heterocyclic compounds containing five-membered rings having two nitrogen atoms and one oxygen atom as the only ring hetero atoms [2]

271/02 . not condensed with other rings **[2]**
271/04 . . 1,2,3-Oxadiazoles; Hydrogenated 1,2,3-oxadiazoles **[2]**
271/06 . . 1,2,4-Oxadiazoles; Hydrogenated 1,2,4-oxadiazoles **[2]**
271/07 . . . with oxygen, sulfur or nitrogen atoms, directly attached to ring carbon atoms, the nitrogen atoms not forming part of a nitro radical **[5]**
271/08 . . 1,2,5-Oxadiazoles; Hydrogenated 1,2,5-oxadiazoles **[2]**
271/10 . . 1,3,4-Oxadiazoles; Hydrogenated 1,3,4-oxadiazoles **[2]**
271/107 . . . with two aryl or substituted aryl radicals attached in positions 2 and 5 **[5]**
271/113 . . . with oxygen, sulfur or nitrogen atoms, directly attached to ring carbon atoms, the nitrogen atoms not forming part of a nitro radical **[5]**
271/12 . condensed with carbocyclic rings or ring systems **[2]**

273/00 Heterocyclic compounds containing rings having nitrogen and oxygen atoms as the only ring hetero atoms, not provided for by groups C07D 261/00 to C07D 271/00 [2]

273/01 . having one nitrogen atom **[3]**
273/02 . having two nitrogen atoms and only one oxygen atom **[2]**
273/04 . . Six-membered rings **[2]**
273/06 . . Seven-membered rings **[2]**
273/08 . having two nitrogen atoms and more than one oxygen atom **[3]**

<u>Heterocyclic compounds having nitrogen and sulfur as the only ring hetero atoms</u> [2]

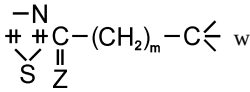
275/00 Heterocyclic compounds containing 1, 2-thiazole or hydrogenated 1,2-thiazole rings [2]

275/02 . not condensed with other rings **[2]**
275/03 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[5]**
275/04 . condensed with carbocyclic rings or ring systems **[2]**
275/06 . . with hetero atoms directly attached to the ring sulfur atom **[2]**

277/00 Heterocyclic compounds containing 1,3-thiazole or hydrogenated 1,3-thiazole rings [2]

277/02 . not condensed with other rings **[2]**
277/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
277/06 . . . with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
277/08 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**
277/10 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
277/12 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
277/14 . . . . Oxygen atoms **[2]**
277/16 . . . . Sulfur atoms **[2]**
277/18 . . . . Nitrogen atoms **[2]**
277/20 . . having two or three double bonds between ring members or between ring members and non-ring members **[2]**
277/22 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
277/24 . . . . Radicals substituted by oxygen atoms **[2]**
277/26 . . . . Radicals substituted by sulfur atoms **[2]**
277/28 . . . . Radicals substituted by nitrogen atoms **[2]**
277/30 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
277/32 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
277/34 . . . . Oxygen atoms **[2]**
277/36 . . . . Sulfur atoms **[2]**
277/38 . . . . Nitrogen atoms **[2]**
277/40 . . . . . Unsubstituted amino or imino radicals **[2]**
277/42 . . . . . Amino or imino radicals substituted by hydrocarbon or substituted hydrocarbon radicals **[2]**
277/44 . . . . . Acylated amino or imino radicals **[2]**
277/46 . . . . . by carboxylic acids, or sulfur or nitrogen analogues thereof **[2]**
277/48 . . . . . by radicals derived from carbonic acid, or sulfur or nitrogen analogues thereof, e.g. carbonylguanidines **[2]**
277/50 . . . . . Nitrogen atoms bound to hetero atoms (nitro radicals C07D 277/58) **[2]**
277/52 . . . . . to sulfur atoms, e.g. sulfonamides **[2]**
277/54 . . . . Nitrogen and either oxygen or sulfur atoms **[2]**
277/56 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**
277/58 . . . . Nitro radicals **[2]**

277/587 . . . with aliphatic hydrocarbon radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms, said aliphatic radicals being substituted in the alpha-position to the ring by a hetero atom, e.g.



with m >= 0, Z being a singly or a doubly bound hetero atom **[5]**

277/593 . . . . Z being doubly bound oxygen or doubly bound nitrogen, which nitrogen is part of a possibly substituted oximino radical **[5]**

277/60 . condensed with carbocyclic rings or ring systems **[2]**

277/62 . . Benzothiazoles **[2]**

277/64 . . . with only hydrocarbon or substituted hydrocarbon radicals attached in position 2 **[2]**

277/66 . . . . with aromatic rings or ring systems directly attached in position 2 **[2]**

277/68 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 2 **[2]**

277/70 . . . . Sulfur atoms **[2]**

277/72 . . . . . 2-Mercaptobenzothiazole **[2]**

277/74 . . . . . Sulfur atoms substituted by carbon atoms **[2]**

277/76 . . . . . Sulfur atoms attached to a second hetero atom **[2]**

277/78 . . . . . to a second sulfur atom **[2]**

277/80 . . . . . to a nitrogen atom **[2]**

277/82 . . . . Nitrogen atoms **[2]**

277/84 . . Naphthothiazoles **[2]**

279/00 Heterocyclic compounds containing six-membered rings having one nitrogen atom and one sulfur atom as the only ring hetero atoms [2]

Note

Thiomorpholines having only hydrogen atoms attached to the ring carbon atoms are classified in group C07D 295/00. **[2]**

279/02 . 1,2-Thiazines; Hydrogenated 1,2-thiazines **[2]**

279/04 . 1,3-Thiazines; Hydrogenated 1,3-thiazines **[2]**

279/06 . . not condensed with other rings **[2]**

279/08 . . condensed with carbocyclic rings or ring systems **[2]**

279/10 . 1,4-Thiazines; Hydrogenated 1,4-thiazines **[2]**

279/12 . . not condensed with other rings **[2]**

279/14 . . condensed with carbocyclic rings or ring systems **[2]**

279/16 . . . condensed with one six-membered ring **[2]**

279/18 . . . [b, e]-condensed with two six-membered rings **[2]**

279/20 . . . . with hydrogen atoms directly attached to the ring nitrogen atom **[2]**

279/22 . . . . with carbon atoms directly attached to the ring nitrogen atom **[2]**

279/24 . . . . . with hydrocarbon radicals, substituted by amino radicals, attached to the ring nitrogen atom **[2]**

279/26 . . . . . without other substituents attached to the ring system **[2]**

279/28 . . . . . with other substituents attached to the ring system **[2]**

279/30 . . . . . with acyl radicals attached to the ring nitrogen atom **[2]**

279/32 . . . . with hetero atoms directly attached to the ring nitrogen atom **[2]**

279/34 . . . . with hetero atoms directly attached to the ring sulfur atom **[2]**

279/36 . . . [b, e]-condensed, at least one with a further condensed benzene ring **[2]**

281/00 Heterocyclic compounds containing rings of more than six members having one nitrogen atom and one sulfur atom as the only ring hetero atoms [2]

281/02 . Seven-membered rings **[2]**

281/04 . . having the hetero atoms in positions 1 and 4 **[2]**

281/06 . . . not condensed with other rings **[2]**

281/08 . . . condensed with carbocyclic rings or ring systems **[2]**

281/10 . . . . condensed with one six-membered ring **[2]**

281/12 . . . . condensed with two six-membered rings **[2]**

281/14 . . . . . [b, e]-condensed **[2]**

281/16 . . . . . [b, f]-condensed **[2]**

281/18 . Eight-membered rings **[2]**

283/00 Heterocyclic compounds containing rings having one nitrogen atom and one sulfur atom as the only ring hetero atoms, according to more than one of groups C07D 275/00 to C07D 281/00 [2]

283/02 . having the hetero atoms in positions 1 and 3 **[2]**

285/00 Heterocyclic compounds containing rings having nitrogen and sulfur atoms as the only ring hetero atoms, not provided for by groups C07D 275/00 to C07D 283/00 [2]

285/01 . Five-membered rings **[5]**

285/02 . . Thiadiazoles; Hydrogenated thiadiazoles **[2,5]**

285/04 . . . not condensed with other rings **[2,5]**

285/06 . . . . 1,2,3-Thiadiazoles; Hydrogenated 1,2,3-thiadiazoles **[2,5]**

285/08 . . . . 1,2,4-Thiadiazoles; Hydrogenated 1,2,4-thiadiazoles **[2,5]**

285/10 . . . . 1,2,5-Thiadiazoles; Hydrogenated 1,2,5-thiadiazoles **[2,5]**

285/12 . . . . 1,3,4-Thiadiazoles; Hydrogenated 1,3,4-thiadiazoles **[2,5]**

285/125 . . . . . with oxygen, sulfur or nitrogen atoms, directly attached to ring carbon atoms, the nitrogen atoms not forming part of a nitro radical **[5]**

285/13 . . . . . Oxygen atoms **[5]**

285/135 . . . . . Nitrogen atoms **[5]**

285/14 . . . condensed with carbocyclic rings or ring systems **[2,5]**

285/15 . Six-membered rings **[5]**

285/16 . . Thiadiazines; Hydrogenated thiadiazines **[2,5]**

285/18 . . . 1,2,4-Thiadiazines; Hydrogenated 1,2,4-thiadiazines **[2,5]**

285/20 . . . . condensed with carbocyclic rings or ring systems **[2,5]**

285/22 . . . . . condensed with one six-membered ring **[2,5]**

285/24 . . . . . with oxygen atoms directly attached to the ring sulfur atom **[2,5]**

285/26 . . . . . substituted in position 6 or 7 by sulfamoyl or substituted sulfamoyl radicals **[2,5]**

285/28 . . . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached in position 3 **[2,5]**
285/30 . . . . . with hydrocarbon radicals, substituted by hetero atoms, attached in position 3 **[2,5]**
285/32 . . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 3 **[2,5]**
285/34 . . . 1,3,5-Thiadiazines; Hydrogenated 1,3,5-thiadiazines **[2,5]**
285/36 . Seven-membered rings **[2]**
285/38 . Eight-membered rings **[2]**

291/00 Heterocyclic compounds containing rings having nitrogen, oxygen and sulfur atoms as the only ring hetero atoms [2]
291/02 . not condensed with other rings **[2]**
291/04 . . Five-membered rings **[2]**
291/06 . . Six-membered rings **[2]**
291/08 . condensed with carbocyclic rings or ring systems **[2]**

293/00 Heterocyclic compounds containing rings having nitrogen and selenium or nitrogen and tellurium, with or without oxygen or sulfur atoms, as the ring hetero atoms [2]
293/02 . not condensed with other rings **[2]**
293/04 . . Five-membered rings **[2]**
293/06 . . . Selenazoles; Hydrogenated selenazoles **[2]**
293/08 . . Six-membered rings **[2]**
293/10 . condensed with carbocyclic rings or ring systems **[2]**
293/12 . . Selenazoles; Hydrogenated selenazoles **[2]**

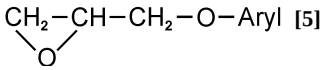
295/00 Heterocyclic compounds containing polymethylene-imine rings with at least five ring members, 3-azabicyclo [3.2.2] nonane, piperazine, morpholine or thiomorpholine rings, having only hydrogen atoms directly attached to the ring carbon atoms [2]
295/02 . containing only hydrogen and carbon atoms in addition to the ring hetero elements **[2]**
295/023 . . Preparation; Separation; Stabilisation; Use of additives **[5]**
295/027 . . containing only one hetero ring **[5]**
295/03 . . . with the ring nitrogen atoms directly attached to acyclic carbon atoms **[5]**
295/033 . . . with the ring nitrogen atoms directly attached to carbocyclic rings **[5]**
295/037 . . with quaternary ring nitrogen atoms **[5]**
295/04 . with substituted hydrocarbon radicals attached to ring nitrogen atoms **[2]**
295/06 . . substituted by halogen atoms or nitro radicals **[2]**
295/067 . . . with the ring nitrogen atoms and the substituents attached to the same carbon chain, which is not interrupted by carbocyclic rings **[5]**
295/073 . . . with the ring nitrogen atoms and the substituents separated by carbocyclic rings or by carbon chains interrupted by carbocyclic rings **[5]**
295/08 . . substituted by singly bound oxygen or sulfur atoms **[2]**
295/084 . . . with the ring nitrogen atoms and the oxygen or sulfur atoms attached to the same carbon chain, which is not interrupted by carbocyclic rings **[5]**
295/088 . . . . to an acyclic saturated chain **[5]**
295/092 . . . . with aromatic radicals attached to the chain **[5]**
295/096 . . . with the ring nitrogen atoms and the oxygen or sulfur atoms separated by carbocyclic rings or by carbon chains interrupted by carbocyclic rings **[5]**
295/10 . . substituted by doubly bound oxygen or sulfur atoms (acylated ring nitrogen atoms C07D 295/16) **[2]**
295/104 . . . with the ring nitrogen atoms and the doubly bound oxygen or sulfur atoms attached to the same carbon chain, which is not interrupted by carbocyclic rings **[5]**
295/108 . . . . to an acyclic saturated chain **[5]**
295/112 . . . with the ring nitrogen atoms and the doubly bound oxygen or sulfur atoms separated by carbocyclic rings or by carbon chains interrupted by carbocyclic rings **[5]**
295/116 . . . . with the doubly bound oxygen or sulfur atoms directly attached to a carbocyclic ring **[5]**
295/12 . . substituted by singly or doubly bound nitrogen atoms (nitro radicals C07D 295/06) **[2]**
295/125 . . . with the ring nitrogen atoms and the substituent nitrogen atoms attached to the same carbon chain, which is not interrupted by carbocyclic rings **[5]**
295/13 . . . . to an acyclic saturated chain **[5]**
295/135 . . . with the ring nitrogen atoms and the substituent nitrogen atoms separated by carbocyclic rings or by carbon chains interrupted by carbocyclic rings **[5]**
295/14 . . substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
295/145 . . . with the ring nitrogen atoms and the carbon atoms with three bonds to hetero atoms attached to the same carbon chain, which is not interrupted by carbocyclic rings **[5]**
295/15 . . . . to an acyclic saturated chain **[5]**
295/155 . . . with the ring nitrogen atoms and the carbon atoms with three bonds to hetero atoms separated by carbocyclic rings or by carbon chains interrupted by carbocyclic rings **[5]**
295/16 . acylated on ring nitrogen atoms **[2]**
295/18 . . by radicals derived from carboxylic acids, or sulfur or nitrogen analogues thereof **[2]**
295/182 . . . Radicals derived from carboxylic acids **[5]**
295/185 . . . . from aliphatic carboxylic acids **[5]**
295/192 . . . . from aromatic carboxylic acids **[5]**
295/194 . . . Radicals derived from thio- or thiono carboxylic acids **[5]**
295/195 . . . Radicals derived from nitrogen analogues of carboxylic acids **[5]**
295/20 . . by radicals derived from carbonic acid, or sulfur or nitrogen analogues thereof **[2]**
295/205 . . . Radicals derived from carbonic acid **[5]**
295/21 . . . Radicals derived from sulfur analogues of carbonic acid **[5]**
295/215 . . . Radicals derived from nitrogen analogues of carbonic acid **[5]**

295/22 . with hetero atoms directly attached to ring nitrogen atoms **[2]**
295/24 . . Oxygen atoms **[5]**
295/26 . . Sulfur atoms **[5]**
295/28 . . Nitrogen atoms **[5]**
295/30 . . . non-acylated **[5]**
295/32 . . . acylated with carboxylic or carbonic acids, or their nitrogen or sulfur analogues **[5]**

Heterocyclic compounds having oxygen atoms, with or without sulfur, selenium, or tellurium atoms, as ring hetero atoms [2]

301/00 Preparation of oxiranes [2]
301/02 . Synthesis of the oxirane ring **[2]**
301/03 . . by oxidation of unsaturated compounds, or of mixtures of unsaturated and saturated compounds **[3]**
301/04 . . . with air or molecular oxygen **[2,3]**
301/06 . . . . in the liquid phase **[2,3]**
301/08 . . . . in the gaseous phase **[2,3]**
301/10 . . . . . with catalysts containing silver or gold **[2,3]**
301/12 . . . with hydrogen peroxide or inorganic peroxides or peracids **[2,3]**
301/14 . . . with organic peracids, or salts, anhydrides or esters thereof **[2,3]**
301/16 . . . . formed in situ, e.g. from carboxylic acids and hydrogen peroxide **[2,3]**
301/18 . . . . . from polybasic carboxylic acids **[2,3]**
301/19 . . . with organic hydroperoxides **[3]**
301/22 . . by oxidation of saturated compounds with air or molecular oxygen (of mixtures of unsaturated and saturated compounds C07D 301/04) **[2]**
301/24 . . by splitting-off Hal−Y from compounds containing the radical Hal−C−C−OY **[2]**
301/26 . . . Y being hydrogen **[2]**
301/27 . Condensation of epihalohydrins or halohydrins with compounds containing active hydrogen atoms (macromolecular compounds C08) **[3]**
301/28 . . by reaction with hydroxyl radicals **[2,3]**
301/30 . . by reaction with carboxyl radicals **[2,3]**
301/32 . Separation; Purification **[2]**
301/36 . Use of additives, e.g. for stabilisation **[3]**

303/00 Compounds containing three-membered rings having one oxygen atom as the only ring hetero atom [2]
303/02 . Compounds containing oxirane rings **[2]**
303/04 . . containing only hydrogen and carbon atoms in addition to the ring oxygen atoms **[2]**
303/06 . . . in which the oxirane rings are condensed with a carbocyclic ring system having three or more relevant rings **[2]**
303/08 . . with hydrocarbon radicals, substituted by halogen atoms, nitro radicals or nitroso radicals **[2]**
303/10 . . . in which the oxirane rings are condensed with a carbocyclic ring system having three or more relevant rings (steroids C07J) **[2]**
303/12 . . with hydrocarbon radicals, substituted by singly or doubly bound oxygen atoms **[2]**
303/14 . . . by free hydroxyl radicals **[2]**
303/16 . . . by esterified hydroxyl radicals **[2]**
303/17 . . . . containing oxirane rings condensed with carbocyclic ring systems having three or more relevant rings **[3]**
303/18 . . . by etherified hydroxyl radicals **[2]**
303/20 . . . . Ethers with hydroxy compounds containing no oxirane rings **[2]**
303/22 . . . . . with monohydroxy compounds **[2]**
303/23 . . . . . Oxiranylmethyl ethers of compounds having one hydroxy group bound to a six-membered aromatic ring, the oxiranylmethyl radical not being further substituted, i.e.



[5]

303/24 . . . . . with polyhydroxy compounds **[2]**
303/26 . . . . . having one or more free hydroxyl radicals **[2]**
303/27 . . . . . having all hydroxyl radicals etherified with oxirane containing compounds **[3]**
303/28 . . . . Ethers with hydroxy compounds containing oxirane rings **[2]**
303/30 . . . . . Ethers of oxirane-containing polyhydroxy compounds in which all hydroxyl radicals are etherified with oxirane-containing hydroxy compounds **[2]**
303/31 . . . . in which the oxirane rings are condensed with a carbocyclic ring system having three or more relevant rings **[3]**
303/32 . . . by aldehydo- or ketonic radicals **[2]**
303/34 . . with hydrocarbon radicals, substituted by sulfur, selenium, or tellurium atoms **[2]**
303/36 . . with hydrocarbon radicals, substituted by nitrogen atoms (nitro, nitroso radicals C07D 303/08) **[2]**
303/38 . . with hydrocarbon radicals, substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
303/40 . . . by ester radicals **[2]**
303/42 . . . . Acyclic compounds having a chain of seven or more carbon atoms, e.g. epoxidised fats **[2]**
303/44 . . . . Esterified with oxirane-containing hydroxy compounds **[2]**
303/46 . . . by amide or nitrile radicals **[2]**
303/48 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, directly attached to ring carbon atoms, e.g. ester or nitrile radicals **[3]**

305/00 Heterocyclic compounds containing four-membered rings having one oxygen atom as the only ring hetero atoms [2]
305/02 . not condensed with other rings **[2]**
305/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**
305/06 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to the ring atoms **[2]**
305/08 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring atoms **[2]**
305/10 . . having one or more double bonds between ring members or between ring members and non-ring members **[2]**
305/12 . . . Beta-lactones **[2]**
305/14 . condensed with carbocyclic rings or ring systems **[2]**

307/00 Heterocyclic compounds containing five-membered rings having one oxygen atom as the only ring hetero atom [2]

307/02 . not condensed with other rings **[2]**

307/04 . . having no double bonds between ring members or between ring members and non-ring members **[2]**

307/06 . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to ring carbon atoms **[2]**

307/08 . . . . Preparation of tetrahydrofuran **[2]**

307/10 . . . with substituted hydrocarbon radicals attached to ring carbon atoms **[2]**

307/12 . . . . Radicals substituted by oxygen atoms **[2]**

307/14 . . . . Radicals substituted by nitrogen atoms not forming part of a nitro radical **[2]**

307/16 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**

307/18 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**

307/20 . . . . Oxygen atoms **[2]**

307/22 . . . . Nitrogen atoms not forming part of a nitro radical **[2]**

307/24 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**

307/26 . . having one double bond between ring members or between a ring member and a non-ring member **[2]**

307/28 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**

307/30 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**

307/32 . . . . Oxygen atoms **[2]**

307/33 . . . . . in position 2, the oxygen atom being in its keto or unsubstituted enol form **[5]**

307/34 . . having two or three double bonds between ring members or between ring members and non-ring members **[2]**

307/36 . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to ring carbon atoms **[2]**

307/38 . . . with substituted hydrocarbon radicals attached to ring carbon atoms **[2]**

307/40 . . . . Radicals substituted by oxygen atoms **[2]**

307/42 . . . . . Singly bound oxygen atoms (two oxygen atoms bound to the same carbon atom C07D 307/46) **[2]**

307/44 . . . . . Furfuryl alcohol **[2]**

307/45 . . . . . Oxygen atoms acylated by a cyclopropane containing carboxylic acyl radical, e.g. chrysanthemumates **[3]**

307/46 . . . . . Doubly bound oxygen atoms, or two oxygen atoms singly bound to the same carbon atom **[2]**

307/48 . . . . . Furfural **[2]**

307/50 . . . . . Preparation from natural products **[2]**

307/52 . . . . Radicals substituted by nitrogen atoms not forming part of a nitro radical **[2]**

307/54 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**

307/56 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**

307/58 . . . . One oxygen atom, e.g. butenolide **[2]**

307/60 . . . . Two oxygen atoms, e.g. succinic anhydride **[2]**

307/62 . . . . Three oxygen atoms, e.g. ascorbic acid **[2]**

307/64 . . . . Sulfur atoms **[2]**

307/66 . . . . Nitrogen atoms (nitro radicals C07D 307/70) **[2]**

307/68 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**

307/70 . . . . Nitro radicals **[2]**

307/71 . . . . . attached in position 5 **[2]**

307/72 . . . . . with hydrocarbon radicals, substituted by nitrogen-containing radicals, attached in position 2 **[2]**

307/73 . . . . . by amino or imino, or substituted amino or imino radicals **[2]**

307/74 . . . . . by hydrazino or hydrazono or such substituted radicals **[2]**

307/75 . . . . . having carboxylic acyl radicals or their thio or nitrogen analogues directly attached to the hydrazino or hydrazono radical, e.g. hydrazides **[2]**

307/76 . . . . . having carbonic acyl radicals or their thio or nitrogen analogues directly attached to the hydrazino or hydrazono radical, e.g. semicarbazides **[2,3]**

307/77 . ortho- or peri-condensed with carbocyclic rings or ring systems **[2]**

307/78 . . Benzo [b] furans; Hydrogenated benzo [b] furans **[2]**

307/79 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to carbon atoms of the hetero ring **[2]**

307/80 . . . . Radicals substituted by oxygen atoms **[2]**

307/81 . . . . Radicals substituted by nitrogen atoms not forming part of a nitro radical **[2]**

307/82 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to carbon atoms of the hetero ring **[2]**

307/83 . . . . Oxygen atoms **[2]**

307/84 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**

307/85 . . . . . attached in position 2 **[2]**

307/86 . . . with an oxygen atom directly attached in position 7 **[2]**

307/87 . . Benzo [c] furans; Hydrogenated benzo [c] furans **[2]**

307/88 . . . with one oxygen atom directly attached in position 1 or 3 **[2]**

307/885 . . . . 3,3-Diphenylphthalides **[5]**

307/89 . . . with two oxygen atoms directly attached in positions 1 and 3 **[2]**
307/90 . . . with an oxygen atom in position 1 and a nitrogen atom in position 3, or vice versa **[2]**
307/91 . . Dibenzofurans; Hydrogenated dibenzofurans **[2]**
307/92 . . Naphthofurans; Hydrogenated naphthofurans **[2]**
307/93 . . condensed with a ring other than six-membered **[2]**
307/935 . . . Not further condensed cyclopenta [b] furans or hydrogenated cyclopenta [b] furans **[3]**
307/937 . . . . with hydrocarbon or substituted hydrocarbon radicals directly attached in position 2, e.g. prostacyclins **[5]**
307/94 . spiro-condensed with carbocyclic rings or ring systems, e.g. griseofulvins **[2]**

309/00 Heterocyclic compounds containing six-membered rings having one oxygen atom as the only ring hetero atom, not condensed with other rings [2]

309/02 . having no double bonds between ring members or between ring members and non-ring members **[2]**
309/04 . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms **[2]**
309/06 . . . Radicals substituted by oxygen atoms **[2]**
309/08 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
309/10 . . . Oxygen atoms **[2]**
309/12 . . . . only hydrogen atoms and one oxygen atom directly attached to ring carbon atoms, e.g. tetrahydropyranyl ethers **[2]**
309/14 . . . Nitrogen atoms not forming part of a nitro radical **[2]**
309/16 . having one double bond between ring members or between a ring member and a non-ring member **[2]**
309/18 . . containing only hydrogen and carbon atoms in addition to the ring hetero atom **[2]**
309/20 . . with hydrogen atoms and substituted hydrocarbon radicals directly attached to ring carbon atoms **[2]**
309/22 . . . Radicals substituted by oxygen atoms **[2]**
309/24 . . . . Methylol radicals **[2]**
309/26 . . . . Carboxaldehyde radicals **[2]**
309/28 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
309/30 . . . Oxygen atoms, e.g. delta-lactones **[2]**
309/32 . having two double bonds between ring members or between ring members and non-ring members **[2]**
309/34 . having three or more double bonds between ring members or between ring members and non-ring members **[2]**
309/36 . . with oxygen atoms directly attached to ring carbon atoms **[2]**
309/38 . . . one oxygen atom in position 2 or 4, e.g. pyrones **[2]**
309/40 . . . Oxygen atoms attached in positions 3 and 4, e.g. maltol **[2]**

311/00 Heterocyclic compounds containing six-membered rings having one oxygen atom as the only hetero atom, condensed with other rings [2]

311/02 . ortho- or peri-condensed with carbocyclic rings or ring systems **[2]**
311/04 . . Benzo [b] pyrans, not hydrogenated in the carbocyclic ring **[2]**
311/06 . . . with oxygen or sulfur atoms directly attached in position 2 **[2]**
311/08 . . . . not hydrogenated in the hetero ring **[2]**
311/10 . . . . . unsubstituted **[2]**
311/12 . . . . . substituted in position 3 and unsubstituted in position 7 **[2]**
311/14 . . . . . substituted in position 6 and unsubstituted in position 7 **[2]**
311/16 . . . . . substituted in position 7 **[2]**
311/18 . . . . . substituted otherwise than in position 3 or 7 (substituted in position 4 by oxygen or sulfur C07D 311/42) **[2]**
311/20 . . . . hydrogenated in the hetero ring **[2]**
311/22 . . . with oxygen or sulfur atoms directly attached in position 4 **[2]**
311/24 . . . . with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 2 **[2]**
311/26 . . . . with aromatic rings attached in position 2 or 3 **[2]**
311/28 . . . . . with aromatic rings attached in position 2 only **[2]**
311/30 . . . . . not hydrogenated in the hetero ring, e.g. flavones **[2]**
311/32 . . . . . 2, 3-Dihydro derivatives, e.g. flavanones **[2]**
311/34 . . . . . with aromatic rings attached in position 3 only **[2]**
311/36 . . . . . not hydrogenated in the hetero ring, e.g. isoflavones **[2]**
311/38 . . . . . 2, 3-Dihydro derivatives, e.g. isoflavanones **[2]**
311/40 . . . . . Separation, e.g. from natural material; Purification **[2]**
311/42 . . . with oxygen or sulfur atoms in positions 2 and 4 **[2]**
311/44 . . . . with one hydrogen atom in position 3 **[2]**
311/46 . . . . . unsubstituted in the carbocyclic ring **[2]**
311/48 . . . . . with two such benzopyran radicals linked together by a carbon chain **[2]**
311/50 . . . . . with elements other than carbon and hydrogen in position 3 **[2]**
311/52 . . . . . Enol-esters or -ethers, or sulfur analogues thereof **[2]**
311/54 . . . . . substituted in the carbocyclic ring **[2]**
311/56 . . . . without hydrogen atoms in position 3 **[2]**
311/58 . . . other than with oxygen or sulfur atoms in position 2 or 4 **[2]**
311/60 . . . . with aryl radicals attached in position 2 **[2]**
311/62 . . . . . with oxygen atoms directly attached in position 3, e.g. anthocyanidins **[2]**
311/64 . . . . with oxygen atoms directly attached in position 8 **[2]**
311/66 . . . . with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 2 **[2]**
311/68 . . . . with nitrogen atoms directly attached in position 4 **[2]**
311/70 . . . . with two hydrocarbon radicals attached in position 2 and elements other than carbon and hydrogen in position 6 **[2]**
311/72 . . . . . 3, 4-Dihydro derivatives having in position 2 at least one methyl radical and in position 6 one oxygen atom, e.g. tocopherols **[2]**

311/74 . . Benzo [b] pyrans, hydrogenated in the carbocyclic ring **[2]**
311/76 . . Benzo [c] pyrans **[2]**
311/78 . . Ring systems having three or more relevant rings **[2]**
311/80 . . . Dibenzopyrans; Hydrogenated dibenzopyrans **[2]**
311/82 . . . . Xanthenes **[2]**
311/84 . . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 9 **[2]**
311/86 . . . . . Oxygen atoms, e.g. xanthones **[2]**
311/88 . . . . . Nitrogen atoms **[2]**
311/90 . . . . . with hydrocarbon radicals, substituted by amino radicals, directly attached in position 9 **[2]**
311/92 . . . Naphthopyrans; Hydrogenated naphthopyrans **[2]**
311/94 . . condensed with rings other than six-membered or with ring systems containing such rings **[2,5]**
311/96 . spiro-condensed with carbocyclic rings or ring systems **[2]**

313/00 Heterocyclic compounds containing rings of more than six members having one oxygen atom as the only ring hetero atom [2]

313/02 . Seven-membered rings **[2]**
313/04 . . not condensed with other rings **[2]**
313/06 . . condensed with carbocyclic rings or ring systems **[2]**
313/08 . . . condensed with one six-membered ring **[2]**
313/10 . . . condensed with two six-membered rings **[2]**
313/12 . . . . [b, e]-condensed **[2]**
313/14 . . . . [b, f]-condensed **[2]**
313/16 . Eight-membered rings **[2]**
313/18 . . not condensed with other rings **[2]**
313/20 . . condensed with carbocyclic rings or ring systems **[2]**

315/00 Heterocyclic compounds containing rings having one oxygen atom as the only ring hetero atom according to more than one of groups C07D 303/00 to C07D 313/00 [2]

317/00 Heterocyclic compounds containing five-membered rings having two oxygen atoms as the only ring hetero atoms [2]

317/02 . having the hetero atoms in positions 1 and 2 **[2]**
317/04 . . not condensed with other rings **[2]**
317/06 . . condensed with carbocyclic rings or ring systems **[2]**
317/08 . having the hetero atoms in positions 1 and 3 **[2]**
317/10 . . not condensed with other rings **[2]**
317/12 . . . with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to ring carbon atoms **[2]**
317/14 . . . with substituted hydrocarbon radicals attached to ring carbon atoms **[2]**
317/16 . . . . Radicals substituted by halogen atoms or nitro radicals **[2]**
317/18 . . . . Radicals substituted by singly bound oxygen or sulfur atoms **[2]**
317/20 . . . . . Free hydroxyl or mercaptan **[2]**
317/22 . . . . . etherified **[2]**
317/24 . . . . . esterified **[2]**
317/26 . . . . Radicals substituted by doubly bound oxygen or sulfur atoms or by two such atoms singly bound to the same carbon atom **[2]**
317/28 . . . . Radicals substituted by nitrogen atoms (nitro radicals C07D 317/16) **[2]**
317/30 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
317/32 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
317/34 . . . . Oxygen atoms **[2]**
317/36 . . . . . Alkylene carbonates; Substituted alkylene carbonates **[2]**
317/38 . . . . . Ethylene carbonate **[2]**
317/40 . . . . . Vinylene carbonate; Substituted vinylene carbonates **[2]**
317/42 . . . . Halogen atoms or nitro radicals **[2]**
317/44 . . ortho- or peri-condensed with carbocyclic rings or ring systems **[2]**
317/46 . . . condensed with one six-membered ring **[2]**
317/48 . . . . Methylenedioxybenzenes or hydrogenated methylenedioxybenzenes, unsubstituted on the hetero ring **[2]**
317/50 . . . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to atoms of the carbocyclic ring **[2]**
317/52 . . . . . Radicals substituted by halogen atoms or nitro radicals **[2]**
317/54 . . . . . Radicals substituted by oxygen atoms **[2]**
317/56 . . . . . Radicals substituted by sulfur atoms **[2]**
317/58 . . . . . Radicals substituted by nitrogen atoms (nitro radicals C07D 317/52) **[2]**
317/60 . . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
317/62 . . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to atoms of the carbocyclic ring **[2]**
317/64 . . . . . Oxygen atoms **[2]**
317/66 . . . . . Nitrogen atoms not forming part of a nitro radical **[2]**
317/68 . . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**
317/70 . . . condensed with ring systems containing two or more relevant rings **[2]**
317/72 . . spiro-condensed with carbocyclic rings **[2]**

319/00 Heterocyclic compounds containing six-membered rings having two oxygen atoms as the only ring hetero atoms [2]

319/02 . 1,2-Dioxanes; Hydrogenated 1,2-dioxanes **[2]**
319/04 . 1,3-Dioxanes; Hydrogenated 1,3-dioxanes **[2]**
319/06 . . not condensed with other rings **[2]**
319/08 . . condensed with carbocyclic rings or ring systems **[2]**
319/10 . 1,4-Dioxanes; Hydrogenated 1,4-dioxanes **[2]**

319/12 . . not condensed with other rings **[2]**
319/14 . . condensed with carbocyclic rings or ring systems **[2]**
319/16 . . . condensed with one six-membered ring **[2]**
319/18 . . . . Ethylenedioxybenzenes, not substituted on the hetero ring **[2]**
319/20 . . . . with substituents attached to the hetero ring **[2]**
319/22 . . . condensed with one naphthalene or hydrogenated naphthalene ring system **[2]**
319/24 . . . [b, e]-condensed with two six-membered rings **[2]**

321/00 Heterocyclic compounds containing rings having two oxygen atoms as the only ring hetero atoms, not provided for by groups C07D 317/00 to C07D 319/00 [2]
321/02 . Seven-membered rings **[2]**
321/04 . . not condensed with other rings **[2]**
321/06 . . . 1, 3-Dioxepines; Hydrogenated 1,3-dioxepines **[2]**
321/08 . . . 1, 4-Dioxepines; Hydrogenated 1,4-dioxepines **[2]**
321/10 . . condensed with carbocyclic rings or ring systems **[2]**
321/12 . Eight-membered rings **[2]**

323/00 Heterocyclic compounds containing more than two oxygen atoms as the only ring hetero atoms [2]
323/02 . Five-membered rings **[2]**
323/04 . Six-membered rings **[2]**
323/06 . . Trioxane **[2]**

325/00 Heterocyclic compounds containing rings having oxygen as the only ring hetero atom according to more than one of groups C07D 303/00 to C07D 323/00 [2]

327/00 Heterocyclic compounds containing rings having oxygen and sulfur atoms as the only ring hetero atoms [2]
327/02 . one oxygen atom and one sulfur atom **[2]**
327/04 . . Five-membered rings **[2]**
327/06 . . Six-membered rings **[2]**
327/08 . . . [b, e]-condensed with two six-membered carbocyclic rings **[2]**
327/10 . two oxygen atoms and one sulfur atom, e.g. cyclic sulfates **[2]**

329/00 Heterocyclic compounds containing rings having oxygen and selenium or oxygen and tellurium atoms as the only ring hetero atoms [2]

Heterocyclic compounds having sulfur, selenium, or tellurium atoms as the only ring hetero atoms [2]

331/00 Heterocyclic compounds containing rings of less than five members, having one sulfur atom as the only ring hetero atom [2]
331/02 . Three-membered rings **[2]**
331/04 . Four-membered rings **[2]**

333/00 Heterocyclic compounds containing five-membered rings having one sulfur atom as the only ring hetero atom [2]
333/02 . not condensed with other rings **[2]**
333/04 . . not substituted on the ring sulfur atom **[2]**
333/06 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to the ring carbon atoms **[2]**
333/08 . . . . Hydrogen atoms or radicals containing only hydrogen and carbon atoms **[2]**
333/10 . . . . . Thiophene **[2]**
333/12 . . . . Radicals substituted by halogen atoms or nitro or nitroso radicals **[2]**
333/14 . . . . Radicals substituted by singly bound hetero atoms other than halogen **[2]**
333/16 . . . . . by oxygen atoms **[2]**
333/18 . . . . . by sulfur atoms **[2]**
333/20 . . . . . by nitrogen atoms (nitro, nitroso radicals C07D 333/12) **[2]**
333/22 . . . . Radicals substituted by doubly bound hetero atoms, or by two hetero atoms other than halogen singly bound to the same carbon atom **[2]**
333/24 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
333/26 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms **[2]**
333/28 . . . . Halogen atoms **[2]**
333/30 . . . . Hetero atoms other than halogen **[2]**
333/32 . . . . . Oxygen atoms **[2]**
333/34 . . . . . Sulfur atoms **[2]**
333/36 . . . . . Nitrogen atoms (nitro, nitroso radicals C07D 333/42) **[2]**
333/38 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
333/40 . . . . . Thiophene-2-carboxylic acid **[2]**
333/42 . . . . with nitro or nitroso radicals directly attached to ring carbon atoms **[2]**
333/44 . . . . . attached in position 5 **[2]**
333/46 . . substituted on the ring sulfur atom **[2]**
333/48 . . . by oxygen atoms **[2]**
333/50 . condensed with carbocyclic rings or ring systems **[2]**
333/52 . . Benzo [b] thiophenes; Hydrogenated benzo [b] thiophenes **[2]**
333/54 . . . with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to carbon atoms of the hetero ring **[2]**
333/56 . . . . Radicals substituted by oxygen atoms **[2]**
333/58 . . . . Radicals substituted by nitrogen atoms **[2]**
333/60 . . . . Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals **[2]**
333/62 . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to carbon atoms of the hetero ring **[2]**
333/64 . . . . Oxygen atoms **[2]**
333/66 . . . . Nitrogen atoms not forming part of a nitro radical **[2]**
333/68 . . . . Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**
333/70 . . . . . attached in position 2 **[2]**

333/72 . . Benzo [c] thiophenes; Hydrogenated benzo [c] thiophenes **[2]**
333/74 . . Naphthothiophenes **[2]**
333/76 . . Dibenzothiophenes **[2]**
333/78 . . condensed with rings other than six-membered or with ring systems containing such rings **[2,5]**
333/80 . . . Seven-membered rings **[2]**

335/00 Heterocyclic compounds containing six-membered rings having one sulfur atom as the only ring hetero atom [2]
335/02 . not condensed with other rings **[2]**
335/04 . condensed with carbocyclic rings or ring systems **[2]**
335/06 . . Benzothiopyrans; Hydrogenated benzothiopyrans **[2]**
335/08 . . Naphthothiopyrans; Hydrogenated naphthothiopyrans **[2]**
335/10 . . Dibenzothiopyrans; Hydrogenated dibenzothiopyrans **[2]**
335/12 . . . Thioxanthenes **[2]**
335/14 . . . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 9 **[2]**
335/16 . . . . . Oxygen atoms, e.g. thioxanthones **[2]**
335/18 . . . . . Nitrogen atoms **[2]**
335/20 . . . . with hydrocarbon radicals, substituted by amino radicals, directly attached in position 9 **[2]**

337/00 Heterocyclic compounds containing rings of more than six members having one sulfur atom as the only ring hetero atom [2]
337/02 . Seven-membered rings **[2]**
337/04 . . not condensed with other rings **[2]**
337/06 . . condensed with carbocyclic rings or ring systems **[2]**
337/08 . . . condensed with one six-membered ring **[2]**
337/10 . . . condensed with two six-membered rings **[2]**
337/12 . . . . [b, e]-condensed **[2]**
337/14 . . . . [b, f]-condensed **[2]**
337/16 . Eight-membered rings **[2]**

339/00 Heterocyclic compounds containing rings having two sulfur atoms as the only ring hetero atoms [2]
339/02 . Five-membered rings **[2]**
339/04 . . having the hetero atoms in positions 1 and 2, e.g. lipoic acid **[2]**
339/06 . . having the hetero atoms in positions 1 and 3, e.g. cyclic dithiocarbonates **[2]**
339/08 . Six-membered rings **[2]**

341/00 Heterocyclic compounds containing rings having three or more sulfur atoms as the only ring hetero atoms [2]

343/00 Heterocyclic compounds containing rings having sulfur and selenium or sulfur and tellurium atoms as the only ring hetero atoms [2]

345/00 Heterocyclic compounds containing rings having selenium or tellurium atoms as the only ring hetero atoms [2]

347/00 Heterocyclic compounds containing rings having halogen atoms as ring hetero atoms [2]

Heterocyclic compounds containing two or more hetero rings [2]

Note

Groups C07D 401/00 to C07D 421/00 cover compounds containing two or more relevant hetero rings at least two of which are covered by different main groups of groups C07D 203/00 to C07D 347/00, neither condensed among themselves nor condensed with a common carbocyclic ring or ring system. **[2]**

401/00 Heterocyclic compounds containing two or more hetero rings, having nitrogen atoms as the only ring hetero atoms, at least one ring being a six-membered ring with only one nitrogen atom [2]
401/02 . containing two hetero rings **[2]**
401/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
401/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
401/08 . . linked by a carbon chain containing alicyclic rings **[2]**
401/10 . . linked by a carbon chain containing aromatic rings **[2]**
401/12 . . linked by a chain containing hetero atoms as chain links **[2]**
401/14 . containing three or more hetero rings **[2]**

403/00 Heterocyclic compounds containing two or more hetero rings, having nitrogen atoms as the only ring hetero atoms, not provided for by group C07D 401/00 [2]
403/02 . containing two hetero rings **[2]**
403/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
403/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
403/08 . . linked by a carbon chain containing alicyclic rings **[2]**
403/10 . . linked by a carbon chain containing aromatic rings **[2]**
403/12 . . linked by a chain containing hetero atoms as chain links **[2]**
403/14 . containing three or more hetero rings **[2]**

405/00 Heterocyclic compounds containing both one or more hetero rings having oxygen atoms as the only ring hetero atoms, and one or more rings having nitrogen as the only ring hetero atom [2]
405/02 . containing two hetero rings **[2]**
405/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
405/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
405/08 . . linked by a carbon chain containing alicyclic rings **[2]**
405/10 . . linked by a carbon chain containing aromatic rings **[2]**
405/12 . . linked by a chain containing hetero atoms as chain links **[2]**
405/14 . containing three or more hetero rings **[2]**

407/00 Heterocyclic compounds containing two or more hetero rings, at least one ring having oxygen atoms as the only ring hetero atoms, not provided for by group C07D 405/00 [2]
407/02 . containing two hetero rings **[2]**

407/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
407/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
407/08 . . linked by a carbon chain containing alicyclic rings **[2]**
407/10 . . linked by a carbon chain containing aromatic rings **[2]**
407/12 . . linked by a chain containing hetero atoms as chain links **[2]**
407/14 . containing three or more hetero rings **[2]**

409/00 Heterocyclic compounds containing two or more hetero rings, at least one ring having sulfur atoms as the only ring hetero atoms [2]
409/02 . containing two hetero rings **[2]**
409/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
409/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
409/08 . . linked by a carbon chain containing alicyclic rings **[2]**
409/10 . . linked by a carbon chain containing aromatic rings **[2]**
409/12 . . linked by a chain containing hetero atoms as chain links **[2]**
409/14 . containing three or more hetero rings **[2]**

411/00 Heterocyclic compounds containing two or more hetero rings, at least one ring having oxygen and sulfur atoms as the only ring hetero atoms [2]
411/02 . containing two hetero rings **[2]**
411/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
411/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
411/08 . . linked by a carbon chain containing alicyclic rings **[2]**
411/10 . . linked by a carbon chain containing aromatic rings **[2]**
411/12 . . linked by a chain containing hetero atoms as chain links **[2]**
411/14 . containing three or more hetero rings **[2]**

413/00 Heterocyclic compounds containing two or more hetero rings, at least one ring having nitrogen and oxygen atoms as the only ring hetero atoms [2]
413/02 . containing two hetero rings **[2]**
413/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
413/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
413/08 . . linked by a carbon chain containing alicyclic rings **[2]**
413/10 . . linked by a carbon chain containing aromatic rings **[2]**
413/12 . . linked by a chain containing hetero atoms as chain links **[2]**
413/14 . containing three or more hetero rings **[2]**

415/00 Heterocyclic compounds containing the thiamine skeleton [2]

417/00 Heterocyclic compounds containing two or more hetero rings, at least one ring having nitrogen and sulfur atoms as the only ring hetero atoms, not provided for by group C07D 415/00 [2]
417/02 . containing two hetero rings **[2]**
417/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
417/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
417/08 . . linked by a carbon chain containing alicyclic rings **[2]**
417/10 . . linked by a carbon chain containing aromatic rings **[2]**
417/12 . . linked by a chain containing hetero atoms as chain links **[2]**
417/14 . containing three or more hetero rings **[2]**

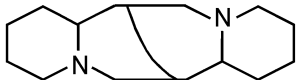
419/00 Heterocyclic compounds containing two or more hetero rings, at least one ring having nitrogen, oxygen, and sulfur atoms as the only ring hetero atoms [2]
419/02 . containing two hetero rings **[2]**
419/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
419/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
419/08 . . linked by a carbon chain containing alicyclic rings **[2]**
419/10 . . linked by a carbon chain containing aromatic rings **[2]**
419/12 . . linked by a chain containing hetero atoms as chain links **[2]**
419/14 . containing three or more hetero rings **[2]**

421/00 Heterocyclic compounds containing two or more hetero rings, at least one ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2]
421/02 . containing two hetero rings **[2]**
421/04 . . directly linked by a ring-member-to-ring- member bond **[2]**
421/06 . . linked by a carbon chain containing only aliphatic carbon atoms **[2]**
421/08 . . linked by a carbon chain containing alicyclic rings **[2]**
421/10 . . linked by a carbon chain containing aromatic rings **[2]**
421/12 . . linked by a chain containing hetero atoms as chain links **[2]**
421/14 . containing three or more hetero rings **[2]**

Heterocyclic compounds containing condensed hetero ring systems [2]

(1) Groups C07D 451/00 to C07D 517/00 cover compounds containing one system of two or more relevant hetero rings condensed among themselves or condensed with a common carbocyclic ring system, with or without other non-condensed hetero rings. **[2]**
(2) For the purpose of classification in groups C07D 451/00 to C07D 519/00, the degree of hydrogenation of the ring system is not taken into consideration. **[2]**

(3) For the purpose of classification in groups C07D 451/00 to C07D 463/00, C07D 473/00 to C07D 477/00, C07D 489/00, C07D 499/00 to C07D 507/00, the wording of the groups has to be understood, in the absence of an indication to the contrary, as including ring systems further condensed with carbocyclic rings or ring systems, but excluding ring systems further condensed with other hetero rings, either directly or through a common carbocyclic ring system, e.g. sparteine



is classified in group C07D 471/22, not in group C07D 455/02. **[3,5]**

(4) In groups C07D 471/00, C07D 487/00, C07D 491/00 to C07D 498/00 or C07D 513/00 to C07D 517/00, the subdivision is based on the number of relevant hetero rings. **[3]**

451/00 Heterocyclic compounds containing 8-azabicyclo [3.2.1] octane, 9-azabicyclo [3.3.1] nonane, or 3-oxa-9-azatricyclo [3.3.1.02,4] nonane ring systems, e.g. tropane or granatane alkaloids, scopolamine; Cyclic acetals thereof [2]

451/02 . containing not further condensed 8-azabicyclo [3.2.1] octane or 3-oxa-9-azatricyclo [3.3.1.02,4] nonane ring systems, e.g. tropane; Cyclic acetals thereof **[2]**

451/04 . . with hetero atoms directly attached in position 3 of the 8-azabicyclo [3.2.1] octane or in position 7 of the 3-oxa-9-azatricyclo [3.3.1.02,4] nonane ring system **[2]**

451/06 . . . Oxygen atoms **[2]**

451/08 . . . . Diarylmethoxy radicals **[2]**

451/10 . . . . acylated by aliphatic or araliphatic carboxylic acids, e.g. atropine, scopolamine **[2]**

451/12 . . . . acylated by aromatic or heteroaromatic carboxylic acids, e.g. cocaine **[2]**

451/14 . containing 9-azabicyclo [3.3.1] nonane ring systems, e.g. granatane, 2-aza-adamantane; Cyclic acetals thereof **[2]**

453/00 Heterocyclic compounds containing quinuclidine or iso-quinuclidine ring systems, e.g. quinine alkaloids [2]

453/02 . containing not further condensed quinuclidine ring systems **[2]**

453/04 . . having a quinolyl-4, a substituted quinolyl-4 or a alkylenedioxy-quinolyl-4 radical linked through only one carbon atom, attached in position 2, e.g. quinine **[2]**

453/06 . containing iso-quinuclidine ring systems **[2]**

455/00 Heterocyclic compounds containing quinolizine ring systems, e.g. emetine alkaloids, protoberberine; Alkylenedioxy derivatives of dibenzo [a, g] quinolizines, e.g. berberine [2]

455/02 . containing not further condensed quinolizine ring systems **[2]**

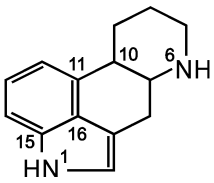
455/03 . containing quinolizine ring systems directly condensed with at least one six-membered carbocyclic ring, e.g. protoberberine; Alkylenedioxy derivatives of dibenzo [a, g] quinolizines, e.g. berberine **[3]**

455/04 . . containing a quinolizine ring system condensed with only one six-membered carbocyclic ring, e.g. julolidine **[2,3]**

455/06 . . . containing benzo [a] quinolizine ring systems **[2,3]**

455/08 . . . . having an isoquinolyl-1, a substituted isoquinolyl-1 or an alkylenedioxyisoquinolyl-1 radical linked through only one carbon atom, attached in position 2, e.g. emetine **[2,3]**

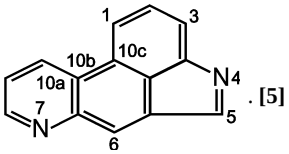
457/00 Heterocyclic compounds containing indolo [4, 3-f, g] quinoline ring systems, e.g. derivatives of ergoline, of the formula:



, e.g. lysergic acid (compounds of the cyclic peptide type derived from ergotamane C07D 519/02) **[2]**

Note

The numbering may be different according to the RING INDEX and given by the formula:



. **[5]**

457/02 . with hydrocarbon or substituted hydrocarbon radicals, attached in position 8 **[2]**

457/04 . with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 8 **[2]**

457/06 . . Lysergic acid amides **[2]**

457/08 . . . in which the amide nitrogen is a member of a heterocyclic ring **[2]**

457/10 . with hetero atoms directly attached in position 8 **[2]**

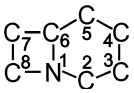
457/12 . . Nitrogen atoms **[2]**

457/14 . containing indolo [4, 3-f, g] quinoline ring systems condensed with carbocyclic rings or ring systems **[3]**

459/00 Heterocyclic compounds containing benz [g] indolo [2, 3-a] quinolizine ring systems, e.g. yohimbine; 16, 18-lactones thereof, e.g. reserpic acid lactone [2]

461/00 Heterocyclic compounds containing indolo [3, 2, 1-d, e] pyrido [3, 2, 1-i, j] [1, 5]-naphthyridine ring systems, e.g. vincamine (dimeric indolo alkaloids C07D 519/04) **[3]**

463/00 Heterocyclic compounds containing 1-azabicyclo [4.2.0] octane ring systems, i.e. compounds containing a ring system of the formula:



, e.g. carbacephalosporins; Such ring systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5]

463/02 . Preparation (by microbiological processes C12P 17/18) **[6]**

463/04 . . by forming the ring or condensed ring systems **[6]**

463/06 . . from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents **[6]**

463/08 . . . Modification of a carboxyl group directly attached in position 2, e.g. esterification **[6]**

463/10 . with a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 **[6]**

463/12 . . with hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals attached in position 7 **[6]**

463/14 . . with hetero atoms directly attached in position 7 **[6]**

463/16 . . . Nitrogen atoms **[6]**

463/18 . . . . further acylated by radicals derived from carboxylic acids or by nitrogen or sulfur analogues thereof **[6]**

463/20 . . . . . with the acylating radicals further substituted by hetero atoms or by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[6]**

463/22 . . . . . further substituted by nitrogen atoms **[6]**

471/00 Heterocyclic compounds containing nitrogen atoms as the only ring hetero atoms in the condensed system, at least one ring being a six-membered ring with one nitrogen atom, not provided for by groups C07D 451/00 to C07D 463/00 [2,5]

471/02 . in which the condensed system contains two hetero rings **[2]**

471/04 . . Ortho-condensed systems (carbacephams, e.g. homothienamycins, C07D 463/00) **[2,5]**

471/06 . . Peri-condensed systems **[2]**

471/08 . . Bridged systems **[2]**

471/10 . . Spiro-condensed systems **[2]**

471/12 . in which the condensed system contains three hetero rings **[2]**

471/14 . . Ortho-condensed systems **[2]**

471/16 . . Peri-condensed systems **[2]**

471/18 . . Bridged systems **[2]**

471/20 . . Spiro-condensed systems **[2]**

471/22 . in which the condensed systems contains four or more hetero rings **[2]**

473/00 Heterocyclic compounds containing purine ring systems [2]

473/02 . with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 **[2]**

473/04 . . two oxygen atoms **[2]**

473/06 . . . with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 **[2]**

473/08 . . . . with methyl radicals in positions 1 and 3, e.g. theophylline **[2]**

473/10 . . . . with methyl radicals in positions 3 and 7, e.g. theobromine **[2]**

473/12 . . . . with methyl radicals in positions 1, 3, and 7, e.g. caffeine **[2]**

473/14 . . . . with two methyl radicals in positions 1 and 3 and two methyl radicals in positions 7, 8, or 9 **[2]**

473/16 . . two nitrogen atoms **[2]**

473/18 . . one oxygen and one nitrogen atom, e.g. guanine **[2]**

473/20 . . two sulfur atoms **[2]**

473/22 . . one oxygen and one sulfur atom **[2]**

473/24 . . one nitrogen and one sulfur atom **[2]**

473/26 . with an oxygen, sulfur, or nitrogen atom directly attached in position 2 or 6, but not in both **[2]**

473/28 . . Oxygen atom **[2]**

473/30 . . . attached in position 6, e.g. hypoxanthine **[2]**

473/32 . . Nitrogen atom **[2]**

473/34 . . . attached in position 6, e.g. adenine **[2]**

473/36 . . Sulfur atom **[2]**

473/38 . . . attached in position 6 **[2]**

473/40 . with halogen atoms or perhalogeno-alkyl radicals directly attached in position 2 or 6 **[2]**

475/00 Heterocyclic compounds containing pteridine ring systems [2]

475/02 . with an oxygen atom directly attached in position 4 **[2]**

475/04 . . with a nitrogen atom directly attached in position 2 **[2]**

475/06 . with a nitrogen atom directly attached in position 4 **[2]**

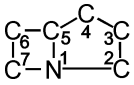
475/08 . . with a nitrogen atom directly attached in position 2 **[2]**

475/10 . . with an aromatic or hetero-aromatic ring directly attached in position 2 **[2]**

475/12 . containing pteridine ring systems condensed with carbocyclic rings or ring systems **[3]**

475/14 . . Benz [g] pteridines, e.g. riboflavin **[3]**

477/00 Heterocyclic compounds containing 1-azabicyclo [3.2.0] heptane ring systems, i.e. compounds containing a ring system of the formula:



, e.g. carbapenicillins, thienamycins;

Such ring systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5]

477/02 . Preparation (by microbiological processes C12P 17/18) **[6]**

477/04 . . by forming the ring or condensed ring systems **[6]**

477/06 . . from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents **[6]**

477/08 . . . Modification of a carboxyl group directly attached in position 2, e.g. esterification **[6]**

477/10 . with hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached in position 4, and with a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 **[6]**

477/12 . . with hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, attached in position 6 **[6]**

477/14 . . . with hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, attached in position 3 **[6]**

477/16 . . . with hetero atoms or carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 3 **[6]**

477/18 . . . . Oxygen atoms **[6]**

477/20 . . . . Sulfur atoms **[6]**

477/22 . . . . Nitrogen atoms **[6]**

477/24 . . with hetero atoms or carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 6 **[6]**

477/26 . with hetero atoms or carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 4 **[6]**

487/00 Heterocyclic compounds containing nitrogen atoms as the only ring hetero atoms in the condensed system, not provided for by groups C07D 451/00 to C07D 477/00 [2,5]

487/02 . in which the condensed system contains two hetero rings **[2]**

487/04 . . Ortho-condensed systems (carbapenams, e.g. thienamycins, C07D 477/00) **[2,5]**

487/06 . . Peri-condensed systems **[2]**

487/08 . . Bridged systems **[2]**

487/10 . . Spiro-condensed systems **[2]**

487/12 . in which the condensed system contains three hetero rings **[2]**

487/14 . . Ortho-condensed systems **[2]**

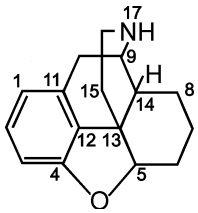
487/16 . . Peri-condensed systems **[2]**

487/18 . . Bridged systems **[2]**

487/20 . . Spiro-condensed systems **[2]**

487/22 . in which the condensed system contains four or more hetero rings **[2]**

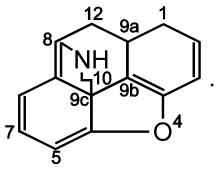
489/00 Heterocyclic compounds containing 4aH-8, 9 c-Iminoethano-phenanthro [4, 5-b, c, d] furan ring systems, e.g. derivatives of [4, 5-epoxy]-morphinan of the formula:



[2]

Note

The numbering may be different according to the RING INDEX and given by the formula:



. **[5]**

489/02 . with oxygen atoms attached in positions 3 and 6, e.g. morphine, morphinone **[2]**

489/04 . . Salts; Organic complexes **[2]**

489/06 . with a hetero atom directly attached in position 14 **[2]**

489/08 . . Oxygen atom **[2]**

489/09 . containing 4aH-8, 9 c-Iminoethano- phenanthro [4, 5-b, c, d] furan ring systems condensed with carbocyclic rings or ring systems **[3]**

489/10 . . with a bridge between positions 6 and 14 **[2,3]**

489/12 . . . the bridge containing only two carbon atoms **[2,3]**

491/00 Heterocyclic compounds containing in the condensed ring system both one or more rings having oxygen atoms as the only ring hetero atoms and one or more rings having nitrogen atoms as the only ring hetero atoms, not provided for by groups C07D 451/00 to C07D 459/00, C07D 463/00, C07D 477/00 or C07D 489/00 [2]

491/02 . in which the condensed system contains two hetero rings **[2]**

491/04 . . Ortho-condensed systems **[2]**

491/044 . . . with only one oxygen atom as ring hetero atom in the oxygen-containing ring **[3]**

491/048 . . . . the oxygen-containing ring being five-membered **[3]**

491/052 . . . . the oxygen-containing ring being six-membered **[3]**

491/056 . . . with two or more oxygen atoms as ring hetero atoms in the oxygen-containing ring **[3]**

491/06 . . Peri-condensed systems **[2]**

491/08 . . Bridged systems **[2]**

491/10 . . Spiro-condensed systems **[2]**

491/107 . . . with only one oxygen atom as ring hetero atom in the oxygen-containing ring **[3]**

491/113 . . . with two or more oxygen atoms as ring hetero atoms in the oxygen-containing ring **[3]**

491/12 . in which the condensed system contains three hetero rings **[2]**

491/14 . . Ortho-condensed systems (alkylenedioxy derivatives of dibenzo [a, g] quinolizines, e.g. berberine, C07D 455/03) **[2]**

491/147 . . . the condensed system containing one ring with oxygen as ring hetero atom and two rings with nitrogen as ring hetero atom **[3]**

491/153 . . . the condensed system containing two rings with oxygen as ring hetero atom and one ring with nitrogen as ring hetero atom **[3]**

491/16 . . Peri-condensed systems **[2]**

491/18 . . Bridged systems (3-oxa-9-azatricyclo [3.3.1.02,4] nonane ring systems, e.g. scopolamine, C07D 451/00) **[2]**

491/20 . . Spiro-condensed systems **[2]**

491/22 . in which the condensed system contains four or more hetero rings **[2]**

493/00 Heterocyclic compounds containing oxygen atoms as the only ring hetero atoms in the condensed system [2]

493/02 . in which the condensed system contains two hetero rings **[2]**

493/04 . . Ortho-condensed systems **[2]**

493/06 . . Peri-condensed systems **[2]**

493/08 . . Bridged systems **[2]**

493/10 . . Spiro-condensed systems **[2]**

493/12 . in which the condensed system contains three hetero rings **[2]**

493/14 . . Ortho-condensed systems **[2]**

493/16 . . Peri-condensed systems **[2]**

493/18 . . Bridged systems **[2]**

493/20 . . Spiro-condensed systems **[2]**

493/22 . in which the condensed system contains four or more hetero rings **[2]**

495/00 Heterocyclic compounds containing in the condensed system at least one hetero ring having sulfur atoms as the only ring hetero atoms [2]

495/02 . in which the condensed system contains two hetero rings **[2]**

495/04 . . Ortho-condensed systems **[2]**
495/06 . . Peri-condensed systems **[2]**
495/08 . . Bridged systems **[2]**
495/10 . . Spiro-condensed systems **[2]**
495/12 . in which the condensed system contains three hetero rings **[2]**
495/14 . . Ortho-condensed systems **[2]**
495/16 . . Peri-condensed systems **[2]**
495/18 . . Bridged systems **[2]**
495/20 . . Spiro-condensed systems **[2]**
495/22 . in which the condensed system contains four or more hetero rings **[2]**

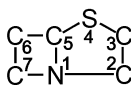
497/00 Heterocyclic compounds containing in the condensed system at least one hetero ring having oxygen and sulfur atoms as the only ring hetero atoms [2]

497/02 . in which the condensed system contains two hetero rings **[2]**
497/04 . . Ortho-condensed systems **[2]**
497/06 . . Peri-condensed systems **[2]**
497/08 . . Bridged systems **[2]**
497/10 . . Spiro-condensed systems **[2]**
497/12 . in which the condensed system contains three hetero rings **[2]**
497/14 . . Ortho-condensed systems **[2]**
497/16 . . Peri-condensed systems **[2]**
497/18 . . Bridged systems **[2]**
497/20 . . Spiro-condensed systems **[2]**
497/22 . in which the condensed system contains four or more hetero rings **[2]**

498/00 Heterocyclic compounds containing in the condensed system at least one hetero ring having nitrogen and oxygen atoms as the only ring hetero atoms (4-oxa-1-azabicyclo [3.2.0] heptanes, e.g. oxapenicillins C07D 503/00; 5-oxa-1-azabicyclo [4.2.0] octanes, e.g. oxacephalosporins C07D 505/00; analogues thereof having ring oxygen atoms in other position C07D 507/00) **[2,6]**

498/02 . in which the condensed system contains two hetero rings **[2]**
498/04 . . Ortho-condensed systems **[2]**
498/06 . . Peri-condensed systems **[2]**
498/08 . . Bridged systems **[2]**
498/10 . . Spiro-condensed systems **[2]**
498/12 . in which the condensed system contains three hetero rings **[2]**
498/14 . . Ortho-condensed systems **[2]**
498/16 . . Peri-condensed systems **[2]**
498/18 . . Bridged systems **[2]**
498/20 . . Spiro-condensed systems **[2]**
498/22 . in which the condensed system contains four or more hetero rings **[2]**

499/00 Heterocyclic compounds containing 4-thia-1-azabicyclo [3.2.0] heptane ring systems, i.e. compounds containing a ring system of the formula:



, e.g. penicillins, penems; **Such ring systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [2]**

499/04 . Preparation **[2,6]**
499/06 . . by forming the ring or condensed ring systems (by microbiological processes C12P 37/00) **[2,6]**
499/08 . . Modification of a carboxyl radical directly attached in position 2, e.g. esterification **[2,6]**
499/10 . . Modification of an amino radical directly attached in position 6 **[2,6]**
499/12 . . . Acylation **[2,6]**
499/14 . . Preparation of salts **[2,6]**
499/16 . . . of alkali or alkaline earth metals **[2,6]**
499/18 . . Separation; Purification **[2,6]**
499/20 . . . via salts with organic bases **[2,6]**
499/21 . with a nitrogen atom directly attached in position 6 and a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 **[6]**
499/22 . . Salts with organic bases; Complexes with organic compounds **[2]**
499/24 . . . with acyclic or carbocyclic compounds containing amino radicals **[2]**
499/26 . . . with heterocyclic compounds **[2]**
499/28 . . with modified 2-carboxyl group **[2]**
499/30 . . . Acid anhydride **[2]**
499/32 . . . Esters **[2]**
499/34 . . . Thio-acid; Esters thereof **[2]**
499/36 . . . . O-esters **[2]**
499/38 . . . . S-esters **[2]**
499/40 . . . Amides; Hydrazides; Azides **[2]**
499/42 . . Compounds with a free primary amino radical attached in position 6 **[2]**
499/44 . . Compounds with an amino radical acylated by carboxylic acids, attached in position 6 **[2]**
499/46 . . . with acyclic hydrocarbon radicals or such radicals substituted by carbocyclic or heterocyclic rings, attached to the carboxamido radical **[2]**
499/48 . . . with a carbon chain, substituted by hetero atoms or by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, attached to the carboxamido radical **[2]**
499/50 . . . . substituted in beta-position to the carboxamido radical **[2]**
499/52 . . . . . by oxygen or sulfur atoms **[2]**
499/54 . . . . . by nitrogen atoms **[2]**
499/56 . . . . . by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[2]**
499/58 . . . . substituted in alpha-position to the carboxamido radical **[2]**
499/60 . . . . . by oxygen atoms **[2]**
499/62 . . . . . by sulfur atoms **[2]**
499/64 . . . . . by nitrogen atoms **[2]**
499/66 . . . . . with alicyclic rings as additional substituents on the carbon chain **[2]**
499/68 . . . . . with aromatic rings as additional substituents on the carbon chain **[2]**
499/70 . . . . . with hetero rings as additional substituents on the carbon chain **[2]**
499/72 . . . . . by carbon atoms having three bonds to hetero atoms **[2]**
499/74 . . . with carbocyclic rings directly attached to the carboxamido radical **[2]**
499/76 . . . with hetero rings directly attached to the carboxamido radical **[2]**
499/78 . . Compounds with an amino radical, acylated by carbonic acid, or by nitrogen or sulfur analogues thereof, attached in position 6 **[2]**

499/80 . . Compounds with a nitrogen-containing hetero ring, attached with the ring nitrogen atom in position 6 **[2]**

499/86 . with only atoms other than nitrogen atoms directly attached in position 6 and a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 **[5,6]**

499/861 . . with a hydrocarbon radical or a substituted hydrocarbon radical, directly attached in position 6 **[6]**

499/865 . . with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 6 **[6]**

499/87 . Compounds being unsubstituted in position 3 or with substituents other than only two methyl radicals attached in position 3, and with a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 **[6]**

499/88 . Compounds with a double bond between positions 2 and 3 and a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 **[5,6]**

499/881 . . with a hydrogen atom or an unsubstituted hydrocarbon radical, attached in position 3 **[6]**

499/883 . . with a substituted hydrocarbon radical attached in position 3 **[6]**

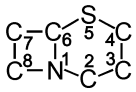
499/887 . . with a hetero atom or a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 3 **[6]**

499/893 . . with a hetero ring or a condensed hetero ring system, directly attached in position 3 **[6]**

499/897 . Compounds with substituents other than a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, directly attached in position 2 **[6]**

499/90 . further condensed with carbocyclic rings or ring systems **[5]**

501/00 Heterocyclic compounds containing 5-thia-1-azabicyclo [4.2.0] octane ring systems, i.e. compounds containing a ring system of the formula:



, e.g. cephalosporins; **Such ring systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [2]**

501/02 . Preparation **[2]**

501/04 . . from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents **[2]**

501/06 . . . Acylation of 7-aminocephalosporanic acid **[2]**

501/08 . . by forming the ring or condensed ring systems (by microbiological processes C12P 35/00) **[2]**

501/10 . . . from compounds containing the penicillin ring system **[2]**

501/12 . . Separation; Purification **[2]**

501/14 . Compounds having a nitrogen atom directly attached in position 7 **[2]**

501/16 . . with a double bond between positions 2 and 3 **[2]**

501/18 . . . 7-Aminocephalosporanic or substituted 7-aminocephalosporanic acids **[2]**

501/20 . . . 7-Acylaminocephalosporanic or substituted 7-acylaminocephalosporanic acids in which the acyl radicals are derived from carboxylic acids **[2]**

501/22 . . . . with radicals containing only hydrogen and carbon atoms, attached in position 3 **[2]**

501/24 . . . . with hydrocarbon radicals, substituted by hetero atoms or hetero rings, attached in position 3 **[2]**

501/26 . . . . . Methylene radicals, substituted by oxygen atoms; Lactones thereof with the 2-carboxyl group **[2]**

501/28 . . . . . with the 7-amino radical acylated by an aliphatic carboxylic acid, which is substituted by hetero atoms **[2]**

501/30 . . . . . with the 7-amino-radical acylated by an araliphatic carboxylic acid **[2]**

501/32 . . . . . with the 7-amino radical acylated by an araliphatic carboxylic acid, which is substituted on the aliphatic radical by hetero atoms **[2]**

501/34 . . . . . with the 7-amino radical acylated by carboxylic acids containing hetero rings **[2]**

501/36 . . . . . Methylene radicals, substituted by sulfur atoms **[2]**

501/38 . . . . . Methylene radicals, substituted by nitrogen atoms; Lactams thereof with the 2-carboxyl group; Methylene radicals substituted by nitrogen-containing hetero rings attached by the ring nitrogen atom; Quaternary compounds thereof **[2]**

501/40 . . . . . with the 7-amino radical acylated by an aliphatic carboxylic acid, which is substituted by hetero atoms **[2]**

501/42 . . . . . with the 7-amino radical acylated by an araliphatic carboxylic acid **[2]**

501/44 . . . . . with the 7-amino radical acylated by an araliphatic carboxylic acid, which is substituted on the aliphatic radical by hetero atoms **[2]**

501/46 . . . . . with the 7-amino radical acylated by carboxylic acids containing hetero rings **[2]**

501/48 . . . . . Methylene radicals, substituted by hetero rings (C07D 501/38 to C07D 501/46 take precedence) **[2]**

501/50 . . . . . with the 7-amino radical acylated by an aliphatic carboxylic acid, which is substituted by hetero atoms **[2]**

501/52 . . . . . with the 7-amino radical acylated by an araliphatic carboxylic acid **[2]**

501/54 . . . . . with the 7-amino radical acylated by an araliphatic carboxylic acid, which is substituted on the aliphatic radical by hetero atoms **[2]**

501/56 . . . . . with the 7-amino radical acylated by carboxylic acids containing hetero rings **[2]**

501/57 . . . . with a further substituent in position 7, e.g. cephamycines **[3]**

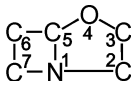
501/58 . . . with a nitrogen atom, which is a member of a hetero ring, attached in position 7 **[2]**

501/59 . . . with hetero atoms directly attached in position 3 **[3]**

501/60 . . with a double bond between positions 3 and 4 **[2]**

501/62 . Compounds further condensed with a carbocyclic ring or ring system **[3]**

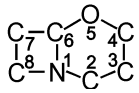
503/00 **Heterocyclic compounds containing 4-oxa-1-azabicyclo [3.2.0] heptane ring systems, i.e. compounds containing a ring system of the formula:**



, e.g. oxapenicillins, clavulanic acid derivatives; **Such ring systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [6]**

503/02 . Preparation (by microbiological processes C12P 17/18) **[6]**
503/04 . . by forming the ring or condensed ring systems **[6]**
503/06 . . from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents **[6]**
503/08 . . . Modification of a carboxyl group directly attached in position 2, e.g. esterification **[6]**
503/10 . with a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 **[6]**
503/12 . . unsubstituted in position 6 **[6]**
503/14 . . . with hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, other than a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, attached in position 3 **[6]**
503/16 . . . . Radicals substituted by hetero atoms or by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical **[6]**
503/18 . . . . . by oxygen atoms **[6]**
503/20 . . . . . by sulfur atoms **[6]**
503/22 . . . . . by nitrogen atoms **[6]**

505/00 **Heterocyclic compounds containing 5-oxa-1-azabicyclo [4.2.0] octane ring systems, i.e. compounds containing a ring system of the formula:**



, e.g. oxacephalosporins; **Such ring systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [6]**

505/02 . Preparation (by microbiological processes C12P 17/18) **[6]**
505/04 . . by forming the ring or condensed ring systems **[6]**
505/06 . . from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents **[6]**
505/08 . . . Modification of a carboxyl group directly attached in position 2, e.g. esterification **[6]**
505/10 . with a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 **[6]**
505/12 . . substituted in position 7 **[6]**
505/14 . . . with hetero atoms directly attached in position 7 **[6]**
505/16 . . . . Nitrogen atoms **[6]**
505/18 . . . . . further acylated by radicals derived from carboxylic acids or by nitrogen or sulfur analogues thereof **[6]**
505/20 . . . . . with the acylating radicals further substituted by hetero atoms or by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen **[6]**
505/22 . . . . . further substituted by singly-bound nitrogen atoms **[6]**
505/24 . . . . . further substituted by doubly-bound nitrogen atoms **[6]**

507/00 **Heterocyclic compounds containing a condensed beta-lactam ring system, not provided for by groups C07D 463/00, C07D 477/00 or C07D 499/00 to C07D 505/00**; **Such ring systems being further condensed [6]**

507/02 . containing 3-oxa-1-azabicyclo [3.2.0] heptane ring systems **[6]**
507/04 . containing 2-oxa-1-azabicyclo [4.2.0] octane ring systems **[6]**
507/06 . containing 3-oxa-1-azabicyclo [4.2.0] octane ring systems **[6]**
507/08 . containing 4-oxa-1-azabicyclo [4.2.0] octane ring systems **[6]**

513/00 **Heterocyclic compounds containing in the condensed system at least one hetero ring having nitrogen and sulfur atoms as the only ring hetero atoms, not provided for in groups C07D 463/00, C07D 477/00 or C07D 499/00 to C07D 507/00 [2,6]**

513/02 . in which the condensed system contains two hetero rings **[2]**
513/04 . . Ortho-condensed systems **[2]**
513/06 . . Peri-condensed systems **[2]**
513/08 . . Bridged systems **[2]**
513/10 . . Spiro-condensed systems **[2]**
513/12 . in which the condensed system contains three hetero rings **[2]**
513/14 . . Ortho-condensed systems **[2]**
513/16 . . Peri-condensed systems **[2]**
513/18 . . Bridged systems **[2]**
513/20 . . Spiro-condensed systems **[2]**
513/22 . in which the condensed system contains four or more hetero rings **[2]**

515/00 **Heterocyclic compounds containing in the condensed system at least one hetero ring having nitrogen, oxygen, and sulfur atoms as the only ring hetero atoms, not provided for in groups C07D 463/00, C07D 477/00 or C07D 499/00 to C07D 507/00 [2]**

515/02 . in which the condensed system contains two hetero rings **[2]**
515/04 . . Ortho-condensed systems **[2]**
515/06 . . Peri-condensed systems **[2]**
515/08 . . Bridged systems **[2]**
515/10 . . Spiro-condensed systems **[2]**
515/12 . in which the condensed system contains three hetero rings **[2]**
515/14 . . Ortho-condensed systems **[2]**
515/16 . . Peri-condensed systems **[2]**
515/18 . . Bridged systems **[2]**
515/20 . . Spiro-condensed systems **[2]**
515/22 . in which the condensed system contains four or more hetero rings **[2]**

517/00 Heterocyclic compounds containing in the condensed system at least one hetero ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2]

517/02 . in which the condensed system contains two hetero rings **[2]**
517/04 . . Ortho-condensed systems **[2]**
517/06 . . Peri-condensed systems **[2]**
517/08 . . Bridged systems **[2]**
517/10 . . Spiro-condensed systems **[2]**
517/12 . in which the condensed system contains three hetero rings **[2]**
517/14 . . Ortho-condensed systems **[2]**
517/16 . . Peri-condensed systems **[2]**
517/18 . . Bridged systems **[2]**
517/20 . . Spiro-condensed systems **[2]**
517/22 . in which the condensed system contains four or more hetero rings **[2]**

519/00 Heterocyclic compounds containing more than one system of two or more relevant hetero rings condensed among themselves or condensed with a common carbocyclic ring system not provided for in groups C07D 453/00 or C07D 455/00 [2]

519/02 . Ergot alkaloids of the cyclic peptide type **[2]**
519/04 . Dimeric indole alkaloids, e.g. vincaleucoblastine **[2]**
519/06 . containing at least one condensed beta-lactam ring system, provided for by groups C07D 463/00, C07D 477/00 or C07D 499/00 to C07D 507/00, e.g. a penem or a cepham system **[6]**

521/00 Heterocyclic compounds containing unspecified hetero rings [2]

Note

This group is only used for the classification of heterocyclic compounds the chemical structure of which are not specified, i.e. only in those cases where the heterocyclic compounds cannot be classified in any of groups C07D 201/00 to C07D 519/00. **[2009.01]**

C07F ACYCLIC, CARBOCYCLIC, OR HETEROCYCLIC COMPOUNDS CONTAINING ELEMENTS OTHER THAN CARBON, HYDROGEN, HALOGEN, OXYGEN, NITROGEN, SULFUR, SELENIUM, OR TELLURIUM (metal-containing porphyrins C07D 487/22)

(1) Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C to C07K and within these subclasses. **[8]**
(2) Attention is drawn to Note (6) following the title of class C07. **[2]**
(3) Attention is drawn to Note (3) after the title of section C, which Note indicates to which version of the periodic table of chemical elements the IPC refers. **[2010.01]**
(4) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**
(5) In this subclass, organic acid salts, alcoholates, phenates, chelates or mercaptides are classified as the parent compounds. **[2]**

1/00 Compounds containing elements of the 1st Group of the Periodic System

1/02 . Lithium compounds
1/04 . Sodium compounds
1/06 . Potassium compounds
1/08 . Copper compounds
1/10 . Silver compounds
1/12 . Gold compounds

3/00 Compounds containing elements of the 2nd Group of the Periodic System

3/02 . Magnesium compounds
3/04 . Calcium compounds
3/06 . Zinc compounds
3/08 . Cadmium compounds
3/10 . Mercury compounds
3/12 . . Aromatic substances containing mercury
3/14 . . Heterocyclic substances containing mercury

5/00 Compounds containing elements of the 3rd Group of the Periodic System

5/02 . Boron compounds
5/04 . . Esters of boric acids
5/05 . . Cyclic compounds having at least one ring containing boron but no carbon in the ring **[2]**
5/06 . Aluminium compounds

7/00 Compounds containing elements of the 4th Group of the Periodic System

7/02 . Silicon compounds
7/04 . . Esters of silicic acids
7/06 . . . with hydroxyaryl compounds
7/07 . . . Cyclic esters **[2]**
7/08 . . Compounds having one or more C−Si linkages
7/10 . . . containing nitrogen
7/12 . . . Organo silicon halides
7/14 . . . . Preparation thereof from halogenated silanes and hydrocarbons
7/16 . . . . Preparation thereof from silicon and halogenated hydrocarbons
7/18 . . . Compounds having one or more C−Si linkages as well as one or more C−O−Si linkages
7/20 . . . Purification; Separation
7/21 . . Cyclic compounds having at least one ring containing silicon but no carbon in the ring **[2]**
7/22 . Tin compounds
7/24 . Lead compounds
7/26 . . Tetra-alkyl lead compounds
7/28 . Titanium compounds
7/30 . Germanium compounds **[2]**

9/00 Compounds containing elements of the 5th Group of the Periodic System

9/02 . Phosphorus compounds **[2]**

9/04 . . Reaction products of phosphorus sulfur compounds with hydrocarbons
9/06 . . without P−C bonds
9/08 . . . Esters of oxyacids of phosphorus
9/09 . . . . Esters of phosphoric acids **[2]**
9/10 . . . . . Phosphatides, e.g. lecithin
9/11 . . . . . with hydroxyalkyl compounds without further substituents on alkyl **[2]**
9/113 . . . . . with unsaturated acyclic alcohols **[2]**
9/117 . . . . . with cycloaliphatic alcohols **[2]**
9/12 . . . . . with hydroxyaryl compounds **[2]**
9/14 . . . . . containing P-halide groups **[2]**
9/141 . . . . Esters of phosphorous acids **[2]**
9/142 . . . . . with hydroxyalkyl compounds without further substituents on alkyl **[2]**
9/143 . . . . . with unsaturated acyclic alcohols **[2]**
9/144 . . . . . with cycloaliphatic alcohols **[2]**
9/145 . . . . . with hydroxyaryl compounds **[2]**
9/146 . . . . . containing P-halide groups **[2]**
9/16 . . . Esters of thiophosphoric acids or thiophosphorous acids
9/165 . . . . Esters of thiophosphoric acids **[2]**
9/17 . . . . . with hydroxyalkyl compounds without further substituents on alkyl **[2]**
9/173 . . . . . with unsaturated acyclic alcohols **[2]**
9/177 . . . . . with cycloaliphatic alcohols **[2]**
9/18 . . . . . with hydroxyaryl compounds **[2]**
9/20 . . . . . containing P-halide groups **[2]**
9/201 . . . . Esters of thiophosphorous acids **[2]**
9/202 . . . . . with hydroxyalkyl compounds without further substituents on alkyl **[2]**
9/203 . . . . . with unsaturated acyclic alcohols **[2]**
9/204 . . . . . with cycloaliphatic alcohols **[2]**
9/205 . . . . . with hydroxyaryl compounds **[2]**
9/206 . . . . . containing P-halide groups **[2]**
9/22 . . . Amides of acids of phosphorus
9/24 . . . . Esteramides
9/26 . . . . containing P-halide groups
9/28 . . with one or more P−C bonds
9/30 . . . Phosphinic acids (R_2=P(:O)OH); Thiophosphinic acids
9/32 . . . . Esters thereof
9/34 . . . . Halides thereof
9/36 . . . . Amides thereof
9/38 . . . Phosphonic acids (R−P(:O)$(OH)_2$); Thiophosphonic acids
9/40 . . . . Esters thereof
9/42 . . . . Halides thereof
9/44 . . . . Amides thereof
9/46 . . . Phosphinous acids (R_2=P−OH); Thiophosphinous acids
9/48 . . . Phosphonous acids (R−P$(OH)_2$); Thiophosphonous acids
9/50 . . . Organo-phosphines
9/52 . . . . Halophosphines
9/53 . . . . Organo-phosphine oxides; Organo-phosphine sulfides **[2]**
9/535 . . . Organo-phosphoranes **[3]**
9/54 . . . Quaternary phosphonium compounds
9/547 . . Heterocyclic compounds, e.g. containing phosphorus as a ring hetero atom **[5]**
9/553 . . . having one nitrogen atom as the only ring hetero atom **[5]**
9/564 . . . . Three-membered rings **[5]**
9/568 . . . . Four-membered rings **[5]**
9/572 . . . . Five-membered rings **[5]**
9/576 . . . . Six-membered rings **[5]**
9/58 . . . . . Pyridine rings **[5]**
9/59 . . . . . Hydrogenated pyridine rings **[5]**
9/60 . . . . . Quinoline or hydrogenated quinoline ring systems **[5]**
9/62 . . . . . Isoquinoline or hydrogenated isoquinoline ring systems **[5]**
9/64 . . . . . Acridine or hydrogenated acridine ring systems **[5]**
9/645 . . . having two nitrogen atoms as the only ring hetero atoms **[5]**
9/6503 . . . . Five-membered rings **[5]**
9/6506 . . . . . having the nitrogen atoms in positions 1 and 3 **[5]**
9/6509 . . . . Six-membered rings **[5]**
9/6512 . . . . . having the nitrogen atoms in positions 1 and 3 **[5]**
9/6515 . . . having three nitrogen atoms as the only ring hetero atoms **[5]**
9/6518 . . . . Five-membered rings **[5]**
9/6521 . . . . Six-membered rings **[5]**
9/6524 . . . having four or more nitrogen atoms as the only ring hetero atoms **[5]**
9/6527 . . . having nitrogen and oxygen atoms as the only ring hetero atoms **[5]**
9/653 . . . . Five-membered rings **[5]**
9/6533 . . . . Six-membered rings **[5]**
9/6536 . . . having nitrogen and sulfur atoms with or without oxygen atoms, as the only ring hetero atoms **[5]**
9/6539 . . . . Five-membered rings **[5]**
9/6541 . . . . . condensed with carbocyclic rings or ring systems **[5]**
9/6544 . . . . Six-membered rings **[5]**
9/6547 . . . . . condensed with carbocyclic rings or ring systems **[5]**
9/655 . . . having oxygen atoms, with or without sulfur, selenium, or tellurium atoms, as the only ring hetero atoms **[5]**
9/6553 . . . having sulfur atoms, with or without selenium or tellurium atoms, as the only ring hetero atoms **[5]**
9/6558 . . . containing at least two different or differently substituted hetero rings neither condensed among themselves nor condensed with a common carbocyclic ring or ring system **[5]**
9/6561 . . . containing systems of two or more relevant hetero rings condensed among themselves or condensed with a common carbocyclic ring or ring system, with or without other non-condensed hetero rings **[5]**
9/6564 . . . having phosphorus atoms, with or without nitrogen, oxygen, sulfur, selenium or tellurium atoms, as ring hetero atoms **[5]**
9/6568 . . . . having phosphorus atoms as the only ring hetero atoms **[5]**
9/6571 . . . . having phosphorus and oxygen atoms as the only ring hetero atoms **[5]**
9/6574 . . . . . Esters of oxyacids of phosphorus **[5]**

9/6578 . . . . having phosphorus and sulfur atoms with or without oxygen atoms, as ring hetero atoms **[5]**
9/6581 . . . . having phosphorus and nitrogen atoms with or without oxygen or sulfur atoms, as ring hetero atoms **[5]**
9/6584 . . . . . having one phosphorus atom as ring hetero atom **[5]**
9/6587 . . . . . having two phosphorus atoms as ring hetero atoms **[5]**
9/659 . . . . . having three phosphorus atoms as ring hetero atoms **[5]**
9/6593 . . . . . 1,3,5-Triaza-2,4,6-triphosphorines **[5]**
9/6596 . . . having atoms other than oxygen, sulfur, selenium, tellurium, nitrogen or phosphorus as ring hetero atoms **[5]**
9/66 . Arsenic compounds
9/68 . . without As−C bonds
9/70 . . Organo-arsenic compounds
9/72 . . . Aliphatic compounds
9/74 . . . Aromatic compounds
9/76 . . . . containing hydroxyl groups
9/78 . . . . containing amino groups
9/80 . . . Heterocyclic compounds
9/82 . . . . Arsenic compounds containing one or more pyridine rings
9/84 . . . . Arsenic compounds containing one or more quinoline ring systems
9/86 . . . . Arsenic compounds containing one or more isoquinoline ring systems
9/88 . . . . Arsenic compounds containing one or more acridine ring systems
9/90 . Antimony compounds
9/92 . . Aromatic compounds
9/94 . Bismuth compounds

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

C07H SUGARS; **DERIVATIVES THEREOF**; **NUCLEOSIDES**; **NUCLEOTIDES**; **NUCLEIC ACIDS** (derivatives of aldonic or saccharic acids C07C, C07D; aldonic acids, saccharic acids C07C 59/105, C07C 59/285; cyanohydrins C07C 255/16; glycals C07D; compounds of unknown constitution C07G; polysaccharides, derivatives thereof C08B; DNA or RNA concerning genetic engineering, vectors, e.g. plasmids, or their isolation, preparation or purification C12N 15/00; sugar industry C13) **[2]**

(1) This subclass covers compounds containing saccharide radicals (see the definitions in Note (3) below).
(2) This subclass does not cover polysaccharides which for the purpose of this subclass are defined as having more than five saccharide radicals attached to each other by glycosidic linkages.

(3) In this subclass, the following expressions are used with the meanings indicated:

– "saccharide radical" which is derived from acyclic polyhydroxy-aldehydes or acyclic polyhydroxy-ketones, or from their cyclic tautomers, by removing hydrogen atoms or by replacing hetero bonds to oxygen by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium, or tellurium, in accordance with either of the following definitions:

(a) It

(i) consists of an uninterrupted carbon skeleton and oxygen atoms directly attached thereto, and

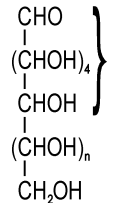
(ii) is considered to be terminated by every bond to a carbon atom of a cyclic structure and by every bond to a carbon atom having three bonds to hetero atoms, e.g. ester or nitrile radicals, and

(iii) contains within the carbon skeleton an unbranched sequence of at the most six carbon atoms in which at least three carbon atoms – at least two in the case of a skeleton having only four carbon atoms – have one single bond to an oxygen atom as the only hetero bond, and

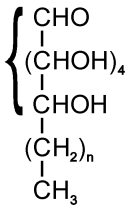
(A) in a cyclic or acyclic sequence, at least one other carbon atom has two single bonds to oxygen atoms as the only hetero bonds, or

(B) in an acyclic sequence, at least one other carbon atom has one double bond to an oxygen atom as the only hetero bond,

the said sequence containing at the most one double bond, i.e. C=C or possibly ketalised C(=O), in addition to the hetero bonds mentioned above under (A) or (B), e.g. the compounds



an unbranched sequence of at the most six carbon atoms, having bonds to oxygen as defined in this Note



n being an integer, are classified in group C07H 3/02; **[4]**

(b) It is also a radical derived from a radical as defined in (a) above by replacing at the most four of the specified hetero bonds to oxygen by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium, or tellurium;

– "heterocyclic radical" or "hetero ring" is considered to exclude saccharide radicals as defined above.

(4) Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C to C07K and within these subclasses. **[8]**

(5) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

Subclass index

1/00 Processes for the preparation of sugar derivatives [2]

3/00 **Compounds containing only hydrogen atoms and saccharide radicals having only carbon, hydrogen, and oxygen atoms** (preparation by hydrolysis of di-or polysaccharides C13; separation or purification of sucrose, glucose, fructose, lactose or maltose C13) **[2]**

3/02 . Monosaccharides **[2]**

3/04 . Disaccharides **[2]**

3/06 . Oligosaccharides, i.e. having three to five saccharide radicals attached to each other by glycosidic linkages **[2]**

3/08 . Deoxysugars; Unsaturated sugars (1,2-dideoxy-1-enoses C07D); Osones **[2]**

3/10 . Anhydrosugars, e.g. epoxides **[2]**

5/00 **Compounds containing saccharide radicals in which the hetero bonds to oxygen have been replaced by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium, or tellurium [2]**

5/02 . to halogen **[2]**

5/04 . to nitrogen **[2]**

5/06 . . Aminosugars **[2]**

5/08 . to sulfur, selenium, or tellurium **[2]**

5/10 . . to sulfur **[2]**

7/00 **Compounds containing non-saccharide radicals linked to saccharide radicals by a carbon-to-carbon bond [2]**

7/02 . Acyclic radicals **[2]**

7/027 . . Keto-aldonic acids **[4]**

7/033 . . Uronic acids **[4]**

7/04 . Carbocyclic radicals **[2]**

7/06 . Heterocyclic radicals **[2]**

9/00 **Compounds containing a hetero ring sharing at least two hetero atoms with a saccharide radical [2]**

9/02 . the hetero ring containing only oxygen as ring hetero atoms **[2]**

9/04 . . Cyclic acetals **[2]**

9/06 . the hetero ring containing nitrogen as ring hetero atoms **[2]**

11/00 **Compounds containing saccharide radicals esterified by inorganic acids**; **Metal salts thereof** (halo-sugars C07H 5/02; thio-, seleno-, or telluro-sugars C07H 5/08) **[2]**

11/02 . Nitrates; Nitrites **[2]**

11/04 . Phosphates; Phosphites; Polyphosphates **[2]**

13/00 **Compounds containing saccharide radicals esterified by carbonic acid or derivatives thereof, or by organic acids, e.g. phosphonic acids [2]**

13/02 . by carboxylic acids **[2]**

13/04 . . having the esterifying carboxyl radicals attached to acyclic carbon atoms **[2]**

13/06 . . . Fatty acids **[2]**

13/08 . . having the esterifying carboxyl radicals directly attached to carbocyclic rings **[2]**

13/10 . . having the esterifying carboxyl radicals directly attached to heterocyclic rings **[2]**

13/12 . by acids having the group $-X-C(=X)-X-$, or halides thereof, in which X means nitrogen, oxygen, sulfur, selenium, or tellurium, e.g. carbonic acid, carbamic acid **[2]**

15/00 **Compounds containing hydrocarbon or substituted hydrocarbon radicals directly attached to hetero atoms of saccharide radicals [2]**

Note

In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as substituted hydrocarbon radicals. **[4]**

15/02 . Acyclic radicals, not substituted by cyclic structures **[2]**

15/04 . . attached to an oxygen atom of a saccharide radical **[2]**

15/06 . . . being a hydroxyalkyl group esterified by a fatty acid **[4]**

15/08 . . . Polyoxyalkylene derivatives **[2]**

15/10 . . . containing unsaturated carbon-to-carbon bonds **[2]**

15/12 . . attached to a nitrogen atom of a saccharide radical **[2]**

15/14 . . attached to a sulfur, selenium or tellurium atom of a saccharide radical **[2]**

15/16 . . . Lincomycin; Derivatives thereof **[2]**

15/18 . Acyclic radicals, substituted by carbocyclic rings **[2]**

15/20 . Carbocyclic rings **[2]**

15/203 . . Monocyclic carbocyclic rings other than cyclohexane rings; Bicyclic carbocyclic ring systems **[4]**

15/207 . . Cyclohexane rings not substituted by nitrogen atoms, e.g. kasugamycins **[4]**

15/22 . . Cyclohexane rings, substituted by nitrogen atoms **[4]**

15/222 . . . Cyclohexane rings, substituted by at least two nitrogen atoms **[4]**

15/224 . . . . with only one saccharide radical directly attached to the cyclohexane rings, e.g. destomycin, fortimicin, neamine **[4]**

15/226 . . . . with at least two saccharide radicals directly attached to the cyclohexane rings **[4]**

15/228 . . . . . attached to adjacent ring-carbon atoms of the cyclohexane rings **[4]**

15/23 . . . . . with only two saccharide radicals in the molecule, e.g. ambutyrosin, butyrosin, xylostatin, ribostamycin **[4]**

15/232 . . . . . with at least three saccharide radicals in the molecule, e.g. lividomycin, neomycin, paromomycin **[4]**

15/234 . . . . . attached to non-adjacent ring carbon atoms of the cyclohexane rings, e.g. kanamycins, tobramycin, nebramycin, gentamicin A_2 **[4]**

15/236 . . . . . a saccharide radical being substituted by an alkylamino radical in position 3 and by two substituents different from hydrogen in position 4, e.g. gentamicin complex, sisomicin, verdamicin **[4]**

15/238 . . . Cyclohexane rings substituted by two guanidine radicals, e.g. streptomycins **[4]**

15/24 . . Condensed ring systems having three or more rings **[2]**

15/244 . . . Anthraquinone radicals, e.g. sennosides **[4]**

15/248 . . . Colchicine radicals, e.g. colchicosides **[4]**

15/252 . . . Naphthacene radicals, e.g. daunomycins, adriamycins **[4]**

15/256 . . . Polyterpene radicals **[4]**
15/26 . Acyclic or carbocyclic radicals, substituted by hetero rings **[2]**

17/00 Compounds containing heterocyclic radicals directly attached to hetero atoms of saccharide radicals [2]
17/02 . Heterocyclic radicals containing only nitrogen as ring hetero atoms **[2]**
17/04 . Heterocyclic radicals containing only oxygen as ring hetero atoms **[2]**
17/06 . . Benzopyran radicals **[4]**
17/065 . . . Benzo[b]pyrans **[4]**
17/07 . . . . Benzo[b]pyran-4-ones **[4]**
17/075 . . . . Benzo[b]pyran-2-ones **[4]**
17/08 . . Hetero rings containing eight or more ring members, e.g. erythromycins **[2]**

19/00 Compounds containing a hetero ring sharing one ring hetero atom with a saccharide radical; **Nucleosides**; **Mononucleotides**; **Anhydro derivatives thereof [2,4]**
19/01 . sharing oxygen **[4]**
19/02 . sharing nitrogen **[2]**
19/04 . . Heterocyclic radicals containing only nitrogen as ring hetero atom **[2]**
19/044 . . . Pyrrole radicals **[4]**
19/048 . . . Pyridine radicals **[4]**
19/052 . . . Imidazole radicals **[4]**
19/056 . . . Triazole or tetrazole radicals **[4]**
19/06 . . . Pyrimidine radicals **[2]**
19/067 . . . . with ribosyl as the saccharide radical **[4]**
19/073 . . . . with 2-deoxyribosyl as the saccharide radical **[4]**
19/09 . . . . with arabinosyl as the saccharide radical **[4]**
19/10 . . . . with the saccharide radical being esterified by phosphoric or polyphosphoric acids **[2]**
19/11 . . . . . containing cyclic phosphate **[4]**
19/12 . . . Triazine radicals **[2]**
19/14 . . . Pyrrolo-pyrimidine radicals **[2]**
19/16 . . . Purine radicals **[2]**
19/167 . . . . with ribosyl as the saccharide radical **[4]**
19/173 . . . . with 2-deoxyribosyl as the saccharide radical **[4]**
19/19 . . . . with arabinosyl as the saccharide radical **[4]**
19/20 . . . . with the saccharide radical being esterified by phosphoric or polyphosphoric acids **[2]**
19/207 . . . . . the phosphoric or polyphosphoric acids being esterified by a further hydroxylic compound, e.g. flavine-adenine dinucleotide or nicotinamide-adenine dinucleotide **[4]**
19/213 . . . . . containing cyclic phosphate **[4]**
19/22 . . . Pteridine radicals **[2]**
19/23 . . . Heterocyclic radicals containing two or more heterocyclic rings condensed among themselves or condensed with a common carbocyclic ring system, not provided for in groups C07H 19/14 to C07H 19/22 **[4]**
19/24 . . Heterocyclic radicals containing oxygen or sulfur as ring hetero atom **[2]**

21/00 Compounds containing two or more mononucleotide units having separate phosphate or polyphosphate groups linked by saccharide radicals of nucleoside groups, e.g. nucleic acids [2]
21/02 . with ribosyl as saccharide radical **[2]**
21/04 . with deoxyribosyl as saccharide radical **[2]**

23/00 Compounds containing boron, silicon, or a metal, e.g. chelates, vitamin B_{12} (esters with inorganic acids C07H 11/00; metal salts, see parent compounds) **[2]**

99/00 Subject matter not provided for in other groups of this subclass [8]

C07J STEROIDS (seco-steroids C07C) **[2]**

(1) This subclass covers compounds containing a cyclopenta[a]hydrophenanthrene skeleton or a ring structure derived therefrom:
– by contraction or expansion of one ring by one or two atoms,
– by contraction or expansion of two rings each by one atom,
– by contraction of one ring by one atom and expansion of one ring by one atom,
– by substitution of one or two carbon atoms of the cyclopenta[a]hydrophenanthrene skeleton, which are not shared by rings, by hetero atoms, in combination with the above defined contraction or expansion or not, or
– by condensation with carbocyclic or heterocyclic rings in combination with one or more of the foregoing alterations or not. **[4]**
(2) Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C to C07Kand within these subclasses. **[8]**
(3) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

Subclass index

Normal steroids, i.e. cyclopenta[a]hydrophenanthrenes, containing carbon, hydrogen, halogen, or oxygen [2]

1/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, not substituted in position 17 beta by a carbon atom, e.g. oestrane, androstane [2]**

3/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 beta by one carbon atom [2]**

5/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 beta by a chain of two carbon atoms, e.g. pregnane, and substituted in position 21 by only one singly bound oxygen atom [2]**

7/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 beta by a chain of two carbon atoms** (C07J 5/00 takes precedence) **[2]**

9/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 beta by a chain of more than two carbon atoms, e.g. cholane, cholestane, coprostane [2]**

11/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, not substituted in position 3 [2]**

13/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, having a carbon-to-carbon double bond from or to position 17 [2]**

15/00 **Stereochemically pure steroids containing carbon, hydrogen, halogen, or oxygen, having a partially or totally inverted skeleton, e.g. retrosteroids, L-isomers [2]**

17/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, having an oxygen-containing hetero ring not condensed with the cyclopenta[a]hydrophenanthrene skeleton [2]**

19/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 by a lactone ring [2]**

21/00 **Normal steroids containing carbon, hydrogen, halogen, or oxygen, having an oxygen-containing hetero ring spiro-condensed with the cyclopenta[a]hydrophenanthrene skeleton [2]**

Normal steroids, i.e. cyclopenta[a]hydrophenanthrenes, containing sulfur [2]

31/00 **Normal steroids containing one or more sulfur atoms not belonging to a hetero ring [2]**

33/00 **Normal steroids having a sulfur-containing hetero ring spiro-condensed or not condensed with the cyclopenta[a]hydrophenanthrene skeleton [2]**

Normal steroids, i.e. cyclopenta[a]hydrophenanthrenes, containing nitrogen [2]

41/00 **Normal steroids containing one or more nitrogen atoms not belonging to a hetero ring [2]**

43/00 **Normal steroids having a nitrogen-containing hetero ring spiro-condensed or not condensed with the cyclopenta[a]hydrophenanthrene skeleton [2]**

51/00 **Normal steroids with unmodified cyclopenta[a]hydrophenanthrene skeleton not provided for in groups C07J 1/00 to C07J 43/00 [2]**

53/00 **Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by condensation with carbocyclic rings or by formation of an additional ring by means of a direct link between two ring carbon atoms [2]**

Nor- or homosteroids [2]

61/00 **Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by contraction of only one ring by one or two atoms [2]**

63/00 **Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by expansion of only one ring by one or two atoms [2]**

65/00 **Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by contraction of two rings, each by one atom [2]**

67/00 **Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by expansion of two rings, each by one atom [2]**

69/00 **Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by contraction of only one ring by one atom and expansion of only one ring by one atom [2]**

71/00 **Steroids in which the cyclopenta[a]hydrophenanthrene skeleton is condensed with a heterocyclic ring** (spiro-condensed heterocyclic rings C07J 21/00, C07J 33/00, C07J 43/00) **[2]**

73/00 **Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by substitution of one or two carbon atoms by hetero atoms [2]**

75/00 **Processes for the preparation of steroids, in general [4]**

C07K **PEPTIDES** (peptides containing β-lactam rings C07D; cyclic dipeptides not having in their molecule any other peptide link than those which form their ring, e.g. piperazine-2,5-diones, C07D; ergot alkaloids of the cyclic peptide type C07D 519/02; single cell proteins, enzymes C12N; genetic engineering processes for obtaining peptides C12N 15/00) **[4]**

(1) In this subclass, the following terms or expressions are used with the meanings indicated:
- "amino acids" are compounds in which at least one amino group and at least one carboxyl group are bound to the same carbon skeleton and the nitrogen atom of the amino group may form part of a ring;
- "normal peptide link" is one between an alpha-amino group of an amino acid and the carboxyl group −in position 1 −of another alpha-amino acid;
- "abnormal peptide link" is a link where at least one of the linked amino acids is not an alpha-amino acid or a link formed by at least one carboxyl or amino group being part of the side chain of an alpha-amino acid;
- "peptides" are compounds containing at least two amino acid units, which are bound through at least one normal peptide link, including oligopeptides, polypeptides and proteins, where
  - (i) "linear peptides" may comprise rings formed through S−S bridges, or through an hydroxy or a mercapto group of an hydroxy- or a mercapto-amino acid and the carboxyl group of another amino acid (e.g. peptide lactones) but do not comprise rings which are formed only through peptide links;
  - (ii) "cyclic peptides" are peptides comprising at least one ring formed only through peptide links; the cyclisation may occur only through normal peptide links or through abnormal peptide links, e.g. through the 4-amino group of 2,4-diamino-butanoic acid. Thus, cyclic compounds in which at least one link in the ring is a non-peptide link are considered as "linear peptides";
  - (iii) "depsipeptides" are compounds containing a sequence of at least two alpha-amino acids and at least one alpha-hydroxy carboxylic acid, which are bound through at least one normal peptide link and ester links, derived from the hydroxy carboxylic acids, where
    - (a) "linear depsipeptides" may comprise rings formed through S−S bridges, or through an hydroxy or a mercapto group of an hydroxy-, or mercapto-amino acid and the carboxyl group of another amino- or hydroxy-acid but do not comprise rings formed only through peptide or ester links derived from hydroxy carboxylic acids, e.g. Gly-Ala-Gly−OCH_2CO_2H and Gly−OCH_2CO-Ala-Gly are considered as "linear depsipeptides", but $HOCH_2$CO-Gly-Ala-Gly does not contain an ester link, and is thus a derivative of Gly-Ala-Gly which is covered by C07K 5/08;
    - (b) "cyclic depsipeptides" are peptides containing at least one ring formed only through peptide or ester links −derived from hydroxy carboxylic acids −, e.g.

      ; **[4]**

  - (iv) "hybrid peptides" are peptides produced through fusion or covalent binding of two or more heterologous peptides.

(2) Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C to C07K and within these subclasses. **[8]**

(3) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

(4) When classifying in this subclass, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned. **[8]**

(5) Fragments of peptides or peptides modified by removal or addition of amino acids, by substitution of amino acids by others, or by combination of these modifications are classified as the parent peptides. However, fragments of peptides having only four or less amino acids are also classified in group C07K 5/00. **[6]**

(6) Peptides prepared by chemical processes and having an amino acid sequence derived from naturally occurring peptides are classified with the natural one. **[6]**

(7) Peptides prepared by recombinant DNA technology are not classified according to the host, but according to the original peptide expressed, e.g. HIV peptide expressed in E. coli is classified with HIV peptides. **[6]**

Subclass index

1/00 **General processes for the preparation of peptides [4]**
1/02 . in solution **[4]**

1/30 . . by precipitation **[6]**
1/32 . . . as complexes **[6]**
1/34 . . by filtration, ultrafiltration or reverse osmosis **[6]**
1/36 . . by a combination of two or more processes of different types **[6]**

2/00 Peptides of undefined number of amino acids; Derivatives thereof [6]

4/00 Peptides having up to 20 amino acids in an undefined or only partially defined sequence; Derivatives thereof [6]
4/02 . from viruses **[6]**
4/04 . from bacteria **[6]**
4/06 . from fungi **[6]**
4/08 . from algae; from lichens **[6]**
4/10 . from plants **[6]**
4/12 . from animals; from humans **[6]**

5/00 Peptides having up to four amino acids in a fully defined sequence; Derivatives thereof [4]

Note

In this group, the following expression is used with the meaning indicated: **[6]**
– "first amino acid" means the first amino acid from the left side, i.e. the N-terminal amino acid, of the peptide sequence. **[6]**

5/02 . containing at least one abnormal peptide link **[4]**
5/023 . . in which at least a beta-amino acid is involved **[6]**
5/027 . . in which at least a gamma-amino acid is involved, e.g. statine **[6]**
5/03 . . in which at least a delta-amino acid is involved, e.g. isosteres **[6]**
5/033 . . in which at least an epsilon- or zeta-amino acid is involved **[6]**
5/037 . . the abnormal link being formed by the side chain of an alpha-amino acid, e.g. gamma-Glu, epsilon-Lys, glutathione **[6]**
5/04 . containing only normal peptide links **[4]**
5/06 . . Dipeptides **[4]**
5/062 . . . the side chain of the first amino acid being acyclic, e.g. Gly, Ala **[6]**
5/065 . . . the side chain of the first amino acid containing carbocyclic rings, e.g. Phe, Tyr **[6]**
5/068 . . . the side chain of the first amino acid containing more amino groups than carboxyl groups, or derivatives thereof, e.g. Lys, Arg **[6]**
5/072 . . . the side chain of the first amino acid containing more carboxyl groups than amino groups, or derivatives thereof, e.g. Asp, Glu, Asn **[6]**
5/075 . . . . Asp-Phe; Derivatives thereof, e.g. aspartame **[6]**
5/078 . . . the first amino acid being heterocyclic, e.g. Pro, His, Trp **[6]**
5/08 . . Tripeptides **[4]**
5/083 . . . the side chain of the first amino acid being acyclic, e.g. Gly, Ala **[6]**
5/087 . . . the side chain of the first amino acid containing carbocyclic rings, e.g. Phe, Tyr **[6]**
5/09 . . . the side chain of the first amino acid containing more amino groups than carboxyl groups, or derivatives thereof, e.g. Lys, Arg **[6]**
5/093 . . . the side chain of the first amino acid containing more carboxyl groups than amino groups, or derivatives thereof, e.g. Asp, Glu, Asn **[6]**
5/097 . . . the first amino acid being heterocyclic, e.g. Pro, His, Trp, e.g. thyroliberin, melanostatin **[6]**
5/10 . . Tetrapeptides **[4]**
5/103 . . . the side chain of the first amino acid being acyclic, e.g. Gly, Ala **[6]**
5/107 . . . the side chain of the first amino acid containing carbocyclic rings, e.g. Phe, Tyr **[6]**
5/11 . . . the side chain of the first amino acid containing more amino groups than carboxyl groups, or derivatives thereof, e.g. Lys, Arg **[6]**
5/113 . . . the side chain of the first amino acid containing more carboxyl groups than amino groups, or derivatives thereof, e.g. Asp, Glu, Asn **[6]**
5/117 . . . the first amino acid being heterocyclic, e.g. Pro, His, Trp **[6]**
5/12 . . Cyclic peptides **[4]**

7/00 Peptides having 5 to 20 amino acids in a fully defined sequence; Derivatives thereof [4,6]
7/02 . Linear peptides containing at least one abnormal peptide link **[4]**
7/04 . Linear peptides containing only normal peptide links **[4]**
7/06 . . having 5 to 11 amino acids **[4]**
7/08 . . having 12 to 20 amino acids **[4,6]**
7/14 . . Angiotensins; Related peptides **[4]**
7/16 . . Oxytocins; Vasopressins; Related peptides **[4]**
7/18 . . Kallidins; Bradykinins; Related peptides **[4]**
7/22 . . Eledoisins; Related peptides **[4]**
7/23 . . Luteinising hormone-releasing hormone (LHRH); Related peptides **[6]**
7/28 . . Gramicidins A, B, D; Related peptides **[4]**
7/50 . Cyclic peptides containing at least one abnormal peptide link **[4]**
7/52 . . with only normal peptide links in the ring **[4]**
7/54 . . with at least one abnormal peptide link in the ring **[4]**
7/56 . . . the cyclisation not occurring through 2,4-diamino-butanoic acid **[4]**
7/58 . . . . Bacitracins; Related peptides **[4]**
7/60 . . . the cyclisation occurring through the 4-amino group of 2,4-diamino-butanoic acid **[4]**
7/62 . . . . Polymyxins; Related peptides **[4]**
7/64 . Cyclic peptides containing only normal peptide links **[4]**
7/66 . . Gramicidins S, C; Tyrocidins A, B, C; Related peptides **[4]**

9/00 Peptides having up to 20 amino acids, containing saccharide radicals and having a fully defined sequence; Derivatives thereof [4,6]

11/00 Depsipeptides having up to 20 amino acids in a fully defined sequence; Derivatives thereof [4,6]
11/02 . cyclic, e.g. valinomycins **[4]**

14/00 Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6]
14/005 . from viruses **[6]**

14/01 . . DNA viruses **[6]**
14/015 . . . Parvoviridae, e.g. feline panleukopenia virus, human parvovirus **[6]**
14/02 . . . Hepadnaviridae, e.g. hepatitis B virus **[6]**
14/025 . . . Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus **[6]**
14/03 . . . Herpetoviridae, e.g. pseudorabies virus **[6]**
14/035 . . . . Herpes simplex virus I or II **[6]**
14/04 . . . . Varicella-zoster virus **[6]**
14/045 . . . . Cytomegalovirus **[6]**
14/05 . . . . Epstein-Barr virus **[6]**
14/055 . . . . Marek's disease virus **[6]**
14/06 . . . . Infectious bovine rhinotracheitis virus **[6]**
14/065 . . . Poxviridae, e.g. avipoxvirus **[6]**
14/07 . . . . Vaccinia virus; Variola virus **[6]**
14/075 . . . Adenoviridae **[6]**
14/08 . . RNA viruses **[6]**
14/085 . . . Picornaviridae, e.g. coxsackie virus, echovirus, enterovirus **[6]**
14/09 . . . . Foot-and-mouth disease virus **[6]**
14/095 . . . . Rhinovirus **[6]**
14/10 . . . . Hepatitis A virus **[6]**
14/105 . . . . Poliovirus **[6]**
14/11 . . . Orthomyxoviridae, e.g. influenza virus **[6]**
14/115 . . . Paramyxoviridae, e.g. parainfluenza virus **[6]**
14/12 . . . . Mumps virus; Measles virus **[6]**
14/125 . . . . Newcastle disease virus **[6]**
14/13 . . . . Canine distemper virus **[6]**
14/135 . . . . Respiratory syncytial virus **[6]**
14/14 . . . Reoviridae, e.g. rotavirus, bluetongue virus, Colorado tick fever virus **[6]**
14/145 . . . Rhabdoviridae, e.g. rabies virus, Duvenhage virus, Mokda virus, vesicular stomatitis virus **[6]**
14/15 . . . Retroviridae, e.g. bovine leukaemia virus, feline leukaemia virus, human T-cell leukaemia-lymphoma virus **[6]**
14/155 . . . . Lentiviridae, e.g. human immunodeficiency virus (HIV), visna-maedi virus, equine infectious anaemia virus **[6]**
14/16 . . . . . HIV-1 **[6]**
14/165 . . . Coronaviridae, e.g. avian infectious bronchitis virus **[6]**
14/17 . . . . Porcine transmissible gastroenteritis virus **[6]**
14/175 . . . Bunyaviridae, e.g. California encephalitis virus, Rift valley fever virus, Hantaan virus **[6]**
14/18 . . . Togaviridae, e.g. flavivirus, pestivirus, yellow fever virus, hepatitis C virus, japanese encephalitis virus **[6]**
14/185 . . . . Hog cholera virus **[6]**
14/19 . . . . Rubella virus **[6]**
14/195 . from bacteria **[6]**

Note

In groups C07K 14/20 to C07K 14/365, where appropriate, after the bacteria terminology, the indication of the order (O), family (F) or genus (G) of the bacteria is given in brackets. **[6]**

14/20 . . from Spirochaetales (O), e.g. Treponema, Leptospira **[6]**
14/205 . . from Campylobacter (G) **[6]**
14/21 . . from Pseudomonadaceae (F) **[6]**
14/215 . . from Halobacteriaceae (F) **[6]**
14/22 . . from Neisseriaceae (F), e.g. Acinetobacter **[6]**
14/225 . . from Alcaligenes (G) **[6]**
14/23 . . from Brucella (G) **[6]**
14/235 . . from Bordetella (G) **[6]**
14/24 . . from Enterobacteriaceae (F), e.g. Citrobacter, Serratia, Proteus, Providencia, Morganella, Yersinia **[6]**
14/245 . . . Escherichia (G) **[6]**
14/25 . . . Shigella (G) **[6]**
14/255 . . . Salmonella (G) **[6]**
14/26 . . . Klebsiella (G) **[6]**
14/265 . . . Enterobacter (G) **[6]**
14/27 . . . Erwinia (G) **[6]**
14/275 . . . Hafnia (G) **[6]**
14/28 . . from Vibrionaceae (F) **[6]**
14/285 . . from Pasteurellaceae (F), e.g. Haemophilus influenza **[6]**
14/29 . . from Richettsiales (O) **[6]**
14/295 . . from Chlamydiales (O) **[6]**
14/30 . . from Mycoplasmatales, e.g. Pleuropneumonia-like organisms (PPLO) **[6]**
14/305 . . from Micrococcaceae (F) **[6]**
14/31 . . . from Staphylococcus (G) **[6]**
14/315 . . from Streptococcus (G), e.g. Enterococci **[6]**
14/32 . . from Bacillus (G) **[6]**
14/325 . . . Bacillus thuringiensis crystal peptide (delta-endotoxin) **[6]**
14/33 . . from Clostridium (G) **[6]**
14/335 . . from Lactobacillus (G) **[6]**
14/34 . . from Corynebacterium (G) **[6]**
14/345 . . from Brevibacterium (G) **[6]**
14/35 . . from Mycobacteriaceae (F) **[6]**
14/355 . . from Nocardia (G) **[6]**
14/36 . . from Actinomyces; from Streptomyces (G) **[6]**
14/365 . . from Actinoplanes (G) **[6]**
14/37 . from fungi **[6]**
14/375 . . from Basidiomycetes **[6]**
14/38 . . from Aspergillus **[6]**
14/385 . . from Penicillium **[6]**
14/39 . . from yeasts **[6]**
14/395 . . . from Saccharomyces **[6]**
14/40 . . . from Candida **[6]**
14/405 . from algae **[6]**
14/41 . from lichens **[6]**
14/415 . from plants **[6]**
14/42 . . Lectins, e.g. concanavalin, phytohaemagglutinin **[6]**
14/425 . . Zeins **[6]**
14/43 . . Thaumatin **[6]**
14/435 . from animals; from humans **[6]**
14/44 . . from protozoa **[6]**
14/445 . . . Plasmodium **[6]**
14/45 . . . Toxoplasma **[6]**
14/455 . . . Eimeria **[6]**
14/46 . . from vertebrates **[6]**
14/465 . . . from birds **[6]**
14/47 . . . from mammals **[6]**
14/475 . . Growth factors; Growth regulators **[6]**
14/48 . . . Nerve growth factor (NGF) **[6]**
14/485 . . . Epidermal growth factor (EGF) (urogastrone) **[6]**
14/49 . . . Platelet-derived growth factor (PDGF) **[6]**

14/495 . . . Transforming growth factor (TGF) **[6]**
14/50 . . . Fibroblast growth factor (FGF) **[6]**
14/505 . . . Erythropoietin (EPO) **[6]**
14/51 . . . Bone morphogenic factor; Osteogenin; Osteogenic factor; Bone-inducing factor **[6]**
14/515 . . . Angiogenic factor; Angiogenin **[6]**
14/52 . . Cytokines; Lymphokines; Interferons **[6]**
14/525 . . . Tumour necrosis factor (TNF) **[6]**
14/53 . . . Colony-stimulating factor (CSF) **[6]**
14/535 . . . . Granulocyte CSF; Granulocyte-macrophage CSF **[6]**
14/54 . . . Interleukins (IL) **[6]**
14/545 . . . . IL-1 **[6]**
14/55 . . . . IL-2 **[6]**
14/555 . . . Interferons (IFN) **[6]**
14/56 . . . . IFN-alpha **[6]**
14/565 . . . . IFN-beta **[6]**
14/57 . . . . IFN-gamma **[6]**
14/575 . . Hormones **[6]**
14/58 . . . Atrial natriuretic factor complex; Atriopeptin; Atrial natriuretic peptide (ANP); Cardionatrin; Cardiodilatin **[6]**
14/585 . . . Calcitonins **[6]**
14/59 . . . Follicle-stimulating hormone (FSH); Chorionic gonadotropins, e.g. HCG; Luteinising hormone (LH); Thyroid-stimulating hormone (TSH) **[6]**
14/595 . . . Gastrins; Cholecystokinins (CCK) **[6]**
14/60 . . . Growth hormone-releasing factor (GH-RF) (Somatoliberin) **[6]**
14/605 . . . Glucagons **[6]**
14/61 . . . Growth hormone (GH) (Somatotropin) **[6]**
14/615 . . . . Extraction from natural sources **[6]**
14/62 . . . Insulins **[6]**
14/625 . . . . Extraction from natural sources **[6]**
14/63 . . . Motilins **[6]**
14/635 . . . Parathyroid hormone (parathormone); Parathyroid hormone-related peptides **[6]**
14/64 . . . Relaxins **[6]**
14/645 . . . Secretins **[6]**
14/65 . . . Insulin-like growth factors (Somatomedins), e.g. IGF-1, IGF-2 **[6]**
14/655 . . . Somatostatins **[6]**
14/66 . . . Thymopoietins **[6]**
14/665 . . derived from pro-opiomelanocortin, pro-enkephalin or pro-dynorphin **[6]**
14/67 . . . Lipotropins, e.g. beta- or gamma-lipotropin **[6]**
14/675 . . . Beta-endorphins **[6]**
14/68 . . . Melanocyte-stimulating hormone (MSH) **[6]**
14/685 . . . . Alpha-melanotropin **[6]**
14/69 . . . . Beta-melanotropin **[6]**
14/695 . . . Corticotropin (ACTH) **[6]**
14/70 . . . Enkephalins **[6]**
14/705 . . Receptors; Cell surface antigens; Cell surface determinants **[6]**
14/71 . . . for growth factors; for growth regulators **[6]**
14/715 . . . for cytokines; for lymphokines; for interferons **[6]**
14/72 . . . for hormones **[6]**
14/725 . . . T-cell receptors **[6]**
14/73 . . . . CD4 **[6]**
14/735 . . . Fc receptors **[6]**
14/74 . . . Major histocompatibility complex (MHC) **[6]**
14/745 . . Blood coagulation or fibrinolysis factors **[6]**
14/75 . . . Fibrinogen **[6]**
14/755 . . . Factors VIII **[6]**
14/76 . . Albumins **[6]**
14/765 . . . Serum albumin, e.g. HSA **[6]**
14/77 . . . Ovalbumin **[6]**
14/775 . . Apolipopeptides **[6]**
14/78 . . Connective tissue peptides, e.g. collagen, elastin, laminin, fibronectin, vitronectin, cold insoluble globulin (CIG) **[6]**
14/785 . . Alveolar surfactant peptides; Pulmonary surfactant peptides **[6]**
14/79 . . Transferrins, e.g. lactoferrins, ovotransferrins **[6]**
14/795 . Porphyrin- or corrin-ring-containing peptides **[6]**
14/80 . . Cytochromes **[6]**
14/805 . . Haemoglobins; Myoglobins **[6]**
14/81 . Protease inhibitors **[6]**
14/815 . . from leeches, e.g. hirudin, eglin **[6]**
14/82 . Translation products from oncogenes **[6]**
14/825 . Metallothioneins **[6]**

16/00 Immunoglobulins, e.g. monoclonal or polyclonal antibodies [6]

16/02 . from eggs **[6]**
16/04 . from milk **[6]**
16/06 . from serum **[6]**
16/08 . against material from viruses **[6]**
16/10 . . from RNA viruses **[6]**
16/12 . against material from bacteria **[6]**
16/14 . against material from fungi, algae or lichens **[6]**
16/16 . against material from plants **[6]**
16/18 . against material from animals or humans **[6]**
16/20 . . from protozoa **[6]**
16/22 . . against growth factors **[6]**
16/24 . . against cytokines, lymphokines or interferons **[6]**
16/26 . . against hormones **[6]**
16/28 . . against receptors, cell surface antigens or cell surface determinants **[6]**
16/30 . . . from tumour cells **[6]**
16/32 . . against translation products from oncogenes **[6]**
16/34 . . against blood group antigens **[6]**
16/36 . . against blood coagulation factors **[6]**
16/38 . against protease inhibitors of peptide structure **[6]**
16/40 . against enzymes **[6]**
16/42 . against immunoglobulins (anti-idiotypic antibodies) **[6]**
16/44 . against material not provided for elsewhere **[6]**
16/46 . Hybrid immunoglobulins (hybrids of an immunoglobulin with a peptide not being an immunoglobulin C07K 19/00) **[6]**

17/00 Carrier-bound or immobilised peptides; **Preparation thereof [4]**

17/02 . Peptides being immobilised on, or in, an organic carrier **[4]**
17/04 . . entrapped within the carrier, e.g. gel, hollow fibre **[4]**
17/06 . . attached to the carrier via a bridging agent **[4]**
17/08 . . the carrier being a synthetic polymer **[4]**
17/10 . . the carrier being a carbohydrate **[4]**
17/12 . . . Cellulose or derivatives thereof **[4]**
17/14 . Peptides being immobilised on, or in, an inorganic carrier **[4]**

19/00 Hybrid peptides (hybrid immunoglobulins composed solely of immunoglobulins C07K 16/46) **[6]**

C08 ORGANIC MACROMOLECULAR COMPOUNDS; THEIR PREPARATION OR CHEMICAL WORKING-UP; COMPOSITIONS BASED THEREON

(1) Biocidal, pest repellant, pest attractant or plant growth regulatory activity of compounds or preparations is further classified in subclass A01P. **[8]**

(2) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S.

C08B POLYSACCHARIDES; **DERIVATIVES THEREOF** (polysaccharides containing less than six saccharide radicals attached to each other by glycosidic linkages C07H; fermentation or enzyme-using processes C12P 19/00; sugar industry C13; production of cellulose D21) **[4]**

Note

Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

Subclass index

Preparation

1/00 Preparatory treatment of cellulose for making derivatives thereof
1/02 . Rendering cellulose suitable for esterification
1/04 . . for the preparation of cellulose nitrate
1/06 . Rendering cellulose suitable for etherification
1/08 . Alkali cellulose
1/10 . . Apparatus for the preparation of alkali cellulose
1/12 . . . Steeping devices
1/14 . . . Ripening devices

3/00 Preparation of cellulose esters of organic acids
3/02 . Catalysts used for the esterification
3/04 . Cellulose formate
3/06 . Cellulose acetate
3/08 . of monobasic organic acids with three or more carbon atoms
3/10 . . with five or more carbon atoms
3/12 . of polybasic organic acids
3/14 . in which the organic acid residue contains substituents, e.g. NH_2, Cl
3/16 . Preparation of mixed organic cellulose esters
3/18 . . Aceto-butyrates
3/20 . Esterification with maintenance of the fibrous structure of the cellulose (surface esterification of textiles D06M 13/00)
3/22 . Post-esterification treatments, including purification
3/24 . . Hydrolysis or ripening
3/26 . . Isolation of the cellulose ester
3/28 . . . by precipitation
3/30 . . Stabilisation (by addition of stabilisers C08K)

5/00 Preparation of cellulose esters of inorganic acids
5/02 . Cellulose nitrate
5/04 . . Post-esterification treatments, including purification
5/06 . . . Isolation of the cellulose nitrate
5/08 . . . Stabilisation (by addition of stabilisers C08K)
5/10 . . . Reducing the viscosity
5/12 . . . Replacing the water by organic liquids
5/14 . Cellulose sulfate

7/00 Preparation of cellulose esters of both organic and inorganic acids

9/00 Preparation of cellulose xanthate or viscose
9/02 . Sulfidisers; Dissolvers
9/04 . Continuous processes
9/06 . Single-stage processes

11/00 Preparation of cellulose ethers
11/02 . Alkyl or cycloalkyl ethers
11/04 . . with substituted hydrocarbon radicals
11/06 . . . with halogen-substituted hydrocarbon radicals
11/08 . . . with hydroxylated hydrocarbon radicals; Esters, ethers, or acetals thereof
11/10 . . . substituted with acid radicals
11/12 . . . . substituted with carboxylic radicals
11/14 . . . with nitrogen-containing groups

11/145 . . . . with basic nitrogen, e.g. aminoalkyl ethers **[2]**
11/15 . . . . with carbamoyl groups **[2]**
11/155 . . . . with cyano groups, e.g. cyanoalkyl ethers **[2]**
11/16 . Aryl or aralkyl ethers
11/18 . . with substituted hydrocarbon radicals
11/187 . with olefinic unsaturated groups **[2]**
11/193 . Mixed ethers, i.e. ethers with two or more different etherifying groups **[2]**
11/20 . Post-etherification treatments, including purification
11/22 . . Isolation

13/00 Preparation of cellulose ether-esters
13/02 . Cellulose ether xanthates

15/00 Preparation of other cellulose derivatives or modified cellulose
15/02 . Oxycellulose; Hydrocellulose; Cellulose hydrate
15/04 . . Carboxycellulose, e.g. prepared by oxidation with nitrogen dioxide
15/05 . Derivatives containing elements other than carbon, hydrogen, oxygen, halogen, or sulfur (esters of phosphorus acids C08B 5/00) **[2]**
15/06 . . containing nitrogen **[2]**
15/08 . Fractionation of cellulose, e.g. separation of cellulose crystallites **[2]**
15/10 . Crosslinking of cellulose **[2]**

16/00 Regeneration of cellulose [2]

17/00 Apparatus for esterification or etherification of cellulose
17/02 . for making organic esters of cellulose
17/04 . for making cellulose nitrate
17/06 . for making cellulose ethers

30/00 Preparation of starch, degraded or non-chemically modified starch, amylose, or amylopectin [4]
30/02 . Preparatory treatment, e.g. crushing of raw materials (machines for preliminary washing A23N) **[4]**
30/04 . Extraction or purification **[4]**
30/06 . Drying; Forming **[4]**
30/08 . Concentration of starch suspensions **[4]**
30/10 . Working-up residues from the starch extraction, including pressing water from the starch-extracted material **[4]**
30/12 . Degraded or non-chemically modified starch; Bleaching of starch (preparation of chemical derivatives of starch C08B 31/00) **[4]**
30/14 . . Cold water dispersible or pregelatinised starch **[4]**
30/16 . . Apparatus therefor **[4]**
30/18 . . Dextrin **[4]**
30/20 . Amylose or amylopectin (chemical derivatives thereof C08B 33/00, C08B 35/00) **[4]**

31/00 Preparation of chemical derivatives of starch (chemical derivatives of amylose C08B 33/00; chemical derivatives of amylopectin C08B 35/00) **[2]**
31/02 . Esters **[2]**
31/04 . . of organic acids **[2]**
31/06 . . of inorganic acids **[2]**
31/08 . Ethers **[2]**
31/10 . . Alkyl or cycloalkyl ethers **[2]**
31/12 . . having alkyl or cycloalkyl radicals substituted by hetero atoms **[2]**
31/14 . . Aryl or aralkyl ethers **[2]**
31/16 . Ether-esters **[2]**
31/18 . Oxidised starch **[2]**

33/00 Preparation of chemical derivatives of amylose [2]
33/02 . Esters **[2]**
33/04 . Ethers **[2]**
33/06 . Ether-esters **[2]**
33/08 . Oxidised amylose **[2]**

35/00 Preparation of chemical derivatives of amylopectin [2]
35/02 . Esters **[2]**
35/04 . Ethers **[2]**
35/06 . Ether-esters **[2]**
35/08 . Oxidised amylopectin **[2]**

37/00 Preparation of polysaccharides not provided for in groups C08B 1/00 to C08B 35/00; **Derivatives thereof** (cellulose D21) **[4]**
37/02 . Dextran; Derivatives thereof **[2]**
37/04 . Alginic acid; Derivatives thereof (foodstuff preparations A23L 1/05) **[2]**
37/06 . Pectin; Derivatives thereof **[2]**
37/08 . Chitin; Chondroitin sulfate; Hyaluronic acid; Derivatives thereof **[2]**
37/10 . Heparin; Derivatives thereof **[2]**
37/12 . Agar-agar; Derivatives thereof **[2]**
37/14 . Hemicellulose; Derivatives thereof **[2]**
37/16 . Cyclodextrin; Derivatives thereof **[2]**
37/18 . Reserve carbohydrates, e.g. glycogen, inulin, laminarin; Derivatives thereof **[4]**

C08C TREATMENT OR CHEMICAL MODIFICATION OF RUBBERS

Note

This subclass covers:
– processes directed to natural rubber or to conjugated diene rubbers (synthesis thereof C08F); **[2]**
– processes directed to rubbers in general (to a specific rubber, other than provided for above, C08F to C08H). **[2]**

Preparation

1/00 Treatment of rubber latex
1/02 . Chemical or physical treatment of rubber latex before or during concentration
1/04 . . Purifying; Deproteinising
1/06 . . Preservation of rubber latex (preserving ingredients C08K)
1/065 . . Increasing the size of dispersed rubber particles **[2]**
1/07 . . . characterised by the agglomerating agents used **[2]**
1/075 . . Concentrating **[2]**

1/08 . . . with the aid of creaming agents **[2]**
1/10 . . . by centrifugation **[2]**
1/12 . . . by evaporation **[2]**
1/14 . Coagulation
1/15 . . characterised by the coagulants used **[2]**
1/16 . . in floc form

2/00 **Treatment of rubber solutions [2]**
2/02 . Purification **[2]**
2/04 . . Removal of catalyst residues **[2]**
2/06 . Winning of rubber from solutions **[2]**

3/00 **Treatment of coagulated rubber**
3/02 . Purification **[2]**

4/00 **Treatment of rubber before vulcanisation, not provided for in groups C08C 1/00 to C08C 3/02 [2]**

19/00 **Chemical modification of rubber** (crosslinking agents, other than provided for by group C08C 19/30, C08K) **[2]**

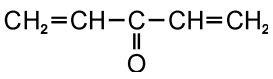
Note

In groups C08C 19/02 to C08C 19/30 in the absence of an indication to the contrary, a process is classified in the last appropriate place. **[2]**

19/02 . Hydrogenation **[2]**
19/04 . Oxidation **[2]**
19/06 . . Epoxidation **[2]**
19/08 . Depolymerisation **[2]**
19/10 . Isomerisation; Cyclisation **[2]**
19/12 . Incorporating halogen atoms into the molecule **[2]**
19/14 . . by reaction with halogens **[2]**
19/16 . . by reaction with hydrogen halides **[2]**
19/18 . . by reaction with hydrocarbons substituted by halogen **[2]**
19/20 . Incorporating sulfur atoms into the molecule **[2]**
19/22 . Incorporating nitrogen atoms into the molecule **[2]**
19/24 . Incorporating phosphorus atoms into the molecule **[2]**
19/25 . Incorporating silicon atoms into the molecule **[5]**
19/26 . Incorporating metal atoms into the molecule **[2]**
19/28 . Reaction with compounds containing carbon-to-carbon unsaturated bonds (graft polymers C08F) **[2]**
19/30 . Addition of a reagent which reacts with a hetero atom or a group containing hetero atoms of the macromolecule **[2]**
19/32 . . reacting with halogens or halogen-containing groups **[2]**
19/34 . . reacting with oxygen or oxygen-containing groups **[2]**
19/36 . . . with carboxy radicals **[2]**
19/38 . . . with hydroxy radicals **[2]**
19/40 . . . with epoxy radicals **[2]**
19/42 . . reacting with metals or metal-containing groups **[2]**
19/44 . . . of polymers containing metal atoms exclusively at one or both ends of the skeleton **[2]**

C08F **MACROMOLECULAR COMPOUNDS OBTAINED BY REACTIONS ONLY INVOLVING CARBON-TO-CARBON UNSATURATED BONDS** (production of liquid hydrocarbon mixtures from lower carbon number hydrocarbons, e.g. by oligomerisation, C10G 50/00; graft polymerisation of monomers containing carbon-to-carbon unsaturated bonds on to fibres, threads, yarns, fabrics or fibrous goods made from such materials D06M 14/00) **[2]**

(1) In this subclass, boron or silicon are considered as metals. **[2]**
(2) In this subclass, the following expression is used with the meaning indicated:
– "aliphatic radical" means an acyclic or a non-aromatic carbocyclic carbon skeleton which is considered to be terminated by every bond to:
(a) an element other than carbon;
(b) a carbon atom having a double bond to one atom other than carbon;
(c) an aromatic carbocyclic ring or a heterocyclic ring.
Examples: Polymers of
(a) $CH_2{=}CH{-}O{-}CH_2{-}CH_2{-}NH{-}COO{-}CH_2{-}CH_2{-}OH$ are classified in group C08F 16/28;
(b)



are classified in group C08F 16/36;
(c)

are classified in group C08F 12/18. **[2]**

(3) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**
(4) In this subclass, in the absence of an indication to the contrary, a catalyst or a polymer is classified in the last appropriate place. **[2]**
(5) In this subclass:
(a) macromolecular compounds and their preparation are classified in the groups for the type of compound prepared. General processes for the preparation of macromolecular compounds according to more than one main group are classified in the groups for the processes employed (C08F 2/00 to C08F 8/00). Processes for the preparation of macromolecular compounds are also classified in the groups for the types of reactions employed, if of interest; **[2]**
(b) subject matter relating to both homopolymers and copolymers is classified in groups C08F 10/00 to C08F 38/00; **[2]**
(c) subject matter limited to homopolymers is classified only in groups C08F 110/00 to C08F 138/00; **[2]**
(d) subject matter limited to copolymers is classified only in groups C08F 210/00 to C08F 246/00; **[2]**
(e) in groups C08F 210/00 to C08F 238/00, in the absence of an indication to the contrary, a copolymer is classified according to the major monomeric component. **[2]**

(6) This subclass covers also compositions based on monomers which form macromolecular compounds classifiable in this subclass (paints C09D 4/00; adhesives C09J 4/00). **[7]**
In this subclass: **[7]**
(a) if the monomers are defined, classification is made according to the polymer to be formed: **[7]**
– in groups C08F 10/00 to C08F 246/00 if no preformed polymer is present; **[7]**
– in groups C08F 251/00 to C08F 291/00 if a preformed polymer is present, considering the reaction to take place as a graft or cross-linking reaction; **[7]**
(b) if the presence of compounding ingredients is of interest, classification is made in group C08F 2/44 (sensitising agents C08F 2/50; catalysts C08F 4/00); **[7]**
(c) if the compounding ingredients are of interest per se, classification is also made in subclass C08K. **[7]**

Subclass index

Processes; **Catalysts**

2/00 **Processes of polymerisation** **[2]**
2/01 . characterised by special features of the polymerisation apparatus used **[7]**
2/02 . Polymerisation in bulk **[2]**
2/04 . Polymerisation in solution (C08F 2/32 takes precedence) **[2]**
2/06 . . Organic solvent **[2]**
2/08 . . . with the aid of dispersing agents for the polymer **[2]**
2/10 . . Aqueous solvent **[2]**
2/12 . Polymerisation in non-solvents (C08F 2/32 takes precedence) **[2]**
2/14 . . Organic medium **[2]**
2/16 . . Aqueous medium **[2]**
2/18 . . . Suspension polymerisation **[2]**
2/20 . . . . with the aid of macromolecular dispersing agents **[2]**
2/22 . . . Emulsion polymerisation **[2]**
2/24 . . . . with the aid of emulsifying agents **[2]**
2/26 . . . . . anionic **[2]**
2/28 . . . . . cationic **[2]**
2/30 . . . . . non-ionic **[2]**
2/32 . Polymerisation in water-in-oil emulsions **[2]**
2/34 . Polymerisation in gaseous state **[2]**
2/36 . Polymerisation in solid state **[2]**
2/38 . Polymerisation using regulators, e.g. chain terminating agents **[2]**
2/40 . . using retarding agents **[2]**
2/42 . . using short-stopping agents **[2]**
2/44 . Polymerisation in the presence of compounding ingredients, e.g. plasticisers, dyestuffs, fillers **[2]**
2/46 . Polymerisation initiated by wave energy or particle radiation **[2]**
2/48 . . by ultra-violet or visible light **[2]**
2/50 . . . with sensitising agents **[2]**
2/52 . . by electric discharge, e.g. voltolisation **[2]**
2/54 . . by X-rays or electrons **[2]**
2/56 . . by ultrasonic vibrations **[2]**
2/58 . Polymerisation initiated by direct application of electric current (electrolytic processes, e.g. electrophoresis, C25) **[2]**
2/60 . Polymerisation by the diene synthesis **[2]**

4/00 **Polymerisation catalysts** (catalysts in general B01J) **[2]**
4/02 . Carriers therefor **[2]**

Note

When classifying in groups C08F 4/04 to C08F 4/42, classification may also be made in group C08F 4/02, if a carrier is of particular interest. **[2]**

4/04 . Azo-compounds **[2]**
4/06 . Metallic compounds other than hydrides and other than metallo-organic compounds; Boron halide or aluminium halide complexes with organic compounds containing oxygen **[2]**
4/08 . . of alkali metals **[2]**

4/10 . . of alkaline earth metals, zinc, cadmium, mercury, copper, or silver **[2]**
4/12 . . of boron, aluminium, gallium, indium, thallium, or rare earths **[2]**
4/14 . . . Boron halides or aluminium halides; Complexes thereof with organic compounds containing oxygen **[2]**
4/16 . . of silicon, germanium, tin, lead, titanium, zirconium or hafnium **[2]**
4/18 . . . Oxides **[2]**
4/20 . . of antimony, bismuth, vanadium, niobium, or tantalum **[2]**
4/22 . . of chromium, molybdenum, or tungsten **[2]**
4/24 . . . Oxides **[2]**
4/26 . . of manganese, iron group metals, or platinum group metals **[2]**
4/28 . Oxygen or compounds releasing free oxygen (redox systems C08F 4/40) **[2]**
4/30 . . Inorganic compounds **[2]**
4/32 . . Organic compounds **[2]**
4/34 . . . Per-compounds with one peroxy-radical **[2]**
4/36 . . . Per-compounds with more than one peroxy-radical **[2]**
4/38 . . . Mixtures of peroxy-compounds **[2]**
4/40 . Redox systems **[2]**
4/42 . Metals; Metal hydrides; Metallo-organic compounds; Use thereof as catalyst precursors **[2]**
4/44 . . selected from light metals, zinc, cadmium, mercury, copper, silver, gold, boron, gallium, indium, thallium, rare earths, or actinides **[2]**
4/46 . . . selected from alkali metals **[2]**
4/48 . . . . selected from lithium, rubidium, caesium, or francium **[2]**
4/50 . . . selected from alkaline earth metals, zinc, cadmium, mercury, copper, or silver **[2]**
4/52 . . . selected from boron, aluminium, gallium, indium, thallium, or rare earths (C08F 4/14 takes precedence) **[2]**
4/54 . . . together with other compounds thereof **[2]**
4/56 . . . . Alkali metals being the only metals present, e.g. Alfin catalysts **[2]**
4/58 . . . together with silicon, germanium, tin, lead, antimony, bismuth, or compounds thereof **[2]**
4/60 . . . together with refractory metals, iron group metals, platinum group metals, manganese, technetium, rhenium, or compounds thereof **[2,5]**

Note

In groups C08F 4/602 to C08F 4/62, the following term is used with the meaning indicated:
– "component" comprises a transition metal or a compound thereof, pretreated or not (pretreatment C08F 4/61, C08F 4/63, C08F 4/65). **[5]**

4/602 . . . . Component covered by group C08F 4/60 with an organo-aluminium compound **[5]**
4/603 . . . . Component covered by group C08F 4/60 with a metal or compound covered by group C08F 4/44 other than an organo-aluminium compound **[5]**
4/605 . . . . Component covered by group C08F 4/60 with a metal or compound covered by group C08F 4/44, not provided for in a single group of groups C08F 4/602 or C08F 4/603 **[5]**
4/606 . . . . Catalysts comprising at least two different metals, in metallic form or as compounds thereof, in addition to the component covered by group C08F 4/60 **[5]**
4/607 . . . . Catalysts containing a specific non-metal or metal-free compound **[5]**
4/608 . . . . . inorganic **[5]**
4/609 . . . . . organic **[5]**
4/61 . . . . Pretreating the metal or compound covered by group C08F 4/60 before the final contacting with the metal or compound covered by group C08F 4/44 **[5]**
4/611 . . . . . Pretreating with non-metals or metal-free compounds **[5]**
4/612 . . . . . Pretreating with metals or metal-containing compounds **[5]**
4/613 . . . . . with metals covered by group C08F 4/60 or compounds thereof **[5]**
4/614 . . . . . with magnesium or compounds thereof **[5]**
4/615 . . . . . with aluminium or compounds thereof **[5]**
4/616 . . . . . with silicon or compounds thereof **[5]**
4/617 . . . . . with metals or metal-containing compounds, not provided for in groups C08F 4/613 to C08F 4/616 **[5]**
4/618 . . . . . with metals or metal-containing compounds, provided for in at least two of the groups C08F 4/613 to C08F 4/617 **[5]**
4/619 . . . . Component covered by group C08F 4/60 containing a transition metal-carbon bond **[8]**
4/6192 . . . . . containing at least one cyclopentadienyl ring, condensed or not, e.g. an indenyl or a fluorenyl ring **[8]**
4/62 . . . . Refractory metals or compounds thereof **[2]**
4/622 . . . . . Component covered by group C08F 4/62 with an organo-aluminium compound **[5]**
4/623 . . . . . Component covered by group C08F 4/62 with a metal or compound covered by group C08F 4/44 other than an organo-aluminium compound **[5]**
4/625 . . . . . Component covered by group C08F 4/62 with a metal or compound covered by group C08F 4/44, not provided for in a single group of groups C08F 4/622 or C08F 4/623 **[5]**
4/626 . . . . . Catalysts comprising at least two different metals, in metallic form or as compounds thereof, in addition to the component covered by group C08F 4/62 **[5]**
4/627 . . . . . Catalysts containing a specific non-metal or metal-free compound **[5]**
4/628 . . . . . inorganic **[5]**
4/629 . . . . . organic **[5]**
4/63 . . . . . Pretreating the metal or compound covered by group C08F 4/62 before the final contacting with the metal or compound covered by group C08F 4/44 **[5]**
4/631 . . . . . Pretreating with non-metals or metal-free compounds **[5]**
4/632 . . . . . Pretreating with metals or metal-containing compounds **[5]**

4/633 . . . . . with metals covered by group C08F 4/62 or compounds thereof **[5]**
4/634 . . . . . with magnesium or compounds thereof **[5]**
4/635 . . . . . with aluminium or compounds thereof **[5]**
4/636 . . . . . with silicon or compounds thereof **[5]**
4/637 . . . . . with metals or metal-containing compounds, not provided for in groups C08F 4/633 to C08F 4/636 **[5]**
4/638 . . . . . with metals or metal-containing compounds, not provided for in a single group of groups C08F 4/633 to C08F 4/637 **[5]**
4/639 . . . . Component covered by group C08F 4/62 containing a transition metal-carbon bond **[8]**
4/6392 . . . . . containing at least one cyclopentadienyl ring, condensed or not, e.g. an indenyl or a fluorenyl ring **[8]**
4/64 . . . . Titanium, zirconium, hafnium, or compounds thereof **[2]**
4/642 . . . . . Component covered by group C08F 4/64 with an organo-aluminium compound **[5]**
4/643 . . . . . Component covered by group C08F 4/64 with a metal or compound covered by group C08F 4/44 other than an organo-aluminium compound **[5]**
4/645 . . . . . Component covered by group C08F 4/64 with a metal or compound covered by group C08F 4/44, not provided for in a single group of groups C08F 4/642 to C08F 4/643 **[5]**
4/646 . . . . . Catalysts comprising at least two different metals, in metallic form or as compounds thereof, in addition to the component covered by group C08F 4/64 **[5]**
4/647 . . . . . Catalysts containing a specific non-metal or metal-free compound **[5]**
4/648 . . . . . inorganic **[5]**
4/649 . . . . . organic **[5]**
4/65 . . . . Pretreating the metal or compound covered by group C08F 4/64 before the final contacting with the metal or compound covered by group C08F 4/44 **[5]**
4/651 . . . . . Pretreating with non-metals or metal-free compounds **[5]**
4/652 . . . . . Pretreating with metals or metal-containing compounds **[5]**
4/653 . . . . . with metals covered by group C08F 4/64 or compounds thereof **[5]**
4/654 . . . . . with magnesium or compounds thereof **[5]**
4/655 . . . . . with aluminium or compounds thereof **[5]**
4/656 . . . . . with metals or metal-containing compounds, not provided for in groups C08F 4/653 to C08F 4/656 **[5]**
4/657 . . . . . with metals or metal-containing compounds, not provided for in a single group of groups C08F 4/653 to C08F 4/657 **[5]**
4/658 . . . . . Component covered by group C08F 4/64 containing a transition metal-carbon bond **[8]**
4/6592 . . . . . containing at least one cyclopentadienyl ring, condensed or not, e.g. an indenyl or a fluorenyl ring **[8]**
4/68 . . . . Vanadium, niobium, tantalum, or compounds thereof **[2]**
4/685 . . . . . Vanadium or compounds thereof in combination with titanium or compounds thereof **[5]**
4/69 . . . . Chromium, molybdenum, tungsten or compounds thereof **[5]**
4/695 . . . . Manganese, technetium, rhenium or compounds thereof **[5]**
4/70 . . . . Iron group metals, platinum group metals, or compounds thereof **[2]**
4/72 . . selected from metals not provided for in group C08F 4/44 (C08F 4/54 to C08F 4/70 take precedence) **[2]**
4/74 . . . selected from refractory metals **[2]**
4/76 . . . . selected from titanium, zirconium, hafnium, vanadium, niobium, or tantalum **[2]**
4/78 . . . . selected from chromium, molybdenum, or tungsten **[2]**
4/80 . . . selected from iron group metals or platinum group metals **[2]**
4/82 . . . . pi-Allyl complexes **[2]**

6/00 **Post-polymerisation treatments** (C08F 8/00 takes precedence; of conjugated diene rubbers C08C) **[2]**
6/02 . Neutralisation of the polymerisation mass, e.g. killing the catalyst (short-stopping C08F 2/42) **[2]**
6/04 . Fractionation **[2]**
6/06 . Treatment of polymer solutions **[2]**
6/08 . . Removal of catalyst residues **[2]**
6/10 . . Removal of volatile materials, e.g. monomers, solvents **[2]**
6/12 . . Separation of polymers from solutions **[2]**
6/14 . Treatment of polymer emulsions **[2]**
6/16 . . Purification **[2]**
6/18 . . Increasing the size of the dispersed particles **[2]**
6/20 . . Concentration **[2]**
6/22 . . Coagulation **[2]**
6/24 . Treatment of polymer suspensions **[2]**
6/26 . Treatment of polymers prepared in bulk **[2]**
6/28 . . Purification **[2]**

8/00 **Chemical modification by after-treatment** (graft polymers, block polymers, crosslinking with unsaturated monomers or with polymers C08F 251/00 to C08F 299/00; of conjugated diene rubbers C08C; crosslinking in general C08J) **[2]**

Note

In groups C08F 8/02 to C08F 8/50, in the absence of an indication to the contrary, a process is classified in the last appropriate place. **[2]**

8/02 . Alkylation **[2]**
8/04 . Reduction, e.g. hydrogenation **[2]**
8/06 . Oxidation **[2]**
8/08 . Epoxidation **[2]**
8/10 . Acylation **[2]**
8/12 . Hydrolysis **[2]**
8/14 . Esterification **[2]**
8/16 . . Lactonisation **[2]**
8/18 . Introducing halogen atoms or halogen-containing groups **[2]**
8/20 . . Halogenation **[2]**
8/22 . . . by reaction with free halogens **[2]**
8/24 . . Haloalkylation **[2]**
8/26 . Removing halogen atoms or halogen-containing groups from the molecule **[2]**
8/28 . Condensation with aldehydes or ketones **[2]**
8/30 . Introducing nitrogen atoms or nitrogen-containing groups (polymeric products of isocyanates or thiocyanates C08G) **[2]**
8/32 . . by reaction with amines **[2]**
8/34 . Introducing sulfur atoms or sulfur-containing groups **[2]**
8/36 . . Sulfonation; Sulfation **[2]**
8/38 . . Sulfohalogenation **[2]**
8/40 . Introducing phosphorus atoms or phosphorus-containing groups **[2]**
8/42 . Introducing metal atoms or metal-containing groups **[2]**
8/44 . Preparation of metal salts or ammonium salts **[2]**
8/46 . Reaction with unsaturated dicarboxylic acids or anhydrides thereof, e.g. maleinisation **[2]**
8/48 . Isomerisation; Cyclisation **[2]**
8/50 . Partial depolymerisation **[2]**

Homopolymers or copolymers [2]

10/00 Homopolymers or copolymers of unsaturated aliphatic hydrocarbons having only one carbon-to-carbon double bond [2]
10/02 . Ethene **[2]**
10/04 . Monomers containing three or four carbon atoms **[2]**
10/06 . . Propene **[2]**
10/08 . . Butenes **[2]**
10/10 . . . Isobutene **[2]**
10/14 . Monomers containing five or more carbon atoms **[2]**

12/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an aromatic carbocyclic ring [2]
12/02 . Monomers containing only one unsaturated aliphatic radical **[2]**
12/04 . . containing one ring **[2]**
12/06 . . . Hydrocarbons **[2]**
12/08 . . . . Styrene **[2]**
12/12 . . . . containing a branched unsaturated aliphatic radical or an alkyl radical attached to the ring **[2]**
12/14 . . . substituted by hetero atoms or groups containing hetero atoms **[2]**
12/16 . . . . Halogens **[2]**
12/18 . . . . . Chlorine **[2]**
12/20 . . . . . Fluorine **[2]**
12/22 . . . . Oxygen **[2]**
12/24 . . . . . Phenols or alcohols **[2]**
12/26 . . . . Nitrogen **[2]**
12/28 . . . . . Amines **[2]**
12/30 . . . . Sulfur **[2]**
12/32 . . containing two or more rings **[2]**
12/34 . Monomers containing two or more unsaturated aliphatic radicals **[2]**
12/36 . . Divinylbenzene **[2]**

14/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a halogen [2]
14/02 . Monomers containing chlorine **[2]**
14/04 . . Monomers containing two carbon atoms **[2]**
14/06 . . . Vinyl chloride **[2]**
14/08 . . . Vinylidene chloride **[2]**
14/12 . . . 1, 2-Dichloroethene **[2]**
14/14 . . Monomers containing three or more carbon atoms **[2]**
14/16 . Monomers containing bromine or iodine **[2]**
14/18 . Monomers containing fluorine **[2]**
14/20 . . Vinyl fluoride **[2]**
14/22 . . Vinylidene fluoride **[2]**
14/24 . . Trifluorochloroethene **[2]**
14/26 . . Tetrafluoroethene **[2]**
14/28 . . Hexafluoropropene **[2]**

16/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an alcohol, ether, aldehydo, ketonic, acetal, or ketal radical [2]
16/02 . by an alcohol radical **[2]**
16/04 . . Acyclic compounds **[2]**
16/06 . . . Polyvinyl alcohol **[2]**
16/08 . . . Allyl alcohol **[2]**
16/10 . . Carbocyclic compounds **[2]**
16/12 . by an ether radical **[2]**
16/14 . . Monomers containing only one unsaturated aliphatic radical **[2]**
16/16 . . . Monomers containing no hetero atoms other than the ether oxygen **[2]**
16/18 . . . . Acyclic compounds **[2]**
16/20 . . . . . Monomers containing three or more carbon atoms in the unsaturated aliphatic radical **[2]**
16/22 . . . . Carbocyclic compounds **[2]**
16/24 . . . Monomers containing halogen **[2]**
16/26 . . . Monomers containing oxygen atoms in addition to the ether oxygen **[2]**
16/28 . . . Monomers containing nitrogen **[2]**
16/30 . . . Monomers containing sulfur **[2]**
16/32 . . Monomers containing two or more unsaturated aliphatic radicals **[2]**
16/34 . by an aldehydo radical **[2]**
16/36 . by a ketonic radical **[2]**
16/38 . by an acetal or ketal radical **[2]**

18/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid, or of a haloformic acid [2]

18/02 . Esters of monocarboxylic acids **[2]**
18/04 . . Vinyl esters **[2]**
18/06 . . . Vinyl formate **[2]**
18/08 . . . Vinyl acetate **[2]**
18/10 . . . of monocarboxylic acids containing three or more carbon atoms **[2]**
18/12 . . with unsaturated alcohols containing three or more carbon atoms **[2]**
18/14 . Esters of polycarboxylic acids **[2]**
18/16 . . with alcohols containing three or more carbon atoms **[2]**
18/18 . . . Diallyl phthalate **[2]**
18/20 . Esters containing halogen **[2]**
18/22 . Esters containing nitrogen **[2]**
18/24 . Esters of carbonic or haloformic acids **[2]**

20/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and only one being terminated by only one carboxyl radical or a salt, anhydride, ester, amide, imide, or nitrile thereof [2]

20/02 . Monocarboxylic acids having less than ten carbon atoms; Derivatives thereof **[2]**
20/04 . . Acids; Metal salts or ammonium salts thereof **[2]**
20/06 . . . Acrylic acid; Methacrylic acid; Metal salts or ammonium salts thereof **[2]**
20/08 . . Anhydrides **[2]**
20/10 . . Esters **[2]**
20/12 . . . of monohydric alcohols or phenols **[2]**
20/14 . . . . Methyl esters **[2]**
20/16 . . . . of phenols or of alcohols containing two or more carbon atoms **[2]**
20/18 . . . . . with acrylic or methacrylic acids **[2]**
20/20 . . . of polyhydric alcohols or phenols **[2]**
20/22 . . . Esters containing halogen **[2]**
20/24 . . . . containing perhaloalkyl radicals **[2]**
20/26 . . . Esters containing oxygen in addition to the carboxy oxygen **[2]**
20/28 . . . . containing no aromatic rings in the alcohol moiety **[2]**
20/30 . . . . containing aromatic rings in the alcohol moiety **[2]**
20/32 . . . . containing epoxy radicals **[2]**
20/34 . . . Esters containing nitrogen **[2]**
20/36 . . . . containing oxygen in addition to the carboxy oxygen **[2]**
20/38 . . . Esters containing sulfur **[2]**
20/40 . . . Esters of unsaturated alcohols **[2]**
20/42 . . Nitriles **[2]**
20/44 . . . Acrylonitrile **[2]**
20/50 . . . containing four or more carbon atoms **[2]**
20/52 . . Amides or imides **[2]**
20/54 . . . Amides **[2]**
20/56 . . . . Acrylamide; Methacrylamide **[2]**
20/58 . . . . containing oxygen in addition to the carbonamido oxygen **[2]**
20/60 . . . . containing nitrogen in addition to the carbonamido nitrogen **[2]**
20/62 . Monocarboxylic acids having ten or more carbon atoms; Derivatives thereof **[2]**
20/64 . . Acids; Metal salts or ammonium salts thereof **[2]**
20/66 . . Anhydrides **[2]**
20/68 . . Esters **[2]**
20/70 . . Nitriles; Amides; Imides **[2]**

22/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical and containing at least one other carboxyl radical in the molecule; **Salts, anhydrides, esters, amides, imides, or nitriles thereof [2]**

22/02 . Acids; Metal salts or ammonium salts thereof **[2]**
22/04 . Anhydrides, e.g. cyclic anhydrides **[2]**
22/06 . . Maleic anhydride **[2]**
22/10 . Esters **[2]**
22/12 . . of phenols or saturated alcohols **[2]**
22/14 . . . Esters having no free carboxylic acid groups **[2]**
22/16 . . . Esters having free carboxylic acid groups **[2]**
22/18 . . . Esters containing halogen **[2]**
22/20 . . . Esters containing oxygen in addition to the carboxy oxygen **[2]**
22/22 . . . Esters containing nitrogen **[2]**
22/24 . . . Esters containing sulfur **[2]**
22/26 . . of unsaturated alcohols **[2]**
22/28 . . . Diallyl maleate **[2]**
22/30 . Nitriles **[2]**
22/32 . . Alpha-cyano-acrylic acid; Esters thereof **[2]**
22/34 . . Vinylidene cyanide **[2]**
22/36 . Amides or imides **[2]**
22/38 . . Amides **[2]**
22/40 . . Imides, e.g. cyclic imides **[2]**

24/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (cyclic esters of polyfunctional acids C08F 18/00; cyclic anhydrides of unsaturated acids C08F 20/00, C08F 22/00) **[2]**

26/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a single or double bond to nitrogen or by a heterocyclic ring containing nitrogen [2]

26/02 . by a single or double bond to nitrogen **[2]**
26/04 . . Diallylamine **[2]**
26/06 . by a heterocyclic ring containing nitrogen **[2]**
26/08 . . N-Vinyl-pyrrolidine **[2]**
26/10 . . N-Vinyl-pyrrolidone **[2]**
26/12 . . N-Vinyl-carbazole **[2]**

28/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a bond to sulfur or by a heterocyclic ring containing sulfur [2]

28/02 . by a bond to sulfur **[2]**
28/04 . . Thioethers **[2]**
28/06 . by a heterocyclic ring containing sulfur **[2]**

30/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing phosphorus, selenium, tellurium or a metal (metal salts, e.g. phenolates or alcoholates, see the parent compounds) **[2]**

30/02 . containing phosphorus **[2]**
30/04 . containing a metal **[2]**
30/06 . . containing boron **[2]**
30/08 . . containing silicon **[2]**
30/10 . . containing germanium **[2]**

32/00 Homopolymers or copolymers of cyclic compounds having no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic ring system [2]

32/02 . having no condensed rings **[2]**
32/04 . . having one carbon-to-carbon double bond **[2]**
32/06 . . having two or more carbon-to-carbon double bonds **[2]**
32/08 . having condensed rings (coumarone-indene polymers C08F 244/00) **[2]**

34/00 Homopolymers or copolymers of cyclic compounds having no unsaturated aliphatic radicals in a side chain and having one or more carbon-to-carbon double bonds in a heterocyclic ring (cyclic esters of polyfunctional acids C08F 18/00; cyclic anhydrides or imides C08F 22/00) **[2]**

34/02 . in a ring containing oxygen (coumarone-indene polymers C08F 244/00) **[2]**
34/04 . in a ring containing sulfur **[2]**

36/00 Homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds (C08F 32/00 takes precedence) **[2]**

36/02 . the radical having only two carbon-to-carbon double bonds **[2]**
36/04 . . conjugated **[2]**
36/06 . . . Butadiene **[2]**
36/08 . . . Isoprene **[2]**
36/14 . . . containing elements other than carbon and hydrogen **[2]**
36/16 . . . . containing halogen **[2]**
36/18 . . . . . containing chlorine **[2]**
36/20 . . unconjugated **[2]**
36/22 . the radical having three or more carbon-to-carbon double bonds **[2]**

38/00 Homopolymers or copolymers of compounds having one or more carbon-to-carbon triple bonds [2]

38/02 . Acetylene **[2]**
38/04 . Vinylacetylene **[2]**

Homopolymers [2]

110/00 Homopolymers of unsaturated aliphatic hydrocarbons having only one carbon-to-carbon double bond [2]

110/02 . Ethene **[2]**
110/04 . Monomers containing three or four carbon atoms **[2]**
110/06 . . Propene **[2]**
110/08 . . Butenes **[2]**
110/10 . . . Isobutene **[2]**
110/14 . Monomers containing five or more carbon atoms **[2]**

112/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an aromatic carbocyclic ring [2]

112/02 . Monomers containing only one unsaturated aliphatic radical **[2]**
112/04 . . containing one ring **[2]**
112/06 . . . Hydrocarbons **[2]**
112/08 . . . . Styrene **[2]**
112/12 . . . . containing a branched unsaturated aliphatic radical or an alkyl radical attached to the ring **[2]**
112/14 . . . substituted by hetero atoms or groups containing hetero atoms **[2]**
112/32 . . containing two or more rings **[2]**
112/34 . Monomers containing two or more unsaturated aliphatic radicals **[2]**
112/36 . . Divinylbenzene **[2]**

114/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a halogen [2]

114/02 . Monomers containing chlorine **[2]**
114/04 . . Monomers containing two carbon atoms **[2]**
114/06 . . . Vinyl chloride **[2]**
114/08 . . . Vinylidene chloride **[2]**
114/12 . . . 1,2-Dichloroethene **[2]**
114/14 . . Monomers containing three or more carbon atoms **[2]**
114/16 . Monomers containing bromine or iodine **[2]**
114/18 . Monomers containing fluorine **[2]**
114/20 . . Vinyl fluoride **[2]**
114/22 . . Vinylidene fluoride **[2]**
114/24 . . Trifluorochloroethene **[2]**
114/26 . . Tetrafluoroethene **[2]**
114/28 . . Hexafluoropropene **[2]**

116/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an alcohol, ether, aldehydo, ketonic, acetal, or ketal radical [2]

116/02 . by an alcohol radical **[2]**
116/04 . . Acyclic compounds **[2]**
116/06 . . . Polyvinyl alcohol **[2]**
116/08 . . . Allyl alcohol **[2]**
116/10 . . Carbocyclic compounds **[2]**
116/12 . by an ether radical **[2]**
116/14 . . Monomers containing only one unsaturated aliphatic radical **[2]**
116/16 . . . Monomers containing no hetero atoms other than the ether oxygen **[2]**
116/18 . . . . Acyclic compounds **[2]**
116/20 . . . . . Monomers containing three or more carbon atoms in the unsaturated aliphatic radical **[2]**
116/34 . by an aldehydo radical **[2]**
116/36 . by a ketonic radical **[2]**
116/38 . by an acetal or ketal radical **[2]**

118/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid, or of a haloformic acid [2]

118/02 . Esters of monocarboxylic acids **[2]**
118/04 . . Vinyl esters **[2]**
118/06 . . . Vinyl formate **[2]**
118/08 . . . Vinyl acetate **[2]**
118/10 . . . of monocarboxylic acids containing three or more carbon atoms **[2]**
118/12 . . with unsaturated alcohols containing three or more carbon atoms **[2]**
118/14 . Esters of polycarboxylic acids **[2]**
118/16 . . with alcohols containing three or more carbon atoms **[2]**
118/18 . . . Diallyl phthalate **[2]**

120/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and only one being terminated by only one carboxyl radical or a salt, anhydride, ester, amide, imide, or nitrile thereof [2]

120/02 . Monocarboxylic acids having less than ten carbon atoms; Derivatives thereof **[2]**
120/04 . . Acids; Metal salts or ammonium salts thereof **[2]**
120/06 . . . Acrylic acid; Methacrylic acid; Metal salts or ammonium salts thereof **[2]**
120/08 . . Anhydrides **[2]**
120/10 . . Esters **[2]**
120/12 . . . of monohydric alcohols or phenols **[2]**
120/14 . . . . Methyl esters **[2]**
120/16 . . . . of phenols or of alcohols containing two or more carbon atoms **[2]**
120/18 . . . . . with acrylic or methacrylic acids **[2]**
120/20 . . . of polyhydric alcohols or phenols **[2]**
120/22 . . . Esters containing halogen **[2]**
120/24 . . . . containing perhaloalkyl radicals **[2]**
120/26 . . . Esters containing oxygen in addition to the carboxy oxygen **[2]**
120/28 . . . . containing no aromatic rings in the alcohol moiety **[2]**
120/30 . . . . containing aromatic rings in the alcohol moiety **[2]**
120/32 . . . . containing epoxy radicals **[2]**
120/34 . . . Esters containing nitrogen **[2]**
120/36 . . . . containing oxygen in addition to the carboxy oxygen **[2]**
120/38 . . . Esters containing sulfur **[2]**
120/40 . . . Esters of unsaturated alcohols **[2]**
120/42 . . Nitriles **[2]**
120/44 . . . Acrylonitrile **[2]**
120/50 . . . containing four or more carbon atoms **[2]**
120/52 . . Amides or imides **[2]**
120/54 . . . Amides **[2]**
120/56 . . . . Acrylamide; Methacrylamide **[2]**
120/58 . . . . containing oxygen in addition to the carbonamido oxygen **[2]**
120/60 . . . . containing nitrogen in addition to the carbonamido nitrogen **[2]**
120/62 . Monocarboxylic acids having ten or more carbon atoms; Derivatives thereof **[2]**
120/64 . . Acids; Metal salts or ammonium salts thereof **[2]**
120/66 . . Anhydrides **[2]**
120/68 . . Esters **[2]**
120/70 . . Nitriles; Amides; Imides **[2]**

122/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical and containing at least one other carboxyl radical in the molecule; **Salts, anhydrides, esters, amides, imides, or nitriles thereof [2]**

122/02 . Acids; Metal salts or ammonium salts thereof **[2]**
122/04 . Anhydrides, e.g. cyclic anhydrides **[2]**
122/06 . . Maleic anhydride **[2]**
122/10 . Esters **[2]**
122/12 . . of phenols or saturated alcohols **[2]**
122/14 . . . Esters having no free carboxylic acid groups **[2]**
122/16 . . . Esters having free carboxylic acid groups **[2]**
122/18 . . . Esters containing halogen **[2]**
122/20 . . . Esters containing oxygen in addition to the carboxy oxygen **[2]**
122/22 . . . Esters containing nitrogen **[2]**
122/24 . . . Esters containing sulfur **[2]**
122/26 . . of unsaturated alcohols **[2]**
122/28 . . . Diallyl maleate **[2]**
122/30 . Nitriles **[2]**
122/32 . . Alpha-cyano-acrylic acid; Esters thereof **[2]**
122/34 . . Vinylidene cyanide **[2]**
122/36 . Amides or imides **[2]**
122/38 . . Amides **[2]**
122/40 . . Imides, e.g. cyclic imides **[2]**

124/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (cyclic esters of polyfunctional acids C08F 118/00; cyclic anhydrides of unsaturated acids C08F 120/00, C08F 122/00) **[2]**

126/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a single or double bond to nitrogen or by a heterocyclic ring containing nitrogen [2]

126/02 . by a single or double bond to nitrogen **[2]**
126/04 . . Diallylamine **[2]**
126/06 . by a heterocyclic ring containing nitrogen **[2]**
126/08 . . N-Vinyl-pyrrolidine **[2]**
126/10 . . N-Vinyl-pyrrolidone **[2]**
126/12 . . N-Vinyl-carbazole **[2]**

128/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon bond, and at least one being terminated by a bond to sulfur or by a heterocyclic ring containing sulfur [2]

128/02 . by a bond to sulfur **[2]**
128/04 . . Thioethers **[2]**
128/06 . by a heterocyclic ring containing sulfur **[2]**

130/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing phosphorus, selenium, tellurium, or a metal (metal salts, e.g. phenolates or alcoholates, see the parent compounds) **[2]**

130/02 . containing phosphorus **[2]**

130/04 . containing a metal **[2]**
130/06 . . containing boron **[2]**
130/08 . . containing silicon **[2]**
130/10 . . containing germanium **[2]**

132/00 Homopolymers of cyclic compounds containing no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic ring system [2]
132/02 . having no condensed rings **[2]**
132/04 . . having one carbon-to-carbon double bond **[2]**
132/06 . . having two or more carbon-to-carbon double bonds **[2]**
132/08 . having condensed rings **[2]**

134/00 Homopolymers of cyclic compounds having no unsaturated aliphatic radicals in a side chain and having one or more carbon-to-carbon double bonds in a heterocyclic ring (cyclic esters of polyfunctional acids C08F 118/00; cyclic anhydrides or imides C08F 122/00) **[2]**
134/02 . in a ring containing oxygen **[2]**
134/04 . in a ring containing sulfur **[2]**

136/00 Homopolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds (C08F 132/00 takes precedence) **[2]**
136/02 . the radical having only two carbon-to-carbon double bonds **[2]**
136/04 . . conjugated **[2]**
136/06 . . . Butadiene **[2]**
136/08 . . . Isoprene **[2]**
136/14 . . . containing elements other than carbon and hydrogen **[2]**
136/16 . . . . containing halogen **[2]**
136/18 . . . . . containing chlorine **[2]**
136/20 . . unconjugated **[2]**
136/22 . the radical having three or more carbon-to-carbon double bonds **[2]**

138/00 Homopolymers of compounds having one or more carbon-to-carbon triple bonds [2]
138/02 . Acetylene **[2]**
138/04 . Vinylacetylene **[2]**

Copolymers [2]

(1) When classifying in groups C08F 210/00 to C08F 297/00, any monomeric components not identified by the classification according to Note (4) after the title of subclass C08F within this classification range, and where the use of such monomeric components is determined to be novel and non-obvious, must also be classified in the last appropriate place in groups C08F 210/00 to C08F 238/00. **[8]**

(2) Any monomeric components not identified by the classification according to Note (4) after the title of subclass C08F or Note (1) above, and where the use of such monomeric components is considered to represent information of interest for search, may also be classified in the last appropriate place in groups C08F 210/00 to C08F 238/00. This can for example be the case when it is considered of interest to enable searching of copolymers using a combination of classification symbols. Such non-obligatory classification should be given as “additional information”. **[8]**

210/00 Copolymers of unsaturated aliphatic hydrocarbons having only one carbon-to-carbon double bond [2]
210/02 . Ethene **[2]**
210/04 . Monomers containing three or four carbon atoms **[2]**
210/06 . . Propene **[2]**
210/08 . . Butenes **[2]**
210/10 . . . Isobutene **[2]**
210/12 . . . . with conjugated diolefins, e.g. butyl rubber **[2]**
210/14 . Monomers containing five or more carbon atoms **[2]**
210/16 . Copolymers of ethene with alpha-alkenes, e.g. EP rubbers **[2]**
210/18 . . with non-conjugated dienes, e.g. EPT rubbers **[2]**

212/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an aromatic carbocyclic ring [2]
212/02 . Monomers containing only one unsaturated aliphatic radical **[2]**
212/04 . . containing one ring **[2]**
212/06 . . . Hydrocarbons **[2]**
212/08 . . . . Styrene **[2]**
212/10 . . . . . with nitriles **[2]**
212/12 . . . . containing a branched unsaturated aliphatic radical or an alkyl radical attached to the ring **[2]**
212/14 . . . substituted by hetero atoms or groups containing hetero atoms **[2]**
212/32 . . containing two or more rings **[2]**
212/34 . Monomers containing two or more unsaturated aliphatic radicals **[2]**
212/36 . . Divinylbenzene **[2]**

214/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a halogen [2]
214/02 . Monomers containing chlorine **[2]**
214/04 . . Monomers containing two carbon atoms **[2]**
214/06 . . . Vinyl chloride **[2]**
214/08 . . . Vinylidene chloride **[2]**
214/10 . . . . with nitriles **[2]**
214/12 . . . 1,2-Dichloroethene **[2]**
214/14 . . Monomers containing three or more carbon atoms **[2]**
214/16 . Monomers containing bromine or iodine **[2]**
214/18 . Monomers containing fluorine **[2]**
214/20 . . Vinyl fluoride **[2]**
214/22 . . Vinylidene fluoride **[2]**
214/24 . . Trifluorochloroethene **[2]**
214/26 . . Tetrafluoroethene **[2]**
214/28 . . Hexafluoropropene **[2]**

216/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an alcohol, ether, aldehydo, ketonic, acetal, or ketal radical [2]

216/02 . by an alcohol radical **[2]**
216/04 . . Acyclic compounds **[2]**
216/06 . . . Polyvinyl alcohol **[2]**
216/08 . . . Allyl alcohol **[2]**
216/10 . . Carbocyclic compounds **[2]**
216/12 . by an ether radical **[2]**
216/14 . . Monomers containing only one unsaturated aliphatic radical **[2]**
216/16 . . . Monomers containing no hetero atoms other than the ether oxygen **[2]**
216/18 . . . . Acyclic compounds **[2]**
216/20 . . . . . Monomers containing three or more carbon atoms in the unsaturated aliphatic radical **[2]**
216/34 . by an aldehydo radical **[2]**
216/36 . by a ketonic radical **[2]**
216/38 . by an acetal or ketal radical **[2]**

218/00 Copolymers having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid, or of a haloformic acid [2]

218/02 . Esters of monocarboxylic acids **[2]**
218/04 . . Vinyl esters **[2]**
218/06 . . . Vinyl formate **[2]**
218/08 . . . Vinyl acetate **[2]**
218/10 . . . of monocarboxylic acids containing three or more carbon atoms **[2]**
218/12 . . with unsaturated alcohols containing three or more carbon atoms **[2]**
218/14 . Esters of polycarboxylic acids **[2]**
218/16 . . with alcohols containing three or more carbon atoms **[2]**
218/18 . . . Diallyl phthalate **[2]**

220/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and only one being terminated by only one carboxyl radical or a salt, anhydride, ester, amide, imide, or nitrile thereof [2]

220/02 . Monocarboxylic acids having less than ten carbon atoms; Derivatives thereof **[2]**
220/04 . . Acids; Metals salts or ammonium salts thereof **[2]**
220/06 . . . Acrylic acid; Methacrylic acid; Metal salts or ammonium salts thereof **[2]**
220/08 . . Anhydrides **[2]**
220/10 . . Esters **[2]**
220/12 . . . of monohydric alcohols or phenols **[2]**
220/14 . . . . Methyl esters **[2]**
220/16 . . . . of phenols or of alcohols containing two or more carbon atoms **[2]**
220/18 . . . . . with acrylic or methacrylic acids **[2]**
220/20 . . . of polyhydric alcohols or phenols **[2]**
220/22 . . . Esters containing halogen **[2]**
220/24 . . . . containing perhaloalkyl radicals **[2]**
220/26 . . . Esters containing oxygen in addition to the carboxy oxygen **[2]**
220/28 . . . . containing no aromatic rings in the alcohol moiety **[2]**
220/30 . . . . containing aromatic rings in the alcohol moiety **[2]**
220/32 . . . . containing epoxy radicals **[2]**
220/34 . . . Esters containing nitrogen **[2]**
220/36 . . . . containing oxygen in addition to the carboxy oxygen **[2]**
220/38 . . . Esters containing sulfur **[2]**
220/40 . . . Esters of unsaturated alcohols **[2]**
220/42 . . Nitriles **[2]**
220/44 . . . Acrylonitrile **[2]**
220/46 . . . . with carboxylic acids, sulfonic acids or salts thereof **[2]**
220/48 . . . . with nitrogen-containing monomers **[2]**
220/50 . . . containing four or more carbon atoms **[2]**
220/52 . . Amides or imides **[2]**
220/54 . . . Amides **[2]**
220/56 . . . . Acrylamide; Methacrylamide **[2]**
220/58 . . . . containing oxygen in addition to the carbonamido oxygen **[2]**
220/60 . . . . containing nitrogen in addition to the carbonamido nitrogen **[2]**
220/62 . Monocarboxylic acids having ten or more carbon atoms; Derivatives thereof (copolymers of drying-oils C08F 242/00) **[2]**
220/64 . . Acids; Metal salts or ammonium salts thereof **[2]**
220/66 . . Anhydrides **[2]**
220/68 . . Esters **[2]**
220/70 . . Nitriles; Amides; Imides **[2]**

222/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical and containing at least one other carboxyl radical in the molecule; **Salts, anhydrides, esters, amides, imides, or nitriles thereof [2]**

222/02 . Acids; Metal salts or ammonium salts thereof **[2]**
222/04 . Anhydrides, e.g. cyclic anhydrides **[2]**
222/06 . . Maleic anhydride **[2]**
222/08 . . . with vinyl aromatic monomers **[2]**
222/10 . Esters **[2]**
222/12 . . of phenols or saturated alcohols **[2]**
222/14 . . . Esters having no free carboxylic acid groups **[2]**
222/16 . . . Esters having free carboxylic acid groups **[2]**
222/18 . . . Esters containing halogen **[2]**
222/20 . . . Esters containing oxygen in addition to the carboxy oxygen **[2]**
222/22 . . . Esters containing nitrogen **[2]**
222/24 . . . Esters containing sulfur **[2]**
222/26 . . of unsaturated alcohols **[2]**
222/28 . . . Diallyl maleate **[2]**
222/30 . Nitriles **[2]**
222/32 . . Alpha-cyano-acrylic acid; Esters thereof **[2]**
222/34 . . Vinylidene cyanide **[2]**
222/36 . Amides or imides **[2]**
222/38 . . Amides **[2]**
222/40 . . Imides, e.g. cyclic imides **[2]**

224/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (cyclic esters of polyfunctional acids C08F 218/00; cyclic anhydrides of unsaturated acids C08F 220/00, C08F 222/00) **[2]**

226/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a single or double bond to nitrogen or by a heterocyclic ring containing nitrogen [2]

226/02 . by a single or double bond to nitrogen **[2]**
226/04 . . Diallylamine **[2]**
226/06 . by a heterocyclic ring containing nitrogen **[2]**
226/08 . . N-Vinyl-pyrrolidine **[2]**
226/10 . . N-Vinyl-pyrrolidone **[2]**
226/12 . . N-Vinyl-carbazole **[2]**

228/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a bond to sulfur or by a heterocyclic ring containing sulfur [2]

228/02 . by a bond to sulfur **[2]**
228/04 . . Thioethers **[2]**
228/06 . by a heterocyclic ring containing sulfur **[2]**

230/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing phosphorus, selenium, tellurium, or a metal (metal salts, e.g. phenolates or alcoholates, see the parent compounds) **[2]**

230/02 . containing phosphorus **[2]**
230/04 . containing a metal **[2]**
230/06 . . containing boron **[2]**
230/08 . . containing silicon **[2]**
230/10 . . containing germanium **[2]**

232/00 Copolymers of cyclic compounds containing no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic ring system [2]

232/02 . having no condensed rings **[2]**
232/04 . . having one carbon-to-carbon double bond **[2]**
232/06 . . having two or more carbon-to-carbon double bonds **[2]**
232/08 . having condensed rings (coumarone-indene polymers C08F 244/00) **[2]**

234/00 Copolymers of cyclic compounds having no unsaturated aliphatic radicals in a side chain and having one or more carbon-to-carbon double bonds in a heterocyclic ring (cyclic esters of polyfunctional acids C08F 218/00; cyclic anhydrides or imides C08F 222/00) **[2]**

234/02 . in a ring containing oxygen (coumarone-indene polymers C08F 244/00) **[2]**
234/04 . in a ring containing sulfur **[2]**

236/00 Copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds (C08F 232/00 takes precedence) **[2]**

236/02 . the radical having only two carbon-to-carbon double bonds **[2]**
236/04 . . conjugated **[2]**
236/06 . . . Butadiene **[2]**
236/08 . . . Isoprene **[2]**
236/10 . . . with vinyl aromatic monomers **[2]**
236/12 . . . with nitriles **[2]**
236/14 . . . containing elements other than carbon and hydrogen **[2]**
236/16 . . . . containing halogen **[2]**
236/18 . . . . . containing chlorine **[2]**
236/20 . . unconjugated **[2]**
236/22 . the radical having three or more carbon-to-carbon double bonds **[2]**

238/00 Copolymers of compounds having one or more carbon-to-carbon triple bonds [2]

238/02 . Acetylene **[2]**
238/04 . Vinylacetylene **[2]**

240/00 Copolymers of hydrocarbons and mineral oils, e.g. petroleum resins [2]

242/00 Copolymers of drying-oils with other monomers [2]

244/00 Coumarone-indene copolymers [2]

246/00 Copolymers in which the nature of only the monomers in minority is defined [2]

Graft polymers; **Polymers crosslinked with unsaturated monomers [2]**

251/00 Macromolecular compounds obtained by polymerising monomers on to polysaccharides or derivatives thereof [2]

251/02 . on to cellulose or derivatives thereof **[2]**

253/00 Macromolecular compounds obtained by polymerising monomers on to natural rubbers or derivatives thereof [2]

255/00 Macromolecular compounds obtained by polymerising monomers on to polymers of hydrocarbons as defined in group C08F 10/00 [2]

255/02 . on to polymers of olefins having two or three carbon atoms **[2]**
255/04 . . on to ethene-propene copolymers **[2]**
255/06 . . on to ethene-propene-diene terpolymers **[2]**
255/08 . on to polymers of olefins having four or more carbon atoms **[2]**
255/10 . . on to butene polymers **[2]**

257/00 Macromolecular compounds obtained by polymerising monomers on to polymers of aromatic monomers as defined in group C08F 12/00 [2]

257/02 . on to polymers of styrene or alkyl-substituted styrenes **[2]**

259/00 Macromolecular compounds obtained by polymerising monomers on to polymers of halogen containing monomers as defined in group C08F 14/00 [2]

259/02 . on to polymers containing chlorine **[2]**
259/04 . . on to polymers of vinyl chloride **[2]**
259/06 . . on to polymers of vinylidene chloride **[2]**
259/08 . on to polymers containing fluorine **[2]**

261/00 Macromolecular compounds obtained by polymerising monomers on to polymers of oxygen-containing monomers as defined in group C08F 16/00 [2]

261/02 . on to polymers of unsaturated alcohols **[2]**
261/04 . . on to polymers of vinyl alcohol **[2]**
261/06 . on to polymers of unsaturated ethers **[2]**
261/08 . on to polymers of unsaturated aldehydes **[2]**
261/10 . on to polymers of unsaturated ketones **[2]**
261/12 . on to polymers of unsaturated acetals or ketals **[2]**

263/00 Macromolecular compounds obtained by polymerising monomers on to polymers of esters of unsaturated alcohols with saturated acids as defined in group C08F 18/00 [2]

263/02 . on to polymers of vinyl esters with monocarboxylic acids **[2]**

263/04 . . on to polymers of vinyl acetate **[2]**

263/06 . on to polymers of esters with polycarboxylic acids **[2]**

263/08 . . Polymerisation of diallyl phthalate prepolymers **[2]**

265/00 Macromolecular compounds obtained by polymerising monomers on to polymers of unsaturated monocarboxylic acids or derivatives thereof as defined in group C08F 20/00 [2]

265/02 . on to polymers of acids, salts or anhydrides **[2]**

265/04 . on to polymers of esters **[2]**

265/06 . . Polymerisation of acrylate or methacrylate esters on to polymers thereof **[2]**

265/08 . on to polymers of nitriles **[2]**

265/10 . on to polymers of amides or imides **[2]**

267/00 Macromolecular compounds obtained by polymerising monomers on to polymers of unsaturated polycarboxylic acids or derivatives thereof as defined in group C08F 22/00 [2]

267/02 . on to polymers of acids or salts **[2]**

267/04 . on to polymers of anhydrides **[2]**

267/06 . on to polymers of esters **[2]**

267/08 . on to polymers of nitriles **[2]**

267/10 . on to polymers of amides or imides **[2]**

269/00 Macromolecular compounds obtained by polymerising monomers on to polymers of heterocyclic oxygen-containing monomers as defined in group C08F 24/00 [2]

271/00 Macromolecular compounds obtained by polymerising monomers on to polymers of nitrogen-containing monomers as defined in group C08F 26/00 [2]

271/02 . on to polymers of monomers containing heterocyclic nitrogen **[2]**

273/00 Macromolecular compounds obtained by polymerising monomers on to polymers of sulfur-containing monomers as defined in group C08F 28/00 [2]

275/00 Macromolecular compounds obtained by polymerising monomers on to polymers of monomers containing phosphorus, selenium, tellurium, or a metal as defined in group C08F 30/00 [2]

277/00 Macromolecular compounds obtained by polymerising monomers on to polymers of carbocyclic or heterocyclic monomers as defined respectively in group C08F 32/00 or in group C08F 34/00 [2]

279/00 Macromolecular compounds obtained by polymerising monomers on to polymers of monomers having two or more carbon-to-carbon double bonds as defined in group C08F 36/00 [2]

279/02 . on to polymers of conjugated dienes **[2]**

279/04 . . Vinyl aromatic monomers and nitriles as the only monomers **[2]**

279/06 . . Vinyl aromatic monomers and methacrylates as the only monomers **[2]**

281/00 Macromolecular compounds obtained by polymerising monomers on to polymers of monomers having carbon-to-carbon triple bonds as defined in group C08F 38/00 [2]

283/00 Macromolecular compounds obtained by polymerising monomers on to polymers provided for in subclass C08G [4]

283/01 . on to unsaturated polyesters **[4]**

283/02 . on to polycarbonates or saturated polyesters **[2]**

283/04 . on to polycarbonamides, polyesteramides or polyimides **[2]**

283/06 . on to polyethers, polyoxymethylenes or polyacetals **[2]**

283/08 . . on to polyphenylene oxides **[2]**

283/10 . on to polymers containing more than one epoxy radical per molecule **[2]**

283/12 . on to polysiloxanes **[2]**

283/14 . on to polymers obtained by ring-opening polymerisation of carbocyclic compounds having one or more carbon-to-carbon double bonds in the carbocyclic ring, i.e. polyalkeneamers **[2]**

285/00 Macromolecular compounds obtained by polymerising monomers on to preformed graft polymers [2]

287/00 Macromolecular compounds obtained by polymerising monomers on to block polymers [2]

289/00 Macromolecular compounds obtained by polymerising monomers on to macromolecular compounds not provided for in groups C08F 251/00 to C08F 287/00 [2]

290/00 Macromolecular compounds obtained by polymerising monomers on to polymers modified by introduction of aliphatic unsaturated end or side groups [6]

290/02 . on to polymers modified by introduction of unsaturated end groups **[6]**

290/04 . . Polymers provided for in subclasses C08C or C08F **[6]**

290/06 . . Polymers provided for in subclass C08G **[6]**

290/08 . on to polymers modified by introduction of unsaturated side groups **[6]**

290/10 . . Polymers provided for in subclass C08B **[6]**

290/12 . . Polymers provided for in subclasses C08C or C08F **[6]**

290/14 . . Polymers provided for in subclass C08G **[6]**

291/00 Macromolecular compounds obtained by polymerising monomers on to macromolecular compounds according to more than one of the groups C08F 251/00 to C08F 289/00 [2]

291/02 . on to elastomers **[2]**

291/04 . on to halogen-containing macromolecules **[2]**

291/06 . on to oxygen-containing macromolecules **[2]**

291/08 . . on to macromolecules containing hydroxy radicals **[2]**

291/10 . . on to macromolecules containing epoxy radicals **[2]**

291/12 . on to nitrogen-containing macromolecules **[2]**

291/14 . on to sulfur-containing macromolecules **[2]**

291/16 . on to macromolecules containing more than two metal atoms **[2]**

291/18 . on to irradiated or oxidised macromolecules (epoxidised C08F 291/10) **[2]**

292/00 Macromolecular compounds obtained by polymerising monomers on to inorganic materials [3]

Block polymers [2]

293/00 Macromolecular compounds obtained by polymerisation on to a macromolecule having groups capable of inducing the formation of new polymer chains bound exclusively at one or both ends of the starting macromolecule (on to polymers modified by introduction of unsaturated end groups C08F 290/02) **[2]**

295/00 Macromolecular compounds obtained by polymerisation using successively different catalyst types without deactivating the intermediate polymer [2]

297/00 Macromolecular compounds obtained by successively polymerising different monomer systems using a catalyst of the ionic or coordination type without deactivating the intermediate polymer [2]

297/02 . using a catalyst of the anionic type **[2]**

297/04 . . polymerising vinyl aromatic monomers and conjugated dienes **[2]**

297/06 . using a catalyst of the coordination type **[2]**

297/08 . . polymerising mono-olefins **[2]**

299/00 Macromolecular compounds obtained by interreacting polymers involving only carbon-to-carbon unsaturated bond reactions, in the absence of non-macromolecular monomers (in the presence of non-macromolecular monomers C08F 251/00 to C08F 291/00; involving other reactions C08G 81/00) **[2,6]**

299/02 . from unsaturated polycondensates **[2]**

299/04 . . from polyesters **[2]**

299/06 . . from polyurethanes **[2]**

299/08 . . from polysiloxanes **[2]**

301/00 Macromolecular compounds not provided for in groups C08F 10/00 to C08F 299/00 [8]

C08G MACROMOLECULAR COMPOUNDS OBTAINED OTHERWISE THAN BY REACTIONS ONLY INVOLVING CARBON-TO-CARBON UNSATURATED BONDS [2]

(1) Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

(2) In this subclass, group C08G 18/00 takes precedence over the other groups. A further classification is given if the polymers are obtained by reactions forming specific linkages for which an appropriate group is provided. **[2]**

(3) Within each main group of this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[2]**

(4) This subclass covers also compositions based on monomers which form macromolecular compounds classifiable in this subclass. **[7]** In this subclass: **[7]**

(a) if the monomers are defined, classification is made in groups C08G 2/00 to C08G 79/00, C08G 83/00 according to the polymer to be formed; **[7]**

(b) if the monomers are defined in a way that a composition cannot be classified within one main group of this subclass, the composition is classified in group C08G 85/00; **[7]**

(c) if the compounding ingredients are of interest per se, classification is also made in subclass C08K. **[7]**

Subclass index

2/00 Addition polymers of aldehydes or cyclic oligomers thereof or of ketones; **Addition copolymers thereof with less than 50 molar percent of other substances [2]**

2/02 . Polymerisation initiated by wave energy or by particle radiation **[2]**

2/04 . Polymerisation by using compounds which act upon the molecular weight, e.g. chain-transferring agents **[2]**

2/06 . Catalysts (catalysts in general B01J) **[2]**

2/08 . Polymerisation of formaldehyde **[2]**

2/10 . Polymerisation of cyclic oligomers of formaldehyde **[2]**

2/12 . Polymerisation of acetaldehyde or cyclic oligomers thereof **[2]**

2/14 . Polymerisation of single aldehydes not provided for in groups C08G 2/08 to C08G 2/12 **[2]**

2/16 . Polymerisation of single ketones **[2]**
2/18 . Copolymerisation of aldehydes or ketones **[2]**
2/20 . . with other aldehydes or ketones **[2]**
2/22 . . with epoxy compounds **[2]**
2/24 . . with acetals **[2]**
2/26 . . with compounds containing carbon-to-carbon unsaturation **[2]**
2/28 . Post-polymerisation treatments **[2]**
2/30 . Chemical modification by after-treatment **[2]**
2/32 . . by esterification **[2]**
2/34 . . by etherification **[2]**
2/36 . . by depolymerisation **[2]**
2/38 . Block or graft polymers prepared by polymerisation of aldehydes or ketones on to macromolecular compounds **[2]**

4/00 Condensation polymers of aldehydes or ketones with polyalcohols; **Addition polymers of heterocyclic oxygen compounds containing in the ring at least once the grouping −O−C−O−**(of cyclic oligomers of aldehydes C08G 2/00) **[2]**

6/00 Condensation polymers of aldehydes or ketones only [2]
6/02 . of aldehydes with ketones **[2]**

8/00 Condensation polymers of aldehydes or ketones with phenols only [2]
8/02 . of ketones **[2]**
8/04 . of aldehydes **[2]**
8/06 . . of furfural **[2]**
8/08 . . of formaldehyde, e.g. of formaldehyde formed in situ **[2]**
8/10 . . . with phenol **[2]**
8/12 . . . with monohydric phenols having only one hydrocarbon substituent ortho or para to the OH group, e.g. p-tert.-butyl phenol **[2]**
8/14 . . . with halogenated phenols **[2]**
8/16 . . . with amino- or nitrophenols **[2]**
8/18 . . . with phenols substituted by carboxylic or sulfonic acid groups **[2]**
8/20 . . . with polyhydric phenols **[2]**
8/22 . . . . Resorcinol **[2]**
8/24 . . . with mixtures of two or more phenols which are not covered by only one of the groups C08G 8/10 to C08G 8/20 **[2]**
8/26 . from mixtures of aldehydes and ketones **[2]**
8/28 . Chemically modified polycondensates **[2]**
8/30 . . by unsaturated compounds, e.g. terpenes **[2]**
8/32 . . by organic acids or derivatives thereof, e.g. fatty oils **[2]**
8/34 . . by natural resins or resin acids, e.g. rosin **[2]**
8/36 . . by etherifying **[2]**
8/38 . Block or graft polymers prepared by polycondensation of aldehydes or ketones on to macromolecular compounds **[2]**

10/00 Condensation polymers of aldehydes or ketones with aromatic hydrocarbons or halogenated aromatic hydrocarbons only [2]
10/02 . of aldehydes **[2]**
10/04 . . Chemically modified polycondensates **[2]**
10/06 . Block or graft polymers prepared by polycondensation of aldehydes or ketones on to macromolecular compounds **[2]**

12/00 Condensation polymers of aldehydes or ketones with only compounds containing hydrogen attached to nitrogen (amino phenols C08G 8/16) **[2]**
12/02 . of aldehydes **[2]**
12/04 . . with acyclic or carbocyclic compounds **[2]**
12/06 . . . Amines **[2]**
12/08 . . . . aromatic **[2]**
12/10 . . . with acyclic compounds having the moiety $X=C(-N\langle)_2$ in which X is O, S, or −N **[2]**
12/12 . . . . Ureas; Thioureas **[2]**
12/14 . . . . Dicyandiamides; Dicyandiamidines; Guanidines; Biguanides; Biuret; Semicarbazides **[2]**
12/16 . . . . . Dicyandiamides **[2]**
12/18 . . . with cyanamide **[2]**
12/20 . . . with urethanes or thiourethanes **[2]**
12/22 . . . with carboxylic acid amides (reaction polyamides with aldehydes C08G 69/50) **[2]**
12/24 . . . with sulfonic acid amides **[2]**
12/26 . . with heterocyclic compounds **[2]**
12/28 . . . with substituted diazines, diazoles or triazoles **[2]**
12/30 . . . with substituted triazines **[2]**
12/32 . . . . Melamines **[2]**
12/34 . . . and acyclic or carbocyclic compounds **[2]**
12/36 . . . . Ureas; Thioureas **[2]**
12/38 . . . . . and melamines **[2]**
12/40 . . Chemically modified polycondensates **[2]**
12/42 . . . by etherifying **[2]**
12/44 . . . by esterifying **[2]**
12/46 . Block or graft polymers prepared by polycondensation of aldehydes or ketones on to macromolecular compounds **[2]**

14/00 Condensation polymers of aldehydes or ketones with two or more other monomers covered by at least two of the groups C08G 8/00 to C08G 12/00 [2]
14/02 . of aldehydes **[2]**
14/04 . . with phenols **[2]**
14/06 . . . and monomers containing hydrogen attached to nitrogen **[2]**
14/067 . . . . Acyclic or carbocyclic monomers **[5]**
14/073 . . . . . Amines **[5]**
14/08 . . . . . Ureas; Thioureas **[2,5]**
14/09 . . . . Heterocyclic monomers **[5]**
14/10 . . . . . Melamines **[2,5]**
14/12 . . . Chemically modified polycondensates **[2]**
14/14 . Block or graft polymers prepared by polycondensation of aldehydes or ketones on to macromolecular compounds **[2]**

16/00 Condensation polymers of aldehydes or ketones with monomers not provided for in the groups C08G 4/00 to C08G 14/00 (with polynitriles C08G 69/38) **[2]**
16/02 . of aldehydes **[2]**
16/04 . . Chemically modified polycondensates **[2]**
16/06 . Block or graft polymers prepared by polycondensation of aldehydes or ketones on to macromolecular compounds **[2]**

18/00 **Polymeric products of isocyanates or isothiocyanates** (preparatory processes of porous or cellular materials, in which the monomers or catalysts are not specific C08J) **[2]**

Note

In this group, it is desirable to add the indexing code of group C08G 101/00. **[5]**

18/02 . of isocyanates or isothiocyanates only **[2]**
18/04 . with vinyl compounds **[2]**
18/06 . with compounds having active hydrogen **[2]**
18/08 . . Processes **[2]**
18/09 . . . comprising oligomerisation of isocyanates or isothiocyanates involving reaction of a part of the isocyanate or isothiocyanate groups with each other in the reaction mixture (use of preformed oligomers C08G 18/79) **[7]**
18/10 . . . Prepolymer processes involving reaction of isocyanates or isothiocyanates with compounds having active hydrogen in a first reaction step (masked polyisocyanates C08G 18/80) **[2]**
18/12 . . . . using two or more compounds having active hydrogen in the first polymerisation step **[2]**
18/16 . . . Catalysts (catalysts in general B01J) **[2]**
18/18 . . . . containing secondary or tertiary amines or salts thereof **[2]**
18/20 . . . . . Heterocyclic amines; Salts thereof **[2]**
18/22 . . . . containing metal compounds **[2]**
18/24 . . . . . of tin **[2]**
18/26 . . . . . of lead **[2]**
18/28 . . characterised by the compounds used containing active hydrogen **[2]**

Note

For the purpose of this group, the addition of water for the preparation of cellular materials is not taken into consideration. **[2]**

18/30 . . . Low-molecular-weight compounds **[2]**
18/32 . . . . Polyhydroxy compounds; Polyamines; Hydroxy amines **[2]**
18/34 . . . . Carboxylic acids; Esters thereof with monohydroxyl compounds **[2]**
18/36 . . . . Hydroxylated esters of higher fatty acids **[2]**
18/38 . . . . having hetero atoms other than oxygen (C08G 18/32 takes precedence) **[2]**
18/40 . . . High-molecular-weight compounds **[2]**
18/42 . . . . Polycondensates having carboxylic or carbonic ester groups in the main chain **[2]**
18/44 . . . . . Polycarbonates **[2]**
18/46 . . . . . having hetero atoms other than oxygen **[2]**
18/48 . . . . Polyethers **[2]**
18/50 . . . . . having hetero atoms other than oxygen **[2]**
18/52 . . . . Polythioethers **[2]**
18/54 . . . . Polycondensates of aldehydes **[2]**
18/56 . . . . Polyacetals **[2]**
18/58 . . . . Epoxy resins **[2]**
18/60 . . . . Polyamides or polyester-amides **[2]**
18/61 . . . . Polysiloxanes **[2]**
18/62 . . . . Polymers of compounds having carbon-to-carbon double bonds **[2]**
18/63 . . . . Block or graft polymers obtained by polymerising compounds having carbon-to-carbon double bonds on to polymers **[2]**
18/64 . . . . Macromolecular compounds not provided for by groups C08G 18/42 to C08G 18/63 **[2]**
18/65 . . . Low-molecular-weight compounds having active hydrogen with high-molecular-weight compounds having active hydrogen **[2]**
18/66 . . . . Compounds of groups C08G 18/42, C08G 18/48, or C08G 18/52 **[2]**
18/67 . . . Unsaturated compounds having active hydrogen **[2]**
18/68 . . . . Unsaturated polyesters **[2]**
18/69 . . . . Polymers of conjugated dienes **[2]**
18/70 . . characterised by the isocyanates or isothiocyanates used **[2]**
18/71 . . . Monoisocyanates or monoisothiocyanates **[2]**
18/72 . . . Polyisocyanates or polyisothiocyanates **[2]**
18/73 . . . . acyclic **[2]**
18/74 . . . . cyclic **[2]**
18/75 . . . . . cycloaliphatic **[2]**
18/76 . . . . . aromatic **[2]**
18/77 . . . . having hetero atoms in addition to the isocyanate or isothiocyanate nitrogen and oxygen or sulfur **[2]**
18/78 . . . . . Nitrogen **[2]**
18/79 . . . . . characterised by the polyisocyanates used, these having groups formed by oligomerisation of isocyanates or isothiocyanates **[2]**
18/80 . . . . Masked polyisocyanates **[2]**
18/81 . . . Unsaturated isocyanates or isothiocyanates **[2]**
18/82 . . Post-polymerisation treatment **[2]**
18/83 . . Chemically modified polymers **[2]**
18/84 . . . by aldehydes **[2]**
18/85 . . . by azo compounds **[2]**
18/86 . . . by peroxides **[2]**
18/87 . . . by sulfur **[2]**

59/00 **Polycondensates containing more than one epoxy group per molecule** (low-molecular-weight polyepoxy compounds C07); **Macromolecules obtained by reaction of epoxy polycondensates with monofunctional low-molecular-weight compounds**; **Macromolecules obtained by polymerising compounds containing more than one epoxy group per molecule using curing agents or catalysts which react with the epoxy groups** **[2]**

59/02 . Polycondensates containing more than one epoxy group per molecule **[2]**
59/04 . . of polyhydroxy compounds with epihalohydrins or precursors thereof **[2]**
59/06 . . . of polyhydric phenols **[2]**
59/08 . . . . from phenol-aldehyde condensates **[2]**
59/10 . . of polyamines with epihalohydrins or precursors thereof **[2]**
59/12 . . of polycarboxylic acids with epihalohydrins or precursors thereof **[2]**
59/14 . Polycondensates modified by chemical after-treatment **[2]**
59/16 . . by monocarboxylic acids or by anhydrides, halides or low-molecular-weight esters thereof **[2]**
59/17 . . . by acrylic or methacrylic acid **[4]**

59/18 . Macromolecules obtained by polymerising compounds containing more than one epoxy group per molecule using curing agents or catalysts which react with the epoxy groups **[2]**

59/20 . . characterised by the epoxy compounds used **[2]**

Note

Preparation and curing of epoxy polycondensates, in which the epoxy polycondensate is not exclusively a low-molecular-weight compound and in which the method of curing is not important, are classified only in group C08G 59/02. **[2]**

59/22 . . . Di-epoxy compounds **[2]**
59/24 . . . . carbocyclic **[2]**
59/26 . . . . heterocyclic **[2]**
59/28 . . . . containing acyclic nitrogen atoms **[2]**
59/30 . . . . containing atoms other than carbon, hydrogen, oxygen, and nitrogen **[2]**
59/32 . . . Epoxy compounds containing three or more epoxy groups **[2]**
59/34 . . . . obtained by epoxidation of an unsaturated polymer **[2]**
59/36 . . . . together with mono-epoxy compounds **[2]**
59/38 . . . . together with di-epoxy compounds **[2]**
59/40 . . characterised by the curing agents used **[2]**
59/42 . . . Polycarboxylic acids; Anhydrides, halides, or low-molecular-weight esters thereof **[2]**
59/44 . . . Amides **[2]**
59/46 . . . . together with other curing agents **[2]**
59/48 . . . . . with polycarboxylic acids or with anhydrides, halides, or low-molecular-weight esters thereof **[2]**
59/50 . . . Amines **[2]**
59/52 . . . . Amino carboxylic acids **[2]**
59/54 . . . . Amino amides **[2]**
59/56 . . . . together with other curing agents **[2]**
59/58 . . . . . with polycarboxylic acids or with anhydrides, halides, or low-molecular-weight esters thereof **[2]**
59/60 . . . . . with amides **[2]**
59/62 . . . Alcohols or phenols **[2]**
59/64 . . . . Amino alcohols **[2]**
59/66 . . . Mercaptans **[2]**
59/68 . . characterised by the catalysts used **[2]**
59/70 . . . Chelates **[2]**
59/72 . . . Complexes of boron halides **[2]**

Note

In groups C08G 61/00 to C08G 79/00, in the absence of an indication to the contrary, macromolecular compounds obtained by reactions forming two different linkages in the main chain are classified only according to the linkage present in excess. **[2]**

61/00 Macromolecular compounds obtained by reactions forming a carbon-to-carbon link in the main chain of the macromolecule (C08G 2/00 to C08G 16/00 take precedence) **[2]**

61/02 . Macromolecular compounds containing only carbon atoms in the main chain of the macromolecule, e.g. polyxylylenes **[2]**
61/04 . . only aliphatic carbon atoms **[2]**
61/06 . . . prepared by ring-opening of carbocyclic compounds **[2]**
61/08 . . . . of carbocyclic compounds containing one or more carbon-to-carbon double bonds in the ring **[2]**
61/10 . . only aromatic carbon atoms, e.g. polyphenylenes **[2]**
61/12 . Macromolecular compounds containing atoms other than carbon in the main chain of the macromolecule **[2]**

63/00 Macromolecular compounds obtained by reactions forming a carboxylic ester link in the main chain of the macromolecule (polyester-amides C08G 69/44; polyester-imides C08G 73/16) **[2,5]**

Note

Compounds characterised by the chemical constitution of the polyesters are classified in the groups for the type of polyester compound. Compounds characterised by the preparation process of the polyesters are classified in the groups for the process employed (groups C08G 63/78 to C08G 63/87). Compounds characterised both by the chemical constitution and by the preparation process are classified according to each of these aspects. **[5]**

63/02 . Polyesters derived from hydroxy carboxylic acids or from polycarboxylic acids and polyhydroxy compounds **[2]**
63/06 . . derived from hydroxy carboxylic acids **[2]**
63/08 . . . Lactones or lactides **[2]**
63/12 . . derived from polycarboxylic acids and polyhydroxy compounds **[2]**
63/123 . . . the acids or hydroxy compounds containing carbocyclic rings **[5]**
63/127 . . . . Acids containing aromatic rings **[5]**
63/13 . . . . . containing two or more aromatic rings **[5]**
63/133 . . . . Hydroxy compounds containing aromatic rings **[5]**
63/137 . . . . Acids or hydroxy compounds containing cycloaliphatic rings **[5]**
63/16 . . . Dicarboxylic acids and dihydroxy compounds **[2]**
63/18 . . . . the acids or hydroxy compounds containing carbocyclic rings **[2]**
63/181 . . . . . Acids containing aromatic rings **[5]**
63/183 . . . . . Terephthalic acids **[5]**
63/185 . . . . . containing two or more aromatic rings **[5]**
63/187 . . . . . containing condensed aromatic rings **[5]**
63/189 . . . . . containing a naphthalene ring **[5]**
63/19 . . . . . Hydroxy compounds containing aromatic rings **[5]**
63/191 . . . . . Hydroquinones **[5]**
63/193 . . . . . containing two or more aromatic rings **[5]**
63/195 . . . . . Bisphenol A **[5]**
63/197 . . . . . containing condensed aromatic rings **[5]**
63/199 . . . . . Acids or hydroxy compounds containing cycloaliphatic rings **[5]**
63/20 . . . . Polyesters having been prepared in the presence of compounds having one reactive group or more than two reactive groups **[2]**

63/21 . . . . . in the presence of unsaturated monocarboxylic acids or unsaturated monohydric alcohols or reactive derivatives thereof **[5]**

63/40 . . . Polyesters derived from ester-forming derivatives of polycarboxylic acids or of polyhydroxy compounds, other than from esters thereof **[2]**

63/42 . . . . Cyclic ethers (C08G 59/00 takes precedence); Cyclic carbonates; Cyclic sulfites; Cyclic orthoesters **[2,7]**

63/44 . . . . Polyamides; Polynitriles **[2]**

63/46 . . . Polyesters chemically modified by esterification (C08G 63/20 takes precedence; by after-treatment C08G 63/91) **[2]**

63/47 . . . . by unsaturated monocarboxylic acids or unsaturated monohydric alcohols or reactive derivatives thereof **[5]**

63/48 . . . . by unsaturated higher fatty oils or their acids; by resin acids **[2]**

63/49 . . . . . Alkyd resins **[5]**

63/50 . . . . by monohydric alcohols **[2]**

63/52 . . . Polycarboxylic acids or polyhydroxy compounds in which at least one of the two components contains aliphatic unsaturation **[2]**

63/54 . . . . the acids or hydroxy compounds containing carbocyclic rings **[2]**

63/547 . . . . . Hydroxy compounds containing aromatic rings **[5]**

63/553 . . . . . Acids or hydroxy compounds containing cycloaliphatic rings, e.g. Diels-Alder adducts **[5]**

63/56 . . . . Polyesters derived from ester-forming derivatives of polycarboxylic acids or of polyhydroxy compounds, other than from esters thereof **[2]**

63/58 . . . . . Cyclic ethers (C08G 59/00 takes precedence); Cyclic carbonates; Cyclic sulfites **[2]**

63/60 . . derived from the reaction of a mixture of hydroxy carboxylic acids, polycarboxylic acids and polyhydroxy compounds **[2]**

63/64 . Polyesters containing both carboxylic ester groups and carbonate groups **[2]**

63/66 . Polyesters containing oxygen in the form of ether groups (C08G 63/42, C08G 63/58 take precedence) **[2]**

63/664 . . derived from hydroxycarboxylic acids **[5]**

63/668 . . derived from polycarboxylic acids and polyhydroxy compounds **[5]**

63/672 . . . Dicarboxylic acids and dihydroxy compounds **[5]**

63/676 . . . in which at least one of the two components contains aliphatic unsaturation **[5]**

63/68 . Polyesters containing atoms other than carbon, hydrogen, and oxygen (C08G 63/64 takes precedence) **[4]**

63/682 . . containing halogens **[5]**

63/685 . . containing nitrogen **[5]**

63/688 . . containing sulfur **[5]**

63/692 . . containing phosphorus **[5]**

63/695 . . containing silicon **[5]**

63/698 . . containing boron **[5]**

63/78 . Preparation processes **[5]**

63/79 . . Interfacial processes, i.e. processes involving a reaction at the interface of two non-miscible liquids **[5]**

63/80 . . Solid-state polycondensation **[5]**

63/81 . . using solvents (C08G 63/79 takes precedence) **[5]**

63/82 . . characterised by the catalyst used **[5]**

63/83 . . . Alkali metals, alkaline earth metals, beryllium, magnesium, copper, silver, gold, zinc, cadmium, mercury, manganese, or compounds thereof **[5]**

63/84 . . . Boron, aluminium, gallium, indium, thallium, rare-earth metals, or compounds thereof **[5]**

63/85 . . . Germanium, tin, lead, arsenic, antimony, bismuth, titanium, zirconium, hafnium, vanadium, niobium, tantalum, or compounds thereof **[5]**

63/86 . . . . Germanium, antimony, or compounds thereof **[5]**

63/87 . . . Non-metals or inter-compounds thereof (boron C08G 63/84) **[5]**

63/88 . Post-polymerisation treatment **[5]**

63/89 . . Recovery of the polymer **[5]**

63/90 . . Purification; Drying **[5]**

63/91 . Polymers modified by chemical after-treatment **[5]**

64/00 Macromolecular compounds obtained by reactions forming a carbonic ester link in the main chain of the macromolecule (polycarbonate-amides C08G 69/44; polycarbonate-imides C08G 73/16) **[5]**

Note

Polymers containing both carboxylic ester groups and carbonate groups are always classified in group C08G 63/64, even when the carbonate groups are present in excess. **[5]**

64/02 . Aliphatic polycarbonates **[5]**

64/04 . Aromatic polycarbonates **[5]**

64/06 . . not containing aliphatic unsaturation **[5]**

64/08 . . . containing atoms other than carbon, hydrogen or oxygen **[5]**

64/10 . . . . containing halogens **[5]**

64/12 . . . . containing nitrogen **[5]**

64/14 . . . containing a chain-terminating or -crosslinking agent **[5]**

64/16 . Aliphatic-aromatic or araliphatic polycarbonates **[5]**

64/18 . Block or graft polymers **[5]**

64/20 . General preparatory processes **[5]**

64/22 . . using carbonyl halides **[5]**

64/24 . . . and phenols **[5]**

64/26 . . using halocarbonates **[5]**

64/28 . . . and phenols **[5]**

64/30 . . using carbonates **[5]**

64/32 . . using carbon dioxide **[5]**

64/34 . . . and cyclic ethers **[5]**

64/36 . . using carbon monoxide **[5]**

64/38 . . using other monomers **[5]**

64/40 . Post-polymerisation treatment **[5]**

64/42 . Chemical after-treatment **[5]**

65/00 Macromolecular compounds obtained by reactions forming an ether link in the main chain of the macromolecule (polyacetals C08G 2/00, C08G 4/00; epoxy resins C08G 59/00; polythioether-ethers C08G 75/12; polyethers containing less than eleven monomer units C07C) **[2]**

65/02 . from cyclic ethers by opening of the heterocyclic ring **[2]**

65/04 . . from cyclic ethers only **[2]**

65/06 . . . Cyclic ethers having no atoms other than carbon and hydrogen outside the ring **[2]**
65/08 . . . . Saturated oxiranes **[2]**
65/10 . . . . . characterised by the catalysts used **[2]**
65/12 . . . . . containing organo-metallic compounds or metal hydrides **[2]**
65/14 . . . . Unsaturated oxiranes **[2]**
65/16 . . . . Cyclic ethers having four or more ring atoms **[2]**
65/18 . . . . . Oxetanes **[2]**
65/20 . . . . . Tetrahydrofuran **[2]**
65/22 . . . Cyclic ethers having at least one atom other than carbon and hydrogen outside the ring **[2]**
65/24 . . . . Epihalohydrins **[2]**
65/26 . . from cyclic ethers and other compounds **[2]**
65/28 . . . Cyclic ethers and hydroxy compounds **[2]**
65/30 . . Post-polymerisation treatment, e.g. recovery, purification, drying **[2]**
65/32 . . Polymers modified by chemical after-treatment **[2]**
65/321 . . . with inorganic compounds **[7]**
65/322 . . . . containing hydrogen **[7]**
65/323 . . . . containing halogens **[7]**
65/324 . . . . containing oxygen **[7]**
65/325 . . . . containing nitrogen **[7]**
65/326 . . . . containing sulfur **[7]**
65/327 . . . . containing phosphorus **[7]**
65/328 . . . . containing other elements **[7]**
65/329 . . . with organic compounds **[7]**
65/331 . . . . containing oxygen **[7]**
65/332 . . . . . containing carboxyl groups, or halides or esters thereof **[7]**
65/333 . . . . containing nitrogen **[7]**
65/334 . . . . containing sulfur **[7]**
65/335 . . . . containing phosphorus **[7]**
65/336 . . . . containing silicon **[7]**
65/337 . . . . containing other elements (organic compounds containing halogens only as halides of a carboxyl group C08G 65/332) **[7]**
65/338 . . . with inorganic and organic compounds **[7]**
65/34 . from hydroxy compounds or their metallic derivatives (C08G 65/28 takes precedence) **[2]**
65/36 . . Furfuryl alcohol **[2]**
65/38 . . derived from phenols **[2]**
65/40 . . . from phenols and other compounds **[2]**
65/42 . . . . Phenols and polyhydroxy ethers **[2]**
65/44 . . . by oxidation of phenols **[2]**
65/46 . . Post-polymerisation treatment, e.g. recovery, purification, drying **[2]**
65/48 . . Polymers modified by chemical after-treatment **[2]**

67/00 Macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing oxygen or oxygen and carbon, not provided for in groups C08G 2/00 to C08G 65/00 [2]

67/02 . Copolymers of carbon monoxide and aliphatic unsaturated compounds **[2]**
67/04 . Polyanhydrides **[2]**

69/00 Macromolecular compounds obtained by reactions forming a carboxylic amide link in the main chain of the macromolecule (products obtained from isocyanates or isothiocyanates C08G 18/00; polyhydrazides C08G 73/08; polyamide acids C08G 73/10; polyamide-imides C08G 73/14) **[2]**

69/02 . Polyamides derived from amino carboxylic acids or from polyamines and polycarboxylic acids **[2]**
69/04 . . Preparatory processes **[2]**
69/06 . . . Solid state polycondensation **[2]**
69/08 . . derived from amino carboxylic acids **[2]**
69/10 . . . Alpha-amino-carboxylic acids **[2]**
69/12 . . . with both amino and carboxylic groups aromatically bound **[2]**
69/14 . . . Lactams **[2]**
69/16 . . . . Preparatory processes **[2]**
69/18 . . . . . Anionic polymerisation **[2]**
69/20 . . . . . characterised by the catalysts used **[2]**
69/22 . . . . Beta-lactams **[2]**
69/24 . . . . Pyrrolidones or piperidones **[2]**
69/26 . . derived from polyamines and polycarboxylic acids **[2]**
69/28 . . . Preparatory processes **[2]**
69/30 . . . . Solid state polycondensation **[2]**
69/32 . . . from aromatic diamines and aromatic dicarboxylic acids with both amino and carboxylic groups aromatically bound **[2]**
69/34 . . . using polymerised unsaturated fatty acids **[2]**
69/36 . . derived from amino acids, polyamines, and polycarboxylic acids **[2]**
69/38 . Polyamides prepared from aldehydes and polynitriles **[2]**
69/40 . Polyamides containing oxygen in the form of ether groups (C08G 69/12, C08G 69/32 take precedence) **[2]**
69/42 . Polyamides containing atoms other than carbon, hydrogen, oxygen, and nitrogen (C08G 69/12, C08G 69/32 take precedence) **[2]**
69/44 . Polyester-amides **[2]**
69/46 . Post-polymerisation treatment **[2]**
69/48 . Polymers modified by chemical after-treatment **[2]**
69/50 . . with aldehydes **[2]**

71/00 Macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a ureide or urethane link, otherwise than from isocyanate radicals [2]

71/02 . Polyureas **[2]**
71/04 . Polyurethanes **[2]**

73/00 Macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen, with or without oxygen or carbon, not provided for in groups C08G 12/00 to C08G 71/00 [2]

73/02 . Polyamines (containing less than eleven monomer units C07C) **[2]**
73/04 . . derived from alkyleneimines **[2]**
73/06 . Polycondensates having nitrogen-containing heterocyclic rings in the main chain of the macromolecule; Polyhydrazides; Polyamide acids or similar polyimide precursors **[2]**
73/08 . . Polyhydrazides; Polytriazoles; Polyaminotriazoles; Polyoxadiazoles **[2]**
73/10 . . Polyimides; Polyester-imides; Polyamide-imides; Polyamide acids or similar polyimide precursors **[2]**

73/12 . . . Unsaturated polyimide precursors **[2]**
73/14 . . . Polyamide-imides **[2]**
73/16 . . . Polyester-imides **[2]**
73/18 . . Polybenzimidazoles **[2]**
73/20 . . Pyrrones **[2]**
73/22 . . Polybenzoxazoles **[2]**
73/24 . Copolymers of a fluoronitroso organic compound and another fluoro organic compound, e.g. nitroso rubbers **[2]**
73/26 . . of trifluoronitrosomethane with a fluoro-olefin **[2]**

75/00 Macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing sulfur, with or without nitrogen, oxygen, or carbon [2]

75/02 . Polythioethers **[2]**
75/04 . . from mercapto compounds or metallic derivatives thereof **[2]**
75/06 . . from cyclic thioethers **[2]**
75/08 . . . from thiiranes **[2]**
75/10 . . from sulfur or sulfur-containing compounds and aldehydes or ketones **[2]**
75/12 . Polythioether-ethers **[2]**
75/14 . Polysulfides **[2]**
75/16 . . by polycondensation of organic compounds with inorganic polysulfides **[2]**
75/18 . Polysulfoxides **[2]**
75/20 . Polysulfones **[2]**
75/22 . . Copolymers of sulfur dioxide with unsaturated aliphatic compounds **[2]**
75/23 . . Polyethersulfones **[2]**
75/24 . Polysulfonates **[2]**
75/26 . Polythioesters **[2]**
75/28 . Polythiocarbonates **[2]**
75/30 . Polysulfonamides; Polysulfonimides **[2]**
75/32 . Polythiazoles; Polythiadiazoles **[2]**

77/00 Macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon, with or without sulfur, nitrogen, oxygen, or carbon [2]

77/02 . Polysilicates **[2]**
77/04 . Polysiloxanes **[2]**
77/06 . . Preparatory processes **[2]**
77/08 . . . characterised by the catalysts used **[2]**
77/10 . . . Equilibration processes **[2]**
77/12 . . containing silicon bound to hydrogen **[2]**
77/14 . . containing silicon bound to oxygen-containing groups **[2]**
77/16 . . . to hydroxy groups **[2]**
77/18 . . . to alkoxy or aryloxy groups **[2]**
77/20 . . containing silicon bound to unsaturated aliphatic groups **[2]**
77/22 . . containing silicon bound to organic groups containing atoms other than carbon, hydrogen, and oxygen **[2]**
77/24 . . . halogen-containing groups **[2]**
77/26 . . . nitrogen-containing groups **[2]**
77/28 . . . sulfur-containing groups **[2]**
77/30 . . . phosphorus-containing groups **[2]**
77/32 . . Post-polymerisation treatment (chemical after-treatment C08G 77/38) **[2]**
77/34 . . . Purification **[2]**
77/36 . . . Fractionation **[2]**
77/38 . . Polysiloxanes modified by chemical after-treatment **[2]**
77/382 . . . containing atoms other than carbon, hydrogen, oxygen or silicon **[5]**
77/385 . . . . containing halogens **[5]**
77/388 . . . . containing nitrogen **[5]**
77/392 . . . . containing sulfur **[5]**
77/395 . . . . containing phosphorus **[5]**
77/398 . . . . containing boron or metal atoms **[5]**
77/42 . Block- or graft-polymers containing polysiloxane sequences (polymerising aliphatic unsaturated monomers on to a polysiloxane C08F 283/12) **[2]**
77/44 . . containing only polysiloxane sequences **[2]**
77/442 . . containing vinyl polymer sequences **[5]**
77/445 . . containing polyester sequences **[5]**
77/448 . . containing polycarbonate sequences **[5]**
77/452 . . containing nitrogen-containing sequences **[5]**
77/455 . . . containing polyamide, polyesteramide or polyimide sequences **[5]**
77/458 . . . containing polyurethane sequences **[5]**
77/46 . . containing polyether sequences **[2]**
77/48 . in which at least two but not all the silicon atoms are connected by linkages other than oxygen atoms (C08G 77/42 takes precedence) **[2]**
77/50 . . by carbon linkages **[2]**
77/52 . . . containing aromatic rings **[2]**
77/54 . . Nitrogen-containing linkages **[2]**
77/56 . . Boron-containing linkages **[2]**
77/58 . . Metal-containing linkages **[2]**
77/60 . in which all the silicon atoms are connected by linkages other than oxygen atoms **[2]**
77/62 . . Nitrogen atoms **[2]**

79/00 Macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing atoms other than silicon, sulfur, nitrogen, oxygen, and carbon [2]

79/02 . a linkage containing phosphorus **[2]**
79/04 . . Phosphorus linked to oxygen or to oxygen and carbon **[2]**
79/06 . . Phosphorus linked to carbon only **[2]**
79/08 . a linkage containing boron **[2]**
79/10 . a linkage containing aluminium **[2]**
79/12 . a linkage containing tin **[2]**
79/14 . a linkage containing two or more elements other than carbon, oxygen, nitrogen, sulfur, and silicon **[2]**

81/00 Macromolecular compounds obtained by interreacting polymers in the absence of monomers, e.g. block polymers (involving only carbon-to-carbon unsaturated bond reactions C08F 299/00) **[2]**

81/02 . at least one of the polymers being obtained by reactions involving only carbon-to-carbon unsaturated bonds **[2]**

83/00 Macromolecular compounds not provided for in groups C08G 2/00 to C08G 81/00 [2]

85/00 General processes for preparing compounds provided for in this subclass [2]

Indexing scheme associated with group C08G 18/00, relating to cellular products. [5]

101/00 Manufacture of cellular products [5]

C08H DERIVATIVES OF NATURAL MACROMOLECULAR COMPOUNDS (polysaccharides C08B; natural rubber C08C; natural resins or their derivatives C09F; bituminous materials C10)

Note

Therapeutic activity of compounds is further classified in subclass A61P. **[7]**

1/00 Macromolecular products derived from proteins (food proteins A23; glue, gelatine C09H)

1/02 . Protein-aldehyde condensates

1/04 . . Casein-aldehyde condensates

1/06 . derived from horn, hoofs, hair, skin, or leather

3/00 Vulcanised oils, e.g. factice

6/00 Macromolecular compounds derived from lignin [2010.01]

7/00 Lignin; Modified lignin; High-molecular-weight products derived therefrom *(low-molecular-weight derivatives of lignin C07G 1/00)* **[2011.01]**

8/00 Macromolecular compounds derived from lignocellulosic materials [2010.01]

99/00 Subject matter not provided for in other groups of this subclass [2010.01]

C08J WORKING-UP; GENERAL PROCESSES OF COMPOUNDING; AFTER-TREATMENT NOT COVERED BY SUBCLASSES C08B, C08C, C08F, C08G OR C08H (working, e.g. shaping, of plastics B29) **[2]**

(1) This subclass covers processes, not covered by subclasses C08B to C08H, for treating polymers. **[4]**
(2) In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[2]**
(3) When classifying in this subclass, additional classification may be made in class C08L relating to the materials used. **[8]**

3/00 Processes of treating or compounding macromolecular substances [2]

3/02 . Making solutions, dispersions, lattices or gels by other methods than by solution, emulsion or suspension polymerisation techniques **[2]**

3/03 . . in aqueous media **[5]**

3/05 . . . from solid polymers **[5]**

3/07 . . . from polymer solutions **[5]**

3/075 . . . Macromolecular gels **[6]**

3/09 . . in organic liquids **[5]**

3/11 . . . from solid polymers **[5]**

3/12 . Powdering or granulating **[2]**

3/14 . . by precipitation from solutions **[2]**

3/16 . . by coagulating dispersions **[2]**

3/18 . Plasticising macromolecular compounds (plasticisers C08K) **[2]**

3/20 . Compounding polymers with additives, e.g. colouring **[2]**

3/205 . . in the presence of a liquid phase **[5]**

3/21 . . . the polymer being premixed with a liquid phase **[5]**

3/215 . . . . at least one additive being also premixed with a liquid phase **[5]**

3/22 . . using masterbatch techniques **[2]**

3/24 . Crosslinking, e.g. vulcanising, of macromolecules (mechanical aspects B29C 35/00; crosslinking agents C08K) **[2]**

3/26 . . of latex **[2]**

3/28 . Treatment by wave energy or particle radiation **[2]**

5/00 Manufacture of articles or shaped materials containing macromolecular substances (manufacture of semi-permeable membranes B01D 67/00 to B01D 71/00) **[2]**

5/02 . Direct processing of dispersions, e.g. latex, to articles **[2]**

5/04 . Reinforcing macromolecular compounds with loose or coherent fibrous material **[2]**

5/06 . . using pretreated fibrous materials **[2]**

5/08 . . . glass fibres **[2]**

5/10 . . characterised by the additives used in the polymer mixture **[2]**

5/12 . Bonding of a preformed macromolecular material to the same or other solid material such as metal, glass, leather, e.g. using adhesives **[2]**

5/14 . Manufacture of abrasive or friction articles or materials **[2]**

5/16 . Manufacture of articles or materials having reduced friction **[2]**

5/18 . Manufacture of films or sheets **[2]**

5/20 . Manufacture of shaped structures of ion-exchange resins **[2]**

5/22 . . Films, membranes or diaphragms **[2]**

5/24 . Impregnating materials with prepolymers which can be polymerised in situ, e.g. manufacture of prepregs **[2]**

7/00 Chemical treatment or coating of shaped articles made of macromolecular substances (coating with metallic material C23C; electrolytic deposition of metals C25) **[2]**

7/02 . with solvents, e.g. swelling agents **[2]**

7/04 . Coating **[2]**

7/06 . . with compositions not containing macromolecular substances **[2]**

7/12 . Chemical modification **[2]**
7/14 . . with acids, their salts or anhydrides **[2]**
7/16 . . with polymerisable compounds **[2]**
7/18 . . . using wave energy or particle radiation **[2]**

9/00 Working-up of macromolecular substances to porous or cellular articles or materials; **After-treatment thereof** (mechanical aspects of shaping of plastics or substances in a plastic state for the production of porous or cellular articles B29C) **[2]**
9/02 . using blowing gases generated by the reacting monomers or modifying agents during the preparation or modification of macromolecules **[2]**
9/04 . using blowing gases generated by a previously added blowing agent **[2]**
9/06 . . by a chemical blowing agent **[2]**
9/08 . . . developing carbon dioxide **[2]**
9/10 . . . developing nitrogen **[2]**
9/12 . . by a physical blowing agent **[2]**
9/14 . . . organic **[2]**

Note

In groups C08J 9/16 to C08J 9/22, the following term is used with the meaning indicated:
– "expandable" includes also expanding, pre-expanded or expanded. **[5]**

9/16 . Making expandable particles **[2,5]**
9/18 . . by impregnating polymer particles with the blowing agent **[2]**
9/20 . . by suspension polymerisation in the presence of the blowing agent **[2]**
9/22 . After-treatment of expandable particles; Forming foamed products **[2,5]**
9/224 . . Surface treatment **[5]**
9/228 . . Forming foamed products **[5]**
9/232 . . . by sintering expandable particles **[5]**
9/236 . . . using binding agents **[5]**
9/24 . by surface fusion and bonding of particles to form voids, e.g. sintering (of expandable particles C08J 9/232) **[2,5]**
9/26 . by elimination of a solid phase from a macromolecular composition or article, e.g. leaching out **[2]**
9/28 . by elimination of a liquid phase from a macromolecular composition or article, e.g. drying of coagulum **[2]**
9/30 . by mixing gases into liquid compositions or plastisols, e.g. frothing with air **[2]**
9/32 . from compositions containing micro-balloons, e.g. syntactic foams **[2]**
9/33 . Agglomerating foam fragments, e.g. waste foam **[5]**
9/34 . Chemical features in the manufacture of articles consisting of a foamed macromolecular core and a macromolecular surface layer having a higher density than the core **[2]**
9/35 . Composite foams, i.e. continuous macromolecular foams containing discontinuous cellular particles or fragments **[5]**
9/36 . After-treatment (C08J 9/22 takes precedence) **[2,5]**
9/38 . . Destruction of cell membranes **[2]**
9/40 . . Impregnation **[2]**
9/42 . . . with macromolecular compounds **[2]**

11/00 Recovery or working-up of waste materials (recovery of plastics B29B 17/00; polymerisation processes involving purification or recycling of waste polymers or their depolymerisation products C08B, C08C, C08F, C08G, C08H) **[4]**
11/02 . of solvents, plasticisers or unreacted monomers **[4]**
11/04 . of polymers **[2]**
11/06 . . without chemical reactions **[4]**
11/08 . . . using selective solvents for polymer components **[4]**
11/10 . . by chemically breaking down the molecular chains of polymers or breaking of crosslinks, e.g. devulcanisation (depolymerisation to the original monomer C07) **[4]**
11/12 . . . by dry-heat treatment only **[4]**
11/14 . . . by treatment with steam or water **[4]**
11/16 . . . by treatment with inorganic material (C08J 11/14 takes precedence) **[4]**
11/18 . . . by treatment with organic material **[4]**
11/20 . . . . by treatment with hydrocarbons or halogenated hydrocarbons **[4]**
11/22 . . . . by treatment with organic oxygen-containing compounds **[4]**
11/24 . . . . . containing hydroxyl groups **[4]**
11/26 . . . . . containing carboxylic acid groups, their anhydrides or esters **[4]**
11/28 . . . . by treatment with organic compounds containing nitrogen, sulfur or phosphorus **[4]**

99/00 Subject matter not provided for in other groups of this subclass [8]

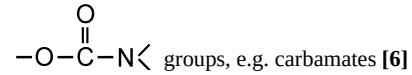
C08K USE OF INORGANIC OR NON-MACROMOLECULAR ORGANIC SUBSTANCES AS COMPOUNDING INGREDIENTS (paints, inks, varnishes, dyes, polishes, adhesives C09) **[2]**

(1) In this subclass, in the absence of an indication to the contrary, an ingredient is classified in the last appropriate place. **[2]**
(2) In this subclass:
– a mixture of ingredients is classified in the most indented group covering all the essential ingredients of the mixture, e.g.:
a mixture of a monohydroxylic and a polyhydroxylic alcohol C08K 5/05; **[4]**
a mixture of two polyhydroxylic alcohols C08K 5/053; **[6]**
a mixture of an alcohol and an ether C08K 5/04; **[4]**
a mixture of an ether and an amine C08K 5/00; **[4]**
a mixture of an amine and a metal C08K 13/02; **[4]**
– ammonium salts are classified in the same way as metal salts. **[2]**
(3) In this subclass, any ingredient of a mixture which is not identified by the classification according to Note (2) above, and the use of which is determined to be novel and non-obvious, must also be classified in this subclass according to Note (1). The ingredient can be either a single compound or a composition in itself. **[8]**

(4) Any ingredient of a mixture which is not identified by the classification according to Notes (2) or (3) above, and which is considered to represent information of interest for search, may also be classified in this subclass according to Note (1). This can, for example, be the case when it is considered of interest to enable searching of mixtures using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

3/00 Use of inorganic ingredients [2]
3/02 . Elements **[2]**
3/04 . . Carbon **[2]**
3/06 . . Sulfur **[2]**
3/08 . . Metals **[2]**
3/10 . Metal compounds **[2]**
3/12 . . Hydrides **[2]**
3/14 . . Carbides **[2]**
3/16 . Halogen-containing compounds **[2]**
3/18 . Oxygen-containing compounds, e.g. metal carbonyls **[2]**
3/20 . . Oxides; Hydroxides **[2]**
3/22 . . . of metals **[2]**
3/24 . . Acids; Salts thereof **[2]**
3/26 . . . Carbonates; Bicarbonates **[2]**
3/28 . Nitrogen-containing compounds **[2]**
3/30 . Sulfur-, selenium-, or tellurium-containing compounds **[2]**
3/32 . Phosphorus-containing compounds **[2]**
3/34 . Silicon-containing compounds **[2]**
3/36 . . Silica **[2]**
3/38 . Boron-containing compounds **[2]**
3/40 . Glass **[2]**

5/00 Use of organic ingredients [2]
5/01 . Hydrocarbons **[2]**
5/02 . Halogenated hydrocarbons **[2]**
5/03 . . aromatic **[2]**
5/04 . Oxygen-containing compounds **[2]**
5/05 . . Alcohols; Metal alcoholates **[2]**
5/053 . . . Polyhydroxylic alcohols **[6]**
5/057 . . . Metal alcoholates **[6]**
5/06 . . Ethers; Acetals; Ketals; Ortho-esters **[2]**
5/07 . . Aldehydes; Ketones **[2]**
5/08 . . . Quinones **[2]**
5/09 . . Carboxylic acids; Metal salts thereof; Anhydrides thereof **[2]**
5/092 . . . Polycarboxylic acids **[6]**
5/095 . . . Carboxylic acids containing halogens **[6]**
5/098 . . . Metal salts of carboxylic acids **[6]**
5/10 . . Esters; Ether-esters **[2]**
5/101 . . . of monocarboxylic acids **[6]**
5/103 . . . . with polyalcohols **[6]**
5/105 . . . . with phenols **[6]**
5/107 . . . . . with polyphenols **[6]**
5/109 . . . of carbonic acid **[6]**
5/11 . . . of acyclic polycarboxylic acids **[2]**
5/12 . . . of cyclic polycarboxylic acids **[2]**
5/13 . . Phenols; Phenolates **[2]**
5/132 . . . Phenols containing keto groups **[6]**
5/134 . . . Phenols containing ester groups **[6]**
5/136 . . . Phenols containing halogens **[6]**
5/138 . . . Phenolates **[6]**
5/14 . . Peroxides **[2]**
5/15 . . Heterocyclic compounds having oxygen in the ring **[2]**
5/151 . . . having one oxygen atom in the ring **[7]**
5/1515 . . . . Three-membered rings **[7]**
5/1525 . . . . Four-membered rings **[7]**
5/1535 . . . . Five-membered rings **[7]**
5/1539 . . . . . Cyclic anhydrides **[7]**
5/1545 . . . . Six-membered rings **[7]**
5/156 . . . having two oxygen atoms in the ring **[7]**
5/1565 . . . . Five-membered rings **[7]**
5/1575 . . . . Six-membered rings **[7]**
5/159 . . . having more than two oxygen atoms in the ring **[7]**
5/16 . Nitrogen-containing compounds **[2]**
5/17 . . Amines; Quaternary ammonium compounds **[2]**
5/18 . . . with aromatically bound amino groups **[2]**
5/19 . . . Quaternary ammonium compounds **[2]**
5/20 . . Carboxylic acid amides **[2]**
5/205 . . Compounds containing



groups, e.g. carbamates **[6]**
5/21 . . Urea; Derivatives thereof, e.g. biuret **[2]**
5/22 . . Compounds containing nitrogen bound to another nitrogen atom **[2]**
5/23 . . . Azo-compounds **[2]**
5/24 . . . Derivatives of hydrazine **[2]**
5/25 . . . . Carboxylic acid hydrazides **[2]**
5/26 . . . . Semicarbazides **[2]**
5/27 . . . Compounds containing a nitrogen atom bound to two other nitrogen atoms, e.g. diazoamino-compounds **[2]**
5/28 . . . . Azides **[2]**
5/29 . . Compounds containing carbon-to-nitrogen double bonds **[2]**
5/30 . . . Hydrazones; Semicarbazones **[2]**
5/31 . . . Guanidine; Derivatives thereof **[2]**
5/315 . . Compounds containing carbon-to-nitrogen triple bonds **[6]**
5/32 . . Compounds containing nitrogen bound to oxygen **[2]**
5/33 . . . Oximes **[2]**
5/34 . . Heterocyclic compounds having nitrogen in the ring **[2]**
5/3412 . . . having one nitrogen atom in the ring **[5]**
5/3415 . . . . Five-membered rings **[5]**
5/3417 . . . . . condensed with carbocyclic rings **[5]**
5/3432 . . . . Six-membered rings **[5]**
5/3435 . . . . . Piperidines **[5]**
5/3437 . . . . . condensed with carbocyclic rings **[5]**
5/3442 . . . having two nitrogen atoms in the ring **[5]**
5/3445 . . . . Five-membered rings **[5]**
5/3447 . . . . . condensed with carbocyclic rings **[5]**
5/3462 . . . . Six-membered rings **[5]**
5/3465 . . . . . condensed with carbocyclic rings **[5]**
5/3467 . . . having more than two nitrogen atoms in the ring **[5]**
5/3472 . . . . Five-membered rings **[5]**
5/3475 . . . . . condensed with carbocyclic rings **[5]**
5/3477 . . . . Six-membered rings **[5]**
5/3492 . . . . . Triazines **[5]**
5/3495 . . . . . condensed with carbocyclic rings **[5]**

5/35 . . . having also oxygen in the ring **[2]**
5/353 . . . . Five-membered rings **[5]**
5/357 . . . . Six-membered rings **[5]**
5/36 . Sulfur-, selenium-, or tellurium-containing compounds **[2]**
5/37 . . Thiols **[2,7]**
5/372 . . Sulfides **[6,7]**
5/375 . . . containing six-membered aromatic rings **[6,7]**
5/378 . . . containing heterocyclic rings **[6,7]**
5/38 . . Thiocarbonic acids; Derivatives thereof, e.g. xanthates **[2]**
5/39 . . Thiocarbamic acids; Derivatives thereof, e.g. dithiocarbamates **[2]**
5/40 . . . Thiuramsulfides; Thiurampolysulfides, e.g. compounds containing  groups **[2]**
5/405 . . Thioureas; Derivatives thereof **[6]**
5/41 . . Compounds containing sulfur bound to oxygen **[2]**
5/42 . . . Sulfonic acids; Derivatives thereof **[2]**
5/43 . . Compounds containing sulfur bound to nitrogen **[2]**
5/435 . . . Sulfonamides **[6]**
5/44 . . . Sulfenamides **[2]**
5/45 . . Heterocyclic compounds having sulfur in the ring **[2]**
5/46 . . . with oxygen or nitrogen in the ring **[2]**
5/47 . . . . Thiazoles **[2]**
5/48 . . Selenium- or tellurium-containing compounds **[2]**
5/49 . Phosphorus-containing compounds **[2]**
5/50 . . Phosphorus bound to carbon only **[2,5]**
5/51 . . Phosphorus bound to oxygen **[2]**
5/52 . . . bound to oxygen only **[2]**
5/521 . . . . Esters of phosphoric acids, e.g. of H_3PO_4 **[5]**
5/523 . . . . . with hydroxyaryl compounds **[5]**
5/524 . . . . Esters of phosphorous acids, e.g. of H_3PO_3 **[5]**
5/526 . . . . . with hydroxyaryl compounds **[5]**
5/527 . . . . Cyclic esters **[5]**
5/529 . . . . Esters containing heterocyclic rings not representing cyclic esters of phosphoric or phosphorous acids **[5]**
5/53 . . . bound to oxygen and to carbon only **[2,5]**
5/5313 . . . . Phosphinic compounds, e.g. $R_2{=}P(:O)OR'$ **[5]**
5/5317 . . . . Phosphonic compounds, e.g. $R{-}P(:O)(OR')_2$ **[5]**
5/5333 . . . . . Esters of phosphonic acids **[5]**
5/5337 . . . . . containing also halogens **[5]**
5/5353 . . . . . containing also nitrogen **[5]**
5/5357 . . . . . cyclic **[5]**
5/5373 . . . . . containing heterocyclic rings not representing cyclic esters of phosphonic acids **[5]**
5/5377 . . . . Phosphinous compounds, e.g. $R_2{=}P{-}OR'$ **[5]**
5/5393 . . . . Phosphonous compounds, e.g. $R{-}P(OR')_2$ **[5]**
5/5397 . . . . Phosphine oxides **[5]**
5/5398 . . Phosphorus bound to sulfur **[5]**
5/5399 . . Phosphorus bound to nitrogen **[5]**
5/54 . Silicon-containing compounds **[2]**
5/541 . . containing oxygen **[7]**
5/5415 . . . containing at least one $Si{-}O$ bond **[7]**
5/5419 . . . . containing at least one $Si{-}C$ bond **[7]**
5/5425 . . . containing at least one $C{=}C$ bond **[7]**
5/5435 . . . containing oxygen in a ring **[7]**
5/544 . . containing nitrogen **[7]**
5/5445 . . . containing at least one $Si{-}N$ bond **[7]**
5/5455 . . . containing at least one  group **[7]**
5/5465 . . . containing at least one $C{=}N$ bond **[7]**
5/5475 . . . containing at least one $C{\equiv}N$ bond **[7]**
5/548 . . containing sulfur **[7]**
5/549 . . containing silicon in a ring **[7]**
5/55 . Boron-containing compounds **[2]**
5/56 . Organo-metallic compounds, i.e. organic compounds containing a metal-to-carbon bond **[2]**
5/57 . . Organo-tin compounds **[2]**
5/58 . . . containing sulfur **[2]**
5/59 . Arsenic- or antimony-containing compounds **[2]**

7/00 Use of ingredients characterised by shape [2]
7/02 . Fibres or whiskers **[2]**
7/04 . . inorganic **[2]**
7/06 . . . Elements **[2]**
7/08 . . . Oxygen-containing compounds **[2]**
7/10 . . . Silicon-containing compounds **[2]**
7/12 . . . . Asbestos **[2]**
7/14 . . . Glass **[2]**
7/16 . Solid spheres **[2]**
7/18 . . inorganic **[2]**
7/20 . . . Glass **[2]**
7/22 . Expanded, porous or hollow particles **[2]**
7/24 . . inorganic **[2]**
7/26 . . . Silicon-containing compounds **[2]**
7/28 . . . Glass **[2]**

9/00 Use of pretreated ingredients (use of pretreated fibrous materials in the manufacture of articles or shaped materials containing macromolecular substances C08J 5/06) **[2]**
9/02 . Ingredients treated with inorganic substances **[2]**
9/04 . Ingredients treated with organic substances **[2]**
9/06 . . with silicon-containing compounds **[2]**
9/08 . Ingredients agglomerated by treatment with a binding agent **[2]**
9/10 . Encapsulated ingredients **[2]**
9/12 . Adsorbed ingredients **[2]**

11/00 Use of ingredients of unknown constitution, e.g. undefined reaction products [2]

13/00 Use of mixtures of ingredients not covered by any single one of main groups C08K 3/00 to C08K 11/00, each of these compounds being essential [4]
13/02 . Organic and inorganic ingredients **[4]**
13/04 . Ingredients characterised by their shape and organic or inorganic ingredients **[4]**
13/06 . Pretreated ingredients and ingredients covered by the main groups C08K 3/00 to C08K 7/00 **[4]**
13/08 . Ingredients of unknown constitution and ingredients covered by the main groups C08K 3/00 to C08K 9/00 **[4]**

C08L COMPOSITIONS OF MACROMOLECULAR COMPOUNDS (pesticides, herbicides A01N; pharmaceuticals, cosmetics A61K; explosives C06B; compositions based on polymerisable monomers C08F, C08G; paints, inks, varnishes, dyes, polishes, adhesives C09; lubricants C10M; detergents C11D; artificial filaments or fibres D01F; textile treating compositions D06) **[2]**

(1) In this subclass, the following term is used with the meaning indicated:
– "rubber" includes:
(a) natural or conjugated diene rubbers;
(b) rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, see the group provided for compositions of such macromolecular compounds). **[2]**

(2) In this subclass:
(a) compositions are classified according to the mutual proportions by weight of only the macromolecular constituents; **[2]**
(b) compositions are classified according to the macromolecular constituent or constituents present in the highest proportion; if all these constituents are present in equal proportions the composition is classified according to each of these constituents. **[2]**

(3) Any macromolecular constituent of a composition which is not identified by the classification according to Note (2) above, and the use of which is determined to be novel and non-obvious, must also be classified in this subclass. For example, a composition containing 80 parts polyethene and 20 parts polyvinyl chloride is classified in both groups C08L 23/06 and C08L 27/06, if the use of polyvinyl chloride is determined to be novel and non-obvious. **[8]**

(4) Any macromolecular constituent of a composition which is not identified by the classification according to Notes (2) or (3) above, and which is considered to represent information of interest for search, may also be classified in this subclass. This can, for example, be the case when it is considered of interest to enable searching of compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

Subclass index

Compositions of polysaccharides or of their derivatives [2]

1/00 Compositions of cellulose, modified cellulose, or cellulose derivatives [2]
1/02 . Cellulose; Modified cellulose **[2]**
1/04 . . Oxycellulose; Hydrocellulose **[2]**
1/06 . . Cellulose hydrate **[2]**
1/08 . Cellulose derivatives **[2]**
1/10 . . Esters of organic acids **[2]**
1/12 . . . Cellulose acetate **[2]**
1/14 . . . Mixed esters, e.g. cellulose acetate-butyrate **[2]**
1/16 . . Esters of inorganic acids **[2]**
1/18 . . . Cellulose nitrate **[2]**
1/20 . . Esters of both organic acids and inorganic acids **[2]**
1/22 . . Cellulose xanthate **[2]**
1/24 . . . Viscose **[2]**
1/26 . . Cellulose ethers **[2]**
1/28 . . . Alkyl ethers **[2]**
1/30 . . . Aryl ethers; Aralkyl ethers **[2]**
1/32 . . Cellulose ether-esters **[2]**

3/00 Compositions of starch, amylose or amylopectin or of their derivatives or degradation products [2]
3/02 . Starch; Degradation products thereof, e.g. dextrin **[2]**
3/04 . Starch derivatives **[2]**
3/06 . . Esters **[2]**
3/08 . . Ethers **[2]**
3/10 . . Oxidised starch **[2]**
3/12 . Amylose; Amylopectin; Degradation products thereof **[2]**
3/14 . Amylose derivatives; Amylopectin derivatives **[2]**
3/16 . . Esters **[2]**
3/18 . . Ethers **[2]**
3/20 . . Oxidised amylose; Oxidised amylopectin **[2]**

5/00 Compositions of polysaccharides or of their derivatives not provided for in group C08L 1/00 or C08L 3/00 [2]
5/02 . Dextran; Derivatives thereof **[2]**
5/04 . Alginic acid; Derivatives thereof **[2]**
5/06 . Pectin; Derivatives thereof **[2]**
5/08 . Chitin; Chondroitin sulfate; Hyaluronic acid; Derivatives thereof **[2]**
5/10 . Heparin; Derivatives thereof **[2]**
5/12 . Agar-agar; Derivatives thereof **[2]**
5/14 . Hemicellulose; Derivatives thereof **[2]**
5/16 . Cyclodextrin; Derivatives thereof **[2]**

Compositions of rubbers or of their derivatives [2]

7/00 Compositions of natural rubber [2]
7/02 . Latex **[2]**

9/00 Compositions of homopolymers or copolymers of conjugated diene hydrocarbons [2]
9/02 . Copolymers with acrylonitrile **[2]**
9/04 . . Latex **[2]**
9/06 . Copolymers with styrene **[2]**

9/08 . . Latex **[2]**
9/10 . Latex (C08L 9/04, C08L 9/08 take precedence) **[2]**

11/00 Compositions of homopolymers or copolymers of chloroprene [2]
11/02 . Latex **[2]**

13/00 Compositions of rubbers containing carboxyl groups [2]
13/02 . Latex **[2]**

15/00 Compositions of rubber derivatives (C08L 11/00, C08L 13/00 take precedence) **[4]**
15/02 . Rubber derivatives containing halogen **[2]**

17/00 Compositions of reclaimed rubber [2]

19/00 Compositions of rubbers not provided for in groups C08L 7/00 to C08L 17/00 [2]
19/02 . Latex **[2]**

21/00 Compositions of unspecified rubbers [2]
21/02 . Latex **[2]**

Compositions of macromolecular compounds obtained by reactions involving only carbon-to-carbon unsaturated bonds [2]

(1) In groups C08L 23/00 to C08L 49/00, "aliphatic radical" means an acyclic or a non-aromatic carbocyclic carbon skeleton which is considered to be terminated by every bond to: **[8]**
(a) an element other than carbon; **[8]**
(b) a carbon atom having a double bond to one atom other than carbon; **[8]**
(c) an aromatic carbocyclic ring or a heterocyclic ring. **[8]**

(2) In groups C08L 23/00 to C08L 49/00, in the absence of an indication to the contrary, a copolymer is classified according to the major monomeric component. **[8]**

23/00 Compositions of homopolymers or copolymers of unsaturated aliphatic hydrocarbons having only one carbon-to-carbon double bond; **Compositions of derivatives of such polymers [2]**
23/02 . not modified by chemical after-treatment **[2]**
23/04 . . Homopolymers or copolymers of ethene **[2]**
23/06 . . . Polyethene **[2]**
23/08 . . . Copolymers of ethene (C08L 23/16 takes precedence) **[2]**
23/10 . . Homopolymers or copolymers of propene **[2]**
23/12 . . . Polypropene **[2]**
23/14 . . . Copolymers of propene (C08L 23/16 takes precedence) **[2]**
23/16 . . Ethene-propene or ethene-propene-diene copolymers **[2]**
23/18 . . Homopolymers or copolymers of hydrocarbons having four or more carbon atoms **[2]**
23/20 . . . having four to nine carbon atoms **[2]**
23/22 . . . . Copolymers of isobutene; Butyl rubber **[2]**
23/24 . . . having ten or more carbon atoms **[2]**
23/26 . modified by chemical after-treatment **[2]**
23/28 . . by reaction with halogens or halogen-containing compounds (C08L 23/32 takes precedence) **[2]**
23/30 . . by oxidation **[2]**
23/32 . . by reaction with phosphorus- or sulfur-containing compounds **[2]**
23/34 . . . by chlorosulfonation **[2]**
23/36 . . by reaction with nitrogen-containing compounds, e.g. by nitration **[2]**

25/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an aromatic carbocyclic ring; **Compositions of derivatives of such polymers [2]**
25/02 . Homopolymers or copolymers of hydrocarbons **[2]**
25/04 . . Homopolymers or copolymers of styrene **[2]**
25/06 . . . Polystyrene **[2]**
25/08 . . . Copolymers of styrene (C08L 29/08, C08L 35/06, C08L 55/02 take precedence) **[2]**
25/10 . . . . with conjugated dienes **[2]**
25/12 . . . . with unsaturated nitriles **[2]**
25/14 . . . . with unsaturated esters **[2]**
25/16 . . Homopolymers or copolymers of alkyl-substituted styrenes **[2]**
25/18 . Homopolymers or copolymers of aromatic monomers containing elements other than carbon and hydrogen **[2]**

27/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a halogen; **Compositions of derivatives of such polymers [2]**
27/02 . not modified by chemical after-treatment **[2]**
27/04 . . containing chlorine atoms **[2]**
27/06 . . . Homopolymers or copolymers of vinyl chloride **[2]**
27/08 . . . Homopolymers or copolymers of vinylidene chloride **[2]**
27/10 . . containing bromine or iodine atoms **[2]**
27/12 . . containing fluorine atoms **[2]**
27/14 . . . Homopolymers or copolymers of vinyl fluoride **[2]**
27/16 . . . Homopolymers or copolymers of vinylidene fluoride **[2]**
27/18 . . . Homopolymers or copolymers of tetrafluoroethene **[2]**
27/20 . . . Homopolymers or copolymers of hexafluoropropene **[2]**
27/22 . modified by chemical after-treatment **[2]**
27/24 . . halogenated **[2]**

29/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an alcohol, ether, aldehydo, ketonic, acetal, or ketal radical; **Compositions of hydrolysed polymers of esters of unsaturated alcohols with saturated carboxylic acids**; **Compositions of derivatives of such polymers [2]**
29/02 . Homopolymers or copolymers of unsaturated alcohols (C08L 29/14 takes precedence) **[2]**
29/04 . . Polyvinyl alcohol; Partially hydrolysed homopolymers or copolymers of esters of unsaturated alcohols with saturated carboxylic acids **[2]**
29/06 . . Copolymers of allyl alcohol **[2]**
29/08 . . . with vinyl aromatic monomers **[2]**
29/10 . Homopolymers or copolymers of unsaturated ethers (C08L 35/08 takes precedence) **[2]**

29/12 . Homopolymers or copolymers of unsaturated ketones **[2]**

29/14 . Homopolymers or copolymers of acetals or ketals obtained by polymerisation of unsaturated acetals or ketals or by after-treatment of polymers of unsaturated alcohols **[2]**

31/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid, or of a haloformic acid (of hydrolysed polymers C08L 29/00); **Compositions of derivatives of such polymers [2]**

31/02 . Homopolymers or copolymers of esters of monocarboxylic acids **[2]**

31/04 . . Homopolymers or copolymers of vinyl acetate **[2]**

31/06 . Homopolymers or copolymers of esters of polycarboxylic acids **[2]**

31/08 . . of phthalic acid **[2]**

33/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and only one being terminated by only one carboxyl radical, or of salts, anhydrides, esters, amides, imides, or nitriles thereof; **Compositions of derivatives of such polymers [2]**

33/02 . Homopolymers or copolymers of acids; Metal or ammonium salts thereof **[2]**

33/04 . Homopolymers or copolymers of esters **[2]**

33/06 . . of esters containing only carbon, hydrogen, and oxygen, the oxygen atom being present only as part of the carboxyl radical **[2]**

33/08 . . . Homopolymers or copolymers of acrylic acid esters **[2]**

33/10 . . . Homopolymers or copolymers of methacrylic acid esters **[2]**

33/12 . . . . Homopolymers or copolymers of methyl methacrylate **[2]**

33/14 . . of esters containing halogen, nitrogen, sulfur, or oxygen atoms in addition to the carboxy oxygen **[2]**

33/16 . . . Homopolymers or copolymers of esters containing halogen atoms **[2]**

33/18 . Homopolymers or copolymers of nitriles **[2]**

33/20 . . Homopolymers or copolymers of acrylonitrile (C08L 55/02 takes precedence) **[2]**

33/22 . . Homopolymers or copolymers of nitriles containing four or more carbon atoms **[2]**

33/24 . Homopolymers or copolymers of amides or imides **[2]**

33/26 . . Homopolymers or copolymers of acrylamide or methacrylamide **[2]**

35/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical, and containing at least one other carboxyl radical in the molecule, or of salts, anhydrides, esters, amides, imides or nitriles thereof; **Compositions of derivatives of such polymers [2]**

35/02 . Homopolymers or copolymers of esters (C08L 35/06, C08L 35/08 take precedence) **[2]**

35/04 . Homopolymers or copolymers of nitriles (C08L 35/06, C08L 35/08 take precedence) **[2]**

35/06 . Copolymers with vinyl aromatic monomers **[2]**

35/08 . Copolymers with vinyl ethers **[2]**

37/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (of cyclic esters of polyfunctional acids C08L 31/00; of cyclic anhydrides of unsaturated acids C08L 35/00); **Compositions of derivatives of such polymers [2]**

39/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a single or double bond to nitrogen or by a heterocyclic ring containing nitrogen; **Compositions of derivatives of such polymers [2]**

39/02 . Homopolymers or copolymers of vinylamine **[2]**

39/04 . Homopolymers or copolymers of monomers containing heterocyclic rings having nitrogen as ring member **[2]**

39/06 . . Homopolymers or copolymers of N-vinyl-pyrrolidones **[2]**

39/08 . . Homopolymers or copolymers of vinyl-pyridine **[2]**

41/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a bond to sulfur or by a heterocyclic ring containing sulfur; **Compositions of derivatives of such polymers [2]**

43/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing boron, silicon, phosphorus, selenium, tellurium, or a metal; **Compositions of derivatives of such polymers [2]**

43/02 . Homopolymers or copolymers of monomers containing phosphorus **[2]**

43/04 . Homopolymers or copolymers of monomers containing silicon **[2]**

45/00 Compositions of homopolymers or copolymers of compounds having no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic or in a heterocyclic ring system; **Compositions of derivatives of such polymers** (of cyclic esters of polyfunctional acids C08L 31/00; of cyclic anhydrides or imides C08L 35/00) **[2]**

45/02 . of coumarone-indene polymers **[2]**

47/00 Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds; **Compositions of derivatives of such polymers** (C08L 45/00 takes precedence; of conjugated diene rubbers C08L 9/00 to C08L 21/00) **[2]**

49/00 Compositions of homopolymers or copolymers of compounds having one or more carbon-to-carbon triple bonds; **Compositions of derivatives of such polymers [2]**

51/00 **Compositions of graft polymers in which the grafted component is obtained by reactions only involving carbon-to-carbon unsaturated bonds** (for ABS polymers C08L 55/02); **Compositions of derivatives of such polymers [2]**

51/02 . grafted on to polysaccharides **[2]**

51/04 . grafted on to rubbers **[2]**

51/06 . grafted on to homopolymers or copolymers of aliphatic hydrocarbons containing only one carbon-to-carbon double bond **[2]**

51/08 . grafted on to macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[2]**

51/10 . grafted on to inorganic materials **[3]**

53/00 **Compositions of block copolymers containing at least one sequence of a polymer obtained by reactions only involving carbon-to-carbon unsaturated bonds**; **Compositions of derivatives of such polymers [2]**

53/02 . of vinyl aromatic monomers and conjugated dienes **[2]**

55/00 **Compositions of homopolymers or copolymers, obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in groups C08L 23/00 to C08L 53/00 [2]**

55/02 . ABS [Acrylonitrile-Butadiene-Styrene] polymers **[2]**

55/04 . Polyadducts obtained by the diene synthesis **[2]**

57/00 **Compositions of unspecified polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds [2]**

57/02 . Copolymers of mineral oil hydrocarbons **[2]**

57/04 . Copolymers in which only the monomer in minority is defined **[2]**

57/06 . Homopolymers or copolymers containing elements other than carbon and hydrogen **[2]**

57/08 . . containing halogen atoms **[2]**

57/10 . . containing oxygen atoms **[2]**

57/12 . . containing nitrogen atoms **[2]**

Compositions of macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds [2]

59/00 **Compositions of polyacetals**; **Compositions of derivatives of polyacetals** (of polyvinyl acetals C08L 29/14) **[2]**

59/02 . Polyacetals containing polyoxymethylene sequences only **[2]**

59/04 . Copolyoxymethylenes **[3]**

61/00 **Compositions of condensation polymers of aldehydes or ketones** (with polyalcohols C08L 59/00; with polynitriles C08L 77/00); **Compositions of derivatives of such polymers [2]**

61/02 . Condensation polymers of aldehydes or ketones only **[2]**

61/04 . Condensation polymers of aldehydes or ketones with phenols only **[2]**

61/06 . . of aldehydes with phenols **[2]**

61/08 . . . with monohydric phenols **[2]**

61/10 . . . . Phenol-formaldehyde condensates **[2]**

61/12 . . . with polyhydric phenols **[2]**

61/14 . . . Modified phenol-aldehyde condensates **[2]**

61/16 . . of ketones with phenols **[2]**

61/18 . Condensation polymers of aldehydes or ketones with aromatic hydrocarbons or their halogen derivatives only **[2]**

61/20 . Condensation polymers of aldehydes or ketones with only compounds containing hydrogen attached to nitrogen (with amino phenols C08L 61/04) **[2]**

61/22 . . of aldehydes with acyclic or carbocyclic compounds **[2]**

61/24 . . . with urea or thiourea **[2]**

61/26 . . of aldehydes with heterocyclic compounds **[2]**

61/28 . . . with melamine **[2]**

61/30 . . of aldehydes with heterocyclic and acyclic or carbocyclic compounds **[2]**

61/32 . . Modified amine-aldehyde condensates **[2]**

61/34 . Condensation polymers of aldehydes or ketones with monomers covered by at least two of the groups C08L 61/04, C08L 61/18, and C08L 61/20 **[2]**

63/00 **Compositions of epoxy resins**; **Compositions of derivatives of epoxy resins [2]**

63/02 . Polyglycidyl ethers of bis-phenols **[2]**

63/04 . Epoxynovolacs **[2]**

63/06 . Triglycidylisocyanurates **[2]**

63/08 . Epoxidised polymerised polyenes **[2]**

63/10 . Epoxy resins modified by unsaturated compounds **[2]**

Note

In groups C08L 65/00 to C08L 85/00, in the absence of an indication to the contrary, compositions of macromolecular compounds obtained by reactions forming two different linkages in the main chain are classified only according to the linkage present in excess. **[2]**

65/00 **Compositions of macromolecular compounds obtained by reactions forming a carbon-to-carbon link in the main chain** (C08L 7/00 to C08L 57/00, C08L 61/00 take precedence); **Compositions of derivatives of such polymers [2]**

65/02 . Polyphenylenes **[2]**

65/04 . Polyxylylenes **[2]**

67/00 **Compositions of polyesters obtained by reactions forming a carboxylic ester link in the main chain** (of polyester-amides C08L 77/12; of polyester-imides C08L 79/08); **Compositions of derivatives of such polymers [2]**

67/02 . Polyesters derived from dicarboxylic acids and dihydroxy compounds (C08L 67/06 takes precedence) **[2]**

67/03 . . the dicarboxylic acids and dihydroxy compounds having the hydroxy and the carboxyl groups directly linked to aromatic rings **[5]**

67/04 . Polyesters derived from hydroxy carboxylic acids, e.g. lactones (C08L 67/06 takes precedence) **[2]**

67/06 . Unsaturated polyesters **[2]**

67/07 . . having terminal carbon-to-carbon unsaturated bonds **[5]**

67/08 . Polyesters modified with higher fatty oils or their acids, or with natural resins or resin acids **[2]**

69/00 **Compositions of polycarbonates**; **Compositions of derivatives of polycarbonates [2]**

71/00 **Compositions of polyethers obtained by reactions forming an ether link in the main chain** (of polyacetals C08L 59/00; of epoxy resins C08L 63/00; of polythioether-ethers C08L 81/02; of polyethersulfones C08L 81/06); **Compositions of derivatives of such polymers [2]**

71/02 . Polyalkylene oxides **[2]**

71/03 . . Polyepihalohydrins **[5]**
71/08 . Polyethers derived from hydroxy compounds or from their metallic derivatives (C08L 71/02 takes precedence) **[5]**
71/10 . . from phenols **[5]**
71/12 . . . Polyphenylene oxides **[5]**
71/14 . . Furfuryl alcohol polymers **[5]**

73/00 Compositions of macromolecular compounds obtained by reactions forming a linkage containing oxygen or oxygen and carbon in the main chain, not provided for in groups C08L 59/00 to C08L 71/00; **Compositions of derivatives of such polymers [2]**
73/02 . Polyanhydrides **[2]**

75/00 Compositions of polyureas or polyurethanes; **Compositions of derivatives of such polymers [2]**
75/02 . Polyureas **[2]**
75/04 . Polyurethanes **[2]**
75/06 . . from polyesters **[2]**
75/08 . . from polyethers **[2]**
75/10 . . from polyacetals **[2]**
75/12 . . from compounds containing nitrogen and active hydrogen, the nitrogen atom not being part of an isocyanate group **[2]**
75/14 . . Polyurethanes having carbon-to-carbon unsaturated bonds **[5]**
75/16 . . . having terminal carbon-to-carbon unsaturated bonds **[5]**

77/00 Compositions of polyamides obtained by reactions forming a carboxylic amide link in the main chain (of polyhydrazides C08L 79/06; of polyamide-imides or polyamide acids C08L 79/08); **Compositions of derivatives of such polymers [2]**
77/02 . Polyamides derived from omega-amino carboxylic acids or from lactams thereof (C08L 77/10 takes precedence) **[2]**
77/04 . Polyamides derived from alpha-amino carboxylic acids (C08L 77/10 takes precedence) **[2]**
77/06 . Polyamides derived from polyamines and polycarboxylic acids (C08L 77/10 takes precedence) **[2]**
77/08 . . from polyamines and polymerised unsaturated fatty acids **[2]**
77/10 . Polyamides derived from aromatically bound amino and carboxyl groups of amino carboxylic acids or of polyamines and polycarboxylic acids **[2]**
77/12 . Polyester-amides **[2]**

79/00 Compositions of macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen with or without oxygen, or carbon only, not provided for in groups C08L 61/00 to C08L 77/00 [2]
79/02 . Polyamines **[2]**
79/04 . Polycondensates having nitrogen-containing heterocyclic rings in the main chain; Polyhydrazides; Polyamide acids or similar polyimide precursors **[2]**
79/06 . . Polyhydrazides; Polytriazoles; Polyamino-triazoles; Polyoxadiazoles **[2]**
79/08 . . Polyimides; Polyester-imides; Polyamide-imides; Polyamide acids or similar polyimide precursors **[2]**

81/00 Compositions of macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing sulfur with or without nitrogen, oxygen, or carbon only; **Compositions of polysulfones**; **Compositions of derivatives of such polymers [2]**
81/02 . Polythioethers; Polythioether-ethers **[2]**
81/04 . Polysulfides **[2]**
81/06 . Polysulfones; Polyethersulfones **[2]**
81/08 . Polysulfonates **[2]**
81/10 . Polysulfonamides; Polysulfonimides **[2]**

83/00 Compositions of macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon with or without sulfur, nitrogen, oxygen, or carbon only; **Compositions of derivatives of such polymers [2]**
83/02 . Polysilicates **[2]**
83/04 . Polysiloxanes **[2]**
83/05 . . containing silicon bound to hydrogen **[4]**
83/06 . . containing silicon bound to oxygen-containing groups (C08L 83/12 takes precedence) **[2]**
83/07 . . containing silicon bound to unsaturated aliphatic groups **[4]**
83/08 . . containing silicon bound to organic groups containing atoms other than carbon, hydrogen, and oxygen **[2]**
83/10 . Block- or graft-copolymers containing polysiloxane sequences (obtained by polymerising a compound having a carbon-to-carbon double bond on to a polysiloxane C08L 51/08, C08L 53/00) **[2]**
83/12 . . containing polyether sequences **[2]**
83/14 . in which at least two but not all the silicon atoms are connected by linkages other than oxygen atoms (C08L 83/10 takes precedence) **[2]**
83/16 . in which all the silicon atoms are connected by linkages other than oxygen atoms **[2]**

85/00 Compositions of macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing atoms other than silicon, sulfur, nitrogen, oxygen, and carbon; **Compositions of derivatives of such polymers [2]**
85/02 . containing phosphorus **[2]**
85/04 . containing boron **[2]**

87/00 Compositions of unspecified macromolecular compounds, obtained otherwise than by polymerisation reactions only involving unsaturated carbon-to-carbon bonds [2]

Compositions of natural macromolecular compounds or of derivatives thereof [2]

89/00 Compositions of proteins; **Compositions of derivatives thereof** (foodstuff preparations A23J 3/00) **[2]**
89/02 . Casein-aldehyde condensates **[2]**
89/04 . Products derived from waste materials, e.g. horn, hoof or hair **[2]**
89/06 . . derived from leather or skin **[2]**

91/00 Compositions of oils, fats or waxes; **Compositions of derivatives thereof** (polishing compositions, ski waxes C09G; soaps, detergent compositions C11D) **[2]**
91/02 . Vulcanised oils, e.g. factice **[2]**
91/04 . Linoxyn **[2]**
91/06 . Waxes **[2]**
91/08 . . Mineral waxes **[2]**

93/00 **Compositions of natural resins**; **Compositions of derivatives thereof** (of polysaccharides C08L 1/00 to C08L 5/00; of natural rubber C08L 7/00; polishing compositions C09G) **[2]**

93/02 . Shellac (French polish C09F) **[2]**

93/04 . Rosin **[2]**

95/00 **Compositions of bituminous materials, e.g. asphalt, tar or pitch [2]**

97/00 **Compositions of lignin-containing materials** (of polysaccharides C08L 1/00 to C08L 5/00) **[2]**

97/02 . Lignocellulosic material, e.g. wood, straw or bagasse **[2]**

99/00 **Compositions of natural macromolecular compounds or of derivatives thereof not provided for in groups C08L 1/00 to C08L 7/00 or C08L 89/00 to C08L 97/00 [2]**

101/00 **Compositions of unspecified macromolecular compounds [2]**

101/02 . characterised by the presence of specified groups **[2]**

101/04 . . containing halogen atoms **[2]**

101/06 . . containing oxygen atoms **[2]**

101/08 . . . Carboxyl groups **[2]**

101/10 . . containing hydrolysable silane groups **[4]**

101/12 . characterised by physical features, e.g. anisotropy, viscosity or electrical conductivity (liquid crystal materials or compositions C09K 19/00) **[6]**

101/14 . . the macromolecular compounds being water soluble or water swellable, e.g. aqueous gels **[6]**

101/16 . the macromolecular compounds being biodegradable **[7]**

C09 DYES; PAINTS; POLISHES; NATURAL RESINS; ADHESIVES; COMPOSITIONS NOT OTHERWISE PROVIDED FOR; APPLICATIONS OF MATERIALS NOT OTHERWISE PROVIDED FOR

C09B ORGANIC DYES OR CLOSELY-RELATED COMPOUNDS FOR PRODUCING DYES; MORDANTS; LAKES
(fermentation or enzyme-using processes to synthesise a desired chemical compound C12P)

(1) In this subclass, in the absence of an indication to the contrary, a compound is classified in the last appropriate place.
(2) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

Anthracene dyes

1/00 Dyes with an anthracene nucleus not condensed with any other ring

1/02 . Hydroxy anthraquinones; Ethers or esters thereof
1/04 . . Preparation by synthesis of the nucleus
1/06 . . Preparation from starting materials already containing the anthracene nucleus
1/08 . . . Dyes containing only OH groups
1/10 . . . Dyes containing halogen
1/12 . . . Dyes containing sulfonic acid groups
1/14 . . . Dyes containing ether groups
1/16 . Amino anthraquinones
1/18 . . Preparation by synthesis of the nucleus
1/20 . . Preparation from starting materials already containing the anthracene nucleus
1/22 . . . Dyes with unsubstituted amino groups
1/24 . . . . sulfonated
1/26 . . . Dyes with amino groups substituted by hydrocarbon radicals
1/28 . . . . substituted by alkyl, aralkyl, or cyclo-alkyl groups
1/30 . . . . . sulfonated
1/32 . . . . substituted by aryl groups (anthrimides C09B 1/48)
1/34 . . . . . sulfonated
1/36 . . . Dyes with acylated amino groups
1/38 . . . . Urea or thiourea derivatives
1/40 . . . . the acyl groups being residues of an aliphatic or araliphatic carboxylic acid
1/42 . . . . the acyl groups being residues of an aromatic carboxylic acid
1/43 . . . . . Dicarboxylic acids **[3]**
1/44 . . . . the acyl groups being residues of a heterocyclic carboxylic acid
1/46 . . . . the acyl groups being residues of cyanuric acid or an analogous heterocyclic compound
1/467 . . . . . attached to two or more anthraquinone rings **[3]**
1/473 . . . . the acyl groups being residues of a sulfonic acid **[3]**
1/48 . . . Anthrimides
1/50 . Amino-hydroxy anthraquinones; Ethers or esters thereof
1/503 . . unsubstituted amino-hydroxy anthraquinone **[2]**

1/51 . . N-substituted amino-hydroxy anthraquinone **[2]**
1/514 . . . N-aryl derivatives (N-aralkyl derivatives C09B 1/515) **[2]**
1/515 . . . N-alkyl, N-aralkyl, or N-cycloalkyl derivatives **[2]**
1/516 . . . N-acylated derivatives **[2]**
1/52 . . sulfonated
1/54 . . etherified
1/56 . Mercapto-anthraquinones
1/58 . . with mercapto groups substituted by aliphatic, cycloaliphatic, araliphatic or aryl radicals **[3]**
1/60 . . . substituted by aliphatic, cycloaliphatic or araliphatic radicals **[3]**
1/62 . . with mercapto groups substituted by a heterocyclic ring **[3]**

3/00 Dyes with anthracene nucleus condensed with one or more carbocyclic rings
3/02 . Benzanthrones
3/04 . . Preparation by synthesis of the nucleus
3/06 . . Preparation from starting materials already containing the benzanthrone nucleus
3/08 . . . by halogenation
3/10 . . . Amino derivatives
3/12 . . Dibenzanthronyls
3/14 . Perylene derivatives
3/16 . . Preparation by synthesis of the nucleus
3/18 . . Preparation from starting materials already containing the perylene nucleus
3/20 . . . by halogenation
3/22 . Dibenzanthrones; Isodibenzanthrones
3/24 . . Preparation by synthesis of the nucleus
3/26 . . . from dibenzanthronyls
3/28 . . . from perylene derivatives
3/30 . . Preparation from starting materials already containing the dibenzanthrone or isodibenzanthrone nucleus
3/32 . . . by halogenation
3/34 . . . by oxidation
3/36 . . . by etherification of hydroxy compounds
3/38 . . . by introduction of hydrocarbon or acyl residues into amino groups
3/40 . Pyranthrones
3/42 . . Preparation by synthesis of the nucleus
3/44 . . Preparation from starting materials already containing the pyranthrone nucleus
3/46 . . . by halogenation
3/48 . . . Amino derivatives
3/50 . Dibenzopyrenequinones
3/52 . . Preparation by synthesis of the nucleus
3/54 . . Preparation from starting materials already containing the dibenzopyrenequinone nucleus
3/56 . . . Amino derivatives
3/58 . Benzanthraquinones
3/60 . Anthanthrones
3/62 . . Preparation by synthesis of the nucleus
3/64 . . Preparation from starting materials already containing the anthanthrone nucleus
3/66 . . . by halogenation
3/68 . . . Amino derivatives
3/70 . Benzo-, naphtho-, or anthra-dianthrones
3/72 . . Preparation by synthesis of the nucleus
3/74 . . Preparation from starting materials already containing the benzo-, naphtho-, or anthra-dianthrone nucleus
3/76 . . . by halogenation
3/78 . Other dyes in which the anthracene nucleus is condensed with one or more carbocyclic rings
3/80 . . Preparation by synthesis of the nucleus
3/82 . . Preparation from starting materials already containing the condensed anthracene nucleus

5/00 Dyes with an anthracene nucleus condensed with one or more heterocyclic rings with or without carbocyclic rings
5/02 . the heterocyclic ring being condensed in peri position
5/04 . . Pyrazolanthrones
5/06 . . . Benzanthronyl-pyrazolanthrone condensation products
5/08 . . . Dipyrazolanthrones
5/10 . . Isothiazolanthrones; Isoxazolanthrones; Isoselenazolanthrones
5/12 . . Thiophenanthrones
5/14 . . Benz-azabenzanthrones (anthrapyridones)
5/16 . . Benz-diazabenzanthrones, e.g. anthrapyrimidones
5/18 . . Coeroxene; Coerthiene; Coeramidene; Derivatives thereof
5/20 . . Flavanthrones
5/22 . . . Preparation from starting materials already containing the flavanthrone nucleus
5/24 . the heterocyclic ring(s) being condensed with an anthraquinone nucleus in 1-2 or 2-3 position
5/26 . . Carbazoles of the anthracene series
5/28 . . . Anthrimide carbazoles
5/30 . . 1.2 azoles of the anthracene series
5/32 . . 1.3 azoles of the anthracene series
5/34 . . Anthraquinone acridones or thioxanthones
5/36 . . . Amino acridones
5/38 . . . Compounds containing acridone and carbazole rings
5/40 . . . Condensation products of benzanthronyl-amino anthraquinones
5/42 . . Pyridino anthraquinones
5/44 . . Azines of the anthracene series
5/46 . . . Para-diazines
5/48 . . . . Bis-anthraquinonediazines (indanthrone)
5/50 . . . . . Preparation by alkaline melting of 2-amino anthraquinones
5/52 . . . . . Preparation by condensation of 1.2-halogeno-amino anthraquinones
5/54 . . . . . Preparation from 2-amino anthrahydroquinones
5/56 . . . . . Preparation from starting materials already containing the indanthrene nucleus
5/58 . . . . . by halogenation
5/60 . . . Thiazines; Oxazines
5/62 . Cyclic imides or amidines of peri-dicarboxylic acids of the anthracene, benzanthrene, or perylene series

6/00 Anthracene dyes not provided for above [2]

7/00 Indigoid dyes
7/02 . Bis-indole indigos
7/04 . . Halogenation thereof
7/06 . Indone-thionaphthene indigos
7/08 . Other indole-indigos
7/10 . Bis-thionaphthene indigos
7/12 . Other thionaphthene indigos

9/00 Esters or ester-salts of leuco compounds of vat dyestuffs
9/02 . of anthracene dyes
9/04 . of indigoid dyes

11/00 Diaryl- or triarylmethane dyes
11/02 . derived from diarylmethanes
11/04 . derived from triarylmethanes
11/06 . . Hydroxy derivatives of triarylmethanes in which at least one −OH group is bound to an aryl nucleus
11/08 . . . Phthaleins
11/10 . . Amino derivatives of triarylmethanes
11/12 . . . without any −OH group bound to an aryl nucleus
11/14 . . . . Preparation from aromatic aldehydes, aromatic carboxylic acids or derivatives thereof, and aromatic amines
11/16 . . . . Preparation from diarylketones or diarylcarbinols
11/18 . . . . Preparation by oxidation
11/20 . . . . Preparation from other triarylmethane derivatives
11/22 . . . containing −OH groups bound to an aryl nucleus
11/24 . . . Phthaleins containing amino groups
11/26 . . Triarylmethane dyes in which at least one of the aromatic nuclei is heterocyclic
11/28 . Pyronines

13/00 Oxyketone dyes
13/02 . of the naphthalene series, e.g. naphthazarin
13/04 . of the pyrene series
13/06 . of the acetophenone series

Acridine, azine, oxazine, or thiazine dyes

15/00 Acridine dyes

17/00 Azine dyes
17/02 . of the benzene series
17/04 . of the naphthalene series
17/06 . Fluorindine or its derivatives

19/00 Oxazine dyes
19/02 . Bisoxazines prepared from amino quinones

21/00 Thiazine dyes

Quinoline or polymethine dyes

23/00 Methine or polymethine dyes, e.g. cyanine dyes
23/01 . characterised by the methine chain **[3]**
23/02 . . containing an odd number of >CH groups **[3]**
23/04 . . . one >CH group, e.g. cyanines, isocyanines, pseudocyanines **[3]**
23/06 . . . three >CH groups, e.g. carbocyanines **[3]**
23/08 . . . more than three >CH groups, e.g. polycarbocyanines **[3]**
23/10 . . containing an even number of >CH groups **[3]**
23/12 . the polymethine chain being branched
23/14 . Styryl dyes
23/16 . the polymethine chain containing hetero atoms

25/00 Quinophthalones

26/00 Hydrazone dyes; Triazene dyes [3]
26/02 . Hydrazone dyes (hydrazone-azo dyes C09B 56/18) **[3]**
26/04 . . cationic **[3]**
26/06 . Triazene dyes (triazene-azo dyes C09B 56/20) **[3]**

Azo dyes

Note

In groups C09B 27/00 to C09B 46/00, arrows in the formulae of the various types of azo dyes indicate which part of an azo dye, prepared by diazotising and coupling, is derived from the diazo component and which part is derived from the coupling component. The arrow is pointing to the part derived from the coupling component. **[4]**

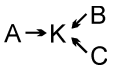
27/00 Azo dyes in which the azo group is formed in any way other than by diazotising and coupling
27/06 . Tartrazines **[3]**

29/00 Monoazo dyes prepared by diazotising and coupling
29/01 . characterised by the diazo component **[3]**
29/02 . . from diazotised o-amino-hydroxy compounds **[3]**
29/03 . . from diazotised o-amino carboxylic acids or o-amino-sulfonic acids **[3]**
29/033 . . from diazotised amines containing a heterocyclic ring **[3]**
29/036 . . . the heterocyclic ring containing only nitrogen as hetero atoms **[3]**
29/039 . . . the heterocyclic ring containing nitrogen and sulfur as hetero atoms **[3]**
29/042 . . . . the hetero ring being a thiazole ring **[3]**
29/045 . . . . . Benzothiazoles **[3]**
29/048 . . . . the hetero ring being a thiadiazole ring **[3]**
29/06 . from coupling components containing amino as the only directing group
29/08 . . Amino benzenes
29/085 . . . coupled with diazotised anilines **[3]**
29/09 . . . coupled with diazotised amines containing heterocyclic rings **[3]**
29/095 . . Amino naphthalenes **[3]**
29/10 . from coupling components containing hydroxy as the only directing group
29/12 . . of the benzene series
29/14 . . . Hydroxy carboxylic acids
29/15 . . of the naphthalene series **[3]**
29/16 . . . Naphthol-sulfonic acids **[3]**
29/18 . . ortho-Hydroxy carbonamides
29/20 . . . of the naphthalene series
29/22 . . . of heterocyclic compounds
29/24 . from coupling components containing both hydroxy and amino directing groups
29/26 . . Amino phenols
29/28 . . Amino naphthols
29/30 . . . Amino naphtholsulfonic acid
29/32 . from coupling components containing a reactive methylene group
29/33 . . Aceto- or benzoyl-acetylarylides **[3]**
29/34 . from other coupling components
29/36 . . from heterocyclic compounds
29/40 . . . containing a five-membered ring with one nitrogen atom as the only ring hetero atom **[3]**
29/42 . . . containing a six-membered ring with one nitrogen atom as the only ring hetero atom **[3]**

29/44 . . . . Quinolines or hydrogenated quinolines **[3]**
29/46 . . . 1,2-Diazoles or hydrogenated 1,2-diazoles **[3]**
29/48 . . . . Amino-1,2-diazoles **[3]**
29/50 . . . . 1,2-Diazolones **[3]**
29/52 . . . Diazines **[3]**

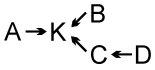
31/00 Disazo or polyazo dyes of the type A→ B→ C, A→ B→ C→ D, or the like, prepared by diazotising and coupling
31/02 . Disazo dyes
31/04 . . from a coupling component "C" containing a directive amino group
31/043 . . . Amino benzenes **[3]**
31/047 . . . . containing acid groups, e.g. $-COOH$, $-SO_3H$, $-PO_3H_2$, $-OSO_3H$, $-OPO_2H_2$; Salts thereof **[3]**
31/053 . . . Amino naphthalenes **[3]**
31/057 . . . . containing acid groups, e.g. $-COOH$, $-SO_3H$, $-PO_3H_2$, $-OSO_3H$, $-OPO_2H_2$; Salts thereof **[3]**
31/06 . . from a coupling component "C" containing a directive hydroxy group
31/062 . . . Phenols **[3]**
31/065 . . . . containing acid groups, e.g. $-COOH$, $-SO_3H$, $-PO_3H_2$, $-OSO_3H$, $-OPO_2H_2$; Salts thereof **[3]**
31/068 . . . Naphthols **[3]**
31/072 . . . . containing acid groups, e.g. $-COOH$, $-SO_3H$, $-PO_3H_2$, $-OSO_3H$, $-OPO_2H_2$; Salts thereof **[3]**
31/075 . . . ortho-Hydroxy carboxylic acid amides **[3]**
31/078 . . . . containing acid groups, e.g. $-COOH$, $-SO_3H$, $-PO_3H_2$, $-OSO_3H$, $-OPO_2H_2$; Salts thereof **[3]**
31/08 . . from a coupling component "C" containing directive hydroxy and amino groups
31/10 . . from a coupling component "C" containing reactive methylene groups
31/11 . . . Aceto- or benzoyl-acetylarylides **[3]**
31/12 . . from other coupling components "C"
31/14 . . . Heterocyclic components
31/143 . . . . 1,2-Diazoles **[3]**
31/147 . . . . . Pyrazoles **[3]**
31/15 . . . . Indoles **[3]**
31/153 . . . . containing a six-membered ring with one nitrogen atom as the only ring hetero atom **[3]**
31/157 . . . . . Quinolines or hydrogenated quinolines **[3]**
31/16 . Trisazo dyes
31/18 . . from a coupling component "D" containing a directive amino group
31/20 . . from a coupling component "D" containing a directive hydroxy group
31/22 . . from a coupling component "D" containing directive hydroxy and amino groups
31/24 . . from a coupling component "D" containing reactive methylene groups
31/26 . . from other coupling components "D"
31/28 . . . Heterocyclic compounds
31/30 . Other polyazo dyes

33/00 Disazo or polyazo dyes of the types A → K ← B, A → B → K ← C, or the like, prepared by diazotising and coupling
33/02 . Disazo dyes
33/04 . . in which the coupling component is a dihydroxy or polyhydroxy compound
33/044 . . . the coupling component being a bis-phenol **[3]**
33/048 . . . the coupling component being a bis-naphthol **[3]**
33/052 . . . the coupling component being a bis-(naphthol-amine) **[3]**
33/056 . . . the coupling component being a bis-(naphthol-urea) **[3]**
33/06 . . in which the coupling component is a diamine or polyamine
33/08 . . in which the coupling component is a hydroxy-amino compound
33/10 . . . in which the coupling component is an amino naphthol
33/12 . . in which the coupling component is a heterocyclic compound
33/13 . . . the coupling component being a bis-pyrazolone **[3]**
33/147 . . in which the coupling component is a bis-(o-hydroxy carboxylic acid amide) **[3]**
33/153 . . in which the coupling component is a bis-(aceto-acetyl amide) or a bis-(benzoyl-acetylamide) **[3]**
33/16 . . from other coupling components
33/18 . Trisazo or higher polyazo dyes
33/22 . . Trisazo dyes of the type A→ B→ K← C **[3]**
33/24 . . Trisazo dyes of the type



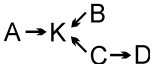
[3]

33/26 . . Tetrazo dyes of the type A→ B→ C→ K← D **[3]**
33/28 . . Tetrazo dyes of the type A→ B→ K← C← D **[3]**
33/30 . . Tetrazo dyes of the type



[3]

33/32 . . Tetrazo dyes of the type



[3]

35/00 Disazo or polyazo dyes of the type A ← D → B prepared by diazotising and coupling
35/02 . Disazo dyes
35/021 . . characterised by two coupling components of the same type **[3]**
35/023 . . . in which the coupling component is a hydroxy or polyhydroxy compound **[3]**
35/025 . . . in which the coupling component is an amine or polyamine **[3]**
35/027 . . . in which the coupling component is a hydroxy-amino compound **[3]**
35/029 . . . . Amino naphthol **[3]**
35/03 . . . in which the coupling component is a heterocyclic compound **[3]**
35/031 . . . . containing a six-membered ring with one nitrogen atom as the only ring hetero atom **[3]**

35/033 . . . in which the coupling component is an arylamide of an o-hydroxy carboxylic acid or of a beta-keto-carboxylic acid **[3]**

35/035 . . . in which the coupling component contains an activated methylene group **[3]**

35/037 . . characterised by two coupling components of different types **[3]**

35/039 . . characterised by the tetrazo component **[3]**

35/04 . . . the tetrazo component being a benzene derivative **[3]**

35/06 . . . the tetrazo component being a naphthalene derivative **[3]**

35/08 . . . the tetrazo component being a derivative of biphenyl **[3]**

35/10 . . . . from two coupling components of the same type **[3]**

35/12 . . . . . from amines **[3]**

35/14 . . . . . from hydroxy compounds **[3]**

35/16 . . . . . from hydroxy amines **[3]**

35/18 . . . . . from heterocyclic compounds **[3]**

35/20 . . . . from two coupling compounds of different types **[3]**

35/205 . . . the tetrazo component being a derivative of a diaryl- or triaryl-alkane or -alkene **[3]**

35/21 . . . . of diarylmethane or triarylmethane **[3]**

35/215 . . . . of diarylethane or diarylethene **[3]**

35/22 . . . the tetrazo component being a derivative of a diaryl ether **[3]**

35/227 . . . the tetrazo component being a derivative of a diaryl sulfide or diaryl polysulfide **[3]**

35/233 . . . the tetrazo component being a derivative of a diaryl ketone or benzil **[3]**

35/24 . . . the tetrazo component being a derivative of a diaryl amine **[3]**

35/26 . . . the tetrazo component being a derivative of a diaryl urea **[3]**

35/28 . . . the tetrazo component containing two aryl nuclei linked by at least one of the groups −CON⟨, $-SO_2N\langle$, $-SO_2-$, or $-SO_2O-$ **[3]**

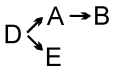
35/30 . . . . from two identical coupling components **[3]**

35/32 . . . . from two different coupling components **[3]**

35/34 . . . the tetrazo component being heterocyclic **[3]**

35/35 . Trisazo dyes in which the tetrazo component is a diamino-azo-aryl compound **[3]**

35/36 . Trisazo dyes of the type



35/362 . . D is benzene **[3]**

35/364 . . D is naphthalene **[3]**

35/366 . . D is diphenyl **[3]**

35/368 . . D is a diarylether, a diarylsulfide or a diarylpolysulfide **[3]**

35/37 . . D is a diarylamine **[3]**

35/372 . . D is a diarylurea **[3]**

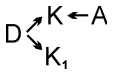
35/374 . . D contains two aryl nuclei linked by at least one of the groups −CON⟨, $-SO_2N\langle$, $-SO_2-$, or $-SO_2O-$ **[3]**

35/376 . . D is a heterocyclic compound **[3]**

35/378 . Trisazo dyes of the type

 **[3]**

35/38 . Trisazo dyes ot the types



35/40 . . the component K being a dihydroxy or polyhydroxy compound

35/42 . . the component K being a diamine or polyamine

35/44 . . the component K being a hydroxy amine

35/46 . . . the component K being an amino naphthol

35/48 . . the component K being heterocyclic

35/50 . Tetrazo dyes

35/52 . . of the type

 **[3]**

35/54 . . of the type

 **[3]**

35/56 . . of the type

 **[3]**

35/58 . . of the type

 **[3]**

35/60 . . of the type

 **[3]**

35/62 . . of the type

 **[3]**

35/64 . Higher polyazo dyes, e.g. of the types

 **[3]**

37/00 Azo dyes prepared by coupling the diazotised amine with itself

39/00 Other azo dyes prepared by diazotising and coupling

41/00 Special methods of performing the coupling reaction

43/00 Preparation of azo dyes from other azo compounds

43/02 . by sulfonation

43/04 . by nitration

43/06 . by oxidation

43/08 . by reduction (deamination C09B 43/44)

43/10 . . with formation of a new azo or an azoxy bridge

43/11 . by introducing hydrocarbon radicals or substituted hydrocarbon radicals on primary or secondary amino groups (formation of an amino group by reduction, e.g. of a nitro group, C09B 43/08) **[3]**

43/12 . by acylation of amino groups

43/124 . . with monocarboxylic acids, carbamic esters or halides, monoisocyanates, or haloformic acid esters **[3]**

43/128 . . . Aliphatic, cycloaliphatic or araliphatic acids **[3]**

43/132 . . . having the carboxyl group directly attached to an aromatic carbocyclic ring **[3]**

43/136 . . with polyfunctional acylating agents **[3]**

43/14 . . . with phosgene or thiophosgene **[3]**

43/145 . . . with polycarboxylic acids **[3]**
43/15 . . . . with formation of cyclic imides of ortho-or peri-dicarboxylic acids **[3]**
43/155 . . . with di- or poly-isocyanates **[3]**
43/16 . . . linking amino-azo compounds with other amino compounds by cyanuric acid or cyanuric acid residues **[3]**
43/18 . by acylation of hydroxy groups
43/20 . . with monocarboxylic acids, carbamic acid esters or halides, monoisocyanates or haloformic acid esters **[3]**
43/22 . . . having the carboxyl group directly attached to an aromatic carbocyclic ring **[3]**
43/24 . . with formation of $-O-SO_2-R$ or $-O-SO_3H$ radicals **[3]**
43/26 . . with polyfunctional acylating agents **[3]**
43/28 . by etherification of hydroxy groups **[3]**
43/30 . by esterification of $-COOH$ or $-SO_3H$ groups **[3]**
43/32 . by reacting carboxyl or sulfonic groups, or derivatives thereof, with amines; by reacting keto groups with amines **[3]**
43/34 . . by reacting ortho- or peri-dicarboxylic dyes **[3]**
43/36 . . with amino anthracene or amino anthraquinone dyes **[3]**
43/38 . . by reacting two or more ortho-hydroxy naphthoic acid dyes with polyamines **[3]**
43/40 . by substituting hetero atoms by radicals containing other hetero atoms **[3]**
43/42 . . by substituting radicals containing hetero atoms for $-CN$ radicals **[3]**
43/44 . by substituting amine groups for hydroxyl groups or hydroxy groups for amine groups; Desacylation of amino-acyl groups; Deaminating **[3]**

44/00 Azo dyes containing onium groups [3]
44/02 . containing ammonium groups not directly attached to an azo group **[3]**
44/04 . . from coupling components containing amino as the only directing group **[3]**
44/06 . . from coupling components containing hydroxyl as the only directing group **[3]**
44/08 . . from coupling components containing heterocyclic rings **[3]**
44/10 . containing cyclammonium groups attached to an azo group by a carbon atom of the ring system **[3]**
44/12 . . having one nitrogen atom as the only ring hetero atom **[3]**
44/14 . . 1,2-Diazoles or hydrogenated 1,2-diazoles **[3]**
44/16 . . 1,3-Diazoles or hydrogenated 1,3-diazoles **[3]**
44/18 . . having three nitrogen atoms as the only ring hetero atoms **[3]**
44/20 . . Thiazoles or hydrogenated thiazoles **[3]**

45/00 Complex metal compounds of azo dyes
45/01 . characterised by the method of metallisation **[3]**
45/02 . Preparation from dyes containing in o-position a hydroxy group and in o1-position hydroxy, alkoxy, carboxyl, amino, or keto groups **[2]**
45/04 . . Azo compounds in general
45/06 . . . Chromium compounds
45/08 . . . Copper compounds
45/10 . . . Cobalt compounds
45/12 . . . other metal compounds
45/14 . . Monoazo compounds
45/16 . . . containing chromium
45/18 . . . containing copper
45/20 . . . containing cobalt
45/22 . . . containing other metals
45/24 . . Disazo or polyazo compounds
45/26 . . . containing chromium
45/28 . . . containing copper
45/30 . . . containing cobalt
45/32 . . . containing other metals
45/34 . Preparation from o-monohydroxy azo compounds having in the o1-position an atom or functional group other than hydroxy, alkoxy, carboxyl, amino, or keto groups
45/36 . . by oxidation of hydrogen in o1-position
45/38 . Preparation from compounds with $-OH$ and $-COOH$ adjacent in the same ring or in peri position
45/40 . . Chromium compounds
45/42 . . Copper compounds
45/44 . . Cobalt compounds
45/46 . . Other metal compounds
45/48 . Preparation from other complex metal compounds of azo dyes

46/00 Azo dyes not provided for in groups C09B 27/00 to C09B 45/00 [2]

47/00 Porphines; **Azaporphines**
47/04 . Phthalocyanines **[3]**
47/06 . . Preparation from carboxylic acids or derivatives thereof **[3]**
47/067 . . . from phthalodinitriles **[3]**
47/073 . . Preparation from isoindolenines **[3]**
47/08 . . Preparation from other phthalocyanine compounds **[3]**
47/10 . . . Obtaining compounds having halogen atoms directly bound to the phthalocyanine skeleton **[3]**
47/12 . . . Obtaining compounds having alkyl radicals, or alkyl radicals substituted by hetero atoms, bound to the phthalocyanine skeleton **[3]**
47/14 . . . . having alkyl radicals substituted by halogen atoms **[3]**
47/16 . . . . having alkyl radicals substituted by nitrogen atoms **[3]**
47/18 . . . Obtaining compounds having oxygen atoms directly bound to the phthalocyanine skeleton **[3]**
47/20 . . . Obtaining compounds having sulfur atoms directly bound to the phthalocyanine skeleton **[3]**
47/22 . . . Obtaining compounds having nitrogen atoms directly bound to the phthalocyanine skeleton **[3]**
47/24 . . . Obtaining compounds having $-COOH$ or $-SO_3H$ radicals, or derivatives thereof, directly bound to the phthalocyanine radical **[3]**
47/26 . . . . Amide radicals **[3]**
47/28 . . Phthalocyanine dyes containing $-S-SO_3H$ radicals **[3]**
47/30 . . Metal-free phthalocyanines **[3]**
47/32 . . Cationic phthalocyanine dyes **[3]**

48/00 Quinacridones

49/00 Sulfur dyes
49/02 . from nitro compounds of the benzene, naphthalene or anthracene series

49/04 . from amino compounds of the benzene, naphthalene or anthracene series
49/06 . from azines, oxazines, thiazines, or thiazoles
49/08 . from urea derivatives
49/10 . from diphenylamines, indamines, or indophenols
49/12 . from other compounds

50/00 Formazane dyes; Tetrazolium dyes [3]
50/02 . Tetrazolium dyes **[3]**
50/04 . Metal-free formazane dyes **[3]**
50/06 . Bis-formazane dyes **[3]**
50/08 . Meso-acyl formazane dyes **[3]**
50/10 . Cationic formazane dyes **[3]**

51/00 Nitro or nitroso dyes

53/00 Quinone imides
53/02 . Indamines; Indophenols

55/00 Azomethine dyes

56/00 Azo dyes containing other chromophoric systems [3]
56/02 . Azomethine-azo dyes **[3]**
56/04 . Stilbene-azo dyes **[3]**
56/06 . . Bis- or poly-stilbene-azo dyes **[3]**
56/08 . Styryl-azo dyes **[3]**
56/10 . Formazane-azo dyes **[3]**
56/12 . Anthraquinone-azo dyes **[3]**
56/14 . Phthalocyanine-azo dyes **[3]**
56/16 . Methine- or polymethine-azo dyes **[3]**
56/18 . Hydrazone-azo dyes **[3]**
56/20 . Triazene-azo dyes **[3]**

57/00 Other synthetic dyes of known constitution
57/02 . Coumarine dyes **[3]**
57/04 . Isoindoline dyes **[3]**
57/06 . Naphtholactam dyes **[3]**
57/08 . Naphthalimide dyes; Phthalimide dyes **[3]**
57/10 . Metal complexes of organic compounds not being dyes in uncomplexed form **[3]**
57/12 . Perinones, i.e. naphthoylene-aryl-imidazoles **[3]**
57/14 . Benzoxanthene dyes; Benzothioxanthene dyes **[3]**

59/00 Artificial dyes of unknown constitution

61/00 Dyes of natural origin prepared from natural sources

62/00 Reactive dyes, i.e. dyes which form covalent bonds with the substrates or which polymerise with themselves [3]
62/002 . with the linkage of the reactive group being alternatively specified **[3]**
62/004 . . Anthracene dyes **[3]**
62/006 . . Azo dyes **[3]**
62/008 . . . Monoazo dyes **[3]**
62/01 . . . Disazo or polyazo dyes **[3]**
62/012 . . . Metal complex azo dyes **[3]**
62/014 . . Nitro dyes **[3]**
62/016 . . Porphines; Azaporphines **[3]**
62/018 . . Formazane dyes **[3]**
62/02 . with the reactive group directly attached to a heterocyclic ring
62/022 . . the heterocyclic ring being alternatively specified **[3]**
62/024 . . . Anthracene dyes **[3]**
62/026 . . . Azo dyes **[3]**
62/028 . . . . Monoazo dyes **[3]**
62/03 . . . . Disazo or polyazo dyes **[3]**
62/032 . . . . Metal complex azo dyes **[3]**
62/034 . . . Nitro dyes **[3]**
62/036 . . . Porphines; Azaporphines **[3]**
62/038 . . . Formazane dyes **[3]**
62/04 . . to a triazine ring
62/06 . . . Anthracene dyes
62/08 . . . Azo dyes
62/085 . . . . Monoazo dyes **[3]**
62/09 . . . . Disazo or polyazo dyes **[3]**
62/095 . . . . Metal complex azo dyes **[3]**
62/10 . . . Porphines; Azaporphines
62/12 . . to a pyridazine ring
62/14 . . . Anthracene dyes
62/16 . . . Azo dyes
62/165 . . . . Monoazo dyes **[3]**
62/17 . . . . Disazo or polyazo dyes **[3]**
62/175 . . . . Metal complex azo dyes **[3]**
62/18 . . . Porphines; Azaporphines
62/20 . . to a pyrimidine ring
62/22 . . . Anthracene dyes
62/24 . . . Azo dyes
62/245 . . . . Monoazo dyes **[3]**
62/25 . . . . Disazo or polyazo dyes **[3]**
62/255 . . . . Metal complex azo dyes **[3]**
62/26 . . . Porphines; Azaporphines
62/28 . . to a pyrazine ring
62/30 . . . Anthracene dyes
62/32 . . . Azo dyes
62/325 . . . . Monoazo dyes **[3]**
62/33 . . . . Disazo or polyazo dyes **[3]**
62/335 . . . . Metal complex azo dyes **[3]**
62/34 . . . Porphines; Azaporphines
62/343 . . to a five-membered ring **[3]**
62/345 . . . Anthracene dyes **[3]**
62/347 . . . Azo dyes **[3]**
62/35 . . . . Monoazo dyes **[3]**
62/353 . . . . Disazo or polyazo dyes **[3]**
62/355 . . . . Metal complex azo dyes **[3]**
62/357 . . . Porphines; Azaporphines **[3]**
62/36 . . to some other heterocyclic ring
62/38 . . . Anthracene dyes
62/40 . . . Azo dyes
62/405 . . . . Monoazo dyes **[3]**
62/41 . . . . Disazo or polyazo dyes **[3]**
62/415 . . . . Metal complex azo dyes **[3]**
62/42 . . . Porphines; Azaporphines
62/44 . with the reactive group not directly attached to a heterocyclic ring
62/443 . . the reactive group being alternatively specified **[3]**
62/445 . . . Anthracene dyes **[3]**
62/447 . . . Azo dyes **[3]**
62/45 . . . . Monoazo dyes **[3]**
62/453 . . . . Disazo or polyazo dyes **[3]**
62/455 . . . . Metal complex azo dyes **[3]**
62/457 . . . Porphines; Azaporphines **[3]**
62/463 . . . Formazane dyes **[3]**
62/465 . . the reactive group being an acryloyl group, a quaternised or non-quaternised aminoalkyl carbonyl group, or a $(-N)_n-CO-A-O-X$ or $(-N)_n-CO-A-Hal$ group, wherein A is an alkylene or alkylidene group, X is hydrogen or an acyl radical of an organic or inorganic acid, Hal is a halogen atom, and n is 0 or 1 **[3]**

62/467 . . . Anthracene dyes **[3]**
62/47 . . . Azo dyes **[3]**
62/473 . . . . Monoazo dyes **[3]**
62/475 . . . . Disazo or polyazo dyes **[3]**
62/477 . . . . Metal complex azo dyes **[3]**
62/483 . . . Porphines; Azaporphines **[3]**
62/485 . . the reactive group being a halo-cyclobutyl-carbonyl, halo-cyclobutyl-vinyl-carbonyl, or halo-cyclobutenyl-carbonyl group **[3]**
62/487 . . . Anthracene dyes **[3]**
62/489 . . . Azo dyes **[3]**
62/491 . . . . Monoazo dyes **[3]**
62/493 . . . . Disazo or polyazo dyes **[3]**
62/495 . . . . Metal complex azo dyes **[3]**
62/497 . . . Porphines; Azaporphines **[3]**
62/503 . . the reactive group being an esterified or non-esterified hydroxyalkyl sulfonyl or mercaptoalkyl sulfonyl group, a quaternised or non-quaternised aminoalkyl sulfonyl group, a heterylmercapto alkyl sulfonyl group, a vinyl sulfonyl or a substituted vinyl sulfonyl group, or a thiophene-dioxide group **[3]**
62/505 . . . Anthracene dyes **[3]**
62/507 . . . Azo dyes **[3]**
62/51 . . . . Monoazo dyes **[3]**
62/513 . . . . Disazo or polyazo dyes **[3]**
62/515 . . . . Metal complex azo dyes **[3]**
62/517 . . . Porphines; Azaporphines **[3]**
62/523 . . the reactive group being an esterified or non-esterified hydroxyalkyl sulfonyl amido or hydroxyalkyl amino sulfonyl group, a quaternised or non-quaternised amino alkyl sulfonyl amido group, or a substituted alkyl amino sulfonyl group, or a halogen alkyl sulfonyl amido or halogen alkyl amino sulfonyl group or a vinyl sulfonylamido or a substituted vinyl sulfonamido group **[3]**
62/525 . . . Anthracene dyes **[3]**
62/527 . . . Azo dyes **[3]**
62/53 . . . . Monoazo dyes **[3]**
62/533 . . . . Disazo or polyazo dyes **[3]**
62/535 . . . . Metal complex azo dyes **[3]**
62/537 . . . Porphines; Azaporphines **[3]**
62/54 . . the reactive group being an epoxy or halohydrin group **[3]**
62/56 . . . Anthracene dyes
62/58 . . . Azo dyes
62/585 . . . . Monoazo dyes **[3]**
62/59 . . . . Disazo or polyazo dyes **[3]**
62/595 . . . . Metal complex azo dyes **[3]**
62/60 . . . Porphines; Azaporphines
62/62 . . the reactive group being an ethylenimino or N-acylated ethylenimino group or a $-CO-NH-CH_2-CH_2-X$ group, wherein X is a halogen atom, a quaternary ammonium group or O-acyl and acyl is derived from an organic or inorganic acid, or a beta-substituted ethylamine group
62/64 . . . Anthracene dyes
62/66 . . . Azo dyes
62/665 . . . . Monoazo dyes **[3]**
62/67 . . . . Disazo or polyazo dyes **[3]**
62/675 . . . . Metal complex azo dyes **[3]**
62/68 . . . Porphines; Azaporphines
62/763 . . the reactive group being a N-methylol group or an O-derivative thereof **[3]**
62/765 . . . Anthracene dyes **[3]**
62/767 . . . Azo dyes **[3]**
62/77 . . . . Monoazo dyes **[3]**
62/773 . . . . Disazo or polyazo dyes **[3]**
62/775 . . . . Metal complex azo dyes **[3]**
62/777 . . . Porphines; Azaporphines **[3]**
62/78 . . with other reactive groups
62/80 . . . Anthracene dyes
62/82 . . . Azo dyes
62/825 . . . . Monoazo dyes **[3]**
62/83 . . . . Disazo or polyazo dyes **[3]**
62/835 . . . . Metal complex azo dyes **[3]**
62/84 . . . Porphines; Azaporphines

Lakes; **Mordants**; **Dyestuff preparations**

63/00 Lakes

65/00 Compositions containing mordants (preparation of the mordant compounds C01, C07)

67/00 Influencing the physical, e.g. the dyeing or printing, properties of dyestuffs without chemical reaction, e.g. by treating with solvents; **Process features in the making of dyestuff preparations**; **Dyestuff preparations of a special physical nature, e.g. tablets, films**

67/02 . Dyestuff preparations characterised by special physical forms, e.g. tablets, films **[3]**
67/04 . Grinding or milling (C09B 67/14 takes precedence) **[3]**
67/06 . Drying **[3]**
67/08 . Coated particulate pigments or dyes **[3]**
67/10 . Influencing the physical properties by treatment with a liquid, e.g. solvents (C09B 67/14, C09B 67/18, C09B 67/20 take precedence) **[3]**
67/12 . . of phthalocyanines **[3]**
67/14 . Influencing the physical properties by treatment with an acid **[3]**
67/16 . . of phthalocyanines **[3]**
67/18 . Influencing the physical properties by treatment with an amine **[3]**
67/20 . Preparations of organic pigments **[3]**
67/22 . Mixtures of different pigments or dyes or solid solutions of pigments or dyes **[3]**
67/24 . Preparations of acid dyes or reactive dyes **[3]**
67/26 . . in liquid form **[3]**
67/28 . Preparations of vat or sulfur dyes **[3]**
67/30 . . in liquid form **[3]**
67/32 . Preparations of cationic or basic dyes **[3]**
67/34 . . in liquid form **[3]**
67/36 . Azoic dyestuff preparations **[3]**
67/38 . Preparations of disperse dyes **[3]**
67/40 . . in liquid form **[3]**
67/42 . Preparations of dyes not provided for in a single one of groups C09B 67/24 to C09B 67/40 **[3]**
67/44 . . Solutions **[3]**
67/46 . . Dispersions **[3]**
67/48 . Crystalline modifications of pigments or dyestuff (C09B 67/24 takes precedence) **[3]**
67/50 . . of phthalocyanines **[3]**
67/52 . . of quinacridones **[3]**
67/54 . Separation; Purification (C09B 67/06, C09B 67/10 take precedence) **[3]**

69/00 **Dyes not provided for by a single group of this subclass [2]**

69/02 . Dyestuff salts, e.g. salts of acid dyes with basic dyes (for Na, K, or NH_4+ salts of dyes or for chlorides, sulfates or chlorozincates, see the relevant dye groups) **[3]**

69/04 . . of anionic dyes with nitrogen containing compounds **[3]**

69/06 . . of cationic dyes with organic acids **[3]**

69/08 . Dyes containing a splittable water solubilising group **[3]**

69/10 . Polymeric dyes; Reaction products of dyes with monomers or with macromolecular compounds **[3]**

C09C **TREATMENT OF INORGANIC MATERIALS, OTHER THAN FIBROUS FILLERS, TO ENHANCE THEIR PIGMENTING OR FILLING PROPERTIES** (preparation of inorganic compounds or non-metallic elements C01; treatment of materials specially adapted to enhance their filling properties in mortars, concrete or artificial stone C04B 14/00, C04B 18/00, C04B 20/00); **PREPARATION OF CARBON BLACK [4]**

Note

In this subclass, in the absence of an indication to the contrary, a compound is classified in the last appropriate place.

1/00 **Treatment of specific inorganic materials other than fibrous fillers** (luminescent or tenebrescent materials C09K); **Preparation of carbon black**

1/02 . Compounds of alkaline earth metals or magnesium

1/04 . Compounds of zinc

1/06 . . Lithopone

1/08 . . Zinc chromate

1/10 . Compounds of cadmium

1/12 . . Cadmium sulfoselenide

1/14 . Compounds of lead

1/16 . . White lead

1/18 . . Red lead

1/20 . . Lead chromate

1/22 . Compounds of iron

1/24 . . Oxides of iron

1/26 . . Iron blues

1/28 . Compounds of silicon

1/30 . . Silicic acid

1/32 . . Ultramarine

1/34 . Compounds of chromium

1/36 . Compounds of titanium

1/38 . Compounds of mercury

1/40 . Compounds of aluminium

1/42 . . Clays (preparatory treatment for clay-wares C04B 33/04)

1/44 . Carbon

1/46 . . Graphite (preparation of graphite C01B 31/04)

1/48 . . Carbon black

1/50 . . . Furnace black

1/52 . . . Channel black

1/54 . . . Acetylene black; thermal black

1/56 . . . Treatment of carbon black

1/58 . . . . Agglomerating, pelleting, or the like by wet methods

1/60 . . . . Agglomerating, pelleting, or the like by dry methods

1/62 . Metallic pigments or fillers (obtaining metal powder, see the relevant class for the method used, e.g. B22F 9/00, C21B 15/02, C22B 5/20, C25C 5/00)

1/64 . . Aluminium

1/66 . . Copper alloys, e.g. bronze

1/68 . Loose abrasive particles

3/00 **Treatment in general of inorganic materials, other than fibrous fillers, to enhance their pigmenting or filling properties** (dyeing other macromolecular particles C08J 3/20; dyeing macromolecular fibres D06P)

3/04 . Physical treatment, e.g. grinding, treatment with ultrasonic vibrations **[2]**

3/06 . Treatment with inorganic compounds **[2]**

3/08 . Treatment with low-molecular-weight organic compounds **[2]**

3/10 . Treatment with macromolecular organic compounds **[2]**

3/12 . Treatment with organosilicon compounds **[2]**

C09D **COATING COMPOSITIONS, E.G. PAINTS, VARNISHES OR LACQUERS**; **FILLING PASTES**; **CHEMICAL PAINT OR INK REMOVERS**; **INKS**; **CORRECTING FLUIDS**; **WOODSTAINS**; **PASTES OR SOLIDS FOR COLOURING OR PRINTING**; **USE OF MATERIALS THEREFOR** (cosmetics A61K; processes for applying liquids or other fluent materials to surfaces, in general, B05D; staining wood B27K 5/02; glazes or vitreous enamels C03C; organic macromolecular compounds C08; organic dyes or closely-related compounds for producing dyes, mordants or lakes, per se, C09B; treatment of inorganic materials other than fibrous fillers used as pigments or fillers C09C; natural resins, French polish, drying-oils, driers, turpentine, per se, C09F; polishing compositions other than French polish, ski waxes C09G; preparation of glue or gelatine C09H; adhesives or use of materials as adhesives C09J; materials for sealing or packing joints or covers C09K 3/10; materials for stopping leaks C09K 3/12; processes for the electrolytic or electrophoretic production of coatings C25D; textile-treating compositions D06; paper-making D21; conductors, insulators H01B) **[5]**

(1) In this subclass, the following terms or expressions are used with the meanings indicated:
- "use of materials for coating compositions" means the use of known or new polymers or products;
- "rubber" includes:
  (a) natural or conjugated diene rubbers;
  (b) rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, see the group provided for coating compositions based on such macromolecular compounds);
- "based on" is defined by means of Note (3), below;
- "filling pastes" means materials used to fill up the holes or cavities of a substrate in order to smooth its surface prior to coating. **[5]**

(2) In this subclass, coating compositions, containing specific organic macromolecular substances are classified only according to the macromolecular substance, non-macromolecular substances not being taken into account.
Example: a coating composition containing polyethene and amino-propyltrimethoxysilane is classified in group C09D 123/06.
However, coating compositions containing combinations of organic non-macromolecular compounds having at least one polymerisable carbon-to-carbon unsaturated bond with prepolymers or polymers other than unsaturated polymers of groups C09D 159/00 to C09D 187/00 are classified according to the unsaturated non-macromolecular component in group C09D 4/00.
Example: a coating composition containing polyethene and styrene monomer is classified in group C09D 4/00.
Aspects relating to the physical nature of the coating compositions or to the effects produced, as defined in group C09D 5/00, if clearly and explicitly stated, are also classified in this subclass.
Coating compositions characterised by other features, e.g. additives, are classified in group C09D 7/00, unless the macromolecular constituent is specified. **[5]**

(3) In this subclass, coating compositions comprising two or more macromolecular constituents are classified according to the macromolecular constituent or constituents present in the highest proportion, i.e. the constituent on which the composition is based. If the composition is based on two or more constituents, present in equal proportions, the composition is classified according to each of these constituents.
Example: a coating composition containing 80 parts of polyethene and 20 parts of polyvinylchloride is classified in group C09D 123/06. A coating composition containing 40 parts of polyethene and 40 parts of polyvinylchloride is classified in groups C09D 123/06 and C09D 127/06. **[5]**

Subclass index

1/00 **Coating compositions, e.g. paints, varnishes or lacquers, based on inorganic substances** (C04B takes precedence; glazes or vitreous enamels C03C)

1/02 . alkali metal silicates
1/04 . . with organic additives
1/06 . cement
1/08 . . with organic additives
1/10 . lime
1/12 . . with organic additives

4/00 **Coating compositions, e.g. paints, varnishes or lacquers, based on organic non-macromolecular compounds having at least one polymerisable carbon-to-carbon unsaturated bond [5]**

4/02 . Acrylmonomers **[5]**
4/04 . . Cyanoacrylate monomers **[5]**
4/06 . in combination with a macromolecular compound other than an unsaturated polymer of groups C09D 159/00 to C09D 187/00 **[5]**

5/00 **Coating compositions, e.g. paints, varnishes or lacquers, characterised by their physical nature or the effects produced**; **Filling pastes [5]**

5/02 . Emulsion paints
5/03 . Powdery paints (C09D 5/46 takes precedence) **[4]**
5/04 . Thixotropic paints
5/06 . Artists' paints
5/08 . Anti-corrosive paints
5/10 . . containing metal dust
5/12 . . Wash primers
5/14 . Paints containing biocides, e.g. fungicides, insecticides or pesticides (C09D 5/16 takes precedence) **[6]**
5/16 . Anti-fouling paints; Underwater paints **[6]**
5/18 . Fireproof paints
5/20 . for coatings strippable as coherent films, e.g. temporary coatings strippable as coherent films
5/22 . Luminous paints
5/23 . Magnetisable or magnetic paints or lacquers **[2]**
5/24 . Electrically-conducting paints
5/25 . Electrically-insulating paints or lacquers **[2]**
5/26 . Thermosensitive paints
5/28 . for wrinkle, crackle, orange-peel, or similar decorative effects
5/29 . for multicolour effects **[2]**
5/30 . Camouflage paints
5/32 . Radiation-absorbing paints
5/33 . Radiation-reflecting paints (C09D 5/30 takes precedence) **[4]**
5/34 . Filling pastes (materials for sealing or packing joints or covers C09K 3/10; materials for stopping leaks C09K 3/12)
5/36 . Pearl essence, e.g. coatings containing platelet-like pigments for pearl lustre
5/38 . Paints containing free metal not provided for in groups C09D 5/00 to C09D 5/36 **[2]**
5/44 . for electrophoretic applications (C09D 5/46 takes precedence; processes for coating by electrophoresis C25D 13/00) **[4]**
5/46 . for flame-spraying; for electrostatic or whirl-sintering coating **[4]**

7/00 **Features of coating compositions, not provided for in group C09D 5/00** (driers C09F 9/00)

7/02 . Use of compounds as anti-settling agents
7/04 . Use of compounds as anti-skinning agents
7/06 . Use of compounds as levelling agents
7/12 . Other additives
7/14 . Special processes for incorporating ingredients

9/00 **Chemical paint or ink removers** (fluid media for correction of typographical errors by coating C09D 10/00) **[4]**

9/02 . with abrasives
9/04 . with surface-active agents

10/00 **Correcting fluids, e.g. fluid media for correction of typographical errors by coating [5]**

11/00 **Inks**

11/02 . Printing inks
11/04 . . based on proteins
11/06 . . based on fatty oils
11/08 . . based on natural resins
11/10 . . based on artificial resins
11/12 . . based on waxes or bitumen
11/14 . . based on carbohydrates
11/16 . Writing inks
11/18 . . for use in ball-point writing instruments
11/20 . . indelible

13/00 **Pencil-leads**; **Crayon compositions**; **Chalk compositions**

15/00 **Woodstains [2]**

17/00 **Pigment pastes, e.g. for mixing in paints** (artists' paints C09D 5/06) **[2]**

Coating compositions based on polysaccharides or on their derivatives [5]

(1) In groups C09D 101/00 to C09D 201/00, any macromolecular constituent of a coating composition which is not identified by the classification according to Note (3) after the title of subclass C09D, and the use of which is determined to be novel and non-obvious, must also be classified in a group chosen from groups C09D 101/00 to C09D 201/00. **[8]**

(2) Any macromolecular constituent of a coating composition which is not identified by the classification according to Note (3) after the title of subclass C09D or Note (1) above, and which is considered to represent information of interest for search, may also be classified in a group chosen from groups C09D 101/00 to C09D 201/00. This can for example be the case when it is considered of interest to enable searching of coating compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information." **[8]**

101/00 **Coating compositions based on cellulose, modified cellulose, or cellulose derivatives [5]**

101/02 . Cellulose; Modified cellulose **[5]**
101/04 . . Oxycellulose; Hydrocellulose **[5]**
101/06 . . Cellulose hydrate **[5]**
101/08 . Cellulose derivatives **[5]**
101/10 . . Esters of organic acids (of both organic acids and inorganic acids C09D 101/20) **[5]**
101/12 . . . Cellulose acetate **[5]**
101/14 . . . Mixed esters, e.g. cellulose acetate-butyrate **[5]**
101/16 . . Esters of inorganic acids (of both organic acids and inorganic acids C09D 101/20) **[5]**
101/18 . . . Cellulose nitrate **[5]**
101/20 . . Esters of both organic acids and inorganic acids **[5]**
101/22 . . Cellulose xanthate **[5]**
101/24 . . . Viscose **[5]**
101/26 . . Cellulose ethers **[5]**
101/28 . . . Alkyl ethers **[5]**
101/30 . . . Aryl ethers; Aralkyl ethers **[5]**
101/32 . . Cellulose ether-esters **[5]**

103/00 **Coating compositions based on starch, amylose or amylopectin or on their derivatives or degradation products [5]**

103/02 . Starch; Degradation products thereof, e.g. dextrin **[5]**
103/04 . Starch derivatives **[5]**
103/06 . . Esters **[5]**
103/08 . . Ethers **[5]**
103/10 . . Oxidised starch **[5]**
103/12 . Amylose; Amylopectin; Degradation products thereof **[5]**
103/14 . Amylose derivatives; Amylopectin derivatives **[5]**

103/16 . . Esters **[5]**
103/18 . . Ethers **[5]**
103/20 . . Oxidised amylose; Oxidised amylopectin **[5]**

105/00 Coating compositions based on polysaccharides or on their derivatives, not provided for in groups C09D 101/00 or C09D 103/00 [5]
105/02 . Dextran; Derivatives thereof **[5]**
105/04 . Alginic acid; Derivatives thereof **[5]**
105/06 . Pectin; Derivatives thereof **[5]**
105/08 . Chitin; Chondroitin sulfate; Hyaluronic acid; Derivatives thereof **[5]**
105/10 . Heparin; Derivatives thereof **[5]**
105/12 . Agar-agar; Derivatives thereof **[5]**
105/14 . Hemicellulose; Derivatives thereof **[5]**
105/16 . Cyclodextrin; Derivatives thereof **[5]**

Coating compositions based on rubbers or on their derivatives [5]

107/00 Coating composition based on natural rubber [5]
107/02 . Latex **[5]**

109/00 Coating compositions based on homopolymers or copolymers of conjugated diene hydrocarbons [5]
109/02 . Copolymers with acrylonitrile **[5]**
109/04 . . Latex **[5]**
109/06 . Copolymers with styrene **[5]**
109/08 . . Latex **[5]**
109/10 . Latex (C09D 109/04, C09D 109/08 take precedence) **[5]**

111/00 Coating compositions based on homopolymers or copolymers of chloroprene [5]
111/02 . Latex **[5]**

113/00 Coating compositions based on rubbers containing carboxyl groups [5]
113/02 . Latex **[5]**

115/00 Coating compositions based on rubber derivatives (C09D 111/00, C09D 113/00 take precedence) **[5]**
115/02 . Rubber derivatives containing halogen **[5]**

117/00 Coating compositions based on reclaimed rubber [5]

119/00 Coating compositions based on rubbers, not provided for in groups C09D 107/00 to C09D 117/00 [5]
119/02 . Latex **[5]**

121/00 Coating compositions based on unspecified rubbers [5]
121/02 . Latex **[5]**

Coating compositions based on organic macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds [5]

(1) In groups C09D 123/00 to C09D 149/00, "aliphatic radical" means an acyclic or a non-aromatic carbocyclic carbon skeleton which is considered to be terminated by every bond to: **[8]**
(a) an element other than carbon; **[8]**
(b) a carbon atom having a double bond to one atom other than carbon; **[8]**
(c) an aromatic carbocyclic ring or a heterocyclic ring. **[8]**

(2) In groups C09D 123/00 to C09D 149/00, in the absence of an indication to the contrary, a copolymer is classified according to the major monomeric component. **[8]**

123/00 Coating compositions based on homopolymers or copolymers of unsaturated aliphatic hydrocarbons having only one carbon-to-carbon double bond; **Coating compositions based on derivatives of such polymers [5]**
123/02 . not modified by chemical after-treatment **[5]**
123/04 . . Homopolymers or copolymers of ethene **[5]**
123/06 . . . Polyethene **[5]**
123/08 . . . Copolymers of ethene (C09D 123/16 takes precedence) **[5]**
123/10 . . Homopolymers or copolymers of propene **[5]**
123/12 . . . Polypropene **[5]**
123/14 . . . Copolymers of propene (C09D 123/16 takes precedence) **[5]**
123/16 . . Ethene-propene or ethene-propene-diene copolymers **[5]**
123/18 . . Homopolymers or copolymers of hydrocarbons having four or more carbon atoms **[5]**
123/20 . . . having four to nine carbon atoms **[5]**
123/22 . . . . Copolymers of isobutene; Butyl rubber **[5]**
123/24 . . . having ten or more carbon atoms **[5]**
123/26 . modified by chemical after-treatment **[5]**
123/28 . . by reaction with halogens or halogen-containing compounds (C09D 123/32 takes precedence) **[5]**
123/30 . . by oxidation **[5]**
123/32 . . by reaction with phosphorus- or sulfur- containing compounds **[5]**
123/34 . . . by chlorosulfonation **[5]**
123/36 . . by reaction with nitrogen-containing compounds, e.g. by nitration **[5]**

125/00 Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an aromatic carbocyclic ring; **Coating compositions based on derivatives of such polymers [5]**
125/02 . Homopolymers or copolymers of hydrocarbons **[5]**
125/04 . . Homopolymers or copolymers of styrene **[5]**
125/06 . . . Polystyrene **[5]**
125/08 . . . Copolymers of styrene (C09D 129/08, C09D 135/06, C09D 155/02 take precedence) **[5]**
125/10 . . . . with conjugated dienes **[5]**
125/12 . . . . with unsaturated nitriles **[5]**
125/14 . . . . with unsaturated esters **[5]**
125/16 . . Homopolymers or copolymers of alkyl-substituted styrenes **[5]**
125/18 . Homopolymers or copolymers of aromatic monomers containing elements other than carbon and hydrogen **[5]**

127/00 Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a halogen; **Coating compositions based on derivatives of such polymers [5]**
127/02 . not modified by chemical after-treatment **[5]**
127/04 . . containing chlorine atoms **[5]**
127/06 . . . Homopolymers or copolymers of vinyl chloride **[5]**

127/08 . . . Homopolymers or copolymers of vinylidene chloride **[5]**
127/10 . . containing bromine or iodine atoms **[5]**
127/12 . . containing fluorine atoms **[5]**
127/14 . . . Homopolymers or copolymers of vinyl fluoride **[5]**
127/16 . . . Homopolymers or copolymers of vinylidene fluoride **[5]**
127/18 . . . Homopolymers or copolymers of tetrafluoroethene **[5]**
127/20 . . . Homopolymers or copolymers of hexafluoropropene **[5]**
127/22 . modified by chemical after-treatment **[5]**
127/24 . . halogenated **[5]**

129/00 Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an alcohol, ether, aldehydo, ketonic, acetal, or ketal radical; **Coating compositions based on hydrolysed polymers of esters of unsaturated alcohols with saturated carboxylic acids**; **Coating compositions based on derivatives of such polymers [5]**

129/02 . Homopolymers or copolymers of unsaturated alcohols (C09D 129/14 takes precedence) **[5]**
129/04 . . Polyvinyl alcohol; Partially hydrolysed homopolymers or copolymers of esters of unsaturated alcohols with saturated carboxylic acids **[5]**
129/06 . . Copolymers of allyl alcohol **[5]**
129/08 . . . with vinyl aromatic monomers **[5]**
129/10 . Homopolymers or copolymers of unsaturated ethers (C09D 135/08 takes precedence) **[5]**
129/12 . Homopolymers or copolymers of unsaturated ketones **[5]**
129/14 . Homopolymers or copolymers of acetals or ketals obtained by polymerisation of unsaturated acetals or ketals or by after-treatment of polymers of unsaturated alcohols **[5]**

131/00 Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid, or of a haloformic acid (based on hydrolysed polymers C09D 129/00); **Coating compositions based on derivatives of such polymers [5]**

131/02 . Homopolymers or copolymers of esters of monocarboxylic acids **[5]**
131/04 . . Homopolymers or copolymers of vinyl acetate **[5]**
131/06 . Homopolymers or copolymers of esters of polycarboxylic acids **[5]**
131/08 . . of phthalic acid **[5]**

133/00 Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by only one carboxyl radical, or of salts, anhydrides, esters, amides, imides, or nitriles thereof; **Coating compositions based on derivatives of such polymers [5]**

133/02 . Homopolymers or copolymers of acids; Metal or ammonium salts thereof **[5]**
133/04 . Homopolymers or copolymers of esters **[5]**
133/06 . . of esters containing only carbon, hydrogen and oxygen, the oxygen atom being present only as part of the carboxyl radical **[5]**
133/08 . . . Homopolymers or copolymers of acrylic acid esters **[5]**
133/10 . . . Homopolymers or copolymers of methacrylic acid esters **[5]**
133/12 . . . . Homopolymers or copolymers of methyl methacrylate **[5]**
133/14 . . of esters containing halogen, nitrogen, sulfur or oxygen atoms in addition to the carboxy oxygen **[5]**
133/16 . . . Homopolymers or copolymers of esters containing halogen atoms **[5]**
133/18 . Homopolymers or copolymers of nitriles **[5]**
133/20 . . Homopolymers or copolymers of acrylonitrile (C09D 155/02 takes precedence) **[5]**
133/22 . . Homopolymers or copolymers of nitriles containing four or more carbon atoms **[5]**
133/24 . Homopolymers or copolymers of amides or imides **[5]**
133/26 . . Homopolymers or copolymers of acrylamide or methacrylamide **[5]**

135/00 Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical, and containing at least another carboxyl radical in the molecule, or of salts, anhydrides, esters, amides, imides or nitriles thereof; **Coating compositions based on derivatives of such polymers [5]**

135/02 . Homopolymers or copolymers of esters (C09D 135/06, C09D 135/08 take precedence) **[5]**
135/04 . Homopolymers or copolymers of nitriles (C09D 135/06, C09D 135/08 take precedence) **[5]**
135/06 . Copolymers with vinyl aromatic monomers **[5]**
135/08 . Copolymers with vinyl ethers **[5]**

137/00 Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (based on polymers of cyclic esters of polyfunctional acids C09D 131/00; based on polymers of cyclic anhydrides of unsaturated acids C09D 135/00); **Coating compositions based on derivatives of such polymers [5]**

139/00 Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a single or double bond to nitrogen or by a heterocyclic ring containing nitrogen; **Coating compositions based on derivatives of such polymers [5]**

139/02 . Homopolymers or copolymers of vinylamine **[5]**
139/04 . Homopolymers or copolymers of monomers containing heterocyclic rings having nitrogen as ring member **[5]**
139/06 . . Homopolymers or copolymers of N-vinyl-pyrrolidones **[5]**
139/08 . . Homopolymers or copolymers of vinyl-pyridine **[5]**

141/00 **Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a bond to sulfur or by a heterocyclic ring containing sulfur**; **Coating compositions based on derivatives of such polymers [5]**

143/00 **Coating compositions based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing boron, silicon, phosphorus, selenium, tellurium or a metal**; **Coating compositions based on derivatives of such polymers [5]**

143/02 . Homopolymers or copolymers of monomers containing phosphorus **[5]**

143/04 . Homopolymers or copolymers of monomers containing silicon **[5]**

145/00 **Coating compositions based on homopolymers or copolymers of compounds having no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic or in a heterocyclic ring system**; **Coating compositions based on derivatives of such polymers** (based on polymers of cyclic esters of polyfunctional acids C09D 131/00; based on polymers of cyclic anhydrides or imides C09D 135/00) **[5]**

145/02 . Coumarone-indene polymers **[5]**

147/00 **Coating compositions based on homolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds**; **Coating compositions based on derivatives of such polymers** (C09D 145/00 takes precedence; based on conjugated diene rubbers C09D 109/00 to C09D 121/00) **[5]**

149/00 **Coating compositions based on homopolymers or copolymers of compounds having one or more carbon-to-carbon triple bonds**; **Coating compositions based on derivatives of such polymers [5]**

151/00 **Coating compositions based on graft polymers in which the grafted component is obtained by reactions only involving carbon-to-carbon unsaturated bonds** (based on ABS polymers C09D 155/02); **Coating compositions based on derivatives of such polymers [5]**

151/02 . grafted on to polysaccharides **[5]**

151/04 . grafted on to rubbers **[5]**

151/06 . grafted on to homopolymers or copolymers of aliphatic hydrocarbons containing only one carbon-to-carbon double bond **[5]**

151/08 . grafted on to macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[5]**

151/10 . grafted on to inorganic materials **[5]**

153/00 **Coating compositions based on block copolymers containing at least one sequence of a polymer obtained by reactions only involving carbon-to-carbon unsaturated bonds**; **Coating compositions based on derivatives of such polymers [5]**

153/02 . Vinyl aromatic monomers and conjugated dienes **[5]**

155/00 **Coating composition based on homopolymers or copolymers, obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in groups C09D 123/00 to C09D 153/00 [5]**

155/02 . ABS [Acrylonitrile-Butadiene-Styrene] polymers **[5]**

155/04 . Polyadducts obtained by the diene synthesis **[5]**

157/00 **Coating compositions based on unspecified polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds [5]**

157/02 . Copolymers of mineral oil hydrocarbons **[5]**

157/04 . Copolymers in which only the monomer in minority is defined **[5]**

157/06 . Homopolymers or copolymers containing elements other than carbon and hydrogen **[5]**

157/08 . . containing halogen atoms **[5]**

157/10 . . containing oxygen atoms **[5]**

157/12 . . containing nitrogen atoms **[5]**

Coating compositions based on organic macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds [5]

159/00 **Coating compositions based on polyacetals**; **Coating compositions based on derivatives of polyacetals [5]**

159/02 . Polyacetals containing polyoxymethylene sequence only **[5]**

159/04 . Copolyoxymethylenes **[5]**

161/00 **Coating compositions based on condensation polymers of aldehydes or ketones** (with polyalcohols C09D 159/00; with polynitriles C09D 177/00); **Coating compositions based on derivatives of such polymers [5]**

161/02 . Condensation polymers of aldehydes or ketones only **[5]**

161/04 . Condensation polymers of aldehydes or ketones with phenols only **[5]**

161/06 . . of aldehydes with phenols **[5]**

161/08 . . . with monohydric phenols **[5]**

161/10 . . . . Phenol-formaldehyde condensates **[5]**

161/12 . . . with polyhydric phenols **[5]**

161/14 . . . Modified phenol-aldehyde condensates **[5]**

161/16 . . of ketones with phenols **[5]**

161/18 . Condensation polymers of aldehydes or ketones with aromatic hydrocarbons or their halogen derivatives only **[5]**

161/20 . Condensation polymers of aldehydes or ketones with only compounds containing hydrogen attached to nitrogen (with amino phenols C09D 161/04) **[5]**

161/22 . . of aldehydes with acyclic or carbocyclic compounds **[5]**

161/24 . . . with urea or thiourea **[5]**

161/26 . . of aldehydes with heterocyclic compounds **[5]**

161/28 . . . with melamine **[5]**

161/30 . . of aldehydes with heterocyclic and acyclic or carbocyclic compounds **[5]**

161/32 . . Modified amine-aldehyde condensates **[5]**

161/34 . Condensation polymers of aldehydes or ketones with monomers covered by at least two of the groups C09D 161/04, C09D 161/18 and C09D 161/20 **[5]**

163/00 **Coating compositions based on epoxy resins**; **Coating compositions based on derivatives of epoxy resins [5]**

163/02 . Polyglycidyl ethers of bis-phenols **[5]**

163/04 . Epoxynovolacs **[5]**

163/06 . Triglycidylisocyanurates **[5]**

163/08 . Epoxidised polymerised polyenes **[5]**

163/10 . Epoxy resins modified by unsaturated compounds **[5]**

Note

In groups C09D 165/00 to C09D 185/00, in the absence of an indication to the contrary, coating compositions based on macromolecular compounds obtained by reactions forming two different linkages in the main chain are classified only according to the linkage present in excess. **[5]**

165/00 Coating compositions based on macromolecular compounds obtained by reactions forming a carbon-to-carbon link in the main chain (C09D 107/00 to C09D 157/00, C09D 161/00 take precedence); **Coating compositions based on derivatives of such polymers [5]**

165/02 . Polyphenylenes **[5]**

165/04 . Polyxylylenes **[5]**

167/00 Coating compositions based on polyesters obtained by reactions forming a carboxylic ester link in the main chain (based on polyester-amides C09D 177/12; based on polyester-imides C09D 179/08); **Coating compositions based on derivatives of such polymers [5]**

167/02 . Polyesters derived from dicarboxylic acids and dihydroxy compounds (C09D 167/06 takes precedence) **[5]**

167/03 . . the dicarboxylic acids and dihydroxy compounds having the hydroxy and the carboxyl groups directly linked to aromatic rings **[5]**

167/04 . Polyesters derived from hydroxy carboxylic acids, e.g. lactones (C09D 167/06 takes precedence) **[5]**

167/06 . Unsaturated polyesters having carbon-to-carbon unsaturation **[5]**

167/07 . . having terminal carbon-to-carbon unsaturated bonds **[5]**

167/08 . Polyesters modified with higher fatty oils or their acids, or with natural resins or resin acids **[5]**

169/00 Coating compositions based on polycarbonates; **Coating compositions based on derivatives of polycarbonates [5]**

171/00 Coating compositions based on polyethers obtained by reactions forming an ether link in the main chain (based on polyacetals C09D 159/00; based on epoxy resins C09D 163/00; based on polythioether-ethers C09D 181/02; based on polyethersulfones C09D 181/06); **Coating compositions based on derivatives of such polymers [5]**

171/02 . Polyalkylene oxides **[5]**

171/03 . . Polyepihalohydrins **[5]**

171/08 . Polyethers derived from hydroxy compounds or from their metallic derivatives (C09D 171/02 takes precedence) **[5]**

171/10 . . from phenols **[5]**

171/12 . . . Polyphenylene oxides **[5]**

171/14 . . Furfuryl alcohol polymers **[5]**

173/00 Coating compositions based on macromolecular compounds obtained by reactions forming a linkage containing oxygen or oxygen and carbon in the main chain, not provided for in groups C09D 159/00 to C09D 171/00; **Coating compositions based on derivatives of such polymers [5]**

173/02 . Polyanhydrides **[5]**

175/00 Coating compositions based on polyureas or polyurethanes; **Coating compositions based on derivatives of such polymers [5]**

175/02 . Polyureas **[5]**

175/04 . Polyurethanes **[5]**

175/06 . . from polyesters **[5]**

175/08 . . from polyethers **[5]**

175/10 . . from polyacetals **[5]**

175/12 . . from compounds containing nitrogen and active hydrogen, the nitrogen atom not being part of an isocyanate group **[5]**

175/14 . . Polyurethanes having carbon-to-carbon unsaturated bonds **[5]**

175/16 . . . having terminal carbon-to-carbon unsaturated bonds **[5]**

177/00 Coating compositions based on polyamides obtained by reactions forming a carboxylic amide link in the main chain (based on polyhydrazides C09D 179/06; based on polyamide-imides C09D 179/08); **Coating compositions based on derivatives of such polymers [5]**

177/02 . Polyamides derived from omega-amino carboxylic acids or from lactams thereof (C09D 177/10 takes precedence) **[5]**

177/04 . Polyamides derived from alpha-amino carboxylic acids (C09D 177/10 takes precedence) **[5]**

177/06 . Polyamides derived from polyamines and polycarboxylic acids (C09D 177/10 takes precedence) **[5]**

177/08 . . from polyamines and polymerised unsaturated fatty acids **[5]**

177/10 . Polyamides derived from aromatically bound amino and carboxyl groups of amino carboxylic acids or of polyamines and polycarboxylic acids **[5]**

177/12 . Polyester-amides **[5]**

179/00 Coating compositions based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen, with or without oxygen, or carbon only, not provided for in groups C09D 161/00 to C09D 177/00 [5]

179/02 . Polyamines **[5]**

179/04 . Polycondensates having nitrogen-containing heterocyclic rings in the main chain; Polyhydrazides; Polyamide acids or similar polyimide precursors **[5]**

179/06 . . Polyhydrazides; Polytriazoles; Polyamino-triazoles; Polyoxadiazoles **[5]**

179/08 . . Polyimides; Polyester-imides; Polyamide-imides; Polyamide acids or similar polyimide precursors **[5]**

181/00 Coating compositions based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing sulfur, with or without nitrogen, oxygen, or carbon only; **Coating compositions based on polysulfones**; **Coating compositions based on derivatives of such polymers [5]**

181/02 . Polythioethers; Polythioether-ethers **[5]**

181/04 . Polysulfides **[5]**

181/06 . Polysulfones; Polyethersulfones **[5]**

181/08 . Polysulfonates **[5]**

181/10 . Polysulfonamides; Polysulfonimides **[5]**

183/00 **Coating compositions based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon, with or without sulfur, nitrogen, oxygen, or carbon only**; **Coating compositions based on derivatives of such polymers [5]**

183/02 . Polysilicates **[5]**

183/04 . Polysiloxanes **[5]**

183/05 . . containing silicon bound to hydrogen **[5]**

183/06 . . containing silicon bound to oxygen-containing groups (C09D 183/12 takes precedence) **[5]**

183/07 . . containing silicon bound to unsaturated aliphatic groups **[5]**

183/08 . . containing silicon bound to organic groups containing atoms other than carbon, hydrogen, and oxygen **[5]**

183/10 . Block or graft copolymers containing polysiloxane sequences (obtained by polymerising a compound having a carbon-to-carbon double bond on to a polysiloxane C09D 151/08, C09D 153/00) **[5]**

183/12 . . containing polyether sequences **[5]**

183/14 . in which at least two but not all the silicon atoms are connected by linkages other than oxygen atoms (C09D 183/10 takes precedence) **[5]**

183/16 . in which all the silicon atoms are connected by linkages other than oxygen atoms **[5]**

185/00 **Coating compositions based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing atoms other than silicon, sulfur, nitrogen, oxygen, and carbon**; **Coating compositions based on derivatives of such polymers [5]**

185/02 . containing phosphorus **[5]**

185/04 . containing boron **[5]**

187/00 **Coating compositions based on unspecified macromolecular compounds, obtained otherwise than by polymerisation reactions only involving unsaturated carbon-to-carbon bonds [5]**

Coating compositions based on natural macromolecular compounds or on derivatives thereof [5]

189/00 **Coating compositions based on proteins**; **Coating compositions based on derivatives thereof** (foodstuff preparations A23J 3/00) **[5]**

189/02 . Casein-aldehyde condensates **[5]**

189/04 . Products derived from waste materials, e.g. horn, hoof or hair **[5]**

189/06 . . derived from leather or skin **[5]**

191/00 **Coating compositions based on oils, fats or waxes**; **Coating compositions based on derivatives thereof** (polishing compositions, ski waxes C09G; soaps, detergent compositions C11D) **[5]**

191/02 . Vulcanised oils, e.g. factice **[5]**

191/04 . Linoxyn **[5]**

191/06 . Waxes **[5]**

191/08 . . Mineral waxes **[5]**

193/00 **Coating compositions based on natural resins**; **Coating compositions based on derivatives thereof** (based on polysaccharides C09D 101/00 to C09D 105/00; based on natural rubber C09D 107/00; polishing compositions C09G) **[5]**

193/02 . Shellac **[5]**

193/04 . Rosin **[5]**

195/00 **Coating compositions based on bituminous materials, e.g. asphalt, tar or pitch [5]**

197/00 **Coating compositions based on lignin-containing materials** (based on polysaccharides C09D 101/00 to C09D 105/00) **[5]**

197/02 . Lignocellulosic material, e.g. wood, straw or bagasse **[5]**

199/00 **Coating compositions based on natural macromolecular compounds or on derivatives thereof, not provided for in groups C09D 101/00 to C09D 107/00 or C09D 189/00 to C09D 197/00 [5]**

201/00 **Coating compositions based on unspecified macromolecular compounds [5]**

201/02 . characterised by the presence of specified groups **[5]**

201/04 . . containing halogen atoms **[5]**

201/06 . . containing oxygen atoms **[5]**

201/08 . . . Carboxyl groups **[5]**

201/10 . . containing hydrolysable silane groups **[5]**

C09F **NATURAL RESINS**; **FRENCH POLISH**; **DRYING-OILS**; **DRIERS (SICCATIVES)**; **TURPENTINE**

1/00 **Obtaining, purification, or chemical modification of natural resins, e.g. oleo-resins**

1/02 . Purification

1/04 . Chemical modification, e.g. esterification

3/00 **Obtaining spirits of turpentine**

3/02 . as a by-product in the paper-pulping process

5/00 **Obtaining drying-oils**

5/02 . from natural sources

5/04 . . from cashew nuts

5/06 . by dehydration of hydroxylated fatty acids or oils

5/08 . by esterification of fatty acids

5/10 . Refining

5/12 . . by distillation

7/00 **Chemical modification of drying-oils** (factice C08H)

7/02 . by oxidising

7/04 . by voltolising

7/06 . by polymerisation

7/08 . by isomerisation

7/10 . by re-esterification

7/12 . Apparatus therefor

9/00 **Compounds to be used as driers (siccatives)**

11/00 **Preparation of French polish**

C09G POLISHING COMPOSITIONS OTHER THAN FRENCH POLISH; SKI WAXES

1/00 **Polishing compositions** (French polish C09F 11/00; detergents C11D)
1/02 . containing abrasives or grinding agents
1/04 . Aqueous dispersions (C09G 1/02 takes precedence)
1/06 . Other polishing compositions
1/08 . . based on wax
1/10 . . . based on mixtures of wax and natural or synthetic resin
1/12 . . . . mixtures of wax and silicon-containing polycondensates
1/14 . . based on non-waxy substances
1/16 . . . on natural or synthetic resins
1/18 . . . on other substances

3/00 **Ski waxes**

C09H PREPARATION OF GLUE OR GELATINE

Note

Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

1/00 **Pretreatment of collagen-containing raw materials for the manufacture of glue**
1/02 . of bones (defatting bones C11B)
1/04 . of hides, hoofs, or leather scrap (recovery of tanning agents C14C)

3/00 **Isolation of glue or gelatine from raw materials, e.g. by extracting, by heating** (gelatine for foodstuffs A23J 1/10)
3/02 . Purification of solutions of gelatine

5/00 **Stabilisation of solutions of glue or gelatine**

7/00 **Preparation of water-insoluble gelatine**

9/00 **Drying of glue or gelatine**
9/02 . in the form of foils
9/04 . in the form of granules, e.g. beads

C09J ADHESIVES; NON-MECHANICAL ASPECTS OF ADHESIVE PROCESSES IN GENERAL; ADHESIVE PROCESSES NOT PROVIDED FOR ELSEWHERE; USE OF MATERIALS AS ADHESIVES

(surgical adhesives A61L 24/00; adhesives on the basis of non specified organic macromolecular compounds used as bonding agents in layered products B32B; labelling fabrics or comparable materials or articles with deformable surface using adhesives and thermo-activatable adhesives respectively B65C 5/02, B65C 5/04; preparation of glue or gelatine C09H; adhesive labels, tag tickets or similar identification of indication means G09F 3/10) **[5]**

(1) In this subclass, the following terms or expressions are used with the meanings indicated:
– "use of materials as adhesives" means the use of known or new polymers or products;
– "rubber" includes:
(a) natural or conjugated diene rubbers;
(b) rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, see the group provided for adhesives based on such macromolecular compounds);
– "based on" is defined by means of Note (3), below. **[5]**

(2) In this subclass, adhesives containing specific organic macromolecular substances are classified only according to the macromolecular substance, non-macromolecular substances not being taken into account.
Example: an adhesive containing polyethene and amino-propyltrimethoxysilane is classified in group C09J 123/06.
However, adhesives containing combinations of organic non-macromolecular compounds having at least one polymerisable carbon-to-carbon unsaturated bond with prepolymers or polymers other than unsaturated polymers of groups C09J 159/00 to C09J 187/00 are classified according to the unsaturated non-macromolecular component in group C09J 4/00.
Example: an adhesive containing polyethene and styrene monomer is classified in group C09J 4/00.
Aspects relating to the physical nature of the adhesives or to the effects produced, as defined in group C09J 9/00, if clearly and explicitly stated, are also classified in this subclass.
Adhesives characterised by other features, e.g. additives, are classified in group C09J 11/00, unless the macromolecular constituent is specified. **[5]**

(3) In this subclass, adhesives comprising two or more macromolecular constituents are classified according to the macromolecular constituent or constituents present in the highest proportion, i.e. the constituent on which the adhesive is based. If the adhesive is based on two or more constituents, present in equal proportions, the adhesive is classified according to each of these constituents.
Example: an adhesive containing 80 parts of polyethene and 20 parts of polyvinylchloride is classified in group C09J 123/06. An adhesive containing 40 parts of polyethene and 40 parts of polyvinylchloride is classified in groups C09J 123/06 and C09J 127/06. **[5]**

Subclass index

1/00 Adhesives based on inorganic constituents

1/02 . containing water-soluble alkali silicates

4/00 Adhesives based on organic non-macromolecular compounds having at least one polymerisable carbon-to-carbon unsaturated bond [5]

4/02 . Acrylmonomers **[5]**

4/04 . . Cyanoacrylate monomers **[5]**

4/06 . in combination with a macromolecular compound other than an unsaturated polymer of groups C09J 159/00 to C09J 187/00 **[5]**

5/00 Adhesive processes in general; Adhesive processes not provided for elsewhere, e.g. relating to primers

5/02 . involving pretreatment of the surfaces to be joined

5/04 . involving separate application of adhesive ingredients to the different surfaces to be joined

5/06 . involving heating of the applied adhesive

5/08 . using foamed adhesives

5/10 . Joining materials by welding overlapping edges with an insertion of plastic material

7/00 Adhesives in the form of films or foils

7/02 . on carriers

7/04 . . on paper or textile fabric (adhesive bandages, dressings or absorbent pads A61L 15/16)

9/00 Adhesives characterised by their physical nature or the effects produced, e.g. glue sticks (C09J 7/00 takes precedence) **[5]**

9/02 . Electrically-conducting adhesives (electrically conductive adhesives specially adapted for use in therapy or testing in vivo A61K 50/00) **[5]**

11/00 Features of adhesives not provided for in group C09J 9/00, e.g. additives [5]

11/02 . Non-macromolecular additives **[5]**

11/04 . . inorganic **[5]**

11/06 . . organic **[5]**

11/08 . Macromolecular additives **[5]**

Adhesives based on polysaccharides or on their derivatives [5]

(1) In groups C09J 101/00 to C09J 201/00, any macromolecular constituent of an adhesive composition which is not identified by the classification according to Note (3) after the title of subclass C09J, and the use of which is determined to be novel and non-obvious, must also be classified in a group chosen from groups C09J 101/00 to C09J 201/00. **[8]**

(2) Any macromolecular constituent of an adhesive composition which is not identified by the classification according to Note (3) after the title of subclass C09J or Note (1) above, and which is considered to represent information of interest for search, may also be classified in a group chosen from groups C09J 101/00 to C09J 201/00. This can, for example, be the case when it is considered of interest to enable searching of adhesive compositions using a combination of classification symbols. Such non-obligatory classification should be given as “additional information”. **[8]**

101/00 Adhesives based on cellulose, modified cellulose, or cellulose derivatives [5]

101/02 . Cellulose; Modified cellulose **[5]**

101/04 . . Oxycellulose; Hydrocellulose **[5]**

101/06 . . Cellulose hydrate **[5]**

101/08 . Cellulose derivatives **[5]**

101/10 . . Esters of organic acids (of both organic acids and inorganic acids C09J 101/20) **[5]**

101/12 . . . Cellulose acetate **[5]**

101/14 . . . Mixed esters, e.g. cellulose acetate-butyrate **[5]**

101/16 . . Esters of inorganic acids (of both organic acids and inorganic acids C09J 101/20) **[5]**

101/18 . . . Cellulose nitrate **[5]**

101/20 . . Esters of both organic acids and inorganic acids **[5]**

101/22 . . Cellulose xanthate **[5]**

101/24 . . . Viscose **[5]**

101/26 . . Cellulose ethers **[5]**

101/28 . . . Alkyl ethers **[5]**

101/30 . . . Aryl ethers; Aralkyl ethers **[5]**

101/32 . . Cellulose ether-esters **[5]**

103/00 Adhesives based on starch, amylose or amylopectin or on their derivatives or degradation products [5]

103/02 . Starch; Degradation products thereof, e.g. dextrin **[5]**

103/04 . Starch derivatives **[5]**

103/06 . . Esters **[5]**
103/08 . . Ethers **[5]**
103/10 . . Oxidised starch **[5]**
103/12 . Amylose; Amylopectin; Degradation products thereof **[5]**
103/14 . Amylose derivatives; Amylopectin derivatives **[5]**
103/16 . . Esters **[5]**
103/18 . . Ethers **[5]**
103/20 . . Oxidised amylose; Oxidised amylopectin **[5]**

105/00 Adhesives based on polysaccharides or on their derivatives, not provided for in groups C09J 101/00 or C09J 103/00 [5]
105/02 . Dextran; Derivatives thereof **[5]**
105/04 . Alginic acid; Derivatives thereof **[5]**
105/06 . Pectin; Derivatives thereof **[5]**
105/08 . Chitin; Chondroitin sulfate; Hyaluronic acid; Derivatives thereof **[5]**
105/10 . Heparin; Derivatives thereof **[5]**
105/12 . Agar-agar; Derivatives thereof **[5]**
105/14 . Hemicellulose; Derivatives thereof **[5]**
105/16 . Cyclodextrin; Derivatives thereof **[5]**

Adhesives based on rubbers or on their derivatives [5]

107/00 Adhesives based on natural rubber [5]
107/02 . Latex **[5]**

109/00 Adhesives based on homopolymers or copolymers of conjugated diene hydrocarbons [5]
109/02 . Copolymers with acrylonitrile **[5]**
109/04 . . Latex **[5]**
109/06 . Copolymers with styrene **[5]**
109/08 . . Latex **[5]**
109/10 . Latex (C09J 109/04, C09J 109/08 take precedence) **[5]**

111/00 Adhesives based on homopolymers or copolymers of chloroprene [5]
111/02 . Latex **[5]**

113/00 Adhesives based on rubbers containing carboxyl groups [5]
113/02 . Latex **[5]**

115/00 Adhesives based on rubber derivatives (C09J 111/00, C09J 113/00 take precedence) **[5]**
115/02 . Rubber derivatives containing halogen **[5]**

117/00 Adhesives based on reclaimed rubber [5]

119/00 Adhesives based on rubbers, not provided for in groups C09J 107/00 to C09J 117/00 [5]
119/02 . Latex **[5]**

121/00 Adhesives based on unspecified rubbers [5]
121/02 . Latex **[5]**

Adhesives based on organic macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds [5]

(1) In groups C09J 123/00 to C09J 149/00, "aliphatic radical" means an acyclic or a non-aromatic carbocyclic carbon skeleton which is considered to be terminated by every bond to: **[8]**
(a) an element other than carbon; **[8]**
(b) a carbon atom having a double bond to one atom other than carbon; **[8]**
(c) an aromatic carbocyclic ring or a heterocyclic ring. **[8]**

(2) In groups C09J 123/00 to C09J 149/00, in the absence of an indication to the contrary, a copolymer is classified according to the major monomeric component. **[8]**

123/00 Adhesives based on homopolymers or copolymers of unsaturated aliphatic hydrocarbons having only one carbon-to-carbon double bond; **Adhesives based on derivatives of such polymers [5]**
123/02 . not modified by chemical after-treatment **[5]**
123/04 . . Homopolymers or copolymers of ethene **[5]**
123/06 . . . Polyethene **[5]**
123/08 . . . Copolymers of ethene (C09J 123/16 takes precedence) **[5]**
123/10 . . Homopolymers or copolymers of propene **[5]**
123/12 . . . Polypropene **[5]**
123/14 . . . Copolymers of propene (C09J 123/16 takes precedence) **[5]**
123/16 . . Ethene-propene or ethene-propene-diene copolymers **[5]**
123/18 . . Homopolymers or copolymers of hydrocarbons having four or more carbon atoms **[5]**
123/20 . . . having four to nine carbon atoms **[5]**
123/22 . . . . Copolymers of isobutene; Butyl rubber **[5]**
123/24 . . . having ten or more carbon atoms **[5]**
123/26 . modified by chemical after-treatment **[5]**
123/28 . . by reaction with halogens or halogen-containing compounds (C09J 123/32 takes precedence) **[5]**
123/30 . . by oxidation **[5]**
123/32 . . by reaction with phosphorus- or sulfur-containing compounds **[5]**
123/34 . . . by chlorosulfonation **[5]**
123/36 . . by reaction with nitrogen-containing compounds, e.g. by nitration **[5]**

125/00 Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an aromatic carbocyclic ring; **Adhesives based on derivatives of such polymers [5]**
125/02 . Homopolymers or copolymers of hydrocarbons **[5]**
125/04 . . Homopolymers or copolymers of styrene **[5]**
125/06 . . . Polystyrene **[5]**
125/08 . . . Copolymers of styrene (C09J 129/08, C09J 135/06, C09J 155/02 take precedence) **[5]**
125/10 . . . . with conjugated dienes **[5]**
125/12 . . . . with unsaturated nitriles **[5]**
125/14 . . . . with unsaturated esters **[5]**
125/16 . . Homopolymers or copolymers of alkyl-substituted styrenes **[5]**
125/18 . Homopolymers or copolymers of aromatic monomers containing elements other than carbon and hydrogen **[5]**

127/00 Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a halogen; **Adhesives based on derivatives of such polymers [5]**
127/02 . not modified by chemical after-treatment **[5]**
127/04 . . containing chlorine atoms **[5]**

127/06 . . . Homopolymers or copolymers of vinyl chloride **[5]**
127/08 . . . Homopolymers or copolymers of vinylidene chloride **[5]**
127/10 . . containing bromine or iodine atoms **[5]**
127/12 . . containing fluorine atoms **[5]**
127/14 . . . Homopolymers or copolymers of vinyl fluoride **[5]**
127/16 . . . Homopolymers or copolymers of vinylidene fluoride **[5]**
127/18 . . . Homopolymers or copolymers of tetrafluoroethene **[5]**
127/20 . . . Homopolymers or copolymers of hexafluoropropene **[5]**
127/22 . modified by chemical after-treatment **[5]**
127/24 . . halogenated **[5]**

129/00 Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an alcohol, ether, aldehydo, ketonic, acetal, or ketal radical; **Adhesives based on hydrolysed polymers of esters of unsaturated alcohols with saturated carboxylic acids**; **Adhesives based on derivatives of such polymers [5]**

129/02 . Homopolymers or copolymers of unsaturated alcohols (C09J 129/14 takes precedence) **[5]**
129/04 . . Polyvinyl alcohol; Partially hydrolysed homopolymers or copolymers of esters of unsaturated alcohols with saturated carboxylic acids **[5]**
129/06 . . Copolymers of allyl alcohol **[5]**
129/08 . . . with vinyl aromatic monomers **[5]**
129/10 . Homopolymers or copolymers of unsaturated ethers (C09J 135/08 takes precedence) **[5]**
129/12 . Homopolymers or copolymers of unsaturated ketones **[5]**
129/14 . Homopolymers or copolymers of acetals or ketals obtained by polymerisation of unsaturated acetals or ketals or by after-treatment of polymers of unsaturated alcohols **[5]**

131/00 Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid, or of a haloformic acid (based on hydrolysed polymers C09J 129/00); **Adhesives based on derivatives of such polymers [5]**

131/02 . Homopolymers or copolymers of esters of monocarboxylic acids **[5]**
131/04 . . Homopolymers or copolymers of vinyl acetate **[5]**
131/06 . Homopolymers or copolymers of esters of polycarboxylic acids **[5]**
131/08 . . of phthalic acid **[5]**

133/00 Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by only one carboxyl radical, or of salts, anhydrides, esters, amides, imides, or nitriles thereof; **Adhesives based on derivatives of such polymers [5]**

133/02 . Homopolymers or copolymers of acids; Metal or ammonium salts thereof **[5]**
133/04 . Homopolymers or copolymers of esters **[5]**
133/06 . . of esters containing only carbon, hydrogen and oxygen, the oxygen atom being present only as part of the carboxyl radical **[5]**
133/08 . . . Homopolymers or copolymers of acrylic acid esters **[5]**
133/10 . . . Homopolymers or copolymers of methacrylic acid esters **[5]**
133/12 . . . . Homopolymers or copolymers of methyl methacrylate **[5]**
133/14 . . of esters containing halogen, nitrogen, sulfur or oxygen atoms in addition to the carboxy oxygen **[5]**
133/16 . . . Homopolymers or copolymers of esters containing halogen atoms **[5]**
133/18 . Homopolymers or copolymers of nitriles **[5]**
133/20 . . Homopolymers or copolymers of acrylonitrile (C09J 155/02 takes precedence) **[5]**
133/22 . . Homopolymers or copolymers of nitriles containing four or more carbon atoms **[5]**
133/24 . Homopolymers or copolymers of amides or imides **[5]**
133/26 . . Homopolymers or copolymers of acrylamide or methacrylamide **[5]**

135/00 Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical, and containing at least another carboxyl radical in the molecule, or of salts, anhydrides, esters, amides, imides or nitriles thereof; **Adhesives based on derivatives of such polymers [5]**

135/02 . Homopolymers or copolymers of esters (C09J 135/06, C09J 135/08 take precedence) **[5]**
135/04 . Homopolymers or copolymers of nitriles (C09J 135/06, C09J 135/08 take precedence) **[5]**
135/06 . Copolymers with vinyl aromatic monomers **[5]**
135/08 . Copolymers with vinyl ethers **[5]**

137/00 Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (based on polymers of cyclic esters of polyfunctional acids C09J 131/00; based on polymers of cyclic anhydrides of unsaturated acids C09J 135/00); **Adhesives based on derivatives of such polymers [5]**

139/00 Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a single or double bond to nitrogen or by a heterocyclic ring containing nitrogen; **Adhesives based on derivatives of such polymers [5]**

139/02 . Homopolymers or copolymers of vinylamine **[5]**
139/04 . Homopolymers or copolymers of monomers containing heterocyclic rings having nitrogen as ring member **[5]**
139/06 . . Homopolymers or copolymers of N-vinyl-pyrrolidones **[5]**
139/08 . . Homopolymers or copolymers of vinyl-pyridine **[5]**

141/00 **Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a bond to sulfur or by a heterocyclic ring containing sulfur**; **Adhesives based on derivatives of such polymers [5]**

143/00 **Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing boron, silicon, phosphorus, selenium, tellurium, or a metal**; **Adhesives based on derivatives of such polymers [5]**

143/02 . Homopolymers or copolymers of monomers containing phosphorus **[5]**

143/04 . Homopolymers or copolymers of monomers containing silicon **[5]**

145/00 **Adhesives based on homopolymers or copolymers of compounds having no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic or in a heterocyclic ring system**; **Adhesives based on derivatives of such polymers** (based on polymers of cyclic esters of polyfunctional acids C09J 131/00; based on polymers of cyclic anhydrides or imides C09J 135/00) **[5]**

145/02 . Coumarone-indene polymers **[5]**

147/00 **Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds**; **Adhesives based on derivatives of such polymers** (C09J 145/00 takes precedence; based on conjugated diene rubbers C09J 109/00 to C09J 121/00) **[5]**

149/00 **Adhesives based on homopolymers or copolymers of compounds having one or more carbon-to-carbon triple bonds**; **Adhesives based on derivatives of such polymers [5]**

151/00 **Adhesives based on graft polymers in which the grafted component is obtained by reactions only involving carbon-to-carbon unsaturated bonds** (based on ABS polymers C09J 155/02); **Adhesives based on derivatives of such polymers [5]**

151/02 . grafted on to polysaccharides **[5]**

151/04 . grafted on to rubbers **[5]**

151/06 . grafted on to homopolymers or copolymers of aliphatic hydrocarbons containing only one carbon-to-carbon double bond **[5]**

151/08 . grafted on to macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[5]**

151/10 . grafted on to inorganic materials **[5]**

153/00 **Adhesives based on block copolymers containing at least one sequence of a polymer obtained by reactions only involving carbon-to-carbon unsaturated bonds**; **Adhesives based on derivatives of such polymers [5]**

153/02 . Vinyl aromatic monomers and conjugated dienes **[5]**

155/00 **Adhesives based on homopolymers or copolymers, obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in groups C09J 123/00 to C09J 153/00 [5]**

155/02 . ABS [Acrylonitrile-Butadiene-Styrene] polymers **[5]**

155/04 . Polyadducts obtained by the diene synthesis **[5]**

157/00 **Adhesives based on unspecified polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds [5]**

157/02 . Copolymers of mineral oil hydrocarbons **[5]**

157/04 . Copolymers in which only the monomer in minority is defined **[5]**

157/06 . Homopolymers or copolymers containing elements other than carbon and hydrogen **[5]**

157/08 . . containing halogen atoms **[5]**

157/10 . . containing oxygen atoms **[5]**

157/12 . . containing nitrogen atoms **[5]**

Adhesives based on organic macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds [5]

159/00 **Adhesives based on polyacetals**; **Adhesives based on derivatives of polyacetals [5]**

159/02 . Polyacetals containing polyoxymethylene sequences only **[5]**

159/04 . Copolyoxymethylenes **[5]**

161/00 **Adhesives based on condensation polymers of aldehydes or ketones** (with polyalcohols C09J 159/00; with polynitriles C09J 177/00); **Adhesives based on derivatives of such polymers [5]**

161/02 . Condensation polymers of aldehydes or ketones only **[5]**

161/04 . Condensation polymers of aldehydes or ketones with phenols only **[5]**

161/06 . . of aldehydes with phenols **[5]**

161/08 . . . with monohydric phenols **[5]**

161/10 . . . . Phenol-formaldehyde condensates **[5]**

161/12 . . . with polyhydric phenols **[5]**

161/14 . . . Modified phenol-aldehyde condensates **[5]**

161/16 . . of ketones with phenols **[5]**

161/18 . Condensation polymers of aldehydes or ketones with aromatic hydrocarbons or their halogen derivatives only **[5]**

161/20 . Condensation polymers of aldehydes or ketones with only compounds containing hydrogen attached to nitrogen (with amino phenols C09J 161/04) **[5]**

161/22 . . of aldehydes with acyclic or carbocyclic compounds **[5]**

161/24 . . . with urea or thiourea **[5]**

161/26 . . of aldehydes with heterocyclic compounds **[5]**

161/28 . . . with melamine **[5]**

161/30 . . of aldehydes with heterocyclic and acyclic or carbocyclic compounds **[5]**

161/32 . . Modified amine-aldehyde condensates **[5]**

161/34 . Condensation polymers of aldehydes or ketones with monomers covered by at least two of the groups C09J 161/04, C09J 161/18 and C09J 161/20 **[5]**

163/00 **Adhesives based on epoxy resins**; **Adhesives based on derivatives of epoxy resins [5]**

163/02 . Polyglycidyl ethers of bis-phenols **[5]**

163/04 . Epoxynovolacs **[5]**

163/06 . Triglycidylisocyanurates **[5]**

163/08 . Epoxidised polymerised polyenes **[5]**

163/10 . Epoxy resins modified by unsaturated compounds **[5]**

Note

In groups C09J 165/00 to C09J 185/00, in the absence of an indication to the contrary, adhesives based on macromolecular compounds obtained by reactions forming two different linkages in the main chain are classified only according to the linkage present in excess. **[5]**

165/00 **Adhesives based on macromolecular compounds obtained by reactions forming a carbon-to-carbon link in the main chain** (C09J 107/00 to C09J 157/00, C09J 161/00 take precedence); **Adhesives based on derivatives of such polymers [5]**

165/02 . Polyphenylenes **[5]**

165/04 . Polyxylylenes **[5]**

167/00 **Adhesives based on polyesters obtained by reactions forming a carboxylic ester link in the main chain** (based on polyester-amides C09J 177/12; based on polyester-imides C09J 179/08); **Adhesives based on derivatives of such polymers [5]**

167/02 . Polyesters derived from dicarboxylic acids and dihydroxy compounds (C09J 167/06 takes precedence) **[5]**

167/03 . . the dicarboxylic acids and dihydroxy compounds having the hydroxy and the carboxyl groups directly linked to aromatic rings **[5]**

167/04 . Polyesters derived from hydroxy carboxylic acids, e.g. lactones (C09J 167/06 takes precedence) **[5]**

167/06 . Unsaturated polyesters having carbon-to-carbon unsaturation **[5]**

167/07 . . having terminal carbon-to-carbon unsaturated bonds **[5]**

167/08 . Polyesters modified with higher fatty oils or their acids, or with natural resins or resin acids **[5]**

169/00 **Adhesives based on polycarbonates**; **Adhesives based on derivatives of polycarbonates [5]**

171/00 **Adhesives based on polyethers obtained by reactions forming an ether link in the main chain** (based on polyacetals C09J 159/00; based on epoxy resins C09J 163/00; based on polythioether-ethers C09J 181/02; based on polyethersulfones C09J 181/06); **Adhesives based on derivatives of such polymers [5]**

171/02 . Polyalkylene oxides **[5]**

171/03 . . Polyepihalohydrins **[5]**

171/08 . Polyethers derived from hydroxy compounds or from their metallic derivatives (C09J 171/02 takes precedence) **[5]**

171/10 . . from phenols **[5]**

171/12 . . . Polyphenylene oxides **[5]**

171/14 . . Furfuryl alcohol polymers **[5]**

173/00 **Adhesives based on macromolecular compounds obtained by reactions forming a linkage containing oxygen or oxygen and carbon in the main chain, not provided for in groups C09J 159/00 to C09J 171/00**; **Adhesives based on derivatives of such polymers [5]**

173/02 . Polyanhydrides **[5]**

175/00 **Adhesives based on polyureas or polyurethanes**; **Adhesives based on derivatives of such polymers [5]**

175/02 . Polyureas **[5]**

175/04 . Polyurethanes **[5]**

175/06 . . from polyesters **[5]**

175/08 . . from polyethers **[5]**

175/10 . . from polyacetals **[5]**

175/12 . . from compounds containing nitrogen and active hydrogen, the nitrogen atom not being part of an isocyanate group **[5]**

175/14 . . Polyurethanes having carbon-to-carbon unsaturated bonds **[5]**

175/16 . . . having terminal carbon-to-carbon unsaturated bonds **[5]**

177/00 **Adhesives based on polyamides obtained by reactions forming a carboxylic amide link in the main chain** (based on polyhydrazides C09J 179/06; based on polyamide-imides C09J 179/08); **Adhesives based on derivatives of such polymers [5]**

177/02 . Polyamides derived from omega-amino carboxylic acids or from lactams thereof (C09J 177/10 takes precedence) **[5]**

177/04 . Polyamides derived from alpha-amino carboxylic acids (C09J 177/10 takes precedence) **[5]**

177/06 . Polyamides derived from polyamines and polycarboxylic acids (C09J 177/10 takes precedence) **[5]**

177/08 . . from polyamines and polymerised unsaturated fatty acids **[5]**

177/10 . Polyamides derived from aromatically bound amino and carboxyl groups of amino carboxylic acids or of polyamines and polycarboxylic acids **[5]**

177/12 . Polyester-amides **[5]**

179/00 **Adhesives based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen, with or without oxygen, or carbon only, not provided for in groups C09J 161/00 to C09J 177/00 [5]**

179/02 . Polyamines **[5]**

179/04 . Polycondensates having nitrogen-containing heterocyclic rings in the main chain; Polyhydrazides; Polyamide acids or similar polyimide precursors **[5]**

179/06 . . Polyhydrazides; Polytriazoles; Polyamino-triazoles; Polyoxadiazoles **[5]**

179/08 . . Polyimides; Polyester-imides; Polyamide-imides; Polyamide acids or similar polyimide precursors **[5]**

181/00 **Adhesives based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing sulfur, with or without nitrogen, oxygen, or carbon only**; **Adhesives based on polysulfones**; **Adhesives based on derivatives of such polymers [5]**

181/02 . Polythioethers; Polythioether-ethers **[5]**

181/04 . Polysulfides **[5]**

181/06 . Polysulfones; Polyethersulfones **[5]**

181/08 . Polysulfonates **[5]**

181/10 . Polysulfonamides; Polysulfonimides **[5]**

183/00 **Adhesives based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon, with or without sulfur, nitrogen, oxygen, or carbon only**; **Adhesives based on derivatives of such polymers [5]**

183/02 . Polysilicates **[5]**

183/04 . Polysiloxanes **[5]**

183/05 . . containing silicon bound to hydrogen **[5]**

183/06 . . containing silicon bound to oxygen-containing groups (C09J 183/12 takes precedence) **[5]**

183/07 . . containing silicon bound to unsaturated aliphatic groups **[5]**

183/08 . . containing silicon bound to organic groups containing atoms other than carbon, hydrogen, and oxygen **[5]**

183/10 . Block or graft copolymers containing polysiloxane sequences (obtained by polymerising a compound having a carbon-to-carbon double bond on to a polysiloxane C09J 151/08, C09J 153/00) **[5]**

183/12 . . containing polyether sequences **[5]**

183/14 . in which at least two but not all the silicon atoms are connected by linkages other than oxygen atoms (C09J 183/10 takes precedence) **[5]**

183/16 . in which all the silicon atoms are connected by linkages other than oxygen atoms **[5]**

185/00 Adhesives based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing atoms other than silicon, sulfur, nitrogen, oxygen, and carbon; **Adhesives based on derivatives of such polymers [5]**

185/02 . containing phosphorus **[5]**

185/04 . containing boron **[5]**

187/00 Adhesives based on unspecified macromolecular compounds, obtained otherwise than by polymerisation reactions only involving unsaturated carbon-to-carbon-bonds [5]

Adhesives based on natural macromolecular compounds or on derivatives thereof [5]

189/00 Adhesives based on proteins; **Adhesives based on derivatives thereof [5]**

189/02 . Casein-aldehyde condensates **[5]**

189/04 . Products derived from waste materials, e.g. horn, hoof or hair **[5]**

189/06 . . derived from leather or skin **[5]**

191/00 Adhesives based on oils, fats or waxes; **Adhesives based on derivatives thereof [5]**

191/02 . Vulcanised oils, e.g. factice **[5]**

191/04 . Linoxyn **[5]**

191/06 . Waxes **[5]**

191/08 . . Mineral waxes **[5]**

193/00 Adhesives based on natural resins; **Adhesives based on derivatives thereof** (based on polysaccharides C09J 101/00 to C09J 105/00; based on natural rubber C09J 107/00) **[5]**

193/02 . Shellac **[5]**

193/04 . Rosin **[5]**

195/00 Adhesives based on bituminous materials, e.g. asphalt, tar or pitch [5]

197/00 Adhesives based on lignin-containing materials (based on polysaccharides C09J 101/00 to C09J 105/00) **[5]**

197/02 . Lignocellulosic material, e.g. wood, straw or bagasse **[5]**

199/00 Adhesives based on natural macromolecular compounds or on derivatives thereof, not provided for in groups C09J 101/00 to C09J 107/00 or C09J 189/00 to C09J 197/00 [5]

201/00 Adhesives based on unspecified macromolecular compounds [5]

201/02 . characterised by the presence of specified groups **[5]**

201/04 . . containing halogen atoms **[5]**

201/06 . . containing oxygen atoms **[5]**

201/08 . . . Carboxyl groups **[5]**

201/10 . . containing hydrolysable silane groups **[5]**

C09K MATERIALS FOR APPLICATIONS NOT OTHERWISE PROVIDED FOR; **APPLICATIONS OF MATERIALS NOT OTHERWISE PROVIDED FOR**

(1) This subclass covers also the use of specified materials in general or their use for the applications not specifically provided for elsewhere.

(2) In this subclass, the following term is used with the meaning indicated:
– "materials" includes compositions. **[4]**

3/00 Materials not provided for elsewhere [2]

3/10 . for sealing or packing joints or covers

3/12 . for stopping leaks, e.g. in radiators or in tanks

3/14 . Anti-slip materials; Abrasives **[4]**

3/16 . Anti-static materials **[4]**

3/18 . for application to surface to minimize adherence of ice, mist or water thereto; Thawing or antifreeze materials for application to surfaces **[4]**

3/20 . as substitutes for glycerol in its non-chemical uses, e.g. as a base in toilet creams or ointments

3/22 . for dust-laying or dust-absorbing **[4]**

3/24 . for simulating ice or snow **[4]**

3/30 . for aerosols **[4]**

3/32 . for treating liquid pollutants, e.g. oil, gasoline or fat (processes for making harmful chemical substances harmless or less harmful, by effecting a chemical change in the substances A62D 3/00)

5/00 Heat-transfer, heat-exchange or heat-storage materials, e.g. refrigerants; **Materials for the production of heat or cold by chemical reactions other than by combustion [2]**

5/02 . Materials undergoing a change of physical state when used (C09K 5/16, C09K 5/20 take precedence) **[2]**

5/04 . . the change of state being from liquid to vapour or vice-versa **[2]**

5/06 . . the change of state being from liquid to solid or vice-versa **[2]**

5/08 . Materials not undergoing a change of physical state when used (C09K 5/16, C09K 5/20 take precedence) **[7]**

5/10 . . Liquid materials **[7]**

5/12 . . . Molten materials, i.e. materials solid at room temperature, e.g. metals or salts **[7]**

5/14 . . Solid materials, e.g. powdery or granular **[7]**

5/16 . Materials undergoing chemical reactions when used **[7]**
5/18 . . Non-reversible chemical reactions **[7]**
5/20 . Antifreeze additives therefor, e.g. for radiator liquids **[7]**

8/00 Compositions for drilling of boreholes or wells; Compositions for treating boreholes or wells, e.g. for completion or for remedial operations [8]
8/02 . Well-drilling compositions **[8]**

Note

In groups C09K 8/03 to C09K 8/38, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[8]**

8/03 . . Specific additives for general use in well-drilling compositions **[8]**
8/035 . . . Organic additives **[8]**
8/04 . . Aqueous well-drilling compositions **[8]**
8/05 . . . containing inorganic compounds only, e.g. mixtures of clay and salt **[8]**
8/06 . . . Clay-free compositions (containing inorganic compounds only C09K 8/05) **[8]**
8/08 . . . . containing natural organic compounds, e.g. polysaccharides, or derivatives thereof **[8]**
8/10 . . . . . Cellulose or derivatives thereof **[8]**
8/12 . . . . containing synthetic organic macromolecular compounds or their precursors **[8]**
8/14 . . . Clay-containing compositions (containing inorganic compounds only C09K 8/05) **[8]**
8/16 . . . . characterised by the inorganic compounds other than clay **[8]**
8/18 . . . . characterised by the organic compounds **[8]**
8/20 . . . . . Natural organic compounds or derivatives thereof, e.g. polysaccharides or lignin derivatives **[8]**
8/22 . . . . . Synthetic organic compounds **[8]**
8/24 . . . . . Polymers **[8]**
8/26 . . . Oil-in-water emulsions **[8]**
8/28 . . . . containing organic additives **[8]**
8/32 . . Non-aqueous well-drilling compositions, e.g. oil-based **[8]**
8/34 . . . Organic liquids **[8]**
8/36 . . . Water-in-oil emulsions **[8]**
8/38 . . Gaseous or foamed well-drilling compositions **[8]**
8/40 . Spacer compositions, e.g. compositions used to separate well-drilling from cementing masses **[8]**
8/42 . Compositions for cementing, e.g. for cementing casings into boreholes; Compositions for plugging, e.g. for killing wells (compositions for plastering borehole walls C09K 8/50) **[8]**
8/44 . . containing organic binders only **[8]**
8/46 . . containing inorganic binders, e.g. Portland cement **[8]**
8/467 . . . containing additives for specific purposes **[8]**
8/473 . . . . Density reducing additives, e.g. for obtaining foamed cement compositions **[8]**
8/48 . . . . Density increasing or weighting additives **[8]**
8/487 . . . . Fluid loss control additives; Additives for reducing or preventing circulation loss **[8]**
8/493 . . . . Additives for reducing or preventing gas migration **[8]**
8/50 . Compositions for plastering borehole walls, i.e. compositions for temporary consolidation of borehole walls **[8]**
8/502 . . Oil-based compositions **[8]**
8/504 . . Compositions based on water or polar solvents (C09K 8/502 takes precedence) **[8]**
8/506 . . . containing organic compounds **[8]**
8/508 . . . . macromolecular compounds **[8]**
8/512 . . . . . containing cross-linking agents **[8]**
8/514 . . . . . of natural origin, e.g. polysaccharides, cellulose (C09K 8/512 takes precedence) **[8]**
8/516 . . characterised by their form or by the form of their components, e.g. encapsulated material **[8]**
8/518 . . . Foams **[8]**
8/52 . Compositions for preventing, limiting or eliminating depositions, e.g. for cleaning **[8]**
8/524 . . organic depositions, e.g. paraffins or asphaltenes **[8]**
8/528 . . inorganic depositions, e.g. sulfates or carbonates **[8]**
8/532 . . . Sulfur **[8]**
8/536 . . characterised by their form or by the form of their components, e.g. encapsulated material **[8]**
8/54 . Compositions for in situ inhibition of corrosion in boreholes or wells **[8]**
8/56 . Compositions for consolidating loose sand or the like around wells without excessively decreasing the permeability thereof **[8]**
8/565 . . Oil-based compositions **[8]**
8/57 . . Compositions based on water or polar solvents (C09K 8/565 takes precedence) **[8]**
8/575 . . . containing organic compounds **[8]**
8/58 . Compositions for enhanced recovery methods for obtaining hydrocarbons, i.e. for improving the mobility of the oil, e.g. displacing fluids **[8]**
8/582 . . characterised by the use of bacteria **[8]**
8/584 . . characterised by the use of specific surfactants **[8]**
8/588 . . characterised by the use of specific polymers **[8]**
8/592 . . Compositions used in combination with generated heat, e.g. by steam injection **[8]**
8/594 . . Compositions used in combination with injected gas (C09K 8/592 takes precedence) **[8]**
8/60 . Compositions for stimulating production by acting on the underground formation **[8]**
8/62 . . Compositions for forming crevices or fractures **[8]**
8/64 . . . Oil-based compositions **[8]**
8/66 . . . Compositions based on water or polar solvents (C09K 8/64 takes precedence) **[8]**
8/68 . . . . containing organic compounds **[8]**
8/70 . . . characterised by their form or by the form of their components, e.g. foams **[8]**
8/72 . . . Eroding chemicals, e.g. acids **[8]**
8/74 . . . . combined with additives added for specific purposes **[8]**
8/76 . . . . . for preventing or reducing fluid loss **[8]**
8/78 . . . . . for preventing sealing **[8]**
8/80 . . Compositions for reinforcing fractures, e.g. compositions of proppants used to keep the fractures open **[8]**
8/82 . . Oil-based compositions (C09K 8/64 takes precedence) **[8]**
8/84 . . Compositions based on water or polar solvents (C09K 8/66, C09K 8/82 take precedence) **[8]**
8/86 . . . containing organic compounds **[8]**
8/88 . . . . macromolecular compounds **[8]**

8/90 . . . . . of natural origin, e.g. polysaccharides, cellulose **[8]**

8/92 . . characterised by their form or by the form of their components, e.g. encapsulated material (C09K 8/70 takes precedence) **[8]**

8/94 . . . Foams **[8]**

9/00 Tenebrescent materials, i.e. materials for which the range of wavelengths for energy adsorption is changed as a result of excitation by some form of energy [2]

9/02 . Organic tenebrescent materials **[2]**

11/00 Luminescent, e.g. electroluminescent, chemiluminescent, materials [2]

11/01 . Recovery of luminescent materials **[3]**

11/02 . Use of particular materials as binders, particle coatings or suspension media therefor **[2]**

11/04 . containing natural or artificial radioactive elements or unspecified radioactive elements **[2]**

11/06 . containing organic luminescent materials **[2]**

11/07 . . having chemically-interreactive components, e.g. reactive chemiluminescent compositions **[3]**

11/08 . containing inorganic luminescent materials **[2]**

Note

In groups C09K 11/54 to C09K 11/89, in the absence of an indication to the contrary, materials are classified in the last appropriate place; however, activating constituents of the luminescent materials are disregarded for classification purposes. **[4]**

11/54 . . containing zinc or cadmium **[4]**

11/55 . . containing beryllium, magnesium, alkali metals or alkaline earth metals **[4]**

11/56 . . containing sulfur **[4]**

11/57 . . containing manganese or rhenium **[4]**

11/58 . . containing copper, silver or gold **[4]**

11/59 . . containing silicon **[4]**

11/60 . . containing iron, cobalt or nickel **[4]**

11/61 . . containing fluorine, chlorine, bromine, iodine or unspecified halogen elements **[4]**

11/62 . . containing gallium, indium or thallium **[4]**

11/63 . . containing boron **[4]**

11/64 . . containing aluminium **[4]**

11/65 . . containing carbon **[4]**

11/66 . . containing germanium, tin or lead **[4]**

11/67 . . containing refractory metals **[4]**

11/68 . . . containing chromium, molybdenum or tungsten **[4]**

11/69 . . . containing vanadium **[4]**

11/70 . . containing phosphorus **[4]**

11/71 . . . also containing alkaline earth metals **[4]**

11/72 . . . also containing halogen, e.g. halophosphates **[4]**

11/73 . . . . also containing alkaline earth metals **[4]**

11/74 . . containing arsenic, antimony or bismuth **[4]**

11/75 . . . containing antimony **[4]**

11/76 . . . . also containing phosphorus and halogen, e.g. halophosphates **[4]**

11/77 . . containing rare earth metals **[4]**

11/78 . . . containing oxygen **[4]**

11/79 . . . containing silicon **[4]**

11/80 . . . containing aluminium or gallium **[4]**

11/81 . . . containing phosphorus **[4]**

11/82 . . . containing vanadium **[4]**

11/83 . . . containing vanadium and phosphorus **[4]**

11/84 . . . containing sulfur, e.g. oxysulfides **[4]**

11/85 . . . containing halogen **[4]**

11/86 . . . containing oxygen and halogen, e.g. oxyhalides **[4]**

11/87 . . containing platinum group metals **[4]**

11/88 . . containing selenium, tellurium or unspecified chalcogen elements **[4]**

11/89 . . containing mercury **[4]**

13/00 Etching, surface-brightening or pickling compositions [2]

Note

In groups C09K 13/02 to C09K 13/12, a composition is classified in the last appropriate place. **[2]**

13/02 . containing an alkali metal hydroxide **[2]**

13/04 . containing an inorganic acid **[2]**

13/06 . . with organic material **[2]**

13/08 . . containing a fluorine compound **[2]**

13/10 . . containing a boron compound **[2]**

13/12 . containing heavy metal salts in an amount of at least 50% of the non-solvent components **[2]**

15/00 Anti-oxidant compositions; **Compositions inhibiting chemical change [4]**

(1) In groups C09K 15/02 to C09K 15/34, in the absence of an indication to the contrary, a composition is classified in the last appropriate place. **[2]**

(2) In groups C09K 15/02 to C09K 15/34, a metal salt of an organic compound is classified as that compound. **[2]**

15/02 . containing inorganic compounds **[2]**

15/04 . containing organic compounds **[2]**

15/06 . . containing oxygen **[2]**

15/08 . . . containing a phenol or quinone moiety **[2]**

15/10 . . containing sulfur **[2]**

15/12 . . containing sulfur and oxygen **[2]**

15/14 . . . containing a phenol or quinone moiety **[2]**

15/16 . . containing nitrogen **[2]**

15/18 . . . containing an amine or imine moiety **[2]**

15/20 . . containing nitrogen and oxygen **[2]**

15/22 . . . containing an amide or imide moiety **[2]**

15/24 . . . containing a phenol or quinone moiety **[2]**

15/26 . . containing nitrogen and sulfur **[2]**

15/28 . . containing nitrogen, oxygen and sulfur **[2]**

15/30 . . containing heterocyclic ring with at least one nitrogen atom as ring member **[2]**

15/32 . . containing boron, silicon, phosphorus, selenium, tellurium or a metal **[2]**

15/34 . containing plant or animal materials of unknown composition **[2]**

17/00 Soil-conditioning materials or soil-stabilising materials [3]

(1) This group covers mixtures of soil-conditioning or soil-stabilising materials with fertilisers characterised by their soil-conditioning or soil-stabilising activity. **[6]**

(2) This group does not cover mixtures of soil-conditioning or soil-stabilising materials with fertilisers characterised by their fertilising activity which are covered by subclass C05G. **[6]**

(3) For the purpose of classification in this group, the presence of fertilisers in the composition is not taken into account. **[6]**

(4) In groups C09K 17/02 to C09K 17/40, in the absence of an indication to the contrary, materials are classified in the last appropriate place.

(5) In this group, it is desirable to add the indexing codes of groups C09K 101/00 to C09K 109/00. **[6]**

17/02 . containing inorganic compounds only **[6]**
17/04 . . applied in a physical form other than a solution or a grout, e.g. as granules or gases **[6]**
17/06 . . Calcium compounds, e.g. lime **[6]**
17/08 . . Aluminium compounds, e.g. aluminium hydroxide **[6]**
17/10 . . Cements, e.g. Portland cement **[6]**
17/12 . . Water-soluble silicates, e.g. waterglass **[6]**
17/14 . containing organic compounds only **[6]**
17/16 . . applied in a physical form other than a solution or a grout, e.g. as platelets or granules **[6]**
17/18 . . Prepolymers; Macromolecular compounds **[6]**
17/20 . . . Vinyl polymers **[6]**
17/22 . . . . Polyacrylates; Polymethacrylates **[6]**
17/24 . . . Condensation polymers of aldehydes or ketones **[6]**
17/26 . . . . Phenol-aldehyde condensation polymers **[6]**
17/28 . . . . Urea-aldehyde condensation polymers **[6]**
17/30 . . . Polyisocyanates; Polyurethanes **[6]**
17/32 . . . of natural origin, e.g. cellulosic materials **[6]**
17/34 . . . Bituminous materials **[6]**
17/36 . . Compounds having one or more carbon-to-silicon linkages **[6]**
17/38 . . . Siloxanes **[6]**
17/40 . containing mixtures of inorganic and organic compounds **[6]**
17/42 . . Inorganic compounds mixed with organic active ingredients, e.g. accelerators **[6]**
17/44 . . . the inorganic compound being cement **[6]**
17/46 . . . the inorganic compound being a water-soluble silicate **[6]**
17/48 . . Organic compounds mixed with inorganic active ingredients, e.g. polymerisation catalysts **[6]**
17/50 . . . the organic compound being of natural origin, e.g. cellulose derivatives **[6]**
17/52 . Mulches **[6]**

19/00 Liquid crystal materials [4]

Note

In groups C09K 19/02 to C09K 19/52 in the absence of an indication to the contrary, materials are classified in the last appropriate place. **[4]**

19/02 . characterised by optical, electrical or physical properties of the components, in general **[4]**
19/04 . characterised by the chemical structure of the liquid crystal components **[4]**
19/06 . . Non-steroidal liquid crystal compounds **[4]**
19/08 . . . containing at least two non-condensed rings **[4]**
19/10 . . . . containing at least two benzene rings **[4]**
19/12 . . . . . at least two benzene rings directly linked, e.g. biphenyls **[4]**
19/14 . . . . . linked by a carbon chain **[4]**
19/16 . . . . . the chain containing carbon-to-carbon double bonds, e.g. stilbenes **[4]**
19/18 . . . . . the chain containing carbon-to-carbon triple bonds, e.g. tolans **[4]**
19/20 . . . . . linked by a chain containing carbon and oxygen atoms as chain links, e.g. esters **[4]**
19/22 . . . . . linked by a chain containing carbon and nitrogen atoms as chain links, e.g. Schiff bases **[4]**
19/24 . . . . . linked by a chain containing nitrogen-to-nitrogen bonds **[4]**
19/26 . . . . . Azoxy compounds **[4]**
19/28 . . . . . linked by a chain containing carbon and sulfur atoms as chain links, e.g. thioesters **[4]**
19/30 . . . . containing saturated or unsaturated non-aromatic rings, e.g. cyclohexane rings **[4]**
19/32 . . . containing condensed ring systems, i.e. fused, bridged or spiro ring systems **[4]**
19/34 . . . containing at least one heterocyclic ring **[4]**
19/36 . . Steroidal liquid crystal compounds **[4]**
19/38 . . Polymers, e.g. polyamides **[4]**
19/40 . . containing elements other than carbon, hydrogen, halogen, oxygen, nitrogen or sulfur, e.g. silicon, metals **[4]**
19/42 . . Mixtures of liquid crystal compounds covered by two or more of the preceding groups C09K 19/06 to C09K 19/40 **[4]**

(1) This group does not cover mixtures containing two or more liquid crystal compounds covered individually by the same one of groups C09K 19/04 to C09K 19/40 which are classified only in that group. **[4]**

(2) If liquid crystal components of the mixtures classified in this group are of interest as such, they are also classified according to the compounds in groups C09K 19/04 to C09K 19/40. **[4]**

19/44 . . . containing compounds with benzene rings directly linked **[4]**
19/46 . . . containing esters **[4]**
19/48 . . . containing Schiff bases **[4]**
19/50 . . . containing steroidal liquid crystal compounds **[4]**
19/52 . characterised by components which are not liquid crystals, e.g. additives **[4]**
19/54 . . Additives having no specific mesophase **[4]**
19/56 . . . Aligning agents **[4]**
19/58 . . Dopants or charge transfer agents **[4]**
19/60 . . Pleochroic dyes **[4]**

21/00 Fireproofing materials [4]

Note

In groups C09K 21/02 to C09K 21/14, in the absence of an indication to the contrary, materials are classified in the last appropriate place. **[4]**

21/02 . Inorganic materials **[4]**
21/04 . . containing phosphorus **[4]**
21/06 . Organic materials **[4]**
21/08 . . containing halogen **[4]**
21/10 . . containing nitrogen **[4]**

21/12 . . containing phosphorus **[4]**
21/14 . Macromolecular materials **[4]**

Indexing scheme associated with group C09K 17/00, relating to the use or the intended effect of the soil-conditioning or soil-stabilising materials. [6]

101/00 Agricultural use [6]

103/00 Civil engineering use [6]

105/00 Erosion prevention [6]

107/00 Impermeabilisation [6]

109/00 pH regulation [6]

C10 PETROLEUM, GAS OR COKE INDUSTRIES; TECHNICAL GASES CONTAINING CARBON MONOXIDE; FUELS; LUBRICANTS; PEAT

C10B DESTRUCTIVE DISTILLATION OF CARBONACEOUS MATERIALS FOR PRODUCTION OF GAS, COKE, TAR, OR SIMILAR MATERIALS (cracking oils C10G; underground gasification of minerals E21B 43/295) **[5]**

Subclass index

Retorts or coke ovens

1/00 Retorts
1/02 . Stationary retorts
1/04 . . Vertical retorts
1/06 . . Horizontal retorts
1/08 . . Inclined retorts
1/10 . Rotary retorts

3/00 Coke ovens with vertical chambers
3/02 . with heat-exchange devices

5/00 Coke ovens with horizontal chambers
5/02 . with vertical heating flues
5/04 . . with cross-over inter-connections
5/06 . with horizontal heating flues
5/08 . with horizontal and vertical heating flues
5/10 . with heat-exchange devices
5/12 . . with regenerators
5/14 . . . situated in the longitudinal direction of the chambers
5/16 . . . . with separated flues
5/18 . . . situated in the longitudinal direction of the oven battery
5/20 . . with recuperators

7/00 Coke ovens with mechanical conveying means for the raw material inside the oven
7/02 . with rotary scraping devices
7/04 . with shaking or vibrating devices
7/06 . with endless conveying devices
7/08 . . in vertical direction
7/10 . with conveyer-screws
7/12 . with tilting or rocking means
7/14 . with trucks, containers, or trays

9/00 Beehive ovens

11/00 Coke ovens with inclined chambers

13/00 Coke ovens with means for bringing and keeping the charge under mechanical pressure

15/00 Other coke ovens
15/02 . with floor heating

Heating of coke ovens

17/00 Preheating of coke ovens

19/00 Heating of coke ovens by electrical means

21/00 Heating of coke ovens with combustible gases
21/02 . with lean gas
21/04 . with rich gas
21/06 . in coke ovens suitable for the use of lean gas or rich gas
21/08 . by applying special heating gases
21/10 . Regulating or controlling the combustion
21/12 . . Burners
21/14 . . Devices for reversing the draught
21/16 . . by controlling or varying the openings between the heating flues and the regenerator flues
21/18 . . Recirculating the flue gases
21/20 . Methods of heating ovens of the chamber oven type
21/22 . . by introducing the heating gas and air at various levels
21/24 . . . at the top and the bottom of the vertical heating flues
21/26 . . by introducing the heating gas and air at the top of the vertical flues only

23/00 Other methods of heating coke ovens

25/00 Doors or closures for coke ovens
25/02 . Doors; Door frames
25/04 . . for ovens with vertical chambers
25/06 . . for ovens with horizontal chambers
25/08 . . Closing or opening the doors
25/10 . . . for ovens with vertical chambers
25/12 . . . for ovens with horizontal chambers
25/14 . . . Devices for lifting doors
25/16 . . Sealing; Means for sealing
25/18 . . Cooling
25/20 . Lids or closures for charging holes
25/22 . . for ovens with vertical chambers
25/24 . . for ovens with horizontal chambers

27/00 Arrangements for withdrawal of the distillation gases
27/02 . with outlets arranged at different levels in the chamber
27/04 . during the charging operation of the oven
27/06 . Conduit details, e.g. valves

29/00 Other details of coke ovens
29/02 . Brickwork, e.g. casings, linings, walls
29/04 . Controlling or preventing expansion or contraction
29/06 . Preventing or repairing leakages of the brickwork
29/08 . Bracing or foundation of the ovens

Devices for charging or discharging coke ovens; **Mechanical treatments of coal charges**

31/00 Charging devices for coke ovens
31/02 . for charging vertically
31/04 . . coke ovens with horizontal chambers
31/06 . for charging horizontally
31/08 . . coke ovens with horizontal chambers
31/10 . . . with one compact charge
31/12 . for liquid materials

33/00 Discharging devices for coke ovens; **Coke guides**
33/02 . Extracting coke with built-in devices, e.g. gears, screws
33/04 . Pulling-out devices
33/06 . . for horizontal chambers
33/08 . Pushers, e.g. rams
33/10 . . for horizontal chambers
33/12 . Discharge valves
33/14 . Coke guides

35/00 Combined charging and discharging devices for coke ovens

37/00 Mechanical treatments of coal charges in the oven
37/02 . Levelling charges, e.g. with bars
37/04 . Compressing charges (during coking C10B 47/12)
37/06 . Forming holes in charges

39/00 Cooling or quenching coke
39/02 . Dry cooling outside the oven
39/04 . Wet quenching
39/06 . . in the oven
39/08 . . Coke-quenching towers
39/10 . combined with agitating means, e.g. rotating tables or drums
39/12 . combined with conveying means
39/14 . Cars
39/16 . combined with sorting
39/18 . Coke ramps

41/00 Safety devices, e.g. signalling or controlling devices for use in the discharge of coke
41/02 . for discharging coke
41/04 . . by electrical means
41/06 . . by pneumatic or hydraulic means
41/08 . for the withdrawal of the distillation gases

43/00 Preventing or removing incrustations
43/02 . Removing incrustations
43/04 . . by mechanical means
43/06 . . . from conduits, valves or the like
43/08 . . with liquids
43/10 . . by burning out
43/12 . . . Burners
43/14 . Preventing incrustations

45/00 Other details
45/02 . Devices for producing compact unified coal charges outside the oven

Carbonising or coking processes

47/00 Destructive distillation of solid carbonaceous materials with indirect heating, e.g. by external combustion
47/02 . with stationary charge
47/04 . . in shaft furnaces
47/06 . . in retorts
47/08 . . in beehive ovens
47/10 . . in coke ovens of the chamber type
47/12 . . in which the charge is subjected to mechanical pressure during coking
47/14 . . with the aid of hot liquids, e.g. molten salts
47/16 . . with indirect heating means both inside and outside the retorts
47/18 . with moving charge
47/20 . . according to the “moving bed” technique (C10B 47/26 takes precedence)
47/22 . . in dispersed form (C10B 47/26 takes precedence)
47/24 . . . according to the “fluidised bed” technique
47/26 . . with the aid of hot liquids, e.g. molten salts
47/28 . Other processes
47/30 . . in rotary ovens or retorts
47/32 . . in ovens with mechanical conveying means
47/34 . . . with rotary scraping devices
47/36 . . . . in multi-stage ovens
47/38 . . . with shaking or vibrating devices
47/40 . . . with endless conveying devices
47/42 . . . . in vertical direction
47/44 . . . with conveyer-screws
47/46 . . . with trucks, containers, or trays
47/48 . . . with tilting or rocking means

49/00 Destructive distillation of solid carbonaceous materials by direct heating with heat-carrying agents including the partial combustion of the solid material to be treated
49/02 . with hot gases or vapours, e.g. hot gases obtained by partial combustion of the charge
49/04 . . while moving the solid material to be treated
49/06 . . . according to the “moving bed” technique
49/08 . . . in dispersed form
49/10 . . . . according to the “fluidised bed” technique
49/12 . . . . by mixing tangentially, e.g. in vortex chambers
49/14 . with hot liquids, e.g. molten metals
49/16 . with moving solid heat-carriers in divided form
49/18 . . according to the “moving bed” technique
49/20 . . in dispersed form
49/22 . . . according to the “fluidised bed” technique

51/00 Destructive distillation of solid carbonaceous materials by combined direct and indirect heating

53/00 Destructive distillation, specially adapted for particular solid raw materials or solid raw materials in special form (wet carbonising of peat C10F)
53/02 . of cellulose-containing material (production of pyroligneous acid C10C 5/00)
53/04 . of powdered coal

53/06 . of oil shale or bituminous rocks
53/07 . of synthetic polymeric materials, e.g. tyres (recovery or working-up of waste materials of organic macromolecular compounds or compositions based thereon by dry-heat treatment for obtaining partially depolymerised materials C08J 11/10; production of liquid hydrocarbon mixtures from rubber or rubber waste C10G 1/10) **[8]**
53/08 . in the form of briquettes, lumps or the like

55/00 Coking mineral oils, bitumen, tar or the like, or mixtures thereof, with solid carbonaceous materials (cracking oils C10G)
55/02 . with solid materials
55/04 . . with moving solid materials
55/06 . . . according to the "moving bed" technique
55/08 . . . in dispersed form
55/10 . . . . according to the "fluidised bed" technique

57/00 Other carbonising or coking processes; **Features of destructive distillation processes in general**
57/02 . Multi-step carbonising or coking processes
57/04 . using charges of special composition
57/06 . . containing additives
57/08 . Non-mechanical pretreatment of the charge
57/10 . . Drying
57/12 . Applying additives during coking
57/14 . Features of low-temperature carbonising processes
57/16 . Features of high-temperature carbonising processes
57/18 . Modifying the properties of the distillation gases in the oven

C10C WORKING-UP TAR, PITCH, ASPHALT, BITUMEN; PYROLIGNEOUS ACID

1/00 Working-up tar (obtaining hydrocarbon oils C10G) **[4]**
1/02 . Removal of water (by distillation C10C 1/06)
1/04 . by distillation
1/06 . . Removal of water
1/08 . . Winning of aromatic fractions
1/10 . . . benzene fraction
1/12 . . . naphthalene fraction
1/14 . . Winning of tar oils from tar
1/16 . . Winning of pitch
1/18 . by extraction with selective solvents
1/19 . by thermal treatment not involving distillation **[4]**
1/20 . Refining by chemical means

3/00 Working-up pitch, asphalt, bitumen
3/02 . by chemical means
3/04 . . by blowing or oxidising
3/06 . by distillation
3/08 . by selective extraction
3/10 . Melting
3/12 . . Devices therefor
3/14 . Solidifying; Disintegrating, e.g. granulating
3/16 . . by direct contact with liquids
3/18 . Removing in solid form from reaction vessels, containers and the like, e.g. by cutting out, by pressing

5/00 Production of pyroligneous acid (carbonisation of wood C10B)

C10F DRYING OR WORKING-UP OF PEAT [5]

5/00 Drying or de-watering peat
5/02 . in the field; Auxiliary means therefor
5/04 . by using presses, bandpresses, rolls, or centrifuges (moulding C10F 7/04)
5/06 . combined with a carbonisation step for producing turfcoal

7/00 Working-up peat (extracting wax from peat C10G)
7/02 . Disintegrating peat (obtaining fibres from peat D01B 1/50)
7/04 . by moulding
7/06 . . Briquetting
7/08 . by extrusion combined with cutting

C10G CRACKING HYDROCARBON OILS; PRODUCTION OF LIQUID HYDROCARBON MIXTURES, E.G. BY DESTRUCTIVE HYDROGENATION, OLIGOMERISATION, POLYMERISATION (cracking to hydrogen or synthesis gas C01B; cracking or pyrolysis of hydrocarbon gases to individual hydrocarbons or mixtures thereof of definite or specified constitution C07C; cracking to cokes C10B); RECOVERY OF HYDROCARBON OILS FROM OIL-SHALE, OIL-SAND, OR GASES; REFINING MIXTURES MAINLY CONSISTING OF HYDROCARBONS; REFORMING OF NAPHTHA; MINERAL WAXES [6]

(1) In this subclass:
– groups C10G 9/00 to C10G 49/00 are limited to one-step processes; **[3]**
– combined or multi-step processes are covered by groups C10G 51/00 to C10G 69/00; **[3]**
– refining or recovery of mineral waxes is covered by group C10G 73/00. **[3]**

(2) In this subclass, the following terms or expressions are used with the meanings indicated:
- "in the presence of hydrogen" or "in the absence of hydrogen" mean treatments in which hydrogen, in free form or as hydrogen generating compounds, is added, or not added, respectively; **[3]**
- "hydrotreatment" is used for conversion processes as defined in group C10G 45/00 or group C10G 47/00; **[3]**
- "hydrocarbon oils" covers mixtures of hydrocarbons such as tar oils or mineral oils. **[3]**

(3) In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[3]**

(4) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

1/00 Production of liquid hydrocarbon mixtures from oil shale, oil-sand, or non-melting solid carbonaceous or similar materials, e.g. wood, coal (mechanical winning of oil from oil-shales, oil-sand, or the like B03B)

1/02 . by distillation
1/04 . by extraction
1/06 . by destructive hydrogenation
1/08 . . with moving catalysts
1/10 . from rubber or rubber waste

2/00 Production of liquid hydrocarbon mixtures of undefined composition from oxides of carbon [5]

3/00 Production of liquid hydrocarbon mixtures from oxygen-containing organic materials, e.g. fatty oils, fatty acids (production from non-melting solid oxygen-containing carbonaceous materials C10G 1/00)

5/00 Recovery of liquid hydrocarbon mixtures from gases, e.g. natural gas

5/02 . with solid adsorbents
5/04 . with liquid absorbents
5/06 . by cooling or compressing

7/00 Distillation of hydrocarbon oils

7/02 . Stabilising gasoline by removing gases by fractioning
7/04 . De-watering
7/06 . Vacuum distillation **[3]**
7/08 . Azeotropic or extractive distillation (refining of hydrocarbon oils, in the absence of hydrogen, by extraction with selective solvents C10G 21/00) **[3]**
7/10 . Inhibiting corrosion during distillation **[3]**
7/12 . Controlling or regulating **[3]**

Cracking in the absence of hydrogen

9/00 Thermal non-catalytic cracking, in the absence of hydrogen, of hydrocarbon oils

9/02 . in retorts
9/04 . . Retorts
9/06 . by pressure distillation
9/08 . . Apparatus therefor
9/12 . . . Removing incrustation
9/14 . in pipes or coils with or without auxiliary means, e.g. digesters, soaking drums, expansion means
9/16 . . Preventing or removing incrustation
9/18 . . Apparatus
9/20 . . . Tube furnaces
9/24 . by heating with electrical means
9/26 . with discontinuously preheated non-moving solid material, e.g. blast and run
9/28 . with preheated moving solid material
9/30 . . according to the "moving bed" technique
9/32 . . according to the "fluidised bed" technique
9/34 . by direct contact with inert preheated fluids, e.g. with molten metals or salts
9/36 . . with heated gases or vapours
9/38 . . . produced by partial combustion of the material to be cracked or by combustion of another hydrocarbon **[2]**
9/40 . by indirect contact with preheated fluid other than hot combustion gases
9/42 . by passing the material to be cracked in thin streams or as spray on or near continuously heated surfaces

11/00 Catalytic cracking, in the absence of hydrogen, of hydrocarbon oils (cracking in direct contact with molten metals or salts C10G 9/34)

11/02 . characterised by the catalyst used
11/04 . . Oxides
11/05 . . . Crystalline alumino-silicates, e.g. molecular sieves **[3]**
11/06 . . Sulfides
11/08 . . Halides
11/10 . with stationary catalyst bed
11/12 . with discontinuously preheated non-moving solid catalysts, e.g. blast and run
11/14 . with preheated moving solid catalysts
11/16 . . according to the "moving bed" technique
11/18 . . according to the "fluidised bed" technique

11/20 . by direct contact with inert heated gases or vapours
11/22 . . produced by partial combustion of the material to be cracked

---

15/00 Cracking of hydrocarbon oils by electric means, electromagnetic or mechanical vibrations, by particle radiation or with gases superheated in electric arcs
15/08 . by electric means or by electromagnetic or mechanical vibrations **[3]**
15/10 . by particle radiation **[3]**
15/12 . with gases superheated in an electric arc, e.g. plasma **[3]**

Refining in the absence of hydrogen

17/00 Refining of hydrocarbon oils, in the absence of hydrogen, with acids, acid-forming compounds, or acid-containing liquids, e.g. acid sludge
17/02 . with acids or acid-containing liquids, e.g. acid sludge
17/04 . . Liquid-liquid treatment forming two immiscible phases
17/06 . . . using acids derived from sulfur or acid sludge thereof
17/07 . . . using halogen acids or oxyacids of halogen (acids generating halogen C10G 27/02) **[3]**
17/08 . with acid-forming oxides (refining with CO_2 or SO_2 as a selective solvent C10G 21/06)
17/085 . . with oleum **[3]**
17/09 . with acid salts **[3]**
17/095 . with "solid acids", e.g. phosphoric acid deposited on a carrier **[3]**
17/10 . Recovery of used refining agent

19/00 Refining hydrocarbon oils, in the absence of hydrogen, by alkaline treatment
19/02 . with aqueous alkaline solutions
19/04 . . containing solubilisers, e.g. solutisers
19/06 . . with plumbites or plumbates
19/067 . with molten alkaline material **[3]**
19/073 . with solid alkaline material **[3]**
19/08 . Recovery of used refining agent

21/00 Refining of hydrocarbon oils, in the absence of hydrogen, by extraction with selective solvents (C10G 17/00, C10G 19/00 take precedence)
21/02 . with two or more solvents, which are introduced or withdrawn separately
21/04 . . by introducing simultaneously at least two immiscible solvents counter-current to each other
21/06 . characterised by the solvent used
21/08 . . Inorganic compounds only
21/10 . . . Sulfur dioxide
21/12 . . Organic compounds only
21/14 . . . Hydrocarbons
21/16 . . . Oxygen-containing compounds
21/18 . . . Halogen-containing compounds
21/20 . . . Nitrogen-containing compounds
21/22 . . . Compounds containing sulfur, selenium, or tellurium
21/24 . . . Phosphorus-containing compounds
21/26 . . . Silicon-containing compounds
21/27 . . . Organic compounds not provided for in a single one of groups C10G 21/14 to C10G 21/26 **[3]**
21/28 . Recovery of used solvent
21/30 . Controlling or regulating **[3]**

25/00 Refining of hydrocarbon oils, in the absence of hydrogen, with solid sorbents

Note

When classifying in this group, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned. **[8]**

25/02 . with ion-exchange material
25/03 . . with crystalline alumino-silicates, e.g. molecular sieves **[3]**
25/05 . . . Removal of non-hydrocarbon compounds, e.g. sulfur compounds **[3]**
25/06 . with moving sorbents or sorbents dispersed in the oil
25/08 . . according to the "moving bed" technique
25/09 . . according to the "fluidised bed" technique **[3]**
25/11 . . Distillation in the presence of moving sorbents **[3]**
25/12 . Recovery of used adsorbent

27/00 Refining of hydrocarbon oils, in the absence of hydrogen, by oxidation
27/02 . with halogen or compounds generating halogen; Hypochlorous acid or salts thereof
27/04 . with oxygen or compounds generating oxygen
27/06 . . in the presence of alkaline solutions
27/08 . . in the presence of copper chloride
27/10 . . in the presence of metal-containing organic complexes, e.g. chelates, or cationic ion-exchange resins **[3]**
27/12 . . with oxygen-generating compounds, e.g. per-compounds, chromic acid, chromates (plumbites or plumbates C10G 19/06) **[3]**
27/14 . . with ozone-containing gases **[3]**

29/00 Refining of hydrocarbon oils, in the absence of hydrogen, with other chemicals
29/02 . Non-metals
29/04 . Metals, or metals deposited on a carrier
29/06 . Metal salts, or metal salts deposited on a carrier
29/08 . . containing the metal in the lower valency
29/10 . . Sulfides
29/12 . . Halides **[3]**
29/16 . Metal oxides
29/20 . Organic compounds not containing metal atoms
29/22 . . containing oxygen as the only hetero atom
29/24 . . . Aldehydes or ketones
29/26 . . Halogenated hydrocarbons
29/28 . . containing sulfur as the only hetero atom, e.g. mercaptans, or sulfur and oxygen as the only hetero atoms

31/00 Refining of hydrocarbon oils, in the absence of hydrogen, by methods not otherwise provided for (by distillation C10G 7/00) **[2]**
31/06 . by heating, cooling, or pressure treatment
31/08 . by treating with water
31/09 . by filtration **[3]**
31/10 . with the aid of centrifugal force
31/11 . by dialysis **[3]**

32/00 Refining of hydrocarbon oils by electric or magnetic means, by irradiation, or by using microorganisms [3]
32/02 . by electric or magnetic means **[3]**
32/04 . by particle radiation **[3]**

33/00 De-watering or demulsification of hydrocarbon oils (by distillation C10G 7/04)

33/02 . with electrical or magnetic means
33/04 . with chemical means
33/06 . with mechanical means, e.g. by filtration
33/08 . Controlling or regulating **[3]**

35/00 Reforming naphtha

Note

In this group, the following term is used with the meaning indicated:
– "reforming" means the treatment of naphtha in order to improve the octane number or its aromatic content. **[3]**

35/02 . Thermal reforming
35/04 . Catalytic reforming
35/06 . . characterised by the catalyst used
35/085 . . . containing platinum group metals or compounds thereof **[3]**
35/09 . . . . Bimetallic catalysts in which at least one of the metals is a platinum-group metal **[3]**
35/095 . . . containing crystalline alumino-silicates, e.g. molecular sieves **[3]**
35/10 . . with moving catalysts
35/12 . . . according to the "moving bed" technique
35/14 . . . according to the "fluidised bed" technique
35/16 . with electric, electromagnetic, or mechanical vibrations; by particle radiation
35/22 . Starting-up reforming operations **[3]**
35/24 . Controlling or regulating of reforming operations **[3]**

Hydrotreatment processes

45/00 Refining of hydrocarbon oils using hydrogen or hydrogen-generating compounds [3]

Note

Treatment of hydrocarbon oils in the presence of hydrogen-generating compounds not provided for in a single one of groups C10G 45/02, C10G 45/32, C10G 45/44, or C10G 45/58 is covered by group C10G 49/00. **[3]**

45/02 . to eliminate hetero atoms without changing the skeleton of the hydrocarbon involved and without cracking into lower boiling hydrocarbons; Hydrofinishing **[3]**
45/04 . . characterised by the catalyst used **[3]**
45/06 . . . containing nickel or cobalt metal, or compounds thereof **[3]**
45/08 . . . . in combination with chromium, molybdenum, or tungsten metals, or compounds thereof **[3]**
45/10 . . . containing platinum group metals or compounds thereof **[3]**
45/12 . . . containing crystalline alumino-silicates, e.g. molecular sieves **[3]**
45/14 . . with moving solid particles **[3]**
45/16 . . . suspended in the oil, e.g. slurries **[3]**
45/18 . . . according to the "moving bed" technique **[3]**
45/20 . . . according to the "fluidised bed" technique **[3]**
45/22 . . with hydrogen dissolved or suspended in the oil **[3]**
45/24 . . with hydrogen-generating compounds **[3]**
45/26 . . . Steam or water **[3]**
45/28 . . . Organic compounds; Autofining **[3]**
45/30 . . . . characterised by the catalyst used **[3]**
45/32 . Selective hydrogenation of the diolefin or acetylene compounds **[3]**
45/34 . . characterised by the catalyst used **[3]**
45/36 . . . containing nickel or cobalt metal, or compounds thereof **[3]**
45/38 . . . . in combination with chromium, molybdenum or tungsten metals, or compounds thereof **[3]**
45/40 . . . containing platinum group metals or compounds thereof **[3]**
45/42 . . with moving solid particles **[3]**
45/44 . Hydrogenation of the aromatic hydrocarbons **[3]**
45/46 . . characterised by the catalyst used **[3]**
45/48 . . . containing nickel or cobalt metal, or compounds thereof **[3]**
45/50 . . . . in combination with chromium, molybdenum or tungsten metal, or compounds thereof **[3]**
45/52 . . . containing platinum group metals or compounds thereof **[3]**
45/54 . . . containing crystalline alumino-silicates, e.g. molecular sieves **[3]**
45/56 . . with moving solid particles **[3]**
45/58 . to change the structural skeleton of some of the hydrocarbon content without cracking the other hydrocarbons present, e.g. lowering pour point; Selective hydrocracking of normal paraffins (C10G 32/00 takes precedence; improving or increasing the octane number or aromatic content of naphtha C10G 35/00) **[3]**
45/60 . . characterised by the catalyst used **[3]**
45/62 . . . containing platinum group metals or compounds thereof **[3]**
45/64 . . . containing crystalline alumino-silicates, e.g. molecular sieves **[3]**
45/66 . . with moving solid particles **[3]**
45/68 . . Aromatisation of hydrocarbon oil fractions **[3]**
45/70 . . . with catalysts containing platinum group metals or compounds thereof **[3]**
45/72 . Controlling or regulating **[3]**

47/00 Cracking of hydrocarbon oils, in the presence of hydrogen or hydrogen-generating compounds, to obtain lower boiling fractions (C10G 15/00 takes precedence; destructive hydrogenation of non-melting solid carbonaceous or similar materials C10G 1/06) **[3]**

47/02 . characterised by the catalyst used **[3]**
47/04 . . Oxides **[3]**
47/06 . . Sulfides **[3]**
47/08 . . Halides **[3]**
47/10 . . with catalysts deposited on a carrier **[3]**
47/12 . . . Inorganic carriers **[3]**
47/14 . . . . the catalyst containing platinum group metals or compounds thereof **[3]**
47/16 . . . . Crystalline alumino-silicate carriers **[3]**
47/18 . . . . . the catalyst containing platinum group metals or compounds thereof **[3]**
47/20 . . . . . the catalyst containing other metals or compounds thereof **[3]**
47/22 . Non-catalytic cracking in the presence of hydrogen **[3]**
47/24 . with moving solid particles **[3]**
47/26 . . suspended in the oil, e.g. slurries **[3]**

47/28 . . according to the "moving bed" technique **[3]**
47/30 . . according to the "fluidised bed" technique **[3]**
47/32 . in the presence of hydrogen-generating compounds **[3]**
47/34 . . Organic compounds, e.g. hydrogenated hydrocarbons **[3]**
47/36 . Controlling or regulating **[3]**

49/00 Treatment of hydrocarbon oils, in the presence of hydrogen or hydrogen-generating compounds, not provided for in a single one of groups C10G 45/02, C10G 45/32, C10G 45/44, C10G 45/58, or C10G 47/00 [3]
49/02 . characterised by the catalyst used **[3]**
49/04 . . containing nickel, cobalt, chromium, molybdenum, or tungsten metals, or compounds thereof **[3]**
49/06 . . containing platinum group metals or compounds thereof **[3]**
49/08 . . containing crystalline alumino-silicates, e.g. molecular sieves **[3]**
49/10 . with moving solid particles **[3]**
49/12 . . suspended in the oil, e.g. slurries **[3]**
49/14 . . according to the "moving bed" technique **[3]**
49/16 . . according to the "fluidised bed" technique **[3]**
49/18 . in the presence of hydrogen-generating compounds, e.g. ammonia, water, hydrogen sulfide **[3]**
49/20 . . Organic compounds **[3]**
49/22 . Separation of effluents **[3]**
49/24 . Starting-up hydrotreatment operations **[3]**
49/26 . Controlling or regulating **[3]**

50/00 Production of liquid hydrocarbon mixtures from lower carbon number hydrocarbons, e.g. by oligomerisation [6]
50/02 . of hydrocarbon oils for lubricating purposes **[6]**

Multi-step processes

Note

Groups C10G 51/00 to C10G 69/00 cover only those combined treating operations where the interest is directed to the relationship between the steps. **[3]**

51/00 Treatment of hydrocarbon oils, in the absence of hydrogen, by two or more cracking processes only [3]
51/02 . plural serial stages only **[3]**
51/04 . . including only thermal and catalytic cracking steps **[3]**
51/06 . plural parallel stages only **[3]**

53/00 Treatment of hydrocarbon oils, in the absence of hydrogen, by two or more refining processes [3]
53/02 . plural serial stages only **[3]**
53/04 . . including at least one extraction step **[3]**
53/06 . . . including only extraction steps, e.g. deasphalting by solvent treatment followed by extraction of aromatics **[3]**
53/08 . . including at least one sorption step **[3]**
53/10 . . including at least one acid-treatment step **[3]**
53/12 . . including at least one alkaline-treatment step **[3]**
53/14 . . including at least one oxidation step **[3]**
53/16 . plural parallel stages only **[3]**

55/00 Treatment of hydrocarbon oils, in the absence of hydrogen, by at least one refining process and at least one cracking process [3]
55/02 . plural serial stages only **[3]**
55/04 . . including at least one thermal cracking step **[3]**
55/06 . . including at least one catalytic cracking step **[3]**
55/08 . plural parallel stages only **[3]**

57/00 Treatment of hydrocarbon oils, in the absence of hydrogen, by at least one cracking process or refining process and at least one other conversion process [3]
57/02 . with polymerisation **[3]**

59/00 Treatment of naphtha by two or more reforming processes only or by at least one reforming process and at least one process which does not substantially change the boiling range of the naphtha [3]
59/02 . plural serial stages only **[3]**
59/04 . . including at least one catalytic and at least one non-catalytic reforming step **[3]**
59/06 . plural parallel stages only **[3]**

61/00 Treatment of naphtha by at least one reforming process and at least one process of refining in the absence of hydrogen [3]
61/02 . plural serial stages only **[3]**
61/04 . . the refining step being an extraction **[3]**
61/06 . . the refining step being a sorption process **[3]**
61/08 . plural parallel stages only **[3]**
61/10 . processes also including other conversion steps **[3]**

63/00 Treatment of naphtha by at least one reforming process and at least one other conversion process (C10G 59/00, C10G 61/00 take precedence) **[3]**
63/02 . plural serial stages only **[3]**
63/04 . . including at least one cracking step **[3]**
63/06 . plural parallel stages only **[3]**
63/08 . . including at least one cracking step **[3]**

65/00 Treatment of hydrocarbon oils by two or more hydrotreatment processes only [3]
65/02 . plural serial stages only **[3]**
65/04 . . including only refining steps **[3]**
65/06 . . . at least one step being a selective hydrogenation of the diolefins **[3]**
65/08 . . . at least one step being a hydrogenation of the aromatic hydrocarbons **[3]**
65/10 . . including only cracking steps **[3]**
65/12 . . including cracking steps and other hydrotreatment steps **[3]**
65/14 . plural parallel stages only **[3]**
65/16 . . including only refining steps **[3]**
65/18 . . including only cracking steps **[3]**

67/00 Treatment of hydrocarbon oils by at least one hydrotreatment process and at least one process for refining in the absence of hydrogen only [3]
67/02 . plural serial stages only **[3]**
67/04 . . including solvent extraction as the refining step in the absence of hydrogen **[3]**
67/06 . . including a sorption process as the refining step in the absence of hydrogen **[3]**
67/08 . . including acid treatment as the refining step in the absence of hydrogen **[3]**
67/10 . . including alkaline treatment as the refining step in the absence of hydrogen **[3]**

67/12 . . including oxidation as the refining step in the absence of hydrogen **[3]**
67/14 . . including at least two different refining steps in the absence of hydrogen **[3]**
67/16 . plural parallel stages only **[3]**

69/00 Treatment of hydrocarbon oils by at least one hydrotreatment process and at least one other conversion process (C10G 67/00 takes precedence) **[3]**
69/02 . plural serial stages only **[3]**
69/04 . . including at least one step of catalytic cracking in the absence of hydrogen **[3]**
69/06 . . including at least one step of thermal cracking in the absence of hydrogen **[3]**
69/08 . . including at least one step of reforming naphtha **[3]**
69/10 . . . hydrocracking of higher boiling fractions into naphtha and reforming the naphtha obtained **[3]**
69/12 . . including at least one polymerisation or alkylation step **[3]**
69/14 . plural parallel stages only **[3]**

70/00 Working-up undefined normally gaseous mixtures obtained by processes covered by groups C10G 9/00, C10G 11/00, C10G 15/00, C10G 47/00, C10G 51/00 [5]
70/02 . by hydrogenation **[5]**
70/04 . by physical processes **[5]**
70/06 . . by gas-liquid contact **[5]**

71/00 Treatment by methods not otherwise provided for of hydrocarbon oils or fatty oils for lubricating purposes [3]
71/02 . Thickening by voltolising (chemical modification of drying-oils by voltolising C09F 7/04) **[3]**

73/00 Recovery or refining of mineral waxes, e.g. montan wax (compositions essentially based on waxes C08L 91/00) **[3]**
73/02 . Recovery of petroleum waxes from hydrocarbon oils; De-waxing of hydrocarbon oils **[3]**
73/04 . . with the use of filter aids **[3]**
73/06 . . with the use of solvents **[3]**
73/08 . . . Organic compounds **[3]**
73/10 . . . . Hydrocarbons **[3]**
73/12 . . . . Oxygen-containing compounds **[3]**
73/14 . . . . Halogen-containing compounds **[3]**
73/16 . . . . Nitrogen-containing compounds **[3]**
73/18 . . . . containing sulfur, selenium or tellurium **[3]**
73/20 . . . . containing phosphorus **[3]**
73/22 . . . . Mixtures of organic compounds **[3]**
73/23 . . . Recovery of used solvents **[6]**
73/24 . . by formation of adducts **[3]**
73/26 . . by flotation **[3]**
73/28 . . by centrifugal force **[3]**
73/30 . . with electric means **[3]**
73/32 . . Methods of cooling during de-waxing **[3]**
73/34 . . Controlling or regulating **[3]**
73/36 . Recovery of petroleum waxes from other compositions containing oil in minor proportions, from concentrates or from residues; De-oiling, sweating **[3]**
73/38 . Chemical modification of petroleum waxes **[3]**
73/40 . Physical treatment of waxes or modified waxes, e.g. granulation, dispersion, emulsion, irradiation **[3]**
73/42 . Refining of petroleum waxes **[3]**
73/44 . . in the presence of hydrogen or hydrogen-generating compounds **[3]**

75/00 Inhibiting corrosion or fouling in apparatus for treatment or conversion of hydrocarbon oils, in general (C10G 7/10, C10G 9/16 take precedence) **[6]**
75/02 . by addition of corrosion inhibitors **[6]**
75/04 . by addition of antifouling agents **[6]**

99/00 Subject matter not provided for in other groups of this subclass [8]

C10H PRODUCTION OF ACETYLENE BY WET METHODS [5]

Subclass index

1/00 Acetylene gas generators with dropwise, gravity, non-automatic water feed
1/02 . Valves
1/04 . . Screw valves
1/06 . . Cocks
1/08 . Other means for controlling the water feed
1/10 . Water feed from above through a central or lateral pipe
1/12 . Water feed from above through porous materials

3/00 Acetylene gas generators with automatic water feed regulation by means independent of the gas-holder
3/02 . with membranes
3/04 . with floats
3/06 . with pistons

5/00 Acetylene gas generators with automatic water feed regulation by the gas-holder
5/02 . with overflow for the water
5/04 . by drop-by-drop water valves connected with the gas-holder
5/06 . . by drop-by-drop water cocks connected with the gas-holder
5/08 . with gas-holder-connected water valves or cocks according to the submersion system

7/00 **Acetylene gas generators with water feed by Kipp's principle**
7/02 . with water feed from below
7/04 . with water feed from above

9/00 **Acetylene gas generators according to Dobereiner's principle with fixed carbide bell**
9/02 . with water feed from below through porous materials (by capillary feed)
9/04 . with gas cock actuated by the gas-holder
9/06 . with the depth of the gas outlet pipe regulated by the gas-holder
9/08 . with movable gas-holder
9/10 . by wetting the carbide only at the bottom

11/00 **Acetylene gas generators with submersion of the carbide in water**
11/02 . inside the gas-holder
11/04 . with sealing and reaction water separated from each other

13/00 **Acetylene gas generators with combined dipping and drop-by-drop system**

15/00 **Acetylene gas generators with carbide feed, with or without regulation by the gas pressure**
15/02 . with non-automatic carbide feed
15/04 . . Closure means at the filling-hopper
15/06 . with automatic carbide feed by valves
15/08 . . by flap or slide valves
15/10 . . by float valves
15/12 . . by measuring valves, including pocket-wheels
15/14 . with feed worm or feed conveyers
15/16 . with feed drums
15/18 . with movable feed disc and fixed carbide-receptacle
15/20 . with carbide feed by cartridges or other packets
15/22 . with carbide feed of pulverous carbide from receptacles or through the gas-holder
15/24 . with carbide feed by pistons

17/00 **High-pressure acetylene gas generators**

19/00 **Other acetylene gas generators**
19/02 . Rotary carbide receptacles

21/00 **Details of acetylene generators**; **Accessory equipment for, or features of, the wet production of acetylene**
21/02 . Packages of carbide for use in generators, e.g. cartridges
21/04 . . Placing packages in the generator
21/06 . . . Opening devices for packages in the generator
21/08 . Safety devices for acetylene generators
21/10 . Carbide compositions
21/12 . Gas-tight sealing means, e.g. liquid seals in generators
21/14 . Ventilation means; Cooling devices
21/16 . Removing sludge from generators

C10J **PRODUCTION OF PRODUCER GAS, WATER-GAS, SYNTHESIS GAS FROM SOLID CARBONACEOUS MATERIAL, OR MIXTURES CONTAINING THESE GASES** (synthesis gas from liquid or gaseous hydrocarbons C01B; underground gasification of minerals E21B 43/295); **CARBURETTING AIR OR OTHER GASES [5]**

1/00 **Production of fuel gases by carburetting air or other gases without pyrolysis** (for internal-combustion engines F02)
1/02 . Carburetting air
1/04 . . Controlling supply of air
1/06 . . with materials which are liquid at ordinary temperatures
1/08 . . . by passage of air through or over the surface of the liquid
1/10 . . . . with the liquid absorbed on carriers
1/12 . . . by atomisation of the liquid
1/14 . . . Controlling the supply of liquid in accordance with the air supply
1/16 . . with solid hydrocarbons
1/18 . . in rotary carburettors
1/20 . Carburetting gases other than air
1/22 . Adding materials to prevent vapour deposition
1/24 . Controlling humidity of the air or gas to be carburetted
1/26 . using raised temperatures or pressures
1/28 . Odorising air gas

3/00 **Production of combustible gases containing carbon monoxide from solid carbonaceous fuels** (destructive distillation processes C10B)
3/02 . Fixed-bed gasification of lump fuel
3/04 . . Cyclic processes, e.g. alternate blast and run
3/06 . . Continuous processes
3/08 . . . with ash-removal in liquid state
3/10 . . . using external heating
3/12 . . . using solid heat-carriers
3/14 . . . using gaseous heat-carriers
3/16 . . . simultaneously reacting oxygen and water with the carbonaceous material
3/18 . . . using electricity
3/20 . . Apparatus; Plants
3/22 . . . Arrangements or dispositions of valves or flues
3/24 . . . . to permit flow of gases or vapours other than upwardly through the fuel bed
3/26 . . . . . downwardly
3/28 . . . . fully automatic
3/30 . . . Fuel charging devices
3/32 . . . Devices for distributing fuel evenly over the bed for stirring-up the fuel bed
3/34 . . . Grates; Mechanical ash-removing devices
3/36 . . . . Fixed grates
3/38 . . . . . with stirring beams
3/40 . . . . Movable grates
3/42 . . . . . Rotary grates
3/44 . . . adapted for use on vehicles
3/46 . Gasification of granular or pulverulent fuels in suspension
3/48 . . Apparatus; Plants
3/50 . . . Fuel charging devices
3/52 . . . Ash-removing devices
3/54 . . Gasification of granular or pulverulent fuels by the Winkler technique, i.e. by fluidisation
3/56 . . . Apparatus; Plants
3/57 . Gasification using molten salts or metals (C10J 3/02, C10J 3/46 take precedence) **[4]**
3/58 . combined with pre-distillation of the fuel

3/60 . . Processes
3/62 . . . with separate withdrawal of the distillation products
3/64 . . . with decomposition of the distillation products
3/66 . . . . by introducing them into the gasification zone
3/68 . Carburetting by pyrolysis of carbonaceous material in the fuel bed (C10J 3/66 takes precedence)
3/70 . Carburetting by pyrolysis of carbonaceous material in a carburettor
3/72 . Other features
3/74 . . Construction of shells or jackets
3/76 . . . Water jackets; Steam boiler jackets
3/78 . . High-pressure apparatus
3/80 . . with arrangements for preheating the blast or the water vapour
3/82 . . Gas withdrawal means
3/84 . . . with means for removing dust or tar from the gas
3/86 . . combined with waste-heat boilers

C10K PURIFYING OR MODIFYING THE CHEMICAL COMPOSITION OF COMBUSTIBLE GASES CONTAINING CARBON MONOXIDE

1/00 Purifying combustible gases containing carbon monoxide (isolation of hydrogen from mixtures containing hydrogen and carbon monoxide C01B 3/50)
1/02 . Dust removal
1/04 . by cooling to condense non-gaseous materials
1/06 . . combined with spraying with water
1/08 . by washing with liquids; Reviving the used wash liquors
1/10 . . with aqueous liquids
1/12 . . . alkaline-reacting
1/14 . . . . organic
1/16 . . with non-aqueous liquids
1/18 . . . hydrocarbon oils
1/20 . by treating with solids; Regenerating spent purifying masses
1/22 . . Apparatus, e.g. dry box purifiers
1/24 . . . Supporting means for the purifying material
1/26 . . Regeneration of the purifying material
1/28 . . Controlling the gas flow through the purifiers
1/30 . . with moving purifying masses
1/32 . with selectively absorptive solids, e.g. active carbon
1/34 . by catalytic conversion of impurities to more readily removable materials

3/00 Modifying the chemical composition of combustible gases containing carbon monoxide to produce an improved fuel, e.g. one of different calorific value, which may be free from carbon monoxide
3/02 . by catalytic treatment
3/04 . . reducing the carbon monoxide content
3/06 . by mixing with gases

C10L FUELS NOT OTHERWISE PROVIDED FOR; NATURAL GAS; SYNTHETIC NATURAL GAS OBTAINED BY PROCESSES NOT COVERED BY SUBCLASSES C10G OR C10K; LIQUEFIED PETROLEUM GAS; USE OF ADDITIVES TO FUELS OR FIRES; FIRE-LIGHTERS [5]

1/00 Liquid carbonaceous fuels
1/02 . essentially based on components consisting of carbon, hydrogen, and oxygen only
1/04 . essentially based on blends of hydrocarbons
1/06 . . for spark ignition
1/08 . . for compression ignition
1/10 . containing additives

(1) In groups C10L 1/12 to C10L 1/14, in the absence of an indication to the contrary, a compound is classified in the last appropriate place.
(2) If an additive is a mixture of compounds, classification is made for each compound of interest. **[8]**
(3) A metal salt or an ammonium salt of a compound is classified as that compound, e.g. a chromium sulfonate is classified as a sulfonate in group C10L 1/24 and <u>not</u> in group C10L 1/30.

1/12 . . Inorganic compounds
1/14 . . Organic compounds
1/16 . . . Hydrocarbons
1/18 . . . containing oxygen
1/182 . . . . containing hydroxy groups; Salts thereof **[8]**
1/183 . . . . . at least one hydroxy group bound to an aromatic carbon atom **[8]**
1/185 . . . . Ethers; Acetals; Ketals; Aldehydes; Ketones **[8]**
1/188 . . . . Carboxylic acids; Salts thereof **[8]**
1/189 . . . . . having at least one carboxyl group bound to an aromatic carbon atom **[8]**
1/19 . . . . Esters **[8]**
1/192 . . . . Macromolecular compounds **[8]**
1/195 . . . . . obtained by reactions involving only carbon-to-carbon unsaturated bonds **[8]**
1/196 . . . . . derived from monomers containing a carbon-to-carbon unsaturated bond and a carboxyl group or salts, anhydrides or esters thereof **[8]**
1/197 . . . . . derived from monomers containing a carbon-to-carbon unsaturated bond and an acyloxy group of a saturated carboxylic or carbonic acid **[8]**
1/198 . . . . . obtained otherwise than by reactions involving only carbon-to-carbon unsaturated bonds **[8]**
1/20 . . . containing halogen
1/22 . . . containing nitrogen

1/222 . . . . containing at least one carbon-to-nitrogen single bond **[8]**
1/223 . . . . . having at least one amino group bound to an aromatic carbon atom **[8]**
1/224 . . . . . Amides; Imides **[8]**
1/226 . . . . containing at least one nitrogen-to-nitrogen bond, e.g. azo compounds, azides, hydrazines **[8]**
1/228 . . . . containing at least one carbon-to-nitrogen double bond, e.g. guanidines, hydrazones, semicarbazones, imines; containing at least one carbon-to-nitrogen triple bond, e.g. nitriles **[8]**
1/23 . . . . containing at least one nitrogen-to-oxygen bond, e.g. nitro-compounds, nitrates, nitrites **[8]**
1/232 . . . . containing nitrogen in a heterocyclic ring **[8]**
1/233 . . . . . containing nitrogen and oxygen in the ring, e.g. oxazoles **[8]**
1/234 . . . . Macromolecular compounds **[8]**
1/236 . . . . . obtained by reactions involving only carbon-to-carbon unsaturated bonds **[8]**
1/238 . . . . . obtained otherwise than by reactions involving only carbon-to-carbon unsaturated bonds **[8]**
1/2383 . . . . . Polyamines or polyimines, or derivatives thereof **[8]**
1/2387 . . . . . Polyoxyalkyleneamines **[8]**
1/24 . . . containing sulfur, selenium or tellurium
1/26 . . . containing phosphorus
1/28 . . . containing silicon
1/30 . . . containing elements not mentioned in groups C10L 1/16 to C10L 1/28
1/32 . consisting of coal-oil suspensions or aqueous emulsions

3/00 **Gaseous fuels**; **Natural gas**; **Synthetic natural gas obtained by processes not covered by subclasses C10G, C10K**; **Liquefied petroleum gas [5]**
3/02 . Compositions containing acetylene
3/04 . . Absorbing compositions, e.g. solvents
3/06 . Natural gas; Synthetic natural gas obtained by processes not covered by C10G, C10K 3/02 or C10K 3/04 **[5]**
3/08 . . Production of synthetic natural gas **[5]**
3/10 . . Working-up natural gas or synthetic natural gas **[5]**
3/12 . Liquefied petroleum gas **[5]**

5/00 **Solid fuels** (produced by solidifying fluid fuels C10L 7/00; peat briquettes C10F 7/06)
5/02 . Briquettes consisting mainly of carbonaceous materials of mineral origin (peat briquettes C10F)
5/04 . . Raw material to be used; Pretreatment thereof
5/06 . . Briquetting processes
5/08 . . . without the aid of extraneous binders
5/10 . . . with the aid of binders, e.g. pretreated binders
5/12 . . . . with inorganic binders
5/14 . . . . with organic binders
5/16 . . . . . with bituminous binders, e.g. tar, pitch
5/18 . . . . . with naphthalene
5/20 . . . . . with sulfite lye
5/22 . . . . Methods of applying the binder to the other compounding ingredients; Apparatus therefor
5/24 . . Combating dust during briquetting; Safety devices against explosion
5/26 . . After-treatment of the briquettes
5/28 . . . Heating the briquettes; Coking the binders
5/30 . . . Cooling the briquettes
5/32 . . . Coating
5/34 . . Other details of the briquettes
5/36 . . . Shape
5/38 . . . . Briquettes consisting of different layers
5/40 . essentially based on materials of non-mineral origin
5/42 . . on animal substances or products obtained therefrom
5/44 . . on vegetable substances
5/46 . . on sewage, house, or town refuse
5/48 . . on industrial residues or waste materials (C10L 5/42, C10L 5/44 take precedence) **[4]**

7/00 **Fuels produced by solidifying fluid fuels**
7/02 . liquid fuels
7/04 . . alcohol

8/00 **Fuels not provided for in other groups of this subclass [8]**

9/00 **Treating solid fuels to improve their combustion**
9/02 . by chemical means
9/04 . . by hydrogenating
9/06 . . by oxidation
9/08 . by heat treatment, e.g. calcining
9/10 . by using additives
9/12 . . Oxidation means, e.g. oxygen-generating compounds

10/00 **Use of additives to fuels or fires for particular purposes** (using binders for briquetting solid fuels C10L 5/10; using additives to improve the combustion of solid fuels C10L 9/10) **[1,8]**
10/02 . for reducing smoke development
10/04 . for minimising corrosion or incrustation
10/06 . for facilitating soot removal
10/08 . for improving lubricity; for reducing wear **[8]**
10/10 . for improving the octane number **[8]**
10/12 . for improving the cetane number **[8]**
10/14 . for improving low temperature properties **[8]**
10/16 . . Pour-point depressants **[8]**
10/18 . use of detergents or dispersants for purposes not provided for in groups C10L 10/02 to C10L 10/16 **[8]**

11/00 **Fire-lighters**
11/02 . based on refractory porous bodies
11/04 . consisting of combustible material (matches C06F)
11/06 . of a special shape
11/08 . Apparatus for the manufacture thereof

C10M **LUBRICATING COMPOSITIONS** (well drilling compositions C09K 8/02); **USE OF CHEMICAL SUBSTANCES EITHER ALONE OR AS LUBRICATING INGREDIENTS IN A LUBRICATING COMPOSITION** (mould release, i.e. separating, agents for metals B22C 3/00, for plastics or substances in a plastic state, in general B29C 33/56, for glass C03B 40/02; textile lubricating compositions D06M 11/00, D06M 13/00, D06M 15/00; use of particular substances in particular apparatus or conditions, see F16N or the relevant groups for the application, e.g. A21D 8/08, B21C 9/00, H01B 3/18; immersion oils for microscopy G02B 21/33) **[4]**

(1) In this subclass, the following terms or expressions are used with the meanings indicated:
- "lubricant" or "lubricating composition" includes cutting oils, hydraulic fluids, metal drawing compositions, flushing oils, slushing oils, or the like;
- "aliphatic" includes "cycloaliphatic". **[4]**

(2) In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place. Thus, a compound having an aromatic ring is classified as aromatic regardless of whether the substituent(s) of interest are on the ring or on an aliphatic part of the molecule. **[4]**

(3) In this subclass:
(a) metal or ammonium salts of a compound are classified as that compound;
(b) salts or adducts formed between two or more organic compounds are classified according to all compounds forming the salt or adduct, if of interest;
(c) a specified compound, e.g. phenols, acids, substituted by a macromolecular hydrocarbon radical is classified as that compound;
(d) base-materials or thickeners or additives consisting of a mixture for which no specific main group is provided are classified in the most indented group covering all essential constituents of the mixture, for example,
- a base-material mixture of ketone and amide group C10M 105/00;
- a base-material mixture of ketone and ether group C10M 105/08;
- an additive mixture of long and short chain esters group C10M 129/00;
- an additive mixture of short chain aliphatic and aromatic carboxylic acids group C10M 129/26;

(e) except for aqueous lubricating compositions containing more than 10% water, which are classified separately, classification is made according to the type of ingredient or mixture of types of ingredient (base-material, thickener or additive) which characterises the composition.

Attention is drawn to the fact that a mixture of essential ingredients characterised by only one of its components, rather than by the mixture as a whole, is not classified as a mixture, e.g., a lubricating composition consisting of:
- a known base-material and a new additive is classified only in the "additive" part of the classification scheme;
- a known base-material with both a thickener and a further additive as essential ingredients, which may be individually known or not, is classified as a mixture of thickener and additive;
- a known base-material with a combination of additives as essential ingredients, which may be individually known or not, is classified in the appropriate place for the additive mixture. **[4]**

(4) Any part of a composition which is not identified by the classification according to Notes (2) or (3) above, and which itself is determined to be novel and non-obvious, must also be classified in the last appropriate place. The part can be either a single ingredient or a composition in itself. **[8]**

(5) Any part of a composition which is not identified by the classification according to Notes (2) to (4) above, and which is considered to represent information of interest for search, may also be classified in the last appropriate place. This can, for example, be the case when it is considered of interest to enable searching of compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

(6) In this subclass, it is desirable to add the indexing codes of subclass C10N. **[4]**

Subclass index

Base-materials [4]

101/00 Lubricating compositions characterised by the base-material being a mineral or fatty oil (containing more than 10% water C10M 173/00) **[4]**
101/02 . Petroleum fractions **[4]**
101/04 . Fatty oil fractions **[4]**

103/00 Lubricating compositions characterised by the base-material being an inorganic material (containing more than 10% water C10M 173/00) **[4]**
103/02 . Carbon; Graphite **[4]**
103/04 . Metals; Alloys **[4]**
103/06 . Metal compounds **[4]**

105/00 Lubricating compositions characterised by the base-material being a non-macromolecular organic compound [4]
105/02 . Well-defined hydrocarbons (petroleum fractions C10M 101/02) **[4]**
105/04 . . aliphatic **[4]**
105/06 . . aromatic **[4]**
105/08 . containing oxygen **[4]**
105/10 . . having hydroxy groups bound to acyclic or cycloaliphatic carbon atoms **[4]**
105/12 . . . monohydroxy **[4]**
105/14 . . . polyhydroxy **[4]**
105/16 . . having hydroxy groups bound to a carbon atom of a six-membered aromatic ring **[4]**
105/18 . . Ethers, e.g. epoxides **[4]**
105/20 . . Aldehydes; Ketones **[4]**
105/22 . . Carboxylic acids or their salts **[4]**
105/24 . . . having only one carboxyl group bound to an acyclic carbon atom, cycloaliphatic carbon atom or hydrogen **[4]**
105/26 . . . having more than one carboxyl group bound to an acyclic carbon atom or cycloaliphatic carbon atom **[4]**
105/28 . . . having only one carboxyl group bound to a carbon atom of a six-membered aromatic ring **[4]**
105/30 . . . having more than one carboxyl group bound to a carbon atom of a six-membered aromatic ring **[4]**
105/32 . . Esters **[4]**
105/34 . . . of monocarboxylic acids **[4]**
105/36 . . . of polycarboxylic acids **[4]**
105/38 . . . of polyhydroxy compounds **[4]**
105/40 . . . containing free hydroxy or carboxyl groups **[4]**
105/42 . . . Complex esters, i.e. compounds containing at least three esterified carboxyl groups and derived from the combination of at least three different types of the following five types of compound: monohydroxy compounds, polyhydroxy compounds, monocarboxylic acids, polycarboxylic acids and hydroxy carboxylic acids **[4]**
105/44 . . . . derived from the combination of monocarboxylic acids, dicarboxylic acids and dihydroxy compounds only and having no free hydroxy or carboxyl groups **[4]**
105/46 . . . . derived from the combination of monohydroxy compounds, dihydroxy compounds and dicarboxylic acids only and having no free hydroxy or carboxyl groups **[4]**
105/48 . . . of carbonic acid **[4]**
105/50 . containing halogen **[4]**
105/52 . . containing carbon, hydrogen and halogen only **[4]**
105/54 . . containing carbon, hydrogen, halogen and oxygen **[4]**
105/56 . containing nitrogen **[4]**
105/58 . . Amines, e.g. polyalkylene polyamines, quaternary amines (polyalkylene polyamines with eleven or more monomer units C10M 107/44) **[4]**
105/60 . . . having amino groups bound to an acyclic or cycloaliphatic carbon atom **[4]**
105/62 . . . . containing hydroxy groups **[4]**
105/64 . . . having amino groups bound to a carbon atom of a six-membered aromatic ring **[4]**
105/66 . . . . containing hydroxy groups **[4]**
105/68 . . Amides; Imides **[4]**
105/70 . . as ring hetero atom **[4]**
105/72 . containing sulfur, selenium or tellurium **[4]**
105/74 . containing phosphorus **[4]**
105/76 . containing silicon **[4]**
105/78 . containing boron **[4]**
105/80 . containing atoms of elements not provided for in groups C10M 105/02 to C10M 105/78 **[4]**

107/00 Lubricating compositions characterised by the base-material being a macromolecular compound [4]
107/02 . Hydrocarbon polymers; Hydrocarbon polymers modified by oxidation **[4]**
107/04 . . Polyethene **[4]**
107/06 . . containing propene **[4]**
107/08 . . containing butene **[4]**
107/10 . . containing aliphatic monomer having more than 4 carbon atoms **[4]**
107/12 . . containing aromatic monomer, e.g. styrene **[4]**
107/14 . . containing conjugated diene **[4]**
107/16 . . containing non-conjugated diene **[4]**
107/18 . . Hydrocarbon polymers modified by oxidation **[4]**
107/20 . containing oxygen (C10M 107/18 takes precedence) **[4]**
107/22 . . Macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
107/24 . . . containing monomers having an unsaturated radical bound to an alcohol, aldehydo, ketonic, ether, ketal or acetal radical **[4]**
107/26 . . . containing monomers having an unsaturated radical bound to an acyloxy radical of a saturated carboxylic or carbonic acid **[4]**
107/28 . . . containing monomers having an unsaturated radical bound to a carboxyl radical, e.g. acrylate **[4]**
107/30 . . Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
107/32 . . . Condensation polymers of aldehydes or ketones; Polyesters; Polyethers **[4]**
107/34 . . . . Polyoxyalkylenes **[4]**
107/36 . . Polysaccharides, e.g. cellulose **[4]**
107/38 . containing halogen **[4]**
107/40 . containing nitrogen **[4]**
107/42 . . Macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
107/44 . . Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
107/46 . containing sulfur **[4]**
107/48 . containing phosphorus **[4]**

107/50 . containing silicon **[4]**
107/52 . containing boron **[4]**
107/54 . containing atoms of elements not provided for in groups C10M 107/02 to C10M 107/52 **[4]**

109/00 Lubricating compositions characterised by the base-material being a compound of unknown or incompletely defined constitution (C10M 101/00 takes precedence) **[4]**

109/02 . Reaction products **[4]**

Note

When classifying in this group, any reactant of a reaction product which is considered to represent information of interest for search, may also be classified in the last appropriate place in this subclass. This can, for example, be the case when it is considered of interest to enable searching of compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

111/00 Lubricating compositions characterised by the base-material being a mixture of two or more compounds covered by more than one of the main groups C10M 101/00 to C10M 109/00, each of these compounds being essential [4]

111/02 . at least one of them being a non-macromolecular organic compound **[4]**
111/04 . at least one of them being a macromolecular organic compound **[4]**
111/06 . at least one of them being a compound of the type covered by group C10M 109/00 **[4]**

Thickeners [4]

Note

In groups C10M 113/00 to C10M 123/00, the following term is used with the meaning indicated:
– "thickener" is an agent which solidifies other liquid components to form a grease (solid lubricants consisting of solid components C10M 101/00 to C10M 111/00). **[4]**

113/00 Lubricating compositions characterised by the thickener being an inorganic material [4]

113/02 . Carbon; Graphite **[4]**
113/04 . Sulfur **[4]**
113/06 . Metals; Alloys **[4]**
113/08 . Metal compounds **[4]**
113/10 . Clays; Micas **[4]**
113/12 . Silica **[4]**
113/14 . Glass **[4]**
113/16 . Inorganic material treated with organic compounds, e.g. coated **[4]**

115/00 Lubricating compositions characterised by the thickener being a non-macromolecular organic compound other than a carboxylic acid or salt thereof [4]

115/02 . Hydrocarbons (petroleum fractions C10M 121/02) **[4]**
115/04 . containing oxygen **[4]**
115/06 . containing halogen **[4]**
115/08 . containing nitrogen **[4]**
115/10 . containing sulfur **[4]**
115/12 . containing phosphorus **[4]**

117/00 Lubricating compositions characterised by the thickener being a non-macromolecular carboxylic acid or salt thereof [4]

117/02 . having only one carboxyl group bound to an acyclic carbon atom, cycloaliphatic carbon atom or hydrogen **[4]**
117/04 . . containing hydroxy groups **[4]**
117/06 . having more than one carboxyl group bound to an acyclic carbon atom or cycloaliphatic carbon atom **[4]**
117/08 . having only one carboxyl group bound to a carbon atom of a six-membered aromatic ring **[4]**
117/10 . having more than one carboxyl group bound to a carbon atom of a six-membered aromatic ring **[4]**

119/00 Lubricating compositions characterised by the thickener being a macromolecular compound [4]

119/02 . Hydrocarbons polymers; Hydrocarbon polymers modified by oxidation **[4]**
119/04 . containing oxygen (hydrocarbon polymers modified by oxidation C10M 119/02) **[4]**
119/06 . . Macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
119/08 . . . containing monomers having an unsaturated radical bound to an alcohol, aldehydo, ketonic, ether, ketal or acetal radical **[4]**
119/10 . . . containing monomers having an unsaturated radical bound to an acyloxy radical of a saturated carboxylic or carbonic acid **[4]**
119/12 . . . containing monomers having an unsaturated radical bound to a carboxyl radical, e.g. acrylate **[4]**
119/14 . . Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
119/16 . . . Condensation polymers of aldehydes or ketones; Polyesters; Polyethers **[4]**
119/18 . . . . Polyoxyalkylenes **[4]**
119/20 . . Polysaccharides, e.g. cellulose **[4]**
119/22 . containing halogen **[4]**
119/24 . containing nitrogen **[4]**
119/26 . containing sulfur **[4]**
119/28 . containing phosphorus **[4]**
119/30 . containing atoms of elements not provided for in groups C10M 119/02 to C10M 119/28 **[4]**

121/00 Lubricating compositions characterised by the thickener being a compound of unknown or incompletely defined constitution [4]

121/02 . Petroleum fractions, e.g. tars **[4]**
121/04 . Reaction products **[4]**

Note

When classifying in this group, any reactant of a reaction product which is considered to represent information of interest for search, may also be classified in the last appropriate place in this subclass. This can, for example, be the case when it is considered of interest to enable searching of compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

123/00 Lubricating compositions characterised by the thickener being a mixture of two or more compounds covered by more than one of the main groups C10M 113/00 to C10M 121/00, each of these compounds being essential (inorganic materials coated with organic compounds C10M 113/16) **[4]**

123/02 . at least one of them being a non-macromolecular compound **[4]**

123/04 . at least one of them being a macromolecular compound **[4]**

123/06 . at least one of them being a compound of the type covered by group C10M 121/00 **[4]**

Additives [4]

125/00 Lubricating compositions characterised by the additive being an inorganic material [4]

125/02 . Carbon; Graphite **[4]**

125/04 . Metals; Alloys **[4]**

125/06 . Sulfur **[4]**

125/08 . Metal carbides or hydrides **[4]**

125/10 . Metal oxides, hydroxides, carbonates or bicarbonates **[4]**

125/12 . Metal carbonyls **[4]**

125/14 . Water (aqueous lubricating compositions containing more than 10% water C10M 173/00) **[4]**

125/16 . Hydrogen peroxide; Oxygenated water **[4]**

125/18 . Compounds containing halogen **[4]**

125/20 . Compounds containing nitrogen **[4]**

125/22 . Compounds containing sulfur, selenium or tellurium **[4]**

125/24 . Compounds containing phosphorus, arsenic or antimony **[4]**

125/26 . Compounds containing silicon or boron, e.g. silica, sand **[4]**

125/28 . . Glass **[4]**

125/30 . . Clay **[4]**

127/00 Lubricating compositions characterised by the additive being a non-macromolecular hydrocarbon (petroleum fractions C10M 159/04) **[4]**

127/02 . well-defined aliphatic **[4]**

127/04 . well-defined aromatic **[4]**

127/06 . Alkylated aromatic hydrocarbons **[4]**

129/00 Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing oxygen [4]

129/02 . having a carbon chain of less than 30 atoms **[4]**

129/04 . . Hydroxy compounds **[4]**

129/06 . . . having hydroxy groups bound to acyclic or cycloaliphatic carbon atoms **[4]**

129/08 . . . . containing at least 2 hydroxy groups **[4]**

129/10 . . . having hydroxy groups bound to a carbon atom of a six-membered aromatic ring **[4]**

129/12 . . . . with condensed rings **[4]**

129/14 . . . . containing at least 2 hydroxy groups **[4]**

129/16 . . Ethers **[4]**

129/18 . . . Epoxides **[4]**

129/20 . . . Cyclic ethers having 4 or more ring atoms, e.g. furans, dioxolanes **[4]**

129/22 . . Peroxides; Ozonides **[4]**

129/24 . . Aldehydes; Ketones **[4]**

129/26 . . Carboxylic acids; Salts thereof **[4]**

129/28 . . . having carboxyl groups bound to acyclic or cycloaliphatic carbon atoms **[4]**

129/30 . . . . having 7 or less carbon atoms **[4]**

129/32 . . . . . monocarboxylic **[4]**

129/34 . . . . . polycarboxylic **[4]**

129/36 . . . . . containing hydroxy groups **[4]**

129/38 . . . . having 8 or more carbon atoms **[4]**

129/40 . . . . . monocarboxylic **[4]**

129/42 . . . . . polycarboxylic **[4]**

129/44 . . . . . containing hydroxy groups **[4]**

129/46 . . . . cycloaliphatic **[4]**

129/48 . . . having carboxyl groups bound to a carbon atom of a six-membered aromatic ring **[4]**

129/50 . . . . monocarboxylic **[4]**

129/52 . . . . polycarboxylic **[4]**

129/54 . . . . containing hydroxy groups **[4]**

129/56 . . . Acids of unknown or incompletely defined constitution **[4]**

129/58 . . . . Naphthenic acids **[4]**

129/60 . . . . Tall oil acids **[4]**

129/62 . . . . Rosin acids **[4]**

129/64 . . . Acids obtained from polymerised unsaturated acids **[4]**

129/66 . . Epoxidised acids or esters **[4]**

129/68 . . Esters (epoxidised C10M 129/66) **[4]**

129/70 . . . of monocarboxylic acids **[4]**

129/72 . . . of polycarboxylic acids **[4]**

129/74 . . . of polyhydroxy compounds **[4]**

129/76 . . . containing free hydroxy or carboxyl groups **[4]**

129/78 . . . Complex esters, i.e. compounds containing at least three esterified carboxyl groups and derived from the combination of at least three different types of the following five types of compound: monohydroxy compounds, polyhydroxy compounds, monocarboxylic acids, polycarboxylic acids, hydroxy carboxylic acids **[4]**

129/80 . . . . derived from the combination of monocarboxylic acids, dicarboxylic acids and dihydroxy compounds only and having no free hydroxy or carboxyl groups **[4]**

129/82 . . . . derived from the combination of monohydroxy compounds, dihydroxy compounds and dicarboxylic acids only and having no free hydroxy or carboxyl groups **[4]**

129/84 . . . of carbonic acid **[4]**

129/86 . having a carbon chain of 30 or more atoms **[4]**

129/88 . . Hydroxy compounds **[4]**

129/90 . . . having hydroxy groups bound to acyclic or cycloaliphatic carbon atoms **[4]**

129/91 . . . having hydroxy groups bound to a carbon atom of a six-membered aromatic ring **[4]**

129/92 . . Carboxylic acids **[4]**

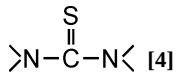
129/93 . . . having carboxyl groups bound to acyclic or cycloaliphatic carbon atoms **[4]**

129/94 . . . having carboxyl groups bound to a carbon atom of a six-membered aromatic ring **[4]**
129/95 . . Esters **[4]**

131/00 Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing halogen [4]
131/02 . containing carbon, hydrogen and halogen only **[4]**
131/04 . . aliphatic **[4]**
131/06 . . aromatic **[4]**
131/08 . containing carbon, hydrogen, halogen and oxygen **[4]**
131/10 . . Alcohols; Ethers; Aldehydes; Ketones **[4]**
131/12 . . Acids; Salts or esters thereof **[4]**
131/14 . Halogenated waxes **[4]**

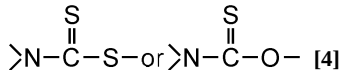
133/00 Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing nitrogen [4]
133/02 . having a carbon chain of less than 30 atoms **[4]**
133/04 . . Amines, e.g. polyalkylene polyamines; Quaternary amines (polyalkylene polyamines with eleven or more monomer units C10M 149/22) **[4]**
133/06 . . . having amino groups bound to acyclic or cycloaliphatic carbon atoms **[4]**
133/08 . . . . containing hydroxy groups **[4]**
133/10 . . . . cycloaliphatic **[4]**
133/12 . . . having amino groups bound to a carbon atom of a six-membered aromatic ring **[4]**
133/14 . . . . containing hydroxy groups **[4]**
133/16 . . Amides; Imides **[4]**
133/18 . . . of carbonic or haloformic acids **[4]**
133/20 . . . . Ureas; Semicarbazides; Allophanates **[4]**
133/22 . . containing a carbon-to-nitrogen double bond, e.g. guanidines, hydrazones, semicarbazones **[4]**
133/24 . . Nitriles **[4]**
133/26 . . containing a nitrogen-to-nitrogen double bond **[4]**
133/28 . . . Azo compounds **[4]**
133/30 . . containing a nitrogen-to-oxygen bond **[4]**
133/32 . . . containing a nitro group **[4]**
133/34 . . . containing a nitroso group **[4]**
133/36 . . . Hydroxylamines **[4]**
133/38 . . Heterocyclic nitrogen compounds **[4]**
133/40 . . . Six-membered ring containing nitrogen and carbon only **[4]**
133/42 . . . . Triazines **[4]**
133/44 . . . Five-membered ring containing nitrogen and carbon only **[4]**
133/46 . . . . Imidazoles **[4]**
133/48 . . . the ring containing both nitrogen and oxygen **[4]**
133/50 . . . . Morpholines **[4]**
133/52 . having a carbon chain of 30 or more atoms **[4]**
133/54 . . Amines **[4]**
133/56 . . Amides; Imides **[4]**
133/58 . . Heterocyclic compounds **[4]**

135/00 Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing sulfur, selenium or tellurium [4]
135/02 . Sulfurised compounds **[4]**
135/04 . . Hydrocarbons **[4]**
135/06 . . Esters, e.g. fats **[4]**
135/08 . containing a sulfur-to-oxygen bond **[4]**
135/10 . . Sulfonic acids or derivatives thereof **[4]**
135/12 . Thio-acids; Thiocyanates; Derivatives thereof **[4]**
135/14 . . having a carbon-to-sulfur double bond **[4]**
135/16 . . . thiourea type, i.e. containing the group



[4]

135/18 . . . thiocarbamic type, e.g. containing the groups



[4]

135/20 . Thiols; Sulfides; Polysulfides **[4]**
135/22 . . containing sulfur atoms bound to acyclic or cycloaliphatic carbon atoms **[4]**
135/24 . . . containing hydroxy groups; Derivatives thereof **[4]**
135/26 . . . containing carboxyl groups; Derivatives thereof **[4]**
135/28 . . containing sulfur atoms bound to a carbon atom of a six-membered aromatic ring **[4]**
135/30 . . . containing hydroxy groups; Derivatives thereof **[4]**
135/32 . Heterocyclic sulfur, selenium or tellurium compounds **[4]**
135/34 . . the ring containing sulfur and carbon only **[4]**
135/36 . . the ring containing sulfur and carbon with nitrogen or oxygen **[4]**

137/00 Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing phosphorus [4]
137/02 . having no phosphorus-to-carbon bond **[4]**
137/04 . . Phosphate esters **[4]**
137/06 . . . Metal salts **[4]**
137/08 . . . Ammonium or amine salts **[4]**
137/10 . . . Thio derivatives **[4]**
137/12 . having a phosphorus-to-carbon bond **[4]**
137/14 . . containing sulfur **[4]**
137/16 . having a phosphorus-to-nitrogen bond **[4]**

139/00 Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing atoms of elements not provided for in groups C10M 127/00 to C10M 137/00 [4]
139/02 . Esters of silicon acids **[4]**
139/04 . having a silicon-to-carbon bond, e.g. silanes **[4]**
139/06 . having a metal-to-carbon bond (metal complexes of unknown constitution C10M 159/18) **[4]**

141/00 Lubricating compositions characterised by the additive being a mixture of two or more compounds covered by more than one of the main groups C10M 125/00 to C10M 139/00, each of these compounds being essential [4]
141/02 . at least one of them being an organic oxygen-containing compound **[4]**
141/04 . at least one of them being an organic halogen-containing compound **[4]**
141/06 . at least one of them being an organic nitrogen-containing compound **[4]**
141/08 . at least one of them being an organic sulfur-, selenium- or tellurium-containing compound **[4]**
141/10 . at least one of them being an organic phosphorus-containing compound **[4]**
141/12 . at least one of them being an organic compound containing atoms of elements not provided for in groups C10M 141/02 to C10M 141/10 **[4]**

143/00 Lubricating composition characterised by the additive being a macromolecular hydrocarbon or such hydrocarbon modified by oxidation [4]

143/02 . Polyethene **[4]**
143/04 . containing propene **[4]**
143/06 . containing butene **[4]**
143/08 . containing aliphatic monomer having more than 4 carbon atoms **[4]**
143/10 . containing aromatic monomer, e.g. styrene **[4]**
143/12 . containing conjugated diene **[4]**
143/14 . containing non-conjugated diene **[4]**
143/16 . containing cycloaliphatic monomer **[4]**
143/18 . Oxidised hydrocarbons, i.e. oxidised subsequent to macromolecular formation **[4]**

145/00 Lubricating compositions characterised by the additive being a macromolecular compound containing oxygen (oxidised hydrocarbons C10M 143/18) **[4]**

145/02 . Macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
145/04 . . containing monomers having an unsaturated radical bound to an alcohol, aldehydo, ketonic, ether, ketal or acetal radical **[4]**
145/06 . . containing monomers having an unsaturated radical bound to an acyloxy radical of a saturated carboxylic or carbonic acid **[4]**
145/08 . . . Vinyl esters of a saturated carboxylic or carbonic acid **[4]**
145/10 . . containing monomers having an unsaturated radical bound to a carboxyl radical, e.g. acrylate **[4]**
145/12 . . . monocarboxylic **[4]**
145/14 . . . . Acrylate; Methacrylate **[4]**
145/16 . . . polycarboxylic **[4]**
145/18 . Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
145/20 . . Condensation polymers of aldehydes or ketones **[4]**
145/22 . . Polyesters **[4]**
145/24 . . Polyethers **[4]**
145/26 . . . Polyoxyalkylenes **[4]**
145/28 . . . . of alkylene oxides containing 2 carbon atoms only **[4]**
145/30 . . . . of alkylene oxides containing 3 carbon atoms only **[4]**
145/32 . . . . of alkylene oxides containing 4 or more carbon atoms **[4]**
145/34 . . . . of two or more specified different types **[4]**
145/36 . . . . etherified **[4]**
145/38 . . . . esterified **[4]**
145/40 . Polysaccharides, e.g. cellulose **[4]**

147/00 Lubricating compositions characterised by the additive being a macromolecular compound containing halogen [4]

147/02 . Monomer containing carbon, hydrogen and halogen only **[4]**
147/04 . Monomer containing carbon, hydrogen, halogen and oxygen **[4]**

149/00 Lubricating compositions characterised by the additive being a macromolecular compound containing nitrogen [4]

149/02 . Macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
149/04 . . containing monomers having an unsaturated radical bound to an amino group **[4]**
149/06 . . containing monomers having an unsaturated radical bound to an amido or imido group **[4]**
149/08 . . containing monomers having an unsaturated radical bound to a nitrile group **[4]**
149/10 . . containing monomers having an unsaturated radical bound to a nitrogen-containing hetero ring **[4]**
149/12 . Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
149/14 . . a condensation reaction being involved **[4]**
149/16 . . . between the nitrogen-containing monomer and an aldehyde or ketone **[4]**
149/18 . . . Polyamides **[4]**
149/20 . . . Polyureas **[4]**
149/22 . . . Polyamines **[4]**

151/00 Lubricating compositions characterised by the additive being a macromolecular compound containing sulfur, selenium or tellurium [4]

151/02 . Macromolecular compounds obtained by reactions involving only carbon-to-carbon unsaturated bonds **[4]**
151/04 . Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**

153/00 Lubricating compositions characterised by the additive being a macromolecular compound containing phosphorus [4]

153/02 . Macromolecular compounds obtained by reactions involving only carbon-to-carbon unsaturated bonds **[4]**
153/04 . Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**

155/00 Lubricating compositions characterised by the additive being a macromolecular compound containing atoms of elements not provided for in groups C10M 143/00 to C10M 153/00 [4]

155/02 . Monomer containing silicon **[4]**
155/04 . Monomer containing boron **[4]**

157/00 Lubricating compositions characterised by the additive being a mixture of two or more macromolecular compounds covered by more than one of the main groups C10M 143/00 to C10M 155/00, each of these compounds being essential [4]

157/02 . at least one of them being a halogen-containing compound **[4]**
157/04 . at least one of them being a nitrogen-containing compound **[4]**
157/06 . at least one of them being a sulfur-, selenium- or tellurium-containing compound **[4]**
157/08 . at least one of them being a phosphorus-containing compound **[4]**
157/10 . at least one of them being a compound containing atoms of elements not provided for in groups C10M 157/02 to C10M 157/08 **[4]**

159/00 Lubricating compositions characterised by the additive being of unknown or incompletely defined constitution (carboxylic acids with less than 30 carbon atoms in the chain, of unknown or incompletely defined constitution C10M 129/56) **[4]**

159/02 . Natural products **[4]**

159/04 . . Petroleum fractions, e.g. tars, solvents **[4]**

159/06 . . Waxes, e.g. ozocerite, ceresine, petrolatum, slack-wax **[4]**

159/08 . . Fatty oils **[4]**

159/10 . . Rubber **[4]**

159/12 . Reaction products **[4]**

Note

When classifying in this group, any reactant of a reaction product which is considered to represent information of interest for search, may also be classified in the last appropriate place in this subclass. This can, for example, be the case when it is considered of interest to enable searching of compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

159/14 . . obtained by Friedel-Crafts condensation **[4]**

159/16 . . obtained by Mannich reactions **[4]**

159/18 . . Complexes with metals **[4]**

159/20 . . Reaction mixtures having an excess of neutralising base, e.g. so-called overbasic or highly basic products **[4]**

159/22 . . . containing phenol radicals **[4]**

159/24 . . . containing sulfonic radicals **[4]**

161/00 Lubricating compositions characterised by the additive being a mixture of a macromolecular compound and a non-macromolecular compound, each of these compounds being essential [4]

163/00 Lubricating compositions characterised by the additive being a mixture of a compound of unknown or incompletely defined constitution and a non-macromolecular compound, each of these compounds being essential [4]

165/00 Lubricating compositions characterised by the additive being a mixture of a macromolecular compound and a compound of unknown or incompletely defined constitution, each of these compounds being essential [4]

167/00 Lubricating compositions characterised by the additive being a mixture of a macromolecular compound, a non-macromolecular compound and a compound of unknown or incompletely defined constitution, each of these compounds being essential [4]

Mixtures of base-materials, thickeners and additives [4]

169/00 Lubricating compositions characterised by containing as components a mixture of at least two types of ingredient selected from base-materials, thickeners or additives, covered by the preceding groups, each of these compounds being essential [4]

169/02 . Mixtures of base-materials and thickeners **[4]**

169/04 . Mixtures of base-materials and additives **[4]**

169/06 . Mixtures of thickeners and additives **[4]**

Compositions characterised by physical properties [4]

171/00 Lubricating compositions characterised by purely physical criteria, e.g. containing as base-material, thickener or additive, ingredients which are characterised exclusively by their numerically specified physical properties, i.e. containing ingredients which are physically well defined but for which the chemical nature is either unspecified or only very vaguely indicated (chemically defined ingredients C10M 101/00 to C10M 169/00; petroleum fractions C10M 101/02, C10M 121/02, C10M 159/04) **[4]**

171/02 . Specified values of viscosity or viscosity index **[4]**

171/04 . Specified molecular weight or molecular weight distribution **[4]**

171/06 . Particles of special shape or size **[4]**

Aqueous lubricating compositions [4]

173/00 Lubricating compositions containing more than 10% water [4]

173/02 . not containing mineral or fatty oils **[4]**

Working-up [4]

175/00 Working-up used lubricants to recover useful products [4]

175/02 . mineral-oil based **[4]**

175/04 . aqueous emulsion based **[4]**

175/06 . by ultrafiltration or osmosis **[4]**

Preparation or after-treatment [4]

177/00 Special methods of preparation of lubricating compositions; **Chemical modification by after-treatment of components or of the whole of a lubricating composition, not covered by other classes [4]**

C10N INDEXING SCHEME ASSOCIATED WITH SUBCLASS C10M [4]

(1) This subclass constitutes an indexing scheme associated with subclass C10M, relating to:
- metals and the metal of a compound (C10N 10/00);
- the properties of the lubricant composition or constituents thereof (C10N 20/00, C10N 30/00);
- the use or application of the lubricant composition (C10N 40/00);
- the form in which the lubricant composition is applied (C10N 50/00);

– chemical modification by after-treatment of lubricant constituents (C10N 60/00);
– special methods of preparation (C10N 70/00);
– special pretreatment of the material to be lubricated (C10N 80/00).

(2) In this subclass, the following terms or expressions are used with the meanings indicated:
– "lubricant" or "lubricating composition" includes cutting oils, hydraulic fluids, metal drawing compositions, flushing oils, slushing oils, or the like;
– "aliphatic" includes "cycloaliphatic". **[4]**

10/00 Metal present as such or in compounds [4]

(1) In this group, metals should be indexed according to their group of the Periodic Table. **[4]**

(2) Attention is drawn to Note (3) after the title of section C, which Note indicates to which version of the periodic table of chemical elements the IPC refers. **[2010.01]**

10/02 . Group 1 **[4]**
10/04 . Group 2 **[4]**
10/06 . Group 3 **[4]**
10/08 . Group 4 **[4]**
10/10 . Group 5 **[4]**
10/12 . Group 6 **[4]**
10/14 . Group 7 **[4]**
10/16 . Group 8 **[4]**

20/00 Specified physical properties of component of lubricating compositions [4]

20/02 . Viscosity; Viscosity index **[4]**
20/04 . Molecular weight; Molecular weight distribution **[4]**
20/06 . Particles of special shape or size **[4]**

30/00 Specified physical or chemical property which is improved by the additive characterising the lubricating composition, e.g. multifunctional additives [4]

30/02 . Pour-point; Viscosity index **[4]**
30/04 . Detergent or dispersant property **[4]**
30/06 . Oiliness; Film-strength; Anti-wear; Resistance to extreme pressure **[4]**
30/08 . Resistance to extreme temperature **[4]**
30/10 . Inhibition of oxidation, e.g. anti-oxidants **[4]**
30/12 . Inhibition of corrosion, e.g. anti-rust agents, anti-corrosives **[4]**
30/14 . Metal deactivation **[4]**
30/16 . Antiseptic; Biocidal **[4]**
30/18 . Anti-foaming property **[4]**
30/20 . Colour, e.g. dyes **[4]**

40/00 Specified use or application for which the lubricating composition is intended [4]

40/02 . Bearings **[4]**
40/04 . Oil-bath; Gear-boxes; Automatic transmissions; Traction drives **[4]**
40/06 . Instruments or other precision apparatus, e.g. damping fluids **[4]**
40/08 . Hydraulic fluids, e.g. brake-fluids **[4]**
40/10 . Running-in oil **[4]**
40/12 . Gas-turbines **[4]**
40/13 . . Aircraft turbines **[5]**
40/14 . Electric or magnetic purposes **[4]**
40/16 . . dielectric; Insulating oil **[4]**
40/18 . . in connection with recordings on magnetic tape or disc **[4]**
40/20 . Metal working **[4]**
40/22 . . with essential removal of material **[4]**
40/24 . . without essential removal of material; Punching metal **[4]**
40/25 . Internal-combustion engines **[5]**
40/26 . . Two-stroke **[4,5]**
40/28 . . Rotary **[4,5]**
40/30 . Refrigerator lubricant **[5]**
40/32 . Wire, rope or cable lubricants **[5]**
40/34 . Lubricating-sealants **[5]**
40/36 . Release agents **[5]**

50/00 Form in which the lubricant is applied to the material being lubricated [4]

50/02 . dissolved or suspended in a carrier which subsequently evaporates to leave a lubricant coating **[4]**
50/04 . Aerosol **[4]**
50/06 . Gaseous phase, at least during working conditions **[4]**
50/08 . solid **[4]**
50/10 . semi-solid; greasy **[4]**

60/00 Chemical after-treatment of the constituents of the lubricating composition [4]

60/02 . Reduction, e.g. hydrogenation **[4]**
60/04 . Oxidation, e.g. ozonisation **[4]**
60/06 . by epoxides **[4]**
60/08 . Halogenation **[4]**
60/10 . by sulfur or a compound containing sulfur **[4]**
60/12 . by phosphorus or a compound containing phosphorus, e.g. P_xS_y **[4]**
60/14 . by boron or a compound containing boron **[4]**

70/00 Special methods of preparation [4]

80/00 Special pretreatment of the material to be lubricated, e.g. phosphatising or chromatising of a metal [4]

C11 ANIMAL OR VEGETABLE OILS, FATS, FATTY SUBSTANCES OR WAXES; FATTY ACIDS THEREFROM; DETERGENTS; CANDLES

C11B PRODUCING, E.G. BY PRESSING RAW MATERIALS OR BY EXTRACTION FROM WASTE MATERIALS, REFINING OR PRESERVING FATS, FATTY SUBSTANCES, E.G. LANOLIN, FATTY OILS OR WAXES; ESSENTIAL OILS; PERFUMES (drying-oils C09F)

Subclass index

1/00 **Production of fats or fatty oils from raw materials**
1/02 . Pretreatment
1/04 . . of vegetable raw material
1/06 . by pressing
1/08 . . by hot pressing
1/10 . by extracting
1/12 . by melting out
1/14 . . with hot water or aqueous solutions
1/16 . . with steam

3/00 **Refining fats or fatty oils**
3/02 . by chemical reaction
3/04 . . with acids
3/06 . . with bases
3/08 . . with oxidising agents
3/10 . by adsorption

Note

When classifying in this group, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned. **[8]**

3/12 . by distillation
3/14 . . with the use of indifferent gases or vapours, e.g. steam
3/16 . by mechanical means

5/00 **Preserving by using additives, e.g. anti-oxidants**

7/00 **Separation of mixtures of fats or fatty oils into their constituents, e.g. saturated oils from unsaturated oils**

9/00 **Essential oils**; **Perfumes** (synthesis of chemical substances C07)
9/02 . Recovery or refining of essential oils from raw materials

11/00 **Recovery or refining of other fatty substances, e.g. lanolin, waxes** (synthetic waxes C07, C08; mineral waxes C10G)

13/00 **Recovery of fats, fatty oils, or fatty acids from waste materials** (mechanical separation from waste water C02F, E03F)
13/02 . from soap stock
13/04 . from spent adsorption materials

15/00 **Solidifying fatty oils, fats, or waxes by physical processes**

C11C FATTY ACIDS FROM FATS, OILS OR WAXES; CANDLES; FATS, OILS OR FATTY ACIDS BY CHEMICAL MODIFICATION OF FATS, OILS, OR FATTY ACIDS OBTAINED THEREFROM

1/00 **Preparation of fatty acids from fats, fatty oils, or waxes**; **Refining the fatty acids** (recovery of fatty acids from waste materials C11B 13/00)
1/02 . from fats or fatty oils
1/04 . . by hydrolysis
1/06 . . . using solid catalysts
1/08 . Refining
1/10 . . by distillation

3/00 **Fats, oils, or fatty acids by chemical modification of fats, oils, or fatty acids obtained therefrom** (sulfonated fats or oils C07C 309/62; factice C08H; drying-oils C09F)
3/02 . by esterification of fatty acids with glycerol
3/04 . by esterification of fats or fatty oils
3/06 . . with glycerol
3/08 . . with fatty acids
3/10 . . Ester interchange
3/12 . by hydrogenation
3/14 . by isomerisation

5/00 **Candles**
5/02 . Apparatus for preparation thereof

C11D **DETERGENT COMPOSITIONS** (preparations specially adapted for washing the hair A61K 8/00, A61Q 5/12; methods or apparatus for disinfection or sterilisation A61L; special washing compositions for cleaning semi-permeable membranes B01D 65/06); **USE OF SINGLE SUBSTANCES AS DETERGENTS**; **SOAP OR SOAP-MAKING**; **RESIN SOAPS**; **RECOVERY OF GLYCEROL**

(1) When classifying in the mixture groups of this subclass, any individual ingredient of a composition which is not identified by such classification, and which itself is determined to be novel and non-obvious, must also be classified in groups C11D 1/00 to C11D 9/00. The individual ingredient can be either a single substance or a composition in itself. **[8]**

(2) Any ingredient of a composition which is not identified by the classification according to Note (1) above, and which is considered to represent information of interest for search, may also be classified in groups C11D 1/00 to C11D 9/00. This can, for example, be the case when it is considered of interest to enable searching of compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

Subclass index

Surface-active non-soap detergents

1/00 Detergent compositions based essentially on surface-active compounds; Use of these compounds as a detergent

Note

In groups C11D 1/02 to C11D 1/88, in the absence of an indication to the contrary, a compound is classified in the last appropriate place.

1/02 . Anionic compounds
1/04 . . Carboxylic acids or salts thereof (soap C11D 9/00)
1/06 . . . Ether- or thioether carboxylic acids
1/08 . . . Polycarboxylic acids containing no nitrogen or sulfur
1/10 . . . Amino carboxylic acids; Imino carboxylic acids; Fatty acid condensates thereof
1/12 . . Sulfonic acids or sulfuric acid esters; Salts thereof (C11D 3/065 takes precedence)
1/14 . . . derived from aliphatic hydrocarbons or mono-alcohols
1/16 . . . derived from divalent or polyvalent alcohols
1/18 . . . derived from amino alcohols
1/20 . . . . Fatty acid condensates
1/22 . . . derived from aromatic compounds
1/24 . . . . containing ester or ether groups directly attached to the nucleus
1/26 . . . derived from heterocyclic compounds
1/28 . . . Sulfonation products derived from fatty acids or their derivatives, e.g. esters, amides
1/29 . . . Sulfates of polyoxyalkylene ethers **[2]**
1/30 . . . Sulfonation products derived from lignin
1/32 . . Protein hydrolysates; Fatty acid condensates thereof
1/34 . . Derivatives of acids of phosphorus
1/36 . . of unknown constitution
1/37 . . Mixtures of compounds all of which are anionic
1/38 . Cationic compounds
1/40 . . Monoamines or polyamines; Salts thereof
1/42 . . Amino alcohols or amino ethers
1/44 . . . Ethers of polyoxyalkylenes with amino alcohols; Condensation products of epoxyalkanes with amines
1/46 . . Esters of carboxylic acids with amino alcohols; Esters of amino carboxylic acids with alcohols
1/48 . . N-containing polycondensation products
1/50 . . Derivatives of urea, thiourea, cyanamide, guanidine or urethanes
1/52 . . Carboxylic amides, alkylolamides or imides (C11D 3/07 takes precedence)
1/54 . . Hydrazides of carboxylic acids
1/56 . . containing nitro or nitroso groups
1/58 . . Heterocyclic compounds
1/60 . . Sulfonium or phosphonium compounds
1/62 . . Quaternary ammonium compounds
1/64 . . of unknown constitution
1/645 . . Mixtures of compounds all of which are cationic
1/65 . . Mixtures of anionic with cationic compounds
1/655 . . . of sulfonated products with alkylolamides of carboxylic acids (C11D 3/066 takes precedence)
1/66 . Non-ionic compounds
1/68 . . Alcohols; Oxidation products of paraffin wax, other than acids
1/70 . . Phenols
1/72 . . Ethers of polyoxyalkylene glycols (C11D 3/075 takes precedence)
1/722 . . Ethers of polyoxyalkylenes having mixed oxyalkylene groups **[2]**
1/74 . . Carboxylates or sulfonates of polyoxyalkylene glycols
1/75 . . Amino oxides **[2]**
1/755 . . Sulfoxides **[2]**
1/76 . . Synthetic resins containing no nitrogen
1/78 . . Neutral esters of acids of phosphorus
1/79 . . Phosphine oxides **[2]**
1/80 . . Derivatives of lignin containing no sulfo- or sulfate groups
1/82 . . Compounds containing silicon
1/825 . . Mixtures of compounds all of which are non-anionic
1/83 . . Mixtures of non-ionic with anionic compounds

1/831 . . . of sulfonates with ethers of polyoxyalkylenes without phosphates
1/835 . . Mixtures of non-ionic with cationic compounds
1/86 . Mixtures of anionic, cationic, and non-ionic compounds
1/88 . Ampholytes; Electroneutral compounds **[2]**
1/90 . . Betaines **[2]**
1/92 . . Sulfobetaines **[2]**
1/94 . . Mixtures with anionic, cationic or non-ionic compounds **[2]**

3/00 Other compounding ingredients of detergent compositions covered in group C11D 1/00

Note

In groups C11D 3/02 to C11D 3/39, in the absence of an indication to the contrary, a compound is classified in the last appropriate place. **[2]**

3/02 . Inorganic compounds
3/04 . . Water-soluble compounds
3/06 . . . Phosphates, including polyphosphates
3/065 . . . . in admixture with sulfonated products
3/066 . . . . . and with alkylolamides of carboxylic acids
3/07 . . . . in a mixture with alkylolamides of carbocyclic acids
3/075 . . . . in admixture with ethers of polyoxyalkylenes
3/08 . . . Silicates
3/10 . . . Carbonates
3/12 . . Water-insoluble compounds
3/14 . . . Pigments; Fillers; Abrasives
3/16 . Organic compounds
3/18 . . Hydrocarbons
3/20 . . containing oxygen
3/22 . . . Carbohydrates or derivatives thereof
3/24 . . containing halogen
3/26 . . containing nitrogen
3/28 . . . Heterocyclic compounds containing nitrogen in the ring
3/30 . . . Amines; Substituted amines
3/32 . . . Amides; Substituted amides
3/33 . . . Amino carboxylic acids **[2]**
3/34 . . containing sulfur
3/36 . . containing phosphorus
3/37 . . Polymers **[2]**
3/38 . . Products with no well-defined composition
3/382 . . . Vegetable products, e.g. soya meal, wood flour, sawdust **[2]**
3/384 . . . Animal products **[2]**
3/386 . . . Preparations containing enzymes **[2]**
3/39 . Organic or inorganic per-compounds **[2]**
3/395 . Bleaching agents **[2]**
3/40 . Dyes **[2]**
3/42 . . Brightening agents **[2]**
3/43 . Solvents **[2]**
3/44 . . Mixed solvents
3/46 . Superfatting agents **[2]**
3/48 . Medicinal or disinfecting agents **[2]**
3/50 . Perfumes **[2]**
3/60 . Mixtures of compounding ingredients **[2]**

7/00 Compositions of detergents based essentially on non-surface-active compounds

Note

In groups C11D 7/02 to C11D 7/22, in the absence of an indication to the contrary, a compound is classified in the last appropriate place.

7/02 . Inorganic compounds
7/04 . . Water-soluble compounds
7/06 . . . Hydroxides
7/08 . . . Acids
7/10 . . . Salts
7/12 . . . . Carbonates
7/14 . . . . Silicates
7/16 . . . . Phosphates including polyphosphates
7/18 . . Peroxides; Persalts
7/20 . . Water-insoluble oxides
7/22 . Organic compounds
7/24 . . Hydrocarbons
7/26 . . containing oxygen
7/28 . . containing halogen
7/30 . . . Halogenated hydrocarbons
7/32 . . containing nitrogen
7/34 . . containing sulfur
7/36 . . containing phosphorus
7/38 . . Per-compounds
7/40 . . Products in which the composition is not well defined
7/42 . . . Preparations containing enzymes
7/44 . . . Vegetable products (C11D 7/42 takes precedence)
7/46 . . . Animal products (C11D 7/42 takes precedence)
7/50 . Solvents **[2]**
7/52 . . combined with promoters **[2]**
7/54 . Bleaching agents **[2]**
7/56 . . combined with phosphates **[2]**
7/60 . Mixtures of non-surface-active compounds **[2]**

Soap Detergents

9/00 Compositions of detergents based essentially on soap (compositions containing resin soap C11D 15/04)
9/02 . on alkali or ammonium soaps
9/04 . containing compounding ingredients other than soaps

Note

In groups C11D 9/06 to C11D 9/42, in the absence of an indication to the contrary, a compound is classified in the last appropriate place.

9/06 . . Inorganic compounds
9/08 . . . Water-soluble compounds
9/10 . . . . Salts
9/12 . . . . . Carbonates
9/14 . . . . . Phosphates; Polyphosphates
9/16 . . . . . Borates
9/18 . . . Water-insoluble compounds
9/20 . . . . Pigments; Fillers; Abrasives
9/22 . . Organic compounds
9/24 . . . Hydrocarbons
9/26 . . . containing oxygen
9/28 . . . containing halogen

9/30 . . . containing nitrogen
9/32 . . . containing sulfur
9/34 . . . containing phosphorus
9/36 . . . containing silicon
9/38 . . . Products in which the composition is not well defined
9/40 . . . Proteins
9/42 . . Per-compounds
9/44 . . Perfumes; Colouring materials; Brightening agents
9/48 . . Superfatting agents
9/50 . . Medicinal or disinfecting agents
9/60 . . Mixtures of compounding ingredients **[2]**

10/00 Compositions of detergents, not provided for by any single one of main groups C11D 1/00 to C11D 9/00 [2]
10/02 . based on mixtures of surface-active non-soap and non-surface-active compounds **[2]**
10/04 . based on mixtures of surface-active non-soap compounds and soap **[2]**
10/06 . based on mixtures of non-surface-active compounds and soap **[2]**

11/00 Special methods for preparing compositions containing mixtures of detergents
11/02 . Preparation in the form of powder by spray-drying
11/04 . by chemical means, e.g. sulfonating in the presence of other compounding ingredients followed by neutralising

Soap or soap-making; **Resin soaps**

13/00 Making of soap or soap solutions in general; **Apparatus therefor** (resin soap C11D 15/00)
13/02 . Boiling soap; Refining
13/04 . . Continuous methods therefor
13/06 . . Bleaching of soap or soap solutions
13/08 . Colouring or perfuming
13/10 . Mixing; Kneading
13/12 . Cooling (C11D 13/14 takes precedence)
13/14 . Shaping
13/16 . . in moulds
13/18 . . by extrusion or by pressing
13/20 . . in the form of small particles, e.g. powder, flakes (by slicing C11D 13/24)
13/22 . Cutting
13/24 . . Slicing soap on the cooling drum
13/26 . Drying (drying ovens F27)
13/28 . Embossing; Polishing
13/30 . Recovery of soap, e.g. from spent solutions

15/00 Manufacture of resin soap or soaps derived from naphthenic acids; **Compositions**
15/02 . Apparatus therefor
15/04 . Compositions containing resin soap or soap derived from naphthenic acids

---

17/00 Detergent materials or soaps characterised by their shape or physical properties (shaping soap C11D 13/14)
17/02 . Floating bodies of detergents
17/04 . combined with or containing other objects
17/06 . Powder; Flakes; Free-flowing mixtures; Sheets
17/08 . Liquid soap; capsuled

19/00 Recovery of glycerol from a saponification liquor (refining glycerol C07C 31/22)

C12 BIOCHEMISTRY; BEER; SPIRITS; WINE; VINEGAR; MICROBIOLOGY; ENZYMOLOGY; MUTATION OR GENETIC ENGINEERING

(1) Between subclasses C12M to C12Q, and within each of these subclasses, in the absence of an indication to the contrary, classification is made in the last appropriate place. For example, a fermentation or enzyme-using process involving condition-responsive control is classified in subclass C12Q. **[3]**

(2) In this class, viruses, undifferentiated human, animal or plant cells, protozoa, tissues and unicellular algae are considered as micro-organisms. **[3,5]**

(3) In this class, unless specifically provided for, undifferentiated human, animal or plant cells, protozoa, tissues and unicellular algae are classified together with micro-organisms. Sub-cellular parts, unless specifically provided for, are classified with the whole cell. **[5]**

(4) The codes of subclass C12R are only for use as indexing codes associated with subclasses C12C to C12Q or C12S, so as to provide information concerning the micro-organisms used in the processes classified in these subclasses. **[3]**

C12C BREWING OF BEER (cleaning of raw materials A23N; pitching or depitching machines, cellar tools C12L; propagating yeasts C12N 1/14; non-beverage ethanolic fermentation C12P 7/06)

Note

In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

Subclass index

1/00 Preparation of malt

1/02 . Pretreatment of grains, e.g. washing, steeping

1/027 . Germinating **[6]**

1/033 . . in boxes or drums **[6]**

1/047 . . Influencing the germination by chemical or physical means **[6]**

1/053 . . . by irradiation or electric treatment **[6]**

1/067 . Drying **[6]**

1/073 . . Processes or apparatus specially adapted to save or recover energy **[6]**

1/10 . . Drying on fixed supports

1/12 . . Drying on moving supports

1/125 . Continuous or semi-continuous processes for steeping, germinating or drying **[6]**

1/13 . . with vertical transport of the grains **[6]**

1/135 . . with horizontal transport of the grains **[6]**

1/15 . Grain or malt turning, charging or discharging apparatus **[6]**

1/16 . After-treatment of malt, e.g. malt cleaning, detachment of the germ

1/18 . Preparation of malt extract or of special kinds of malt, e.g. caramel, black malt (malt products for use as foodstuffs A23L)

3/00 Treatment of hops

3/02 . Drying

3/04 . Conserving; Storing; Packing

3/06 . . Powder or pellets from hops **[6]**

3/08 . . Solvent extracts from hops **[6]**

3/10 . . . using carbon dioxide **[6]**

3/12 . . Isomerised products from hops **[6]**

5/00 Other raw materials for the preparation of beer

5/02 . Additives for beer

5/04 . . Colouring additives

7/00 Preparation of wort (malt extract C12C 1/18)

7/01 . Pretreatment of malt, e.g. malt grinding **[6]**

7/04 . Preparation or treatment of the mash

7/047 . . part of the mash being unmalted cereal mash **[6]**

7/053 . . part of the mash being non-cereal material **[6]**

7/06 . . Mashing apparatus

7/14 . Clarifying wort (Läuterung)

7/16 . . by straining

7/165 . . . in mash filters **[6]**

7/17 . . . in lautertuns **[6]**

7/175 . . by centrifuging **[6]**

7/20 . . Boiling the beerwort (brew kettles C12C 13/02) **[6]**

7/22 . . . Processes or apparatus specially adapted to save or recover energy **[6]**

7/24 . Clarifying beerwort between hop boiling and cooling **[6]**

7/26 . Cooling beerwort; Clarifying beerwort during or after the cooling **[6]**

7/28 . After-treatment **[6]**

11/00 Fermentation processes for beer

11/02 . Pitching yeast

11/06 . Acidifying the wort

11/07 . Continuous fermentation **[6]**

11/09 . Fermentation with immobilised yeast **[6]**
11/11 . Post fermentation treatments, e.g. carbonation, concentration (C12H takes precedence; containers with means specially adapted for effervescing potable liquids B65D 85/73) **[6]**

12/00 Processes specially adapted for making special kinds of beer [6]
12/02 . Beer with low calorie content (C12C 12/04 takes precedence) **[6]**
12/04 . Beer with low alcohol content (removal of alcohol C12H 3/00) **[6]**

13/00 Brewing devices, not covered by a single group of C12C 1/00 to C12C 12/04 [3,6]
13/02 . Brew kettles **[3]**
13/06 . . heated with fire **[3]**
13/08 . . with internal heating elements **[6]**
13/10 . Home brew equipment **[6]**

C12F RECOVERY OF BY-PRODUCTS OF FERMENTED SOLUTIONS; DENATURING OF, OR DENATURED, ALCOHOL [6]

Note

In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

3/00 Recovery of by-products
3/02 . of carbon dioxide
3/04 . . Recovery of volatile fermentation products from carbon dioxide
3/06 . from beer or wine (C12F 3/02 takes precedence; removal of yeast C12G 1/08)
3/08 . . Recovery of alcohol from press residues or other waste material (from carbon dioxide C12F 3/04)
3/10 . from distillery slops

5/00 Preparation of denatured alcohol

C12G WINE; OTHER ALCOHOLIC BEVERAGES; PREPARATION THEREOF (beer C12C)

Note

In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

1/00 Preparation of wine or sparkling wine
1/02 . Preparation of must from grapes; Must treatment or fermentation
1/022 . . Fermentation; Microbiological or enzymatic treatment **[6]**
1/024 . . . in a horizontally mounted cylindrical vessel (C12G 1/026 takes precedence) **[6]**
1/026 . . . in vessels with movable equipment for mixing the content **[6]**
1/028 . . . with thermal treatment of the grapes or the must **[6]**
1/032 . . . with recirculation of the must for pompage extraction **[6]**
1/036 . . . by use of a home wine making vessel **[6]**
1/04 . . Sulfiting the must; Desulfiting
1/06 . Preparation of sparkling wine, e.g. champagne; Impregnating wine with carbon dioxide
1/067 . . Continuous processes **[6]**
1/073 . . Fermentation with immobilised yeast **[6]**
1/08 . Removal of yeast (“degorgeage”)
1/09 . . Agitation, centrifugation or vibration of bottles **[6]**
1/10 . Deacidifying of wine **[6]**
1/12 . Processes for preventing winestone precipitation **[6]**

3/00 Preparation of other alcoholic beverages
3/02 . by straight fermentation
3/04 . by mixing, e.g. liqueurs
3/06 . . with flavouring ingredients
3/07 . . . Flavouring with wood or wood extract; Pretreatment of the wood used therefor **[6]**
3/08 . by other methods for varying the composition of fermented solutions (removal of alcohol from alcoholic beverages to obtain alcohol-free or low-alcohol beverages C12H 3/00)
3/10 . . Increasing the alcohol content
3/12 . . . by distillation (distillation processes or apparatus, in general B01D 3/00)
3/14 . . . by freezing **[6]**

C12H **PASTEURISATION, STERILISATION, PRESERVATION, PURIFICATION, CLARIFICATION, AGEING OF ALCOHOLIC BEVERAGES OR REMOVAL OF ALCOHOL THEREFROM** (deacidifying wine C12G 1/10; preventing winestone precipitation C12G 1/12; simulation ageing by flavouring C12G 3/06) **[6]**

(1) When classifying in this subclass, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned. **[8]**

(2) In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

1/00 **Pasteurisation, sterilisation, preservation, purification, clarification, or ageing of alcoholic beverages**

1/02 . combined with removal of precipitate or added materials, e.g. adsorption material

1/04 . . with the aid of ion-exchange material or inert clarification material, e.g. adsorption material

1/044 . . . with the aid of inorganic material **[6]**

1/048 . . . . with silicon containing material **[6]**

1/052 . . . with the aid of organic material **[6]**

1/056 . . . . with the aid of polymers **[6]**

1/06 . . Precipitation by physical means, e.g. by irradiation, vibrations

1/065 . . . Separation by centrifugation **[6]**

1/07 . . . Separation by filtration **[6]**

1/075 . . . . by cross-flow filtration **[6]**

1/08 . . . by heating

1/10 . . Precipitation by chemical means

1/12 . without precipitation

1/14 . . with non-precipitating compounds, e.g. sulfiting; Sequestration, e.g. with chelate-producing compounds

1/15 . . . with enzymes **[6]**

1/16 . . by physical means, e.g. irradiation

1/18 . . . by heating

1/20 . . . . in containers allowing for expansion of the contents

1/22 . Ageing or ripening by storing, e.g. lagering of beer

3/00 **Removal of alcohol from alcoholic beverages to obtain alcohol-free or low-alcohol beverages** (recovery of by-products of wine or beer other than low-alcohol beverages C12F 3/06; preparation of alcoholic beverages other than wine or beer by varying the composition of fermented solutions C12G 3/08) **[6]**

3/02 . by evaporating **[6]**

3/04 . using semi-permeable membranes **[6]**

C12J **VINEGAR**; **ITS PREPARATION**

Note

In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

1/00 **Vinegar**; **Preparation**; **Purification**

1/02 . from wine

1/04 . from alcohol

1/06 . from milk

1/08 . Addition of flavouring ingredients

1/10 . Apparatus

C12L **PITCHING OR DEPITCHING MACHINES**; **CELLAR TOOLS** (cleaning of casks B08B 9/00)

Note

In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

3/00 **Pitching or depitching machines**

9/00 **Venting devices for casks, barrels, or the like**

11/00 **Cellar tools**

C12M **APPARATUS FOR ENZYMOLOGY OR MICROBIOLOGY** (installations for fermenting manure A01C 3/02; preservation of living parts of humans or animals A01N 1/02; physical or chemical apparatus in general B01; brewing apparatus C12C; fermentation apparatus for wine C12G; apparatus for preparing vinegar C12J 1/10) **[3]**

(1) Attention is drawn to Notes (1) to (3) following the title of class C12. **[4]**
(2) In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

1/00 **Apparatus for enzymology or microbiology [3]**

Note

This group covers:
- apparatus where micro-organisms or enzymes are produced or isolated;
- apparatus where the characteristics of micro-organisms or enzymes are investigated, e.g. which growth factors are necessary;
- apparatus specially adapted to employ micro-organisms or enzymes as "reactants" or biocatalysts;
- apparatus of both the laboratory and industrial scale. **[3]**

1/02 . with agitation means; with heat exchange means **[3]**
1/04 . with gas introduction means **[3]**
1/06 . . with agitator, e.g. impeller **[3]**
1/08 . . with draft tube **[3]**
1/09 . . Flotation apparatus **[5]**
1/10 . rotatably mounted **[3]**
1/107 . with means for collecting fermentation gases, e.g. methane (producing methane by anaerobic treatment of sludge C02F 11/04) **[5]**
1/113 . . with transport of the substrate during the fermentation **[5]**
1/12 . with sterilisation, filtration, or dialysis means **[3]**
1/14 . with means providing thin layers or with multi-level trays **[3]**
1/16 . containing, or adapted to contain, solid media **[3]**
1/18 . . Multiple fields or compartments **[3]**
1/20 . . . Horizontal planar fields **[3]**
1/21 . Froth suppressors **[5]**
1/22 . Petri type dish **[3]**
1/24 . tube or bottle type **[3]**
1/26 . Inoculator or sampler **[3]**
1/28 . . being part of container **[3]**
1/30 . . . Sampler being a swab **[3]**
1/32 . . multiple field or continuous type **[3]**
1/33 . Disintegrators **[5]**
1/34 . Measuring or testing with condition measuring or sensing means, e.g. colony counters **[3]**
1/36 . including condition or time responsive control, e.g. automatically controlled fermentors (controlling or regulating in general G05) **[3]**
1/38 . . Temperature-responsive control **[3]**
1/40 . Apparatus specially designed for the use of free, immobilised, or carrier-bound enzymes, e.g. apparatus containing a fluidised bed of immobilised enzymes **[3]**
1/42 . Apparatus for the treatment of micro-organisms or enzymes with electrical or wave energy, e.g. magnetism, sonic wave **[5]**

3/00 **Tissue, human, animal or plant cell, or virus culture apparatus [3]**

3/02 . with means providing suspensions **[3]**
3/04 . with means providing thin layers **[3]**
3/06 . with filtration, ultrafiltration, inverse osmosis or dialysis means **[5]**
3/08 . Apparatus for tissue disaggregation **[5]**
3/10 . for culture in eggs **[5]**

C12N **MICRO-ORGANISMS OR ENZYMES**; **COMPOSITIONS THEREOF** (biocides, pest repellants or attractants, or plant growth regulators containing micro-organisms, viruses, microbial fungi, enzymes, fermentates, or substances produced by, or extracted from, micro-organisms or animal material A01N 63/00; medicinal preparations A61K; fertilisers C05F); **PROPAGATING, PRESERVING, OR MAINTAINING MICRO-ORGANISMS**; **MUTATION OR GENETIC ENGINEERING**; **CULTURE MEDIA** (microbiological testing media C12Q 1/00) **[3]**

(1) Attention is drawn to Notes (1) to (3) following the title of class C12. **[3,4]**
(2) Biocidal, pest repellant, pest attractant or plant growth regulatory activity of compounds or preparations is further classified in subclass A01P. **[8]**
(3) Therapeutic activity of single-cell proteins or enzymes is further classified in subclass A61P. **[7]**
(4) When classifying in this subclass, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned. **[8]**
(5) In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

Subclass index

1/00 **Micro-organisms, e.g. protozoa**; **Compositions thereof** (medicinal preparations containing material from protozoa, bacteria or viruses A61K 35/66, from algae A61K 36/02, from fungi A61K 36/06; preparing medicinal bacterial antigen or antibody compositions, e.g. bacterial vaccines, A61K 39/00); **Processes of propagating, maintaining or preserving micro-organisms or compositions thereof**; **Processes of preparing or isolating a composition containing a micro-organism**; **Culture media therefor [3]**

1/02 . Separating micro-organisms from their culture media **[3]**

1/04 . Preserving or maintaining viable micro-organisms (immobilised micro-organisms C12N 11/00) **[3]**

1/06 . Lysis of micro-organisms **[3]**

1/08 . Reducing the nucleic acid content **[3]**

1/10 . Protozoa; Culture media therefor **[3]**

1/11 . . modified by introduction of foreign genetic material **[5]**

1/12 . Unicellular algae; Culture media therefor (as new plants A01H 13/00) **[3]**

1/13 . . modified by introduction of foreign genetic material **[5]**

1/14 . Fungi (culture of mushrooms A01G 1/04; as new plants A01H 15/00); Culture media therefor **[3]**

1/15 . . modified by introduction of foreign genetic material **[5]**

1/16 . . Yeasts; Culture media therefor **[3]**

1/18 . . . Baker's yeast; Brewer's yeast **[3]**

1/19 . . . modified by introduction of foreign genetic material **[5]**

1/20 . Bacteria; Culture media therefor **[3]**

1/21 . . modified by introduction of foreign genetic material **[5]**

1/22 . Processes using, or culture media containing, cellulose or hydrolysates thereof **[3]**

1/24 . Processes using, or culture media containing, waste sulfite liquor **[3]**

1/26 . Processes using, or culture media containing, hydrocarbons (refining of hydrocarbon oils by using micro-organisms C10G 32/00) **[3]**

1/28 . . aliphatic **[3]**

1/30 . . . having five or less carbon atoms **[3]**

1/32 . Processes using, or culture media containing, lower alkanols, i.e. C_1 to C_6 **[3]**

1/34 . Processes using foam culture **[3]**

1/36 . Adaptation or attenuation of cells **[3]**

1/38 . Chemical stimulation of growth or activity by addition of chemical compounds which are not essential growth factors; Stimulation of growth by removal of a chemical compound (C12N 1/34 takes precedence) **[3]**

3/00 **Spore-forming or isolating processes [3]**

5/00 **Undifferentiated human, animal or plant cells, e.g. cell lines**; **Tissues**; **Cultivation or maintenance thereof**; **Culture media therefor** (plant reproduction by tissue culture techniques A01H 4/00) **[3,5]**

5/02 . Propagation of single cells or cells in suspension; Maintenance thereof; Culture media therefor **[3]**

5/04 . Plant cells or tissues **[5]**

5/07 . Animal cells or tissues **[2010.01]**

Note

The last place priority rule does not apply between the subgroups of this group. **[2010.01]**

5/071 . . Vertebrate cells or tissues, e.g. human cells or tissues **[2010.01]**

5/073 . . . Embryonic cells or tissues; Foetal cells or tissues **[2010.01]**

5/0735 . . . . Embryonic stem cells; Embryonic germ cells **[2010.01]**

5/074 . . . Adult stem cells **[2010.01]**

5/075 . . . Oocytes; Oogonia **[2010.01]**

5/076 . . . Sperm cells; Spermatogonia **[2010.01]**

5/077 . . . Mesenchymal cells, e.g. bone cells, cartilage cells, marrow stromal cells, fat cells or muscle cells **[2010.01]**

5/0775 . . . . Mesenchymal stem cells; Adipose-tissue derived stem cells **[2010.01]**

5/078 . . . Cells from blood or from the immune system **[2010.01]**

5/0781 . . . . B cells; Progenitors thereof **[2010.01]**

5/0783 . . . . T cells; NK cells; Progenitors of T or NK cells **[2010.01]**

5/0784 . . . . Dendritic cells; Progenitors thereof **[2010.01]**

5/0786 . . . . Monocytes; Macrophages **[2010.01]**

5/0787 . . . . Granulocytes, e.g. basophils, eosinophils, neutrophils or mast cells **[2010.01]**

5/0789 . . . . Stem cells; Multipotent progenitor cells **[2010.01]**

5/079 . . . Neural cells **[2010.01]**

5/0793 . . . . Neurons **[2010.01]**

5/0797 . . . . Stem cells; Progenitor cells **[2010.01]**

5/09 . Tumour cells **[2010.01]**

5/095 . . Stem cells; Progenitor cells **[2010.01]**

5/10 . Cells modified by introduction of foreign genetic material, e.g. virus-transformed cells **[5]**

5/12 . . Fused cells, e.g. hybridomas **[5]**

5/14 . . . Plant cells **[5]**

5/16 . . . Animal cells **[5]**

5/18 . . . . Murine cells, e.g. mouse cells **[5]**

5/20 . . . . . one of the fusion partners being a B lymphocyte **[5]**

5/22 . . . Human cells **[5]**

5/24 . . . . one of the fusion partners being a B lymphocyte **[5]**

5/26 . . . Cells resulting from interspecies fusion **[5]**

5/28 . . . . one of the fusion partners being a human cell **[5]**

7/00 **Viruses, e.g. bacteriophages**; **Compositions thereof**; **Preparation or purification thereof** (medicinal preparations containing viruses A61K 35/76; preparing medicinal viral antigen or antibody compositions, e.g. virus vaccines, A61K 39/00) **[3]**

7/01 . Viruses, e.g. bacteriophages, modified by introduction of foreign genetic material (vectors C12N 15/00) **[5]**

7/02 . Recovery or purification **[3]**

7/04 . Inactivation or attenuation; Producing viral sub-units **[3]**

7/06 . . by chemical treatment **[3]**

7/08 . . by serial passage of virus **[3]**

9/00 **Enzymes, e.g. ligases (6.)**; **Proenzymes**; **Compositions thereof** (preparations containing enzymes for cleaning teeth A61K 8/66, A61Q 11/00; medicinal preparations containing enzymes or proenzymes A61K 38/43; enzyme containing detergent compositions C11D); **Processes for preparing, activating, inhibiting, separating, or purifying enzymes [3]**

Note

In this group:
- proenzymes are classified with the corresponding enzymes; **[5]**
- enzymes are generally categorised according to the "Nomenclature and Classification of Enzymes" of the International Commission on Enzymes. Where appropriate, this designation appears in the subgroups below in parenthesis. **[3]**

9/02 . Oxidoreductases (1.), e.g. luciferase **[3]**
9/04 . . acting on CHOH groups as donors, e.g. glucose oxidase, lactate dehydrogenase (1.1) **[3]**
9/06 . . acting on nitrogen containing compounds as donors (1.4, 1.5, 1.7) **[3]**
9/08 . . acting on hydrogen peroxide as acceptor (1.11) **[3]**
9/10 . Transferases (2.) (ribonucleases C12N 9/22) **[3]**
9/12 . . transferring phosphorus containing groups, e.g. kinases (2.7) **[3]**
9/14 . Hydrolases (3.) **[3]**
9/16 . . acting on ester bonds (3.1) **[3]**
9/18 . . . Carboxylic ester hydrolases **[3]**
9/20 . . . . Triglyceride splitting, e.g. by means of lipase **[3]**
9/22 . . . Ribonucleases **[3]**
9/24 . . acting on glycosyl compounds (3.2) **[3]**
9/26 . . . acting on alpha-1, 4-glucosidic bonds, e.g. hyaluronidase, invertase, amylase **[3]**
9/28 . . . . Alpha-amylase from microbial source, e.g. bacterial amylase **[3]**
9/30 . . . . . Fungal source **[3]**
9/32 . . . . Alpha-amylase from plant source **[3]**
9/34 . . . . Glucoamylase **[3]**
9/36 . . . acting on beta-1, 4 bonds between N-acetylmuramic acid and 2-acetylamino 2-deoxy-D-glucose, e.g. lysozyme **[3]**
9/38 . . . acting on beta-galactose-glycoside bonds, e.g. beta-galactosidase **[3]**
9/40 . . . acting on alpha-galactose-glycoside bonds, e.g. alpha-galactosidase **[3]**
9/42 . . . acting on beta-1, 4-glucosidic bonds, e.g. cellulase **[3]**
9/44 . . . acting on alpha-1, 6-glucosidic bonds, e.g. isoamylase, pullulanase **[3]**
9/46 . . . . Dextranase **[3]**
9/48 . . acting on peptide bonds, e.g. thromboplastin, leucine aminopeptidase (3.4) **[3]**
9/50 . . . Proteinases **[3]**
9/52 . . . . derived from bacteria **[3]**
9/54 . . . . . bacteria being Bacillus **[3]**
9/56 . . . . . Bacillus subtilis or Bacillus licheniformis **[3]**
9/58 . . . . derived from fungi **[3]**
9/60 . . . . . from yeast **[3]**
9/62 . . . . . from Aspergillus **[3]**
9/64 . . . . derived from animal tissue, e.g. rennin **[3]**
9/66 . . . Elastase **[3]**
9/68 . . . Plasmin, i.e. fibrinolysin **[3]**
9/70 . . . Streptokinase **[3]**
9/72 . . . Urokinase **[3]**
9/74 . . . Thrombin **[3]**
9/76 . . . Trypsin; Chymotrypsin **[3]**
9/78 . . acting on carbon to nitrogen bonds other than peptide bonds (3.5) **[3]**
9/80 . . . acting on amide bonds in linear amides **[3]**
9/82 . . . . Asparaginase **[3]**
9/84 . . . . Penicillin amidase **[3]**
9/86 . . . acting on amide bonds in cyclic amides, e.g. penicillinase **[3]**
9/88 . Lyases (4.) **[3]**
9/90 . Isomerases (5.) **[3]**
9/92 . . Glucose isomerase **[3]**
9/94 . Pancreatin **[3]**
9/96 . Stabilising an enzyme by forming an adduct or a composition; Forming enzyme conjugates **[3]**
9/98 . Preparation of granular or free-flowing enzyme compositions (C12N 9/96 takes precedence) **[3]**
9/99 . Enzyme inactivation by chemical treatment **[3]**

11/00 **Carrier-bound or immobilised enzymes**; **Carrier-bound or immobilised microbial cells**; **Preparation thereof [3]**

11/02 . Enzymes or microbial cells being immobilised on or in an organic carrier **[3]**
11/04 . . entrapped within the carrier, e.g. gel, hollow fibre **[3]**
11/06 . . attached to the carrier via a bridging agent **[3]**
11/08 . . the carrier being a synthetic polymer **[3]**
11/10 . . the carrier being a carbohydrate **[3]**
11/12 . . . Cellulose or derivatives thereof **[3]**
11/14 . Enzymes or microbial cells being immobilised on or in an inorganic carrier **[3]**
11/16 . Enzymes or microbial cells being immobilised on or in a biological cell **[3]**
11/18 . Multi-enzyme systems **[3]**

13/00 **Treatment of micro-organisms or enzymes with electrical or wave energy, e.g. magnetism, sonic waves [3]**

15/00 **Mutation or genetic engineering**; **DNA or RNA concerning genetic engineering, vectors, e.g. plasmids, or their isolation, preparation or purification**; **Use of hosts therefor** (mutants or genetically engineered micro-organisms C12N 1/00, C12N 5/00, C12N 7/00; new plants A01H; plant reproduction by tissue culture techniques A01H 4/00; new animals A01K 67/00; use of medicinal preparations containing genetic material which is inserted into cells of the living body to treat genetic diseases, gene therapy A61K 48/00; peptides in general C07K) **[3,5,6]**

Note

This group covers processes wherein there is a modification of the genetic material which would not normally occur in nature without intervention of man which produce a change in the gene structure which is passed on to succeeding generations. **[3]**

15/01 . Preparation of mutants without inserting foreign genetic material therein; Screening processes therefor **[5]**
15/02 . Preparation of hybrid cells by fusion of two or more cells, e.g. protoplast fusion **[5]**

15/03 . . Bacteria **[5]**
15/04 . . Fungi **[5]**
15/05 . . Plant cells **[5]**
15/06 . . Animal cells **[5]**
15/07 . . Human cells **[5]**
15/08 . . Cells resulting from interspecies fusion **[5]**
15/09 . Recombinant DNA-technology **[5]**
15/10 . . Processes for the isolation, preparation or purification of DNA or RNA (chemical preparation of DNA or RNA C07H 21/00; preparation of non-structural polynucleotides from micro-organisms or with enzymes C12P 19/34) **[5]**
15/11 . . DNA or RNA fragments; Modified forms thereof (DNA or RNA not used in recombinant technology C07H 21/00) **[5]**
15/113 . . . Non-coding nucleic acids modulating the expression of genes, e.g. antisense oligonucleotides **[2010.01]**
15/115 . . . Aptamers, i.e. nucleic acids binding a target molecule specifically and with high affinity without hybridising therewith **[2010.01]**
15/117 . . . Nucleic acids having immunomodulatory properties, e.g. containing CpG-motifs **[2010.01]**
15/12 . . . Genes encoding animal proteins **[5]**
15/13 . . . . Immunoglobulins **[5]**
15/14 . . . . Human serum albumins **[5]**
15/15 . . . . Protease inhibitors, e.g. antithrombin, antitrypsin, hirudin **[5]**
15/16 . . . . Hormones **[5]**
15/17 . . . . . Insulins **[5]**
15/18 . . . . . Growth hormones **[5]**
15/19 . . . . Interferons; Lymphokines; Cytokines **[5]**
15/20 . . . . . Interferons **[5]**
15/21 . . . . . Alpha-interferons **[5]**
15/22 . . . . . Beta-interferons **[5]**
15/23 . . . . . Gamma-interferons **[5]**
15/24 . . . . . Interleukins **[5]**
15/25 . . . . . Interleukin-1 **[5]**
15/26 . . . . . Interleukin-2 **[5]**
15/27 . . . . . Colony stimulating factors **[5]**
15/28 . . . . . Tumor necrosis factors **[5]**
15/29 . . . Genes encoding plant proteins, e.g. thaumatin **[5]**
15/30 . . . Genes encoding protozoal proteins, e.g. from Plasmodium, Trypanosoma, Eimeria **[5]**
15/31 . . . Genes encoding microbial proteins, e.g. enterotoxins **[5]**
15/32 . . . . Bacillus crystal proteins **[5]**
15/33 . . . . Genes encoding viral proteins **[5]**
15/34 . . . . . Proteins from DNA viruses **[5]**
15/35 . . . . . Parvoviridae, e.g. feline panleukopenia virus, human parvovirus **[5]**
15/36 . . . . . Hepadnaviridae **[5]**
15/37 . . . . . Papovaviridae, e.g. papillomaviruses, polyomavirus, SV40 **[5]**
15/38 . . . . . Herpetoviridae, e.g. herpes simplex virus, varicella-zoster virus, Epstein-Barr virus, cytomegalovirus, pseudorabies virus **[5]**
15/39 . . . . . Poxviridae, e.g. vaccinia virus, variola virus **[5]**
15/40 . . . . . Proteins from RNA viruses, e.g. flaviviruses **[5]**
15/41 . . . . . Picornaviridae, e.g. rhinovirus, coxsackie viruses, echoviruses, enteroviruses **[5]**
15/42 . . . . . Foot-and-mouth disease virus **[5]**
15/43 . . . . . Poliovirus **[5]**
15/44 . . . . . Orthomyxoviridae, e.g. influenza virus **[5]**
15/45 . . . . . Paramyxoviridae, e.g. measles virus, mumps virus, Newcastle disease virus, canine distemper virus, rinderpest virus, respiratory syncytial viruses **[5]**
15/46 . . . . . Reoviridae, e.g. rotavirus, bluetongue virus, Colorado tick fever virus **[5]**
15/47 . . . . . Rhabdoviridae, e.g. rabies viruses, vesicular stomatitis virus **[5]**
15/48 . . . . . Retroviridae, e.g. bovine leukaemia virus, feline leukaemia virus **[5]**
15/49 . . . . . Lentiviridae, e.g. immunodeficiency viruses such as HIV, visna-maedi virus, equine infectious anaemia virus **[5]**
15/50 . . . . . Coronaviridae, e.g. infectious bronchitis virus, transmissible gastroenteritis virus **[5]**
15/51 . . . . . Hepatitis viruses **[5]**
15/52 . . . Genes encoding for enzymes or proenzymes **[5]**

Note

In this group:
– genes encoding for proenzymes are classified with the corresponding genes encoding enzymes;
– enzymes are generally categorised according to the "Nomenclature and Classification of Enzymes" of the International Commission on Enzymes. Where appropriate, this designation appears in the groups below in parenthesis. **[5]**

15/53 . . . . Oxidoreductases (1) **[5]**
15/54 . . . . Transferases (2) **[5]**
15/55 . . . . Hydrolases (3) **[5]**
15/56 . . . . . acting on glycosyl compounds (3.2), e.g. amylase, galactosidase, lysozyme **[5]**
15/57 . . . . . acting on peptide bonds (3.4) **[5]**
15/58 . . . . . Plasminogen activators, e.g. urokinase, TPA **[5]**
15/59 . . . . . Chymosin **[5]**
15/60 . . . . Lyases (4) **[5]**
15/61 . . . . Isomerases (5) **[5]**
15/62 . . . DNA sequences coding for fusion proteins **[5]**

Note

In this group, the following term is used with the meaning indicated:
– "fusion" means the fusion of two different proteins. **[5]**

15/63 . . Introduction of foreign genetic material using vectors; Vectors; Use of hosts therefor; Regulation of expression **[5]**
15/64 . . . General methods for preparing the vector, for introducing it into the cell or for selecting the vector-containing host **[5]**
15/65 . . . using markers (enzymes used as markers C12N 15/52) **[5]**

15/66 . . . General methods for inserting a gene into a vector to form a recombinant vector using cleavage and ligation; Use of non-functional linkers or adaptors, e.g. linkers containing the sequence for a restriction endonuclease **[5]**

Note

In this group, the following expression is used with the meaning indicated:
– "non-functional linkers" means DNA sequences which are used to link DNA sequences and which have no known function of structural gene or regulating function. **[5]**

15/67 . . . General methods for enhancing the expression **[5]**
15/68 . . . . Stabilisation of the vector **[5]**
15/69 . . . . Increasing the copy number of the vector **[5]**
15/70 . . . Vectors or expression systems specially adapted for E. coli **[5]**

(1) This group covers the use of E. coli as host. **[5]**
(2) Shuttle vectors also replicating in E. coli are classified according to the other host. **[5]**

15/71 . . . . Expression systems using regulatory sequences derived from the trp-operon **[5]**
15/72 . . . . Expression systems using regulatory sequences derived from the lac-operon **[5]**
15/73 . . . . Expression systems using phage lambda regulatory sequences **[5]**
15/74 . . . Vectors or expression systems specially adapted for prokaryotic hosts other than E. coli, e.g. Lactobacillus, Micromonospora **[5]**

Note

This group covers the use of prokaryotes as hosts. **[5]**

15/75 . . . . for Bacillus **[5]**
15/76 . . . . for Actinomyces; for Streptomyces **[5]**
15/77 . . . . for Corynebacterium; for Brevibacterium **[5]**
15/78 . . . . for Pseudomonas **[5]**
15/79 . . . Vectors or expression systems specially adapted for eukaryotic hosts **[5]**

Note

This group covers the use of eukaryotes as hosts. **[5]**

15/80 . . . . for fungi **[5]**
15/81 . . . . . for yeasts **[5]**
15/82 . . . . for plant cells **[5]**
15/83 . . . . . Viral vectors, e.g. cauliflower mosaic virus **[5]**
15/84 . . . . . Ti-plasmids **[5]**
15/85 . . . . for animal cells **[5]**
15/86 . . . . . Viral vectors **[5]**
15/861 . . . . . Adenoviral vectors **[7]**
15/863 . . . . . Poxviral vectors, e.g. vaccinia virus **[7]**
15/864 . . . . . Parvoviral vectors **[7]**
15/866 . . . . . Baculoviral vectors **[7]**
15/867 . . . . . Retroviral vectors **[7]**
15/869 . . . . . Herpesviral vectors **[7]**
15/87 . . Introduction of foreign genetic material using processes not otherwise provided for, e.g. co-transformation **[5]**
15/873 . . . Techniques for producing new embryos, e.g. nuclear transfer, manipulation of totipotent cells or production of chimeric embryos **[2010.01]**
15/877 . . . . Techniques for producing new mammalian cloned embryos **[2010.01]**
15/88 . . . using micro-encapsulation, e.g. using liposome vesicle **[5]**
15/89 . . . using micro-injection **[5]**
15/90 . . . Stable introduction of foreign DNA into chromosome **[5]**

C12P FERMENTATION OR ENZYME-USING PROCESSES TO SYNTHESISE A DESIRED CHEMICAL COMPOUND OR COMPOSITION OR TO SEPARATE OPTICAL ISOMERS FROM A RACEMIC MIXTURE (fermentation processes to form a food composition A21, A23; compounds in general, see the relevant compound class, e.g. C01, C07; brewing of beer C12C; producing vinegar C12J; processes for producing enzymes C12N 9/00; DNA or RNA concerning genetic engineering, vectors, e.g. plasmids, or their isolation, preparation or purification C12N 15/00) **[3]**

(1) This subclass covers both major and minor chemical modifications. **[3]**
(2) Group C12P 1/00 covers processes for producing organic compounds not sufficiently identified to be classified in groups C12P 3/00 to C12P 37/00. Compounds identified only by their empirical formulae are not considered to be sufficiently identified. **[3]**
(3) Attention is drawn to Notes (1) to (3) following the title of class C12. **[4]**
(4) If a particular reaction is considered of interest, it is also classified in the relevant chemical compound class, e.g. C07, C08. **[3]**
(5) In this subclass:
– metal or ammonium salts of a compound are classified as that compound.
– compositions are classified in the relevant compound groups. **[3]**
(6) In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

Subclass index

1/00 Preparation of compounds or compositions, not provided for in groups C12P 3/00 to C12P 39/00, by using micro-organisms or enzymes; General processes for the preparation of compounds or compositions by using micro-organisms or enzymes [3]

1/02 . by using fungi **[3]**

1/04 . by using bacteria **[3]**

1/06 . by using actinomycetales **[3]**

3/00 Preparation of elements or inorganic compounds except carbon dioxide [3]

5/00 Preparation of hydrocarbons [3]

5/02 . acyclic (producing methane by anaerobic treatment of sludge C02F 11/04) **[3]**

7/00 Preparation of oxygen-containing organic compounds [3]

7/02 . containing a hydroxy group **[3]**

7/04 . . acyclic **[3]**

7/06 . . . Ethanol, i.e. non-beverage **[3]**

7/08 . . . . produced as by-product or from waste or cellulosic material substrate **[3]**

7/10 . . . . . substrate containing cellulosic material **[3]**

7/12 . . . . . substrate containing sulfite waste liquor or citrus waste **[3]**

7/14 . . . . Multiple stages of fermentation; Multiple types of micro-organisms or reuse for micro-organisms **[3]**

7/16 . . . Butanols **[3]**

7/18 . . . polyhydric **[3]**

7/20 . . . . Glycerol **[3]**

7/22 . . aromatic **[3]**

7/24 . containing a carbonyl group **[3]**

7/26 . . Ketones **[3]**

7/28 . . . Acetone-containing products **[3]**

7/30 . . . . produced from substrate containing inorganic compounds other than water **[3]**

7/32 . . . . produced from substrate containing inorganic nitrogen source **[3]**

7/34 . . . . produced from substrate containing protein as nitrogen source **[3]**

7/36 . . . . produced from substrate containing grain or cereal material **[3]**

7/38 . . . Cyclopentanone- or cyclopentadione-containing products **[3]**

7/40 . containing a carboxyl group **[3]**

7/42 . . Hydroxy carboxylic acids **[3]**

7/44 . . Polycarboxylic acids **[3]**

7/46 . . . Dicarboxylic acids having four or less carbon atoms, e.g. fumaric acid, maleic acid **[3]**

7/48 . . . Tricarboxylic acids, e.g. citric acid **[3]**

7/50 . . . having keto groups, e.g. 2-ketoglutaric acid **[3]**

7/52 . . Propionic acid; Butyric acids **[3]**

7/54 . . Acetic acid (vinegar C12J) **[3]**

7/56 . . Lactic acid **[3]**

7/58 . . Aldonic, ketoaldonic or saccharic acids (uronic acids C12P 19/00) **[3]**

7/60 . . . 2-Ketogulonic acid **[3]**

7/62 . Carboxylic acid esters **[3]**

7/64 . Fats; Fatty oils; Ester-type waxes; Higher fatty acids, i.e. having at least seven carbon atoms in an unbroken chain bound to a carboxyl group; Oxidised oils or fats **[3]**

7/66 . containing the quinoid structure **[3]**

9/00 Preparation of organic compounds containing a metal or atom other than H, N, C, O, S, or halogen [3]

11/00 Preparation of sulfur-containing organic compounds [3]

13/00 Preparation of nitrogen-containing organic compounds [3]

13/02 . Amides, e.g. chloramphenicol **[3]**

13/04 . Alpha- or beta-amino acids **[3]**

13/06 . . Alanine; Leucine; Isoleucine; Serine; Homoserine **[3]**

13/08 . . Lysine; Diaminopimelic acid; Threonine; Valine **[3]**

13/10 . . Citrulline; Arginine; Ornithine **[3]**

13/12 . . Methionine; Cysteine; Cystine **[3]**

13/14 . . Glutamic acid; Glutamine **[3]**

13/16 . . . using surfactants, fatty acids or fatty acid esters, i.e. having at least seven carbon atoms in an unbroken chain bound to a carboxyl group or a carboxyl ester group **[3]**

13/18 . . . using biotin or its derivatives **[3]**

13/20 . . Aspartic acid; Asparagine **[3]**

13/22 . . Tryptophan; Tyrosine; Phenylalanine; 3,4-Dihydroxyphenylalanine **[3]**

13/24 . . Proline; Hydroxyproline; Histidine **[3]**

15/00 Preparation of compounds containing at least three condensed carbocyclic rings [3]

17/00 Preparation of heterocyclic carbon compounds with only O, N, S, Se, or Te as ring hetero atoms (C12P 13/04 to C12P 13/24 take precedence) **[3]**

17/02 . Oxygen as only ring hetero atoms **[3]**

17/04 . . containing a five-membered hetero ring, e.g. griseofulvin **[3]**

17/06 . . containing a six-membered hetero ring, e.g. fluorescein **[3]**

17/08 . . containing a hetero ring of at least seven ring members, e.g. zearalenone, macrolide aglycons **[3]**

17/10 . Nitrogen as only ring hetero atom **[3]**

17/12 . . containing a six-membered hetero ring **[3]**

17/14 . Nitrogen or oxygen as hetero atom and at least one other diverse hetero ring atom in the same ring **[3]**

17/16 . containing two or more hetero rings **[3]**

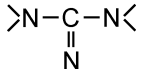
17/18 . containing at least two hetero rings condensed among themselves or condensed with a common carbocyclic ring system, e.g. rifamycin **[3]**

19/00 **Preparation of compounds containing saccharide radicals** (ketoaldonic acids C12P 7/58) **[3]**

Note

Attention is drawn to Note (3) following the title of subclass C07H, which defines the expression "saccharide radical". **[3]**

19/02 . Monosaccharides (2-ketogulonic acid C12P 7/60) **[3]**
19/04 . Polysaccharides, i.e. compounds containing more than five saccharide radicals attached to each other by glycosidic bonds **[3]**
19/06 . . Xanthan, i.e. Xanthomonas-type heteropolysaccharides **[3]**
19/08 . . Dextran **[3]**
19/10 . . Pullulan **[3]**
19/12 . Disaccharides **[3]**
19/14 . produced by the action of a carbohydrase, e.g. by alpha-amylase **[3]**
19/16 . produced by the action of an alpha-1, 6-glucosidase, e.g. amylose, debranched amylopectin (non-biological hydrolysis of starch C08B 30/00) **[3]**
19/18 . produced by the action of a glycosyl transferase, e.g. alpha-, beta- or gamma-cyclodextrins **[3]**
19/20 . produced by the action of an exo-1, 4 alpha-glucosidase, e.g. dextrose **[3]**
19/22 . produced by the action of a beta-amylase, e.g. maltose **[3]**
19/24 . produced by the action of an isomerase, e.g. fructose **[3]**
19/26 . Preparation of nitrogen-containing carbohydrates **[3]**
19/28 . . N-glycosides **[3]**
19/30 . . . Nucleotides **[3]**
19/32 . . . . having a condensed ring system containing a six-membered ring having two nitrogen atoms in the same-ring, e.g. purine nucleotides, nicotineamide-adenine dinucleotide **[3]**
19/34 . . . . Polynucleotides, e.g. nucleic acids, oligoribonucleotides **[3]**
19/36 . . . . Dinucleotides, e.g. nicotineamide-adenine dinucleotide phosphate **[3]**
19/38 . . . Nucleosides **[3]**
19/40 . . . . having a condensed ring system containing a six-membered ring having two nitrogen atoms in the same ring, e.g. purine nucleosides **[3]**
19/42 . . . Cobalamins, i.e. vitamin B_{12}, LLD factor **[3]**
19/44 . Preparation of O-glycosides, e.g. glucosides **[3]**
19/46 . . having an oxygen atom of the saccharide radical bound to a cyclohexyl radical, e.g. kasugamycin **[3]**
19/48 . . . the cyclohexyl radical being substituted by two or more nitrogen atoms, e.g. destomycin, neamin **[3]**
19/50 . . . . having two saccharide radicals bound through only oxygen to adjacent ring carbon atoms of the cyclohexyl radical, e.g. ambutyrosin, ribostamycin **[3]**
19/52 . . . . . containing three or more saccharide radicals, e.g. neomycin, lividomycin **[3]**
19/54 . . . the cyclohexyl radical being bound directly to a nitrogen atom of two or more



radicals, e.g. streptomycin **[3]**

19/56 . . having an oxygen atom of the saccharide radical directly bound to a condensed ring system having three or more carbocyclic rings, e.g. daunomycin, adriamycin **[3]**
19/58 . . having an oxygen atom of the saccharide radical directly bound through only acyclic carbon atoms to a non-saccharide heterocyclic ring, e.g. bleomycin, phleomycin **[3]**
19/60 . . having an oxygen of the saccharide radical directly bound to a non-saccharide heterocyclic ring or a condensed ring system containing a non-saccharide heterocyclic ring, e.g. coumermycin, novobiocin **[3]**
19/62 . . . the hetero ring having eight or more ring members and only oxygen as ring hetero atoms, e.g. erythromycin, spiramycin, nystatin **[3]**
19/64 . Preparation of S-glycosides, e.g. lincomycin **[3]**

21/00 **Preparation of peptides or proteins** (single-cell protein C12N 1/00) **[3]**
21/02 . having a known sequence of two or more amino acids, e.g. glutathione **[3]**
21/04 . . Cyclic or bridged peptides or polypeptides, e.g. bacitracin (cyclised by −S−S− bonds only C12P 21/02) **[3]**
21/06 . produced by the hydrolysis of a peptide bond, e.g. hydrolysate products (preparing foodstuffs by protein hydrolysis A23J 3/00) **[3]**
21/08 . Monoclonal antibodies **[5]**

23/00 **Preparation of compounds containing a cyclohexene ring having an unsaturated side chain containing at least ten carbon atoms bound by conjugated double bonds, e.g. carotenes** (containing hetero-rings C12P 17/00) **[3]**

25/00 **Preparation of compounds containing alloxazine or isoalloxazine nucleus, e.g. riboflavin [3]**

27/00 **Preparation of compounds containing a gibbane ring system, e.g. gibberellin [3]**

29/00 **Preparation of compounds containing a naphthacene ring system, e.g. tetracycline** (C12P 19/00 takes precedence) **[3]**

31/00 **Preparation of compounds containing a five-membered ring having two side-chains in ortho position to each other, and having at least one oxygen atom directly bound to the ring in ortho position to one of the side-chains, one side-chain containing, not directly bound to the ring, a carbon atom having three bonds to hetero atoms with at the most one bond to halogen, and the other side-chain having at least one oxygen atom bound in gamma-position to the ring, e.g. prostaglandins [3]**

33/00 **Preparation of steroids [3]**

Note

Attention is drawn to Note (1) following the title of subclass C07J, which explains what is covered by the term "steroids". **[3]**

Note

In groups C12P 33/02 to C12P 33/20, the following terms are used with the meaning indicated:
– "acting", "forming", "hydroxylating", "dehydroxylating" or "dehydrogenating" means the action of a micro-organism or enzyme rather than other chemical action. **[3]**

33/02 . Dehydrogenating; Dehydroxylating **[3]**
33/04 . . Forming an aryl ring from A ring **[3]**
33/06 . Hydroxylating **[3]**
33/08 . . at 11 position **[3]**
33/10 . . . at 11alpha-position **[3]**
33/12 . Acting on D ring **[3]**
33/14 . . Hydroxylating at 16 position **[3]**
33/16 . . Acting at 17 position **[3]**
33/18 . . . Hydroxylating at 17 position **[3]**
33/20 . containing heterocyclic rings **[3]**

35/00 Preparation of compounds having a 5-thia-1-azabicyclo [4.2.0] octane ring system, e.g. cephalosporin [3]
35/02 . by desacylation of the substituent in the 7 position **[3]**
35/04 . by acylation of the substituent in the 7 position **[3]**
35/06 . Cephalosporin C; Derivatives thereof **[3]**
35/08 . disubstituted in the 7 position **[3]**

37/00 Preparation of compounds having a 4-thia-1-azabicyclo [3.2.0] heptane ring system, e.g. penicillin [3]
37/02 . in presence of phenylacetic acid or phenylacetamide or their derivatives **[3]**
37/04 . by acylation of the substituent in the 6 position **[3]**
37/06 . by desacylation of the substituent in the 6 position **[3]**

39/00 Processes involving micro-organisms of different genera in the same process, simultaneously [3]

41/00 Processes using enzymes or micro-organisms to separate optical isomers from a racemic mixture [4]

C12Q MEASURING OR TESTING PROCESSES INVOLVING ENZYMES OR MICRO-ORGANISMS (immunoassay G01N 33/53); **COMPOSITIONS OR TEST PAPERS THEREFOR**; **PROCESSES OF PREPARING SUCH COMPOSITIONS**; **CONDITION-RESPONSIVE CONTROL IN MICROBIOLOGICAL OR ENZYMOLOGICAL PROCESSES [3]**

(1) This subclass does not cover the observation of the progress or of the result of processes specified in this subclass by any of the methods specified in groups G01N 3/00 to G01N 29/00, which is covered by subclass G01N. **[3]**
(2) In this subclass, the following expression is used with the meaning indicated:
– "involving", when used in relation to a substance, includes the testing for the substance as well as employing the substance as a determinant or reactant in a test for a different substance. **[3]**
(3) Attention is drawn to Notes (1) to (3) following the title of class C12. **[4]**
(4) In this subclass, test media are classified in the appropriate group for the relevant test process. **[3]**
(5) In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

1/00 Measuring or testing processes involving enzymes or micro-organisms (measuring or testing apparatus with condition measuring or sensing means, e.g. colony counters, C12M 1/34); **Compositions therefor**; **Processes of preparing such compositions [3]**
1/02 . involving viable micro-organisms **[3]**
1/04 . . Determining presence or kind of micro-organism; Use of selective media for testing antibiotics or bacteriocides; Compositions containing a chemical indicator therefor **[3]**
1/06 . . . Quantitative determination **[3]**
1/08 . . . . using multifield media **[3]**
1/10 . . . Enterobacteria **[3]**
1/12 . . . Nitrate to nitrite reducing bacteria **[3]**
1/14 . . . Streptococcus; Staphylococcus **[3]**
1/16 . . . using radioactive material **[3]**
1/18 . . Testing for antimicrobial activity of a material **[3]**
1/20 . . . using multifield media **[3]**
1/22 . . Testing for sterility conditions **[3]**
1/24 . . Methods of sampling, or inoculating or spreading a sample; Methods of physically isolating an intact micro-organism **[3]**
1/25 . involving enzymes not classifiable in groups C12Q 1/26 to C12Q 1/70 **[5]**
1/26 . involving oxidoreductase **[3]**
1/28 . . involving peroxidase **[3]**
1/30 . . involving catalase **[3]**
1/32 . . involving dehydrogenase **[3]**
1/34 . involving hydrolase **[3]**
1/37 . . involving peptidase or proteinase **[5]**
1/40 . . involving amylase **[3]**
1/42 . . involving phosphatase **[3]**
1/44 . . involving esterase **[3]**
1/46 . . . involving cholinesterase **[3]**
1/48 . involving transferase **[3]**
1/50 . . involving creatine phosphokinase **[3]**
1/52 . . involving transaminase **[3]**
1/527 . involving lyase **[5]**
1/533 . involving isomerase **[5]**
1/54 . involving glucose or galactose **[3]**
1/56 . involving blood clotting factors, e.g. involving thrombin, thromboplastin, fibrinogen **[3]**
1/58 . involving urea or urease **[3]**
1/60 . involving cholesterol **[3]**
1/61 . involving triglycerides **[5]**
1/62 . involving uric acid **[3]**
1/64 . Geomicrobiological testing, e.g. for petroleum **[3]**
1/66 . involving luciferase **[3]**
1/68 . involving nucleic acids **[3]**
1/70 . involving virus or bacteriophage **[3]**

3/00 Condition-responsive control processes (apparatus therefor C12M 1/36; controlling or regulating in general G05) **[3]**

C12R INDEXING SCHEME ASSOCIATED WITH SUBCLASSES C12C TO C12Q OR C12S, RELATING TO MICRO-ORGANISMS [3]

(1) This subclass constitutes an indexing scheme associated with the other subclasses of class C12, relating to micro-organisms used in the processes classified in subclasses C12C to C12Q or C12S. **[3]**

(2) The bacteria terminology is based on “Bergey’s Manual of Determinative Bacteriology”, Eighth Edition, 1975. **[3]**

1/00 Micro-organisms [3]
1/01 . Bacteria or actinomycetales **[3]**
1/02 . . Acetobacter **[3]**
1/025 . . Achromobacter **[3]**
1/03 . . Actinomadura **[3]**
1/04 . . Actinomyces **[3]**
1/045 . . Actinoplanes **[3]**
1/05 . . Alcaligenes **[3]**
1/06 . . Arthrobacter **[3]**
1/065 . . Azotobacter **[3]**
1/07 . . Bacillus **[3]**
1/08 . . . Bacillus brevis **[3]**
1/085 . . . Bacillus cereus **[3]**
1/09 . . . Bacillus circulans **[3]**
1/10 . . . Bacillus licheniformis **[3]**
1/11 . . . Bacillus megaterium **[3]**
1/12 . . . Bacillus polymyxa **[3]**
1/125 . . . Bacillus subtilis **[3]**
1/13 . . Brevibacterium **[3]**
1/14 . . Chainia **[3]**
1/145 . . Clostridium **[3]**
1/15 . . Corynebacterium **[3]**
1/16 . . . Corynebacterium diphtheriae **[3]**
1/165 . . . Corynebacterium poinsettiae **[3]**
1/17 . . . Corynebacterium pyogenes **[3]**
1/18 . . Erwinia **[3]**
1/185 . . Escherichia **[3]**
1/19 . . . Escherichia coli **[3]**
1/20 . . Flavobacterium **[3]**
1/21 . . Haemophilus **[3]**
1/22 . . Klebsiella **[3]**
1/225 . . Lactobacillus **[3]**
1/23 . . . Lactobacillus acidophilus **[3]**
1/24 . . . Lactobacillus brevis **[3]**
1/245 . . . Lactobacillus casei **[3]**
1/25 . . . Lactobacillus plantarum **[3]**
1/26 . . Methylomonas **[3]**
1/265 . . Micrococcus **[3]**
1/27 . . . Micrococcus flavus **[3]**
1/28 . . . Micrococcus glutamicus **[3]**
1/285 . . . Micrococcus lysodeikticus **[3]**
1/29 . . Micromonospora **[3]**
1/30 . . . Micromonospora chalcea **[3]**
1/31 . . . Micromonospora purpurea **[3]**
1/32 . . Mycobacterium **[3]**
1/325 . . . Mycobacterium avium **[3]**
1/33 . . . Mycobacterium fortuitum **[3]**
1/34 . . . Mycobacterium smegmatis **[3]**
1/35 . . Mycoplasma **[3]**
1/36 . . Neisseria **[3]**
1/365 . . Nocardia **[3]**
1/37 . . Proteus **[3]**
1/38 . . Pseudomonas **[3]**
1/385 . . . Pseudomonas aeruginosa **[3]**
1/39 . . . Pseudomonas fluorescens **[3]**
1/40 . . . Pseudomonas putida **[3]**
1/41 . . Rhizobium **[3]**
1/42 . . Salmonella **[3]**
1/425 . . Serratia **[3]**
1/43 . . . Serratia marcescens **[3]**
1/44 . . Staphylococcus **[3]**
1/445 . . . Staphylococcus aureus **[3]**
1/45 . . . Staphylococcus epidermidis **[3]**
1/46 . . Streptococcus **[3]**
1/465 . . Streptomyces **[3]**
1/47 . . . Streptomyces albus **[3]**
1/48 . . . Streptomyces antibioticus **[3]**
1/485 . . . Streptomyces aureofaciens **[3]**
1/49 . . . Streptomyces aureus **[3]**
1/50 . . . Streptomyces bikiniensis **[3]**
1/51 . . . Streptomyces candidus **[3]**
1/52 . . . Streptomyces chartreusis **[3]**
1/525 . . . Streptomyces diastatochromogenes **[3]**
1/53 . . . Streptomyces filipinensis **[3]**
1/54 . . . Streptomyces fradiae **[3]**
1/545 . . . Streptomyces griseus **[3]**
1/55 . . . Streptomyces hygroscopicus **[3]**
1/56 . . . Streptomyces lavendulae **[3]**
1/565 . . . Streptomyces lincolnensis **[3]**
1/57 . . . Streptomyces noursei **[3]**
1/58 . . . Streptomyces olivaceus **[3]**
1/585 . . . Streptomyces platensis **[3]**
1/59 . . . Streptomyces rimosus **[3]**
1/60 . . . Streptomyces sparsogenes **[3]**
1/61 . . . Streptomyces venezuelae **[3]**
1/62 . . Streptosporangium **[3]**
1/625 . . Streptoverticillium **[3]**
1/63 . . Vibrio **[3]**
1/64 . . Xanthomonas **[3]**
1/645 . Fungi **[3]**
1/65 . . Absidia **[3]**
1/66 . . Aspergillus **[3]**
1/665 . . . Aspergillus awamori **[3]**
1/67 . . . Aspergillus flavus **[3]**
1/68 . . . Aspergillus fumigatus **[3]**
1/685 . . . Aspergillus niger **[3]**
1/69 . . . Aspergillus oryzae **[3]**
1/70 . . . Aspergillus ustus **[3]**
1/71 . . . Aspergillus wentii **[3]**
1/72 . . Candida **[3]**
1/725 . . . Candida albicans **[3]**
1/73 . . . Candida lipolytica **[3]**
1/74 . . . Candida tropicalis **[3]**
1/745 . . Cephalosporium **[3]**

1/75 . . . Cephalosporium acremonium **[3]**
1/76 . . . Cephalosporium coerulescens **[3]**
1/765 . . . Cephalosporium crotocinigenum **[3]**
1/77 . . Fusarium **[3]**
1/78 . . Hansenula **[3]**
1/785 . . Mucor **[3]**
1/79 . . Paecilomyces **[3]**
1/80 . . Penicillium **[3]**
1/81 . . . Penicillium brevi **[3]**
1/82 . . . Penicillium chrysogenum **[3]**
1/825 . . . Penicillium notatum **[3]**
1/83 . . . Penicillium patulum **[3]**

1/85 . . Saccharomyces **[3]**
1/86 . . . Saccharomyces carlsbergensis **[3]**
1/865 . . . Saccharomyces cerevisiae **[3]**
1/87 . . . Saccharomyces lactis **[3]**
1/88 . . Torulopsis **[3]**
1/885 . . Trichoderma **[3]**
1/89 . Algae **[3]**
1/90 . Protozoa **[3]**
1/91 . Cell lines **[3,7]**
1/92 . Viruses **[5,7]**
1/93 . . Animal viruses **[7]**
1/94 . . Plant viruses **[7]**

C12S **PROCESSES USING ENZYMES OR MICRO-ORGANISMS TO LIBERATE, SEPARATE OR PURIFY A PRE-EXISTING COMPOUND OR COMPOSITION** (biological treatment of water, waste water, or sewage C02F 3/00, of sludge C02F 11/02; processes using enzymes or micro-organisms to separate optical isomers from a racemic mixture C12P 41/00); **PROCESSES USING ENZYMES OR MICRO-ORGANISMS TO TREAT TEXTILES OR TO CLEAN SOLID SURFACES OF MATERIALS [5]**

(1) This subclass covers processes already provided for in:
– Section A: A21, A23, A61L, A62D;
– Section B: B01D, B08B, B09C;
– Section C: C01, C05F, C08, C09B, C09H, C10G, C13, C14C, C21B, C22B, C23F, C23G;
– Section D: D01C, D01F, D06L, D06M, D06P, D21C, D21H;
– Section E: E21B;
– Section F: F24F, F24J, F26B;
– Section H: H01M.
This subclass is intended to provide a basis for a complete search to be made with respect to the subject matter defined by the subclass title and, therefore, all relevant information is classified in this subclass, even if classified elsewhere.
(2) Attention is drawn to Notes (2) and (3) following the title of class C12. **[5]**
(3) In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[2009.01]**
(4) The classification symbols of this subclass are not listed first when printed on patent documents. **[5]**
(5) In this subclass, it is desirable to add the indexing codes of subclass C12R. **[6]**

1/00 **Treatment of petroleum oils, shale oils or sand oils [5]**
1/02 . Desulfurising **[5]**

3/00 **Treatment of animal or plant materials or micro-organisms [5]**
3/02 . Recovery or purification of carbohydrate material **[5]**
3/04 . . Cellulose, e.g. plant fibres **[5]**
3/06 . . . Treatment of hemp or flax **[5]**
3/08 . . . in the production of paper pulp **[5]**
3/10 . . Treatment of sugar or molasses **[5]**
3/12 . . Treatment of pectin or starch **[5]**
3/14 . Recovery or purification of proteinaceous material **[5]**
3/16 . . Collagen or gelatin **[5]**
3/18 . Recovery or purification of glyceridic oils, fats, ester-type waxes or fatty acids **[5]**
3/20 . Removal of nucleic acids from intact or disrupted cells **[5]**
3/22 . Treatment of blood fractions **[5]**
3/24 . Treatment of animal secretions or organs **[5]**

5/00 **Treatment of emulsions, gases or foams [5]**

7/00 **Treatment of hides, e.g. depilating, bating [5]**

9/00 **Cleaning solid surfaces of materials [5]**

11/00 **Treatment of textiles, e.g. cleaning [5]**

99/00 **Subject matter not provided for in other groups of this subclass [2010.01]**

C13 SUGAR INDUSTRY [4]

(1) In class C13, the following terms or expressions are used with the meanings indicated:
– *"sugars" are a class of edible, water-soluble crystalline carbohydrates, having a characteristic sweet taste, including mono-, di- and oligosaccharides, e.g. sucrose, lactose and fructose. A more specific meaning of the term "sugar" is defined in the note of subclass C13B.* **[2011.01]**

(2) Processes using enzymes or micro-organisms in order:
(i) to liberate, separate or purify a pre-existing compound or composition, or
(ii) to treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

C13B ***PRODUCTION OF SUCROSE; APPARATUS SPECIALLY ADAPTED THEREFOR*** *(chemically synthesised sugars or sugar derivatives C07H; fermentation or enzyme-using processes for preparing compounds containing saccharide radicals C12P 19/00)* **[2011.01]**

Note

In subclass C13B, the following terms or expressions are used with the meanings indicated:
– *"sugar" is used in its non-scientific meaning and refers to sucrose, also called "table sugar" or "saccharose", a white crystalline disaccharide;* **[2011.01]**
– *"sugar juices" are solutions of sugar, essentially comprising sucrose, which are derived from different plants, e.g. beet, cane or maple;* **[2011.01]**
– *"syrups" are highly concentrated sugar juices.* **[2011.01]**

5/00 ***Reducing the size of material from which sugar is to be extracted*** *(for extraction of starch C08B 30/02)* **[2011.01]**
5/02 . *Cutting sugar cane* **[2011.01]**
5/04 . . *Shredding sugar cane* **[2011.01]**
5/06 . *Slicing sugar beet* **[2011.01]**
5/08 . *Knives; Adjustment or maintenance thereof* **[2011.01]**

10/00 ***Production of sugar juices*** *(tapping of tree-juices A01G 23/10; tapping-spouts, receptacles for juices A01G 23/14)* **[2011.01]**
10/02 . *Expressing juice from sugar cane or similar material, e.g. sorghum saccharatum* **[2011.01]**
10/04 . . *combined with imbibition* **[2011.01]**
10/06 . . *Sugar-cane crushers* **[2011.01]**
10/08 . *Extraction of sugar from sugar beet with water* **[2011.01]**
10/10 . . *Continuous processes* **[2011.01]**
10/12 . . *Details of extraction apparatus, e.g. arrangements of pipes or valves* **[2011.01]**
10/14 . *using extracting agents other than water, e.g. alcohol or salt solutions* **[2011.01]**

15/00 ***Expressing water from material from which sugar has been extracted*** *(from starch-extracted material C08B 30/10)* **[2011.01]**
15/02 . *between perforated moving belts* **[2011.01]**

20/00 ***Purification of sugar juices*** **[2011.01]**

Note

When classifying in this group, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned. **[2011.01]**

20/02 . *using alkaline earth metal compounds* **[2011.01]**
20/04 . . *followed by saturation* **[2011.01]**
20/06 . . . *with carbon dioxide or sulfur dioxide* **[2011.01]**
20/08 . *by oxidation or reduction* **[2011.01]**
20/10 . . *using sulfur dioxide or sulfites* **[2011.01]**
20/12 . *using adsorption agents, e.g. active carbon* **[2011.01]**
20/14 . *using ion-exchange materials* **[2011.01]**
20/16 . *by physical means, e.g. osmosis or filtration* **[2011.01]**
20/18 . *by electrical means* **[2011.01]**

25/00 ***Evaporators or boiling pans specially adapted for sugar juices; Evaporating or boiling sugar juices*** **[2011.01]**
25/02 . *Details, e.g. for preventing foaming or for catching juice* **[2011.01]**
25/04 . . *Heating equipment* **[2011.01]**
25/06 . *combined with measuring instruments for effecting control of the process* **[2011.01]**

30/00 ***Crystallisation; Crystallising apparatus; Separating crystals from mother liquors*** **[2011.01]**
30/02 . *Crystallisation; Crystallising apparatus* **[2011.01]**
30/04 . *Separating crystals from mother liquor* **[2011.01]**
30/06 . . *by centrifugal force* **[2011.01]**
30/08 . . *Washing residual mother liquor from crystals* **[2011.01]**
30/10 . . . *in centrifuges* **[2011.01]**
30/12 . . *Recycling mother liquor or wash liquors* **[2011.01]**
30/14 . . *Dissolving or refining raw sugar* **[2011.01]**

35/00 ***Extraction of sucrose from molasses*** **[2011.01]**
35/02 . *by chemical means* **[2011.01]**
35/04 . . *by precipitation as alkaline earth metal saccharates* **[2011.01]**
35/06 . . *using ion exchange* **[2011.01]**
35/08 . *by physical means, e.g. osmosis* **[2011.01]**

40/00 ***Drying sugar*** **[2011.01]**

45/00 ***Cutting machines specially adapted for sugar*** **[2011.01]**
45/02 . *in combination with sorting and packing machines* **[2011.01]**

50/00 ***Sugar products, e.g. powdered, lump or liquid sugar****; **Working-up of sugar** (C13B 40/00, C13B 45/00 take precedence; confectionery A23G 3/00)* **[2011.01]**

50/02 **.** *formed by moulding sugar* **[2011.01]**

99/00 ***Subject matter not provided for in other groups of this subclass*** **[2011.01]**

C13K **SACCHARIDES, OTHER THAN SUCROSE, OBTAINED FROM NATURAL SOURCES OR BY HYDROLYSIS OF NATURALLY OCCURRING DI-, OLIGO- OR POLYSACCHARIDES** (chemically synthesised sugars or sugar derivatives C07H; polysaccharides, e.g. starch, derivatives thereof C08B; malt C12C; fermentation or enzyme-using processes for preparing compounds containing saccharide radicals C12P 19/00)

1/00 **Glucose** (separation from invert sugar C13K 3/00); **Glucose-containing syrups [2]**

1/02 **.** obtained by saccharification of cellulosic materials (manufacture of fodder A23K 1/12)

1/04 **. .** Purifying

1/06 **.** obtained by saccharification of starch or raw materials containing starch

1/08 **. .** Purifying

1/10 **.** Crystallisation

3/00 **Invert sugar**; **Separation of glucose or fructose from invert sugar**

5/00 **Lactose**

7/00 **Maltose**

11/00 **Fructose** (separation from invert sugar C13K 3/00) **[2]**

13/00 **Sugars not otherwise provided for in this class [2]**

C14 SKINS; HIDES; PELTS; LEATHER

C14B MECHANICAL TREATMENT OR PROCESSING OF SKINS, HIDES, OR LEATHER IN GENERAL; PELT-SHEARING MACHINES; INTESTINE-SPLITTING MACHINES (mechanical cleaning of hides or the like D06G)

Subclass index

1/00 Manufacture of leather; Machines or devices therefor

1/02 . Fleshing, unhairing, samming, stretching-out, setting-out, shaving, splitting, or skiving skins, hides, or leather

1/04 . . using slicking, scraping, or smoothing-out cylinders or blades fixed on supports, e.g. cylinders, in a plane substantially at right angles to the working surface

1/06 . . . in machines in which the working piece is maintained in contact with the working tools solely by means of rolls

1/08 . . . in machines with flexible bands as bed supporting or counter-pressure elements

1/10 . . . in machines with drums with cylindrical, conical, or similar surfaces for supporting the whole working piece

1/12 . . . in machines with plane supporting bed-plates

1/14 . . using tools cutting the skin in a plane substantially parallel to its surface

1/16 . . . using fixed or reciprocating or oscillating knives

1/18 . . . using band knives

1/20 . . . using circular dished or coned knives

1/22 . . . using cylindrical knives

1/24 . . Cutting or shearing hairs without cutting the skin (shearing furs or plucking hairs for fur manufacturing purposes C14B 15/02)

1/26 . Leather tensioning or stretching frames; Stretching-machines; Setting-out boards; Pasting boards (fastening devices C14B 17/08)

1/28 . Machines for treating leather combined with devices for measuring and printing

1/30 . Pressing or rolling leather

1/32 . . by linear movement of the pressing elements

1/34 . . by rotating movement of the pressing or rolling elements

1/36 . . . Bridge leather-rolling machines

1/38 . Hammering leather

1/40 . Softening or making skins or leather supple, e.g. by staking, boarding, or crippling machines, by dry mills

1/42 . . by means of a rotatable drum with radial blades

1/44 . Mechanical treatment of leather surfaces

1/46 . . Fluffing, buffing or sanding

1/48 . . Roughening (by sanding C14B 1/46)

1/50 . . Glazing

1/52 . . Brushing or plush-wheeling

1/54 . . Ironing (pressing or rolling C14B 1/30)

1/56 . . Ornamenting, producing designs, embossing

1/58 . Drying

1/60 . . Pasting processes (chemical aspects C14C 7/00)

1/62 . Winding or stacking hides or leather

3/00 Milling leather

5/00 Clicking, perforating, or cutting leather (for shoe parts, e.g. soles, A43D)

5/02 . Stamps or dies for leather articles

5/04 . for making leather belts or strips

5/06 . . Machines for cutting strips spirally from discs of leather

7/00 Special leathers or their manufacture

7/02 . Composite leathers (with one or more laminae of plastics material B32B 9/02)

7/04 . . by cementing or pressing together leather pieces, strips, or layers; Reinforcing or stiffening leather by means of reinforcing layers

7/06 . Leather webs built up of interengaged strips or pieces, e.g. by braiding

9/00 Making driving belts or other leather belts or strips

11/00 Finishing the edges of leather pieces, e.g. by folding, by burning

13/00 Shredding hides or leather

15/00 Mechanical treatment of furs

15/02 . Shearing; Removing dead or coarse hairs or bristles by shearing or plucking

15/04 . Fur dressing

15/06 . . Fur-stretching devices

15/08 . Application of reinforcing or stiffening layers to fur skins

15/10 . Cutting furs; Making fur plates or strips

15/12 . Finishing, e.g. pointing furs; Producing designs or patterns

17/00 Details of apparatus or machines for manufacturing or treating skins, hides, leather, or furs

17/02 . Blading cylinders or other working cylinders, e.g. slicking or scraping cylinders

17/04 . Work-supports or other counter-pressing elements; Bed rolls or counter-pressing rolls

17/06 . Work feeding or clamping devices

17/08 . . Fastening devices, e.g. clips for leather-stretching

17/10 . Arrangements for driving parts of leather-working machines

17/12 . Safety devices specially adapted for leather-working machines

17/14 . Auxiliary devices for leather-working machines, e.g. grinding devices for blading cylinders or dust-removal devices combined with the working machines

19/00 Hand tools specially adapted for the treatment of hides, skins, or leather in the manufacture of leather or furs (equipment or tools for saddlery B68C)

21/00 Splitting intestines; **Cutting intestines longitudinally** (cleaning or cutting intestines during processing of meat A22C 17/00)

99/00 Subject matter not provided for in other groups of this subclass [8]

C14C CHEMICAL TREATMENT OF SKINS, HIDES OR LEATHER, E.G. TANNING, IMPREGNATING, FINISHING; **APPARATUS THEREFOR**; **COMPOSITIONS FOR TANNING** (bleaching of leather or furs D06L; dyeing of leather or furs D06P)

Note

Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

1/00 Chemical treatment prior to tanning

1/02 . Curing raw hides

1/04 . Soaking

1/06 . Facilitating unhairing, e.g. by painting, by liming

1/08 . Deliming; Bating; Pickling; Degreasing

3/00 Tanning; **Compositions for tanning**

3/02 . Chemical tanning

3/04 . . Mineral tanning

3/06 . . . using chromium compounds

3/08 . . by organic agents

3/10 . . . Vegetable tanning

3/12 . . . . using purified or modified vegetable tanning agents

3/14 . . . Fat tanning; Oil tanning

3/16 . . . using aliphatic aldehydes

3/18 . . . using polycondensation products or precursors thereof

3/20 . . . . sulfonated

3/22 . . . using polymerisation products

3/24 . . . using lignin derivatives, e.g. sulfate liquor

3/26 . . . using other organic substances, containing halogen

3/28 . . Multi-step processes

3/30 . . using physical means combined with chemical means

3/32 . Recovering tanning agents from leather

5/00 Degreasing leather

7/00 Chemical aspects of pasting processes

9/00 Impregnating leather for preserving, waterproofing, making resistant to heat or similar purposes

9/02 . using fatty or oily materials, e.g. fat liquoring

9/04 . Fixing tanning agents in the leather

11/00 Surface finishing of leather

13/00 Manufacture of special kinds of leather, e.g. vellum

13/02 . Manufacture of technical leather

15/00 Apparatus for chemical treatment or washing of hides, skins, or leather

99/00 Subject matter not provided for in other groups of this subclass [8]

METALLURGY

C21 METALLURGY OF IRON

C21B MANUFACTURE OF IRON OR STEEL (preliminary treatment of ferrous ores or scrap C22B 1/00; electric heating H05B)

(1) This subclass covers:
- the production of iron or steel from source materials, e.g. the production of pig-iron;
- apparatus specially adapted therefor, e.g. blast furnaces, air heaters (furnaces in general F27).

(2) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

3/00 General features in the manufacture of pig-iron (mixers for pig-iron C21C 1/06)
- 3/02 . by applying additives, e.g. fluxing agents
- 3/04 . Recovery of by-products, e.g. slag
- 3/06 . . Treatment of liquid slag (slag wool C03B; slag stones C04B)
- 3/08 . . . Cooling slag
- 3/10 . . . Slag pots; Slag cars

5/00 Making pig-iron in the blast furnace
- 5/02 . Making special pig-iron, e.g. by applying additives, e.g. oxides of other metals
- 5/04 . Making slag of special composition
- 5/06 . using top gas in the blast furnace process (in coke ovens C10B)

7/00 Blast furnaces (lifts associated with blast furnaces B66B 9/06)
- 7/02 . Internal forms
- 7/04 . with special refractories (refractory materials C04B)
- 7/06 . . Linings for furnaces
- 7/08 . Top armourings
- 7/10 . Cooling; Devices therefor
- 7/12 . Opening or sealing the tap holes
- 7/14 . Discharging devices, e.g. for slag
- 7/16 . Tuyères
- 7/18 . Bell-and-hopper arrangements
- 7/20 . . with appliances for distributing the burden
- 7/22 . Dust arresters
- 7/24 . Test rods or other checking devices

9/00 Stoves for heating the blast in blast furnaces
- 9/02 . Brick hot-blast stoves
- 9/04 . . with combustion shaft
- 9/06 . . Linings
- 9/08 . Iron hot-blast stoves
- 9/10 . Other details, e.g. blast mains
- 9/12 . . Hot-blast valves or slides for blast furnaces (valves in general F16K)
- 9/14 . Preheating the combustion air
- 9/16 . Cooling or drying the hot-blast

11/00 Making pig-iron other than in blast furnaces
- 11/02 . in low shaft furnaces
- 11/06 . in rotary kilns
- 11/08 . in hearth-type furnaces
- 11/10 . in electric furnaces

13/00 Making spongy iron or liquid steel, by direct processes
- 13/02 . in shaft furnaces
- 13/04 . in retorts
- 13/06 . in multi-storied furnaces
- 13/08 . in rotary furnaces
- 13/10 . in hearth-type furnaces
- 13/12 . in electric furnaces
- 13/14 . Multi-stage processes

15/00 Other processes for the manufacture of iron from iron compounds (general methods of reducing to metal C22B 5/00; by electrolysis C25C 1/06)
- 15/02 . Metallothermic processes, e.g. thermit reduction
- 15/04 . from iron carbonyl

C21C PROCESSING OF PIG-IRON, E.G. REFINING, MANUFACTURE OF WROUGHT-IRON OR STEEL (refining or remelting metals in general C22B 9/00); **TREATMENT IN MOLTEN STATE OF FERROUS ALLOYS**

1/00 Refining of pig-iron; Cast iron
1/02 . Dephosphorising or desulfurising
1/04 . Removing impurities other than carbon, phosphorus, or sulfur
1/06 . Constructional features of mixers for pig-iron
1/08 . Manufacture of cast-iron
1/10 . Making spheroidal graphite cast-iron

3/00 Manufacture of wrought-iron or wrought-steel

5/00 Manufacture of carbon steel, e.g. plain mild steel, medium carbon steel, or cast-steel
5/02 . Crucible furnace processes
5/04 . Manufacture of hearth-furnace steel, e.g. Siemens-Martin steel
5/06 . . Processes yielding slags of special composition
5/28 . Manufacture of steel in the converter
5/30 . . Regulating or controlling the blowing
5/32 . . . Blowing from above (C21C 5/35 takes precedence) **[5]**
5/34 . . . Blowing through the bath (C21C 5/35 takes precedence) **[5]**
5/35 . . . Blowing from above and through the bath **[5]**
5/36 . . Processes yielding slags of special composition
5/38 . . Removal of waste gases or dust
5/40 . . . Offtakes or separating apparatus for converter waste gases or dust
5/42 . . Constructional features of converters
5/44 . . . Refractory linings
5/46 . . . Details or accessories
5/48 . . . . Bottoms or tuyères of converters
5/50 . . . . Tilting mechanisms for converters
5/52 . Manufacture of steel in electric furnaces (electric heating per se H05B)
5/54 . . Processes yielding slags of special composition
5/56 . Manufacture of steel by other methods (making liquid steel by direct processes C21B 13/00)

7/00 Treating molten ferrous alloys, e.g. steel, not covered by groups C21C 1/00 to C21C 5/00 (treating molten metals during moulding B22D 1/00, B22D 27/00; remelting ferrous metals C22B)
7/04 . Removing impurities by adding a treating agent
7/06 . . Deoxidising, e.g. killing **[2]**
7/064 . . Dephosphorising; Desulfurising **[3]**
7/068 . . Decarburising **[3]**
7/072 . . Treatment with gases (C21C 7/06, C21C 7/064, C21C 7/068 take precedence) **[3]**
7/076 . . Use of slags or fluxes as treating agents (C21C 7/06, C21C 7/064, C21C 7/068 take precedence) **[3]**
7/10 . Handling in vacuum

C21D MODIFYING THE PHYSICAL STRUCTURE OF FERROUS METALS; GENERAL DEVICES FOR HEAT TREATMENT OF FERROUS OR NON-FERROUS METALS OR ALLOYS; MAKING METAL MALLEABLE BY DECARBURISATION, TEMPERING, OR OTHER TREATMENTS (cementation by diffusion processes C23C; surface treatment of metallic material involving at least one process provided for in class C23 and at least one process covered by this subclass C23F 17/00; unidirectional solidification of eutectic materials or unidirectional demixing of eutectoid materials C30B)

Subclass index

1/00 General methods or devices for heat treatment, e.g. annealing, hardening, quenching, tempering (furnaces in general F27; electric heating H05B)
1/02 . Hardening articles or materials formed by forging or rolling, with no further heating beyond that required for the formation
1/04 . with simultaneous application of supersonic waves, magnetic or electric fields
1/06 . Surface hardening
1/08 . . with flames
1/09 . . by direct application of electrical or wave energy; by particle radiation **[3]**
1/10 . . . by electric induction **[3]**
1/18 . Hardening (C21D 1/02 takes precedence); Quenching with or without subsequent tempering (quenching devices C21D 1/62) **[3]**
1/19 . . by interrupted quenching **[3]**
1/20 . . . Isothermal quenching, e.g. bainitic hardening **[3]**
1/22 . . . Martempering **[3]**
1/25 . . Hardening, combined with annealing between 300 °C and 600 °C, i.e. heat refining ("Vergüten") **[3]**
1/26 . Methods of annealing
1/28 . . Normalising
1/30 . . Stress-relieving
1/32 . . Soft annealing, e.g. spheroidising
1/34 . Methods of heating (C21D 1/06 takes precedence)
1/38 . . Heating by cathodic discharges
1/40 . . Direct resistance heating
1/42 . . Induction heating
1/44 . . in heat-treatment baths
1/46 . . . Salt baths

1/48 . . . Metal baths
1/50 . . . Oil baths
1/52 . . with flames
1/53 . . Heating in fluidised beds **[3]**
1/54 . Determining when the hardening temperature has been reached by measurement of magnetic or electrical properties
1/55 . Hardenability tests, e.g. end-quench tests (investigating or analysing materials by determining their chemical or physical properties, in general G01N) **[3]**
1/56 . characterised by the quenching agents
1/58 . . Oils
1/60 . . Aqueous agents
1/607 . . Molten salts **[3]**
1/613 . . Gases; Liquefied or solidified normally gaseous material **[3]**
1/62 . Quenching devices
1/63 . . for bath quenching **[3]**
1/64 . . . with circulating liquids (in general F28D) **[3]**
1/667 . . for spray quenching **[3]**
1/673 . . for die quenching **[3]**
1/68 . Temporary coatings or embedding materials applied before or during heat treatment
1/70 . . while heating or quenching
1/72 . . during chemical change of surfaces
1/74 . Methods of treatment in inert gas, controlled atmosphere, vacuum, or pulverulent material (production of gases C01, C10)
1/76 . . Adjusting the composition of the atmosphere
1/767 . . with forced gas circulation; Reheating thereof **[3]**
1/773 . . under reduced pressure or vacuum **[3]**
1/78 . Combined heat-treatments not provided for above
1/82 . Descaling by thermal stresses (mechanically B21, B23; chemically C23; electrolytically C25F)
1/84 . Controlled slow cooling (cooling-beds for metal rolling B21B 43/00) **[3]**

3/00 Diffusion processes for extraction of non-metals; **Furnaces therefor** (local protective coatings C21D 1/72; furnaces in general F27)
3/02 . Extraction of non-metals
3/04 . . Decarburising
3/06 . . Extraction of hydrogen
3/08 . . Extraction of nitrogen
3/10 . Furnaces therefor

5/00 Heat treatment of cast-iron
5/02 . improving the malleability of grey cast-iron
5/04 . of white cast-iron
5/06 . . Malleabilising
5/08 . . . with oxidation of carbon
5/10 . . . . in gaseous agents
5/12 . . . . in solid agents
5/14 . . . Graphitising
5/16 . . . . Packing agents

6/00 Heat treatment of ferrous alloys [2]

(1) When classifying in group C21D 6/00, any aspect of the method for the heat treatment of ferrous alloys which is considered to represent information of interest for search may also be classified in groups C21D 1/02 to C21D 1/84. This can, for example, be the case when it is considered of interest to enable searching of heat treatment methods of ferrous alloys using a combination of classification symbols. Such non-obligatory classification should be given as “additional information”. **[8]**

(2) When classifying in group C21D 6/00, any alloying constituent which is considered to represent information of interest for search may also be classified in groups C22C 38/02 to C22C 38/60. This can, for example, be the case when it is considered of interest to enable searching of heat treatment of specific ferrous alloys using a combination of classification symbols. Such non-obligatory classification should be given as “additional information”. **[8]**

6/02 . Hardening by precipitation **[2]**
6/04 . Hardening by cooling below 0° C **[2]**

7/00 Modifying the physical properties of iron or steel by deformation (apparatus for mechanical working of metal B21, B23, B24)
7/02 . by cold working
7/04 . . of the surface
7/06 . . . by shot-peening or the like
7/08 . . . by burnishing or the like
7/10 . . of the whole cross-section, e.g. of concrete reinforcing bars
7/12 . . . by expanding tubular bodies
7/13 . by hot working

8/00 Modifying the physical properties by deformation combined with, or followed by, heat treatment (hardening articles or materials formed by forging or rolling with no further heating beyond that required for the formation C21D 1/02) **[3]**
8/02 . during manufacturing of plates or strips (C21D 8/12 takes precedence) **[3]**
8/04 . . to produce plates or strips for deep-drawing **[3]**
8/06 . during manufacturing of rods or wires **[3]**
8/08 . . for concrete reinforcement **[3]**
8/10 . during manufacturing of tubular bodies **[3]**
8/12 . during manufacturing of articles with special electromagnetic properties **[3]**

9/00 Heat treatment, e.g. annealing, hardening, quenching, tempering, adapted for particular articles; **Furnaces therefor** (furnaces in general F27)
9/02 . for springs
9/04 . for rails (apparatus for heat treatment of railway rails on the spot E01B 31/18)
9/06 . . with diminished tendency to become wavy
9/08 . for tubular bodies or pipes
9/10 . . shotgun barrels
9/12 . . barrels for ordnance
9/14 . . wear- or pressure-resistant pipes
9/16 . for explosive shells
9/18 . for knives, scythes, scissors, or like hand cutting tools
9/20 . for blades for skates
9/22 . for drills; for milling cutters; for machine cutting tools
9/24 . for saw blades

9/26 . for needles; for teeth for card-clothing
9/28 . for plain shafts
9/30 . for crankshafts; for camshafts
9/32 . for gear wheels, worm wheels, or the like
9/34 . for tyres; for rims
9/36 . for balls; for rollers
9/38 . for roll bodies
9/40 . for rings; for bearing races
9/42 . for armour plate
9/44 . for equipment for lining mine shafts, e.g. segments, rings, props
9/46 . for sheet metals
9/48 . . deep-drawing sheets
9/50 . for welded joints
9/52 . for wires; for strips
9/54 . . Furnaces for treating strips or wire
9/56 . . . Continuous furnaces for strip or wire
9/567 . . . . with heating in fluidised beds **[3]**
9/573 . . . . with cooling **[3]**
9/58 . . . . with heating by baths
9/60 . . . . with induction heating
9/62 . . . . with direct resistance heating
9/63 . . . . the strip being supported by a cushion of gas **[3]**
9/64 . . . Patenting furnaces
9/66 . . . Tower-type furnaces
9/663 . . . Bell-type furnaces **[3]**
9/665 . . . . inverted or side-facing **[3]**
9/667 . . . . Multi-station furnaces **[3]**
9/67 . . . . . adapted for treating the charge in vacuum or special atmosphere **[3]**
9/673 . . . . Details, accessories, or equipment peculiar to bell-type furnaces **[3]**
9/675 . . . . Arrangements of charging or discharging devices **[3]**
9/677 . . . . Arrangements of heating devices **[3]**
9/68 . . . Furnace coilers; Hot coilers (cold coilers B21C)
9/70 . Furnaces for ingots, i.e. soaking pits

10/00 Modifying the physical properties by methods other than heat treatment or deformation [3]

11/00 Process control or regulation for heat treatments (controlling or regulating in general G05) **[2]**

C22 METALLURGY; FERROUS OR NON-FERROUS ALLOYS; TREATMENT OF ALLOYS OR NON-FERROUS METALS

C22B PRODUCTION OR REFINING OF METALS (making metallic powder or suspensions thereof B22F 9/00; production of metals by electrolysis or electrophoresis C25); PRETREATMENT OF RAW MATERIALS

(1) In this subclass, groups for obtaining metals include obtaining the metals by non-metallurgical processes, and obtaining metal compounds by metallurgical processes. Thus, for example, group C22B 11/00 covers the production of silver by reduction of ammoniacal silver oxide in solution, and group C22B 17/00 covers the production of cadmium oxide by a metallurgical process. Furthermore, although compounds of arsenic and antimony are classified in C01G, production of the elements themselves is covered by C22B, as well as the production of their compounds by metallurgical processes.

(2) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

1/00 Preliminary treatment of ores or scrap

1/02 . Roasting processes (C22B 1/16 takes precedence)
1/04 . . Blast roasting
1/06 . . Sulfating roasting
1/08 . . Chloridising roasting
1/10 . . in fluidised form
1/11 . Removing sulfur, phosphorus or arsenic, other than by roasting **[2]**
1/14 . Agglomerating; Briquetting; Binding; Granulating
1/16 . . Sintering; Agglomerating
1/18 . . . in sinter pots
1/20 . . . in sintering machines with movable grates
1/212 . . . in tunnel furnaces **[2]**
1/214 . . . in shaft furnaces **[2]**
1/216 . . . in rotary furnaces **[2]**
1/22 . . . in other sintering apparatus
1/24 . . Binding; Briquetting
1/242 . . . with binders **[2]**
1/243 . . . . inorganic **[2]**
1/244 . . . . organic **[2]**
1/245 . . . . . with carbonaceous material for the production of coked agglomerates **[2]**
1/248 . . . of metal scrap or alloys **[2]**
1/26 . Cooling of roasted, sintered, or agglomerated ores

3/00 Extraction of metal compounds from ores or concentrates by wet processes [5]

Note

When classifying in this group, the nature of any metal which is considered to represent information of interest for search may also be classified in the main groups only of C22B 11/00 to C22B 25/00, in group C22B 19/34 or in any of groups C22B 26/00 to C22B 61/00. This can, for example, be the case when it is considered of interest to enable searching for extraction of specific metals or their compounds. Such non-obligatory classification should be given as "additional information". **[8]**

3/02 . Apparatus therefor
3/04 . by leaching (C22B 3/18 takes precedence) **[5]**
3/06 . . in inorganic acid solutions **[5]**
3/08 . . . Sulfuric acid **[5]**
3/10 . . . Hydrochloric acid **[5]**
3/12 . . in inorganic alkaline solutions **[5]**
3/14 . . . containing ammonia or ammonium salts **[5]**
3/16 . . in organic solutions **[5]**
3/18 . with the aid of micro-organisms or enzymes, e.g. bacteria or algae **[5]**
3/20 . Treatment or purification of solutions, e.g. obtained by leaching (C22B 3/18 takes precedence) **[5]**
3/22 . . by physical processes, e.g. by filtration, by magnetic means (C22B 3/26 takes precedence) **[5]**
3/24 . . . by adsorption on solid substances, e.g. by extraction with solid resins **[5]**
3/26 . . by liquid-liquid extraction using organic compounds **[5]**

Note

In groups C22B 3/28 to C22B 3/40:
(a) in the absence of an indication to the contrary, compounds are classified in the last appropriate place;

(b) when two or more compounds are used successively, each compound is classified as such;
(c) mixtures containing two or more compounds covered individually by the same one of groups C22B 3/28 to C22B 3/38, are classified only in that group. **[5]**

3/28 . . . Amines **[5]**
3/30 . . . Oximes **[5]**
3/32 . . . Carboxylic acids **[5]**
3/34 . . . containing sulfur **[5]**
3/36 . . . Heterocyclic compounds (C22B 3/34 takes precedence) **[5]**
3/38 . . . containing phosphorus **[5]**
3/40 . . . Mixtures **[5]**
3/42 . . by ion-exchange extraction **[5]**
3/44 . . by chemical processes (C22B 3/26, C22B 3/42 take precedence) **[5]**
3/46 . . . by substitution, e.g. by cementation **[5]**

4/00 Electrothermal treatment of ores or metallurgical products for obtaining metals or alloys (general methods of refining or remelting metals C22B 9/00; obtaining iron or steel C21B, C21C) **[2]**
4/02 . Light metals **[2]**
4/04 . Heavy metals **[2]**
4/06 . Alloys **[2]**
4/08 . Apparatus **[2]**

5/00 General processes of reducing to metals
5/02 . Dry processes
5/04 . . by aluminium, other metals, or silicon
5/06 . . by carbides or the like
5/08 . . by sulfides; Roasting reaction processes
5/10 . . by solid carbonaceous reducing agents
5/12 . . by gases
5/14 . . . fluidised material
5/16 . . with volatilisation or condensation of the metal being produced
5/18 . . Reducing step-by-step
5/20 . . from metal carbonyls

7/00 Working-up raw materials other than ores, e.g. scrap, to produce non-ferrous metals or compounds thereof
7/02 . Working-up flue dust
7/04 . Working-up slag

9/00 General processes of refining or remelting of metals; **Apparatus for electroslag or arc remelting of metals**
9/02 . Refining by liquating, filtering, centrifuging, distilling or supersonic wave action
9/04 . Refining by applying a vacuum **[3]**
9/05 . Refining by treating with gases, e.g. gas flushing **[3]**
9/10 . with refining or fluxing agents; Use of materials therefor (C22B 9/18 takes precedence) **[3]**
9/14 . Refining in the solid state
9/16 . Remelting metals (liquating C22B 9/02) **[3]**
9/18 . . Electroslag remelting **[3]**
9/187 . . . Apparatus therefor, e.g. furnaces **[5]**
9/193 . . . . Moulds, bottom plates or starter plates **[5]**
9/20 . . Arc remelting **[3]**
9/21 . . . Apparatus therefor **[5]**
9/22 . . with heating by wave energy or particle radiation **[3]**

11/00 Obtaining noble metals
11/02 . by dry processes
11/06 . Chloridising
11/08 . by cyaniding
11/10 . by amalgamating
11/12 . . Apparatus therefor

13/00 Obtaining lead
13/02 . by dry processes
13/06 . Refining
13/08 . . Separating metals from lead by precipitating, e.g. by Parkes process
13/10 . . Separating metals from lead by crystallising, e.g. by Pattison process

15/00 Obtaining copper
15/02 . in blast furnaces
15/04 . in reverberatory furnaces
15/06 . in converters
15/14 . Refining

17/00 Obtaining cadmium
17/02 . by dry processes
17/06 . Refining

19/00 Obtaining zinc or zinc oxide
19/02 . Preliminary treatment of ores; Preliminary refining of zinc oxide
19/04 . Obtaining zinc by distilling
19/06 . . in muffle furnaces
19/08 . . in blast furnaces
19/10 . . in reverberatory furnaces
19/12 . . in crucible furnaces
19/14 . . in vertical retorts
19/16 . . Distilling vessels
19/18 . . . Condensers; Receiving vessels
19/20 . Obtaining zinc otherwise than by distilling
19/28 . from muffle furnace residues
19/30 . from metallic residues or scraps
19/32 . Refining zinc
19/34 . Obtaining zinc oxide (purifying zinc oxide C01G 9/02)
19/36 . . in blast or reverberatory furnaces
19/38 . . in rotary furnaces

21/00 Obtaining aluminium
21/02 . with reducing
21/04 . with alkali metals
21/06 . Refining

23/00 Obtaining nickel or cobalt
23/02 . by dry processes
23/06 . Refining

25/00 Obtaining tin
25/02 . by dry processes
25/06 . from scrap, especially tin scrap (by electrolytic process C25C 1/14)
25/08 . Refining

26/00 Obtaining alkali, alkaline earth metals or magnesium [2]
26/10 . Obtaining alkali metals **[2]**
26/12 . . Obtaining lithium **[2]**
26/20 . Obtaining alkaline earth metals or magnesium **[2]**
26/22 . . Obtaining magnesium **[2]**

30/00 Obtaining antimony, arsenic or bismuth [2]
30/02 . Obtaining antimony **[2]**
30/04 . Obtaining arsenic **[2]**
30/06 . Obtaining bismuth **[2]**

34/00 Obtaining refractory metals [2]
34/10 . Obtaining titanium, zirconium or hafnium **[2]**
34/12 . . Obtaining titanium **[2]**
34/14 . . Obtaining zirconium or hafnium **[2]**
34/20 . Obtaining niobium, tantalum or vanadium **[2]**
34/22 . . Obtaining vanadium **[2]**
34/24 . . Obtaining niobium or tantalum **[2]**
34/30 . Obtaining chromium, molybdenum or tungsten **[2]**
34/32 . . Obtaining chromium **[2]**
34/34 . . Obtaining molybdenum **[2]**
34/36 . . Obtaining tungsten **[2]**

35/00 Obtaining beryllium

41/00 Obtaining germanium

43/00 Obtaining mercury

47/00 Obtaining manganese

58/00 Obtaining gallium or indium [2]

59/00 Obtaining rare earth metals

60/00 Obtaining metals of atomic number 87 or higher, i.e. radioactive metals [2]
60/02 . Obtaining thorium, uranium or other actinides **[2]**
60/04 . . Obtaining plutonium **[2]**

61/00 Obtaining metals not elsewhere provided for in this subclass (iron C21) **[2]**

C22C ALLOYS (treatment of alloys C21D, C22F)

Note

In this subclass, the following terms or expressions are used with the meanings indicated:
– "alloys" includes also:
(a) metallic composite materials containing a substantial proportion of fibres or other somewhat larger particles;
(b) ceramic compositions containing free metal bonded to carbides, diamond, oxides, borides, nitrides or silicides, e.g. cermets, or other metal compounds, e.g. oxynitrides or sulfides, other than as macroscopic reinforcing agents. **[4]**
– "based on" requires at least 50% by weight of the specified constituent or of the specified group of constituents. **[2]**

Subclass index

Non-ferrous alloys, i.e. alloys based essentially on metals other than iron [2,5]

Note

Groups C22C 43/00 to C22C 49/00 take precedence over groups C22C 1/00 to C22C 38/00. **[2009.01]**

1/00 Making non-ferrous alloys (by electrothermic methods C22B 4/00; by electrolysis C25C)
1/02 . by melting
1/03 . . using master alloys **[2]**
1/04 . by powder metallurgy (C22C 1/08 takes precedence) **[2]**
1/05 . . Mixtures of metal powder with non-metallic powder (C22C 1/08 takes precedence) **[2]**
1/06 . with the use of special agents for refining or deoxidising
1/08 . Alloys with open or closed pores
1/10 . Alloys containing non-metals (C22C 1/08 takes precedence) **[2]**

3/00 Removing material from non-ferrous alloys to produce alloys of different constitution

5/00 Alloys based on noble metals
5/02 . Alloys based on gold **[2]**
5/04 . Alloys based on a platinum group metal **[2]**
5/06 . Alloys based on silver **[2]**
5/08 . . with copper as the next major constituent **[2]**
5/10 . . with cadmium as the next major constituent **[2]**

7/00 Alloys based on mercury

9/00 Alloys based on copper
9/01 . with aluminium as the next major constituent **[2]**
9/02 . with tin as the next major constituent **[2]**
9/04 . with zinc as the next major constituent **[2]**
9/05 . with manganese as the next major constituent **[2]**
9/06 . with nickel or cobalt as the next major constituent **[2]**
9/08 . with lead as the next major constituent **[2]**
9/10 . with silicon as the next major constituent

11/00 Alloys based on lead
11/02 . with an alkali or an alkaline earth metal as the next major constituent **[2]**
11/04 . with copper as the next major constituent **[2]**
11/06 . with tin as the next major constituent **[2]**

11/08 . with antimony or bismuth as the next major constituent **[2]**
11/10 . . with tin **[2]**

12/00 Alloys based on antimony or bismuth [2]

13/00 Alloys based on tin
13/02 . with antimony or bismuth as the next major constituent **[2]**

14/00 Alloys based on titanium [2]

16/00 Alloys based on zirconium [2]

18/00 Alloys based on zinc [2]
18/02 . with copper as the next major constituent **[2]**
18/04 . with aluminium as the next major constituent **[2]**

19/00 Alloys based on nickel or cobalt
19/03 . based on nickel **[2]**
19/05 . . with chromium **[2]**
19/07 . based on cobalt **[2]**

20/00 Alloys based on cadmium [2]

21/00 Alloys based on aluminium
21/02 . with silicon as the next major constituent **[2]**
21/04 . . Modified aluminium-silicon alloys
21/06 . with magnesium as the next major constituent **[2]**
21/08 . . with silicon **[2]**
21/10 . with zinc as the next major constituent **[2]**
21/12 . with copper as the next major constituent **[2]**

Note

In groups C22C 21/14 to C22C 21/18, in the absence of an indication to the contrary, an alloy is classified in the last appropriate place. **[4]**

21/14 . . with silicon **[2]**
21/16 . . with magnesium **[2]**
21/18 . . with zinc **[2]**

22/00 Alloys based on manganese [2]

23/00 Alloys based on magnesium
23/02 . with aluminium as the next major constituent **[2]**
23/04 . with zinc or cadmium as the next major constituent **[2]**
23/06 . with a rare earth metal as the next major constituent **[2]**

24/00 Alloys based on an alkali or an alkaline earth metal [2]

25/00 Alloys based on beryllium

26/00 Alloys containing diamond [4]

27/00 Alloys based on rhenium or a refractory metal not mentioned in groups C22C 14/00 or C22C 16/00 [2]
27/02 . Alloys based on vanadium, niobium or tantalum **[2]**
27/04 . Alloys based on tungsten or molybdenum **[2]**
27/06 . Alloys based on chromium **[2]**

28/00 Alloys based on a metal not provided for in groups C22C 5/00 to C22C 27/00 [2]

29/00 Alloys based on carbides, oxides, borides, nitrides or silicides, e.g. cermets, or other metal compounds, e. g. oxynitrides, sulfides [4]
29/02 . based on carbides or carbonitrides **[4]**
29/04 . . based on carbonitrides **[4]**
29/06 . . based on carbides, but not containing other metal compounds **[4]**
29/08 . . . based on tungsten carbide **[4]**
29/10 . . . based on titanium carbide **[4]**
29/12 . based on oxides **[4]**
29/14 . based on borides **[4]**
29/16 . based on nitrides **[4]**
29/18 . based on silicides **[4]**

30/00 Alloys containing less than 50% by weight of each constituent [2]

Note

In groups C22C 30/02 to C22C 30/06, in the absence of an indication to the contrary, an alloy is classified in the last appropriate place. **[4]**

30/02 . containing copper **[2]**
30/04 . containing tin or lead **[2]**
30/06 . containing zinc **[2]**

32/00 Non-ferrous alloys containing at least 5% by weight but less than 50% by weight of oxides, carbides, borides, nitrides, silicides or other metal compounds, e.g. oxynitrides, sulfides, whether added as such or formed in situ [2]

Ferrous alloys, i.e. alloys based on iron [2,5]

33/00 Making ferrous alloys (heat treatment thereof C21D 5/00, C21D 6/00)
33/02 . by powder metallurgy
33/04 . by melting **[2]**
33/06 . . using master alloys **[2]**
33/08 . Making cast-iron alloys **[2]**
33/10 . . including procedures for adding magnesium **[2]**
33/12 . . . by fluidised injection **[2]**

35/00 Master alloys for iron or steel

Note

In groups C22C 37/00 and C22C 38/00, in the absence of an indication to the contrary, an alloy is classified in the last appropriate place that provides for one of the alloying components. **[2]**

37/00 Cast-iron alloys [2]
37/04 . containing spheroidal graphite
37/06 . containing chromium **[2]**
37/08 . . with nickel
37/10 . containing aluminium or silicon

38/00 Ferrous alloys, e.g. steel alloys (cast-iron alloys C22C 37/00) **[2]**
38/02 . containing silicon **[2]**
38/04 . containing manganese **[2]**
38/06 . containing aluminium **[2]**
38/08 . containing nickel **[2]**
38/10 . containing cobalt **[2]**
38/12 . containing tungsten, tantalum, molybdenum, vanadium or niobium **[2]**
38/14 . containing titanium or zirconium **[2]**
38/16 . containing copper **[2]**
38/18 . containing chromium **[2]**

38/20 . . with copper **[2]**
38/22 . . with molybdenum or tungsten **[2]**
38/24 . . with vanadium **[2]**
38/26 . . with niobium or tantalum **[2]**
38/28 . . with titanium or zirconium **[2]**
38/30 . . with cobalt **[2]**
38/32 . . with boron **[2]**
38/34 . . with more than 1.5% by weight of silicon **[2]**
38/36 . . with more than 1.7% by weight of carbon **[2]**
38/38 . . with more than 1.5% by weight of manganese **[2]**
38/40 . . with nickel **[2]**
38/42 . . . with copper **[2]**
38/44 . . . with molybdenum or tungsten **[2]**
38/46 . . . with vanadium **[2]**
38/48 . . . with niobium or tantalum **[2]**
38/50 . . . with titanium or zirconium **[2]**
38/52 . . . with cobalt **[2]**
38/54 . . . with boron **[2]**
38/56 . . . with more than 1.7% by weight of carbon **[2]**
38/58 . . . with more than 1.5% by weight of manganese **[2]**
38/60 . containing lead, selenium, tellurium or antimony, or more than 0.04% by weight of sulfur **[2]**

43/00 Alloys containing radioactive materials [2]

45/00 Amorphous alloys [5]
45/02 . with iron as the major constituent **[5]**
45/04 . with nickel or cobalt as the major constituent **[5]**
45/06 . with beryllium as the major constituent **[5]**
45/08 . with aluminium as the major constituent **[5]**
45/10 . with molybdenum, tungsten, niobium, tantalum, titanium, or zirconium as the major constituent **[5]**

Alloys containing fibres or filaments [7]

Note

In groups C22C 47/00 and C22C 49/00, it is desirable to add the indexing codes of groups C22C 101/00, C22C 111/00 and C22C 121/00. **[7]**

47/00 Making alloys containing metallic or non-metallic fibres or filaments [7]
47/02 . Pretreatment of the fibres or filaments **[7]**
47/04 . . by coating, e.g. with a protective or activated covering **[7]**
47/06 . . by forming the fibres or filaments into a preformed structure, e.g. using a temporary binder to form a mat-like element **[7]**
47/08 . by contacting the fibres or filaments with molten metal, e.g. by infiltrating the fibres or filaments placed in a mould **[7]**
47/10 . . Infiltration in the presence of a reactive atmosphere; Reactive infiltration **[7]**
47/12 . . Infiltration or casting under mechanical pressure **[7]**
47/14 . by powder metallurgy, i.e. by processing mixtures of metal powder and fibres or filaments **[7]**
47/16 . by thermal spraying of the metal, e.g. plasma spraying **[7]**
47/18 . . using a preformed structure of fibres or filaments **[7]**
47/20 . by subjecting to pressure and heat an assembly comprising at least one metal layer or sheet and one layer of fibres or filaments **[7]**

49/00 Alloys containing metallic or non-metallic fibres or filaments [7]
49/02 . characterised by the matrix material **[7]**
49/04 . . Light metals **[7]**
49/06 . . . Aluminium **[7]**
49/08 . . Iron group metals **[7]**
49/10 . . Refractory metals **[7]**
49/11 . . . Titanium **[7]**
49/12 . . Intermetallic matrix material **[7]**
49/14 . characterised by the fibres or filaments **[7]**

Indexing scheme associated with groups C22C 47/00 and C22C 49/00, relating to the nature of the fibrous materials contained in metal-fibrous composites. [7]

101/00 Non-metallic fibres or filaments [7]
101/02 . based on oxides, e.g. oxide ceramic fibres **[7]**
101/04 . . Aluminium oxide **[7]**
101/06 . . Mixed oxides, e.g. aluminium silicate or glass **[7]**
101/08 . based on non-oxides, e.g. non-oxide ceramic fibres **[7]**
101/10 . . Carbon **[7]**
101/12 . . Carbides **[7]**
101/14 . . . Silicon carbide **[7]**
101/16 . . Nitrides **[7]**
101/18 . . . Silicon nitride **[7]**
101/20 . . Boron **[7]**
101/22 . . Borides **[7]**

111/00 Metallic fibres or filaments [7]
111/02 . Refractory metal fibres or filaments, e.g. tungsten fibres **[7]**

121/00 Pretreated fibres or filaments [7]
121/02 . Coated fibres or filaments, e.g. ceramic fibres with protective coatings **[7]**

C22F CHANGING THE PHYSICAL STRUCTURE OF NON-FERROUS METALS OR NON-FERROUS ALLOYS (general methods or devices for heat treatment of ferrous or non-ferrous metals or alloys C21D; surface treatment of metallic material involving at least one process provided for in class C23 and at least one process covered by this subclass C23F 17/00)

1/00 Changing the physical structure of non-ferrous metals or alloys by heat treatment or by hot or cold working
1/02 . in inert or controlled atmosphere or vacuum
1/04 . of aluminium or alloys based thereon
1/043 . . of alloys with silicon as the next major constituent **[4]**
1/047 . . of alloys with magnesium as the next major constituent **[4]**

1/05 . . of alloys of the Al-Si-Mg type, i.e. containing silicon and magnesium in approximately equal proportions **[4]**

1/053 . . of alloys with zinc as the next major constituent **[4]**

1/057 . . of alloys with copper as the next major constituent **[4]**

1/06 . of magnesium or alloys based thereon

1/08 . of copper or alloys based thereon

1/10 . of nickel or cobalt or alloys based thereon

1/11 . of chromium or alloys based thereon

1/12 . of lead or alloys based thereon

1/14 . of noble metals or alloys based thereon

1/16 . of other metals or alloys based thereon

1/18 . . High-melting or refractory metals or alloys based thereon

3/00 Changing the physical structure of non-ferrous metals or alloys by special physical methods, e.g. treatment with neutrons

3/02 . by solidifying a melt controlled by supersonic waves or electric or magnetic fields

C23 COATING METALLIC MATERIAL; COATING MATERIAL WITH METALLIC MATERIAL; CHEMICAL SURFACE TREATMENT; DIFFUSION TREATMENT OF METALLIC MATERIAL; COATING BY VACUUM EVAPORATION, BY SPUTTERING, BY ION IMPLANTATION OR BY CHEMICAL VAPOUR DEPOSITION, IN GENERAL; INHIBITING CORROSION OF METALLIC MATERIAL OR INCRUSTATION IN GENERAL [2]

Note

In this class, the following expression is used with the meaning indicated:
– "metallic material" covers:
(a) metals; **[4]**
(b) alloys (attention is drawn to the Note following the title of subclass C22C).

C23C COATING METALLIC MATERIAL; COATING MATERIAL WITH METALLIC MATERIAL; SURFACE TREATMENT OF METALLIC MATERIAL BY DIFFUSION INTO THE SURFACE, BY CHEMICAL CONVERSION OR SUBSTITUTION; COATING BY VACUUM EVAPORATION, BY SPUTTERING, BY ION IMPLANTATION OR BY CHEMICAL VAPOUR DEPOSITION, IN GENERAL (applying liquids or other fluent materials to surfaces in general B05; making metal-coated products by extrusion B21C 23/22; covering with metal by connecting pre-existing layers to articles, see the relevant places, e.g. B21D 39/00, B23K; working of metal by the action of a high concentration of electric current on a workpiece using an electrode B23H; metallising of glass C03C; metallising mortars, concrete, artificial stone, ceramics or natural stone C04B 41/00; paints, varnishes, lacquers C09D; enamelling of, or applying a vitreous layer to, metals C23D; inhibiting corrosion of metallic material or incrustation in general C23F; treating metal surfaces or coating of metals by electrolysis or electrophoresis C25D, C25F; single-crystal film growth C30B; by metallising textiles D06M 11/83; decorating textiles by locally metallising D06Q 1/04; details of scanning-probe apparatus, in general G01Q; manufacture of semiconductor devices H01L; manufacture of printed circuits H05K) **[4]**

Note

In this subclass, an operation is considered as pretreatment or after-treatment when it is specially adapted for, but quite distinct from, the coating process concerned and constitutes an independent operation. If an operation results in the formation of a permanent sub- or upper layer, it is not considered as pretreatment or after-treatment and is classified as a multi-coating process. **[4]**

Subclass index

Coating by applying the coating material in the molten state [4]

2/00 Hot-dipping or immersion processes for applying the coating material in the molten state without affecting the shape; Apparatus therefor [4]

2/02 . Pretreatment of the material to be coated, e.g. for coating on selected surface areas (C23C 2/30 takes precedence) **[4]**
2/04 . characterised by the coating material **[4]**
2/06 . . Zinc or cadmium or alloys based thereon **[4]**
2/08 . . Tin or alloys based thereon **[4]**
2/10 . . Lead or alloys based thereon **[4]**
2/12 . . Aluminium or alloys based thereon **[4]**
2/14 . Removing excess of molten coatings; Controlling or regulating the coating thickness (controlling or regulating thickness in general G05D 5/02) **[4]**
2/16 . . using fluids under pressure, e.g. air knives **[4]**
2/18 . . . Removing excess of molten coatings from elongated material **[4]**
2/20 . . . . Strips; Plates **[4]**
2/22 . . by rubbing, e.g. using knives **[4]**
2/24 . . using magnetic or electric fields **[4]**
2/26 . After-treatment (C23C 2/14 takes precedence) **[4]**
2/28 . . Thermal after-treatment, e.g. treatment in oil bath **[4]**
2/30 . Fluxes or coverings on molten baths (C23C 2/22 takes precedence) **[4]**
2/32 . using vibratory energy applied to the bath or substrate (C23C 2/14 takes precedence) **[4]**
2/34 . characterised by the shape of the material to be treated (C23C 2/14 takes precedence) **[4]**
2/36 . . Elongated material **[4]**
2/38 . . . Wires; Tubes **[4]**
2/40 . . . Plates; Strips **[4]**

4/00 Coating by spraying the coating material in the molten state, e.g. by flame, plasma or electric discharge (built-up welding B23K, e.g. B23K 5/18, B23K 9/04; spraying guns B05B; making alloys containing fibres or filaments by thermal spraying of metal C22C 47/16; plasma guns H05H) **[4]**

4/02 . Pretreatment of the material to be coated, e.g. for coating on selected surface areas **[4]**
4/04 . characterised by the coating material **[4]**

4/06 . . Metallic material **[4]**
4/08 . . . containing only metal elements **[4]**
4/10 . . Oxides, borides, carbides, nitrides, silicides or mixtures thereof **[4]**
4/12 . characterised by the method of spraying **[4]**
4/14 . . for covering elongated material **[4]**
4/16 . . . Wires; Tubes **[4]**
4/18 . After-treatment **[4]**

6/00 Coating by casting molten material on the substrate [4]

Solid state diffusion into metallic material surfaces [4]

8/00 Solid state diffusion of only non-metal elements into metallic material surfaces (diffusion of silicon C23C 10/00); **Chemical surface treatment of metallic material by reaction of the surface with a reactive gas, leaving reaction products of surface material in the coating, e.g. conversion coatings, passivation of metals** (C23C 14/00 takes precedence) **[4]**
8/02 . Pretreatment of the material to be coated (C23C 8/04 takes precedence) **[4]**
8/04 . Treatment of selected surface areas, e.g. using masks **[4]**
8/06 . using gases **[4]**
8/08 . . only one element being applied **[4]**
8/10 . . . Oxidising **[4]**
8/12 . . . . using elemental oxygen or ozone **[4]**
8/14 . . . . . Oxidising of ferrous surfaces **[4]**
8/16 . . . . using oxygen-containing compounds, e.g. H_2O, CO_2 **[4]**
8/18 . . . . . Oxidising of ferrous surfaces **[4]**
8/20 . . . Carburising **[4]**
8/22 . . . . of ferrous surfaces **[4]**
8/24 . . . Nitriding **[4]**
8/26 . . . . of ferrous surfaces **[4]**
8/28 . . more than one element being applied in one step **[4]**
8/30 . . . Carbo-nitriding **[4]**
8/32 . . . . of ferrous surfaces **[4]**
8/34 . . more than one element being applied in more than one step **[4]**
8/36 . . using ionised gases, e.g. ionitriding (discharge tubes with provision for introducing objects or material to be exposed to the discharge H01J 37/00) **[4]**
8/38 . . . Treatment of ferrous surfaces **[4]**
8/40 . using liquids, e.g. salt baths, liquid suspensions **[4]**
8/42 . . only one element being applied **[4]**
8/44 . . . Carburising **[4]**
8/46 . . . . of ferrous surfaces **[4]**
8/48 . . . Nitriding **[4]**
8/50 . . . . of ferrous surfaces **[4]**
8/52 . . more than one element being applied in one step **[4]**
8/54 . . . Carbo-nitriding **[4]**
8/56 . . . . of ferrous surfaces **[4]**
8/58 . . more than one element being applied in more than one step **[4]**
8/60 . using solids, e.g. powders, pastes (using liquid suspensions of solids C23C 8/40) **[4]**
8/62 . . only one element being applied **[4]**
8/64 . . . Carburising **[4]**
8/66 . . . . of ferrous surfaces **[4]**
8/68 . . . Boronising **[4]**
8/70 . . . . of ferrous surfaces **[4]**
8/72 . . more than one element being applied in one step **[4]**
8/74 . . . Carbo-nitriding **[4]**
8/76 . . . . of ferrous surfaces **[4]**
8/78 . . more than one element being applied in more than one step **[4]**
8/80 . After-treatment **[4]**

10/00 Solid state diffusion of only metal elements or silicon into metallic material surfaces [4]
10/02 . Pretreatment of the material to be coated (C23C 10/04 takes precedence) **[4]**
10/04 . Diffusion into selected surface areas, e.g. using masks **[4]**
10/06 . using gases **[4]**
10/08 . . only one element being diffused **[4]**
10/10 . . . Chromising **[4]**
10/12 . . . . of ferrous surfaces **[4]**
10/14 . . more than one element being diffused in one step **[4]**
10/16 . . more than one element being diffused in more than one step **[4]**
10/18 . using liquids, e.g. salt baths, liquid suspensions **[4]**
10/20 . . only one element being diffused **[4]**
10/22 . . . Metal melt containing the element to be diffused **[4]**
10/24 . . . Salt bath containing the element to be diffused **[4]**
10/26 . . more than one element being diffused **[4]**
10/28 . using solids, e.g. powders, pastes **[4]**
10/30 . . using a layer of powder or paste on the surface (using liquid suspensions of solids C23C 10/18) **[4]**
10/32 . . . Chromising **[4]**
10/34 . . Embedding in a powder mixture, i.e. pack cementation **[4]**
10/36 . . . only one element being diffused **[4]**
10/38 . . . . Chromising **[4]**
10/40 . . . . . of ferrous surfaces **[4]**
10/42 . . . . . in the presence of volatile transport additives, e.g. halogenated substances **[4]**
10/44 . . . . Siliconising **[4]**
10/46 . . . . . of ferrous surfaces **[4]**
10/48 . . . . Aluminising **[4]**
10/50 . . . . . of ferrous surfaces **[4]**
10/52 . . . more than one element being diffused in one step **[4]**
10/54 . . . . Diffusion of at least chromium **[4]**
10/56 . . . . . and at least aluminium **[4]**
10/58 . . . more than one element being diffused in more than one step **[4]**
10/60 . After-treatment **[4]**

12/00 Solid state diffusion of at least one non-metal element other than silicon and at least one metal element or silicon into metallic material surfaces [4]
12/02 . Diffusion in one step **[4]**

Coating by vacuum evaporation, by sputtering or by ion implantation [4]

14/00 Coating by vacuum evaporation, by sputtering or by ion implantation of the coating forming material (discharge tubes with provision for introducing objects or material to be exposed to the discharge H01J 37/00) **[4]**

14/02 . Pretreatment of the material to be coated (C23C 14/04 takes precedence) **[4]**

14/04 . Coating on selected surface areas, e.g. using masks **[4]**

14/06 . characterised by the coating material (C23C 14/04 takes precedence) **[4]**

14/08 . . Oxides (C23C 14/10 takes precedence) **[4]**

14/10 . . Glass or silica **[4]**

14/12 . . Organic material **[4]**

14/14 . . Metallic material, boron or silicon **[4]**

14/16 . . . on metallic substrates or on substrates of boron or silicon **[4]**

14/18 . . . on other inorganic substrates **[4]**

14/20 . . . on organic substrates **[4]**

14/22 . characterised by the process of coating **[4]**

14/24 . . Vacuum evaporation **[4]**

14/26 . . . by resistance or inductive heating of the source **[4]**

14/28 . . . by wave energy or particle radiation (C23C 14/32 to C23C 14/48 take precedence) **[4]**

14/30 . . . . by electron bombardment **[4]**

14/32 . . . by explosion; by evaporation and subsequent ionisation of the vapours (C23C 14/34 to C23C 14/48 take precedence) **[4]**

14/34 . . Sputtering **[4]**

14/35 . . . by application of a magnetic field, e.g. magnetron sputtering **[5]**

14/36 . . . Diode sputtering (C23C 14/35 takes precedence) **[4,5]**

14/38 . . . . by direct current glow discharge **[4]**

14/40 . . . . with alternating current discharge, e.g. high-frequency discharge **[4]**

14/42 . . . Triode sputtering (C23C 14/35 takes precedence) **[4,5]**

14/44 . . . . by application of high frequencies and additional direct voltages **[4]**

14/46 . . . by ion beam produced by an external ion source (C23C 14/40 takes precedence) **[4]**

14/48 . . Ion implantation **[4]**

14/50 . . Substrate holders **[4]**

14/52 . . Means for observation of the coating process **[4]**

14/54 . . Controlling or regulating the coating process (controlling or regulating in general G05) **[4]**

14/56 . . Apparatus specially adapted for continuous coating; Arrangements for maintaining the vacuum, e.g. vacuum locks **[4]**

14/58 . After-treatment **[4]**

Chemical deposition or plating by decomposition; **Contact plating [4]**

16/00 Chemical coating by decomposition of gaseous compounds, without leaving reaction products of surface material in the coating, i.e. chemical vapour deposition (CVD) processes (reactive sputtering or vacuum evaporation C23C 14/00) **[4]**

16/01 . on temporary substrates, e.g. on substrates subsequently removed by etching **[7]**

16/02 . Pretreatment of the material to be coated (C23C 16/04 takes precedence) **[4]**

16/04 . Coating on selected surface areas, e.g. using masks **[4]**

16/06 . characterised by the deposition of metallic material **[4]**

16/08 . . from metal halides **[4]**

16/10 . . . Deposition of chromium only **[4]**

16/12 . . . Deposition of aluminium only **[4]**

16/14 . . . Deposition of only one other metal element **[4]**

16/16 . . from metal carbonyl compounds **[4]**

16/18 . . from metallo-organic compounds **[4]**

16/20 . . . Deposition of aluminium only **[4]**

16/22 . characterised by the deposition of inorganic material, other than metallic material **[4]**

16/24 . . Deposition of silicon only **[4]**

16/26 . . Deposition of carbon only **[4]**

16/27 . . . Diamond only **[7]**

16/28 . . Deposition of only one other non-metal element **[4]**

16/30 . . Deposition of compounds, mixtures or solid solutions, e.g. borides, carbides, nitrides **[4]**

16/32 . . . Carbides **[4]**

16/34 . . . Nitrides **[4]**

16/36 . . . Carbo-nitrides **[4]**

16/38 . . . Borides **[4]**

16/40 . . . Oxides **[4]**

16/42 . . . Silicides **[4]**

16/44 . characterised by the method of coating (C23C 16/04 takes precedence) **[4]**

16/442 . . using fluidised bed processes **[7]**

16/448 . . characterised by the method used for generating reactive gas streams, e.g. by evaporation or sublimation of precursor materials **[7]**

16/452 . . . by activating reactive gas streams before introduction into the reaction chamber, e.g. by ionization or by addition of reactive species **[7]**

16/453 . . passing the reaction gases through burners or torches, e.g. atmospheric pressure CVD (C23C 16/513 takes precedence; for flame or plasma spraying of coating material in the molten state C23C 4/00) **[7]**

16/455 . . characterised by the method used for introducing gases into the reaction chamber or for modifying gas flows in the reaction chamber **[7]**

16/458 . . characterised by the method used for supporting substrates in the reaction chamber **[7]**

16/46 . . characterised by the method used for heating the substrate (C23C 16/48, C23C 16/50 take precedence) **[4]**

16/48 . . by irradiation, e.g. photolysis, radiolysis, particle radiation **[4]**

16/50 . . using electric discharges **[4]**

16/503 . . . using dc or ac discharges **[7]**

16/505 . . . using radio frequency discharges **[7]**

16/507 . . . . using external electrodes, e.g. in tunnel type reactors **[7]**

16/509 . . . . using internal electrodes **[7]**

16/511 . . . using microwave discharges **[7]**

16/513 . . . using plasma jets **[7]**

16/515 . . . using pulsed discharges **[7]**

16/517 . . . using a combination of discharges covered by two or more of groups C23C 16/503 to C23C 16/515 **[7]**

16/52 . . Controlling or regulating the coating process (controlling or regulating in general G05) **[4]**

16/54 . . Apparatus specially adapted for continuous coating **[4]**

16/56 . After-treatment **[4]**

18/00 Chemical coating by decomposition of either liquid compounds or solutions of the coating forming compounds, without leaving reaction products of surface material in the coating (chemical surface reaction C23C 8/00, C23C 22/00); **Contact plating [4]**

Note

This group covers also suspensions containing reactive liquids and non-reactive solid particles. **[4]**

18/02 . by thermal decomposition **[4]**
18/04 . . Pretreatment of the material to be coated (C23C 18/06 takes precedence) **[4]**
18/06 . . Coating on selected surface areas, e.g. using masks **[4]**
18/08 . . characterised by the deposition of metallic material **[4]**
18/10 . . . Deposition of aluminium only **[4]**
18/12 . . characterised by the deposition of inorganic material other than metallic material **[4]**
18/14 . Decomposition by irradiation, e.g. photolysis, particle radiation **[4]**
18/16 . by reduction or substitution, i.e. electroless plating (C23C 18/54 takes precedence) **[4]**
18/18 . . Pretreatment of the material to be coated **[4]**
18/20 . . . of organic surfaces, e.g. resins **[4]**
18/22 . . . . Roughening, e.g. by etching **[4]**
18/24 . . . . . using acid aqueous solutions **[4]**
18/26 . . . . . using organic liquids **[4]**
18/28 . . . . Sensitising or activating **[4]**
18/30 . . . . . Activating **[4]**
18/31 . . Coating with metals **[5]**
18/32 . . . Coating with one of iron, cobalt or nickel; Coating with mixtures of phosphorus or boron with one of these metals **[4,5]**
18/34 . . . . using reducing agents **[4,5]**
18/36 . . . . . using hypophosphites **[4,5]**
18/38 . . . Coating with copper **[4,5]**
18/40 . . . . using reducing agents **[4,5]**
18/42 . . . Coating with noble metals **[4,5]**
18/44 . . . . using reducing agents **[4,5]**
18/48 . . Coating with alloys **[4,5]**
18/50 . . . with alloys based on iron, cobalt or nickel (C23C 18/32 takes precedence) **[4,5]**
18/52 . . using reducing agents for coating with metallic material not provided for in a single one of groups C23C 18/32 to C23C 18/50 **[4]**
18/54 . Contact plating, i.e. electroless electrochemical plating **[4]**

20/00 Chemical coating by decomposition of either solid compounds or suspensions of the coating forming compounds, without leaving reaction products of surface material in the coating (chemical surface reaction C23C 8/00, C23C 22/00) **[4]**

Note

This group covers also suspensions containing non-reactive liquids and reactive solid particles. **[4]**

20/02 . Coating with metallic material **[4]**
20/04 . . with metals **[4]**
20/06 . Coating with inorganic material, other than metallic material **[4]**
20/08 . . with compounds, mixtures or solid solutions, e.g. borides, carbides, nitrides **[4]**

22/00 Chemical surface treatment of metallic material by reaction of the surface with a reactive liquid, leaving reaction products of surface material in the coating, e.g. conversion coatings, passivation of metals (wash primers C09D 5/12) **[4]**

(1) This group covers also suspensions containing reactive liquids and non-reactive solid particles. **[4]**
(2) Rejuvenating of the bath is classified in the appropriate place for the specific bath composition. **[4]**

Note

In groups C23C 22/02 to C23C 22/86, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[4]**

22/02 . using non-aqueous solutions **[4]**
22/03 . . containing phosphorus compounds **[4]**
22/04 . . containing hexavalent chromium compounds **[4]**
22/05 . using aqueous solutions **[5]**
22/06 . . using aqueous acidic solutions with pH < 6 **[4,5]**
22/07 . . . containing phosphates **[4,5]**
22/08 . . . . Orthophosphates **[4,5]**
22/10 . . . . . containing oxidants **[4,5]**
22/12 . . . . . containing zinc cations **[4,5]**
22/13 . . . . . containing also nitrate or nitrite anions **[4,5]**
22/14 . . . . . containing also chlorate anions **[4,5]**
22/16 . . . . . containing also peroxy-compounds **[4,5]**
22/17 . . . . . containing also organic acids **[4,5]**
22/18 . . . . . containing manganese cations **[4,5]**
22/20 . . . . . containing aluminium cations **[4,5]**
22/22 . . . . . containing alkaline earth metal cations **[4,5]**
22/23 . . . . Condensed phosphates **[4,5]**
22/24 . . . containing hexavalent chromium compounds **[4,5]**
22/26 . . . . containing also organic compounds **[4,5]**
22/27 . . . . . Acids **[4,5]**
22/28 . . . . . Macromolecular compounds **[4,5]**
22/30 . . . . containing also trivalent chromium **[4,5]**
22/32 . . . . containing also pulverulent metals **[4,5]**
22/33 . . . . containing also phosphates **[4,5]**
22/34 . . . containing fluorides or complex fluorides **[4,5]**
22/36 . . . . containing also phosphates **[4,5]**
22/37 . . . . containing also hexavalent chromium compounds **[4,5]**
22/38 . . . . . containing also phosphates **[4,5]**
22/40 . . . containing molybdates, tungstates or vanadates **[4,5]**
22/42 . . . . containing also phosphates **[4,5]**
22/43 . . . . containing also hexavalent chromium compounds **[4,5]**
22/44 . . . . containing also fluorides or complex fluorides **[4,5]**
22/46 . . . containing oxalates **[4,5]**
22/47 . . . . containing also phosphates **[4,5]**

22/48 . . . not containing phosphates, hexavalent chromium compounds, fluorides or complex fluorides, molybdates, tungstates, vanadates or oxalates **[4,5]**
22/50 . . . . Treatment of iron or alloys based thereon **[4,5]**
22/52 . . . . Treatment of copper or alloys based thereon **[4,5]**
22/53 . . . . Treatment of zinc or alloys based thereon **[4,5]**
22/54 . . . . Treatment of refractory metals or alloys based thereon **[4,5]**
22/56 . . . . Treatment of aluminium or alloys based thereon **[4,5]**
22/57 . . . . Treatment of magnesium or alloys based thereon **[4,5]**
22/58 . . . . Treatment of other metallic material **[4,5]**
22/60 . . using alkaline aqueous solutions with pH > 8 **[4,5]**
22/62 . . . Treatment of iron or alloys based thereon **[4,5]**
22/63 . . . Treatment of copper or alloys based thereon **[4,5]**
22/64 . . . Treatment of refractory metals or alloys based thereon **[4,5]**
22/66 . . . Treatment of aluminium or alloys based thereon **[4,5]**
22/67 . . . . with solutions containing hexavalent chromium **[4,5]**
22/68 . . using aqueous solutions with pH between 6 and 8 **[4,5]**
22/70 . using melts **[4]**
22/72 . . Treatment of iron or alloys based thereon **[4]**
22/73 . characterised by the process **[4]**
22/74 . . for obtaining burned-in conversion coatings **[4]**
22/76 . . Applying the liquid by spraying **[4]**
22/77 . . Controlling or regulating of the coating process (controlling or regulating in general G05) **[4]**
22/78 . Pretreatment of the material to be coated **[4]**
22/80 . . with solutions containing titanium or zirconium compounds **[4]**
22/82 . After-treatment **[4]**
22/83 . . Chemical after-treatment **[4]**
22/84 . . Dyeing **[4]**
22/86 . Regeneration of coating baths **[4]**

24/00 Coating starting from inorganic powder (spraying of the coating material in molten state C23C 4/00; solid state diffusion C23C 8/00 to C23C 12/00; manufacture of composite layers, workpieces or articles by sintering metallic powder B22F 7/00; friction welding B23K 20/12) **[4]**
24/02 . by application of pressure only **[4]**
24/04 . . Impact or kinetic deposition of particles **[4]**
24/06 . . Compressing powdered coating material, e.g. by milling **[4]**
24/08 . by application of heat or pressure and heat (C23C 24/04 takes precedence) **[4]**
24/10 . . with intermediate formation of a liquid phase in the layer **[4]**

26/00 Coating not provided for in groups C23C 2/00 to C23C 24/00 [4]
26/02 . applying molten material to the substrate (applying melts to surfaces, in general B05) **[4]**

28/00 Coating for obtaining at least two superposed coatings either by methods not provided for in a single one of main groups C23C 2/00 to C23C 26/00, or by combinations of methods provided for in subclasses C23C and C25C or C25D [4]
28/02 . only coatings of metallic material **[4]**
28/04 . only coatings of inorganic non-metallic material **[4]**

30/00 Coating with metallic material characterised only by the composition of the metallic material, i.e. not characterised by the coating process (C23C 26/00, C23C 28/00 take precedence) **[4]**

C23D ENAMELLING OF, OR APPLYING A VITREOUS LAYER TO, METALS (chemical composition of the enamels C03C)

Subclass index

1/00 Melting or fritting the enamels; **Apparatus or furnaces therefor**
1/02 . Granulating the melt; Drying the granules

Coating with the enamels

3/00 Chemical treatment of the metal surfaces prior to coating (cleaning or de-greasing of metallic objects C23G)

5/00 Coating with enamels or vitreous layers [4]
5/02 . by wet methods
5/04 . by dry methods
5/06 . producing designs or letters
5/08 . Applying enamels non-uniformly over the surface

7/00 Treating the coatings, e.g. drying before burning

Firing the enamels

9/00 Ovens specially adapted for firing enamels
9/02 . Non-electric muffle furnaces
9/04 . Non-electric tunnel ovens
9/06 . Electric furnaces
9/08 . Supporting devices for burning-bars
9/10 . Loading or unloading devices

11/00 Continuous processes for firing enamels; **Apparatus therefor**

After-treatment

13/00 After-treatment of the enamelled articles

13/02 . Removing defects by local re-melting of the enamel; Adjusting the shape

15/00 Joining enamelled articles to other enamelled articles by processes involving an enamelling step

17/00 De-enamelling

C23F NON-MECHANICAL REMOVAL OF METALLIC MATERIAL FROM SURFACES (working of metal by electro-erosion B23H; desurfacing by applying flames B23K 7/00; working metal by laser beam B23K 26/00; producing decorative effects by removing surface-material, e.g. by engraving, by etching, B44C 1/22); **INHIBITING CORROSION OF METALLIC MATERIAL**; **INHIBITING INCRUSTATION IN GENERAL** (treating metal surfaces or coating of metals by electrolysis or electrophoresis C25D, C25F); **MULTI-STEP PROCESSES FOR SURFACE TREATMENT OF METALLIC MATERIAL INVOLVING AT LEAST ONE PROCESS PROVIDED FOR IN CLASS C23 AND AT LEAST ONE PROCESS COVERED BY SUBCLASS C21D OR C22F OR CLASS C25** (inhibition or prevention of corrosion or incrustation during processing of hydrocarbons C10G 7/10, C10G 9/16, C10G 75/00) **[4]**

(1) This subclass covers inhibiting corrosion or incrustation in general, whether of or on metallic or non-metallic surfaces, subject to Note (2) below.

(2) This subclass does not cover:
- protective layers or coating compositions or methods of applying them; these are classified in the appropriate places, e.g. B05, B44, C09D, C10M, C23C;
- mechanical devices or constructional features of particular articles for inhibiting incrustation; these are classified in the appropriate places, e.g. in pipes or pipe fittings F16L 58/00;
- articles characterised by being made of materials selected for their properties of resistance to corrosion or incrustation; these are classified in the appropriate places, e.g. turbine blades F01D 5/28.

(3) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

1/00 Etching metallic material by chemical means (manufacture of printing surfaces B41C; manufacture of printed circuits H05K) **[2]**

1/02 . Local etching
1/04 . . Chemical milling
1/06 . Sharpening files
1/08 . Apparatus, e.g. for photomechanical printing surfaces (photomechanical reproduction G03F)
1/10 . Etching compositions (C23F 1/44 takes precedence) **[4]**
1/12 . . Gaseous compositions **[4]**
1/14 . . Aqueous compositions **[4]**
1/16 . . . Acidic compositions (C23F 1/42 takes precedence) **[4]**
1/18 . . . . for etching copper or alloys thereof **[4]**
1/20 . . . . for etching aluminium or alloys thereof **[4]**
1/22 . . . . for etching magnesium or alloys thereof **[4]**
1/24 . . . . for etching silicon or germanium **[4]**
1/26 . . . . for etching refractory metals **[4]**
1/28 . . . . for etching iron group metals **[4]**
1/30 . . . . for etching other metallic material **[4]**
1/32 . . . Alkaline compositions (C23F 1/42 takes precedence) **[4]**
1/34 . . . . for etching copper or alloys thereof **[4]**
1/36 . . . . for etching aluminium or alloys thereof **[4]**
1/38 . . . . for etching refractory metals **[4]**
1/40 . . . . for etching other metallic material **[4]**
1/42 . . . containing a dispersed water-immiscible liquid **[4]**
1/44 . Compositions for etching metallic material from a metallic material substrate of different composition **[4]**
1/46 . Regeneration of etching compositions **[4]**

3/00 Brightening metals by chemical means [2]

3/02 . Light metals
3/03 . . with acidic solutions **[4]**
3/04 . Heavy metals
3/06 . . with acidic solutions **[4]**

4/00 Processes for removing metallic material from surfaces, not provided for in group C23F 1/00 or C23F 3/00 [4]

4/02 . by evaporation **[4]**
4/04 . by physical dissolution **[4]**

11/00 Inhibiting corrosion of metallic material by applying inhibitors to the surface in danger of corrosion or adding them to the corrosive agent (compositions for in situ inhibition of corrosion in boreholes or wells C09K 8/54; adding inhibitors to mineral oils, fuels or lubricants C10; adding inhibitors to pickling solutions C23G)

11/02 . in air or gases by adding vapour phase inhibitors

11/04 . in markedly acid liquids
11/06 . in markedly alkaline liquids
11/08 . in other liquids
11/10 . . using organic inhibitors

Note

In groups C23F 11/12 to C23F 11/173 in the absence of an indication to the contrary, a compound is classified in the last appropriate place.

11/12 . . . Oxygen-containing compounds
11/14 . . . Nitrogen-containing compounds
11/16 . . . Sulfur-containing compounds
11/167 . . . Phosphorus-containing compounds **[4]**
11/173 . . . Macromolecular compounds **[4]**
11/18 . . using inorganic inhibitors

13/00 Inhibiting corrosion of metals by anodic or cathodic protection
13/02 . cathodic; Selection of conditions, parameters or procedures for cathodic protection, e.g. of electrical conditions **[5]**
13/04 . . Controlling or regulating desired parameters **[5]**
13/06 . . Constructional parts, or assemblies of cathodic-protection apparatus **[5]**
13/08 . . . Electrodes specially adapted for inhibiting corrosion by cathodic protection; Manufacture thereof; Conducting electric current thereto **[5]**
13/10 . . . . Electrodes characterised by the structure (C23F 13/16 takes precedence) **[5]**
13/12 . . . . Electrodes characterised by the material (C23F 13/16 takes precedence) **[5]**
13/14 . . . . . Material for sacrificial anodes **[5]**
13/16 . . . . Electrodes characterised by the combination of the structure and the material **[5]**
13/18 . . . . Means for supporting electrodes **[5]**
13/20 . . . . Conducting electric current to electrodes **[5]**
13/22 . . . . Monitoring arrangements therefor **[5]**

14/00 Inhibiting incrustation in apparatus for heating liquids for physical or chemical purposes (adding scale preventives or removers to water C02F 5/00) **[2]**
14/02 . by chemical means

15/00 Other methods of preventing corrosion or incrustation

17/00 Multi-step processes for surface treatment of metallic material involving at least one process provided for in class C23 and at least one process covered by subclass C21D or C22F or class C25 (C23C 28/00 takes precedence) **[4]**

C23G CLEANING OR DE-GREASING OF METALLIC MATERIAL BY CHEMICAL METHODS OTHER THAN ELECTROLYSIS (polishing compositions C09G; detergents in general C11D)

Note

Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

1/00 Cleaning or pickling metallic material with solutions or molten salts (with organic solvents C23G 5/02)
1/02 . with acid solutions
1/04 . . using inhibitors
1/06 . . . organic inhibitors
1/08 . . Iron or steel
1/10 . . Other heavy metals
1/12 . . Light metals
1/14 . with alkaline solutions
1/16 . . using inhibitors
1/18 . . . Organic inhibitors
1/19 . . Iron or steel **[4]**
1/20 . . Other heavy metals **[4]**
1/22 . . Light metals
1/24 . with neutral solutions
1/26 . . using inhibitors
1/28 . with molten salts
1/30 . . using inhibitors
1/32 . . Heavy metals
1/34 . . Light metals
1/36 . Regeneration of waste pickling liquors

3/00 Apparatus for cleaning or pickling metallic material (with organic solvents C23G 5/04)
3/02 . for cleaning wires, strips, filaments continuously
3/04 . for cleaning pipes

5/00 Cleaning or de-greasing metallic material by other methods; **Apparatus for cleaning or de-greasing metallic material with organic solvents**

Note

In groups C23G 5/02 to C23G 5/06, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[4]**

5/02 . using organic solvents
5/024 . . containing hydrocarbons **[4]**
5/028 . . containing halogenated hydrocarbons **[4]**
5/032 . . containing oxygen-containing compounds **[4]**
5/036 . . . having also nitrogen **[4]**
5/04 . . Apparatus
5/06 . using emulsions **[4]**

C25 ELECTROLYTIC OR ELECTROPHORETIC PROCESSES; APPARATUS THEREFOR [4]

(1) Electrolytic or electrophoretic processes or apparatus or operational features are classified
(i) in the groups for the compounds or articles produced, and
(ii) in the groups which cover the apparatus or operational features. **[2]**

(2) The electrolytic or electrophoretic purification of materials is classified according to the nature of the liquid in the relevant places, e.g. A01K 63/00, C02F 1/46, C25B 15/08, C25D 21/16, C25F 7/02. **[2]**

Class index

C25B ELECTROLYTIC OR ELECTROPHORETIC PROCESSES FOR THE PRODUCTION OF COMPOUNDS OR NON-METALS; APPARATUS THEREFOR (anodic or cathodic protection C23F; single-crystal growth C30B) **[2]**

(1) In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[2]**

(2) Compounds of particular interest are also classified in the relevant classes, e.g. in C01, C07. **[2]**

1/00 Electrolytic production of inorganic compounds or non-metals [2]

1/02 . of hydrogen or oxygen **[2]**
1/04 . . by electrolysis of water **[2]**
1/06 . . . in cells with flat or plate-like electrodes **[2]**
1/08 . . . . of the filter-press type **[2]**
1/10 . . . in diaphragm cells **[2]**
1/12 . . . in pressure cells **[2]**
1/13 . of ozone **[7]**
1/14 . of alkali metal compounds **[2]**
1/16 . . Hydroxides **[2]**
1/18 . of alkaline earth metal compounds or magnesium compounds **[2]**
1/20 . . Hydroxides **[2]**
1/21 . of manganese oxides **[7]**
1/22 . of inorganic acids **[2]**
1/24 . of halogens or compounds thereof **[2]**
1/26 . . Chlorine; Compounds thereof **[2]**
1/28 . of per-compounds **[2]**
1/30 . . Peroxides **[2]**
1/32 . . Perborates **[2]**
1/34 . Simultaneous production of alkali metal hydroxides and chlorine, its oxyacids or salts **[2]**
1/36 . . in mercury cathode cells **[2]**
1/38 . . . with vertical mercury cathode **[2]**
1/40 . . . with horizontal mercury cathode **[2]**
1/42 . . . Decomposition of amalgams **[2]**
1/44 . . . . with the aid of catalysts **[2]**
1/46 . . in diaphragm cells **[2]**

3/00 Electrolytic production of organic compounds [2]

3/02 . by oxidation **[2]**
3/04 . by reduction **[2]**
3/06 . by halogenation **[2]**
3/08 . . by fluorination **[2]**
3/10 . by coupling reactions, e.g. dimerisation **[2]**
3/12 . of organo-metallic compounds **[2]**

5/00 Electrogenerative processes, i.e. processes for producing compounds in which simultaneously electricity is generated [2]

7/00 Electrophoretic production of compounds or non-metals (separation or purification of peptides, e.g. of proteins, by electrophoresis C07K 1/26) **[2]**

9/00 Cells or assemblies of cells; Constructional parts of cells; Assemblies of constructional parts, e.g. electrode-diaphragm assemblies [2,7]

9/02 . Holders for electrodes **[2]**
9/04 . Devices for current supply (electrical connections in general H01R); Electrode connections; Electric inter-cell connections **[2]**

9/06 . Cells comprising dimensionally-stable non-movable electrodes; Assemblies of constructional parts thereof **[7]**
9/08 . . with diaphragms **[7]**
9/10 . . . including an ion-exchange membrane in or on which electrode material is embedded **[7]**
9/12 . Cells or assemblies of cells comprising at least one movable electrode, e.g. rotary electrodes; Assemblies of constructional parts thereof **[7]**
9/14 . . Liquid electrodes, e.g. mercury electrodes **[7]**
9/16 . Cells or assemblies of cells comprising at least one electrode made of particles; Assemblies of constructional parts thereof **[7]**
9/18 . Assemblies comprising a plurality of cells (assemblies of cells with movable electrodes C25B 9/12; assemblies of cells with electrodes made of particles C25B 9/16) **[7]**
9/20 . . of the filter-press type **[7]**

11/00 **Electrodes**; **Manufacture thereof not otherwise provided for [2]**
11/02 . characterised by shape or form **[2]**
11/03 . . perforated or foraminous **[2]**
11/04 . characterised by the material **[2]**
11/06 . . by the catalytic materials used (catalysts in general B01J) **[2]**
11/08 . . . Noble metals **[2]**
11/10 . . Electrodes based on barrier-type metals, e.g. titanium **[2]**
11/12 . . Electrodes based on carbon (carbon masses in general C04B 35/52) **[2]**
11/14 . . . Impregnation of carbon electrodes (C25B 11/06 takes precedence) **[2]**
11/16 . . Electrodes based on manganese dioxide or lead dioxide **[2]**
11/18 . . Mercury or amalgam electrodes **[2]**

13/00 **Diaphragms**; **Spacing elements [4]**
13/02 . characterised by form or shape **[2]**
13/04 . characterised by the material **[2]**
13/06 . . based on asbestos **[2]**
13/08 . . based on organic materials **[2]**

15/00 **Operating or servicing of cells [2]**
15/02 . Process control or regulation (controlling or regulating in general G05) **[2]**
15/04 . Regulation of the inter-electrode distance (working of metal by the action of a high concentration of electric current B23H) **[2]**
15/06 . Detection or inhibition of short circuits in the cell **[2]**
15/08 . Supplying or removing reactants or electrolytes; Regeneration of electrolytes **[2]**

C25C **PROCESSES FOR THE ELECTROLYTIC PRODUCTION, RECOVERY OR REFINING OF METALS**; **APPARATUS THEREFOR** (anodic or cathodic protection C23F; single-crystal growth C30B) **[2]**

1/00 **Electrolytic production, recovery or refining of metals by electrolysis of solutions** (C25C 5/00 takes precedence) **[2]**
1/02 . of light metals **[2]**
1/04 . . in mercury cathode cells **[2]**
1/06 . of iron group metals, refractory metals or manganese **[2]**
1/08 . . of nickel or cobalt **[2]**
1/10 . . of chromium or manganese **[2]**
1/12 . of copper **[2]**
1/14 . of tin **[2]**
1/16 . of zinc, cadmium or mercury **[2]**
1/18 . of lead **[2]**
1/20 . of noble metals **[2]**
1/22 . of metals not provided for in groups C25C 1/02 to C25C 1/20 **[2]**
1/24 . Alloys obtained by cathodic reduction of all their ions **[2]**

3/00 **Electrolytic production, recovery or refining of metals by electrolysis of melts** (C25C 5/00 takes precedence) **[2]**
3/02 . of alkali or alkaline earth metals **[2]**
3/04 . of magnesium **[2]**
3/06 . of aluminium **[2]**
3/08 . . Cell construction, e.g. bottoms, walls, cathodes **[2]**
3/10 . . . External supporting frames or structures **[2]**
3/12 . . . Anodes **[2]**
3/14 . . Devices for feeding or crust breaking **[2]**
3/16 . . Electric current supply devices, e.g. bus bars **[2]**
3/18 . . Electrolytes **[2]**
3/20 . . Automatic control or regulation of cells (controlling or regulating in general G05) **[2]**
3/22 . . Collecting emitted gases **[2]**
3/24 . . Refining **[2]**
3/26 . of titanium, zirconium, hafnium, tantalum or vanadium **[2]**
3/28 . . of titanium **[2]**
3/30 . of manganese **[2]**
3/32 . of chromium **[2]**
3/34 . of metals not provided for in groups C25C 3/02 to C25C 3/32 **[2]**
3/36 . Alloys obtained by cathodic reduction of all their ions **[2]**

5/00 **Electrolytic production, recovery or refining of metal powders or porous metal masses [2]**
5/02 . from solutions **[2]**
5/04 . from melts **[2]**

7/00 **Constructional parts, or assemblies thereof, of cells**; **Servicing or operating of cells** (for the production of aluminium C25C 3/06 to C25C 3/22) **[2]**
7/02 . Electrodes (consumable anodes for the refining of metals C25C 1/00 to C25C 5/00); Connections thereof **[2]**
7/04 . Diaphragms; Spacing elements **[2]**
7/06 . Operating or servicing **[2]**
7/08 . . Separating of deposited metals from the cathode **[2]**

C25D PROCESSES FOR THE ELECTROLYTIC OR ELECTROPHORETIC PRODUCTION OF COATINGS; **ELECTROFORMING** (manufacturing printed circuits by metal deposition H05K 3/18); **JOINING WORKPIECES BY ELECTROLYSIS**; **APPARATUS THEREFOR** (anodic or cathodic protection C23F; single-crystal growth C30B) **[2,6]**

1/00 Electroforming [2]
1/02 . Tubes; Rings; Hollow bodies **[2]**
1/04 . Wires; Strips; Foils **[2]**
1/06 . Wholly-metallic mirrors **[2]**
1/08 . Perforated or foraminous objects, e.g. sieves (C25D 1/10 takes precedence) **[2]**
1/10 . Moulds; Masks; Masterforms **[2]**
1/12 . by electrophoresis **[2]**
1/14 . . of inorganic material **[2]**
1/16 . . . Metals **[2]**
1/18 . . of organic material **[2]**
1/20 . Separation of the formed objects from the electrodes **[2]**
1/22 . . Separating compounds **[2]**

2/00 Joining workpieces by electrolysis [6]

3/00 Electroplating; **Baths therefor [2]**
3/02 . from solutions (C25D 5/24 to C25D 5/32 take precedence) **[2]**
3/04 . . of chromium **[2]**
3/06 . . . from solutions of trivalent chromium **[2]**
3/08 . . . Deposition of black chromium **[2]**
3/10 . . . characterised by the organic bath constituents used **[2]**
3/12 . . of nickel or cobalt **[2]**
3/14 . . . from baths containing acetylenic or heterocyclic compounds **[2]**
3/16 . . . . Acetylenic compounds **[2]**
3/18 . . . . Heterocyclic compounds **[2]**
3/20 . . of iron **[2]**
3/22 . . of zinc **[2]**
3/24 . . . from cyanide baths **[2]**
3/26 . . of cadmium **[2]**
3/28 . . . from cyanide baths **[2]**
3/30 . . of tin **[2]**
3/32 . . . characterised by the organic bath constituents used **[2]**
3/34 . . of lead **[2]**
3/36 . . . characterised by the organic bath constituents used **[2]**
3/38 . . of copper **[2]**
3/40 . . . from cyanide baths **[2]**
3/42 . . of light metals **[2]**
3/44 . . . Aluminium **[2]**
3/46 . . of silver **[2]**
3/48 . . of gold **[2]**
3/50 . . of platinum group metals **[2]**
3/52 . . . characterised by the organic bath constituents used **[2]**
3/54 . . of metals not provided for in groups C25D 3/04 to C25D 3/50 **[2]**
3/56 . . of alloys **[2]**
3/58 . . . containing more than 50% by weight of copper **[2]**
3/60 . . . containing more than 50% by weight of tin **[2]**
3/62 . . . containing more than 50% by weight of gold **[2]**
3/64 . . . containing more than 50% by weight of silver **[2]**
3/66 . from melts **[2]**

5/00 Electroplating characterised by the process; **Pretreatment or after-treatment of workpieces [2]**
5/02 . Electroplating of selected surface areas **[2]**
5/04 . Electroplating with moving electrodes **[2]**
5/06 . . Brush or pad plating **[2]**
5/08 . Electroplating with moving electrolyte, e.g. jet electroplating **[2]**
5/10 . Electroplating with more than one layer of the same or of different metals (for bearings C25D 7/10) **[2]**
5/12 . . at least one layer being of nickel or chromium **[2]**
5/14 . . . two or more layers being of nickel or chromium, e.g. duplex or triplex layers **[2]**
5/16 . Electroplating with layers of varying thickness **[2]**
5/18 . Electroplating using modulated, pulsed or reversing current **[2]**
5/20 . Electroplating using ultrasonics **[2]**
5/22 . Electroplating combined with mechanical treatment during the deposition **[2]**
5/24 . Electroplating of metal surfaces to which a coating cannot readily be applied (C25D 5/34 takes precedence) **[2]**
5/26 . . of iron or steel surfaces **[2]**
5/28 . . of surfaces of refractory metals **[2]**
5/30 . . of surfaces of light metals **[2]**
5/32 . . of surfaces of actinides **[2]**
5/34 . Pretreatment of metallic surfaces to be electroplated **[2]**
5/36 . . of iron or steel **[2]**
5/38 . . of refractory metals or nickel **[2]**
5/40 . . . Nickel; Chromium **[2]**
5/42 . . of light metals **[2]**
5/44 . . . Aluminium **[2]**
5/46 . . of actinides **[2]**
5/48 . After-treatment of electroplated surfaces **[2]**
5/50 . . by heat-treatment **[2]**
5/52 . . by brightening or burnishing **[2]**
5/54 . Electroplating of non-metallic surfaces (C25D 7/12 takes precedence) **[2]**
5/56 . . of plastics **[2]**

7/00 Electroplating characterised by the article coated [2]
7/02 . Slide fasteners **[2]**
7/04 . Tubes; Rings; Hollow bodies **[2]**
7/06 . Wires; Strips; Foils **[2]**
7/08 . Mirrors; Reflectors **[2]**
7/10 . Bearings **[2]**
7/12 . Semiconductors **[2]**

9/00 Electrolytic coating other than with metals (C25D 11/00, C25D 15/00 take precedence; electrophoretic coating C25D 13/00) **[2]**
9/02 . with organic materials **[2]**
9/04 . with inorganic materials **[2]**
9/06 . . by anodic processes **[2]**
9/08 . . by cathodic processes **[2]**

9/10 . . . on iron or steel **[2]**
9/12 . . . on light metals **[2]**

11/00 Electrolytic coating by surface reaction, i.e. forming conversion layers [2]
11/02 . Anodisation **[2]**
11/04 . . of aluminium or alloys based thereon **[2]**
11/06 . . . characterised by the electrolytes used **[2]**
11/08 . . . . containing inorganic acids **[2]**
11/10 . . . . containing organic acids **[2]**
11/12 . . . Anodising more than once, e.g. in different baths **[2]**
11/14 . . . Producing integrally coloured layers **[2]**
11/16 . . . Pretreatment **[2]**
11/18 . . . After-treatment, e.g. pore-sealing (lacquering B44D) **[2]**
11/20 . . . . Electrolytic after-treatment **[2]**
11/22 . . . . . for colouring layers **[2]**
11/24 . . . . Chemical after-treatment **[2]**
11/26 . . of refractory metals or alloys based thereon **[2]**
11/28 . . of actinides or alloys based thereon **[2]**
11/30 . . of magnesium or alloys based thereon **[2]**
11/32 . . of semiconducting materials **[2]**
11/34 . . of metals or alloys not provided for in groups C25D 11/04 to C25D 11/32 **[2]**
11/36 . Phosphatising **[2]**
11/38 . Chromatising **[2]**

13/00 Electrophoretic coating (C25D 15/00 takes precedence; apparatus for continuously conveying articles into baths B65G, e.g. B65G 49/00; compositions for electrophoretic coating C09D 5/44) **[2]**
13/02 . with inorganic material **[2]**
13/04 . with organic material **[2]**
13/06 . . polymers **[2]**
13/08 . . . by polymerisation in situ of monomeric materials **[2]**
13/10 . characterised by the additives used **[2]**
13/12 . characterised by the article coated **[2]**
13/14 . . Tubes; Rings; Hollow bodies **[2]**
13/16 . . Wires; Strips; Foils **[2]**
13/18 . using modulated, pulsed or reversing current **[2]**
13/20 . Pretreatment **[2]**
13/22 . Servicing or operating **[2]**
13/24 . . Regeneration of process liquids **[2]**

15/00 Electrolytic or electrophoretic production of coatings containing embedded materials, e.g. particles, whiskers, wires [2]
15/02 . Combined electrolytic and electrophoretic processes **[2]**

17/00 Constructional parts, or assemblies thereof, of cells for electrolytic coating (apparatus for continuously conveying articles into baths B65G, e.g. B65G 49/00; electric devices, see the relevant places, e.g. H01B, H02G) **[2]**
17/02 . Tanks; Installations therefor **[2]**
17/04 . . External supporting frames or structures **[2]**
17/06 . Suspending or supporting devices for articles to be coated **[2]**
17/08 . . Racks **[2]**
17/10 . Electrodes **[2]**
17/12 . . Shape or form (C25D 17/14 takes precedence) **[2]**
17/14 . . for pad-plating **[2]**
17/16 . Apparatus for electrolytic coating of small objects in bulk **[2]**
17/18 . . having closed containers **[2]**
17/20 . . . Horizontal barrels **[2]**
17/22 . . having open containers **[2]**
17/24 . . . Oblique barrels **[2]**
17/26 . . . Oscillating baskets **[2]**
17/28 . . with means for moving the objects individually through the apparatus during the treatment **[2]**

19/00 Electrolytic coating plants [2]

21/00 Processes for servicing or operating cells for electrolytic coating [2]
21/02 . Heating or cooling **[2]**
21/04 . Removal of gases or vapours **[2]**
21/06 . Filtering **[2]**
21/08 . Rinsing **[2]**
21/10 . Agitating of electrolytes; Moving of racks **[2]**
21/11 . Use of protective surface layers on electrolytic baths **[3]**
21/12 . Process control or regulation (controlling or regulating in general G05) **[2]**
21/14 . . Controlled addition of electrolyte components **[2]**
21/16 . Regeneration of process solutions **[2]**
21/18 . . of electrolytes (C25D 21/22 takes precedence) **[2]**
21/20 . . of rinse-solutions (C25D 21/22 takes precedence) **[2]**
21/22 . . by ion-exchange **[2]**

C25F PROCESSES FOR THE ELECTROLYTIC REMOVAL OF MATERIALS FROM OBJECTS; **APPARATUS THEREFOR** (treatment of water, waste water or sewage by electrochemical methods C02F 1/46; anodic or cathodic protection C23F) **[2]**

Note

In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[2]**

1/00 Electrolytic cleaning, degreasing, pickling, or descaling [2]
1/02 . Pickling; Descaling **[2]**
1/04 . . in solution **[2]**
1/06 . . . of iron or steel **[2]**
1/08 . . . of refractory metals **[2]**
1/10 . . . of actinides **[2]**
1/12 . . in melts **[2]**
1/14 . . . of iron or steel **[2]**
1/16 . . . of refractory metals **[2]**
1/18 . . . of actinides **[2]**

3/00 Electrolytic etching or polishing [2]
3/02 . Etching **[2]**
3/04 . . of light metals **[2]**
3/06 . . of iron or steel **[2]**

3/08 . . of refractory metals **[2]**
3/10 . . of actinides **[2]**
3/12 . . of semiconducting materials **[2]**
3/14 . . locally **[2]**
3/16 . Polishing **[2]**
3/18 . . of light metals **[2]**
3/20 . . . of aluminium **[2]**
3/22 . . of heavy metals **[2]**
3/24 . . . of iron or steel **[2]**
3/26 . . . of refractory metals **[2]**
3/28 . . . of actinides **[2]**
3/30 . . of semiconducting materials **[2]**

5/00 Electrolytic stripping of metallic layers or coatings [2]

7/00 Constructional parts, or assemblies thereof, of cells for electrolytic removal of material from objects (for both electrolytic coating and removal C25D); **Servicing or operating [2]**
7/02 . Regeneration of process liquids **[2]**

C30 CRYSTAL GROWTH [3]

C30B **SINGLE-CRYSTAL GROWTH** (by using ultra-high pressure, e.g. for the formation of diamonds B01J 3/06); **UNIDIRECTIONAL SOLIDIFICATION OF EUTECTIC MATERIAL OR UNIDIRECTIONAL DEMIXING OF EUTECTOID MATERIAL**; **REFINING BY ZONE-MELTING OF MATERIAL** (zone-refining of metals or alloys C22B); **PRODUCTION OF A HOMOGENEOUS POLYCRYSTALLINE MATERIAL WITH DEFINED STRUCTURE** (casting of metals, casting of other substances by the same processes or devices B22D; working of plastics B29; modifying the physical structure of metals or alloys C21D, C22F); **SINGLE CRYSTALS OR HOMOGENEOUS POLYCRYSTALLINE MATERIAL WITH DEFINED STRUCTURE**; **AFTER-TREATMENT OF SINGLE CRYSTALS OR A HOMOGENEOUS POLYCRYSTALLINE MATERIAL WITH DEFINED STRUCTURE** (for producing semiconductor devices or parts thereof H01L); **APPARATUS THEREFOR [3]**

(1) In this subclass, the following expressions are used with the meaning indicated:
- "single crystal" includes also twin crystals and a predominantly single crystal product; **[3]**
- "homogeneous polycrystalline material" means a material with crystal particles, all of which have the same chemical composition; **[5]**
- "defined structure" means the structure of a material with grains which are oriented in a preferential way or have larger dimensions than normally obtained. **[5]**

(2) In this subclass:
- the preparation of single crystals or a homogeneous polycrystalline material with defined structure of particular materials or shapes is classified in the group for the process as well as in group C30B 29/00; **[3]**
- an apparatus specially adapted for a specific process is classified in the appropriate group for the process. Apparatus to be used in more than one kind of process is classified in group C30B 35/00. **[3]**

Subclass index

Single-crystal growth from solids or gels [3]

1/00 **Single-crystal growth directly from the solid state** (unidirectional demixing of eutectoid materials C30B 3/00; under a protective fluid C30B 27/00) **[3]**

1/02 . by thermal treatment, e.g. strain annealing (C30B 1/12 takes precedence) **[3]**

1/04 . . Isothermal recrystallisation **[3]**

1/06 . . Recrystallisation under a temperature gradient **[3]**

1/08 . . . Zone recrystallisation **[3]**

1/10 . by solid state reactions or multi-phase diffusion **[3]**

1/12 . by pressure treatment during the growth **[3]**

3/00 **Unidirectional demixing of eutectoid materials [3]**

5/00 **Single-crystal growth from gels** (under a protective fluid C30B 27/00) **[3]**

5/02 . with addition of doping materials **[3]**

Single-crystal growth from liquids; **Unidirectional solidification of eutectic materials [3]**

7/00 **Single-crystal growth from solutions using solvents which are liquid at normal temperature, e.g. aqueous solutions** (from molten solvents C30B 9/00; by normal or gradient freezing C30B 11/00; under a protective fluid C30B 27/00) **[3]**

7/02 . by evaporation of the solvent **[3]**

7/04 . . using aqueous solvents **[3]**

7/06 . . using non-aqueous solvents **[3]**

7/08 . by cooling of the solution **[3]**

7/10 . by application of pressure, e.g. hydrothermal processes **[3]**

7/12 . by electrolysis **[3]**

7/14 . the crystallising materials being formed by chemical reactions in the solution **[3]**

9/00 **Single-crystal growth from melt solutions using molten solvents** (by normal or gradient freezing C30B 11/00; by zone-melting C30B 13/00; by crystal pulling C30B 15/00; on immersed seed crystal C30B 17/00; by liquid phase epitaxial growth C30B 19/00; under a protective fluid C30B 27/00) **[3]**

9/02 . by evaporation of the molten solvent **[3]**

9/04 . by cooling of the solution **[3]**

9/06 . . using as solvent a component of the crystal composition **[3]**

9/08 . . using other solvents **[3]**

9/10 . . . Metal solvents **[3]**

9/12 . . . Salt solvents, e.g. flux growth **[3]**

9/14 . by electrolysis **[3]**

11/00 **Single-crystal-growth by normal freezing or freezing under temperature gradient, e.g. Bridgman-Stockbarger method** (C30B 13/00, C30B 15/00, C30B 17/00, C30B 19/00 take precedence; under a protective fluid C30B 27/00) **[3]**

11/02 . without using solvents (C30B 11/06 takes precedence) **[3]**

11/04 . adding crystallising materials or reactants forming it in situ to the melt **[3]**

11/06 . . at least one but not all components of the crystal composition being added **[3]**

11/08 . . every component of the crystal composition being added during the crystallisation **[3]**

11/10 . . . Solid or liquid components, e.g. Verneuil method **[3]**

11/12 . . . Vaporous components, e.g. vapour-liquid-solid-growth **[3]**

11/14 . characterised by the seed, e.g. its crystallographic orientation **[3]**

13/00 **Single-crystal growth by zone-melting**; **Refining by zone-melting** (C30B 17/00 takes precedence; by changing the cross-section of the treated solid C30B 15/00; under a protective fluid C30B 27/00; for the growth of homogeneous polycrystalline material with defined structure C30B 28/00; zone-refining of specific materials, see the relevant subclasses for the materials) **[3,5]**

13/02 . Zone-melting with a solvent, e.g. travelling solvent process **[3]**

13/04 . Homogenisation by zone-levelling **[3]**

13/06 . the molten zone not extending over the whole cross-section **[3]**

13/08 . adding crystallising materials or reactants forming it in situ to the molten zone **[3]**

13/10 . . with addition of doping materials **[3]**

13/12 . . . in the gaseous or vapour state **[3]**

13/14 . Crucibles or vessels **[3]**

13/16 . Heating of the molten zone **[3]**

13/18 . . the heating element being in contact with, or immersed in, the molten zone **[3]**

13/20 . . by induction, e.g. hot wire technique (C30B 13/18 takes precedence) **[3]**

13/22 . . by irradiation or electric discharge **[3]**

13/24 . . . using electromagnetic waves **[3]**

13/26 . Stirring of the molten zone **[3]**

13/28 . Controlling or regulating **[3]**

13/30 . . Stabilisation or shape controlling of the molten zone, e.g. by concentrators, by electromagnetic fields; Controlling the section of the crystal **[3]**

13/32 . Mechanisms for moving either the charge or the heater **[3]**

13/34 . characterised by the seed, e.g. by its crystallographic orientation **[3]**

15/00 **Single-crystal growth by pulling from a melt, e.g. Czochralski method** (under a protective fluid C30B 27/00) **[3]**

15/02 . adding crystallising materials or reactants forming it in situ to the melt **[3]**

15/04 . . adding doping materials, e.g. for n–p-junction **[3]**

15/06 . Non-vertical pulling **[3]**

15/08 . Downward pulling **[3]**

15/10 . Crucibles or containers for supporting the melt **[3]**

15/12 . . Double crucible methods **[3]**

15/14 . Heating of the melt or the crystallised materials **[3]**

15/16 . . by irradiation or electric discharge **[3]**

15/18 . . using direct resistance heating in addition to other methods of heating, e.g. using Peltier heat **[3]**

15/20 . Controlling or regulating (controlling or regulating in general G05) **[3]**

15/22 . . Stabilisation or shape controlling of the molten zone near the pulled crystal; Controlling the section of the crystal **[3]**

15/24 . . . using mechanical means, e.g. shaping guides (shaping dies for edge-defined film-fed crystal growth C30B 15/34) **[3]**

15/26 . . . using television detectors; using photo or X-ray detectors **[3]**

15/28 . . . using weight changes of the crystal or the melt, e.g. flotation methods **[3]**

15/30 . Mechanisms for rotating or moving either the melt or the crystal (flotation methods C30B 15/28) **[3]**

15/32 . Seed holders, e.g. chucks **[3]**

15/34 . Edge-defined film-fed crystal growth using dies or slits **[3]**

15/36 . characterised by the seed, e.g. its crystallographic orientation **[3]**

17/00 **Single-crystal growth on to a seed which remains in the melt during growth, e.g. Nacken-Kyropoulos method** (C30B 15/00 takes precedence) **[3]**

19/00 **Liquid-phase epitaxial-layer growth** **[3]**

19/02 . using molten solvents, e.g. flux **[3]**

19/04 . . the solvent being a component of the crystal composition **[3]**

19/06 . Reaction chambers; Boats for supporting the melt; Substrate holders **[3]**

19/08 . Heating of the reaction chamber or the substrate **[3]**

19/10 . Controlling or regulating (controlling or regulating in general G05) **[3]**

19/12 . characterised by the substrate **[3]**

21/00 **Unidirectional solidification of eutectic materials** **[3]**

21/02 . by normal casting or gradient freezing **[3]**

21/04 . by zone-melting **[3]**

21/06 . by pulling from a melt **[3]**

Single-crystal growth from vapours **[3]**

23/00 **Single-crystal growth by condensing evaporated or sublimed materials** **[3]**

23/02 . Epitaxial-layer growth **[3]**

23/04 . . Pattern deposit, e.g. by using masks **[3]**

23/06 . . Heating of the deposition chamber, the substrate, or the materials to be evaporated **[3]**

23/08 . . by condensing ionised vapours (by reactive sputtering C30B 25/06) **[3]**

25/00 **Single-crystal growth by chemical reaction of reactive gases, e.g. chemical vapour deposition growth** **[3]**

25/02 . Epitaxial-layer growth **[3]**

25/04 . . Pattern deposit, e.g. by using masks **[3]**

25/06 . . by reactive sputtering **[3]**

25/08 . . Reaction chambers; Selection of materials therefor **[3]**

25/10 . . Heating of the reaction chamber or the substrate **[3]**

25/12 . . Substrate holders or susceptors **[3]**

25/14 . . Feed and outlet means for the gases; Modifying the flow of the reactive gases **[3]**

25/16 . . Controlling or regulating (controlling or regulating in general G05) **[3]**
25/18 . . characterised by the substrate **[3]**
25/20 . . . the substrate being of the same materials as the epitaxial layer **[3]**
25/22 . . Sandwich processes **[3]**

27/00 Single-crystal growth under a protective fluid [3]
27/02 . by pulling from a melt **[3]**

28/00 Production of homogeneous polycrystalline material with defined structure [5]
28/02 . directly from the solid state **[5]**
28/04 . from liquids **[5]**
28/06 . . by normal freezing or freezing under temperature gradient **[5]**
28/08 . . by zone-melting **[5]**
28/10 . . by pulling from a melt **[5]**
28/12 . directly from the gas state **[5]**
28/14 . . by chemical reaction of reactive gases **[5]**

29/00 Single crystals or homogeneous polycrystalline material with defined structure characterised by the material or by their shape [3,5]

(1) In groups C30B 29/02 to C30B 29/54, in the absence of an indication to the contrary, a material is classified in the last appropriate place. **[3]**
(2) Attention is drawn to Note (3) after the title of section C, which Note indicates to which version of the periodic table of chemical elements the IPC refers. **[2010.01]**

29/02 . Elements **[3]**
29/04 . . Diamond **[3]**
29/06 . . Silicon **[3]**
29/08 . . Germanium **[3]**
29/10 . Inorganic compounds or compositions **[3]**
29/12 . . Halides **[3]**
29/14 . . Phosphates **[3]**
29/16 . . Oxides **[3]**
29/18 . . . Quartz **[3]**
29/20 . . . Aluminium oxides **[3]**
29/22 . . . Complex oxides **[3]**
29/24 . . . . with formula $AMeO_3$, wherein A is a rare earth metal and Me is Fe, Ga, Sc, Cr, Co, or Al, e.g. ortho ferrites **[3]**
29/26 . . . . with formula BMe_2O_4, wherein B is Mg, Ni, Co, Al, Zn or Cd and Me is Fe, Ga, Sc, Cr, Co, or Al **[3]**
29/28 . . . . with formula $A_3Me_5O_{12}$, wherein A is a rare earth metal and Me is Fe, Ga, Sc, Cr, Co or Al, e.g. garnets **[3]**
29/30 . . . . Niobates; Vanadates; Tantalates **[3]**
29/32 . . . . Titanates; Germanates; Molybdates; Tungstates **[3]**
29/34 . . Silicates **[3]**
29/36 . . Carbides **[3]**
29/38 . . Nitrides **[3]**
29/40 . . $A_{III}B_V$ compounds **[3]**
29/42 . . . Gallium arsenide **[3]**
29/44 . . . Gallium phosphide **[3]**
29/46 . . Sulfur-, selenium- or tellurium-containing compounds **[3]**
29/48 . . . $A_{II}B_{VI}$ compounds **[3]**
29/50 . . . . Cadmium sulfide **[3]**
29/52 . . Alloys **[3]**
29/54 . Organic compounds **[3]**
29/56 . . Tartrates **[3]**
29/58 . . Macromolecular compounds **[3]**
29/60 . characterised by shape **[3]**
29/62 . . Whiskers or needles **[3]**
29/64 . . Flat crystals, e.g. plates, strips, disks **[5]**
29/66 . . Crystals of complex geometrical shape, e.g. tubes, cylinders **[5]**
29/68 . . Crystals with laminate structure, e.g. "superlattices" **[5]**

30/00 Production of single crystals or homogeneous polycrystalline material with defined structure characterised by the action of electric or magnetic fields, wave energy or other specific physical conditions [5]

Note

When classifying in this group, classification is also made in groups C30B 1/00 to C30B 28/00 according to the process of crystal growth. **[5]**

30/02 . using electric fields, e.g. electrolysis **[5]**
30/04 . using magnetic fields **[5]**
30/06 . using mechanical vibrations **[5]**
30/08 . in conditions of zero-gravity or low gravity **[5]**

After-treatment of single crystals or homogeneous polycrystalline material with defined structure [3,5]

31/00 Diffusion or doping processes for single crystals or homogeneous polycrystalline material with defined structure; Apparatus therefor [3,5]
31/02 . by contacting with diffusion materials in the solid state **[3]**
31/04 . by contacting with diffusion materials in the liquid state **[3]**
31/06 . by contacting with diffusion material in the gaseous state (C30B 31/18 takes precedence) **[3]**
31/08 . . the diffusion materials being a compound of the elements to be diffused **[3]**
31/10 . . Reaction chambers; Selection of materials therefor **[3]**
31/12 . . Heating of the reaction chamber **[3]**
31/14 . . Substrate holders or susceptors **[3]**
31/16 . . Feed and outlet means for the gases; Modifying the flow of the gases **[3]**
31/18 . . Controlling or regulating **[3]**
31/20 . Doping by irradiation with electromagnetic waves or by particle radiation **[3]**
31/22 . . by ion-implantation **[3]**

33/00 After-treatment of single crystals or homogeneous polycrystalline material with defined structure (C30B 31/00 takes precedence) **[3,5]**
33/02 . Heat treatment (C30B 33/04, C30B 33/06 take precedence) **[5]**
33/04 . using electric or magnetic fields or particle radiation **[5]**
33/06 . Joining of crystals **[5]**
33/08 . Etching **[5]**

33/10 . . in solutions or melts **[5]**
33/12 . . in gas atmosphere or plasma **[5]**

35/00 Apparatus in general, specially adapted for the growth, production or after-treatment of single crystals or a homogeneous polycrystalline material with defined structure [3,5]

COMBINATORIAL TECHNOLOGY

C40 COMBINATORIAL TECHNOLOGY [8]

C40B COMBINATORIAL CHEMISTRY; LIBRARIES, E.G. CHEMICAL LIBRARIES, IN SILICO LIBRARIES [8]

(1) In this subclass, the first place priority rule is applied, i.e. at each hierarchical level, classification is made in the first appropriate place. **[8]**

(2) When classifying in this subclass, subject matter of interest is also classified in other appropriate places: **[8]**

(a) library members are also classified in the appropriate places elsewhere in the IPC (e.g. in section C) according to established procedure relating to "Markush"-type formulae (see paragraphs 100 and 101 of the Guide); **[8]**

(b) methods or apparatus covered by this subclass are also classified for their biological, chemical, physical or other features in the appropriate places in the IPC, if such features are of interest, e.g. **[8]**

A01N	Biocides
A61K	Preparations for medical, dental or toilet purposes
A61P	Therapeutic activity of compounds
B01D	Separation
B01J	Chemical or physical processes, e.g. catalysis; Apparatus therefor
B01L	Chemical or physical laboratory apparatus
B29	Shaped plastics
C01, C07, C08	Inorganic, organic or organic macromolecular compounds; Methods of preparation or separation thereof
C12	Biochemistry, microbiology, enzymology including micro-organisms or enzymes, preparing them, using them to synthesise compounds or compositions; Measuring or testing processes involving micro-organisms or enzymes; Mutation or genetic engineering
C22	Metal alloys
G01N	Chemical or physical analysis
G01R, G01T	Physical measurements methods; Apparatus therefor
G03F	Photomechanical methods
G06F	Electrical digital data processing
G06K	Data processing
G06T	Image data processing
G09F	Displaying; Advertising

10/00 Directed molecular evolution of macromolecules, e.g. RNA, DNA or proteins [8]

20/00 Methods specially adapted for identifying library members [8]

20/02 . Identifying library members by their fixed physical location on a support or substrate **[8]**

20/04 . Identifying library members by means of a tag, label, or other readable or detectable entity associated with the library members, e.g. decoding processes **[8]**

20/06 . using iterative deconvolution techniques **[8]**

20/08 . Direct analysis of the library members per se by physical methods, e.g. spectroscopy **[8]**

30/00 Methods of screening libraries [8]

30/02 . In silico screening **[8]**

30/04 . by measuring the ability to specifically bind a target molecule, e.g. antibody-antigen binding, receptor-ligand binding **[8]**

30/06 . by measuring effects on living organisms, tissues or cells **[8]**

30/08 . by measuring catalytic activity **[8]**

30/10 . by measuring physical properties, e.g. mass **[8]**

40/00 Libraries per se, e.g. arrays, mixtures [8]

40/02 . Libraries contained in or displayed by micro-organisms, e.g. bacteria or animal cells; Libraries contained in or displayed by vectors, e.g. plasmids; Libraries containing only micro-organisms or vectors **[8]**

40/04 . Libraries containing only organic compounds **[8]**

Note

Libraries containing salts of organic compounds are classified in the groups for the libraries containing the parent compounds **[8]**

40/06 . . Libraries containing nucleotides or polynucleotides, or derivatives thereof **[8]**

40/08 . . . Libraries containing RNA or DNA which encodes proteins, e.g. gene libraries **[8]**

40/10 . . Libraries containing peptides or polypeptides, or derivatives thereof **[8]**

40/12 . . Libraries containing saccharides or polysaccharides, or derivatives thereof **[8]**

40/14 . . Libraries containing macromolecular compounds and not covered by groups C40B 40/06 to C40B 40/12 **[8]**

40/16 . . Libraries containing metal-containing organic compounds **[8]**

40/18 . Libraries containing only inorganic compounds or inorganic materials **[8]**

50/00 Methods of creating libraries, e.g. combinatorial synthesis [8]

50/02 . In silico or mathematical conception of libraries **[8]**

50/04 . using dynamic combinatorial chemistry techniques **[8]**

50/06 . Biochemical methods, e.g. using enzymes or whole viable micro-organisms **[8]**

50/08 . Liquid phase synthesis, i.e. wherein all library building blocks are in liquid phase or in solution during library creation; Particular methods of cleavage from the liquid support **[8]**

50/10 . . involving encoding steps **[8]**

50/12 . . using a particular method of attachment to the liquid support **[8]**

50/14 . Solid phase synthesis, i.e. wherein one or more library building blocks are bound to a solid support during library creation; Particular methods of cleavage from the solid support **[8]**

50/16 . . involving encoding steps **[8]**

50/18 . . using a particular method of attachment to the solid support **[8]**

60/00 Apparatus specially adapted for use in combinatorial chemistry or with libraries [8]

60/02 . Integrated apparatus specially adapted for creating libraries, screening libraries and for identifying library members **[8]**

60/04 . Integrated apparatus specially adapted for both screening libraries and identifying library members **[8]**

60/06 . Integrated apparatus specially adapted for both creating libraries and identifying library members **[8]**

60/08 . Integrated apparatus specially adapted for both creating and screening libraries **[8]**

60/10 . for identifying library members **[8]**

60/12 . for screening libraries **[8]**

60/14 . for creating libraries **[8]**

70/00 Tags or labels specially adapted for combinatorial chemistry or libraries, e.g. fluorescent tags or bar codes [8]

80/00 Linkers or spacers specially adapted for combinatorial chemistry or libraries, e.g. traceless linkers or safety-catch linkers [8]

99/00 Subject matter not provided for in other groups of this subclass [8]

C99 SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

C99Z SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

Note

This subclass covers subject matter that: **[8]**
(a) is not provided for, but is most closely related to, the subject matter covered by the subclasses of this section, and **[8]**
(b) is not explicitly covered by any subclass of another section. **[8]**

99/00 Subject matter not otherwise provided for in this section [8]

SECTION D – TEXTILES; PAPER

TEXTILES OR FLEXIBLE MATERIALS NOT OTHERWISE PROVIDED FOR

D01 NATURAL OR ARTIFICIAL THREADS OR FIBRES; SPINNING

Note

In this class, the following terms are used with the meanings indicated:
– "fibre" means a relatively-short, elongated member of natural or artificial material;
– "filament" means an endless or quasi-endless, elongated member of natural or artificial material;
– "yarn" means a unitary assembly of fibres, usually produced by spinning;
– "thread" means an assembly of yarns or filaments, usually produced by twisting.

D01B MECHANICAL TREATMENT OF NATURAL FIBROUS OR FILAMENTARY MATERIAL TO OBTAIN FIBRES OR FILAMENTS, E.G. FOR SPINNING (crude extraction of asbestos fibres from ores B03B; apparatus for retting D01C)

Note

Attention is drawn to the Note following the title of class D01.

Subclass index

1/00 Mechanical separation of fibres from plant material, e.g. seeds, leaves, stalks

1/02 . Separating vegetable fibres from seeds, e.g. cotton
1/04 . . Ginning
1/06 . . . Roller gins, e.g. Macarthy type
1/08 . . . Saw gins
1/10 . Separating vegetable fibres from stalks or leaves
1/12 . . Rippling
1/14 . . Breaking or scutching, e.g. of flax; Decorticating
1/16 . . . with devices dependent on a bending action to break or loosen fibre-bearing materials (crushing rollers D01B 1/22)
1/18 . . . with stamping devices
1/20 . . . with scraping devices
1/22 . . . with crushing or breaking rollers or plates
1/24 . . . with toothed or other pointed devices
1/26 . . . with beaters rotating about an axis parallel to the fibre bundle
1/28 . . . with beaters rotating about an axis perpendicular to the fibre bundle
1/30 . . . Details of machines
1/32 . . . . Feeding arrangements
1/34 . . . . Devices holding fibres or fibre-bearing materials during treatment
1/36 . . . . . Conveying devices, e.g. moving bands or ropes
1/38 . . . . Delivery or discharge arrangements
1/40 . . . . Arrangements for disposing of non-fibrous materials
1/42 . . . . . employing liquids
1/44 . . . . Framework; Casings; Coverings; Grids
1/46 . . . . Driving arrangements
1/48 . . Drying retted fibres
1/50 . Obtaining fibres from other specified vegetable matter, e.g. peat, Spanish moss

3/00 Mechanical removal of impurities from animal fibres (carbonising rags to recover animal fibres D01C 5/00) **[2]**

3/02 . De-burring machines or apparatus (de-burring arrangements forming part of, or intimately associated with, carding or drafting machines, e.g. burr-crushing rollers, D01G)
3/04 . Machines or apparatus for washing or scouring loose wool fibres
3/06 . . with circular movement of either wool or liquid
3/08 . . with longitudinal movement of either wool or liquid
3/10 . . Details of machines or apparatus

5/00 Hackling or heckling machines (hand heckling tools D01G 33/00)

5/02 . Details
5/04 . . Apparatus for feeding, holding, or conveying materials to or in machines
5/06 . . Construction, mounting, or operating features of heckling devices
5/08 . . Arrangements for removing, or disposing of, tow or waste
5/10 . . Touch pins or other ending devices
5/12 . . Framework; Casings; Coverings

5/14 . . Driving arrangements
5/16 . . Arrangements for confining or removing dust or the like

7/00 Obtaining silk fibres or filaments
7/02 . Cleaning or classifying silk cocoons
7/04 . Reeling silk
7/06 . Obtaining silk from cocoons or portions thereof not suitable for reeling (de-gumming silk D01C 3/02)

9/00 Other mechanical treatment of natural fibrous or filamentary material to obtain fibres or filaments

---

D01C CHEMICAL TREATMENT OF NATURAL FILAMENTARY OR FIBROUS MATERIAL TO OBTAIN FILAMENTS OR FIBRES FOR SPINNING; CARBONISING RAGS TO RECOVER ANIMAL FIBRES

(1) Attention is drawn to the Note following the title of class D01.
(2) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

1/00 Treatment of vegetable material
1/02 . by chemical methods to obtain bast fibres
1/04 . Bacteriological retting

3/00 Treatment of animal material, e.g. chemical scouring of wool (recovery of lanolin or wool wax C11B 11/00)
3/02 . De-gumming silk

5/00 Carbonising rags to recover animal fibres (chemical removal of vegetable impurities from threads or fabrics of animal fibres D06M)

D01D MECHANICAL METHODS OR APPARATUS IN THE MANUFACTURE OF ARTIFICIAL FILAMENTS, THREADS, FIBRES, BRISTLES, OR RIBBONS (metal threads B21; fibres or filaments of softened glass, minerals or slag C03B 37/00)

(1) Attention is drawn to the Note following the title of class D01.
(2) Apparatus specially adapted for the manufacture of carbon filaments are classified in group D01F 9/12. **[5]**

Subclass index

1/00 Treatment of filament-forming or like material (working of plastics or substances in a plastic state, in general B29)
1/02 . Preparation of spinning solutions
1/04 . Melting filament-forming substances
1/06 . Feeding liquid to the spinning head (constructions of pumps F04)
1/09 . . Pressure, temperature or feeding rate regulation **[3]**
1/10 . Filtering or de-aerating the spinning solution or melt

4/00 Spinnerette packs; **Cleaning thereof** (D01D 5/24, D01D 5/253, D01D 5/28 take precedence) **[3]**
4/02 . Spinnerettes (alloys therefor C22C) **[3]**
4/04 . Cleaning spinnerettes or other parts of the spinnerette packs (cleaning in general B08B) **[3]**
4/06 . Distributing spinning solution or melt to spinning nozzles **[3]**
4/08 . Supporting spinnerettes or other parts of spinnerette packs **[3]**

5/00 Formation of filaments, threads, or the like
5/02 . Starting the formation
5/04 . Dry spinning methods
5/06 . Wet spinning methods
5/08 . Melt-spinning methods
5/084 . . Heating filaments, threads or the like, leaving the spinnerettes **[3]**
5/088 . . Cooling filaments, threads or the like, leaving the spinnerettes **[3]**
5/092 . . . in shafts or chimneys **[3]**
5/096 . . Humidity control, or oiling, of filaments, threads or the like, leaving the spinnerettes **[3]**

5/098 . . with simultaneous stretching **[4]**
5/10 . . using organic materials
5/11 . Flash-spinning **[3]**
5/12 . Stretch-spinning methods (finishing by stretching D02J 1/22)
5/14 . . with flowing liquid stretching media
5/16 . . using rollers, or like mechanical devices, e.g. snubbing pins
5/18 . by means of rotating spinnerets
5/20 . with varying denier along their length
5/22 . with a crimped or curled structure; with a special structure to simulate wool (producing crimped or curled effects in filaments or threads after formation D02G 1/00)
5/23 . . by asymmetrical cooling of filaments, threads, or the like, leaving the spinnerettes **[3]**
5/24 . with a hollow structure; Spinnerette packs therefor (D01D 5/38 takes precedence; producing tubes of plastic material B29D; addition of agents forming hollow filaments D01F 1/08) **[3]**
5/247 . . Discontinuous hollow structure or microporous structure **[3]**
5/253 . with a non-circular cross section; Spinnerette packs therefor (D01D 5/38 takes precedence) **[3]**
5/26 . Formation of staple fibres (by flash-spinning D01D 5/11)
5/28 . while mixing different spinning solutions or melts during the spinning operation; Spinnerette packs therefor
5/30 . . Conjugate filaments; Spinnerette packs therefor **[3]**
5/32 . . . Side-by-side structure; Spinnerette packs therefor **[3]**
5/34 . . . Core-skin structure; Spinnerette packs therefor **[3]**
5/36 . . . Matrix structure; Spinnerette packs therefor **[3]**
5/38 . Formation of filaments, threads, or the like during polymerisation **[3]**
5/40 . by applying a shearing force to a dispersion or solution of filament formable polymers, e.g. by stirring **[3]**
5/42 . by cutting films into narrow ribbons or filaments or by fibrillation of films **[3]**

7/00 **Collecting the newly-spun products** (collecting newly-spun products with the imparting of twist D01H)
7/02 . in centrifugal spinning pots **[3]**

10/00 **Physical treatment of artificial filaments or the like during manufacture, i.e. during a continuous production process before the filaments have been collected** (finishing D02J) **[4]**
10/02 . Heat treatment (heating for finishing D02J 13/00) **[4]**
10/04 . Supporting filaments or the like during their treatment **[4]**
10/06 . Washing or drying **[4]**

11/00 **Other features of manufacture**
11/02 . Opening bundles to space the threads or filaments from one another
11/04 . Fixed guides
11/06 . Coating with spinning solutions or melts

13/00 **Complete machines for producing artificial threads**
13/02 . Elements of machines in combination

D01F CHEMICAL FEATURES IN THE MANUFACTURE OF ARTIFICIAL FILAMENTS, THREADS, FIBRES, BRISTLES, OR RIBBONS; APPARATUS SPECIALLY ADAPTED FOR THE MANUFACTURE OF CARBON FILAMENTS [2]

(1) Attention is drawn to the Note following the title of class D01.
(2) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

1/00 **General methods for the manufacture of artificial filaments or the like**
1/02 . Addition of substances to the spinning solution or to the melt (addition of substances to viscose D01F 2/08)
1/04 . . Pigments
1/06 . . Dyes
1/07 . . for making fire- or flame-proof filaments **[4]**
1/08 . . for forming hollow filaments
1/09 . . for making electroconductive or anti-static filaments **[4]**
1/10 . . Other agents for modifying properties **[2]**

2/00 **Monocomponent artificial filaments or the like of cellulose or cellulose derivatives; Manufacture thereof [2]**
2/02 . from solutions of cellulose in acids, bases, or salts **[2]**
2/04 . . from cuprammonium solutions **[2]**
2/06 . from viscose (preparation of alkali cellulose C08B) **[2]**

2/08 . . Composition of the spinning solution or the bath (preparing or dissolving cellulose xanthate C08B) **[2]**
2/10 . . . Addition to the spinning solution or spinning bath of substances which exert their effect equally well in either **[2]**
2/12 . . . Addition of delustring agents to the spinning solution **[2]**
2/14 . . . . Addition of pigments **[2]**
2/16 . . . Addition of dyes to the spinning solution **[2]**
2/18 . . . Addition to the spinning solution of substances to influence ripening **[2]**
2/20 . . . for the manufacture of hollow threads **[2]**
2/22 . . by the dry spinning process **[2]**
2/24 . from cellulose derivatives **[2]**
2/26 . . from nitrocellulose **[2]**
2/28 . . from organic cellulose esters or ethers, e.g. cellulose acetate **[2]**
2/30 . . . by the dry spinning process **[2]**

4/00 Monocomponent artificial filaments or the like of proteins; **Manufacture thereof [2]**

4/02 . from fibroin **[2]**
4/04 . from casein **[2]**
4/06 . from globulins, e.g. groundnut protein **[2]**

6/00 Monocomponent artificial filaments or the like of synthetic polymers; **Manufacture thereof [2]**

Note

In this group, the percentage for determining the major constituent is expressed in mole percent. **[8]**

6/02 . from homopolymers obtained by reactions only involving carbon-to-carbon unsaturated bonds **[2]**
6/04 . . from polyolefins **[2]**
6/06 . . . from polypropylene **[2]**
6/08 . . from polymers of halogenated hydrocarbons **[2]**
6/10 . . . from polyvinyl chloride or polyvinylidene chloride **[2]**
6/12 . . . from polymers of fluorinated hydrocarbons **[2]**
6/14 . . from polymers of unsaturated alcohols, e.g. polyvinyl alcohol, or of their acetals or ketals **[2]**
6/16 . . from polymers of unsaturated carboxylic acids or unsaturated organic esters, e.g. polyacrylic esters, polyvinyl acetate **[2]**
6/18 . . from polymers of unsaturated nitriles, e.g. polyacrylonitrile, polyvinylidene cyanide **[2]**
6/20 . . from polymers of cyclic compounds with one carbon-to-carbon double bond in the side chain **[2]**
6/22 . . . from polystyrene **[2]**
6/24 . . from polymers of aliphatic compounds with more than one carbon-to-carbon double bond **[2]**
6/26 . . from other polymers **[2]**
6/28 . from copolymers obtained by reactions only involving carbon-to-carbon unsaturated bonds **[2]**
6/30 . . comprising olefins as the major constituent **[2]**
6/32 . . comprising halogenated hydrocarbons as the major constituent **[2]**
6/34 . . comprising unsaturated alcohols, acetals, or ketals as the major constituent **[2]**
6/36 . . comprising unsaturated carboxylic acids or unsaturated organic esters as the major constituent **[2]**
6/38 . . comprising unsaturated nitriles as the major constituent **[2]**
6/40 . . Modacrylic fibres, i.e. containing 35 to 85% acrylonitrile **[2]**
6/42 . . comprising cyclic compounds containing one carbon-to-carbon double bond in the side chain as major constituent **[2]**
6/44 . from mixtures of polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds as major constituent with other polymers or low-molecular-weight compounds **[2]**
6/46 . . of polyolefins **[2]**
6/48 . . of polymers of halogenated hydrocarbons **[2]**
6/50 . . of polyalcohols, polyacetals or polyketals **[2]**
6/52 . . of polymers of unsaturated carboxylic acids or unsaturated esters **[2]**
6/54 . . of polymers of unsaturated nitriles **[2]**
6/56 . . of polymers of cyclic compounds with one carbon-to-carbon double bond in the side chain **[2]**
6/58 . from homopolycondensation products **[2]**
6/60 . . from polyamides (from polyamino acids or polypeptides D01F 6/68) **[2]**
6/62 . . from polyesters **[2]**
6/64 . . . from polycarbonates **[2]**
6/66 . . from polyethers **[2]**
6/68 . . from polyaminoacids or polypeptides **[2]**
6/70 . . from polyurethanes **[2]**
6/72 . . from polyureas **[2]**
6/74 . . from polycondensates of cyclic compounds, e.g. polyimides, polybenzimidazoles **[2]**
6/76 . . from other polycondensation products **[2]**
6/78 . from copolycondensation products **[2]**
6/80 . . from copolyamides **[2]**
6/82 . . from polyester amides or polyether amides **[2]**
6/84 . . from copolyesters **[2]**
6/86 . . from polyetheresters **[2]**
6/88 . from mixtures of polycondensation products as major constituent with other polymers or low-molecular-weight compounds **[2]**
6/90 . . of polyamides **[2]**
6/92 . . of polyesters **[2]**
6/94 . . of other polycondensation products **[2]**
6/96 . from other synthetic polymers **[2]**

8/00 Conjugated, i.e. bi- or multicomponent, artificial filaments or the like; **Manufacture thereof [2]**

8/02 . from cellulose, cellulose derivatives, or proteins **[2]**
8/04 . from synthetic polymers **[2]**
8/06 . . with at least one polyolefin as constituent **[2]**
8/08 . . with at least one polyacrylonitrile as constituent **[2]**
8/10 . . with at least one other macromolecular compound obtained by reactions only involving carbon-to-carbon unsaturated bonds as constituent **[2]**
8/12 . . with at least one polyamide as constituent **[2]**
8/14 . . with at least one polyester as constituent **[2]**
8/16 . . with at least one other macromolecular compound obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[2]**
8/18 . from other substances **[2]**

9/00 Artificial filaments or the like of other substances; **Manufacture thereof**; **Apparatus specially adapted for the manufacture of carbon filaments [5]**

9/02 . of reaction products of rubber with acids or acid anhydrides, e.g. sulfur dioxide

9/04 . of alginates
9/08 . of inorganic material (from softened glass, minerals, or slags C03B 37/00; incandescent bodies F21H, H01K 1/02, H01K 3/02) **[2]**
9/10 . . by decomposition of organic substances (D01F 9/12 takes precedence) **[2]**
9/12 . . Carbon filaments; Apparatus specially adapted for the manufacture thereof **[2,5]**
9/127 . . . by thermal decomposition of hydrocarbon gases or vapours **[5]**
9/133 . . . . Apparatus therefor **[5]**
9/14 . . . by decomposition of organic filaments **[2,5]**
9/145 . . . . from pitch or distillation residues **[5]**
9/15 . . . . . from coal pitch **[5]**
9/155 . . . . . from petroleum pitch **[5]**
9/16 . . . . from products of vegetable origin or derivatives thereof, e.g. from cellulose acetat (D01F 9/18 takes precedence) **[2,5]**
9/17 . . . . . from lignin **[5]**
9/18 . . . . from proteins, e.g. from wool **[2]**
9/20 . . . . from polyaddition, polycondensation or polymerisation products (D01F 9/145, D01F 9/16, D01F 9/18 take precedence) **[2,5]**
9/21 . . . . . from macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[5]**
9/22 . . . . . from polyacrylonitriles **[2,5]**
9/24 . . . . . from macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[5]**
9/26 . . . . . from polyesters **[5]**
9/28 . . . . . from polyamides **[5]**
9/30 . . . . . from aromatic polyamides **[5]**
9/32 . . . . Apparatus therefor **[5]**

11/00 Chemical after-treatment of artificial filaments or the like during manufacture (finishing D06M) **[2]**
11/02 . of cellulose, cellulose derivatives, or proteins **[2]**
11/04 . of synthetic polymers **[2]**
11/06 . . of macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[2]**
11/08 . . of macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[2]**
11/10 . of carbon **[2]**
11/12 . . with inorganic substances **[5]**
11/14 . . with organic compounds, e.g. macromolecular compounds **[5]**
11/16 . . by physicochemical methods **[5]**

13/00 Recovery of starting material, waste material, or solvents during the manufacture of artificial filaments or the like [2]
13/02 . of cellulose, cellulose derivatives, or proteins **[2]**
13/04 . of synthetic polymers **[2]**

D01G PRELIMINARY TREATMENT OF FIBRES, E.G. FOR SPINNING (winding or unwinding, conducting or guiding laps, webs, slivers, or rovings in general, sliver or roving cans, depositing in sliver or roving cans B65H; preparation of fibres for paper-making D21)

Note

Attention is drawn to the Note following the title of class D01.

Subclass index

1/00 Severing continuous filaments or long fibres, e.g. stapling (drafting arrangements, twisting arrangements D01H)
1/02 . to form staple fibres not delivered in strand form
1/04 . . by cutting
1/06 . Converting tows to slivers or yarns, e.g. in direct spinning
1/08 . . by stretching or abrading
1/10 . . by cutting

3/00 Roughening of fibres

5/00 Separating, e.g. sorting, fibres (separating fibres of differing lengths in silk-dressing machines D01G 17/00; in combing machines D01G 19/00)

7/00 Breaking or opening fibre bales

7/02 . by means of beater arms

7/04 . by means of toothed members

7/06 . Details of apparatus or machines

7/08 . . Arrangements for feeding bales to comminuting elements

7/10 . . Arrangements for discharging fibres

7/12 . . Framework; Casings; Coverings; Grids

7/14 . . Driving arrangements

9/00 Opening or cleaning fibres, e.g. scutching cotton (scutching flax or like fibres D01B; making cellulose wadding in paper-making machines D21F 11/14)

9/02 . by agitation within a moving receptacle

9/04 . by means of beater arms

9/06 . by means of toothed members

9/08 . by means of air draught arrangements

9/10 . . using foraminous cylinders (foraminous suction cylinders for lap-forming D01G 25/00)

9/12 . Combinations of opening or cleaning machines

9/14 . Details of machines or apparatus

9/16 . . Feeding arrangements (fibre-feeding apparatus of general application in fibre-treating machines D01G 23/00)

9/18 . . Arrangements for discharging fibres

9/20 . . Framework; Casings; Coverings; Grids

9/22 . . Driving arrangements

11/00 Disintegrating fibre-containing articles to obtain fibres for re-use

11/02 . Opening, unravelling, or teasing ropes or like fibrous strands to obtain fibres for re-use

11/04 . Opening rags to obtain fibres for re-use (mechanical treatment of rags for paper-making D21B)

13/00 Mixing, e.g. blending, fibres; **Mixing non-fibrous materials with fibres** (mixing of fibres combined with other operations, e.g. bale-breaking or fibre-opening, see the appropriate groups for such operations)

15/00 Carding machines or accessories; **Card clothing**; **Burr-crushing or removing arrangements associated with carding or other preliminary-treatment machines** (de-burring apparatus or machines operating independently D01B)

15/02 . Carding machines

15/04 . . with worker and stripper or like rollers operating in association with a main cylinder

15/06 . . . Garnett machines

15/08 . . with flats or like members or endless card sheets operating in association with a main cylinder

15/10 . . with other apparatus, e.g. drafting devices, in integral or closely-associated combination (web-dividing apparatus D01G 15/46; burr-crushing or removing arrangements D01G 15/94)

15/12 . . Details

15/14 . . . Constructional features of carding elements, e.g. for facilitating attachment of card clothing

15/16 . . . . Main cylinders; Breasts

15/18 . . . . Workers; Strippers; Doffers (doffers specially adapted for web dividing D01G 15/54)

15/20 . . . . Feed rollers; Takers-in

15/22 . . . . Fancies

15/24 . . . . Flats or like members

15/26 . . . Arrangements or disposition of carding elements

15/28 . . . Supporting arrangements for carding elements; Arrangements for adjusting relative positions of carding elements

15/30 . . . . Bends

15/32 . . . Framework; Casings; Coverings

15/34 . . . Grids; Dirt knives; Angle blades

15/36 . . . Driving or speed control arrangements

15/38 . . . . for use during the grinding of card clothing

15/40 . . . Feeding apparatus (fibre-feeding apparatus of general application to fibre-treating machines, e.g. hopper feeders, D01G 23/00)

15/42 . . . . Feeding from laps

15/44 . . . . Intermediate feeds

15/46 . . . Doffing or like arrangements for removing fibres from carding elements; Web-dividing apparatus; Condensers (lap-forming devices D01G 25/00; fibre condensing guides D01H 5/72)

15/48 . . . . Stripping-combs

15/50 . . . . Stripping-rollers or like devices

15/52 . . . . Web-dividing arrangements

15/54 . . . . . employing doffers specially adapted for web dividing

15/56 . . . . . employing tapes

15/58 . . . . Sliver or like rubbing apparatus

15/60 . . . . . Constructions of rubbing leathers

15/62 . . . . Slubbing-winding apparatus (winding apparatus of general application to the winding of filamentary material B65H)

15/64 . . . . Drafting or twisting apparatus associated with doffing arrangements or with web-dividing apparatus

15/66 . . . . . with arrangements inserting false twist (false-twist devices D01H)

15/68 . . . . . with arrangements inserting permanent twist, e.g. spinning

15/70 . . Arrangements for producing decorative or fancy effects in products

15/72 . . Arrangements for returning waste to be re-carded

15/74 . . Air draught arrangements (air draught arrangements for stripping or for removing dust or fly D01G 15/76)

15/76 . Stripping or cleaning carding surfaces; Maintaining cleanliness of carding area

15/78 . . Arrangements for stripping flats

15/80 . . Arrangements for stripping cylinders or rollers

15/82 . . Arrangements for confining or removing dust, fly, or the like

15/84 . Card clothing; Manufacture thereof not otherwise provided for (arrangements for driving carding-machine elements during grinding D01G 15/38; grinding card clothing B24B)

15/86 . . with flexible non-metallic backing

15/88 . . formed from metal sheets or strips

15/90 . . Lags, e.g. for jute cards

15/92 . . Attaching card clothing to carding elements

15/94 . Burr-crushing or removing arrangements

15/96 . . Burr-crushing rollers

15/98 . . Morel or like apparatus

17/00 Silk-dressing machines

19/00 **Combining machines**
19/02 . with pinned circles, e.g. Noble
19/04 . with pinned cylinders, e.g. rectilinear
19/06 . Details
19/08 . . Feeding apparatus
19/10 . . Construction, mounting, or operating features of combing elements
19/12 . . Devices for laying or holding fibres in combs, e.g. dabbing brushes
19/14 . . Drawing-off and delivery apparatus
19/16 . . . Nipper mechanisms
19/18 . . . Roller, or roller and apron, devices, e.g. operating to draw-off fibres continuously
19/20 . . . . operating to draw-off fibres intermittently
19/22 . . Arrangements for removing, or disposing of, noil or waste
19/24 . . Framework; Casings; Coverings
19/26 . . Driving arrangements
19/28 . . Air draught or like pneumatic arrangements
19/30 . . Heating arrangements

21/00 **Combinations of machines, apparatus, or processes, e.g. for continuous processing** (D01G 1/06, D01G 9/12, D01G 15/46, D01G 15/94 take precedence)

23/00 **Feeding fibres to machines**; **Conveying fibres between machines** (D01G 21/00 takes precedence; intermediate feeds in carding machines D01G 15/40)
23/02 . Hoppers; Delivery shoots
23/04 . . with means for regulating of feed
23/06 . Arrangements in which a machine or apparatus is regulated in response to changes in the volume or weight of fibres fed, e.g. piano motions (arrangements in which draft is regulated in response to irregularities in fibre supply D01H)
23/08 . Air draught or like pneumatic arrangements

25/00 **Lap-forming devices not integral with machines specified above** (forming mats or batts of continuous filaments for non-woven fabrics D04H)

27/00 **Lap- or sliver-winding devices, e.g. for products of cotton scutchers, jute cards, or worsted gill boxes**
27/02 . with lap roll or the like loaded to provide firm packages
27/04 . with automatic discharge of lap roll or the like

29/00 **Arrangements for lubricating fibres, e.g. in gill boxes** (processes involving the use of particular lubricants D06M 15/00)

31/00 **Warning or safety devices, e.g. automatic fault detectors, stop motions** (safety devices of general application F16P; indicating devices of general application G08B)

33/00 **Hand tools for treatment of fibres**

35/00 **Treatment of oakum**

99/00 **Subject matter not provided for in other groups of this subclass [2010.01]**

D01H **SPINNING OR TWISTING** (unwinding, paying-out, forwarding, winding, or coiling filamentary material, not intimately associated with spinning or twisting, B65H; cores, formers, supports, or holders for coiled or wound material, e.g. bobbins, B65H; twisting oakum D01G 35/00; crimping or curling of fibres, filaments, or yarns D02G 1/00; making chenille D03D, D04D 3/00; testing yarns, rovings, slivers, fibres, or fibre webs G01)

Note

Attention is drawn to the Note following the title of class D01.

Subclass index

Kinds or types of spinning or twisting machines; **Drafting machines or arrangements**; **Twisting arrangements**

1/00 **Spinning or twisting machines in which the product is wound-up continuously** (open-end spinning machines D01H 4/00) **[5]**
1/02 . ring type
1/04 . flyer type
1/06 . cap type
1/08 . cup, pot, or disc type, in which annular masses of yarn are formed by centrifugal action
1/10 . for imparting multiple twist, e.g. two-for-one twisting
1/11 . Spinning by false-twisting **[5]**
1/115 . . using pneumatic means **[5]**
1/14 . Details (drafting arrangements D01H 5/00; twisting arrangements D01H 7/00)
1/16 . . Framework; Casings; Coverings
1/18 . . Supports for supply packages
1/20 . . Driving or stopping arrangements (for open-end spinning machines D01H 4/12, D01H 4/20, D01H 4/42; safety devices D01H 13/14) **[5]**
1/22 . . . for rollers (regulating or varying draft D01H 5/32)
1/24 . . . for twisting arrangements, e.g. spindles (braking arrangements for spindles D01H 7/22; interrelated flyer and bobbin drive mechanisms D01H 7/50)
1/241 . . . . driven by belt **[2]**

1/242 . . . . driven by toothed wheels **[2]**
1/243 . . . . driven by friction discs **[2]**
1/244 . . . . each spindle driven by an electric motor **[2]**
1/26 . . . . with two or more speeds; with variable-speed arrangements
1/28 . . . for two or more machine elements possessing different characteristics but in operative association
1/30 . . . . with two or more speeds; with variable-speed arrangements
1/32 . . . for complete machines
1/34 . . . . with two or more speeds; with variable-speed arrangements
1/36 . . Package-shaping arrangements, e.g. building motions
1/38 . . Arrangements for winding reserve lengths of yarn on take-up packages, e.g. transfer tails
1/40 . . Arrangements for connecting continuously-delivered material to bobbins or the like
1/42 . . Guards or protectors for yarns or threads, e.g. separator plates, anti-ballooning devices (anti-ballooning devices on spindles D01H 7/18)

3/00 Spinning or twisting machines in which the product is wound-up intermittently, e.g. mules

3/02 . Details (drafting arrangements D01H 5/00; twisting arrangements D01H 7/00)
3/04 . . Carriages; Mechanisms effecting carriage movements
3/06 . . . Carriages; Carriage rails; Squaring motions
3/08 . . . Drawing-out or taking-in motions
3/10 . . . Moving-creel arrangements, e.g. for twiners
3/12 . . Package-shaping motions; Faller arrangements
3/14 . . Roller-driving arrangements (drafting arrangements of general application in spinning machines D01H 5/18)
3/16 . . Spindle-driving arrangements (spindles, spindle bearings, spindle supports D01H 7/04)
3/18 . . . Tin rollers; Driving arrangements intimately associated with tin rollers
3/20 . . . Spindle-driving arrangements during drawing-out or backing-off
3/22 . . . Spindle-driving arrangements during taking-in
3/24 . . . . Quadrant motions; Nosing motions
3/26 . . Driving or stopping arrangements not otherwise provided for; Locking motions (safety devices D01H 13/14)

4/00 Open-end spinning machines or arrangements for imparting twist to independently moving fibres separated from slivers; **Piecing arrangements therefor**; **Covering endless core threads with fibres by open-end spinning techniques [5]**

Note

In this group, the expression “open-end spinning” covers such expressions as “break spinning”, “ringless spinning”, “rotor spinning” and “friction spinning”, but does not cover the expression “spinning by false-twisting”. **[5]**

4/02 . imparting twist by a fluid, e.g. air vortex **[5]**
4/04 . imparting twist by contact of fibres with a running surface **[5]**
4/06 . . co-operating with suction means (D01H 4/08, D01H 4/16 take precedence) **[5]**
4/08 . . Rotor spinning, i.e. the running surface being provided by a rotor **[5]**
4/10 . . . Rotors **[5]**
4/12 . . . Rotor bearings; Arrangements for driving or stopping (control therefor D01H 4/42) **[5]**
4/14 . . . . Rotor driven by an electric motor **[5]**
4/16 . . Friction spinning, i. e. the running surface being provided by a pair of closely spaced friction drums, e.g. at least one suction drum **[5]**
4/18 . . . Friction drums, e.g. arrangement of suction holes **[5]**
4/20 . . . Drum bearings; Arrangements for driving or stopping (control therefor D01H 4/42) **[5]**
4/22 . . Cleaning of running surfaces **[5]**
4/24 . . . in rotor spinning **[5]**
4/26 . . . in friction spinning **[5]**
4/28 . using electrostatic fields **[5]**
4/30 . Arrangements for separating slivers into fibres; Orienting or straightening fibres **[5]**
4/32 . . using opening rollers **[5]**
4/34 . . using air-jet streams **[5]**
4/36 . . with means for taking away impurities **[5]**
4/38 . Channels for feeding fibres to the yarn forming region **[5]**
4/40 . Removing running yarn from the yarn forming region, e.g. using tubes **[5]**
4/42 . Control of driving or stopping **[5]**
4/44 . . in rotor spinning **[5]**
4/46 . . in friction spinning **[5]**
4/48 . Piecing arrangements; Control therefor **[5]**
4/50 . . for rotor spinning **[5]**
4/52 . . for friction spinning **[5]**

5/00 Drafting machines or arrangements (arrangements in which draft is dependent on linear movement of take-up spindles, e.g. in mules, D01H 3/00; devices for combing or orienting fibres for open-end spinning machines D01H 4/30)

5/02 . Gill boxes or other drafting machines employing fallers or like pinned bars (lubricating fibres in gill boxes D01G 29/00)
5/04 . . with pinned bars actuated by screw members
5/06 . . . Intersecting gill boxes
5/08 . . with bars connected by links, chains, or the like
5/10 . . with pinned bars unconnected with each other but actuated through pressure of one against another
5/12 . . Details
5/14 . . . Pinned bars
5/16 . . . Framework; Casings; Coverings
5/18 . Drafting machines or arrangements without fallers or like pinned bars
5/20 . . in which fibres are controlled by contact with stationary or reciprocating surfaces
5/22 . . in which fibres are controlled by rollers only
5/24 . . . with porcupines or like pinned rotary members
5/26 . . in which fibres are controlled by one or more endless aprons
5/28 . . in which fibres are controlled by inserting twist during drafting (mules D01H 3/00; constructions of false-twist devices D02G 1/04)
5/30 . . incorporating arrangements for severing continuous filaments, e.g. in direct spinning (converting tows to slivers or yarns D01G 1/06)
5/32 . . Regulating or varying draft
5/34 . . . by manual adjustments

5/36 . . . according to a pre-arranged pattern, e.g. to produce slubs
5/38 . . . in response to irregularities in material
5/40 . . . . employing mechanical time-delay devices
5/42 . . . . employing electrical time-delay devices
5/44 . . Adjusting drafting elements, e.g. altering ratch
5/46 . . Loading arrangements
5/48 . . . using weights
5/50 . . . using springs
5/52 . . . using fluid pressure
5/54 . . . using magnetic arrangements
5/56 . . Supports for drafting elements (saddles or top roller arms forming essential components of weighting arrangements D01H 5/48)
5/58 . . Arrangements for traversing drafting elements (traversing arrangements for roving guides D01H 13/06)
5/60 . . Arrangements maintaining drafting elements free of fibre accumulations
5/62 . . . Non-rotary cleaning pads or plates; Scrapers
5/64 . . . Rollers or aprons with cleaning surfaces
5/66 . . . Suction devices
5/68 . . . . Suction end-catchers
5/70 . . Constructional features of drafting elements
5/72 . . . Fibre-condensing guides (guides for slivers, rovings, or yarns applicable solely for spinning, twisting, curling, or crimping purposes D01H 13/04)
5/74 . . . Rollers
5/76 . . . . Loose-boss assemblies
5/78 . . . . with flutes or other integral surface characteristics
5/80 . . . . with covers; Cots or covers
5/82 . . . . Arrangements for coupling roller sections
5/84 . . . . Porcupines
5/86 . . . Aprons; Apron supports; Apron-tensioning arrangements
5/88 . . . . Cradles; Tensors

7/00 Spinning or twisting arrangements (for open-end spinning D01H 4/00) **[5]**
7/02 . for imparting permanent twist
7/04 . . Spindles (spindle bearings, supports therefor, in general F16C)
7/06 . . . Stationary spindles with package-holding sleeves
7/08 . . . Mounting arrangements
7/10 . . . . Spindle supports; Rails; Rail supports, e.g. poker guides
7/12 . . . . Bolsters; Bearings
7/14 . . . . Holding-down arrangements
7/16 . . . Arrangements for coupling bobbins or like to spindles
7/18 . . . Arrangements on spindles for suppressing yarn balloons (thread guards or protectors D01H 1/42)
7/20 . . . Lubricating arrangements
7/22 . . . Braking arrangements
7/24 . . Flyer or like arrangements (multiple-twist arrangements D01H 7/86)
7/26 . . . Flyer constructions
7/28 . . . . arranged to guide material over exterior of legs
7/30 . . . . with guide channels formed in legs, e.g. slubbing flyers
7/32 . . . . . with pressing devices
7/34 . . . . with haul pulleys or like arrangements
7/36 . . . . with traversing devices
7/38 . . . . Ring flyers
7/40 . . . Flyer supports, e.g. rails
7/42 . . . Arrangements coupling flyers to spindles
7/44 . . . Drag arrangements for bobbins or flyers
7/46 . . . Devices attached to, or integral with, flyers for temporarily increasing twist in material passing to them
7/48 . . . Eyes or like guiding arrangements (D01H 7/46 takes precedence)
7/50 . . . Interrelated flyer and bobbin drive mechanisms, e.g. winding-on motions for cotton-roving frames (package-building mechanisms D01H 1/36)
7/52 . . Ring-and-traveller arrangements
7/54 . . . with fixed rings
7/56 . . . with freely-rotatable rings; with braked or dragged rings
7/58 . . . with driven rings
7/60 . . . Rings or travellers; Manufacture thereof not otherwise provided for (hand tools for applying travellers to rings D01H 17/02)
7/62 . . . Arrangements providing lubricant for travellers
7/64 . . . Ring supports, e.g. ring rails (poker guides or other rail supports D01H 7/10)
7/66 . . Cap arrangements
7/68 . . . Cap constructions
7/70 . . . Arrangements for supporting caps on spindles
7/72 . . . Bobbin-supporting arrangements, e.g. bobbin rails (poker guides or other rail supports D01H 7/10)
7/74 . . Cup or like arrangements
7/76 . . . Rotary discs
7/78 . . . Constructions of cups, e.g. spinning boxes
7/80 . . . . adapted to collect wet yarns
7/82 . . . Casings or guards for rotary cups or the like
7/84 . . . Spindles or yarn carriers for co-operation with rotary cups (removing yarn from centrifugal cups on to yarn carriers D01H 9/06)
7/86 . . Multiple-twist arrangements, e.g. two-for-one twisting devices
7/88 . . Hollow-spindle arrangements (D01H 7/86 takes precedence)
7/90 . . Arrangements with two or more twisting devices in combination (D01H 7/86, D01H 7/88 take precedence)
7/92 . for imparting transient twist

Common features or details of, or accessories for, spinning or twisting machines of various kinds or types

9/00 Arrangements for replacing or removing bobbins, cores, receptacles, or completed packages at paying-out or take-up stations (arrangements of general interest in the winding of filamentary material B65H)
9/02 . for removing completed take-up packages and replacing by bobbins, cores, or receptacles at take-up stations; Transferring material between adjacent full and empty take-up elements
9/04 . . Doffing arrangements integral with spinning or twisting machines
9/06 . . . Removing yarn from centrifugal cups on to yarn carriers
9/08 . . Doffing arrangements independent of spinning or twisting machines

9/10 . . . Doffing carriages
9/12 . . . Manual cop-tube applying apparatus; Stands for cop-tube applying apparatus
9/14 . . for preparing machines for doffing of yarns (stop motions responsive to delivery of a measured length of material D01H 13/24)
9/16 . . Yarn-severing arrangements
9/18 . for supplying bobbins, cores, receptacles, or completed packages to, or transporting from, paying-out or take-up stations (D01H 9/10 takes precedence)

11/00 **Arrangements for confining or removing dust, fly, or the like** (cleaning of running surfaces in open-end spinning machines D01H 4/22; separation in general B01D; cleaning in general B08B; air-conditioning F24F, e.g. by filtering F24F 3/16) **[5]**

13/00 **Other common constructional features, details, or accessories** (for open-end spinning D01H 4/00) **[5]**
13/02 . Roller arrangements not otherwise provided for
13/04 . Guides for slivers, rovings, or yarns; Smoothing dies (fibre-condensing guides D01H 5/72)
13/06 . . Traversing arrangements
13/08 . Twist arresters
13/10 . Tension devices
13/12 . Arrangements preventing snarls or inadvertent doubling of yarns (suction end-catchers D01H 5/68)
13/14 . Warning or safety devices, e.g. automatic fault detectors, stop motions (warning or safety devices for filamentary material, not intimately associated with spinning or like machines B65H; safety devices of general application F16P; indicating devices of general application G08B)
13/16 . . responsive to reduction in material tension, failure of supply, or breakage, of material
13/18 . . . stopping supply only
13/20 . . responsive to excessive tension or irregular operation of apparatus
13/22 . . responsive to presence of irregularities in running material
13/24 . . responsive to delivery of a measured length of material, completion of winding of a package or filling of a receptacle
13/26 . Arrangements facilitating the inspection or testing of yarns or the like in connection with spinning or twisting
13/28 . Heating or cooling arrangements
13/30 . Moistening, sizing, oiling, waxing, colouring, or drying yarns or the like as incidental measures during spinning or twisting
13/32 . Counting, measuring, recording, or registering devices (in general, see in the appropriate subclass of section G, e.g. G01B)

15/00 **Piecing arrangements** (for open-end spinning machines D01H 4/48; in machines for producing textile fabrics, see the appropriate subclasses) **[5]**
15/007 . for two-for-one twisting machines **[5]**
15/013 . Carriages travelling along the machines **[5]**

17/00 **Hand tools** (cop-tube applying apparatus D01H 9/12)
17/02 . Arrangements for storing ring travellers; Devices for applying travellers to rings

D02 YARNS; MECHANICAL FINISHING OF YARNS OR ROPES; WARPING OR BEAMING

Note

In this class, the following terms are used with the meanings indicated:
– "fibre" means a relatively-short, elongated member of natural or artificial material;
– "filament" means an endless or quasi-endless, elongated member of natural or artificial material;
– "yarn" means a unitary assembly of fibres, usually produced by spinning;
– "thread" means an assembly of yarns or filaments, usually produced by twisting.

D02G CRIMPING OR CURLING FIBRES, FILAMENTS, YARNS, OR THREADS; YARNS OR THREADS

Note

Attention is drawn to the Note following the title of class D02.

1/00 Producing crimped or curled fibres, filaments, yarns, or threads, giving them latent characteristics (yarns per se D02G 3/00; during formation of artificial filaments, threads, or the like D01D 5/22; general aspects of chemical treatment D06M)

1/02 . by twisting, fixing the twist and backtwisting, i.e. by imparting false twist

1/04 . . Devices for imparting false twist

1/06 . . . Spindles

1/08 . . . Rollers

1/10 . using knife edges, e.g. heated knife edges, for edge crimping

1/12 . using stuffer boxes

1/14 . using grooved rollers or gear-wheel-type members

1/16 . using jets or streams of turbulent gases, e.g. air, steam

1/18 . by combining fibres, filaments, or yarns, having different shrinkage characteristics

1/20 . Combinations of two or more of the above-mentioned operations or devices; After-treatments for fixing crimp or curl

3/00 Yarns or threads, e.g. fancy yarns; Processes or apparatus for the production thereof, not otherwise provided for (for producing crimped or curled yarns D02G 1/00)

3/02 . Yarns or threads characterised by the material or by the materials from which they are made

3/04 . . Blended or other yarns or threads containing components made from different materials

3/06 . . Threads formed from strip material other than paper

3/08 . . Paper yarns or threads

3/10 . . Yarns or threads formed from collagenous materials, e.g. catgut

3/12 . . Threads containing metallic filaments or strips

3/14 . . Horse-hair threads

3/16 . . Yarns or threads made from mineral substances

3/18 . . . from glass or the like

3/20 . . . from asbestos

3/22 . Yarns or threads characterised by constructional features

3/24 . . Bulked yarns or threads, e.g. formed from staple fibre components with different relaxation characteristics

3/26 . . with characteristics dependent on the amount or direction of twist

3/28 . . . Doubled, plied, or cabled threads

3/30 . . . Crêped or other highly-twisted yarns or threads

3/32 . . Elastic yarns or threads

3/34 . . Yarns or threads having slubs, knops, spirals, loops, tufts, or other irregular or decorative effects, i.e. effect yarns

3/36 . . Cored or coated yarns or threads (elastic yarns or threads D02G 3/32)

3/38 . . Threads in which fibres, filaments, or yarns are wound with other yarns or filaments (covering endless core threads with fibres by using open-end spinning techniques D01H 4/00)

3/40 . . Yarns in which fibres are united by adhesives; Impregnated yarns or threads

3/42 . . Chenille threads

3/44 . Yarns or threads characterised by the purpose for which they are designed

3/46 . . Sewing-cottons or the like

3/48 . . Tyre cords

D02H WARPING, BEAMING, OR LEASING

Note

Attention is drawn to the Note following the title of class D02.

Subclass index

1/00 Creels, i.e. apparatus for supplying a multiplicity of individual threads

3/00 Warping machines

5/00 Beaming machines

5/02 . combined with apparatus for sizing or other treatment of warps (sizing per se D06B)

7/00 Combined warping and beaming machines

9/00 Leasing

9/02 . Lease rods or bands

11/00 Methods or apparatus not provided for in groups D02H 1/00 to D02H 9/00, e.g. for cleaning the warp

13/00 Details of machines of the other groups of this subclass

13/02 . Stop motions
13/04 . . responsive to breakage, slackness, or excessive tension of threads, with detectors for individual threads or small groups of threads
13/06 . . . mechanical
13/08 . . . electrical
13/10 . . responsive to thread-measuring devices, e.g. stopping the machine when required length of warp has been wound
13/12 . Variable-speed driving mechanisms
13/14 . . controlled automatically by tension in the warp
13/16 . Reeds, combs, or other devices for determining the spacing of threads
13/18 . . with adjustable spacing
13/20 . . with fixed spacing
13/22 . Tensioning devices
13/24 . . for individual threads
13/26 . . for threads in warp form (controlling the driving of beams, or the like, to keep tension constant D02H 13/14)
13/28 . Warp beams (cloth beams D03D 49/20)
13/30 . . with flanges
13/32 . . . adjustable
13/34 . . sectional
13/36 . . Means for attaching warp to beam
13/38 . Storage racks for beams

D02J FINISHING OR DRESSING OF FILAMENTS, YARNS, THREADS, CORDS, ROPES, OR THE LIKE (curling or crimping D02G; by treatment with liquids, gases or vapours D06B; finishing other than by liquid treatment, of yarns in warp or sheet form D06C; for chemical matters, see D06L, D06M, D06P, D06Q; treatment during rope-making, apparatus for treating ropes auxiliary to rope-making D07B)

Note

Attention is drawn to the Note following the title of class D02.

Subclass index

1/00 Modifying the structure or properties resulting from a particular structure; **Modifying, retaining, or restoring the physical form or cross-sectional shape, e.g. by use of dies or squeeze rollers** (modifying only the surface D02J 3/00)

1/02 . Bulking, e.g. looping (by crimping, by curling D02G)
1/04 . Compacting
1/06 . Imparting irregularity, e.g. slubbing or other non-uniform features, e.g. high- and low-shrinkage or strengthened and weakened sections
1/08 . Interlacing constituent filaments without breakage thereof, e.g. by use of turbulent air streams
1/12 . Modifying stretch/bulk properties of textured yarns or the like by after-treatment
1/14 . Rendering uniform or evening non-uniform features

1/16 . Rubbing or similar working, e.g. to redistribute or remove fibres

1/18 . Separating or spreading

1/20 . Stressing or stress-relieving, e.g. by vibration or subjection to electrostatic stress or electric discharge

1/22 . Stretching or tensioning, shrinking or relaxing, e.g. by use of overfeed and underfeed apparatus, or preventing stretch (stretch spinning D01D 5/12)

3/00 Modifying the surface

3/02 . by abrading, scraping, scuffing, cutting, or nicking (preliminary roughening of fibres, e.g. for spinning, D01G 3/00)

3/04 . by brushing

3/06 . by polishing, e.g. glazing, glossing

3/08 . . by compressing, e.g. by calendering or ironing

3/10 . by indenting

3/12 . by removing projecting ends of fibres

3/14 . . by shearing

3/16 . . by singeing

3/18 . Treating with particulate, semi-solid, or solid substances, e.g. wax (during package formation B65H 71/00; waxing yarns or the like as incidental measures during spinning or twisting D01H 13/30)

7/00 Cleaning, e.g. removing dust, loose fibres, charred ends (in combination with the shearing, singeing, or otherwise removing of projecting fibre ends D02J 3/12, D02J 3/14, D02J 3/16)

11/00 Combinations, not covered by any one of groups D02J 1/00 to D02J 7/00, of processes provided for in such groups; **Plant for carrying-out such combinations of processes**

13/00 Heating or cooling the yarn, thread, cord, rope, or the like, not specific to any one of the processes provided for in this subclass (heating, cooling, or drying during spinning or twisting D01H; drying of yarns, or the like, in general F26B)

D03 WEAVING

D03C SHEDDING MECHANISMS; PATTERN CARDS OR CHAINS; PUNCHING OF CARDS; DESIGNING PATTERNS

Subclass index

1/00 Dobbies

1/02 . Single-lift dobbies, i.e. dobbies in which the same draw-knife or equivalent operates for every pick (D03C 1/10 takes precedence)

1/04 . . Open-shed single-lift dobbies

1/06 . Double-lift dobbies, i.e. dobbies in which separate draw-knives or equivalent operate on alternate picks

1/08 . . reversible, i.e. correct sheds open automatically when the loom is driven backwards

1/10 . Centre-shed dobbies, i.e. shed formed by lifting some threads and lowering the others from central shed-closed position

1/12 . Dobbies employing toothed gearing instead of draw-knives

1/14 . Features common to dobbies of different types (stop motions acting on defective operation of shedding mechanisms D03D 51/46)

1/16 . . Arrangements of dobby in relation to loom

1/18 . . Knives; Knife frames

1/20 . . Hooks; Lifters

1/22 . . Needles; Needle boxes; Needle boards

1/24 . . Cylinders; Cylinder battens

1/26 . . Facilitating engagement of lifting-hooks with draw-knives

1/28 . . . by creating and then eliminating back-lash between hooks and knives

1/30 . . . wherein all the hooks are disengaged from the knives, and selected hooks then re-engaged

1/32 . . . wherein all the hooks are engaged with the knives, and unselected hooks then disengaged

1/34 . . Arrangements wherein warp threads pass one another at different heights to avoid congestion

1/36 . . Card- or chain-saving arrangements, e.g. cross-border dobbies

3/00 Jacquards (controlling jacquard by scanning design D03C 17/06; for gripper Axminster looms D03D 39/08)

3/02 . Single-lift jacquards

3/04 . . of open-shed type

3/06 . Double-lift jacquards

3/08 . . of open-shed type

3/10 . Centre-shed jacquards

3/12 . Multiple-shed jacquards, i.e. jacquards which move warp threads to several different heights, e.g. for weaving pile fabrics

3/14 . Jacquards not employing lifting-hooks, e.g. employing knotted cords in conjunction with keyhole slots

3/16 . Verdol or other jacquards having intermediate power-operated needles between reading needles and lifting-hooks

3/18 . Selvedge jacquards

3/20 . Electrically-operated jacquards

3/22 . Fluid-operated jacquards

3/24 . Features common to jacquards of different types

3/26 . . General arrangements of jacquards, or disposition in relation to loom

3/28 . . Pick-finding arrangements; Arrangements for preventing next shed from being opened during stopping of loom

3/30 . . Arrangements wherein hooks are positively operated to close shed

3/32 . . Jacquard driving mechanisms

3/34 . . . Cylinder operating mechanisms

3/36 . . . Griffe operating mechanisms

3/38 . . Comber boards

3/40 . . Constructions of lifting-cords

3/42 . . Arrangements of lifting-cords

3/44 . . Lingoes

5/00 Cam or other direct-acting shedding mechanisms, i.e. operating heald frames without intervening power-supplying devices

5/02 . operated by rotating cams

5/04 . . Construction or shape of cams (cams in general F16H 53/00)

5/06 . operated by cam devices other than rotating cams

7/00 Leno or similar shedding mechanisms

7/02 . Gauze healds

7/04 . Mechanisms having discs oscillating about a weftwise axis and having apertures for warp threads

7/06 . Mechanisms having eyed needles for moving warp threads from side to side of other warp threads

7/08 . Devices for twisting warp threads repeatedly in the same direction

9/00 Healds; **Heald frames** (for leno shedding D03C 7/00)

9/02 . Healds

9/04 . . Metal healds

9/06 . Heald frames

11/00 Selvedge shedding mechanisms not forming part of main shedding mechanism (selvedge jacquards D03C 3/18; leno selvedge mechanism D03C 7/00)

13/00 Shedding mechanisms not otherwise provided for

15/00 Pattern cards or chains

15/02 . Chains of metal, wood, or similar material with projecting pattern-indicating elements

15/04 . Cards or paper perforated to indicate pattern

15/06 . Apparatus for setting pegs in, or removing pegs from, pattern cards

15/08 . Apparatus for interconnecting, e.g. by lacing, or disconnecting pattern cards

17/00 Card-punching apparatus (marking record carriers in digital fashion G06K)

17/02 . manually-controlled, i.e. holes to be punched determined by the operator

17/04 . . power-operated

17/06 . automatic, i.e. design scanned optically or otherwise to control punching apparatus or to control loom jacquard directly

19/00 Methods or devices concerned with designing or making patterns, not provided for in other groups of this subclass

---

D03D WOVEN FABRICS; METHODS OF WEAVING; LOOMS

(1) Class D06 takes precedence over this subclass in respect of processes involving both weaving and finishing steps and in respect of the finished fabrics.

(2) A method of weaving is classified in the group designating the fabric woven unless the method is characterised by the operation of a particular loom rather than by the production of a particular fabric. In this case, the method is classified in the group for the loom.

(3) In this subclass, if there is any doubt as to which of the essential features is the most important (this is usually the most restrictive feature), the groups designating woven fabrics should be considered in the order in which they appear at each level of indentation, except that groups designating woven pile fabrics are to be considered as taking precedence over groups designating other woven fabrics.

Subclass index

Woven fabrics; Methods of weaving other than those characterised by the operation of a particular loom

1/00 Woven fabrics designed to make specified articles

1/02 . Inflatable articles

1/04 . Sack- or bag-like articles

1/06 . Curtain heading tapes

1/08 . Ladder tapes (ladder tapes for venetian blinds E06B 9/382)

3/00 Woven fabrics characterised by their shape

3/02 . Tubular fabrics

3/04 . Endless fabrics

3/06 . Fabrics of varying width

3/08 . Arched, corrugated, or like fabrics

5/00 Selvedges

7/00 Woven fabrics designed to be resilient, i.e. to recover from compressive stress

9/00 Open-work fabrics (ladder-tape fabrics D03D 1/08)

11/00 Double or multi-ply fabrics not otherwise provided for

11/02 . Fabrics formed with pockets, tubes, loops, folds, tucks, or flaps (fabrics for curtain heading tapes D03D 1/06; fabrics consisting of a single tube D03D 3/02)

13/00 Woven fabrics characterised by the special disposition of the warp or weft threads, e.g. with curved weft threads, with discontinuous warp threads, with diagonal warp or weft

15/00 Woven fabrics characterised by the material or construction of the yarn or other warp or weft elements used

15/02 . the warp or weft elements being of stiff material, e.g. wire, cane, slat

15/04 . woven to produce shapes or effects upon differential shrinkage

15/06 . using scaffolding threads, i.e. threads removed after weaving

15/08 . using stretchable or elastic threads (woven fabrics whose elastic or stretch properties are due to the manner of weaving D03D 17/00)

15/10 . using threads having high or low coefficients of friction

15/12 . using heat-resistant or fireproof threads

17/00 Woven fabrics having elastic or stretch properties due to manner of weaving (fabrics using stretchable or elastic threads D03D 15/08)

19/00 Gauze or leno-woven fabrics

21/00 Lappet- or swivel-woven fabrics

23/00 General weaving methods not special to the production of any particular woven fabric or the use of any particular loom; **Weaves not provided for in any other single group**

25/00 Woven fabrics not otherwise provided for

27/00 Woven pile fabrics

27/02 . wherein the pile is formed by warp or weft

27/04 . . Weft pile fabrics

27/06 . . Warp pile fabrics

27/08 . . . Terry fabrics

27/10 . . Fabrics woven face-to-face, e.g. double velvet

27/12 . wherein pile tufts are inserted during weaving

27/14 . . with tufts around warps

27/16 . . with tufts around wefts

27/18 . Chenille fabrics

Looms; **Methods of weaving characterised by the operation of particular looms**

29/00 Hand looms

31/00 Lappet, swivel or other looms for forming embroidery-like decoration on fabrics

33/00 Multiple looms, i.e. two or more looms assembled together, whether or not they have mechanisms in common (D03D 35/00 takes precedence)

35/00 Smallware looms, i.e. looms for weaving ribbons or other narrow fabrics (D03D 47/00 takes precedence)

37/00 Circular looms (looms for weaving separate fabrics disposed in a circle or polygon D03D 33/00)

39/00 Pile-fabric looms

39/02 . Axminster looms, i.e. wherein pile tufts are inserted during weaving

39/04 . . Spool Axminster looms

39/06 . . . Tuft yarn tube or spool frames

39/08 . . Gripper Axminster looms

39/10 . Wire-tapestry looms, e.g. for weaving velvet or Brussels or Wilton carpets, the pile being formed over weftwise wires

39/12 . . Mechanisms for operating the pile wires

39/14 . . Construction of the pile wires, e.g. pile wires which cut

39/16 . Double-plush looms, i.e. for weaving two pile fabrics face-to-face

39/18 . . Separating the two plush layers, e.g. by cutting

39/20 . Looms forming pile over warpwise wires

39/22 . Terry looms

39/24 . Devices for cutting the pile on the loom (pile wires which cut D03D 39/14; separating two plush layers D03D 39/18)

41/00 Looms not otherwise provided for, e.g. for weaving chenille yarn; **Details peculiar to these looms**

43/00 Looms with change-boxes

43/02 . with drop boxes

43/04 . . Operating mechanisms

43/06 . with rotary boxes

43/08 . . Operating mechanisms

43/10 . Weft catchers, i.e. means for preventing entanglement of wefts

45/00 Looms with automatic weft replenishment (automatic replenishment in smallware looms D03D 35/00, in circular looms D03D 37/00; bobbins rewound on loom D03J 1/12)

45/02 . Controlling replenishment

45/04 . . Pirn feelers or other detectors for initiating replenishment (weft stop motions D03D 51/34)

45/06 . . . mechanical

45/08 . . . . of the side-slip type

45/10 . . . electrical

45/12 . . . optical

45/14 . . Storing the need for replenishment or the colour required until the spent shuttle returns to the replenishing end of the loom

45/16 . . . selecting thereby weft of correct colour

45/18 . . Shuttle feelers or other devices for preventing replenishment if shuttle is incorrectly positioned in shuttle box (shuttle stop motions D03D 51/40)

45/20 . Changing bobbins, cops, or other shuttle stock

45/22 . . effected with shuttle in normal shuttle box

45/24 . . effected otherwise than in normal box

45/26 . . Magazines

45/28 . . . for one type of thread, e.g. same colour

45/30 . . . . rotary

45/32 . . . for several types of thread, e.g. multicolour

45/34 . Shuttle changing

45/36 . . fresh shuttle being substituted for spent shuttle in the same cell of shuttle box

45/38 . . Shuttle box with an extra cell which is used only during replenishment

45/40 . . . the spent shuttle being received in the normal cell and the fresh shuttle being picked from the extra cell

45/42 . . . the spent shuttle being received in the extra cell and the fresh shuttle being picked from the normal cell

45/44 . . Magazines

45/46 . . . for one type of thread, e.g. single colour

45/48 . . . for several types of threads, e.g. multicolour

45/50 . Cutting, holding, manipulating, or disposing of, weft ends

45/52 . . Cutting weft of depleted shuttle near shuttle and holding the piece attached to the fabric
45/54 . . Cutting fresh weft and holding the piece attached to the fabric
45/56 . . Cutting depleted and fresh wefts at selvedge
45/58 . . Removing tip bunch or fresh weft end from fresh bobbin
45/60 . . . substantially by air stream or suction
45/62 . . Disposing of waste pieces of cut weft end (D03D 45/58 takes precedence)

47/00 Looms in which bulk supply of weft does not pass through shed, e.g. shuttleless looms, gripper shuttle looms, dummy shuttle looms (circular looms D03D 37/00)
47/02 . wherein loops of continuous weft thread are inserted, i.e. double picks (D03D 47/27 takes precedence) **[3]**
47/04 . . by a reciprocating needle having a permanently-threaded eye
47/06 . . by a pivoted having a permanently-threaded eye
47/08 . . . the path of the needle being modified by cams, linkages, or other means
47/10 . . by a forked needle pushing loop of weft through shed
47/12 . wherein single picks of weft thread are inserted, i.e. with shedding between each pick (D03D 47/27 takes precedence) **[3]**
47/14 . . by a gripper needle taking the end of the weft through the shed
47/16 . . by a gripper needle entering the shed empty and drawing the weft as it retracts
47/18 . . two weft inserters meeting at or near the middle of the shed and transferring the weft from one to the other
47/20 . . Constructional features of the thread-engaging device on the inserters
47/22 . . . adapted for working a loop of weft part-way inserted in the shed and then straightened-out
47/23 . . . Thread grippers (in dummy or gripper shuttles D03J 5/06) **[3]**
47/24 . . by gripper or dummy shuttle (travelling-wave-shed looms D03D 47/26; inserting mechanisms for shuttles D03D 49/24; gripper or dummy shuttles per se D03J 5/06)
47/25 . . . inserted from only one side of loom **[3]**
47/26 . . Travelling-wave-shed looms
47/27 . Drive or guide mechanisms for weft inserting **[3]**
47/28 . wherein the weft itself is projected into the shed
47/30 . . by gas jet
47/32 . . by liquid jet
47/34 . Handling the weft between bulk storage and weft-inserting means
47/36 . . Measuring and cutting the weft
47/38 . . Weft pattern mechanisms
47/39 . wherein cane, straw, slats, material for hair-cloth or similar material is handled **[3]**
47/40 . Forming selvedges
47/42 . . by knitting or interlacing loops of weft
47/44 . . . with additional selvedge thread
47/46 . . by selvedge shuttle or other device passing selvedge thread through loop of weft (by knitting D03D 47/44)
47/48 . . by inserting cut end of weft in next shed, e.g. by tucking, by blowing
47/50 . . by adhesion

49/00 Details or constructional features not peculiar to looms of a particular type (temples D03J 1/22)
49/02 . Construction of loom framework
49/04 . Control of the tension in warp or cloth
49/06 . . Warp let-off mechanisms (construction of warp beam D02H)
49/08 . . . Warp beam brakes
49/10 . . . Driving the warp beam to let the warp off
49/12 . . Controlling warp tension by means other than let-off mechanisms
49/14 . . . Compensating for tension differences during shedding
49/16 . . . Warp supplied by creel
49/18 . . Devices for indicating warp tension (measuring tension of threads in general G01L 5/04)
49/20 . . Take-up motions; Cloth beams (storage racks for beams D02H)
49/22 . . Back rests; Lease rods; Brest beams
49/24 . Mechanisms for inserting shuttle in shed (shuttles per se D03J 5/00)
49/26 . . Picking mechanisms, e.g. for propelling gripper shuttles or dummy shuttles
49/28 . . . Driving mechanisms for the picker stick
49/30 . . . . operated by cam
49/32 . . . . operated by previously-loaded spring or equivalent
49/34 . . . . operated by liquid or gas pressure
49/36 . . . Pickers; Arresting means therefor (check straps D03D 49/40)
49/38 . . . Picking sticks; Arresting means therefor (check straps D03D 49/40)
49/40 . . . Check straps; Lug straps; Similar strap components
49/42 . . whereby the shuttle is propelled by liquid or gas pressure
49/44 . . whereby the shuttle is propelled by electric or magnetic means
49/46 . . wherein the shuttle is pushed or pulled positively (travelling-wave-shed type looms D03D 47/26)
49/48 . . positioning shuttle in readiness for picking
49/50 . . Devices or arrangements concerning insertion of the weft, not otherwise provided for
49/52 . Shuttle boxes (change-boxes D03D 43/00)
49/54 . . Braking means; Swells
49/56 . . . Shuttle relief mechanisms, i.e. reducing shuttle swell pressure before picking
49/58 . Shuttle guards
49/60 . Construction or operation of slay
49/62 . . Reeds mounted on slay
49/64 . . wherein the slay dwells or moves slowly while the weft is being inserted
49/66 . . Shuttle races
49/68 . Reeds or beat-up combs not mounted on the slay (loose reed stop motion D03D 51/42)
49/70 . Devices for cutting weft threads (cutting weft in looms with automatic weft replenishment D03D 45/50; apparatus for slitting fabric D03J 1/08)

51/00 Driving, starting, or stopping arrangements; Automatic stop motions
51/02 . General arrangements of driving mechanism
51/04 . Manual controls
51/06 . using particular methods of stopping
51/08 . . stopping at definite point in weaving cycle, or moving to such point after stopping
51/10 . . stopping suddenly

51/12 . for adjusting speed
51/14 . for reducing speed temporarily
51/16 . for varying speed cyclically
51/18 . Automatic stop motions
51/20 . . Warp stop motions
51/22 . . . mechanical
51/24 . . . . wherein droppers are suspended on individual warp threads or small groups of threads
51/26 . . . . Detector healds
51/28 . . . electrical
51/30 . . . . wherein droppers are suspended on individual warp threads or small groups of threads
51/32 . . . . Detector healds
51/34 . . Weft stop motions
51/36 . . . Centre weft forks
51/38 . . . Side weft forks
51/40 . . Shuttle stop motions
51/42 . . . Loose reed mechanisms
51/44 . . acting on defective operation of loom mechanisms
51/46 . . . of shedding mechanisms

D03J AUXILIARY WEAVING APPARATUS; WEAVERS' TOOLS; SHUTTLES

1/00 Auxiliary apparatus combined with or associated with looms
1/02 . for treating warp, e.g. cleaning, moistening
1/04 . for treating weft
1/06 . for treating fabric (cutting pile on the loom D03D 39/24)
1/08 . . for slitting fabric
1/10 . for indicating pattern to weaver
1/12 . transferring bobbins between loom and winding station (bobbin-winding machines B65H)
1/13 . for leasing warp (leasing in general D02H 9/00) **[2]**
1/14 . Apparatus for threading warp stop-motion droppers, healds, or reeds
1/16 . Apparatus for joining warp ends (knot-tying tools D03J 3/00)
1/18 . . for joining, e.g. tying, a complete series of fresh warp threads to the used warp threads
1/20 . Measuring length of fabric or number of picks woven
1/22 . Temples
1/24 . Mirrors or other arrangements for inspecting loom parts

3/00 Weavers' tools, e.g. knot-tying tools
3/02 . Reed and heald hooks
3/04 . Shuttle-threading tools (threading devices in shuttles D03J 5/20)

5/00 Shuttles (swivel shuttles D03D 31/00; shuttles for smallware looms D03D 35/00; circular loom shuttles D03D 37/00; selvedge shuttles D03D 47/46)
5/02 . Construction of shuttle body
5/04 . . Shuttle tips
5/06 . Dummy shuttles; Gripper shuttles
5/08 . Supports for pirns, bobbins, or cops
5/10 . . Pegs or spindles
5/12 . . . removable
5/14 . . . pivoted
5/16 . . Bobbin clamps, e.g. for automatic bobbin-changing loom shuttles
5/18 . . for coreless cops, i.e. shuttles having no peg or bobbin clamp
5/20 . Devices in shuttles for threading (separate tools for threading shuttles D03J 3/04)
5/22 . . for self-threading, i.e. threading automatically when shuttle is picked
5/24 . Tension devices

D04 BRAIDING; LACE-MAKING; KNITTING; TRIMMINGS; NON-WOVEN FABRICS

D04B KNITTING

(1) In this subclass, groups designating machines, apparatus, devices, or implements include processes characterised by, or dependent on, their use, and the products of such processes.

(2) Knitted products, i.e. fabrics, articles, are classified in this subclass only if they have constructional features which are of interest from the knitting aspect.

Subclass index

Weft knitting; **Machines therefor**

1/00 Weft knitting processes for the production of fabrics or articles not dependent on the use of particular machines; **Fabrics or articles defined by such processes**

1/02 . Pile fabrics or articles having similar surface features
1/04 . . characterised by thread material
1/06 . Non-run fabrics or articles
1/08 . . characterised by thread material
1/10 . Patterned fabrics or articles
1/12 . . characterised by thread material
1/14 . Other fabrics or articles characterised primarily by the use of particular thread materials
1/16 . . synthetic threads
1/18 . . elastic threads
1/20 . . . crimped threads
1/22 . specially adapted for knitting goods of particular configuration
1/24 . . wearing apparel
1/26 . . . stockings
1/28 . . . gloves

3/00 Hand tools or implements for weft knitting

3/02 . Needles
3/04 . Finger protectors; Thread tensioners
3/06 . Ball holders or receptacles

5/00 Weft knitting apparatus or machines without needles for domestic use (with needles D04B 7/08)

7/00 Flat-bed knitting machines with independently-movable needles (straight-bar machines with fixed needles D04B 11/00)

7/02 . with one set of needles
7/04 . with two sets of needles
7/06 . . for purl work or Links-Links loop formation
7/08 . for domestic use
7/10 . with provision for narrowing or widening to produce fully-fashioned goods
7/12 . with provision for incorporating pile threads
7/14 . with provision for incorporating internal threads in laid-in fabrics
7/16 . for producing fabrics consisting of, or incorporating, elastic threads
7/18 . . incorporated as weft or inlaid threads
7/20 . with provision for changing the fabric construction, e.g. from plain to rib-loop fabric
7/22 . with special provision for commencing goods, e.g. with non-run edges
7/24 . for producing patterned fabrics
7/26 . . with colour patterns
7/28 . . with stitch patterns
7/30 . specially adapted for knitting goods of particular configuration
7/32 . . tubular goods
7/34 . . . gloves

9/00 Circular weft knitting machines with independently-movable needles (with fixed spring or bearded needles D04B 13/00)

9/02 . with one set of needles

9/04 . . with spring or bearded needles
9/06 . with needle cylinder and dial for ribbed goods
9/08 . . for interlock goods
9/10 . with two needle cylinders for purl work or for Links-Links loop formation
9/12 . with provision for incorporating pile threads
9/14 . with provision for incorporating loose fibres, e.g. in high-pile fabrics
9/16 . with provision for incorporating internal threads in laid-in fabrics
9/18 . with provision for splicing by incorporating reinforcing threads
9/20 . with provision for narrowing or widening; with reciprocatory action, e.g. for knitting of flat portions
9/22 . with provision for changing the fabric construction, e.g. from plain to rib-loop fabric
9/24 . with special provision for commencing goods, e.g. with non-run edges
9/26 . for producing patterned fabrics
9/28 . . with colour patterns
9/30 . . . by striping
9/32 . . . . by wrap striping
9/34 . . . by plating
9/36 . . . Intarsia work obtained by reciprocatory action
9/38 . . with stitch patterns
9/40 . with provision for transfer of knitted goods from one machine to another
9/42 . specially adapted for producing goods of particular configuration
9/44 . . elongated tubular articles of small diameter, e.g. coverings for cables (sheathing electric cables H01B 13/22)
9/46 . . stockings, or portions thereof
9/48 . . . non-run stockings
9/50 . . . . micromesh stockings
9/52 . . . surgical stockings
9/54 . . . welts, e.g. double or turned welts
9/56 . . . heel or toe portions
9/58 . . gloves

11/00 Straight-bar knitting machines with fixed needles (flat-bed machines with independently-movable needles D04B 7/00)

11/02 . with one set of needles
11/04 . with two sets of needles
11/06 . with provision for narrowing or widening to produce fully-fashioned goods
11/08 . with provision for incorporating pile threads
11/10 . with provision for incorporating internal threads in laid-in fabrics
11/12 . for producing fabrics from, or incorporating, elastic threads
11/14 . with provision for changing the fabric construction, e.g. from plain to rib-loop fabric
11/16 . with special provision for commencing goods, e.g. with non-run edges
11/18 . for producing patterned fabrics
11/20 . . with colour patterns
11/22 . . with stitch patterns
11/24 . with provision for transfer of knitted goods from one machine to another
11/26 . specially adapted for producing goods of particular configuration
11/28 . . stockings, or portions thereof
11/30 . . . non-run stockings
11/32 . . . welts, e.g. double or turned welts
11/34 . . . heel or toe portions
11/36 . . other wearing apparel

13/00 Circular weft knitting machines with fixed spring or bearded needles, e.g. loop-wheel machines (with independently-movable needles D04B 9/00)

13/02 . with horizontal needles

15/00 Details of, or auxiliary devices incorporated in, weft knitting machines, restricted to machines of this kind (details or auxiliary devices not so restricted D04B 35/00)

15/02 . Loop-transfer points
15/04 . . for straight-bar knitting machines
15/06 . Sinkers
15/08 . Needle latch openers; Brushes
15/10 . Needle beds
15/12 . . Shogging devices therefor
15/14 . Needle cylinders
15/16 . . Driving devices for reciprocatory action
15/18 . Dials
15/20 . Needle bars
15/22 . . Driving devices therefor
15/24 . Sinker heads; Sinker bars
15/26 . Slurcocks
15/28 . Needle pressers
15/30 . Driving devices for thread-carrier rods
15/32 . Cam systems or assemblies for operating knitting instruments
15/34 . . for dials
15/36 . . for flat-bed knitting machines
15/38 . Devices for supplying, feeding, or guiding threads to needles
15/40 . . Holders or supports for thread packages
15/42 . . . Frames for assemblies of two or more reels
15/44 . . Tensioning devices for individual threads
15/46 . . . for elastic threads
15/48 . . Thread-feeding devices
15/50 . . . for elastic threads
15/52 . . . for straight-bar knitting machines
15/54 . . Thread guides
15/56 . . . for flat-bed knitting machines
15/58 . . . for circular knitting machines; Thread-changing devices
15/60 . . . . with thread-clamping or -severing devices
15/61 . . . . . arranged within needle circle
15/62 . . . . with thread knotters
15/64 . . . for straight-bar knitting machines
15/66 . Devices for determining or controlling patterns
15/68 . . characterised by the knitting instruments used
15/70 . . . in flat-bed knitting machines
15/72 . . . in straight-bar knitting machines
15/74 . . . Pattern drums
15/76 . . . Pattern wheels
15/78 . . . Electrical devices
15/80 . . characterised by the thread guides used
15/82 . . characterised by the needle cams used
15/84 . . Jacquard cards or mechanisms (stamping apparatus therefor D03C)
15/86 . . . in flat-bed knitting machines
15/88 . Take-up or draw-off devices for knitting products
15/90 . . for flat-bed knitting machines
15/92 . . pneumatic
15/94 . Driving-gear not otherwise provided for

15/96 . . in flat-bed knitting machines
15/98 . . in straight-bar knitting machines
15/99 . . electrically controlled

Repairing or unravelling knitted fabrics

17/00 Repairing knitted fabrics by knitting operations
17/02 . by darning
17/04 . by picking-up dropped stitches

19/00 Unravelling knitted fabrics

Warp knitting; **Machines therefor**

21/00 Warp knitting processes for the production of fabrics or articles not dependent on the use of particular machines; **Fabrics or articles defined by such processes**
21/02 . Pile fabrics or articles having similar surface features
21/04 . . characterised by thread material
21/06 . Patterned fabrics or articles (open-work fabrics D04B 21/10)
21/08 . . characterised by thread material
21/10 . Open-work fabrics
21/12 . . characterised by thread material
21/14 . Fabrics characterised by the incorporation by knitting, in one or more thread, fleece, or fabric layers, of reinforcing, binding, or decorative threads; Fabrics incorporating small auxiliary elements, e.g. for decorative purposes (pile fabrics D04B 21/02; non-woven fabrics in general D04H)
21/16 . . incorporating synthetic threads
21/18 . . incorporating elastic threads
21/20 . specially adapted for knitting articles of particular configuration

23/00 Flat warp knitting machines
23/02 . with two sets of needles
23/04 . with independently-movable knitting needles
23/06 . for producing fabrics consisting of, or incorporating, elastic threads
23/08 . with provision for incorporating pile threads
23/10 . for knitting through thread, fleece, or fabric layers, or around elongated core material
23/12 . with provision for incorporating unlooped wefts extending from selvedge to selvedge
23/14 . with provision for incorporating small auxiliary elements, e.g. for decorative purposes
23/16 . specially adapted for producing fabrics, or article blanks, of particular form or configuration
23/18 . . with provision for narrowing or widening
23/20 . . for producing stocking blanks
23/22 . with special thread-guiding means
23/24 . with cut needle presser arrangements to produce patterns

25/00 Warp knitting machines not otherwise provided for
25/02 . Tubular machines
25/04 . Milanese machines
25/06 . Galloon crocheting machines
25/08 . . for producing pile fabrics
25/10 . . for producing patterned fabrics
25/12 . . . with independently-movable weft-thread guides controlled by Jacquard mechanisms
25/14 . . specially adapted for producing articles of particular configuration

27/00 Details of, or auxiliary devices incorporated in, warp knitting machines, restricted to machines of this kind (details or auxiliary devices not so restricted D04B 35/00)
27/02 . Warp-thread guides
27/04 . Sinkers
27/06 . Needle bars; Sinker bars
27/08 . . Driving devices therefor
27/10 . Devices for supplying, feeding, or guiding threads to needles
27/12 . . Tensioning devices for individual threads
27/14 . . Thread tensioning rod arrangements
27/16 . . Warp beams; Bearings therefor
27/18 . . . Warp beam braking devices for thread tensioning
27/20 . . . Warp beam driving devices
27/22 . . . . electrically controlled
27/24 . . Thread guide bar assemblies
27/26 . . . Shogging devices therefor
27/28 . . . . with arrangements to reduce the number of members of pattern chains
27/30 . . . . with driving-gear comprising force-multiplication devices
27/32 . . . with independently-movable thread guides controlled by Jacquard mechanisms
27/34 . Take-up or draw-off devices for knitted products
27/36 . . with temples

Crocheting; **Apparatus therefor**

31/00 Crocheting processes for the production of fabrics or articles
31/02 . Crocheted strips or threads

33/00 Crocheting tools or apparatus (galloon crocheting machines for warp knitting D04B 25/06)

35/00 Details of, or auxiliary devices incorporated in, knitting machines, not otherwise provided for
35/02 . Knitting tools or instruments not provided for in group D04B 15/00 or D04B 27/00 (needle manufacture B21G 1/00)
35/04 . . Latch needles
35/06 . . Sliding-tongue needles
35/08 . . Spring or bearded needles
35/10 . Indicating, warning, or safety devices, e.g. stop motions
35/12 . . responsive to thread consumption
35/14 . . responsive to thread breakage
35/16 . . . with detectors associated with a series of threads
35/18 . . responsive to breakage, misplacement, or malfunctioning of knitting instruments
35/20 . . responsive to defects, e.g. holes in knitted products
35/22 . Devices for preparatory treatment of threads
35/24 . . by moistening or lubricating
35/26 . . by heating
35/28 . Devices for lubricating machine parts (in general F16N)
35/30 . Devices for controlling temperature of machine parts
35/32 . Devices for removing lint or fluff
35/34 . Devices for cutting knitted fabrics
35/36 . Devices for printing, coating, or napping knitted fabrics

37/00 **Auxiliary apparatus or devices for use with knitting machines** (Jacquard cards, pattern chains, apparatus for punching same D03C)
37/02 . with weft knitting machines
37/04 . . for inserting or adjusting pattern pins or like elements in pattern drums or wheels
37/06 . with warp knitting machines

39/00 **Knitting processes, apparatus or machines, not otherwise provided for**
39/02 . with work carrier in screw form
39/04 . adapted for combined weft and warp knitting
39/06 . adapted for combined knitting and weaving
39/08 . Sewing machines modified for knitting

D04C **BRAIDING OR MANUFACTURE OF LACE, INCLUDING BOBBIN-NET OR CARBONISED LACE**; **BRAIDING MACHINES**; **BRAID**; **LACE** (machines for making soles from strips of material A43D 29/00; cane working B27J 1/00)

1/00 **Braid or lace, e.g. pillow-lace**; **Processes for the manufacture thereof**
1/02 . made from particular materials
1/04 . . Carbonised or like lace
1/06 . Braid or lace serving particular purposes
1/08 . . Tulle fabrics
1/10 . . . Pattern tulle fabrics
1/12 . . Cords, lines, or tows

3/00 **Braiding or lacing machines**
3/02 . with spool carriers guided by track plates or by bobbin heads exclusively
3/04 . . with spool carriers guided and reciprocating in non-endless paths
3/06 . . with spool carriers moving always in the same direction in endless paths
3/08 . . with means for superimposing threads or braids
3/10 . . with means for forming edge loops, ears, or eyes
3/12 . . with means for introducing core threads
3/14 . . Spool carriers
3/16 . . . for horizontal spools
3/18 . . . for vertical spools
3/20 . . Arrangement of bobbin heads and guides or track plates in the machine
3/22 . . Guides or track plates (with means for controlling spool carriers D04C 3/24)
3/24 . . Devices for controlling spool carriers to obtain patterns, e.g. devices on guides or track plates
3/26 . . . by stopping bobbin heads
3/28 . . . by stopping only the spool carrier
3/30 . . . by controlling switches of guides or track plates
3/32 . . Pattern input
3/34 . . Beater or beat-up mechanisms
3/36 . . Frames
3/38 . . Driving-gear; Starting or stopping mechanisms
3/40 . for making tubular braids by circulating strand supplies around braiding centre at equal distances
3/42 . . with means for forming sheds by controlling guides for individual threads
3/44 . . with means for forming sheds by subsequently diverting various threads using the same guiding means
3/46 . . with thread carriers supported on rolls
3/48 . Auxiliary devices

5/00 **Twist or bobbin-net lace-making machines** (bobbins B65H 75/02)
5/02 . Net looms for tulle fabrics
5/04 . Net or lace curtain machines
5/06 . Machines for making twist-lace fabrics
5/08 . Bobbin carriages
5/10 . Bobbin-carriage guides; Drives for swinging bobbin carriages
5/12 . Drives for advancing bobbin carriages
5/14 . . Pattern input
5/16 . Warp thread feeding or guiding devices
5/18 . . Guide bars; Guiding means therefor; Pattern input by control thereof
5/20 . . Jacks or pickers; Pattern input by control thereof
5/22 . Delivery devices
5/24 . Driving-gear; Starting or stopping mechanisms
5/26 . Auxiliary devices

7/00 **Tools or apparatus for braiding or lacing by hand**

D04D **TRIMMINGS**; **RIBBONS, TAPES, OR BANDS, NOT OTHERWISE PROVIDED FOR** (fittings or trimmings for hats, e.g. hat bands, A42C 5/00; decorating art B44; yarns or threads D02G; weaving D03; braid or lace D04C; non-woven fabrics D04H)

Note

In this subclass, the following term is used with the meaning indicated:
– "trimmings" means decorative or ornamental articles made wholly or partly of textile or analogous material, or strips of textile or analogous material intended to be used for decorative or ornamental purposes, not otherwise provided for.

1/00 **Ropes or like decorative or ornamental elongated trimmings made from filamentary material** (ropes or cords in general D07B)
1/02 . by twisting strands around centrally arranged cores
1/04 . by threading or stringing pearls or beads on filamentary material

3/00 **Chenille trimmings** (chenille yarns D02G; making chenille trimmings by weaving D03D)

5/00 **Fringes** (tasselled D04D 7/08)

7/00 **Decorative or ornamental textile articles**
7/02 . Flat articles

7/04 . Three-dimensional articles (ornamental buttons A44B 1/04)
7/06 . . Ball-like tufts, e.g. pompons
7/08 . . Tassels or tasselled fringes
7/10 . . Decorative bow structures (neckties with ready-made knots or bows A41D 25/02)

9/00 Ribbons, tapes, welts, bands, beadings, or other decorative or ornamental strips, not otherwise provided for (made by laminating B32B; binders for packaging purposes B65D; adhesive tape C09J 7/02; made by weaving D03; made by braiding D04C)
9/02 . made by lengthwise folding of fabric strip
9/04 . built-up from several strips or elements
9/06 . made by working plastics

11/00 Ribbon-threading apparatus or devices (needles D05B)

D04G MAKING NETS BY KNOTTING OF FILAMENTARY MATERIAL; **MAKING KNOTTED CARPETS OR TAPESTRIES**; **KNOTTING NOT OTHERWISE PROVIDED FOR** (binding knotters for harvesters A01D 59/04; wire netting B21F; tying articles by knotting B65B; knotting in association with winding or unwinding B65H 69/00; knotting in weaving D03J; making nets, carpets, or tapestries by other techniques, see the relevant subclasses)

1/00 Making nets by knotting of filamentary material
1/02 . in machines
1/04 . . using a single thread
1/06 . . using a single thread and a series of threads
1/08 . . using two series of threads

3/00 Making knotted carpets or tapestries
3/02 . by hand; Tools therefor
3/04 . in machines

5/00 Knotting not otherwise provided for

D04H MAKING TEXTILE FABRICS, E.G. FROM FIBRES OR FILAMENTARY MATERIAL (weaving D03; knitting D04B; braiding D04C; net-making D04G; sewing D05B; tufting D05C; finishing non-woven fabrics D06); **FABRICS MADE BY SUCH PROCESSES OR APPARATUS, E.G. FELTS, NON-WOVEN FABRICS**; **COTTON-WOOL**; **WADDING** (non-woven fabrics having an intermediate or external layer of a different kind, e.g. of woven fabric, B32B)

(1) In this subclass, the following expression is used with the meaning indicated:
– "non-woven fabrics" means fabrics formed wholly or partly of textile material by processes comprising operations other than the weaving, knitting, braiding, lacing, or knotting of yarns, threads, or filaments for which provision is made in other subclasses of section D. This expression includes felts, cotton-wool and wadding.

(2) In this subclass:
– some of the non-woven fabrics can also be regarded as "layered products" within the meaning of subclass B32B, and further classification in that subclass should be considered in accordance with the notes thereto;
– in cases where the making of non-woven fabrics involves the use of particular chemical compounds or compositions, e.g. for treating or bonding fibres, filaments, or yarns, further classification in other appropriate subclasses should also be considered.

(3) By varying the proportions of fibres or threads, and the chemical compounds or compositions, the final products may be given the appearance of paper, cardboard, leather, or the like.

Subclass index

Kinds or types of non-woven fabrics; **Apparatus or processes for making such products**

1/00 Non-woven fabrics formed wholly or mainly of staple fibres or like relatively short fibres
1/02 . Cotton-wool; Wadding (carding D01G)
1/04 . from fleeces or layers composed of fibres having existing or potential cohesive properties, e.g. natural fibres, prestretched or fibrillated artificial fibres (felting apparatus D04H 17/00)
1/06 . . by treatment to produce shrinking, swelling, crimping, or curling of fibres (curling or crimpling of fibres, filaments, or yarns D02G 1/00)
1/08 . . and hardened by felting; Felts or felted products
1/10 . . . Felts made from mixtures of fibres
1/12 . . . . and incorporating artificial organic fibres
1/14 . . . . and incorporating inorganic fibres
1/16 . . . Laminated felts in which the separate layers are united by a felting process

1/20 . . . Felts incorporating inserts or attachments, e.g. for ornamental purposes
1/22 . . . Three-dimensional articles formed by felting processes
1/24 . . . Covers felted on to three-dimensional articles
1/40 . from fleeces or layers composed of fibres without existing or potential cohesive properties
1/42 . . characterised by the use of certain kinds of fibres insofar as this use has no preponderant influence on the consolidation of the fleece
1/44 . . the fleeces or layers being consolidated by mechanical means, e.g. by rolling
1/45 . . . by forming intermeshing loops or stitches from some of the fibres (knitting D04B; sewing D05B) **[4]**
1/46 . . . by needling or like operations to cause entanglement of fibres (D04H 1/45 takes precedence; needling machines D04H 18/00) **[4]**
1/48 . . . . in combination with at least one other method of consolidation, e.g. with application of bonding agents
1/50 . . . by treatment to produce shrinking, swelling, crimping, or curling of fibres (curling or crimping of fibres, filaments, or yarns D02G 1/00)
1/52 . . . by applying or inserting filamentary binding elements (knitting D04B; sewing D05B)
1/54 . . by welding together the fibres, e.g. by partially melting or dissolving (in combination with needling D04H 1/48)
1/56 . . . in association with fibre formation, e.g. immediately following extrusion of staple fibres
1/58 . . by applying, incorporating, or activating chemical or thermoplastic bonding agents, e.g. adhesives (in combination with needling D04H 1/48)
1/60 . . . the bonding agent being applied in dry state, e.g. thermo-activatable agents in solid or molten state, and heat being applied subsequently
1/62 . . . . at spaced points or locations
1/64 . . . the bonding agent being applied in wet state, e.g. chemical agents in dispersions or solutions
1/66 . . . . at spaced points or locations (D04H 1/68 takes precedence)
1/68 . . . . the bonding agent being applied in the form of foam
1/70 . characterised by the method of forming fleeces or layers, e.g. reorientation of fibres (lap-forming devices D01G 25/00; paper web-making by wet methods D21F, D21H) **[4]**
1/72 . . the fibres being randomly arranged
1/74 . . the fibres being orientated, e.g. in parallel

3/00 Non-woven fabrics formed wholly or mainly of yarns or like filamentary material of substantial length

3/02 . characterised by the method of forming fleeces or layers, e.g. reorientation of yarns or filaments (lap-forming devices D01G 25/00; paper web-making by wet methods D21F, D21H) **[4]**
3/03 . . at random
3/04 . . in rectilinear paths, e.g. crossing at right angles
3/05 . . in another pattern, e.g. zig-zag, sinusoidal
3/07 . . otherwise than in a plane, e.g. in a tubular way
3/08 . characterised by the method of strengthening or consolidating
3/10 . . with bonds between yarns or filaments made mechanically (needling machines D04H 18/00; knitting D04B; sewing D05B)
3/12 . . with filaments or yarns secured together by chemical or thermo-activatable bonding agents, e.g. adhesives, applied or incorporated in liquid or solid form
3/14 . . with bonds between thermoplastic yarns or filaments produced by welding
3/16 . . . with bonds between thermoplastic filaments produced in association with filament formation, e.g. immediately following extrusion **[4]**

5/00 Non-woven fabrics formed of mixtures of relatively-short fibres and yarns or like filamentary material of substantial length

5/02 . strengthened or consolidated by mechanical methods, e.g. needling (needling machines D04H 18/00; knitting D04B; sewing D05B)
5/04 . strengthened or consolidated by applying or incorporating chemical or thermo-activatable bonding agents in solid or liquid form
5/06 . strengthened or consolidated by welding-together thermoplastic fibres, filaments, or yarns
5/08 . characterised by the method of forming fleeces or layers, e.g. reorientation of fibres or yarns (lap-forming devices D01G 25/00; paper web-making by wet methods D21F, D21H) **[4]**

11/00 Non-woven pile fabrics (layered products forming non-woven pile fabrics B32B; woven pile fabrics D03D; tufting D05C)

11/04 . formed by zig-zag folding of a fleece or layer of staple fibres, filaments, or yarns, strengthened or consolidated at the folds
11/08 . formed by creation of a pile on at least one surface of a non-woven fabric without addition of pile-forming material, e.g. by needling, by differential shrinking (needling machines D04H 18/00)

13/00 Other non-woven fabrics

13/02 . Production of non-woven fabrics by partial defibrillating of oriented thermoplastics films **[4]**

17/00 Felting apparatus

17/10 . for felting between rollers, e.g. heated rollers
17/12 . . Multi-roller apparatus

18/00 Needling machines

D05 SEWING; EMBROIDERING; TUFTING

D05B **SEWING** (appliances for the tailoring trade A41H; sewing tables A47B 29/00; sewing in bookbinding B42B 2/00; sewing machines modified for knitting D04B 39/08)

Note

In this subclass, the groups designating sewing apparatus or machines cover also sewing processes dependent on their use, and the thread seams produced thereby.

Subclass index

1/00 General types of sewing apparatus or machines without mechanism for lateral movement of the needle or the work or both

1/02 . for making single-thread seams

1/04 . . Running-stitch seams

1/06 . . Single chain-stitch seams

1/08 . for making multi-thread seams

1/10 . . Double chain-stitch seams

1/12 . . Lock-stitch seams

1/14 . . Combined or alternative chain-stitch and lock-stitch seams

1/16 . . Pseudo-lock-stitch seams in which the thread loops do not positively interlock (shoe or welt sewing machines D05B 15/02)

1/18 . . Seams for protecting or securing edges (zig-zag sewing machines D05B 3/02, D05B 3/04)

1/20 . . . Overedge seams

1/22 . . . . combined with joining or securing seams

1/24 . for making blind-stitch seams

1/26 . for making fluid-tight seams (sewing machines for concurrently making thread and welded seams D05B 17/00)

Special-purpose or automatic sewing apparatus or machines

3/00 **Sewing apparatus or machines with mechanism for lateral movement of the needle or the work or both for making ornamental pattern seams, for sewing buttonholes, for reinforcing openings, or for fastening articles, e.g. buttons, by sewing** (programme-controlled sewing machines D05B 19/00; with devices for automatically controlling movement of work-carrier D05B 21/00) **[6]**

3/02 . with mechanisms for needle-bar movement

3/04 . with mechanisms for work feed

3/06 . for sewing buttonholes (buttonholes A41F 1/02)

3/08 . . for buttonholes with eyelet ends

3/10 . for making piped openings

3/12 . for fastening articles by sewing

3/14 . . perforated or press buttons

3/16 . . shank buttons

3/18 . . hooks or eyelets

3/20 . . labels (labelling fabrics otherwise than by sewing B65C 5/00; labels or securing means therefor, in general G09F 3/00)

3/22 . . Article-, e.g. button-, feed mechanisms therefor

3/24 . formed by general-purpose sewing machines modified by attachments, e.g. by detachable devices

5/00 **Sewing machines for temporarily connecting articles, e.g. pairs of socks**

7/00 **Linking machines, e.g. for joining knitted fabrics**

9/00 **Hem-stitch sewing machines**

11/00 **Machines for sewing quilts or mattresses** (control of workpiece-holding frames, or of sewing machines, in order to obtain particular seam configuration D05B 21/00)

13/00 **Machines for sewing sacks**

13/02 . for closing filled bags or sacks (combined with bag- or sack-filling apparatus B65B)

15/00 **Machines for sewing leather goods** (making pseudo-lock-stitch seams D05B 1/16)

15/02 . Shoe sewing machines

15/04 . . for lock-stitch work (D05B 15/08 takes precedence)

15/06 . . Welt sewing machines

15/08 . . . for lock-stitch work

15/10 . . Lining sewing machines

17/00 **Sewing machines for concurrently making thread and welded seams** (for making non-welded fluid-tight seams D05B 1/26)

19/00 **Programme-controlled sewing machines** (with devices for automatically controlling movement of work-carrier D05B 21/00; devices for stopping drive when sewing tools have reached a predetermined position D05B 69/22)

19/02 . Sewing machines having electronic memory or micro-processor control unit **[6]**

19/04 . . characterised by memory aspects **[6]**

19/06 . . . Physical exchange of memory **[6]**

19/08 . . . Arrangements for inputting stitch or pattern data to memory **[6]**

19/10 . . . Arrangements for selecting combinations of stitch or pattern data from memory **[6]**

19/12 . . characterised by control of operation of machine **[6]**

19/14 . . . Control of needle movement, e.g. varying amplitude or period of needle movement **[6]**

19/16 . . . Control of workpiece movement, e.g. modulation of travel of feed dog **[6]**

21/00 **Sewing machines with devices for automatically controlling movement of work-carrier relative to stitch-forming mechanism in order to obtain particular configuration of seam, e.g. programme-controlled for sewing collars, for attaching pockets**

23/00 **Sewing apparatus or machines not otherwise provided for** (for making zip closures A44B 19/00)

25/00 **Sewing units consisting of combinations of several sewing machines**

Sewing-machine elements for feeding, positioning, handling, or treating the work

27/00 **Work-feeding means for sewing machines**

27/02 . with feed dogs having horizontal and vertical movements

27/04 . . arranged above the workpieces

27/06 . . arranged above and below the workpieces

27/08 . . with differential feed motions

27/10 . with rotary circular feed members

27/12 . . rotating continuously

27/14 . . rotating discontinuously

27/16 . . with differential feed motions

27/18 . . Feed cups

27/20 . constituted by sewing needles

27/22 . with means for setting length of stitch

27/24 . Feed-dog lifting and lowering devices

27/26 . in machines for sewing leather

29/00 **Pressers or presser feet for sewing machines** (for feeding D05B 27/04)

29/02 . Presser-control devices

29/04 . Pressers in machines for sewing leather

29/06 . Presser feet

29/08 . . comprising relatively-movable parts

29/10 . . with rollers

29/12 . Presser-foot attachment

31/00 **Workpiece holders or hold-downs in machines for sewing leather**

31/02 . Welt guides

33/00 **Devices incorporated in sewing machines for supplying or removing the work**

33/02 . and connected, for synchronous operation, with the work-feeding devices of the sewing machine

35/00 **Work-feeding or work-handling elements for sewing machines, not otherwise provided for**

35/02 . for facilitating seaming; Hem-turning elements; Hemmers

35/04 . . with movable tools

35/06 . for attaching bands, ribbons, strips, or tapes or for binding

35/08 . for ruching, gathering, casing, or filling lace, ribbons, or bindings; Pleating devices; Cuttlers; Gathering feet; Crimpers; Curlers; Rufflers

35/10 . Edge guides

35/12 . Indicators for positioning work, e.g. with graduated scales

37/00 Devices incorporated in sewing machines for slitting, grooving, or cutting (severing sewing-threads D05B 65/00)
37/02 . Slitting or grooving devices
37/04 . Cutting devices
37/06 . . with oscillating tools
37/08 . . with rotatable tools
37/10 . . with heated tools

39/00 Workpiece carriers for sewing machines (for automatically controlling movement of work-carrier to obtain particular configuration of seam D05B 21/00; in general A41H 15/00)

41/00 Work-collecting devices for sewing machines

Sewing-machine elements for supplying, handling, or treating thread material

43/00 Spool-pin assemblies incorporated in sewing machines

45/00 Applications of measuring devices for determining the length of threads used in sewing machines (measuring devices in embroidery machines D05C, in general G01B)

47/00 Needle-thread tensioning devices for sewing machines; **Applications of tensometers in sewing machines**
47/02 . Manually-controlled tensioning devices
47/04 . Automatically-controlled tensioning devices
47/06 . Applications of tensometers (application of tension indicators in handling thin or filamentary material B65H 59/40; for embroidery machines D05C 11/08; tensometers in general G01L)

49/00 Take-up devices, e.g. levers, for the needle thread of sewing machines
49/02 . operated by cams or linkages
49/04 . rotary
49/06 . for machines for sewing leather

51/00 Applications of needle-thread guards in sewing machines; **Thread-break detectors for sewing machines** (for embroidery machines D05C 11/00)

53/00 Thread- or cord-laying mechanisms for sewing machines; **Thread fingers for sewing machines**

55/00 Needle holders for sewing machines; **Needle bars for sewing machines** (needles D05B 85/00)
55/02 . Devices for fastening needles to needle bars
55/04 . Devices for inserting needles
55/06 . Needle guides; Needle protectors (finger-protecting devices D05B 83/00)
55/08 . Driving arrangements for curved needles
55/10 . Needle bars for multiple-needle sewing machines
55/12 . . with provision for varying the distance between the needles
55/14 . Needle-bar drives
55/16 . . with provision for disengaging individual needle bars

57/00 Loop takers, e.g. loopers, for sewing machines
57/02 . for chain-stitch sewing machines, e.g. oscillating
57/04 . . rotary
57/06 . for overedge-stitch sewing machines
57/08 . for lock-stitch sewing machines
57/10 . . Shuttles
57/12 . . . oscillating
57/14 . . . with rotary hooks
57/16 . . . with bobbin casings guided in tracks
57/18 . . . with bobbin casings held by removable caps
57/20 . . . with bobbin casings held by magnetic forces
57/22 . . with spool-size bobbin for lower thread
57/24 . . . with lower-thread packages mounted for controlled sliding movements
57/26 . Bobbin holders or casings; Bobbin holder or case guards; Bobbin discharge devices
57/28 . Applications of bobbins for storing the lower thread
57/30 . Driving-gear for loop takers
57/32 . . in chain-stitch sewing machines
57/34 . . in overedge-stitch sewing machines
57/36 . . in lock-stitch sewing machines
57/38 . . . Shuttle drives

59/00 Applications of bobbin-winding or -changing devices in sewing machines; **Indicating or control devices associated therewith**
59/02 . Devices for determining or indicating the length of thread still on the bobbin
59/04 . Devices for changing the bobbin

61/00 Loop holders; **Loop spreaders for sewing machines**; **Stitch-forming fingers for sewing machines**

63/00 Devices associated with the loop-taker thread of sewing machines, e.g. for tensioning
63/02 . Loop-taker thread take-up levers
63/04 . Loop-taker thread guards

65/00 Devices for severing the needle or lower thread in sewing machines
65/02 . controlled by the sewing mechanisms
65/04 . controlled by the workpieces
65/06 . and for disposing of the severed thread end

67/00 Devices incorporated in sewing machines for lubricating, waxing, or colouring the threads

Driving-gear, control, lubricating, or cooling devices for sewing machines

69/00 Driving-gear or control devices for sewing machines
69/02 . Mechanical drives
69/04 . . Manual drives
69/06 . . Pedal drives
69/08 . Fluid drives, e.g. pneumatic
69/10 . Electrical or electromagnetic drives
69/12 . . using rotary electric motors
69/14 . Devices for changing speed or for reversing direction of rotation
69/16 . . mechanical
69/18 . . electric
69/20 . Control devices responsive to the number of stitches made
69/22 . Devices for stopping drive when sewing tools have reached a predetermined position (electric motor control systems in general H02P)
69/24 . . Applications of devices for indicating or ascertaining sewing-tool position
69/26 . . with automatic means to reduce speed of drive, e.g. in one or more steps
69/28 . Applications of servo devices for tool-positioning purposes
69/30 . Details (work-feeding drives D05B 27/00; needle-bar drives D05B 55/14; loop-taker drives D05B 57/30)

69/32 . . Vibration-minimising devices
69/34 . . Hand-wheel clutches
69/36 . Devices for stopping drive when abnormal conditions occur, e.g. thread breakage

71/00 Lubricating or cooling devices for sewing machines
71/02 . Loop-taker lubricating devices
71/04 . Needle cooling devices

Casings, supports, covers, or accessories for sewing machines; Sewing machines combined with auxiliary devices serving purposes other than sewing

73/00 Casings for sewing machines
73/02 . Upper casings
73/04 . Lower casings
73/06 . . for free-arm sewing machines
73/08 . . for column-type sewing machines
73/10 . . Devices for converting free-arm sewing machines into flat-bed machines
73/12 . . Slides; Needle plates

75/00 Frames, stands, tables, or other furniture adapted to carry sewing machines (furniture aspects A47B, A47C)
75/02 . for drop-head sewing machines
75/04 . with noise-suppressing devices
75/06 . Arrangements, e.g. hinges, for mounting sewing-machine casings to frames, stands, or tables

77/00 Covers, or portable enclosures, for sewing machines

79/00 Incorporations or adaptations of lighting equipment for sewing machines

81/00 Sewing machines incorporating devices serving purposes other than sewing, e.g. for blowing air, for grinding

83/00 Guards or like devices for preventing injury to operator of sewing machines (machine safety devices in general F16P)

Needles; Needle threaders; Seam-ripping devices

85/00 Needles (surgical needles A61B 17/06; manufacture of needles B21G 1/00)
85/02 . with slotted eyes
85/04 . Spring or bearded needles
85/06 . Curved needles
85/08 . Flexible needles
85/10 . Hollow needles
85/12 . Coated needles
85/14 . Latch needles

87/00 Needle-threading devices
87/02 . with mechanical means for moving thread through needle eye
87/04 . with optical devices to assist threading

89/00 Seam-ripping devices

Hand sewing

91/00 Tools, implements, or accessories for hand sewing (needles, needle threaders D05B 85/00, D05B 87/00; appliances for the tailoring trade A41H)
91/02 . Bodkins
91/04 . Thimbles; Finger shields; Palm protectors
91/06 . Work holders or supports
91/08 . . Mushrooms; Darning eggs
91/10 . . Hoops or frames (for embroidery D05C)
91/12 . Tool receptacles
91/14 . Thread-spool pins
91/16 . Thread-spool receptacles

93/00 Stitches; Stitch seams for hand sewing
93/02 . strengthened by auxiliary elements, e.g. rivets, staples

95/00 Preparatory or finishing operations in connection with hand sewing
95/04 . Softening material prior to sewing
95/06 . Flattening, pounding, or pressing stitched seams (in shoemaking A43D 8/44)

97/00 Hand sewing processes or apparatus for special work or not otherwise provided for
97/02 . Hand-guided apparatus
97/04 . for darning
97/06 . . using apparatus with latch or bearded needles
97/08 . using special threads or wires
97/10 . for attaching buttons or fasteners
97/12 . for attaching patches or like small pieces of fabric

D05C EMBROIDERING (programme-controlled sewing machines with embroidering capability D05B 19/00, D05B 21/00); **TUFTING** (making non-woven fabrics D04H; sewing D05B)

Subclass index

1/00 Apparatus, devices, or tools for hand embroidering
1/02 . Work frames
1/04 . . circular
1/06 . Needles specially adapted for hand embroidering (sewing needles D05B 85/00); Holders for needles or threads
1/08 . Patterns for hand embroidering; Manufacture thereof

Embroidering machines

3/00 General types of embroidering machines
3/02 . with vertical needles
3/04 . with horizontal needles

5/00 Embroidering machines with arrangements for automatic control of a series of individual steps
5/02 . by electrical or magnetic control devices
5/04 . by input of recorded information, e.g. on perforated tape
5/06 . . with means for recording the information

7/00 Special-purpose or automatic embroidering machines
7/02 . with accessories for peculiar kinds of embroidery
7/04 . for boring or jogging
7/06 . for embroidering festoons
7/08 . for attaching cords, tapes, bands, or the like
7/10 . for separating and burning-off parts of the base fabric (making patterns or designs on fabrics by singeing or etching D06C 23/02)
7/12 . for making cotton buttons

9/00 Appliances for holding or feeding the base fabric in embroidering machines
9/02 . in machines with vertical needles
9/04 . . Work holders, e.g. frames
9/06 . . . Feeding arrangements therefor, e.g. influenced by patterns, operated by pantographs
9/08 . in machines with horizontal needles
9/10 . . Work holders or carriers
9/12 . . . Holding or stretching arrangements for the base fabric in embroidery work holders
9/14 . . . Suspension or balancing arrangements therefor
9/16 . . . Feeding arrangements therefor
9/18 . Movement of the base fabric in one of the two directions controlled by embroidering needles
9/20 . Movement of the base fabric controlled by the presser feet; Driving arrangements therefor
9/22 . Adjusting or registering devices for the base fabric, e.g. for alignment with respect to the needles

11/00 Devices for guiding, feeding, handling, or treating the threads in embroidering machines; **Machine needles**; **Operating or control mechanisms therefor**
11/02 . Machine needles
11/04 . . Arrangements for fastening or inserting in bars or carriers
11/06 . . Needle-driving or control mechanisms
11/08 . Thread-tensioning arrangements
11/10 . . Guides, e.g. resilient
11/12 . . Rollers
11/14 . . Stop motions responsive to thread tension or breakage
11/16 . Arrangements for repeating thread patterns or for changing threads
11/18 . Shuttles
11/20 . Arrangements for cutting the needle or lower threads
11/22 . Arrangements for cutting-out broken threads
11/24 . incorporating devices for dyeing or impregnating the threads

13/00 Auxiliary devices incorporated in embroidering machines, not otherwise provided for; **Ancillary apparatus for use with embroidering machines**
13/02 . Counting, measuring, indicating, warning, or safety devices
13/04 . Lubricating devices
13/06 . Apparatus for filling or threading shuttles

15/00 Making pile fabrics or articles having similar surface features by inserting loops into a base material (layered products B32B; non-woven pile fabrics D04H 11/00)
15/02 . Rooting of hair in doll heads or wigs (wigs A41G 3/00; hair or wigs for doll heads A63H 3/44)
15/04 . Tufting
15/06 . . Hand tufting needles
15/08 . . Tufting machines
15/10 . . . operating with a plurality of needles, e.g. in one row
15/12 . . . . in more than one row
15/14 . . . Arrangements or devices for holding or feeding the base material (D05C 15/26 takes precedence)
15/16 . . . Arrangements or devices for manipulating threads (D05C 15/26 takes precedence)
15/18 . . . . Thread feeding or tensioning arrangements
15/20 . . . . Arrangements or devices, e.g. needles, for inserting loops; Driving mechanisms therefor
15/22 . . . . Loop-catching arrangements, e.g. loopers; Driving mechanisms therefor
15/24 . . . . Loop cutters; Driving mechanisms therefor
15/26 . . . with provision for producing patterns
15/28 . . . . by moving the base material laterally
15/30 . . . . by moving the tufting tools laterally
15/32 . . . . by altering the loop length
15/34 . . . . by inserting loops of different nature or colour
15/36 . . . . by selective cutting of loops
15/38 . by passing thread material in zig-zag manner through spaced layers of base material and subsequently cutting along a central plane

17/00 Embroidered or tufted products; **Base fabrics specially adapted for embroidered work**; **Inserts for producing surface irregularities in embroidered products** (layered products B32B; non-woven pile fabrics D04H 11/00)
17/02 . Tufted products

D06 TREATMENT OF TEXTILES OR THE LIKE; LAUNDERING; FLEXIBLE MATERIALS NOT OTHERWISE PROVIDED FOR

D06B **TREATING TEXTILE MATERIALS BY LIQUIDS, GASES, OR VAPOURS** (applying liquids to surfaces in general B05; conveying in general, handling webs or filaments in general B65; treating leather C14C; mechanical removal of impurities from animal fibres D01B; laundering D06F; chemical matters, see D06L to D06Q) **[2]**

Note

In this subclass, the following terms or expressions are used with the meaning indicated:
- "fabric" includes yarns in warp or sheet form; **[2]**
- "textile material" includes fabrics, yarns or other fibrous materials; **[2]**
- "indefinite length" means an extent of material having the characteristic that the longitudinal dimension is effectively infinite in so far as the procedure for advancing or moving the material is concerned. **[3]**

Subclass index

1/00 **Applying liquids, gases, or vapours on to textile materials to effect treatment, e.g. washing, dyeing, bleaching, sizing, impregnating** (mercerising D06B 7/00; solvent-treatment D06B 9/00; treatment of selected parts of textile materials D06B 11/00; with aid of vibration D06B 13/00; transfer application of finishing agents D06M 23/00) **[4]**

1/02 . by spraying or projecting (D06B 1/08 takes precedence; spraying in general B05) **[2]**
1/04 . by pouring or allowing to flow on to the surface of the textile material **[2]**
1/06 . . flowing along an inclined surface **[2]**
1/08 . from outlets being in, or almost in, contact with the textile material **[2]**
1/10 . by contact with a member carrying the treating material **[2]**
1/12 . . by rubbing contact, e.g. with brushes or pads **[2]**
1/14 . . with a roller **[2]**
1/16 . . . the treating material being supplied from inside the roller **[2]**

3/00 **Passing of textile materials through liquids, gases, or vapours to effect treatment, e.g. washing, dyeing, bleaching, sizing, impregnating** (mercerising D06B 7/00; solvent-treatment D06B 9/00; treatment of selected parts of textile materials D06B 11/00; with aid of vibration D06B 13/00) **[2]**

3/02 . of fibres, slivers, or rovings **[2]**
3/04 . of yarns, threads, or filaments **[2]**
3/06 . . individually handled **[2]**
3/08 . . as hanks **[2]**
3/09 . . as packages, e.g. cheeses **[3]**
3/10 . of fabrics (D06B 3/24, D06B 3/28, D06B 3/32 take precedence; jiggers D06B 3/32) **[2]**
3/12 . . in zig-zag manner over series of guiding means **[2]**
3/14 . . in wound form **[2]**
3/16 . . in superimposed, i.e. stack-packed, form **[2]**
3/18 . . combined with squeezing, e.g. in padding machines **[2]**
3/20 . . with means to improve the circulation of the treating material on the surface of the fabric **[2]**
3/22 . . only one side of the fabric coming into contact with the guiding means **[2]**
3/24 . of fabrics in roped form **[2]**
3/26 . . in superimposed, i.e. stack-packed, form **[2]**
3/28 . of fabrics propelled by, or with the aid of, jets of the treating material **[2]**
3/30 . of articles, e.g. stockings **[2]**
3/32 . of open-width materials backwards and forwards between beaming rollers during treatment; Jiggers **[2]**
3/34 . Driving arrangements of machines or apparatus **[2]**
3/36 . . Drive control **[2]**

5/00 **Forcing liquids, gases, or vapours through textile materials to effect treatment, e.g. washing, dyeing, bleaching, sizing, impregnating** (mercerising D06B 7/00; solvent-treatment D06B 9/00; treatment of selected parts of textile materials D06B 11/00; with aid of vibration D06B 13/00) **[2]**

5/02 . through moving materials of indefinite length **[2]**
5/04 . . through slivers or rovings **[2]**
5/06 . . through yarns, threads, or filaments **[2]**
5/08 . . through fabrics **[2]**
5/10 . . using centrifugal force **[2]**
5/12 . through materials of definite length **[2]**
5/14 . . through fibres, slivers, or rovings **[2]**
5/16 . . through yarns, threads, or filaments **[2]**
5/18 . . . through beamed warp **[2]**
5/20 . . . through hanks **[2]**
5/22 . . through fabrics **[2]**
5/24 . . through articles, e.g. stockings **[2]**
5/26 . . using centrifugal force **[2]**

7/00 **Mercerising, e.g. lustring by mercerising [2]**

7/02 . of slivers **[2]**
7/04 . of yarns, threads, or filaments **[2]**
7/06 . . of hanks of yarns **[2]**

7/08 . of fabrics of indefinite length **[2]**
7/10 . of tubular fabrics or tubular articles **[2]**

9/00 Solvent-treatment of textile materials (dry-cleaning D06F 43/00) **[2]**
9/02 . solvent-dyeing **[2]**
9/04 . Successively applying two or more different solvent-based treating materials **[2]**
9/06 . with recovery of the solvent **[2]**

11/00 Treatment of selected parts of textile materials, e.g. partial dyeing [2]

13/00 Treatment of textile materials with liquids, gases, or vapours with aid of vibration [2]

15/00 Removing liquids, gases, or vapours from textile materials in association with treatment of the materials by liquids, gases, or vapours (drying F26B) **[2]**

Note

Group D06B 15/12 takes precedence over groups D06B 15/02 to D06B 15/10. **[2]**

15/02 . by squeezing rollers **[2]**
15/04 . by suction **[2]**
15/06 . by vibrating the textile material **[2]**
15/08 . by scraping **[2]**
15/09 . by jets of gases **[3]**
15/10 . by use of centrifugal force **[2]**
15/12 . up to the moisture regain of textile material **[2]**

17/00 Storing of textile materials in association with the treatment of the materials by liquids, gases, or vapours (carriers or supports specially adapted therefor D06B 23/04) **[2]**
17/02 . in superimposed, i.e. stack-packed, form; J-boxes **[2]**
17/04 . in wound form **[2]**
17/06 . in festooned form **[3]**

19/00 Treatment of textile materials by liquids, gases, or vapours, not provided for in groups D06B 1/00 to D06B 17/00 [2]

21/00 Successive treatments of textile materials by liquids, gases, or vapours (successive treatments in which the characteristics of a single treatment are of interest only, or in which all treatments have characteristics provided for in a single main group, see the relevant groups for the single treatment) **[2]**
21/02 . the treatments being performed in a single container **[2]**

23/00 Component parts, details, or accessories of apparatus or machines, specially adapted for the treating of textile materials, not restricted to a particular kind of apparatus, provided for in groups D06B 1/00 to D06B 21/00 [2]
23/02 . Rollers **[2]**
23/04 . Carriers or supports for textile materials to be treated **[2]**
23/06 . Guiding means for preventing filaments, yarns, or threads from sticking together **[2]**
23/08 . Untwisting devices **[2]**
23/10 . Devices for dyeing samples (D06B 23/12 takes precedence) **[2]**
23/12 . Means for taking samples from textile materials during or after treatment **[2]**
23/14 . Containers, e.g. vats **[2]**
23/16 . . with means for introducing or removing textile materials without modifying container pressure **[2]**
23/18 . . Sealing arrangements **[2]**
23/20 . Arrangements of apparatus for treating processing-liquids, -gases, or -vapours, e.g. purification, filtration, distillation (such apparatus per se, see the relevant classes for the apparatus) **[2]**
23/22 . . for heating **[2]**
23/24 . Means for regulating the amount of treating material picked up by the textile material during its treatment **[2]**
23/26 . . in response to a test conducted on the textile material **[2]**
23/28 . . in response to a test conducted on the treating material **[2]**
23/30 . Means for cleaning apparatus or machines, or parts thereof **[2]**

D06C FINISHING, DRESSING, TENTERING, OR STRETCHING TEXTILE FABRICS (chemical matters, see D06L to D06Q; drying F26B) **[2]**

Note

In this subclass, the following term is used with meaning indicated:
– "fabric" includes yarns in warp or sheet form.

Subclass index

FINISHING OR DRESSING NOT OTHERWISE PROVIDED FOR

Compound processes or apparatus; other treatments 27/00; 29/00

3/00 **Stretching, tentering, or spreading textile fabrics**; **Producing elasticity in textile fabrics** (shaping or stretching tubular fabrics upon cores or internal frames D06C 5/00; removing skew or disorientation of weft threads in woven fabrics D06H 3/12)

3/02 . by endless chain or like apparatus (hooks or pin-blocks D06C 3/10)

3/04 . . Tentering clips

3/06 . by rotary disc, roller, or like apparatus

3/08 . by frames or like apparatus

3/10 . Hooks, pin-blocks, or like apparatus

5/00 **Shaping or stretching of tubular fabrics upon cores or internal frames** (supports simply for drying D06F 59/00)

7/00 **Heating or cooling textile fabrics** (hosiery boarding D06C 5/00; singeing D06C 9/00; treating with liquids, gases, or vapours D06B; processes comprising combined chemical and mechanical treatment D06M; during operations provided for elsewhere, see the relevant groups for such operations)

7/02 . Setting

7/04 . Carbonising or oxidising

9/00 **Singeing** (for making patterns or designs D06C 23/02)

9/02 . by flame

9/04 . by contact with heated elements

11/00 **Teasing, napping, or otherwise roughening or raising pile of textile fabrics** (for making patterns or designs D06C 23/00)

13/00 **Shearing, clipping, or cropping surfaces of textile fabrics**; **Pile cutting**; **Trimming seamed edges** (for making patterns or designs D06C 23/00; cutting or severing fabrics D06H)

13/02 . Arrangements for detecting the presence of a seam in the fabric to lift the shearing blade

13/04 . Shearing lace or embroidery, e.g. cutting loose threads

13/06 . Removing floats

13/08 . Cutting pile loops (on the loom D03D 39/24)

13/10 . Splitting double pile fabrics (on the loom D03D 39/16)

13/12 . Trimming hosiery or seamed edges of fabrics

15/00 **Calendering, pressing, ironing, glossing, or glazing textile fabrics** (shrinking by compressing D06C 21/00; for making patterns or designs D06C 23/00; domestic, laundry, or like ironing or pressing D06F)

15/02 . between co-operating press or calender rolls

15/04 . between rollers and co-operating concave surfaces (D06C 15/06 takes precedence)

15/06 . between rollers and co-operating moving surfaces formed of flexible material, e.g. bands

15/08 . Rollers therefor

15/10 . between flat plates of a press

15/12 . . for pressing a pile of fabrics

15/14 . Beetling

17/00 **Fulling**

17/02 . by rollers

17/04 . by hammers or beaters

19/00 **Breaking or softening of fabrics** (by stretching D06C 3/00; by calendering, pressing, or beetling D06C 15/00; by fulling D06C 17/00)

21/00 **Shrinking by compressing**

23/00 **Making patterns or design on fabrics** (by printing B41F; decoration in general B44)

23/02 . by singeing, teasing, shearing, etching, or brushing

23/04 . by shrinking, embossing, moireing, or crêping

25/00 **Treating selvedges or other edges, e.g. stiffening** (trimming edges D06C 13/12; forming selvedges on the loom, e.g. by adhesive, D03D 47/40)

27/00 **Compound processes or apparatus, for finishing or dressing textile fabrics, not otherwise provided for**

29/00 **Finishing or dressing, of textile fabrics, not provided for in the other groups of this subclass**

D06F **LAUNDERING, DRYING, IRONING, PRESSING OR FOLDING TEXTILE ARTICLES** (apparatus for blocking, pressing, steaming, or stretching hats A42C; treating textile materials by liquids, gases or vapors D06B; chemical matters, see D06L, D06M)

(1) This subclass covers:
- domestic or laundry dry-cleaning apparatus using volatile solvents;
- domestic, laundry, or tailors' ironing or other hot-pressing of clothes, linen, or other textile articles.

(2) This subclass does not cover apparatus for wringing, washing, dry-cleaning, ironing, or other hot-pressing of textiles in manufacturing operations, which is covered by subclasses D06B, D06C.

Subclass index

RECEPTACLES; REMOVABLE DEVICES FOR USE WITH DIFFERENT RECEPTACLES 1/00; 7/00

HAND IMPLEMENTS 5/00

IMPLEMENTS FOR WASHING BY HAND

Receptacles; hand rubbing apparatus 1/00; 3/00

WASHING MACHINES

using brushes, rollers 9/00, 11/00

Washing; **Rinsing**; **Dry-cleaning**

1/00 **Washing receptacles** (of washing machines D06F 37/00, D06F 39/00)

1/02 . Wash-tubs, Supports therefor

1/04 . . the tub walls or bottom having corrugations (rubbing boards D06F 3/02)

1/06 . Wash-boiler receptacles

1/08 . . with special means for water circulation by heat, e.g. fountain-washers

1/10 . Covers; Handles

1/12 . Racks or other rigid open containers of skeleton or like apertured construction supporting clothes in washing receptacles

3/00 **Hand rubbing apparatus** (corrugated tub-walls D06F 1/04)

3/02 . Rubbing boards

3/04 . Hand rubbers, e.g. gloves with corrugated surfaces

5/00 **Hand implements for washing purposes, e.g. sticks** (hand rubbing appliances D06F 3/00; brushes A46B)

5/02 . Plungers, dollies, pounders, squeezers, or the like

5/04 . . adapted for removable mounting on receptacles such as wash-tubs

5/06 . Grippers

7/00 **Washing devices adapted to be used independently of any particular receptacle, e.g. for removable mounting on wash-tubs, bath-tubs, or the like**

7/02 . of the rotary-impeller type

7/04 . of the vibrator type

7/06 . agitating the washing liquid by air

9/00 **Brushing-type washing machines**

11/00 **Washing machines using rollers, e.g. of the mangle type**

13/00 **Washing machines having receptacles, stationary for washing purposes, with agitators therein contacting the articles being washed** (plungers or the like adapted for removable mounting on receptacles D06F 5/04; washing devices adapted to be used independently of any particular receptacle D06F 7/00)

13/02 . wherein the agitator has an oscillatory rotary motion only

13/04 . wherein the agitator has an axial motion only

13/06 . wherein the agitator has both rotary, e.g. oscillating rotary, motion and axial motion

13/08 . wherein the agitator has a gyratory or orbital motion

15/00 Washing machines having beating, rubbing, or squeezing means in receptacles stationary for washing purposes (plungers or the like adapted for removable mounting on receptacles D06F 5/04; mangle-type washing machines D06F 11/00)

15/02 . wherein the articles being washed are squeezed by a flexible diaphragm or bag

17/00 Washing machines having receptacles, stationary for washing purposes, wherein the washing action is effected solely by circulation or agitation of the washing liquid (washing devices adapted to be used independently of any particular receptacle D06F 7/00; using vibrations for washing purposes D06F 19/00)

17/02 . by pumps (D06F 17/04 takes precedence)
17/04 . solely by water jets
17/06 . by rotary impellers
17/08 . . Driving arrangements for the impeller
17/10 . . Impellers
17/12 . solely by gases, e.g. air or steam, introduced into the washing liquid

18/00 Washing machines having receptacles, stationary for washing purposes, and having further drying means (details concerning drying only D06F 58/00) **[3]**

19/00 Washing machines using vibrations for washing purposes (devices of the vibrator type adapted to be used independently of any particular receptacle D06F 7/04)

21/00 Washing machines with receptacles, e.g. perforated, having a rotary movement, e.g. oscillatory movement (with receptacles serving both for washing and centrifugally draining D06F 23/00, D06F 25/00; with receptacles moving bodily about an axis D06F 27/00; programme control aspects D06F 33/00)

21/02 . about a horizontal axis
21/04 . . within an enclosing receptacle
21/06 . about a vertical axis
21/08 . . within an enclosing receptacle
21/10 . about an inclined axis
21/12 . the receptacle having a wobbling motion
21/14 . with rubbing or beating means not secured to, or forming part of, the receptacle

23/00 Washing machines with receptacles, e.g. perforated, having a rotary movement, e.g. oscillatory movement, the receptacle serving both for washing and centrifugally draining (with further drying means D06F 25/00; programme control aspects D06F 33/00)

23/02 . and rotating or oscillating about a horizontal axis
23/04 . and rotating or oscillating about a vertical axis
23/06 . and rotating or oscillating about an inclined axis

25/00 Washing machines with receptacles, e.g. perforated, having a rotary movement, e.g. oscillatory movement, the receptacle serving both for washing and centrifugally draining and having further drying means, e.g. using hot air (programme-control aspects D06F 33/00; details concerning drying only D06F 58/00)

27/00 Washing machines with receptacles moving bodily, e.g. reciprocating, swinging

29/00 Combinations of a washing machine with other separate apparatus in a common frame or the like, e.g. with rinsing apparatus

29/02 . with liquid-extracting apparatus (with roller wringer D06F 45/12)

31/00 Washing installations comprising an assembly of several washing machines or washing units, e.g. continuous flow assemblies

33/00 Controlling a series of operations in washing machines, e.g. programme-control arrangements for washing and drying cycles (D06F 31/00 takes precedence)

33/02 . electrically
33/04 . non-electrically
33/06 . . substantially mechanically
33/08 . . substantially hydraulically
33/10 . . substantially pneumatically

35/00 Washing machines, apparatus, or methods not otherwise provided for

37/00 Details of washing machines of kinds covered by groups D06F 21/00 to D06F 25/00, restricted to machines of these kinds (details of more general application D06F 39/00; details concerning drying only D06F 58/00)

37/02 . Rotary receptacles, e.g. drums
37/04 . . adapted for rotation or oscillation about a horizontal or inclined axis
37/06 . . . Ribs, lifters, or rubbing means forming part of the receptacle
37/08 . . . Partitions
37/10 . . . Doors; Securing means therefor
37/12 . . adapted for rotation or oscillation about a vertical axis
37/14 . . . Ribs or rubbing means forming part of the receptacle
37/16 . . . Partitions
37/18 . . . Doors or covers; Securing means therefor
37/20 . Mountings, e.g. resilient mountings, for the rotary receptacle, motor, tub, or casing; preventing or damping vibrations (damping vibrations in general F16F)
37/22 . . in machines with a receptacle rotating or oscillating about a horizontal axis
37/24 . . in machines with a receptacle rotating or oscillating about a vertical axis
37/26 . Casings; Tubs
37/28 . . Doors; Security means therefor
37/30 . Driving arrangements
37/32 . . for rotating the receptacle at one speed only
37/34 . . . in opposite directions, e.g. oscillating
37/36 . . for rotating the receptacle at more than one speed
37/38 . . . in opposite directions
37/40 . . for driving the receptacle and an agitator or impeller, e.g. alternatively
37/42 . Safety arrangements, e.g. for stopping rotation of the receptacle upon opening of the casing door

39/00 Details of washing machines in so far as such details are not special to washing machines of groups D06F 21/00 to D06F 25/00 or to any particular type of washing machine defined in groups D06F 9/00 to D06F 19/00 or D06F 27/00

39/02 . Devices for adding soap or other washing agents
39/04 . Heating arrangements
39/06 . Arrangements for preventing or destroying scum
39/08 . Liquid supply or discharge arrangements (supplying liquid detergent D06F 39/02)
39/10 . Filtering arrangements
39/12 . Casings; Tubs
39/14 . . Doors or covers; Securing means therefor

41/00 Rinsing apparatus

43/00 Dry-cleaning apparatus using volatile solvents (D06F 9/00 to D06F 41/00 take precedence)
43/02 . having one rotary cleaning receptacle only
43/04 . having more than one rotary cleaning receptacle
43/06 . wherein the articles to be cleaned are passed through a cleaning chamber or bath
43/08 . Associated apparatus for handling and recovering the solvents (separate apparatus for purifying dry-cleaning solvents B01D)

Expelling water from the linen; **Smoothing by cold rolling**

45/00 Wringing machines with two or more co-operating rollers; **Similar cold-smoothing apparatus**
45/02 . wherein the pressure is transmitted by spring means
45/04 . . with hand-operated quick-release means
45/06 . . with automatically-operated quick-release means
45/08 . wherein the pressure is applied by fluid means
45/10 . with three or more co-operating rollers
45/12 . combined with washing machines
45/14 . with means for removable attachment to washing machines, tables or other supports (combined with tables A47B)
45/16 . Details
45/18 . . Driving or control arrangements for rotation of the rollers
45/20 . . Toggle or other lever means for transmitting pressure to the rollers
45/22 . . Rollers
45/24 . . Frames guiding or housing the roller shafts; Stands for supporting the roller framework
45/26 . . Draining boards; Feed or discharge boards; Stripping means
45/28 . . Belt arrangements for guiding the linen between the rollers

47/00 Apparatus of the press type for expelling water from the linen
47/02 . by a mechanically-actuated ram
47/04 . by a fluid-actuated ram
47/06 . by a flexible diaphragm
47/08 . Covers; Securing means therefor

49/00 Domestic spin-dryers or similar spin-dryers not suitable for industrial use (centrifuges in general B04B)
49/02 . Bowl construction
49/04 . Bowl drive
49/06 . Mountings, e.g. resilient mountings, for the bowl or casings; Preventing or damping vibrations (damping vibrations in general F16F)
49/08 . Liquid discharge arrangements

51/00 Apparatus for expelling or draining water from the linen, not provided for in groups D06F 45/00 to D06F 49/00
51/02 . by twisting

Drying; **Airing**

53/00 Clothes-lines; **Supports therefor** (drying frames incorporating clothes-lines D06F 57/00; supports or holders specially adapted or mounted for storing and repeatedly paying-out and restoring lengths of lines B65H 75/34; ropes, cables D07B)
53/02 . Clothes-lines
53/04 . Supports, e.g. poles, props for clothes-lines (poles in general E04H)

55/00 Clothes-pegs
55/02 . with pivoted clamping members

57/00 Supporting means, other than simple clothes-lines, for linen or garments to be dried or aired (in combination with means for heating or positive air circulation D06F 58/00, F26B; adapted to retain the shape of particular articles being dried D06F 59/00; clothing hangers, e.g. suit hangers, A47G 25/14)
57/02 . mounted on pillar, e.g. rotatably
57/04 . . and having radial arms, e.g. collapsible
57/06 . comprising vertical members connected by horizontal bars
57/08 . Folding stands (D06F 57/06 takes precedence)
57/10 . . of the lazy-tongs type
57/12 . specially adapted for attachment to walls, ceilings, stoves, or other structures or objects

58/00 Domestic laundry driers (drying in general F26B) **[2]**
58/02 . having drier drums rotating about a horizontal axis **[3]**
58/04 . . Details (controlling or regulating arrangements D06F 58/28) **[3]**
58/06 . . . Mountings for the rotating drums **[3]**
58/08 . . . Driving arrangements **[3]**
58/10 . Drying cabinets or drying chambers having heating or ventilating means **[3]**
58/12 . . having conveying means for moving clothes, e.g. along an endless track **[3]**
58/14 . . Collapsible drying cabinets; Wall mounted collapsible hoods **[3]**
58/16 . having heatable surfaces for contacting the laundry (D06F 59/00 takes precedence) **[3]**
58/18 . Detachable or door-mounted drying arrangements for washing machines **[3]**
58/20 . General details of domestic laundry driers (D06F 59/00 takes precedence) **[3]**
58/22 . . Lint collecting arrangements **[3]**
58/24 . . Condensing arrangements **[3]**
58/26 . . Heating arrangements, e.g. gas heating equipment (D06F 58/18 takes precedence) **[3]**
58/28 . . Controlling or regulating (controlling or regulating in general G05) **[3]**

59/00 Supports adapted to retain the shape of particular articles being dried, e.g. incorporating heating means
59/02 . for garments
59/04 . . for gloves
59/06 . . for stockings
59/08 . for curtains, table cloths, or other articles of sheet form

60/00 Drying not provided for in groups D06F 53/00 to D06F 59/00 [2009.01]

Ironing; **Pressing**

61/00 Ironing machines using two or more co-operating pressing rollers

61/02 . with two rollers
61/04 . with three or more rollers one above the other
61/06 . with successive pairs of rollers
61/08 . with one central roller co-operating with a plurality of circumferential rollers
61/10 . with two or more central rollers co-operating with a plurality of circumferential rollers

63/00 Ironing machines having a roller or rollers coacting with a fixed or moving flat bed or table (coverings or pads D06F 83/00)

63/02 . with two or more rollers co-acting with a fixed or moving flat bed or table

65/00 Ironing machines with rollers rotating against curved surfaces

65/02 . with one roller only
65/04 . . the bed being urged against the roller by hand or foot
65/06 . . the bed being urged against the roller by power
65/08 . . the roller being urged against the bed
65/10 . with two or more rollers co-operating with two or more curved surfaces

67/00 Details of ironing machines provided for in groups D06F 61/00, D06F 63/00, or D06F 65/00 (coverings or pads for ironing or pressing members D06F 83/00)

67/02 . Rollers; Heating arrangements therefor
67/04 . Arrangements for feeding or spreading the linen
67/06 . Means for stripping the linen from the rollers
67/08 . Beds; Heating arrangements therefor **[2]**
67/10 . Driving arrangements **[2]**

69/00 Ironing machines not otherwise provided for

69/02 . using endless or other ironing or pressing belts or aprons
69/04 . with relatively-sliding flat surfaces

71/00 Apparatus for hot-pressing clothes, linen, or other textile articles, i.e. wherein there is substantially no relative movement between pressing element and article while pressure is being applied to the article; **Similar machines for cold-pressing clothes, linen, or other textile articles** (smoothing by cold rolling between two or more co-operating rollers D06F 45/00; devices, for household use, for cold-pressing garments A47G)

71/02 . actuated wholly by hand or foot (D06F 71/08 takes precedence)
71/04 . power-actuated (D06F 71/08 takes precedence)
71/06 . . fluid-actuated
71/08 . wherein one or more of the pressing elements is moved laterally between successive pressing operations (laundry systems or arrangements of apparatus or machines D06F 95/00)
71/10 . . by movement about a vertical axis
71/12 . . by movement about a horizontal axis
71/14 . . by a rectilinear movement
71/16 . having a pressing element or buck adapted to provide interior support for a garment to be pressed (D06F 71/18 takes precedence)
71/18 . specially adapted for pressing particular garments or parts thereof (for pressing seams D06F 71/30)
71/20 . . for pressing shirts
71/22 . . for pressing collars
71/24 . . for pressing cuffs
71/26 . . for pressing shoulders or necks
71/28 . . for pressing sleeves, trousers, or other tubular garments or tubular parts of garments
71/29 . . . Trousers **[4]**
71/30 . specially adapted for pressing seams
71/32 . Details
71/34 . . Heating arrangements; Arrangements for supplying or removing steam or other gases
71/36 . . Pressing elements (for use in pressing particular garments or parts thereof D06F 71/18; coverings or pads therefor D06F 83/00)
71/38 . . Feeding arrangements (feeding by lateral movement of pressing elements D06F 71/08)
71/40 . . Holders or stretchers for the article to be pressed

73/00 Apparatus for smoothing or removing creases from garments or other textile articles by formers, cores, stretchers, or internal frames, with the application of heat or steam (stretchers for drying purposes D06F 59/00; combined with external pressure means D06F 71/00; stretchers for use with presses D06F 71/40; dress forms for the tailoring trade A41H; garment stretchers without the application of heat A47G 25/00)

73/02 . having one or more treatment chambers **[4]**

75/00 Hand irons

75/02 . Externally-heated hand irons; Hand irons internally heated by means other than electricity, e.g. by solid fuel, by steam
75/04 . . by pre-heated block
75/06 . . with means for supplying steam or liquid to the article being ironed (D06F 75/32 takes precedence)
75/08 . Hand irons internally heated by electricity
75/10 . . with means for supplying steam to the article being ironed (D06F 75/32 takes precedence)
75/12 . . . the steam being produced from water supplied to the iron from an external source
75/14 . . . the steam being produced from water in a reservoir carried by the iron
75/16 . . . . the reservoir being heated to produce the steam
75/18 . . . . the water being fed slowly, e.g. drop by drop, from the reservoir to a steam generator
75/20 . . . Arrangements for discharging the steam to the article being ironed
75/22 . . with means for supplying liquid to the article being ironed (D06F 75/10 takes precedence)
75/24 . . Arrangements of the heating means within the iron; Arrangements for distributing, conducting, or storing the heat (electric heating in general H05B)
75/26 . . Temperature control or indicating arrangements (thermally-actuated switches H01H)
75/28 . . Arrangements for attaching, protecting, or supporting the electric supply cable
75/30 . Hand irons of special external shape or form
75/32 . Attachments for converting hand irons to steam irons
75/34 . Handles; Handle mountings
75/36 . Casings
75/38 . Sole plates (D06F 75/20 takes precedence)
75/40 . Stands or supports attached to the iron

77/00 Arrangements for exerting pressure on, lifting, or guiding hand irons

79/00 **Accessories for hand irons**
79/02 . Stands or supports neither attached to, nor forming part of, the iron or ironing board
79/04 . Stoves or other heating means specially adapted for heating irons externally (stoves in general F24)
79/06 . Means, not forming part of the iron, for cooling the iron

81/00 **Ironing boards** (coverings or pads therefor D06F 83/00; combined with tables, mounted in kitchen cabinets A47B; tables in general A47B; combined with ladders E06C)
81/02 . with collapsible underframe
81/04 . . with means for adjusting height
81/06 . attachable to independent supports, e.g. walls
81/08 . incorporating heating, steaming, or forced ventilation means
81/10 . Top board elements
81/12 . Sleeve boards; Attaching means therefor
81/14 . Means for attaching covers

83/00 **Coverings or pads for ironing or pressing members**

85/00 **Independent elements for interposition between the article and the ironing or pressing surface**

Other laundry apparatus or systems

87/00 **Apparatus for moistening or otherwise conditioning the article to be ironed or pressed** (apparatus for smoothing or removing creases from garments or other textile articles by formers, cores, stretchers or internal frames, with the application of heat or steam D06F 73/00)

89/00 **Apparatus for folding textile articles with or without stapling [4]**
89/02 . of textile articles to be worn, e.g. shirts **[4]**

91/00 **Starching apparatus**

93/00 **Counting, sorting, or marking arrangements specially adapted for laundry purposes**

95/00 **Laundry systems or arrangements of apparatus or machines**; **Mobile laundries** (D06F 31/00 takes precedence; laundries as buildings E04H)

D06G **MECHANICAL OR PRESSURE CLEANING OF CARPETS, RUGS, SACKS, HIDES, OR OTHER SKIN OR TEXTILE ARTICLES OR FABRICS**; **TURNING INSIDE-OUT FLEXIBLE TUBULAR OR OTHER HOLLOW ARTICLES** (mechanical preparation or mechanical treatment of bed feathers B68G 3/00)

1/00 **Beating, brushing, or otherwise mechanically cleaning or pressure cleaning carpets, rugs, sacks, hides, or other skin or textile articles or fabrics** (brushes A46B; suction cleaners A47L; domestic cleaning apparatus A47L; cleaning in general B08B; apparatus for cleaning bed feathers B68G 3/00)

3/00 **Turning inside-out flexible tubular or other hollow articles** (in combination with inspecting D06H 3/16)
3/02 . by mechanical means
3/04 . pneumatically

5/00 **Mechanical, vacuum, or pressure cleaning in combination with the turning inside-out of flexible tubular or other hollow articles**

D06H **MARKING, INSPECTING, SEAMING, OR SEVERING TEXTILE MATERIALS** (seaming by sewing D05B; in connection with manufacturing, see the relevant subclasses)

Subclass index

1/00 **Marking textile materials**; **Marking in combination with metering or inspecting**
1/02 . Marking by printing or analogous processes
1/04 . by attaching threads, tags, or the like

3/00 **Inspecting textile materials** (testing physical properties of textile materials G01N, e.g. investigating the presence of flaws, defects or contamination using optical means G01N 21/88)
3/02 . visually (D06H 3/12, D06H 3/14, D06H 3/16 take precedence)
3/04 . . wherein the material is supported on a table
3/06 . . wherein the material is supported on a drum
3/08 . by photo-electric or television means (D06H 3/12, D06H 3/14, D06H 3/16 take precedence)
3/10 . by non-optical apparatus (D06H 3/12, D06H 3/14, D06H 3/16 take precedence)
3/12 . Detecting or automatically correcting errors in the position of weft threads in woven fabrics
3/14 . Detecting and removing metal particles, e.g. broken needles, or card clothing, from fabrics
3/16 . Inspecting hosiery or other tubular fabric; Inspecting in combination with turning inside-out, classifying, or other handling (turning inside-out per se D06G 3/00)

5/00 **Seaming textile materials**

7/00 **Apparatus or processes for cutting, or otherwise severing, specially adapted for the cutting, or otherwise severing, of textile materials** (severing for making buttonholes A41H; hand cutting tools in general B26B; cutting machines in general B26D; severing otherwise than by cutting in general B26F; trimming seamed edges, shearing surfaces of fabrics, shearing lace or embroidery, e.g. cutting loose threads D06C)

7/02 . transversely (D06H 7/14 takes precedence)
7/04 . longitudinally (D06H 7/14 takes precedence)
7/06 . . Removing selvedge edges
7/08 . . for cutting tubular fabric longitudinally
7/10 . obliquely
7/12 . . cutting a tubular fabric helically
7/14 . Cutting fabrics by cutting the weft or warp threads while making special provision to avoid cutting warp or weft threads, respectively, adjacent to the cut
7/16 . specially adapted for cutting lace or embroidery
7/18 . Cutting rolls of material without unwinding
7/20 . Tearing
7/22 . Severing by heat or by chemical agents
7/24 . Devices specially adapted for cutting-out samples

D06J **PLEATING, KILTING, OR GOFFERING TEXTILE FABRICS OR WEARING APPAREL** (corrugating, creasing, or otherwise deforming paper, or material worked in a manner analogous to paper, without removing material B31F; by weaving D03D; by sewing D05B; apparatus for pressing or setting formed pleats D06C)

1/00 **Pleating, kilting, or goffering textile fabrics or wearing apparel**

1/02 . continuously and transversely to the direction of feed
1/04 . . by co-operating ribbed or grooved rollers or belts
1/06 . . by reciprocating blades
1/08 . . . which introduce the folds between rollers or belts
1/10 . continuously and longitudinally to the direction of feed
1/12 . Forms of pleats or the like

D06L **BLEACHING, E.G. OPTICAL BLEACHING, DRY-CLEANING, OR WASHING FIBRES, THREADS, YARNS, FABRICS, FEATHERS, OR MADE-UP FIBROUS GOODS**; **BLEACHING LEATHER OR FURS** (treatment of fibres or filaments of glass, mineral wool, or slag wool C03; chemical treatment of fibrous material to obtain fibres for spinning D01; for mechanical matters, see D06B, D06C, D06F; bleaching paper pulp or cotton linters D21)

Note

Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

1/00 **Dry-cleaning or washing fibres, threads, yarns, fabrics, feathers, or made-up fibrous goods**

1/02 . using organic solvents
1/04 . . together with additives (D06L 1/06 takes precedence)
1/06 . . De-sizing
1/08 . . Multi-step processes
1/10 . . Regeneration of used chemical baths
1/12 . using aqueous baths
1/14 . . De-sizing
1/16 . . Multi-step processes
1/18 . . Working under pressure in closed vessels
1/20 . . combined with mechanical means
1/22 . Processes involving successive treatments with aqueous and organic materials

3/00 **Bleaching fibres, threads, yarns, fabrics, feathers, or made-up fibrous goods, leather, or furs**

3/02 . using compounds which develop oxygen (D06L 3/06 takes precedence)
3/04 . by irradiation or ozonisation
3/06 . using compounds which contain halogen
3/08 . . chlorites; chlorine dioxide
3/10 . using reducing agents
3/11 . using enzymes **[7]**
3/12 . Optical bleaching
3/14 . Multi-step processes
3/16 . . combined with cleaning or washing

D06M TREATMENT, NOT PROVIDED FOR ELSEWHERE IN CLASS D06, OF FIBRES, THREADS, YARNS, FABRICS, FEATHERS, OR FIBROUS GOODS MADE FROM SUCH MATERIALS (surface treatment of fibres or filaments from glass, minerals or slags C03C 25/00; treatment of textiles by mechanical means, see D06B to D06J)

(1) In each of the groups D06M 11/00 to D06M 15/00, in the absence of an indication to the contrary, a substance is classified in the last appropriate place. **[5]**

(2) In this subclass:
(a) Within each one of main groups D06M 11/00 to D06M 15/00, a mixture of substances is classified at least according to the essential ingredient. If more than one ingredient is essential, the mixture is classified, in the absence of an indication to the contrary, according to the essential ingredient which belongs to the last appropriate place in the sequence of substance.
(b) Treatment by mixtures of substances covered by two or more of main groups D06M 11/00 to D06M 15/00 is classified in each appropriate main group. **[5]**

(3) In this subclass, the treatment of textiles, not provided for elsewhere in class D06, is classified according to the following principles:
(a) Treatment of textiles characterised by the treating agent in groups D06M 11/00 to D06M 16/00.
(b) Treatment of textiles characterised by the process in group D06M 23/00. **[5]**

(4) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

(5) Attention is drawn to Note (3) after the title of section C, which Note indicates to which version of the periodic table of chemical elements the IPC refers. **[2010.01]**

Subclass index

10/00 Physical treatment of fibres, threads, yarns, fabrics, or fibrous goods made from such materials, e.g. ultrasonic, corona discharge, irradiation, electric currents, magnetic fields; Physical treatment combined with treatment with chemical compounds or elements [2,5]

10/02 . ultrasonic or sonic; Corona discharge **[5]**

10/04 . Physical treatment combined with treatment with chemical compounds or elements (graft polymerisation using wave energy or particle radiation D06M 14/18) **[5]**

10/06 . . Inorganic compounds or elements **[5]**

10/08 . . Organic compounds **[5]**

10/10 . . . Macromolecular compounds **[5]**

11/00 Treating fibres, threads, yarns, fabrics, or fibrous goods made from such materials, with inorganic substances or complexes thereof; Such treatment combined with mechanical treatment, e.g. mercerising (D06M 10/00 takes precedence; decorating textiles by local treatment D06Q 1/00) **[5]**

(1) In this group, the following term is used with the meaning indicated:
– "treatment" means, in the absence of an indication to the contrary, the treatment which leads to the end product, e.g. treatment with barium sulfate can mean treatment with barium chloride and with sulfuric acid in two separate steps. **[5]**

(2) If a compound used in the treatment is characterised by its cation, classification for this aspect is made in main group D06M 11/00only and not in groups D06M 11/01 to D06M 11/80; metallisation by treatment with a metal salt, followed by reduction, is classified in group D06M 11/83. **[5]**

(3) In this group, it is desirable to add the indexing codes of group D06M 101/00. **[5]**

11/01 . with hydrogen, water or heavy water; with hydrides of metals or complexes thereof; with boranes, diboranes, silanes, disilanes, phosphines, diphosphines, stibines, distibines, arsines, or diarsines or complexes thereof **[5]**

11/05 . . with water, e.g. steam; with heavy water **[5]**

11/07 . with halogens; with halogen acids or salts thereof; with oxides or oxyacids of halogens or salts thereof **[5]**

11/09 . . with free halogens or interhalogen compounds **[5]**

11/11 . . with halogen acids or salts thereof **[5]**

11/13 . . . Ammonium halides or halides of elements of the first Group of the Periodic System **[5]**

11/155 . . . Halides of elements of the second Group of the Periodic System **[5]**

11/17 . . . Halides of elements of the third Group of the Periodic System **[5]**

11/20 . . . Halides of elements of the fourth Group of the Periodic System, e.g. zirconyl chloride **[5]**

11/22 . . . Halides of elements of the fifth Group of the Periodic System **[5]**

11/24 . . . Halides of elements of the sixth Group of the Periodic System, e.g. chromyl chloride **[5]**

11/26 . . . Halides of elements of the seventh Group of the Periodic System (interhalogen compounds D06M 11/09) **[5]**

11/28 . . . Halides of elements of the eighth Group of the Periodic System **[5]**

11/30 . . with oxides of halogens, oxyacids of halogens or their salts, e.g. with perchlorates **[5]**

11/32 . with oxygen, ozone, ozonides, oxides, hydroxides or percompounds; Salts derived from anions with an amphoteric element-oxygen bond (with water or heavy water D06M 11/05; with oxides or oxyacids of halogens D06M 11/30; bleaching D06L) **[5]**

11/34 . . with oxygen, ozone or ozonides **[5]**

11/36 . . with oxides, hydroxides or mixed oxides; with salts derived from anions with an amphoteric element-oxygen bond **[5]**

11/38 . . . Oxides or hydroxides of elements of the first Group of the Periodic System (producing patterns by locally destroying or modifying the fibres by chemical action D06Q 1/02) **[5]**

11/40 . . . . combined with, or in absence of, mechanical tension, e.g. slack mercerising **[5]**

11/42 . . . . Oxides or hydroxides of copper, silver or gold **[5]**

11/44 . . . Oxides or hydroxides of elements of the second Group of the Periodic System; Zincates; Cadmates **[5]**

11/45 . . . Oxides or hydroxides of elements of the third Group of the Periodic System; Aluminates **[5]**

11/46 . . . Oxides or hydroxides of elements of the fourth Group of the Periodic System; Titanates; Zirconates; Stannates; Plumbates **[5]**

11/47 . . . Oxides or hydroxides of elements of the fifth Group of the Periodic System; Vanadates; Niobates; Tantalates; Arsenates; Antimonates; Bismuthates **[5]**

11/48 . . . Oxides or hydroxides of chromium, molybdenum or tungsten; Chromates; Dichromates; Molybdates; Tungstates **[5]**

11/49 . . . Oxides or hydroxides of elements of the eight Group of the Periodic System; Ferrates; Cobaltates; Nickelates; Ruthenates; Osmates; Rhodates; Iridates; Palladates; Platinates **[5]**

11/50 . . with hydrogen peroxide or peroxides of metals; with persulfuric, permanganic, pernitric, percarbonic acids or their salts **[5]**

11/51 . with sulfur, selenium, tellurium, polonium or compounds thereof (with persulfuric acids or their salts D06M 11/50) **[5]**

11/52 . . with selenium, tellurium, polonium or their compounds; with sulfur, dithionites or compounds containing sulfur and halogens, with or without oxygen; by sulfohalogenation with chlorosulfonic acid; by sulfohalogenation with a mixture of sulfur dioxide and free halogens **[5]**

11/53 . . with hydrogen sulfide or its salts; with polysulfides **[5]**

11/54 . . with sulfur dioxide; with sulfurous acid or its salts (D06M 11/52 takes precedence) **[5]**

11/55 . . with sulfur trioxide; with sulfuric acid or thiosulfuric acid or their salts **[5]**

11/56 . . . Sulfates or thiosulfates other than of elements of the third Group of the Periodic System **[5]**

11/57 . . . Sulfates or thiosulfates of elements of the third Group of the Periodic System, e.g. alums **[5]**

11/58 . with nitrogen or compounds thereof, e.g. with nitrides (with ammonium halides D06M 11/13) **[5]**

11/59 . . with ammonia; with complexes of organic amines with inorganic substances **[5]**

11/60 . . . Ammonia as a gas or in solution **[5]**

11/61 . . . Liquid ammonia **[5]**

11/62 . . . Complexes of metal oxides or complexes of metal salts with ammonia or with organic amines **[5]**

11/63 . . with hydroxylamine or hydrazine **[5]**

11/64 . . with nitrogen oxides; with oxyacids of nitrogen or their salts (with pernitric acids or their salts D06M 11/50) **[5]**

11/65 . . . Salts of oxyacids of nitrogen **[5]**

11/66 . . with sulfamic acid or its salts **[5]**

11/67 . . with cyanogen or compounds thereof, e.g. with cyanhydric acid, cyanic acid, isocyanic acid, thiocyanic acid, isothiocyanic acid or their salts, or with cyanamides; with carbamic acid or its salts (with dicyanamides D06M 13/432) **[5]**

11/68 . with phosphorus or compounds thereof, e.g. with chlorophosphonic acid or salts thereof (with phosphines or diphosphines D06M 11/01; with selenium or tellurium compounds D06M 11/52; with polyphosphazene or derivatives thereof D06M 15/673) **[5]**

11/69 . . with phosphorus; with halides or oxyhalides of phosphorus; with chlorophosphonic acid or its salts **[5]**

11/70 . . with oxides of phosphorus; with hypophosphorous, phosphorous or phosphoric acids or their salts **[5]**

11/71 . . . Salts of phosphoric acids **[5]**

11/72 . . with metaphosphoric acids or their salts; with polyphosphoric acids or their salts; with perphosphoric acids or their salts **[5]**

11/73 . with carbon or compounds thereof (D06M 11/67 takes precedence) **[5]**

11/74 . . with carbon or graphite; with carbides; with graphitic acids or their salts **[5]**

11/75 . . with phosgene; with compounds containing both carbon and sulfur, e.g. thiophosgene (with thiocyanic acid D06M 11/67; with thiocarbamic acid D06M 13/425; with thiourea D06M 13/432) **[5]**

11/76 . . with carbon oxides or carbonates (D06M 11/75 takes precedence; with percarbonic acids or their salts D06M 11/50; with urea D06M 13/432) **[5]**

11/77 . with silicon or compounds thereof (with silanes or disilanes D06M 11/01) **[5]**

11/78 . . with silicon; with halides or oxyhalides of silicon; with fluorosilicates **[5]**

11/79 . . with silicon dioxide, silicic acids or their salts **[5]**

11/80 . with boron or compounds thereof, e.g. borides (with boranes or diboranes D06M 11/01; with boron carbides D06M 11/74) **[5]**

11/81 . . with boron; with boron halides; with fluoroborates **[5]**

11/82 . . with boron oxides; with boric, meta- or perboric acids or their salts, e.g. with borax **[5]**

11/83 . with metals; with metal-generating compounds, e.g. metal carbonyls; Reduction of metal compounds on textiles (decorating textiles by locally metallising D06Q 1/04) **[5]**

11/84 . combined with mechanical treatment (combined with mechanical tension, e.g. mercerising, D06M 11/40) **[5]**

13/00 **Treating fibres, threads, yarns, fabrics or fibrous goods made from such materials with non-macromolecular organic compounds** (D06M 10/00, D06M 14/00 take precedence; treatment with complexes of organic amines with inorganic substances D06M 11/59); **Such treatment combined with mechanical treatment [4,5]**

(1) In this group, the following term is used with the meaning indicated:
– "treatment" means, in the absence of an indication to the contrary, the treatment which leads to the end product, e.g. treatment with chloroacetic acid can mean treatment with chloroacetylchloride and saponification in two separate steps. **[5]**

(2) In this group, it is desirable to add the indexing codes of group D06M 101/00. **[5]**

13/02 . with hydrocarbons
13/03 . . with unsaturated hydrocarbons, e.g. alkenes, alkynes **[5]**
13/07 . . . Aromatic hydrocarbons **[5]**
13/08 . with halogenated hydrocarbons
13/10 . with compounds containing oxygen
13/11 . . Compounds containing epoxy groups or precursors thereof **[5]**
13/12 . . Aldehydes; Ketones
13/123 . . . Polyaldehydes; Polyketones **[5]**
13/127 . . . Mono-aldehydes, e.g. formaldehyde; Monoketones **[5]**
13/13 . . . Unsaturated aldehydes, e.g. acrolein; Unsaturated ketones; Ketenes **[5]**
13/133 . . . Halogenated aldehydes; Halogenated ketones **[5]**
13/137 . . Acetals, e.g. formals, ketals **[5]**
13/144 . . Alcohols; Metal alcoholates (D06M 13/11 takes precedence) **[5]**
13/148 . . . Polyalcohols, e.g. glycerol **[5]**
13/152 . . having a hydroxy group bound to a carbon atom of a six-membered aromatic ring **[5]**
13/156 . . . containing halogen atoms **[5]**
13/165 . . Ethers (D06M 13/11 takes precedence) **[5]**
13/17 . . . Polyoxyalkyleneglycol ethers **[5]**
13/175 . . . Unsaturated ethers, e.g. vinylethers **[5]**
13/184 . . Carboxylic acids; Anhydrides, halides or salts thereof **[5]**
13/188 . . . Monocarboxylic acids; Anhydrides, halides or salts thereof **[5]**
13/192 . . . Polycarboxylic acids; Anhydrides, halides or salts thereof **[5]**
13/196 . . . Percarboxylic acids; Anhydrides, halides or salts thereof **[5]**
13/203 . . . Unsaturated carboxylic acids; Anhydrides, halides or salts thereof **[5]**
13/207 . . . Substituted carboxylic acids, e.g. by hydroxy or keto groups; Anhydrides, halides or salts thereof **[5]**
13/21 . . . . Halogenated carboxylic acids; Anhydrides, halides or salts thereof **[5]**
13/213 . . . . . Perfluoroalkyl carboxylic acids; Anhydrides, halides or salts thereof **[5]**
13/217 . . . . Polyoxyalkyleneglycol ethers with a terminal carboxyl group; Anhydrides, halides or salts thereof **[5]**
13/224 . . Esters of carboxylic acids; Esters of carbonic acid **[5]**
13/228 . . . Cyclic esters, e.g. lactones **[5]**
13/232 . . . Organic carbonates **[5]**
13/236 . . . containing halogen atoms **[5]**
13/238 . . . Tannins, e.g. gallotannic acids **[5]**
13/244 . with compounds containing sulfur or phosphorus **[5]**
13/248 . . with compounds containing sulfur **[5]**
13/252 . . . Mercaptans, thiophenols, sulfides or polysulfides, e.g. mercapto acetic acid; Sulfonium compounds **[5]**
13/256 . . . Sulfonated compounds **[5]**
13/262 . . . Sulfated compounds **[5]**
13/265 . . . containing halogen atoms **[5]**
13/268 . . . Sulfones **[5]**
13/272 . . . Unsaturated compounds containing sulfur atoms **[5]**
13/275 . . . . Vinylthioethers **[5]**
13/278 . . . . Vinylsulfonium compounds; Vinylsulfone or vinylsulfoxide compounds **[5]**
13/282 . . with compounds containing phosphorus **[5]**
13/285 . . . Phosphines; Phosphine oxides; Phosphine sulfides; Phosphinic or phosphinous acids or derivatives thereof **[5]**
13/288 . . . Phosphonic or phosphonous acids or derivatives thereof **[5]**
13/29 . . . . containing halogen atoms **[5]**
13/292 . . . Mono-, di- or triesters of phosphoric or phosphorous acids; Salts thereof **[5]**
13/295 . . . . containing polyglycol moieties; containing neopentyl moieties **[5]**
13/298 . . . . containing halogen atoms **[5]**
13/313 . . . Unsaturated compounds containing phosphorus atoms, e.g. vinylphosphonium compounds **[5]**
13/322 . with compounds containing nitrogen **[5]**
13/325 . . Amines **[5]**
13/328 . . . the amino group being bound to an acyclic or cycloaliphatic carbon atom **[5]**
13/33 . . . . containing halogen atoms **[5]**
13/332 . . . Di- or polyamines **[5]**
13/335 . . . having an amino group bound to a carbon atom of a six-membered aromatic ring **[5]**
13/338 . . . Organic hydrazines; Hydrazinium compounds **[5]**
13/342 . . . Amino-carboxylic acids; Betaines; Aminosulfonic acids; Sulfo-betaines **[5]**
13/345 . . Nitriles **[5]**
13/348 . . . unsaturated, e.g. acrylonitrile **[5]**
13/35 . . Heterocyclic compounds **[5]**
13/352 . . . having five-membered heterocyclic rings **[5]**
13/355 . . . having six-membered heterocyclic rings **[5]**
13/358 . . . . Triazines **[5]**
13/364 . . . . . Cyanuric acid; Isocyanuric acid; Derivatives thereof **[5]**
13/368 . . Hydroxyalkylamines; Derivatives thereof, e.g. Kritchevsky bases **[5]**
13/372 . . containing etherified or esterified hydroxy groups **[5]**
13/376 . . Oximes **[5]**
13/382 . . Aminoaldehydes **[5]**
13/385 . . containing epoxy groups **[5]**
13/388 . . Amine oxides **[5]**
13/392 . . Nitroso compounds; Nitro compounds **[5]**
13/395 . . Isocyanates **[5]**
13/398 . . . containing fluorine atoms **[5]**

13/402 . . Amides **[5]**
13/405 . . . Acylated polyalkylene polyamines **[5]**
13/408 . . . Acylated amines containing fluorine atoms; Amides of perfluoro carboxylic acids **[5]**
13/41 . . . Amides derived from unsaturated carboxylic acids, e.g. acrylamide **[5]**
13/412 . . . . N-methylolacrylamides **[5]**
13/415 . . . Amides of aromatic carboxylic acids; Acylated aromatic amines **[5]**
13/418 . . . Cyclic amides, e.g. lactams; Amides of oxalic acid **[5]**
13/419 . . . Amides having nitrogen atoms of amide groups substituted by hydroxyalkyl or by etherified or esterified hydroxyalkyl groups **[5]**
13/422 . . . Hydrazides **[5]**
13/425 . . . Carbamic or thiocarbamic acids or derivatives thereof, e.g. urethanes (unsubstituted carbamic acid D06M 11/67) **[5]**
13/428 . . . . containing fluorine atoms **[5]**
13/432 . . . Urea, thiourea or derivatives thereof, e.g. biurets; Urea-inclusion compounds; Dicyanamides; Guanidines, e.g. dicyandiamides **[5]**
13/435 . . . Semicarbazides **[5]**
13/438 . . . Sulfonamides **[5]**
13/44 . . containing nitrogen and phosphorus
13/447 . . . Phosphonates or phosphinates containing nitrogen atoms **[5]**
13/453 . . . Phosphates or phosphites containing nitrogen atoms **[5]**
13/46 . . Compounds containing quaternary nitrogen atoms (hydrazinium compounds D06M 13/338; betaines, sulfo-betaines D06M 13/342) **[5]**
13/463 . . . derived from monoamines **[5]**
13/467 . . . derived from polyamines **[5]**
13/47 . . . derived from heterocyclic compounds **[5]**
13/473 . . . . having five-membered heterocyclic rings **[5]**
13/477 . . . . having six-membered heterocyclic rings **[5]**
13/48 . . containing the ethylene imine ring
13/487 . . Aziridinylphosphines; Aziridinylphosphine-oxides or sulfides; Carbonylaziridinyl or carbonylbisaziridinyl compounds; Sulfonylaziridinyl or sulfonylbisaziridinyl compounds **[5]**
13/493 . . . perfluorinated **[5]**
13/50 . with organometallic compounds; with organic compounds containing boron, silicon, selenium or tellurium atoms **[5]**
13/503 . . without bond between a carbon atom and a metal or a boron, silicon, selenium or tellurium atom **[5]**
13/507 . . . Organic silicon compounds without carbon-silicon bond **[5]**
13/51 . . Compounds with at least one carbon-metal or carbon-boron, carbon-silicon, carbon-selenium, or carbon-tellurium bond **[5]**
13/513 . . . with at least one carbon-silicon bond **[5]**
13/517 . . . . containing silicon-halogen bonds **[5]**
13/52 . combined with mechanical treatment (decorating textiles D06Q)
13/525 . . Embossing; Calendering; Pressing (moulding D06M 23/14) **[5]**
13/53 . . Cooling; Steaming or heating, e.g. in fluidised beds; with molten metals **[5]**
13/535 . . Suction; Vacuum treatment; Degassing; Blowing **[5]**

14/00 **Graft polymerisation of monomers containing carbon-to-carbon unsaturated bonds on to fibres, threads, yarns, fabrics, or fibrous goods made from such materials** (on to unshaped polymers C08F 251/00 to C08F 292/00) **[4]**
14/02 . on to materials of natural origin (D06M 14/18 takes precedence) **[4]**
14/04 . . of vegetal origin, e.g. cellulose or derivatives thereof **[4]**
14/06 . . of animal origin, e.g. wool, silk **[4]**
14/08 . on to materials of synthetic origin (D06M 14/18 takes precedence) **[4]**
14/10 . . of macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
14/12 . . of macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
14/14 . . . Polyesters **[4]**
14/16 . . . Polyamides **[4]**
14/18 . using wave energy or particle radiation **[4]**
14/20 . . on to materials of natural origin **[4]**
14/22 . . . of vegetal origin, e.g. cellulose or derivatives thereof **[4]**
14/24 . . . of animal origin, e.g. wool, silk **[4]**
14/26 . . on to materials of synthetic origin **[4]**
14/28 . . . of macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
14/30 . . . of macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
14/32 . . . . Polyesters **[4]**
14/34 . . . . Polyamides **[4]**
14/36 . on to carbon fibres **[5]**

15/00 **Treating fibres, threads, yarns, fabrics or fibrous goods made from such materials with macromolecular compounds**; **Such treatment combined with mechanical treatment** (D06M 10/00, D06M 14/00 take precedence) **[5]**

(1) In this group, the following term is used with the meaning indicated:
– "treatment" means, in the absence of an indication to the contrary, the treatment which leads to the end product, e.g.:
(a) treatment with polyvinylalcohol can mean treatment with polyvinylacetate and subsequent saponification in a separate step;
(b) treatment with aminoplast can mean the delayed cure process or the treatment with precondensation products, or with e.g. urea and with formaldehyde in two separate steps. **[5]**
(2) In this group, it is desirable to add the indexing codes of group D06M 101/00. **[5]**

15/01 . with natural macromolecular compounds or derivatives thereof (with natural rubber or derivatives thereof D06M 15/693) **[4]**
15/03 . . Polysaccharides or derivatives thereof **[4]**
15/05 . . . Cellulose or derivatives thereof **[4]**
15/055 . . . . with the residual liquors derived of the sulfatic process for the preparation of cellulose **[5]**
15/07 . . . . Cellulose esters **[4]**

15/09 . . . . Cellulose ethers **[4]**
15/11 . . . Starch or derivatives thereof **[4]**
15/13 . . . Alginic acid or derivatives thereof **[4]**
15/15 . . Proteins or derivatives thereof **[4]**
15/17 . . Natural resins, resinous alcohols, resinous acids, or derivatives thereof **[4,5]**
15/19 . with synthetic macromolecular compounds (with synthetic rubber D06M 15/693) **[4]**
15/21 . . Macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
15/227 . . . of hydrocarbons, or reaction products thereof, e.g. afterhalogenated or sulfochlorinated **[4]**
15/233 . . . . aromatic, e.g. styrene **[4]**
15/244 . . . of halogenated hydrocarbons (afterhalogenated hydrocarbons D06M 15/227) **[4]**
15/248 . . . . containing chlorine **[4]**
15/252 . . . . containing bromine **[4]**
15/256 . . . . containing fluorine **[4]**
15/263 . . . of unsaturated carboxylic acids; Salts or esters thereof **[4]**
15/267 . . . . of unsaturated carboxylic esters having amino or quaternary ammonium groups **[4]**
15/27 . . . . of alkylpolyalkylene glycol esters of unsaturated carboxylic acids **[4]**
15/273 . . . . of unsaturated carboxylic esters having epoxy groups **[4]**
15/277 . . . . containing fluorine **[4]**
15/285 . . . of unsaturated carboxylic acid amides or imides **[4]**
15/29 . . . . containing a N-methylol group or an etherified N-methylol group; containing a N-aminomethylene group; containing a N-sulfido-methylene group **[4,5]**
15/295 . . . . containing fluorine **[4]**
15/31 . . . of unsaturated nitriles **[4]**
15/327 . . . of unsaturated alcohols or esters thereof **[4]**
15/33 . . . . Esters containing fluorine **[5]**
15/333 . . . . of vinyl acetate; Polyvinylalcohol **[4]**
15/347 . . . of unsaturated ethers, acetals, hemiacetals, ketones or aldehydes **[4,5]**
15/353 . . . . containing fluorine **[4]**
15/356 . . . of other unsaturated compounds containing nitrogen, sulfur, silicon or phosphorus atoms **[5]**
15/37 . . Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[4]**
15/39 . . . Aldehyde resins; Ketone resins; Polyacetals **[4]**
15/41 . . . . Phenol-aldehyde or phenol-ketone resins **[4,5]**
15/415 . . . . . modified by compounds containing phosphorus **[5]**
15/423 . . . . Amino-aldehyde resins **[4,5]**
15/427 . . . . . modified by alkoxylated compounds or alkylene oxides **[4]**
15/429 . . . . . modified by compounds containing sulfur **[5]**
15/43 . . . . . modified by phosphorus compounds **[4]**
15/431 . . . . . by phosphines or phosphine oxides; by oxides or salts of the phosphonium radical **[5]**
15/432 . . . . . by phosphonic acids or derivatives thereof **[5]**
15/433 . . . . . by phosphoric acids **[4]**
15/437 . . . . . containing fluorine **[4]**
15/45 . . . . . Use of special catalysts **[4]**
15/507 . . . Polyesters **[4]**
15/51 . . . . Unsaturated polymerisable polyesters **[5]**
15/513 . . . . Polycarbonates **[4]**
15/53 . . . Polyethers (polyacetals D06M 15/39) **[4]**
15/55 . . . Epoxy resins **[4]**
15/555 . . . . modified by compounds containing phosphorus **[5]**
15/564 . . . Polyureas, polyurethanes or other polymers having ureide or urethane links; Precondensation products forming them **[4]**
15/568 . . . . Reaction products of isocyanates with polyethers **[4]**
15/572 . . . . Reaction products of isocyanates with polyesters or polyesteramides **[4]**
15/576 . . . . containing fluorine **[4]**
15/579 . . . . modified by compounds containing phosphorus **[5]**
15/59 . . . Polyamides; Polyimides **[4,5]**
15/592 . . . . made of polymerised unsaturated fatty acids and polyamines **[5]**
15/595 . . . . Derivatives obtained by substitution of a hydrogen atom of the carboxamide radical **[5]**
15/598 . . . . modified by compounds containing phosphorus **[5]**
15/61 . . . Polyamines **[4]**
15/63 . . . containing sulfur in the main chain, e.g. polysulfones **[4]**
15/643 . . . containing silicon in the main chain **[4]**
15/647 . . . . containing polyether sequences **[4]**
15/65 . . . . containing epoxy groups **[4]**
15/653 . . . . modified by isocyanate compounds **[4]**
15/657 . . . . containing fluorine **[4]**
15/667 . . . containing phosphorus in the main chain **[4]**
15/673 . . . . containing phosphorus and nitrogen in the main chain **[4]**
15/687 . . . containing atoms other than phosphorus, silicon, sulfur, nitrogen, oxygen or carbon in the main chain **[4]**
15/693 . with natural or synthetic rubber, or derivatives thereof **[4]**
15/70 . combined with mechanical treatment (decorating textiles D06Q)
15/705 . . Embossing; Calendering; Pressing (moulding D06M 23/14) **[5]**
15/71 . . Cooling; Steaming or heating, e.g. in fluidised beds; with molten metals **[5]**
15/715 . . Suction; Vacuum treatment; Degassing; Blowing **[5]**

16/00 Biochemical treatment of fibres, threads, yarns, fabrics, or fibrous goods made from such materials, e.g. enzymatic [2]

Note

In this group, it is desirable to add the indexing codes of group D06M 101/00. **[5]**

17/00 Producing multi-layer textile fabrics
17/02 . by applying cellulose derivatives as adhesives **[5]**
17/04 . by applying synthetic resins as adhesives **[5]**
17/06 . . Polymers of vinyl compounds **[5]**
17/08 . . Polyamides **[5]**
17/10 . . Polyurethanes **[5]**

19/00 Treatment of feathers [2]

23/00 Treatment of fibres, threads, yarns, fabrics or fibrous goods made from such materials, characterised by the process [5]

Note

In this group, it is desirable to add the indexing codes of group D06M 101/00. **[5]**

23/02 . Processes in which the treating agent is releasably affixed or incorporated into a dispensing means **[5]**

23/04 . Processes in which the treating agent is applied in the form of a foam **[5]**

23/06 . Processes in which the treating agent is dispersed in a gas, e.g. aerosols (aerosol compositions C09K 3/30) **[5]**

23/08 . Processes in which the treating agent is applied in powder or granular form (adhesives for multi-layer textile fabrics D06M 17/00; decorating textiles D06Q) **[5]**

23/10 . Processes in which the treating agent is dissolved or dispersed in organic solvents; Processes for the recovery of organic solvents thereof **[5]**

23/12 . Processes in which the treating agent is incorporated in microcapsules (making microcapsules B01J 13/02) **[5]**

23/14 . Processes for the fixation or treatment of textile materials in three-dimensional forms **[5]**

23/16 . Processes for the non-uniform application of treating agents, e.g. one-sided treatment; Differential treatment (decorating textiles D06Q) **[5]**

23/18 . . for the chemical treatment of borders of fabrics or knittings; for the thermal or chemical fixation of cuttings, seams or fibre ends **[5]**

Indexing scheme, associated with groups D06M 11/00, D06M 13/00, D06M 15/00, D06M 16/00 and D06M 23/00, relating to the fibres to be treated. [5]

101/00 Chemical constitution of the fibres, threads, yarns, fabrics or fibrous goods made from such materials, to be treated [5]

(1) Examples:
- the swelling of cellulose with alkaline hydroxides is classified in group D06M 11/38 and indexed in group D06M 101/06;
- the treatment of cellulose with amines is classified in group D06M 13/325 and indexed in group D06M 101/06;
- the treatment of polyester fibres with polyesters is classified in group D06M 15/507 and indexed in group D06M 101/32;
- the treatment of wool with pepsin is classified in group D06M 16/00 and indexed in group D06M 101/12;
- the treatment of cellulose with silicon tetrachloride in the form of a foam is classified in groups D06M 11/78, D06M 23/04 and indexed in group D06M 101/06. **[5]**

(2) Blends of fibres are indexed according to each constituent fibre. **[5]**

101/02 . Natural fibres, other than mineral fibres **[5]**

101/04 . . Vegetal fibres **[5]**

101/06 . . . cellulosic **[5]**

101/08 . . . . Esters or ethers of cellulose **[5]**

101/10 . . Animal fibres **[5]**

101/12 . . . Keratin fibres or silk **[5]**

101/14 . . . Collagen fibres **[5]**

101/16 . Synthetic fibres, other than mineral fibres **[5]**

101/18 . . Synthetic fibres consisting of macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[5]**

101/20 . . . Polyalkenes, polymers or copolymers of compounds with alkenyl groups bonded to aromatic groups **[5]**

101/22 . . . Polymers or copolymers of halogenated mono-olefins **[5]**

101/24 . . . Polymers or copolymers of alkenylalcohols or esters thereof; Polymers or copolymers of alkenylethers, acetals or ketones **[5]**

101/26 . . . Polymers or copolymers of unsaturated carboxylic acids or derivatives thereof **[5]**

101/28 . . . . Acrylonitrile; Methacrylonitrile **[5]**

101/30 . . Synthetic polymers consisting of macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[5]**

101/32 . . . Polyesters **[5]**

101/34 . . . Polyamides **[5]**

101/36 . . . . Aromatic polyamides **[5]**

101/38 . . . Polyurethanes **[5]**

101/40 . Fibres of carbon **[5]**

D06N WALL, FLOOR, OR LIKE COVERING MATERIALS, E.G. LINOLEUM, OILCLOTH, ARTIFICIAL LEATHER, ROOFING FELT, CONSISTING OF A FIBROUS WEB COATED WITH A LAYER OF MACROMOLECULAR MATERIAL; FLEXIBLE SHEET MATERIAL NOT OTHERWISE PROVIDED FOR (laminates in general B32B; coated webs which retain the character of paper or cardboard D21)

Note

Layered products classified in this subclass are also classified in subclass B32B.

1/00 Linoleum

3/00 Artificial leather, oilcloth, or like material obtained by covering fibrous webs with macromolecular material, e.g. resins, rubber or derivatives thereof [4]

3/02 . with cellulose derivatives

3/04 . with macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds

3/06 . . with polyvinyl chloride or its copolymerisation products

3/08 . . . with a finishing layer consisting of polyacrylates, polyamides, or polyurethanes
3/10 . . with styrene-butadiene copolymerisation products
3/12 . with macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds
3/14 . . with polyurethanes
3/16 . with oil varnishes
3/18 . with two layers of different macromolecular materials (D06N 3/08 takes precedence)

5/00 Roofing felt, i.e. fibrous webs coated with bitumen

7/00 Flexible sheet materials not otherwise provided for, e.g. textile threads, filaments, yarns or tow, glued on macromolecular material
7/02 . composed of mixtures of substances
7/04 . characterised by their surface properties
7/06 . impregnated

D06P DYEING OR PRINTING TEXTILES; **DYEING LEATHER, FURS, OR SOLID MACROMOLECULAR SUBSTANCES IN ANY FORM** (for mechanical matters, see B41F, B41J, D06B, D06C; printing on surfaces of materials other than textiles B41M; surface treatment of fibres or filaments from glass, minerals, or slags C03C 25/00; mordanting D06M; dyeing paper D21H)

Note

Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

1/00 General processes of dyeing or printing textiles, or general processes of dyeing leather, furs, or solid macromolecular substances in any form, classified according to the dyes, pigments, or auxiliary substances employed
1/02 . using azo dyes (D06P 1/18, D06P 1/38, D06P 1/39, D06P 1/41 take precedence) **[2]**
1/04 . . not containing metal
1/06 . . . containing acid groups
1/08 . . . cationic azo dyes
1/10 . . containing metal
1/12 . . prepared in situ
1/13 . using azomethine dyes **[2]**
1/14 . using phthalocyanine dyes without vatting (D06P 1/38, D06P 1/40 take precedence)
1/16 . using dispersed, e.g. acetate, dyestuffs
1/18 . . Azo dyes
1/19 . . Nitro dyes **[2]**
1/20 . . Anthraquinone dyes
1/22 . using vat dyestuffs
1/24 . . Anthraquinone dyes
1/26 . . Phthalocyanine dyes
1/28 . . Esters of vat dyestuffs
1/30 . using sulfur dyes
1/32 . using oxidation dyes
1/34 . using natural dyestuffs
1/36 . using mordant dyes
1/38 . using reactive dyes
1/382 . . with a reactive group directly attached to the heterocyclic group **[2]**
1/384 . . with a reactive group not directly attached to the heterocyclic group **[2]**
1/39 . using acid dyes **[2]**
1/40 . . using acid dyes without azo groups
1/41 . using basic dyes **[2]**
1/42 . . using basic dyes without azo groups
1/44 . using insoluble pigments or auxiliary substances, e.g. binders **[2]**
1/46 . . using compositions containing natural macromolecular substances or derivatives thereof
1/48 . . . Derivatives of carbohydrates
1/50 . . . . Derivatives of cellulose
1/52 . . using compositions containing synthetic macromolecular substances (D06P 1/60 takes precedence)
1/54 . . . Substances with reactive groups together with crosslinking agents
1/56 . . . Condensation products or precondensation products prepared with aldehydes
1/58 . . . . together with other synthetic macromolecular substances
1/60 . . using compositions containing polyethers
1/607 . . . Nitrogen-containing polyethers **[2]**
1/613 . . . Polyethers without nitrogen **[2]**
1/62 . . using compositions containing low-molecular-weight organic compounds with sulfate or sulfonate groups
1/64 . . using compositions containing low-molecular-weight organic compounds without sulfate or sulfonate groups
1/642 . . . Compounds containing nitrogen **[2]**
1/645 . . . . Aliphatic, araliphatic or cycloaliphatic compounds containing amino groups **[2]**
1/647 . . . . Nitrogen-containing carboxylic acids or their salts **[2]**

1/649 . . . . Compounds containing carbonamide, thiocarbonamide or guanyl groups **[2]**
1/651 . . . Compounds without nitrogen **[2]**
1/653 . . Nitrogen-free carboxylic acids or their salts **[2]**
1/655 . . Compounds containing ammonium groups **[2,6]**
1/66 . . . containing quaternary ammonium groups **[6]**
1/667 . . Organo-phosphorus compounds **[2]**
1/673 . . Inorganic compounds **[2]**
1/81 . using dyes dissolved in inorganic solvents **[7]**
1/90 . using dyes dissolved in organic solvents or aqueous emulsions thereof **[2]**
1/92 . . in organic solvents **[7]**
1/94 . using dyes dissolved in solvents which are in the supercritical state **[7]**
1/96 . Dyeing characterised by a short bath ratio **[7]**

3/00 Special processes of dyeing or printing textiles, or dyeing leather, furs, or solid macromolecular substances in any form, classified according to the material treated

3/02 . Material containing basic nitrogen
3/04 . . containing amide groups
3/06 . . . using acid dyes
3/08 . . . using oxidation dyes
3/10 . . . using reactive dyes
3/12 . . . Preparing azo dyes on the material
3/14 . . . Wool
3/16 . . . . using acid dyes
3/18 . . . . using basic dyes
3/20 . . . . using mordant dyes
3/22 . . . . Preparing azo dyes on the fibre
3/24 . . . Polyamides; Polyurethanes
3/26 . . . . using dispersed dyestuffs
3/28 . . . . Preparing azo dyes on the material
3/30 . . . Furs
3/32 . . . Leather
3/34 . Material containing ester groups (D06P 3/04 takes precedence)
3/36 . . using dispersed dyestuffs
3/38 . . Preparing azo dyes on the material
3/40 . . Cellulose acetate
3/42 . . . using dispersed dyestuffs
3/44 . . . Preparing azo dyes on the material
3/46 . . . Cellulose triacetate
3/48 . . . . using dispersed dyestuffs
3/50 . . . . Preparing azo dyes on the material
3/52 . . Polyesters
3/54 . . . using dispersed dyestuffs
3/56 . . . Preparing azo dyes on the material
3/58 . Material containing hydroxyl groups
3/60 . . Natural or regenerated cellulose
3/62 . . . using direct dyes
3/64 . . . using mordant dyes
3/66 . . . using reactive dyes
3/68 . . . Preparing azo dyes on the material
3/70 . Material containing nitrile groups
3/72 . . using dispersed dyestuffs
3/74 . . using acid dyes
3/76 . . using basic dyes
3/78 . . Preparing azo dyes on the material
3/79 . Polyolefins **[2]**
3/80 . Inorganic fibres (surface treatment of fibres or filaments from glass, minerals or slags C03C 25/00)
3/82 . Textiles which contain different kinds of fibres
3/84 . . in the same shade
3/85 . . dyed with one dye **[2]**
3/852 . . . containing half-wool or cellulose-polyamide mixture **[2]**
3/854 . . . containing modified or unmodified fibres **[2]**
3/86 . . in different shades
3/87 . . dyed with two or more dyes **[2]**
3/872 . . . dyed with dispersed and reactive dyes **[2]**
3/874 . . . with non-reactive anionic and non-reactive dispersed or cationic dyes **[2]**

5/00 Other features in dyeing or printing textiles, or dyeing leather, furs, or solid macromolecular substances in any form

5/02 . After-treatment

Note

In groups D06P 5/04 to D06P 5/10, in the absence of an indication to the contrary, a compound is classified in the last appropriate place.

5/04 . . with organic compounds
5/06 . . . containing nitrogen
5/08 . . . macromolecular
5/10 . . with compounds containing metal
5/12 . Reserving parts of the material before dyeing or printing
5/13 . Fugitive dyeing or stripping dyes **[2]**
5/15 . Locally discharging the dyes **[2]**
5/17 . . Azo dyes **[2]**
5/20 . Physical treatments affecting dyeing, e.g. ultrasonic, electric **[2]**
5/22 . Effecting variation of dye affinity on textile material by chemical means that react with the fibre **[2]**
5/24 . Transfer printing (transfer printing apparatus for textile material B41F 16/02) **[7]**
5/26 . . Heat transfer printing **[7]**
5/28 . . . using subliming dyes **[7]**
5/30 . Ink jet printing (ink jet printing apparatus B41J 2/00) **[7]**

7/00 Dyeing or printing processes combined with mechanical treatment

D06Q **DECORATING TEXTILES** (for treatment of textiles by mechanical means, see D06B to D06J; metallising the entire surface of textiles D06M 11/83; textile threads, filaments, yarns or tow, glued on macromolecular material D06N 7/00; dyeing or printing D06P) **[5]**

Note

In this subclass, the following term is used with the meaning indicated:
– "decorating" means "local treatment" or "local effects produced" as to change, e.g. optically, the appearance or the properties of textile materials. **[5]**

1/00 **Decorating textiles** (partial dyeing D06B 11/00; reserving parts of the material before dyeing or printing textiles D06P 5/12)

1/02 **.** Producing patterns by locally destroying or modifying the fibres of a web by chemical actions, e.g. making translucent

1/04 **.** by metallising (transfer of metal particles D06Q 1/12) **[5]**

1/06 **.** by local treatment of pile fabrics with chemical means **[5]**

1/08 **.** by fixation of mechanical effects, e.g. calendering, embossing or Chintz effects, using chemical means **[5]**

1/10 **.** by treatment with, or fixation of, a particulate material, e.g. mica, glass beads (by metallising D06Q 1/04; by transferring D06Q 1/12) **[5]**

1/12 **.** by transferring a chemical agent or a metallic or non-metallic material in particulate or other form, from a solid temporary carrier to the textile **[5]**

1/14 **. .** by transferring fibres, or adhesives for fibres, to the textile **[5]**

D07 ROPES; CABLES OTHER THAN ELECTRIC

D07B **ROPES OR CABLES IN GENERAL** (joining ropes or cables to one another or to other objects B65H 69/00, F16G 11/00; mechanical finishing or dressing of ropes D02J; decorative ropes or cords D04D; suspension cables for bridges E01D 19/16; specially adapted for driving, or for being driven by, pulleys or other gearing elements F16G 9/00; electric cables or joints insofar as electrical aspects are essential H01B, H01R)

Subclass index

1/00 Constructional features of ropes or cables

1/02 . Ropes built-up from fibrous or filamentary material, e.g. of vegetable origin, of animal origin, regenerated cellulose, plastics

1/04 . . with a core of fibres or filaments arranged parallel to the centre line

1/06 . Ropes or cables built-up from metal wires, e.g. of section wires around a hemp core

1/08 . . the layers of which are formed of profiled interlocking wires, i.e. the strands forming concentric layers

1/10 . . . with a core of wires arranged parallel to the centre line

1/12 . Ropes or cables with a hollow core

1/14 . Ropes or cables with incorporated auxiliary elements, e.g. for making, extending throughout the length of the rope or cable

1/16 . Ropes or cables with an enveloping sheathing or inlays of rubber or plastics (D07B 1/04, D07B 1/10 take precedence)

1/18 . Grommets

1/20 . Buoyant ropes, e.g. with air-filled cellular cores; Accessories therefor

1/22 . Flat or flat-sided ropes; Sets of ropes consisting of a series of parallel ropes

Manufacture of ropes or cables

3/00 General-purpose machines or apparatus for producing twisted ropes or cables from component strands of the same or different material

3/02 . in which the supply reels rotate about the axis of the rope or cable

3/04 . . and are arranged in tandem along the axis of the machine

3/06 . . and are spaced radially from the axis of the machine

3/08 . in which the take-up reel rotates about the axis of the rope or cable and the supply reels are fixed in position

3/10 . . with provision for imparting more than one complete twist to the ropes or cables for each revolution of the take-up reel

3/12 . operating with rotating loops of filaments

3/14 . hand-operated

5/00 Making ropes or cables from special materials or of particular form

5/02 . from straw or like vegetable material

5/04 . Rope bands

5/06 . from natural or artificial staple fibres

5/08 . . agglutinated by adhesives

5/10 . from strands of non-circular cross-section

5/12 . of low twist or low tension by processes comprising setting or straightening treatments

7/00 Details of, or auxiliary devices incorporated in, rope- or cable-making machines; Auxiliary apparatus associated with such machines

7/02 . Machine details; Auxiliary devices

7/04 . . Devices for imparting reverse rotation to bobbin- or reel cages

7/06 . . Bearing supports or brakes for supply bobbins or reels

7/08 . . Alarms or stop motions responsive to exhaustion or breakage of filamentary material fed from supply reels or bobbins

7/10 . . Devices for taking-up or winding the finished rope or cable

7/12 . . for softening, lubricating, or impregnating ropes, cables, or component strands thereof

7/14 . . for coating or wrapping ropes, cables, or component strands thereof (applying liquids or other fluent materials to surfaces in general B05; wrapping elongated cores in general B65H 81/06)

7/16 . Auxiliary apparatus

7/18 . . for spreading or untwisting ropes or cables into constituent parts for treatment or splicing purposes

9/00 Binding or sealing ends, e.g. to prevent unravelling

PAPER

D21 PAPER-MAKING; PRODUCTION OF CELLULOSE

D21B FIBROUS RAW MATERIALS OR THEIR MECHANICAL TREATMENT

1/00 **Fibrous raw materials or their mechanical treatment** (beaters D21D 1/00)

1/02 . Pretreatment of the raw materials by physical or chemical means (removal of bark B27L)

1/04 . by dividing raw materials into small particles, e.g. fibres (breaking-up or cutting wood or the like by dry methods B27L; disintegrating peat C10F 7/02; obtaining fibres mechanically for spinning from rags, peat, or the like D01B)

1/06 . . by dry methods

1/08 . . . the raw material being waste paper (chemical part D21C 5/02); the raw material being rags

1/10 . . . . by cutting actions

1/12 . . by wet methods, by the use of steam

1/14 . . . Disintegrating in mills (in general B02C)

1/16 . . . . in the presence of chemical agents

1/18 . . . . in magazine-type machines

1/20 . . . . . with chain feed

1/22 . . . . . with screw feed

1/24 . . . . . of the pocket type

1/26 . . . . Driving or feeding arrangements

1/28 . . . . Dressers for mill stones, combined with the mill

1/30 . . . Defibrating by other means

1/32 . . . . of waste paper

1/34 . . . . Kneading or mixing; Pulpers

1/36 . . . . Explosive disintegration by sudden pressure reduction

1/38 . Conserving the finely-divided cellulosic material

D21C PRODUCTION OF CELLULOSE BY REMOVING NON-CELLULOSE SUBSTANCES FROM CELLULOSE-CONTAINING MATERIALS; REGENERATION OF PULPING LIQUORS; APPARATUS THEREFOR

Note

Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

1/00 **Pretreatment of the finely-divided materials before digesting** (of waste paper D21C 5/02)

1/02 . with water or steam

1/04 . with acid reacting compounds

1/06 . with alkaline reacting compounds

1/08 . with oxygen-generating compounds

1/10 . Physical methods for facilitating impregnation

3/00 **Pulping cellulose-containing materials** (digesters D21C 7/00)

3/02 . with inorganic bases or alkaline reacting compounds, e.g. sulfate processes

3/04 . with acids, acid salts, or acid anhydrides

3/06 . . sulfur dioxide; sulfurous acid; bisulfites

3/08 . . . calcium bisulfite

3/10 . . . magnesium bisulfite

3/12 . . . sodium bisulfite

3/14 . . . ammonium bisulfite

3/16 . . nitrogen oxides; nitric acid

3/18 . with halogens or halogen-generating compounds (bleaching cellulose pulp D21C 9/12)

3/20 . with organic solvents

3/22 . Other features of pulping processes

3/24 . . Continuous processes

3/26 . . Multi-stage processes

3/28 . . Prevention of foam

5/00 **Other processes for obtaining cellulose, e.g. cooking cotton linters** (obtaining fibres for spinning D01C)

5/02 . Working-up waste paper (mechanical part D21B 1/08, D21B 1/32)

7/00 **Digesters**

7/02 . Rotary digesters

7/04 . Linings

7/06 . Feeding devices

7/08 . Discharge devices

7/10 . Heating devices
7/12 . Devices for regulating or controlling
7/14 . Means for circulating the lye
7/16 . Safety devices

9/00 After-treatment of cellulose pulp, e.g. of wood pulp, or cotton linters
9/02 . Washing
9/04 . . in diffusers
9/06 . . in filters
9/08 . Removal of fats, resins, pitch, or waxes
9/10 . Bleaching
9/12 . . with halogens or halogen-containing compounds (D21C 9/16 takes precedence) **[4]**
9/14 . . . with ClO_2 or chlorites
9/147 . . with oxygen or its allotropic modifications (D21C 9/16 takes precedence) **[4]**
9/153 . . . with ozone **[4]**
9/16 . . with per compounds
9/18 . De-watering (de-watering in general F26B)

11/00 Regeneration of pulp liquors
11/02 . of sulfite lye
11/04 . of alkali lye
11/06 . Treatment of pulp gases; Recovery of the heat content of the gases
11/08 . . Deodorisation
11/10 . Concentrating spent liquor by evaporation (evaporators B01D)
11/12 . Combustion of pulp liquors
11/14 . . Wet combustion

D21D TREATMENT OF THE MATERIALS BEFORE PASSING TO THE PAPER-MAKING MACHINE [5]

1/00 Methods of beating or refining; **Beaters of the Hollander type** (knotter screens D21F)
1/02 . Methods of beating; Beaters of the Hollander type
1/04 . . Beater rolls or bars
1/06 . . Bed plates
1/08 . . Beaters with means for driving the pulp quickly
1/10 . . Beaters with means for regulating the pressure between the beater roll and the bed plate
1/12 . . Beaters with means for continuous pulp discharge
1/14 . . Beaters with one beater roll and with vertical stuff circulation canal
1/16 . . Beaters with means for returning the pulp over the head of the beater roll
1/18 . . Beaters with two or more beater rolls
1/20 . Methods of refining
1/22 . . Jordans
1/24 . . . Jordan rolls
1/26 . . . Jordan bed plates
1/28 . . Ball or rod mills
1/30 . . Disc mills
1/32 . . Hammer mills
1/34 . . Other mills or refiners
1/36 . . . with vertical shaft
1/38 . . . with horizontal shaft
1/40 . . Washing the fibres

5/00 Purification of the pulp suspension by mechanical means; **Apparatus therefor** (centrifuges, cyclones B04)
5/02 . Straining or screening the pulp
5/04 . . Flat screens
5/06 . . Rotary screen-drums
5/08 . . . combined with a rocking movement
5/10 . . . . of the tank
5/12 . . . . of the screen
5/14 . . . . of the tank and the screen
5/16 . . Cylinders and plates for screens
5/18 . with the aid of centrifugal force
5/20 . . in apparatus with a horizontal axis
5/22 . . in apparatus with a vertical axis
5/24 . . in cyclones
5/26 . De-aeration of paper stock
5/28 . Tanks for storing or agitating pulp

99/00 Subject matter not provided for in other groups of this subclass [8]

D21F PAPER-MAKING MACHINES; METHODS OF PRODUCING PAPER THEREON

Subclass index

1/00 Wet end of machines for making continuous webs of paper
1/02 . Head boxes of Fourdrinier machines
1/04 . Head boxes of cylinder machines
1/06 . Regulating pulp flow
1/08 . Regulating consistency
1/10 . Wire-cloths
1/12 . . Seams thereof

1/14 . . . welded
1/16 . . . sewn
1/18 . Shaking-apparatus for wire-cloths and associated parts
1/20 . . in Fourdrinier machines
1/22 . . in cylinder machines
1/24 . Tilting, raising, or lowering mechanisms for wire-cloths
1/26 . . in Fourdrinier machines
1/28 . . in cylinder machines
1/30 . Protecting wire-cloths from mechanical damage
1/32 . Washing wire-cloths or felts
1/34 . Construction or arrangement of spraying pipes
1/36 . Guiding mechanisms
1/38 . . Pads
1/40 . . Rolls
1/42 . . Jets
1/44 . Watermarking devices
1/46 . . Dandy rolls
1/48 . Suction apparatus (suction rolls D21F 3/10)
1/50 . . Suction boxes with rolls
1/52 . . Suction boxes without rolls
1/54 . Skimming devices, e.g. froth ledges
1/56 . Deckle frame arrangements
1/58 . Deckle straps
1/60 . Cylinder moulds
1/62 . Sand traps
1/64 . Magnetic separators
1/66 . Pulp catching, de-watering, or recovering; Re-use of pulp-water
1/68 . . using hydrocyclones
1/70 . . by flotation
1/72 . . using funnels
1/74 . . using cylinders
1/76 . . . with suction
1/78 . . . with pressure
1/80 . . using endless screening belts
1/82 . . adding fibre agglomeration compositions

2/00 Transferring continuous webs from wet ends to press sections

3/00 Press section of machines for making continuous webs of paper

3/02 . Wet presses
3/04 . . Arrangements thereof
3/06 . . Means for regulating the pressure
3/08 . . Pressure rolls
3/10 . . Suction rolls, e.g. couch rolls

5/00 Dryer section of machines for making continuous webs of paper

5/02 . Drying on cylinders
5/04 . . on two or more drying cylinders
5/06 . . Regulating temperature
5/08 . . Arrangement of steam points in the cylinders
5/10 . . Removing condensate from the interior of the cylinders
5/12 . Festoon drying
5/14 . Drying webs by applying vacuum
5/16 . Drying webs by electrical heating
5/18 . Drying webs by hot air
5/20 . Waste heat recovery

7/00 Other details of machines for making continuous webs of paper

7/02 . Mechanical driving arrangements
7/04 . Paper-break control devices
7/06 . Indicating or regulating the thickness of the layer; Signal devices
7/08 . Felts
7/10 . . Seams thereof
7/12 . . Drying

9/00 Complete machines for making continuous webs of paper

9/02 . of the Fourdrinier type
9/04 . of the cylinder type

11/00 Processes for making continuous lengths of paper, or of cardboard, or of wet web for fibreboard production, on paper-making machines

11/02 . of the Fourdrinier type
11/04 . . paper or board consisting of two or more layers
11/06 . of the cylinder type
11/08 . . paper or board consisting of two or more layers
11/10 . Making imitation mould-made paper
11/12 . Making corrugated paper or board
11/14 . Making cellulose wadding, filter- or blotting paper
11/16 . Making paper strips for spinning or twisting

13/00 Methods or apparatus for making discontinuous sheets of paper, pulpboard, or cardboard, or of wet web, for fibreboard production (making discontinuous sheets of board in moulds D21J; drying paper, pulpboard, or cardboard, in discontinuous-sheet form F26B)

13/02 . Making hand-made paper
13/04 . on cylinder board machines
13/06 . . Format rolls
13/08 . . . Automatic cut-off rolls
13/10 . using board presses
13/12 . . Platen presses

D21G CALENDERS; ACCESSORIES FOR PAPER-MAKING MACHINES (winders or rewinders for finished products, means for adjustment of wrinkles or lateral extensions B65H)

1/00 Calenders (if restricted to the treatment of particular materials, see the relevant place, e.g. B29C 43/24, D06); **Smoothing apparatus**

1/02 . Rolls; Their bearings (in general F16C 13/00)

3/00 Doctors

3/02 . for calenders
3/04 . for drying cylinders

5/00 Safety devices

7/00 Damping devices

9/00 Other accessories for paper-making machines

D21H PULP COMPOSITIONS; PREPARATION THEREOF NOT COVERED BY SUBCLASSES D21C, D21D; IMPREGNATING OR COATING OF PAPER; TREATMENT OF FINISHED PAPER NOT COVERED BY CLASS B31 OR SUBCLASS D21G; PAPER NOT OTHERWISE PROVIDED FOR [5]

(1) This subclass covers also pulp compositions for the preparation of fibreboard or other fibrous articles by wet processes. **[5]**

(2) In this subclass, the following terms are used with the meaning indicated:
- "pulp" means a dispersion comprising paper-making fibres and optional additives, which is to be processed, and covers the term "stock"; it also means dry paper-making fibres which are to be made into paper by either wet or dry processes; **[5]**
- "paper" means paper, cardboard or wet-laid non-woven fabrics.

(3) If a pulp composition or a paper, or a constituent thereof, is characterised by more than one feature provided for in this subclass, for example, by both the fibrous material and a coating or by both a colorant and a water-repelling agent, classification is made in all places providing for these features. **[8]**

(4) Processes using enzymes or micro-organisms in order to:
(i) liberate, separate or purify a pre-existing compound or composition, or to
(ii) treat textiles or clean solid surfaces of materials
are further classified in subclass C12S. **[5]**

Subclass index

Note

In groups D21H 11/00 to D21H 15/00, in the absence of an indication to the contrary, classification is made in the last appropriate place. **[5]**

11/00 Pulp or paper, comprising cellulose or lignocellulose fibres of natural origin only [5]

11/02 . Chemical or chemomechanical pulp **[5]**
11/04 . . Kraft or sulfate pulp **[5]**
11/06 . . Sulfite or bisulfite pulp **[5]**
11/08 . Mechanical or thermomechanical pulp **[5]**
11/10 . Mixtures of chemical and mechanical pulp **[5]**
11/12 . Pulp from non-woody plants or crops, e.g. cotton, flax, straw, bagasse **[5]**
11/14 . Secondary fibres (working-up waste paper D21C 5/02) **[5]**
11/16 . modified by a particular after-treatment **[5]**
11/18 . . Highly hydrated, swollen or fibrillatable fibres **[5]**
11/20 . . Chemically or biochemically modified fibres **[5]**
11/22 . . . cationised **[5]**

13/00 Pulp or paper, comprising synthetic cellulose or non-cellulose fibres or web-forming material (chemical features in the manufacture of artificial fibres D01F) **[5]**

13/02 . Synthetic cellulose fibres **[5]**
13/04 . . Cellulose ethers **[5]**
13/06 . . Cellulose esters **[5]**
13/08 . . from regenerated cellulose **[5]**
13/10 . Organic non-cellulose fibres **[5]**
13/12 . . from macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[5]**
13/14 . . . Polyalkenes, e.g. polystyrene **[5]**
13/16 . . . Polyalkenylalcohols; Polyalkenylethers; Polyalkenylesters **[5]**
13/18 . . . Polymers of unsaturated acids or derivatives thereof, e.g. polyacrylonitriles **[5]**
13/20 . . from macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[5]**
13/22 . . . Condensation polymers of aldehydes or ketones **[5]**
13/24 . . . Polyesters **[5]**
13/26 . . . Polyamides; Polyimides **[5]**
13/28 . . from natural polymers **[5]**
13/30 . . . Non-cellulose polysaccharides **[5]**
13/32 . . . . Alginate fibres **[5]**
13/34 . . . Protein fibres **[5]**
13/36 . Inorganic fibres or flakes **[5]**
13/38 . . siliceous **[5]**
13/40 . . . vitreous, e.g. mineral wool, glass fibres **[5]**
13/42 . . . Asbestos **[5]**
13/44 . . . Flakes, e.g. mica, vermiculite **[5]**
13/46 . . Non-siliceous fibres, e.g. from metal oxides **[5]**
13/48 . . . Metal or metallised fibres **[5]**
13/50 . . . Carbon fibres **[5]**

15/00 Pulp or paper, comprising fibres or web-forming material characterised by features other than their chemical constitution [5]

15/02 . characterised by configuration **[5]**
15/04 . . crimped, kinked, curled or twisted fibres **[5]**
15/06 . . Long fibres, i.e. fibres exceeding the upper length limit of conventional paper-making fibres; Filaments **[5]**
15/08 . . Flakes (D21H 13/44 takes precedence) **[5]**
15/10 . . Composite fibres **[5]**
15/12 . . . partly organic, partly inorganic **[5]**

17/00 Non-fibrous material added to the pulp, characterised by its constitution; Paper-impregnating material characterised by its constitution [5]

(1) In groups D21H 17/01 to D21H 17/63, in the absence of an indication to the contrary, a material is classified in the last appropriate place. **[8]**

(2) A mixture of two or more materials is classified in the last appropriate place in groups D21H 17/01 to D21H 17/63 that provides for at least one of these materials. **[8]**

(3) Any part of a mixture which is not identified by the classification according to note (2), and which itself is determined to be novel and non-obvious, must also be classified in the last appropriate place in groups D21H 17/01 to D21H 17/63. The part can be either a single material or a mixture in itself. **[8]**

(4) A part of a mixture which is not identified by the classification according to note (2) or (3), and which is considered to represent information of interest for search, may also be classified in the last appropriate place in groups D21H 17/01 to D21H 17/63. This can for example be the case when it is considered of interest to enable searching of mixtures using a combination of classification symbols. Such non-obligatory classification should be given as "additional information". **[8]**

17/01 . Waste products, e.g. sludge **[5]**
17/02 . Material of vegetable origin (proteins D21H 17/22; lignins D21H 17/23; polysaccharides D21H 17/24; rosin D21H 17/62) **[5]**
17/03 . Non-macromolecular organic compounds **[5]**
17/04 . . Hydrocarbons **[5]**
17/05 . . containing elements other than carbon and hydrogen only **[5]**
17/06 . . . Alcohols; Phenols; Ethers; Aldehydes; Ketones; Acetals; Ketals **[5]**
17/07 . . . Nitrogen-containing compounds **[5]**
17/08 . . . . Isocyanates **[5]**
17/09 . . . Sulfur-containing compounds **[5]**
17/10 . . . Phosphorus-containing compounds **[5]**
17/11 . . . Halides **[5]**
17/12 . . . Organo-metallic compounds **[5]**
17/13 . . . Silicon-containing compounds **[5]**
17/14 . . . Carboxylic acids; Derivatives thereof **[5]**
17/15 . . . . Polycarboxylic acids, e.g. maleic acid **[5]**
17/16 . . . . . Addition products thereof with hydrocarbons **[5]**
17/17 . . . Ketenes, e.g. ketene dimers **[5]**
17/18 . . . forming new compounds in situ, e.g. within the pulp or paper, by chemical reaction with itself, or other added substances **[5]**
17/19 . . . . by reactions only involving carbon-to-carbon unsaturated bonds **[5]**
17/20 . Macromolecular organic compounds **[5]**
17/21 . . of natural origin; Derivatives thereof **[5]**
17/22 . . . Proteins **[5]**
17/23 . . . Lignins **[5]**
17/24 . . . Polysaccharides **[5]**
17/25 . . . . Cellulose **[5]**
17/26 . . . . . Ethers thereof **[5]**
17/27 . . . . . Esters thereof **[5]**
17/28 . . . . Starch **[5]**
17/29 . . . . . cationic **[5]**
17/30 . . . . Alginic acid or alginates **[5]**
17/31 . . . . Gums **[5]**
17/32 . . . . . Guar gum **[5]**
17/33 . . Synthetic macromolecular compounds **[5]**
17/34 . . . obtained by reactions only involving carbon-to-carbon unsaturated bonds **[5]**
17/35 . . . . Polyalkenes, e.g. polystyrene **[5]**
17/36 . . . . Polyalkenylalcohols; Polyalkenylethers; Polyalkenylesters **[5]**
17/37 . . . . Polymers of unsaturated acids or derivatives thereof, e.g. polyacrylates **[5]**
17/38 . . . . containing crosslinkable groups **[5]**
17/39 . . . . . forming ether crosslinkages, e.g. alkylol groups **[5]**
17/40 . . . . . unsaturated **[5]**
17/41 . . . . containing ionic groups **[5]**
17/42 . . . . . anionic **[5]**
17/43 . . . . . Carboxyl groups or derivatives thereof **[5]**
17/44 . . . . . cationic **[5]**
17/45 . . . . . Nitrogen-containing groups **[5]**
17/46 . . . obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[5]**
17/47 . . . . Condensation polymers of aldehydes or ketones **[5]**
17/48 . . . . . with phenols **[5]**
17/49 . . . . . with compounds containing hydrogen bound to nitrogen **[5]**
17/50 . . . . . Acyclic compounds **[5]**
17/51 . . . . . Triazines, e.g. melamine **[5]**
17/52 . . . . Epoxy resins **[5]**
17/53 . . . . Polyethers; Polyesters **[5]**
17/54 . . . . obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen **[5]**
17/55 . . . . . Polyamides; Polyaminoamides; Polyester-amides **[5]**
17/56 . . . . . Polyamines; Polyimines; Polyester-imides **[5]**
17/57 . . . . . Polyureas; Polyurethanes **[5]**
17/58 . . . . obtained by reactions forming in the main chain of the macromolecule a linkage containing sulfur **[5]**
17/59 . . . . obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon **[5]**
17/60 . Waxes **[5]**
17/61 . Bitumen **[5]**
17/62 . Rosin; Derivatives thereof **[5]**
17/63 . Inorganic compounds **[5]**
17/64 . . Alkaline compounds **[5]**
17/65 . . Acid compounds **[5]**
17/66 . . Salts, e.g. alums **[5]**
17/67 . . Water-insoluble compounds, e.g. fillers, pigments **[5]**
17/68 . . . siliceous, e.g. clays **[5]**
17/69 . . . modified, e.g. by association with other compositions prior to incorporation in the pulp or paper **[5]**
17/70 . . forming new compounds in situ, e.g. within the pulp or paper, by chemical reaction with other substances added separately **[5]**

19/00 **Coated paper** (coated fibreboard D21J 1/08); **Coating material** (recording sheets characterised by the coating used to improve ink, dye or pigment receptivity B41M 5/50) **[5]**

19/02 . Metal coatings (D21H 19/66 takes precedence) **[5]**

19/04 . . applied as foil **[5]**

19/06 . . applied as liquid or powder **[5]**

19/08 . . applied as vapour, e.g. in vacuum **[5]**

19/10 . Coatings without pigments (D21H 19/66 takes precedence) **[5]**

19/12 . . applied as a solution using water as the only solvent, e.g. in the presence of acid or alkaline compounds **[5]**

19/14 . . applied in a form other than the aqueous solution defined in group D21H 19/12 **[5]**

19/16 . . . comprising curable or polymerisable compounds (D21H 19/24 takes precedence) **[5]**

19/18 . . . comprising waxes **[5]**

19/20 . . . comprising macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds **[5]**

19/22 . . . . Polyalkenes, e.g. polystyrene **[5]**

19/24 . . . comprising macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[5]**

19/26 . . . . Aminoplasts **[5]**

19/28 . . . . Polyesters **[5]**

19/30 . . . . Polyamides; Polyimides **[5]**

19/32 . . . . obtained by reactions forming a linkage containing silicon in the main chain of the macromolecule **[5]**

19/34 . . . comprising cellulose or derivatives thereof **[5]**

19/36 . Coatings with pigments (D21H 19/66 takes precedence; metal powder D21H 19/06) **[5]**

19/38 . . characterised by the pigments **[5]**

19/40 . . . siliceous, e.g. clays **[5]**

19/42 . . . at least partly organic **[5]**

19/44 . . characterised by the other ingredients, e.g. the binder or dispersing agent **[5]**

19/46 . . . Non-macromolecular organic compounds **[5]**

19/48 . . . . Diolefins, e.g. butadiene; Aromatic vinyl monomers, e.g. styrene; Polymerisable unsaturated acids or derivatives thereof, e.g. acrylic acid **[5]**

19/50 . . . Proteins **[5]**

19/52 . . . Cellulose; Derivatives thereof **[5]**

19/54 . . . Starch **[5]**

19/56 . . . Macromolecular organic compounds or oligomers thereof obtained by reactions only involving carbon-to-carbon unsaturated bonds **[5]**

19/58 . . . . Polymers or oligomers of diolefins, aromatic vinyl monomers or unsaturated acids or derivatives thereof **[5]**

19/60 . . . . Polyalkenylalcohols; Polyalkenylethers; Polyalkenylesters **[5]**

19/62 . . . Macromolecular organic compounds or oligomers thereof obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds **[5]**

19/64 . . . Inorganic compounds **[5]**

19/66 . Coatings characterised by a special visual effect, e.g. patterned, textured (marbled paper D21H 27/04) **[5]**

19/68 . . uneven, broken, discontinuous **[5]**

19/70 . . with internal voids, e.g. bubble coatings **[5]**

19/72 . Coated paper characterised by the paper substrate **[5]**

19/74 . . the substrate having an uneven surface, e.g. crêped or corrugated paper **[5]**

19/76 . . the substrate having specific absorbent properties **[5]**

19/78 . . . being substantially impervious to the coating **[5]**

19/80 . Paper comprising more than one coating (D21H 19/02 takes precedence) **[5]**

19/82 . . superposed **[5]**

19/84 . . on both sides of the substrate **[5]**

21/00 **Non-fibrous material added to the pulp, characterised by its function, form or properties**; **Paper impregnating or coating material, characterised by its function, form or properties [5]**

21/02 . Agents for preventing deposition on the paper mill equipment, e.g. pitch or slime control (removal of fats, resins, pitch, or waxes D21C 9/08) **[5]**

21/04 . . Slime-control agents **[5]**

21/06 . Paper forming aids **[5]**

21/08 . . Dispersing agents for fibres **[5]**

21/10 . . Retention agents or drainage improvers **[5]**

21/12 . . Defoamers **[5]**

21/14 . characterised by function or properties in or on the paper (D21H 19/66, D21H 27/02 take precedence) **[5]**

21/16 . . Sizing or water-repelling agents **[5]**

21/18 . . Reinforcing agents **[5]**

21/20 . . . Wet strength agents **[5]**

21/22 . . Agents rendering paper porous, absorbent or bulky **[5]**

21/24 . . . Surfactants **[5]**

21/26 . . Agents rendering paper transparent or translucent **[5]**

21/28 . . Colorants **[5]**

21/30 . . Luminescent or fluorescent substances, e.g. for optical bleaching (D21H 21/40 takes precedence) **[5]**

21/32 . . Bleaching agents (bleaching cellulose pulp D21C 9/10) **[5]**

21/34 . . Ignifugeants **[5]**

21/36 . . Biocidal agents, e.g. fungicidal, bactericidal, insecticidal agents **[5]**

21/38 . . Corrosion-inhibiting agents or anti-oxidants **[5]**

21/40 . . Agents facilitating proof of genuineness or preventing fraudulent alteration, e.g. for security paper (watermarking B41M 3/10, D21F 1/44; security printing B41M 3/14; securities or banknotes characterised by colour effects B44F 1/12; testing paper currency or valuable papers for genuineness G07D 7/00) **[5]**

21/42 . . . Ribbons or strips (filaments D21H 15/06) **[5]**

21/44 . . . Latent security elements, i.e. detectable or becoming apparent only by use of special verification or tampering devices or methods **[5]**

21/46 . . . . Elements suited for chemical verification or impeding chemical tampering, e.g. by use of eradicators **[5]**

21/48 . . . . Elements suited for physical verification, e.g. by irradiation **[5]**

21/50 . characterised by form (D21H 19/66, D21H 21/42, D21H 27/02 take precedence) **[5]**

21/52 . . Additives of definite length or shape **[5]**

21/54 . . . being spherical, e.g. microcapsules, beads **[5]**
21/56 . . Foam **[5]**

23/00 Processes or apparatus for adding material to the pulp or to the paper (applying liquids or other fluent material to surfaces, in general B05; processes for making continuous lengths of paper D21F 11/00) **[5]**
23/02 . characterised by the manner in which substances are added **[5]**
23/04 . . Addition to the pulp; After-treatment of added substances in the pulp **[5]**
23/06 . . . Controlling the addition **[5]**
23/08 . . . . by measuring pulp properties, e.g. zeta potential, pH **[5]**
23/10 . . . . . at least two kinds of compounds being added **[5]**
23/12 . . . . by measuring properties of the formed web **[5]**
23/14 . . . . by selecting point of addition or time of contact between components **[5]**
23/16 . . . . . Addition before or during pulp beating or refining (disintegrating fibrous raw materials in mills in the presence of chemical agents D21B 1/16; methods of beating D21D 1/02; methods of refining D21D 1/20) **[5]**
23/18 . . . . . Addition at a location where shear forces are avoided before sheet-forming, e.g. after pulp beating or refining **[5]**
23/20 . . . Apparatus therefor **[5]**
23/22 . . Addition to the formed paper **[5]**
23/24 . . . during paper manufacture **[5]**

Note

Processes or apparatus used for addition to the paper during its manufacture, i.e. on-machine, are classified in group D21H 23/24 if they are specially influenced by, or specially adapted to, the paper-making process. **[5]**

23/26 . . . . by selecting point of addition or moisture content of the paper **[5]**
23/28 . . . . . Addition before the dryer section, e.g. at the wet end or press section **[5]**
23/30 . . . Pretreatment of the paper (D21H 23/70, D21H 23/76 take precedence) **[5]**
23/32 . . . by contacting paper with an excess of material, e.g. from a reservoir or in a manner necessitating removal of applied excess material from the paper (D21H 23/66 takes precedence; removing excess material D21H 25/08) **[5]**
23/34 . . . . Knife or blade type coaters **[5]**
23/36 . . . . . Knife or blade forming part of the fluid reservoir, e.g. puddle-type trailing blade **[5]**
23/38 . . . . . the fluid material being applied with a special device, e.g. with a roll in a flooded-nip inverted blade coater **[5]**
23/40 . . . . only one side of the paper being in contact with the material (D21H 23/34 takes precedence) **[5]**
23/42 . . . . Paper being at least partly surrounded by the material on both sides (D21H 23/34 takes precedence) **[5]**
23/44 . . . . . Treatment with a gas or vapour **[5]**
23/46 . . . Pouring or allowing the fluid to flow in a continuous stream on to the surface, the entire stream being carried away by the paper (D21H 23/66 takes precedence) **[5]**
23/48 . . . . Curtain coaters **[5]**
23/50 . . . Spraying or projecting (D21H 23/44, D21H 23/66 take precedence) **[5]**
23/52 . . . by contacting paper with a device carrying the material (D21H 23/32, D21H 23/46, D21H 23/66 take precedence) **[5]**
23/54 . . . . Rubbing devices, e.g. brush, pad, felt **[5]**
23/56 . . . . Rolls (D21H 23/38 takes precedence) **[5]**
23/58 . . . . . Details thereof, e.g. surface characteristics, peripheral speed **[5]**
23/60 . . . . . the material on the applicator roll being subjected to a particular treatment before applying to the paper (D21H 23/64 takes precedence) **[5]**
23/62 . . . . . Reverse roll coating, i.e. applicator roll surface moving in direction opposite to that of the paper **[5]**
23/64 . . . . the material being non-fluent at the moment of transfer, e.g. in form of preformed, at least partially hardened coating **[5]**
23/66 . . . Treating discontinuous paper, e.g. sheets, blanks, rolls **[5]**
23/68 . . . . whereby the paper moves continuously **[5]**
23/70 . . . Multistep processes; Apparatus for adding one or several substances in portions or in various ways to the paper, not covered by another single group of this main group **[5]**
23/72 . . . . Plural serial stages only **[5]**
23/74 . . . . Apparatus permitting switching from one technique to another **[5]**
23/76 . characterised by choice of auxiliary compounds which are added separately from at least one other compound, e.g. to improve the incorporation of the latter or to obtain an enhanced combined effect (D21H 17/18, D21H 17/70, D21H 23/10 take precedence) **[5]**
23/78 . Controlling or regulating not limited to any particular process or apparatus **[5]**

25/00 After-treatment of paper not provided for in groups D21H 17/00 to D21H 23/00 [5]
25/02 . Chemical or biochemical treatment (D21H 25/18 takes precedence) **[5]**
25/04 . Physical treatment, e.g. heating, irradiating (D21H 25/18 takes precedence; dryer section of machines for making continuous webs of paper D21F 5/00) **[5]**
25/06 . . of impregnated or coated paper (D21H 25/08 takes precedence) **[5]**
25/08 . Rearranging applied substances, e.g. metering, smoothing; Removing excess material **[5]**
25/10 . . with blades **[5]**
25/12 . . with an essentially cylindrical body, e.g. roll or rod **[5]**
25/14 . . . the body being a casting drum **[5]**
25/16 . . with a blast of vapour or gas, e.g. air knife **[5]**
25/18 . of old paper as in books, documents, e.g. restoring **[5]**

27/00 Special paper not otherwise provided for, e.g. made by multi-step processes [5]

Note

This group provides for the classification of paper with special properties or applications which are only partially or not at all provided for elsewhere in the classification. Whenever possible, however, these papers are classified according to the criteria used in the other groups of this subclass. **[5]**

27/02 . Patterned paper (patterned coatings D21H 19/66; embossing B31F 1/07; prepared on the paper-making machines D21F 11/00) **[5]**
27/04 . . marbled **[5]**
27/06 . Vegetable or imitation parchment; Glassine paper **[5]**
27/08 . Filter paper (self-supporting filtering material B01D 39/14; making on paper-making machines D21F 11/14) **[5]**
27/10 . Packing paper (packaging materials of special type or form B65D 65/38) **[5]**
27/12 . Electrically-insulating paper **[5]**
27/14 . Paper having stable form or dimension; Curl-resistant paper (anticoil photographic support G03C 1/81) **[5]**
27/16 . Pure paper, i.e. paper lacking or having low content of contaminants (after-treatment of cellulose pulp D21C 9/00) **[5]**
27/18 . Paper- or board-based structures for surface covering **[5]**
27/20 . . Flexible structures being applied by the user, e.g. wallpaper (printed wallpapers B41M 3/18; paperhanging B44C 7/00; pregummed wallpaper C09J 7/04) **[5]**
27/22 . . Structures being applied on the surface by special manufacturing processes, e.g. in presses **[5]**
27/24 . . . characterised by the surface to be covered being phenolic-resin paper laminates, vulcan fibre or similar cellulosic fibreboards **[5]**
27/26 . . . characterised by the overlay sheet or the top layers of the structures (decorative panels B44C 5/04; wood grain effects B44F 9/02) **[5]**
27/28 . . . . treated to obtain specific resistance properties, e.g. against wear or weather (water-repelling agents D21H 21/16) **[5]**
27/30 . Multi-ply (for surface covering D21H 27/18; making on paper-making machines D21F 9/00, D21F 11/00) **[5]**

Note

Layered products classified in this group are also classified in subclass B32B. **[5]**

27/32 . . with materials applied between the sheets (attaching together paper or cardboard sheets B31F 5/00; adhesives C09J) **[5]**
27/34 . . . Continuous materials, e.g. filaments, sheets, nets **[5]**
27/36 . . . . Films made from synthetic macromolecular compounds **[5]**
27/38 . . at least one of the sheets having a fibrous composition differing from that of other sheets **[5]**
27/40 . . at least one of the sheets being non-planar, e.g. crêped (creping or corrugating paper B31F) **[5]**
27/42 . . comprising dry-laid paper **[5]**

D21J FIBREBOARD; **MANUFACTURE OF ARTICLES FROM CELLULOSIC FIBROUS SUSPENSIONS OR FROM PAPIER-MÂCHÉ** (manufacture of articles by dry processes B27N)

1/00 Fibreboard (preparation of pulp compositions or addition of chemical agents D21B, D21C, D21H; formation of the wet web D21F)
1/02 . Cutting, e.g. using wet saws
1/04 . Pressing
1/06 . Drying
1/08 . Impregnated or coated fibreboard
1/10 . After-treatment
1/12 . . Hardening
1/14 . . Conditioning
1/16 . Special fibreboard
1/18 . . Hardboard
1/20 . . Insulating board

3/00 Manufacture of articles by pressing wet fibre pulp, or papier-mâché, between moulds
3/02 . of rings
3/04 . of tubes
3/06 . of stoppers
3/08 . of bobbins
3/10 . of hollow bodies
3/12 . of sheets; of diaphragms

5/00 Manufacture of hollow articles by transferring sheets, produced from fibres suspensions or papier-mâché by suction on wire-net moulds, to couch moulds

7/00 Manufacture of hollow articles from fibre suspensions or papier-mâché by deposition of fibres in or on a wire-net mould

D99 SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

D99Z SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

Note

This subclass covers subject matter that: **[8]**
(a) is not provided for, but is most closely related to, the subject matter covered by the subclasses of this section, and **[8]**
(b) is not explicitly covered by any subclass of another section. **[8]**

99/00 Subject matter not otherwise provided for in this section [8]

SECTION E – FIXED CONSTRUCTIONS

BUILDING

E01 CONSTRUCTION OF ROADS, RAILWAYS, OR BRIDGES

E01B **PERMANENT WAY**; **PERMANENT-WAY TOOLS**; **MACHINES FOR MAKING RAILWAYS OF ALL KINDS** (derailing or rerailing blocks on track, track brakes or retarders B61K; removal of foreign matter from the permanent way, vegetation control, applying liquids E01H)

Subclass index

Structure of the permanent way for railways or tramways

1/00 **Ballastway**; **Other means for supporting the sleepers or the track**; **Drainage of the ballastway** (draining by trenches, culverts, or conduits E01F 5/00)

2/00 **General structure of permanent way** (railway networks B61B 1/00; foundations for pavings E01C 3/00; foundations in general E02D)

3/00 **Transverse or longitudinal sleepers** (for switches or crossings E01B 7/22); **Other means resting directly on the ballastway for supporting rails**

3/02 . made from wood (drying or impregnating B27K)

3/04 . . Means for preventing cleaving

3/06 . . . Anti-cracking dogs

3/08 . . . Straps or bands for hooping or encircling sleepers (apparatus for hooping wooden railway sleepers on the spot E01B 31/28)

3/10 . . Composite sleepers

3/12 . . Longitudinal sleepers; Longitudinal sleepers integral or combined with tie-rods; Combined longitudinal and transverse sleepers

3/14 . . Slabs; Blocks; Fastening tie-rods to them

3/16 . made from steel

3/18 . . Composite sleepers

3/20 . . Sleeper construction for special purposes, e.g. with openings for ballast working (sleepers for shiftable track for heavy loads E01B 23/12)

3/22 . . Longitudinal sleepers; Longitudinal sleepers integral or combined with tie-rods; Combined longitudinal and transverse sleepers

3/24 . . Slabs; Blocks; Pot sleepers; Fastening tie-rods to them

3/26 . . combined with inserts of wood, artificial stone, or other material

3/28 . made from concrete or from natural or artificial stone (manufacture B28)

3/30 . . Hollow sleepers

3/32 . . with armouring or reinforcement (hollow sleepers E01B 3/30)

3/34 . . . with pre-tensioned armouring or reinforcement (pre-tensioned armouring or reinforcing elements E04C 5/00)

3/36 . . Composite sleepers

3/38 . . Longitudinal sleepers; Longitudinal sleepers integral or combined with tie-rods; Combined longitudinal and transverse sleepers; Layers of concrete supporting both rails

3/40 . . Slabs; Blocks; Pot sleepers; Fastening tie-rods to them

3/42 . . combined with inserts of wood or other material

3/44 . made from other materials only if the material is essential

3/46 . made from different materials (E01B 3/26, E01B 3/42 take precedence)

3/48 . Distance keepers or tie-rods for sleepers

5/00 **Rails**; **Guard rails** (manufacture of rails B21B); **Distance-keeping means for them**

5/02 . Rails

5/04 . . Grooved rails

5/06 . . Reversible or invertible rails

5/08 . . Composite rails; Compound rails with dismountable or non-dismountable parts

5/10 . . . Composite grooved rails; Inserts for grooved rails

5/12 . . Rails with a foot serving as a sleeper

5/14 . . Rails for special parts of the track, e.g. for curves

5/16 . Distance keepers

5/18 . Guard rails; Connecting, fastening or adjusting means therefor

7/00 **Switches**; **Crossings** (operating mechanisms B61L)

7/02 . Tongues; Associated constructions

7/04 . . Constructions with tongues turning about a vertical pivot at the end

7/06 . . Constructions with flexible tongues or flexible fishplates

7/08 . . Other constructions of tongues, e.g. tilting about an axis parallel to the rail, movable tongue blocks or rails

7/10 . Frogs
7/12 . . Fixed frogs made of one part or composite
7/14 . . with movable parts
7/16 . . Jump-over frogs
7/18 . Combinations of switches and crossings
7/20 . Safety means for switches, e.g. switch point protectors, auxiliary or guiding rail members
7/22 . Special sleepers for switches or crossings; Fastening means therefor
7/24 . Heating of switches
7/26 . Lubricating of switches (lubricating of rails B61K 3/00)
7/28 . Crossings
7/30 . . Jump-over crossings

9/00 **Fastening rails on sleepers, or the like** (fastening rails to bridges E01D 19/12)
9/02 . Fastening rails, tie-plates, or chairs directly on sleepers or foundations; Means therefor
9/04 . . Fastening on wooden or concrete sleepers or on masonry without clamp members
9/06 . . . Railways spikes (nails in general F16B)
9/08 . . . . Elastic spikes
9/10 . . . Screws or bolts for sleepers (screws or bolts in general F16B)
9/12 . . . Retaining or locking devices for spikes or screws
9/14 . . . Plugs, sleeves, thread linings, or other inserts for holes in sleepers (inserting plugs or sleeves E01B 31/26)
9/16 . . . . for wooden sleepers
9/18 . . . . for concrete sleepers
9/20 . . . by keys
9/22 . . Fastening on steel sleepers without clamp members
9/24 . . . by keys
9/26 . . . Welded fastenings
9/28 . . Fastening on wooden or concrete sleepers or on masonry with clamp members
9/30 . . . by resilient steel clips
9/32 . . Fastening on steel sleepers with clamp members
9/34 . . . by resilient steel clips
9/36 . . Metal sole-plates for rails which rails are directly fastened to sleepers
9/38 . Indirect fastening of rails by using tie-plates or chairs; Fastening of rails on the tie-plates or in the chairs
9/40 . . Tie-plates for flat-bottom rails (manufacture thereof B21)
9/42 . . . of two or more parts
9/44 . . Fastening the rail on the tie-plate
9/46 . . . by clamps
9/48 . . . . by resilient steel clips
9/50 . . . by keys
9/52 . . . . by resilient keys
9/54 . . Rail chairs
9/56 . . . for rails with two or more treads
9/58 . . Fastening the rail in the chair
9/60 . Rail fastenings making use of clamps or braces supporting the side or head of the rail
9/62 . Rail fastenings incorporating resilient supports
9/64 . Rail fastenings gripping or encircling the sleeper
9/66 . Rail fastenings allowing the adjustment of the position of the rails, so far as not covered by the preceding groups
9/68 . Pads or the like, e.g. of wood, rubber, placed under the rail, tie-plate, or chair

11/00 **Rail joints** (electrical connection of rails B60M 5/00)
11/02 . Dismountable rail joints
11/04 . . Flat fishplates
11/06 . . . with keys or pins
11/08 . . Angle fishplates
11/10 . . Fishplates with parts supporting or surrounding the rail foot
11/12 . . Fishplates engaging only the rail foot
11/14 . . Rail foot flange clips in one piece
11/16 . . Fishplates for joining rails of different sections
11/18 . . Fishplates for temporarily repairing broken rails
11/20 . . with gap-bridging
11/22 . . . by parts of the rails
11/24 . . . . with oblique or overlapping rail ends
11/26 . . . . with interlocking rail ends
11/28 . . . by parts of the joining members
11/30 . . . . Fishplates with integral tread parts lying in the cross-section of the rail head
11/32 . . . by separate parts; Inserts bridging both rail heads
11/34 . . . . Auxiliary rail beside the gap
11/36 . . Fastening means for fishplates
11/38 . . . Locking arrangements for fastening means (locking means for nuts or bolts in general F16B)
11/40 . . Dismountable rail joints combined with welded parts
11/42 . Joint constructions for relatively movable rails, e.g. rails on turntables, traversers, or swing bridges
11/44 . Non-dismountable rail joints; Welded joints (welding methods B23K)
11/46 . . General methods for making gapless tracks
11/48 . . Joints made by flame welding
11/50 . . Joints made by electric welding
11/52 . . Joints made by alumino-thermal welding
11/54 . Electrically-insulating rail joints
11/56 . Special arrangements for supporting rail ends (foot supports E01B 11/08 to E01B 11/14)
11/58 . . Bridge plates
11/60 . . . with wedges
11/62 . . Bridge chairs (chairs E01B 9/54 to E01B 9/58)

13/00 **Arrangements preventing shifting of the track**
13/02 . Rail anchors

15/00 **Guards for preventing a person's foot being trapped in grooved rails**

17/00 **Cattle guards connected to the permanent way** (grids in general for preventing cattle from straying A01K 3/00)

19/00 **Protection of permanent way against development of dust or against the effect of wind, sun, frost, or corrosion**; **Means to reduce development of noise** (snow fences E01F 7/02; snow-ploughs E01H 8/02; watering E01H 11/00)

21/00 **Track superstructure specially adapted for tramways in paved streets** (paving E01C 9/04, E01C 9/06)
21/02 . Special supporting means; Draining of rails
21/04 . Special fastenings, joint constructions, or tie-rods

23/00 **Easily dismountable or movable tracks, e.g. temporary railways**; **Details specially adapted therefor**

23/02 . Tracks for light railways, e.g. for field, colliery, or mine use

23/04 . . Fastening or joining means

23/06 . . Switches (turntables B60S, B61J); Portable switches; Turnouts

23/08 . Temporary tracks for use while repairing tramways

23/10 . Shiftable tracks for heavy loads, e.g. carrying excavators

23/12 . . Sleepers

23/14 . . Fastening or joining means (fastening of rails by keys E01B 9/24)

23/16 . . Switches

25/00 **Tracks for special kinds of railways** (systems B61B; wheel tracks on roads E01C 9/02)

Note

In this group, the following term is used with the meaning indicated:
– "track" includes non-load-carrying guide rails.

25/02 . Tracks for rack railways

25/04 . . Rack rails; Supports or connections for rack rails

25/06 . . Switches; Frogs; Crossings

25/08 . Tracks for mono-rails with centre of gravity of vehicle above the load-bearing rail (E01B 25/30 takes precedence) **[1,7]**

25/10 . . Mono-rails; Auxiliary balancing rails; Supports or connections for rails

25/12 . . Switches; Crossings

25/14 . Tracks for cable-drawn railway vehicles

25/15 . . Switches; Crossings

25/16 . Tracks for aerial rope railways with a stationary rope

25/18 . . Ropes; Supports, fastening or straining means for ropes (ropes in general D07B; masts E04H 12/00; rope sockets F16G)

25/20 . . Switches; Crossings

25/22 . Tracks for railways with the vehicle suspended from rigid supporting rails

25/24 . . Supporting rails; Auxiliary balancing rails; Supports or connections for rails

25/26 . . Switches; Crossings

25/28 . Rail tracks for guiding vehicles when running on road or similar surface (wheel tracks on roads E01C 9/02)

25/30 . Tracks for magnetic suspension or levitation vehicles **[7]**

25/32 . . Stators, guide rails or slide rails **[7]**

25/34 . . Switches; Frogs; Crossings **[7]**

26/00 **Tracks or track components not covered by any one of main groups E01B 1/00 to E01B 25/00**

Making, maintaining, renewing, or taking-up the ballastway or the track; **Tools or machines specially designed therefor**

27/00 **Placing, renewing, working, cleaning, or taking-up the ballast, with or without concurrent work on the track**; **Devices therefor**; **Packing sleepers**

27/02 . Placing the ballast; Making the ballastway; Redistributing ballasting material; Machines or devices therefor; Levelling means

27/04 . Removing the ballast; Machines therefor, whether or not additionally adapted for taking-up ballast (E01B 27/06, E01B 27/12 take precedence; redistributing ballasting material E01B 27/02)

27/06 . Renewing or cleaning the ballast in situ, with or without concurrent work on the track

27/08 . . the track having been taken-up (E01B 27/11 takes precedence)

27/10 . . without taking-up the track (E01B 27/11 takes precedence)

27/11 . . combined with concurrent renewal of track components

27/12 . Packing sleepers, with or without concurrent work on the track; Compacting track-carrying ballast

27/13 . . Packing sleepers, with or without concurrent work on the track (preforming ballast cores or seats for sleepers E01B 27/02)

27/14 . . . Manual tools or hand-held power tools therefor

27/16 . . . Machines therefor, e.g. so-called sleeper-tamping machines

27/17 . . . . combined with means for lifting, levelling, or slewing the track

27/18 . . . by introducing additional fresh material under the sleepers, e.g. by the measured-shovel method, by the blowing method

27/20 . . Compacting the material of the track-carrying ballastway, e.g. by vibrating the track, by surface vibrators (of trackless ballastway E01B 27/02; for packing sleepers E01B 27/12)

29/00 **Laying, rebuilding, or taking-up tracks**; **Tools or machines therefor** (E01B 27/00, E01B 31/00 take precedence)

29/02 . Transporting, laying, removing, or renewing lengths of assembled track, assembled switches, or assembled crossings (E01B 29/04 takes precedence)

29/04 . Lifting or levelling of tracks (lifting devices in general B66F)

29/05 . Transporting, laying, removing, or renewing both rails and sleepers (as assembled units E01B 29/02)

29/06 . Transporting, laying, removing, or renewing sleepers (E01B 29/05 takes precedence; carrying devices B65G 7/12)

29/09 . . under, or from under, installed rails

29/10 . . . for inserting or removing sleepers

29/11 . . . . Removal involving destruction of the sleeper, e.g. the sectioning thereof

29/13 . . . for moving sleepers in a direction parallel to the rails, e.g. for spacing or aligning them (E01B 29/10 takes precedence)

29/14 . . . for lifting sleepers up to the rails (lifting devices in general B66F)

29/16 . Transporting, laying, removing, or replacing rails; Moving rails placed on sleepers in the track (E01B 29/05 takes precedence; moving or tilting heavy loads in general B65G 7/00)

29/17 . . Lengths of rails assembled into strings, e.g. welded together

29/20 . . Moving rails placed on installed sleepers in the plane of the track

29/22 . . Raising rails from sleepers, e.g. for inserting sole-plates (lifting devices in general B66F)

29/24 . Fixing or removing detachable fastening means or accessories thereof; Pre-assembling track components by detachable fastening means (E01B 29/02, E01B 31/26 take precedence)

29/26 . . the fastening means being spikes (E01B 29/16 takes precedence; hand-held tools for nail or staple driving or extracting B25C)

29/28 . . the fastening means being of screw-and-nut type (portable apparatus for fixing or removing screws or the like B25B); Apparatus therefor, adapted to additionally drilling holes

29/29 . . . for horizontally-arranged fastening elements, e.g. fish-bolts

29/32 . Installing or removing track components, not covered by the preceding groups, e.g. sole-plates, rail anchors (E01B 31/26 takes precedence)

29/40 . Means or arrangements for temporarily supporting laid tracks, or rails or sleepers in the track (temporary fishplates E01B 11/18)

29/42 . Undetachably joining or fastening track components in or on the track, e.g. by welding, by gluing; Pre-assembling track components by gluing; Sealing joints with filling components (E01B 31/26 takes precedence; independent heating means E01B 31/18; welding in general B23K; gluing metal parts in general F16B 11/00)

29/44 . . Methods for effecting joining of rails in the track, e.g. taking account of ambient temperature

29/46 . . Devices for holding, positioning, or urging together the rail ends (adjusting the joint by moving rails E01B 29/20)

31/00 Working rails, sleepers, baseplates, or the like, in or on the line; **Machines, tools, or auxiliary devices specially designed therefor** (characterised by features independent of use on assembled track B21, B23 to B25, B27)

31/02 . Working rail or other metal track components on the spot

31/04 . . Sectioning or slitting, e.g. by sawing, shearing, flame-cutting

31/06 . . Making holes, e.g. by drilling, punching, flame-cutting

31/08 . . Bending, e.g. for straightening rails or rail joints (for aligning rail ends to be welded E01B 29/46)

31/12 . . Removing metal from rails, rail joints, or baseplates, e.g. for deburring welds, reconditioning worn rails

31/13 . . . by milling

31/15 . . . by planing or filing

31/17 . . . by grinding

31/18 . . Reconditioning or repairing worn or damaged parts on the spot, e.g. applying inlays, building-up rails by welding (E01B 31/04 to E01B 31/12 take precedence); Heating or cooling of parts on the spot, e.g. for reducing joint gaps, for hardening rails

31/20 . Working or treating non-metal sleepers in or on the line, e.g. marking, creosoting (working metal sleepers E01B 31/02)

31/22 . . Cutting or grinding wooden sleepers, e.g. for forming rail seats (E01B 31/24 takes precedence)

31/23 . . . Sectioning (combined with removal of segments from track E01B 29/11)

31/24 . . Forming, treating, reconditioning, or cleaning holes in sleepers; Drilling-templates (E01B 29/28, E01B 31/26 take precedence)

31/26 . . Inserting or removing inserts or fillings for holes in sleepers, e.g. plugs, sleeves

31/28 . . Applying or removing anti-splitting or like reinforcing means (E01B 31/26 takes precedence; straps or bands therefor E01B 3/08)

33/00 Machines or devices for shifting tracks, with or without lifting, e.g. for aligning track, for shifting excavator track (combined with sleeper packing machines E01B 27/17)

33/02 . for slewing, i.e. transversely shifting, in steps

33/04 . . Manual tools; Devices not mounted on vehicles

33/06 . for slewing in a continuous operation, e.g. for tracks which carry excavators

33/08 . . Boom track-slewing machines

33/10 . . Bridge track-slewing machines

33/12 . . Combined boom and bridge track-slewing machines

33/18 . . Details not peculiar to a particular type of machine

33/21 . . . Arrangement or construction of rollers moving the rails

35/00 Applications of measuring apparatus or devices for track-building purposes (apparatus on locomotives or cars to indicate or record bad track sections B61K 9/00; measuring angles, linear dimensions, or irregularities in general G01B, G01C)

35/02 . for spacing; for cross levelling; for laying-out curves

35/04 . . Wheeled apparatus

35/06 . for measuring irregularities in longitudinal direction

35/08 . . for levelling

35/10 . . for aligning

35/12 . for measuring movement of the track or of components thereof under rolling loads, e.g. depression of sleepers, increase of gauge

37/00 Making, maintaining, renewing, or taking-up the ballastway or the track, not provided for in a single one of groups E01B 27/00 to E01B 35/00

E01C CONSTRUCTION OF, OR SURFACES FOR, ROADS, SPORTS GROUNDS, OR THE LIKE; **MACHINES OR AUXILIARY TOOLS FOR CONSTRUCTION OR REPAIR** (forming road or like surfaces by compacting or grading snow or ice E01H)

Subclass index

1/00 **Design or layout of roads, e.g. for noise abatement, for gas absorption** (design or layout of sports grounds A63C 19/00; design or layout of airfields B64F)

1/02 . Crossings, junctions, or interconnections between roads on the same level

1/04 . Road crossings on different levels; Interconnections between roads on different levels

Structure of roads, playgrounds, sports grounds, airfields

3/00 **Foundations for pavings** (specially adapted for playgrounds or sports grounds E01C 13/02; foundations in general E02D)

3/02 . Concrete base for bituminous paving

3/04 . Foundations produced by soil stabilisation

3/06 . Methods or arrangements for protecting foundations from destructive influences of moisture, frost or vibration

5/00 **Pavings made of prefabricated single units** (specially adapted for playgrounds or sports grounds E01C 13/04, for footpaths, sidewalks or cycle tracks E01C 15/00; making artificial stones C04B; building stones E04C; flooring E04F)

5/02 . made of natural stones, e.g. sett stones

5/04 . made of bricks

5/06 . made of units with cement or like binders

5/08 . . Reinforced units

5/10 . . . Prestressed reinforced units

5/12 . made of units with bituminous binders

5/14 . made of wooden units

5/16 . made of metallic units (steel gratings E01C 9/10)

5/18 . made of rubber units

5/20 . made of units of plastics (E01C 5/18 takes precedence)

5/22 . made of units composed of a mixture of materials covered by two or more of groups E01C 5/02 to E01C 5/20

7/00 **Coherent pavings made <u>in situ</u>** (specially adapted for playgrounds or sports grounds E01C 13/06, for footpaths, sidewalks or cycle tracks E01C 15/00)

7/02 . made of road-metal without binders

7/04 . . of broken stones, gravel, or like materials

7/06 . . by melting, burning, or vitrifying road-metal <u>in situ</u>

7/08 . made of road-metal and binders

7/10 . . of road-metal and cement or like binders (cement or like binders, composition of mortars C04B)

7/12 . . . Mortar-bound paving

7/14 . . . Concrete paving

7/16 . . . . Prestressed concrete paving

7/18 . . of road-metal and bituminous binders

7/20 . . . Binder incorporated in cold state, e.g. natural asphalt

7/22 . . . Binder incorporated in hot state, e.g. heated bitumen

7/24 . . . Binder incorporated as an emulsion or solution (making dispersions or emulsions for road building C04B)

7/26 . . . mixed with other materials, e.g. cement, rubber, leather, fibre

7/30 . . of road-metal and other binders, e.g. synthetic material

7/32 . . of courses of different kind made <u>in situ</u>

7/34 . . . made of several courses which are not bound to each other

7/35 . . Topping or surface dressings; Methods of mixing, impregnating, or spreading them

7/36 . by subjecting soil to stabilisation

9/00 **Special pavings** (specially adapted for playgrounds or sports grounds E01C 13/00, for footpaths, sidewalks or cycle tracks E01C 15/00); **Pavings for special parts of roads or airfields** (pavement lights E01C 17/00; manholes or like covers or frames E02D 29/14)

9/02 . Wheel tracks (rail tracks for guiding vehicles E01B 25/28)

9/04 . Pavings for railroad level-crossings

9/06 . Pavings adjacent tramways rails

9/08 . Temporary pavings (steel gratings E01C 9/10)

9/10 . Steel gratings (gully gratings E03F 5/06; as building elements in general E04C)

11/00 **Details of pavings**

11/02 . Arrangement or construction of joints; Methods of making joints; Packing for joints (sealing joints not restricted to road or airfield paving E04B 1/68)

11/04 . . for cement concrete paving

11/06 . . . Methods of making joints

11/08 . . . Packing of metal

11/10 . . . Packing of plastic or elastic materials

11/12 . . . Packing of metal and plastic or elastic materials

11/14 . . . Dowel assembly

11/16 . Reinforcements (for building in general E04C)

11/18 . . for cement concrete pavings

11/20 . . . for prestressed concrete pavings

11/22 . Gutters; Kerbs (kerbs specially adapted for informing road users E01F 9/053)

11/24 . Methods or arrangements for preventing slipperiness or protecting against influences of the weather

11/26 . . Permanently-installed heating or blowing devices

13/00 **Pavings or foundations specially adapted for playgrounds or sports grounds** (general layout A63C 19/00)

13/02 . Foundations, e.g. with drainage or heating arrangements **[6]**

13/04 . Pavings made of prefabricated single units (E01C 13/08, E01C 13/10 take precedence) **[6]**

13/06 . Pavings made <u>in situ</u> (E01C 13/08, E01C 13/10 take precedence) **[6]**

13/08 . Surfaces simulating grass **[6]**

13/10 . for artificial surfaces for outdoor or indoor practice of snow or ice sports (E01C 13/08 takes precedence; production of snow or ice for winter sports or similar recreational purposes F25C 3/00) **[6]**

13/12 . . for snow sports **[6]**

15/00 **Pavings specially adapted for footpaths, sidewalks, or cycle tracks**

17/00 **Pavement lights, i.e. translucent constructions forming part of the surface** (blocks specially designed for marking roads E01F 9/04)

Machines, tools or auxiliary devices for constructing or repairing the surfacing of roads or like structures

19/00 **Machines, tools, or auxiliary devices for preparing or distributing paving materials, for working the placed materials, or for forming, consolidating, or finishing the paving** (surface stabilisation E01C 21/00; apparatus specially adapted for reconditioning or repairing paving E01C 23/00)

19/02 . for preparing the materials

19/05 . . Crushing, pulverising, or disintegrating apparatus (in general B02C); Aggregate screening, cleaning, or heating apparatus

19/08 . . Apparatus for transporting and melting asphalt, bitumen, tar, or the like (stationarily-arranged melting boilers for tar, asphalt, or the like, in general C10C 3/12)

19/10 . . Apparatus or plants for premixing or precoating aggregate or fillers with non-hydraulic binders, e.g. with bitumen, with resins; Apparatus for premixing non-hydraulic mixtures prior to placing or for reconditioning salvaged non-hydraulic compositions

19/12 . for distributing granular or liquid materials (E01C 23/07 takes precedence; for filling joints or grooves E01C 23/02, E01C 23/09)

19/15 . . for laying-down uncoated stone or similar materials, or for striking-off or spreading same without compacting, e.g. for crushed rock base courses, sand cushions for paving (E01C 19/52 takes precedence; distributing E01C 19/20)

19/16 . . for applying or spreading liquid materials, e.g. bitumen slurries (E01C 19/45, E01C 23/02, E01C 23/03, E01C 23/16 take precedence; spraying or spreading liquids or other fluent materials to surfaces in general B05)

19/17 . . . Application by spraying

19/18 . . Devices for distributing road-metals mixed with binders, e.g. cement, bitumen, without consolidating or ironing effect (E01C 19/20, E01C 19/47 take precedence; conveying installations for concrete or the like B65G)

19/20 . . Apparatus for distributing, e.g. spreading, granular or pulverulent materials, e.g. sand, gravel, salt, dry binders (fertiliser distributors A01C 15/00)

19/21 . . for simultaneously but separately applying liquid material and granular or pulverulent material, e.g. bitumen and grit, with or without spreading

19/22 . for consolidating or finishing laid-down unset materials (E01C 23/02 takes precedence; apparatus for generating vibrations in general B06B)

19/23 . . Rollers therefor; Such rollers usable also for compacting soil (E01C 19/43 takes precedence; specially adapted for agricultural purposes A01B 29/00; garden rollers A01G 1/12; making or maintaining surfaces of snow or ice E01H 4/00; solely for soil compaction E02D 3/026)

19/24 . . . hand propelled (E01C 19/27 to E01C 19/29 take precedence)

19/25 . . . propelled by animals or vehicles (E01C 19/26 to E01C 19/29 take precedence)

19/26 . . . self-propelled or fitted to road vehicles (E01C 19/27 to E01C 19/29 take precedence)

19/27 . . . with elastically-deformable rolling elements, e.g. pneumatic tyres (vibrating or impacting E01C 19/28)

19/28 . . . Vibrated rollers or rollers subjected to impacts, e.g. hammering blows (E01C 19/29 takes precedence)

19/29 . . . Rolling apparatus adapted to apply a rolling pressure less than its weight, e.g. roller finishers travelling on formrails

19/30 . . Tamping or vibrating apparatus other than rollers (E01C 23/02, E01C 23/04 take precedence; vibrated depositing devices E01C 19/12; tamping or vibrating rollers E01C 19/28; portable percussion tools in general B25D; tamping or vibrating soil in general E02D 3/046)

19/32 . . . Hand-held hand-actuated rammers or tampers

19/34 . . . Power-driven rammers or tampers

19/35 . . . . Hand-held or hand-guided tools (E01C 19/36 to E01C 19/40 take precedence)

19/36 . . . . with direct-acting explosion chambers

19/38 . . . . with means specifically for generating vibrations

19/40 . . . . adapted to impart a smooth finish to the paving, e.g. tamping or vibrating finishers

19/41 . . Apparatus having both rolling tools and ramming, tamping, or vibrating tools

19/42 . . Machines for imparting a smooth finish to freshly-laid paving courses other than by rolling, tamping, or vibrating (for distributing only E01C 19/12)

19/43 . . Machines or arrangements for roughening or patterning freshly-laid paving courses, e.g. indenting rollers

19/44 . . Hand-actuated tools other than rollers, dampers, or vibrators, specially adapted for imparting a required surface finish to freshly-laid paving courses (E01C 19/43 takes precedence)

19/45 . Portable apparatus for preparing, or for preparing and applying to the road, compound liquid binders, e.g. emulsified bitumen, fluxed asphalt (applying only E01C 19/16)

19/46 . for preparing and placing the materials (E01C 19/45 takes precedence; making surfaces by mixing borrowed aggregate with binders E01C 21/00)

19/47 . . Hydraulic cement concrete mixers combined with distributing means specially adapted for road building (concrete mixers per se B28C)

19/48 . for laying-down the materials and consolidating them, or finishing the surface

19/50 . Removable forms or shutterings for road-building purposes (E01C 23/02, E01C 23/04 take precedence; permanent forms E01C 3/00 to E01C 7/00; slip forms E01C 19/48); Devices or arrangements for forming individual paving elements, e.g. kerbs, in situ

19/52 . Apparatus for laying individual preformed surface elements, e.g. kerbs (preforming and placing continuous strip E01C 19/46; forming paving elements in situ E01C 19/50)

21/00 **Apparatus or processes for surface stabilisation for road building or like purposes, e.g. mixing borrowed aggregate with binder** (stabilising soil under existing surfacing E01C 23/10; soil-conditioning or soil-stabilising materials C09K 17/00; soil-consolidation in general E02D 3/12)

21/02 . Fusing, calcining, or burning soil in situ

23/00 **Auxiliary devices or arrangements for constructing, repairing, reconditioning, or taking-up road or like surfaces** (apparatus for reconditioning of salvaged non-hydraulic compositions E01C 19/10)

23/01 . Devices or auxiliary means for setting-out or checking the configuration of new surfacing, e.g. templates, screed supports (form rails E01C 19/50); Applications of apparatus for measuring, indicating, or recording the surface configuration of existing surfacing, e.g. profilographs (E01C 23/07 takes precedence; measuring roughness or irregularity in general G01B)

23/02 . Devices for making, treating, or filling grooves or like channels in not-yet-hardened paving, e.g. for joints or markings (surface patterning E01C 19/43); Removable forms therefor (non-removable forms E01C 11/02); Devices for introducing inserts or removable insert-supports in not-yet-hardened paving (E01C 23/04 takes precedence; non-removable insert supports E01C 11/02)

23/03 . Arrangements for curing paving; Devices for applying curing means; Devices for laying prefabricated underlay, e.g. sheets, membranes (reinforcing elements E01C 23/04); Protecting paving under construction or while curing, e.g. use of tents (road barriers E01F 13/00)

23/04 . Devices for laying reinforcing elements or dowel bars; Removable supports for reinforcing elements (non-removable supports therefor E01C 11/16; side forms adapted to supporting reinforcement E01C 19/50); Devices, e.g. removable forms, for making essentially horizontal ducts in paving, e.g. for prestressed reinforcement

23/05 . Devices for installing or removing forms

23/06 . Devices or arrangements for working the finished surface (working freshly-laid paving E01C 19/42 to E01C 19/44, E01C 23/02; mining picks E21C 35/18); Devices for repairing the surface of damaged paving **[6]**

23/07 . . Apparatus combining measurement of the surface configuration of paving with application of material in proportion to the measured irregularities (measuring means only E01C 23/01)

23/08 . . for roughening or patterning; for removing high spots or material bonded to the surface, e.g. markings (removing matter not bonded to the surface E01H 1/00; roughening or detaching ice E01H 5/12)

23/082 . . . using non-powered tools **[6]**

23/085 . . . using power-driven tools, e.g. vibratory tools **[6]**

23/088 . . . . Rotary tools, e.g. milling drums **[6]**

23/09 . . for forming cuts, grooves, or recesses, e.g. for making joints or channels for markings, for cutting-out sections to be removed; for cleaning, treating, or filling cuts, grooves, recesses, or fissures; for trimming paving edges

23/10 . . for raising or levelling sunken paving; for filling voids under paving; for introducing material into substructure (consolidating soil in general E02D 3/12)

23/12 . . for taking-up, tearing-up, or breaking-up paving (adapted to both placing and removing paving E01C 19/52)

23/14 . for heating or drying foundation, paving, or materials thereon, e.g. paint (E01C 23/03 takes precedence; heating or drying devices incorporated in the paving E01C 11/26; surface stabilisation by fusing, calcining, or burning soil <u>in situ</u> E01C 21/02; for street cleaning E01H 1/08; melting snow or ice on surfacing E01H 5/10)

23/16 . Devices for marking-out, applying, or forming traffic or like markings on finished paving (E01C 23/14 takes precedence; inserting or forming in not-yet-hardened paving E01C 23/02, in recesses formed in fully-set paving E01C 23/09; marking-out playing courts or playgrounds A63C 19/06; applying liquids or other fluent materials to surfaces in general B05; road surface markings <u>per se</u> E01F 9/04); Protecting fresh markings

23/18 . . for applying prefabricated markings **[6]**

23/20 . . for forming markings <u>in situ</u> **[6]**

23/22 . . . by spraying **[6]**

23/24 . . . by pouring **[6]**

E01D **BRIDGES** (bridges extending between terminal buildings and aircraft for embarking or disembarking passengers B64F 1/305)

<u>Note</u>

In this subclass, it is desirable to add the indexing codes of group E01D 101/00. **[6]**

<u>Subclass index</u>

1/00 **Bridges in general** (characterised by their structural type E01D 4/00 to E01D 15/00) **[6]**

2/00 **Bridges characterised by the cross-section of their bearing spanning structure [6]**

2/02 . of the I-girder type **[6]**

2/04 . of the box-girder type **[6]**

4/00 Arch-type bridges [6]

6/00 Truss-type bridges [6]
6/02 . of bowstring type **[6]**

11/00 Suspension or cable-stayed bridges [6]
11/02 . Suspension bridges **[6]**
11/04 . Cable-stayed bridges **[6]**

12/00 Bridges characterised by a combination of structures not covered as a whole by a single one of groups E01D 2/00 to E01D 11/00 [6]

15/00 Movable or portable bridges (arrangement of ship-based outboard ramps or gangways B63B 27/14; loading ramps B65G 69/28); **Floating bridges**
15/02 . Vertical lift bridges
15/04 . Swing bridges
15/06 . Bascule bridges; Roller bascule bridges, e.g. of Scherzer type
15/08 . . Drawbridges
15/10 . Travelling bridges; Sliding bridges; Rotary cylinder bridges, i.e. rotating about longitudinal axis to invert and raise the road
15/12 . Portable or sectional bridges (floating bridges E01D 15/14)
15/127 . . combined with ground-supported vehicles for the transport, handling or placing of such bridges or of sections thereof **[6]**
15/133 . . built-up from readily separable standardised sections or elements, e.g. Bailey bridges (E01D 15/127 takes precedence) **[6]**
15/14 . Floating bridges, e.g. pontoon bridges (landing bridges E01D 15/24; floating bodies or pontoons B63B) **[6]**
15/20 . . collapsible, expandable, inflatable or the like (E01D 15/22 takes precedence) **[6]**
15/22 . . designed as, or mounted on, vehicles **[6]**
15/24 . Bridges or similar structures, based on land or on a fixed structure and designed to give access to ships or other floating structures **[6]**

18/00 Bridges specially adapted for particular applications or functions not provided for elsewhere, e.g. aqueducts, bridges for supporting pipe-lines [6]

19/00 Details of bridges
19/02 . Piers; Abutments (foundations E02D)
19/04 . Bearings; Hinges
19/06 . Arrangement, construction, or bridging of expansion joints
19/08 . Damp-proof or other insulating layers; Drainage arrangements or devices
19/10 . Railings; Protectors against smoke or gases, e.g. of locomotives; Maintenance travellers; Fastening of pipes or cables to bridges
19/12 . Grating or flooring for bridges; Fastening railway sleepers or tracks to bridges
19/14 . Towers; Anchors; Saddle supports **[6]**
19/16 . Suspension cables; Cable clamps for suspension cables **[6]**

21/00 Methods or apparatus specially adapted for erecting or assembling bridges [6]
21/06 . by translational movement of the bridge or bridge sections **[6]**
21/08 . by rotational movement of the bridge or bridge sections **[6]**
21/10 . Cantilevered erection **[6]**

22/00 Methods or apparatus for repairing or strengthening existing bridges [6]

24/00 Methods or apparatus for dismantling bridges [8]

Indexing scheme associated with groups E01D 1/00 to E01D 22/00, relating to the material constitution of bridges. [6]

101/00 Material constitution of bridges [6]
101/10 . Wood **[6]**
101/20 . Concrete, stone or stone-like material **[6]**
101/22 . . Masonry; Bricks **[6]**
101/24 . . Concrete **[6]**
101/26 . . . reinforced **[6]**
101/28 . . . . prestressed **[6]**
101/30 . Metal (E01D 101/26 takes precedence) **[6]**
101/32 . . prestressed **[6]**
101/34 . . non-ferrous, e.g. aluminium **[6]**
101/40 . Plastics **[6]**

E01F ADDITIONAL WORK, SUCH AS EQUIPPING ROADS OR THE CONSTRUCTION OF PLATFORMS, HELICOPTER LANDING STAGES, SIGNS, SNOW FENCES, OR THE LIKE

Subclass index

Arrangement or construction of additional equipment for roads or railways; **Landing stages for helicopters**

1/00 Construction of platforms or refuge islands (general arrangement of railway platforms B61B)

3/00 Landing stages for helicopters, e.g. located above buildings (layout of airfields B64F; buildings or like structures for special purposes E04H)

5/00 Draining the sub-base of roads or ballastway of railways by trenches, culverts, or conduits (underground drainage E02D; conduits for sewerage E03F)

7/00 **Devices affording protection against snow, sand drifts, side-wind effects, snowslides, avalanches or falling rocks** (permanently installed heating or blowing devices for roads E01C 11/26); **Anti-dazzle arrangements**

7/02 . Snow fences or similar devices, e.g. devices affording protection against sand drifts or side-wind effects (fences in general E04H 17/00)

7/04 . Devices affording protection against snowslides, avalanches or falling rocks, e.g. avalanche preventing structures, galleries (securing of slopes E02D 17/20; roof snow-traps E04D 13/10)

7/06 . Anti-dazzle arrangements (E01F 8/00 takes precedence) **[3]**

8/00 **Arrangements for absorbing or reflecting air transmitted noise from road or railway traffic** (ground installations for reducing aircraft noise B64F 1/26; general building constructions for absorbing or reflecting noise, noise absorption or reflection for buildings E04B 1/74) **[3]**

8/02 . specially adapted for sustaining vegetation or for accommodating plants (receptacles for cultivation of plants A01G 9/02; securing slopes or inclines E02D 17/20; retaining or protecting walls E02D 29/02) **[6]**

Arrangements for facilitating the use of roads

9/00 **Arrangement of road signs or traffic signals** (signals, signalling systems G08; signs, attachment thereof to supports G09F); **Arrangements for enforcing caution, e.g. speed bumps [6]**

9/011 . Upright bodies, e.g. marker posts or bollards; Supports for road signs (posts or poles in general E04H 12/00; means for attaching signs to a supporting structure in general G09F 7/18) **[6]**

9/012 . . free-standing, e.g. traffic cones, foldable or inflatable devices **[6]**

9/013 . . intended to be readily removable, e.g. for insertion into road-stud sockets (E01F 9/012 takes precedence) **[6]**

9/014 . . Storing, transporting, placing or retrieving portable devices **[6]**

9/015 . . with reflectors, e.g. with means for keeping clean **[6]**

9/016 . . illuminated (for obstructing or restricting traffic E01F 13/00) **[6]**

9/017 . . self-righting after deflection or displacement **[6]**

9/018 . . specially adapted for breaking, disengaging, collapsing or permanent deformation upon deflection or displacement, e.g. upon vehicle impact **[6]**

9/019 . . extensible, collapsible or pivotable (E01F 9/017, E01F 9/018 take precedence) **[6]**

9/03 . . Arrangements for fastening signs or signals to safety barriers or the like **[6]**

9/04 . Road surface markings; Kerbs or road edgings, specially adapted for informing road users, e.g. illuminated (for redirecting vehicles E01F 15/00) **[6]**

9/047 . . specially adapted for audible or vibrational signalling, e.g. rumble strips, or for enforcing reduced speed, e.g. speed bumps **[6]**

9/053 . . Kerbs or road edgings, specially adapted for informing road users, e.g. illuminated **[6]**

9/06 . . Traffic studs; Marking blocks

9/07 . . . having deflectable or displaceable parts, with or without return to original position, e.g. flexible flaps **[6]**

9/08 . . Traffic lines

9/087 . . . Lane delineators for physically separating traffic lanes and discouraging but not preventing crossing **[6]**

9/093 . . . movable for repeated use at different locations **[6]**

11/00 **Embedding pads or other sensitive devices in paving or other road surfaces** (pressure-sensitive elements G01L; traffic control systems G08G)

13/00 **Arrangements for obstructing or restricting traffic, e.g. gates, barricades** (for railway crossings B61L)

13/02 . free-standing **[6]**

13/04 . movable to allow or prevent passage **[6]**

13/06 . . by swinging into open position about a horizontal axis parallel to the road direction, i.e. swinging gates **[6]**

13/08 . . by swinging into closed position about a transverse axis situated in the road surface, e.g. tiltable sections of the road surface, tiltable parking posts **[6]**

13/10 . Vehicle barriers specially adapted for allowing passage in one direction only **[6]**

13/12 . for forcibly arresting or disabling vehicles, e.g. spiked mats **[6]**

15/00 **Safety arrangements for slowing, redirecting or stopping errant vehicles, e.g. guard posts or bollards**; **Arrangements for reducing damage to roadside structures due to vehicular impact** (arrangements for fastening signs or signals to safety barriers or the like E01F 9/03; for forcibly arresting vehicles E01F 13/00) **[6]**

15/02 . Continuous barriers extending along roads or between traffic lanes (crossable-lane separators E01F 9/087) **[6]**

15/04 . . essentially made of longitudinal beams or rigid strips (E01F 15/10, E01F 15/12 take precedence) **[6]**

15/06 . . essentially made of cables, nettings or the like (E01F 15/10, E01F 15/12 take precedence; protection against falling rocks E01F 7/04; arresting gear for aircraft B64F 1/02) **[6]**

15/08 . . essentially made of walls or wall-like elements (E01F 15/10, E01F 15/12 take precedence) **[6]**

15/10 . . portable, e.g. for temporary use **[6]**

15/12 . . and having means for providing occasional passage, e.g. for emergency vehicles **[6]**

15/14 . specially adapted for local protection, e.g. for bridge piers, for traffic islands **[6]**

E01H **STREET CLEANING**; **CLEANING OF PERMANENT WAYS**; **CLEANING BEACHES**; **CLEANING LAND**; **DISPERSING FOG IN GENERAL** (mowers convertible to apparatus for sweeping or cleaning lawns or other surfaces, e.g. to remove snow, or capable of sweeping or cleaning lawns or other surfaces A01D 42/06; cleaning in general B08B) **[4]**

Subclass index

1/00 **Removing undesirable matter from roads or like surfaces, with or without moistening of the surface** (for snow or ice E01H 5/00; cleaning tramway rails E01H 8/00; obstruction-removers on vehicles B60R 19/00; in combination with application of bitumen or the like E01C 19/16; in combination with application of traffic lines E01C 23/16)

1/02 . Brushing apparatus (E01H 1/08 to E01H 1/14 take precedence; brushes in general A46B)

1/04 . . taking-up the sweepings, e.g. for collecting, for loading

1/05 . . with driven brushes (E01H 1/04 takes precedence)

1/08 . Pneumatically dislodging or taking-up undesirable matter (suction cleaners in general A47L 5/00 to A47L 9/00); Drying by heat only, or by streams of gas (permanently-installed heating or blowing devices E01C 11/26; heating or drying for road building or repairing E01C 23/14); Cleaning by projecting abrasive particles (sand-blasting in general B24C)

1/10 . Hydraulically loosening or dislodging undesirable matter (stationary flushing devices E01H 3/04); Raking or scraping apparatus (hand implements E01H 1/12)

1/12 . Hand implements, e.g. litter pickers (rakes A01D 7/00)

1/14 . Removing by magnetic effect

3/00 **Applying liquids to roads or like surfaces, e.g. for dust control**; **Stationary flushing devices** (combined with removal of undesirable matter E01H 1/00; spray heads, other outlets B05B)

3/02 . Mobile apparatus, e.g. watering-vehicles (vehicle features B60P 3/22; applying liquid materials for road paving E01C 19/16)

3/04 . Fixed devices, e.g. permanently-installed flushing means (hydrants E03B 9/02)

4/00 **Working on surfaces of snow or ice in order to make them suitable for traffic or sporting purposes, e.g. by compacting snow** (production of artificial snow F25C 3/04) **[4]**

4/02 . for sporting purposes, e.g. preparation of ski trails (production of snow or ice for winter sports or similar recreational purposes F25C 3/00) **[4]**

5/00 **Removing snow or ice from roads or like surfaces**; **Grading or roughening snow or ice** (by applying de-icing agents E01H 10/00; obstruction removers on vehicles B60R 19/00; sand, gravel or salt spreaders E01C 19/20) **[4]**

5/02 . Hand implements (E01H 5/04, E01H 5/10, E01H 5/12 take precedence)

5/04 . Apparatus propelled by animal or engine power; Apparatus propelled by hand with driven dislodging or conveying elements, e.g. conveying pneumatically (E01H 5/10, E01H 5/12 take precedence)

5/06 . . dislodging essentially by non-driven elements, e.g. scraper blades

5/07 . . . and conveying dislodged material by driven or pneumatic means

5/08 . . dislodging essentially by driven elements

5/09 . . . the elements being rotary or moving along a closed circular path, e.g. rotary cutter, digging wheels

5/10 . by application of heat (stationary blowing or paving-heating means E01C 11/26)

5/12 . Apparatus or implements specially adapted for breaking, disintegrating, or loosening layers of ice or hard snow

6/00 **Apparatus equipped with, or having provisions for equipping with, both elements for removal of refuse or the like and elements for removal of snow or ice** (E01H 8/10 takes precedence)

8/00 **Removing undesirable matter from the permanent way of railways**; **Removing undesirable matter from tramway rails** (E01H 1/00 to E01H 6/00 take precedence)

8/02 . Methods or apparatus for removing ice or snow from railway tracks, e.g. using snow-ploughs (operating only on rails or flange grooves E01H 8/10)

8/04 . . essentially by non-driven elements

8/06 . . essentially by driven tools

8/08 . . by application of heat (heated track E01B 19/00)

8/10 . Removing undesirable matter from rails, flange grooves, or the like, e.g. removing ice from contact rails, removing mud from flange grooves (heating, blowing, or fluid-applying devices installed in the track E01B 19/00; built-in draining devices for rails E01B 21/02; removing ballast from rails E01B 27/04)

8/12 . . specially adapted to grooved rails, flangeways, or the like

10/00 **Improving gripping of ice-bound or other slippery traffic surfaces, e.g. using gritting or thawing materials** (roughening ice by means of tools E01H 5/12; applying de-icing agents to rails E01H 8/10; thawing materials C09K 3/18; by constructional features E01C 11/24)

11/00 **Control of undesirable vegetation on roads or permanent ways of railways** (destruction of undesirable vegetation in general A01M 7/00 to A01M 15/00, A01M 21/00; weeding involving working the ballast E01B 27/00); **Applying liquids, e.g. water, weed-killer, bitumen, to permanent ways** (specially to rails E01H 8/10; for preserving sleepers E01B 31/20)

12/00 Cleaning beaches

13/00 Dispersing fog in general, e.g. on roads, on airfields

15/00 Removing undesirable matter, e.g. rubbish, from the land, not otherwise provided for (gatherers for removing stones, roots or the like from the soil A01B 43/00) **[4]**

E02 HYDRAULIC ENGINEERING; FOUNDATIONS; SOIL-SHIFTING

E02B HYDRAULIC ENGINEERING (ship-lifting E02C; dredging E02F)

Subclass index

1/00 Equipment or apparatus for, or methods of, general hydraulic engineering

1/02 . Hydraulic models

3/00 Engineering work in connection with control or use of streams, rivers, coasts, or other marine sites (barrages or weirs E02B 7/00); **Sealings or joints for engineering work in general**

3/02 . Stream regulation, e.g. breaking up subaqueous rock, cleaning the beds of waterways, directing the water flow (dredging or scraping devices E02F)

3/04 . Structures or apparatus for, or methods of, protecting banks, coasts, or harbours (sealings or joints E02B 3/16)

3/06 . . Moles; Piers; Quays; Quay walls; Groynes; Breakwaters

3/08 . . . Structures of loose stones with or without piles (piles E02D 5/00)

3/10 . . Dams; Dykes; Sluice ways or other structures for dykes, dams, or the like (making embankments or dams in general E02D 17/18)

3/12 . . Revetment of banks, dams, watercourses, or the like (of slopes in general E02D 17/20)

3/14 . . . Preformed blocks; Arrangements thereof

3/16 . Sealings or joints (joints for foundation structures E02D 29/16; sealing joints not restricted to hydraulic engineering work E04B 1/68)

3/18 . Reclamation of land from water (drainage of soil E02B 11/00)

3/20 . Equipment for shipping on coasts, in harbours or on other fixed marine structures, e.g. bollards (tying-up, anchoring B63B 21/00, e.g. bollards for shipping B63B 21/06; buoys B63B 22/00) **[5]**

3/24 . . Mooring posts **[5]**

3/26 . . Fenders (fenders integral with waterborne vessels or specially adapted therefor B63B 59/02) **[5]**

3/28 . . Fender piles **[5]**

5/00 Artificial water canals (for water-power plants E02B 9/02; irrigation of soil E02B 13/00)

5/02 . Making or lining canals

5/04 . Navigable canals

5/06 . . Operating equipment in connection with canals (ship-lifting devices E02C)

5/08 . Details, e.g. gates, screens

7/00 Barrages or weirs; **Layout, construction, methods of, or devices for, making same** (for protecting banks, coasts, or harbours E02B 3/04; sealings or joints E02B 3/16; handling building or like materials for hydraulic engineering E02D 15/00; foundations in general E02D 27/00)

7/02 . Fixed barrages

7/04 . . Dams across valleys

7/06 . . . Earth-fill dams; Rock-fill dams

7/08 . . . Wall dams

7/10 . . . . Gravity dams, i.e. those in which the weight of the structure prevents overturning

7/12 . . . . Arch dams

7/14 . . . . Buttress dams

7/16 . Fixed weirs; Superstructures or flash-boards therefor

7/18 . . Siphon weirs

7/20 . Movable barrages; Lock gates

7/22 . . Stop log dams; Emergency gates

7/24 . . Needle weirs

7/26 . . Vertical-lift gates

7/28 . . . with sliding gates

7/30 . . . with guide wheels or rollers for the gates

7/32 . . . Cylindrical or tubular gates

7/34 . . . Flash-boards for vertical-lift gates

7/36 . . . Elevating mechanisms for vertical-lift gates

7/38 . . Rolling gates

7/40 . . Swinging or turning gates

7/42 . . . Gates of segmental or sector-like shape with horizontal axis

7/44 . . . Hinged-leaf gates

7/46 . . . Gates turning round a horizontal axis arranged midway of the flap

7/48 . . . Roof or double shutter gates

7/50 . . Floating gates

7/52 . . Equipment preventing vibration of gates

7/54 . . Sealings for gates

8/00 Details of barrages or weirs (cleaning or keeping clear the surface of open water E02B 15/00)

8/02 . Sediment base gates; Sand sluices; Structures for arresting waterborne material

8/04 . Valves, slides, or the like; Submerged sluice gates

8/06 . Spillways; Devices for dissipation of energy, e.g. for reducing eddies

8/08 . Fish passes; Passages for rafts or boats

9/00 Water-power plants; **Layout, construction or equipment, methods of, or apparatus for, making same** (hydraulic motors F03B)

9/02 . Water-ways

9/04 . . Free-flow canals or flumes; Intakes (gratings or screens therefor E02B 5/08)

9/06 . . Pressure galleries or pressure conduits; Galleries specially adapted to house pressure conduits; Means specially adapted for use therewith, e.g. housings, valves, gates (driving inclined galleries E21D 9/02; valves in general F16K; conduits in general F16L) **[6]**

9/08 . Tide or wave power plants (water-pressure machines, tide or wave motors F03B)

11/00 Drainage of soil, e.g. for agricultural purposes

11/02 . Drainage-device-laying apparatus, e.g. drainage ploughs

13/00 Irrigation ditches, i.e. gravity flow, open channel water distribution systems (other distribution systems for watering or spraying gardens, fields, sports grounds, or the like A01G 25/00) **[2]**

13/02 . Closures for irrigation conduits

15/00 Cleaning or keeping clear the surface of open water; **Apparatus therefor** (construction of ships or other waterborne vessels B63B, e.g. vessels specially adapted for collecting pollution from open water B63B 35/32; in swimming or splash baths or pools E04H 4/16) **[5]**

15/02 . from ice **[5]**

15/04 . Devices for cleaning or keeping clear the surface of open water from oil or like floating materials by separating or removing these materials (other treatment of water, waste water or sewage C02F; materials for treating liquid pollutants, e.g. oil, gasoline, fat, C09K 3/32)

15/06 . . Barriers therefor (E02B 15/08 takes precedence) **[5]**

15/08 . . Devices for reducing the polluted area without removing the material **[5]**

15/10 . . Devices for removing the material from the surface **[5]**

17/00 Artificial islands mounted on piles or like supports, e.g. platforms on raisable legs; **Construction methods therefor** (fenders E02B 3/26; anchoring floating platforms B63B 21/00; floating platforms, e.g. anchored, B63B 35/44; independent underwater structures E02D 29/00) **[5]**

17/02 . placed by lowering the supporting construction to the bottom, e.g. with subsequent fixing thereto

17/04 . Equipment specially adapted for raising, lowering, or immobilising the working platform relative to the supporting construction (platform lifts in general B66F 7/00)

17/06 . . for immobilising, e.g. using wedges or clamping rings

17/08 . . for raising or lowering

E02C SHIP-LIFTING DEVICES OR MECHANISMS

1/00 Locks; **Shaft locks, i.e. locks of which one front side is formed by a solid wall with an opening in the lower part through which the ships pass** (lock gates E02B 7/20)

1/02 . with auxiliary basins

1/04 . with floating troughs

1/06 . Devices for filling or emptying locks (in lock gates E02B 7/20)

1/08 . Arrangements for dissipating the energy of the water (carried by lock gates E02B 8/06)

1/10 . Equipment for use in connection with the navigation of ships in locks; Mooring equipment (tying-up, anchoring waterborne vessels B63B 21/00; equipment for shipping on coasts, in harbours or on other fixed marine structures E02B 3/20)

3/00 Inclined-plane ship-lifting mechanisms

5/00 Mechanisms for lifting ships vertically (salvaging sunken vessels B63C 7/00)

5/02 . with floating chambers

E02D FOUNDATIONS; EXCAVATIONS; EMBANKMENTS (specially adapted for hydraulic engineering E02B); UNDERGROUND OR UNDERWATER STRUCTURES [6]

(1) This subclass covers underground structures made by foundation engineering, i.e. involving disturbance of the ground surface. **[6]**

(2) This subclass does not cover underground spaces, made by underground mining methods only, i.e. not involving disturbance of the ground surface, which are covered by subclass E21D. **[6]**

Subclass index

1/00 **Investigation of foundation soil <u>in situ</u>** (investigation involving boring or specially adapted to earth drilling E21B 25/00, E21B 49/00; investigating or analysing materials by determining their chemical or physical properties, in general G01N, e.g. sampling G01N 1/00)

1/02 . before construction work

1/04 . . Sampling of soil

1/06 . . Sampling of ground water

1/08 . after finishing the foundation structure

3/00 **Improving or preserving soil or rock, e.g. preserving permafrost soil** (securing of slopes or inclines E02D 17/20; damming or interrupting passage of underground water E02D 19/12; improving soil for agricultural purposes A01; soil stabilisation for road building or like purposes E01C 21/00, E01C 23/10; setting rock anchoring bolts E21D)

3/02 . Improving by compacting (E02D 3/11 takes precedence; compacting soil locally before or while forming foundations E02D 27/26, E02D 27/28) **[3]**

3/026 . . by rolling with rollers usable only for or specially adapted for soil compaction, e.g. sheepsfoot rollers (rollers for soil working in agriculture A01B 29/00; rollers for road paving, such rollers usable also for compacting soil E01C 19/23) **[3]**

3/032 . . . Trench rollers **[3]**

3/039 . . . Slope rollers **[3]**

3/046 . . by tamping or vibrating, e.g. with auxiliary watering of the soil (E02D 3/026, E02D 3/08 take precedence; tamping or vibrating apparatus for working ballast on railways E01B 27/00, for consolidating paving materials E01C 19/30, for consolidating concrete in general E04G 21/06) **[3]**

3/054 . . . involving penetration of the soil, e.g. vibroflotation **[3]**

3/061 . . . Tampers with directly acting explosion chambers (pile drivers with explosion chambers E02D 7/12) **[3]**

3/068 . . . Vibrating apparatus operating with systems involving reciprocating masses (E02D 3/054, E02D 3/061 take precedence) **[3]**

3/074 . . . Vibrating apparatus operating with systems involving rotary unbalanced masses (E02D 3/054 takes precedence) **[3]**

3/08 . . by inserting stones or lost bodies, e.g. compaction piles (sand drains for soil compaction E02D 3/10; stressing soil while forming foundations E02D 27/28)

3/10 . . by watering, draining, de-aerating or blasting, e.g. by installing sand or wick drains (E02D 3/11 takes precedence; soil-penetrating vibrators with auxiliary watering E02D 3/054; drainage of soil in general E02B 11/00) **[3]**

3/11 . by thermal, electrical or electro-chemical means (freezing soil for interrupting passage of underground water E02D 19/14) **[3]**

3/115 . . by freezing **[3]**

3/12 . Consolidating by placing solidifying or pore-filling substances in the soil (making piles E02D 5/46; soil-conditioning or soil-stabilising materials C09K 17/00)

5/00 **Bulkheads, piles, or other structural elements specially adapted to foundation engineering** (engineering elements in general F16)

5/02 . Sheet piles or sheet pile bulkheads

5/03 . . Prefabricated parts

5/04 . . . made of steel

5/06 . . . . Fitted piles or other elements specially adapted for closing gaps between two sheet piles or between two walls of sheet piles

5/08 . . . . Locking forms; Edge joints; Pile crossings; Branch pieces

5/10 . . . made of concrete or reinforced concrete

5/12 . . . . Locking forms; Edge joints; Pile crossings; Branch pieces

5/14 . . Sealing joints between adjacent piles (sealing joints not restricted to foundation piles E04B 1/68)

5/16 . . Auxiliary devices rigidly or detachably arranged on sheet piles for facilitating assembly

5/18 . Bulkheads or similar walls made solely of concrete <u>in situ</u>

5/20 . Bulkheads or similar walls made of prefabricated parts and concrete, including reinforced concrete, <u>in situ</u>

5/22 . Piles (sheet piles E02D 5/02)

5/24 . . Prefabricated piles

5/26 . . . made of timber with or without reinforcement; Means affording protection against spoiling of the wood (cases E02D 5/60; impregnating agents B27K 3/16); Self-cleaning of piles placed in water

5/28 . . . made of steel

5/30 . . . made of concrete or reinforced concrete or made of steel and concrete

5/32 . . . with arrangements for setting in position by fluid jets

5/34 . . Concrete or concrete-like piles cast in position

5/36 . . . making without use of mould-pipes or other moulds

5/38 . . . making by use of mould-pipes or other moulds

5/40 . . . . in open water

5/42 . . . . by making use of pressure liquid or pressure gas for compacting the concrete

5/44 . . . . with enlarged footing or enlargements at the bottom of the pile

5/46 . . . making <u>in situ</u> by forcing bonding agents into gravel fillings or the soil (consolidating soil in general E02D 3/12)

5/48 . . Piles varying in construction along their length

5/50 . . Piles comprising both precast concrete portions and concrete portions cast <u>in situ</u>

5/52 . . Piles composed of separable parts, e.g. telescopic tubes

5/54 . . Piles with prefabricated supports or anchoring parts; Anchoring piles

5/56 . . Screw piles

5/58 . . Prestressed concrete piles

5/60 . . Piles with protecting cases

5/62 . . Compacting the soil at the footing or in a casing by forcing cement or like material through tubes

5/64 . . Repairing piles

5/66 . Mould-pipes or other moulds

5/68 . . for making bulkheads
5/70 . . for making sheet piles
5/72 . Pile shoes
5/74 . Means for anchoring structural elements or bulkheads (anchoring piles E02D 5/54)
5/76 . . Anchorings for bulkheads or sections thereof
5/80 . . Ground anchors

7/00 Methods or apparatus for placing sheet pile bulkheads, piles, mould-pipes, or other moulds (for both placing and removing E02D 11/00)
7/02 . Placing by driving
7/04 . . Hand pile-drivers
7/06 . . Power-driven drivers
7/08 . . . Drop drivers with free-falling hammer
7/10 . . . with pressure-operated hammer
7/12 . . . Drivers with explosion chambers
7/14 . . . Components for drivers
7/16 . . . . Scaffolds for drivers
7/18 . Placing by vibrating
7/20 . Placing by pressure or pulling power
7/22 . Placing by screwing down
7/24 . Placing by using fluid jets
7/26 . Placing by using several means simultaneously
7/28 . Placing of hollow piles or mould-pipes by means arranged inside the piles or pipes
7/30 . . by driving cores

9/00 Removing sheet pile bulkheads, piles, mould-pipes, or other moulds (for both placing and removing E02D 11/00)
9/02 . by withdrawing
9/04 . by cutting-off under water

11/00 Methods or apparatus for both placing and removing sheet pile bulkheads, piles, or mould-pipes (features relating to placing only E02D 7/00, to removing only E02D 9/00)

13/00 Accessories for placing or removing piles or bulkheads
13/02 . specially adapted for placing or removing bulkheads
13/04 . Guide devices; Guide frames
13/06 . for observation while placing
13/08 . Removing obstacles
13/10 . Follow-blocks of pile-drivers or like devices

15/00 Handling building or like materials for hydraulic engineering or foundations (conveying or working-up concrete or similar masses in general E04G 21/02)
15/02 . Handling of bulk concrete specially for foundation purposes
15/04 . . Placing concrete in mould-pipes, pile tubes, boreholes, or narrow shafts
15/06 . . Placing concrete under water
15/08 . Sinking workpieces into water or soil
15/10 . Placing gravel or like material under water

17/00 Excavations; **Bordering of excavations**; **Making embankments** (soil shifting apparatus E02F; earth drilling E21)
17/02 . Foundation pits
17/04 . . Bordering or stiffening the sides of foundation pits
17/06 . Foundation ditches or narrow shafts
17/08 . . Bordering or stiffening the sides of ditches or narrow shafts for foundations
17/10 . . Covering trenches for foundations
17/12 . . Back-filling of foundation trenches or ditches
17/13 . Foundation slots; Implements for making these slots
17/16 . Loosening of soil or rock, under water (for correcting streams E02B 3/02; by dredgers or excavators E02F)
17/18 . Making embankments (E02D 17/20 takes precedence)
17/20 . Securing of slopes or inclines

19/00 Keeping dry foundation sites or other areas in the ground (sheet piles or bulkheads E02D 5/02)
19/02 . Restraining of open water
19/04 . . by coffer-dams
19/06 . Restraining of underground water
19/08 . . by employing open ditches arranged below the level of the water
19/10 . . by lowering level of ground water
19/12 . . by damming or interrupting the passage of underground water
19/14 . . . by freezing the soil (in connection with sinking shafts E21D 1/12)
19/16 . . . by placing or applying sealing substances (consolidating by placing solidifying or pore-filling substances in the soil E02D 3/12)
19/18 . . . by making use of sealing aprons (sealings or joints for engineering work E02B 3/16)
19/20 . . . by displacing the water, e.g. by compressed air
19/22 . Lining sumps in trenches

23/00 Caissons; **Construction or placing of caissons** (tunnels submerged into or built in open water E02D 29/063) **[6]**
23/02 . Caissons able to be floated on water and to be lowered into water in situ
23/04 . Pneumatic caissons
23/06 . . Bringing persons or material into, or out of, compressed air caissons
23/08 . Lowering or sinking caissons
23/10 . . Caissons filled with compressed air
23/12 . . Inclined lowering
23/14 . . Decreasing the skin friction while lowering
23/16 . Jointing caissons to the foundation soil, specially to uneven foundation soil

25/00 Joining caissons or like sunk units to each other under water

27/00 Foundations as substructures
27/01 . Flat foundations
27/02 . . Flat foundations without substantial excavation (E02D 27/04, E02D 27/08 take precedence)
27/04 . . in water or on quicksand
27/06 . . . Floating caisson foundations
27/08 . . Reinforcements for flat foundations
27/10 . Deep foundations
27/12 . . Pile foundations
27/14 . . . Pile framings
27/16 . . . Foundations formed of separate piles
27/18 . . Foundations formed by making use of caissons
27/20 . . Caisson foundations combined with pile foundations
27/22 . . Caisson foundations made by starting from fixed or floating artificial islands by using protective bulkheads
27/24 . Foundations constructed by making use of diving-bells (equipment for dwelling or working under water B63C 11/00)

27/26 . Compacting soil locally before forming foundations; Construction of foundation structures by forcing binding substances into gravel fillings (consolidating foundation soil in general E02D 3/02 to E02D 3/12)
27/28 . Stressing the soil or the foundation structure while forming foundations
27/30 . Foundations made with permanent use of sheet pile bulkheads, walls of planks, or sheet piling boxes
27/32 . Foundations for special purposes
27/34 . . Foundations for sinking or earthquake territories (building constructions with protection arrangements against earthquakes E04H 9/02)
27/35 . . Foundations formed in frozen ground, e.g. in permafrost soil **[3]**
27/36 . . Foundations formed in moors or bogs
27/38 . . Foundations for large tanks, e.g. oil tanks
27/40 . . Foundations for dams across valleys or for dam constructions
27/42 . . Foundations for poles, masts, or chimneys
27/44 . . Foundations for machines, engines, or ordnance (special layout of foundations with respect to machinery to be supported F16M 9/00)
27/46 . . Foundations for supply conduits or other canals
27/48 . . Foundations inserted underneath existing buildings or constructions
27/50 . . Anchored foundations
27/52 . . Submerged foundations

29/00 Underground or underwater structures (underground tanks B65D 88/76; hydraulic engineering, e.g. sealings or joints, E02B; underground garages E04H 6/00; underground air-raid shelters E04H 9/12; burial vaults E04H 13/00); **Retaining walls [6]**

29/02 . Retaining or protecting walls (piers or quay walls E02B 3/06)
29/045 . Underground structures, e.g. tunnels or galleries, built in the open air or by methods involving disturbance of the ground surface all along the location line; Methods of making them **[6]**
29/05 . . at least part of the cross-section being constructed in an open excavation or from the ground surface, e.g. assembled in a trench **[6]**
29/055 . . . further excavation of the cross-section proceeding underneath an already installed part of the structure, e.g. the roof of a tunnel **[6]**
29/063 . Tunnels submerged into, or built in, open water (construction or placing of caissons in general E02D 23/00; joining caissons to each other under water, in general E02D 25/00) **[6]**
29/067 . . Floating tunnels; Submerged bridge-like tunnels, i.e. tunnels supported by piers or the like above the water-bed (pontoons or floating bridges E01D 15/14) **[6]**
29/07 . . Tunnels or shuttering therefor preconstructed as a whole or continuously made, and moved into place on the water-bed, e.g. into a preformed trench **[6]**
29/073 . . Tunnels or shuttering therefor assembled from sections individually sunk onto, or laid on, the water-bed, e.g. in a preformed trench (caisson-type sections lowered onto the water-bed E02D 29/077) **[6]**
29/077 . . Tunnels at least partially built beneath the water-bed characterised by being made by methods involving disturbance thereof all along the location line, e.g. by cut-and-cover or caisson methods **[6]**
29/09 . Constructions or methods of constructing, in water, not otherwise provided for **[6]**
29/12 . Manhole shafts; Other inspection or access chambers; Accessories therefor (for underground tanks B65D 90/10; for sewerage E03F 5/02) **[6]**
29/14 . . Covers for manholes or the like; Frames for covers **[6]**
29/16 . Arrangement or construction of joints in foundation structures (sealing joints not restricted to foundation structures E04B 1/68)

31/00 Protective arrangements for foundations or foundation structures; **Ground foundation measures for protecting the soil or the subsoil water, e.g. preventing or counteracting oil pollution** (spillage retaining means for tanks B65D 90/24)

31/02 . against ground humidity or ground water
31/04 . . Watertight packings for use under hydraulic pressure
31/06 . against corrosion by soil or water
31/08 . against transmission of vibrations or movements in the foundation soil
31/10 . against soil pressure or hydraulic pressure
31/12 . . against upward hydraulic pressure
31/14 . . against frost heaves in soil **[3]**

33/00 Testing foundations or foundation structures (testing methods or apparatus, see the relevant subclasses of class G01; testing structures or apparatus as regards function, in general, G01M; investigating or analysing materials by determining their chemical or physical properties, in general G01N)

35/00 Straightening, lifting, or lowering of foundation structures or of constructions erected on foundations

37/00 Repair of damaged foundations or foundation structures

E02F DREDGING; **SOIL-SHIFTING** (winning peat E21C 49/00)

Note

This subclass covers:
– primarily equipment for excavating or loosening earth or for moving loose earth;
– equipment for working similarly on other materials and similar equipment for loading or unloading materials.

Subclass index

1/00 **General working methods with dredgers or soil-shifting machines** (methods for making embankments E02D 17/18; methods for mining E21C)

3/00 **Dredgers**; **Soil-shifting machines** (for special purposes E02F 5/00; other machines or apparatus for mining E21C; tunnelling E21D)

3/02 . hand-operated
3/04 . mechanically-driven
3/06 . . with digging screws
3/08 . . with digging elements on an endless chain (conveyers B65G)
3/10 . . . with tools that only loosen the material
3/12 . . . Component parts
3/14 . . . . Buckets; Chains; Guides for buckets or chains; Drives for chains
3/16 . . . . Safety or control devices (safety devices in general F16P; controlling in general G05)
3/18 . . with digging wheels turning round an axis
3/20 . . . with tools that only loosen the material
3/22 . . . Component parts
3/24 . . . . Digging wheels; Digging elements of wheels; Drives for wheels
3/26 . . . . Safety or control devices (safety devices in general F16P; controlling in general G05)
3/28 . . with digging tools mounted on a dipper- or bucket-arm, e.g. dippers, buckets **[4]**
3/30 . . . with a dipper-arm pivoted on a cantilever beam
3/32 . . . . working downwardly and towards the machine, e.g. with backhoes
3/34 . . . with bucket-arms directly pivoted on the frames of tractors or self-propelled machines **[4]**
3/342 . . . . Buckets emptying overhead (E02F 3/348 to E02F 3/358 take precedence) **[4]**
3/345 . . . . Buckets emptying side-ways (E02F 3/348 to E02F 3/358 take precedence) **[4]**
3/348 . . . . Buckets emptying into a collecting or conveying device **[4]**
3/352 . . . . Buckets movable along a fixed guide **[4]**
3/355 . . . . Buckets connected to the rear end of a tractor **[4]**
3/358 . . . . Bucket-arms pivoted on a turntable being part of a tractor frame **[4]**
3/36 . . . Component parts
3/38 . . . . Cantilever beams; Dipper-arms; Bucket-arms **[4]**
3/39 . . . . . with telescopic arms **[4]**
3/40 . . . . Dippers; Buckets **[4]**
3/407 . . . . . with ejecting device **[4]**
3/413 . . . . . with grabbing device (grab equipment for cranes B66C) **[4]**
3/42 . . . . Drives for dippers, buckets, dipper-arms or bucket-arms **[4]**
3/43 . . . . . Control of dipper or bucket position; Control of sequence of drive operations **[4]**
3/46 . . with reciprocating digging or scraping elements moved by cables or hoisting ropes **[4]**
3/47 . . . with grab buckets (grab equipment for cranes B66C) **[4]**
3/48 . . . Drag-lines
3/50 . . . with buckets or other digging elements moved along a rigid guideway
3/52 . . . Cableway excavators (cable cranes B66C)
3/54 . . . Cable scrapers
3/56 . . . . with hand-controlled scraper or other digging elements
3/58 . . . Component parts
3/60 . . . . Buckets, scrapers, or other digging elements
3/627 . . Devices to connect beams or arms to a tractor or similar self-propelled machine **[4]**
3/633 . . . Drives therefor **[4]**
3/64 . . Bucket cars, i.e. having scraper bowls **[4]**
3/65 . . . Component parts, e.g. drives, control devices **[4]**
3/76 . . Graders, bulldozers, or the like with scraper plates or ploughshare-like elements (soil working A01B); Levelling devices **[4]**
3/78 . . . with rotating digging elements
3/80 . . . Component parts
3/815 . . . . Blades; Levelling tools **[4]**
3/84 . . . . Drives or control devices therefor
3/85 . . . . . Applications of hydraulic or pneumatic systems
3/88 . . with arrangements acting by a sucking or forcing effect, e.g. suction dredgers (pumps in general F04)
3/90 . . . Component parts, e.g. drives, control devices
3/92 . . . . Digging elements, e.g. suction heads
3/94 . . . . Apparatus for separating stones from the dredged material
3/96 . . with arrangements for alternate use of different digging elements

5/00 **Dredgers or soil-shifting machines for special purposes**

5/02 . for digging trenches or ditches (agricultural ploughs for working ridges A01B 13/02)
5/04 . . with digging screws
5/06 . . with digging elements mounted on an endless chain
5/08 . . with digging wheels turning round an axis
5/10 . . with arrangements for reinforcing trenches or ditches; with arrangements for making or assembling conduits or for laying conduits or cables (laying pipes per se F16L 1/00; making pipes in situ F16L 1/038; laying electric cables per se H02G 1/06) **[6]**
5/12 . . with equipment for back-filling trenches or ditches (E02F 5/10 takes precedence) **[3]**
5/14 . . Component parts for trench excavators, e.g. indicating devices

5/16 . Machines for digging other holes in the soil (earth drilling E21)
5/18 . . for horizontal holes
5/20 . . for vertical holes
5/22 . for making embankments; for back-filling (in combination with trench excavators E02F 5/12)
5/24 . . Depositing dredged material in mounds
5/26 . . Combined conveying-bridges and dredgers
5/28 . for cleaning watercourses or other waters
5/30 . Auxiliary apparatus, e.g. for thawing, cracking, blowing-up, or other preparatory treatment of the soil
5/32 . . Rippers **[4]**

7/00 Equipment for conveying or separating excavated material (barges adapted for carrying-away material from floating dredgers B63B 35/28)
7/02 . Conveying equipment mounted on a dredger (conveyers in general B65G)
7/04 . Loading devices mounted on a dredger (loading devices in general B65G)
7/06 . Delivery chutes or screening plants mounted on a dredger (separating equipment in general B03; delivery chutes in general B65G)
7/10 . Pipe-lines for conveying excavated materials (pipes in general F16L; pipe-line systems F17D)

9/00 Component parts of dredgers or soil-shifting machines, not restricted to one of the kinds covered by groups E02F 3/00 to E02F 7/00 (laying-out or take-up devices for trailing electric cables B66C) **[3]**
9/02 . Travelling gear (for motor vehicles B60B, B60G; undercarriages for locomotives or railroad cars B61F; track-laying vehicles B62D; for cranes B66C)
9/04 . . Walking gears moving the dredger forward step-by-step
9/06 . Floating substructures as supports
9/08 . Superstructures; Supports for superstructures
9/10 . . Supports for movable superstructures mounted on travelling or walking gears or on other superstructures
9/12 . . . Slewing or traversing gears (roller and ball bearings F16C)
9/14 . Booms; Cable suspensions
9/16 . Cabins, platforms, or the like for the driver (for cranes B66C 13/54)
9/18 . Counterweights
9/20 . Drives; Control devices (gearing in general F16H; controlling in general G05; electric multi-motor drives H02K, H02P)
9/22 . . Hydraulic or pneumatic drives
9/24 . Safety devices
9/26 . Indicating devices
9/28 . Small metalwork for digging elements, e.g. teeth

E03 WATER SUPPLY; SEWERAGE

E03B INSTALLATIONS OR METHODS FOR OBTAINING, COLLECTING, OR DISTRIBUTING WATER (drilling wells, obtaining fluids in general from wells E21B; pipe-line systems in general F17D)

Subclass index

1/00 **Methods or layout of installations for water supply** (E03B 3/00, E03B 9/00 take precedence) **[4]**

1/02 . for public or like main supply

1/04 . for domestic or like local supply

3/00 **Methods or installations for obtaining or collecting drinking water or tap water** (treatment of water C02F) **[4]**

3/02 . from rain-water

3/03 . . Special vessels for collecting or storing rain-water for use in the household, e.g. water-butts

3/04 . from surface water

3/06 . from underground

3/08 . . Obtaining and confining water by means of wells (applicable to a combination of water and other liquids or to other liquids only E21B 43/00)

3/10 . . . by means of pit wells

3/11 . . . . in combination with tubes, e.g. perforated, extending horizontally, or upwardly inclined, exterior to the pits

3/12 . . . by means of vertical pipe wells

3/14 . . . by means of horizontal or oblique wells

3/15 . . . Keeping wells in good condition, e.g. by cleaning, repairing, regenerating; Maintaining or enlarging the capacity of wells or water-bearing layers (with artificial enrichment E03B 3/32)

3/16 . . . Component parts of wells

3/18 . . . . Well filters (filters in general B01D 24/00 to B01D 35/00)

3/20 . . . . . of elements of special shape

3/22 . . . . . Selection of specified materials

3/24 . . . . . formed of loose materials, e.g. gravel

3/26 . . . . . with packed filtering material

3/28 . from humid air (condensing of vapours in general B01D 5/00; dehumidification of air for air-conditioning F24F 3/14)

3/30 . from snow or ice **[4]**

3/32 . with artificial enrichment, e.g. by adding water from a pond or a river

3/34 . . of underground water

3/36 . . of surface water

3/38 . Curbs for springs

3/40 . Other devices for confining, e.g. trenches, drainage

5/00 **Use of pumping plants or installations**; **Layouts thereof** (pumps, pumping plants or installations per se, F04)

5/02 . arranged in buildings

5/04 . arranged in wells

5/06 . . Special equipment

7/00 **Water main or service pipe systems** (pipes or tubes in general F16L)

7/02 . Public or like main pipe systems

7/04 . Domestic or like local pipe systems (domestic plumbing E03C 1/02)

7/07 . Arrangement of devices, e.g. filters, flow controls, measuring devices, siphons, valves, in the pipe systems (devices per se, see the relevant classes for these devices)

7/08 . . Arrangement of draining devices (draining devices in general F16K, F16L)

7/09 . Component parts or accessories (tools for cleaning pipes B08B 9/02; devices for preventing contamination of drinking water pipes for domestic use E03C 1/10; devices for preventing damage in case of bursts of pipes F16L; heating of pipes in general F16L 53/00)

7/10 . . Devices preventing bursting of pipes by freezing (devices preventing bursting of pipes in general F16L 55/00)

7/12 . . . by preventing freezing

7/14 . . Devices for thawing frozen pipes

9/00 **Methods or installations for drawing-off water** (domestic water-drawing devices E03C; taps or valves per se F16K) **[4]**

9/02 . Hydrants; Arrangement of valves therein; Keys for hydrants

9/04 . . Column hydrants

9/06 . . . Covers

9/08 . . Underground hydrants

9/10 . . . Protective plates or covers

9/12 . . . Stand-pipes

9/14 . . Draining devices for hydrants

9/16 . . Devices for retaining foreign matter, e.g. sand

9/18 . . Cleaning tools for hydrants

9/20 . . Pillar fountains or like apparatus for dispensing drinking water

11/00 **Arrangements or adaptations of tanks for water supply** (water-butts E03B 3/03; storage aspects B65D, B65G, F17B, F17C; foundations E02D 27/38; construction or assembling of bulk storage containers employing civil engineering techniques E04H 7/00; tower aspects E04H 12/00)

11/02 . for domestic or like local water supply

11/04 . . without air regulator

11/06 . . with air regulator

11/08 . . . Air regulators

11/10 . for public or like main water supply

11/12 . . of high-level tanks
11/14 . . of underground tanks
11/16 . . Adaptations of devices for putting pumping plants in and out of operation, e.g. automatic control devices

---

E03C DOMESTIC PLUMBING INSTALLATIONS FOR FRESH WATER OR WASTE WATER (not connected to either water-supply main or to waste pipe A47K; devices of the kind used in the ground E03B, E03F); **SINKS**

1/00 Domestic plumbing installations for fresh water or waste water; Sinks
1/01 . for combinations of baths, showers, sinks, wash-basins, closets, urinals, or the like
1/02 . Plumbing installations for fresh water
1/04 . . Water-basin installations specially adapted to wash-basins or baths (valves, faucets, mixing valves, taps F16K)
1/042 . . . Arrangements on taps for wash-basins or baths for connecting to the wall
1/044 . . . having a heating or cooling apparatus in the supply line (water heaters, e.g. with continuous flow, F24H)
1/046 . . . Adding soap, disinfectant, or the like, in the supply line (preventing contamination of drinking-water pipes E03C 1/10)
1/048 . . . supplying water through two or more openings around or along one side of the water-basin
1/05 . . Arrangements of devices on wash-basins, baths, sinks, or the like, for remote control of taps (remote control of taps or the like, per se F16K)
1/06 . . Devices for suspending or supporting the supply pipe or supply hose of a shower-bath
1/08 . . Jet regulators, e.g. anti-splash devices
1/084 . . . Jet regulators with aerating means
1/086 . . . Jet regulators or jet guides, easily mountable on the outlet of taps
1/10 . . Devices for preventing contamination of drinking-water pipes, e.g. means for aerating self-closing flushing valves (vacuum-breakers in general F16K, F16L)
1/12 . Plumbing installations for waste water; Basins or fountains connected thereto (drainage devices in floors E03F 5/04); Sinks
1/122 . . Pipe-line systems for waste water in buildings (pipe-line systems in general F17D)
1/126 . . Installations for disinfecting or deodorising waste-water plumbing installations
1/14 . . Wash-basins connected to the waste pipe
1/16 . . Wash-fountains connected to the waste pipe
1/18 . . Sinks, whether or not connected to the waste-pipe
1/181 . . . Anti-splash devices in sinks (jet regulators E03C 1/08)
1/182 . . . connected to the waste pipe
1/184 . . . . adapted for attachment of washing machines or heating or cooling devices (washing machines for attachment D06F 7/00)
1/186 . . . Separate partition walls, lids, protecting borders, or the like, for sinks
1/20 . . Connecting baths or bidets to the waste pipe
1/22 . . Outlet devices mounted in basins, baths, or sinks (stoppers A47K 1/14)
1/23 . . . with mechanical closure mechanisms
1/232 . . . . combined with overflow devices (overflow devices for basins or baths per se E03C 1/24)
1/24 . . Overflow devices for basins or baths (E03C 1/232 takes precedence)
1/242 . . . automatically actuating supply or draining valves
1/244 . . . Separate devices to be placed on the outlet opening
1/26 . . Object-catching inserts or similar devices for waste pipes or outlets (E03C 1/28 takes precedence)
1/262 . . . combined with outlet stoppers
1/264 . . . Separate sieves or similar object-catching inserts
1/266 . . . Arrangement of disintegrating apparatus in waste pipes or outlets; Disintegrating apparatus specially adapted for installation in waste pipes or outlets
1/28 . . Odour seals
1/282 . . . combined with additional object-catching devices
1/284 . . . having U-shaped trap
1/286 . . . . having hand-operated valves against return of waste water
1/288 . . . . having non-return valves against return of waste water (E03C 1/286 takes precedence)
1/29 . . . having housing containing dividing wall, e.g. tubular
1/292 . . . . having elastic housing
1/294 . . . with provisions against loss of water lock
1/295 . . . . using air-supply valves
1/296 . . . . using water-supply valves
1/298 . . . consisting only of non-return valve
1/30 . . Devices to facilitate removing of obstructions in waste pipes or sinks
1/302 . . . using devices moved through the pipes
1/304 . . . using fluid under pressure
1/306 . . . . by means of a tube connected to the water mains
1/308 . . . . by means of a pumping device
1/32 . . Holders or supports for basins
1/322 . . . connected to the wall only
1/324 . . . . adjustable
1/326 . . . resting on the floor
1/328 . . . . adjustable
1/33 . . . Fastening sinks or basins in an apertured support

E03D WATER-CLOSETS OR URINALS WITH FLUSHING DEVICES; FLUSHING VALVES THEREFOR

Subclass index

1/00 Water flushing devices with cisterns

1/01 . Shape or selection of material for flushing cisterns
1/012 . . Details of shape of cisterns, e.g. for connecting to wall, for supporting or connecting flushing-device actuators
1/02 . High-level flushing systems
1/04 . . Cisterns with bell siphons
1/05 . . . with movable siphon bells
1/06 . . Cisterns with tube siphons
1/07 . . . with movable or deformable siphon tubes
1/08 . . . Siphon action initiated by air or water pressure
1/10 . . . Siphon action initiated by raising the water level in the cistern, e.g. by means of displacement members
1/12 . . . Siphon action initiated by outlet of air
1/14 . . Cisterns discharging variable quantities of water (twin or multiple flushing cisterns E03D 1/22; flushing devices operated by pressure of the water supply system and discharging variable quantities of water E03D 3/12)
1/16 . . Cisterns for periodical discharge
1/18 . . Cisterns empty when not in action
1/20 . . Cisterns with tiltably-mounted containers
1/22 . . Twin or multiple flushing cisterns
1/24 . Low-level flushing systems
1/26 . . Bowl with flushing cistern mounted on the rearwardly extending end of the bowl (shape or material of the cistern E03D 1/01; constructional features of the bowl E03D 11/02 to E03D 11/12)
1/28 . . Bowl integral with the flushing cistern
1/30 . Valves for high or low cisterns; Their arrangement (inlet valves, valves in general F16K)
1/32 . . Arrangement of inlet valves (devices for reducing noise E03D 9/14)
1/33 . . Adaptations or arrangements of floats (actuating-floats in general F16K 33/00)
1/34 . . Flushing valves for outlets; Arrangement of outlet valves
1/35 . . . Flushing valves having buoyancy **[2]**
1/36 . . Associated working of inlet and outlet valves
1/38 . Adaptations or arrangements of flushing pipes (noise-absorbing means in pipe systems F16L 55/00)

3/00 Flushing devices operated by pressure of the water supply system

3/02 . Self-closing flushing valves (self-closing valves in general F16K 21/04)
3/04 . . with piston valve and pressure chamber for retarding the valve-closing movement
3/06 . . with diaphragm valve and pressure chamber for retarding the valve-closing movement
3/08 . . with other retarding devices
3/10 . Flushing devices with pressure-operated reservoir, e.g. air chamber
3/12 . Flushing devices discharging variable quantities of water (flushing cisterns discharging variable quantities of water E03D 1/14)

5/00 Special constructions of flushing devices (in motor vehicles or trailers B60R 15/00; in railway carriages B61D 35/00; in ships B63B 29/14; in aircraft B64D 11/02)

5/01 . using flushing pumps
5/012 . combined with movable closure elements in the bowl outlet (bowls with closure elements between bottom or outlet and outlet pipe E03D 11/10)
5/014 . . with devices for separate removal of liquids and solids
5/016 . with recirculation of bowl-cleaning fluid
5/02 . operated mechanically or hydraulically (E03D 5/01, E03D 5/12 take precedence)
5/04 . . directly by the seat or cover
5/06 . . directly by the door
5/08 . . directly by foot
5/09 . . directly by hand
5/092 . . . the flushing element, e.g. siphon bell, being actuated through a lever
5/094 . . . the flushing element, e.g. siphon bell, being actuated through a cable, chain, or the like
5/10 . operated electrically (E03D 5/01, E03D 5/12 take precedence)
5/12 . discharging periodically (high-level cisterns for periodical discharge E03D 1/16)

7/00 Wheeled lavatories (wheeled closets without flushing A47K 11/00; construction of land vehicles B62)

9/00 Sanitary or other accessories for lavatories (hand tools for cleaning the toilet bowl A47K 11/10; seats or covers for closets A47K 13/00; body supports, other than seats, for closets A47K 17/02; devices for preventing contamination of drinking-water pipes E03C 1/10)

9/02 . Devices adding a disinfecting, deodorising or cleaning agent to the water while flushing, or in the flushing tank (apparatus for disinfection of materials or objects in general A61L 2/00; treatment of water in general C02F)
9/03 . . consisting of a separate container with an outlet through which the agent is introduced into the flushing water, e.g. by suction
9/04 . Special arrangement or operation of ventilating devices (ventilating rooms in general F24F)
9/05 . . ventilating the bowl
9/052 . . . using incorporated fans **[2]**
9/06 . Auxiliary chambers with water connection to the flushing pipe and adapted to receive utensils for bowl-cleaning, e.g. brushes

9/08 . Devices in the bowl producing upwardly-directed sprays; Modifications of the bowl for use with such devices (showers A47K 3/28; bathing devices for special therapeutic or hygienic purposes A61H 33/00, for specific parts of the body A61H 35/00)

9/10 . Waste-disintegrating apparatus combined with the bowl

9/12 . Means to prevent freezing of lavatories

9/14 . Noise-reducing means combined with flushing valves (noise-absorbing means in pipe systems F16L 55/00)

9/16 . Water pressure regulating means in flushing pipes

11/00 Other component parts of water-closets (pipe joints or couplings in general F16L)

11/02 . Water-closet bowls (auxiliary chambers with connections to flushing water for bowl-cleaning utensils E03D 9/06; modified for using upwardly-directed sprays E03D 9/08; seats or covers A47K 13/00)

11/04 . . Bowls of flat shape with only slightly inclined bottom

11/06 . . Bowls with downwardly-extending flanges

11/08 . . Bowls with means producing a flushing water swirl

11/10 . . Bowls with closure elements provided between bottom or outlet and the outlet pipe; Bowls with pivotally supported inserts

11/11 . . Bowls combined with a reservoir, e.g. containing apparatus for disinfecting or for disintegrating

11/12 . Swivel-mounted bowls, e.g. for use in restricted spaces

11/13 . Parts or details of bowls; Special adaptations of pipe joints or couplings for use with bowls **[2]**

11/14 . . Means for connecting the bowl to the wall, e.g. to a wall outlet **[2]**

11/16 . . Means for connecting the bowl to the floor, e.g. to a floor outlet **[2]**

11/17 . . Means for connecting the bowl to the flushing pipe **[2]**

11/18 . Siphons (for pipes in general F16L 43/00, F16L 45/00)

13/00 Urinals (without flushing devices A47K 11/00)

E03F SEWERS; CESSPOOLS

Subclass index

1/00 Methods, systems, or installations for draining-off sewage or storm water

3/00 Sewer pipe-line systems

3/02 . Arrangement of sewer pipe-lines or pipe-line systems

3/04 . Pipes or fittings specially adapted to sewers (manufacture of concrete tubes B28; pipes or pipe fittings in general F16L)

3/06 . Methods of, or installations for, laying sewer pipes (making pipes in situ F16L 1/038) **[6]**

5/00 Sewerage structures

5/02 . Manhole shafts or other inspection chambers (in general E02D 29/12); Snow-filling openings; Accessories (covers or frames for manholes or the like E02D 29/14)

5/04 . Gullies with or without odour seals or sediment traps

5/042 . . Arrangements of means against overflow of water, backing-up from the drain

5/046 . . adapted to be used with kerbs (E03F 5/06 takes precedence)

5/06 . . Gully gratings

5/08 . Ventilation of sewers

5/10 . Collecting-tanks; Equalising-tanks for regulating the run-off; Laying-up basins

5/12 . Emergency outlets

5/14 . Devices for separating liquid or solid substances from sewage, e.g. sand or sludge traps, rakes or grates (for use in sewage purification plants or both in sewage purification plants or in sewer systems B01D, C02F)

5/16 . . Devices for separating oil, water, or grease from sewage in drains leading to the main sewer

5/18 . Tanks for disinfecting, neutralising, or cooling sewage (arrangements in tanks as to the biological or chemical aspect C02F)

5/20 . Siphon pipes or inverted siphons (for connections of baths, basins, or the like E03C 1/12)

5/22 . Adaptations of pumping plants for lifting sewage (wheeled apparatus for emptying sewers or cesspools E03F 7/10; pumps, pumping plants, per se F04)

5/24 . Installations for neutralising explosions in sewers

5/26 . Installations for stirring-up sewage

7/00 Other installations or implements for operating sewer systems, e.g. for preventing or indicating stoppage; Emptying cesspools

7/02 . Shut-off devices (in general F16K)

7/04 . . Valves for preventing return flow

7/06 . Devices for restraining rats or other animals

7/08 . Hand implements for emptying sewers or cesspools

7/10 . Wheeled apparatus for emptying sewers or cesspools

7/12 . Installations enabling inspection personnel to drive along sewer canals

9/00 Arrangements or fixed installations for cleaning sewer pipes, e.g. by flushing (sediment traps, rakes, screens, or the like, arranged in sewer lines E03F 5/14; cleaning pipes in general, devices for cleaning pipes B08B 9/02)

11/00 Cesspools (emptying cesspools E03F 7/00; features relating to treatment of sewage C02F)

E04 BUILDING

E04B GENERAL BUILDING CONSTRUCTIONS; WALLS, E.G. PARTITIONS; ROOFS; FLOORS; CEILINGS; INSULATION OR OTHER PROTECTION OF BUILDINGS (border constructions of openings in walls, floors, or ceilings E06B 1/00)

(1) This subclass covers working methods used in constructing new buildings and analogous working methods on existing buildings. Other working methods on existing buildings, except those for insulating, are classified in group E04G 23/00. **[5]**

(2) In this subclass, the following term is used with the meaning indicated:
– "ceiling" includes all the finishing material concealing the underside of the load-carrying ceiling structure or roof structure. **[4]**

1/00 **Constructions in general**; **Structures which are not restricted either to walls, e.g. partitions, or floors or ceilings or roofs** (scaffolds, shutterings E04G; structures specially adapted for buildings for special purposes, general layout of buildings, e.g. modular co-ordination, E04H; the particular parts of buildings, see the relevant groups for those parts)

1/02 . Structures consisting primarily of load-supporting, block-shaped or slab-shaped elements (E04B 1/32 to E04B 1/36 take precedence)

1/04 . . the elements consisting of concrete, e.g. reinforced concrete, or other stone-like material

1/06 . . . the elements being prestressed

1/08 . . the elements consisting of metal

1/10 . . the elements consisting of wood

1/12 . . the elements consisting of other material

1/14 . . the elements being composed of two or more materials (of reinforced concrete E04B 1/04)

1/16 . Structures made from masses, e.g. concrete, cast or similarly formed in situ with or without making use of additional elements, such as permanent forms, sub-structures to be coated with load-bearing material (E04B 1/32 to E04B 1/36 take precedence)

1/18 . Structures comprising elongated load-supporting parts, e.g. columns, girders, skeletons (E04B 1/32 to E04B 1/36 take precedence; elongated load-supporting parts as elements, trusses, truss-like structures E04C 3/00)

1/19 . . Three-dimensional framework structures **[2]**

Note

Group E04B 1/19 takes precedence over groups E04B 1/20 to E04B 1/30. **[2]**

1/20 . . the supporting parts consisting of concrete, e.g. reinforced concrete, or other stone-like material

1/21 . . . Connections specially adapted therefor **[2]**

1/22 . . . with parts being prestressed

1/24 . . the supporting parts consisting of metal

1/26 . . the supporting parts consisting of wood

1/28 . . the supporting parts consisting of other material

1/30 . . the supporting parts being composed of two or more materials; Composite steel and concrete constructions (of reinforced concrete E04B 1/20)

1/32 . Arched structures; Vaulted structures; Folded structures (vaulted roofs E04B 7/08)

1/34 . Extraordinary structures, e.g. with suspended or cantilever parts supported by masts or tower-like structures enclosing elevators or stairs; Features relating to the elastic stability (E04B 1/342, E04B 1/343, E04B 1/348 take precedence; for floors E04B 5/43; buildings for special purposes, e.g. withstanding earthquake, E04H)

1/342 . Structures covering a large free area, whether open-sided or not, e.g. hangars, halls (roof trusses E04C 3/00; non-structural features for specified purposes, see the relevant groups of E04H)

1/343 . Structures characterised by movable, separable, or collapsible parts, e.g. for transport (movable roof parts E04B 7/16; floatable buildings B63B; small prefabricated buildings, transportable as a whole, E04H 1/12; small garages E04H 6/02; tents or canopies, in general E04H 15/00)

1/344 . . with hinged parts

1/346 . . Rotary buildings; Buildings with rotary units, e.g. rooms

1/348 . Structures composed of units comprising at least considerable parts of two sides of a room, e.g. box-like or cell-like units closed or in skeleton form (wall units locating conduits or the like E04C 2/52)

1/35 . Extraordinary methods of construction, e.g. lift-slab, jack-block (E04B 1/34 takes precedence; falsework, shuttering for shaping walls, floors, ceilings or roofs for structures of particular shape in situ E04G 11/04; conveying or assembling of building materials E04G 21/00; working measures on existing buildings E04G 23/00)

1/36 . Bearings or like supports allowing movement (for bridges E01D 19/04; buildings withstanding earthquake E04H 9/02)

1/38 . Connections for building structures in general

Note

Connections specially adapted for particular building parts or for particular building structures are classified in the groups for those parts or structures, e.g. in groups E04B 1/21, E04B 2/00, E04B 5/00, E04B 7/00 or E04B 9/00. Joints not specially adapted for building construction, or of more general application, are classified in the appropriate subclasses, e.g. F16B. **[5]**

1/41 . . Connecting devices specially adapted for embedding in concrete or masonry (spacers for cavity walls E04B 2/30, E04B 2/44; connectors for reinforcing elements E04C 5/16; fastening frames to the border of openings E06B 1/56)

1/48 . . Dowels, i.e. members adapted to penetrate the surfaces of two parts and to take the shear stresses

1/49 . . . with self-penetrating parts, e.g. claw dowels

1/58 . . of bar-shaped building elements
1/61 . . of slab-shaped building elements with each other **[5]**
1/62 . Insulation or other protection; Elements or use of specified material therefor (chemical compositions C01 to C11; implements for applying insulation or sealings E04F 21/00; buildings to withstand, or to provide protection against, external undesired influences E04H 9/00; sealing pipes in walls or partitions F16L 5/02; shielding against dangerous radiation G21F; constructions of particular parts of buildings, see the relevant groups for those parts)
1/64 . . for making damp-proof; Protection against corrosion (sealings E04B 1/66)
1/66 . . Sealings (additions of anti-leak properties to plaster C04B; bituminous sealing masses C08L 95/00; sealings for hydraulic engineering work in general E02B 3/16; against ground humidity or ground water E02D 31/02; coverings against rain or other precipitations of the atmosphere E04D; composition of material or manufacture of sealing foils, see the relevant classes for these foils)
1/68 . . . of joints, e.g. expansion joints (packing for joints in roads or airfields E01C 11/02; expansion joints for bridges E01D 19/06; sealing joints between foundation piles E02D 5/14; joints in foundation structures E02D 29/16; devices for sealing the spaces or joints between roof-covering elements E04D 1/36; sealing joints between roof-covering elements E04D 3/38; construction of joints for flooring or floor layers made of masses in situ E04F 15/14)
1/682 . . . . formed in situ **[5]**
1/684 . . . . using preformed elastomeric elements **[5]**
1/686 . . . . . comprising a plurality of hollow, deformable internal cells **[5]**
1/70 . . Drying or keeping dry, e.g. by air vents (by sealings E04B 1/66; during erection E04G 21/28)
1/72 . . Pest control (by keeping dry E04B 1/70; impregnation of wood or like materials B27K)
1/74 . . Heat, sound or noise insulation, absorption, or reflection (forms of, or arrangements in, rooms for influencing or directing sound E04B 1/99); Other building methods affording favourable thermal or acoustical conditions, e.g. accumulating of heat within walls (fire protection E04B 1/94; elements chiefly adapted for structural purposes E04C 1/00 to E04C 3/00; chiefly adapted for surface coverings E04F 13/00; as underlayers for floor coverings E04F 15/18; closures for wall or like openings E06B)
1/76 . . . specifically with respect to heat only (heat insulation in general F16L 59/00)
1/78 . . . . Heat insulating elements
1/80 . . . . . slab-shaped
1/82 . . . specifically with respect to sound only (noise damping in ducts or channels E04F 17/00; noise damping in general G10K 11/16)
1/84 . . . . Sound-absorbing elements
1/86 . . . . . slab-shaped
1/88 . . . Insulating elements for both heat and sound
1/90 . . . . slab-shaped
1/92 . . Protection against other undesired influences or dangers (buildings providing protection against external dangers E04H 9/00; shielding against dangerous radiation G21F)
1/94 . . . against fire (fire-fighting A62C; impregnation of wood or similar materials B27K; fireproof doors E06B 5/16)
1/98 . . . against vibrations or shocks (on foundations E02D 31/08); against mechanical destruction, e.g. by air-raids (against incendiary damage only E04B 1/94; finishing work therefor E04F; buildings withstanding earthquake or the like, shelters, arrangements of splinter-catching walls E04H 9/00)
1/99 . Room acoustics, i.e. forms of, or arrangements in, rooms for influencing or directing sound (E04B 1/82 takes precedence; acoustics in general G10K 11/00; electric signal processing for producing a reverberation or echo sound G10K 15/08)

2/00 **Walls, e.g. partitions, for buildings**; **Wall construction with regard to insulation**; **Connections specially adapted to walls** (connections for building structures in general E04B 1/38; insulation for building in general E04B 1/62; building elements of relatively thin form for parts of buildings E04C 2/00)
2/02 . built-up from layers of building elements
2/04 . . Walls having neither cavities between, nor in, the solid elements
2/06 . . . using elements having specially-designed means for stabilising the position
2/08 . . . . by interlocking of projections or inserts with indentations, e.g. of tongues, grooves, dovetails
2/10 . . . . by filling material with or without reinforcements in small channels in, or in grooves between, the elements
2/12 . . . using elements having a general shape differing from that of a parallelepiped
2/14 . . Walls having cavities in, but not between, the elements, i.e. each cavity being enclosed by at least four sides forming part of one single element
2/16 . . . using elements having specially designed means for stabilising the position
2/18 . . . . by interlocking of projections or inserts with indentations, e.g. of tongues, grooves, dovetails
2/20 . . . . by filling material with or without reinforcements in small channels in, or in grooves between, the elements
2/22 . . . using elements having a general shape differing from that of a parallelepiped
2/24 . . . the walls being characterised by fillings in some of the cavities forming load-bearing pillars or beams
2/26 . . . the walls being characterised by fillings in all cavities in order to form a wall construction
2/28 . . Walls having cavities between, but not in, the elements; Walls of elements each consisting of two or more parts kept in distance by means of spacers, all parts being solid
2/30 . . . using elements having specially designed means for stabilising the position; Spacers for cavity walls
2/32 . . . . by interlocking of projections or inserts with indentations, e.g. of tongues, grooves, dovetails
2/34 . . . . by filling material with or without reinforcements in small channels in, or in grooves between, the elements
2/36 . . . using elements having a general shape differing from that of a parallelepiped

2/38 . . . the walls being characterised by fillings in some of the cavities forming load-bearing pillars or beams

2/40 . . . the walls being characterised by fillings in all cavities in order to form a wall construction

2/42 . . Walls having cavities between, as well as in, the elements; Walls of elements each consisting of two or more parts, kept in distance by means of spacers, at least one of the parts having cavities

2/44 . . . using elements having specially designed means for stabilising the position; Spacers for cavity walls

2/46 . . . . by interlocking of projections or inserts with indentations, e.g. of tongues, grooves, dovetails

2/48 . . . . by filling material with or without reinforcements in small channels in, or in grooves between, the elements

2/50 . . . using elements having a general shape differing from that of a parallelepiped

2/52 . . . the walls being characterised by fillings in some of the cavities forming load-bearing pillars or beams

2/54 . . . the walls being characterised by fillings in all cavities in order to form a wall construction

2/56 . Walls of framework or pillarwork; Walls incorporating load-bearing elongated members (E04B 2/74, E04B 2/88 take precedence; pillars E04C 3/30)

2/58 . . with elongated members of metal

2/60 . . . characterised by special cross-section of the elongated members

2/62 . . . . the members being formed of two or more elements in side-by-side relationship

2/64 . . with elongated members of concrete

2/66 . . . characterised by special cross-section of the elongated members

2/68 . . . made by filling-up wall cavities (E04B 2/24, E04B 2/38, E04B 2/52 take precedence)

2/70 . . with elongated members of wood

2/72 . Walls of elements of relatively thin form (E04B 2/56, E04B 2/74, E04B 2/88 take precedence; with joint fillings acting as framework or pillars E04B 2/68; elements E04C 2/00)

2/74 . Removable non-load-bearing partitions; Partitions with a free upper edge (framed panels E04C 2/38)

2/76 . . with framework or posts of metal

2/78 . . . characterised by special cross-section of the frame members

2/80 . . with framework or posts of wood

2/82 . . characterised by the manner in which edges are connected to the building; Means therefor; Special details of easily-removable partitions

2/84 . Walls made by casting, pouring, or tamping in situ (E04B 2/02, E04B 2/56 take precedence; forms therefor E04G 11/06; working of concrete or similar masses able to be cast or poured in situ E04G 21/02)

2/86 . . made in permanent forms

2/88 . Curtain walls

2/90 . . comprising panels directly attached to the structure **[4]**

2/92 . . . Sandwich-type panels **[4]**

2/94 . . . Concrete panels (E04B 2/92 takes precedence) **[4]**

2/96 . . comprising panels attached to the structure through mullions or transoms **[4]**

5/00 **Floors**; **Floor construction with regard to insulation**; **Connections specially adapted therefor** (elements for floors, e.g. bricks, stones, filling bodies, girders, E04C; flooring as finishing work, insulation of flooring, sectional false floors, e.g. for computers, E04F 15/00) **[5]**

5/02 . Load-carrying floor structures formed substantially of prefabricated units (E04B 5/43 to E04B 5/48 take precedence)

5/04 . . with beams of concrete or other stone-like material, e.g. asbestos cement (E04B 5/08, E04B 5/14 take precedence)

5/06 . . . placed against one another

5/08 . . assembled of block-shaped elements, e.g. hollow stones (E04B 5/14 takes precedence; floors composed of reinforced brickwork E04B 5/44)

5/10 . . with metal beams or girders, e.g. with steel lattice girders (E04B 5/14 takes precedence)

5/12 . . with wooden beams (E04B 5/14 takes precedence)

5/14 . . with beams or girders laid in two directions

5/16 . Load-carrying floor structures wholly or partly cast or similarly formed in situ (E04B 5/43 to E04B 5/48 take precedence; floors merely characterised by the prefabricated elements E04C)

5/17 . . Floor structures partly formed in situ

5/18 . . . with stiffening ribs or other beam-like formations wholly cast between filling members

5/19 . . . . the filling members acting as self-supporting permanent forms (E04B 5/21 takes precedence)

5/21 . . . . Cross-ribbed floors

5/23 . . . with stiffening ribs or other beam-like formations wholly or partly prefabricated (with all load-carrying parts substantially consisting of prefabricated units E04B 5/02)

5/26 . . . . with filling members between the beams (E04B 5/28 takes precedence)

5/28 . . . . Cross-ribbed floors

5/29 . . . . the prefabricated parts of the beams consisting wholly of metal (E04B 5/28 takes precedence)

5/32 . . Floor structures wholly cast in situ with or without form units or reinforcements

5/36 . . . with form units as part of the floor

5/38 . . . . with slab-shaped form units acting simultaneously as reinforcement; Form slabs with reinforcements extending laterally outside the element

5/40 . . . . . with metal form slabs

5/43 . Floor structures of extraordinary design; Features relating to the elastic stability; Floor structures specially designed for resting on columns only, e.g. mushroom floors (extraordinary constructions in general E04B 1/34)

5/44 . Floors composed of stones, mortar, and reinforcing elements (with inserts of glass E04B 5/46)

5/46 . Special adaptation of floors for transmission of light, e.g. by inserts of glass (of ceilings E04B 9/32; block-shaped elements E04C 1/42; slab- or sheet-shaped elements E04C 2/54; for roof covering E04D 3/06) **[5]**

5/48 . Special adaptations of floors for incorporating ducts, e.g. for heating or ventilating (in block-shaped elements E04C 1/39; in slab- or sheet-shaped elements E04C 2/52)

7/00 **Roofs**; **Roof construction with regard to insulation** (structures for roofs as well as for floors E04B 5/00; ceilings E04B 9/00; greenhouses A01G 9/14; large containers having floating covers B65D 88/34; roof trusses, truss-like structures, joists E04C 3/02; roof coverings E04D) **[5]**

7/02 . with plane sloping surfaces, e.g. saddle roofs (E04B 7/12 takes precedence)

7/04 . . supported by horizontal beams or the equivalent resting on the walls (E04B 7/06 takes precedence)

7/06 . . Constructions of roof intersections or hopped ends

7/08 . Vaulted roofs (E04B 7/14 takes precedence; vaulted structures in general E04B 1/32; inflatable tents or canopies, in general E04H 15/20; inflatable forms for shaping in situ E04G 11/04)

7/10 . . Shell structures, e.g. of hyperbolic-parabolic shape; Grid-like formations acting as shell structures; Folded structures

7/12 . formed in bays, e.g. sawtooth roofs (E04B 7/10 takes precedence)

7/14 . Suspended roofs (suspended tents or canopies, in general E04H 15/04)

7/16 . Roof structures with movable roof parts (buildings for special purposes E04H)

7/18 . Special structures in or on roofs, e.g. dormer windows (in connection with roof coverings E04D 13/00, especially domes E04D 13/03)

7/20 . Roofs consisting of self-supporting slabs, e.g. able to be loaded **[5]**

7/22 . . the slabs having insulating properties, e.g. being laminated with layers of insulating material (E04B 7/24 takes precedence) **[6]**

7/24 . . the slabs being collapsible, e.g. for transport **[6]**

9/00 **Ceilings**; **Construction of ceilings, e.g. false ceilings**; **Ceiling construction with regard to insulation** (ceilings used as forms for making floors E04B 5/00; coverings or linings for ceilings E04F 13/00) **[5]**

9/02 . having means for ventilation or vapour discharge **[5]**

9/04 . comprising slabs, sheets or the like (E04B 9/06 to E04B 9/34 take precedence; slabs, sheets or the like per se E04C 2/00) **[5]**

9/06 . characterised by constructional features of the supporting construction **[5]**

9/08 . . having the capability of expansion **[5]**

9/10 . . Connections between parallel members of the supporting construction (E04B 9/08 takes precedence) **[5]**

9/12 . . Connections between non-parallel members of the supporting construction (E04B 9/08 takes precedence) **[5]**

9/14 . . . all the members being discontinuous and lying at least partly in the same plane **[5]**

9/16 . . . the members lying in different planes **[5]**

9/18 . Means for suspending the supporting construction **[5]**

9/20 . . adjustable **[5]**

9/22 . Connection of slabs, sheets or the like to the supporting construction **[5]**

9/24 . . with the slabs, sheets or the like positioned on, or held against, horizontal flanges of the supporting construction **[5]**

9/26 . . . by means of snap action of elastically deformable elements **[5]**

9/28 . . with the slabs, sheets or the like having grooves engaging with horizontal flanges of the supporting construction or accessory means connected thereto **[5]**

9/30 . characterised by edge details of the ceiling, e.g. securing to an adjacent wall **[5]**

9/32 . Translucent ceilings, i.e. permitting both the transmission and diffusion of light (E04B 9/34 takes precedence; lighting F21) **[5]**

9/34 . Open-work ceilings, e.g. lattice type (E04B 9/30 takes precedence) **[5]**

9/36 . . consisting of parallel slats **[5]**

E04C **STRUCTURAL ELEMENTS**; **BUILDING MATERIALS** (for bridges E01D; specially designed for insulation or other protection E04B; elements used as building aids E04G; for mining E21; for tunnels E21D; structural elements with broader range of application than for building engineering F16, particularly F16S)

1/00 **Building elements of block or other shape for the construction of parts of buildings** (of relatively thin form E04C 2/00; structural elongated elements designed for load-supporting E04C 3/00, e.g. columns or pillars E04C 3/30; manufacture or material of building bricks, stones, or the like B28, C03, C04; paving elements E01C; general building constructions E04B, e.g. walls E04B 2/00, floors E04B 5/00, roofs E04B 7/00, ceilings E04B 9/00; structural elements specially designed for built-in conduit shafts E04F; special elements for building ovens or furnaces F24B, F27D) **[5]**

1/39 . characterised by special adaptations, e.g. serving for locating conduits, for forming soffits, cornices, or shelves, for fixing wall-plates or door-frames, for claustra

1/40 . built-up from parts of different materials, e.g. composed of layers of different materials or stones with filling material or with insulating inserts

1/41 . . composed of insulating material and load-bearing concrete, stone or stone-like material **[6]**

1/42 . of glass or other transparent material

2/00 **Building elements of relatively thin form for the construction of parts of buildings, e.g. sheet materials, slabs, or panels** (materials or manufacture, see the relevant places, e.g. B27N, B29, D21J; made in situ E04B; specially designed for insulation or other protection E04B 1/62; load-carrying floor structures E04B 5/02, E04B 5/16; roofs consisting of self-supporting slabs E04B 7/20; roof- or like covering elements E04D 3/00; for lining or finishing E04F 13/00)

2/02 . characterised by specified materials (translucent E04C 2/54)

2/04 . . of concrete or other stone-like material; of asbestos cement (E04C 2/26 takes precedence; material or manufacture B28, C04)

2/06 . . . reinforced

2/08 . . of metal, e.g. sheet metal (E04C 2/26 takes precedence)

2/10 . . of wood, fibres, chips, vegetable stems, or the like; of plastics; of foamed products (E04C 2/26 takes precedence)

2/12 . . . of solid wood

2/14 . . . . reinforced
2/16 . . . of fibres, chips, vegetable stems, or the like
2/18 . . . . with binding wires, reinforcing bars, or the like
2/20 . . . of plastics
2/22 . . . . reinforced
2/24 . . . laminated and composed of materials covered by two or more of groups E04C 2/12, E04C 2/16, E04C 2/20
2/26 . . composed of materials covered by two or more of groups E04C 2/04, E04C 2/08, E04C 2/10, or of materials covered by one of these groups with a material not specified in one of these groups
2/28 . . . combinations of materials fully covered by groups E04C 2/04 and E04C 2/08
2/284 . . . at least one of the materials being insulating **[6]**
2/288 . . . . composed of insulating material and concrete, stone or stone-like material **[6]**
2/292 . . . . composed of insulating material and sheet metal **[6]**
2/296 . . . . composed of insulating material and non-metallic or unspecified sheet-material (E04C 2/288 takes precedence) **[6]**
2/30 . characterised by the shape or structure (translucent E04C 2/54)
2/32 . . formed of corrugated or otherwise indented sheet-like material; composed of such layers with or without layers of flat sheet-like material
2/34 . . composed of two or more spaced sheet-like parts (E04C 2/32 takes precedence; spacers for cavity walls E04B 2/44)
2/36 . . . spaced apart by transversely-placed strip material, e.g. honeycomb panels (honeycomb or other core members for layered products B32B)
2/38 . . with attached ribs, flanges, or the like, e.g. framed panels (concerned with attaching to other panels or elements to form a structure, see the places for the relevant structure, e.g. E04B 2/00)
2/40 . . composed of a number of smaller components rigidly or movably connected together, e.g. interlocking, hingedly connected
2/42 . . Gratings; Grid-like panels (reinforcing elements E04C 5/00; built-in gratings E04F 19/10; gratings in general F16S 3/00)
2/52 . . with special adaptations for auxiliary purposes, e.g. serving for locating conduits (E04C 2/54 takes precedence; block-shaped elements therefor E04C 1/39; floor structures incorporating ducts E04B 5/48)
2/54 . Slab-like translucent elements (floors for transmitting light E04B 5/46; translucent or open-work ceilings E04B 9/32, E04B 9/34; translucent roof coverings E04D 3/06, E04D 3/28)

3/00 Structural elongated elements designed for load-supporting (as building aids E04G)

3/02 . Joists; Girders, trusses, or truss-like structures, e.g. prefabricated; Lintels; Transoms (E04C 3/38 takes precedence; for structures characterised by movable, separable, or collapsible parts E04B 1/343)
3/04 . . of metal (E04C 3/29 takes precedence; as reinforcing elements E04C 5/06; manufacture B21)
3/06 . . . with substantially solid, i.e. unapertured, web (E04C 3/10, E04C 3/11 take precedence)
3/07 . . . . at least partly of bent or otherwise deformed strip- or sheet-like material
3/08 . . . with apertured web, e.g. with a web consisting of bar-like components; Honeycomb girders (E04C 3/10, E04C 3/11 take precedence)
3/09 . . . . at least partly of bent or otherwise deformed strip- or sheet-like material
3/10 . . . prestressed
3/11 . . . with non-parallel upper and lower edges, e.g. roof trusses (arched girders, portal frames E04C 3/38)
3/12 . . of wood, e.g. with reinforcements, with tensioning members (E04C 3/292 takes precedence)
3/14 . . . with substantially solid, i.e. unapertured, web (E04C 3/17, E04C 3/18 take precedence)
3/16 . . . with apertured web, e.g. trusses (E04C 3/17, E04C 3/18 take precedence)
3/17 . . . with non-parallel upper and lower edges, e.g. roof trusses
3/18 . . . with metal reinforcements or tensioning members
3/20 . . of concrete or other stone-like material, e.g. with reinforcements or tensioning members (reinforcing elements E04C 5/00)
3/22 . . . built-up by elements joined in line
3/26 . . . prestressed (E04C 3/22, E04C 3/29 take precedence; prestressing members E04C 5/08)
3/28 . . of other materials
3/29 . . built-up from parts of different materials
3/292 . . . the materials being wood and metal
3/293 . . . the materials being steel and concrete (concrete with internal reinforcements or tensioning members E04C 3/20)
3/294 . . . . of concrete combined with a girder-like structure extending laterally outside the element (light-weight girders used as reinforcement E04C 5/065; as part of a floor structure E04B 5/23)
3/30 . Columns; Pillars; Struts (not designed for end loading E04C 3/02; posts, masts, as independent structures E04H 12/00)
3/32 . . of metal (E04C 3/36 takes precedence)
3/34 . . of concrete or other stone-like material, with or without permanent form elements, with or without internal or external reinforcement, e.g. metal coverings (E04C 3/36 takes precedence)
3/36 . . of other materials
3/38 . Arched girders or portal frames (straight girders able to be bent E04C 3/02; inflatable tents or canopies, in general E04H 15/20)
3/40 . . of metal (E04C 3/46 takes precedence)
3/42 . . of wood, e.g. units for rafter roofs (E04C 3/46 takes precedence)
3/44 . . of concrete or other stone-like material, e.g. with reinforcements or tensioning members (E04C 3/46 takes precedence)
3/46 . . of other materials

5/00 Reinforcing elements, e.g. for concrete; **Auxiliary elements therefor** (material composition C21, C22; arrangements of reinforcing elements, see the relevant classes)

5/01 . Reinforcing elements of metal, e.g. with non-structural coatings **[5]**
5/02 . . of low bending resistance, i.e. of essentially one-or two-dimensional extent
5/03 . . . with indentations, projections, ribs, or the like, for augmenting the adherence to the concrete
5/04 . . . Mats (bases for plaster E04F 13/04)

5/06 . . of high bending resistance, i.e. of essentially three-dimensional extent, e.g. lattice girders
5/065 . . . Light-weight girders, e.g. with precast parts (light-weight girders in general E04C 3/08, E04C 3/294)
5/07 . Reinforcing elements of material other than metal, e.g. of glass, of plastics, or not exclusively made of metal (metal elements with non-structural coatings E04C 5/01) **[5]**
5/08 . Members specially adapted to be used in prestressed constructions
5/10 . . Ducts
5/12 . Anchoring devices (tools or methods for tensioning E04G 21/12) **[5]**
5/16 . Auxiliary parts for reinforcements, e.g. connectors, spacers, stirrups (tools for connecting reinforcing elements E04G 21/12)
5/18 . . of metal or substantially of metal
5/20 . . of other material than metal or with only additional metal parts, e.g. concrete or plastics spacers with metal binding wires

---

E04D **ROOF COVERINGS**; **SKY-LIGHTS**; **GUTTERS**; **ROOF-WORKING TOOLS** (coverings of outer walls by plaster or other porous material E04F 13/00)

Note

In this subclass, the following expression is used with the meaning indicated:
– "roof coverings" includes any similar kind of watertight covering against rain, snow, hail, or the like, for other parts of buildings.

Subclass index

1/00 **Roof covering by making use of tiles, slates, shingles, or other small roofing elements** (roofing supports E04D 12/00)
1/02 . Grooved or vaulted roofing elements (E04D 1/28, E04D 1/30 take precedence)
1/04 . . of ceramics, glass or concrete, with or without reinforcement
1/06 . . of metal
1/08 . . of plastics; of fibrous materials
1/10 . . of specified materials, or of combinations of materials, not covered by any one of groups E04D 1/04 to E04D 1/08
1/12 . Roofing elements shaped as plain tiles or shingles, i.e. with flat outer surface (E04D 1/28, E04D 1/30 take precedence)
1/14 . . of slate material, with or without fastening means
1/16 . . of ceramics, glass or concrete, with or without reinforcement
1/18 . . of metal
1/20 . . of plastics, fibrous materials, or wood
1/22 . . of specified materials, or of combinations of materials, not covered by any one of groups E04D 1/14 to E04D 1/20
1/24 . Roofing elements with cavities, e.g. hollow tiles (E04D 1/28 takes precedence)
1/26 . Strip-shaped roofing elements appearing as a row of shingles
1/28 . Roofing elements comprising two or more layers, e.g. for insulation
1/30 . Special roof-covering elements, e.g. ridge tiles, gutter tiles, gable tiles, ventilation tiles (E04D 3/40 takes precedence; roof covering aspects of energy collecting devices E04D 13/18)
1/34 . Fastenings for attaching roof-covering elements to the supporting elements
1/36 . Devices for sealing the spaces or joints between roof-covering elements (sealing joints not restricted to roof covering elements E04B 1/68)

3/00 **Roof covering by making use of flat or curved slabs or stiff sheets** (E04D 1/00 takes precedence; built-up roofs E04D 11/02)
3/02 . of plane slabs, slates, or sheets, or in which the cross-section is unimportant (E04D 3/35 takes precedence)
3/04 . . of concrete or ceramics (of asbestos cement E04D 3/18)
3/06 . . of glass or other translucent material; Fixing means therefor (fixing glass panes by means applicable to windows E06B 3/54)
3/08 . . . with metal glazing bars
3/14 . . . with glazing bars of other material, e.g. of glass
3/16 . . of metal
3/18 . . of specified materials, or of combinations of materials, not covered by any of groups E04D 3/04, E04D 3/06 or E04D 3/16
3/24 . with special cross-section, e.g. with corrugations on both sides, with ribs, flanges, or the like (E04D 3/35 takes precedence)
3/26 . . of concrete or ceramics
3/28 . . of glass
3/30 . . of metal
3/32 . . of plastics, fibrous materials, or asbestos cement
3/34 . . of specified materials, or of combinations of materials, not covered by any one of groups E04D 3/26 to E04D 3/32
3/35 . Roofing slabs or stiff sheets comprising two or more layers, e.g. for insulation
3/36 . Connecting; Fastening

Note

In groups E04D 3/361 to E04D 3/368, additional small fastening elements, e.g. nails, screws, are not to be considered to be separate connecting elements.

3/361 . . by specially-profiled marginal portions of the slabs or sheets

3/362 . . . by locking the edge of one slab or sheet within the profiled marginal portion of the adjacent slab or sheet, e.g. using separate connecting elements

3/363 . . . with snap action **[4]**

3/3645 . . . by interference fitting **[4]**

3/365 . . by simple overlapping of the marginal portions with use of separate connecting elements, e.g. hooks or bolts for corrugated sheets

3/366 . . by closing the space between the slabs or sheets by gutters, bulges, or bridging elements, e.g. strips

3/367 . . by permanent deformation of the marginal portions of adjacent slabs or sheets, e.g. by folding the edges **[4]**

3/368 . . by forcing together the marginal portions of adjacent slabs or sheets

3/369 . . by welding of the marginal portions of adjacent slabs or sheets

3/38 . Devices for sealing spaces or joints between roof-covering elements (E04D 3/36 takes precedence; sealing joints not restricted to roof covering elements E04B 1/68)

3/40 . Slabs or sheets locally modified for auxiliary purposes, e.g. for resting on walls, for serving as guttering; Elements for particular purposes, e.g. ridge elements, specially designed for use in conjunction with slabs or sheets (roof covering aspects of energy collecting devices E04D 13/18)

5/00 **Roof covering by making use of flexible material, e.g. supplied in roll form** (using stiff sheets E04D 3/00; gravelling of flat roofs E04D 7/00; built-up roofs E04D 11/02)

Note

Group E04D 5/12 takes precedence over groups E04D 5/02 to E04D 5/08.

5/02 . of materials impregnated with sealing substances, e.g. roofing felt

5/04 . by making use of metal foils

5/06 . by making use of plastics

5/08 . by making use of other materials

5/10 . by making use of compounded or laminated materials, e.g. metal foils or plastic films coated with bitumen (E04D 5/12 takes precedence)

5/12 . specially modified, e.g. perforated, with granulated surface, with attached pads

5/14 . Fastening means therefor

7/00 **Roof covering by sealing masses applied in situ; Gravelling of flat roofs**

9/00 **Roof covering by using straw, thatch, or like materials** (impregnation against incendiary damage B27K)

11/00 **Roof covering, as far as not restricted to features covered by only one of groups E04D 1/00 to E04D 9/00; Roof covering in ways not provided for by groups E04D 1/00 to E04D 9/00**

11/02 . Built-up roofs, i.e. consisting of two or more layers bonded together in situ, at least one of the layers being of watertight composition (gravelling of flat roofs E04D 7/00; venting or ventilation E04D 13/17)

12/00 **Non-structural supports for roofing materials, e.g. battens, boards** (E04D 11/02 takes precedence)

13/00 **Special arrangements or devices in connection with roof coverings; Roof drainage** (ventilation tiles E04D 1/30; ventilation slabs E04D 3/40; internal channels E04F 17/00; roofing elements therefor, see the relevant groups)

13/02 . Roof-covering aspects of dormer windows (E04D 13/14 takes precedence; structures therefor E04B 7/18)

13/03 . Sky-lights; Domes; Ventilating sky-lights (E04D 13/14 takes precedence; structures therefor E04B 7/18)

13/035 . . characterised by having movable parts

13/04 . Roof drainage; Drainage fittings in flat roofs (gutter tiles E04D 1/30; gutter slabs E04D 3/40; street gullies E03F 5/04)

13/064 . . Gutters **[6]**

13/068 . . . Means for fastening gutter parts together **[6]**

13/072 . . . Hanging means (in combination with means for fastening gutter parts together E04D 13/068) **[6]**

13/076 . . Devices or arrangements for removing snow, ice or debris from gutters or for preventing accumulation thereof **[6]**

13/08 . . Down pipes; Special clamping means therefor (clamping pipes in general F16B, F16L)

13/10 . Snow traps

13/12 . Devices or arrangements allowing walking on the roof or in the gutter

13/14 . Junctions of roof sheathings to chimneys or other parts extending above the roof

13/143 . . with ventilating means **[6]**

13/147 . . specially adapted for inclined roofs **[6]**

13/15 . Trimming strips; Edge strips; Fascias (E04D 13/14 takes precedence) **[6]**

13/152 . . with ventilating means **[6]**

13/155 . . retaining the roof sheathing **[6]**

13/158 . . covering the overhang at the eave side, e.g. soffits, or the verge of saddle roofs **[6]**

13/16 . Insulating devices or arrangements in so far as the roof covering is concerned (methods for keeping dry building structures in general E04B 1/70; buildings for extreme climates E04H 9/16) **[6]**

13/17 . Ventilation of roof coverings not otherwise provided for (ventilation of rooms or spaces F24F) **[6]**

13/18 . Roof covering aspects of energy collecting devices, e.g. including solar panels (heat collectors per se F24J, e.g. solar heat collectors F24J 2/02; semiconductor devices for converting solar energy into electrical energy H01L 25/00, H01L 31/00) **[4]**

15/00 **Apparatus or tools for roof working**

15/02 . for roof coverings comprising tiles, shingles, or like roofing elements

15/04 . for roof coverings comprising slabs, sheets or flexible material

15/06 . for handling roofing or sealing material in roll form

15/07 . for handling roofing or sealing material in bulk form

---

E04F FINISHING WORK ON BUILDINGS, E.G. STAIRS, FLOORS (windows, doors E06B)

Subclass index

10/00 **Sunshades**; **Awnings** (baldachins A45B, A45F, E04H; trailer awnings E04H 15/08; for tents E04H 15/58)

10/02 . of flexible canopy materials, e.g. canvas

10/04 . . with material fixed on sections of a collapsible frame

10/06 . . comprising a roller-blind with means for holding the end away from a building

10/08 . of a plurality of similar rigid parts, e.g. slabs, lamellae (rigidly-arranged sunshade roofs with coherent surfaces E04B 7/00)

10/10 . . collapsible

11/00 **Stairways, ramps, or like structures** (mounting or marking-off stairways E04F 21/26; of temporary construction E04G 27/00); **Balustrades**; **Handrails** (ladders permanently attached to fixed structures E06C 9/00)

11/02 . Stairways; Layouts thereof

11/022 . . characterised by the supporting structure **[6]**

11/025 . . . Stairways having stringers **[6]**

11/028 . . . . having a central stringer **[6]**

11/032 . . . Spiral stairways supported by a central column **[6]**

11/035 . . . Stairways consisting of a plurality of assembled modular parts without further support **[6]**

11/038 . . . . each modular part having a load-bearing balustrade part **[6]**

11/04 . . Movable stairways, e.g. of loft ladders which may or may not be concealable or extensible (ship ladders B63B; stairs for aircraft B64F; escalators or moving walkways B66B)

11/06 . . . collapsible, e.g. folding, telescopic

11/09 . . Tread-and-riser units **[6]**

11/104 . . Treads (E04F 11/09 takes precedence) **[6]**

11/108 . . . of wood **[6]**

11/112 . . . of metal **[6]**

11/116 . . . of stone, concrete or like material **[6]**

11/16 . . . Surfaces thereof; Protecting means for the edges or corners thereof (floor fabrics, fastenings therefor A47G 27/00)

11/17 . . . . Surfaces **[6]**

11/18 . Balustrades; Handrails (guard-rails on ships B63B; for bridges E01D 19/10; for roads E01F 13/00, E01F 15/00; fences E04H 17/00)

13/00 **Coverings or linings, e.g. for walls or ceilings** (flooring E04F 15/00; decoration of surfaces, mosaic work B44, e.g. paper-hanging B44C 7/00; made of webs, e.g. of fabrics or wallpaper, D03D, D04G, D04H, D06N, D21H; construction of ceilings E04B 9/00; roofings or similar water-tight coverings against precipitation E04D) **[3]**

13/02 . of plastic materials hardening after applying, e.g. plaster (surface treatment in painting technique B44D; inorganic or bituminous masses C04B; organic plastics C08L)

13/04 . . Bases for plaster (sub-ceilings with plaster-carrying means E04B 9/06)

13/06 . . . Edge-protecting borders

13/07 . composed of covering or lining elements; Sub-structures therefor; Fastening means therefor **[8]**

13/072 . . composed of specially adapted, structured or shaped covering or lining elements **[8]**

13/073 . . . for particular building parts, e.g. corners or columns **[8]**

13/074 . . . for accommodating service installations or utility lines, e.g. heating conduits, electrical lines, lighting devices or service outlets **[8]**

13/075 . . . for insulation or surface protection, e.g. against noise or impact **[8]**

13/076 . . . characterised by the joints between neighbouring elements, e.g. with joint fillings or with tongue and groove connections **[8]**

13/077 . . . composed of several layers, e.g. sandwich panels (E04F 13/075 takes precedence) **[8]**

13/078 . . . Stretched foil- or web-like elements attached with edge gripping devices **[8]**

13/08 . . composed of a plurality of similar covering or lining elements (E04F 13/072 takes precedence; borders, skirtings E04F 19/02) **[1,8]**

13/09 . . . of elements attached to a common web, support plate or grid **[8]**

Note

Group E04F 13/09 takes precedence over groups E04F 13/10 to E04F 13/18. **[8]**

13/10 . . . of wood **[1,8]**

13/12 . . . of metal **[1,8]**

13/14 . . . of stone or stone-like materials, e.g. ceramics; of glass **[1,8]**

13/15 . . . . characterised by the use of glass elements **[8]**

13/16 . . . of fibres or chips, e.g. bonded with synthetic resins **[1,8]**

13/18 . . . of organic plastics with or without reinforcements or filling materials (of plastic-bound fibres or chips E04F 13/16) **[1,8]**
13/21 . . Fastening means specially adapted for covering or lining elements **[8]**
13/22 . . . Anchors, support angles or consoles **[8]**
13/23 . . . . adjustable **[8]**
13/24 . . . Hidden fastening means on the rear of the covering or lining elements (E04F 13/30 takes precedence) **[8]**
13/25 . . . . adjustable **[8]**
13/26 . . . Edge engaging fastening means, e.g. clamps, clips or border profiles **[8]**
13/28 . . . . adjustable **[8]**
13/30 . . . Magnetic fastening means **[8]**

15/00 Flooring (stair treads E04F 11/104; coverings not specially adapted for floors E04F 13/00; borders, skirtings E04F 19/02; gratings for cleaning soles of footwear A47L 23/24; of similar materials to roads E01C; basic or rough floors E04B 5/00) **[6]**
15/02 . Flooring or floor layers composed of a number of similar elements (of webs E04F 15/16)
15/022 . . Flooring consisting of parquetry tiles on a non-rollable sub-layer of other material, e.g. board, concrete, cork **[2]**
15/024 . . Sectional false floors, e.g. computer floors
15/04 . . only of wood, e.g. with wooden connecting members (rollable parquet E04F 15/16)
15/06 . . of metal, whether or not in combination with other material (gratings as building elements E04C 2/42)
15/08 . . only of stone or stone-like material, e.g. concrete; of glass
15/10 . . of other materials, e.g. fibrous or chipped materials, organic plastics, magnesite, hardboard
15/12 . Flooring or floor layers made of masses in situ, e.g. seamless magnesite floors, terrazzo (inorganic or bituminous masses C04B; organic plastic masses C08L)
15/14 . . Construction of joints, e.g. dividing strips (sealing joints not restricted to flooring E04B 1/68)
15/16 . Flooring, e.g. parquet on flexible web, laid as flexible webs; Webs specially adapted for use as flooring (resiliently-mounted floors, e.g. sprung floors, E04F 15/22; linoleum D06N; webs in general, manufacturing of webs, see the relevant classes)
15/18 . Separately-laid insulating layers; Other additional insulating measures; Floating floors (insulating of buildings in general E04B 1/62)
15/20 . . for sound insulation
15/22 . Resiliently-mounted floors, e.g. sprung floors (laid as webs E04F 15/16) **[2]**

17/00 Vertical ducts; **Channels, e.g. for drainage** (pipes in general F16L; pipe-line systems F17D)
17/02 . for carrying away waste gases, e.g. flue gases (free-standing chimneys E04H 12/28; connections between fireplace and chimney, chimney fittings, covers for cleaning holes of chimneys F23J; chimney tops F23L); Building elements specially designed therefor, e.g. shaped bricks or sets thereof
17/04 . Air-ducts or air channels
17/06 . Light shafts, e.g. for cellars
17/08 . for receiving utility lines, e.g. cables, pipes (covers giving access to the ducts or channels, covers of inspection holes E04F 19/08) **[6]**
17/10 . Arrangements in buildings for the disposal of refuse (refuse bins, gathering or removal of refuse B65F)
17/12 . . Chutes

19/00 Other details or constructional parts for finishing work on buildings (ladders, e.g. climbing irons, E06C 9/04)
19/02 . Borders; Finishing strips, e.g. beadings; Light coves (for protecting edges of plaster E04F 13/06)
19/04 . . for use between floor or ceiling and wall, e.g. skirtings
19/06 . . specially designed for securing panels
19/08 . Built-in cupboards; Masks of niches; Covers of holes enabling access to installations (clean-out doors of chimneys F23J)
19/10 . Built-in gratings, e.g. foot-scrapers

21/00 Implements for finishing work on buildings (for working or treating building elements of stone or stone-like material B28D; designed specifically for special details provided for in the other groups of this subclass, see the relevant groups for the details)
21/02 . for applying plasticised masses to surfaces, e.g. plastering walls (specially for laying flooring E04F 21/20; applying liquids or other fluent materials to surfaces, in general B05; decorative arts B44)
21/04 . . Patterns or templates; Jointing rulers
21/05 . . . Supports for jointing rulers
21/06 . . Implements for applying plaster, insulating material, or the like
21/08 . . . Mechanical implements (E04F 21/14 takes precedence; spraying apparatus in general B05B; sand-blasting B24C)
21/10 . . . . centrifugally acting
21/12 . . . . acting by gas pressure, e.g. steam pressure
21/14 . . . in shafts, e.g. chimneys
21/16 . . Implements for after-treatment of plaster or the like, e.g. smoothing tools, profile trowels
21/165 . for finishing joints, e.g. implements for raking or filling joints, jointers (bricklayers' tools E04G 21/16; repairing, e.g. filling cracks, E04G 23/02) **[3]**
21/18 . for setting wall or ceiling slabs or plates (tools for mosaic work B44C)
21/20 . for laying flooring (made of similar material to roads or pavements E01C)
21/22 . . of single elements, e.g. flooring cramps
21/24 . . of masses made in situ, e.g. smoothing tools
21/26 . for mounting staircases, e.g. tools for marking steps
21/28 . for glazing (glass cutters C03B 33/10)
21/30 . . Putty squeezers or guns
21/32 . . Putty knives; Putty removers

E04G SCAFFOLDING; FORMS; SHUTTERING; BUILDING IMPLEMENTS OR OTHER BUILDING AIDS, OR THEIR USE; HANDLING BUILDING MATERIALS ON THE SITE; REPAIRING, BREAKING-UP OR OTHER WORK ON EXISTING BUILDINGS

Note

In this subclass, the following term is used with the meaning indicated:
– "scaffolding" includes other supports for like purposes.

Subclass index

Workmen's or safety scaffolds

1/00 Scaffolds primarily resting on the ground

1/02 . composed essentially of members elongated in one dimension only, e.g. poles, lattice masts, with or without end portions of special form, connected together by any means

1/04 . . the members being exclusively poles, rods, beams, or other members of similar form and simple cross-section

1/06 . . . comprising members with rod-like or tubular portions fitting together end to end, with or without separate connecting pieces

1/08 . . . secured together by bolts or the like penetrating the members

1/10 . . . . Timber-work constructions

1/12 . . comprising members of special, e.g. composite, cross-section, or with lugs or the like or lateral apertures for supporting or attaching other members

1/14 . Comprising essentially pre-assembled two-dimensional frame-like elements, e.g. of rods in L- or H-shape, with or without bracing (E04G 1/15 takes precedence) **[1,8]**

1/15 . essentially comprising special means for supporting or forming platforms (E04G 1/20 takes precedence); Platforms (boards or planks therefor E04G 5/08) **[1,8]**

1/17 . Comprising essentially pre-assembled three-dimensional elements, e.g. cubic elements **[8]**

1/18 . adjustable in height

1/20 . . Scaffolds comprising upright members and provision for supporting cross-members or platforms at different positions therealong

1/22 . . Scaffolds having a platform on an extensible sub-structure, e.g. of telescopic type or with lazy-tongs mechanism

1/24 . comprising essentially special base constructions; comprising essentially special ground-engaging parts, e.g. inclined struts, wheels (component parts E04G 5/00)

1/28 . designed to provide support only at a low height

1/30 . . Ladder scaffolds

1/32 . . Other free-standing supports, e.g. using trestles (stands or trestles in general F16M 11/00)

1/34 . Scaffold constructions able to be folded in prismatic or flat parts or able to be turned down

1/36 . Scaffolds for particular parts of buildings or buildings of particular shape, e.g. for stairs, cupolas, domes

1/38 . Scaffolds partly supported by the building (ladders attachable to structures E06C 1/34) **[8]**

3/00 Scaffolds essentially supported by building constructions, e.g. adjustable in height (E04G 1/00 takes precedence)

3/18 . supported by cantilevers or other provisions mounted in openings in the building, e.g. window openings (E04G 3/28 takes precedence) **[8]**

3/20 . supported by walls (E04G 3/28 takes precedence; wall-anchors for supporting scaffolds E04G 5/04; consoles E04G 5/06) **[8]**

3/22 . supported by roofs or ceilings (E04G 3/28 takes precedence) **[8]**

3/24 . specially adapted for particular parts of buildings or for buildings of particular shape, e.g. chimney stacks or pylons (E04G 3/28 takes precedence) **[8]**

3/26 . . specially adapted for working on roofs **[8]**

3/28 . Mobile scaffolds; Scaffolds with mobile platforms **[8]**

3/30 . . suspended by flexible supporting elements, e.g. cables **[8]**

3/32 . . . Hoisting devices; Safety devices **[8]**

3/34 . . characterised by supporting structures provided on the roofs **[8]**

5/00 Component parts or accessories for scaffolds (connections E04G 7/00) **[1,8]**

5/02 . Scaffold feet, e.g. with arrangements for adjustment

5/04 . Means for fastening, supporting, or bracing scaffolds on or against building constructions (fastenings in general F16B)

5/06 . Consoles; Brackets

5/08 . Scaffold boards or planks

5/10 . Steps or ladders specially adapted for scaffolds **[8]**

5/12 . Canopies **[8]**

5/14 . Railings **[8]**

5/16 . Struts or stiffening rods, e.g. diagonal rods **[8]**

7/00 **Connections between parts of the scaffold** (for building structures in general E04B 1/38; connections in general F16B)
7/02 . with separate coupling elements
7/04 . . Flexible elements, with or without brackets, e.g. ropes, cables, chains (in general F16G)
7/06 . . Stiff scaffolding clamps for connecting scaffold members of common shape
7/08 . . . Clamps for parallely-arranged members
7/10 . . . . Self-tightening clamps, e.g. stirrups
7/12 . . . Clamps or clips for crossing members (E04G 7/22 takes precedence)
7/14 . . . . for clamping the members independently
7/16 . . . . . of which the clamping parts for the different members are rotatable with respect to one another
7/18 . . . . for clamping the members against one another or against a separate cushioning piece between them
7/20 . . . for ends of members only, e.g. for connecting members in end-to-end relation
7/22 . . . for scaffold members in end-to-side relation
7/24 . . . Couplings involving arrangements covered by more than one of the groups E04G 7/08, E04G 7/12, E04G 7/20, E04G 7/22
7/26 . . for use with specially-shaped scaffold members
7/28 . . Clips or connections for securing boards (brackets E04G 5/06)
7/30 . Scaffolding bars or members with non-detachably fixed coupling elements
7/32 . . with coupling elements using wedges **[8]**
7/34 . . with coupling elements using positive engagement, e.g. hooks or pins **[8]**

Falsework, forms or shutterings for shaping of building parts in situ [5]

9/00 **Forming or shuttering elements for general use**
9/02 . Forming boards or similar elements (E04G 9/08, E04G 9/10 take precedence)
9/04 . . the form surface being of wood **[2]**
9/05 . . the form surface being of plastics **[2]**
9/06 . . the form surface being of metal **[2]**
9/08 . Forming boards or similar elements, which are collapsible, foldable, or able to be rolled up
9/10 . with additional peculiarities such as surface shaping, insulating or heating, permeability to water or air

11/00 **Forms, shutterings, or falsework for making walls, floors, ceilings, or roofs**
11/02 . for rooms as a whole, whole storeys, or whole buildings
11/04 . for structures of spherical, spheroid or similar shape, or for cupola structures of circular or polygonal horizontal or vertical section; Inflatable forms (connection of valves to inflatable elastic bodies B60C 29/00)
11/06 . for walls, e.g. curved (E04G 11/04 takes precedence)
11/08 . . Forms which are completely dismantled after setting of the concrete and re-built for the next pouring (connecting or supporting means for forms E04G 17/00)
11/10 . . . of elements without beams (E04G 11/18 takes precedence)
11/12 . . . of elements and beams (E04G 11/18 takes precedence)
11/14 . . . . with beams arranged in alignment with, and between the, elements
11/16 . . . . with beams placed within the wall
11/18 . . . for double walls
11/20 . . Movable forms; Movable forms for moulding cylindrical, conical, or hyperbolical structures; Templates serving as forms for positioning blocks or the like (E04G 11/04 takes precedence)
11/22 . . . Sliding forms raised continuously or step-by-step and being in contact with the poured concrete during raising; Arrangements of lifting means therefor
11/24 . . . . Construction of lifting jacks or climbing rods for sliding forms (climbing-type hoisting units in general B66F)
11/26 . . . the sheathing of which consists of ribbons, endless aprons, or the like, guided by driven rollers
11/28 . . . Climbing forms, i.e. forms which are not in contact with the poured concrete during lifting from layer to layer
11/30 . . . . which are lifted from layer to layer by turning, tilting, or similar moving upwards about a horizontal axis
11/32 . . . Tiltable forms or tilting tables for making walls as a whole or in parts in situ
11/34 . . . Horizontally-travelling moulds for making walls blockwise or sectionwise (E04G 11/26 takes precedence)
11/36 . for floors, ceilings, or roofs of plane or curved surfaces
11/38 . . for plane ceilings of concrete
11/40 . . for coffered or ribbed ceilings
11/42 . . . with beams of metal or prefabricated concrete
11/44 . . . with supporting beams for the shuttering used simultaneously as permanent reinforcement of the ribs
11/46 . . . of hat-like or trough-like shape encasing a rib or the section between two ribs or encasing one rib and its adjacent flat floor or ceiling section
11/48 . . Supporting structures for shutterings or frames for floors or roofs (struts E04G 25/00)
11/50 . . . Girders, beams, or the like as supporting members for forms (members, e.g. consoles, for attachment to the wall E04G 17/16; girders intended to form part of the construction E04C 3/02)
11/52 . . . . of several units arranged one after another
11/54 . . . . of extensible type, with or without adjustable supporting shoes, fishplates, or the like
11/56 . . . . . of telescopic type

13/00 **Falsework, forms or shutterings for particular parts of buildings, e.g. stairs, steps, cornices or balconies** (moulds for making units for prefabricated buildings or prefabricated stair units B28B 7/22)
13/02 . for columns or like pillars; Special tying or clamping means therefor
13/04 . for lintels, beams, or transoms to be encased separately; Special tying or clamping means therefor (members, e.g. consoles, for attachment to the wall E04G 17/16)
13/06 . for stairs, steps, cornices, balconies, or other parts corbelled out of the wall

15/00 **Forms or shutterings for making openings, cavities, slits, or channels** (forming part of shuttering for walls E04G 11/06)

15/02 . for windows, doors, or the like

15/04 . Cores for anchor holes or the like

15/06 . for cavities or channels in walls or floors, e.g. for making chimneys

17/00 **Connecting or other auxiliary members for forms, falsework structures, or shutterings**

17/02 . Connecting or fastening means for non-metallic forming or stiffening elements

17/04 . Connecting or fastening means for metallic forming or stiffening elements

17/06 . Tying means; Spacers

17/065 . . Tying means, the tensional elements of which are threaded to enable their fastening or tensioning **[5]**

17/07 . . Tying means, the tensional elements of which are fastened or tensioned by means of wedge-shaped members **[5]**

17/075 . . Tying means, the tensional elements of which are fastened or tensioned by other means **[5]**

17/12 . . with arms engaging the forms

17/14 . Bracing or strutting arrangements for formwalls; Devices for aligning forms (E04G 25/00 takes precedence)

17/16 . Members, e.g. consoles, for attachment to the wall to support girders, beams, or the like carrying forms or moulds for floors, lintels, or transoms

17/18 . Devices for suspending or anchoring form elements to girders placed in ceilings, e.g. hangers

19/00 **Auxiliary treatment of forms, e.g. dismantling**; **Cleaning devices** (lubricating compositions C10M)

21/00 **Preparing, conveying, or working-up building materials or building elements <u>in situ</u>; Other devices or measures for constructional work** (working stone-like materials B28D; conveying in general B65G; lifting devices B66; measuring instruments G01)

21/02 . Conveying or working-up concrete or similar masses able to be heaped or cast (working concrete in general, e.g. mixing machines, B28C; composition of concrete C04B; construction and surfacing of floorings made of similar material to roads or pavements E01C; in connection with barrages E02B 7/00; in connection with foundations E02D 15/00; in connection with finishing work E04F)

21/04 . . Devices for both conveying and distributing (concrete pumps F04)

21/06 . . Compacting concrete, e.g. by application of vacuum before hardening (for road building E01C 19/00; devices for compacting also soil E02D 3/02)

21/08 . . . Internal vibrators

21/10 . . Devices for levelling, e.g. templates or boards (smoothing tools E04F 21/16, E04F 21/24)

21/12 . Mounting of reinforcing inserts; Prestressing (shell tubes for prestressing members E04C 5/10; anchoring means E04C 5/12; connections of reinforcing elements and spacers E04C 5/16)

21/14 . Conveying or assembling building elements (roofing E04D; finishing work E04F)

21/16 . . Tools or apparatus (devices for erecting fences E04H 17/26)

21/18 . . . Adjusting tools; Templates

21/20 . . . for applying mortar

21/22 . . . for setting building elements with mortar, e.g. brick-laying machines

21/24 . Safety or protective measures preventing damage to building parts or finishing work during construction (as auxiliary structures for scaffolds E04G 5/00)

21/26 . . Strutting means for wall parts; Supports or the like, e.g. for holding in position prefabricated walls (E04G 25/00 takes precedence; on existing buildings E04G 23/04)

21/28 . . against unfavourable weather influence

21/30 . . against mechanical damage or dirt, e.g. guard covers of stairs

21/32 . Safety or protective measures for persons during the construction of buildings (related to scaffolds E04G 5/00; ropes or belts for life-saving A62B 1/16, A62B 35/00; climbing tools, e.g. climbing irons for masts, A63B 27/00)

23/00 **Working measures on existing buildings** (on foundations E02D 35/00, E02D 37/00; in connection with insulations E04B; subsequent or finishing work E04F)

<u>Note</u>

In addition to the subject matter referred out in this group, subject matter relating to working measures on existing buildings which are analogous to those used in constructing new buildings, is classified in the appropriate construction groups. **[5]**

23/02 . Repairing, e.g. filling cracks; Restoring; Altering; Enlarging

23/03 . . specially adapted for roofs, e.g. to fit out attics **[5]**

23/04 . Propping of endangered or damaged buildings or building parts, e.g. with respect to air-raid action (struts E04G 25/00)

23/06 . Separating, lifting, removing of buildings; Making a new sub-structure

23/08 . Wrecking of buildings (dismantling bridges E01D 24/00) **[1,8]**

25/00 **Shores or struts** (specially designed for use in mines E21D 15/00); **Chocks**

25/02 . non-telescopic

25/04 . telescopic

25/06 . . with parts held together by positive means

25/08 . . with parts held relatively to each other by friction or gripping

27/00 **Temporary arrangements for giving access from one level to another for men or vehicles, e.g. steps, ramps** (as parts or accessories for scaffolds E04G 5/00; gangways B63; lifts B66; landing bridges E01D 15/24; permanent stairways or ramps E04F 11/00; ladders E06C)

E04H BUILDINGS OR LIKE STRUCTURES FOR PARTICULAR PURPOSES; **SWIMMING OR SPLASH BATHS OR POOLS**; **MASTS**; **FENCING**; **TENTS OR CANOPIES, IN GENERAL** (foundations E02D) **[4]**

(1) This subclass covers
- primarily the layout of buildings as a whole;
- details which are peculiar to types of buildings, or buildings for special purposes, specified in the groups;
- canopies in general and canopies similar in construction to tents. **[4]**

(2) This subclass does not cover canopies having special application, which are covered by the relevant place, e.g. protecting chairs against the weather A47C 7/66, bed canopies A47C 29/00, sun shades or awnings for buildings E04F 10/00. **[4]**

(3) In this subclass, the following terms are used with the meanings indicated:
- "buildings" does not exclude engineering structures and other constructions;
- "tent" means a tent or canopy having a supporting means, e.g. frame and a flexible cover. **[4]**

Subclass index

1/00 Buildings or groups of buildings for dwelling or office purposes; **General layout, e.g. modular co-ordination, staggered storeys** (E04H 3/00 takes precedence; buildings for two or more purposes, drive-in buildings E04H 14/00; building construction in general E04B 1/00)

1/02 . Dwelling houses; Buildings for temporary habitation (small erections for limited occupation E04H 1/12)

1/04 . . Apartment houses arranged in two or more levels

1/06 . Office buildings; Banks (E04H 1/12 takes precedence; furniture or fittings for shops, storehouses, or the like A47F)

1/12 . Small buildings or other erections for limited occupation, erected in the open air or arranged in buildings, e.g. kiosks, waiting shelters for bus stops or for filling stations, roofs for railway platforms, watchmen's huts, dressing cubicles (movable screens as household equipment A47G 5/00)

1/14 . . Telephone cabinets

3/00 Buildings or groups of buildings for public or similar purposes; **Institutions, e.g. infirmaries, prisons** (portions of buildings for individual occupation, e.g. cubicles, E04H 1/00; structures covering a large free area E04B 1/342)

3/02 . Hotels; Motels; Coffee-houses; Restaurants; Shops; Department stores

3/04 . . Restaurants or shops having arrangements for self-service (paying counters A47F 9/02; furniture or installations specially adapted for supermarkets A47F 10/00; transport aspects B65G; coin-freed apparatus G07F)

3/06 . Museums; Library buildings

3/08 . Hospitals, infirmaries, or the like; Schools; Prisons

3/10 . for meetings, entertainments, or sports

3/12 . . Tribunes, grandstands or terraces for spectators (auditoriums E04H 3/30; chairs, stools, benches A47C) **[2]**

3/14 . . Gymnasiums; Other sporting buildings (tribunes E04H 3/12)

3/16 . . . for swimming (swimming or splash baths or pools E04H 4/00) **[5]**

3/22 . . Theatres; Concert halls; Studios for broadcasting, cinematography, television or similar purposes (drive-in buildings E04H 14/00; equipment for theatres or concert halls A63J) **[2]**

3/24 . . . Constructional features of stages

3/26 . . . . Revolving stages; Stages able to be lowered (devices for raising or lowering persons A63J 5/12)

3/28 . . . . Shiftable or portable platforms

3/30 . . . Constructional features of auditoriums (chairs, stools, benches A47C; building details providing acoustical effects E04B 1/99)

4/00 Swimming or splash baths or pools (wave-producers for baths A47K 3/10; separation B01D; treatment of water C02F; wave-producing pumps F04D 35/00) **[5]**

4/02 . formed in situ **[5]**

4/04 . prefabricated or composed of prefabricated elements **[5]**

4/06 . Safety devices; Coverings for baths **[5]**

4/08 . . Coverings consisting of rigid elements **[5]**

4/10 . . Coverings of flexible material **[5]**

4/12 . Devices or arrangements for circulating water **[5]**

4/14 . Parts, details or accessories not otherwise provided for **[5]**

4/16 . . specially adapted for cleaning (cleaning devices peculiar to vessels B63B 59/00) **[5]**

5/00 Buildings or groups of buildings for industrial or agricultural purposes (building construction in general E04B 1/00)

5/02 . Buildings or groups of buildings for industrial purposes, e.g. for power-plants, factories (buildings forming part of cooling plants E04H 5/10; building structures for parking vehicles E04H 6/00)

5/04 . . Transformer houses; Substations or switchgear houses **[5]**

5/06 . . Pits or building structures for inspection or services (manhole shafts or other inspection chambers in general E02D 29/12)

5/08 . Buildings or groups of buildings for agricultural purposes (silos E04H 7/22; manure storage places A01C 3/02; greenhouses A01G 9/14)

5/10 . Buildings forming part of cooling plants

5/12 . . Cooling towers (towers in general E04H 12/00; cooling equipment F28)

6/00 Buildings for parking cars, rolling-stock, aircraft, vessels, or like vehicles, e.g. garages (tents for use as garages E04H 15/00; bicycle stands B62H; storing of vessels on land B63C 15/00; construction of ground-supported surfaces E01C; marking of parking areas on the ground E01F 9/00; building construction in general E04B 1/00)

6/02 . Small garages, e.g. for one or two cars (attached to, or supported by, the vehicle B62D; prefabricated and with undivided interior E04B 1/343)

6/04 . . wheeled, hinged, foldable, telescopic, swinging, or otherwise movable (transportable or collapsible buildings in general E04B 1/343)

6/06 . . with means for shifting or lifting vehicles

6/08 . Garages for many vehicles

6/10 . . without mechanical means for shifting or lifting vehicles, e.g. with helically-arranged fixed ramps, with movable ramps

6/12 . . with mechanical means for shifting or lifting vehicles

6/14 . . . with endless conveyer chains having load-carrying parts moving vertically, e.g. paternoster lifts

6/16 . . . Garages shaped as a wheel or drum rotatable about a horizontal axis

6/18 . . . with means for transport in vertical direction only or independently in vertical and horizontal directions (E04H 6/14 takes precedence)

6/20 . . . . characterised by use of conveyer chains or rotatable rollers for horizontal transport

6/22 . . . . characterised by use of movable platforms for horizontal transport

6/24 . . . . characterised by use of dollies for horizontal transport

6/26 . . . . characterised by use of tiltable floors or floor sections; characterised by use of movable ramps

6/28 . . . . characterised by use of turntables or rotary rings for horizontal transport

6/30 . . . with means for transport in horizontal direction only

6/32 . . . . characterised by use of conveyer chains or rotatable rollers

6/34 . . . . characterised by use of movable platforms

6/36 . . . . characterised by use of freely-movable dollies

6/38 . . . . characterised by use of tiltable floors or floor sections

6/40 . . . . characterised by use of turntables or rotary rings

6/42 . Devices or arrangements peculiar to garages, not covered elsewhere, e.g. securing devices, safety devices

6/44 . for storing aircraft (structures covering a large free area E04B 1/342)

7/00 Construction or assembling of bulk storage containers employing civil engineering techniques <u>in situ</u> or off the site (tower aspects E04H 12/00; storage aspects, e.g. floating roofs, sealing means, filling or discharging means B65D, B65G, F17B, F17C; foundations E02D 27/38) **[2]**

7/02 . Containers for fluids or gases; Supports therefor (arrangements or adaptations of tanks for water supply E03B 11/00) **[2]**

7/04 . . mainly of metal

7/06 . . . with vertical axis

7/14 . . . ball-shaped

7/16 . . . with horizontal axis

7/18 . . mainly of concrete, e.g. reinforced concrete, or other stone-like material

7/20 . . . Prestressed constructions

7/22 . Containers for fluent solids, e.g. silos, bunkers; Supports therefor **[2]**

7/24 . . Constructions, with or without perforated walls, depending on the use of specified materials

7/26 . . . mainly of concrete, e.g. reinforced concrete, or other stone-like material

7/28 . . . . composed of special building elements

7/30 . . . mainly of metal

7/32 . . . mainly of wood

9/00 Buildings, groups of buildings, or shelters, adapted to withstand or provide protection against, abnormal external influences, e.g. war-like action, earthquake, extreme climate (floating buildings B63B; foundation aspects E02D; building constructions in general E04B; bearings or like supports allowing movement E04B 1/36; special details regarding insulation or other protection E04B 1/62; supporting structures for endangered or damaged existing buildings or parts thereof E04G 23/04; doors, windows E06B 5/00; air-conditioning, ventilation F24F; camouflage F41H 3/00; cells or rooms shielded against dangerous radiation G21F 7/00)

9/02 . withstanding earthquake or sinking of ground (foundations E02D 27/34)

9/04 . against air-raid or other war-like actions (respiratory apparatus A62B)

9/06 . . Structures arranged in, or forming part of, buildings

9/08 . . . Structures arranged underneath buildings, e.g. air-raid shelters

9/10 . . Independent shelters; Arrangement of independent splinter-proof walls

9/12 . . . entirely underneath the level of the ground, e.g. air-raid galleries (tunnels, galleries E21D)

9/14 . against other dangerous influences, e.g. tornadoes, floods

9/16 . against adverse conditions, e.g. extreme climate, pests

12/00 Towers; **Masts, poles**; **Chimney stacks**; **Water-towers**; **Methods of erecting such structures** (cooling towers E04H 5/12; supports for road signs E01F 9/011; foundation piles E02D 5/22; foundations for masts, poles, or chimneys E02D 27/42; structural elongated members in general E04C 3/00; fixed climbing irons E06C 9/04; derricks for oil drilling E21B 15/00) **[6]**

12/02 . Structures made of specified materials (E04H 12/16, E04H 12/18 take precedence)

12/04 . . of wood

12/06 . . . Truss-like structures

12/08 . . of metal

12/10 . . . Truss-like structures
12/12 . . of concrete or other stone-like material, with or without internal or external reinforcement, e.g. with metal coverings, with permanent form elements
12/14 . . . Truss-like structures
12/16 . Prestressed structures
12/18 . movable or with movable sections, e.g. rotatable, telescopic (rotary buildings E04B 1/346)
12/20 . Side-supporting means therefor, e.g. using guy ropes, struts (ground anchors E02D 5/80; fastening means for cables or ropes F16G 11/00)
12/22 . Sockets or holders for poles or posts
12/24 . Cross-arms
12/26 . Winding towers for mines (elevators B66B)
12/28 . Chimney stacks, e.g. free-standing, or similar ducts (foundations E02D 27/42; chimneys as part of buildings E04F 17/02; connections between furnace and smoke stack, chimney equipment F23J)
12/30 . Water-towers (tanks B65D 88/00; use of high-level tanks E03B 11/12)
12/32 . Flagpoles (flags, banners, mountings therefor G09F 17/00)
12/34 . Arrangements for erecting or lowering towers, masts, poles, chimney stacks, or the like **[6]**

13/00 **Monuments**; **Tombs**; **Burial vaults**; **Columbaria** (sculpture or other artistic features B44)

14/00 **Buildings for combinations of different purposes not covered by any single one of main groups E04H 1/00 to E04H 13/00 of this subclass, e.g. for double purpose** (E04H 3/02, E04H 9/06 take precedence); **Buildings of the drive-in type**

15/00 **Tents or canopies, in general [4]**
15/02 . Tents combined or specially associated with other devices **[4]**
15/04 . . suspended type, e.g. from trees, from cantilever supports (supporting frames E04H 15/34) **[4]**
15/06 . . Tents at least partially supported by vehicles **[4]**
15/08 . . . Trailer awnings or the like **[4]**
15/10 . . Heating, lighting, or ventilating (for heating, lighting, or ventilating devices per se, see the relevant classes, e.g. F21, F24) **[4]**
15/12 . . . Heating **[4]**
15/14 . . . Ventilating **[4]**
15/16 . . . . of tent roofs **[4]**
15/18 . Tents having plural sectional covers, e.g. pavilions, vaulted tents, marquees, circus tents (inflatable E04H 15/20); Plural tents, e.g. modular **[4]**
15/20 . inflatable, e.g. shaped, strengthened, or supported by fluid pressure (connection of valves to inflatable elastic bodies B60C 29/00; inflatable forms for making walls, floors, ceilings or roofs in situ E04G 11/04) **[4]**
15/22 . . supported by air pressure inside the tent **[4]**
15/24 . cone shaped, e.g. teepees **[4]**
15/26 . Center-pole supported tents (umbrella type E04H 15/28) **[4]**
15/28 . Umbrella type tents **[4]**
15/30 . convertible, e.g. from one type tent to another type tent, from tent to canopy, from tent cover into diverse article (sacks or packs convertible into tents A45F 4/04; coats or capes convertible into tent coverings A45F 4/14) **[4]**
15/32 . Parts, components, construction details, accessories, interior equipment, specially adapted for tents, e.g. guy-line equipment, skirts, thresholds **[4]**
15/34 . . Supporting means, e.g. frames **[4]**
15/36 . . . arch-shaped type (E04H 15/42 takes precedence) **[4]**
15/38 . . . . expansible, e.g. extensible **[4]**
15/40 . . . . flexible **[4]**
15/42 . . . external type, e.g. frame outside of cover **[4]**
15/44 . . . collapsible, e.g. breakdown type (E04H 15/42 takes precedence; building structures having collapsible parts in general E04B 1/343) **[4]**
15/46 . . . . telescoping and foldable **[4]**
15/48 . . . . foldable, i.e. having pivoted or hinged means (E04H 15/46 takes precedence) **[4]**
15/50 . . . . . lazy-tongs type **[4]**
15/52 . . . . . parallelogram type **[4]**
15/54 . . Covers of tents or canopies (ventilated tent roofs E04H 15/16) **[4]**
15/56 . . Floors **[4]**
15/58 . . Closures; Awnings; Sunshades **[4]**
15/60 . . Poles **[4]**
15/62 . . Pegs, stakes or the like **[4]**
15/64 . . Tent or canopy cover fastenings **[4]**

17/00 **Fencing, e.g. fences, enclosures, corrals** (features peculiar to electrified fences A01K 3/00, H05C; means for allowing passage through fences, barriers, or the like E06B 11/00)
17/02 . Wire fencing, e.g. made of wire mesh (E04H 17/14 takes precedence; working or processing of wire B21F, e.g. making wire nets B21F 27/00)
17/04 . . characterised by the use of specially adapted wire, e.g. barbed wire **[1,7]**
17/06 . . Parts for wire fences
17/08 . . . Anchoring means therefor, e.g. specially-shaped parts entering the ground; Struts or the like (for towers or masts E04H 12/20; sockets for posts E04H 12/22)
17/10 . . characterised by the way of connecting wire to the posts; Droppers
17/12 . . . the wire being placed in slots, grooves, or the like
17/14 . Fences constructed of rigid elements, e.g. with additional wire fillings or with posts
17/16 . . using prefabricated panel-like elements, e.g. wired frames
17/18 . . . Corrals, i.e. easily transportable or demountable enclosures
17/20 . . Posts therefor
17/22 . . . Anchoring means therefor, e.g. specially-shaped parts entering the ground; Struts or the like (for towers or masts E04H 12/20; sockets for posts E04H 12/22)
17/24 . . Connections for attaching additional wire to frames, posts or railings
17/26 . Devices for erecting or removing fences

E05 LOCKS; KEYS; WINDOW OR DOOR FITTINGS; SAFES

Note

In this class, the following terms are used with the meanings indicated:
- "wing" is a general term for swingable, slidable, or otherwise movable doors or windows. This term also includes other movable structures such as drawers, lids of chests, car boots, or car bonnets, to which the operating, mounting, latching, or locking means covered by this class may be applied;
- "frame" means any member to which a wing may be held by a fastening device. It does not include a framework forming part of the wing, but it may be another wing;
- "lock" means primarily a device for releasing or securing any member, which requires a key or a permutation mechanism for release. In groups E05B 1/00 to E05B 9/00, E05B 13/00 to E05B 17/00, E05B 39/00 to E05B 47/00, E05B 51/00, E05B 53/00, E05B 63/00 and E05B 65/00 however, the term "lock" may include other fastening devices;
- "bolt" means a sliding, pivoted, or otherwise movable member such as is normally carried by a door to hold it shut by engagement with a keeper on the frame. It may be operated by hand directly or through mechanism or by a key; it may be a latch (see below);
- "latch" means a bolt arranged to be moved to the releasing position against the force of a spring, or some other returning force, when a wing meets the frame on closing, so that it does not have to be operated by hand to secure the wing, but only to open it;
- "hasp" means a member hinged to the frame or wing so that it can be moved towards the face of the wing or frame and secured thereto, e.g. by a turn-button, by a padlock and staple.

E05B LOCKS; ACCESSORIES THEREFOR; HANDCUFFS

Subclass index

Details or accessories of locks or the like; keys

1/00 **Knobs or handles for wings** (for furniture A47B 95/02); **Knobs, handles, or press buttons for locks or latches on wings** (E05B 5/00, E05B 7/00 take precedence)
- 1/02 . of solid material
- 1/04 . with inner rigid member and outer cover or covers
- 1/06 . of sheet material

3/00 **Fastening handles to lock or latch parts**
- 3/02 . Fastening handles to the spindle by pinning or riveting
- 3/04 . Fastening the handle shank to the spindle by screws, springs, or snap bolts
- 3/06 . by means arranged in or on the rose
- 3/08 . Fastening the spindle to the follower
- 3/10 . by a bipartite or cleft spindle in the follower or in the handle shank

5/00 **Handles completely let into the surface of the wing**
- 5/02 . able to be turned outwards before operation
- 5/04 . able to be shifted parallel to the wing after being pulled out

7/00 **Handles pivoted about an axis parallel to the wing** (E05B 5/00 takes precedence)

9/00 **Lock or latch-mechanism casings mountable on or in wings** (padlock casings E05B 67/02)
- 9/02 . of latch-bolt locks
- 9/04 . of cylinder locks
- 9/06 . Fastening together the parts of casings
- 9/08 . Fastening the casings of latch-bolt locks or cylinder locks to the wing
- 9/10 . Coupling devices for the two halves of double cylinder locks

11/00 **Devices preventing keys from being removed from the lock**
- 11/02 . before the wing is locked
- 11/04 . before the wing is closed
- 11/06 . for catching skeleton or incorrect keys

13/00 **Devices preventing the key or the handle or both from being used**
- 13/02 . shaped as sectors of escutcheons, arranged in the keyhole
- 13/04 . shaped as fork-like implements grasping and fixing the key
- 13/06 . shaped as bolt detents arranged in the path of motion of the key bit
- 13/08 . formed by longitudinal bolt or cross-bar connecting the handle with a stationary lock part or fitting
- 13/10 . formed by a lock arranged in the handle

15/00 **Other details of locks**; **Parts for engagement by bolts of fastening devices** (fastening devices for wings other than locks E05C)
15/02 . Striking-plates; Keepers; Bolt staples; Escutcheons
15/04 . Spring arrangements in locks
15/06 . Lock wards
15/08 . Key guides; Key pins
15/10 . Bolts of locks or night latches
15/12 . Pins or detents for locking bolts
15/14 . Tumblers
15/16 . Use of special materials for parts of locks (for handles E05B 1/00)

17/00 **Accessories in connection with locks** (locks with indicating or timing devices E05B 39/00 to E05B 45/00; buffers E05F 5/00; means for preventing rattling of wings E05F 7/04; means for taking the weight of the wing E05F 7/06) **[4]**
17/02 . Coupling devices for double doors, i.e. two doors one behind the other and hinged on the same side
17/04 . Devices for coupling the turning cylinder of a single or double cylinder lock with the bolt-operating member
17/06 . Templates for marking the position of apertures in fittings of wings
17/08 . Lubricating devices
17/10 . Illuminating devices on, or for, locks or keys
17/12 . Devices for removing keys stuck in the lock
17/14 . Closures or guards for keyholes
17/16 . . shaped as pins or key bits
17/18 . . shaped as lids or slides
17/20 . Means independent of the locking mechanism for preventing unauthorised opening, e.g. for securing the bolt in the fastening position (pins or detents E05B 15/12) **[4]**
17/22 . Means for operating or controlling lock or fastening device accessories, i.e. other than the fastening members, e.g. switches, indicators **[4]**

19/00 **Keys**; **Accessories therefor** (making keys, see the relevant places, e.g. B21D 53/42; milling grooves in keys B23C 3/35)
19/02 . Construction of the shank of the key
19/04 . Construction of the bow of the key; Construction of flat keys
19/06 . Key bits; Flat key bits
19/08 . . Special forms of key bits, e.g. double key bits, folding key bits
19/10 . Fastening the key bit and bow on the shank of the key
19/12 . Keys with several bits moving relatively to each other when in use
19/14 . Double keys
19/16 . Extremely thin keys acting without rotation
19/18 . Keys adjustable before use
19/20 . Skeleton keys; Devices for picking locks; Other devices for similar purposes
19/22 . Keys with devices for indicating whether the last operation was locking or unlocking
19/24 . Key-distinguishing marks
19/26 . Use of special materials for keys

Locks with rotary keys moving lamelliform tumblers perpendicular to the key

21/00 **Locks with rotary keys moving lamelliform tumblers perpendicular to the key, in which the tumblers do not follow the movement of the bolt**
21/02 . with identical tumblers
21/04 . with stop pins on the tumbler (E05B 21/02 takes precedence)
21/06 . Cylinder locks, e.g. protector locks

23/00 **Locks with rotary keys moving lamelliform tumblers perpendicular to the key, in which the tumblers follow the movement of the bolt**

25/00 **Locks with rotary keys moving lamelliform tumblers perpendicular to the key, characterised by the tumblers**
25/02 . with tumblers in the cut-out of which the key bit is moved
25/04 . with tumblers in which the stop pin is guided from one locked position to the other in an inclined direction
25/06 . with tumblers in which the stop pin is guided from one locked position to the other along a curved path
25/08 . with tumblers with movable pawls engaging the key
25/10 . with tumblers formed to engage one another to determine their unlocked position

Locks of which the tumblers are set by pushing the key in

27/00 **Cylinder locks with tumbler pins or balls that are set by pushing the key in**
27/02 . operated by the edge of the key
27/04 . . arranged radially in one row
27/06 . . arranged radially in more than one row
27/08 . . arranged axially
27/10 . operated by other surfaces of the key, e.g. openings receiving projections on the tumblers

29/00 **Cylinder locks with plate tumblers that are set by pushing the key in**
29/02 . operated by the edge of the key
29/04 . . arranged singly
29/06 . . arranged in pairs
29/08 . operated by other surfaces of the key
29/10 . . operated by a curved groove or slot
29/12 . . operated by a curved rib
29/14 . with both axially and radially arranged plate tumblers

31/00 **Cylinder locks with both tumbler pins or balls and plate tumblers that are set by pushing the key in**

33/00 **Cylinder locks with tumblers that are set by pushing the key in, in which the bolt is moved by means other than the key**

35/00 **Locks for use with special keys or a plurality of keys**
35/02 . which can be shifted laterally
35/04 . for pull keys
35/06 . for screw keys
35/08 . operable by a plurality of keys
35/10 . . with master and pass keys
35/12 . . requiring the use of two keys, e.g. safe-deposit locks
35/14 . with keys of which different parts operate separate mechanisms

37/00 **Permutation locks** (electric permutation locks E05B 49/00; for bicycles E05B 71/02); **Puzzle locks**
37/02 . with tumbler discs or rings arranged on a single axis, each disc being adjustable independently of the others
37/04 . with tumbler discs on a single axis, all the discs being adjustable by rotating a shiftable knob
37/06 . . in padlocks
37/08 . with tumbler discs on a single axis, all the discs being adjustable by a rotary knob which is not shifted
37/10 . . in padlocks
37/12 . with tumbler discs on several axes
37/14 . . in padlocks
37/16 . with two or more push or pull knobs, slides, or the like
37/18 . . in padlocks
37/20 . Puzzle locks
37/22 . . in padlocks

Locks with indicating or timing devices

39/00 **Locks giving indication of unauthorised unlocking**
39/02 . with destructible seal closures or paper closures (seals per se G09F 3/00) **[4]**
39/04 . with counting or registering devices

41/00 **Locks with visible indication as to whether the lock is locked or unlocked**

43/00 **Time locks** (clocks or clock mechanisms with attached or built-in means operating any device at preselected times or after a predetermined time interval G04C 23/00)

45/00 **Alarm locks** (alarm devices actuated by tampering with fastenings in general G08B)
45/02 . with mechanically-operated bells
45/04 . with detonating alarm devices
45/06 . Electric alarm locks
45/08 . . with contact making inside the lock or in the striking plate
45/10 . . . by introducing the key
45/12 . . . by movement of the bolt
45/14 . . with contact making outside the lock

Operation or control of locks by non-mechanical means, e.g. from a distance

47/00 **Operating or controlling locks or other fastening devices by electric or magnetic means** (electric permutation locks E05B 49/00; holding in open position or limiting movement of wings by magnetic or electromagnetic attraction E05C 17/56; key switches H01H 27/00) **[2]**
47/02 . Adaptation of locks, latches, or parts thereof, for movement of the bolt by electromagnetic means
47/04 . . for unlocking only
47/06 . Controlling mechanically-operated bolts by electromagnetically-operated detents
47/08 . . the bolt being withdrawn by a spring which is stressed by closing the wing

49/00 **Electric permutation locks**; **Circuits therefor**
49/02 . with electrical arrangements inside the lock
49/04 . with electrical arrangements outside the lock

51/00 **Operating or controlling locks or other fastening devices by other non-mechanical means**
51/02 . by pneumatic or hydraulic means

53/00 **Operation or control of locks by mechanical transmissions, e.g. from a distance** (for passenger doors E05B 65/20)

Locks with provision for latching

55/00 **Locks in which a sliding latch is used also as a locking bolt**
55/02 . the bolt being secured by the tumbler
55/04 . the bolt being secured by the cross-bar or the turnbuckle and the handle being locked
55/06 . the handle being disconnected
55/08 . . the bolt being secured by transverse bolts
55/10 . . without securing the bolt
55/12 . the bolt being secured by the operation of a hidden parallel member
55/14 . the bolt being secured by the operation of a wing handle, or by means in the wing handle or knob
55/16 . . merely by normal use of the handle on one side of the wing

57/00 **Locks in which a pivoted latch is used also as locking means**

59/00 **Locks with latches separate from the lock-bolts, or with a plurality of latches or lock-bolts**
59/02 . with arrangements for securing the latch while shooting the lock-bolt
59/04 . Locks in which the latch is moved by a lock-bolt, or the lock-bolt by a latch, or one latch by another, or the like
59/06 . with a lock-bolt slidable in the latch

61/00 **Other locks with provision for latching**

Locks with special structural characteristics or for special use

63/00 **Locks with special structural characteristics**
63/02 . without springs
63/04 . for alternative use on the right-hand or left-hand side of wings
63/06 . with lengthwise-adjustable bolts
63/08 . Mortise locks
63/10 . . requiring only two cylindrical holes in the wing
63/12 . with means carried by the bolt for interlocking with the keeper (for passenger doors E05B 65/28)
63/14 . Arrangement of several locks or locks with several bolts, e.g. arranged one behind the other (locks for keys with several bits E05B 35/14; with provision for latching E05B 59/00, E05B 61/00; arrangements of simultaneously-actuated bolts or other securing devices at well-separated positions on the same wing E05C 9/00) **[4]**
63/16 . with the handles on opposite sides moving independently (the latch being secured by the operation of a wing handle E05B 55/14)
63/18 . with arrangements independent of the locking mechanism for retaining the bolt in the retracted position
63/20 . . released automatically when the wing is closed

63/22 . operated by a pulling or pushing action perpendicular to the front plate (E05B 35/04 takes precedence)

63/24 . Arrangements in which the fastening members which engage one another are mounted respectively on the wing and the frame and are both movable, e.g. for release by moving either of them (hasp locks E05B 65/48; hasp fastenings E05C 19/08) **[4]**

65/00 Locks for special use

65/02 . for thin, hollow, or thin-metal wings

65/04 . for wings, one behind the other, hinged on the same side (fastening devices specially adapted for two wings which lie one behind the other when closed E05C 7/02) **[4]**

65/06 . for swing doors

65/08 . for sliding wings

65/10 . for panic or emergency doors

65/12 . for vehicles (E05B 71/00 takes precedence; locking arrangements for non-fixed vehicle roofs B60J 7/185) **[2]**

65/14 . . for railway freight-cars or the like; for lorries (E05B 65/20 takes precedence)

65/16 . . . for back doors of vans

65/18 . . . with provision for sealing

65/19 . . for car-boot lids; for car bonnets

65/20 . . for passenger or like doors

65/22 . . . with rectilinearly-moving bolt

65/24 . . . . locked by a special movement of the door handle

65/26 . . . . with the outside door handle drawn into a recess when the door is locked

65/28 . . . . with means carried by the bolt for interlocking with the keeper

65/30 . . . . with two or more bolts moved simultaneously

65/32 . . . with the bolt turning about an axis

65/34 . . . . in which the member engaging the keeper is shaped as a lockable toothed wheel or the like

65/36 . . . Locking several doors simultaneously

65/38 . . . . by pneumatic or hydraulic means

65/40 . . . Locking one door by shutting another (by non-mechanical means E05B 47/00, E05B 51/00; operation of locks by mechanical transmissions E05B 53/00; fastenings, other than locks, for double doors E05C 7/06)

65/42 . . . Securing the latch or bolt by movement of the vehicle

65/44 . for furniture or drawers

65/46 . . Special locks for drawers, e.g. for a plurality of drawers **[4]**

65/48 . Hasp locks (hasp fastenings other than locks E05C 19/08)

65/50 . . for briefcases

65/52 . Other locks for chests, boxes, trunks, baskets, travelling bags, or the like (closures for bags or trunks A45C 13/06, A45C 13/10, A45C 13/16)

67/00 Padlocks (permutation locks E05B 37/00); **Details thereof**

67/02 . Cases

67/04 . . Armoured cases

67/06 . Shackles; Arrangement of the shackle

67/08 . . Padlocks with shackles hinged on the case

67/10 . . . with devices for securing the free end of the shackle

67/12 . . . . with built-in cylinder locks

67/14 . . . with devices for securing the hinged end of the shackle

67/16 . . . . with built-in cylinder locks

67/18 . . . with devices for securing both ends of the shackle

67/20 . . . . with built-in cylinder locks

67/22 . . Padlocks with sliding shackles, with or without rotary or pivotal movement

67/24 . . . with built-in cylinder locks

67/26 . . . with screw action, with or without the shackle being moved by turning the key

67/28 . . Padlocks with shackles forming a circle

67/30 . . . with built-in cylinder locks

67/32 . . Padlocks with pincer-like shackles

67/34 . . . with built-in cylinder locks

67/36 . Padlocks with closing means other than shackles

67/38 . Auxiliary or protective devices

Locking devices for clothing, sticks, umbrellas, or cycles

69/00 Devices for locking clothing; **Lockable clothing holders or hangers** (dress or hat holders in general A47G 25/00)

69/02 . Lockable clothing hooks (coin-controlled locking hooks G07F)

71/00 Locks specially adapted for bicycles, other than padlocks (locks integral with cycles B62H 5/00)

71/02 . with permutation locking devices

73/00 Devices for locking portable objects against unauthorised removal; **Locking devices not provided for in other groups of this subclass**

73/02 . for walking-sticks or umbrellas (stick or umbrella holders in general A47G 25/12)

75/00 Handcuffs

E05C BOLTS OR FASTENING DEVICES FOR WINGS, SPECIALLY FOR DOORS OR WINDOWS (latching means for sideboard or tailgate structures for vehicles B62D 33/037; fastening devices for constructional or engineering elements E04, F16B; locks, fastening devices structurally or operatively combined or having significant cooperation with locks E05B; means for operating or controlling wing fasteners in conjunction with mechanisms for moving the wing E05F)

(1) In this subclass, only the movement essential for securing the wing is considered, e.g. a sliding bolt which is rotated on its axis to prevent its withdrawal is classified as having only a sliding movement.

(2) Attention is drawn to the definitions following the title of class E05.

Subclass index

Bolts, latches or equivalent wing-fastening devices, characterised by special way of movement, e.g. moving rectilinearly, pivotally or rotatively

1/00 **Fastening devices with bolts moving rectilinearly** (devices released automatically by pull or pressure on the wing E05C 19/02)

1/02 . without latching action

1/04 . . with operating handle or equivalent member rigid with the bolt

1/06 . . with operating handle or equivalent member moving otherwise than rigidly with the bolt

1/08 . with latching action

1/10 . . with operating handle or equivalent member rigid with the latch

1/12 . . with operating handle or equivalent member moving otherwise than rigidly with the latch

1/14 . . . the handle or member moving essentially towards, or away from, the plane of the wing or frame

1/16 . . . the handle or member moving essentially in a plane substantially parallel to the wing

3/00 **Fastening devices with bolts moving pivotally or rotatively** (devices released automatically by pull or pressure on the wing E05C 19/02)

3/02 . without latching action

3/04 . . with operating handle or equivalent member rigid with the bolt

3/06 . . with operating handle or equivalent member moving otherwise than rigidly with the bolt

3/08 . . . the handle or member moving essentially towards, or away from, the plane of the wing or frame

3/10 . . . the handle or member moving essentially in a plane substantially parallel to the wing

3/12 . with latching action (devices in which the securing part is formed or merely carried by a spring and moves only by distortion of the spring, e.g. snaps, E05C 19/06)

3/14 . . with operating handle or equivalent member rigid with the latch

3/16 . . with operating handle or equivalent member moving otherwise than rigidly with the latch

3/22 . . . the bolt being spring-controlled

3/24 . . . . in the form of a bifurcated member

3/26 . . . . . engaging a stud-like keeper

3/28 . . . . . with simultaneously-operating double bolts

3/30 . . . . in the form of a hook

3/32 . . . . . engaging a hooked keeper (E05C 3/34 takes precedence)

3/34 . . . . . with simultaneously-operating double bolts

3/36 . . . . in the form of a rotary gear

3/38 . . . . with bolts engaging a hooked keeper (E05C 3/24, E05C 3/30, E05C 3/36 take precedence)

3/40 . . . . with bolts engaging a stud-like keeper (E05C 3/24, E05C 3/30, E05C 3/36 take precedence)

5/00 **Fastening devices with bolts moving otherwise than only rectilinearly and only pivotally or rotatively** (devices released automatically by pull or pressure on the wing E05C 19/02)

5/02 . both moving axially and turning about their axes to secure the wing

5/04 . . performing both movements simultaneously, e.g. screwing into a keeper

---

7/00 **Fastening devices specially adapted for two wings**

Note

In this group, if a fastening device merely secures one wing to another wing which is already closed it is not regarded as specially adapted for two wings.

7/02 . for wings which lie one behind the other when closed

7/04 . for wings which abut when closed

7/06 . . a fastening device for one wing being actuated or controlled by closing another wing

9/00 **Arrangement of simultaneously-actuated bolts or other securing devices at well-separated positions on the same wing** (essentially involving locking means E05B 63/14; similar constructions for engineering closures for pressure vessels, in general F16J 13/08)

9/02 . with one sliding bar for fastening when moved in one direction and unfastening when moved in opposite direction; with two sliding bars moved in the same direction when fastening or unfastening **[4]**

9/04 . with two sliding bars moved in opposite directions when fastening or unfastening

9/06 . with three or more sliding bars

9/08 . with a rotary bar for actuating the fastening means

9/10 . Actuating mechanisms for bars

9/12 . . with gears and racks

9/14 . . with pins engaging slots

9/16 . . with crank pins and connecting rods

9/18 . Details of fastening means or of fixed retaining means for the ends of bars

9/20 . Coupling means for sliding bars, rods, or cables **[4]**

9/22 . Guides for sliding bars, rods, or cables (corner guides E05C 9/24) **[4]**

9/24 . Means for transmitting movements between vertical and horizontal sliding bars, rods, or cables, e.g. corner guides (means for transmitting movements between vertical and horizontal sliding bars, rods, or cables, for moving wings into open or closed position E05F 7/08) **[4]**

17/00 **Devices for holding wings open**; **Devices for limiting opening of wings or for holding wings open by a movable member extending between frame and wing**; **Braking devices, stops or buffers, combined therewith** (combined with hinges E05D 11/00; combined with operating apparatus for wings E05F; other braking devices, stops, buffers E05F 5/00) **[4]**

17/02 . by mechanical means (E05C 17/60 takes precedence) **[4]**

17/04 . . with a movable bar or equivalent member extending between frame and wing

17/06 . . . releasable to allow further opening only when the wing is nearly closed

17/08 . . . with special means for release, e.g. automatic release by further opening

17/10 . . . incorporating a special device for securing the wing in the closed position

17/12 . . . consisting of a single rod

17/14 . . . . Hook and eye, or equivalent

17/16 . . . . pivoted only at one end and having an elongated slot

17/18 . . . . pivoted only at one end and having a row of holes, notches, or pins

17/20 . . . . sliding through a guide (E05C 17/18 takes precedence)

17/22 . . . . . with braking, clamping or securing means in the guide **[4]**

17/24 . . . . pivoted at one end, and with the other end running along a guide member

17/26 . . . . . with braking, clamping or securing means at the pivot of the rod **[4]**

17/28 . . . . . with braking, clamping or securing means at the connection to the guide member **[4]**

17/30 . . . of extensible, e.g. telescopic, construction (flexible members E05C 17/36)

17/32 . . . consisting of two or more pivoted rods

17/34 . . . . with means for holding in more than one position

17/36 . . . comprising a flexible member, e.g. chains

17/38 . . with a curved rail rigid with the frame for engagement with means on the wing, or vice versa

17/40 . . Bars or like parts connecting a right wing with a left wing which move against each other when being closed

17/42 . . connecting exterior and interior wings

17/44 . . with a device carried on the wing for frictional or like engagement with a fixed flat surface, e.g. retractable feet

17/46 . . in which the wing or a member fixed thereon is engaged by a movable fastening member in a fixed position; in which a movable fastening member mounted on the wing engages a stationary member **[4]**

17/48 . . . comprising a sliding securing member

17/50 . . . comprising a single pivoted securing member

17/52 . . . comprising a snap, catch, or the like

17/54 . . Portable devices, e.g. wedges

17/56 . by magnetic or electromagnetic attraction (operation of locks or fasteners by electric or magnetic means E05B 47/00) **[2]**

17/58 . operated or controlled from a distance

17/60 . holding sliding wings open **[4]**

17/62 . . using notches **[4]**

17/64 . . by friction **[4]**

19/00 **Other devices specially designed for securing wings** (movable draft sealings additionally used for bolting E06B 7/18) **[2]**

19/02 . Automatic catches, i.e. released by pull or pressure on the wing (E05C 19/06 takes precedence)

19/04 . . Ball or roller catches

19/06 . in which the securing part is formed or carried by a spring and moves only by distortion of the spring, e.g. snaps

19/08 . Hasps; Hasp fastenings; Spring catches therefor

19/10 . Hook fastenings; Fastenings in which a link engages a fixed hook-like member

19/12 . . pivotally mounted

19/14 . . . with toggle action

19/16 . Devices holding the wing by magnetic or electromagnetic attraction

19/18 . Portable devices specially adapted for securing wings (preventing operation of handles E05B 13/00)

21/00 **Arrangement or combinations of wing fastening, securing, or holding devices, not covered by any single one of main groups E05C 1/00 to E05C 19/00**

21/02 . for holding a wing closed only

E05D **HINGES OR OTHER SUSPENSION DEVICES FOR DOORS, WINDOWS, OR WINGS** (pivotal connections in general F16C 11/00)

Subclass index

1/00 **Pinless hinges**; **Substitutes for hinges**

1/02 . made of one piece

1/04 . with guide members shaped as circular arcs

1/06 . consisting of two easily-separable parts

3/00 **Hinges with pins**

3/02 . with one pin

3/04 . . engaging three or more parts, e.g. sleeves, movable relatively to one another for connecting two or more wings to another member

3/06 . with two or more pins (E05D 7/08 takes precedence) **[2]**

3/08 . . for swing-doors, i.e. openable by pushing from either side

3/10 . . with non-parallel pins

3/12 . . with two parallel pins and one arm (E05D 3/08 takes precedence) **[7]**
3/14 . . with four parallel pins and two arms (E05D 3/08 takes precedence) **[7]**
3/16 . . with seven parallel pins and four arms (E05D 3/08 takes precedence) **[7]**
3/18 . . with sliding pins or guides (E05D 3/08 takes precedence) **[7]**

5/00 Construction of single parts, e.g. the parts for attachment
5/02 . Parts for attachment, e.g. flaps
5/04 . . Flat flaps
5/06 . . Bent flaps
5/08 . . of cylindrical shape
5/10 . Pins, sockets or sleeves; Removable pins (E05D 15/522 takes precedence) **[2]**
5/12 . . Securing pins in sockets, movably or not
5/14 . . Construction of sockets or sleeves
5/16 . . . to be secured without special attachment parts on the socket or sleeve

7/00 Hinges or pivots of special construction (used for special suspension arrangements E05D 15/00; so as to be self-closing E05F 1/06, E05F 1/12; with means for raising wings before being turned E05F 7/02)
7/02 . for use on the right-hand as well as on the left-hand side; Convertible right-hand or left-hand hinges
7/04 . Hinges adjustable relative to the wing or the frame
7/06 . to allow tilting of the members
7/08 . for use in suspensions comprising two spigots placed at opposite edges of the wing, especially at the top and the bottom, e.g. trunnions
7/081 . . the pivot axis of the wing being situated near one edge of the wing (braking devices therefor E05D 11/08) **[2]**
7/082 . . the pivot axis of the wing being situated at a considerable distance from the edges of the wing **[2]**
7/083 . . . with a fixed pivot axis **[2]**
7/084 . . . with a movable pivot axis **[2]**
7/085 . . . . with two or more pivot axes, e.g. used at the same time **[2]**
7/086 . . . Braking devices structurally combined with hinges (braking devices for windows per se E05F 5/00) **[2]**
7/10 . to allow easy separation of the parts at the hinge axis (substitutes for hinges E05D 1/06)
7/12 . to allow easy detachment of the hinge from the wing or the frame
7/14 . Hinges for safes

9/00 Flaps or sleeves specially designed for making from particular material, e.g. hoop-iron, sheet metal, plastics

11/00 Additional features or accessories of hinges
11/02 . Lubricating arrangements
11/04 . relating to the use of free balls as bearing-surfaces (E05D 7/06 takes precedence)
11/06 . Devices for limiting the opening movement of hinges
11/08 . Friction devices between relatively-movable hinge parts (E05D 7/086 takes precedence) **[2]**
11/10 . Devices for preventing movement between relatively-movable hinge parts

13/00 Accessories for sliding or lifting wings, e.g. pulleys, safety catches (counterbalance devices E05F 1/00, E05F 3/00) **[4]**

15/00 Suspension arrangements for wings (arrangements of wings not characterised by the construction of the supporting means E06B 3/32)
15/02 . for revolving wings
15/04 . with arms fixed on the wing pivoting about an axis outside of the wing
15/06 . for wings sliding horizontally more or less in their own plane
15/08 . . consisting of two or more independent parts movable each in its own guides
15/10 . . movable out of one plane into a second parallel plane
15/12 . . consisting of parts connected at their edges
15/14 . . with movable arms situated in the plane of the wing
15/16 . for wings sliding vertically more or less in their own plane
15/18 . . consisting of two or more independent parts movable each in its own guides
15/20 . . movable out of one plane into a second parallel plane
15/22 . . allowing an additional movement
15/24 . . consisting of parts connected at their edges
15/26 . for folding wings
15/28 . supported on arms movable in horizontal plane
15/30 . . with pivoted arms and sliding guides
15/32 . . with two pairs of pivoted arms
15/34 . . . with wings opening parallel to themselves
15/36 . moving along slide-ways so arranged that one guide member of the wing moves in a direction substantially perpendicular to the movement of another guide member
15/38 . . for upwardly-moving wings, e.g. up-and-over doors
15/40 . supported on arms movable in vertical planes
15/42 . . with pivoted arms and horizontally-sliding guides
15/44 . . with pivoted arms and vertically-sliding guides
15/46 . . with two pairs of pivoted arms
15/48 . allowing alternative movements (for vertically-sliding wings E05D 15/22)
15/50 . . for opening at either of two opposite edges
15/52 . . for opening about a vertical as well as a horizontal axis
15/522 . . . with disconnecting means for the appropriate pivoting parts **[2]**
15/523 . . . . using movable rods **[2]**
15/524 . . . . . Actuating mechanisms **[2]**
15/526 . . . Safety devices **[2]**
15/54 . . for opening both inwards and outwards
15/56 . with successive different movements
15/58 . . with both swinging and sliding movements

E05F DEVICES FOR MOVING WINGS INTO OPEN OR CLOSED POSITION; CHECKS FOR WINGS; WING FITTINGS NOT OTHERWISE PROVIDED FOR, CONCERNED WITH THE FUNCTIONING OF THE WING

Note

In this subclass, the following terms are used with the meanings indicated:
– "closer" or "opener" includes devices for assisting wing-movement or for wing-counterbalancing. **[4]**

Subclass index

1/00 **Closers or openers for wings, not otherwise provided for in this subclass**
1/02 . gravity-actuated
1/04 . . for wings which lift during movement
1/06 . . . Mechanisms in the shape of hinges or pivots, operated by the weight of the wing
1/08 . spring-actuated
1/10 . . for swinging wings
1/12 . . . Mechanisms in the shape of hinges or pivots, operated by springs
1/14 . . . with double-acting springs, e.g. for closing and opening or checking and closing
1/16 . . for sliding wings **[4]**

3/00 **Closers or openers with braking devices, e.g. checks**; **Construction of pneumatic or liquid braking devices** (construction of non-pneumatic or non-liquid braking devices E05F 5/00; friction devices in hinges E05D 11/08)
3/02 . with pneumatic piston brakes (rotary type E05F 3/14)
3/04 . with liquid piston brakes (rotary type E05F 3/14)
3/06 . . in which a torsion spring rotates a member around an axis perpendicular to the axis of the piston
3/08 . . in which a torsion spring rotates a member around an axis arranged in the direction of the axis of the piston
3/10 . . with a spring, other than a torsion spring, and a piston, the axes of which are the same or lie in the same direction
3/12 . . Special devices controlling the circulation of the liquid, e.g. valve arrangement (valves per se F16K)
3/14 . with fluid brakes of the rotary type
3/16 . with friction brakes
3/18 . with counteracting springs (double-acting springs E05F 1/14)
3/20 . in hinges
3/22 . Additional arrangements for closers, e.g. for holding the wing in opened or other position

5/00 **Braking devices, e.g. checks**; **Stops**; **Buffers** (construction of pneumatic or liquid braking devices E05F 3/00; combined with devices for holding wings open E05C 17/00; devices for limiting opening of wings or for holding wings open by a movable member extending between frame and wing E05C 17/04) **[4]**
5/02 . specially for preventing the slamming of wings
5/04 . . hand-operated; operated by centrifugal action
5/06 . Buffers (E05F 5/02 takes precedence)
5/08 . . with springs
5/10 . . with piston brakes
5/12 . specially for preventing the closing of a wing before another wing has been closed

7/00 **Accessories for wings not provided for in other groups of this subclass** (specially adapted for furniture A47B 95/00; door-lifters B66F, E04F 21/00; knobs or handles E05B) **[2]**
7/02 . for raising wings before being turned
7/04 . Arrangements affording protection against rattling (with buffering action E05F 5/00)
7/06 . Devices for taking the weight of the wing, arranged away from the hinge axis
7/08 . Means for transmitting movements between vertical and horizontal sliding bars, rods, or cables (means for transmitting movements between vertical and horizontal sliding bars, rods, or cables, for the fastening of wings E05C 9/24)

Operating mechanisms for wings [2]

9/00 **Means for operating wings by hand rods not guided in or on the frame, including those which also operate the fastening** (bolts or fastening devices for wings E05C)

11/00 **Man-operated mechanisms for operating wings, including those which also operate the fastening** (connecting mechanisms for a plurality of wings E05F 17/00)
11/02 . for wings in general, e.g. fanlights (E05F 11/36 takes precedence; for windows to be lowered vertically E05F 11/38; for doors E05F 11/54)
11/04 . . with cords, chains, or cables
11/06 . . . in guide-channels
11/08 . . with longitudinally-moving bars guided, e.g. by pivoted links, in or on the frame
11/10 . . . Mechanisms by which a handle moves the bar
11/12 . . . Mechanisms by which the bar shifts the wing
11/14 . . . . directly, i.e. without links, shifting the wing, e.g. by rack-and-gear or pin-and-slot
11/16 . . . . shifting the wing by pivotally-connected members moving in a plane perpendicular to the pivot axis of the wing
11/18 . . . . . consisting of a lever, e.g. an angle lever, only
11/20 . . . . . consisting of a lever, e.g. an angle lever, and only one additional link
11/22 . . . . . consisting of a lever, e.g. an angle lever, and two or more additional links in series

11/24 . . . . shifting the wing by pivotally-connected members moving in a plane parallel to the pivot axis of the wing
11/26 . . . . . consisting of a lever, e.g. an angle lever, only
11/28 . . . . . consisting of a lever, e.g. an angle lever, and one or more additional links
11/30 . . . . . consisting of links in rhomb form
11/32 . . with rotary bars guided in the frame (E05F 11/34 takes precedence)
11/34 . . with screw mechanisms
11/36 . specially designed for passing through a wall
11/38 . for sliding windows, e.g. vehicle windows, to be opened or closed by vertical movement
11/40 . . operated by screw mechanism
11/42 . . operated by rack bars and toothed wheels
11/44 . . operated by one or more lifting arms
11/46 . . operated by lazy-tongs mechanism
11/48 . . operated by cords or chains
11/50 . . Crank gear with clutches or retaining brakes, for operating window mechanisms
11/52 . . combined with means for producing an additional movement, e.g. a horizontal or a rotary movement
11/53 . for sliding windows, e.g. vehicle windows, to be opened or closed by horizontal movement **[2]**
11/54 . for doors

13/00 **Operating mechanisms for wings, operated by the movement or weight of a person or vehicle** (through power-operated wing-operating mechanisms E05F 15/00)
13/02 . by devices, e.g. lever arms, affected by the movement of the user
13/04 . by platforms lowered by the weight of the user

15/00 **Power-operated mechanisms for wings**
15/02 . with pressure medium
15/04 . . for swinging wings
15/06 . . for horizontally-sliding wings
15/08 . . for vertically-sliding wings
15/10 . with rotary electromotors
15/12 . . for swinging wings
15/14 . . for horizontally-sliding wings
15/16 . . for vertically-sliding wings
15/18 . with other electrical means, e.g. solenoids
15/20 . controlled by automatically-acting means, e.g. by photocells, by electric waves, by thermostats, by rain, by fire

17/00 **Special devices for shifting a plurality of wings operated simultaneously** (for simultaneously moving a plurality of interconnected ventilating lamellae E06B 7/086) **[2]**

E05G **SAFES OR STRONG-ROOMS FOR VALUABLES**; **BANK PROTECTION DEVICES**; **SAFETY TRANSACTION PARTITIONS** (alarm arrangements per se G08B) **[2]**

Note

In this subclass, the following terms or expressions are used with the meanings indicated:
– "bank" is a building or portion of a building devoted to the safekeeping or exchange of valuables between the "bank" and its customers; **[2]**
– "bank protection device" is a mechanism in or on a bank for protecting the valuables or repelling attacks by stealth or force. **[2]**

1/00 **Safes or strong-rooms for valuables** (savings boxes A45C 1/12; floatable safes B63C 7/30; storage containers without attack or fire repellent features B65D; bank buildings in general, e.g. modular construction, floor plan, E04H 1/06; buildings resistant to earthquake or war action E04H 9/00)
1/02 . Details (safe hinges E05D 7/14)
1/024 . . Wall or panel structure **[2]**
1/026 . . Closures (protective doors, windows, or like closures against air-raid or other war-like action E06B 5/10; shutters, movable grilles, other safety closures E06B 9/02) **[2]**
1/04 . . Closure fasteners (locks E05B)
1/06 . having provision for multiple compartments **[2]**
1/08 . . secured individually **[2]**
1/10 . with alarm, signal, or indicator (burglar, theft, or intruder alarm per se G08B 13/00; fire or explosion alarm per se G08B 17/00) **[2]**
1/12 . with fluent-material releasing, generating, or distributing means, e.g. repellent or fire extinguishing (E05G 1/14 takes precedence; identifying, scaring or incapacitating burglars, thieves, or intruders with smoke, gas, powder, or liquid G08B 15/02) **[2,6]**
1/14 . with means for marking or destroying the valuables, e.g. in case of theft **[6]**

5/00 **Bank protection devices** (E05G 1/12, E05G 7/00 take precedence; closed-circuit television systems H04N 7/18) **[2]**
5/02 . Trapping or confining mechanisms (thief or burglar incapacitating means in general G08B 15/00) **[2]**

7/00 **Safety transaction partitions, e.g. movable payplates** (non-safety paying counters, e.g. for supermarkets, A47F 9/02) **[2]**

E06 DOORS, WINDOWS, SHUTTERS, OR ROLLER BLINDS, IN GENERAL; LADDERS

E06B FIXED OR MOVABLE CLOSURES FOR OPENINGS IN BUILDINGS, VEHICLES, FENCES, OR LIKE ENCLOSURES, IN GENERAL, E.G. DOORS, WINDOWS, BLINDS, GATES (shades or blinds for greenhouses A01G 9/22; curtains A47H; lids for car boots or bonnets B62D 25/10; sky-lights E04B 7/18; sunshades, awnings E04F 10/00)

(1) This subclass does not cover combinations of wings or frames with operating, mounting, latching or locking means of the type found in class E05, which are covered by the relevant subclasses of class E05, except such as are covered by groups E06B 7/086, E06B 9/00, or E06B 11/02 of this subclass. **[2]**

(2) In this subclass, the following terms or expressions are used with the meanings indicated:
- "wing" means a swingable, slidable or otherwise movable member such as a door or window, for closing an opening;
- "wing frame" means the peripheral edge or edges which define the outer border of the wing.

(3) For vehicle door or window arrangements, attention is drawn to Note (1) following the title of subclass B60J. **[3]**

Subclass index

1/00 Border constructions of openings in walls, floors, or ceilings; Frames to be rigidly mounted in such openings (E06B 5/00 takes precedence; features relating also to inner frames or wing frames, features relating solely to the mounting of inner frames E06B 3/00; corner joints or edge joints E06B 3/96) **[4]**

1/02 . Base frames, i.e. template frames for openings in walls or the like, provided with means for securing a further rigidly-mounted frame; Special adaptations of frames to be fixed therein

1/04 . Frames for doors, windows, or the like to be fixed in openings (special adaptations for fixing in base frames E06B 1/02; features relating solely to the mounting of glass panes or other sheets E06B 3/00)

1/06 . . Wooden frames

1/08 . . . composed of several parts with respect to the cross-section of the frame itself

1/10 . . . . adjustable with respect to the thickness of walls

1/12 . . Metal frames

1/14 . . . of special cross-section (E06B 1/18, E06B 1/22 take precedence)

1/16 . . . . Hollow frames

1/18 . . . composed of several parts with respect to the cross-section of the frame itself

1/20 . . . . adjustable with respect to the thickness of walls

1/22 . . . with integral thresholds of special form

1/24 . . Frames of natural stone, concrete, or other stone-like material

1/26 . . Frames of plastics

1/28 . . . Hollow frames (E06B 1/30 takes precedence)

1/30 . . . composed of several parts with respect to the cross-section of the frame itself

1/32 . . Frames composed of parts made of different materials

1/34 . . Coverings, e.g. protecting against weather, for decorative purposes

1/36 . . Frames uniquely adapted for windows

1/38 . . . for shop-, show- or like large windows

1/40 . . . Frames with parts removable to admit the glass (E06B 1/38 takes precedence)

1/52 . . Frames specially adapted for doors

1/56 . Fastening frames to the border of openings

1/58 . . by filling-up the joints, e.g. by cementing

1/60 . . by mechanical means, e.g. anchoring means

1/62 . Tightening or covering joints between the border of openings and the frame (E06B 1/34 takes precedence)

1/64 . . by loosely-inserted means, e.g. strip, resilient tongue

1/66 . . by labyrinth packings

1/68 . . by profiled external parts

1/70 . Sills; Thresholds

3/00 Window sashes, door leaves, or like elements for closing openings; Layout of fixed or moving closures, e.g. windows; Features of rigidly-mounted outer frames relating to the mounting of wing frames (E06B 5/00 takes precedence; shutters or the like E06B 9/00; glass panes C03; uniting glass sheets by fusion C03B 23/203; joining glass to glass other than by fusing or to other inorganic material C03C 27/00)

3/01 . Removable or disappearing walls for hangars or other halls, e.g. for aircraft (wall constructions E04B 2/00)

3/02 . Wings made completely of glass

3/04 . Wing frames not characterised by the manner of movement (features relating to the manner of movement E06B 3/32)

3/06 . . Single frames

3/08 . . . Constructions depending on the use of specified materials (E06B 3/24 takes precedence)

3/10 . . . . of wood

3/12 . . . . of metal

3/14 . . . . . of special cross-section

3/16 . . . . . Hollow frames

3/18 . . . . of concrete or other stone-like material

3/20 . . . . of plastics

3/22 . . . . . Hollow frames

3/24 . . . specially adapted for double glazing (separable parts for securing panes E06B 3/64)

3/26 . . Compound frames, i.e. one frame within or behind another (E06B 3/263, E06B 3/28 take precedence; arrangements of movable frames E06B 3/32)

3/263 . . Frames with special provision for insulation **[6]**
3/267 . . . with insulating elements formed in situ **[6]**
3/273 . . . with prefabricated insulating elements held in position by deformation of portions of the frame members **[6]**
3/277 . . . with prefabricated insulating elements held in position by expansion of the insulating elements **[6]**
3/28 . . with additional removable glass panes or the like, framed or unframed
3/30 . Coverings, e.g. protecting against weather, for decorative purposes
3/32 . Arrangements of wings characterised by the manner of movement; Arrangements of movable wings in openings; Features of wings or frames relating solely to the manner of movement of the wing **[3]**
3/34 . . with only one kind of movement (E06B 3/48 takes precedence)
3/36 . . . with a single vertical axis of rotation at one side of the opening, or swinging through the opening (wings requiring lifting before opening E06B 3/52)
3/38 . . . with a horizontal axis of rotation at the top or bottom of the opening
3/40 . . . with a vertical or horizontal axis of rotation not at one side of the opening, e.g. turnover wings
3/42 . . . Sliding wings; Details of frames with respect to guiding
3/44 . . . . Vertically-sliding wings
3/46 . . . . Horizontally-sliding wings
3/48 . . Wings connected at their edges, e.g. foldable wings
3/50 . . with more than one kind of movement (E06B 3/48 takes precedence)
3/52 . . . Wings requiring lifting before opening
3/54 . Fixing of glass panes or like plates
3/56 . . by means of putty, cement, or adhesives only (E06B 3/64 takes precedence)
3/58 . . by means of borders, cleats, or the like (E06B 3/64 takes precedence)
3/60 . . . of clamping cleats of metal
3/62 . . . of rubber-like elastic cleats
3/64 . . Fixing of more than one pane to a frame
3/66 . Units comprising two or more parallel glass or like panes in spaced relationship, the panes being permanently secured together, e.g. along the edges (layered products essentially comprising sheet glass B32B 17/00; coating of glass C03C 17/00)
3/663 . . Elements for spacing panes **[6]**
3/667 . . . Connectors therefor **[6]**
3/67 . . characterised by additional arrangements or devices for heat or sound insulation **[6]**
3/673 . . Assembling the units (E06B 3/677 takes precedence) **[6]**
3/677 . . Evacuating or filling the gap between the panes; Preventing condensation in the gap between the panes (by means of spacing elements E06B 3/663); Cleaning the gap between the panes **[6]**
3/68 . Window bars
3/70 . Door leaves (wing frames E06B 3/04)
3/72 . . consisting of frame and panels
3/74 . . . with wooden panels
3/76 . . . with metal panels
3/78 . . . with panels of plastics
3/80 . . flexible
3/82 . . Flush doors, i.e. with completely flat surface (E06B 3/02 takes precedence)
3/84 . . . of plywood
3/86 . . . of plastics
3/88 . . Edge-protecting devices for door leaves (finger guards for doors or windows E06B 7/36)
3/90 . Revolving doors; Cages or housings therefor (turnstiles E06B 11/08)
3/92 . Doors or windows extensible when set in position (sliding wings for windows E06B 3/42; foldable wings E06B 3/48; wall-closing devices which may be rolled up, e.g. shutters, E06B 9/08)
3/94 . . Doors of the bellows type
3/96 . Corner joints or edge joints for windows, doors, or the like frames or wings **[4]**
3/964 . . using separate connecting pieces, e.g. T-connecting pieces (E06B 3/984, E06B 3/988, E06B 3/99 take precedence) **[5]**
3/968 . . . characterised by the way the connecting pieces are fixed in or on the frame members **[5]**
3/972 . . . . by increasing the cross-section of the connecting pieces, e.g. by expanding the connecting pieces with wedges (E06B 3/976 takes precedence) **[5]**
3/976 . . . . by deformation of the frame members **[5]**
3/98 . . . . the connecting pieces being specially adapted for drawing the frame members towards each other (E06B 3/972, E06B 3/976 take precedence) **[5]**
3/984 . . specially adapted for frame members of wood or other material worked in a similar way (E06B 3/99 takes precedence) **[5]**
3/988 . . specially adapted for frame members of sheet metal, or similar sheet material, with an open generally U-shaped cross-section, e.g. for door frame members **[5]**
3/99 . . for continuous frame members crossing each other without interruption (window bars E06B 3/68) **[5]**

5/00 Doors, windows, or like closures for special purposes; Border constructions therefor

5/01 . Trap-doors
5/02 . for out-buildings or cellars; Other simple closures not designed to be close-fitting
5/04 . . with fixed wooden frames
5/06 . . with fixed metal frames
5/08 . . with fixed frames made of concrete, stone-like material, or plastics
5/10 . for protection against air-raid or other war-like action; for other protective purposes
5/11 . . against burglary **[6]**
5/12 . . against air pressure, explosion, or gas
5/14 . . . Gasproof doors or similar closures; Adaptation of fixed constructions therefor
5/16 . . Fireproof doors or similar closures; Adaptations of fixed constructions therefor
5/18 . . against harmful radiation (against heat E06B 5/16)
5/20 . for insulation against noise

7/00 Special arrangements or measures in connection with doors or windows (screening or similar protective devices E06B 9/00)

7/02 . for providing ventilation, e.g. through double windows; Arrangement of ventilation roses (airflow control members per se F24F 13/08)
7/03 . . Ventilating devices for inserting under upwardly-sliding windows (rain or draught deflectors E06B 7/26)

7/04 . . with ventilation wings (E06B 7/08 takes precedence)
7/06 . . . with one ventilation wing only
7/08 . . Louvre doors, windows, or grilles
7/082 . . . with rigid or slidable lamellae
7/084 . . . with rotatable lamellae
7/086 . . . . interconnected for concurrent movement **[2]**
7/088 . . . . . with facing protective grille or safety guard **[2]**
7/09 . . . . . mounted in movable wing, e.g. door **[2]**
7/092 . . . . . operable in two or more distinct sets **[2]**
7/094 . . . . . operable in sequence; characterised by additional independent movement **[2]**
7/096 . . . . . operated or interconnected by gearing (wing operators with gearing in general E05F 11/00) **[2]**
7/098 . . . . . with weather seal **[2]**
7/10 . . by special construction of the frame members
7/12 . Measures preventing the formation of condensed water (double glazing E06B 3/24 to E06B 3/28, E06B 3/64, E06B 3/66; heating arrangements specially adapted for transparent or reflecting areas H05B 3/84)
7/14 . Measures for draining-off condensed water or water leaking-in
7/16 . Sealing arrangements on wings or parts co-operating with the wings (E06B 7/098 takes precedence) **[2]**
7/18 . . by means of movable edgings, e.g. draught sealings additionally used for bolting
7/20 . . . automatically withdrawn when the wing is opened
7/205 . . . . with sealing strip mounted on sill **[2]**
7/21 . . . . with sealing strip movable in plane of wing **[2]**
7/215 . . . . with sealing strip being moved to a retracted position by elastic means, e.g. springs **[2]**
7/22 . . by means of elastic edgings, e.g. elastic rubber tubes; by means of resilient edgings, e.g. felt or plush strips, resilient metal strips (E06B 7/18 takes precedence)
7/23 . . . Plastic, sponge rubber, or like strips or tubes
7/232 . . . Resilient strips of hard material, e.g. metal
7/24 . . without separate sealing members, e.g. with labyrinth
7/26 . Rain or draught deflectors, e.g. under sliding wings
7/28 . Other arrangements on doors or windows, e.g. door-plates, windows adapted to carry plants, hooks for window cleaners
7/30 . . Peep-holes; Devices for speaking through; Doors having windows
7/32 . . Serving doors; Passing-through doors
7/34 . . Doors containing cupboards (cabinets in general A47B)
7/36 . . Finger guards **[7]**

9/00 Screening or protective devices for openings, with or without operating or securing mechanisms; **Closures of similar construction** (E06B 5/10 takes precedence; wings for doors or windows, connected at their edges, E06B 3/48; additional indoor equipment of doors or windows, not forming part of the proper finishing work of a building, e.g. curtains, A47H; gratings as building elements E04C 2/42; locks, accessories therefor E05B; bolts or fastening devices for wings E05C; operating mechanism for wings in general E05F)
9/01 . Grilles fixed to walls, doors, or windows; Grilles moving with doors or windows; Walls formed as grilles, e.g. claustra
9/02 . Shutters, movable grilles, or other safety closing devices, e.g. against burglary (louvre windows or grilles E06B 7/08; lamellar blinds E06B 9/26)
9/04 . . of wing type, e.g. revolving or sliding
9/06 . . collapsible or foldable, e.g. of the bellows or lazy-tongs type (bellows-type doors E06B 3/94; roll-type grilles E06B 9/18)
9/08 . . Roll-type closures (roller blinds E06B 9/40; operating, guiding or securing devices or arrangements for roll-type closures E06B 9/56; usable only as awnings E04F 10/06) **[5]**
9/11 . . . Roller shutters **[5]**
9/13 . . . . with closing members of one piece, e.g. of corrugated sheet metal **[5]**
9/15 . . . . with closing members formed of slats or the like **[5]**
9/165 . . . . . with slats disappearing in each other; with slats the distance between which can be altered **[5]**
9/17 . . . . Parts or details of roller shutters, e.g. suspension devices, shutter boxes, wicket doors, ventilation openings **[5]**
9/171 . . . . . Rollers therefor; Fastening roller shutters to rollers **[5]**
9/172 . . . . . by clamping bars
9/173 . . . . . by clasps or buttons
9/174 . . . . . Bearings specially adapted therefor **[5]**
9/18 . . . Roll-type grilles **[5]**
9/24 . Screens or other constructions affording protection against light, especially against sunshine; Similar screens for privacy or appearance (operating, guiding or securing devices or arrangements for roll-type closures E06B 9/56; free-hanging flexible screens A47H 23/00)
9/26 . . Lamellar or like blinds, e.g. venetian blinds
9/262 . . . with flexibly-interconnected horizontal or vertical strips; Concertina blinds
9/264 . . . Combinations of lamellar blinds with roller shutters, screen windows, windows, or double panes; Lamellar blinds with special devices
9/266 . . . Devices or accessories for making or mounting lamellar blinds or parts thereof **[3]**
9/28 . . . with horizontal lamellae, e.g. non-liftable (louvre windows or gratings E06B 7/08)
9/30 . . . . liftable
9/302 . . . . . without ladder-tape, e.g. with lazy-tongs, with screw spindle
9/303 . . . . . with ladder-tape
9/304 . . . . . with tilting bar and separate raising shaft
9/305 . . . . . with tilting bar and raising cords guided along fixed bar
9/306 . . . . . with tilting bar along which the raising cords are guided

9/307 . . . . . Details of tilting bars or their operation
9/308 . . . . . with coaxial tilting bar and raising shaft
9/32 . . . . . Operating, guiding, or securing devices therefor (operation of tilting bars E06B 9/307)
9/322 . . . . . Details of operating devices, e.g. pulleys, brakes, spring drums, drives (devices of general interest specially adapted or mounted for storing and repeatedly paying-out and re-storing lengths of material B65H 75/34)
9/323 . . . . . Structure or support of upper box
9/324 . . . . . Cord-locks
9/325 . . . . . Immobilising devices preventing raising
9/326 . . . . . Details of cords, e.g. buckles, drawing knobs
9/327 . . . . . Guides for raisable lamellar blinds with horizontal lamellae
9/34 . . . . roller type
9/36 . . . with vertical lamellae
9/38 . . . Other details
9/382 . . . . Details of ladder-tapes or ladder-chains, e.g. buckles for local shortening of tapes
9/384 . . . . Details of interconnection or interaction of tapes and lamellae
9/386 . . . . Details of lamellae
9/388 . . . . Details of bottom or upper slats or their attachment
9/40 . . Roller blinds (usable only as awnings E04F 10/06) **[5]**
9/42 . . . Parts or details of roller blinds, e.g. suspension devices, blind boxes (brackets or adjustable mountings for roller blinds and drawable curtains A47H 1/13) **[5]**
9/44 . . . . Rollers therefor; Fastening roller blinds to rollers **[5]**
9/46 . . . . . by clamping bars **[5]**
9/48 . . . . . by clasps or buttons **[5]**
9/50 . . . . Bearings specially adapted therefor **[5]**
9/52 . Devices affording protection against insects, e.g. fly screens; Mesh windows for other purposes
9/54 . . Roller fly screens (operating, guiding or securing devices therefor E06B 9/56) **[2,5]**
9/56 . Operating, guiding or securing devices or arrangements for roll-type closures; Spring drums; Tape drums; Counterweighting arrangements therefor (devices of general interest specially adapted or mounted for storing and repeatedly paying-out and re-storing lengths of material B65H 75/34) **[5]**
9/58 . . Guiding devices **[5]**
9/60 . . Spring drums operated only by closure members **[5]**
9/62 . . Counterweighting arrangements (E06B 9/60 takes precedence) **[5]**
9/64 . . with lowerable roller **[5]**
9/66 . . with a roller situated at the bottom **[5]**
9/68 . . Operating devices or mechanisms, e.g. with electric drive **[5]**
9/70 . . . comprising an electric motor positioned outside the roller **[5]**
9/72 . . . comprising an electric motor positioned inside the roller **[5]**
9/74 . . . adapted for selective electrical or manual operation **[5]**
9/76 . . . using crank handles **[5]**
9/78 . . for direct manual operation, e.g. by tassels, by handles **[5]**
9/80 . . Safety measures against dropping or unauthorised opening; Braking or immobilising devices; Devices for limiting unrolling (securing devices or arrangements for direct manual operation E06B 9/78) **[5]**
9/82 . . . automatic **[5]**
9/84 . . . . against dropping **[5]**
9/86 . . . . against unauthorised opening **[5]**
9/88 . . . . for limiting unrolling **[5]**
9/90 . . . . for immobilising the closure member in various chosen positions **[5]**
9/92 . . Means allowing the closures to be shifted out of the plane of the opening **[5]**

11/00 **Means for allowing passage through fences, barriers, or the like, e.g. stiles** (general features of doors E06B 1/00 to E06B 9/00)
11/02 . Gates; Doors
11/04 . . characterised by the kind of suspension (suspensions <u>per se</u> E05D)
11/06 . . characterised by the kind of fastening (fastening devices for wings E05C)
11/08 . Turnstiles (on vehicles B60N 5/00; with registering means G07C 9/02)

E06C **LADDERS** (E04F 11/00 takes precedence; step-stools A47C 12/00; adaptation of ladders to use on ships B63B, to use on aircraft B64; scaffolding E04G) **[5,6]**

1/00 **Ladders in general** (mounted on undercarriages or vehicles E06C 5/00; permanently attached to fixed structures E06C 9/00)
1/02 . with rigid longitudinal member or members
1/04 . . Ladders for resting against objects, e.g. walls, poles, trees (supports for ladder heads E06C 7/48)
1/06 . . . in one piece
1/08 . . . multi-part
1/10 . . . . Sections fitted end to end
1/12 . . . . extensible, e.g. telescopic
1/14 . . Ladders capable of standing by themselves
1/16 . . . with struts which rest on the ground (with struts rigid with the ladder E06C 1/24; having platforms E06C 1/39)
1/18 . . . . with supporting struts formed as ladders
1/20 . . . . with supporting struts formed as poles
1/22 . . . . . with extensible, e.g. telescopic, ladder parts or struts
1/24 . . . Free-standing ladders
1/26 . . . . in one piece
1/28 . . . . multi-part (with movable supporting struts formed as ladders E06C 1/18)
1/30 . . . . . extensible, e.g. telescopic

1/32 . . Ladders with a strut which is formed as a ladder and can be secured in line with the ladder
1/34 . . Ladders attachable to structures, such as windows, cornices, poles, or the like (ladders permanently fastened to buildings E06C 9/00)
1/36 . . . Ladders suspendable by hooks or the like
1/38 . . Special constructions of ladders, e.g. ladders with more or less than two longitudinal members, ladders with movable rungs or other treads, longitudinally-foldable ladders
1/383 . . . Foldable ladders in which the longitudinal members are brought together on folding
1/387 . . . having tip-up steps
1/39 . . . Ladders having platforms; Ladders changeable into platforms (platforms for use on ladders E06C 7/16)
1/393 . . . . Ladders having platforms foldable with the ladder
1/397 . . . characterised by having wheels, rollers, or runners
1/52 . with non-rigid longitudinal members
1/54 . . of the lazy-tongs type
1/56 . . Rope or chain ladders
1/58 . with both rigid and non-rigid longitudinal members

5/00 Ladders characterised by being mounted on undercarriages or vehicles; **Securing ladders on vehicles** (ladders having wheels, rollers, or runners E06C 1/397)

5/02 . with rigid longitudinal members
5/04 . . capable of being elevated or extended
5/06 . . . by piston and cylinder, or equivalent means, operated by a pressure medium
5/08 . . . . derived directly from a pressure reservoir
5/10 . . . . . charged by a pump or compressor driven by the motor of the vehicle or another motor on the vehicle
5/12 . . . . derived directly from a pump or compressor
5/14 . . . . . driven by the motor of the vehicle or another motor on the vehicle
5/16 . . . using mechanical transmission only, with or without fluid or other non-mechanical couplings or clutches
5/18 . . . . using power from the motor of the vehicle or another motor
5/20 . . . . using hand-power (hand-operated extending means carried by the ladder E06C 7/04)
5/22 . . . by, or with the assistance of, springs (E06C 5/06, E06C 5/16 take precedence)
5/24 . . Dismounting ladders from vehicles
5/26 . with non-rigid longitudinal members
5/28 . . of the lazy-tongs type
5/30 . . formed of links which reinforce themselves against each other
5/32 . Accessories
5/34 . . Indicating devices
5/36 . . Safety devices against slipping or falling of ladders; Safety devices against overloading ladders
5/38 . . Devices for blocking the springs of the vehicle; Devices for supporting the undercarriage directly from the ground
5/40 . . Devices for canting ladders laterally
5/42 . . Devices for altering inclination; Latching devices therefor
5/44 . . Other accessories on ladders, e.g. acoustical signalling devices, dismountable switchboards

7/00 Component parts, supporting parts, or accessories

7/02 . Extending means (for ladders mounted on undercarriages or vehicles E06C 5/00)
7/04 . . Hand-operated extending means carried by the ladder
7/06 . Securing devices or hooks for parts of extensible ladders
7/08 . Special construction of longitudinal members, or rungs or other treads
7/10 . Reinforcements for ladders
7/12 . Lifts or other hoisting devices on ladders
7/14 . Holders for pails or other equipment on or for ladders
7/16 . Platforms on, or for use on, ladders, e.g. liftable or lowerable platforms (aspects relating to the lifting B66F)
7/18 . Devices for preventing persons from falling (life-saving belts A62B 1/16)
7/42 . Ladder feet; Supports therefor (for scaffold elements E04G 5/02)
7/44 . . Means for mounting ladders on uneven ground
7/46 . . Non-skid equipment
7/48 . Ladder heads; Supports for heads of ladders for resting against objects
7/50 . Joints or other connecting parts

9/00 Ladders characterised by being permanently attached to fixed structures, e.g. fire escapes (movable stairways E04F 11/04)

9/02 . rigidly mounted
9/04 . . in the form of climbing irons or the like
9/06 . movably mounted
9/08 . . with rigid longitudinal members
9/10 . . . forming part of a building, such as a balcony grid, window grid, or other window part
9/12 . . . laterally displaceable
9/14 . . with non-rigid longitudinal members, e.g. rope or chain ladders, ladders of the lazy-tongs type

EARTH OR ROCK DRILLING; MINING

E21 EARTH OR ROCK DRILLING; MINING

Note

In this class, the following term is used with the meaning indicated:
– "drilling" covers boring and vice versa.

E21B EARTH OR ROCK DRILLING (mining, quarrying E21C; making shafts, driving galleries or tunnels E21D); **OBTAINING OIL, GAS, WATER, SOLUBLE OR MELTABLE MATERIALS OR A SLURRY OF MINERALS FROM WELLS [5]**

(1) This subclass covers: **[7]**
– primarily equipment for drilling of earth or rock in their natural formation; **[7]**
– similar equipment for drilling of man-made structures in situ, e.g. of road surfaces or concrete structures. **[7]**

(2) This subclass does not cover: **[7]**
– hand-held drilling machines, e.g. for domestic use; **[7]**
– drilling equipment for manufacturing operations, i.e. where an article is worked, e.g. for further processing; **[7]**
which are covered by relevant subclasses of section B, e.g. B23B; **[7]**
– compositions for drilling of boreholes or wells or for treating boreholes or wells, which compositions are covered by group C09K 8/00, e.g. compositions for enhanced recovery methods for obtaining hydrocarbons C09K 8/58. **[8]**

(3) Processes using enzymes or micro-organisms in order to: **[8]**
(i) liberate, separate or purify a pre-existing compound or composition, or to **[8]**
(ii) treat textiles or clean solid surfaces of materials **[8]**
are further classified in subclass C12S. **[8]**

Subclass index

Methods or apparatus for drilling

1/00 Percussion drilling (drives used in the borehole E21B 4/00) **[3]**
1/02 . Surface drives for drop hammers, e.g. with a cable **[1,7]**
1/04 . . Devices for reversing the movement of the rod or cable at the surface
1/12 . with a reciprocating impulse member (E21B 1/02, E21B 1/38 take precedence) **[7]**
1/14 . . driven by a rotating mechanism **[7]**
1/16 . . . with spring-mounted reciprocating masses, e.g. with air cushion **[7]**
1/18 . . . . with elastic joining of the drive to the push-rod by double buffer springs **[7]**
1/20 . . . formed as centrifugal hammers **[7]**
1/22 . . driven by electromagnets **[7]**
1/24 . . the impulse member being a piston driven directly by fluid pressure **[7]**
1/26 . . . by liquid pressure **[7]**
1/28 . . . . working with pulses **[7]**
1/30 . . . by air, steam or gas pressure **[7]**
1/32 . . . . working with pulses **[7]**
1/34 . . . . . the impulse member being a piston of an internal-combustion engine **[7]**
1/36 . Tool-carrier piston type, i.e. in which the tool is connected to an impulse member **[7]**
1/38 . Hammer piston type, i.e. in which the tool bit or anvil is hit by an impulse member **[7]**

3/00 Rotary drilling (drives used in the borehole E21B 4/00; rotary drilling machines in general B23B) **[3]**
3/02 . Surface drives for rotary drilling
3/025 . . with a to-and-fro rotation of the tool **[7]**
3/03 . . with an intermittent unidirectional rotation of the tool **[7]**
3/035 . . with slipping or elastic transmission **[7]**
3/04 . . Rotary tables
3/06 . . . Adaptation of rotary draw works to drive rotary tables (connecting or disconnecting couplings or joints E21B 19/16; rope, cable, or chain winding mechanisms, capstans B66D) **[3]**

4/00 Drives for drilling, used in the borehole [3]

4/02 . Fluid rotary type drives (hydraulic turbines for drilling wells F03B 13/02) **[3]**

4/04 . Electric drives (E21B 4/12 takes precedence) **[3]**

4/06 . Down-hole impacting means, e.g. hammers (percussion drill bits E21B 10/36; boring rams E21B 11/02; releasing-jars E21B 31/107) **[3]**

4/08 . . impact being obtained by gravity only, e.g. with lost-motion connection **[3]**

4/10 . . continuous unidirectional rotary motion of shaft or drilling pipe effecting consecutive impacts **[3]**

4/12 . . Electrically operated hammers **[3]**

4/14 . . Fluid operated hammers **[3]**

4/16 . Plural down-hole drives, e.g. for combined percussion and rotary drilling (E21B 4/10 takes precedence); Drives for multi-bit drilling units **[3]**

4/18 . Anchoring or feeding in the borehole **[3,7]**

4/20 . combined with surface drive (E21B 4/10 takes precedence) **[3]**

6/00 Drives for drilling with combined rotary and percussive action (drives used in the borehole E21B 4/00; portable percussive machines with superimposed rotation B25D 16/00) **[3]**

6/02 . the rotation being continuous **[7]**

6/04 . . Separate drives for percussion and rotation **[7]**

6/06 . the rotation being intermittent, e.g. obtained by a ratchet device **[7]**

6/08 . . Separate drives for percussion and rotation **[7]**

7/00 Special methods or apparatus for drilling (supports for the drilling machine, e.g. derricks or masts, E21B 15/00) **[1,7]**

7/02 . Drilling rigs characterised by means for land transport, e.g. skid mounting or wheel mounting (portable drilling rigs for use on underwater floors E21B 7/124) **[1,7]**

7/04 . Directional drilling

7/06 . . Deflecting the direction of boreholes

7/08 . . . Special apparatus for deflecting the boring, e.g. special drill bits, knuckle joints, whipstocks (directional window cutting E21B 29/06; deflecting the direction of fishing tools E21B 31/14)

7/10 . . Correction of deflected boreholes

7/12 . Underwater drilling (telescoping joints E21B 17/07; using heave compensators E21B 19/09; well heads specially adapted for underwater installations E21B 33/035) **[1,7]**

7/124 . . with underwater tool drive prime mover, e.g. portable drilling rigs for use on underwater floors **[3]**

7/128 . . from floating support with independent underwater anchored guide base **[3]**

7/132 . . from underwater buoyant support **[3]**

7/136 . . from non-buoyant support (E21B 7/124 takes precedence) **[3]**

7/14 . Drilling by use of heat, e.g. flame drilling

7/15 . . of electrically generated heat **[3]**

7/16 . Applying separate balls or pellets by the pressure of the drill, so-called shot-drilling

7/18 . Drilling by liquid or gas jets, with or without entrained pellets (E21B 7/14 takes precedence; hydraulic monitors E21C 45/00) **[5]**

7/20 . Driving or forcing casings or pipes into boreholes, e.g. sinking; Simultaneously drilling and casing boreholes (surface means for applying to-and-fro rotation movements to the casing E21B 3/025; placing piles E02D 7/00; sinking shafts while moving the lining downwards E21D 1/08) **[3]**

7/24 . Drilling using vibrating or oscillating means, e.g. out-of-balance masses (percussion drilling E21B 1/00) **[3]**

7/26 . Drilling without earth removal, e.g. with self-propelled burrowing devices (E21B 7/30 takes precedence; down-hole drives E21B 4/00) **[3,6]**

7/28 . Enlarging drilled holes, e.g. by counterboring (drill bits for enlarging the borehole E21B 10/26) **[3]**

7/30 . . without earth removal **[6]**

Drilling tools

10/00 Drill bits (specially adapted for deflecting the direction of boring E21B 7/08; with means for collecting substances E21B 27/00) **[3,8]**

10/02 . Core bits (characterised by wear resisting parts E21B 10/46; obtaining undisturbed cores E21B 25/00) **[3]**

10/04 . . with core destroying means **[3]**

10/06 . . Roller core bits **[3]**

10/08 . Roller bits (roller core bits E21B 10/06; with leading portion E21B 10/26; characterised by wear resisting parts E21B 10/46) **[3]**

10/10 . . with roller axle supported at both ends (with disc cutters E21B 10/12) **[3]**

10/12 . . with disc cutters **[3]**

10/14 . . combined with non-rolling cutters other than of leading-portion type **[3]**

10/16 . . characterised by tooth form or arrangement **[3]**

10/18 . . characterised by conduits or nozzles for drilling fluids (drilling fluid supply to the bearings E21B 10/23) **[3,8]**

10/20 . . characterised by detachable or adjustable parts, e.g. legs or axles (cross axle roller bits E21B 10/10) **[3]**

10/22 . . characterised by bearing, lubrication or sealing details **[3,8]**

10/23 . . . with drilling fluid supply to the bearings **[8]**

10/24 . . . characterised by lubricating details (E21B 10/23 takes precedence) **[3,8]**

10/25 . . . characterised by sealing details **[8]**

10/26 . Drill bits with leading portion, i.e. drill bits with a pilot cutter; Drill bits for enlarging the borehole, e.g. reamers (percussion drill bits with leading portion E21B 10/40; augers with leading portion E21B 10/44) **[3]**

10/28 . . with non-expansible roller cutters **[3]**

10/30 . . . Longitudinal axis roller reamers, e.g. reamer stabilisers **[3]**

10/32 . . with expansible cutting tools **[3]**

10/34 . . . of roller-cutter type **[3]**

10/36 . Percussion drill bits (characterised by wear resisting parts E21B 10/46) **[3]**

10/38 . . characterised by conduits or nozzles for drilling fluids **[3]**

10/40 . . with leading portion **[3]**

10/42 . Rotary drag type drill bits with teeth, blades or like cutting elements, e.g. fork-type bits, fish tail bits (characterised by wear resisting parts E21B 10/46, by conduits or nozzles for drilling fluid E21B 10/60, by detachable parts E21B 10/62) **[3,8]**

10/43 . . characterised by the arrangement of teeth or other cutting elements **[8]**

10/44 . Bits with helical conveying portion, e.g. screw type bits; Augers with leading portion or with detachable parts (E21B 10/42 takes precedence; drilling rods with helical structure E21B 17/22) **[3,8]**

10/46 . characterised by wear resisting parts, e.g. diamond inserts **[3]**

10/48 . . the bit being of core type **[3]**

10/50 . . the bit being of roller type **[3]**

10/52 . . . with chisel- or button-type inserts **[3]**

10/54 . . the bit being of the rotary drag type, e.g. fork-type bits **[3,8]**

10/55 . . . with preformed cutting elements (inserts per se E21B 10/56, E21B 10/58) **[8]**

10/56 . . Button-type inserts (E21B 10/52 takes precedence) **[3]**

10/567 . . . with preformed cutting elements mounted on a distinct support, e.g. polycrystalline inserts **[8]**

10/573 . . . . characterised by support details, e.g. the substrate construction or the interface between the substrate and the cutting element **[8]**

10/58 . . Chisel-type inserts (E21B 10/52, E21B 10/54 take precedence) **[3]**

10/60 . characterised by conduits or nozzles for drilling fluids (for roller bits E21B 10/18; for percussion drill bits E21B 10/38) **[3]**

10/61 . . characterised by nozzle structure **[8]**

10/62 . characterised by parts, e.g. cutting elements, which are detachable or adjustable (E21B 10/64 takes precedence; for roller bits E21B 10/20; for augers E21B 10/44) **[3,8]**

10/627 . . with plural detachable cutting elements **[8]**

10/633 . . . independently detachable **[8]**

10/64 . characterised by the whole or part thereof being insertable into or removable from the borehole without withdrawing the drilling pipe (retrievable core receivers E21B 25/02) **[3]**

10/66 . . the cutting element being movable through the drilling pipe and laterally shiftable **[3]**

11/00 Other drilling tools

11/02 . Boring rams (percussion drives used in the borehole E21B 4/06; percussion drill bits E21B 10/36)

11/04 . Boring grabs

11/06 . with driven cutting chains or similarly-driven tools

12/00 Accessories for drilling tools [3]

12/02 . Wear indicators **[3]**

12/04 . Drill bit protectors **[3]**

12/06 . Mechanical cleaning devices **[3]**

Other equipment or details for drilling; **Well equipment or well maintenance**

15/00 Supports for the drilling machine, e.g. derricks or masts [1,7]

15/02 . specially adapted for underwater drilling (E21B 15/04 takes precedence; floating drilling platforms B63B 35/44; drilling platforms on legs E02B 17/00) **[3]**

15/04 . specially adapted for directional drilling, e.g. slant hole rigs **[3]**

17/00 Drilling rods or pipes; **Flexible drill strings**; **Kellies**; **Drill collars**; **Sucker rods**; **Casings**; **Tubings** (rod couplings in general F16D; tubes or tube couplings in general F16L)

17/01 . Risers (riser connectors E21B 33/038) **[3]**

17/02 . Couplings; Joints

17/03 . . between drilling rod or pipe and drill motor, e.g. between drilling rod and hammer **[7]**

17/04 . . between rod and bit, or between rod and rod

17/042 . . . threaded

17/043 . . . . with locking means

17/046 . . . with ribs, pins, or jaws, and complementary grooves or the like, e.g. bayonet catches

17/05 . . . Swivel joints

17/06 . . . Releasing-joints, e.g. safety joints

17/07 . . . Telescoping joints for varying drill string lengths; Shock absorbers (heave compensators in the derrick E21B 19/09; releasing-jars E21B 31/107) **[3]**

17/08 . . Casing joints

17/10 . Wear protectors; Centralising devices (drives used in the borehole with anchoring means E21B 4/18; guiding or centralising devices outside the borehole E21B 19/24)

17/12 . . Devices for placing or drawing out wear protectors

17/14 . Casing shoes

17/16 . Drill collars **[3]**

17/18 . Pipes provided with plural fluid passages (circulation of drilling fluid by means of such pipes E21B 21/12) **[3]**

17/20 . Flexible or articulated drilling pipes **[3]**

17/22 . Rods or pipes with helical structure (drill bits with helical conveying portion E21B 10/44) **[3]**

19/00 Handling rods, casings, tubes or the like outside the borehole, e.g. in the derrick; **Apparatus for feeding the rods or cables** (surface drives E21B 1/02, E21B 3/02)

19/02 . Rod or cable suspensions (load-engaging elements for hoisting or lowering purposes in general B66C 1/00; crown blocks or pulley blocks B66D; cable guides B66D 1/36)

19/04 . . Hooks

19/06 . . Elevators, i.e. rod- or tube-gripping devices

19/07 . . . Slip-type elevators (slips in rotary tables E21B 19/10)

19/08 . Apparatus for feeding the rods or cables (E21B 19/22 takes precedence; automatic feed E21B 44/02; hoisting drums B66D); Apparatus for increasing or decreasing the pressure on the drilling tool; Apparatus for counterbalancing the weight of the rods **[3,7]**

19/081 . . Screw-and-nut feed mechanisms **[7]**

19/083 . . Cam, rack or like feed mechanisms **[7]**

19/084 . . with flexible drawing means, e.g. cables **[7]**

19/086 . . with a fluid-actuated cylinder (E21B 19/084, E21B 19/087, E21B 19/09 take precedence) **[7]**

19/087 . . by means of a swinging arm **[7]**

19/089 . . with a spring or an additional weight **[7]**

19/09 . . specially adapted for drilling underwater formations from a floating support using heave compensators supporting the drill string (drilling-pipe telescoping joints E21B 17/07) **[3]**

19/10 . Slips; Spiders

19/12 . Rope clamps (rope clamps in general F16G 11/00)

19/14 . Racks, ramps, troughs or bins, for holding the lengths of rod singly or connected; Handling between storage place and borehole (E21B 19/20, E21B 19/22 take precedence) **[3]**

19/15 . . Racking of rods in horizontal position; Handling between horizontal and vertical position **[3]**

19/16 . Connecting or disconnecting pipe couplings or joints (E21B 19/20 takes precedence; pipe wrenches or the like B25B) **[3]**

19/18 . Connecting or disconnecting drill bit and drilling pipe **[3]**

19/20 . Combined feeding from rack and connecting, e.g. automatically **[3]**

19/22 . Handling reeled pipe or rod units, e.g. flexible drilling pipes **[3]**

19/24 . Guiding or centralising devices for drilling rods or pipes **[7]**

21/00 Methods or apparatus for flushing boreholes, e.g. by use of exhaust air from motor (freeing objects stuck in boreholes by flushing E21B 31/03; well drilling compositions C09K 8/02) **[2,7]**

21/01 . Arrangements for handling drilling fluids or cuttings outside the borehole, e.g. mud boxes (arrangements for treating drilling fluids E21B 21/06) **[7]**

21/015 . . Means engaging the bore entrance, e.g. hoods for collecting dust **[7]**

21/02 . Swivel joints in hose lines

21/06 . Arrangements for treating drilling fluids outside the borehole (treating steps per se, see the relevant subclasses) **[3]**

21/07 . . for treating dust-laden gaseous fluids **[7]**

21/08 . Controlling or monitoring pressure or flow of drilling fluid, e.g. automatic filling of boreholes, automatic control of bottom pressure (valve arrangements therefor E21B 21/10) **[3]**

21/10 . Valves arrangements in drilling-fluid circulation systems (valves in general F16K) **[3]**

21/12 . using drilling pipes with plural fluid passages, e.g. closed circulation systems (pipes with plural fluid passages E21B 17/18) **[3]**

21/14 . using liquids and gases, e.g. foams **[3]**

21/16 . using gaseous fluids (E21B 21/14 takes precedence; arrangements for handling drilling fluids outside the borehole E21B 21/01; arrangements for treating drilling fluids E21B 21/06) **[7]**

21/18 . Preventing exhaust air from the drill motor from blowing-off towards the working face **[7]**

23/00 Apparatus for displacing, setting, locking, releasing or removing tools, packers or the like in boreholes or wells (setting of casings, screens, or liners E21B 43/10)

23/01 . for anchoring the tools or the like (E21B 23/02 to E21B 23/06 take precedence; anchoring of drives in the borehole E21B 4/18) **[6]**

23/02 . for locking the tools or the like in landing nipples or in recesses between adjacent sections of tubing (E21B 23/03 to E21B 23/06 take precedence) **[3]**

23/03 . for setting the tools into, or removing the tools from, laterally offset landing nipples or pockets **[3]**

23/04 . operated by fluid means, e.g. actuated by explosion (E21B 23/06, E21B 23/08 take precedence) **[3]**

23/06 . for setting packers

23/08 . Introducing or running tools by fluid pressure, e.g. through-the-flow-line tool systems (special provisions on heads therefor E21B 33/068; cementing plugs E21B 33/16; scrapers operated by fluid pressure E21B 37/04) **[3]**

23/10 . . Tools specially adapted therefor **[3]**

23/12 . . Tool diverters **[3]**

23/14 . for displacing a cable or a cable-operated tool, e.g. for logging or perforating operations in deviated wells (by fluid pressure E21B 23/08; provision on well heads for introducing or removing cable-operated tools E21B 33/072, E21B 33/076) **[6]**

25/00 Apparatus for obtaining or removing undisturbed cores, e.g. core barrels, core extractors (core bits E21B 10/02; using explosives or projectiles in boreholes E21B 49/04; side-wall sampling or coring E21B 49/06)

25/02 . the core receiver being insertable into, or removable from, the borehole without withdrawing the drilling pipe (retrievable drill bits E21B 10/64) **[3]**

25/04 . . the core receiver having a core forming cutting edge or element, e.g. punch type core barrels **[3]**

25/06 . the core receiver having a flexible liner or inflatable retaining means **[3]**

25/08 . Coating, freezing, consolidating cores (E21B 25/06 takes precedence); Recovering uncontaminated cores or cores at formation pressure **[3]**

25/10 . Formed core retaining or severing means (E21B 25/06, E21B 25/08 take precedence) **[3]**

25/12 . . of the sliding wedge type **[3]**

25/14 . . mounted on pivot transverse to core axis **[3]**

25/16 . for obtaining oriented cores **[3]**

25/18 . the core receiver being specially adapted for operation under water **[3]**

27/00 Containers for collecting or depositing substances in boreholes or wells, e.g. bailers for collecting mud or sand; **Drill bits with means for collecting substances, e.g. valve drill bits [6,8]**

27/02 . Dump bailers, i.e. containers for depositing substances, e.g. cement or acids **[6,8]**

27/04 . where the collecting or depositing means include helical conveying means **[8]**

28/00 Vibration generating arrangements for boreholes or wells, e.g. for stimulating production (for drilling E21B 7/24; for transmitting measuring-signals E21B 47/14; for geophysical measurements G01V 1/02) **[6]**

29/00 Cutting or destroying pipes, packers, plugs, or wire lines, located in boreholes or wells, e.g. cutting of damaged pipes, of windows (perforators E21B 43/11); **Deforming of pipes in boreholes or wells**; **Reconditioning of well casings while in the ground**

29/02 . by explosives or by thermal or chemical means (destroying objects in boreholes or wells by explosives E21B 31/16)

29/04 . Cutting of wire lines or the like (E21B 29/02 takes precedence) **[3]**

29/06 . Cutting windows, e.g. directional window cutters for whipstock operations (E21B 29/08 takes precedence; whipstocks E21B 7/08) **[3]**

29/08 . Cutting or deforming pipes to control fluid flow (blow-out preventers E21B 33/06) **[3]**

29/10 . Reconditioning of well casings, e.g. straightening **[3]**

29/12 . specially adapted for underwater installations (E21B 29/08 takes precedence) **[3]**

31/00 Fishing for or freeing objects in boreholes or wells (provisions on well heads for introducing or removing objects E21B 33/068; locating or determining the position of objects in boreholes or wells E21B 47/09)

31/03 . Freeing by flushing **[3]**

31/06 . using magnetic means **[3]**

31/08 . using junk baskets or the like **[3]**
31/107 . using impact means for releasing stuck parts, e.g. jars (telescoping joints E21B 17/07) **[3]**
31/113 . . hydraulically operated **[3]**
31/12 . Grappling tools, e.g. tongs or grabs
31/14 . . with means deflecting the direction of the tool, e.g. by use of knuckle joints (apparatus for deflecting the boring E21B 7/08) **[3]**
31/16 . . combined with cutting or destroying means (cutting or destroying means per se E21B 29/00) **[3]**
31/18 . . gripping externally, e.g. overshot **[3]**
31/20 . . gripping internally, e.g. fishing spears **[3]**

33/00 Sealing or packing boreholes or wells
33/02 . Surface sealing or packing
33/03 . . Well heads; Setting-up thereof (valve arrangements therefor E21B 34/02)
33/035 . . . specially adapted for underwater installations (E21B 33/043, E21B 33/064, E21B 33/076 take precedence) **[3]**
33/037 . . . . Protective housings therefor **[3]**
33/038 . . . . Connectors used on well heads, e.g. for connecting blow-out preventer and riser (connecting a production flow line to an underwater well head E21B 43/013) **[3]**
33/04 . . . Casing heads; Suspending casings or tubings in well heads (setting of casings in wells E21B 43/10)
33/043 . . . . specially adapted for underwater well heads (E21B 33/047 takes precedence) **[3]**
33/047 . . . . for plural tubing strings **[3]**
33/05 . . . . Cementing-heads, e.g. having provision for introducing cementing plugs
33/06 . . . Blow-out preventers **[3]**
33/064 . . . . specially adapted for underwater well heads (connectors therefor E21B 33/038) **[3]**
33/068 . . . having provision for introducing objects or fluids into, or removing objects from, wells (cementing-heads E21B 33/05) **[3]**
33/072 . . . . for cable-operated tools (E21B 33/076 takes precedence) **[3]**
33/076 . . . . specially adapted for underwater installations **[3]**
33/08 . . Wipers; Oil savers
33/10 . in the borehole
33/12 . . Packers; Plugs (used for cementing E21B 33/134, E21B 33/16)
33/122 . . . Multiple-string packers
33/124 . . . Units with longitudinally-spaced plugs for isolating the intermediate space
33/126 . . . with fluid-pressure-operated elastic cup or skirt (E21B 33/122, E21B 33/124 take precedence)
33/127 . . . with inflatable sleeve (E21B 33/122, E21B 33/124 take precedence)
33/128 . . . with a member expanded radially by axial pressure (E21B 33/122, E21B 33/124 take precedence)
33/129 . . . with mechanical slips for hooking into the casing (E21B 33/122, E21B 33/124 take precedence)
33/1295 . . . . actuated by fluid pressure **[6]**
33/13 . . Methods or devices for cementing, for plugging holes, crevices, or the like (dump bailers E21B 27/02; chemical compositions therefor C09K 8/00) **[1,8]**
33/134 . . . Bridging plugs
33/136 . . . Baskets, e.g. of umbrella type
33/138 . . . Plastering the borehole wall; Injecting into the formation
33/14 . . . for cementing casings into boreholes
33/16 . . . . using plugs for isolating cement charge; Plugs therefor

34/00 Valve arrangements for boreholes or wells (in drilling fluid circulation systems E21B 21/10; blow-out preventers E21B 33/06; oil flow regulating apparatus E21B 43/12; valves in general F16K) **[3]**
34/02 . in well heads **[3]**
34/04 . . in underwater well heads **[3]**
34/06 . in wells **[3]**
34/08 . . responsive to flow or pressure of the fluid obtained (E21B 34/10 takes precedence) **[3]**
34/10 . . operated by control fluid supplied from outside the borehole (control means being outside the borehole E21B 34/16) **[3]**
34/12 . . operated by movement of casings or tubings **[3]**
34/14 . . operated by movement of tools, e.g. sleeve valves operated by pistons or wire line tools **[3]**
34/16 . Control means therefor being outside the borehole **[3]**

35/00 Methods or apparatus for preventing or extinguishing fires (cutting or deforming pipes to control fluid flow E21B 29/08; controlling flow of fluid to or in wells E21B 43/12; fire fighting in general A62C, A62D)

36/00 Heating, cooling, or insulating arrangements for boreholes or wells, e.g. for use in permafrost zones (drilling by use of heat E21B 7/14; secondary recovery methods using heat E21B 43/24) **[3]**
36/02 . using burners **[3]**
36/04 . using electrical heaters **[3]**

37/00 Methods or apparatus for cleaning boreholes or wells (E21B 21/00 takes precedence; cleaning pipes in general B08B 9/02)
37/02 . Scrapers specially adapted therefor
37/04 . . operated by fluid pressure, e.g. free-piston scrapers (operating other tools by fluid pressure E21B 23/08) **[3]**
37/06 . using chemical means for preventing or limiting the deposition of paraffins or like substances (chemical compositions therefor C09K 8/52) **[3,8]**
37/08 . cleaning in situ of down-hole filters, screens, or gravel packs (E21B 37/06 takes precedence) **[3]**
37/10 . Well swabs **[3]**

40/00 Tubing catchers, automatically arresting the fall of oil-well tubing

41/00 Equipment or details not covered by groups E21B 15/00 to E21B 40/00
41/02 . in situ inhibition of corrosion in boreholes or wells (dump bailers E21B 27/02; chemical compositions therefor C09K 8/54; inhibiting corrosion in general C23F) **[3,6,8]**
41/04 . Manipulators for underwater operations, e.g. temporarily connected to well heads (manipulators in general B25J) **[3]**
41/06 . Work chambers for underwater operations, e.g. temporarily connected to well heads (in general B63C 11/00) **[3]**
41/08 . Underwater guide bases, e.g. drilling templates; Levelling thereof **[7]**
41/10 . Guide posts, e.g. releasable; Attaching guide lines to underwater guide bases **[7]**

Obtaining fluids from wells [3]

43/00 Methods or apparatus for obtaining oil, gas, water, soluble or meltable materials or a slurry of minerals from wells (applicable only to water E03B; obtaining oil-bearing deposits or soluble or meltable materials by mining techniques E21C 41/00; pumps F04)

43/01 . specially adapted for obtaining from underwater installations (underwater well heads E21B 33/035)

43/013 . . Connecting a production flow line to an underwater well head **[3]**

43/017 . . Production satellite stations, i.e. underwater installations comprising a plurality of satellite well heads connected to a central station (underwater separating arrangements E21B 43/36) **[3]**

43/02 . Subsoil filtering (E21B 43/11 takes precedence; chemical compositions for consolidating loose sand or the like around wells C09K 8/56) **[1,8]**

43/04 . . Gravelling of wells

43/08 . . Screens or liners

43/10 . . Setting of casings, screens or liners in wells (driving or forcing casings into boreholes, simultaneously drilling and casing boreholes E21B 7/20; setting of tools, packers or the like E21B 23/00; suspending casings in well heads E21B 33/04)

43/11 . Perforators; Permeators

43/112 . . Perforators with extendable perforating members, e.g. actuated by fluid means

43/114 . . Perforators using direct fluid action, e.g. abrasive jets

43/116 . . Gun or shaped-charge perforators

43/117 . . . Shaped-charge perforators (E21B 43/118 takes precedence)

43/118 . . . characterised by lowering in vertical position and subsequent tilting to operating position

43/1185 . . . Ignition systems **[3]**

43/119 . . Details, e.g. for locating perforating place or direction

43/12 . Methods or apparatus for controlling the flow of the obtained fluid to or in wells (E21B 43/25 takes precedence; valve arrangements E21B 34/00)

43/14 . Obtaining from a multiple-zone well

43/16 . Enhanced recovery methods for obtaining hydrocarbons (fracturing E21B 43/26; obtaining slurry E21B 43/29; reclamation of contaminated soil in situ B09C)

43/17 . . Interconnecting two or more wells by fracturing or otherwise attacking the formation (E21B 43/247 takes precedence) **[3]**

43/18 . . Repressuring or vacuum methods

43/20 . . Displacing by water

43/22 . . Use of chemicals or bacterial activity (E21B 43/27 takes precedence; chemical or bacterial compositions therefor C09K 8/58; chemical features in extracting oils from oil sands or shales C10G) **[1,8]**

43/24 . . using heat, e.g. steam injection (heating, cooling or insulating wells E21B 36/00)

43/241 . . . combined with solution mining of non-hydrocarbon minerals, e.g. solvent pyrolysis of oil shale **[5]**

43/243 . . . Combustion in situ **[3]**

43/247 . . . . in association with fracturing processes **[3]**

43/248 . . . . . using explosives **[5]**

43/25 . Methods for stimulating production (dump bailers E21B 27/02; vibration generating arrangements E21B 28/00; chemical compositions therefor C09K 8/60) **[1,8]**

43/26 . . by forming crevices or fractures

43/263 . . . using explosives **[3]**

43/267 . . . reinforcing fractures by propping **[3]**

43/27 . . . by use of eroding chemicals, e.g. acids

43/28 . Dissolving minerals other than hydrocarbons, e.g. by an alkaline or acid leaching agent (E21B 43/241 takes precedence) **[5]**

43/285 . Melting minerals, e.g. sulfur (E21B 43/24 takes precedence; heating, cooling or insulating arrangements for wells E21B 36/00) **[5]**

43/29 . Obtaining a slurry of minerals, e.g. by using nozzles **[5]**

43/295 . Gasification of minerals, e.g. for producing mixtures of combustible gases (E21B 43/243 takes precedence) **[5]**

43/30 . Specific pattern of wells, e.g. optimizing the spacing of wells (production satellite stations E21B 43/017) **[3]**

43/32 . Preventing gas- or water-coning phenomena, i.e. the formation of a conical column of gas or water around wells **[3]**

43/34 . Arrangements for separating materials produced by the well (separating apparatus per se, see the relevant subclasses) **[3]**

43/36 . . Underwater separating arrangements (E21B 43/38 takes precedence) **[3]**

43/38 . . in the well **[3]**

43/40 . . Separation associated with re-injection of separated materials **[3]**

Automatic control; Surveying or testing [3]

44/00 Automatic control systems specially adapted for drilling operations, i.e. self-operating systems which function to carry out or modify a drilling operation without intervention of a human operator, e.g. computer-controlled drilling systems (for non-automatic drilling control, see the operation controlled; automatic feeding from rack and connecting of drilling pipes E21B 19/20; controlling pressure or flow of drilling fluid E21B 21/08); **Systems specially adapted for monitoring a plurality of drilling variables or conditions** (means for transmitting measuring-signals from the well to the surface E21B 47/12) **[3]**

44/02 . Automatic control of the tool feed (E21B 44/10 takes precedence) **[7]**

44/04 . . in response to the torque of the drive **[7]**

44/06 . . in response to the flow or pressure of the motive fluid of the drive **[7]**

44/08 . . in response to the amplitude of the movement of the percussion tool, e.g. jump or recoil **[7]**

44/10 . Arrangements for automatic stopping when the tool is lifted from the working face **[7]**

Surveying or testing

45/00 Measuring the drilling time or rate of penetration

47/00 **Survey of boreholes or wells** (monitoring pressure or flow of drilling fluid E21B 21/08; geophysical logging G01V)

47/01 . Devices for supporting measuring instruments on a drill pipe, rod or wireline (setting or locking tools in boreholes or wells E21B 23/00); Protecting measuring instruments in boreholes against heat, shock, pressure or the like **[6]**

47/02 . Determining slope or direction (clinometers or direction meters G01C)

47/022 . . of the borehole

47/024 . . of devices in the borehole (E21B 47/022 takes precedence)

47/026 . . of penetrated ground layers (apparatus for obtaining oriented cores E21B 25/16; formation testing E21B 49/00)

47/04 . Measuring depth or liquid level (measuring liquid level in general G01F)

47/06 . Measuring temperature or pressure (measuring temperature in general G01K; measuring pressure in general G01L)

47/08 . Measuring diameter (measuring diameter in general G01B)

47/09 . Locating or determining the position of objects in boreholes or wells; Identifying the free or blocked portions of pipes (measuring depth E21B 47/04; measuring diameter E21B 47/08) **[3]**

47/10 . Locating fluid leaks, intrusions, or movements

47/12 . Means for transmitting measuring-signals from the well to the surface, e.g. for logging while drilling (remote signalling in general G08)

47/14 . . using acoustic waves **[6]**

47/16 . . . through the drill string or casing **[6]**

47/18 . . . through the well fluid **[6]**

49/00 **Testing the nature of borehole walls**; **Formation testing**; **Methods or apparatus for obtaining samples of soil or well fluids, specially adapted to earth drilling or wells** (sampling in general G01N 1/00)

49/02 . by mechanically taking samples of the soil (apparatus for obtaining undisturbed cores E21B 25/00; investigation of foundation soil in situ E02D 1/00)

49/04 . . using explosives in boreholes; using projectiles penetrating the wall **[3]**

49/06 . . using side-wall drilling tools or scrapers

49/08 . Obtaining fluid samples or testing fluids, in boreholes or wells **[3]**

49/10 . . using side-wall fluid samplers or testers **[3]**

E21C MINING OR QUARRYING

Subclass index

Cutting; **Slitting**; **Dislodging**

25/00 **Cutting machines, i.e. for making slits approximately parallel or perpendicular to the seam** (dislodging machines with slitting means E21C 27/02, E21C 27/10, E21C 27/18)

25/02 . Machines slitting solely by one or more percussive tools moved through the seam

25/04 . . Cutting crowns or other tools (percussion drill bits E21B 10/36)

25/06 . Machines slitting solely by one or more cutting rods or cutting drums which rotate, move through the seam, and may or may not reciprocate

25/08 . . Mountings for the rods or drums

25/10 . . Rods; Drums **[6]**

25/14 . . with equipment for cleaning the slit (associated with cutter chain machines E21C 25/50)

25/16 . Machines slitting solely by one or more rotating saws, cutting discs, or wheels

25/18 . . Saws; Discs; Wheels

25/20 . Machines slitting solely by one or more reciprocating sawing implements or reciprocating cutter chains; Shaker conveyers with cutting means

25/22 . Machines slitting solely by one or more cutter chains moving unidirectionally along jibs

25/24 . . with flat jibs only

25/26 . . with curved jibs only

25/28 . . Chains or chain guides **[6]**

25/30 . . . Chain guides

25/32 . . . . specially adapted for curved jibs

25/34 . . . Chains

25/36 . . . . Couplings for links

25/40 . . . . having links with integrally formed picks

25/50 . . with equipment for cleaning the slit (associated with rotary-rod or rotary-drum machines E21C 25/14)

25/52 . Machines incorporating two or more of the slitting means according to groups E21C 25/02, E21C 25/06, E21C 25/16, E21C 25/20 and E21C 25/22

25/54 . Slitting by unguided cutter cables or cutter chains or by unguided tools drawn along the working face by cables or the like (dislodging by planing means E21C 27/32; propulsion by haulage cables E21C 29/14)

25/56 . Slitting by cutter cables or cutter chains or by tools drawn along the working face by cables or the like, in each case guided parallel to the face, e.g. by a conveyer, by a guide parallel to a conveyer (pressing the conveyer equipped with tools toward the working face E21C 35/14)

25/58 . Machines slitting by drilling hole on hole

25/60 . Slitting by jets of water or other liquid (picks with arrangement of fluid-spraying nozzles E21C 35/187; distribution of spraying fluids in rotating cutter-heads E21C 35/23) **[6]**
25/62 . Machines for making slits approximately perpendicular to the seams either level with, or above or below the level of, the machine
25/64 . Slitting machines guided solely by hand and either carried by hand or mounted on supports (hand-held power-operated tools E21C 37/22)
25/66 . Machines for making slits with additional arrangements for drilling
25/68 . Machines for making slits combined with equipment for removing, e.g. by loading, material won by other means (slitting machines combined with planing means E21C 27/18; removing chippings E21C 35/20)

27/00 Machines which completely free the mineral from the seam

27/01 . specially adapted for removing overhanging coal
27/02 . solely by slitting (rods, drums, for same E21C 25/10; saws, discs, wheels E21C 25/18; chains, chain guides, for same E21C 25/28)
27/04 . . by a single chain guided on a frame with or without auxiliary slitting means
27/06 . . . with a slewing frame
27/08 . . with additional means for cutting the mineral into blocks
27/10 . by both slitting and breaking-down
27/12 . . breaking-down effected by acting on the vertical face of the mineral, e.g. by percussive tools
27/14 . . breaking-down effected by force or pressure applied to side of slit, e.g. by wedges (breaking-down by means inserted in boreholes E21C 37/00)
27/16 . . . with means for both slitting and breaking-down
27/18 . by both slitting and planing
27/20 . Mineral freed by means not involving slitting
27/22 . . by rotary drills with breaking-down means, e.g. wedge-shaped drills
27/24 . . by milling means acting on the full working face
27/26 . . by closely adjacent cutter chains acting on the full working face
27/28 . . by percussive drills with breaking-down means, e.g. wedge-shaped tools
27/30 . . by jaws, buckets, or scoops that scoop-out the mineral
27/32 . . by adjustable or non-adjustable planing means with or without loading arrangements (by percussed planing means E21C 27/46)
27/34 . . . Machine propelled along the working face by cable or chain
27/35 . . . . Ram-ploughs
27/36 . . . Machine self-propelled along the working face
27/38 . . . Machine stationary while planing in an arc
27/40 . . . Machine and its planing tool making alternative step-wise movements along the working face
27/42 . . . combined with scraper or collector box
27/44 . . . Planing knives (mining picks E21C 35/18)
27/46 . . by percussed planing means

29/00 Propulsion of machines for slitting or completely freeing the mineral from the seam

29/02 . by means on the machine exerting a thrust against fixed supports
29/04 . by cable or chains
29/06 . . anchored at one or both ends to the mine working face
29/08 . . . Anchoring arrangements (for anchoring of conveyers only E21F 13/00)
29/10 . . . Cable or chain co-operating with a winch or the like on the machine
29/12 . . . Machines propelled by thrust or pull against a part alternately anchored to, and released from, a cable or chain
29/14 . . by haulage cable or chain pulling the machine along the working face
29/16 . . . Winches or other means for pulling cable or chain (winches in general B66D)
29/18 . . . Coupling and uncoupling machine to cable or chain
29/20 . . with safety devices operating in the event of breakage of the cable or chain
29/22 . by wheels, endless tracks, or the like
29/24 . . Trucks carrying the machine while working
29/26 . . . with means for adjustably positioning the machine on the truck
29/28 . . . . adjusting the height of the whole machine

31/00 Driving means incorporated in machines for slitting or completely freeing the mineral from the seam

31/02 . for cutting or breaking-down devices
31/04 . . imparting both a rotary and reciprocating motion
31/06 . . actuated by an endless cable or chain
31/08 . for adjusting parts of the machines
31/10 . for slewing parts of the machines
31/12 . Component parts

33/00 Trucks or other devices for transporting machines for slitting or completely freeing the mineral from the seam

33/02 . with equipment for loading or unloading the machine on to, or from, the truck

35/00 Details of, or accessories for, machines for slitting or completely freeing the mineral from the seam, not provided for in groups E21C 25/00 to E21C 33/00, E21C 37/00 or E21C 39/00

35/02 . Locking equipment for slewable parts
35/04 . Safety devices (operating in the event of breakage of a haulage cable or chain E21C 29/20)
35/06 . Equipment for positioning the whole machine in relation to its sub-structure
35/08 . Guiding the machine
35/10 . . by feelers contacting the working face
35/12 . . along a conveyer for the cut material
35/14 . . . Equipment for pressing the conveyer towards the working face
35/16 . . by making use of the timbering, filling, or other supports
35/18 . Mining picks; Holders therefor (planing knives E21C 27/44) **[6]**
35/183 . . with inserts or layers of wear-resisting material **[6]**
35/187 . . with arrangement of fluid-spraying nozzles (supply of fluid to the nozzles E21C 35/22) **[6]**
35/19 . . Means for fixing picks or holders **[6]**
35/193 . . . using bolts as main fixing elements **[6]**
35/197 . . . using sleeves, rings or the like, as main fixing elements **[6]**
35/20 . General features of equipment for removal of chippings, e.g. for loading on conveyer
35/22 . Equipment for preventing the formation of, or for removal of, dust (picks with arrangement of fluid-spraying nozzles E21C 35/187; methods or apparatus for flushing boreholes E21B 21/00)

35/23 . . Distribution of spraying-fluids in rotating cutter-heads **[6]**

35/24 . Remote control specially adapted for machines for slitting or completely freeing the mineral (control in general G05)

37/00 Other methods or devices for dislodging with or without loading (breaking-down by means inserted in slits E21C 27/14)

37/02 . by wedges

37/04 . by devices with parts pressed mechanically against the wall of a borehole

37/06 . by making use of hydraulic or pneumatic pressure in a borehole

37/08 . . Devices with pistons, plungers, or the like pressed locally against the wall of the borehole

37/10 . . Devices with expanding elastic casings

37/12 . . by injecting into the borehole a liquid, either initially at high pressure or subsequently subjected to high pressure, e.g. by pulses, by explosive cartridges acting on the liquid (slitting by jets of water E21C 25/60; blasting by explosives F42D)

37/14 . . by compressed air; by gas blast; by gasifying liquids

37/16 . by fire-setting or by similar methods based on a heat effect (drilling by use of heat E21B 7/14)

37/18 . by electricity

37/20 . by ultrasonics

37/22 . Hand tools or hand-held power-operated tools specially adapted for dislodging minerals (slitting machines guided solely by hand E21C 25/64)

37/24 . . Pick hammers (pneumatic hammers in general B25D; percussion drilling E21B 1/00)

37/26 . Chisels or other cutting tools not mentioned before

39/00 Devices for testing <u>in situ</u> the hardness or other properties of minerals, e.g. for giving information as to the selection of suitable mining tools

<u>Methods of mining or quarrying</u>; **<u>Open-pit mining</u>**; **<u>Layouts therefor</u>**

41/00 Methods of underground or surface mining (E21C 45/00 takes precedence); **Layouts therefor** (for peat E21C 49/00) **[5]**

41/16 . Methods of underground mining (winning machines therefor E21C 25/00 to E21C 39/00); Layouts therefor **[5]**

41/18 . . for brown or hard coal **[5]**

41/20 . . for rock salt or potash salt **[5]**

41/22 . . for ores, e.g. mining placers **[5]**

41/24 . . for oil-bearing deposits **[5]**

41/26 . Methods of surface mining (machines for obtaining, or the removal of, materials in open-pit mines E21C 47/00); Layouts therefor **[5]**

41/28 . . for brown or hard coal **[5]**

41/30 . . for ores, e.g. mining placers **[5]**

41/32 . Reclamation of surface-mined areas (machines or methods for treating or working soil for agricultural purposes A01B 77/00, A01B 79/00; machines for back-filling E02F 5/22) **[5]**

45/00 Methods of hydraulic mining; **Hydraulic monitors** (E21C 25/60 takes precedence) **[5]**

45/02 . Means for generating pulsating fluid jets **[5]**

45/04 . . by use of highly pressurised liquid **[5]**

45/06 . . by use of compressed gases **[5]**

45/08 . Automatic or remote control of hydraulic monitors **[5]**

47/00 Machines for obtaining, or the removal of, materials in open-pit mines (obtaining peat E21C 49/00)

47/02 . for coal, brown coal, or the like (dredgers or soil-shifting machines in general E02F) **[3]**

47/04 . . Conveyer bridges used in co-operation with the winning apparatus **[3]**

47/06 . . Cableway conveyers used in co-operation with the winning apparatus (underground hauling E21F 13/00)

47/08 . . Devices for cutting-out partings, e.g. layers of sand between seams of coal

47/10 . for quarrying stone, sand, gravel, or clay

49/00 Obtaining peat; **Machines therefor** (treating peat C10F)

49/02 . by excavating

49/04 . by digging in the form of peat sods

50/00 Obtaining minerals from underwater, not otherwise provided for (suction dredgers or component parts thereof E02F 3/88; equipment for conveying or separating excavated material E02F 7/00; dippers G01N 1/12) **[5]**

50/02 . dependent on the ship movements (vessels or floating structures adapted for special purposes B63B 35/00) **[5]**

51/00 Apparatus for, or methods of, winning materials from extraterrestrial sources (cosmonautics B64G) **[2]**

E21D SHAFTS; **TUNNELS**; **GALLERIES**; **LARGE UNDERGROUND CHAMBERS** (soil-conditioning or soil-stabilising materials C09K 17/00; cutting machines for mining or quarrying E21C; safety devices, transport, rescue, ventilation or drainage E21F) **[2,6]**

(1) This subclass <u>covers</u> methods or apparatus for making or lining tunnels, galleries or large underground chambers, using underground mining methods only, i.e. not involving disturbance of the ground surface. **[6]**

(2) This subclass <u>does not cover</u> underground spaces made by foundation engineering, i.e. involving disturbance of the ground surface, which are covered by subclass E02D. **[6]**

<u>Subclass index</u>

Shafts

1/00 **Sinking shafts**
1/02 . by hand
1/03 . mechanically (E21D 1/08 takes precedence)
1/04 . . with grabs
1/06 . . with shaft-boring cutters (drilling machines E21B)
1/08 . while moving the lining downwards
1/10 . Preparation of the ground
1/12 . . by freezing
1/14 . . . Freezing apparatus
1/16 . . by petrification (grouting anchoring-bolts E21D 20/02)

3/00 **Raising shafts, i.e. working upwards from the bottom**

5/00 **Lining shafts**; **Linings therefor** (E21D 11/00 takes precedence) **[3]**
5/01 . using prefabricated lining lowered into a hole filled with liquid or viscous mass
5/012 . Use of fluid-tight or anti-friction material on outside of, or between, lining layers
5/016 . Bearer curbs
5/02 . with wood (E21D 5/01, E21D 5/012, E21D 5/016 take precedence)
5/04 . with brick, concrete, stone, or similar building materials (E21D 5/01, E21D 5/012, E21D 5/016 take precedence)
5/06 . with iron or steel (E21D 5/01, E21D 5/012, E21D 5/016 take precedence)
5/08 . . in the form of profiled parts
5/10 . . in the form of tubbing
5/11 . with combinations of different materials, e.g. wood, metal, concrete (E21D 5/01, E21D 5/012, E21D 5/016 take precedence)
5/12 . Accessories for making shaft linings, e.g. suspended cradles, shutterings

7/00 **Shaft equipment, e.g. timbering within the shaft**
7/02 . Arrangement of guides for cages in shafts; Connection of guides for cages to shaft walls (guideways or guides for elevators B66B 7/02)

8/00 **Shafts not provided for in groups E21D 1/00 to E21D 7/00 [8]**

Tunnels; **Galleries**; **Large underground chambers**; **Linings therefor** **[3,6]**

9/00 **Tunnels or galleries, with or without linings**; **Methods or apparatus for making thereof** (linings per se E21D 11/00; galleries protecting against falling rocks or avalanches E01F 7/04); **Layout of tunnels or galleries [3]**
9/01 . Methods or apparatus for enlarging or restoring the cross-section of tunnels, e.g. by restoring the floor to its original level **[7]**
9/02 . Driving inclined tunnels or galleries **[3]**
9/04 . Driving tunnels or galleries through loose materials; Apparatus therefor not otherwise provided for
9/06 . Making by using a driving shield **[2]**
9/08 . . with additional boring or cutting means **[2]**
9/087 . . . with a rotary drilling-head cutting simultaneously the whole cross-section, i.e. full-face machines **[7]**
9/093 . . Control of the driving shield **[7]**
9/10 . Making by using boring or cutting machines (E21D 9/08 takes precedence; similar machines for mining E21C 27/20; mining picks E21C 35/18) **[3]**
9/11 . . with a rotary drilling-head cutting simultaneously the whole cross-section, i.e. full-face machines **[7]**
9/12 . Devices for removing or hauling away excavated material or spoil; Working or loading platforms (underground transport E21F 13/00) **[2]**
9/13 . . using hydraulic or pneumatic conveying means **[7]**
9/14 . Layout of tunnels or galleries; Constructional features of tunnels or galleries, not otherwise provided for, e.g. portals, day-light attenuation at tunnel openings **[3]**

11/00 **Lining tunnels, galleries or other underground cavities, e.g. large underground chambers**; **Linings therefor**; **Making such linings in situ, e.g. by assembling** (E21D 15/00 to E21D 23/00 take precedence; specially for shafts E21D 5/00; lining pressure water galleries, linings therefor E02B 9/06) **[2]**
11/02 . Lining predominantly with wood **[2]**
11/03 . . using timber-setting machines
11/04 . Lining with building materials (E21D 11/02, E21D 11/14 take precedence) **[2]**
11/05 . . using compressible insertions
11/06 . . with bricks
11/07 . . . using brick-laying machines
11/08 . . with preformed concrete slabs
11/10 . . with concrete cast in situ; Shuttering or other equipment adapted therefor
11/12 . . Temporary supports for use during building; Accessories
11/14 . Lining predominantly with metal **[2]**
11/15 . . Plate linings; Laggings, i.e. linings designed for holding back formation material or for transmitting the load to main supporting members (insulation E21D 11/38) **[2]**
11/18 . . Arch members
11/20 . . . Special cross-sections, e.g. corrugated
11/22 . . . Clamps or other yieldable means for interconnecting adjacent arch members either rigidly, or allowing arch member parts to slide when subjected to excessive pressure
11/24 . . . Knuckle joints or links between arch members
11/26 . . . Shoes for connecting arch members to longitudinal struts
11/28 . . Longitudinal struts
11/30 . . Bases for lower arch members (for props E21D 15/54)
11/34 . . Joints between vertical props and horizontal top bars (end caps forming part of the props E21D 15/54)
11/36 . . Linings or supports specially shaped for tunnels or galleries of irregular cross-section **[2,3]**
11/38 . Waterproofing (in general E02D 31/00); Heat insulating; Soundproofing; Electric insulating (for building constructions in general E04B 1/62) **[2]**
11/40 . Devices or apparatus specially adapted for handling or placing units of linings for tunnels or galleries **[2]**

13/00 **Large underground chambers**; **Methods or apparatus for making them** (lining E21D 11/00) **[6]**
13/02 . Methods
13/04 . Special equipment; Accessories

Working-face supports

15/00 **Props** (in the building art E04G 25/00); **Chocks**
15/02 . Non-telescopic props
15/04 . . with wooden prop parts joined by double conical connectors
15/06 . . with parts joined by a lock, with or without slight axial adjustability
15/08 . . . with toggle joint connection
15/10 . . . with dog-clutch or pin-and-hole connection
15/12 . . . with locking devices located near head or foot
15/14 . Telescopic props (general means for fixing telescopic parts together F16B)
15/15 . . Means counteracting entry of dirt; Built-in cleaning devices
15/16 . . with parts held together by positive means, with or without relative sliding movement when the prop is subject to excessive pressure
15/18 . . . with one part resting on a supporting medium, e.g. rubber, sand, bitumen, lead, located in the other part, with or without expulsion or displacement of the medium upon excessive pressure
15/20 . . . with pawl, pin, cross-piece, or the like engaging with ratchet teeth, notches, holes, or the like spaced apart at intervals
15/22 . . . with member, pin, cross-piece, or the like ruptured, sheared through, or permanently deformed upon excessive pressure
15/24 . . . with axial screw-and-nut, rack-and-worm, or like mechanism
15/26 . . . . with screw, worm, or the like not self-locking but normally prevented from rotation by friction members which slip upon excessive pressure
15/28 . . with parts held relatively to each other by friction or gripping, e.g. using wedges
15/30 . . . by means expanded or contracted by pressure applied through the medium of a fluid or quasi-fluid, e.g. rubber
15/32 . . . by a deformable collar
15/34 . . . by axially-moving balls, rollers, or the like
15/36 . . . by a tiltable collar surrounding one or both parts
15/38 . . . with longitudinally-divided upper or lower prop parts, e.g. interfitting laminations
15/40 . . . Collar or other support gripped to one or both parts by toggle-action, cam, or other member pivoted or similarly mounted
15/42 . . . with special parts to influence the friction
15/43 . . . Details of wedges (friction linings or pads E21D 15/42)
15/44 . . Hydraulic, pneumatic, or hydraulic-pneumatic props
15/45 . . . having closed fluid system, e.g. with built-in pumps or accumulators
15/46 . . with load-measuring devices; with alarm devices
15/48 . Chocks or the like
15/50 . Component parts or details of props (E21D 15/43, E21D 15/58, E21D 15/60 take precedence)
15/502 . . Prop bodies characterised by their shape, e.g. of specified cross-section
15/51 . . specially adapted to hydraulic, pneumatic, or hydraulic-pneumatic props, e.g. arrangements of relief valves
15/52 . . Extensible units located above or below standard props
15/54 . . Details of the ends of props (for permitting step-by-step movement E21D 23/06)
15/55 . . . of prop heads
15/56 . . Details of locks of telescopic props
15/58 . Devices for setting props
15/582 . . for mechanical props
15/59 . . for hydraulic, pneumatic, or hydraulic-pneumatic props
15/60 . Devices for withdrawing props or chocks

17/00 **Caps for supporting mine roofs**
17/01 . characterised by the shape of the cap, e.g. of specified cross-section
17/02 . Cantilever extension or similar protecting devices
17/022 . . Auxiliary devices for temporary support of roof-supporting beams whilst assembling
17/03 . . Brackets for roof-supporting bars
17/04 . . for use in longwall working
17/05 . . . hydraulically extensible
17/054 . . . hydraulically pivotable
17/06 . . for use in drifting galleries
17/08 . . Cap joints for obtaining a coal-face free of pit-props
17/082 . . . of sliding type
17/086 . . . of articulated type
17/10 . Details of mine caps for engaging the tops of pit-props, with or without retaining-plates; Retaining-plates

19/00 **Provisional protective covers for working space** (E21D 9/06, E21D 23/00 take precedence) **[3]**
19/02 . for use in longwall working
19/04 . for use in drifting galleries
19/06 . Arrangements for applying the covers **[6]**

20/00 **Setting anchoring-bolts** (anchoring bolts for shafts, tunnels or galleries E21D 21/00; means for anchoring structural elements or bulkheads specially adapted to foundation engineering E02D 5/74; dowels or other devices fastened in walls or the like by inserting them in holes made therein for that purpose F16B 13/00) **[5]**
20/02 . with provisions for grouting

21/00 **Anchoring-bolts for roof, floor, or shaft-lining protection** (dowels or other devices fastened in walls or the like by inserting them in holes made therein for that purpose F16B 13/00) **[5]**
21/02 . having means for indicating tension (screwed connections specially modified for indicating tensile load F16B 31/02)

23/00 **Mine roof supports for step-by-step movement, e.g. in combination with provisions for shifting of conveyers, mining machines, or guides therefor** (shifting of mine conveyers at the working face, per se E21F 13/08)
23/03 . having protective means, e.g. shields, for preventing or impeding entry of loose material into the working space or support **[4]**
23/04 . Structural features of the supporting construction, e.g. linking members between adjacent frames or sets of props; Means for counteracting lateral sliding on inclined floor (E21D 23/14 takes precedence)

23/06 . . Special mine caps or special tops of pit-props for permitting step-by-step movement
23/08 . Advancing mechanisms (E21D 23/16 takes precedence)
23/10 . . with advancing devices separate from the supporting construction
23/12 . Control, e.g. using remote control (E21D 23/16 takes precedence)
23/14 . . Effecting automatic sequential movement of supports, e.g. one behind the other
23/16 . Hydraulic or pneumatic features, e.g. circuits, arrangement or adaptation of valves, setting or retracting devices
23/18 . . of advancing mechanisms
23/20 . . . for sequential movement, e.g. one behind the other
23/22 . . . incorporated in mine caps
23/24 . . . the advancing mechanisms being separate from the supporting construction
23/26 . . Hydraulic or pneumatic control

E21F SAFETY DEVICES, TRANSPORT, FILLING-UP, RESCUE, VENTILATION, OR DRAINAGE IN OR OF MINES OR TUNNELS [2]

Subclass index

Ventilation of mines or tunnels

1/00 Ventilation of mines or tunnels; **Distribution of ventilating currents** (ventilating rooms or spaces in general F24F) **[2]**
1/02 . Test models (analogue computers therefor G06G 7/50)
1/04 . Air ducts (suspension devices E21F 17/02)
1/06 . . Duct connections (tube connections in general F16L)
1/08 . Ventilation arrangements in connection with air ducts, e.g. arrangements for mounting ventilators (ventilators per se F04D)
1/10 . Air doors (doors in general E06B)
1/12 . . Devices for automatically opening air doors
1/14 . Air partitions; Air locks (dams E21F 17/103; air locks for foundations E02D) **[6]**
1/16 . Shaft covers
1/18 . Gravity-flow ventilation (E21F 1/02 to E21F 1/16 take precedence) **[2]**

3/00 Cooling or drying of air (air-conditioning rooms or spaces in general F24F)

Safety devices; **Rescue devices**

5/00 Means or methods for preventing, binding, depositing or removing dust; **Preventing explosions or fires** (dams E21F 17/103; applying liquids or other fluent materials to surfaces in general B05; flue-gas indicators G01N) **[6]**
5/02 . by wetting or spraying
5/04 . . Spraying barriers (spray nipples, spraying in general B05B, B05D; picks with arrangement of fluid-spraying nozzles E21C 35/187)
5/06 . . Fluids used for spraying
5/08 . Rock dusting; Depositing other protective substances
5/10 . . Devices for rock dusting
5/12 . . Composition of rock dust
5/14 . Fluid barriers or rock dusters made to work by, or at the same time as, shots or explosions
5/16 . Layers of hygroscopic or other salts deposited on floors, walls, or the like, for binding dust; Deposition of such layers (dust-absorbing materials in general C09K 3/22)
5/18 . Impregnating walls, or the like, with liquids for binding dust
5/20 . Drawing-off or depositing dust (methods or apparatus for flushing boreholes E21B 21/00; while slitting E21C 35/22) **[1,7]**

7/00 Methods or devices for drawing-off gases with or without subsequent use of the gas for any purpose

9/00 Devices preventing sparking of machines or apparatus (preventing sparking of electric machines or apparatus H01K, H02K)

11/00 Rescue devices or other safety devices, e.g. safety chambers, escape ways (breathing aids for curative purposes A61H 31/00; respiratory apparatus A62B 7/00; revival apparatus A62B 33/00)

13/00 Transport specially adapted to underground conditions (mine cars B61D; transport in general, loading B65G)
13/02 . in galleries
13/04 . in gravity inclines; in staple or inclined shafts
13/06 . at or adjacent to the working face
13/08 . Shifting conveyers or other transport devices from one location at the working face to another (guiding mining machines along conveyers for the cut mineral E21C 35/12; in combination with mine roof supports for step-by-step movement E21D 23/00)
13/10 . Anchorings for conveyers **[2]**

15/00 Methods or devices for placing filling-up materials in underground workings (dams E21F 17/103) **[6]**
15/02 . Supporting means, e.g. shuttering, for filling-up materials
15/04 . . Stowing mats; Goaf wire netting; Partition walls
15/06 . Filling-up mechanically
15/08 . Filling-up hydraulically or pneumatically (hydraulic or pneumatic transport devices B65G; pipes, pipe couplings F16L)
15/10 . . Hydraulic or pneumatic filling-up machines

16/00 **Drainage** (keeping dry foundation sites or other areas in the ground E02D 19/00) **[2]**

16/02 . of tunnels **[2]**

17/00 **Methods or devices for use in mines or tunnels, not covered elsewhere** (mine lighting F21, H05B) **[2]**

17/02 . Suspension devices for tubes or the like, e.g. for ventilating ducts (supporting pipes, cables or protective tubing in general F16L 3/00 to F16L 7/00)

17/04 . Distributing means for power supply **[2]**

17/06 . . Distributing electric power; Cable networks; Conduits for cables (circuit arrangements for supplying or distributing electric power in general H02J)

17/08 . . Distributing hydraulic power; Pipe networks for hydraulic liquid (pipe-line systems in general F17D)

17/10 . . Distributing pneumatic power; Pipe networks for compressed air (pipe-line systems in general F17D)

17/103 . Dams, e.g. for ventilation **[6]**

17/107 . . inflatable **[6]**

17/12 . . Dam doors

17/16 . Modification of mine passages or chambers for storage purposes, especially for liquids or gases (storing fluids in natural or artificial cavities or chambers in the earth B65G 5/00)

17/18 . Special adaptations of signalling or alarm devices (for elevators, escalators or moving walkways B66B; gas-sensitive devices per se G01N)

E99 SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

E99Z SUBJECT MATTER NOT OTHERWISE PROVIDED FOR IN THIS SECTION [8]

Note

This subclass covers subject matter that: **[8]**
(a) is not provided for, but is most closely related to, the subject matter covered by the subclasses of this section, and **[8]**
(b) is not explicitly covered by any subclass of another section. **[8]**

99/00 Subject matter not otherwise provided for in this section [8]

SECTION F – MECHANICAL ENGINEERING; LIGHTING; HEATING; WEAPONS; BLASTING

ENGINES OR PUMPS

Guide to the use of this subsection (classes F01 to F04)

The following notes are meant to assist in the use of this part of the classification scheme.

(1) In this subsection, subclasses or groups designating "engines" or "pumps" cover methods of operating the same, unless otherwise specifically provided for.

(2) In this subsection, the following terms or expressions are used with the meanings indicated:

- "engine" means a device for continuously converting fluid energy into mechanical power. Thus, this term includes, for example, steam piston engines or steam turbines, per se, or internal-combustion piston engines, but it excludes single-stroke devices. "Engine" also includes the fluid-motive portion of a meter unless such portion is particularly adapted for use in a meter;
- "pump" means a device for continuously raising, forcing, compressing, or exhausting fluid by mechanical or other means. Thus, this term includes fans or blowers;
- "machine" means a device which could equally be an engine and a pump, and not a device which is restricted to an engine or one which is restricted to a pump;
- "positive displacement" means the way the energy of a working fluid is transformed into mechanical energy, in which variations of volume created by the working fluid in a working chamber produce equivalent displacements of the mechanical member transmitting the energy, the dynamic effect of the fluid being of minor importance, and vice versa;
- "non-positive displacement" means the way the energy of a working fluid is transformed into mechanical energy, by transformation of the energy of the working fluid into kinetic energy, and vice versa;
- "oscillating-piston machine" means a positive-displacement machine in which a fluid-engaging work-transmitting member oscillates. This definition applies also to engines and pumps;
- "rotary-piston machine" means a positive-displacement machine in which a fluid-engaging work-transmitting member rotates about a fixed axis or about an axis moving along a circular or similar orbit. This definition applies also to engines and pumps;
- "rotary piston" means the work-transmitting member of a rotary-piston machine and may be of any suitable form, e.g., like a toothed gear;
- "cooperating members" means the "oscillating piston" or "rotary piston" and another member, e.g., the working-chamber wall, which assists in the driving or pumping action;
- "movement of the co-operating members" is to be interpreted as relative, so that one of the "co-operating members" may be stationary, even though reference may be made to its rotational axis, or both may move;
- "teeth or tooth equivalents" include lobes, projections or abutments;
- "internal-axis type" means that the rotational axes of the inner and outer co-operating members remain at all times within the outer member, e.g., in a similar manner to that of a pinion meshing with the internal teeth of a ring gear;
- "free piston" means a piston of which the length of stroke is not defined by any member driven thereby;
- "cylinders" means positive-displacement working chambers in general. Thus, this term is not restricted to cylinders of circular cross-section;
- "main shaft" means the shaft which converts reciprocating piston motion into rotary motion or vice versa;
- "plant" means an engine together with such additional apparatus as is necessary to run the engine. For example, a steam engine plant includes a steam engine and means for generating the steam;
- "working fluid" means the driven fluid in a pump or the driving fluid in an engine. The working fluid can be in a compressible, gaseous state, called elastic fluid, e.g. steam; in a liquid state; or in a state where there is coexistence of an elastic fluid and liquid phase.
- "steam" includes condensable vapours in general, and "special vapour" is used when steam is excluded;
- "reaction type" as applied to non-positive-displacement machines or engines means machines or engines in which pressure/velocity transformation takes place wholly or partly in the rotor. Machines or engines with no, or only slight, pressure/velocity transformation in the rotor are called "impulse type".

(3) In this subsection:

- cyclically operating valves, lubricating, gas-flow silencers or exhaust apparatus, or cooling are classified in subclasses F01L, F01M, F01N, F01Pirrespective of their stated application, unless their classifying features are peculiar to their application, in which case they are classified only in the relevant subclass of classes F01 to F04;
- lubricating, gas-flow silencers or exhaust apparatus, or cooling of machines or engines are classified in subclasses F01M, F01N, F01P except for those peculiar to steam engines which are classified in subclass F01B.

(4) For use of this subsection with a good understanding, it is essential to remember, so far as subclasses F01B, F01C, F01D, F03B, and F04B, F04C, F04D, which form its skeleton, are concerned:

- the principle which resides in their elaboration,
- the classifying characteristics which they call for, and
- their complementarity.

(i) Principle

This concerns essentially the subclasses listed above. Other subclasses, notably those of class F02, which cover better-defined matter, are not considered here.

Each subclass covers fundamentally a genus of apparatus (engine or pump) and by extension covers equally "machines" of the same kind. Two different subjects, one having a more general character than the other, are thus covered by the same subclass.

Subclasses F01B, F03B, F04B, beyond the two subjects which they cover, have further a character of generality in relation to other subclasses concerning the different species of apparatus in the genus concerned.

This generality applies as well for the two subjects dealt with, without these always being in relation to the same subclasses.

Thus, subclass F03B, in its part dealing with "machines", should be considered as being the general class relating to subclasses F04B, F04C, and in its part dealing with "engines" as being general in relation to subclass F03C.

(ii) Characteristics

(a) The principal classifying characteristic of the subclass is that of genera of apparatus, of which there are three possible: Machines; engines; pumps.

(b) As stated above, "machines" are always associated with one of the other two genera. These main genera are subdivided according to the general principles of operation of the apparatus:
Positive displacement; non-positive displacement.

(c) The positive displacement apparatus are further subdivided according to the ways of putting into effect the principle of operation, that is, to the kind of apparatus:
Simple reciprocating piston; rotary or oscillating piston; other kind.

(d) Another classifying characteristic is that of the working fluid, in respect of which three kinds of apparatus are possible, namely:
Liquid and elastic fluid; elastic fluid; liquid.

(iii) Complementarity

This resides in association of pairs of the subclasses listed above, according to the characteristics under consideration in respect of kind of apparatus or working fluid.

The subclasses concerned with the various principles, characteristics and complementarity are shown in the subsection index below.

It is seen from this index that:

– For the same kind of apparatus in a given genus, the characteristics of "working fluid" associates:
F01B and F04B to Machines
F01C and F04C to Machines
F01D and F03B to Machines
F01B and F03C to Engines
F01C and F03C to Engines
F01D and F03B to Engines

– For the same kind of working fluid, the "apparatus" characteristic relates subclasses in the same way as considerations of relative generality.

Subsection index

MACHINES
- positive displacement
  - rotary or oscillating piston
    - liquid and elastic fluid or elastic fluid F01C
    - liquid only F04C
  - reciprocating piston or other
    - liquid and elastic fluid or elastic fluid F01B
    - liquid only F04B
- non-positive displacement
  - liquid and elastic fluid or elastic fluid F01D
  - liquid only F03B

ENGINES
- positive displacement
  - rotary or oscillating piston
    - liquid and elastic fluid or elastic fluid F01C
    - liquid only F03C
  - reciprocating piston or other
    - liquid and elastic fluid or elastic fluid F01B
    - liquid only F03C
- non-positive displacement
  - liquid and elastic fluid or elastic fluid F01D
  - liquid only F03B

PUMPS
- positive displacement
  - rotary or oscillating piston F04C
  - reciprocating piston or other F04B
- non-positive displacement F04D

F01 MACHINES OR ENGINES IN GENERAL; ENGINE PLANTS IN GENERAL; STEAM ENGINES

F01B **MACHINES OR ENGINES, IN GENERAL OR OF POSITIVE-DISPLACEMENT TYPE, E.G. STEAM ENGINES** (of rotary-piston or oscillating-piston type F01C; of non-positive-displacement type F01D; combustion engines F02; internal-combustion aspects of reciprocating-piston engines F02B 57/00, F02B 59/00; machines for liquids F03, F04; crankshafts, crossheads, connecting-rods F16C; flywheels F16F; gearings for interconverting rotary motion and reciprocating motion in general F16H; pistons, piston-rods, cylinders, for engines in general F16J)

(1) This subclass covers, with the exception of the matter provided for in subclasses F01C to F01P:
- engines for elastic fluids, e.g. steam engines;
- engines for liquids and elastic fluids;
- machines for elastic fluids;
- machines for liquids and elastic fluids.

(2) Attention is drawn to the Notes preceding class F01, especially as regards the definitions of “steam” and “special vapour”.

Subclass index

1/00 **Reciprocating-piston machines or engines characterised by number or relative disposition of cylinders or by being built-up from separate cylinder-crankcase elements** (F01B 3/00, F01B 5/00 take precedence) **[2]**

1/01 . with one single cylinder **[2]**

1/02 . with cylinders all in one line

1/04 . with cylinders in V-arrangement

1/06 . with cylinders in star or fan arrangement

1/08 . with cylinders arranged oppositely relative to main shaft and of “flat” type

1/10 . with more than one main shaft, e.g. coupled to common output shaft (combinations of two or more machines or engines F01B 21/00)

1/12 . Separate cylinder-crankcase elements coupled together to form a unit

3/00 **Reciprocating-piston machines or engines with cylinder axes coaxial with, or parallel or inclined to, main shaft axis**

3/02 . with wobble-plate

3/04 . the piston motion being transmitted by curved surfaces

3/06 . . by multi-turn helical surfaces and automatic reversal

3/08 . . . the helices being arranged on the pistons

3/10 . Control of working-fluid admission or discharge peculiar thereto (suitable for more general application F01L)

5/00 **Reciprocating-piston machines or engines with cylinder axes arranged substantially tangentially to a circle centred on main shaft axis**

7/00 **Machines or engines with two or more pistons reciprocating within same cylinder or within essentially coaxial cylinders** (in opposite arrangement relative to main shaft F01B 1/08)

7/02 . with oppositely reciprocating pistons

7/04 . . acting on same main shaft

7/06 . . . using only connecting-rods for conversion of reciprocatory into rotary motion or vice versa

7/08 . . . . with side rods

7/10 . . . . having piston-rod of one piston passed through other piston

7/12 . . . using rockers and connecting-rods

7/14 . . acting on different main shafts

7/16 . with pistons synchronously moving in tandem arrangement

7/18 . with differential piston (F01B 7/20 takes precedence)

7/20 . with two or more pistons reciprocating one within another, e.g. one piston forming cylinder of the other

9/00 **Reciprocating-piston machines or engines characterised by connections between pistons and main shafts and not specific to groups F01B 1/00 to F01B 7/00** (connections disengageable during idling F01B 31/24)

9/02 . with crankshaft

9/04 . with rotary main shaft other than crankshaft

9/06 . . the piston motion being transmitted by curved surfaces

9/08 . . with ratchet and pawl

11/00 **Reciprocating-piston machines or engines without rotary main shaft, e.g. of free-piston type**

11/02 . Equalising or cushioning devices

11/04 . Engines combined with reciprocatory driven devices, e.g. hammers (with pumps F01B 23/08; predominating aspects of driven devices, see the relevant classes for the devices)
11/06 . . for generating vibration only
11/08 . with direct fluid transmission link (F01B 11/02 takes precedence)

13/00 Reciprocating-piston machines or engines with rotating cylinders in order to obtain the reciprocating-piston motion (machines or engines of flexible-wall type F01B 19/00) **[2]**
13/02 . with one cylinder only
13/04 . with more than one cylinder
13/06 . . in star arrangement

15/00 Reciprocating-piston machines or engines with movable cylinders other than provided for in group F01B 13/00 (with movable cylinder sleeves for working-fluid control F01L)
15/02 . with reciprocating cylinders (with one piston within another F01B 7/20)
15/04 . with oscillating cylinder
15/06 . . Control of working-fluid admission or discharge peculiar thereto

17/00 Reciprocating-piston machines or engines characterised by use of uniflow principle
17/02 . Engines
17/04 . . Steam engines

19/00 Positive-displacement machines or engines of flexible-wall type
19/02 . with plate-like flexible members
19/04 . with tubular flexible members

21/00 Combinations of two or more machines or engines (F01B 23/00 takes precedence; combinations of two or more pumps F04; fluid gearing F16H; regulating or controlling, see the relevant groups)
21/02 . the machines or engines being all of reciprocating-piston type
21/04 . the machines or engines being not all of reciprocating-piston type, e.g. of reciprocating steam engine with steam turbine

23/00 Adaptations of machines or engines for special use; **Combinations of engines with devices driven thereby** (F01B 11/00 takes precedence; fluid gearing F16H; aspects predominantly concerning driven devices, see the relevant classes for these devices; regulating or controlling, see the relevant groups)
23/02 . Adaptations for driving vehicles, e.g. locomotives (arrangements in vehicles, see the relevant classes for vehicles)
23/04 . . the vehicles being waterborne vessels
23/06 . Adaptations for driving, or combinations with, hand-held tools or the like
23/08 . Adaptations for driving, or combinations with, pumps
23/10 . Adaptations for driving, or combinations with, electric generators
23/12 . Adaptations for driving rolling mills or other heavy reversing machinery

25/00 Regulating, controlling, or safety means (regulating or controlling in general G05)
25/02 . Regulating or controlling by varying working-fluid admission or exhaust, e.g. by varying pressure or quantity (distributing or expansion valve gear F01L)
25/04 . . Sensing elements
25/06 . . . responsive to speed
25/08 . . Final actuators
25/10 . . . Arrangements or adaptations of working-fluid admission or discharge valves (valves in general F16K)
25/12 . . Devices dealing with sensing elements or final actuators or transmitting means between them, e.g. power-assisted (sensing elements alone F01B 25/04; final actuators alone F01B 25/08)
25/14 . . peculiar to particular kinds of machines or engines
25/16 . Safety means responsive to specific conditions (against water hammer or the like in steam engines F01B 31/34)
25/18 . . preventing rotation in wrong direction
25/20 . Checking operation of safety devices
25/22 . Braking by redirecting working fluid
25/24 . . thereby regenerating energy
25/26 . Warning devices

27/00 Starting of machines or engines (starting combustion engines F02N)
27/02 . of reciprocating-piston engines
27/04 . . by directing working-fluid supply, e.g. by aid of by-pass steam conduits
27/06 . . . specially for compound engines
27/08 . . Means for moving crank off dead-centre (turning-gear in general F16H)

29/00 Machines or engines with pertinent characteristics other than those provided for in main groups F01B 1/00 to F01B 27/00
29/02 . Atmospheric engines, i.e. atmosphere acting against vacuum
29/04 . characterised by means for converting from one type to a different one
29/06 . . from steam engine into combustion engine
29/08 . Reciprocating-piston machines or engines not otherwise provided for
29/10 . . Engines (refrigeration machines F25B)
29/12 . . . Steam engines (toy steam engines A63H 25/00)

31/00 Component parts, details, or accessories not provided for in, or of interest apart from, other groups (machine or engine casings, other than those peculiar to steam engines, F16M)
31/02 . De-icing means for engines having icing phenomena
31/04 . Means for equalising torque in reciprocating-piston machines or engines (compensation of inertial forces, suppression of vibration in systems F16F)
31/06 . Means for compensating relative expansion of component parts
31/08 . Cooling of steam engines (cooling of fluid machines or engines in general F01P); Heating; Heat insulation (heat insulation in general F16L 59/00)
31/10 . Lubricating arrangements of steam engines (of fluid machines or engines in general F01M)
31/12 . Arrangements of measuring or indicating devices (warning apparatus F01B 25/26; measuring instruments or the like per se G01)
31/14 . Changing of compression ratio
31/16 . Silencers specially adapted for steam engines (arrangements of exhaust pipes or tubes on steam engines F01B 31/30; gas-flow silencers or exhaust silencers for machines or engines in general F01N)
31/18 . Draining
31/20 . . of cylinders
31/22 . Idling devices, e.g. having by-passing valves

31/24 . . Disengagement of connections between pistons and main shafts
31/26 . Other component parts, details, or accessories, peculiar to steam engines
31/28 . . Cylinders or cylinder covers
31/30 . . Arrangements of steam conduits
31/32 . . Arrangements or adaptations of vacuum breakers
31/34 . . Safety means against water hammer or against the penetration of water (steam traps F16T)
31/36 . . . automatically cutting-off steam supply

F01C **ROTARY-PISTON OR OSCILLATING-PISTON MACHINES OR ENGINES** (combustion engines F02; internal-combustion aspects F02B 53/00, F02B 55/00; machines for liquids F03, F04)

(1) This subclass covers:
– rotary-piston or oscillating-piston engines for elastic fluids, e.g. steam;
– rotary-piston or oscillating-piston engines for liquids and elastic fluids;
– rotary-piston or oscillating-piston machines for elastic fluids;
– rotary-piston or oscillating-piston machines for liquids and elastic fluids.

(2) In this subclass, the following expression is used with the meaning indicated:
– "rotary-piston machine" includes the German expressions "Drehkolbenmaschinen", "Kreiskolbenmaschinen", and "Umlaufkolbenmaschinen".

(3) Attention is drawn to the Notes preceding class F01, especially as regards the definitions of "rotary-piston machine", "oscillating-piston machine", "rotary piston", "co-operating members", "movement of co-operating members", "teeth or tooth-equivalents" and "internal-axis".

Subclass index

1/00 **Rotary-piston machines or engines** (with axes of co-operating members non-parallel F01C 3/00; with the working-chamber walls at least partly resiliently deformable F01C 5/00; with fluid ring or the like F01C 7/00; rotary-piston machines or engines in which the working fluid is exclusively displaced by, or exclusively displaces, one or more reciprocating pistons F01B 13/00)

Note

Group F01C 1/30 takes precedence over groups F01C 1/02 to F01C 1/24.

1/02 . of arcuate-engagement type, i.e. with circular translatory movement of co-operating members, each member having the same number of teeth or tooth-equivalents
1/04 . . of internal-axis type
1/06 . . of other than internal-axis type (F01C 1/063 takes precedence)
1/063 . . with coaxially-mounted members having continuously-changing circumferential spacing between them **[3]**
1/067 . . . having cam-and-follower type drive **[3]**
1/07 . . . having crankshaft-and-connecting-rod type drive **[3]**
1/073 . . . having pawl-and-ratchet type drive **[3]**
1/077 . . . having toothed-gearing type drive **[3]**
1/08 . of intermeshing-engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing
1/10 . . of internal-axis type with the outer member having more teeth or tooth-equivalents, e.g. rollers, than the inner member
1/107 . . . with helical teeth **[3]**
1/113 . . . the inner member carrying rollers intermeshing with the outer member **[3]**
1/12 . . of other than internal-axis type
1/14 . . . with toothed rotary pistons
1/16 . . . . with helical teeth, e.g. chevron-shaped, screw type
1/18 . . . . with similar tooth forms (F01C 1/16 takes precedence)
1/20 . . . . with dissimilar tooth forms (F01C 1/16 takes precedence)
1/22 . of internal-axis type with equidirectional movement of co-operating members at the points of engagement, or with one of the co-operating members being stationary, the inner member having more teeth or tooth-equivalents than the outer member
1/24 . of counter-engagement type, i.e. the movement of co-operating members at the points of engagement being in opposite directions
1/26 . . of internal-axis type
1/28 . . of other than internal-axis type
1/30 . having the characteristics covered by two or more of groups F01C 1/02, F01C 1/08, F01C 1/22, F01C 1/24 or having the characteristics covered by one of these groups together with some other type of movement between co-operating members
1/32 . . having both the movement defined in group F01C 1/02 and relative reciprocation between the co-operating members

1/324 . . . with vanes hinged to the inner member and reciprocating with respect to the outer member **[3]**
1/328 . . . . and hinged to the outer member **[3]**
1/332 . . . with vanes hinged to the outer member and reciprocating with respect to the inner member **[3]**
1/336 . . . . and hinged to the inner member **[3]**
1/34 . . having the movement defined in group F01C 1/08 or F01C 1/22 and relative reciprocation between the co-operating members
1/344 . . . with vanes reciprocating with respect to the inner member **[3]**
1/348 . . . . the vanes positively engaging, with circumferential play, an outer rotatable member **[3]**
1/352 . . . . the vanes being pivoted on the axis of the outer member **[3]**
1/356 . . . with vanes reciprocating with respect to the outer member **[3]**
1/36 . . having both the movements defined in groups F01C 1/22 and F01C 1/24
1/38 . . having the movement defined in group F01C 1/02 and having a hinged member (F01C 1/32 takes precedence) **[3]**
1/39 . . . with vanes hinged to the inner as well as to the outer member **[3]**
1/40 . . having the movement defined in group F01C 1/08 or F01C 1/22 and having a hinged member
1/44 . . . with vanes hinged to the inner member **[3]**
1/46 . . . with vanes hinged to the outer member **[3]**

3/00 Rotary-piston machines or engines with non-parallel axes of movement of co-operating members (with the working-chamber walls being at least partly resiliently deformable F01C 5/00)
3/02 . the axes being arranged at an angle of 90°
3/04 . . with axially-sliding vanes
3/06 . the axes being arranged otherwise than at an angle of 90°
3/08 . . of intermeshing-engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing

5/00 Rotary-piston machines or engines with the working-chamber walls at least partly resiliently deformable
5/02 . the resiliently-deformable wall being part of the inner member, e.g. of a rotary piston
5/04 . the resiliently-deformable wall being part of the outer member, e.g. of a housing
5/06 . the resiliently-deformable wall being a separate member
5/08 . . of tubular form, e.g. hose

7/00 Rotary-piston machines or engines with fluid ring or the like

9/00 Oscillating-piston machines or engines

11/00 Combinations of two or more machines or engines, each being of rotary-piston or oscillating-piston type (F01C 13/00 takes precedence; combinations of two or more pumps F04; fluid gearing F16H)

13/00 Adaptations of machines or engines for special use; **Combinations of engines with devices driven thereby** (aspects predominantly concerning driven devices, see the relevant classes for these devices)
13/02 . for driving hand-held tools or the like
13/04 . for driving pumps or compressors

17/00 Arrangements for drive of co-operating members, e.g. for rotary piston and casing
17/02 . of toothed-gearing type (F01C 1/077 takes precedence) **[3]**
17/04 . of cam-and-follower type (F01C 1/067 takes precedence) **[3]**
17/06 . using cranks, universal joints, or similar elements (F01C 1/07 takes precedence) **[3]**

19/00 Sealing arrangements in rotary-piston machines or engines (sealings in general F16J)
19/02 . Radially-movable sealings for working fluids
19/04 . . of rigid material
19/06 . . of resilient material
19/08 . Axially-movable sealings for working fluids
19/10 . Sealings for working fluids between radially and axially movable parts
19/12 . for other than working fluid

20/00 Control of, monitoring of, or safety arrangements for, machines or engines [8]
20/02 . specially adapted for several machines or engines connected in series or in parallel **[8]**
20/04 . specially adapted for reversible machines or engines **[8]**
20/06 . specially adapted for stopping, starting, idling or no-load operation **[8]**
20/08 . characterised by varying the rotational speed **[8]**
20/10 . characterised by changing the positions of the inlet or outlet openings with respect to the working chamber **[8]**
20/12 . . using sliding valves **[8]**
20/14 . . using rotating valves **[8]**
20/16 . . using lift valves **[8]**
20/18 . characterised by varying the volume of the working chamber (by changing the positions of inlet or outlet openings F01C 20/10) **[8]**
20/20 . . by changing the form of the inner or outer contour of the working chamber **[8]**
20/22 . . by changing the eccentricity between cooperating members **[8]**
20/24 . characterised by using valves regulating pressure or flow rate, e.g. discharge valves (F01C 20/10 takes precedence) **[8]**
20/26 . . using bypass channels **[8]**
20/28 . Safety arrangements; Monitoring **[8]**

21/00 Component parts, details, or accessories, not provided for in groups F01C 1/00 to F01C 20/00
21/02 . Arrangements of bearings (bearing constructions F16C)
21/04 . Lubrication (of machines or engines in general F01M)
21/06 . Heating; Cooling (of machines or engines in general F01P); Heat insulation (heat insulation in general F16L)

21/08 . Rotary pistons (reciprocating pistons in general F16J)

21/10 . Outer members for co-operation with rotary pistons; Casings (casings for rotary engines or machines in general F16M)

21/18 . Arrangements for admission or discharge of the working fluid, e.g. constructional features of the inlet or outlet **[8]**

F01D NON-POSITIVE-DISPLACEMENT MACHINES OR ENGINES, E.G. STEAM TURBINES (combustion engines F02; machines or engines for liquids F03, F04; non-positive-displacement pumps F04D)

(1) This subclass covers:
- non-positive-displacement engines for elastic fluids, e.g. steam turbines;
- non-positive-displacement engines for liquids and elastic fluids;
- non-positive-displacement machines for elastic fluids;
- non-positive-displacement machines for liquids and elastic fluids.

(2) Attention is drawn to the Notes preceding class F01, especially as regards the definitions of "reaction type", e.g. with airfoil-like blades, and "impulse type", e.g. bucket turbines.

Subclass index

1/00 Non-positive-displacement machines or engines, e.g. steam turbines (with working-fluid flows in opposite axial directions for balancing axial thrust F01D 3/02; with other than pure rotation F01D 23/00; turbines characterised by their use in special steam systems, cycles, or processes, regulating devices therefor F01K)

1/02 . with stationary working-fluid guiding means and bladed or like rotor (F01D 1/24 takes precedence; without working-fluid guiding means F01D 1/18) **[5]**

1/04 . . traversed by the working-fluid substantially axially

1/06 . . traversed by the working-fluid substantially radially

1/08 . . . having inward flow

1/10 . . having two or more stages subjected to working-fluid flow without essential intermediate pressure change, i.e. with velocity stages (F01D 1/12 takes precedence)

1/12 . . with repeated action on same blade ring

1/14 . . . traversed by the working-fluid substantially radially

1/16 . . characterised by having both reaction stages and impulse stages

1/18 . without working-fluid guiding means (F01D 1/24, F01D 1/32, F01D 1/34 take precedence) **[5]**

1/20 . . traversed by the working-fluid substantially axially

1/22 . . traversed by the working-fluid substantially radially

1/24 . characterised by counter-rotating rotors subjected to same working-fluid stream without intermediate stator blades or the like

1/26 . . traversed by the working-fluid substantially axially

1/28 . . traversed by the working-fluid substantially radially

1/30 . characterised by having a single rotor operable in either direction of rotation, e.g. by reversing of blades (combinations of machines or engines F01D 13/00)

1/32 . with pressure/velocity transformation exclusively in rotor, e.g. the rotor rotating under the influence of jets issuing from the rotor

1/34 . characterised by non-bladed rotor, e.g. with drilled holes (F01D 1/32 takes precedence; sirens G10K 7/00) **[5]**

1/36 . . using fluid friction

1/38 . . of the screw type **[5]**

3/00 Machines or engines with axial-thrust balancing effected by working fluid

3/02 . characterised by having one fluid flow in one axial direction and another fluid flow in the opposite direction

3/04 . axial thrust being compensated by thrust-balancing dummy piston or the like

5/00 Blades; **Blade-carrying members** (nozzle boxes F01D 9/02); **Heating, heat-insulating, cooling, or antivibration means on the blades or the members**

5/02 . Blade-carrying members, e.g. rotors (rotors of non-bladed type F01D 1/34; stators F01D 9/00)

5/03 . . Annular blade-carrying members having blades on the inner periphery of the annulus and extending inwardly radially, i.e. inverted rotors **[6]**

5/04 . . for radial-flow machines or engines

5/06 . . Rotors for more than one axial stage, e.g. of drum or multiple-disc type; Details thereof, e.g. shafts, shaft connections
5/08 . . Heating, heat-insulating, or cooling means
5/10 . . Antivibration means
5/12 . Blades (blade roots F01D 5/30; rotors with blades adjustable in operation F01D 7/00; stator blades F01D 9/02)
5/14 . . Form or construction (selecting particular materials, measures against erosion or corrosion F01D 5/28)
5/16 . . . for counteracting blade vibration
5/18 . . . Hollow blades; Heating, heat-insulating, or cooling means on blades
5/20 . . . Specially-shaped blade tips to seal space between tips and stator
5/22 . . Blade-to-blade connections, e.g. by shrouding
5/24 . . . using wire or the like
5/26 . . Antivibration means not restricted to blade form or construction or to blade-to-blade connections
5/28 . . Selecting particular materials; Measures against erosion or corrosion
5/30 . Fixing blades to rotors; Blade roots
5/32 . . Locking, e.g. by final locking-blades or keys
5/34 . Rotor-blade aggregates of unitary construction

7/00 Rotors with blades adjustable in operation; **Control thereof** (for reversing F01D 1/30)
7/02 . having adjustment responsive to speed

9/00 Stators (non-fluid guiding aspects of casings, regulating, controlling, or safety aspects, see the relevant groups)
9/02 . Nozzles; Nozzle boxes; Stator blades; Guide conduits
9/04 . . forming ring or sector
9/06 . Fluid supply conduits to nozzles or the like

11/00 Preventing or minimising internal leakage of working fluid, e.g. between stages (sealings in general F16J)
11/02 . by non-contact sealings, e.g. of labyrinth type (for sealing space between rotor blade tips and stator F01D 11/08)
11/04 . . using sealing fluid, e.g. steam
11/06 . . . Control thereof
11/08 . for sealing space between rotor blade tips and stator (specially-shaped blade tips therefor F01D 5/20)
11/10 . . using sealing fluid, e.g. steam
11/12 . . using a rubstrip, e.g. erodible, deformable or resiliently biased part **[6]**
11/14 . . Adjusting or regulating tip-clearance, i.e. distance between rotor-blade tips and stator casing (rotors with blades adjustable in operation F01D 7/00) **[6]**
11/16 . . . by self-adjusting means (F01D 11/12 takes precedence) **[6]**
11/18 . . . . using stator or rotor components with predetermined thermal response, e.g. selective insulation, thermal inertia, differential expansion **[6]**
11/20 . . . Actively adjusting tip-clearance **[6]**
11/22 . . . . by mechanically actuating the stator or rotor components, e.g. moving shroud sections relative to the rotor **[6]**
11/24 . . . . by selectively cooling or heating stator or rotor components **[6]**

13/00 Combinations of two or more machines or engines (F01D 15/00 takes precedence; combinations of two or more pumps F04; fluid gearing F16H; regulating or controlling, see the relevant groups)
13/02 . Working-fluid interconnection of machines or engines

15/00 Adaptations of machines or engines for special use; **Combinations of engines with devices driven thereby** (regulating or controlling, see the relevant groups; aspects predominantly concerning driven devices, see the relevant classes for the devices)
15/02 . Adaptations for driving vehicles, e.g. locomotives (arrangement in vehicles, see the relevant vehicle classes)
15/04 . . the vehicles being waterborne vessels
15/06 . Adaptations for driving, or combinations with, hand-held tools or the like
15/08 . Adaptations for driving, or combinations with, pumps
15/10 . Adaptations for driving, or combinations with, electric generators
15/12 . Combinations with mechanical gearing (driven by multiple engines F01D 13/00)

17/00 Regulating or controlling by varying flow (for reversing F01D 1/30; by varying rotor blade position F01D 7/00; specially for starting F01D 19/00; shutting-down F01D 21/00; regulating or controlling in general G05)
17/02 . Arrangement of sensing elements (sensing elements per se, see the relevant subclasses)
17/04 . . responsive to load
17/06 . . responsive to speed
17/08 . . responsive to condition of working fluid, e.g. pressure
17/10 . Final actuators (valves in general F16K)
17/12 . . arranged in stator parts
17/14 . . . varying effective cross-sectional area of nozzles or guide conduits
17/16 . . . . by means of nozzle vanes
17/18 . . . varying effective number of nozzles or guide conduits
17/20 . Devices dealing with sensing elements or final actuators or transmitting means between them, e.g. power-assisted (sensing elements alone F01D 17/02; final actuators alone F01D 17/10)
17/22 . . the operation or power assistance being predominantly non-mechanical
17/24 . . . electrical
17/26 . . . fluid, e.g. hydraulic

19/00 Starting of machines or engines; **Regulating, controlling, or safety means in connection therewith** (warming-up before starting F01D 25/10; turning or inching gear F01D 25/34)
19/02 . dependent on temperature of component parts, e.g. of turbine casing

21/00 Shutting-down of machines or engines, e.g. in emergency; **Regulating, controlling, or safety means not otherwise provided for**
21/02 . Shutting-down responsive to overspeed
21/04 . responsive to undesired position of rotor relative to stator, e.g. indicating such position
21/06 . . Shutting-down
21/08 . . Restoring position
21/10 . responsive to unwanted deposits on blades, in working-fluid conduits, or the like

21/12 . responsive to temperature
21/14 . responsive to other specific conditions
21/16 . Trip gear
21/18 . . involving hydraulic means
21/20 . Checking operation of shut-down devices

23/00 Non-positive-displacement machines or engines with movement other than pure rotation, e.g. of endless-chain type

25/00 Component parts, details, or accessories, not provided for in, or of interest apart from, other groups

25/02 . De-icing means for engines having icing phenomena
25/04 . Antivibration arrangements
25/06 . . for preventing blade vibration (means on blade-carrying members or blades F01D 5/00)
25/08 . Cooling (of machines or engines in general F01P); Heating; Heat insulation (of blade-carrying members, of blades F01D 5/00)
25/10 . . Heating, e.g. warming-up before starting
25/12 . . Cooling
25/14 . . Casings modified therefor (double casings F01D 25/26)
25/16 . Arrangement of bearings; Supporting or mounting bearings in casings (bearings per se F16C)
25/18 . Lubricating arrangements (of machines or engines in general F01M)
25/20 . . using lubrication pumps
25/22 . . using working fluid or other gaseous fluid as lubricant
25/24 . Casings (modified for heating or cooling F01D 25/14); Casing parts, e.g. diaphragms, casing fastenings (casings for rotary machines or engines in general F16M)
25/26 . . Double casings; Measures against temperature strain in casings
25/28 . Supporting or mounting arrangements, e.g. for turbine casing
25/30 . Exhaust heads, chambers, or the like
25/32 . Collecting of condensation water; Drainage
25/34 . Turning or inching gear
25/36 . . using electric motors

F01K STEAM ENGINE PLANTS; **STEAM ACCUMULATORS**; **ENGINE PLANTS NOT OTHERWISE PROVIDED FOR**; **ENGINES USING SPECIAL WORKING FLUIDS OR CYCLES** (gas-turbine or jet-propulsion plants F02; steam generation F22; nuclear power plants, engine arrangements therein G21D)

Note

Attention is drawn to the Notes preceding class F01, especially as regards the definitions of “steam” and “special vapour”.

Subclass index

1/00 Steam accumulators (use of accumulators in steam engine plants F01K 3/00)

1/02 . for storing steam otherwise than in a liquid
1/04 . for storing steam in a liquid, e.g. Ruth type (in alkali to increase steam pressure F22B 1/20)
1/06 . . Internal fittings facilitating steam distribution, steam formation, or circulation (acting during charging or discharging F01K 1/08; fittings facilitating circulation through multiple accumulators F01K 1/14)
1/08 . Charging or discharging of accumulators with steam (peculiar to multiple accumulators F01K 1/12)
1/10 . specially adapted for superheated steam
1/12 . Multiple accumulators; Charging, discharging, or regulating peculiar thereto
1/14 . . Circulation
1/16 . Other safety or regulating means
1/18 . . for steam pressure
1/20 . Other steam-accumulator parts, details, or accessories

Steam engine plants

3/00 Plants characterised by the use of steam or heat accumulators, or intermediate steam heaters, therein (regenerating exhaust steam F01K 19/00)

3/02 . Use of accumulators and specific engine types; Regulating thereof

3/04 . . the engine being of multiple-inlet-pressure type
3/06 . . the engine being of extraction or non-condensing type
3/08 . Use of accumulators, the plant being specially adapted for a specific use
3/10 . . for vehicle drive, e.g. for accumulator locomotives
3/12 . having two or more accumulators
3/14 . having both steam accumulator and heater, e.g. superheating accumulator (steam superheaters per se F22G)
3/16 . . Mutual arrangement of accumulator and heater
3/18 . having heaters (having both steam accumulator and heater F01K 3/14; steam heaters per se F22)
3/20 . . with heating by combustion gases of main boiler
3/22 . . . Controlling, e.g. starting, stopping
3/24 . . with heating by separately-fired heaters
3/26 . . with heating by steam

5/00 Plants characterised by use of means for storing steam in an alkali to increase steam pressure, e.g. of Honigmann or Koenemann type
5/02 . used in regenerative installation

7/00 Steam engine plants characterised by the use of specific types of engine (F01K 3/02 takes precedence); **Plants or engines characterised by their use of special steam systems, cycles, or processes** (reciprocating-piston engines using uniflow principle F01B 17/04); **Regulating means peculiar to such systems, cycles, or processes**; **Use of withdrawn or exhaust steam for feed-water heating**
7/02 . the engines being of multiple-expansion type (the engines being only of turbine type F01K 7/16; the engines using steam of critical or over-critical pressure F01K 7/32; the engines being of extraction or non-condensing type F01K 7/34)
7/04 . . Regulating means peculiar thereto
7/06 . the engines being of multiple-inlet-pressure type (F01K 7/02 takes precedence; the engines being only of turbine type F01K 7/16; the engines using steam of critical or over-critical pressure F01K 7/32; the engines being of extraction or non-condensing type F01K 7/34)
7/08 . . Regulating means peculiar thereto
7/10 . characterised by the engine exhaust pressure (the engines being only of turbine type F01K 7/16; the engines using steam of critical or over-critical pressure F01K 7/32; the engines being of extraction or non-condensing type F01K 7/34)
7/12 . . of condensing type
7/14 . . . Regulating means peculiar thereto
7/16 . the engines being only of turbine type (the engines using steam of critical or over-critical pressure F01K 7/32; the engines being of extraction or non-condensing type F01K 7/34)
7/18 . . the turbine being of multiple-inlet-pressure type
7/20 . . . Regulating means peculiar thereto
7/22 . . the turbines having inter-stage steam heating
7/24 . . . Regulating or safety means peculiar thereto
7/26 . . the turbines having inter-stage steam accumulation
7/28 . . . Regulating means peculiar thereto
7/30 . . the turbines using exhaust steam only
7/32 . the engines using steam of critical or over-critical pressure
7/34 . the engines being of extraction or non-condensing type; Use of steam for feed-water heating (feed-water heaters in general F22D)
7/36 . . the engines being of positive-displacement type
7/38 . . the engines being of turbine type
7/40 . . Use of two or more feed-water heaters in series
7/42 . . Use of desuperheaters for feed-water heating
7/44 . . Use of steam for feed-water heating and another purpose

9/00 Steam engine plants characterised by condensers arranged or modified to co-operate with the engines (by condensers structurally combined with engines F01K 11/00; steam condensers per se F28B)
9/02 . Arrangements or modifications of condensate or air pumps
9/04 . with dump valves to by-pass stages

11/00 Steam engine plants characterised by the engines being structurally combined with boilers or condensers
11/02 . the engines being turbines
11/04 . the boilers or condensers being rotated in use

13/00 General layout or general methods of operation, of complete steam engine plants
13/02 . Regulating, e.g. stopping or starting

15/00 Adaptations of steam engine plants for special use
15/02 . for driving vehicles, e.g. locomotives (arrangements in vehicles, see the relevant vehicle classes)
15/04 . . the vehicles being waterborne vessels

17/00 Use of steam or condensate extracted or exhausted from steam engine plant (for heating feed-water F01K 7/34; returning condensate to boiler F22D)
17/02 . for heating purposes, e.g. industrial, domestic (F01K 17/06 takes precedence; domestic- or space-heating systems, e.g. central-heating systems, in general F24D 1/00, F24D 3/00, F24D 9/00) **[3]**
17/04 . for specific purposes other than heating (F01K 17/06 takes precedence)
17/06 . Returning energy of steam, in exchanged form, to process, e.g. use of exhaust steam for drying solid fuel of plant

19/00 Regenerating or otherwise treating steam exhaust from steam engine plant (plants characterised by use of means for storing steam in an alkali to increase steam pressure F01K 5/00; returning condensate to boiler F22D)
19/02 . Regenerating by compression
19/04 . . in combination with cooling or heating
19/06 . . in engine cylinder
19/08 . . compression done by injection apparatus, jet blower, or the like
19/10 . Cooling exhaust steam other than by condenser; Rendering exhaust steam invisible

21/00 Steam engine plants not otherwise provided for
21/02 . with steam generation in engine cylinders
21/04 . using mixtures of steam and gas; Plants generating or heating steam by bringing water or steam into direct contact with hot gas (direct-contact steam generators in general F22B)
21/06 . Treating live steam, other than thermodynamically, e.g. for fighting deposits in engine

---

23/00 Plants characterised by more than one engine delivering power external to the plant, the engines being driven by different fluids
23/02 . the engine cycles being thermally coupled

23/04 . . condensation heat from one cycle heating the fluid in another cycle
23/06 . . combustion heat from one cycle heating the fluid in another cycle
23/08 . . . with working fluid of one cycle heating the fluid in another cycle
23/10 . . . with exhaust fluid of one cycle heating the fluid in another cycle
23/12 . the engines being mechanically coupled (F01K 23/02 takes precedence)
23/14 . . including at least one combustion engine
23/16 . . all the engines being turbines (F01K 23/14 takes precedence)
23/18 . characterised by adaptation for specific use

25/00 Plants or engines characterised by use of special working fluids, not otherwise provided for; Plants operating in closed cycles and not otherwise provided for
25/02 . the fluid remaining in the liquid phase
25/04 . the fluid being in different phases, e.g. foamed
25/06 . using mixtures of different fluids (plants using mixtures of steam and gas F01K 21/04)
25/08 . using special vapours
25/10 . . the vapours being cold, e.g. ammonia, carbon dioxide, ether
25/12 . . the vapours being metallic, e.g. mercury
25/14 . . using industrial or other waste gases

27/00 Plants for converting heat or fluid energy into mechanical energy, not otherwise provided for
27/02 . Plants modified to use their waste heat, other than that of exhaust, e.g. engine-friction heat

---

F01L CYCLICALLY OPERATING VALVES FOR MACHINES OR ENGINES (valves in general F16K)

(1) Groups F01L 1/00 to F01L 13/00 cover only valve-gear or valve arrangements without provision for variable fluid distribution. **[2009.01]**
(2) Valve gear or valve arrangements specially adapted for steam engines are covered by groups F01L 15/00 to F01L 35/00. **[2009.01]**
(3) Valve-gear or valve arrangements specially adapted for machines or engines with variable working-fluid distribution are covered by groups F01L 15/00 to F01L 35/00. **[2009.01]**
(4) Attention is drawn to the Notes preceding class F01, especially Note (3).
(5) As regards the above-mentioned Note (3), attention is drawn to F01B 3/10, F01B 15/06, F01C 20/20, F01C 21/18, F02B 53/06, F03C 1/08, F04B 1/18, F04B 7/00, F04B 39/08, F04B 39/10, F04C 14/00, F04C 15/06, F04C 28/00and F04C 29/12.

Subclass index

Valve-gear or valve arrangements for positive-displacement machines or engines other than steam engines, e.g. for internal-combustion piston engines, without provision for variable fluid distribution

1/00 Valve-gear or valve arrangements, e.g. lift-valve gear (lift valve and valve seat assemblies per se F01L 3/00; slide-valve gear F01L 5/00; actuated non-mechanically F01L 9/00; valve arrangements in working piston or piston-rod F01L 11/00; modifications of valve-gear to facilitate reversing, braking, starting, changing compression ratio, or other specific operations F01L 13/00)
1/02 . Valve drive (transmitting-gear between valve drive and valve F01L 1/12)
1/04 . . by means of cams, camshafts, cam discs, eccentrics, or the like (F01L 1/10 takes precedence)
1/047 . . . Camshafts **[6]**
1/053 . . . . overhead type **[6]**
1/06 . . . the cams, or the like, rotating at a higher speed than that corresponding to the valve cycle, e.g. operating four-stroke engine valves directly from crankshaft
1/08 . . . Shape of cams
1/10 . . by means of crank- or eccentric-driven rods
1/12 . Transmitting-gear between valve drive and valve (simultaneously operating two or more valves F01L 1/26)

1/14 . . Tappets; Push-rods
1/16 . . . Silencing impact; Reducing wear
1/18 . . Rocking arms or levers
1/20 . Adjusting or compensating clearance, i.e. lash adjustment
1/22 . . automatically
1/24 . . . by fluid means, e.g. hydraulically
1/245 . . . . Hydraulic tappets **[6]**
1/25 . . . . . between cam and valve stem **[6]**
1/255 . . . . . between cam and rocker arm **[6]**
1/26 . characterised by the provision of two or more valves operated simultaneously by same transmitting-gear; peculiar to machines or engines with more than two lift valves per cylinder (with coaxial valves F01L 1/28)
1/28 . characterised by the provision of coaxial valves; characterised by the provision of valves co-operating with both intake and exhaust ports
1/30 . characterised by the provision of positively opened and closed valves, i.e. desmodromic valves
1/32 . characterised by the provision of means for rotating lift valves, e.g. to diminish wear
1/34 . characterised by the provision of means for changing the timing of the valves without changing the duration of opening
1/344 . . changing the angular relationship between crankshaft and camshaft, e.g. using helicoidal gear **[6]**
1/348 . . . by means acting on timing belts or chains **[6]**
1/352 . . . using bevel or epicyclic gear **[6]**
1/356 . . . making the angular relationship oscillate **[6]**
1/36 . peculiar to machines or engines of specific type other than four-stroke cycle
1/38 . . for engines with other than four-stroke cycle, e.g. with two-stroke cycle (F01L 1/26, F01L 1/28 take precedence)
1/40 . . for engines with scavenging charge near top dead-centre position, e.g. by overlapping inlet and exhaust time (scavenging aspects F02B)
1/42 . . for machines or engines characterised by cylinder arrangement, e.g. star or fan
1/44 . Multiple-valve gear or arrangements, not provided for in preceding subgroups, e.g. with lift and different valves
1/46 . Component parts, details, or accessories, not provided for in preceding subgroups

3/00 Lift valves, i.e. cut-off apparatus with closure members having at least a component of their opening and closing motion perpendicular to the closing faces; Parts or accessories thereof

3/02 . Selecting particular materials for valve members or valve seats; Valve members or valve seats composed of two or more materials
3/04 . . Coated valve members or valve seats
3/06 . Valve members or valve seats with means for guiding or deflecting the medium controlled thereby, e.g. producing a rotary motion of the drawn-in cylinder charge (for rotating lift valves F01L 1/32)
3/08 . Valve guides; Sealing of valve stem, e.g. sealing by lubricant
3/10 . Connecting springs to valve members
3/12 . Cooling of valves
3/14 . . by means of a liquid or solid coolant, e.g. sodium, in a closed chamber in a valve
3/16 . . by means of a fluid flowing through or along valve, e.g. air (for sealing only F01L 3/08)
3/18 . . . Liquid cooling of valve
3/20 . Shapes or constructions of valve members, not provided for in preceding subgroups of this group
3/22 . Valve seats not provided for in preceding subgroups of this group; Fixing of valve seats
3/24 . Safety means or accessories, not provided for in preceding subgroups of this group

5/00 Slide-valve gear or valve arrangements (with pure rotary or oscillatory movement F01L 7/00)

5/02 . with other than cylindrical, sleeve, or part-annularly-shaped valves, e.g. with flat-type valves
5/04 . with cylindrical, sleeve, or part-annularly-shaped valves
5/06 . . surrounding working cylinder or piston
5/08 . . . Arrangements with several movements or several valves, e.g. one valve inside the other (with part-annularly-shaped valves F01L 5/12)
5/10 . . . . with reciprocating and other movement of same valve
5/12 . . . Arrangements with part-annularly-shaped valves
5/14 . characterised by the provision of valves with reciprocating and other movements (surrounding working cylinder or piston F01L 5/06)
5/16 . . with reciprocating and other movement of same valve, e.g. longitudinally and in cross direction of working cylinder
5/18 . . with reciprocatory valve and other slide valve
5/20 . specially for two-stroke engines (F01L 5/06, F01L 5/14 take precedence)
5/22 . Multiple-valve arrangements (with valves surrounding working cylinder or piston F01L 5/06; with reciprocatory and other slide valves F01L 5/18; specially for two-stroke engines F01L 5/20)
5/24 . Component parts, details, or accessories, not provided for in preceding subgroups of this group

7/00 Rotary or oscillatory slide-valve gear or valve arrangements (slide valves with combined rotary and non-rotary movements, combinations of rotary and non-rotary slide valves F01L 5/00)

7/02 . with cylindrical, sleeve, or part-annularly-shaped valves (of disc type F01L 7/06; of conical type F01L 7/08)
7/04 . . surrounding working cylinder or piston
7/06 . with disc-type valves
7/08 . with conically- or frusto-conically-shaped valves
7/10 . with valves of other specific shape, e.g. spherical
7/12 . specially for two-stroke engines (F01L 7/04 takes precedence)
7/14 . Multiple-valve arrangements (with valves surrounding working cylinder or piston F01L 7/04; specially for two-stroke engines F01L 7/12)
7/16 . Sealing or packing arrangements specially therefor
7/18 . Component parts, details, or accessories, not provided for in preceding subgroups of this group

9/00 Valve-gear or valve arrangements actuated non-mechanically

9/02 . by fluid means, e.g. hydraulic
9/04 . by electric means

11/00 Valve arrangements in working piston or piston-rod

11/02 . in piston
11/04 . . operated by movement of connecting-rod
11/06 . . . operating oscillatory valve

13/00 Modifications of valve-gear to facilitate reversing, braking, starting, changing compression ratio, or other specific operations

13/02 . for reversing

13/04 . for starting by means of fluid pressure

13/06 . for braking

13/08 . for decompression, e.g. during starting; for changing compression ratio

Valve-gear or valve arrangements specially adapted for steam engines, or specially adapted for other positive-displacement machines or engines with variable working-fluid distribution

(1) Groups F01L 15/00 to F01L 31/00 cover:
- valve drive or means external to valves for adjustment during operation;
- tripping-gear;
- reversing-gear;
- use of pistons or piston-rods as valves or as valve-supporting elements;
- valve-gear or valve arrangements peculiar to free-piston machines or engines.

(2) Groups F01L 15/00 to F01L 31/00 do not fully cover subject matter restricted to rotary, oscillatory, or lift-valve gear or valve arrangements, which is covered by group F01L 33/00 or F01L 35/00.

15/00 Valve-gear or valve arrangements, e.g. with reciprocatory slide valves, other than provided for in groups F01L 17/00 to F01L 29/00 (valve drive or external valve-adjustment during operation, see the relevant groups, e.g. F01L 31/00; tripping-gear or tripping of valves F01L 31/00)

15/02 . with valves other than cylindrical, sleeve, or part-annularly-shaped, e.g. flat D-valves

15/04 . . main valve being combined with auxiliary valve (of drag-valve type F01L 15/10)

15/06 . . . of Meyer or Rider type, i.e. in which the expansion is varied at the expansion valve itself

15/08 . with cylindrical, sleeve, or part-annularly-shaped valves; Such main valves combined with auxiliary valves

15/10 . with main slide valve and auxiliary valve dragged thereby

15/12 . characterised by having means for effecting pressure equilibrium between two different cylinder spaces at idling

15/14 . Arrangements with several co-operating main valves, e.g. reciprocatory and rotary

15/16 . . with reciprocatory slide valves only

15/18 . Valve arrangements not provided for in preceding subgroups of this group

15/20 . Component parts, details, or accessories, not provided for in preceding subgroups of this group

17/00 Slide-valve gear or valve arrangements with cylindrical, sleeve, or part-annularly-shaped valves surrounding working cylinder or piston

17/02 . Drive, or adjustment during operation, peculiar thereto, e.g. for reciprocating and oscillating movements or for several valves one inside the other

19/00 Slide-valve gear or valve arrangements with reciprocatory and other movement of same valve, other than provided for in group F01L 17/00, e.g. longitudinally and in cross direction of working cylinder

19/02 . Drive, or adjustment during operation, peculiar thereto

21/00 Use of working pistons or piston-rods as fluid-distributing valves or as valve-supporting elements, e.g. in free-piston machines

21/02 . Piston or piston-rod used as valve member

21/04 . Valves arranged in or on piston or piston-rod

23/00 Valves controlled by impact of piston, e.g. in free-piston machines

25/00 Drive, or adjustment during operation, of distribution or expansion valves by non-mechanical means

25/02 . by fluid means

25/04 . . by working fluid of machine or engine, e.g. free-piston machine

25/06 . . . Arrangements with main and auxiliary valves, at least one of them being fluid-driven

25/08 . by electric or magnetic means

27/00 Distribution or expansion-valve gear peculiar to free-piston machines or engines and not provided for in groups F01L 21/00 to F01L 25/00

27/02 . the machine or engine having rotary or oscillatory valves

27/04 . Delayed-action controls, e.g. of cataract- or dash-pot-type

29/00 Reversing-gear (equally usable for control of degree of working fluid admission, and reversing being of secondary importance F01L 31/00)

29/02 . by displacing eccentric

29/04 . by links or guide rods

29/06 . by interchanging inlet and exhaust ports

29/08 . specially for rotary or oscillatory valves

29/10 . Details, e.g. drive

29/12 . . Powered reverse gear

31/00 Valve drive, valve adjustment during operation, or other valve control, not provided for in groups F01L 15/00 to F01L 29/00 (sensing elements measuring the variable or condition to be controlled or regulated F01B)

31/02 . with tripping-gear (for oscillatory valves F01L 31/06); Tripping of valves

31/04 . . with positively-driven trip levers

31/06 . with tripping-gear specially for oscillatory valves; Oscillatory tripping-valves, e.g. of Corliss type

31/08 . Valve drive or valve adjustment, apart from tripping aspects; Positively-driven gear

31/10 . . the drive being effected by eccentrics (F01L 31/14 takes precedence)

31/12 . . . Valve adjustment by displacing eccentric

31/14 . . Valve adjustment by links or guide rods, e.g. in valve-gears with eccentric drive

31/16 . . the drive being effected by specific means other than eccentric, e.g. cams; Valve adjustment in connection with such drives

31/18 . . specially for rotary or oscillatory valves

31/20 . . . Valve adjustment

31/22 . . specially for lift valves

31/24 . . . Valve adjustment

Rotary or oscillatory slide-valve gear or lift-valve gear or such valve arrangements specially adapted for steam engines, or specially adapted for other positive-displacement machines or engines with variable working-fluid distribution

33/00 **Rotary or oscillatory slide-valve gear or valve arrangements, specially adapted for machines or engines with variable fluid distribution** (drive, adjustment during operation, tripping-gear, reversing-gear, use of working pistons or piston-rods as valves or as valve-supporting elements, valve-gear or valve arrangements peculiar to free-piston machines or engines F01L 15/00 to F01L 31/00)

33/02 . rotary

33/04 . oscillatory

35/00 **Lift-valve gear or valve arrangements specially adapted for machines or engines with variable fluid distribution** (drive, adjustment during operation, tripping-gear, reversing-gear, use of working pistons or piston-rods as valves or as valve-supporting elements, valve-gear or valve arrangements peculiar to free-piston machines or engines F01L 15/00 to F01L 31/00)

35/02 . Valves

35/04 . Arrangements of valves in the machine or engine, e.g. relative to working cylinder

---

F01M LUBRICATING OF MACHINES OR ENGINES IN GENERAL; LUBRICATING INTERNAL-COMBUSTION ENGINES; CRANKCASE VENTILATING [2]

(1) Attention is drawn to the Notes preceding class F01, especially as regards Note (3).

(2) Attention is drawn to the following places, which cover lubrication of specific machines or engines: **[8]**

F01B	31/10	Steam engines
F01C	21/04	Rotary-piston or oscillating-piston machines or engines
F01D	25/18	Non-positive-displacement machines
F02C	7/06	Gas-turbine plants
F02F	1/20	Cylinders of combustion engines
F04B	39/02	Pumps for elastic fluids
F04C	29/02	Rotary-piston or oscillating-piston pumps for liquids
F04D	29/04	Non-positive-displacement pumps

Subclass index

1/00 **Pressure lubrication**

1/02 . using lubricating pumps

1/04 . using pressure in working cylinder or crankcase to operate lubricant-feeding devices

1/06 . Lubricating systems characterised by the provision therein of crankshafts or connecting-rods with lubricant passageways, e.g. bores

1/08 . Lubricating systems characterised by the provision therein of lubricant-jetting means

1/10 . Lubricating systems characterised by the provision therein of lubricant venting or purifying means, e.g. of filters (mounting of, connecting of, or constructional details of lubricant purifying means F01M 11/03)

1/12 . Closed-circuit lubricating systems not provided for in groups F01M 1/02 to F01M 1/10

1/14 . Timed lubrication (F01M 1/08 takes precedence)

1/16 . Controlling lubricant pressure or quantity

1/18 . Indicating or safety devices (concerning lubricant level F01M 11/06, F01M 11/12)

1/20 . . concerning lubricant pressure

1/22 . . . rendering machines or engines inoperative or idling on pressure failure

1/24 . . . . acting on engine fuel system

1/26 . . . . acting on engine ignition system

1/28 . . . . acting on engine combustion-air supply

3/00 **Lubrication specially adapted for engines with crankcase compression of fuel-air mixture, or for other engines in which lubricant is contained in fuel, combustion air, or fuel-air mixture** (separating lubricant from air or fuel-air mixture before entry into cylinder F01M 11/08)

3/02 . with variable proportion of lubricant to fuel, lubricant to air, or lubricant to fuel-air mixture

3/04 . for upper cylinder lubrication only

5/00 **Heating, cooling, or controlling temperature of lubricant** (arrangement of lubricant coolers in engine cooling system F01P 11/08); **Lubrication means facilitating engine starting**

5/02 . Conditioning lubricant for aiding engine starting, e.g. heating

5/04 . . Diluting, e.g. with fuel

7/00 **Lubrication means specially adapted for machine or engine running-in**

9/00 **Lubrication means having pertinent characteristics not provided for in, or of interest apart from, groups F01M 1/00 to F01M 7/00**

9/02 . having means for introducing additives to lubricant

9/04 . Use of fuel as lubricant

9/06 . Dip or splash lubrication

9/08 . Drip lubrication

9/10 . Lubrication of valve gear or auxiliaries
9/12 . Non-pressurised lubrication, or non-closed-circuit lubrication, not otherwise provided for

11/00 Component parts, details, or accessories, not provided for in, or of interest apart from, groups F01M 1/00 to F01M 9/00

11/02 . Arrangements of lubricant conduits
11/03 . Mounting or connecting of lubricant purifying means relative to the machine or engine; Details of lubricant purifying means **[3]**
11/04 . Filling or draining lubricant of or from machines or engines
11/06 . Means for keeping lubricant level constant or for accommodating movement or position of machines or engines
11/08 . Separating lubricant from air or fuel-air mixture before entry into cylinder
11/10 . Indicating devices; Other safety devices
11/12 . . concerning lubricant level

13/00 Crankcase ventilating or breathing [2]

13/02 . by means of additional source of positive or negative pressure **[2]**
13/04 . having means for purifying air before leaving crankcase, e.g. removing oil **[2]**
13/06 . specially adapted for submersible engines, e.g. of armoured vehicles **[2]**

F01N GAS-FLOW SILENCERS OR EXHAUST APPARATUS FOR MACHINES OR ENGINES IN GENERAL; **GAS-FLOW SILENCERS OR EXHAUST APPARATUS FOR INTERNAL-COMBUSTION ENGINES** (arrangements in connection with gas exhaust of propulsion units in vehicles B60K 13/00; combustion-air intake silencers specially adapted for, or arranged on, internal-combustion engines F02M 35/00; protecting against, or damping, noise in general G10K 11/16)

Note

Attention is drawn to the Notes preceding class F01, especially as regards Note (3).

1/00 Silencing apparatus characterised by method of silencing

1/02 . by using resonance
1/04 . . having sound-absorbing materials in resonance chambers
1/06 . by using interference effect
1/08 . by reducing exhaust energy by throttling or whirling
1/10 . . in combination with sound-absorbing materials
1/12 . . using spirally- or helically-shaped channels (F01N 1/10 takes precedence; cyclones B04C)
1/14 . by adding air to exhaust gases
1/16 . by using movable parts
1/18 . . having rotary movement
1/20 . . having oscillating or vibrating movement (the parts being resilient walls F01N 1/22)
1/22 . . the parts being resilient walls
1/24 . by using sound-absorbing materials (F01N 1/04, F01N 1/06, F01N 1/10, F01N 1/14, F01N 1/16 take precedence)

3/00 Exhaust or silencing apparatus having means for purifying, rendering innocuous, or otherwise treating exhaust (electric control F01N 9/00; monitoring or diagnostic devices for exhaust-gas treatment apparatus F01N 11/00) **[4]**

3/01 . by means of electric or electrostatic separators **[7]**
3/02 . for cooling, or for removing solid constituents of, exhaust (by means of electric or electrostatic separators F01N 3/01) **[1,7]**
3/021 . . by means of filters **[7]**
3/022 . . . characterised by specially adapted filtering structure, e.g. honeycomb, mesh or fibrous **[7]**
3/023 . . . using means for regenerating the filters, e.g. by burning trapped particles **[7]**
3/025 . . . . using fuel burner or by adding fuel to exhaust **[7]**
3/027 . . . . using electric or magnetic heating **[7]**
3/028 . . . . . using microwaves **[7]**
3/029 . . . . by adding non-fuel substances to exhaust **[7]**
3/031 . . . having means for by-passing filters, e.g. when clogged or during cold engine start **[7]**
3/032 . . . . during filter regeneration only **[7]**
3/033 . . . in combination with other devices **[7]**
3/035 . . . . with catalytic reactors **[7]**
3/037 . . by means of inertial or centrifugal separators, e.g. associated with agglomerators **[7]**
3/038 . . by means of perforated plates defining expansion chambers associated with condensation and collection chambers **[7]**
3/04 . . by means of liquids
3/05 . . by means of air, e.g. by mixing exhaust with air (silencers working by addition of air to exhaust F01N 1/14; arrangements for the supply of additional air for the thermal or catalytic conversion of noxious components of exhaust F01N 3/30) **[7]**
3/06 . for extinguishing sparks
3/08 . for rendering innocuous (using electric or electrostatic separators F01N 3/01; chemical aspects B01D 53/92) **[1,7]**
3/10 . . by thermal or catalytic conversion of noxious components of exhaust **[3]**
3/18 . . . characterised by methods of operation; Regulation **[3]**
3/20 . . . . specially adapted for catalytic conversion (F01N 3/22 takes precedence) **[3]**
3/22 . . . . Regulation of additional air supply only, e.g. using by-passes or variable air pump drives **[3]**
3/24 . . . characterised by constructional aspects of converting apparatus (filtering in combination with catalytic reactors F01N 3/035) **[3,7]**
3/26 . . . . Construction of thermal reactors **[3]**
3/28 . . . . Construction of catalytic reactors **[3]**
3/30 . . . . Arrangements for supply of additional air (regulation, e.g. using by-passes or variable air pump drives, F01N 3/22) **[3]**

3/32 . . . . . using air pumps (using jet air pumps F01N 3/34; pumps in general F04) **[3]**

3/34 . . . . . using air conduits or jet air pumps, e.g. near the engine exhaust port **[3]**

3/36 . . . . Arrangements for supply of additional fuel **[3]**

3/38 . . . . Arrangements for igniting **[3]**

5/00 Exhaust or silencing apparatus combined or associated with devices profiting by exhaust energy (using kinetic or wave energy of exhaust gases in exhaust systems for charging F02B; predominant aspects of such devices, see the relevant classes for the devices)

5/02 . the devices using heat

5/04 . the devices using kinetic energy

9/00 Electrical control of exhaust gas treating apparatus (monitoring or diagnostic devices for exhaust-gas treatment apparatus F01N 11/00; conjoint electrical control of two or more combustion engine functions F02D 43/00) **[4]**

11/00 Monitoring or diagnostic devices for exhaust-gas treatment apparatus [7]

13/00 Exhaust or silencing apparatus characterised by constructional features [2010.01]

13/02 . having two or more separate silencers in series **[2010.01]**

13/04 . having two or more silencers in parallel, e.g. having interconnections for multi-cylinder engines **[2010.01]**

13/06 . specially adapted for star-arrangement of cylinders, e.g. exhaust manifolds **[2010.01]**

13/08 . Other arrangements or adaptations of exhaust conduits **[2010.01]**

13/10 . . of exhaust manifolds **[2010.01]**

13/12 . specially adapted for submerged exhausting **[2010.01]**

13/14 . having thermal insulation **[2010.01]**

13/16 . Selection of particular materials **[2010.01]**

13/18 . Construction facilitating manufacture, assembly or disassembly **[2010.01]**

13/20 . having flared outlets, e.g. of fish-tail shape **[2010.01]**

99/00 Subject matter not provided for in other groups of this subclass [2010.01]

F01P COOLING OF MACHINES OR ENGINES IN GENERAL; **COOLING OF INTERNAL-COMBUSTION ENGINES** (arrangements in connection with cooling of propulsion units in vehicles B60K 11/00; heat-transfer, heat-exchange or heat-storage materials C09K 5/00; heat-exchange in general, radiators F28)

(1) In this subclass, the following terms or expressions are used with the meanings indicated:
- "air" also includes other gaseous cooling fluids;
- "liquid cooling" also includes cooling where liquid is used as the heat-transferring fluid between parts to be cooled and the air, e.g. using radiators;
- "air cooling" means direct air cooling and thus excludes indirect air cooling occurring in liquid cooling systems as explained under liquid cooling above;
- "cooling-air" includes directly- or indirectly-acting cooling-air.

(2) Attention is drawn to the Notes preceding class F01, especially as regards Note (3).

(3) Cooling by lubricant is classified in subclass F01M when the lubrication aspect predominates, and in subclass F01P when the cooling aspect predominates.

Air cooling; **Liquid cooling**

1/00 Air cooling (propelling cooling-air or liquid coolants F01P 5/00; controlling supply or circulation of coolants F01P 7/00)

1/02 . Arrangements for cooling cylinders or cylinder heads, e.g. ducting cooling-air from its pressure source to cylinders or along cylinders

1/04 . Arrangements for cooling pistons

1/06 . Arrangements for cooling other engine or machine parts

1/08 . . for cooling intake or exhaust valves

1/10 . . for cooling fuel injectors or sparking-plugs

3/00 Liquid cooling (propelling cooling-air or liquid coolants F01P 5/00; controlling supply or circulation of coolants F01P 7/00)

3/02 . Arrangements for cooling cylinders or cylinder heads

3/04 . . Liquid-to-air heat-exchangers combined with, or arranged on, cylinders or cylinder heads

3/06 . Arrangements for cooling pistons

3/08 . . Cooling of piston exterior only, e.g. by jets

3/10 . . Cooling by flow of coolant through pistons

3/12 . Arrangements for cooling other engine or machine parts

3/14 . . for cooling intake or exhaust valves

3/16 . . for cooling fuel injectors or sparking-plugs

3/18 . Arrangement or mounting of liquid-to-air heat-exchangers (such arrangements on cylinders or cylinder heads F01P 3/04; relative to vehicles B60K 11/04)

3/20 . Cooling circuits not specific to a single part of engine or machine (F01P 3/22 takes precedence)

3/22 . characterised by evaporation and condensation of coolant in closed cycles (other cooling by evaporation F01P 9/02); characterised by the coolant reaching higher temperatures than normal atmospheric boiling-point

Pumping cooling-air or liquid coolants; **Controlling circulation or supply of coolants**

5/00 **Pumping cooling-air or liquid coolants** (controlling circulation or supply of coolants by influencing drive of pumps F01P 7/00)

5/02 . Pumping cooling-air; Arrangements of cooling-air pumps, e.g. fans or blowers

5/04 . . Pump-driving arrangements

5/06 . . Guiding or ducting air to or from ducted fans

5/08 . . Use of engine exhaust gases for pumping cooling-air

5/10 . Pumping liquid coolant; Arrangements of coolant pumps

5/12 . . Pump-driving arrangements

5/14 . Safety means against, or active at, failure of coolant-pump drives, e.g. shutting engine down; Means for indicating functioning of coolant pumps

7/00 **Controlling of coolant flow**

7/02 . the coolant being cooling-air

7/04 . . by varying pump speed, e.g. by changing pump-drive gear ratio

7/06 . . by varying blade pitch

7/08 . . by cutting in or out of pumps

7/10 . . by throttling amount of air flowing through liquid-to-air heat-exchangers

7/12 . . . by thermostatic control

7/14 . the coolant being liquid

7/16 . . by thermostatic control

9/00 **Cooling having pertinent characteristics not provided for in, or of interest apart from, groups F01P 1/00 to F01P 7/00** (profiting from waste heat of combustion-engine cooling F02G 5/00)

9/02 . Cooling by evaporation, e.g. by spraying water on to cylinders (evaporation and condensation of liquid coolant in closed cycles F01P 3/22)

9/04 . by simultaneous or alternative use of direct air cooling and liquid cooling (F01P 9/02 takes precedence)

9/06 . by use of refrigerating apparatus, e.g. of compressor or absorber type

11/00 **Component parts, details, or accessories, not provided for in, or of interest apart from, groups F01P 1/00 to F01P 9/00**

11/02 . Liquid-coolant overflow, venting, or draining devices (automatic draining during freezing conditions F01P 11/20)

11/04 . Arrangements of liquid pipes or hoses

11/06 . Cleaning (in general B08B); Combating corrosion (in general C23F)

11/08 . Arrangements of lubricant coolers (in lubrication apparatus F01M)

11/10 . Guiding or ducting cooling-air to or from liquid-to-air heat-exchangers

11/12 . Filtering, cooling, or silencing cooling-air

11/14 . Indicating devices; Other safety devices

11/16 . . concerning coolant temperature (F01P 11/20 takes precedence)

11/18 . . concerning coolant pressure, coolant flow, or liquid-coolant level

11/20 . . concerning atmospheric freezing conditions, e.g. automatically draining or heating during frosty weather

F02 COMBUSTION ENGINES; HOT-GAS OR COMBUSTION-PRODUCT ENGINE PLANTS

F02B **INTERNAL-COMBUSTION PISTON ENGINES**; **COMBUSTION ENGINES IN GENERAL** (cyclically operating valves therefor F01L; lubricating internal-combustion engines F01M; gas-flow silencers or exhaust apparatus therefor F01N; cooling of internal-combustion engines F01P; internal-combustion turbines F02C; plants in which engines use combustion products F02C, F02G)

(1) In this subclass, the following terms or expression are used with the meanings indicated:
- "positive ignition" means ignition by a source external to the working fluid, e.g. by spark or incandescent source;
- "charging" means forcing air or fuel-air mixture into engine cylinders, and thus includes supercharging;
- "scavenging" means forcing the combustion residues from the cylinders other than by movement of the working pistons, and thus includes tuned exhaust systems.

(2) Attention is drawn to the Notes preceding class F01, especially as regards Note (1).

(3) Engines with specified cycles or number of cylinders are classified in group F02B 75/02 or F02B 75/16, unless other classifying features predominate.

Subclass index

Engines characterised by the working fluid to be compressed or characterised by the type of ignition

1/00 **Engines characterised by fuel-air mixture compression** (characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition F02B 11/00; characterised by precombustion chambers F02B 19/00; characterised by air-storage chambers F02B 21/00; characterised by special shape or construction of combustion chambers F02B 23/00)

1/02 . with positive ignition (with non-timed positive ignition F02B 9/06)

1/04 . . with fuel-air mixture admission into cylinder

1/06 . . . Methods of operating

1/08 . . with separate admission of air and fuel into cylinder

1/10 . . . Methods of operating

1/12 . with compression ignition (with fuel-air charge ignited by compression ignition of an additional fuel F02B 7/00)

1/14 . . Methods of operating

3/00 **Engines characterised by air compression and subsequent fuel addition** (characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition F02B 11/00; characterised by precombustion chambers F02B 19/00; characterised by air-storage chambers F02B 21/00; characterised by special shape or construction of combustion chambers F02B 23/00)

3/02 . with positive ignition (with non-timed positive ignition F02B 9/06)

3/04 . . Methods of operating

3/06 . with compression ignition (F02B 13/02 takes precedence; with fuel-air charge ignited by compression ignition of an additional fuel F02B 7/00)

3/08 . . Methods of operating (F02B 3/12 takes precedence)
3/10 . . with intermittent fuel introduction
3/12 . . . Methods of operating

5/00 Engines characterised by positive ignition (F02B 1/02, F02B 3/02 take precedence; with non-timed positive ignition F02B 9/06; characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition F02B 11/00; characterised by precombustion chambers F02B 19/00; characterised by air-storage chambers F02B 21/00; characterised by special shape or construction of combustion chambers F02B 23/00)
5/02 . Methods of operating

7/00 Engines characterised by the fuel-air charge being ignited by compression ignition of an additional fuel (characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition F02B 11/00; characterised by precombustion chambers F02B 19/00; characterised by air-storage chambers F02B 21/00; characterised by special shape or construction of combustion chambers F02B 23/00)
7/02 . the fuel in the charge being liquid
7/04 . . Methods of operating
7/06 . the fuel in the charge being gaseous
7/08 . . Methods of operating

9/00 Engines characterised by other types of ignition (characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition F02B 11/00; characterised by precombustion chambers F02B 19/00; characterised by air-storage chambers F02B 21/00; characterised by special shape or construction of combustion chambers F02B 23/00)
9/02 . with compression ignition (F02B 1/12, F02B 3/06 take precedence)
9/04 . . Methods of operating
9/06 . with non-timed positive ignition, e.g. with hot-spots
9/08 . . with incandescent chambers
9/10 . . . Chamber shapes or constructions

11/00 Engines characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition, e.g. in different cylinders (characterised by precombustion chambers F02B 19/00; characterised by air-storage chambers F02B 21/00; characterised by special shape or construction of combustion chambers F02B 23/00)
11/02 . convertible from fuel-air mixture compression to air compression or vice versa

Engines characterised by the method of introducing liquid fuel into cylinders

13/00 Engines characterised by the introduction of liquid fuel into cylinders by use of auxiliary fluid
13/02 . Compression ignition engines using air or gas for blowing fuel into compressed air in cylinder
13/04 . . Arrangements or adaptations of pumps
13/06 . Engines having secondary air mixed with fuel in pump, compressed therein without ignition, and fuel-air mixture being injected into air in cylinder
13/08 . . Arrangements or adaptations of pumps
13/10 . Use of specific auxiliary fluids, e.g. steam, combustion gas

15/00 Engines characterised by the method of introducing liquid fuel into cylinders and not otherwise provided for
15/02 . having means for sucking fuel directly into cylinder

17/00 Engines characterised by means for effecting stratification of charge in cylinders

Engines characterised by precombustion chambers or air-storage chambers, or characterised by special shape or construction of combustion chambers to improve operation

19/00 Engines characterised by precombustion chambers (engines with incandescent chambers F02B 9/08)
19/02 . the chamber being periodically isolated from its cylinder
19/04 . . the isolation being effected by a protuberance on piston or cylinder head
19/06 . with auxiliary piston in chamber for transferring ignited charge to cylinder space
19/08 . the chamber being of air-swirl type
19/10 . with fuel introduced partly into pre-combustion chamber, and partly into cylinder (F02B 19/02 to F02B 19/08 take precedence)
19/12 . with positive ignition (F02B 19/02 to F02B 19/10 take precedence)
19/14 . with compression ignition (F02B 19/02 to F02B 19/10 take precedence)
19/16 . Chamber shapes or constructions not specific to groups F02B 19/02 to F02B 19/10
19/18 . . Transfer passages between chamber and cylinder

21/00 Engines characterised by air-storage chambers
21/02 . Chamber shapes or constructions

23/00 Other engines characterised by special shape or construction of combustion chambers to improve operation (engines with incandescent chambers F02B 9/08)
23/02 . with compression ignition
23/04 . . the combustion space being subdivided into two or more chambers (with pre-combustion chambers F02B 19/00)
23/06 . . the combustion space being arranged in working piston (F02B 23/04 takes precedence)
23/08 . with positive ignition
23/10 . . with separate admission of air and fuel into cylinder

Engines characterised by provision for charging or scavenging

25/00 Engines characterised by using fresh charge for scavenging cylinders (aspects characterised by provision of driven charging or scavenging pumps F02B 33/00 to F02B 39/00)
25/02 . using unidirectional scavenging
25/04 . . Engines having ports both in cylinder head and in cylinder wall near bottom of piston stroke
25/06 . . . the cylinder-head ports being controlled by working pistons, e.g. by sleeve-shaped extensions thereof
25/08 . . Engines with oppositely-moving reciprocating working pistons
25/10 . . . with one piston having a smaller diameter or shorter stroke than the other
25/12 . . Engines with U-shaped cylinders, having ports in each arm

25/14 . using reverse-flow scavenging, e.g. with both inlet and outlet ports arranged near bottom of piston stroke

25/16 . . the charge flowing upward essentially along cylinder wall opposite the inlet ports

25/18 . . the charge flowing upward essentially along cylinder wall adjacent the inlet ports, e.g. by means of deflection rib on piston

25/20 . Means for reducing the mixing of charge and combustion residues or for preventing escape of fresh charge through outlet ports, not provided for in, or of interest apart from, groups F02B 25/02 to F02B 25/18

25/22 . . by forming air cushion between charge and combustion residues

25/24 . . Inlet or outlet openings being timed asymmetrically relative to bottom dead-centre

25/26 . Multi-cylinder engines other than those provided for in, or of interest apart from, groups F02B 25/02 to F02B 25/24 (internal-combustion aspects of rotary engines with movable cylinders F02B 57/00)

25/28 . . with V-, fan-, or star-arrangement of cylinders

27/00 Use of kinetic or wave energy of charge in induction systems, or of combustion residues in exhaust systems, for improving quantity of charge or for increasing removal of combustion residues (aspects characterised by provision of driven charging or scavenging pumps F02B 33/00 to F02B 39/00, e.g. use of driven apparatus for immediate conversion of combustion gas pressure into pressure of fresh charge F02B 33/42)

27/02 . the systems having variable, i.e. adjustable, cross-sectional areas, chambers of variable volume, or like variable means (in exhaust systems only F02B 27/06)

27/04 . in exhaust systems only, e.g. for sucking-off combustion gases

27/06 . . the systems having variable, i.e. adjustable, cross-sectional areas, chambers of variable volume, or like variable means

29/00 Engines characterised by provision for charging or scavenging not provided for in groups F02B 25/00, F02B 27/00 or F02B 33/00 to F02B 39/00; Details thereof

29/02 . Other fluid-dynamic features of induction systems for improving quantity of charge (for also imparting a rotation to the charge in the cylinder F02B 31/00; structural features of induction systems F02M)

29/04 . Cooling of air intake supply

29/06 . After-charging, i.e. supplementary charging after scavenging

29/08 . Modifying distribution valve timing for charging purposes (F02B 29/06 takes precedence; valve-gear therefor F01L)

31/00 Modifying induction systems for imparting a rotation to the charge in the cylinder (structural features of induction systems F02M)

31/02 . in engines having inlet valves arranged eccentrically to cylinder axis (F02B 31/08 takes precedence) **[6]**

31/04 . by means within the induction channel, e.g. deflectors **[6]**

31/06 . . Movable means, e.g. butterfly valves **[6]**

31/08 . having multiple air inlets **[6]**

Engines characterised by provision of driven charging or scavenging pumps

33/00 Engines characterised by provision of pumps for charging or scavenging (characterised by the introduction of liquid fuel into cylinders by use of auxiliary fluid F02B 13/00; characterised by after-charging F02B 29/06; characterised by provision of pumps for sucking combustion residues from cylinders F02B 35/00; characterised by provision of exhaust-driven pumps F02B 37/00)

33/02 . Engines with reciprocating-piston pumps; Engines with crankcase pumps

33/04 . . with simple crankcase pumps, i.e. with the rear face of a non-stepped working piston acting as sole pumping member in co-operation with the crankcase

33/06 . . with reciprocating-piston pumps other than simple crankcase pumps

33/08 . . . with the working-cylinder head arranged between working and pumping cylinders

33/10 . . . with the pumping cylinder situated between working cylinder and crankcase, or with the pumping cylinder surrounding working cylinder

33/12 . . . . the rear face of working piston acting as pumping member and co-operating with a pumping chamber isolated from crankcase, the connecting-rod passing through the chamber and co-operating with movable isolating member

33/14 . . . . working and pumping pistons forming stepped piston

33/16 . . . . working and pumping pistons having differing movements

33/18 . . . with crankshaft being arranged between working and pumping cylinders

33/20 . . . with pumping-cylinder axis arranged at an angle to working-cylinder axis, e.g. at an angle of 90°

33/22 . . . with pumping cylinder situated at side of working cylinder, e.g. the cylinders being parallel

33/24 . . with crankcase pumps other than with reciprocating pistons only

33/26 . . Four-stroke engines characterised by having crankcase pumps

33/28 . . Component parts, details, or accessories of crankcase pumps not provided for in, or of interest apart from, groups F02B 33/02 to F02B 33/26

33/30 . . . Control of inlet or outlet ports (controlling only working-cylinder inlets F01L)

33/32 . Engines with pumps other than of reciprocating-piston type (with crankcase pumps F02B 33/02)

33/34 . . with rotary pumps (with cell-type pressure exchangers or the like F02B 33/42)

33/36 . . . of positive-displacement type

33/38 . . . . of Roots type

33/40 . . . of non-positive-displacement type

33/42 . . with driven apparatus for immediate conversion of combustion gas pressure into pressure of fresh charge, e.g. with cell-type pressure exchangers (pressure exchangers per se F04F 13/00)

33/44 . Passages conducting the charge from the pump to the engine inlet, e.g. reservoirs (cooling of charge after leaving pump F02B 29/04)

35/00 Engines characterised by provision of pumps for sucking combustion residues from cylinders

35/02 . using rotary pumps

37/00 Engines characterised by provision of pumps driven at least for part of the time by exhaust (characterised by the introduction of liquid fuel into cylinders by use of auxiliary fluid F02B 13/00; characterised by after-charging F02B 29/06; characterised by passages conducting the charge from the pump to the engine inlet F02B 33/44)

37/007 . with exhaust-driven pumps arranged in parallel **[6]**
37/013 . with exhaust-driven pumps arranged in series **[6]**
37/02 . Gas passages between engine outlet and pump drive, e.g. reservoirs
37/04 . Engines with exhaust drive and other drive of pumps, e.g. with exhaust-driven pump and mechanically-driven second pump
37/10 . . at least one pump being alternately driven by exhaust and other drive **[3]**
37/11 . . . driven by other drive at starting only **[6]**
37/12 . Control of the pumps **[3]**
37/14 . . of the alternation between exhaust drive and other drive of a pump, e.g. dependent on speed **[3]**
37/16 . . by bypassing charging air **[6]**
37/18 . . by bypassing exhaust **[6]**
37/20 . . by increasing exhaust energy, e.g. using combustion chambers **[6]**
37/22 . . by varying the cross-section of exhaust passages or air passages **[6]**
37/24 . . by using pumps or turbines with adjustable guide vanes **[6]**

39/00 Component parts, details, or accessories relating to driven charging or scavenging pumps, not provided for in groups F02B 33/00 to F02B 37/00

39/02 . Drives of pumps (exhaust drives or combined exhaust and other drives F02B 37/00); Varying pump drive gear ratio (control acting both on engine and on pump drive gear ratio F02D)
39/04 . . Mechanical drives; Variable-gear-ratio drives (non-mechanical pump drives having variable gear ratio F02B 39/08)
39/06 . . . the engine torque being divided by a differential gear for driving a pump and the engine output shaft
39/08 . . Non-mechanical drives, e.g. fluid drives having variable gear ratio
39/10 . . . electric
39/12 . . Drives characterised by use of couplings or clutches therein (using fluid slip couplings for varying gear ratio F02B 39/08)
39/14 . Lubrication of pumps; Safety measures therefor
39/16 . Other safety measures for, or other control of, pumps

---

41/00 Engines characterised by special means for improving conversion of heat or pressure energy into mechanical power

41/02 . Engines with prolonged expansion
41/04 . . in main cylinders
41/06 . . in compound cylinders
41/08 . . . Two-stroke compound engines
41/10 . . using exhaust turbines (use of exhaust turbines for charging F02B 37/00; turbine constructions F01D; gas-turbine plants F02C)

Engines operating on non-liquid fuels; Plants including such engines, i.e. combinations of the engine with fuel-generating apparatus

43/00 Engines characterised by operating on gaseous fuels; Plants including such engines (engines characterised by the gas-air charge being ignited by compression ignition of an additional fuel F02B 7/06; engines convertible from gas to other fuel consumption F02B 69/04)

43/02 . Engines characterised by means for increasing operating efficiency
43/04 . . for improving efficiency of combustion
43/06 . . for enlarging charge
43/08 . Plants characterised by the engines using gaseous fuel generated in the plant from solid fuel, e.g. wood
43/10 . Engines or plants characterised by use of other specific gases, e.g. acetylene, oxyhydrogen
43/12 . . Methods of operating

45/00 Engines characterised by operating on non-liquid fuels other than gas; Plants including such engines (plants involving generation of gaseous fuel from solid fuel F02B 43/08; engines convertible from gas to other fuel consumption F02B 69/04)

45/02 . operating on powdered fuel, e.g. powdered coal (operating on fuel containing oxidant F02B 45/06)
45/04 . . Plants, e.g. having coal-grinding apparatus
45/06 . operating on fuel containing oxidant
45/08 . operating on other solid fuels
45/10 . operating on mixtures of liquid and non-liquid fuels, e.g. in pasty or foamed state

Methods of operating engines involving specific pre-treating of, or adding specific substances to, combustion air, fuel or fuel-air mixture of the engines, and not otherwise provided for

47/00 Methods of operating engines involving adding non-fuel substances or anti-knock agents to combustion air, fuel, or fuel-air mixtures of engines

47/02 . the substances being water or steam
47/04 . the substances being other than water or steam only
47/06 . . the substances including non-airborne oxygen (F02B 47/10 takes precedence)
47/08 . . the substances including exhaust gas
47/10 . . . Circulation of exhaust gas in closed or semi-closed circuits, e.g. with simultaneous addition of oxygen

49/00 Methods of operating air-compressing compression-ignition engines involving introduction of small quantities of fuel in the form of a fine mist into the air in the engine's intake

51/00 Other methods of operating engines involving pre-treating of, or adding substances to, combustion air, fuel, or fuel-air mixture of the engines

51/02 . involving catalysts
51/04 . involving electricity or magnetism
51/06 . involving rays or sound waves

Internal-combustion aspects of rotary-piston or oscillating-piston engines

53/00 Internal-combustion aspects of rotary-piston or oscillating-piston engines (internal-combustion aspects of rotary pistons or outer members for co-operation therewith F02B 55/00)

53/02 . Methods of operating

53/04 . Charge admission or combustion-gas discharge
53/06 . . Valve control therefor
53/08 . . Charging, e.g. by means of rotary-piston pump
53/10 . Fuel supply; Introducing fuel to combustion space
53/12 . Ignition
53/14 . Adaptations of engines for driving, or engine combinations with, other devices (aspects predominantly concerning such devices, see the relevant classes for the devices)

55/00 Internal-combustion aspects of rotary pistons; **Outer members for co-operation with rotary pistons**
55/02 . Pistons
55/04 . . Cooling thereof
55/06 . . . by air or other gas
55/08 . Outer members for co-operation with rotary pistons; Casings
55/10 . . Cooling thereof
55/12 . . . by air or other gas
55/14 . Shapes or constructions of combustion chambers
55/16 . Admission or exhaust passages in pistons or outer members

Internal-combustion aspects of reciprocating-piston engines with movable cylinders

57/00 Internal-combustion aspects of rotary engines in which the combusted gases displace one or more reciprocating pistons
57/02 . Fuel or combustion-air supply (cylinder-charge admission or exhaust control F02B 57/04)
57/04 . Control of cylinder-charge admission or exhaust (peculiar to two-stroke engines or to other engines with working-piston-controlled charge admission or exhaust F02B 57/06)
57/06 . Two-stroke engines or other engines with working-piston-controlled cylinder-charge admission or exhaust (with combustion space in centre of star F02B 57/10)
57/08 . Engines with star-shaped cylinder arrangements
57/10 . . with combustion space in centre of star

59/00 Internal-combustion aspects of other reciprocating-piston engines with movable, e.g. oscillating, cylinders (with yieldable walls F02B 75/38)

Adaptations of engines for special use; **Combinations of engines with devices other than engine parts or auxiliaries**

61/00 Adaptations of engines for driving vehicles or for driving propellers; **Combinations of engines with gearing** (the engine torque being divided by a differential gear for driving a scavenging or charging pump and the engine output shaft F02B 39/06; adaptations or combinations of rotary-piston or oscillating-piston engines F02B 53/14; arrangements in vehicles, see the relevant classes for vehicles)
61/02 . for driving cycles
61/04 . for driving propellers
61/06 . Combinations of engines with mechanical gearing (F02B 61/02, F02B 61/04 take precedence)

63/00 Adaptations of engines for driving pumps, hand-held tools or electric generators; **Portable combinations of engines with engine-driven devices** (of rotary-piston or oscillating-piston engines F02B 53/14)
63/02 . for hand-held tools
63/04 . for electric generators
63/06 . for pumps

65/00 Adaptations of engines for special uses not provided for in groups F02B 61/00 or F02B 63/00; **Combinations of engines with other devices, e.g. with non-driven apparatus** (of rotary-piston or oscillating-piston engines F02B 53/14; combinations of prime-movers consisting of electric motors and internal combustion engines for mutual or common propulsion B60K 6/20)

Engines with pertinent characteristics other than those provided for in, or of interest apart from, preceding main groups

67/00 Engines characterised by the arrangement of auxiliary apparatus not being otherwise provided for, e.g. the apparatus having different functions; **Driving auxiliary apparatus from engines, not otherwise provided for**
67/04 . of mechanically-driven auxiliary apparatus
67/06 . . driven by means of chains, belts, or like endless members
67/08 . of non-mechanically driven auxiliary apparatus
67/10 . of charging or scavenging apparatus **[5]**

69/00 Internal-combustion engines convertible into other combustion-engine type, not provided for in group F02B 11/00; **Internal-combustion engines of different types characterised by constructions facilitating use of same main engine-parts in different types**
69/02 . for different fuel types, other than engines indifferent to fuel consumed, e.g. convertible from light to heavy fuel
69/04 . . for gaseous and non-gaseous fuels
69/06 . for different cycles, e.g. convertible from two-stroke to four-stroke

71/00 Free-piston engines; **Engines without rotary main shaft**
71/02 . Starting
71/04 . Adaptations of such engines for special use; Combinations of such engines with apparatus driven thereby (aspects predominantly concerning driven apparatus, see the relevant classes for such apparatus)
71/06 . . Free-piston combustion gas generators

73/00 Combinations of two or more engines, not otherwise provided for

75/00 Other engines, e.g. single-cylinder engines
75/02 . Engines characterised by their cycles, e.g. six-stroke
75/04 . Engines with variable distances between pistons at top dead-centre positions and cylinder heads
75/06 . Engines with means for equalising torque (compensations of inertial forces, suppression of vibration in systems F16F)
75/08 . Engines with means for preventing corrosion in gas-swept spaces
75/10 . Engines with means for rendering exhaust gases innocuous (apparatus for rendering exhaust gases innocuous per se F01N 3/08)
75/12 . Other methods of operation
75/16 . Engines characterised by number of cylinders, e.g. single-cylinder engines (F02B 75/26 takes precedence)
75/18 . . Multi-cylinder engines (scavenging aspects F02B 25/00)
75/20 . . . with cylinders all in one line
75/22 . . . with cylinders in V-, fan-, or star-arrangement

75/24 . . . with cylinders arranged oppositely relative to main shaft and of "flat" type
75/26 . Engines with cylinder axes coaxial with, or parallel or inclined to, main-shaft axis; Engines with cylinder axes arranged substantially tangentially to a circle centred on main-shaft axis
75/28 . Engines with two or more pistons reciprocating within same cylinder or within essentially coaxial cylinders (arranged oppositely relative to main shaft F02B 75/24)
75/30 . . with one working piston sliding inside another
75/32 . Engines characterised by connections between pistons and main shafts and not specific to preceding main groups
75/34 . Ultra-small engines, e.g. for driving models
75/36 . Engines with parts of combustion- or working-chamber walls resiliently yielding under pressure
75/38 . . Reciprocating-piston engines (F02B 75/04 takes precedence; with resiliently-urged auxiliary piston in pre-combustion chamber F02B 19/06)
75/40 . Other reciprocating-piston engines

77/00 Component parts, details, or accessories, not otherwise provided for
77/02 . Surface coverings of combustion-gas-swept parts (of pistons or cylinders only F02F)
77/04 . Cleaning of, preventing corrosion or erosion in, or preventing unwanted deposits in, combustion engines
77/08 . Safety, indicating, or supervising devices (thermal insulation F02B 77/11; monitoring or diagnostic devices for exhaust-gas treatment apparatus F01N 11/00)
77/10 . . Safety means relating to crankcase explosions
77/11 . Thermal or acoustic insulation **[3]**
77/13 . . Acoustic insulation **[3]**
77/14 . Engine-driven auxiliary devices combined into units

79/00 Running-in of internal-combustion engines (lubrication thereof F01M)

F02C GAS-TURBINE PLANTS; **AIR INTAKES FOR JET-PROPULSION PLANTS**; **CONTROLLING FUEL SUPPLY IN AIR-BREATHING JET-PROPULSION PLANTS** (construction of turbines F01D; jet-propulsion plants F02K; construction of compressors or fans F04; combustion apparatus in which combustion takes place in a fluidised bed of fuel or other particles F23C 10/00; generating combustion products of high pressure or high velocity F23R; using gas turbines in compression refrigeration plants F25B 11/00; using gas-turbine plants in vehicles, see the relevant vehicle classes)

(1) This subclass covers:
– combustion product or hot gas turbine plants;
– internal combustion turbines or turbine plants;
– turbine plants in which the working fluid is an unheated, pressurised gas.
(2) This subclass does not cover:
– steam turbine plants, which are covered by subclass F01K;
– special vapour plants, which are covered by subclass F01K.
(3) In this subclass, the following expression is used with the meaning indicated:
– "gas-turbine plants" covers all the subject matter of Note (1) above and covers also features of jet-propulsion plants common to gas-turbine plants.
(4) Attention is drawn to the Notes preceding class F01.

1/00 Gas-turbine plants characterised by the use of hot gases or unheated pressurised gases, as the working fluid (by the use of combustion products F02C 3/00, F02C 5/00) **[3]**
1/02 . the working fluid being an unheated pressurised gas **[3]**
1/04 . the working fluid being heated indirectly **[3]**
1/05 . . characterised by the type or source of heat, e.g. using nuclear or solar energy **[3]**
1/06 . . . using reheated exhaust gas (F02C 1/08 takes precedence) **[3]**
1/08 . . Semi-closed cycles **[3]**
1/10 . . Closed cycles **[3]**

3/00 Gas-turbine plants characterised by the use of combustion products as the working fluid (generated by intermittent combustion F02C 5/00)
3/02 . using exhaust-gas pressure in a pressure exchanger to compress combustion-air (pressure exchangers per se F04F 13/00)
3/04 . having a turbine driving a compressor (power transmission arrangements F02C 7/36; control of working fluid flow F02C 9/16) **[5]**
3/045 . . having compressor and turbine passages in a single rotor (F02C 3/073 takes precedence) **[3]**
3/05 . . . the compressor and the turbine being of the radial flow type **[3]**
3/055 . . the compressor being of the positive-displacement type **[3]**
3/06 . . the compressor comprising only axial stages (F02C 3/10 takes precedence) **[3]**
3/067 . . . having counter-rotating rotors (F02C 3/073 takes precedence) **[3]**
3/073 . . . the compressor and turbine stages being concentric **[3]**
3/08 . . the compressor comprising at least one radial stage (F02C 3/10 takes precedence) **[3]**
3/09 . . . of the centripetal type **[3]**
3/10 . . with another turbine driving an output shaft but not driving the compressor

3/107 . . with two or more rotors connected by power transmission **[5]**

3/113 . . . with variable power transmission between rotors **[5]**

3/13 . . having variable working fluid interconnections between turbines or compressors or stages of different rotors **[5]**

3/14 . characterised by the arrangement of the combustion chamber in the plant (combustion chambers per se F23R) **[3]**

3/16 . . the combustion chambers being formed at least partly in the turbine rotor

3/20 . using a special fuel, oxidant, or dilution fluid to generate the combustion products **[3]**

3/22 . . the fuel or oxidant being gaseous at standard temperature and pressure (F02C 3/28 takes precedence) **[3]**

3/24 . . the fuel or oxidant being liquid at standard temperature and pressure **[3]**

3/26 . . the fuel or oxidant being solid or pulverulent, e.g. in slurry or suspension

3/28 . . . using a separate gas producer for gasifying the fuel before combustion **[3]**

3/30 . . Adding water, steam or other fluids to the combustible ingredients or to the working fluid before discharge from the turbine (heating of air intakes to prevent icing F02C 7/047) **[3]**

3/32 . Inducing air flow by fluid jet, e.g. ejector action **[3]**

3/34 . with recycling of part of the working fluid, i.e. semi-closed cycles with combustion products in the closed part of the cycle **[3]**

3/36 . Open cycles **[3]**

5/00 Gas-turbine plants characterised by the working fluid being generated by intermittent combustion

5/02 . characterised by the arrangement of the combustion chamber in the plant (combustion chambers per se F23R) **[3]**

5/04 . . the combustion chambers being formed at least partly in the turbine rotor

5/06 . the working fluid being generated in an internal-combustion gas generator of the positive-displacement type having essentially no mechanical power output (internal-combustion engines with prolonged expansion using exhaust gas turbines F02B)

5/08 . . the gas generator being of the free-piston type

5/10 . the working fluid forming a resonating or oscillating gas column, i.e. the combustion chambers having no positively actuated valves, e.g. using Helmholtz effect **[3]**

5/11 . . using valveless combustion chambers **[3]**

5/12 . the combustion chambers having inlet or outlet valves, e.g. Holzwarth gas-turbine plants

6/00 Plural gas-turbine plants; **Combinations of gas-turbine plants with other apparatus** (aspects predominantly concerning such apparatus, see the relevant classes for the apparatus); **Adaptations of gas-turbine plants for special use [3]**

6/02 . Plural gas-turbine plants having a common power output **[3]**

6/04 . Gas-turbine plants providing heated or pressurised working fluid for other apparatus, e.g. without mechanical power output (F02C 6/18 takes precedence) **[3]**

6/06 . . providing compressed gas (F02C 6/10 takes precedence) **[3]**

6/08 . . . the gas being bled from the gas-turbine compressor **[3]**

6/10 . . supplying working fluid to a user, e.g. a chemical process, which returns working fluid to a turbine of the plant **[3]**

6/12 . . . Turbochargers, i.e. plants for augmenting mechanical power output of internal-combustion piston engines by increase of charge pressure **[3]**

6/14 . Gas-turbine plants having means for storing energy, e.g. for meeting peak loads **[3]**

6/16 . . for storing compressed air **[3]**

6/18 . using the waste heat of gas-turbine plants outside the plants themselves, e.g. gas-turbine power heat plants (using waste heat as source of energy for refrigeration plants F25B 27/02) **[3]**

6/20 . Adaptations of gas-turbine plants for driving vehicles **[3]**

7/00 Features, component parts, details or accessories, not provided for in, or of interest apart from, groups F02C 1/00 to F02C 6/00; **Air intakes for jet-propulsion plants** (controlling F02C 9/00) **[3]**

7/04 . Air intakes for gas-turbine plants or jet-propulsion plants **[3]**

7/042 . . having variable geometry **[3]**

7/045 . . having provisions for noise suppression **[3]**

7/047 . . Heating to prevent icing **[3]**

7/05 . . having provisions for obviating the penetration of damaging objects or particles **[3]**

7/052 . . . with dust-separation devices **[3]**

7/055 . . . with intake grids, screens or guards **[3]**

7/057 . . Control or regulation (conjointly with fuel supply control F02C 9/50, with nozzle area control F02K 1/16) **[3]**

7/06 . Arrangement of bearings (bearings F16C); Lubricating (of engines in general F01M) **[3]**

7/08 . Heating air supply before combustion, e.g. by exhaust gases

7/10 . . by means of regenerative heat-exchangers

7/105 . . . of the rotary type (rotary heat exchangers per se F28D) **[3]**

7/12 . Cooling of plants (of component parts, see the relevant subclasses, e.g. F01D; cooling of engines in general F01P)

7/14 . . of fluids in the plant

7/141 . . . of working fluid (F02C 3/30 takes precedence) **[3]**

7/143 . . . . before or between the compressor stages **[3]**

7/16 . . characterised by cooling medium

7/18 . . . the medium being gaseous, e.g. air

7/20 . Mounting or supporting of plant; Accommodating heat expansion or creep

7/22 . Fuel supply systems

7/224 . . Heating fuel before feeding to the burner **[3]**

7/228 . . Dividing fuel between various burners **[3]**

7/232 . . Fuel valves; Draining valves or systems (valves in general F16K) **[3]**

7/236 . . Fuel delivery systems comprising two or more pumps **[3]**

7/24 . Heat or noise insulation (air intakes having provisions for noise suppression F02C 7/045; turbine exhaust heads, chambers, or the like F01D 25/30; silencing nozzles of jet-propulsion plants F02K 1/00) **[3]**

7/25 . . Fire protection or prevention (in general A62) **[3]**

7/26 . Starting; Ignition

7/262 . . Restarting after flame-out **[3]**
7/264 . . Ignition **[3]**
7/266 . . . Electric (sparking plugs H01T) **[3]**
7/268 . . Starting drives for the rotor **[3]**
7/27 . . . Fluid drives (turbine starters F02C 7/277) **[3]**
7/272 . . . . generated by cartridges **[3]**
7/275 . . . Mechanical drives **[3]**
7/277 . . . . the starter being a turbine **[3]**
7/28 . Arrangement of seals
7/30 . Preventing corrosion in gas-swept spaces
7/32 . Arrangement, mounting, or driving, of auxiliaries
7/36 . Power transmission between the different shafts of the gas-turbine plant, or between the gas-turbine plant and the power user (F02C 7/32 takes precedence; couplings for transmitting rotation F16D; gearing in general F16H) **[3]**

9/00 Controlling gas-turbine plants; **Controlling fuel supply in air-breathing jet-propulsion plants** (controlling air intakes F02C 7/057; controlling turbines F01D; controlling compressors F04D 27/00) **[3]**

9/16 . Control of working fluid flow (F02C 9/48 takes precedence; control of air-intake flow F02C 7/057) **[3]**
9/18 . . by bleeding, by-passing or acting on variable working fluid interconnections between turbines or compressors or their stages **[3,5]**
9/20 . . by throttling; by adjusting vanes **[3]**
9/22 . . . by adjusting turbine vanes **[3]**
9/24 . . Control of the pressure level in closed cycles **[3]**
9/26 . Control of fuel supply (F02C 9/48 takes precedence; fuel valves F02C 7/232) **[3]**
9/28 . . Regulating systems responsive to plant or ambient parameters, e.g. temperature, pressure, rotor speed (F02C 9/30 to F02C 9/38, F02C 9/44 take precedence) **[3]**
9/30 . . characterised by variable fuel pump output **[3]**
9/32 . . characterised by throttling of fuel (F02C 9/38 takes precedence) **[3]**
9/34 . . . Joint control of separate flows to main and auxiliary burners **[3]**
9/36 . . characterised by returning of fuel to sump (F02C 9/38 takes precedence) **[3]**
9/38 . . characterised by throttling and returning of fuel to sump **[3]**
9/40 . . specially adapted to the use of a special fuel or a plurality of fuels **[3]**
9/42 . . specially adapted for the control of two or more plants simultaneously **[3]**
9/44 . . responsive to the speed of aircraft, e.g. Mach number control, optimisation of fuel consumption **[3]**
9/46 . . Emergency fuel control **[3]**
9/48 . Control of fuel supply conjointly with another control of the plant (with nozzle section control F02K 1/17) **[3]**
9/50 . . with control of working fluid flow **[3]**
9/52 . . . by bleeding or by-passing the working fluid **[3]**
9/54 . . . by throttling the working fluid, by adjusting vanes **[3]**
9/56 . . with power transmission control **[3]**
9/58 . . . with control of a variable-pitch propeller **[3]**

F02D CONTROLLING COMBUSTION ENGINES (vehicle fittings, acting on a single sub-unit only, for automatically controlling vehicle speed B60K 31/00; conjoint control of vehicle sub-units of different type or different function, road vehicle drive control systems for purposes other than the control of a single sub-unit B60W; cyclically operating valves for combustion engines F01L; controlling combustion engine lubrication F01M; cooling internal-combustion engines F01P; supplying combustion engines with combustible mixtures or constituents thereof, e.g. carburettors, injection pumps, F02M; starting of combustion engines F02N; controlling of ignition F02P; controlling gas-turbine plants, jet-propulsion plants, or combustion-product engine plants, see the relevant subclasses for these plants) **[4,8]**

(1) In this subclass, the following term or expression is used with the meanings indicated:
– "fuel injection" means the introduction of a combustible substance into a space, e.g. cylinder, by means of a pressure source, e.g. a pump, continuously or cyclically acting behind the substance;
– "supercharging" means supplying to the working space, e.g. cylinder, combustion-air pressurised by means of a pressure source, e.g. a pump.
(2) Attention is drawn to the Notes preceding class F01.
(3) In this subclass, electrical aspects of control arrangements are classified in groups F02D 41/00 to F02D 45/00. **[4]**

Subclass index

Controlling, e.g. regulating, fuel injection

1/00 **Controlling fuel-injection pumps, e.g. of high-pressure injection type** (F02D 3/00 takes precedence) **[2]**
1/02 . not restricted to adjustment of injection timing, e.g. varying amount of fuel delivered
1/04 . . by mechanical means dependent on engine speed, e.g. using centrifugal governors (F02D 1/08 takes precedence)
1/06 . . by means dependent on pressure of engine working fluid (F02D 1/08 takes precedence)
1/08 . . Transmission of control impulse to pump control, e.g. with power drive or power assistance
1/10 . . . mechanical
1/12 . . . non-mechanical, e.g. hydraulic
1/14 . . . . pneumatic
1/16 . Adjustment of injection timing (F02D 1/02 takes precedence)
1/18 . . with non-mechanical means for transmitting control impulse; with amplification of control impulse

3/00 **Controlling low-pressure fuel injection, i.e. where the air-fuel mixture containing fuel thus injected will be substantially compressed by the compression stroke of the engine, by means other than controlling only an injection pump** (carburettors F02M) **[2]**

Note

When the control apparatus or system forms part of the low-pressure fuel-injection apparatus it is classified in group F02M 69/00. **[5]**

3/02 . with continuous injection or continuous flow upstream of the injection nozzle **[2]**
3/04 . Controlling fuel injection and carburation, e.g. of alternative systems

7/00 **Other non-electrical fuel injection control [4]**
7/02 . Controlling fuel injection where fuel is injected by compressed air

---

9/00 **Controlling engines by throttling air or fuel-and-air induction conduits or exhaust conduits**
9/02 . concerning induction conduits (throttle valves, or arrangements thereof in conduits F02D 9/08)
9/04 . concerning exhaust conduits (throttle valves, or arrangements thereof in conduits F02D 9/08)
9/06 . . Exhaust brakes
9/08 . Throttle valves specially adapted therefor; Arrangements of such valves in conduits (throttle valves modified for use in, or arranged in, carburettors F02M; throttle valves in general F16K)
9/10 . . having pivotally-mounted flaps
9/12 . . having slidably-mounted valve-members; having valve-members movable longitudinally of conduit
9/14 . . . the members being slidable transversely of conduit
9/16 . . . the members being rotatable
9/18 . . having elastic-wall valve-members

11/00 **Arrangements for, or adaptations to, non-automatic engine control initiation means, e.g. operator initiated** (specially for reversing F02D 27/00; arrangement or mounting of prime-mover control devices in vehicles B60K 26/00) **[2,5]**
11/02 . characterised by hand, foot, or like operator controlled initiation means **[5]**
11/04 . characterised by mechanical control linkages (with power drive or assistance F02D 11/06) **[5]**
11/06 . characterised by non-mechanical control linkages, e.g. fluid control linkages or by control linkages with power drive or assistance **[5]**
11/08 . . of the pneumatic type **[5]**
11/10 . . of the electric type **[5]**

13/00 **Controlling the engine output power by varying inlet or exhaust valve operating characteristics, e.g. timing** (modifying valve gear F01L)
13/02 . during engine operation
13/04 . . using engine as brake
13/06 . . Cutting-out cylinders
13/08 . for rendering engine inoperative or idling

15/00 **Varying compression ratio** (modifying valve-gear F01L)
15/02 . by alteration or displacement of piston stroke
15/04 . by alteration of volume of compression space without changing piston stroke

17/00 **Controlling engines by cutting-out individual cylinders**; **Rendering engines inoperative or idling** (controlling or rendering inoperative by varying inlet or exhaust valve operating characteristics F02D 13/00)
17/02 . Cutting-out (cutting-out engines in multiple-engine arrangements F02D 25/04)
17/04 . rendering engines inoperative or idling, e.g. caused by abnormal conditions (dependent on lubricating conditions F01M 1/22; dependent on cooling F01P 5/14)

Controlling peculiar to specified types or adaptations of engines

19/00 **Controlling engines characterised by their use of non-liquid fuels, pluralities of fuels, or non-fuel substances added to the combustible mixtures** (the non-fuel substances being gaseous F02D 21/00)
19/02 . peculiar to engines working with gaseous fuels (apparatus, or control parts thereof, for mixing gas and air F02M)

19/04 . peculiar to engines working with solid fuels, e.g. pulverised coal

19/06 . peculiar to engines working with pluralities of fuels, e.g. alternatively with light and heavy fuel oil, other than engines indifferent to the fuel consumed

19/08 . . simultaneously using pluralities of fuels (F02D 19/12 takes precedence)

19/10 . . . peculiar to compression-ignition engines in which the main fuel is gaseous

19/12 . peculiar to engines working with non-fuel substances or with anti-knock agents, e.g. with anti-knock fuel (apparatus, or control parts thereof, for delivering such substances or agents F02M)

21/00 Controlling engines characterised by their being supplied with non-airborne oxygen or other non-fuel gas

21/02 . peculiar to oxygen-fed engines

21/04 . . with circulation of exhaust gases in closed or semi-closed circuits

21/06 . peculiar to engines having other non-fuel gas added to combustion-air

21/08 . . the other gas being the exhaust gas of engine (circulation of exhaust gas in oxygen-fed engines F02D 21/04)

21/10 . . having secondary air added to fuel-air mixture (apparatus, or control parts thereof, for delivering secondary air F02M)

23/00 Controlling engines characterised by their being supercharged

23/02 . the engines being of fuel-injection type

25/00 Controlling two or more co-operating engines

25/02 . to synchronise speed

25/04 . by cutting-out engines

27/00 Controlling engines characterised by their being reversible

27/02 . by performing a programme

28/00 Programme-control of engines (programme-control specific to a type or purpose covered by one of the groups of this subclass, except groups F02D 29/00, F02D 39/00, or by one group of another subclass, e.g. of F01L, see that group) **[2]**

29/00 Controlling engines, such controlling being peculiar to the devices driven thereby, the devices being other than parts or accessories essential to engine operation, e.g. controlling of engines by signals external thereto [2]

29/02 . peculiar to engines driving vehicles; peculiar to engines driving variable-pitch propellers **[2]**

29/04 . peculiar to engines driving pumps

29/06 . peculiar to engines driving electric generators

Other non-electrical control of combustion engines [4]

31/00 Use of non-electrical speed-sensing governors to control combustion engines, not otherwise provided for

33/00 Non-electrical control of delivery of fuel or combustion-air, not otherwise provided for

33/02 . of combustion-air

35/00 Non-electrical control of engines, dependent on conditions exterior or interior to engines, not otherwise provided for

35/02 . on interior conditions

37/00 Non-electrical conjoint control of two or more functions of engines, not otherwise provided for

37/02 . one of the functions being ignition (ignition control per se F02P)

39/00 Other non-electrical control [4]

39/02 . for four-stroke engines

39/04 . for engines with other cycles than four-stroke, e.g. two-stroke

39/06 . for engines adding the fuel substantially at end of compression stroke

39/08 . for engines adding the fuel substantially before compression stroke

39/10 . for free-piston engines; for engines without rotary main shaft

Electrical control of combustion engines [4]

(1) Groups F02D 41/00 to F02D 45/00 cover electrical aspects of electrically controlled devices. **[6]**

(2) Groups F02D 41/00 to F02D 45/00 do not cover: **[6]**
- non-electrical aspects of electrically controlled devices, which are covered by groups F02D 1/00 to F02D 39/00 or by subclass F02M; **[6]**
- both electrical and non-electrical aspects of electrically controlled devices, which are covered by groups F02D 1/00 to F02D 39/00 or by subclass F02M. **[4,6]**

41/00 Electrical control of supply of combustible mixture or its constituents (F02D 43/00 takes precedence) **[4]**

41/02 . Circuit arrangements for generating control signals **[4]**

41/04 . . Introducing corrections for particular operating conditions (F02D 41/14 takes precedence) **[4]**

41/06 . . . for engine starting or warming up **[4]**

41/08 . . . for idling (F02D 41/06, F02D 41/16 take precedence) **[4]**

41/10 . . . for acceleration **[4]**

41/12 . . . for deceleration **[4]**

41/14 . . Introducing closed-loop corrections **[4]**

41/16 . . . for idling **[4]**

41/18 . . by measuring intake air flow (measuring flow, in general G01F) **[4]**

41/20 . Output circuits, e.g. for controlling currents in command coils (current control in inductive loads in general H03K 17/64) **[4]**

41/22 . Safety or indicating devices for abnormal conditions **[4]**

41/24 . characterised by the use of digital means **[4]**

41/26 . . using computer, e.g. microprocessor **[4]**

41/28 . . . Interface circuits **[4]**

41/30 . Controlling fuel injection **[4]**

41/32 . . of the low pressure type **[4]**

41/34 . . . with means for controlling injection timing or duration (ignition timing F02P 5/00) **[4]**

41/36 . . . with means for controlling distribution (arrangement of ignition distributors F02P 7/00) **[4]**

41/38 . . of the high pressure type **[4]**

41/40 . . . with means for controlling injection timing or duration **[4]**

43/00 **Conjoint electrical control of two or more functions, e.g. ignition, fuel-air mixture, recirculation, supercharging, exhaust-gas treatment** (electrical control of exhaust gas treating apparatus per se F01N 9/00) **[4]**

43/02 . using only analogue means **[4]**

43/04 . using only digital means **[4]**

45/00 **Electrical control not provided for in groups F02D 41/00 to F02D 43/00** (electrical control of exhaust gas treating apparatus F01N 9/00; electrical control of one of the functions: ignition, lubricating, cooling, starting, intake-heating, see the relevant subclasses for such functions) **[4]**

F02F **CYLINDERS, PISTONS, OR CASINGS FOR COMBUSTION ENGINES**; **ARRANGEMENTS OF SEALINGS IN COMBUSTION ENGINES** (specially adapted for rotary-piston or oscillating-piston internal-combustion engines F02B; specially adapted for gas-turbine plants F02C; specially adapted for jet-propulsion plants F02K) **[2]**

(1) Attention is drawn to the Notes preceding class F01.

(2) Class F16 takes precedence over this subclass, except for subject matter specific to combustion engines.

1/00 **Cylinders**; **Cylinder heads** (in general F16J)

1/02 . having cooling means (cylinder heads F02F 1/26)

1/04 . . for air cooling

1/06 . . . Shape or arrangement of cooling fins; Finned cylinders

1/08 . . . . running-liner and cooling-part of cylinder being different parts or of different material

1/10 . . for liquid cooling

1/12 . . . Preventing corrosion of liquid-swept surfaces

1/14 . . . Cylinders with means for directing, guiding, or distributing liquid stream

1/16 . . . Cylinder liners of wet type

1/18 . Other cylinders

1/20 . . characterised by constructional features providing for lubrication

1/22 . . characterised by having ports in cylinder wall for scavenging or charging

1/24 . Cylinder heads

1/26 . . having cooling means

1/28 . . . for air cooling

1/30 . . . . Finned cylinder heads

1/32 . . . . . the cylinder heads being of overhead-valve type

1/34 . . . . . with means for directing or distributing cooling medium (F02F 1/32 takes precedence)

1/36 . . . for liquid cooling

1/38 . . . . the cylinder heads being of overhead-valve type

1/40 . . . . . cylinder heads with means for directing, guiding, or distributing liquid stream (F02F 1/38 takes precedence)

1/42 . . Shape or arrangement of intake or exhaust channels in cylinder heads

3/00 **Pistons** (in general F16J)

3/02 . having means for accommodating or controlling heat expansion

3/04 . . having expansion-controlling inserts

3/06 . . . the inserts having bimetallic effect

3/08 . . . the inserts being ring-shaped

3/10 . having surface coverings (F02F 3/02 takes precedence)

3/12 . . on piston heads

3/14 . . . within combustion chambers

3/16 . having cooling means

3/18 . . the means being a liquid or solid coolant, e.g. sodium, in a closed chamber in piston

3/20 . . the means being a fluid flowing through or along piston

3/22 . . . the fluid being liquid

3/24 . having means for guiding gases in cylinders, e.g. for guiding scavenging charge in two-stroke engines

3/26 . having combustion chamber in piston head (the surface thereof being covered F02F 3/14)

3/28 . Other pistons with specially-shaped head

5/00 **Piston rings, e.g. associated with piston crown**

7/00 **Casings, e.g. crankcases** (engine casings in general F16M)

11/00 **Arrangements of sealings in combustion engines** (piston rings F02F 5/00; sealings per se F16J)

F02G **HOT-GAS OR COMBUSTION-PRODUCT POSITIVE-DISPLACEMENT ENGINE PLANTS** (steam engine plants, special vapour plants, plants operating on either hot gas or combustion-product gases together with other fluid F01K; gas-turbine plants F02C; jet-propulsion plants F02K); **USE OF WASTE HEAT OF COMBUSTION ENGINES, NOT OTHERWISE PROVIDED FOR**

Note

Attention is drawn to the Notes preceding class F01.

1/00 **Hot gas positive-displacement engine plants** (positive-displacement engine plants characterised by the working gas being generated by combustion in the plant F02G 3/00) **[3]**

1/02 . of open-cycle type

1/04 . of closed-cycle type

1/043 . . the engine being operated by expansion and contraction of a mass of working gas which is heated and cooled in one of a plurality of constantly communicating expansible chambers, e.g. Stirling cycle type engines **[3]**

1/044 . . . having at least two working members, e.g. pistons, delivering power output **[3]**

1/045 . . . Controlling **[3]**

1/047 . . . . by varying the heating or cooling **[3]**

1/05 . . . . by varying the rate of flow or quantity of the working gas **[3]**

1/053 . . . Component parts or details **[3]**

1/055 . . . . Heaters or coolers **[3]**

1/057 . . . . Regenerators **[3]**

1/06 . Controlling

3/00 **Positive-displacement engine plants characterised by the working gas being generated by combustion in the plant [3]**

3/02 . with reciprocating-piston engines

5/00 **Profiting from waste heat of combustion engines, not otherwise provided for**

5/02 . Profiting from waste heat of exhaust gases

5/04 . . in combination with other waste heat from combustion engines

---

F02K **JET-PROPULSION PLANTS** (arrangement or mounting of jet-propulsion plants in land vehicles or vehicles in general B60K; arrangement or mounting of jet-propulsion plants in waterborne vessels B63H; controlling aircraft attitude, flight direction, or altitude by jet reaction B64C; arrangement or mounting of jet-propulsion plants in aircraft B64D; plants characterised by the power of the working fluid being divided between jet propulsion and another form of propulsion, e.g. propeller, F02B, F02C; features of jet-propulsion plants common to gas-turbine plants, air intakes or fuel supply control of air-breathing jet-propulsion plants F02C)

(1) In this subclass, the following expression is used with the meaning indicated:
– "jet-propulsion plants" means plants using combustion to produce a fluid stream from which a propulsive thrust on the plants is obtained on the reaction principle.

(2) Attention is drawn to the Notes preceding class F01.

Subclass index

1/00 **Plants characterised by the form or arrangement of the jet pipe or nozzle**; **Jet pipes or nozzles peculiar thereto** (rocket nozzles F02K 9/97)

1/04 . Mounting of an exhaust cone in the jet pipe

1/06 . Varying effective area of jet pipe or nozzle (F02K 1/30 takes precedence) **[3]**

1/08 . . by axially moving or transversely deforming an internal member, e.g. the exhaust cone

1/09 . . by axially moving an external member, e.g. a shroud (F02K 1/12 takes precedence) **[3]**

1/10 . . by distorting the jet pipe or nozzle

1/11 . . by means of pivoted eyelids **[3]**

1/12 . . by means of pivoted flaps

1/15 . . Control or regulation **[3]**

1/16 . . . conjointly with another control **[3]**

1/17 . . . . with control of fuel supply **[3]**

1/18 . . . automatic **[3]**

1/28 . using fluid jets to influence the jet flow **[3]**

1/30 . . for varying effective area of jet pipe or nozzle **[3]**

1/32 . . for reversing thrust **[3]**

1/34 . . for attenuating noise **[3]**

1/36 . having an ejector **[3]**

1/38 . Introducing air inside the jet (F02K 1/28 takes precedence) **[3]**

1/40 . Nozzles having means for dividing the jet into a plurality of partial jets or having an elongated cross-section outlet **[3]**

1/42 . . the means being movable into an inoperative position **[3]**
1/44 . Nozzles having means, e.g. a shield, reducing sound radiation in a specified direction (F02K 1/40 takes precedence) **[3]**
1/46 . Nozzles having means for adding air to the jet or for augmenting the mixing region between the jet and the ambient air, e.g. for silencing (F02K 1/28, F02K 1/36, F02K 1/38 take precedence) **[3]**
1/48 . . Corrugated nozzles **[3]**
1/50 . . Deflecting outwardly a portion of the jet by retractable scoop-like baffles **[3]**
1/52 . Nozzles specially constructed for positioning adjacent to another nozzle or to a fixed member, e.g. fairing **[3]**
1/54 . Nozzles having means for reversing jet thrust (F02K 1/32 takes precedence) **[3]**
1/56 . . Reversing jet main flow **[3]**
1/58 . . . Reversers mounted on the inner cone or the nozzle housing **[3]**
1/60 . . . by blocking the rearward discharge by means of pivoted eyelids or clamshells, e.g. target-type reversers **[3]**
1/62 . . . by blocking the rearward discharge by means of flaps **[3]**
1/64 . . Reversing fan flow **[3]**
1/66 . . . using reversing fan blades **[3]**
1/68 . . . Reversers mounted on the engine housing downstream of the fan exhaust section **[3]**
1/70 . . . using thrust reverser flaps or doors mounted on the fan housing **[3]**
1/72 . . . . the aft end of the fan housing being movable to uncover openings in the fan housing for the reversed flow **[3]**
1/74 . . Reversing at least one flow in relation to at least one other flow in a plural-flow engine **[3]**
1/76 . . Control or regulation of thrust reversers **[3]**
1/78 . Other construction of jet pipes **[3]**
1/80 . . Couplings or connections **[3]**
1/82 . . Jet pipe walls, e.g. liners **[3]**

3/00 Plants including a gas turbine driving a compressor or a ducted fan

3/02 . in which part of the working fluid by-passes the turbine and combustion chamber
3/04 . . the plant including ducted fans, i.e. fans with high volume, low-pressure outputs, for augmenting jet thrust, e.g. of double-flow type
3/06 . . . with front fan
3/062 . . . with aft fan **[3]**
3/065 . . . with front and aft fans **[3]**
3/068 . . . being characterised by a short axial length relative to diameter **[3]**
3/072 . . . with counter-rotating rotors **[3]**
3/075 . . . controlling flow ratio between flows **[3]**
3/077 . . . the plant being of the multiple flow type, i.e. having three or more flows **[3]**
3/08 . with supplementary heating of the working fluid (after-burners, combustion chambers F23R); Control thereof (control of fuel supply therefor F02C 9/26) **[3]**
3/10 . . by after-burners (F02K 3/105 takes precedence) **[3]**
3/105 . . Heating the by-pass flow **[3]**
3/11 . . . by means of burners or combustion chambers **[3]**
3/115 . . . by means of indirect heat exchange **[3]**
3/12 . characterised by having more than one gas turbine

5/00 Plants including an engine, other than a gas turbine, driving a compressor or a ducted fan

5/02 . the engine being of the reciprocating-piston type

7/00 Plants in which the working-fluid is used in a jet only, i.e. the plants not having a turbine or other engine driving a compressor or a ducted fan; **Control thereof** (rocket-engine plants F02K 9/00)

7/02 . the jet being intermittent, i.e. pulse jet
7/04 . . with resonant combustion chambers
7/06 . . with combustion chambers having valves
7/067 . . . having aerodynamic valves **[3]**
7/075 . . with multiple pulse-jet engines **[3]**
7/08 . the jet being continuous
7/10 . characterised by having ram-action compression, i.e. aero-thermo-dynamic-ducts or ram-jet engines
7/12 . . Injection-induction jet engines **[3]**
7/14 . . with external combustion, e.g. scram-jet engines **[3]**
7/16 . . Composite ram-jet/turbo-jet engines **[3]**
7/18 . . Composite ram-jet/rocket engines **[3]**
7/20 . . Composite ram-jet/pulse-jet engines **[3]**

9/00 Rocket-engine plants, i.e. plants carrying both fuel and oxidant therefor; **Control thereof** (chemical composition of propellants C06B, C06D) **[3]**

9/08 . using solid propellants (F02K 9/72 takes precedence; using semi-solid or pulverulent propellants F02K 9/70) **[3]**
9/10 . . Shape or structure of solid propellant charges **[3]**
9/12 . . . made of two or more portions burning at different rates **[3]**
9/14 . . . made from sheet-like materials, e.g. of carpet-roll type, of layered structure **[3]**
9/16 . . . of honeycomb structure **[3]**
9/18 . . . of the internal-burning type having a star or like shaped internal cavity **[3]**
9/20 . . . of the external-burning type **[3]**
9/22 . . . of the front-burning type **[3]**
9/24 . . Charging rocket engines with solid propellants; Methods or apparatus specially adapted for working solid propellant charges **[3]**
9/26 . . Burning control **[3]**
9/28 . . having two or more propellant charges with the propulsion gases exhausting through a common nozzle **[3]**
9/30 . . with the propulsion gases exhausting through a plurality of nozzles **[3]**
9/32 . . Constructional parts; Details (shape or structure of solid propellant charges F02K 9/10; starting or ignition means or arrangements F02K 9/95; rocket nozzles F02K 9/97) **[3]**
9/34 . . . Casings; Combustion chambers; Liners thereof **[3]**
9/36 . . . Propellant charge supports **[3]**
9/38 . . . Safety devices, e.g. to prevent accidental ignition **[3]**
9/40 . . . Cooling arrangements **[3]**
9/42 . using liquid or gaseous propellants (F02K 9/72 takes precedence) **[3]**
9/44 . . Feeding propellants **[3]**
9/46 . . . using pumps (pumps <u>per se</u> F04) **[3]**
9/48 . . . . driven by a gas turbine fed by propellant combustion gases **[3]**

9/50 . . . using pressurised fluid to pressurize the propellants **[3]**
9/52 . . . Injectors (in general B05B) **[3]**
9/54 . . . Leakage detectors; Purging systems; Filtration systems (filters per se B01D) **[3]**
9/56 . . . Control **[3]**
9/58 . . . . Propellant feed valves (valves in general F16K) **[3]**
9/60 . . Constructional parts; Details (starting or ignition means or arrangements F02K 9/95; rocket nozzles F02K 9/97) **[3]**
9/62 . . . Combustion or thrust chambers **[3]**
9/64 . . . . having cooling arrangements **[3]**
9/66 . . . . of the rotary type **[3]**
9/68 . . . Decomposition chambers **[3]**
9/70 . using semi-solid or pulverulent propellants **[3]**
9/72 . using liquid and solid propellants, i.e. hybrid rocket-engine plants **[3]**
9/74 . combined with another jet-propulsion plant **[3]**
9/76 . . with another rocket-engine plant; Multistage rocket-engine plants **[3]**
9/78 . . with an air-breathing jet-propulsion plant (with a ram-jet engine F02K 7/18) **[3]**
9/80 . characterised by thrust or thrust vector control (F02K 9/26, F02K 9/56, F02K 9/94 take precedence) **[3]**
9/82 . . by injection of a secondary fluid into the rocket exhaust gases **[3]**
9/84 . . using movable nozzles **[3]**
9/86 . . using nozzle throats of adjustable cross-section **[3]**
9/88 . . using auxiliary rocket nozzles **[3]**
9/90 . . using deflectors (F02K 9/82 takes precedence) **[3]**
9/92 . . incorporating means for reversing or terminating thrust **[3]**
9/94 . Re-ignitable or restartable rocket-engine plants; Intermittently operated rocket-engine plants **[3]**
9/95 . characterised by starting or ignition means or arrangements (safety devices F02K 9/38) **[3]**
9/96 . characterised by specially adapted arrangements for testing or measuring **[3]**
9/97 . Rocket nozzles (thrust or thrust vector control F02K 9/80) **[3]**

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

F02M SUPPLYING COMBUSTION ENGINES IN GENERAL WITH COMBUSTIBLE MIXTURES OR CONSTITUENTS THEREOF (charging such engines F02B)

(1) In this subclass, the following terms or expressions are used with the meanings indicated:
– "carburettors" means essentially apparatus for mixing fuel with air, the fuel being brought into mixing contact with the air by lowering the air pressure, e.g. in a venturi;
– "fuel-injection apparatus" means apparatus for introducing fuel into a space, e.g. engine cylinder, by pressurising the fuel, e.g. by a pump acting behind the fuel, and thus includes the so-called "solid-fuel injection" in which liquid fuel is introduced without any admixture of gas;
– "low-pressure fuel injection" means fuel injection in which the fuel-air mixture containing fuel thus injected will be substantially compressed in the compression stroke of the engine;
– "pumping element" means a single piston-cylinder unit in a reciprocating-piston fuel-injection pump or the equivalent unit in any other type of fuel-injection pump.

(2) Attention is drawn to the Notes preceding class F01.

Subclass index

Carburettors for liquid fuels

1/00 Carburettors with means for facilitating engine's starting or its idling below operational temperatures

1/02 . the means to facilitate starting or idling being chokes for enriching fuel-air mixture (automatic chokes F02M 1/08)

1/04 . the means to facilitate starting or idling being auxiliary carburetting apparatus able to be put into, and out of, operation, e.g. having automatically-operated disc valves

1/06 . . having axially-movable valves, e.g. piston-shaped

1/08 . the means to facilitate starting or idling becoming operative or inoperative automatically (in connection with auxiliary carburetting apparatus F02M 1/04)

1/10 . . dependent on engine temperature, e.g. having thermostat

1/12 . . . with means for electrically heating thermostat

1/14 . . dependent on pressure in combustion-air- or fuel-air-mixture intake (F02M 1/10 takes precedence)

1/16 . Other means for enriching fuel-air mixture during starting; Priming cups; using different fuels for starting and normal operation

1/18 . . Enriching fuel-air mixture by depressing float to flood carburettor

3/00 Idling devices for carburettors (with means for facilitating idling below operational temperatures F02M 1/00)

3/02 . Preventing flow of idling fuel

3/04 . . under conditions where engine is driven instead of driving, e.g. driven by vehicle running down hill

3/045 . . . Control of valves situated in the idling nozzle system, or the passage system, by electrical means or by a combination of electrical means with fluidic or mechanical means **[4]**

3/05 . . . Pneumatic or mechanical control, e.g. with speed regulation **[4]**

3/055 . . . Fuel flow cut-off by introducing air, e.g. brake air, into the idling fuel system **[4]**

3/06 . Increasing idling speed

3/07 . . by positioning the throttle flap stop, or by changing the fuel flow cross-sectional area, by electrical, electromechanical or electropneumatical means, according to engine speed **[4]**

3/08 . Other details of idling devices (fighting ice-formation by heating idling ports F02M 15/02)

3/09 . . Valves responsive to engine conditions, e.g. manifold vacuum (F02M 1/00, F02M 5/00 to F02M 33/00 take precedence) **[5]**

3/10 . . Fuel metering pins; Nozzles **[4]**

3/12 . . Passage way systems **[4]**

3/14 . . Location of idling system outlet relative to throttle valve **[4]**

5/00 Float-controlled apparatus for maintaining a constant fuel level in carburettors

5/02 . with provisions to meet variations in carburettor position, e.g. upside-down position in aircraft

5/04 . . with pivotally or rotatably mounted float chambers **[4]**

5/06 . having adjustable float mechanism, e.g. to meet dissimilarities in specific gravity of different fuels

5/08 . having means for venting float chambers

5/10 . having means for preventing vapour lock, e.g. insulated float chambers or forced fuel circulation through float chamber with engine stopped

5/12 . Other details, e.g. floats, valves, setting devices or tools (floats in general F16K 33/00)

5/16 . . Floats **[4]**

7/00 Carburettors with means for influencing, e.g. enriching or keeping constant, fuel/air ratio of charge under varying conditions (choke valves for starting F02M 1/00)

7/02 . Carburettors having aerated fuel spray nozzles (with valve control for amount of air for aerating fuel F02M 7/24)

7/04 . Means for enriching charge at high combustion-air flow

7/06 . Means for enriching charge on sudden throttle opening, i.e. at acceleration, e.g. storage means in passage way system

7/08 . . using pumps

7/087 . . . changing output according to temperature in engine **[4]**

7/093 . . . changing output according to intake vacuum **[4]**

7/10 . Other installations, without moving parts, for influencing fuel/air ratio, e.g. electrical means (F02M 7/23 takes precedence) **[4]**

7/11 . . Altering float-chamber pressure (enriching the fuel-air mixture during starting by depressing float to flood carburettor F02M 1/18) **[5]**

7/12 . Other installations, with moving parts, for influencing fuel/air ratio, e.g. having valves (F02M 7/24 takes precedence) **[4]**

7/127 . . Altering the float-chamber pressure (enriching the fuel-air mixture during starting by depressing float to flood carburettor F02M 1/18) **[5]**

7/133 . . Auxiliary jets, i.e. operating only under certain conditions, e.g. full power (F02M 7/04, F02M 7/06 take precedence) **[5]**

7/14 . . with means for controlling cross-sectional area of fuel spray nozzle (dependent on air-throttle valve position F02M 7/22)
7/16 . . . operated automatically, e.g. dependent on exhaust-gas analysis
7/17 . . . . by a pneumatically adjustable piston-like element, e.g. constant depression carburettors **[5]**
7/18 . . with means for controlling cross-sectional area of fuel-metering orifice (dependent on air-throttle position F02M 7/22)
7/20 . . . operated automatically, e.g. dependent on altitude
7/22 . . fuel flow cross-sectional area being controlled dependent on air-throttle-valve position (the throttle valve being slidably arranged transversely to air passage F02M 9/06)
7/23 . Fuel aerating devices **[4]**
7/24 . . Controlling flow of aerating air **[4]**
7/26 . . . dependent on position of optionally operable throttle means **[4]**
7/28 . . . dependent on temperature or pressure **[4]**

9/00 Carburettors having air or fuel-air mixture passage throttling valves other than of butterfly type (register-type carburettors F02M 11/00); **Carburettors having fuel-air mixing chambers of variable shape or position**

9/02 . having throttling valves, e.g. of piston shape, slidably arranged transversely to the passage
9/04 . . with throttling valves sliding in a plane inclined to the passage
9/06 . . with means for varying cross-sectional area of fuel spray nozzle dependent on throttle position (F02M 7/17 takes precedence) **[5]**
9/08 . having throttling valves rotatably mounted in the passage
9/10 . having valves, or like controls, of elastic-wall type for controlling the passage, or for varying cross-sectional area, of fuel-air mixing chambers
9/12 . having other specific means for controlling the passage, or for varying cross-sectional area, of fuel-air mixing chambers
9/127 . . Axially movable throttle valves concentric with the axis of the mixture passage **[5]**
9/133 . . . the throttle valves having mushroom-shaped bodies **[5]**
9/14 . having venturi and nozzle relatively displaceable essentially along the venturi axis

11/00 Multi-stage carburettors; **Register-type carburettors, i.e. with slidable or rotatable throttling valves in which a plurality of fuel nozzles, other than only an idling nozzle and a main one, are sequentially exposed to air stream by throttling valve**

11/02 . with throttling valve, e.g. of flap or butterfly type, in a later stage opening automatically
11/04 . . the later-stage valves having damping means
11/06 . Other carburettors with throttling valve of flap or butterfly type
11/08 . Register carburettors with throttling valve movable transversally to air passage
11/10 . Register carburettors with rotatable throttling valves

13/00 Arrangements of two or more separate carburettors (apparatus for testing, tuning, or synchronising carburettors F02M 19/01; re-atomising condensed fuel or homogenising fuel-air mixture F02M 29/00); **Carburettors using more than one fuel** (apparatus for adding small quantities of secondary fuel F02M 25/00)

13/02 . Separate carburettors
13/04 . . structurally united
13/06 . the carburettors using different fuels
13/08 . Carburettors adapted to use liquid and gaseous fuels, e.g. alternatively

15/00 Carburettors with heating, cooling, or thermal insulating means for combustion-air, fuel, or fuel-air mixture (heating, cooling, or thermally insulating float apparatus F02M 5/00; apparatus for thermally treating combustion-air, fuel, or fuel-air mixture, not being part of a carburettor F02M 31/00)

15/02 . with heating means, e.g. to combat ice-formation
15/04 . . the means being electrical
15/06 . Heat shieldings, e.g. from engine radiations

17/00 Carburettors having pertinent characteristics not provided for in, or of interest apart from, the apparatus of main groups F02M 1/00 to F02M 15/00 (apparatus for treating combustion-air, fuel, or fuel-air mixture by catalysts, electric means, magnetism, rays, sonic waves, or the like F02M 27/00; combinations of carburettors and low-pressure fuel-injection apparatus F02M 71/00)

17/02 . Floatless carburettors
17/04 . . having fuel inlet valve controlled by diaphragm
17/06 . . having overflow chamber determining constant fuel level
17/08 . Carburettors having one or more fuel passages opening in a valve-seat surrounding combustion-air passage, the valve being opened by passing air
17/09 . . the valve being of an eccentrically mounted butterfly type **[5]**
17/10 . Carburettors having one or more fuel passages opening in valve-member of air throttle
17/12 . . the valve-member being of butterfly type
17/14 . Carburettors with fuel-supply parts opened and closed in synchronism with engine stroke
17/16 . Carburettors having continuously-rotating bodies, e.g. surface carburettors (fuel injection by centrifugal forces F02M 69/06)
17/18 . Other surface carburettors
17/20 . . with fuel bath
17/22 . . . with air bubbling through bath
17/24 . . with wicks
17/26 . . with other wetted bodies
17/28 . . . fuel being drawn through a porous body
17/30 . Carburettors with fire-protecting devices, e.g. combined with fire-extinguishing apparatus
17/32 . . automatically closing fuel conduits on outbreak of fire
17/34 . Other carburettors combined or associated with other apparatus, e.g. air filters (predominant aspects of the apparatus, see the relevant classes for such apparatus)
17/36 . Carburettors having fitments facilitating their cleaning
17/38 . Controlling of carburettors, not otherwise provided for (external control gear F02M 19/12)
17/40 . Selection of particular materials for carburettors, e.g. sheet metal, plastic, or translucent materials
17/42 . Float-controlled carburettors not otherwise provided for

17/44 . Carburettors characterised by draught direction and not otherwise provided for
17/46 . . with down-draught
17/48 . . with up-draught
17/50 . Carburettors having means for combating ice-formation (thermally F02M 15/02)
17/52 . Use of cold, produced by carburettors, for other purposes (apparatus using the cold, see the relevant classes for such apparatus)

19/00 Details, component parts, or accessories of carburettors, not provided for in, or of interest apart from, the apparatus of groups F02M 1/00 to F02M 17/00 (measuring or testing apparatus in general G01)

19/01 . Apparatus for testing, tuning, or synchronising carburettors, e.g. carburettor flow stands **[3]**
19/02 . Metering-orifices, e.g. variable in diameter (variable during operation F02M 7/18)
19/025 . . Metering orifices not variable in diameter **[4]**
19/03 . Fuel atomising nozzles; Arrangement of emulsifying air conduits (atomising in general B05B) **[4]**
19/035 . . Mushroom-shaped atomising nozzles **[4]**
19/04 . Fuel-metering pins or needles
19/06 . Other details of fuel conduits
19/08 . Venturis
19/10 . . in multiple arrangement
19/12 . External control gear, e.g. having dash-pots (dampening means in later stages of multi-stage carburettors F02M 11/04; carburettor control gear in which the carburettor aspects do not predominate, see the relevant classes)

21/00 Apparatus for supplying engines with non-liquid fuels, e.g. gaseous fuels stored in liquid form

21/02 . for gaseous fuels (apparatus for vaporising liquid fuel by heat F02M 31/00; engines with apparatus generating gas from solid fuel, e.g. from wood, F02B 43/08)
21/04 . . Gas-air mixing apparatus (carburettors adapted to use liquid and gaseous fuels F02M 13/08; carburetting gases in general C10J)
21/06 . . Apparatus for de-liquefying, e.g. by heating (discharging liquefied gases in general F17C)
21/08 . for non-gaseous fuels (for engines operating on fuel containing oxidants F02B)
21/10 . . for fuels with low melting point, e.g. apparatus having heating means
21/12 . for fuels in pulverised state (engine plants with fuel-pulverising apparatus F02B)

Engine-pertinent apparatus for feeding, or treating before their admission to engine, combustion-air, fuel, or fuel-air mixture

23/00 Apparatus for adding secondary air to fuel-air mixture

23/02 . with personal control
23/03 . . the secondary air-valve controlled by main combustion-air throttle **[5]**
23/04 . with automatic control
23/06 . . dependent on engine speed
23/08 . . dependent on pressure in main combustion-air induction system
23/09 . . . using valves directly opened by low pressure **[6]**
23/10 . . dependent on temperature, e.g. engine temperature
23/12 . characterised by being combined with device for, or by secondary air effecting, re-atomising of condensed fuel
23/14 . characterised by adding hot air

25/00 Engine-pertinent apparatus for adding non-fuel substances or small quantities of secondary fuel to combustion-air, main fuel, or fuel-air mixture (F02M 43/00 takes precedence; adding secondary air to fuel-air mixture F02M 23/00)

25/022 . Adding fuel and water emulsion, water or steam **[6]**
25/025 . . Adding water **[6]**
25/028 . . . into the charge intakes **[6]**
25/03 . . . into the cylinders **[6]**
25/032 . . Producing and adding steam **[6]**
25/035 . . . into the charge intakes **[6]**
25/038 . . . into the cylinders **[6]**
25/06 . adding lubricant vapours or exhaust gases
25/07 . . adding exhaust gases **[5]**
25/08 . adding fuel vapours drawn from engine fuel reservoir
25/10 . adding acetylene, non-waterborne hydrogen, non-airborne oxygen, or ozone
25/12 . . the apparatus having means for generating such gases (using rays and simultaneously generating ozone F02M 27/06)
25/14 . adding anti-knock agents, not provided for in groups F02M 25/022 to F02M 25/10

27/00 Apparatus for treating combustion-air, fuel, or fuel-air mixture, by catalysts, electric means, magnetism, rays, sonic waves, or the like

27/02 . by catalysts
27/04 . by electric means or magnetism
27/06 . by rays
27/08 . by sonic or ultrasonic waves

29/00 Apparatus for re-atomising condensed fuel or homogenising fuel-air mixture (combined with secondary-air supply F02M 23/12)

29/02 . having rotary parts
29/04 . having screens, gratings, baffles, or the like (rotary F02M 29/02)
29/06 . . generating whirling motion of mixture
29/08 . . having spirally-wound wires
29/10 . . adjustable
29/12 . having homogenising valves held open by mixture current
29/14 . re-atomising or homogenising being effected by unevenness of internal surfaces of mixture intake

31/00 Apparatus for thermally treating combustion-air, fuel, or fuel-air mixture (F02M 21/06, F02M 21/10 take precedence; such apparatus being part of a carburettor or fuel-injection apparatus F02M 15/00, F02M 53/00; adding hot secondary air to fuel-air mixture F02M 23/14)

31/02 . for heating
31/04 . . combustion-air or fuel-air mixture (electrically F02M 31/12; by using heat from working cylinders or cylinder heads F02M 31/14; heating of combustion-air as an engine starting aid F02N 19/04) **[4]**
31/06 . . . by hot gases, e.g. by mixing cold and hot air
31/07 . . . . Temperature-responsive control, e.g. using thermostatically-controlled valves (F02M 31/083 takes precedence) **[6]**
31/08 . . . . the gases being exhaust gases

31/083 . . . . . Temperature-responsive control of the amount of exhaust gas or combustion air directed to the heat exchange surface **[6]**

31/087 . . . . . Heat-exchange arrangements between the air intake and exhaust gas passages, e.g. by means of contact between the passages **[5]**

31/093 . . . . . Air intake passage surrounding the exhaust gas passage; Exhaust gas passage surrounding the air intake passage **[5]**

31/10 . . . by hot liquids, e.g. lubricants

31/12 . . electrically

31/125 . . . Fuel **[5]**

31/13 . . . Combustion air **[5]**

31/135 . . . Fuel-air mixture **[5]**

31/14 . . by using heat from working cylinders or cylinder heads

31/16 . . Other apparatus for heating fuel

31/18 . . . to vaporise fuel

31/20 . for cooling (cooling of charging-air or of scavenging-air F02B)

33/00 Other apparatus for treating combustion-air, fuel or fuel-air mixture (combustion-air cleaners F02M 35/00; arrangements for purifying liquid fuel F02M 37/22)

33/02 . for collecting and returning condensed fuel

33/04 . . returning to the intake passage **[5]**

33/06 . . . with simultaneous heat supply **[5]**

33/08 . . returning to the fuel tank **[5]**

35/00 Combustion-air cleaners, air intakes, intake silencers, or induction systems specially adapted for, or arranged on, internal-combustion engines (air cleaners in general B01D)

35/02 . Air cleaners

35/022 . . acting by gravity, by centrifugal, or by other inertial forces, e.g. with moistened walls **[2]**

35/024 . . using filters, e.g. moistened (F02M 35/026 takes precedence; cleaning of the filtering material F02M 35/08) **[2]**

35/026 . . acting by guiding the air over or through an oil or other liquid bath, e.g. combined with filters **[2]**

35/04 . . specially arranged with respect to engine; Mounting thereon

35/06 . . . combined or associated with engine's cooling blower or fan, or with flywheel

35/08 . . with means for removing dust from cleaners; with means for indicating clogging; with by-pass means

35/09 . . . Clogging indicators **[6]**

35/10 . Air intakes; Induction systems (using kinetic or wave energy of charge in induction systems for improving quantity of charge F02B)

35/104 . . Intake manifolds **[6]**

35/108 . . . with primary and secondary intake passages **[6]**

35/112 . . . for engines with cylinders all in one line (F02M 35/108 takes precedence) **[6]**

35/116 . . . for engines with cylinders in V-arrangement or arranged oppositely relative to the main shaft (F02M 35/108 takes precedence) **[6]**

35/12 . Intake silencers

35/14 . Combined air cleaners and silencers

35/16 . characterised by use in vehicles (predominant vehicle aspects, see the relevant classes for the vehicles)

37/00 Apparatus or systems for feeding liquid fuel from storage containers to carburettors or fuel-injection apparatus (F02M 69/00 takes precedence; feeding liquid fuel to combustion apparatus, in general F23K 5/00; fuel supply to apparatus for generating combustion products of high pressure or high velocity F23R 3/28); **Arrangements for purifying liquid fuel specially adapted for, or arranged on, internal-combustion engines** (separating apparatus, filters per se B01D; centrifuges B04B) **[5]**

37/02 . Feeding by means of suction apparatus, e.g. by air flow through carburettors (by driven pumps F02M 37/04)

37/04 . Feeding by means of driven pumps (pump construction F04)

37/06 . . mechanically driven

37/08 . . electrically driven

37/10 . . . submerged in fuel, e.g. in reservoir

37/12 . . fluid-driven, e.g. by compressed combustion-air

37/14 . . the pumps being combined with other apparatus

37/16 . . characterised by provision of personally-, e.g. manually-, operated pumps

37/18 . . characterised by provision of main and auxiliary pumps

37/20 . characterised by means for preventing vapour lock

37/22 . Arrangements for purifying liquid fuel specially adapted for, or arranged on, internal-combustion engines, e.g. arrangement in the feeding system **[3]**

Fuel-injection apparatus

Note

Low-pressure fuel injection is classified in groups F02M 51/00, F02M 69/00 or F02M 71/00. **[2009.01]**

39/00 Arrangements of fuel-injection apparatus with respect to engines; **Pump drives adapted to such arrangements** (F02M 49/00 takes precedence; arrangements of injectors F02M 61/14)

39/02 . Arrangements of fuel-injection apparatus to facilitate the driving of pumps; Arrangements of fuel-injection pumps; Pump drives

41/00 Fuel-injection apparatus with two or more injectors fed from a common pressure-source sequentially by means of a distributor

41/02 . the distributor being spaced from pumping elements

41/04 . . the distributor reciprocating

41/06 . . the distributor rotating

41/08 . the distributor and pumping elements being combined

41/10 . . pump pistons acting as the distributor

41/12 . . . the pistons rotating to act as the distributor

41/14 . . rotary distributor supporting pump pistons

41/16 . characterised by the distributor being fed from a constant-pressure source, e.g. accumulator

43/00 Fuel-injection apparatus operating simultaneously on two or more fuels or on a liquid fuel and another liquid, e.g. the other liquid being an anti-knock additive

43/02 . Pumps peculiar thereto

43/04 . Injectors peculiar thereto

45/00 Fuel-injection apparatus characterised by having a cyclic delivery of specific time/pressure or time/quantity relationship (fuel injectors having such deliveries by means of valves furnished at seated ends with pintle- or plug-shaped extensions F02M 61/06)

45/02 . with each cyclic delivery being separated into two or more parts
45/04 . . with a small initial part
45/06 . . . Pumps peculiar thereto
45/08 . . . Injectors peculiar thereto
45/10 . . Other injectors with multiple-part delivery, e.g. with vibrating valves
45/12 . providing a continuous delivery with variable pressure

47/00 Fuel-injection apparatus operated cyclically with fuel-injection valves actuated by fluid pressure (F02M 49/00 takes precedence; apparatus with injection valves opened by fuel pressure and closed by non-fluid means, see the groups providing for other characteristics)

47/02 . of accumulator-injector type, i.e. having fuel pressure of accumulator tending to open, and fuel pressure in other chamber tending to close, injection valves, and having means for periodically releasing that closing pressure
47/04 . using fluid, other than fuel, for injection-valve actuation
47/06 . Other fuel injectors peculiar thereto

49/00 Fuel-injection apparatus in which injection pumps are driven, or injectors are actuated, by the pressure in engine working cylinders, or by impact of engine working piston

49/02 . using the cylinder pressure, e.g. compression end pressure
49/04 . using the piston impact

51/00 Fuel-injection apparatus characterised by being operated electrically

51/02 . specially for low-pressure fuel-injection (pumps per se F02M 51/04; injectors per se F02M 51/08)
51/04 . Pumps peculiar thereto
51/06 . Injectors peculiar thereto
51/08 . . specially for low-pressure fuel-injection

53/00 Fuel-injection apparatus characterised by having heating, cooling, or thermally-insulating means

53/02 . with fuel-heating means, e.g. for vaporising
53/04 . Injectors with heating, cooling, or thermally-insulating means
53/06 . . with fuel-heating means, e.g. for vaporising
53/08 . . with air cooling

55/00 Fuel-injection apparatus characterised by their fuel conduits or their venting means

55/02 . Conduits between injection pumps and injectors
55/04 . Means for damping vibrations in injection-pump inlets

57/00 Fuel injectors combined or associated with other devices

57/02 . Injectors structurally combined with fuel-injection pumps
57/04 . the devices being combustion-air intake or exhaust valves
57/06 . the devices being sparking-plugs

59/00 Pumps specially adapted for fuel-injection and not provided for in groups F02M 39/00 to F02M 57/00 (general features of pumps F04)

59/02 . of reciprocating-piston type
59/04 . . characterised by special arrangement of cylinders with respect to piston-driving shaft, e.g. arranged parallel to that shaft
59/06 . . . with cylinders arranged radially to driving shaft, e.g. in V- or star-arrangement
59/08 . . characterised by two or more pumping elements with conjoint outlet
59/10 . . characterised by the piston drive
59/12 . having other positive-displacement pumping elements, e.g. rotary
59/14 . . of elastic-wall type
59/16 . characterised by having multi-stage compression of fuel
59/18 . characterised by the pumping action being achieved through release of pre-compressed springs
59/20 . Varying fuel delivery in quantity or timing
59/22 . . Varying quantity by adjusting cylinder-head space
59/24 . . with constant-length-stroke pistons having variable effective portion of stroke
59/26 . . . caused by movements of pistons relative to their cylinders
59/28 . . . . Mechanisms therefor
59/30 . . with variable-length-stroke pistons
59/32 . . fuel delivery being controlled by means of fuel-displaced auxiliary pistons, which effect injection
59/34 . . by throttling of passages to pumping elements or of overflow passages
59/36 . . by variably-timed valves controlling fuel passages
59/38 . Pumps characterised by adaptations to special uses or conditions
59/40 . . for reversible engines
59/42 . . for starting of engines
59/44 . Details, component parts, or accessories not provided for in, or of interest apart from, the apparatus of groups F02M 59/02 to F02M 59/42
59/46 . . Valves (in general F16K)
59/48 . . Assembling; Disassembling; Replacing

61/00 Fuel injectors not provided for in groups F02M 39/00 to F02M 57/00 or F02M 67/00

61/02 . of valveless type
61/04 . having valves (valves in general F16K)
61/06 . . the valves being furnished at seated ends with pintle- or plug-shaped extensions
61/08 . . the valves opening in direction of fuel flow
61/10 . . Other injectors with elongated valve bodies, i.e. of needle-valve type
61/12 . . . characterised by the provision of guiding or centring means for valve bodies
61/14 . Arrangements of injectors with respect to engines; Mounting of injectors
61/16 . Details not provided for in, or of interest apart from, the apparatus of groups F02M 61/02 to F02M 61/14
61/18 . . Injection nozzles, e.g. having valve-seats
61/20 . . Closing valves mechanically, e.g. arrangements of springs or weights

63/00 **Other fuel-injection apparatus having pertinent characteristics not provided for in groups F02M 39/00 to F02M 57/00 or F02M 67/00**; **Details, component parts or accessories of fuel-injection apparatus, not provided for in, or of interest apart from, the apparatus of groups F02M 39/00 to F02M 61/00 or F02M 67/00**

63/02 . Fuel-injection apparatus having several injectors fed by a common pumping element, or having several pumping elements feeding a common injector; Fuel-injection apparatus having provisions for cutting-out pumps, pumping elements, or injectors; Fuel-injection apparatus having provisions for variably interconnecting pumping elements and injectors alternatively

63/04 . Fuel-injection apparatus having injection valves held closed by a cyclically-operated mechanism for a time and automatically opened by fuel pressure, e.g. of constant-pressure pump or accumulator, when that mechanism releases the valve

63/06 . Use of pressure wave generated by fuel inertia to open injection valves

65/00 **Testing fuel-injection apparatus, e.g. testing injection timing**

67/00 **Apparatus in which fuel-injection is effected by means of high-pressure gas, the gas carrying the fuel into working cylinders of the engine, e.g. air-injection type** (using compressed air for low-pressure fuel-injection apparatus F02M 69/08)

67/02 . the gas being compressed air, e.g. compressed in pumps (arrangements or adaptations of such pumps F02B)

67/04 . . the air being extracted from working cylinders of the engine

67/06 . the gas being other than air, e.g. steam, combustion gas

67/08 . . the gas being generated by combustion of part of fuel other than in engine working cylinders

67/10 . Injectors peculiar thereto, e.g. of valveless type

67/12 . . having valves

67/14 . characterised by provisions for injecting different fuels, e.g. main fuel and readily self-igniting starting-fuel

69/00 **Low-pressure fuel-injection apparatus** (electrically-operated F02M 51/00)

69/02 . Pumps peculiar thereto

69/04 . Injectors peculiar thereto

69/06 . characterised by the pressurisation of the fuel being caused by centrifugal force acting on the fuel

69/08 . characterised by the fuel being carried by compressed air into main stream of combustion-air

69/10 . peculiar to scavenged two-stroke engines, e.g. injecting into crankcase-pump chamber

69/12 . comprising a fuel-displaced free piston for intermittently metering and supplying fuel to injection nozzles **[5]**

69/14 . having cyclically-operated valves connecting injection nozzles to a source of fuel under pressure during the injection period **[5]**

69/16 . characterised by means for metering continuous fuel flow to injectors or means for varying fuel pressure upstream of injectors **[5]**

69/18 . . the means being metering valves throttling fuel passages to injectors or by-pass valves throttling overflow passages, the metering valves being actuated by a device responsive to the engine working parameters, e.g. engine load, speed, temperature or quantity of air (F02M 69/26 takes precedence) **[5]**

69/20 . . . the device being a servo-motor, e.g. using engine intake air pressure or vacuum (F02M 69/22 takes precedence) **[5]**

69/22 . . . the device comprising a member movably mounted in the air intake conduit and displaced according to the quantity of air admitted to the engine **[5]**

69/24 . . . the device comprising a member for transmitting the movement of the air throttle valve actuated by the operator to the valves controlling fuel passages **[5]**

69/26 . . the means varying fuel pressure in a fuel by-pass passage, the pressure acting on a throttle valve against the action of metered or throttled fuel pressure for variably throttling fuel flow to injection nozzles, e.g. to keep constant the pressure differential at the metering valve **[5]**

69/28 . characterised by means for cutting-out the fuel supply to the engine or to main injectors during certain operating periods, e.g. deceleration **[5]**

69/30 . characterised by means for facilitating the starting-up or idling of engines or by means for enriching fuel charge, e.g. below operational temperatures or upon high power demand of engines (at acceleration F02M 69/44) **[5]**

69/32 . . with an air by-pass around the air throttle valve or with an auxiliary air passage, e.g. with a variably controlled valve therein **[5]**

69/34 . . with an auxiliary fuel circuit supplying fuel to the engine, e.g. with the fuel pump outlet being directly connected to the injection nozzles **[5]**

69/36 . . having an enrichment mechanism modifying fuel flow to injectors, e.g. by acting on the fuel metering device or on the valves throttling fuel passages to injection nozzles or overflow passages **[5]**

69/38 . . . using fuel pressure, e.g. by varying fuel pressure in the control chambers of the fuel metering device (F02M 69/26 takes precedence) **[5]**

69/40 . . . using variably controlled air pressure, e.g. by modifying the intake air vacuum signal acting on the fuel metering device **[5]**

69/42 . . . using other means than variable fluid pressure, e.g. acting on the fuel metering device mechanically or electrically **[5]**

69/44 . characterised by means for supplying extra fuel to the engine on sudden air throttle opening, e.g at acceleration **[5]**

69/46 . Details, component parts or accessories not provided for in, or of interest apart from, the apparatus covered by groups F02M 69/02 to F02M 69/44 **[5]**

69/48 . . Arrangement of air sensors **[5]**

69/50 . . Arrangement of fuel distributors **[5]**

69/52 . . Arrangement of fuel metering devices **[5]**

69/54 . . Arrangement of fuel pressure regulators **[5]**

71/00 **Combinations of carburettors and low-pressure fuel-injection apparatus** (means for enriching charge on sudden air throttle opening of carburettors F02M 7/06)

71/02 . with fuel-air mixture being produced by the carburettor and being compressed by a pump for subsequent injection into main combustion-air (adaptations or arrangements of such pumps F02B)

71/04 . with carburettor being used at starting or idling only and injection apparatus being used during normal operation of engine

99/00 **Subject matter not provided for in other groups of this subclass [8]**

F02N **STARTING OF COMBUSTION ENGINES** (starting of free-piston combustion-engines F02B 71/02; starting of gas-turbine plants F02C 7/26); **STARTING AIDS FOR SUCH ENGINES, NOT OTHERWISE PROVIDED FOR**

(1) Attention is drawn to the Notes preceding class F01.
(2) The starting of engines which are not explicitly stated to be combustion engines is classified in this subclass in so far as their starting is equivalent to that of combustion engines.

Subclass index

Muscle-operated starting apparatus

1/00 **Starting apparatus having hand cranks** (with intermediate power storage F02N 5/00 to F02N 15/00)

1/02 . having safety means preventing damage caused by reverse rotation

3/00 **Other muscle-operated starting apparatus** (with intermediate power storage F02N 5/00 to F02N 15/00)

3/02 . having pull-cords

3/04 . having foot-actuated levers

Power-operated starting apparatus; **Muscle-operated starting apparatus with intermediate power storage**

5/00 **Starting apparatus having mechanical power storage**

5/02 . of spring type

5/04 . of inertia type

7/00 **Starting apparatus having fluid-driven auxiliary engines or apparatus**

7/02 . the apparatus being of single-stroke piston type, e.g. pistons acting on racks or pull-cords

7/04 . . the pistons acting on screw-threaded members to effect rotation

7/06 . the engines being of reciprocating-piston type (of internal-combustion type F02N 7/10)

7/08 . the engines being of rotary type

7/10 . characterised by using auxiliary engines or apparatus of combustion type (by using explosive cartridges F02N 13/00)

7/12 . . the engines being of rotary type, e.g. turbines (F02N 7/14 takes precedence)

7/14 . . the starting engines being readily removable from main engines, e.g. of portable type

9/00 **Starting of engines by supplying auxiliary pressure fluid to their working chambers**

9/02 . the pressure fluid being generated directly by combustion (by using explosive cartridges F02N 13/00)

9/04 . the pressure fluid being generated otherwise, e.g. by compressing air

11/00 **Starting of engines by means of electric motors** (arrangement or mounting of prime-movers consisting of electric motors and internal combustion engines for mutual or common propulsion B60K 6/20)

11/02 . the motors having longitudinally-shiftable rotors

11/04 . the motors being associated with current generators

11/06 . . and with ignition apparatus

11/08 . Circuits specially adapted for starting of engines

11/10 . Safety devices (F02N 11/08 takes precedence)

11/12 . Starting of engines by means of mobile, e.g. portable, starting sets

11/14 . Starting of engines by means of electric starters with external current supply (F02N 11/12 takes precedence)

13/00 **Starting of engines, or driving of starting apparatus by use of explosives, e.g. stored in cartridges**

13/02 . Cartridges specially adapted therefor (gas cartridges in general F42B 3/04)

15/00 **Other power-operated starting apparatus**; **Component parts, details, or accessories, not provided for in, or of interest apart from, groups F02N 5/00 to F02N 13/00**

15/02 . Gearing between starting-engines and started engines; Engagement or disengagement thereof

15/04 . . the gearing including disengaging toothed gears

15/06 . . . the toothed gears being moved by axial displacement

15/08 . . the gearing being of friction type

15/10 . Safety devices not otherwise provided for

19/00 **Starting aids for combustion engines, not otherwise provided for [2010.01]**

19/02 . Aiding engine start by thermal means, e.g. using lighted wicks (using electrically-heated glowing plugs F02P 19/02) **[2010.01]**

19/04 . . by heating of fluids used in engines (heating of lubricants F01M 5/02) **[2010.01]**

19/06 . . . by heating of combustion-air by flame generating means, e.g. flame glow-plugs **[2010.01]**

19/08 . . . . Arrangement thereof **[2010.01]**

19/10 . . . by heating of engine coolants **[2010.01]**

99/00 **Subject matter not provided for in the other groups of this subclass [2010.01]**

F02P **IGNITION, OTHER THAN COMPRESSION IGNITION, FOR INTERNAL-COMBUSTION ENGINES**; **TESTING OF IGNITION TIMING IN COMPRESSION-IGNITION ENGINES** (specially adapted for rotary-piston or oscillating-piston engines F02B 53/12; ignition of combustion apparatus in general, glowing plugs F23Q; measuring of physical variables in general G01; controlling in general G05; data processing in general G06; electrical components in general, see section H; sparking plugs H01T)

Subclass index

Electric spark ignition installations characterised by the type of ignition power generation or storage

1/00 **Installations having electric ignition energy generated by magneto- or dynamo-electric generators without subsequent storage**

1/02 . the generator rotor being characterised by forming part of the engine flywheel

1/04 . the generator being specially adapted for use with specific engine types, e.g. engines with V-arrangement of cylinders

1/06 . Generator drives, e.g. having snap couplings

1/08 . Layout of circuits

3/00 **Other electric spark ignition installations characterised by the type of ignition power generation storage**

3/01 . Electric spark ignition installations without subsequent energy storage, i.e. energy supplied by an electrical oscillator (with magneto- or dynamo-electric generators F02P 1/00; piezo-electric ignition F02P 3/12; with continuous electric spark F02P 15/10) **[4]**

3/02 . having inductive energy storage, e.g. arrangements of induction coils

3/04 . . Layout of circuits

3/045 . . . for control of the dwell or anti-dwell time **[4]**

3/05 . . . for control of the magnitude of the current in the ignition coil (during starting F02P 15/12) **[4]**

3/055 . . . with protective means to prevent damage to the circuit or the ignition coil **[4]**

3/06 . having capacitive energy storage (piezo-electric or electrostatic ignition F02P 3/12)

3/08 . . Layout of circuits (for low tension F02P 3/10)

3/09 . . . for control of the charging current in the capacitor (F02P 15/12 takes precedence) **[4]**

3/10 . . Low-tension installation, e.g. using surface-discharge sparking plugs

3/12 . Piezo-electric ignition; Electrostatic ignition

Advancing or retarding electric ignition spark; **Arrangements of distributors or of circuit-makers or -breakers for electric spark ignition**; **Electric spark ignition control or safety means, not otherwise provided for**

5/00 **Advancing or retarding electric ignition spark**; **Control therefor [6]**

5/02 . non-automatically; dependent on position of personal controls of engine, e.g. throttle position

5/04 . automatically, as a function of the working conditions of the engine or vehicle or of the atmospheric conditions (dependent on position of personal controls of engine F02P 5/02)

5/05 . . using mechanical means **[4]**

5/06 . . . dependent on engine speed **[4]**

5/07 . . . . Centrifugal timing mechanisms **[6]**

5/10 . . . dependent on fluid pressure in engine, e.g. combustion-air pressure **[4]**

5/12 . . . . dependent on a specific pressure other than that of combustion-air, e.g. of exhaust, cooling fluid, lubricant **[4]**

5/14 . . . dependent on specific conditions other than engine speed or engine fluid pressure, e.g. temperature **[4]**

5/145 . . using electrical means **[4]**

5/15 . . . Digital data processing **[4]**

5/152 . . . . dependent on pinking (detecting or indicating knocks in internal-combustion engines G01L 23/22) **[6]**

5/153 . . . . dependent on combustion pressure **[6]**

5/155 . . . Analogue data processing **[4]**

5/16 . characterised by the mechanical transmission between sensing elements or personal controls and final actuating elements

7/00 **Arrangement of distributors, circuit-makers, circuit-breakers or pick-up devices for electric spark ignition** (advancing or retarding ignition or control therefor F02P 5/00; such devices per se, see the relevant classes of section H, e.g. rotary switches H01H 19/00, contact-breakers, distributors H01R 39/00, generators H02K)

7/02 . of distributors

7/03 . . with electrical means (ignition occurring simultaneously at different places in one engine cylinder or in two or more separate engine cylinders F02P 15/08) **[4]**

7/04 . . having distributors with air-tight casing

7/06 . of circuit-makers or -breakers, or pick-up devices adapted to sense particular points of the timing cycle **[4]**

7/063 . . Mechanical pick-up devices, circuit-makers or -breakers, e.g. contact-breakers **[4]**

7/067 . . Electromagnetic pick-up devices **[4]**

7/07 . . . Hall-effect pick-up devices **[4]**

7/073 . . Optical pick-up devices **[4]**

7/077 . . Circuits therefor, e.g. pulse generators **[4]**

7/08 . . having air-tight casings

7/10 . Drives of distributors or of circuit-makers or -breakers

9/00 **Electric spark ignition control, not otherwise provided for**

11/00 **Safety means for electric spark ignition, not otherwise provided for**

11/02 . Preventing damage to engines or engine-driven gearing

11/04 . Preventing unauthorised use of engines (of vehicles B60R 25/04; ignition locks H01H 27/00)

11/06 . Indicating unsafe conditions

13/00 **Sparking plugs structurally combined with other parts of internal-combustion engines** (with fuel injectors F02M 57/06; predominant aspects of the parts, see the relevant subclasses)

15/00 **Electric spark ignition having characteristics not provided for in, or of interest apart from, groups F02P 1/00 to F02P 13/00**

15/02 . Arrangements having two or more sparking plugs

15/04 . one of the spark electrodes being mounted on the engine working piston

15/06 . the electric spark triggered by engine working cylinder compression

15/08 . having multiple-spark ignition, i.e. ignition occurring simultaneously at different places in one engine cylinder or in two or more separate engine cylinders

15/10 . having continuous electric sparks

15/12 . having means for strengthening spark during starting

17/00 **Testing of ignition installations, e.g. in combination with adjusting** (testing fuel injection apparatus F02M 65/00; testing ignition installations in general F23Q 23/00); **Testing of ignition timing in compression-ignition engines [4]**

17/02 . Checking or adjusting ignition timing **[6]**

17/04 . . dynamically **[6]**

17/06 . . . using a stroboscopic lamp **[6]**

17/08 . . . using a cathode-ray oscilloscope (F02P 17/06 takes precedence) **[6]**

17/10 . Measuring dwell or antidwell time **[6]**

17/12 . Testing characteristics of the spark, ignition voltage or current **[6]**

Other ignition

19/00 **Incandescent ignition, e.g. during starting of internal-combustion engines**; **Combination of incandescent and spark ignition [4]**

19/02 . electric, e.g. layout of circuits of apparatus having glowing plugs

19/04 . non-electric, e.g. heating incandescent spots by burners (use of burners for direct ignition F02P 21/00)

21/00 **Direct use of flames or burners for ignition**

21/02 . the flames being kept burning essentially external to engine working chambers

21/04 . Burning-cartridges or like inserts being arranged in engine working chambers (as starting aid F02N 19/02)

23/00 **Other ignition**

23/02 . Friction, pyrophoric, or catalytic ignition

23/04 . Other physical ignition means, e.g. using laser rays

F03 MACHINES OR ENGINES FOR LIQUIDS; WIND, SPRING, OR WEIGHT MOTORS; PRODUCING MECHANICAL POWER OR A REACTIVE PROPULSIVE THRUST, NOT OTHERWISE PROVIDED FOR

F03B **MACHINES OR ENGINES FOR LIQUIDS** (machines or engines for liquids and elastic fluids F01; positive-displacement engines for liquids F03C; positive-displacement machines for liquids F04)

(1) This subclass covers:
- engines, other than of positive-displacement type, driven by liquids;
- machines, other than of positive-displacement type, for liquids.

(2) Attention is drawn to the Notes preceding class F01, especially as regards the definition of "reaction type".

Subclass index

1/00 **Engines of impulse type, i.e. turbines with jets of high-velocity liquid impinging on bladed or like rotors, e.g. Pelton wheels; Parts or details peculiar thereto**

1/02 . Buckets; Bucket-carrying rotors

1/04 . Nozzles (in general B05B); Nozzle-carrying members

3/00 **Machines or engines of reaction type; Parts or details peculiar thereto**

3/02 . with radial flow at high-pressure side and axial flow at low-pressure side of rotors, e.g. Francis turbines

3/04 . with substantially axial flow throughout rotors, e.g. propeller turbines

3/06 . . with adjustable blades, e.g. Kaplan turbines

3/08 . with pressure/velocity transformation exclusively in rotors

3/10 . characterised by having means for functioning alternatively as pumps or turbines

3/12 . Blades; Blade-carrying rotors

3/14 . . Rotors having adjustable blades

3/16 . Stators

3/18 . . Stator blades; Guide conduits or vanes, e.g. adjustable

5/00 **Machines or engines characterised by non-bladed rotors, e.g. serrated, using friction**

7/00 **Water wheels**

9/00 **Endless-chain type machines or engines**

11/00 **Parts or details not provided for in, or of interest apart from, groups F03B 1/00 to F03B 9/00** (controlling F03B 15/00)

11/02 . Casings

11/04 . for diminishing cavitation or vibration, e.g. balancing

11/06 . Bearing arrangements

11/08 . for removing foreign matter, e.g. mud

13/00 **Adaptations of machines or engines for special use; Combinations of machines or engines with driving or driven apparatus** (if the apparatus aspects are predominant, see the relevant places for such apparatus, e.g. H02K 7/18); **Power stations or aggregates** (hydraulic-engineering aspects E02B; incorporating only machines or engines of positive-displacement type F03C)

13/02 . Adaptations for drilling wells

13/04 . Adaptations for use in dentistry

13/06 . Stations or aggregates of water-storage type (turbines characterised by having means for functioning alternatively as pumps F03B 3/10)

13/08 . Machine or engine aggregates in dams or the like; Conduits therefor

13/10 . Submerged units incorporating electric generators or motors

13/12 . characterised by using wave or tide energy

13/14 . . using wave energy **[4]**

13/16 . . . using the relative movement between a wave-operated member and another member **[4]**

13/18 . . . . wherein the other member is fixed, at least at one point, with respect to the sea bed or shore **[4]**

13/20 . . . . wherein both members are movable relative to the sea bed or shore **[4]**

13/22 . . . using the flow of water resulting from wave movements, e.g. to drive a hydraulic motor or turbine **[4]**

13/24 . . . to produce a flow of air, e.g. to drive an air turbine **[4]**

13/26 . . using tide energy **[4]**

15/00 **Controlling** (controlling in general G05)

15/02 . by varying liquid flow

15/04 . . of turbines (rotors having adjustable blades F03B 3/06, F03B 3/14; adjustable guide vanes F03B 3/18; specially adapted for turbines with jets of high-velocity liquid impinging on bladed or like rotors F03B 15/20)

15/06 . . . Regulating, i.e. acting automatically

15/08 . . . . by speed, e.g. by measuring electric frequency or liquid flow
15/10 . . . . . without retroactive action
15/12 . . . . . with retroactive action
15/14 . . . . by or of water level
15/16 . . . . by power output
15/18 . . . . for safety purposes, e.g. preventing overspeed
15/20 . . specially adapted for turbines with jets of high-velocity liquid impinging on bladed or like rotors (nozzles F03B 1/04)
15/22 . . . for safety purposes

17/00 Other machines or engines
17/02 . using hydrostatic thrust
17/04 . . Alleged perpetua mobilia
17/06 . using liquid flow, e.g. of swinging-flap type

F03C POSITIVE-DISPLACEMENT ENGINES DRIVEN BY LIQUIDS (positive-displacement engines for liquids and elastic fluids F01; positive-displacement machines for liquids F04; fluid-pressure actuators F15B; fluid gearing F16H)

Note

Attention is drawn to the Notes preceding class F01, especially as regards the definitions of "positive displacement", "rotary-piston machines", "oscillating-piston machines", "rotary-piston", "co-operating members", "movement of co-operating members", "teeth or tooth-equivalents", and "internal axis".

1/00 Reciprocating-piston liquid engines
1/007 . with single cylinder, double-acting piston **[5]**
1/013 . with single cylinder, single-acting piston **[5]**
1/02 . with multiple cylinders, characterised by the number or arrangement of cylinders (with movable cylinders F03C 1/22; of flexible-wall type F03C 7/00)
1/03 . . with movement in two directions being obtained by two single-acting piston liquid engines, each acting in one direction **[5]**
1/04 . . with cylinders in star- or fan-arrangement
1/047 . . . the pistons co-operating with an actuated element at the outer ends of the cylinders **[5]**
1/053 . . . the pistons co-operating with an actuated element at the inner ends of the cylinders **[5]**
1/06 . . with cylinder axes generally coaxial with, or parallel or inclined to, main shaft axis
1/08 . Distributing valve-gear peculiar thereto (for multiple-cylinder engines F03C 1/34; for engines with positive displacement in general F01L)
1/10 . . actuated by piston or piston-rod
1/12 . . . mechanically **[5]**
1/14 . . actuated by the driving liquid of the engine **[5]**
1/16 . . Speed controlling, equalising, or cushioning **[5]**
1/20 . . specially adapted for engines generating vibration only
1/22 . with movable cylinders
1/24 . . in which the liquid exclusively displaces one or more pistons reciprocating in rotary cylinders
1/247 . . . with cylinders in star- or fan-arrangement **[5]**
1/253 . . . with cylinder axes generally coaxial with, or parallel to, main shaft axis **[5]**
1/26 . adapted for special use or combined with apparatus driven thereby (aspects predominantly concerning the driven apparatus, see the relevant classes for such apparatus)
1/28 . Pistons specially adapted therefor **[5]**
1/30 . Cams specially adapted therefor **[5]**
1/32 . Cylinders specially adapted therefor **[5]**
1/34 . Distribution members specially adapted for multiple-cylinder engines **[5]**
1/36 . . Cylindrical distribution members **[5]**
1/38 . . Plate-like distribution members **[5]**
1/40 . Control specially adapted therefor **[5]**

2/00 Rotary-piston engines (in which the liquid exclusively displaces one or more piston reciprocating in rotary cylinders F03C 1/24) **[3]**

Note

Group F03C 2/30 takes precedence over groups F03C 2/02 to F03C 2/24. **[3]**

2/02 . of arcuate-engagement type, i.e. with circular translatory movement of co-operating members, each member having the same number of teeth or tooth-equivalents **[3]**
2/08 . of intermeshing-engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing **[3]**
2/22 . of internal-axis type with equidirectional movement of co-operating members at the points of engagement, or with one of the co-operating members being stationary, the inner member having more teeth or tooth-equivalents than the outer member **[3]**
2/24 . of counter-engagement type, i.e. the movement of co-operating members at the points of engagement being in opposite directions **[3]**
2/30 . having the characteristics covered by two or more of groups F03C 2/02, F03C 2/08, F03C 2/22, F03C 2/24 or having the characteristics covered by one of these groups together with some other type of movement between co-operating members **[3]**

4/00 Oscillating-piston engines [3]

7/00 Engines of flexible-wall type [2010.01]

99/00 Subject matter not provided for in other groups of this subclass [2010.01]

F03D WIND MOTORS

Note

In this subclass, the following terms or expressions are used with the meanings indicated:
– "wind motor" means a mechanism for converting the energy of natural wind into useful mechanical power, and the transmission of such power to its point of use;
– "rotor" means the wind-engaging parts of the wind motor and the rotary member carrying them;
– "rotation axis" means the axis of rotation of the rotor.

1/00 **Wind motors with rotation axis substantially in wind direction** (controlling F03D 7/00)
1/02 . having a plurality of rotors
1/04 . having stationary wind-guiding means, e.g. with shrouds or channels (F03D 1/02 takes precedence)
1/06 . Rotors

3/00 **Wind motors with rotation axis substantially at right angle to wind direction** (controlling F03D 7/00)
3/02 . having a plurality of rotors
3/04 . having stationary wind-guiding means, e.g. with shrouds or channels (F03D 3/02 takes precedence)
3/06 . Rotors

5/00 **Other wind motors** (controlling F03D 7/00)
5/02 . the wind-engaging parts being attached to endless chains or the like
5/04 . the wind-engaging parts being attached to carriages running on tracks or the like
5/06 . the wind-engaging parts swinging to-and-fro and not rotating

7/00 **Controlling wind motors**
7/02 . the wind motors having rotation axis substantially in wind direction
7/04 . . Regulation, i.e. controlling automatically
7/06 . the wind motors having rotation axis substantially at right angle to wind direction

9/00 **Adaptations of wind motors for special use**; **Combinations of wind motors with apparatus driven thereby** (aspects predominantly concerning driven apparatus, see the relevant classes for such apparatus)
9/02 . the apparatus storing power

11/00 **Details, component parts, or accessories not provided for in, or of interest apart from, the other groups of this subclass**
11/02 . Transmission of power, e.g. using hollow exhausting blades
11/04 . Mounting structures

F03G SPRING, WEIGHT, INERTIA, OR LIKE MOTORS; MECHANICAL-POWER-PRODUCING DEVICES OR MECHANISMS, NOT OTHERWISE PROVIDED FOR OR USING ENERGY SOURCES NOT OTHERWISE PROVIDED FOR (arrangements in connection with power supply in vehicles from force of nature B60K 16/00; electric propulsion with power supply in vehicles from force of nature B60L 8/00)

Note

In this subclass, the following term is used with the meaning indicated:
– "motors" means mechanisms for producing mechanical power from potential energy of solid bodies.

1/00 **Spring motors** (spring-driven toys A63H; springs in general F16F; precision time mechanisms, e.g. for clocks or watches, G04B)
1/02 . characterised by shape or material of spring, e.g. helical, spiral, coil
1/04 . . using rubber springs
1/06 . Other parts or details
1/08 . . for winding
1/10 . . for producing output movement other than rotary, e.g. vibratory

3/00 **Other motors, e.g. gravity or inertia motors**
3/02 . using wheels with circumferentially-arranged compartments co-operating with solid falling bodies (F03G 3/04 takes precedence)
3/04 . driven by sand or like fluent solid material
3/06 . using pendulums
3/08 . using flywheels

4/00 **Devices for producing mechanical power from geothermal energy [5]**
4/02 . with direct fluid contact **[5]**
4/04 . with deep-well turbo-pump **[5]**
4/06 . with fluid flashing **[5]**

5/00 **Devices for producing mechanical power from muscle energy** (driving cycles B62M)
5/02 . of endless-walk type, e.g. treadmills
5/04 . . Horsemills or the like
5/06 . other than of endless-walk type
5/08 . . for combined actuation by different limbs, e.g. hand and leg

6/00 **Devices for producing mechanical power from solar energy** (solar boilers F24) **[5]**
6/02 . using a single state working fluid **[5]**
6/04 . . gaseous **[5]**
6/06 . with solar energy concentrating means **[5]**

7/00 Mechanical-power-producing mechanisms, not otherwise provided for or using energy sources not otherwise provided for

7/04 . using pressure differences or thermal differences occurring in nature (F03G 7/06 takes precedence)

7/05 . . Ocean thermal energy conversion, i.e. OTEC **[5]**

7/06 . using expansion or contraction of bodies due to heating, cooling, moistening, drying, or the like (using thermal expansion of non-vaporising liquids F01K)

7/08 . recovering energy derived from swinging, rolling, pitching, or like movements, e.g. from the vibrations of a machine

7/10 . Alleged perpetua mobilia (using hydrostatic thrust F03B 17/04)

F03H PRODUCING A REACTIVE PROPULSIVE THRUST, NOT OTHERWISE PROVIDED FOR (from combustion products F02K)

1/00 Use of plasma to produce a reactive propulsive thrust (generating plasma H05H 1/00)

3/00 Use of photons to produce a reactive propulsive thrust

99/00 Subject matter not provided for in other groups of this subclass [2009.01]

F04 POSITIVE-DISPLACEMENT MACHINES FOR LIQUIDS; PUMPS FOR LIQUIDS OR ELASTIC FLUIDS

Note

Combinations of positive-displacement and non-positive-displacement pumps are classified in subclass F04B as a general subclass for pumps, and in subclasses F04C, F04D in respect of matter specific to those subclasses.

F04B **POSITIVE-DISPLACEMENT MACHINES FOR LIQUIDS**; **PUMPS** (engine fuel-injection pumps F02M; machines for liquids, or pumps, of rotary-piston or oscillating-piston type F04C; non-positive-displacement pumps F04D; pumping of fluid by direct contact of another fluid or by using inertia of fluid to be pumped F04F; crankshafts, crossheads, connecting-rods F16C; flywheels F16F; gearings for interconverting rotary motion and reciprocating motion in general F16H; pistons, piston-rods, cylinders, in general F16J)

(1) In this subclass, the following term is used with the meaning indicated:
– "piston" also covers a plunger.

(2) Attention is drawn to the Notes following the titles of class B81 and subclass B81Brelating to "micro-structural devices" and "micro-structural systems". **[7]**

(3) Attention is drawn to the Notes preceding class F01, especially as regards the definitions of "machines", "pumps", and "positive-displacement".

(4) Machines, pumps or pumping installations having flexible working members are classified in groups F04B 43/00 or F04B 45/00. **[2009.01]**

Subclass index

Pumps for liquids or for liquid and elastic fluids; **Positive-displacement machines for liquids**

1/00 **Multi-cylinder machines or pumps characterised by number or arrangement of cylinders** (F04B 3/00 takes precedence; fluid-driven pumps F04B 9/08; control of reciprocating machines or pumps in general F04B 49/00)

1/02 . having two cylinders (in V-arrangement F04B 1/04)

1/04 . having cylinders in star- or fan-arrangement **[6]**

1/047 . . with an actuating or actuated element at the outer ends of the cylinders **[6]**

1/053 . . with an actuating or actuated element at the inner ends of the cylinders **[6]**

1/06 . . Control

1/07 . . . by varying the relative eccentricity between two members, e.g. a cam and a drive shaft **[6]**

1/08 . . . regulated by delivery pressure

1/10 . . the cylinders being movable, e.g. rotary **[6]**

1/107 . . . with an actuating or actuated element at the outer ends of the cylinders **[6]**

1/113 . . . with an actuating or actuated element at the inner ends of the cylinders **[6]**

1/12 . having cylinder axes coaxial with, or parallel or inclined to, main shaft axis
1/14 . . having stationary cylinders
1/16 . . . having two or more sets of cylinders or pistons
1/18 . . . having self-acting distribution members, i.e. actuated by working fluid
1/20 . . having rotary cylinder block
1/22 . . . having two or more sets of cylinders or pistons
1/24 . . . . inclined to main shaft axis
1/26 . . Control
1/28 . . . for machines or pumps with stationary cylinders
1/29 . . . . by varying the relative positions of a swash plate and a cylinder block **[6]**
1/30 . . . for machines or pumps with rotary cylinder block
1/32 . . . . by varying the relative positions of a swash plate and a cylinder block **[6]**
1/34 . Control not provided for in a single group of groups F04B 1/02 to F04B 1/32 **[6]**

3/00 Machines or pumps with pistons coacting within one cylinder, e.g. multi-stage

5/00 Machines or pumps with differential-surface pistons
5/02 . with double-acting pistons **[6]**

7/00 Piston machines or pumps characterised by having positively-driven valving (with cylinders in star- or fan-arrangement F04B 1/04; with cylinder axes coaxial with, or parallel or inclined to, main shaft axis F04B 1/12)
7/02 . the valving being fluid-actuated
7/04 . in which the valving is performed by pistons and cylinders coacting to open and close intake or outlet ports **[3]**
7/06 . . the pistons and cylinders being relatively reciprocated and rotated **[3]**

9/00 Piston machines or pumps characterised by the driving or driven means to or from their working members
9/02 . the means being mechanical
9/04 . . the means being cams, eccentrics, or pin-and-slot mechanisms (with cylinder axes coaxial with, or parallel or inclined to, main shaft axis F04B 1/12)
9/06 . . the means including spring- or weight-loaded lost-motion devices
9/08 . the means being fluid
9/10 . . the fluid being liquid
9/103 . . . having only one pumping chamber **[6]**
9/105 . . . . reciprocating movement of the pumping member being obtained by a double-acting liquid motor **[6]**
9/107 . . . . rectilinear movement of the pumping member in the working direction being obtained by a single-acting liquid motor, e.g. actuated in the other direction by gravity or a spring **[6]**
9/109 . . . having plural pumping chambers **[6]**
9/111 . . . . with two mechanically connected pumping members **[6]**
9/113 . . . . . reciprocating movement of the pumping members being obtained by a double-acting liquid motor **[6]**
9/115 . . . . . reciprocating movement of the pumping members being obtained by two single-acting liquid motors, each acting in one direction **[6]**
9/117 . . . . the pumping members not being mechanically connected to each other **[6]**
9/12 . . the fluid being elastic, e.g. steam or air
9/123 . . . having only one pumping chamber **[6]**
9/125 . . . . reciprocating movement of the pumping member being obtained by a double-acting elastic-fluid motor **[6]**
9/127 . . . . rectilinear movement of the pumping member in the working direction being obtained by a single-acting elastic-fluid motor, e.g. actuated in the other direction by gravity or a spring **[6]**
9/129 . . . having plural pumping chambers **[6]**
9/131 . . . . with two mechanically connected pumping members **[6]**
9/133 . . . . . reciprocating movement of the pumping members being obtained by a double-acting elastic-fluid motor **[6]**
9/135 . . . . . reciprocating movement of the pumping members being obtained by two single-acting elastic-fluid motors, each acting in one direction **[6]**
9/137 . . . . the pumping members not being mechanically connected to each other **[6]**
9/14 . Pumps characterised by muscle-power operation

11/00 Equalisation of pulses, e.g. by use of air vessels; **Counteracting cavitation**

13/00 Pumps specially modified to deliver fixed or variable measured quantities (for transferring liquid from bulk storage containers or reservoirs into vehicles or into portable containers B67D 7/58)
13/02 . of two or more fluids at the same time

15/00 Pumps adapted to handle specific fluids, e.g. by selection of specific materials for pumps or pump parts
15/02 . the fluids being viscous or non-homogeneous
15/04 . the fluids being hot or corrosive (F04B 15/06 takes precedence)
15/06 . for liquids near their boiling point, e.g. under subnormal pressure
15/08 . . the liquids having low boiling points

17/00 Pumps characterised by combination with, or adaptation to, specific driving engines or motors
17/02 . driven by wind motors
17/03 . driven by electric motors **[6]**
17/04 . . using solenoids **[6]**
17/05 . driven by internal-combustion engines **[6]**
17/06 . Mobile combinations

19/00 Machines or pumps having pertinent characteristics not provided for in, or of interest apart from, groups F04B 1/00 to F04B 17/00
19/02 . having movable cylinders
19/04 . Pumps for special use (for transferring liquids from bulk storage containers or reservoirs into vehicles or into portable containers B67D 7/58)
19/06 . . Pumps for delivery of both liquid and elastic fluids at the same time (wet gas pumps F04B 37/20) **[6]**
19/08 . Scoop devices
19/10 . . of wheel type
19/12 . . of helical or screw type

19/14 . . of endless-chain type, e.g. with the chains carrying pistons co-operating with open-ended cylinders
19/16 . Adhesion-type liquid-lifting devices
19/18 . . Adhesion members therefor
19/20 . Other positive-displacement pumps
19/22 . . of reciprocating-piston type
19/24 . . Pumping by heat expansion of pumped fluid

23/00 Pumping installations or systems (F04B 17/00 takes precedence)
23/02 . having reservoirs
23/04 . Combinations of two or more pumps
23/06 . . the pumps being all of reciprocating positive-displacement type
23/08 . . the pumps being of different types
23/10 . . . at least one pump being of the reciprocating positive-displacement type
23/12 . . . at least one pump being of the rotary-piston positive-displacement type (F04B 23/10 takes precedence)
23/14 . . . at least one pump being of the non-positive-displacement type (F04B 23/10, F04B 23/12 take precedence)

Pumps specially adapted for elastic fluids

25/00 Multi-stage pumps specially adapted for elastic fluids
25/02 . of stepped-piston type
25/04 . having cylinders coaxial with, or parallel or inclined to, main shaft axis

27/00 Multi-cylinder pumps specially adapted for elastic fluids and characterised by number or arrangement of cylinders (F04B 25/00 takes precedence; control of reciprocating machines or pumps in general F04B 49/00)
27/02 . having cylinders arranged oppositely relative to main shaft
27/04 . having cylinders in star- or fan-arrangement **[6]**
27/047 . . with an actuating element at the outer ends of the cylinders **[6]**
27/053 . . with an actuating element at the inner ends of the cylinders **[6]**
27/06 . . the cylinders being movable, e.g. rotary
27/067 . . Control **[6]**
27/073 . . . by varying the relative eccentricity between two members, e.g. a cam and a drive shaft **[6]**
27/08 . having cylinders coaxial with, or parallel or inclined to, main shaft axis
27/10 . . having stationary cylinders **[6]**
27/12 . . . having plural sets of cylinders or pistons **[6]**
27/14 . . Control **[6]**
27/16 . . . of pumps with stationary cylinders **[6]**
27/18 . . . . by varying the relative positions of a swash plate and a cylinder block **[6]**
27/20 . . . of pumps with rotary cylinder block **[6]**
27/22 . . . . by varying the relative positions of a swash plate and a cylinder block **[6]**
27/24 . Control not provided for in a single group of groups F04B 27/02 to F04B 27/22 **[6]**

31/00 Free-piston pumps specially adapted for elastic fluids; **Systems incorporating such pumps** (muscle-driven pumps in which the stroke is not defined by gearing F04B 33/00; free-piston combustion engines, free-piston gas generators F02B 71/00; systems predominated by prime mover aspects, see the relevant class for the prime mover)

33/00 Pumps specially adapted for elastic fluids actuated by muscle power, e.g. for inflating
33/02 . with intermediate gearing

35/00 Piston pumps specially adapted for elastic fluids and characterised by the driving means to their working members, or by combination with, or adaptation to, specific driving engines or motors, not otherwise provided for (predominant aspects of the engines or motors, see the relevant classes)
35/01 . the means being mechanical **[6]**
35/02 . the means being fluid
35/04 . the means being electric
35/06 . Mobile combinations

37/00 Pumps specially adapted for elastic fluids and having pertinent characteristics not provided for in, or of interest apart from, groups F04B 25/00 to F04B 35/00
37/02 . for evacuating by absorption or adsorption (absorption or adsorption in general B01J)
37/04 . . Selection of specific absorption or adsorption materials
37/06 . for evacuating by thermal means
37/08 . . by condensing or freezing, e.g. cryogenic pumps (cold traps B01D 8/00)
37/10 . for special use (F04B 37/02, F04B 37/06 take precedence)
37/12 . . to obtain high pressure
37/14 . . to obtain high vacuum
37/16 . . . Means for nullifying unswept space
37/18 . . for specific elastic fluids
37/20 . . . for wet gases, e.g. wet air

39/00 Component parts, details, or accessories, of pumps or pumping systems specially adapted for elastic fluids, not otherwise provided for in, or of interest apart from, groups F04B 25/00 to F04B 37/00 (for controlling F04B 49/00)
39/02 . Lubrication (of machines or engines in general F01M)
39/04 . Measures to avoid lubricant contaminating the pumped fluid
39/06 . Cooling (of machines or engines in general F01P); Heating; Prevention of freezing
39/08 . Actuation of distribution members
39/10 . Adaptation or arrangement of distribution members
39/12 . Casings (casings for machines or engines in general F16M); Cylinders; Cylinder heads; Fluid connections
39/14 . Provisions for readily assembling or disassembling
39/16 . Filtration; Moisture separation

41/00 Pumping installations or systems specially adapted for elastic fluids (F04B 31/00, F04B 35/00 take precedence)
41/02 . having reservoirs
41/04 . Conversion of internal-combustion engine cylinder units to pumps
41/06 . Combinations of two or more pumps

Machines or pumps having flexible working members

43/00 Machines, pumps, or pumping installations having flexible working members (pumps or pumping installations specially adapted for elastic fluids F04B 45/00)
43/02 . having plate-like flexible members, e.g. diaphragms (F04B 43/14 takes precedence) **[3]**
43/04 . . Pumps having electric drive

43/06 . . Pumps having fluid drive
43/067 . . . the fluid being actuated directly by a piston **[6]**
43/073 . . . the actuating fluid being controlled by at least one valve **[6]**
43/08 . having tubular flexible members (F04B 43/12 takes precedence)
43/09 . . Pumps having electric drive **[6]**
43/10 . . Pumps having fluid drive
43/107 . . . the fluid being actuated directly by a piston **[6]**
43/113 . . . the actuating fluid being controlled by at least one valve **[6]**
43/12 . having peristaltic action
43/14 . . having plate-like flexible members **[3]**

45/00 Pumps or pumping installations having flexible working members and specially adapted for elastic fluids

45/02 . having bellows
45/027 . . having electric drive **[6]**
45/033 . . having fluid drive **[6]**
45/04 . having plate-like flexible members, e.g. diaphragms (F04B 45/10 takes precedence) **[3]**
45/047 . . Pumps having electric drive **[6]**
45/053 . . Pumps having fluid drive **[6]**
45/06 . having tubular flexible members (F04B 45/02, F04B 45/08 take precedence) **[3]**
45/067 . . Pumps having electric drive **[6]**
45/073 . . Pumps having fluid drive **[6]**
45/08 . having peristaltic action **[3]**
45/10 . . having plate-like flexible members **[3]**

47/00 Pumps or pumping installations specially adapted for raising fluids from great depths, e.g. well pumps (by using positive or negative pressurised fluid medium acting directly on the liquid to be pumped F04F 1/00)

47/02 . the driving mechanisms being situated at ground level (F04B 47/12 takes precedence)
47/04 . . the driving means incorporating fluid means
47/06 . having motor-pump units situated at great depth
47/08 . . the motors being actuated by fluid
47/10 . . . the units or parts thereof being liftable to ground level by fluid pressure
47/12 . having free plunger lifting the fluid to the surface
47/14 . Counterbalancing

49/00 Control of, or safety measures for, machines, pumps, or pumping installations, not otherwise provided for in, or of interest apart from, groups F04B 1/00 to F04B 47/00

49/02 . Stopping, starting, unloading, or idling control (controlled electrically F04B 49/06) **[6]**
49/025 . . by means of floats **[6]**
49/03 . . by means of valves **[6]**
49/035 . . . Bypassing **[6]**
49/04 . Regulating by means of floats (F04B 49/025 takes precedence) **[6]**
49/06 . Control using electricity (regulating by means of floats actuating electric switches F04B 49/04)
49/08 . Regulating by delivery pressure
49/10 . Other safety measures
49/12 . by varying the length of stroke of the working members **[6]**
49/14 . . Adjusting abutments located in the path of reciprocation **[6]**
49/16 . by adjusting the capacity of dead spaces of working chambers **[6]**
49/18 . by changing the effective cross-section of the working surface of the piston **[6]**
49/20 . by changing the driving speed (controlled electrically F04B 49/06) **[6]**
49/22 . by means of valves (F04B 49/03 takes precedence) **[6]**
49/24 . . Bypassing **[6]**

51/00 Testing machines, pumps, or pumping installations

53/00 Component parts, details or accessories not provided for in, or of interest apart from, groups F04B 1/00 to F04B 23/00 or F04B 39/00 to F04B 47/00 [6]

53/02 . Packing the free space between cylinders and pistons **[6]**
53/04 . Draining **[6]**
53/06 . Venting **[6]**
53/08 . Cooling (of machines or engines in general F01P); Heating; Preventing freezing **[6]**
53/10 . Valves; Arrangement of valves **[6]**
53/12 . . arranged in or on pistons **[6]**
53/14 . Pistons, piston-rods or piston-rod connections **[6]**
53/16 . Casings; Cylinders; Cylinder liners or heads; Fluid connections **[6]**
53/18 . Lubricating (of machines or engines in general F01M) **[6]**
53/20 . Filtering **[6]**
53/22 . Arrangements for enabling ready assembly or disassembly **[6]**

F04C **ROTARY-PISTON, OR OSCILLATING-PISTON, POSITIVE-DISPLACEMENT MACHINES FOR LIQUIDS** (engines driven by liquids F03C); **ROTARY-PISTON, OR OSCILLATING-PISTON, POSITIVE-DISPLACEMENT PUMPS** (engine fuel-injection pumps F02M)

Note

Attention is drawn to the Notes preceding class F01, especially as regards the definitions of “machines”, “pumps”, “positive displacement”, “rotary-piston machines”, “oscillating-piston machines”, “rotary piston”, “co-operating members”, “movement of co-operating members”, “teeth or tooth-equivalents”, and “internal axis”.

Subclass index

***Machines for liquids*; *Pumps for liquids or for liquids and elastic fluids* [2011.01]**

2/00 **Rotary-piston machines or pumps** (with non-parallel axes of co-operating members F04C 3/00; with the working-chamber walls at least partly resiliently deformable F04C 5/00; with fluid ring or the like F04C 7/00; rotary-piston pumps specially adapted for elastic fluids F04C 18/00, F04C 19/00; rotary-piston machines or pumps in which the working-fluid is exclusively displaced by, or exclusively displaces, one or more reciprocating pistons F04B) **[3]**

Note

Group F04C 2/30 takes precedence over groups F04C 2/02 to F04C 2/24. **[3]**

2/02 . of arcuate-engagement type, i.e. with circular translatory movement of co-operating members, each member having the same number of teeth or tooth-equivalents **[3]**

2/04 . . of internal-axis type **[3]**

2/06 . . of other than internal-axis type (F04C 2/063 takes precedence) **[3]**

2/063 . . with coaxially-mounted members having continuously-changing circumferential spacing between them **[3]**

2/067 . . . having cam-and-follower type drive **[3]**

2/07 . . . having crankshaft-and-connecting-rod type drive **[3]**

2/073 . . . having pawl-and-ratchet type drive **[3]**

2/077 . . . having toothed-gearing type drive **[3]**

2/08 . of intermeshing-engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing **[3]**

2/10 . . of internal-axis type with the outer member having more teeth or tooth-equivalents, e.g. rollers, than the inner member **[3]**

2/107 . . . with helical teeth **[3]**

2/113 . . . the inner member carrying rollers intermeshing with the outer member **[3]**

2/12 . . of other than internal-axis type **[3]**

2/14 . . . with toothed rotary pistons **[3]**

2/16 . . . . with helical teeth, e.g. chevron-shaped, screw type **[3]**

2/18 . . . . with similar tooth forms (F04C 2/16 takes precedence) **[3]**

2/20 . . . . with dissimilar tooth forms (F04C 2/16 takes precedence) **[3]**

2/22 . of internal-axis type with equidirectional movement of co-operating members at the points of engagement, or with one of the co-operating members being stationary, the inner member having more teeth or tooth-equivalents than the outer member **[3]**

2/24 . of counter-engagement type, i.e. the movement of co-operating members at the points of engagement being in opposite directions **[3]**

2/26 . . of internal-axis type **[3]**

2/28 . . of other than internal-axis type **[3]**

2/30 . having the characteristics covered by two or more of groups F04C 2/02, F04C 2/08, F04C 2/22, F04C 2/24 or having the characteristics covered by one of these groups together with some other type of movement between co-operating members **[3]**

2/32 . . having both the movement defined in group F04C 2/02 and relative reciprocation between the co-operating members **[3]**

2/324 . . . with vanes hinged to the inner member and reciprocating with respect to the outer member **[3]**

2/328 . . . . and hinged to the outer member **[3]**

2/332 . . . with vanes hinged to the outer member and reciprocating with respect to the inner member **[3]**

2/336 . . . . and hinged to the inner member **[3]**

2/34 . . having the movement defined in group F04C 2/08 or F04C 2/22 and relative reciprocation between the co-operating members **[3]**

2/344 . . . with vanes reciprocating with respect to the inner member **[3]**

2/348 . . . . the vanes positively engaging, with circumferential play, an outer rotatable member **[3]**

2/352 . . . . the vanes being pivoted on the axis of the outer member **[3]**

2/356 . . . with vanes reciprocating with respect to the outer member **[3]**

2/36 . . having both the movements defined in groups F04C 2/22 and F04C 2/24 **[3]**

2/38 . . having the movement defined in group F04C 2/02 and having a hinged member (F04C 2/32 takes precedence) **[3]**

2/39 . . . with vanes hinged to the inner as well as to the outer member **[3]**

2/40 . . having the movement defined in group F04C 2/08 or F04C 2/22 and having a hinged member **[3]**

2/44 . . . with vanes hinged to the inner member **[3]**

2/46 . . . with vanes hinged to the outer member **[3]**

3/00 **Rotary-piston machines or pumps, with non-parallel axes of movement of co-operating members, e.g. of screw type** (with the working-chamber walls at least partly resiliently deformable F04C 5/00; rotary-piston pumps with non-parallel axes of movement of co-operating members specially adapted for elastic fluids F04C 18/48)

3/02 . the axes being arranged at an angle of 90 degrees **[5]**

3/04 . . of intermeshing engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing **[5]**

3/06 . the axes being arranged otherwise than at an angle of 90 degrees **[5]**

3/08 . . of intermeshing engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing **[5]**

5/00 **Rotary-piston machines or pumps with the working-chamber walls at least partly resiliently deformable** (such pumps specially adapted for elastic fluids F04C 18/00)

7/00 **Rotary-piston machines or pumps with fluid ring or the like** (such pumps specially adapted for elastic fluids F04C 19/00)

9/00 **Oscillating-piston machines or pumps** (such pumps specially adapted for elastic fluids F04C 21/00)

11/00 **Combinations of two or more machines or pumps, each being of rotary-piston or oscillating-piston type** (combinations of such pumps specially adapted for elastic fluids F04C 23/00); **Pumping installations** (F04C 13/00 takes precedence; specially adapted for elastic fluids F04C 23/00; fluid gearing F16H 39/00 to F16H 47/00)

13/00 **Adaptations of machines or pumps for special use, e.g. for extremely high pressures** (of pumps specially adapted for elastic fluids F04C 25/00)

14/00 **Control of, monitoring of, or safety arrangements for, machines, pumps or pumping installations** (of pumps or pumping installations specially adapted for elastic fluids F04C 28/00) **[8]**

14/02 . specially adapted for several machines or pumps connected in series or in parallel **[8]**

14/04 . specially adapted for reversible machines or pumps **[8]**

14/06 . specially adapted for stopping, starting, idling or no-load operation **[8]**

14/08 . characterised by varying the rotational speed **[8]**

14/10 . characterised by changing the positions of the inlet or outlet openings with respect to the working chamber **[8]**

14/12 . . using sliding valves **[8]**

14/14 . . using rotating valves **[8]**

14/16 . . using lift valves **[8]**

14/18 . characterised by varying the volume of the working chamber (by changing the positions of inlet or outlet openings F04C 14/10) **[8]**

14/20 . . by changing the form of the inner or outer contour of the working chamber **[8]**

14/22 . . by changing the eccentricity between cooperating members **[8]**

14/24 . characterised by using valves regulating pressure or flow rate, e.g. discharge valves (F04C 14/10 takes precedence) **[8]**

14/26 . . using bypass channels **[8]**

14/28 . Safety arrangements; Monitoring **[8]**

15/00 **Component parts, details or accessories of machines, pumps or pumping installations, not provided for in groups F04C 2/00 to F04C 14/00** (of pumps specially adapted for elastic fluids F04C 18/00 to F04C 29/00) **[1,8]**

15/06 . Arrangements for admission or discharge of the working fluid, e.g. constructional features of the inlet or outlet **[8]**

Pumps specially adapted for elastic fluids

18/00 **Rotary-piston pumps specially adapted for elastic fluids** (with fluid ring or the like F04C 19/00; rotary-piston pumps in which the working-fluid is exclusively displaced by one or more reciprocating pistons F04B) **[3]**

Note

Group F04C 18/30 takes precedence over groups F04C 18/02 to F04C 18/24. **[3,5]**

18/02 . of arcuate-engagement type, i.e. with circular translatory movement of co-operating members, each member having the same number of teeth or tooth-equivalents **[3]**

18/04 . . of internal-axis type **[3]**

18/06 . . of other than internal-axis type (F04C 18/063 takes precedence) **[3]**
18/063 . . with coaxially-mounted members having continuously-changing circumferential spacing between them **[3]**
18/067 . . . having cam-and-follower type drive **[3]**
18/07 . . . having crankshaft-and-connecting-rod type drive **[3]**
18/073 . . . having pawl-and-ratchet type drive **[3]**
18/077 . . . having toothed-gearing type drive **[3]**
18/08 . of intermeshing-engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing **[3]**
18/10 . . of internal-axis type with the outer member having more teeth or tooth-equivalents, e.g. rollers, than the inner member **[3]**
18/107 . . . with helical teeth **[3]**
18/113 . . . the inner member carrying rollers intermeshing with the outer member **[3]**
18/12 . . of other than internal-axis type **[3]**
18/14 . . . with toothed rotary pistons **[3]**
18/16 . . . . with helical teeth, e.g. chevron-shaped, screw type **[3]**
18/18 . . . . with similar tooth forms (F04C 18/16 takes precedence) **[3]**
18/20 . . . . with dissimilar tooth forms (F04C 18/16 takes precedence) **[3]**
18/22 . of internal-axis type with equidirectional movement of co-operating members at the points of engagement, or with one of the co-operating members being stationary, the inner member having more teeth or tooth-equivalents than the outer member **[3]**
18/24 . of counter-engagement type, i.e. the movement of co-operating members at the points of engagement being in opposite directions **[3]**
18/26 . . of internal-axis type **[3]**
18/28 . . of other than internal-axis type **[3]**
18/30 . having the characteristics covered by two or more of groups F04C 18/02, F04C 18/08, F04C 18/22, F04C 18/24, F04C 18/48, or having the characteristics covered by one of these groups together with some other type of movement between co-operating members **[3]**
18/32 . . having both the movement defined in group F04C 18/02 and relative reciprocation between the co-operating members **[3]**
18/324 . . . with vanes hinged to the inner member and reciprocating with respect to the outer member **[3]**
18/328 . . . . and hinged to the outer member **[3]**
18/332 . . . with vanes hinged to the outer member and reciprocating with respect to the inner member **[3]**
18/336 . . . . and hinged to the inner member **[3]**
18/34 . . having the movement defined in group F04C 18/08 or F04C 18/22 and relative reciprocation between the co-operating members **[3]**
18/344 . . . with vanes reciprocating with respect to the inner member **[3]**
18/348 . . . . the vanes positively engaging, with circumferential play, an outer rotatable member **[3]**
18/352 . . . . the vanes being pivoted on the axis of the outer member **[3]**
18/356 . . . with vanes reciprocating with respect to the outer member **[3]**
18/36 . . having both the movements defined in groups F04C 18/22 and F04C 18/24 **[3]**
18/38 . . having the movement defined in group F04C 18/02 and having a hinged member (F04C 18/32 takes precedence) **[3]**
18/39 . . . with vanes hinged to the inner as well as to the outer member **[3]**
18/40 . . having the movement defined in group F04C 18/08 or F04C 18/22 and having a hinged member **[3]**
18/44 . . . with vanes hinged to the inner member **[3]**
18/46 . . . with vanes hinged to the outer member **[3]**
18/48 . Rotary-piston pumps with non-parallel axes of movement of co-operating members **[5]**

Note

Group F04C 18/30 takes precedence over group F04C 18/48. **[8]**

18/50 . . the axes being arranged at an angle of 90 degrees **[5]**
18/52 . . . of intermeshing engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing **[5]**
18/54 . . the axes being arranged otherwise than at an angle of 90 degrees **[5]**
18/56 . . . of intermeshing engagement type, i.e. with engagement of co-operating members similar to that of toothed gearing **[5]**

19/00 Rotary-piston pumps with fluid ring or the like, specially adapted for elastic fluids

21/00 Oscillating-piston pumps specially adapted for elastic fluids

23/00 Combinations of two or more pumps, each being of rotary-piston or oscillating-piston type, specially adapted for elastic fluids; **Pumping installations specially adapted for elastic fluids**; **Multi-stage pumps specially adapted for elastic fluids**
(F04C 25/00 takes precedence)
23/02 . Pumps characterised by combination with, or adaptation to, specific driving engines or motors (predominant aspects of the engines or motors, see the relevant classes)

25/00 Adaptations for special use of pumps for elastic fluids
25/02 . for producing high vacuum (sealing arrangements F04C 27/00; silencing F04C 29/06)

27/00 Sealing arrangements in rotary-piston pumps specially adapted for elastic fluids
27/02 . Liquid sealing for high-vacuum pumps

28/00 Control of, monitoring of, or safety arrangements for, pumps or pumping installations specially adapted for elastic fluids [8]
28/02 . specially adapted for several pumps connected in series or in parallel **[8]**
28/04 . specially adapted for reversible pumps **[8]**
28/06 . specially adapted for stopping, starting, idling or no-load operation **[8]**
28/08 . characterised by varying the rotational speed **[8]**

28/10 . characterised by changing the positions of the inlet or outlet openings with respect to the working chamber **[8]**
28/12 . . using sliding valves **[8]**
28/14 . . using rotating valves **[8]**
28/16 . . using lift valves **[8]**
28/18 . characterised by varying the volume of the working chamber (by changing the positions of inlet or outlet openings F04C 28/10) **[8]**
28/20 . . by changing the form of the inner or outer contour of the working chamber **[8]**
28/22 . . by changing the eccentricity between cooperating members **[8]**
28/24 . characterised by using valves regulating pressure or flow rate, e.g. discharge valves (F04C 28/10 takes precedence) **[8]**
28/26 . . using bypass channels **[8]**
28/28 . Safety arrangements; Monitoring **[8]**

29/00 Component parts, details, or accessories, of pumps or pumping installations specially adapted for elastic fluids, not provided for in groups F04C 18/00 to F04C 28/00
29/02 . Lubrication; Lubricant separation
29/04 . Heating; Cooling; Heat insulation
29/06 . Silencing
29/12 . Arrangements for admission or discharge of the working fluid, e.g. constructional features of the inlet or outlet **[8]**

F04D NON-POSITIVE-DISPLACEMENT PUMPS (engine fuel-injection pumps F02M)

(1) This subclass covers non-positive-displacement pumps for liquids, for elastic fluids, or for liquids and elastic fluids whether rotary or not having pure rotation.
(2) This subclass does not cover combinations of non-positive-displacement pumps with other pumps, which are covered by subclass F04B, except that the use of such other pumps for priming or boosting non-positive-displacement is covered by this subclass.
(3) Attention is drawn to the Notes preceding class F01, especially as regards the definition of "pump".

Subclass index

1/00 Radial-flow pumps, e.g. centrifugal pumps; **Helico-centrifugal pumps** (adapted for pumping specific fluids F04D 7/00; priming or boosting F04D 9/00; pumping liquids and elastic fluids at the same time F04D 31/00)
1/02 . having non-centrifugal stages, e.g. centripetal
1/04 . Helico-centrifugal pumps
1/06 . Multi-stage pumps (F04D 1/02 takes precedence)
1/08 . . the stages being situated concentrically
1/10 . . with means for changing the flow-path through the stages, e.g. series/parallel
1/12 . Pumps with scoops or like paring members protruding in the fluid circulating in a bowl
1/14 . Pumps raising fluids by centrifugal force within a conical rotary bowl with vertical axis

3/00 Axial-flow pumps (priming or boosting F04D 9/00; pumping liquids and elastic fluids at the same time F04D 31/00)
3/02 . of screw type

5/00 Pumps with circumferential or transverse flow (pumping liquids and elastic fluids at the same time F04D 31/00)

7/00 Pumps adapted for handling specific fluids, e.g. by selection of specific materials for pumps or pump parts (pumping liquids and elastic fluids at the same time F04D 31/00)
7/02 . of centrifugal type
7/04 . . the fluids being viscous or non-homogeneous
7/06 . . the fluids being hot or corrosive, e.g. liquid metal
7/08 . . the fluids being radioactive

9/00 Priming; **Preventing vapour lock**
9/02 . Self-priming pumps
9/04 . using priming pumps; using booster pumps to prevent vapour lock
9/06 . . of jet type

11/00 Other rotary non-positive-displacement pumps (pumping installations or systems F04D 13/00; pumping liquids and elastic fluids at the same time F04D 31/00)

13/00 **Pumping installations or systems** (controlling F04D 15/00; pumping liquids and elastic fluids at the same time F04D 31/00)

13/02 . Units comprising pumps and their driving means (predominant aspects of the driving means, see the relevant classes for such means)

13/04 . . the pump being fluid-driven

13/06 . . the pump being electrically driven

13/08 . . . for submerged use

13/10 . . . . adapted for use in mining bore holes

13/12 . Combinations of two or more pumps (combinations with priming pumps or booster pumps to counter-act vapour lock F04D 9/04)

13/14 . . the pumps being all of centrifugal type

13/16 . with storage reservoirs

15/00 **Control, e.g. regulation, of pumps, pumping installations, or systems**

15/02 . Stopping of pumps, or operating valves, on occurrence of unwanted conditions

Rotary pumps specially adapted for elastic fluids

17/00 **Radial-flow pumps specially adapted for elastic fluids, e.g. centrifugal pumps**; **Helico-centrifugal pumps specially adapted for elastic fluids** (F04D 21/00 takes precedence)

17/02 . having non-centrifugal stages, e.g. centripetal

17/04 . . of transverse-flow type

17/06 . Helico-centrifugal pumps

17/08 . Centrifugal pumps

17/10 . . for compressing or evacuating

17/12 . . . Multi-stage pumps

17/14 . . . . with means for changing the flow-path through the stages, e.g. series/parallel (surge control F04D 27/02)

17/16 . . for displacing without appreciable compression

17/18 . . characterised by use of centrifugal force of liquids entrained in pumps

19/00 **Axial-flow pumps specially adapted for elastic fluids** (F04D 21/00 takes precedence)

19/02 . Multi-stage pumps

19/04 . . specially adapted to the production of a high vacuum, e.g. molecular pumps

21/00 **Pumps specially adapted for elastic fluids involving supersonic speed of pumped fluids**

23/00 **Other rotary non-positive-displacement pumps specially adapted for elastic fluids** (pumping installations or systems F04D 25/00)

25/00 **Pumping installations or systems specially adapted for elastic fluids** (controlling F04D 27/00)

25/02 . Units comprising pumps and their driving means (predominant aspects of the driving means, see the relevant classes for such means)

25/04 . . the pump being fluid-driven

25/06 . . the pump being electrically driven (F04D 25/08 takes precedence)

25/08 . . the working fluid being air, e.g. for ventilation

25/10 . . . the unit having provisions for automatically changing the direction of output air

25/12 . . . the unit being adapted for mounting in apertures

25/14 . . . . and having shutters, e.g. automatically closed when not in use

25/16 . Combinations of two or more pumps

27/00 **Control, e.g. regulation, of pumps, pumping nstallations or pumping systems specially adapted for elastic fluids**

27/02 . Surge control

29/00 **Details, component parts, or accessories** (machine elements in general F16)

29/02 . Selection of particular materials (for handling specific liquids F04D 7/00)

29/04 . Shafts or bearings, or assemblies thereof (specially adapted for elastic fluid pumps F04D 29/05) **[1,8]**

29/041 . . Axial thrust balancing **[8]**

29/042 . . Axially shiftable rotors (F04D 29/041 takes precedence) **[8]**

29/043 . . Shafts **[8]**

29/044 . . . Arrangements for joining or assembling shafts **[8]**

29/046 . . Bearings **[8]**

29/047 . . . hydrostatic; hydrodynamic **[8]**

29/048 . . . magnetic; electromagnetic **[8]**

29/049 . . . Roller bearings **[8]**

29/05 . Shafts or bearings, or assemblies therof, specially adapted for elastic fluid pumps **[8]**

29/051 . . Axial thrust balancing **[8]**

29/052 . . Axially shiftable rotors (F04D 29/051 takes precedence) **[8]**

29/053 . . Shafts **[8]**

29/054 . . . Arrangements for joining or assembling shafts **[8]**

29/056 . . Bearings **[8]**

29/057 . . . hydrostatic; hydrodynamic **[8]**

29/058 . . . magnetic; electromagnetic **[8]**

29/059 . . . Roller bearings **[8]**

29/06 . Lubrication **[1,8]**

29/063 . . specially adapted for elastic fluid pumps **[8]**

29/08 . Sealings

29/10 . . Shaft sealings

29/12 . . . using sealing-rings

29/14 . . . operative only when pump is inoperative

29/16 . . between pressure and suction sides

29/18 . Rotors (specially adapted for elastic fluids F04D 29/26)

29/20 . . Mounting rotors on shafts

29/22 . . specially for centrifugal pumps

29/24 . . . Vanes

29/26 . Rotors specially adapted for elastic fluids

29/28 . . for centrifugal or helico-centrifugal pumps

29/30 . . . Vanes

29/32 . . for axial-flow pumps

29/34 . . . Blade mountings

29/36 . . . . adjustable

29/38 . . . Blades

29/40 . Casings; Connections for working fluid

29/42 . . for radial or helico-centrifugal pumps

29/44 . . . Fluid-guiding means, e.g. diffusers

29/46 . . . . adjustable

29/48 . . . . . for unidirectional fluid flow in reversible pumps

29/50 . . . . . for reversing fluid flow

29/52 . . for axial pumps

29/54 . . . Fluid-guiding means, e.g. diffusers

29/56 . . . . adjustable
